

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. PricewaterhouseCoopers: Mining Deals* 2008 Annual Review - Mergers and acquisitions activity in the mining market - all published transactions

Mining Deals 2008 is based on published transactions from the Dealogic 'M&A Global' database, December 2008. Analysis encompasses announced deals, including those pending financial and legal closure and those which are completed. Deal values are the consideration value announced or reported including any assumption of debt and liabilities. Figures relate to actual stake purchased and are not multiplied up to 100%. The geographical split of the deals refers to the location of the purchased asset(s). Where this is not clearly identified or relates to multiple geographical regions, the deal region is stated based on the location of the target company. The analysis relates to the extractive mining sector and therefore excludes related sectors such as the steel industry and metals trading sectors. The sector and subsectors analysed include: precious metals (e.g. gold, silver, platinum), base metals (e.g. iron ore, nickel, copper, aluminium), diversified (companies with a wide range of mining activities across subsectors) and other (includes coal, uranium, mineral sands, mining services). Throughout the report, both for 2008 and previous years, we classify the Russian Federation, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan and Armenia as 'Russia and the Commonwealth of Independent States (CIS)'. A full list of transactions throughout 2008 is available by visiting the Mining Deals website at www.pwc.com/miningdeals.

No.	Value of transaction (US\$m)	Date announced	Target Name	Target Nationality	Bidder Name	Bidder Nationality	Geography	Type	Sector
