Explanation of columns

Column 2: Individuals and companies not qualifying as parents are subject to the WHT rates for dividends as indicated in this column.

Columns 3 and 4: Column 3 indicates the WHT rate for dividends paid to a foreign 'parent' company. To be considered as a parent company, the foreign company must hold a specified percentage of the French company's share capital or voting rights. These minimum percentages range from 0% to 50%, as indicated in Column 4, and certain other conditions must be met (see each treaty). If no percentage is indicated, either no minimum shareholding is required or the tax treaty does not reduce the WHT rate of 30%.

No WHT is levied on dividends paid by a French company to an EU parent or to a parent company of Iceland, Liechtenstein, or Norway that is subject to CIT, provided all the following conditions are met:

- The parent company has held a minimum percentage of the share capital of the distributing company, directly and continuously, for at least two years. As of 1 January 2009, the participation required is 10%.
- The parent company is the effective beneficiary of the dividends.
- The parent company has its effective seat of management in an EU state and is not deemed to be domiciled outside the European Union under an applicable tax treaty.
- The parent company is one of the legal forms enumerated by the relevant Directive.
- The parent company is subject to CIT in the member state where it has its effective seat of management.
- There is an anti-avoidance rule.

Column 5: The tax mechanism has been changed so as to exempt the interest from WHT in France except where the interest is paid to an entity established in a non-cooperative state or territory (WHT at a rate of 75% applicable). The payer can, however, be exempt if one proves that the main purpose and effect of such a payment is not to take advantage of locating the income in such a jurisdiction.

These provisions apply to income paid as of 1 March 2010. A special provision applies to loans entered into outside of France by French companies and some investments funds prior to this date. Interest paid on these loans and on related loans after 1 March 2010 will continue to be exempt.

Column 6: There is no requirement to withhold income tax on royalties paid to EU companies if all the following conditions are met:

- The taxpayer is a French resident company or a French PE of a company resident in another EU member state.
- The recipient of the income is an EU resident company.
- The taxpayer and the recipient are at least 25% associates, which means that either one directly holds 25% or more of the share capital or voting rights in the other, or a third party directly holds 25% or more of the capital or voting rights in them both.

Column 7: WHT is automatically imposed on after-tax profits of a PE unless certain conditions are met. The rate is 25% or the reduced tax treaty rate.

Notes

1. See explanation of Columns 3 and 4.
2. Exceptions where the dividends are excluded from the taxable income of the company that has received the dividends.
3. A rate of 15% is applicable for dividends distributed by certain companies.
4. The 1929-type Luxembourg holding companies are not entitled to any of the benefits of the France-Luxembourg tax treaty.
5. A 25% rate applies if dividends are not included in the income taxed to either corporate or income tax.
6. No WHT applies if dividends are taxable in Morocco.
7. The 5% rate applies to dividends when three conditions are fulfilled, as follows: (1) the effective recipient of the dividends must have invested at least EUR 76,224.51 in the company that pays these dividends; (2) the recipient must be a company liable for CIT; and (3) the latter company must be exempt from CIT. The rate is 10% when only condition (1) or conditions (2 and 3) are fulfilled. In all other cases, the rate is 15%.
8. An addendum signed on 22 July 1997 modifies the provisions of the French-Swiss tax treaty relating to dividends, interest, and royalties, and provides for the removal of the 5% WHT on profits realised by French PE of Swiss resident companies.
9. The rate indicated applies to Swiss resident companies controlled by Swiss residents.
10. The rate indicated applies to Swiss resident companies that are controlled by non-Swiss residents (non-UE) (Article 11.2.b ii) and meet the conditions of Article 14 of the tax treaty. In the case of column 3, the 15% rate applies to these companies, provided both the recipient and the distributing company are not quoted on a stock exchange. If these conditions are not met, the tax exemption applies.
11. The rate indicated applies to Swiss resident companies controlled by non-Swiss residents but not complying with Article 14 of the tax treaty.
12. The 5% rate applies to gross dividends if the effective recipient is a Ukrainian company that holds, directly or indirectly, at least 10% of the French company's capital. The rate is 0% if the participation exceeds 50% and EUR 762,245. It is 15% in all other cases.
13. Non-treaty recipients of royalties and management fees are subject to a 33.33% withholding rate. Where a treaty exists, management fees are exempt from WHT unless they are included in the definition of royalties subject to WHT.
14. In France, the WHT is levied on a provisional basis at 25% of the net profit. This amount is reduced to the extent it exceeds the dividends actually paid by the company during the previous 12 months, and the amount of dividends paid to residents of France. Consequently, if the foreign head office undertakes not to distribute dividends in a given year, the after-tax profits of its French branch are not subject to WHT, even when they are transferred abroad.
15. WHT on interest on loans with a contract is 0%, while withholding on other interest is in a range from 15% to 50%. For treaty rates, consult the individual entry in the table.
16. The WHT rate can be 60% for certain securities if the investor's identity is not disclosed.
17. The WHT is levied on the following amount: French net profit divided by the total foreign company net profit, multiplied by the amount of the distribution.
18. The rate of 10% is applicable on royalties for the use of literary, artistic, or scientific works, including films; 25% on royalties for the use of trademarks; and 15% otherwise.
19. No WHT is applicable on a royalty arising from the use of or the right to use literary, artistic, or scientific works (excluding film).
20. WHT is reduced to 6% for royalties paid for the lease of industrial, commercial, or scientific equipment.
21. A rate of 5% (Cyprus) and 10% (Israel) is applicable on royalties paid for the use or the right of the use of films.
22. Profits realised in France by foreign corporations whose head offices are located in a European country are not subject to WHT if certain conditions concerning the foreign corporation are met (effective head office in a European country; foreign corporation subject to corporate taxation).
23. No WHT is applicable on a royalty arising from the use or the right to use literary, artistic, or scientific works.
24. No WHT is levied on certain royalties paid in the field of audio visual techniques.
25. The rate of 15% is applicable on royalties paid for the use of industrial property and trademarks.
26. A rate of 33.33% is applicable on royalties paid for the use of or the right to use films.
27. The rate of 5% is applicable on royalties paid for the use of literary, artistic, or scientific works, excluding films.
28. The rate of 33.33% is applicable on royalties paid for the use of literary and artistic works, including films, and for information concerning commercial experience.

France

29. No WHT is levied on royalties paid for the use of or the right to use literary or artistic works, excluding films and recordings.
30. No WHT is levied on royalties paid for the use of or the right to use copyrights or films.
31. No WHT is levied on royalties paid for the use of or the right to use industrial, commercial, or scientific equipment.
32. The rate of 20% is applicable on royalties paid for the use of trademarks, 15% for the use of industrial property, and 5% for the use of literary, artistic, or scientific works.
33. The rate of 5% is applicable on royalties for the use of literary, artistic, or scientific works, not including films.
34. The rate of 5% is applicable on royalties for the use or the right to use industrial, commercial, or scientific equipment.
35. The reduced rate is applicable if the beneficial owner is a company (other than a partnership).
36. Voting shares solely.
37. French domestic law decreases the WHT rate from 30% to 21% concerning individuals who are resident in another EU member state, in Iceland, and in Norway.
38. See *explanation of Column 6*.

WHT on French-source dividends

The EU WHT exemption has been extended to dividends paid by foreign companies whose effective place of management is in an EEA member state that has concluded an administrative assistance agreement with France (including Iceland, Liechtenstein, and Norway).

Shares held in bare ownership are now taken into account for the computation of the 10% percentage in the distributing entity's capital in order to benefit from the WHT exemption. The ownership percentage required to benefit from the WHT exemption may be reduced from 10% to 5% if the beneficial owner of the dividends (EU or EEA) cannot offset the French domestic WHT in its home country.

These measures apply to fiscal years ending on or after 31 December 2015.

The WHT exemption now applies if dividends are paid to a parent company based in the European Union or in a third country that has concluded an administrative assistance agreement with France that is in a tax loss position and is declared bankrupt or is in a similar situation.

This measure applies to proceeds received on or after 1 January 2016.

Dividends received by a French parent from qualifying holdings

Shares held in bare ownership are now taken into account for the computation of the 5% percentage in the subsidiary's capital in order to benefit from the participation-exemption regime.

Participation exemption is available for fiscal years ending on or after 31 December 2015 to distributions received from entities established in NCSTs, provided the parent company demonstrates that these operations are not designed for, or do not result in, locating profits in such NCST for tax fraud purposes.

There is now an exclusion of certain dividend distributions (e.g. distributions made by *société d'investissement immobilière cotée* [SIIC], *société immobilières pour le commerce et l'industrie* [SICOMI], *société de placement à prépondérance immobilière à capital variable* [SPPICAV], etc.) from the participation-exemption regime.

Anti-avoidance rules applicable to Non-Cooperative States or Territories (NCSTs)

The French parent-subsidiary regime is not applicable to dividends paid from entities located in an NCST.

WHT on passive income is 75% for transactions with an NCST person or entity.

For French tax purposes, a state or territory is considered non-cooperative if it meets all of the following criteria:

- It is not a member of the European Community.
- It has been reviewed and monitored by the OECD Global Forum on Transparency and Exchange of Information.
- It has not concluded at least 12 administrative assistance agreements/treaties that allow a complete exchange of information for tax purposes.
- It has not concluded an administrative assistance agreement/treaty with France.

Payments (e.g. interests, royalties, payments for services) made to an NCST person or entity are, as a general rule, not tax deductible. In addition, it is not possible to offset WHT in France with any foreign WHT borne by the entity located in an NCST.

Moreover, concerning shareholders (individuals and companies) located in an NCST, a tax amounting to 75% is levied on capital gains derived from the disposal of shares in French companies, whatever the level of shareholding.

F

The list of NCSTs is upgraded each year.

On 21 December 2015, the French government published a Ministerial decree removing the British Virgin Islands and Monsterrat from its list of NCSTs, retroactive to 1 January 2015.

New General Anti-Abuse Rule (GAAR)

A new GAAR provided by the EU Directive is implemented in French law and applies to the:

- Parent-subsidiary regime.
- French WHT exemption.

The new French GAAR provides that the benefit of these regimes cannot be claimed:

- if the distributions result from a scheme or series of schemes put in place to obtain, as a main objective or as one of the main objectives, a tax benefit that is contrary to the purpose of the parent-subsidiary regime, and
- that is not genuine based on the applicable facts and circumstances.

According to parliamentary works, this new GAAR aims to exclude from the exemption holding companies with a sole purpose of holding shares.

This new GAAR applies to fiscal years beginning on or after 1 January 2016.

Tax administration

Taxable period

The ordinary taxable period is equal to 12 months. Conformity with the calendar year is not requested. In particular cases, the duration of the taxable period can be different from 12 months (e.g. newly established companies are allowed to have taxable periods longer than 12 months; companies that are involved in extraordinary transactions [merger, de-mergers, etc.], as well as companies that are liquidated, may have taxable periods shorter than 12 months).

Tax returns

Regarding fiscal years that end on 31 December, CIT returns are due by the end of April of the following year.

France

Accounting records to be provided in ‘computerised format’ in case of tax audit

Companies are required to keep their accounting records in computerised form and to provide them to the tax authorities in the same format. Such electronic files must be provided for fiscal year 2013 and following years when audited in fiscal year 2016.

Payment of tax

Payment of tax is made during the fiscal year by way of four instalments totalling 33.33% of the taxable income of the preceding year (i.e. by 15 March, 15 June, 15 September, and 15 December for fiscal years that end on 31 December). Regarding fiscal years that end on 31 December, final CIT payment is due on 15 April of the following year.

Currently, for companies that have gross income in excess of EUR 500 million, the last down-payment is assessed on the basis of the estimated taxable income of the present year (in case of significant increase of the taxable profits in comparison with the previous fiscal year). This leads to an anticipated payment of CIT.

Interest and penalties

Regarding CIT, VAT, registration duties, and business tax:

- late payment is subject to late interest computed at a rate of 0.4% per month (4.80% per year) and to a 5% penalty, and
- late filing is subject to late interest computed at a rate of 0.4% per month (4.80% per year) and to a 10% penalty.

Moreover, a penalty of 40% applies in case of bad faith and is increased to 80% in case of fraud.

Tax audit process

The French tax authorities are responsible for verifying that taxpayers' obligations are correctly complied with and, if necessary, for making adjustments by issuing tax assessments.

Once an assessment is notified by the tax inspector and if the taxpayer disagrees with such an assessment, the taxpayer has 30 days to answer (with a possible 30 days extension upon request) and to provide comments to the French tax authorities.

Following an exchange of written correspondences between the tax inspector and the taxpayer (including hierarchical recourse), either party may submit any disagreement on a factual issue to the departmental or national tax commission. The decision of this commission is neither binding on the taxpayer nor on the French tax authorities.

In cases where the disagreement between the French tax authorities and the taxpayer still remains, the taxpayer can file a claim with the French civil courts or with the French administrative courts, depending on the type of tax that has been subject to assessment by the tax inspector.

Statute of limitation

Regarding CIT, the general statute of limitation expires at the end of the third year following the one that has triggered the tax liability.

Under certain circumstances, the statute of limitation can be extended (e.g. fraud, undisclosed/hidden activity); the statute of limitation can also be interrupted (e.g. notification of a notice of reassessment).

Topics of focus for tax authorities

Transfer pricing, business reorganisation, financing arrangements, and VAT are standard elements reviewed during tax audit.

The ruling system

To secure the tax status of a situation, foreign companies and individuals can request a private ruling from the French tax authorities as to whether their activities constitute a PE or fixed base.

The French tax authorities have to provide an answer within three months after the receipt of the request. In the absence of response from the French tax authorities within this period of time, the foreign company or individual will be deemed not to have a PE in France.

APAs are also provided by the French tax authorities for transfer pricing purposes (*see the Group taxation section for more information*) as well as for eligibility of R&D expenses to the R&D tax credit.

Other issues**France and the United States sign bilateral agreement on the implementation of the Foreign Account Tax Compliance Act (FATCA)**

On 14 November 2013, France and the United States signed a bilateral intergovernmental agreement (IGA) intended to implement FATCA. FATCA was enacted by the United States in 2010 to combat offshore tax evasion by US persons. France, with the United Kingdom, Germany, Spain, and Italy, was an original member of the 'G5' countries that agreed with the United States to advance the principles of FATCA under the concept of bilateral IGAs in order to address many of the legal barriers faced by financial institutions in complying with FATCA.

The French government has committed to drafting local laws and regulations to implement FATCA among all financial institutions resident in France (including French branches of foreign companies). Broadly speaking, the banking, life insurance, and asset management industries will be most affected, but certain estate (patrimonial) vehicles, holding companies, as well as hedging, finance, and treasury centres of non-financial groups could also be impacted, depending on the nature of their activities.

As expected, the US-France IGA is based on the Model 1A version with an Annex II negotiated to include provisions specific to the local French market and that contains categories of French financial institutions qualifying for exempt beneficial owner or deemed-complaint status.

Compliance with FATCA's due diligence, reporting, and, in some cases, withholding requirements is necessary for foreign financial institutions (FFIs) to avoid suffering 30% withholding on certain US-source income and payments. The French IGA is intended to simplify the FATCA requirements for French financial institutions, but, in most cases, still requires significant efforts to maintain compliance.

The following are key points specific to the US-France IGA to consider:

- Inclusion of the 'most favoured nation' clause allowing adoption of certain provisions from other IGAs that may be more favourable to French financial institutions.
- Consistent with Notice 2013-43, the timetable for implementation of FATCA has been synchronised with the intended amendments to the US Treasury Regulations, starting with the entry into force of key provisions effective 1 July 2014.
- Annex II of the French IGA describes various classes of exempt beneficial owners and deemed-compliant financial institutions.

France

- The deemed-compliant financial institutions described in Annex II are treated as Non-Reporting French Financial Institutions under the French IGA. In turn, these Non-Reporting French Financial Institutions are considered certified deemed-compliant FFIs under the US regulations and do not have to register to obtain a global intermediary identification number (GIIN).
- Collective investment vehicles, including investment entities established in France that are regulated as collective investment vehicles, *sociétés de crédit foncier* and *sociétés de financement de l'habitat*, are Non-Reporting French Financial Institutions treated as deemed-compliant FFIs.
- The asset management industry should benefit from an exemption related to employee savings plans and a special status that is intended to reduce the FATCA obligations of investment vehicles and management companies that can ensure the absence of US investors and non-participating financial institution customers.
- The agreement also provides specific provisions for certain French institutions and financial products, including:
 - Exemption for certain local banks with an almost exclusively local client base. This could be beneficial to French institutions following the mutual banking model.
 - Most regulated savings products (savings books and savings plans), which are excluded from the definition of a financial account and will not be treated as US Reportable Accounts, whereas the share savings plan (PEA) remains within the scope of FATCA.
 - Products dedicated to retirement planning (Article 39, Article 82, Article 83, Madelin, Madelin agricole, Perp, Pere, and Prefon), which are excluded from the definition of financial accounts and will not be treated as US Reportable Accounts.
 - Pension funds will also benefit from a specific exemption.

French financial institutions, as well as non-financial organisations with financial institutions within their groups, should be taking steps based on the IGA (and in some cases US Treasury Regulations) to ensure they are prepared to comply. Unofficial draft guidelines have been prepared regarding the US-France IGA. This draft is not binding on French tax authorities. Official guidelines were published on 5 August 2015.

Significant developments

Further to the promulgation of the Financial Act for 2016, the following new tax measures have been introduced:

- The increase of the branch tax rate from 15% to 20%.
- The increase of the rate of the withholding tax (WHT) from 10% to 20%.
- The institution of a value-added tax (VAT) on real estate operations.
- A new condition for the deduction of the VAT paid on services available in the Gabonese territory that are provided by foreign suppliers.
- The increase of registration duties.
- A penalty for non-compliance of the share's register of the company.

Taxes on corporate income

Subject to the provisions of double tax treaties (DTTs), profits subject to corporate income tax (CIT) in Gabon are those obtained by companies exploited in Gabon or those relating to operations carried out in this country.

As the Uniform Act of the Organisation for the Harmonisation of Business Law in Africa (OHADA) relating to the law of companies and economic interest groups has introduced the simplified stock company (SAS) in the OHADA area, the General Tax Code has enlarged the application of the CIT to include the SAS.

The CIT rate is fixed at 30%.

The CIT rate is 35% for companies operating in the oil and mining sectors and 25% for the following entities:

- Companies owning intellectual property shares.
- The Gabonese Development Bank.
- Authorised companies of property promotions.
- Public companies.
- Non-profit partnerships and collectives.
- Authorised companies of the tourism sector.

CIT is assessed on profits minus deductible expenses and charges. Profits are composed of all operations carried out in Gabon by companies during the period of taxation, including, notably, capital gains on fixed assets.

Non-resident companies shall be taxed via WHT at the rate of 20% for income raised in Gabon if they have no permanent establishment (PE) in Gabon.

In cases where non-resident companies have PE in Gabon, they shall be subject to CIT on the income raised in Gabon via the Gabonese PE.

Gabon

Impôt Minimum Forfaitaire (IMF)

The IMF is a lower limit to the CIT and is calculated as 1% of the global turnover carried out during the fiscal year of taxation. Note that the IMF cannot be less than 1 million Central African CFA francs (XAF), even in the case of a negative turnover.

New companies (as defined in Articles 194, etc. of the Gabonese Tax Code), without consideration of the sector of activity, are exempt from this minimum tax during the first two fiscal years of their existence.

Local income taxes

There are no local government taxes on income in Gabon.

Corporate residence

As a general rule, a resident company is a company that is incorporated under commercial laws in force in Gabon.

Permanent establishment (PE)

From a general treaty perspective, a PE designates a permanent business installation through which a company carries out the whole or part of its activity.

The expression 'permanent establishment' notably includes the following:

- Head office.
- Branch.
- Office.
- Plant.
- Workshop.
- Mine, oil or gas shaft, quarry, or other place of natural resources extraction.
- Building site or assembly line.

Other taxes

Value-added tax (VAT)

VAT is a cumulative tax levied on the sale of goods and the provision of services rendered or used in Gabon.

There are four rates of VAT:

- Standard rate: 18%, which applies to all transactions unless otherwise provided for by the law.
- Reduced rates:
 - 10%, which applies to manufacturing operations and sales of products mentioned in a limitative list provided by Article 221 of the Gabonese Tax Code, including mineral water, chicken, and sugar.
 - 5%, which applies to sales and services relating to cement.
- Zero-rate: 0%, which applies to exports and international transports.

Taxable persons are individuals or legal entities carrying out, usually or occasionally, in an independent manner, taxable operations in the scope of an economic activity and for an onerous consideration.

The aforesaid persons, subject to CIT or personal income tax (PIT), being registered or not, are liable to VAT should their turnover out of taxes reach XAF 60 million.

VAT on real estate

According to article 248 ter of the Gabonese Tax Code, operations in relation to the construction or sale of real estate, such as sales of lands to build on, delivery of new buildings, or self-delivery of some buildings, carried out by persons subject to VAT in the scope of their economic activities are subject to VAT on real estate.

The taxpayer of the VAT on real estate is the builder of the building.

The VAT is payable on the delivery date.

The deeds relating to the transfer of buildings subject to VAT on real estate are subject to registration formalities.

The VAT on real estate is calculated based on the sale price as determined by the parties or on the real value of the real estate in case it is superior.

The applicable rate is 18%.

Customs duties

Gabon is member of the Central African Economic and Monetary Community (CEMAC), a customs union that comprises countries from Central Africa.

Merchandise entering into the CEMAC customs territory is subject to importation duties registered into the Customs Tariff.

Four customs regimes are available in Gabon, notably one standard regime and three specific regimes (an exemption regime, a temporary admission regime, and a reduced tax regime).

Apart from customs duties, the importation of merchandise in Gabon is subject to the community tax of integration (CCI) at a rate of 0.4% and to the OHADA withholding (duty) at a rate of 0.05% of the customs value of the imported merchandise.

Excise duty

Excise duty principally applies to luxury goods, such as alcoholic drinks, perfume and cosmetic products, caviar, salmon, cigars, and cigarettes.

The rates of the excise duty are between 20% and 32%.

The Financial Act for 2015 has provided increased excise duty rates for the following goods:

- Local and imported beers: 30% (previously 20%).
- Local and imported wines: 30% (previously 20%).
- Cigarettes, cigars, cigarillos, tobacco: 32% (previously 30%).

Tax on property

Tax on buildings (*Contributions Foncières des Propriétés Bâties* or CFPB) is levied annually at the rate of 15% of the rental value of the building after deduction of 25% for deterioration and maintenance. For properties booked into the assets of a company's balance sheet, the rental value of the premises is equal to 10% of the gross balance sheet value, however, being inferior to the tenth of the market value of the premises.

