

Expand your approach to pension risk

Investment Director | London | Six figure package

With pensions impacting every aspect of corporate life, managing today's pension challenges demands a complete understanding of business. We have it - and our Pension Capital Management team is thriving as a result. Supported by experts in everything from pensions actuarial and investment to accounting, tax, reward, corporate finance and credit analysis, the team offers clients specialist advice that's joined up, all-embracing and uniquely commercial.

We provide a total risk-management framework that allows clients to pinpoint, and therefore control, the risks and impact of decisions around pensions. As a high-profile director in a globally-renowned firm, you will become part of a team that delivers unrivalled outcomes. Focusing on modelling and controlling investment risks, you'll advise

trustees and sponsoring employers of UK defined benefit pension schemes on the investment of pension plan assets. You might have worked in investment banking, insurance, or investment management. But whatever your background, a wide-ranging understanding of the pensions industry is essential. As a result, you'll have the consultative skills, networks and acumen required to promote our services with flair, confidence and credibility.

There are two ways you can find out more about our team at PwC:
