PwC and SAP in the world

SAP®’s portfolio of state-of-the-art business applications is vital for your business on-going growth, speeding the innovation processes and creating meaningful value for the business. However, managing performance improvement throughout the organization and supporting the SAP environment requires the strategic integration of the SAP solutions’ components with leading practices in the industry and critical processes, particularly for transformation initiatives in large organizations.

PwC and SAP work collaboratively to help their clients align SAP technologies and their applications with the business’ strategic objectives and strategies, and also to guide the financial, operating, technical and regulatory compliance challenges, while helping organizations to obtain maximum return from their SAP investments.

Our Global Alliance with SAP

As one of the few Global Service Partners, PwC works jointly with SAP to help our clients in their business transformation initiatives that bring improvements to their performance throughout the company (including clients and suppliers), and provides support for the SAP environment.

PwC and SAP hold a long-lasting strategic alliance and together have completed hundreds of successful projects in a broad number of industries.

Our global practice has a network of over **3.600 SAP consultants**, specializing per industry and with practical knowledge of ERP, GRC and EPM.

We also have **3 development centers** in India and China which allow us to optimize our capabilities in local markets where we are aware that PwC professionals are recognized as expert consultants and leaders in matters regarding Finance, Performance Management, Governance and Risk.

SAP Consulting Services

Global Capabilities

At PwC we offer impartial and objective advisory to our SAP clients, based on what works best for their business. We work with you in several ways: we can help you develop a business case for change, we can guide you through the selection process of suitable technology and then help you get the most out of it.

For this reason, our SAP capabilities are an integral part of our teams that help transform organizations. Our consultants not only are SAP experts, they also have practical experience and industry experience as well. These specialists support our transformation proposals combining local, regional and global knowledge.