Tax on non-built property is levied annually at the rate of 25% of the taxable revenue corresponding to 4% to 5% of the rental value or 10% of the purchase value.

Gabon

Transfer tax

The tax on funds transfer is due on remote transfer operations carried out in Gabon at destination of countries outside the Central Africa Monetary Union (UMAC) countries.

The tax is calculated on the amount of the funds to be transferred, except for related fees and commissions paid by the giver.

The rate of the transfer tax is 1.5%.

Stamp duty

A stamp duty is levied on all paperwork relating to civil and judicial actions and to documents that could be produced in court as evidence.

All signatories for mutually binding contracts, lenders and borrowers for loans, and ministerial officials who receive or modify deeds announcing unstamped deeds or books are jointly responsible for the payment of stamp duties and fines.

Business license tax

The business license tax applies to both individuals and entities, Gabonese and foreign, engaged in a profession, business, or industry in Gabon.

Business license tax corresponds to a professional tax borne annually. It is deductible from the taxable income for CIT purposes.

The rates of this tax vary according to the profession, business, and location within Gabon territory (this tax may vary between XAF 15,000 and XAF 540,000).

The head of the group of companies is exempted from the payment of the business license tax.

Franchise tax

The franchise tax is a fixed annual duty varying from XAF 10,000 to XAF 500,000, according to the size, nature, and location of the company. Each company that carries on a trade, business, or activity that is not expressly exempted is liable for franchise tax.

Activities that are expressly exempted from franchise tax are those carried out by companies of provident, craftsmen, teachers and professors, lyrical and dramatic artists, farmers, cattle-breeders, fishers, etc.

Registration duties

Registration duties in Gabon are fixed, proportional, or progressive, depending on the nature of the acts and transfers in question.

Tax on insurance premiums

Insurance or annuity agreements made with insurance companies or any other Gabonese or foreign insurer are subject to an annual obligatory tax.

The tax is levied on the sums charged by the insurer and on any accessory payments made to this party by the insured party according to the following rates:

Nature of the policies	Rate (%)
Marine policies	5
Life policies	Exempt
Fire policies	30
Other (e.g. personal liability, transportation)	8
Reinsurance	Exempt

Payroll taxes

PIT and complementary tax on salary (TCS) are withheld monthly by the employer and paid to the Treasury before the 15th day of the following month.

Social security contributions

Employers must contribute to the social security system (National Social Security Fund [CNSS] and to the National Disease Insurance and Social Guarantee Fund [CNAMGS]).

The taxable basis for social security contributions to the benefit of the CNSS is made up of gross salaries, including indemnities having the function of a salary and any benefits in kind. However, there is an annual ceiling of XAF 18 million (or XAF 1.5 million per month).

The taxable basis for social security contributions to the benefit of the CNAMGS is made up of gross salaries, including taxable indemnities in the limit of a monthly ceiling of XAF 2.5 million.

The social security contributions due by the employer for both funds are determined according to the following rates:

Contribution to CNSS	Rate (%)
Family allowances	8
Industrial accidents (work injuries)	3
Retirement pensions	5
Contribution to CNAMGS	Rate (%)
Health evacuation funds	0.6
Medication distribution	2
Hospitalisations	1.5
Total	20.1

Branch income

Taxation of branch income is the same as for corporate income. However, a 20% WHT on profit is due at the time the profit is taken by the head office (located abroad) of the branch. This rate is reduced to 10% in case of the existence of a tax treaty.

Simplified tax regime for oil subcontractors

There is a simplified tax regime specific to the oil sector, which is a lump-sum tax regime granted for a biennial period. The request to benefit from such a tax regime is renewable for an additional period of two years, at least. Should the biennial period end after the first quarter of a considered year, the benefit from the simplified tax regime will apply until the end of the said year.

Features of this specific regime are as follows:

- The option for this regime is irrevocable for a period of two years, renewable once.
- The total duration of the benefit of such a regime can't exceed four years.
- The companies must perform their activities exclusively in the scope of oil operations.
- The option is granted by the Director of the General Tax Office to foreign companies.
- The subcontractor must have signed, with an oil company, a temporary agreement for the provisions of services to this company.
- The option is no longer granted to companies that have been in Gabon for more than nine years. The duration of nine years is calculated from the year during which the company started its activities in Gabon.
- The subcontractor must constitute a Gabonese branch office.

Gabon

The rate for the 2015 and 2016 fiscal years is 8.75%, corresponding to CIT (5.95%) and PIT for expatriate employees (2.80%).

Specific regime for regional offices (quartiers généraux)

A regional office is a company or a branch that renders various administrative services, such as management or accounting, exclusively to other companies of the same group based in a given geographical area (usually a group of countries).

Taxation is based on the expenses of the regional office. A rate, between 5% and 12%, is applied to operating expenditures to determine the tax basis. The CIT rate is then applied to that basis.

Income determination

Inventory valuation

Stocks are estimated at cost price. If the market price is lower than the cost price, the company has to make provisions for depreciation of inventory.

Capital gains

Capital gains arising from the transfer of assets must be used for the calculation of taxable profits. However, the tax on capital gains can be deferred if a company reinvests an amount equal to the capital gain and the sale price of the transferred asset back into its fixed assets within three years.

Capital gains realised on the transfer of legal rights of persons or entities, whose asset is, in its majority, constituted of such rights or rights directly or indirectly owned in a company located in Gabon, are subject to CIT in Gabon.

Dividend income

The rate of transferable securities income tax (*Impôt sur le Revenu des Capitaux Mobiliers* or IRCM) is 20% on distributed dividends.

IRCM charged on the beneficiaries of the earnings is withheld at source by the distributing company. It is paid over to the Registration Officer within 30 days from the payment of the dividends.

Inter-company dividends

Inter-company dividends are taxed at a reduced rate in full discharge of the 20% WHT if paid and received by or from companies with their registered office in a CEMAC country, shares were allotted at the time of issue or kept for two years, and the Gabonese company owns more than 25% of the share capital of the subsidiary.

Interest income

Interest income paid to companies is subject to a 20% WHT in Gabon. When paid in respect of bonds of five years or more, it is subject to a 10% WHT.

Foreign income

Foreign interest, royalties, and dividends are included in taxable income, subject to international tax treaties. Note that tax treaties provide that certain/all types of income are not includable in Gabon taxable income. Gabon has tax treaties with France, Belgium, the other countries of CEMAC, and the African and Malagasy Common Organisation (OCAM).

The concept of deferred tax is not applicable in Gabon.

Deductions

Depreciation

The straight-line method and an accelerated depreciation method are permitted in Gabon. Tax and book conformity is obligatory (i.e. annual depreciation must be booked to preserve tax deductibility).

The main depreciation rates provided by the Gabonese Tax Code are the following:

Asset	Rate (%)
Buildings	5
Machinery, equipment	5 to 33.33
Office furniture	15
Office equipment	10
Vehicles	20 to 33.3
Computing equipment	25 to 100

G

Goodwill

There is no provision in the Gabonese Tax Code concerning the tax treatment of goodwill.

Start-up expenses

During the first five years of activity, a start-up can use an accelerated depreciation method on the acquired equipment goods under certain conditions and subject to specific provisions of the Gabonese Tax Code applicable to start-ups. Applicability of these provisions must be requested from the General Tax Manager prior to the incorporation of the company.

Interest expenses

Interest paid to shareholders with respect to the sums made available by them to the company is only deductible within the global limit amounting to half of the share capital and within the limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States raised by 2%, provided that the share capital is fully paid up.

Bad debt

Bad debt can be deducted from the result of the fiscal year during which the debt became completely unrecoverable, subject to the irrecoverable character of the compromised debt being justified due to the situation of the debtor.

Provisions

To be tax deductible, provisions must relate to existing liability or loss. General provisions are not deductible.

Expenditures on rent

The amount of the rentals granted to a company is allowed as a deductible expense under the condition that it does not exceed the average rentals applied for similar buildings and amenities.

Charitable contributions

Charitable contributions do not, in principle, constitute expenses deductible from the taxable result. However, contributions for charity can be deducted, provided that the donation is made to the profit of organisms of public interest located in Gabon and that the donation is justified.

The deduction is limited to 1/1,000 of the company's turnover for the considered fiscal year.

Gabon

Fines and penalties

Fines and third-party taxes borne by companies are not tax deductible.

Social security contributions paid to foreign retirement funds

According to the provision of the Finance Act for 2015, the deductibility of social security contributions paid by the employer to foreign retirement funds are only allowed when paid to the benefit of employees in secondment and within a limit of 15% of the gross salary paid to these employees.

Taxes

Only professional taxes for which the recovery proceeding has started in the current fiscal year and for which the company is effectively liable due to operations carried out in Gabon can be deducted.

Net operating losses

The Gabonese Tax Code does not provide the possibility to carry back losses. It does, however, provide for a five-year carryforward for net operating losses.

Regarding depreciation deferred in the accounts, they can be carried forward indefinitely.

Payments to foreign affiliates

Management fees paid to a foreign parent company are deductible if they meet all of the following conditions:

- They reflect real transactions.
- They do not present an abnormal characteristic.
- They are not exaggerated.

Management fees determined on a lump sum basis are not deductible.

Management fees exceeding 10% of the taxable profit before deduction of the said fees are not deductible.

Interest paid to shareholders is deductible only within the limit of the Central Bank's (BEAC) normal rate for advances plus 2%, on the condition that the registered capital is entirely paid. The portion exceeding the ceiling is not deductible and is thus subject to taxation.

Group taxation

Specific group tax regime

There is a specific tax regime derogatory to the common law tax regime that is applicable, under conditions, to groups of companies.

According to the provisions of Article 11 b. of the tax measures applying to groups of companies, groups of companies are those constituted by companies subject to CIT, or a foreign equivalent tax, united between them through direct or indirect capital links of at least 50% and that allow one of them or several companies, jointly, to control the others.

The control is defined as:

- either the direct or indirect holding of the majority of the vote in another company or
- the nomination, during two consecutive years, of the majority of the members of the board of directors of another company.

To be eligible for this specific tax regime, and without any prejudice of other activities performed to the profit of third parties, the head of the group of companies must perform to the profit of other companies of the group an activity relating exclusively to the following fields:

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial corresponding to functions of management, coordination, and control of the group's companies.
- Research and development (R&D) to the sole profit of the group.
- Management of the finance intra-group.

Each company subject to CIT that is a member of the group and fulfils the conditions provided by the law will be subject to a separate taxation of its results according to the rules of common law and subject to amendments expressly provided by the law for the determination of the taxable result.

The express amendments provided in the scope of the specific tax regime applicable to groups of companies are the following:

Capital gains

Net capital gains are taxed at a reduced rate of 20% when they are realised in the scope of intra-group operations.

Expenses deductible from the taxable result subject to CIT

The following expenses are deductible within the group:

- Head office fees and management fees determined on a lump sum basis, according to the conditions of allocation of the expense between the companies members of the group defined in a previous ruling with the tax authorities.
- The whole of the interests on partners' current accounts (i.e. on the sums put, by the partners, at the disposal of a company of the group) within the sole limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States (equivalent to 2.85%) raised by 2%.
- Rents of movables carried out within the group by the mother company or between companies of the same group.

20% WHT

Sums subject to CIT according to the provisions of Article 206 of the Gabonese Tax Code paid by a Gabonese debtor member of a group of companies to a foreign company member of the same group are exempted from the 20% WHT even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of residence of the beneficiary of the remunerations.

Transferable securities income tax (IRCM)

Companies of the group that benefit from transferable securities income originating from Gabon are exempted from IRCM when the said revenues are paid by a company member of the group.

In return, payments carried out by the head of the group of companies to the profit of its partners (individuals or legal entities) are subject to IRCM at a unique and at source rate of 10% (instead of 20%).

It is to be noted that the transferable securities incomes having their source abroad and which gave rise to taxation in their country of origin give the right in Gabon to a tax credit of the amount of the taxation that is deductible from the CIT of the fiscal year of perception of the incomes. The aforesaid tax credit applies even though no DTT aiming

Gabon

to avoid double taxation has been concluded between Gabon and the country of origin of the incomes.

VAT

The head of the group of companies is liable for VAT.

Members of a group of companies could, however, on option, consider the following provisions of services performed within the group as being out of the scope of application of VAT:

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial.
- Fees relating to studies.
- Putting at disposal of personal.
- Management of finance.

The option for the subjection of the abovementioned operations must be formulated by the concerned taxpayers on express request addressed to the General Tax Manager.

Registration duties

Deeds relating to incorporation, increase or reduction of share capital, breaking up with or without clearance, merger, scission, partial contribution of assets, and transfer of shares of a company member of a tax group, are subject to a fixed duty of XAF 50,000.

In the absence of a more favourable duty provided by the common law of registration, the changes of ownership and use that are not provided at Article 6 of the Gabonese Tax Code are subject to a proportional rate of 1% when carried out by members of the same tax group.

Requirements relating to declaratory obligations

The adherence to the group tax regime must be notified in writing by the head of the group of companies to the General Tax Manager accompanied by the list of the companies included in the tax perimeter of the group.

Each company remains liable for the periodical returns applicable to its activity.

For the purpose of calculation and verification of the returns, each tax return relating to the CIT of each company of the group will be gathered and filed at the same time by the head of the group of companies before the Tax Office.

Transfer pricing

The Gabonese Tax Code provides rules regarding transfer pricing issues.

According to these rules, any payment considered to be a result of mismanagement will be subject to the CIT rate at 30% (35% for companies operating in the oil and mining sectors) plus penalties.

Indeed, Article 12 of the Code provides that “By virtue of law or in fact, for companies which are dependent of companies or groups of companies located outside the CEMAC area, or for those which possess the control of companies located outside the CEMAC area, payments or expenses realised by any mean whatsoever or any kind of advantages or help granted to third parties without equivalent counterpart for the company, comparable to abnormal act of management, constitute transfer of profits subject to corporate income tax”.

It is applicable for the following:

- Payments constituting increase or decrease of purchases or sales.

- Payments of excessive royalties or royalties without compensation.
- Relinquishment of revenues (underestimated sale price, free of charge service provision, granting of a free loan or a loan with low interests).

The abnormal act of management is not limited to expenses; it also includes any form of advantages or allowances granted to third parties without any equivalent compensation for the company.

Article 13 of the Gabonese Tax Code provides that “The advantages or assistance granted by companies belonging to the same group can only be considered as resulting from a normal management if the company which grants these advantages or assistance demonstrates the existence of its own interest in acting as such. The general interest of the group is not sufficient to justify such practices”.

According to the Gabonese Tax Code, the following documents must be made available and provided to the tax authorities upon request:

G

- General information about the group of related entities, notably:
 - A general description of the activity, including any changes that occurred since the beginning of the activity.
 - A general description of the legal and operational structures of the group of related entities, including an identification of each entity.
 - A general description of the exercised functions and assumed risks of the related enterprises.
 - A list of the main intangible assets owned (notably licences, brands, know-how).
 - A general description of the group transfer pricing policies.
- Specific information relating to the company:
 - A description of the spread activity, including any changes that occurred during fiscal years.
 - A description of the operations carried out with other related entities, including the nature and the amount of the flow and including royalties.
 - A list of the agreements pertaining to costs allotment together with copies of any prior agreement on transfer prices and rescripts pertaining to the determination of transfer prices affecting the company's results.
 - A presentation of the methods of determination of transfer prices according to the arm's-length principle, including an analysis of the exercised functions, the assets that are used, and the risks that are assumed, together with an explanation concerning the selection and application of this or these method(s).
 - An analysis of the elements of comparison considered as relevant by the company, when the chosen method requests it.

Thin capitalisation

There is no specific tax rule under Gabon legislation related to thin capitalisation.

Controlled foreign companies (CFCs)

There is no specific tax rule under Gabon legislation related to CFCs.

Tax credits and incentives

Foreign tax credit

DTTs include provisions relating to the attribution of foreign tax credits. Such tax credits aim to limit the double taxation of profits that are subject to taxation in both member states of the treaty.

Tax credits for job creation

There is a mechanism in place for granting corporate tax credits for any salaried appointments of Gabonese personnel.

Gabon

This tax credit is equal to 20% of the gross salary paid to new employees and is subject to the creation of a minimum number of jobs, according to the size of the company as follows:

- Two jobs, for companies with less than 20 employees.
- Three jobs, for companies with 20 to 50 employees.
- Five jobs, for companies with more than 50 employees.

Note that the tax credit is granted only on newly created jobs since the preceding fiscal year. Contracts concluded with the employees must also be for an undetermined duration, and the new jobs must not result from the diminution of existing jobs.

Inbound investment incentives

Due to the provisions of the Investments Law, any private investment in Gabon can benefit from:

- A common law framework.
- Privileged frameworks.
- Specifically agreed frameworks.

Depending on the frameworks it is eligible for, a company can benefit from customs privileges and tax breaks.

Industrial companies already set up in Gabon and wishing to increase their production capacity can be admitted to a preferential tariff framework. This entails the application of a global reduced rate of 5% for duties and taxes paid on imports of equipment (excluding materials, furniture, and spare parts), provided that these correspond to an investment schedule and their value is in excess of XAF 100 million.

New industrial companies can also benefit from this framework, provided they are not subject to any of the other privileged frameworks outlined by current legislation.

The granting of this privileged tariff framework occurs on the basis of a decision by the Minister of Finances, following a proposal from the Director of Customs and Indirect Taxes.

Capital investment incentive

New companies are exempt from the IMF, the minimum taxation of CIT, during the first two years of operations.

Social housing incentive

There are some tax exemptions applicable exclusively to authorised companies during the performance of a social housing investment project.

Favourable measures are applicable with regards to the importations of materials, engines, and equipment destined to authorised companies. Indeed, such importations are exempt of customs duties. They can also be imported under the normal temporary admission.

The concerned companies may apply before the Customs Authorities in order to benefit from the abovementioned regime.

The concerned companies are those authorised for the planning of urban lands intended for social habitat and the building of housings of a socio-economic nature and industrial units of manufacturing of materials and other inputs used for the building of social housings. The abovementioned tax exemptions relate to CIT, VAT, and business license tax.

Tourism incentive

Companies having hotel activity in the tourism sector are exempted from CIT during the first three years of existence, provided that the amount of the investment equals or exceeds XAF 300 million. If not (investment of less than XAF 300 million), aforesaid authorised companies investing in the tourism sector can benefit, during a five-year period, from a 5% tax credit.

Withholding taxes

20% WHT

When they are paid by a debtor established in Gabon to individuals or companies subject to CIT or PIT that do not have a permanent professional base in Gabon, the following amounts are subject to a 20% WHT:

- All amounts paid pursuant to the practice of an 'independent profession' in Gabon.
- Payments received by inventors, payments relating to copyrights, and all payments relating to intellectual and commercial property as well as assimilated rights.
- All amounts paid for services materially rendered or effectively used in Gabon.
- Interest, arrears, and all others fixed-income investment-products pertaining to income declared as professional revenue of the beneficiary.

Net profits carried out by branches of foreign companies having their head offices abroad are also subject to a 20% WHT in Gabon before they are taken into account by the foreign companies.

The WHT of 20% may not apply in the context of the application of a DTT, as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Belgium (1)	18	15	10
Canada (1)	15	10	10
France (2)	15	10	10
Morocco (2, 3)	15	10	10

Notes

1. If the beneficial owner of the dividends, interest, or royalties is a resident of the other contracting state.
2. If the person receiving the dividends, interest, or royalties is the beneficial owner.
3. The tax treaty concluded between Gabon and Morocco has not yet been notified.

Transferable securities income tax (IRCM)

IRCM is due at a 20% rate on revenues from stocks and shares paid to legal entities. It is due by beneficiaries of these revenues and must be withheld by the distributing company.

Tax administration

Taxable period

Companies are required by law to have a 31 December closing of any fiscal year.

Tax returns

Returns for the previous calendar year are to be filed before 30 April of each year.

Payment of tax

Tax is payable to the General Tax Office in two instalments on 30 November and 30 January. The balance of the tax due must be paid by 30 April. The first instalment must

Gabon

equal one-quarter of the tax assessed in the previous year and the second instalment must equal one-third of this tax.

Tax audit process

The rules concerning the tax audit procedure are provided by the Gabonese Tax Code.

There is no specific rule on the selection of companies to be subject to a tax audit. However, it has to be noted that generally, the tax administration proceed by sectors of activities.

The Tax Inspectors proceed to audits at the head office or at the place of the taxpayer's main establishment.

The main steps of the tax audit are the following:

- Notification of a tax audit by which the taxpayer is informed on the date of performance of the tax audit.
- Performance of the audit.
- Provisions of a notification of reassessment.
- Provision, by the taxpayer, of its answers to the notification of reassessment (to be provided within a delay of 20 days from the receipt of the notification).
- Reply of the tax administration to the answers of the taxpayer (to be provided within a delay of 60 days from the receipt of the above-mentioned answer from the taxpayer).
- Closing of the tax audit.

Statute of limitations

The tax administration can proceed to tax audit until the fourth year following the year for which the tax is due.

Topics of focus for tax authorities

The tax administration shall particularly focus on the following aspects:

- Compliance of deductibility of management fees.
- Compliance of deductibility of corporate expenses.
- Compliance of WHT on payments made to foreign services providers.
- Payment of VAT on behalf of third parties.

Other issues

Legal reserve

According to the provisions of the OHADA Uniform Act relating to commercial companies and economic interest groups, one-tenth of the year's profits, reduced, if applicable, by any previous losses, must be put into a reserve account named 'Legal Reserve'.

The endowment of this reserve ceases to be obligatory when its value reaches one-fifth (20%) of the company share capital.

Tax regime of merger and similar operations

There is a specific tax regime derogatory from the common law applicable to the following operations:

- Mergers.
- Scissions.
- Partial transfers of assets.
- Subsidiarisation.

This regime only applies to operations performed by companies liable to CIT.

The benefit of this specific tax regime is also subject to the fulfilment of conditions listed in the Finance Act for 2015.

This Finance Act also provides the provisions applicable to the abovementioned operations regarding the following taxes:

- CIT.
- VAT.
- Registration duties.

Significant developments

In order to encourage domestic and foreign investments, Georgia is switching to a new corporate income tax (CIT) regime from 1 January 2017. The main concept of the new regime comprises that no CIT is levied on retained earnings unless they are distributed.

Under the new regime, the following transactions will be subject to CIT:

- Profit distribution.
- Expenses incurred or other payments not related to economic activities.
- Free delivery of goods/services and/or transfer of funds.
- Representation costs that exceed the maximum amount determined by the Georgian tax code.

