

# Simpler solutions to complex security problems

## Our Team

PricewaterhouseCoopers in Mauritius has a team of professionals that can provide you advice on information technology and information security. We have worked on various related assignments including information security strategy, auditing, information security assessment, implementing and auditing information security management systems, in both public and private sector entities.

Our deep understanding of information technology paired with our experience in this area allows us to identify critical issues and develop recommendations to improve them.

# Consulting Information Security Services

## Making IT Security a business Enabler

In today's economy, as network boundaries blur, the outside threat increases because access to information is needed at anytime, anywhere.

On the other hand, the necessity of achieving adequate information security is continually raised by new regulations, new applications, systems and web enabled business solutions.

For this reason, information security is the cornerstone of a company's ability to function and is closely tied in with the company's growth.

PricewaterhouseCoopers can assist your organisation to manage all aspects of information protection. We provide services that will allow your strategy to respond to existing and future business requirements.

How do I align security with my business needs?

How do I comply with data privacy requirements?

How do I identify threats to my business?