Technical points to be considered:

- Interim dividend distributions will not be deductible (dividends paid between Georgian legal entities will be exempt, then taxed on final distribution to individuals or non-residents).
- Transfer pricing adjustments will be deemed as a profit distribution and will be taxed by CIT.
- Payments out of Georgia to a jurisdiction with a beneficial taxation regime will be immediately taxable.
- Loan distributions to individuals or non-residents will be taxable.
- Free of charge goods and services will be taxable at market price, unless it is taxed at the source.
- Returns must be filed on a monthly basis.

Commercial banks, credit unions, insurance companies, microfinance organisations, and pawn shops will be affected by the new CIT regime after 1 January 2019.

Taxes on corporate income

CIT in Georgia is applied to taxable profit at a rate of 15%. Taxable profit is defined as gross income minus deductible expenses.

Resident enterprises are subject to CIT on worldwide income.

Non-resident enterprises carrying out economic activities in Georgia through a permanent establishment (PE) are subject to CIT with respect to gross income earned from Georgian sources, which can be reduced by deductions attributable to such income.

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to withholding taxes (WHTs) (*see the Withholding taxes section for more information*).

Local income taxes

There are no local income taxes imposed on the profit of legal entities.

Corporate residence

A resident enterprise is any legal entity that is established under the laws of Georgia or has its place of effective management in Georgia.

Permanent establishment (PE)

The domestic definition for a PE essentially adopts the definition for PE found in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Local legislation provides the definition for economic activity to be any activity undertaken with the intent to gain profit, income, or compensation, regardless of the results of such activity, unless otherwise provided by the tax code.

G

Other taxes**Value-added tax (VAT)**

The standard VAT rate is 18% and applies to the sale of all goods and services supplied in Georgia carried out as an economic activity. Goods are considered to be supplied in Georgia if they are transferred in or their shipment originates in Georgia. Services generally are considered to be supplied in Georgia if they are performed in Georgia. However, special rules apply for services relating to immovable property and certain services provided to non-residents.

The export and re-export of goods is exempt from VAT with the right to credit input tax (formerly referred to as zero-rated). VAT-exempt supplies include financial services, goods and services required for oil and gas operations, and medical services.

Reverse-charge VAT applies to services provided to Georgian taxpayers by a non-resident entity.

A VAT payer is a person who is registered or required to be registered as a VAT payer. Any person whose annual taxable turnover exceeds 100,000 Georgian lari (GEL) in any continuous period up to 12 months or who produces or imports excisable goods must register as a VAT payer. In addition, an enterprise that expects to perform one-off taxable transaction of more than GEL 100,000 must also register as a VAT payer no later than the second day after effecting the transaction.

Customs duties

Import tax is levied on goods that cross the economical borders of Georgia (except export). Depending on the types of products, general rates on imported goods are: 0%, 5%, and 12%. Imported cars are taxed at GEL 0.05 multiplied by the volume of the engine, plus 5% of import tax on each additional year of ownership.

Excise tax

Excise tax is levied on specified goods that are produced in Georgia or imported into Georgia. Excise tax generally is calculated with reference to the quantity of goods (e.g. volume, weight) or, in the case of automobiles, on the basis of the engine capacity and vehicle age. Excise tax rate varies from GEL 0.15 to 400 for one unit.

Excise tax applies to the following goods:

- Alcoholic drinks (i.e. GEL 5 per litre of whiskey).

Georgia

- Condensed natural gas, except for pipeline.
- Oil distillates.
- Goods produced from crude oil.
- Tobacco products.
- Automobiles.

The export of excisable goods is exempt from excise tax with the right to credit.

Apart from goods, mobile telecommunication services and termination service of international calls in mobile and fixed networks are also subject to excise tax in Georgia.

The applicable excise rate for mobile telecommunication services is 8%.

International calls termination is taxable based on the call duration with the following rates:

- Call termination within mobile network: GEL 0.15 per minute.
- Call termination within fixed network: GEL 0.08 per minute.

Property tax

Property tax is payable at the rate of 1% on the annual average residual value of fixed assets (except for land) and investment property on the balance sheet as well as on leased out property of Georgian entities or foreign entities with taxable property in Georgia. For immovable property acquired before 2005, the average residual value must be multiplied by a coefficient of between 1.5 and 3, depending on the acquisition date.

Land tax

The annual land tax rate for agricultural land varies according to the administrative unit and the land quality.

The base tax rate per 1 hectare of agricultural land varies from GEL 5 to GEL 100. The tax is further adjusted by a territorial coefficient of up to 150%, depending on the location.

The base tax rate payable on non-agricultural land is GEL 0.24 per square metre, which is further adjusted by a territorial coefficient not exceeding 150%.

Transfer taxes

There are no transfer taxes in Georgia.

Stamp taxes

There are no stamp taxes in Georgia.

Payroll taxes

Payroll tax in Georgia represents a normal personal income tax (PIT), which is withheld by an employer at the source of payment of salary to an employee at a 20% rate of gross payment.

Social security contributions

There are no social security contributions in Georgia.

Branch income

Branch income is taxed at the general rate of 15%. There is no tax on branch profit remittances.

Income determination

Taxable income is determined as the difference between the gross income of a taxpayer and the relevant deductions granted under the Georgian tax code.

Inventory valuation

A taxpayer is required to record the value of goods produced or acquired as the outlays (except for depreciation charges) or the purchase price in tax accounting. Furthermore, the taxpayer shall include the storage and transportation expenses in the value of such goods.

A taxpayer is entitled to record the cost of inventory using the individual accounting method, the average weighted cost method, or first in first out (FIFO).

Capital gains

The Georgian tax code does not define any separate tax for capital gains. Capital gains are taxable as normal business income at the general CIT rate.

Dividend income

Dividends received by local legal entities (except for sole enterprises and entrepreneur partnerships) are not subject to taxation at source and shall not be included in gross income.

Dividends received by non-resident enterprises from resident enterprises are subject to WHT at source (*see the Withholding taxes section for more information*).

Interest income

Resident legal entities and PEs of non-residents that received interest income that was taxed at source in Georgia are entitled to a credit on tax paid to the state budget.

Interest income received from a licensed financial institution is not subject to WHT at source, and it should not be included in the gross income of a recipient unless the recipient is another licensed financial institution.

Rent/royalty income

Rent and royalty income received by resident companies and/or PEs of non-resident enterprises should be included in the gross income of the enterprise and taxed at the CIT rate of 15%.

Foreign income

Resident legal entities are subject to CIT on their worldwide income. Foreign income is subject to CIT at 15%. There is no tax deferral available under the Georgian tax code.

Deductions

Expenses connected with the receipt of income generally are deductible from income, provided sufficient primary documentation is available.

Depreciation

The declining-balance method of depreciation applies to fixed assets for tax purposes. The maximum rate of depreciation is 20% for most fixed assets, though buildings and construction are subject to depreciation at the rate of 5% (please contact us for additional information regarding other groups and rates).

A taxpayer is entitled to fully deduct costs of fixed assets (excluding those contributed to capital) in the year when the fixed assets are put into operation (a form of capital

Georgia

allowance). In case the taxpayer employs the right of full deduction in this manner, this method may not be changed for five years.

Amortisation of intangible assets

Intangible assets (e.g. goodwill) are amortisable in proportion with the period of beneficial use. However, intangible assets of value less than GEL 1,000 are fully deductible from gross income.

If the period of beneficial use of an intangible asset cannot be defined, it is amortisable at the rate of 15%.

Start-up expenses

Expenses incurred before registration of an entity as a taxpayer (e.g. public registry fee) are not deductible under Georgian tax legislation.

Interest expenses

Interest paid on loans is deductible within the limits established by the Finance Minister, unless it is paid on loans received from domestic licensed banks and microfinance organisations. The annual deductible interest rate limitation established by the Minister of Finance of Georgia for the year 2016 is 24%. No limits are established on loans received from domestic licensed banks and microfinance organisations.

Bad debt

A taxpayer is entitled to deduct bad debt only if all of the following conditions are met:

- The bad debt is related to the taxpayer's goods or services sold.
- Income receivable from the sale of goods or services was previously included in taxable gross income.
- The bad debt has been written off and recorded as such in the taxpayer's accounting records.
- Certain documents prescribed under the Georgian tax code are available confirming that the debt is irrecoverable.

Charitable contributions

Charitable contributions are deductible, up to 10% of taxable profit.

Fines and penalties

Fines and penalties paid to the state budget are not deductible.

Taxes

CIT is disallowed for deduction.

Other significant items

The following other expenses are not deductible:

- Expenses not related to the generation of income.
- Expenses related to the receipt of income exempted from CIT.

The deduction of certain expenses is subject to limitations, including:

- Representation expenses, up to 1% of gross income.
- Repair expenses, up to 5% of the book value of the relevant asset at the end of the year. Any excess must be capitalised and deducted through depreciation.

Net operating losses

Losses may be carried forward for five years but may not be carried back.

A taxpayer may elect to extend the carryforward period to ten years. However, this also results in the statute of limitations period being extended from six to 11 years.

International financial companies, free industrial zone (FIZ) enterprises, and Special Trading Companies are not entitled to carry forward losses.

An international financial company is a financial institution that, on behalf of the application of plenipotentiary representative, gets state registered, is granted as 'international financial company', and is given a status confirming certificate. These are resident companies that, after application, were granted the status of international financial company.

An FIZ enterprise is an enterprise operating in the FIZ, which, for the purposes of tax exemption, is granted the status of an FIZ enterprise.

Payments to foreign affiliates

There is no special tax regime in Georgia for payments made to the foreign affiliates; as such, general rules will apply. Payments may be classified as equity, financing, or service fee. Any such transaction will need to be at arm's length in accordance with the Georgian transfer pricing rules.

Group taxation

Georgian law does not provide for taxation of groups.

Transfer pricing

The transfer pricing rules introduced in the tax code are broadly based on the OECD arm's-length principle adopted in tax treaties and by most countries when they implement domestic transfer pricing rules.

The law recognises the five OECD transfer pricing methods for evaluating whether prices are at arm's length:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Net profit margin method.
- Profit split method.

The tax code stipulates that in accordance with the Ministry of Finance (MoF) instructions, the tax authority may recalculate the taxes if they can prove that the prices applied by related parties of transactions differ from the market prices.

According to the instructions issued by the MoF, the methods for assessing the transfer pricing assessment rules have been explained, and the following procedures have been established:

- Determination of comparability of independent transactions.
- Transaction adjustment procedure.
- Information to be represented by the parties of the transaction to the tax authority.
- Documentation list.
- Sources of information on market prices.
- Price range application procedure.

The taxpayer becomes liable to present documentation to the tax authority in support of one's position in considering income received to be consistent with market principles within 30 days of the formal request of the Revenue Service. The report can be written

Georgia

in both Georgian and English but should be translated to Georgian in case it is requested by the Revenue Service. The companies also have an option to sign an Advance Pricing Agreement (APA) in which the transfer pricing methodology will be agreed for specific transactions with the tax authority, who will no longer have the right to charge fines/taxes on these transactions.

The following general penalties, determined by tax legislation, apply for non-compliance with the arm's-length principle or failing to prepare or submit transfer pricing documentation:

- An understated tax liability (e.g. VAT, CIT) is subject to a penalty of 50% of the understated tax.
- Late payment of taxes is subject to interest at a rate of 0.05% per overdue day.
- Failing to submit a required document is generally subject to a penalty of GEL 400.

Thin capitalisation

Interest expense may be disallowed if a company's debt-to-equity ratio exceeds 3:1 (5:1 for leasing companies). The thin capitalisation rules do not apply to financial institutions, entities that have gross income of less than GEL 200,000, and entities with interest expense that is less than 20% of their taxable income before deducting such interest expense.

Note that the Georgian government postponed application of the thin capitalisation rules until 1 January 2018.

Controlled foreign companies (CFCs)

Georgia tax legislation does not provide CFC rules.

Tax credits and incentives

Foreign tax credit

Income tax or profit tax paid on income earned from outside Georgia may be credited against CIT payable in Georgia. The amount of credited taxes may not exceed the Georgian tax payable on the foreign income.

CIT exemptions

The following are exempt from CIT (the list is not exhaustive):

- Income of budgetary, international, and charitable organisations (including grants, membership fees, and donations), except for the profit from commercial activity.
- Profit received from financial services conducted by international financial companies.
- Gains on sales of securities issued by international financial companies.

Free industrial zone (FIZ)

The following rules apply for enterprises located in an FIZ:

- Income received by an FIZ enterprise from its permitted activities conducted in an FIZ is exempt from CIT.
- The importation of foreign goods into an FIZ is free of customs duties and VAT-exempt.
- Operations carried out in an FIZ are VAT-exempt without the right to credit.
- Property located in an FIZ is exempt from property tax.
- The PIT of employees is paid by those individuals through self-reporting.

An FIZ enterprise should pay tax at a rate of 4% on the market price of the goods supplied/received to/from a person registered under the Georgian law (excluding on the supplies to/from other FIZ enterprises).

Withholding taxes

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to WHT at the following rates:

Income	WHT (%)
Dividends	5
Interest	5
Royalties	5
Oil and gas subcontractor income	4
International transportation/communication	10
Income from services rendered in Georgia	10
Other Georgian-source income	10
Insurance and re-insurance	0

Payments of interest, royalties, or other Georgian-source income to non-residents registered in so called 'black listed' countries are subject to WHT at a 15% rate.

The list of such countries is determined by the Ministry of Finance of Georgia.

Double tax treaties (DTTs)

For those countries with which Georgia has entered into DTTs, the WHT rates are the following:

Recipient	Dividends (%)	Interest (%) (1)	Royalties (%)
Non-treaty (14)	5	5	5
Treaty:			
Armenia	5/10 (15)	10	5
Austria	0/5/10 (2)	0	0
Azerbaijan	10	10	10
Bahrain	0	0	0
Belarus	5/10 (15)	5	5
Belgium	5/15 (15)	10	5/10 (3)
Bulgaria	10	10	10
China, People's Republic of	0/5/10 (2)	10	5
Croatia	5	5	5
Czech Republic	5/10 (15)	8	0/5/10 (4)
Denmark	0/5/10 (2)	0	0
Egypt	10	10	10
Estonia	0	0	0
Finland	0/5/10 (2)	0	0
France	0/5/10 (6)	0 (5)	0
Germany	0/5/10 (6)	0	0
Greece	8	8	5
Hungary	0/5 (8)	0	0
Iceland	5/10 (15)	5	5
India	10	10	10
Iran	5/10 (15)	10	5

Georgia

Recipient	Dividends (%)	Interest (%) (1)	Royalties (%)
Ireland	0/5/10 (9)	0	0
Israel	5	0/5 (10)	0
Italy	5/10 (15)	0	0
Kazakhstan	15	10	10
Kuwait	0/5 (11)	0	10
Latvia	5/10 (15)	5	5
Lithuania	5/15 (15)	10	10
Luxembourg	0/5/10 (2)	0	0
Malta	0	0	0
Netherlands	0/5/15 (2)	0	0
Norway	5/10 (15)	0	0
Poland	10	10	10
Portugal	5/10 (15)	10	5
Qatar	0	0	0
Romania	8	10	5
San Marino	0	0	0
Serbia	5/10 (15)	10	10
Singapore	0	0	0

Turkey	10	10	10
Turkmenistan	10	10	10
Ukraine	5/10 (15)	10	10
United Arab Emirates	0	0	0
United Kingdom	0/15 (7)	0	0
Uzbekistan	5/15 (15)	10	10

Notes

1. Some agreements provide a 0% rate on the interest paid by the government or any of its units or on the interest guaranteed by them; this table doesn't consider such provisions.
2. The 0% rate applies if the foreign company owns at least 50% of the Georgian company and has invested more than 2 million euros (EUR).
3. Royalty rate paid for the enterprise is 5%.
4. The 0% rate refers to the copyright of any literature, art, or scientific works (except software), and films and records; the 5% rate refers to lease of techniques.
5. The 0% rate applies to interest on bank loans and commercial credits.
6. The 0% rate applies if the foreign company owns at least 50% of the Georgian company and has invested more than EUR 3 million.
7. The 0% rate applies if the foreign company owns at least 50% of the Georgian company and has invested more than 2 million pound sterling (GBP).
8. The 0% rate applies if the foreign company owns at least 25% of the Georgian company in any continuous 12-month period prior to distribution of dividends.
9. The 0% rate applies if the foreign company controls at least 50% of the voting power in the Georgian company and has invested more than EUR 2 million.
10. The 0% rate applies for certain types of interest.
11. The 0% rate applies if the foreign company has invested in the Georgian company more than 3 million United States dollars (USD).
12. The 0% rate applies if the foreign company owns at least 10% of the Georgian company.
13. The 0% rate applies if the foreign company owns at least 10% of the capital or the voting power of the Georgian company.
14. Domestic WHT rates are applicable when a treaty provides a relief with more unfavourable rates.
15. Domestic WHT rate on dividends is 5%. A treaty provides a relief with the same or more unfavourable rate, thus the domestic rate is applicable.

Tax administration

The tax departments under the Ministry of Finance are responsible for tax administrative matters in Georgia.

Taxable period

The tax year is the calendar year in Georgia.

Tax returns

A CIT return should be submitted before 1 April of the year following the reporting period.

Payment of tax

CIT is paid in advance in four equal instalments, before 15 May, 15 July, 15 September, and 15 December. The advance instalments are estimated according to the previous year's annual tax. A taxpayer with no prior-year CIT obligation is not required to make advance payments.

Final payment is due by 1 April of the year following the reporting period. Excess CIT payments may be offset against other tax liabilities.

Tax audit process

There are two types of tax audits: desk tax audit and field audit. The tax audit may be conducted based on the order of the Revenue Service of Georgia. The Revenue Service sends a notice to the taxpayer no less than ten working days before the commencement of the audit. The audit should commence no later than 30 days after receiving such notice by the taxpayer. Normally, the tax audit may last for three months, and may be extended to another two months with the approval of the head of the Revenue Service. The findings should be presented to the taxpayer in the form of a tax act.

Statute of limitations

The statute of limitations is four years in Georgia in 2016. For those taxpayers who decide to increase the loss carryforward to ten years, the statute of limitations is 11 years. The statute of limitations period was six years prior to 2015, five years in 2015, and will decrease to three years in 2017.

Topics of focus for tax authorities

In recent periods, the tax authorities have become largely focused on transfer pricing issues during tax audits.

Other issues

International agreements

Georgia is a member of the North Atlantic Treaty Organization's (NATO's) Partnership for Peace Program and is actively working to join NATO and the European Union (EU). Georgia is also a member of the World Trade Organization (WTO), the United Nations (UN), the Organization for Security and Co-operation in Europe (OSCE), and the Union of Georgia, Ukraine, Uzbekistan, Azerbaijan, and Moldova (GUUAM), and an observer in the Council of Europe.

Georgia was formerly a member of the Commonwealth of Independent States (CIS). Because of the August 2008 conflict with Russia, Georgia formally notified the CIS on 18 August 2008 of its intention to withdraw from the organisation, and that withdrawal came into effect on 18 August 2009. However, Georgia's Ministry of Foreign Affairs has said it will uphold all trade and treaty agreements made between Georgia and fellow CIS countries.

Georgia

Georgia has a free-trade regime with members of the CIS, including Armenia, Azerbaijan, Kazakhstan, Turkmenistan, Uzbekistan, Ukraine, and Turkey. This results in duty-free trade of goods and services.

On 18 December 2002, the GUUAM free-trade agreement was ratified by the Georgian Parliament, the goal of which is to create favourable trade conditions and to strengthen economic links among the member countries. The agreement to form a free-trade zone was reached at the GUUAM Presidents' Summit in July 2003 in Yalta. Uzbekistan has since left the free-trade zone.

In June 2014, the European Union and Georgia signed an unprecedented Association Agreement. This Agreement aims to deepen political and economic relations between Georgia and the European Union and to gradually integrate Georgia into the European Union.

In July 2015, an intergovernmental agreement (IGA) was signed by and between Georgia and the United States about tax reporting and withholding procedures associated with the Foreign Account Tax Compliance Act (FATCA). As a result, Georgia joined a list of countries that provide financial information to its partner country, the United States, for the deterrence of facts of tax evasion by its citizens.

Significant developments

There has been little significant legislative activity over the past year, and that little has been confined to reacting to court cases and international developments. The coalition agreement between the three governing parties mentions taxes only in general terms without proposing any specific reforms. However, it does indicate an intention to slightly simplify compliance procedures, to move towards a self-assessment system, at least for corporations, and to step-up the struggle against tax evasion/avoidance, especially within international groups of companies. In that latter regard, it suggested waiting until the Organisation for Economic Co-operation and Development (OECD) Base Erosion and Profit Shifting (BEPS) project conclusions became available. This has now happened, although German action has been confined to pressing more emphatically for a system of automatic information exchanges as the more viable alternative to the previous OECD model agreement on information exchanges only on request.

G

Taxes on corporate income

Germany taxes its corporate residents on their worldwide income. However, most double tax treaties (DTTs) exempt income attributable to a foreign permanent establishment (PE). Non-residents with PE or property income are taxed by assessment on German-source income; those earning royalties and dividends are taxed by withholding at source. Interest paid abroad is, in most cases, free of German tax altogether.

German business profits are subject to two taxes, corporation tax and trade tax.

Corporation tax (*Körperschaftsteuer*)

Corporation tax is levied at a uniform rate of 15% and is then subject to a surcharge of 5.5% (solidarity levy).

Trade tax (*Gewerbesteuer*)

The effective rate of trade tax varies by location from the legal minimum of 7%, which applies in a few small villages in depressed areas, to the Munich rate of 17.1%. The local rates in most cities range between 14% and 16%, while those in small towns can be as low as 12%. The basis for this tax is the adjusted accounting profit: in particular, 25% of all financing costs over 100,000 euros (EUR), including the implicit financing costs in leasing, rental, and royalty payments, are added back to taxable income.

If the basis for the two taxes is identical (unlikely in practice), the overall burden on corporate profits earned in Munich would be 33%. In Frankfurt, the burden would be 32%. In Berlin, it would be 30.2%.

Corporate residence

A corporation is resident in Germany for tax purposes if either its place of incorporation or its main place of management is in Germany. A corporation meeting neither of these criteria will be regarded as non-resident with tax obligations limited to its income from German sources. These include active business activities through a PE or the letting of property, as well as investment income, royalties, and equipment rental (leasing). Income of the first two categories is generally taxed by assessment on the actual net earnings. That of the last three is usually taxed at source by withholding from the gross amount payable. Interest paid abroad is generally tax-free. However, interest on convertible or profit-sharing bonds is taxed as a dividend; interest on a German property or ship mortgage is seen as property or shipping income, respectively.

Permanent establishment (PE)

Domestic law defines a PE as any fixed business facility serving the corporate purpose. 'Fixed' is not defined further, but is generally taken to imply a duration of at least six months. A permanent representative is someone who 'habitually' deals on behalf of the principal acting on the principal's instructions, again without any specific time limit. Germany consistently follows the OECD model in her tax treaty PE definitions; consequently, purchasing activities, delivery stores, and independent agents acting in the ordinary course of their business are regularly excluded from the PE concept. Recent tax treaties generally reflect the Authorised OECD Approach to PE income, and Germany has also negotiated corresponding amendments to a number of older treaties. The Authorised OECD Approach has been adopted into domestic law and is generally followed in practice unless doing so would lead to double taxation from continued adherence to the old approach (of treating a PE as part of the same legal entity as its head office) in the other state.

Other taxes

Value-added tax (VAT)

Proceeds of sales and services effected in Germany are subject to VAT under the common system of the European Union (EU) at the standard rate of 19% (7% on certain items, such as food and books). The taxpayer generally is entitled to deduct the VAT charged on inputs from that payable on outputs.

VAT is administered by the tax office responsible for the corporation tax assessment of a company. It is based on returns filed monthly or quarterly by the tenth day of the following month (monthly for new businesses or where the tax payable in the previous year was more than EUR 7,500) drawn up on the basis of the actual transactions during the filing period as shown in the books of account. A permanent filing extension of one month is available against an advance payment of one-eleventh of the total net tax due during the previous year. Otherwise, payment is due when the return is filed.

Legally, VAT is an annual tax. Each taxpayer must file an annual return for each calendar year, regardless of the actual accounting date for the business. The VAT return is filed together with the corporation and trade tax returns. If the annual return does not agree with the total of the monthly or quarterly returns, the tax office can be expected to ask for a detailed explanation and to penalise any irregularity.

Customs duties

Customs duties are levied under a common system on imports into the European Union. The rate is set at zero on most imports from EU candidate countries and on many imports from countries with which the European Union has an association agreement.

For manufactured products from other countries, the rates generally lie within the range of 0% to 10%. The basis is the import value of the goods and thus includes uplifts for

royalty or other payments associated with their use but not apparent from the transit documents.

The European Commission (EC) also sets 'countervailing' duties from time to time on specific imports from specific countries in order to counter dumping attempts. The countervailing duty rate is set to fully absorb the dumping margin and is therefore usually much higher than 10%.

Excise taxes

Excise taxes on fuel, electric power, insurance, and some other products are not a compliance issue for businesses other than dealers in bonded goods and insurance companies, although they can be a significant additional cost factor for business users. These excise taxes also have an environmental element in as much as the rates are set to discourage excessive use of pollutants. However, an air passenger duty is the only tax on pollution as such. Energy producers (such as power stations) can claim a refund of the excise tax borne in the cost of the energy products used in the production process.

Property taxes

There are no taxes on wealth or capital employed. There is a minor local authority tax on property, but the effect of this is partly offset by an additional trade tax deduction.

Stamp taxes

The only significant German stamp tax is the real estate transfer tax on the consideration on conveyances of German property. The rate varies by province; in 2016, the rate is 3.5% for property in Bavaria and Saxony; 4.5% in Hamburg; 5% in Baden-Württemberg, Bremen, Lower Saxony, Mecklenburg-German Pomerania, Rhineland-Pfalz, Saxony-Anhalt, and Thuringia; 6% in Berlin and Hessen; and 6.5% in Brandenburg, North Rhine-Westphalia, the Saar, and Schleswig-Holstein.

This tax is also levied on indirect transfers from the acquisition of at least 95% of the shares in property-owning companies. This applies to shares in the shareholder throughout the corporate chain. If the transfer is indirect, and therefore without its own specific consideration, the basis for the tax is 12.5 times the annual rentable value. This value is derived from rents actually achieved over the past three years or estimated from statistics maintained by the local authority. The Constitutional Court has recently held this valuation to be unconstitutional as it can only reflect actual land values by coincidence. Parliament has until 30 June 2016 to enact a new formula to be applied retroactively to all transactions from 1 January 2009. To date, there has been no public announcement on the intended policy.

The tax is not levied on direct or indirect transfers without consideration in the course of a corporate reorganisation under the laws of a member state of the European Economic Area (EEA), provided at least 95% of the ultimate interest in the property remains unchanged for five years before and after the transaction.

Payroll taxes

Employers are required to pay employee remuneration under deduction of the income tax due. The amounts deducted are paid over to the tax office at regular, usually monthly, intervals. The actual deductions are calculated from the gross pay, taking the employee's marital, family, and other personal circumstances into account. The necessary personal details can be downloaded from a government database. For the employee, the payroll tax deduction is a prepayment on the income tax due after filing his or her annual income tax return. As such, the payroll tax is a withholding tax and not therefore a financial burden on the employer. However, employers are required to deduct the correct amounts and are thus exposed to the risk from a later tax audit assertion of under-deduction, especially as there are often legal or practical impediments to recovery from the employees after the event. The administrative effort involved is also far from insignificant.

Germany

Social security contributions

All employers are required to account for social security contributions on wages and salaries paid, up to set monthly limits. There are four separate types of insurance: for old-age pensions, unemployment benefits, health care, and invalidity care. Employees regularly earning more than EUR 56,250 *per annum* can opt out of the health and invalidity insurances if they take out appropriate coverage with a private insurance company. The pension and unemployment insurances are compulsory for all employees. The upper monthly salary limits are EUR 6,200 (EUR 5,400 in the eastern part of Germany) for the pension and unemployment insurances and EUR 4,237.50 for the health and invalidity insurances. The rates are as follows:

- Pension insurance: 18.7%, of which the employee's share is one half.
- Unemployment insurance: 3.0%, of which the employee's share is one half.
- Health insurance: 14.6%, of which the employee's share is one half. The health funds have the power to levy a supplement.
- Invalidity insurance: 2.35%, of which the employee's share is one half.

Branch income

Both corporation tax and trade tax are imposed on the taxable income of a foreign company's German branch. The rates are the same for branches as for resident German companies, although the withholding tax (WHT) on dividend distributions by German companies is not deducted from profits transferred by a German branch to its foreign head office.

Income determination

Strict conformity between book and tax reporting is no longer required. Rather, a company must draw up its financial statements according to the dictates of fair presentation, but may exercise all valuation and other options in the tax acts in its own best tax interest without regard to the accounting treatment for the item concerned. It must keep a register of all variances between the financial statements and the tax computation showing the basis on which each arose and its reversal. International Financial Reporting Standards (IFRS) financial statements are not accepted as a basis for computing taxable income.

Inventory valuation

Inventories normally are valued at the lower of actual cost, replacement cost, and net realisable value. However, any write-downs below actual cost must be for specific reasons. If specific identification of the inventories is not possible, valuation at either standard or average cost is acceptable. The last in first out (LIFO) method is accepted as an option. First in first out (FIFO) is not accepted unless its assumption accords with the facts, although this condition is often fulfilled in practice.

Long-term liabilities and accruals

Non-interest bearing long-term liabilities, other than advance payments received, must be discounted at 5.5% per year. A similar provision applies to refurbishment (to restore an asset to its original condition) and other accruals that accumulate over time.

Capital gains

Generally, capital gains realised by a corporate entity from a disposal of business assets are treated as ordinary income. It is possible to postpone the taxation of part or all of the gain on real estate by offsetting the gain against the cost of a replacement property.

Capital gains from the sale of investments in other companies are exempt from corporation and trade taxes. Corresponding losses are not deductible. However, 5% of

the capital gains are added back to taxable income as non-deductible, directly-related expenses.

Dividend income

Dividends received on significant holdings are exempt from corporation and trade taxes without a minimum holding period. Portfolio dividends are taxable. A portfolio holding is less than 10% for corporation tax and less than 15% for trade tax. 5% of the tax-free gross dividend is added back to taxable income as non-deductible business expenses.

Note that banks do not enjoy this exemption on dividends from securities held for trading.

Stock dividends

In principle, a declaration of stock dividends (by converting reserves to capital stock) by a company will not lead to taxable income for the shareholder or to other tax effects. Subsequent capital reductions, however, will be treated as cash dividends in most circumstances. There is no German tax reason for distributing a stock dividend as opposed to merely leaving accumulated profits on the books to be carried forward. The decision, therefore, depends upon the situation in the investor's home country.

Interest income

Interest received is taxed as part of a company's ordinary trading income. There is no exemption corresponding to the trade tax disallowance of 25% of the interest expense or to the general tax disallowance of net interest expense in excess of 30% of 'earnings before interest, tax, depreciation, and amortisation' (EBITDA) under the interest limitation rule (*see the Deductions section*). However, since the interest limitation is based on the net interest margin, a company can benefit from earning income as interest as opposed to an interest substitute.

Foreign income

Foreign income, except dividends, received by a German corporation from foreign sources is included in taxable income for corporation tax unless a tax treaty provides for an exemption. Foreign PE income, in most cases, is exempt from corporation and trade taxes, while double taxation on most items of passive income (e.g. interest and royalties) is avoided by foreign tax credit or, at the taxpayer's option, by a deduction of the foreign taxes as an expense.

Irrespective of any tax treaty, income from a foreign branch or partnership is not charged to trade tax.

The Foreign Tax Act sets anti-avoidance (including controlled foreign company [CFC]) rules with respect to subsidiaries in certain lines of business subject to a low-tax regime. A low-tax regime is one in which the rate applicable to the income in question is less than 25%. Most forms of passive income fall under the CFC rules, which essentially attribute the income to the German shareholder as though it had been earned directly. Active business income is not generally caught where the business operates from properly established facilities.

Investment income held in an EU/EEA subsidiary is also exempt from attribution, provided the subsidiary is commercially active in its country of operation and maintains at least a minimum establishment.

Other provisions give the tax office the right to insist on full disclosure of all the facts and circumstances surrounding a transaction as a condition for the deduction of a business expense incurred within an essentially tax-free environment for the supplier. This rule operates independently of ownership or shareholding considerations.

Deductions

Depreciation and amortisation

Depreciation on movable fixed assets is calculated on the straight-line method over the asset's anticipated useful life. Depreciation takes the residual value of the asset into account only if it is material, with any gains on a sale being treated as normal business income.

Buildings are depreciated on a variety of straight-line or reducing-rate systems designed to reach a full write-down between 25 and 50 years, depending on the age of the building and on whether the taxpayer was its first owner.

In addition to normal depreciation, special depreciation is deductible for tax purposes in certain limited circumstances (e.g. small businesses, ancient monuments, buildings in designated renovated city zones).

Intangibles are amortised straight-line over their estimated useful lives; goodwill is amortised over 15 years.

Start-up expenses

Start-up and formation expenses are deductible as incurred.

Interest limitation

Annual net interest expense (the excess of interest paid over that received) of group companies is only deductible at up to 30% of EBITDA for corporation and trade tax purposes. The 30% limitation applies to all interest, whether the debt is granted by a shareholder, related party, or a third party.

This limitation does not apply where the total net interest expense for the year is less than EUR 3 million or where the net amount paid to any one shareholder of more than 25% (or a related party) is no more than 10% of the total. However, this latter concession is dependent on the demonstration that the equity-to-gross assets ratio of the company is no more than two percentage points below that of the group as a whole. Unused EBITDA potential may be carried forward for up to five years to cover future excess interest cost. This carryforward is otherwise subject to the same principles as the loss carryforward, including curtailment on change of shareholder(s).

The Supreme Tax Court has held the interest limitation to be in breach of the constitution and has asked the Constitutional Court to give a definitive ruling. Companies with disallowed interest under the limitation rule are advised to appeal against assessment notices and, if appropriate, ask for suspension of the appeal hearing pending the decision of the Constitutional Court.

It is emphasised that the interest limitation is additional to, and not a substitute for, the transfer pricing requirement that related-party finance be at arm's length.

Bad debts

Bad debts incurred on trading with unrelated parties are deductible once irrecoverability is apparent and all attempts to pursue the debt have failed or been abandoned. Provision for future bad debts may be made; general provisions must reflect the past experience of the business; specific provisions require specific justification based on the actual circumstances. Loans to shareholders of more than 25% or to their related parties may not be written down or off with tax effect, unless a third party creditor would have granted the loan or allowed it to remain outstanding in otherwise similar circumstances.

Charitable contributions

Donations to recognised charities in cash or in kind are deductible, up to the higher of 20% of otherwise net taxable income or 0.4% of the total of sales revenue and wages

and salaries paid during the year. Donations to charities registered in other EU/EEA member states also qualify for deduction if the recipient charity meets the German requirements for recognition.

Fines and penalties

Fines and other penalty payments levied by a court, or other authority, with an intent to punish are not deductible. By contrast, those levied to confiscate ill-gotten gains, or to relieve damage to the victims or to the public good, are deductible. Penalty payments levied for attempted tax evasion are not deductible, but late payment surcharges are deductible if the tax itself is (e.g. VAT).

Taxes

All taxes borne are deductible except for corporation tax, trade tax, and the VAT on most non-deductible expenses.

Net operating losses

Net operating losses are carried forward without time limit. For corporation tax (but not trade tax), there is an optional carryback to the previous year of up to EUR 1 million.

The loss relief brought forward claimable in any one year is limited to EUR 1 million plus 60% of current income exceeding that amount. The remaining 40% of income over EUR 1 million is charged to trade and corporation taxes at current rates. This is referred to as 'minimum taxation'.

The loss carryforward ceases if a single (immediate or ultimate) shareholder acquires more than 50% of the issued capital (voting rights) within a five-year period. An acquisition of between 25% and 50% leads to a corresponding reduction in the loss carryforward.

These forfeiture rules do not apply to share acquisitions as part of a group internal reorganisation without effect on the single ultimate shareholder, or inasmuch as the loss carryforward is covered by hidden reserves in the company's assets that, on realisation, will lead to German taxation. This excludes the appreciation in value of shareholdings in other companies as well as business assets held in foreign PEs.

Payments to foreign affiliates

A German corporation can claim a deduction for royalties, management service fees, and, subject to the interest limitation, interest charges paid to foreign affiliates, provided the amounts are at arm's length. Detailed provisions covering both form and substance define this. In particular, all services must be covered by prior written agreement, and it is also necessary to conclude agreements for the purchase and sale of goods in writing where this would be usual between third parties (e.g. for quantity rebates on sales). The substance tests must be satisfied, both as to value for money and as to business relevance. Thus, the manager of a German subsidiary must be able to show both an adequate business benefit from a related-party transaction and that the company could not have obtained a better deal on the open market. These and all other aspects of inter-company (related-party) trading fall under strict and extensive documentation requirements, breach of which can lead to serious penalties.

Special features for trade tax

There are a number of differences between the income subject to trade tax and to corporation tax. The most significant is the trade tax disallowance of one-quarter of the interest costs, including interest implicit in leasing, rental, and royalty charges. Banks have an exemption from this interest disallowance.

Group taxation

If a German parent holds more than 50% of the voting rights in a domestic subsidiary, the two may conclude a formal, five-year, court-registered profit pooling agreement. The ensuing relationship is then referred to as an *Organschaft*. Effectively, the annual results of an *Organschaft* are pooled in the accounts and tax returns of the parent. Profits and losses within a group can therefore be offset, but there is no provision for the elimination of intra-group profits from the total tax base. It should also be noted that any loss incurred within an *Organschaft* is excluded from offset in the same or another year if a foreign country takes it into account in the taxation of an *Organschaft* member, or of any other entity.

Transfer pricing

Extensive rules on transfer pricing in respect of all transactions with foreign-related parties are in force. The basic principle is that all trading should be at arm's length, but the documentation requirements go far beyond the level of documentation normally found sufficient to demonstrate a conscientious approach to true third-party business. Failure to meet these rules exposes the company to serious risk of penalties as well as unfavourable estimates by the authorities, who have the right to exercise every possible leeway or margin to the taxpayer's disadvantage.

Thin capitalisation

There are no thin capitalisation rules as such; their substitute is the 'interest limitation' to, basically, 30% of EBITDA discussed in the *Deductions* section.

Controlled foreign companies (CFCs)

Germany operates a CFC regime aimed at passive income sheltered abroad and taxed at less than 25%. Essentially, the income is added to that taxable in Germany in the regular manner against a credit for the foreign tax actually paid and not recoverable by either the foreign entity or its shareholder. Active business income, except from tourism and the arms trade, is generally exempt from the CFC net, provided it is earned through a properly established facility of a scale appropriate to the activity concerned. Treaty and EU directive rules exempting foreign income are respected, although taxpayers do have to demonstrate their treaty entitlement.

Tax credits and incentives

Germany does not offer tax incentives except in very limited circumstances, not usually of direct business relevance (e.g. special depreciation for buildings under a conservation order). Partly, this is a question of the state budget, and partly, it reflects the constitutional requirement for equal treatment of all taxpayers.

Other incentives

Local authorities may offer facilities on favourable terms, such as the provision of cheap land on industrial estates.

Foreign tax credit

If foreign-source income is not exempt from German taxation, a credit will be given for the foreign tax actually paid and not otherwise recoverable. However, the credit is limited to the corporation tax (including the solidarity levy) on the net income after deducting the related expense. Unused credit is lost, as there are no provisions for carryforward or for offset against other taxes, such as trade tax. There are still a few cases of fictitious foreign tax credits under tax treaties with developing countries (to protect the treaty partner's investment incentives), but German treaty policy is to abandon such provisions at the first opportunity.

Withholding taxes

Resident corporations paying certain types of income are required to withhold tax as shown in the following tables. There is also a solidarity levy of 5.5% on the tax due.

General

Recipient of German-source income	WHT (%)		
	Dividends (1)	Interest (1, 2, 3)	Royalties
Resident corporations and individuals	25	25	0
Non-resident corporations and individuals (1):			
EU corporations (4, 5)	0	0	0
Non-treaty corporations	25	25	15
Non-treaty individuals	25	25	15

Notes

- Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15%, regardless of any further relief available under a treaty.
- Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax is also withheld from income on convertible or profit-sharing bonds.
- Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
- Where the EC Parent/Subsidiary Directive applies, dividends paid by a German company to a qualifying parent company resident in another EU member state are exempted from German WHT. The minimum shareholding is 10%, to be held continuously for at least one year.
- The EC Interest and Royalties Directive exempts payments from WHT if made to an associated company in another EU member state. The association must be through a common shareholding of at least 25%.

Movable asset rentals are taxed by assessment. For corporations, the rate is the standard 15% corporation tax (plus solidarity levy), although in certain cases the rate may be reduced by treaty.

Notes

- Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15%, regardless of any further relief available under a treaty.
- Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax is also withheld from income on convertible or profit-sharing bonds.
- Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
- The 10% royalty rate applies to access to industrial, commercial, or scientific experience.
- The treaty does not (effectively) limit the taxation of profit-based interest income; thus, the domestic rate (plus solidarity levy) applies.
- The USSR treaty continues in force with Armenia, Moldova, and Turkmenistan.
- The lower royalty rate applies to commercial and industrial royalties, as opposed to cultural royalties.
- Mortgage interest to a Belgian business is exempt unless the recipient holds at least 25% of the voting rights in the payer.
- The Yugoslav treaty continues in force with Bosnia-Herzegovina, Kosovo, Montenegro, and Serbia. Croatia, Macedonia, and Slovenia have their own treaties.
- The higher royalty rate applies to film and television (TV) royalties, licences to use trademarks and names, and to franchises.
- The Czechoslovak treaty continues to apply to the Czech Republic and to Slovakia. Interest on profit-sharing bonds is taxed as a dividend.
- 25% on trademark royalties.

Germany

13. The higher royalty rate of 5% applies to commercial, industrial, and scientific royalties.
14. Cultural royalties are exempt.
15. Per new treaty in force from 1 January 2016.
16. The 15% royalty rate applies to copyrights.
17. Treaty relief on interest, royalties, and rentals is conditional on taxation in country of receipt.
18. The 5% royalty rate applies to copyrights.
19. Royalties for copyrights, except for films and TV, are exempt.
20. The 10% interest rate applies in certain circumstances where the recipient is a bank.
21. The 15% royalty rate applies to patents, trademarks, films, and TV.
22. The dividend exemption applies to corporate shareholders with at least 80% throughout the previous 12 months.
23. The 5% royalty rate applies to industrial, commercial, film, and TV royalties.

Treaties signed, but awaiting ratification: Australia, China, Costa Rica, Israel, Japan, Oman, and South Africa.

Tax administration

Taxable period

The tax year in Germany is the calendar year.

Tax returns

Returns are filed for each calendar year and reflect the financial statements for the business year ending in that calendar year. Assessments are issued once the tax office has reviewed the return.

In principle, returns are due by 31 May of the following year. However, there is a virtually automatic extension to 31 December for those filing with professional assistance. A further extension to 28/29 February is possible, if justified under the circumstances. Known late-filers and those with a record of other irregularities can be asked to submit their returns before these extension dates, though not before 31 May.

Electronic returns

Monthly or quarterly returns for WHT from employee salaries, dividends, interest, royalties, and other payments, and for VAT must be submitted electronically. The same applies to the annual returns for corporation tax, trade tax, and VAT. There is also an electronic filing requirement for the financial statements supporting the return.

Payment of tax

Taxes are payable in quarterly instalments during the year, with a final settlement when the assessment is issued (usually five to six weeks afterwards). The quarterly instalments are based on the estimated ultimate liability. Usually, this is the total tax due shown by the last assessment issued, as adjusted by any rate changes. The corporation tax instalments are due on the tenth day of March, June, September, and December. For trade tax, the due dates are the 15th day of February, May, August, and November. Failure to pay by the due date followed by a three day grace period leads to a penalty of 1% per month.

Corporation and trade tax assessments bear interest on the net amount payable after deduction of all credits and previous payments. The rate is 0.5% per month simple interest, and the period runs from 1 April of the second year following the year of assessment until the date set for payment. The start of the interest period is independent of the actual date of assessment. It thus runs in retrospect on assessments issued later, for example following a tax audit.

Rulings

Tax offices are able to issue binding rulings in respect of planned transactions, provided the taxpayer can show a particular interest in the tax consequences of the intended action. The fee varies between EUR 241 and EUR 91,456, depending upon the amount of tax involved (no fee is charged if the tax amount is less than EUR 10,000).

Advance pricing agreements (APAs)

A taxpayer can request the Central Tax Office to negotiate an APA on related-party transactions with a foreign tax authority on one's behalf. The vehicle is the mutual agreement procedure under the treaty, and the fee is a lump sum EUR 20,000 for each new agreement.

Tax audit process

Germany relies heavily on tax audits as a means of ensuring taxpayer discipline. Audits of small businesses are carried out at random, although those for larger operations and for the local subsidiaries of foreign groups tend to be regular. With some district variations, audits are usually conducted at four to five yearly intervals, though not always with equal intensity for the entire period since the auditors' previous visit.

Statute of limitations

The statutory limitation period for the issue or correction of assessments is four years from the end of the year in which the return was filed. If no return was filed, the period runs from the end of the third year following the end of the year of assessment. The four-year period is extended to five in cases of taxpayer negligence and to ten in the event of evasion.

The statutory limitation period for the collection of tax debts is five years from the end of the year in which payment became due.

Topics of focus for the tax authorities

Tax office reviews of tax returns prior to issuing the assessment notice and payment demand are often rather superficial. Audits, though, are intense, being field reviews on site often lasting for several weeks or even months. Companies with an international focus can expect significant audit emphasis on all aspects of their dealings with their foreign business partners. If the company is a member of an international group, its most important audit component will usually be its transfer pricing on its dealings with foreign-related parties and the relevant documentation. It is emphasised that these two topics are separate fields, as documentation deficiencies can lead to unfavourable estimates on the taxpayer, even if the taxpayer is able to justify the taxpayer's group-company pricing in terms of overall result.

Other issues**International exchange of information**

The Foreign Account Tax Compliance Act (FATCA) agreement of 31 May 2013 with the United States (US) on the automatic exchange between national tax authorities of bank account information on each other's residents is now in force. The reporting obligations of banks entered into effect on 1 January 2016. In the meantime, Germany continues to press for similar agreements with other countries, to be negotiated by the EU with effect for the entire union. Agreements have been signed with Andorra, Liechtenstein, San Marino, and Switzerland and initialled with Monaco. By contrast, there is less pressure on tax haven signatories to ratify the on-request information exchange agreements previously negotiated along the lines of the now obsolete OECD model.

Significant developments

A new tax law, the Income Tax Act, 2015 (Act 896) as amended (ITA), which was passed on 1 September 2015 but entered into force effective 1 January 2016, repealed the Internal Revenue Act, 2000 (Act 592) (IRA). The ITA has not only made changes to provisions that were hitherto in the IRA but has also sought to consolidate such provisions. The ITA, in effect, seeks to align the new provisions with worldwide approaches of taxation. This summary has been updated to reflect the ITA.

2016 government budget highlights

Below are some of the reforms announced in the 2016 budget that the government of Ghana intends to undertake during the year:

- Implementation of excise tax stamp.
- Review of tax exemptions granted to business and other entities.
- Roll out the electronic point-of-sale device project fully.
- Extensive use of Tax Identification Number.

Taxes on corporate income

A resident's worldwide income is assessed for tax. Income from business and investment worldwide is included in determining the resident person's assessable income.

The business and investment income of a non-resident person is included in the assessable income for a year of assessment if that income has a source in Ghana. Where a non-resident person has a Ghanaian permanent establishment (PE), any income connected with the PE is assessed to tax.

The general corporate income tax (CIT) rate is 25%.

Mining and upstream petroleum companies pay CIT at a rate of 35%, while companies principally engaged in the hotel industry pay a reduced rate of 22%.

The CIT rate for companies engaged in non-traditional exports is 8%, while banks lending to the agricultural and leasing sectors pay a CIT rate of 20% on income from those businesses.

National Fiscal Stabilisation Levy (NFSL)

The NFSL applies to specified companies and institutions to raise revenue for fiscal stabilisation of the economy. The NFSL is 5% on the profit (accounting profit) before tax on specified companies. The specified companies and institutions include:

- Banks (excluding rural and community banks).
- Non-bank financial institutions.
- Insurance companies.

- Telecommunications companies liable to collect and pay the communications service tax (CST) under the CST Act, 2008 (Act 754).
- Breweries.
- Inspection and valuation companies.
- Companies providing mining support services.
- Shipping lines, maritime and airport terminals.

The levy shall apply to the aforementioned industries irrespective of any existing exemption granted to an entity under any other laws in Ghana. The tax payable shall not be a deductible expense in arriving at the CIT liability of an entity, and the Commissioner-General (CG) shall issue an assessment to an entity for the amount of tax payable for the period.

NFSL is payable in four equal instalments at the end of each quarter (i.e. March, June, September, and December).

The NFSL was initially scheduled to end in December 2014 but has been extended to 2017.

Local income taxes

Ghana has no local, state, or provincial government taxes on income.

Corporate residence

A company is resident if it is incorporated under the laws of Ghana or has its management and control exercised in Ghana at any time during a year of assessment.

Permanent establishment (PE)

The ITA recognises both Ghanaian PE and foreign PE.

A Ghanaian PE includes:

- a place in the country where a non-resident person carries on business or that is at the disposal of the person for that purpose
- a place in the country where a person has, is using, or is installing substantial equipment or substantial machinery
- a place in the country where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to that project, or
- the provision of services in the country.

A foreign PE means a fixed place of business situated in a foreign country where the business is conducted continuously for at least six months, but excludes any place at which only activities of a preparatory or auxiliary nature are conducted.

Other taxes

Value-added tax (VAT)

Other than exempt goods and services, VAT of 15% and the National Health Insurance Levy (NHIL) of 2.5% are charged on the following:

- Every supply of goods and services made in Ghana.
- Every importation of goods.

VAT and NHIL are charged on the supply of goods and services where the supply is a taxable supply and made by a taxable person in the course of business.

Ghana

VAT and NHIL are payable by the taxable person making the supply in the case of taxable supply and by the importer in the case of imported goods.

Most professional services are also subject to the same VAT and NHIL rates, including the following:

- Management services.
- Insurance brokerage and other services.
- Financial, tax, and economic consulting.
- Engineering and technical services.
- Accounting services.
- Courier services.
- Legal services.
- Provision of satellite television.
- Architectural services.
- Services rendered by surveyors.

Exports of goods and services are zero-rated. Unless specifically exempt, supplies of all goods and services are subject to VAT.

A special petroleum tax of 17.5% has been imposed on supply of specified petroleum products by licensed oil marketing companies.

VAT on financial services rendered for a fee has been enforced. The tax is currently charged by banks on services rendered for a fee.

A flat VAT rate of 5% on the supply of immovable property by an estate developer has also been enforced. However, estate developers supplying immovable properties are not allowed input tax deductions relating to the supply of immovable properties.

Customs and excise duties

Customs and excise duties are imposed on the importation of goods at the port of entry and certain manufactured goods produced or imported into Ghana.

The following rates of excise duties apply on the ex-factory price:

Product	Rate (%)
Sachet water	0
Bottled water	17.5
Malt drink	2.5 to 17.5
Beer	10 to 47.5
Spirits	0 to 25
Cigars and cigarettes	175
Snuff and other tobacco products	175

In addition, a Special Import Levy Act was amended to impose tax on the cost, insurance, and freight (CIF) value of imported goods. The levy varies from 1% to 2%, depending on the type of goods, and is expected to apply up to 2017.

Property taxes

Property tax rates are payable by owners of immovable property to the local District Assembly. The rate of property tax differs depending on the location of the property.

Stamp taxes

Stamp duty is paid, at rates ranging between 0.25% to 1% and 0.05 Ghana cedi (GHS) to GHS 25, depending on the type of transaction and the instrument. A stamp duty of 0.5% applies on the initial stated capital and any subsequent increase in the stated capital.

The stamp duty is not a tax on transactions but on documents brought into being for the purposes of recording transactions. It is therefore a tax on documents or specific instruments that have legal effect, such as the following:

- Insurance policies.
- Awards of cost in matters of dispute.
- Conveyances or transfers on the sale of any property.
- Appointment letters of new trustees.
- Natural resource leases or licences (e.g. mining, timber).
- Agreements or memoranda of agreement.
- Bills of exchange (e.g. issue of cheques).
- Bills of lading.

Communications service tax (CST)

CST of 6% is levied on charges payable by both individual and corporate users of electronic communication services (ECS) provided by service providers other than private electronic communication services. The levy is also applicable to any form of recharge and is payable once a person makes a payment for ECS regardless of whether or not that person is authorised or permitted to provide ECS under the Electronic Communication Act (Act 755). Note that the definition of electronic communication includes interconnection.

Payroll taxes

Employers are required to withhold tax (pay-as-you-earn or PAYE) on employees' salaries and other emoluments, including benefits in kind, on a monthly basis at the graduated rates, with the highest rate at 25%, and remit it to the Ghana Revenue Authority (GRA) by the 15th day of the subsequent month. Failure to withhold the tax and remit to the GRA on the due date attracts an interest penalty of 125% of the statutory rate, compounded monthly, applied to the amount outstanding at the start of the period.

Employers are also required to file annual returns of employees by 31 March of the year following the year to which the returns relate.

Social security contributions

The social security contribution scheme is structured into three tiers, with the first two requiring mandatory contributions and the last one being voluntary. The employee is required to contribute 5.5% with the employer contributing 13%. Of the total contribution of 18.5%, 13.5% is contributed to the first tier and 5% to the second tier schemes.

Local business permits

Business 'permits' are payable annually to local district assemblies or municipal authorities. The amount is dependent on the physical location where business activity is conducted. It is therefore possible that if a taxpayer operates from two business locations in different regions, such permits would be paid to two different local authorities.

Branch income

The CIT rate on branch profits is the same as that on corporate profits.

However, a non-resident person that conducts activities in Ghana through a branch pays tax at 8% on earned repatriated profits, payable within 30 days. The portion of net profit of the resident person that corresponds to interest of the non-resident shareholders is treated as repatriated profits. The repatriated profit is also treated as a dividend distributed in accordance with the respective shares of the non-resident person.

Income determination

Inventory valuation

The ITA, under Section 11, provides general guidance on the principles of stock (inventory) valuation for income tax purposes. A person making a determination of the cost of trading stock is required to use the absorption cost method. The owner of a trading stock or other fungible assets may determine the cost of that asset by using the first in first out (FIFO) method or the average cost method. The closing value of inventory is valued for tax purposes at the lower of cost or market value.

Capital gains

Capital gains are now included as part of business income and taxed at 25%. They are no longer taxed separately.

Dividend income

A dividend paid to a resident company by another resident company is exempt from tax where the company receiving the dividend controls, directly or indirectly, 25% or more of the voting power in the company paying the dividend.

Stock dividends

The issue of stock dividends is permitted under Section 74 (1) of the Ghana Companies Code 1963, Act 179. It is, however, subject to income tax at the dividend withholding tax (WHT) rate of 8%.

Interest income

Interest received by a resident company from another resident company is subject to WHT at a rate of 8%.

However, WHT does not apply on the following:

- Interest received by a resident financial institution.
- Interest paid to an individual by a resident financial institution.
- Interest paid to an individual on bonds issued by the government of Ghana.

Exempt income

Specific exemptions from tax include the following:

- Income of a local authority.
- Income of a statutory or registered building society where only individuals are eligible to be members and the organisation does not engage in political party activities.
- Non-business income of a charitable organisation.
- Pensions.
- Income of organisations formed for the purpose of promoting social or sporting amenities.
- Income of a registered trade union.
- Gain or profit from the business of operating ships or aircraft by non-resident persons if an equivalent exemption is granted by the person's country of residence to persons resident in Ghana.
- Retirement contributions received by a retirement fund.

Foreign income

Resident corporations are taxed on their worldwide income. Foreign income is taxed together with other income derived in Ghana, and double taxation is avoided through treaties or foreign tax credits. No special rules exist for taxing undistributed income of foreign subsidiaries.

Deductions

Depreciation and depletion

Depreciation of depreciable assets in the accounts of a business is not an allowable deduction in computing taxable profits. It is instead replaced by capital allowances at prescribed statutory rates, as follows:

Class	Assets	Rate
1	Assets pooled (allowance calculated on a reducing-balance basis). Mainly computers and data handling equipment together with peripheral devices.	40%
2	Assets pooled (allowance calculated on a reducing-balance basis). Mainly automobiles, buses, mini buses, construction and earth-moving equipment, trailers and trailer-mounted containers, plant and machinery used in manufacturing.	30%
3	Assets pooled (allowance calculated on a reducing-balance basis). Mainly railroad cars, locomotives and equipment, vessels and similar water transportation equipment, aircraft, public utility plant and equipment, office equipment and fixtures, and any other depreciable asset not elsewhere classified.	20%
4	Buildings, structures, and similar works of a permanent nature (allowance calculated using the straight-line method)	10%
5	Intangible assets	Useful life
6	Mining and petroleum expenditure (allowance calculated using the straight-line method)	20%

Allowances are granted only on the following conditions:

- The taxpayer must own the asset.
- Capital expenditure must be incurred.
- The asset must be used in the trade.
- The asset must be in use up to the end of the basis period.
- Capital allowances are granted for every year in which the asset is in use. Balancing allowances and charges are made, as the case may be, on disposal of the asset.

For intangibles, such as goodwill, patents, trademarks, and copyrights, the law allows for capital allowance deduction over the useful life of the asset.

Start-up expenses and pre-operating costs

Although the tax law does not specifically mention start-up expenses or pre-operating costs, generally a deduction is allowed for start-up and pre-operating costs incurred by a business, provided such expenses are wholly, exclusively, and necessarily incurred in the production of income of the taxpayer.

Interest expenses

Interest incurred on loans used to generate the income of a business is ordinarily deductible. Restrictions apply on interest payments on related loans. *See Thin capitalisation in the Group taxation section.*

Financial costs

Deductions for financial costs other than interest are limited to the sum of:

- financial gains derived by the person that are to be included in calculating the income of the person from the investment or business for the year of assessment, and
- 50% of the income of the person for the year from the business or investment calculated without including financial gains derived by the person or financial costs incurred by the person.

Ghana

Bad debts

A deduction is allowed for bad debts incurred in the normal course of business, other than advances made on capital accounts. A bad debt is allowed as a deduction if the CG is satisfied that the taxpayer has taken all reasonable steps to pursue payment and the person reasonably believes payment will not be made.

Any amounts recovered in respect of a bad debt previously written off should be included in income and subject to tax accordingly.

An existing debt that becomes a bad debt after a 50% or more change in underlying ownership is not allowed as a bad debt deduction after the change in ownership has taken place.

Charitable contributions

The following contributions/donations are allowable as deductions in ascertaining the taxable income of a person:

- Contributions made to a charitable institution or fund approved by the government.
- Payments towards a scholarship scheme approved by the government for a technical, professional, or other course of study.
- Donations made for the purpose of any rural or urban area and approved by the government.
- Donations for the purpose of sports development approved by the government.
- Donations to the government for worthwhile government causes approved by the CG.

Fines and penalties

Fines and penalties arising as a result of non-compliance with the provisions of the tax law are generally not allowable deductions.

Taxes

Any income taxes, profit taxes, or other similar taxes are not deductible in determining taxable income.

Other significant items

No other special deductions are allowed. Principal non-deductible expenses include the following:

- Domestic or private expenses, including cost of travel between residence and place of business or employment.
- Any disbursement or expense not being wholly and exclusively paid or expended for the purpose of acquiring income.
- Capital withdrawn or any sum employed or intended to be employed as capital.
- Capital employed in improvement.
- Any sum recoverable under an insurance contract of indemnity.
- Rent of or any expense in connection with premises or a part of premises not occupied or used for the purpose of producing business income.
- Any payment to a savings or other society or fund unless specifically allowed by the CG.

Net operating losses

Tax losses can be carried forward for all sectors and deducted from assessable income for the three years immediately following the year in which the loss was incurred. Specified priority sectors can carry forward their tax losses for up to five years. Carryback of losses is permitted for persons deriving income relating to a long-term contract (except where there is a more than 50% change in underlying ownership within a period of three years). A long-term contract of a business includes a contract for manufacture, installation, or construction that is not completed within the company's accounting year in which it is commenced.

Payments to foreign affiliates

The Transfer Pricing Regulations 2012, (LI 2188) require that payments or transactions between persons in a controlled relationship are conducted at arm's length. A transaction is conducted at arm's length between persons in a controlled relationship if the terms of the transaction do not differ from the terms of a comparable transaction between independent persons. The CG may disregard or disallow transactions if they are deemed to be fictitious or do not have a substantial economic effect and the form does not reflect its substance.

Group taxation

No form of combined reporting of results of operations by a group or affiliates is permitted.

Transfer pricing

The Transfer Pricing Regulations follow the internationally accepted guidelines published by the Organisation for Economic Co-operation and Development (OECD), only with a much broader perspective on the nature of entities and transactions.

The Regulations cover transactions between related parties, including PEs and employees, and also prescribe the transfer pricing methods and documentation that entities are required to maintain and retain.

The Regulations also require entities with related party transactions to file a return on an annual basis.

Thin capitalisation

Interest expenses and foreign exchange currency losses incurred by an entity in which 50% or more of the underlying ownership or control is held by an exempt person, either alone or together with an associate, are not allowed as a deduction in arriving at the chargeable income of the entity if the entity is thinly capitalised. An entity controlled by an exempt person is deemed to be thinly capitalised if its debt-to-equity ratio exceeds the ratio 3:1.

Thin capitalisation provisions do not apply to resident financial institutions.

Controlled foreign companies (CFCs)

There are no provisions for CFCs in the tax laws of Ghana.

Tax credits and incentives**Foreign tax credit**

A resident is entitled to a credit in respect to any foreign income tax paid, to the extent to which the tax paid is in respect of the resident's foreign taxable income. The foreign tax credit available on a specific income type should not exceed the average rate of Ghanaian income tax of the resident for a year.

Inward investment

Under the Ghana Investments Promotion Centre Act, 2013 (Act 865), various incentives are available to encourage strategic or major investments in the country, particularly in the areas of agriculture; manufacturing industries engaged in export trade or using predominantly local raw materials or producing agricultural equipment, etc.; construction and building industries; mining; and tourism.

Incentives generally include exemption from customs import duties on plant and machinery; reduced CIT rates; more favourable investment and capital allowances on

Ghana

plant and machinery; reduction in the actual CIT payable, where appropriate; retention of foreign exchange earnings, where necessary; guaranteed free transfer of dividends or net profits, foreign capital, loan servicing, and fees and charges in respect of technology transfer; and guarantees against expropriation by the government.

Capital investments

Venture capital tax incentives include the following:

- Relief from stamp duty in each year on subscriptions for new equity shares in venture capital funds.
- Interest and dividends from investment in a venture capital company are subject to tax at 1% for the first ten years of assessment.
- Chargeable income is subject to tax at 1% for the first ten years of assessment.
- Carryforward of losses for five years after the year of disposal.
- Carryforward of losses from disposal of investment in a venture capital subsidiary for five years after the ten years of assessment.

Free zone developers/enterprises

Companies registered to operate as free zone developers/enterprises do not pay CIT for the first ten years of operation. After the ten year corporate tax holiday has expired, the CIT rate on export outside the domestic market is 15% while income earned from sales in the domestic market is taxed at 25%.

Construction of residential premises

The income of a certified company from a low cost housing business is subject to tax at 1% for a period of five years of assessment.

Withholding taxes

Income	WHT rate (%)	Final tax
Resident persons:		
Interest (excluding individuals and resident financial institutions)	8	No
Dividend	8	Yes
Rent (on residential properties as investment income)	8	Yes
Rent (on commercial properties as investment income)	15	Yes
Royalties and natural resource payments	15	No
Fees to lecturers, invigilators, examiners, part-time teachers, and endorsement fees	10	Yes
Commissions to insurance agents and sales persons	10	No
Fees, emoluments, and other benefits to a resident director, manager, or board member of a body of persons	20	No
Commissions to lotto agents	10	No
Supply of goods exceeding GHS 2,000	3	No
Supply of works exceeding GHS 2,000	5	No
Supply of services exceeding GHS 2,000 (payments to persons other than individuals)	7.5	No
Payment to individuals for provision of services	15	No
Non-resident persons:		
Dividend	8	Yes
Royalties, natural resources payments, and rents	15	Yes
Management, consulting, and technical service fees, and endorsement fees	20	Yes
Repatriated branch after tax profits	8	Yes
Interest income	8	Yes
Short-term insurance premium	5	Yes

Income	WHT rate (%)	Final tax
Income from telecommunication, shipping, and air transport	15	Yes

Double tax treaties (DTTs)

Ghana has DTTs with the following countries for the relief from double taxation on income arising in Ghana:

Recipient	Dividends (%) (1)	Interest (%)	Royalties (%)	Technical or management service fees (%)
Belgium	5/15	10	10	10
Denmark	5/15	8	8	8
France	7.5/15	10	10	10
Germany	5/15	10	8	8
Italy	5/15	10	10	10
The Netherlands	5/10	8	8	8
South Africa	5/15	5/10 (2)	10	10
Switzerland	5/15	10	8	8
United Kingdom	7.5/15	12.5	12.5	10

Notes

1. The lower rate applies where the recipient holds at least 10% of the shares. The higher rate applies in any other case.
2. 5% for non-resident banks. 10% in any other case.

The government of Ghana is pursuing DTTs with various countries, including the Czech Republic, Mauritius, Sweden, Syria, the United Arab Emirates, and the United States.

Tax administration

Taxable period

The tax year runs from 1 January to 31 December. Corporations with financial periods other than the calendar year are taxed on their financial period ending during the calendar year.

Tax returns

Companies are expected to submit a tax return not later than four months after the end of the financial year. They may file an application for extension of filing time for not more than two months.

Payment of tax

CIT is due for payment at the same time as the due date for filing the return. The tax is payable in four equal instalments at the end of each quarter (i.e. March, June, September, and December) in each year of assessment, but such payments are not deemed to be the actual tax payable.

At the end of the year, all taxpayers are required to file final tax returns and pay any tax outstanding. The final return and tax are due within four months after the financial year-end.

There are also instances where the CG may issue an additional assessment after conduct of an audit. Where such assessment is served, the tax is payable within 30 days after service of the notice. At the discretion of the CG, the time for payment may be extended.

Ghana

Penalties

Where tax is not paid by the due date, a penalty is calculated at 125% of the statutory rate, compounded monthly, and applied to the amount outstanding at the start of the period.

Tax audit process

The GRA assesses taxpayers on a regular basis. The ITA gives powers to persons authorised by the CG to gain full and unlimited access to the taxpayers' premises, records, and electronic information. Industries such as mining, upstream oil and gas, and financial institutions are more likely to be selected for a tax audit. Also, request for a tax refund is also likely to lead to a tax audit. The GRA usually gives notice of its intention to perform a tax audit and, after performance, prepares a report on its findings, which is then shared with the taxpayer.

Statute of limitations

The ITA requires all taxable persons (excluding employees) to maintain records of all receipts and payments, revenue and expenditure, and all assets and liabilities of the business for a period of not less than six years. This is in conjunction with the fact that the Statute of Limitation bars actions to recover tax after 12 years.

Topics of focus for tax authorities

Topics of focus for the tax authorities include:

- Tax refunds.
- CST.
- Transfer pricing sensitisation of taxpayers.
- NFSL.

Other issues

Local Content and Local Participation Regulations

The Minerals and Mining General Regulations 2012 (LI 2173) applicable to mining entities obligate mining contactors and sub-contractors to conform to the requirements for recruitment of expatriates, train Ghanaians, and give preference to local products and services in their operations.

The Petroleum (Local Content and Local Participation) Regulations, 2013 (LI 2204) aim at providing a transparent monitoring system to meet the objectives of the government's Local Content Policy. Further, the Regulations are expected to help facilitate job creation through the use of local expertise for goods and services, business, and financing in the petroleum industry value chain.

Ring fencing for mining and petroleum entities

In determining the chargeable income for a basis period, mining companies are not able to deduct expenses incurred in one mining area against revenue from another mining area.

Similarly, companies engaged in petroleum operations are required to treat the activities of a petroleum right as an independent activity separately from other rights.

Significant developments

The Income Tax (Amendment) Act 2015 ('the Amendment Act') was enacted in August 2015 and has introduced several important changes with respect to tax filing requirements for companies and branches in Gibraltar.

Before the Amendment Act, tax filing for companies only applied to companies that had assessable income in Gibraltar. The Amendment Act changes this and now all companies registered in Gibraltar must file a tax return within the nine months immediately following the month in which the accounting period ends. This change is applicable from 1 January 2016.

The Amendment Act also increases the threshold of assessable income whereby a company or, as the case may be, a branch shall accompany their returns with audited accounts from 1 million British pounds (GBP) to GBP 1.25 million. Below this threshold, a company (or a branch) shall accompany its returns with accounts and an accountant's report.

The Amendment Act also provides that returns in respect of dividends can be filed up to nine months from the end of the accounting period from which the dividend was declared. Before this amendment, the period for filing a dividend return was one month. The Amendment Act also prescribes the information that must be provided in returns relating to shareholders who are either an ordinarily resident individual or another company incorporated in Gibraltar. For these shareholders, the return must specify the amount of dividend allocated to taxable profits and the amount allocated to non-taxable profits. This information will allow Gibraltar resident shareholders to determine the amount of tax credit available to them.

On 1 October 2014, the Commission announced that it will extend the ongoing state aid investigation to include an examination of the Gibraltar tax ruling practice. This year there have been no developments or updates on this investigation.

Taxes on corporate income

Companies are subject to Gibraltar taxation on income accrued in and derived from Gibraltar.

The standard corporate income tax (CIT) rate is 10%, with utility and energy providers and companies that abuse a dominant position paying a higher rate of 20%.

Corporate residence

A company will be considered resident in Gibraltar if the management and control of its business is exercised from Gibraltar or from outside Gibraltar by persons who are ordinarily tax resident in Gibraltar.

Gibraltar

The location of central management and control will be established under legal principles laid down in the United Kingdom (UK) and is the place of the highest form of control and direction over a company's affairs, as opposed to decisions on the day-to-day running of the business.

Permanent establishment (PE)

Gibraltar has not entered into any double tax treaties (DTTs); consequently, there are no provisions on PE from a general treaty perspective. Nevertheless, the Gibraltar Tax Commissioner accepts the definition of PE set out in Article 5 of the Organisation for Economic Co-operation and Development (OECD) Model Convention.

Under the Gibraltar Companies Act 2014 ('the CA 2014'), foreign companies that establish a place of business in Gibraltar or have a branch in Gibraltar must register with the Registrar one month after commencing business in Gibraltar. Under the CA 2014, the definition of a company includes a foreign company registered in Gibraltar. The profits or gains of a foreign company registered in Gibraltar shall be assessable on the accounting period beginning whenever that company is first registered in Gibraltar.

Other taxes

Value-added tax (VAT)

There is no VAT in Gibraltar.

Import duties

Goods imported into Gibraltar are subject to import duty at varying rates. The most noticeable exceptions are fuel, tobacco, and alcohol, which are subject to a fixed amount of duty regardless of the value, and motor vehicles, which attract duty at various rates of between 2% and 35% of the value, depending on the type and size of engine and whether it is a private or dealer importation.

Excise taxes

There is no provision for excise taxes in Gibraltar.

Property tax

A general business property rate is levied annually on all businesses in Gibraltar. The amount varies depending on the property and is subject to an annual review.

Stamp duty

Stamp duty is payable on the transfer or sale of any Gibraltar real estate or shares in a company owning Gibraltar real estate (on an amount based on the market value of said real estate) at the following rates:

- GBP 200,000 or less: 0%.
- Between GBP 200,001 and GBP 350,000: 2% on the first GBP 250,000 and 5.5% on the balance.
- Over GBP 350,000: 3% on the first GBP 350,000 and 3.5% on the balance.

Stamp duty is also payable on mortgages secured on Gibraltar real estate at the rate of 0.13% for mortgages less than GBP 200,000 and 0.20% for mortgages over GBP 200,000.

Gaming tax

Gaming tax is levied at 1% of the gaming income. The tax paid is subject to a minimum of GBP 85,000 and maximum of GBP 425,000.

Capital duty

Capital duty of GBP 10 is payable on the initial authorisation of share capital or any subsequent increase thereto.

Payroll taxes

Collection of employee taxes is initially effected under a pay-as-you-earn (PAYE) system. Employers are required to operate the system without exception, to keep appropriate records and complete the necessary filings.

The PAYE regulations require each employee to obtain from the Commissioner of Income Tax a PAYE allowances certificate, which allocates a code to the employee. The employer is required to use tax tables issued by the Income Tax Office to calculate and deduct tax from emoluments in accordance with the employee's applicable code. The employer is then obligated to pay over to the Commissioner any tax so deducted by the 15th day of the following month.

An employer must also account for social insurance payments in a similar manner, deducting and paying over the employee tax as well as accounting for employer's social insurance.

Social insurance contributions

Social insurance contributions are payable by every employer in respect of every employee.

Employer contributions are 20% of gross earnings, subject to a minimum of GBP 15 per week (GBP 65 per month) and a maximum of GBP 32.97 per week (GBP 142.87 per month).

Branch income

The basis for taxation of branches of foreign enterprises is the same as for corporations.

Allowable head office charges or expenses incurred by a Gibraltar branch for the common purpose of the company and its branches, or for the purpose of the head office or another branch exclusively, are limited to 5% of turnover of the Gibraltar branch (*see Payments to foreign affiliates in the Deductions section*).

Income determination

Generally, companies are subject to Gibraltar taxation on income accrued in and derived from Gibraltar.

The 'accrued in and derived from' principle is defined by reference to the location of the activities that give rise to the profits.

Gibraltar's Income Tax Act 2010 ('the Income Tax Act') clarifies that activities that give rise to the profits of the business shall be deemed to take place in Gibraltar. Should the activity of a business be a licensable activity under Gibraltar law, the profits from this activity will be deemed to arise in Gibraltar. Furthermore, the profits of a business that can lawfully be transacted in Gibraltar, through a branch or any form of PE, by virtue of the fact that it is licensed in another jurisdiction that enjoys passporting rights into Gibraltar and which would otherwise require such licence and regulation in Gibraltar shall be deemed to arise in Gibraltar.

Gibraltar

Inventory valuation

Inventory is valued at the lower of historical cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last in first out (LIFO) method.

Capital gains

Capital gains are not subject to tax in Gibraltar.

Dividend income

There is no charge to tax on the receipt by a Gibraltar company of dividends from any other company.

Interest income

Companies with a banking or money lending licence and earning interest as a trading receipt will have that interest treated as income chargeable to tax.

Interest received or receivable by a Gibraltar company arising from an inter-company loan will be chargeable to tax at the standard CIT rate. Where the interest received or receivable is less than GBP 100,000 *per annum*, the interest is exempt from any charge to taxation.

All other interest received or receivable is not taxable in Gibraltar.

Royalty income

Income from royalties received or receivable by a Gibraltar company is taxable at the standard CIT rate.

Foreign income

Foreign income is not normally taxed in Gibraltar. Exceptions to this rule are interest income and royalty income (*see above*).

Deductions

For the purpose of ascertaining assessable income, all expenses wholly and exclusively incurred in the production of income shall be deducted.

Capital allowances

The first GBP 30,000 of qualifying expenditure on plant and machinery (including fixtures and fittings) and the first GBP 50,000 of qualifying expenditure on computer equipment is fully deductible in the first year as a 'first year allowance'.

Thereafter, qualifying assets are pooled and are subject to an annual capital, or wear and tear, allowance. Allowances are available for plant and machinery (including fixtures and fittings), computer equipment, and motor vehicles at the rate of 15% (20% for companies that are obligated to pay the higher CIT rate, *see the Taxes on corporate income section*) and are calculated on a reducing balance basis.

Capital allowances for industrial buildings are deductible at the rate of 4% *per annum* on a straight-line basis.

Goodwill

Amortisation of goodwill is not a deductible expense.

Start-up expenses

Expenditure incurred with a view to carrying on a trade is treated as incurred on the first day on which the trade is carried on for the purposes of computing the profits or gains of the trade.

Interest expenses

Full deduction is available in respect of interest expenses, subject to anti-avoidance rules (*see the Group taxation section for more information*).

Bad debt

Only specific bad debts or specific bad debt provisions are deductible to the extent that they are respectively estimated to be bad during the said period, notwithstanding that such bad debts were payable prior to the commencement of the period. General doubtful debt provisions are not an allowable expense.

Charitable contributions

A charitable donation is not considered as having been wholly and exclusively expended for the purposes of the production of the income of the trade and is therefore not allowable as a deduction for tax purposes.

Fines and penalties

Fines and penalties, including those resulting from late payment of taxation or from failure to make the necessary tax submissions, are deemed to be a tax and are therefore not a deductible expense.

Taxes

No deduction is allowed for any tax charges under the Income Tax Act.

Other significant items

Additionally, no deduction is allowed in respect of the following:

- Domestic or private expenses.
- Expenses not incurred wholly and exclusively in the generation of income.
- Any expenses of a capital nature.
- Any sum recoverable under an insurance contract or contract of indemnity.
- Property expenses not incurred for the purposes of producing income.
- Depreciation of assets (although capital allowances are available, *see above*).
- Employee remuneration not accompanied by a certified statement of name, address, and amount of remuneration (in respect of Gibraltar employment only).
- Certain business entertainment expenditure falling within guidelines published by the Commissioner.
- Interest paid to a non-Gibraltar resident that is more than a reasonable commercial rate.

In the case of a company that has income, some of which is chargeable to tax and some of which is not, the deductions allowed shall be apportioned on a pro-rata basis between the chargeable and non-chargeable income.

Net operating losses

A trading loss incurred in an accounting period may be offset against trading income arising in the same period or subsequent period, provided that within a period of three years there has not been both a change in the ownership of the company and a major change in the nature or conduct of the trade.

There is no provision for the carrying back of losses.

Payments to foreign affiliates

In the case of branches, the amount of general head office expenses incurred that is deductible is limited to 5% of its turnover.

The Income Tax Act includes anti-avoidance provisions. These provisions state that if the amount charged for goods or services by a connected person is not at 'arm's length', then the expenses that are allowed are subject to the lower of:

Gibraltar

- the expense
- 5% of the gross turnover of the company, or
- 75% of the pre-expense net profit of the company.

Group taxation

Companies are assessed on an individual basis, and trading losses of group members may not be offset against profits of other members of the group.

The Income Tax Act contains a generic anti-avoidance clause that allows the Commissioner to disregard an arrangement that the Commissioner believes is fictitious or artificial. In addition, it includes the following specific anti-avoidance measures.

Where a taxpayer seeks to reduce their liability to tax by creating an artificial split between activities in Gibraltar and outside of Gibraltar, the Commissioner shall use anti-avoidance provisions to defeat such an attempt.

Transfer pricing

The amount of interest payments to connected persons that are in excess of that payable at arm's length will be deemed to be a dividend. Where the amount charged for goods and services by connected persons is not at arm's length, this will be disallowed as a taxable expense. Any expenses allowed will be subject to the lesser of (i) the expense, (ii) 5% of the gross turnover of the company, and (iii) 75% of the pre-expense profit of the company.

Thin capitalisation

Interest paid on a loan to related parties that are not companies (or loans where security is provided by related parties) where the ratio of the value of the loan capital to the equity of the company exceeds 5:1 will be considered as dividend payments and thus not deductible for tax purposes. This provision is not applicable to Gibraltar banks or money lenders.

Back-to-back loans

Since interest income is not taxable on back-to-back loans, the interest expense is not deductible.

Dual employment

Income from dual employment contracts is taxed in Gibraltar if both employers are connected persons.

Transfer of assets abroad

Where assets are transferred abroad with the purpose of avoiding tax and the taxpayer has the power to enjoy these assets either now or in the future, then any income or benefits received from these assets will be deemed to be income chargeable to tax.

Controlled foreign companies (CFCs)

There are no CFC rules in Gibraltar. However, under the general anti-avoidance rules, the Commissioner may disregard any CFC or transaction with such a CFC where the Commissioner believes that it is fictitious or artificial.

Tax credits and incentives

Foreign tax credit

Relief is available in Gibraltar in respect of foreign tax paid. This applies to any person who has paid or is liable to pay tax under the Income Tax Act in respect of profits or gains derived from sources within Gibraltar or within any other jurisdiction who can prove to

the satisfaction of the Commissioner of Income Tax that one has paid or is liable to pay income tax in the other jurisdiction in respect of the same profits or gains.

The relief available in respect to those profits or gains shall be of an amount equal to the lesser of the two following amounts:

- The taxation under the Income Tax Act in respect of the said profits or gains.
- The income tax in the other country, territory, or jurisdiction in respect of that income.

Development aid

In order to encourage private development in Gibraltar, promoters and developers of approved projects are offered certain incentives, such as tax relief, import duty relief, and rates relief.

In order to qualify for the above reliefs, the project needs to be a new project that is for the economic benefit of Gibraltar and the aim of which is:

- to create a tangible immovable asset in Gibraltar that will remain in existence after the applicant has ceased to derive the benefits under the licence
- to provide more than two additional units of housing accommodation in Gibraltar
- to contribute materially to the development of the tourism industry in Gibraltar
- to afford any new employment opportunities or career prospects in Gibraltar, or
- to materially improve the economic or financial infrastructure of Gibraltar.

The project needs to be completed within a specified time (dependent on the type of project) following the issue of the licence, and the applicant must not expend less than the prescribed amount for the project.

Applications for development aid must be made to the Minister for Trade.

Deduction of approved expenditure on premises

For taxpayers with an interest in a building situated in Gibraltar, an allowance is available for approved expenditure on the painting, decorating, repair, or enhancement of the frontage of that building.

The approved amount will be available as a deduction against the taxpayer's income. This deduction is in addition to any deduction, relief, or allowance given in accordance with any other provision of the Income Tax Act in respect of the same expenditure.

The claim for the deduction must be made within two years after the end of the year of assessment with respect to which the deduction is claimed.

Commercial property rate incentives

There are early payment discounts available on property rates, depending on the business conducted from the premises.

Green incentives

A one-off tax deduction is available against assessable income (with the percentage to be verified and subject to the discretion of the Commissioner of Income Tax) on the investment made by an individual, company, or business that makes a significant improvement to the Energy Performance Certificate (EPC) rating of their premises.

Training costs

Training costs borne by an entity for employees studying for a qualification are allowed as an expense against the profits of a business at the rate of 150%.

Gibraltar

Small business and start-up incentives

All newly established businesses in Gibraltar are able to claim 100% of their eligible capital allowances in the first year of trade.

Businesses with ten employees or less will receive a credit of GBP 100 per employee in respect of social insurance contributions. For new businesses in the first year of operation, the credit is extended to 20 employees.

A tax credit equal to the lower of 200% or GBP 5,000 of architectural fees and fees charged by the government in respect of successful planning applications is available in the first three years of operation.

Withholding taxes

There are no withholding taxes (WHTs) in Gibraltar, except in the following cases:

- Payments to subcontractors in the construction industry. Unless the subcontractor is in possession of an exemption certificate, tax is withheld at the rate of 25% of the amount that relates to the labour and profit element of the contract.
- Payments to employees under the PAYE system. Under the PAYE regulations, employers are obligated to deduct an amount of tax in accordance with the employee's tax code.

Tax administration

Taxable period

The taxable period is the accounting period of the company, which begins on the later of the beginning of the accounting period and the date when the company first receives a source of taxable income and ends on the earlier of the end of the accounting period, 12 months from the beginning of the accounting period, or the date on which trade ceased.

Tax returns

Companies with income subject to tax in Gibraltar are required to file a return and calculate their tax liability for the year. The return, together with the estimated liability, needs to be accompanied by payment of the tax due nine months after the date of the company's financial year end.

Companies with turnover of less than GBP 1 million (for financial periods ending on or after 1 July 2015, the threshold increased to GBP 1.25 million) are obligated to file accounts accompanied by an Independent Accountant's Report together with the tax return.

Companies where the turnover exceeds this threshold are required to file audited accounts together with the tax return.

Payment of tax

Companies are required to make payments on account of future liabilities on 28 February and 30 September in each calendar year. Each payment should be equal to 50% of the tax payable for the relevant accounting period. The relevant accounting period is a prior period as determined by the company's year-end in accordance with the relevant table in Schedule 10 of the Income Tax Act.

The balance of tax due (i.e. the actual liability less payments on account) is payable on the date of filing of the return.

Penalties and fines

The following penalties and fines are applicable:

- For the late payment of tax, there is a penalty of 10% of the amount of tax due on the day immediately after such payment was due. If unpaid within 90 days, a further amount of 20% of the tax due and the surcharge mentioned that remains unpaid shall become immediately due and payable. A surcharge imposed shall be deemed to be part of the taxation payable.
- Failure to file a return by the due date will result in a penalty of GBP 50, with a further penalty of GBP 300 if the return is not submitted within three months after the due date, and a further GBP 500 six months after the due date. If the failure to file continues beyond six months, an additional penalty of GBP 500 is payable.
- Failure to respond to a notice or request to submit information or documentation will result in a fine of GBP 200 on the day the failure occurs and a further penalty of GBP 1,000 if the failure to comply continues one month after the applicable day for delivery of the accounts as referred to in the notice. Failure to comply beyond a three month period, if convicted, can result in imprisonment.
- For fraudulently, recklessly, or negligently delivering to the Commissioner an incorrect return, accounts, or information, there is a fine of up to 150% of the difference between the actual tax due and the tax due as per the original declaration. The amount of the penalty will depend on:
 - the amount of the tax lost and/or delayed
 - the gravity of the offence (i.e. if deliberate or an honest mistake), and
 - the level of cooperation in the investigation.
- The Commissioner of Income Tax may publish details of a person who has failed to pay tax due under the Income Tax Act or under the PAYE regulations in the Gibraltar Gazette if:
 - the Commissioner has notified the person of the Commissioner's intention to do so 30 days prior to the publication
 - the person has failed to pay tax due to an amount of GBP 5,000, and
 - the tax due to be collected or paid has not been collected or paid for a period of at least three months after the due date.
- Failure to notify the Commissioner of an arrangement, the main benefit of which is to avoid the payment of tax, will result in a fine of GBP 200 on the day the failure occurs and a further penalty of GBP 1,000 if the failure to comply continues one month after the applicable day for providing the information.

Tax audit process

The Gibraltar tax system is based on self-assessment. However, the Income Tax Office has powers to make an enquiry into the tax return of a company within a period of 12 months from the date when the return is due to be filed or, if filed later than the deadline, 12 months from the date it was filed. If the Commissioner of Income Tax believes a return to be fraudulent, the above time limits will not apply.

A taxpayer may appeal against a disputed assessment by notice in writing addressed to the Commissioner within 28 days of the date of service of the notice of the assessment.

Statute of limitations

The Commissioner has up to six years following the date of assessment to revise any incorrect assessments. There is no limit where the incorrect assessment is as a result of fraud, wilful default, or neglect.

Topics of focus for tax authorities

There are currently no particular topics of focus for the tax authorities.

Other issues

Intergovernmental agreements (IGAs)

Gibraltar has entered into Model 1 IGA reciprocal agreements with both the United States (US) and United Kingdom. The Gibraltar/UK agreement was signed 21 November 2013 and the Gibraltar/US agreement was signed 8 May 2014. Legislation in the form of regulations have been passed.

Information will be exchanged by the Competent Authorities nine months after the year-end. The first due date for exchange is 30 September 2016 for the years ended 31 December 2015 and 2014 for UK reportable accounts and was 30 September 2015 for the year ended 31 December 2014 for US reportable accounts.

The Gibraltar government has committed to be an early adopter of the OECD Common Reporting Standard (CRS), which means that reportable accounts for the year ending 31 December 2016 need to be reported by 30 September 2017.

Gibraltar has also signed Tax Information Exchange Agreements (TIEAs) with 27 jurisdiction, 25 of which have entered into force.

Significant developments

Pursuant to a major tax reform, applicable from 1 January 2014 onwards, the Greek corporate income taxation (CIT) regime has been significantly amended. The new Income Tax Code (ITC) introduced significant and far-reaching changes, governed by a different philosophy, namely the establishment of general principles and the direction towards a substance over form approach, creating legal uncertainties as to the interpretation and practical application of specific provisions.

Based on the recently enacted L. 4378/2016, which incorporated in domestic legislation the Directives 2014/86/EU and 2015/121/EU regarding the conditions for exemption from taxation on intra-group dividends, in order for intra-group dividends received by Greek legal entities or Greek permanent establishments (PEs) of European Union (EU) legal entities to be exempt from taxation, apart from the current applicable conditions (*inter alia*, 10% minimum participation percentage in the capital of the distributing entity and maintenance of the participation for at least 24 months, etc.), a new condition is introduced, by virtue of which, intra-group dividends are exempt from taxation to the extent that the respective dividends have not been deducted by the subsidiary.

By virtue of the same law, a general anti-abuse rule is introduced by virtue of which the tax exemption in case of collection and payment of dividends is alleviated in case it is considered that a 'non-genuine arrangement' exists. A 'non-genuine arrangement' is an arrangement that has not been put into place for valid commercial reasons reflecting the economic reality.

Both the aforementioned provisions are effective as of 1 January 2016 onwards.

In addition, the following have been introduced in May 2016 by virtue of two tax bills adopted:

- The currently applicable 10% withholding tax (WHT) on dividends is increased to 15% (applicable on income earned as of 1 January 2017).
- Introduction of a unified income tax scale applicable to employment income, pensions, and business profits, amending the already existing tax scale for employment income and pensions.
- The special solidarity contribution is incorporated in the ITC and thus its extraordinary character is abolished. Moreover, as of January 2016, the contribution will be calculated based on a progressive tax scale.
- As of 1 January 2016, business income generated by legal entities maintaining single entry accounting books (i.e. partnerships, etc.) is taxed at a unified tax rate of 29%. In addition, any subsequent distribution of profits is not subject to dividend taxation.

Finally, a new incentive's law is expected to be adopted within the summer 2016.

Taxes on corporate income

Resident corporations are taxed on their worldwide income. Non-resident corporations are taxed in Greece on any Greek-source income they derive.

The CIT rate of legal entities has been increased from 26% to 29% as of 1 January 2015.

Shipping companies

The Greek tonnage tax regime model intends to tax shipping activity and applies to Greek or foreign ship-owning companies with vessels flying a Greek flag and foreign ship-owning companies with vessels flying a foreign flag that maintain a ship management company in Greece that is exclusively engaged in ship management activities. The Greek tonnage tax regime applies to vessels of 'A' and 'B' category that are either flying a Greek or foreign flag. In the case of vessels flying a foreign flag, the foreign ship-owning company should maintain a ship management office in Greece. Category 'A' vessels include cargo vessels, tankers, steel hull vessels for dry or liquid cargo that fly to/between foreign ports, passenger vessels, drilling platforms, etc. Category 'B' vessels include small boats and any other motor vessels not listed under category 'A'.

Based on recent developments (L. 4336/2015 published on 14 August 2015), the tonnage tax levied on certain categories of vessels flying a Greek flag (i.e. professional vessels, leisure yachts, ferries, etc.) has been expanded to vessels flying flags of the European Union or EU area member states, with exhaustion of the income tax liability of the ship owners on income earned from the related activity.

Said provision aligns the regime applying to said category of vessels following the European Commission's accusation of discriminatory treatment of foreign-flag vessels compared to Greek-flag ones. The aforementioned provision applies to maritime transport services provided as of 1 January 2015 onwards.

The gross tonnage is calculated by multiplying coefficient rates by each scale of gross registered tonnage. This taxable tonnage is then multiplied by an age-corrected rate.

Various exemptions/reductions of the tonnage tax apply, such as:

- Vessels built in shipyards in Greece, under a Greek flag, are exempt from tax for the first six years.
- 50% reduction for vessels operating regular routes between Greek/foreign ports or solely between foreign ports.

The tonnage tax exhausts the tax liability of the owner, and, if the owner is a company, this extends to its shareholders. Tonnage tax also exhausts the tax liability in relation to operating profits and capital gains arising out of the sale of the vessel flying the Greek flag. Tonnage tax also exhausts the tax liability of the foreign ship-owning company flying a vessel under a foreign flag managed by a ship management company in Greece, as well as of the shareholders thereof. No CIT or dividend WHT is levied on shipping profits.

This tax burdens the ship owners or ship-owning companies, while the ship management companies are jointly and severally liable for the payment thereof.

An obligation of the liable parties for submitting before the Ministry of Mercantile Marine an annual statement indicating the name, flag, total tonnage, and age of the vessel under the foreign flag is established.

For calculating the tonnage tax (tax rates and tax brackets, criteria) and the special tax return and payment of tax, the provisions on the tonnage tax payable for Greek flagged vessels apply in analogy. A credit for the tonnage tax paid abroad is provided.

Annual contribution imposed on foreign ship management companies

An annual contribution (referring only to fiscal years 2012 through 2015 and 2016 through 2019) is imposed on offices or branches of foreign enterprises that have been established in Greece by virtue of Article 25 of L. 27/1975 and that are engaged in the chartering, insurance, average (damage) settlements, purchase, chartering or shipbuilding brokerage, or chartering of insurance of ships under Greek or foreign flag of total tonnage over 500 shipping tons, as well as the representation of ship owner companies or undertakings, whose object is identical to the abovementioned activities.

Greek and foreign companies of L. 27/1975 that are engaged in the management of vessels flying a Greek or foreign flag (that are subject to tonnage tax), as well as in other activities approved by the license of operation, are exempt. Passenger coastal ships or merchant vessels that perform internal routes are exempt.

This contribution is imposed on the total amount of imported foreign exchange, calculated on a minimum 50,000 United States dollars (USD), and for the years 2016 through 2019, the relevant rates have been readjusted and the tax scale is as follows:

Bracket of annual total foreign exchange (USD)	Rate (%)	Tax per bracket (USD)	Total foreign exchange (USD)	Total tax (USD)
200,000	7	14,000	200,000	14,000
200,000	6	12,000	400,000	26,000
Excess amount	5			

Previously, for the years 2012 through 2015, the contribution had been calculated on the following tax scale:

Bracket of annual total foreign exchange (USD)	Rate (%)	Tax per bracket (USD)	Total foreign exchange (USD)	Total tax (USD)
200,000	5	10,000	200,000	10,000
200,000	4	8,000	400,000	18,000
Excess amount	3			

A special tax return for calculating the contribution on the basis of the imported foreign exchange of the previous year should be filed within March of each year. Upon filing of said tax return, one-quarter of the annual contribution is payable. The remaining contribution is paid in three instalments (June, September, and December).

The distribution of profits by a foreign ship-owning company maintaining an office or branch in Greece by virtue of article 25 of L. 27/1975 that is exclusively engaged in the chartering, insurance, brokerage, etc. of vessels to Greek individual tax residents is subject to tax at a rate of 10%.

This tax applies to dividends paid or credited and shall be rendered to the Greek State by the beneficiary of the dividend.

The 10% tax also applies to cases of distributions of profits by the abovementioned companies in the form of extraordinary fees and percentages (bonus) to Board of Directors (BoD) members, directors, and officials, in addition to the regular remuneration, exhausting the tax liability of the beneficiaries for said income.

The Greek tonnage tax system is under investigation by the European Committee as to its compliance with the EU State Aid rules. Based on the preliminary findings of the European Committee, certain amendments may be required in order for the Greek tonnage tax regime to comply with the EU State Aid rules.

Greece

Local/state/provincial tax rates

No local taxes on income are paid at a local level. However, it should be noted that the aforementioned rates are reduced by 40% for profits of companies derived from activities carried out on islands with less than 3,100 inhabitants.

Corporate residence

A legal entity or other entity is considered as tax resident in Greece if one of the following conditions is met:

- It has been incorporated or established according to the Greek legislation.
- It has its registered seat in Greece.
- The place of effective management is located in Greece.

The determination by the tax authorities that the effective management of a legal entity is exercised in Greece is made on the basis of the actual facts and circumstances of each case and by taking into account mainly the place of exercising the day-to-day management, the place of making strategic decisions, the place where the annual general meeting of shareholders or partners is held, the place where the books and records are kept, the place where the meeting of the members of the BoD or other executive management board takes place, and the residence of the members of the BoD or other executive management board. The residence of the majority of the shareholders or partners may also be taken into consideration.

For determining a legal entity as being tax resident in Greece, the exercise of effective management in Greece for any period during the tax year is sufficient.

Companies that are established and operate according to L. 27/1975 'on the taxation of vessels [etc.]' and L.D. 2687/1954 'on the investment and protection of foreign capital' are explicitly excluded from the application of these provisions on tax residence.

Permanent establishment (PE)

The definition of a PE of foreign legal entities in Greece is similar to the one included in the Organisation for Economic Co-operation and Development (OECD) Model Convention on the Double Tax Treaties (DTTs) for the Avoidance of Double Taxation; however, where a DTT applies, its provision will override the domestic definition.

The term 'permanent establishment' includes especially:

- A place of management.
- A branch.
- An office.
- A factory.
- A workshop.
- A mine, an oil or gas well, a quarry, or any other place of extraction of natural resources.

In order for a construction site in Greece to constitute a PE, a time period of at least three months is required, instead of the time period of 12 months provided in the OECD Model Convention.

A distinction applies between the cases of maintaining a PE through a dependent agent and not maintaining a PE when performing activities through an independent agent (e.g. broker, general commission agent).

Other taxes

Value-added tax (VAT)

The standard VAT rate is 24% as of 1 June 2016 (applicable, inter alia, to all standard and processed foods, transportation services, food services, repair services, medical and dental services, and entertainment tickets [excluding theatre tickets]).

A reduced VAT rate of 13% applies, inter alia, to fresh food and, as of 1 October 2015, to accommodation in hotels or similar establishments (including holiday accommodation and letting of places in camping or caravan sites). A super reduced rate of 6% for medicines of CN3003 and 3004, and vaccines of CN3002 intended for human consumption, is applicable. The aforementioned rate is also applicable for children's books, colouring and drawing books, and theatre tickets.

Supplies of goods and services to individuals and legal entities subject to VAT and established in EU countries (intra-Community supplies) are exempt from VAT (zero rated). Exports of goods and certain services to non-EU countries are also exempt (zero rated).

With the following exceptions, real estate leases are generally exempt from VAT. Lease contracts for shopping centres and logistics centres may be subject to VAT on the condition that the taxable person opts for the submission to taxation of the leasing right. Additionally, a right to elect to subject leases of property used for the exercise of professional activities, either independently or as part of mixed contracts, to VAT applies.

Especially for certain Aegean and Dodecanese islands, the general VAT rate is reduced by 30%. However, L. 4334/16.07.2015 provides for the gradual abolition of the special status of the reduced 30% VAT rate on the Aegean islands. As of 1 October 2015, the reduced VAT rates have been abolished for Rhodes, Santorini, Mykonos, Naxos, Paros, Skiathos. As of 1 June 2016, based on the L. 4389/2016, the reduced VAT rate is abolished for Siros, Thasos, Andros, Tinos, Karpathos, Milos, Skiros, Alonnisos, Kea, Antiparos, and Sifnos. On the contrary, the reduced by 30% VAT rate is maintained for the island of Skopelos (due to the nature disaster it suffered) and the islands of the eastern borders of Greece that are affected by the refugee crisis. As of 1 January 2017, the reduced VAT rates will be abolished for all remaining islands based on L. 4334/2015.

Moreover, by virtue of L. 4334/2015, for transactions exceeding 3,000 euros (EUR) between entrepreneurs that are obligatorily settled through the use of a professional bank account or bank cheque and for transactions exceeding EUR 1,500 between entrepreneurs and individuals that are obligatorily settled through the use of a credit or debit card or e-banking or bank deposit or a bank cheque, the intermediary bank is obligated to withhold the relevant VAT amount corresponding to the total amount of the transactions and to pay said VAT directly to the Greek State within five days from said payment, by issuing the respective certificate on the collected amount of VAT to VATable persons. Banks should not charge any fee or other charges for the implementation of the abovementioned services. The above new provision is known as the 'VAT split payment' provision.

By this provision, an obligation to immediate payment of the VAT due is imposed by the separation/split of the transaction value from the corresponding VAT due and the block of the VAT amount until its payment to the Greek state ('split payment' system).

The recipient of the invoice or the retail receipt must pay the transaction through the use of a bank payment instrument, separating/splitting the VATable value from the corresponding VAT, so that the credit institution may transfer the VAT due automatically to a blocked bank account.

Greece

The procedure of application of said provision and any other issue relating to the payment and refund of VAT will be regulated by a decision to be issued by the General Secretariat of Public Revenue. However, up to date, no such Decision has been issued, and the provision remains, in practice, inactive. It should be noted that based on the recently enacted L. 4389/2016, the General Secretariat for Public Revenue will be abolished and a new Independent Public Revenue Authority (IPRA) will be formed aiming to the determination, the assessment, and the collection of tax, customs, and others public revenues. The date of the establishment of the IPRA is not defined yet.

Customs duties

Many goods imported into Greece from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff.

Excise taxes

Excise taxes are imposed on energy and electricity products (e.g. petrol, natural gas, electricity), manufactured tobacco, and alcoholic products. The tax rates vary depending on the category of products.

Uniform Tax on the Ownership of Real Estate Property (ENFIA)

The ownership of real estate property/property rights in Greece is subject to the ENFIA, which consists of a principal tax imposed on each real estate property and a supplementary tax imposed on the total value of the property rights on real estate property of the taxpayer subject to tax.

More specifically, said tax is not imposed on the objective value of real estate property, but is determined on the basis of various factors, according to the final registration of the property at the land registry or ownership title.

The principal tax on buildings is calculated by multiplying the square metres of the building by the principal tax ranging from EUR 2 to EUR 13 per square metre and other coefficients affecting the value of the property (e.g. location, use).

The principal tax on land is calculated by multiplying the square metres of the land by the principal tax ranging from EUR 0.0037 to EUR 11.25 per square metre and other coefficients affecting the value of the property (e.g. location, use).

The supplementary tax is imposed on the total value of the rights to property at a rate of 5.5‰. Self-used real estate is taxed at the reduced rate of 1‰.

Real estate transfer tax

Each transfer of real estate, which is not subject to VAT, is subject to real estate transfer tax. The real estate transfer tax is imposed at a rate of 3% on the taxable value of the property.

Stamp taxes

Rentals of non-residential properties are subject to 3.6% stamp duty (with the exception of shopping centres and logistics centres subject to VAT).

In general, loans and interest may be subject to a 2.4% stamp duty. However, there are a number of exemptions, the main one covering bank loans and bond issues.

Other stamp duties may apply in certain limited cases.

Contribution tax on capital accumulation following incorporation

A 1% tax contribution is imposed on capital accumulation (share capital increase) by:

- business companies and joint ventures

- associations of all degrees and any other form of company, legal entity, or union of persons or society aiming to make profits, and
- branches of foreign companies (unless of EU origin).

For Greek *Soci  t   Anonyme* (SA) companies, an additional 0.1% duty is payable on capital to the competition committee.

The capital concentration tax is on longer imposed upon the incorporation/establishment of legal entities.

Payroll taxes

Employers are liable to submit payroll withholding taxes on monthly salary payments (following the grossing-up to the yearly salary) at the following tax scale:

Taxable income (EUR)	Tax rate (%)
Less than 20,000	22
20,001 to 30,000	29
30,001 to 40,000	37
Greater than 40,000	45

G

Reductions may apply depending on the amount of the annual taxable income received by individual taxpayers and by the number of the dependent children the individual taxpayer has.

Additionally, based on L. 4387/2016, the special solidarity contribution has been incorporated in the ITC and thus its extraordinary character has been abolished. Moreover, the employers shall submit withholding of the special solidarity contribution on salary payment, based on the following progressive rate:

- From EUR 0 to EUR 12,000: 0%.
- From EUR 12,001 to EUR 20,000: 2.20%.
- From EUR 20,001 to EUR 30,000: 5%.
- From EUR 30,001 to EUR 40,000: 6.50%.
- From EUR 40,001 to EUR 65,000: 7.50%.
- From EUR 65,001 to EUR 220,000: 9%.
- Exceeding EUR 220,000: 10%.

Benefits in kind are, in principle, subject to payroll taxes. However, to the extent that it is difficult to proceed to an evaluation of such benefits at the time of their granting, no employment withholdings should be effected thereon, but their value (assuming such benefits are taxable) shall be added to the employment income of the beneficiaries and be taxed upon the clearance of the annual income tax return filed by the employees.

Social security contributions

Social security contributions are due on salary and benefits in cash or in kind granted by an employer to its employees, with the exception of specifically enumerated extraordinary benefits of social character (e.g. marriage gifts, birth gifts). The imposition of social security contributions depends on the social security fund in which the employee is registered.

As of 1 June 2016, for the primary social security fund (IKA-ETAM), social security contributions are withheld at 16% at the level of the employee and contributed at 25.06% at the level of the employer. The monthly social security contribution cap for the IKA is currently set at EUR 5,860.80.

Note that the recently enacted L. 4387/2016 has introduced a major reform on the social security legislation. The Unified Social Security Body (EFKA) is introduced as the new

Greece

body for main social security, which will initiate its operation on 1 January 2017. The EFKA shall automatically integrate, from the initiation of its operation, all the currently available main social security funds.

Branch income

Profits of branches of foreign companies are subject to CIT.

Income determination

Inventory valuation

Inventories are stated at the lower of cost or market (replacement value). The Greek tax system recognises various valuation methods, such as first in first out (FIFO), last in first out (LIFO), weighted average, etc.

Capital gains

In general, capital gains are included in the taxable profits of Greek companies.

The income derived from the goodwill arising upon the transfer of Greek government bonds or Greek treasury bills that are acquired by legal entities that do not qualify as Greek tax residents and do not maintain a PE in Greece is tax exempt.

Capital gains tax on sale of listed shares

Capital gains derived from the sale of listed and non-listed shares are considered business income taxable at the standard CIT rate.

Capital gains derived from the sale of listed and non-listed shares by foreign legal entities that are tax resident abroad shall be taxable in Greece only if they maintain a PE in Greece.

The sale of listed shares is also subject to a transaction duty at a rate of 0.2%.

Dividend income

Dividend income is generally taxable. For subsidiaries established in third countries, any dividend WHT that may have been paid is credited against the Greek CIT payable (up to the amount of tax that would arise in Greece).

However, a tax exemption of intra-group dividends received by Greek tax resident legal entities or PEs of foreign legal entities in Greece applies, provided that:

- the legal entity distributing the profits is included in the forms enumerated in Annex I, Part A of Directive 2011/96/EE, as in force
- the legal entity distributing the profits is tax resident in an EU member state and is not considered as tax resident in a third country in application of the provisions of a DTT concluded with such third country
- the legal entity distributing the profits is subject to one of the taxes listed in Annex I, Part II of Directive 2011/96/EE or any other tax substituting one of those taxes
- the recipient taxpayer holds at least a minimum participation of 10% of the value or the quantity of the share or principal capital or voting rights of the distributing legal entity
- the minimum participation percentage is held for at least 24 months (although the exemption may be provided prior to the completion of 24 months secured by a guarantee), and
- the respective dividends have not been deducted at the level of the entity distributing the dividends.

In case of further distribution of the reserve formed by tax-exempt dividends received from Greek or foreign subsidiaries established in an EU member state, said amount shall not be included in the taxable income of the legal entity proceeding to said distribution, but may be subject to dividend WHT.

Based on the general anti-abuse rule introduced, the tax exemption in the case of collection and payment of dividends is alleviated in case it is considered that a 'non-genuine arrangement' exists (i.e. an arrangement that has not been put into place for valid commercial reasons reflecting the economic reality).

Should the aforementioned tax exemption of intra-group dividends not apply, any underlying CIT and dividend WHT that may have been paid by a Greek or foreign subsidiary established in an EU member state are credited against the Greek CIT payable (up to the amount of tax that would arise in Greece).

Stock dividends

Stock dividends are treated as cash dividends for CIT purposes.

Interest income

Interest income is generally taxable.

Partnership income

Both general partnerships (*Omorrythmi Etairia* or OE) and limited partnerships (*Eterorythmi Etairia* or EE) are not tax transparent. They are subject to tax based on general rules (i.e. at a CIT rate of 29% plus a 10% [15% as of 1 January 2017] WHT on distributions). As of 1 January 2016, business income generated by partnerships that maintain single entry accounting books is taxed at a unified tax rate of 29%. In addition, any subsequent distribution of profits is not subject to dividend taxation.

Rents/royalties income

Income derived from rents and royalties is taxed as ordinary income.

Foreign income

Resident corporations are taxed on their worldwide income. Foreign income received by a domestic corporation is taxed together with other income. If related income tax is paid or withheld abroad, a tax credit is generally available up to the amount of the applicable Greek income tax.

Losses from foreign sources may not be set off against profits generated in Greece.

Exceptionally, losses from foreign sources may be set off with profits arising in other EU or European Economic Area (EEA) member states, provided that they are not exempt on the basis of the DTT concluded and applied by Greece.

Deductions

Depreciation

Mandatory depreciation on a fixed annual basis applies by using fixed depreciation rates stipulated in the law. The transfer of depreciated amounts between fiscal years is not permitted.

The rates of depreciation are determined on the basis of the following table:

Category of assets of the enterprise	Rate of depreciation per tax year (%)
Buildings, installations, facilities, industrial and special installations, non-building facilities, warehouses, and stations, including their annexes (and special loading and unloading vehicles)	4

Greece

Category of assets of the enterprise	Rate of depreciation per tax year (%)
Plots of land used for mining and quarries, unless used for ancillary mining activities	5
Public means of transportation, including airplanes, trains, vessels, and ships	5
Machinery and equipment (aside from personal computers and software)	10
Means of transportation of individuals	16
Means of transportation of goods ('internal transports of goods')	12
Intangible assets, royalties, and expenses of multiannual depreciation	10
Personal computer equipment, principal and ancillary and software	20
Other fixed assets of the enterprise	10

Specifically for intangible assets and royalties, the rate may be adapted on the basis of the lifetime of the right.

An option for the lessee to depreciate a leased asset is provided in cases where there is a financial leasing agreement, provided that specific conditions are met. A financial leasing agreement is defined as any oral or written agreement by which the lessor (owner) is obligated, in return for a rent, to provide to the lessee (user) the use of an asset, provided that one or more of the following criteria are met:

- The ownership of the asset is passed on to the lessee following the end of the lease agreement.
- The lease agreement includes a term of preferential offer for the purchase of the equipment at a price below market value.
- The period of the lease covers at least a percentage of 90% of the financial life of the assets as it derives from the abovementioned table, even in cases where the ownership title is not transferred after the end of the lease agreement.
- At the time of concluding the lease agreement, the present value of the rents amounts to at least 90% of the market value of the asset that is leased.
- The assets that are leased are of such special nature that only the lessee may use them without proceeding to important modifications.

Goodwill

There are some court cases that support the deductibility of goodwill as a start-up expense, but the specifics of each case must be carefully considered.

Organisational and start-up expenses

Based on the provisions of L. 4308/2014 (Greek Accounting Standards), any amount of start-up expenses that has been realised as of 1 January 2015 onwards shall be, under conditions, tax deductible within the year that they have been incurred, to the extent that they do not fall within a category of assets (including tangibles and intangibles).

Any expenses incurred for the acquisition of an asset that are directly related to the latter asset and are necessary for its use are included in the acquisition cost of said asset (e.g. concerning real estate property the real estate transfer tax, notary fees, registration fees, etc.).

Interest expenses

Interest deductibility restrictions apply.

Non-deductible expenses include interest expenses on loans undertaken by the enterprise from third parties, to the extent that they exceed the interest that would arise if the interest rate was equal to the interest rate of loans on open deposit/withdrawal accounts provided to non-financial enterprises, as indicated in a Statistical Bulletin of

the Central Bank of Greece at the prior time period closest to the date such loan was undertaken.

The above interest deductibility restrictions do not apply to inter-bank loans, bonds, and inter-company loans issued by SAs.

Bad debt

The amounts of bad debt provisions and the write-off thereof are deductible, as follows:

- For uncollected due debt up to the amount of EUR 1,000 for a time period exceeding 12 months, the taxpayer may form a provision at a percentage of 100% of the said claim.
- For uncollected due debt exceeding the amount of EUR 1,000 for a time period exceeding 12 months, the taxpayer may form a provision according to the following table:

Duration of late payment (in months)	Provision (%)
Greater than 12	50
Greater than 18	75
Greater than 24	100

The condition for the deduction of the provision for the aforementioned two cases is that all appropriate actions have been taken to ensure the right of collecting the said claim.

The formation of provisions of bad debt is prohibited in the following cases:

- For due debt of shareholders or partners of the enterprise with a minimum participation percentage of 10% and the subsidiary companies of the enterprise with a minimum participation percentage of 10%, unless the claim of such debt is pending before court or court of arbitration, or if the debtor has filed an application for bankruptcy or for a procedure of rationalisation or an enforcement procedure has commenced against the debtor.
- For due debt that are covered by insurance or any guarantee or other contractual or *in rem* security or for debts of the state or local authorities or for those that have been provided by a guarantee of those bodies.

It is provided that a claim may be written off, provided that the following conditions are cumulatively met:

- An amount corresponding to the debt has been previously recorded as income.
- It has been previously written off from the books of the taxpayer.
- All legal actions for the collection of the debt have been exhausted.

This provision applies for provisions formed in the tax years commencing from 1 January 2014 onwards.

Banks may deduct provisions of bad debt at a percentage of 1% on the amount of the annual average of real grants, as indicated by their monthly accounting statements. Aside from the aforementioned deductibility percentage, banks may deduct from their income additional special provisions regarding their clients, for which the settlement of interest has ceased. Moreover, specific provisions on leasing and factoring companies are included.

Charitable contributions

The tax deductibility of donations is not expressly regulated in the respective Greek tax legislation (in contrast to the previously applicable Greek ITC providing for the tax deductibility of specifically enumerated donations, up to a certain amount). Thus,

Greece

the deductibility of charitable contributions shall be examined in light of the generally applicable deductibility criteria, focusing on the productivity of such expenses on a case-by-case basis.

Fines and penalties

Fees from activities constituting a criminal offence, fees from penal clauses, fines, and penalties are not recognised as deductible expenses.

Taxes

Taxes, other than income tax, extraordinary contributions, and VAT corresponding to non-deductible expenses that are not deductible as input VAT, are recognised as deductible expenses.

Other significant items

A general rule on the deductibility of all real and evidenced business expenses realised for the benefit or in the frame of the usual transactions of the company, the value of which is not deemed as higher or lower than the market value, and duly registered in accordance with the rules of recording of transactions is established, with the exception of the restrictively enumerated expenses that are not deductible.

The non-deductible expenses include:

- Some cases of loan interest (*see Interest expenses above*).
- Every kind of expense concerning the acquisition of goods or receipt of services of a value exceeding EUR 500, provided that the partial or total payment was not made through a means of bank payment.
- Unpaid insurance contributions.
- Provisions, with the exception of the explicitly regulated bad debt provisions (*see Bad debt above*).
- Provision or receipt of services in cash or in kind that constitute a criminal offence.
- Deemed income in case of self-use of property, to the extent that the latter exceeds a percentage of 3% of the objective value of the property.
- Expenses for the organisation and conducting of informative conferences and meetings concerning the hospitality (meals and stay) of clients or employees if exceeding the amount of EUR 300 per participant and to the extent that the total annual expense exceeds a percentage of 0.5% of the annual gross income of the enterprise.
- Entertainment expenses, with the exception of such expenses realised by taxpayers having as a main object the provision of entertainment services.
- Private consumer expenses.
- Total of expenses that are paid to tax residents in non-cooperative states or states with a preferential tax regime, unless the taxpayer proves that these expenses refer to real and usual transactions that do not have as their objective the transfer of profits or income or capital with the purpose of tax avoidance or evasion.
- Expenses relating to tax-exempt dividends.

Net operating and capital losses

Losses can be carried forward five years. Carrybacks are not permitted.

Pursuant to a rule on the abuse of provisions on the transfer and setoff of losses, in cases where the direct or indirect ownership or voting rights of an enterprise are changed at a percentage exceeding 33% during a tax year, the carryforward of tax losses ceases to apply unless the taxpayer can prove that the change in ownership occurred for commercial or business purposes.

Payments to foreign affiliates

Royalties, interest, and service fees paid to foreign affiliates are deductible expenses under certain requirements and conditions.

Special restrictions on transactions with non-cooperative states and states with preferential tax treatment

Greek tax law has established rules in relation to non-cooperating states and states with preferential tax treatment.

Non-cooperating states are defined as states that are not EU member states and have not concluded agreements of administrative assistance in the tax sector with Greece or with, at least, 12 other states. Non-cooperative states are enumerated in a Ministerial Decision to be issued annually.

Pursuant to the Ministerial Decision for 2015, the non-cooperating states for 2015 are specified as follows:

- | | | |
|---|--------------------|----------------------------------|
| • Andorra | • Grenada | • Panama |
| • Antigua and Barbuda | • Guatemala | • Philippines |
| • the Bahamas | • Hong Kong | • St. Lucia |
| • Bahrain | • Lebanon | • St. Kitts and Nevis |
| • Barbados | • Liberia | • St. Vincent and the Grenadines |
| • Bermuda | • Liechtenstein | • Samoa |
| • Brunei | • Malaysia | • Seychelles |
| • the Cook Islands | • Marshall Islands | • Singapore |
| • Dominica | • Mauritius | • Uruguay |
| • former Yugoslav Republic of Macedonia (FYROM) | • Monaco | • US Virgin Islands |
| | • Nauru | • Vanuatu |
| | • Niue | |

A legal entity, irrespective of its legal form, is considered located in a preferential tax regime, even if its residence of registered office is located in an EU member state, in cases where it is not subject to taxation in this state or is *de facto* not subject to taxation, or is subject to tax on income or capital at an amount that is equal to or lower than 50% of the tax that would have been due, in accordance with Greek tax legislation, if such entity were resident or were maintaining a PE in Greece.

Pursuant to the Ministerial Decision for 2015, states with preferential tax treatment for 2015 are specified as follows:

- | | | |
|---|-------------------------------|------------------------|
| • Albania | • Gibraltar | • Paraguay |
| • Andorra | • Guernsey | • Qatar |
| • the Bahamas | • Hashemite Kingdom of Jordan | • Republic of Maldives |
| • Bahrain | • Ireland | • Republic of Moldova |
| • Belize | • Isle of Man | • San Marino |
| • Bermuda | • Jersey | • Saudi Arabia |
| • Bonair | • Liechtenstein | • Seychelles |
| • Bosnia and Herzegovina | • Macau | • St. Eustatius |
| • British Virgin Islands | • Marshall Islands | • Turks and Caicos |
| • Bulgaria | • Monaco | • United Arab Emirates |
| • Cayman Islands | • Montenegro | • Vanuatu |
| • Cyprus | • Montserrat | |
| • former Yugoslav Republic of Macedonia (FYROM) | • Nauru | |
| | • Oman | |

Group taxation

Group taxation is not permitted in Greece.

Transfer pricing

Related entities are obligated to document the prices of their intra-group transactions.

An exemption from maintaining a transfer pricing documentation file is provided if:

- the above transactions or transfer of operations amount to up to EUR 100,000 annually and the total turnover of the liable party does not exceed EUR 5 million annually, or
- the above transactions or transfer of operations amount to up to EUR 200,000 annually and the total turnover of the liable party exceeds EUR 5 million annually.

The transfer pricing documentation file is accompanied by the 'Summarized Table of Transfer Pricing Information', which is submitted electronically to the tax administration within four months following the end of every fiscal year.

The transfer pricing documentation file is kept at the registered seat of the liable party for the whole time period that the books and records are required to be kept, and should be provided to the tax administration within 30 days from the receipt of the relevant request.

The obligation of updating the respective transfer pricing file is provided in case of a change of market circumstances that affect the data included therein. The update is made in the tax year in which the change takes place.

The option of obtaining an Advance Pricing Arrangement (APA) of the methodology of specific future intra-group transactions with related parties is integrated in the Code of Tax Procedures. The object of the APA constitutes the total of the criteria used for the determination of the prices of intra-group transactions during a specific time period, which include mainly the transfer pricing methodology used, comparable or reference data, and the respective adjustments, as well as the critical assumptions on future developments. The object of the APA may constitute every other specialised matter concerning the pricing of transactions with related parties.

The validity of the APA decision cannot exceed four years, and it cannot enter into force retroactively (i.e. the tax year that has lapsed at the time the application for the APA has been submitted). The issuance of the APA decision does not impede the subsequent application of a mutual settlement procedure according to the applicable DTT.

The APA decision may be renewed, revoked, or cancelled by a decision of the tax administration, provided that the legal conditions are met.

The delayed submission of the Summary Information Table of transfer pricing information file incurs a penalty calculated at a percentage 1/1,000 of intra-group transactions (not below EUR 500 and not exceeding EUR 2,000).

The penalty for inaccurate submission of the Summary Information Table of transfer pricing information is calculated at a percentage 1/1,000 of the intra-group transactions (not below EUR 500 and not exceeding EUR 2,000), to the extent that the inaccuracy is higher than 10% of the transactions.

The penalty for the non-submission of the Summary Information Table of transfer pricing information is calculated at a percentage 1/1,000 of the intra-group transactions (not below EUR 2,500 and not exceeding EUR 10,000).

The penalty for the non-submission of the transfer pricing documentation file (imposed upon the expiration of the one-month deadline) is calculated at EUR 20,000 (after the 90th day or the non-submission in general).

A repetition within five years of the first infringement incurs double the initial penalty, whereas a second repetition within five years from the first infringement incurs quadruple the initial penalty.

Thin capitalisation

The thin capitalisation rules are determined in connection to the taxable profits before interest, tax, and depreciation (EBITDA). More specifically, interest expenses are not deductible to the extent that the surplus of interest expenses compared to interest income exceeds a percentage of 30% of EBITDA.

In application of a transitional provision, this limit will be:

- 60% from 1 January 2014.
- 50% from 1 January 2015.
- 40% from 1 January 2016.
- 30% from 1 January 2017.

The aforementioned limit does not refer to net interest expenses that do not exceed the amount of EUR 5 million, and from 1 January 2016 this amount is reduced to EUR 3 million.

Any excess amount of non-deductible interest expenses may be carried forward indefinitely to future years and will be deductible in future years to the extent that these future years indicate an uncovered EBITDA amount.

The aforementioned rules do not apply to credit institutions, leasing companies, and factoring companies that are licensed by the Bank of Greece or respective regulatory authorities of other EU member states.

Controlled foreign companies (CFCs)

CFCs rules have been introduced into the Greek legislation applicable from 1 January 2014 onwards. More specifically, the taxable income of a taxpayer with tax residence in Greece shall be increased by the undistributed income of a legal person or legal entity with tax residence in another country, under the following conditions:

- The taxpayer, alone or together with affiliated persons, directly or indirectly owns shares, voting rights, or equity in excess of 50% or is entitled to receive more than 50% of the profits of that legal person or legal entity.
- The above legal person or legal entity is subject to taxation in a non-cooperative state or in a country with a preferential tax regime (*see the lists in the Deductions section*).
- More than 30% of the net income before taxes earned by a legal person or legal entity falls into at least one of the categories of income derived either from interest, dividends, royalties, income from immovable property, or income from insurance, banking, or other financial activities.
- It is not a company whose principal class of shares is subject to trading on a regulated market.

The above do not apply to legal persons or legal entities with tax residence in the European Union or residence in a country that is a contracting member of the European Economic Community (EEC) unless the establishment or the financial activity of such legal entity constitutes a fictitious situation with the view to avoid taxation.

Tax credits and incentives

Foreign tax credit

Tax paid abroad for income taxable in Greece is credited but is limited to the amount of Greek tax due.

Greece

Deferred taxation

The concept of deferred taxation applies on the basis of the International Financial Reporting Standards (IFRS) to entities supervised by the Bank of Greece (namely banks and leasing companies, as well as factoring companies). In this respect, said entities may convert tax assets into tax credits in return for shares issued to the Greek State. Specific rules and conditions apply.

Incentives for the maintenance of workplaces

Legal entities that suffer a reduction of turnover for two consecutive accounting periods without reducing their workforce can enjoy a reduction of the tax rate by three percentage units. However, a revocation of the granted benefit and imposition of further tax in case of reduction of personnel or increase of the turnover within the three-year period is provided.

Other tax incentives

Apart from the aforementioned tax incentives, L. 3908/2011 on 'Bolstering of Private Investments for Economic Growth, Entrepreneurship and Regional Sustainability' (the Investment Incentive Law) provided for certain tax incentives in case of eligible investments.

The incentive law L. 3908/2011 had been introduced in Greece in compliance with the EU State Aid regulatory framework as formed by the Commission Regulation (EC) 800/2008 (in line with Regulation 994/98/EC) and the Map for Regional Aid for the period 2007-2013, which were effective up to 30 June 2014, and thus are no longer in force. As such, the application of L. 3908/2011 has been suspended.

A new incentive's law in compliance with the Guidelines on regional State Aid for the period 2014-2020 in Greece is expected to be adopted by the Greek Parliament within the summer 2016.

Withholding taxes

WHT rates are as follows:

Type of income	WHT rate (%)
Dividends	10 (15 as of 1 January 2017)
Interest	15
Royalties and other payments	20
Fees for technical projects, management fees, and consultancy and other related services	20
By exception, fees received by contractors of every kind of technical projects and lessors of public, municipal, association, or port proceeds	3% on the value of the project under construction or lease payment

Legal entities tax resident in Greece are not subject to WHT in relation to royalties, fees received for the provision of consultancy and other related services, and management fees, unless provided to general government bodies.

Legal entities that are not tax resident in Greece and do not maintain a PE in Greece are not subject to Greek WHT in relation to technical services, consultancy services, or other related services and management fees.

Conversely, foreign legal entities that maintain a PE in Greece are subject to Greek WHT in relation to the provision of the aforementioned services.

Legal entities that are tax resident in Greece or foreign legal entities that maintain a PE in Greece are not subject to WHT in relation to royalty payments.

The exemption from the obligation of WHT for payments of dividends, interest, and royalties by a Greek subsidiary to its parent company includes payments of dividends, interest, and royalties to Greek parent companies.

For the exemption from dividend WHT, the following conditions apply:

- The receiving legal entity should own shares, parts, or a participation of at least 10%, on the basis of the value or number, in the share capital, right to profits, or voting rights of the distributing taxpayer.
- The minimum holding percentage of shares or parts or participations should be held for at least 24 months (subject to providing a bank guarantee, in which case the exemption may apply prior to completing the 24-month holding period).
- The receiving legal entity should be:
 - included in the forms enumerated in Annex I Part A of Directive 2011/96/EU, as in force
 - tax resident in an EU member state according to the legislation of such state and not be considered as tax resident in a third country in application of the terms of the DTT concluded with such third country, and
 - subject, without the option or exemption, to one of the taxes mentioned in Annex I Part B of Directive 2011/96/EU, or to any other tax that may in the future replace one of those taxes.

As of 1 January 2016, a general anti-abuse rule is introduced by virtue of which the tax exemption in case of collection and payment of dividends is alleviated in case it is considered that a 'non-genuine arrangement' exists. A 'non-genuine arrangement' is an arrangement that has not been put into place for valid commercial reasons reflecting the economic reality.

For the exemption from WHT for interest and royalty payments, the following conditions apply:

- The receiving legal entity should directly own shares, parts, or a participation of at least 25%, on the basis of the value or number, in the share capital, right to profits, or voting rights of the paying taxpayer; the paying taxpayer directly owns shares, parts, or a participation of at least 25% in the share capital of the receiving entity; or a third legal entity directly owns shares, parts, or a participation of at least 25% in the share capital of the receiving entity and the paying legal entity.
- The minimum holding percentage of shares or parts or participations should be held for at least 24 months (subject to providing a bank guarantee, in which case the exemption may apply prior to completing the 24-month holding period).
- The receiving legal entity should be:
 - included in the forms enumerated in Annex I Part A of Directive 2003/49/EU, as in force
 - tax resident in an EU member state according to the legislation of such state and not be considered as tax resident in a third country in application of the terms of the DTT concluded with such third country, and
 - subject, without the option or exemption, to one of the taxes mentioned in Annex I Part B of Directive 2003/49/EU, or to any other tax that may in the future replace one of those taxes.

Payments of interest of bank loans, including default interest, as well as interest of intra-bank deposits, are exempt from WHT.

Greece

Interest received from Greek government bonds and treasury bills by legal entities that are not tax resident in Greece and that do not maintain a PE in Greece are not subject to WHT.

The following table provides a summary of the WHTs applicable under the respective DTTs entered into by Greece:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident individuals and companies	10 (15 as of 1 January 2017)	15	20
Non-resident individuals and companies:

Notes

1. The non-resident legal person, legal entity, or individual pursuing business activity may elect to be taxed on income from royalties and fees for technical services, administration fees, and fees for consulting or similar services in accordance with the rules applicable to tax residents who receive such fees and then credit the WHT against the income tax due.
2. The rate of 5% applies in case the beneficiary is a company (excluding a partnership) and directly holds at least 25% of the capital of the paying company.
3. It should be taken into account that such rates are based on the DTT applicable as of 1 January 2011, whilst other rates have been applicable in the past.
4. The rate of 5% will apply if the beneficial owner is a company that directly holds at least 25% of the voting power of the company paying the dividends.
5. The rate of 5% is applicable only for the right to use cinematograph films.
6. Rate of 5% applies to loans not incorporated into negotiable instruments and granted by banks.
7. A rate of 5% is applicable to shareholders of 25% and above.
8. The rate of 5% applies if the royalties consist of payments of any kind received as a consideration for the use of or the right to use any copyright of literary, artistic, or scientific work, including cinematograph films.
9. Exemption ('0' rate) applies to payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for television or radio broadcasting.
10. Interest (on bonds, securities, notes, debentures, or on any other form of indebtedness) received from sources within Greece by a resident or corporation of the United States (US) not engaged in trade or business in Greece through a PE therein, shall be exempt from Greek tax but only to the extent that such interest does not exceed 9% *per annum*; but such exemption shall not apply to such interest paid by a Greek corporation to a US corporation controlling, directly or indirectly, more than 50% of the entire voting power in the paying corporation.
11. The 5% rate is applicable if the royalties consist of payments of any kind received as a consideration for the use of industrial, commercial, or scientific equipment, and the 10% rate is applicable for all the other cases.
12. The 8% rate is applicable when the beneficiary of the interests is a bank or a financial institution, 10% rate is applicable for all the other cases.
13. Exemption ('0' rate) applies to copyright royalties and other like payments in respect of the production or reproduction of any cultural or artistic work (but not including royalties in respect of motion picture films nor royalties in respect of works on films or videotapes or other means of reproduction for use in connection with television broadcasting).

In general, it should be noted that certain DTTs may include specific clauses in specific cases that are not all captured in the table; therefore, a careful review of each DTT is highly advisable.

Tax administration

Taxable period

The taxable period is the calendar year, which may end either on 30 June (for legal persons or legal entities keeping double entry books) or 31 December. The taxable year should not, in any case, exceed 12 months.

The exceptional case of closing the accounting period, for income tax purposes, at a date other than the 31 December or 30 June is limited only to Greek legal entities/other entities that are directly or indirectly owned at a percentage exceeding 50% by foreign legal entities/other entities.

Tax returns

CIT returns of Greek SAs, limited liability companies (LLCs), and branches of foreign companies are filed on a special form by the last day of the sixth month following the end of the tax year.

Tax returns are required to be submitted electronically.

The CIT return constitutes the basis for the direct assessment of tax, which arises without a further action by the tax administration, simultaneously with the submission of the tax return by the taxpayer.

The taxpayer also has the right to amend the tax return by paying the respective difference in tax or by establishing one's rights for a refund of tax paid in excess according to the amended tax return.

Moreover, the taxpayer may request the issuance of a corrective tax assessment act in case of filing an amending tax return for which an administrative assessment tax act has been issued, and the tax administration is obligated to issue such corrective tax assessment if the amending tax return is accepted.

Payment of tax

Prepayment of the current year's CIT (for SAs, LLCs, and private capital companies [IKEs], a 100% prepayment from tax year 2014 onwards, while for partnerships, non-profit entities of public or private law, civil law companies, and joint ventures of partnerships, a 55% prepayment for tax year 2014, a 75% prepayment for tax year 2015, and a 100% prepayment for tax year 2016 onwards), less tax withheld at source, based on the tax return are paid in eight equal monthly instalments, the first of which should be paid upon filing.

CIT and tax prepayment based on the tax return are paid in eight equal monthly instalments, the first of which should be paid upon filing of the CIT return (i.e. until the last day of the sixth month following the end of the tax year) and the remaining seven until the last day of the seventh month of the filing of the CIT return, which, however, may not extend beyond the same tax year.

For newly established companies, the prepayment is reduced to 50% for the first three years of operations.

Tax audit process

Tax audit procedures

The tax audit commences with the issuance of an audit order for open tax years, usually not more than five. The order concerns the audit of all tax issues (CIT, VAT, WHT, capital gain tax, etc.). The duration of the audit may vary from a few weeks to a few months, in certain cases.

The tax administration performs a tax audit from its offices on the basis of the financial statements, tax returns, and other documents that are submitted by the taxpayer, as well as the documents and information in its possession.

The performance of a complete on-site tax audit must be notified to the taxpayer by a previous written notification. A complete on-site tax audit is performed without prior notification in cases where indications of tax avoidance exist.

The tax administration may have access to the books and records and to other documents of the taxpayers, as well as to the receipt of copies thereof. The tax administration has the same rights with regard to books and records that are kept electronically. It is noted that the legal entity subject to keeping books and records must maintain these books and records for at least five years.

An extension of the on-site tax audit may be granted once for six months, as well as for another six months in extraordinary cases.

The right for a new audit of a tax period already audited is provided only in case new data arises that affects the calculation of the tax liability. 'New data' is defined as all data that could not have been known to the tax administration upon the commencement of the original tax audit.

The election of the cases subject to audit will be made on the basis of risk analysis criteria. Exceptionally, cases may be elected on the basis of other criteria, according to a decision of the General Secretary of Public Revenue. It should be noted that, based on the recently enacted L. 4389/2016, the General Secretariat for Public Revenue is abolished and a new Independent Public Revenue Authority (IPRA) is formed aiming to the determination, the assessment, and the collection of tax, customs, and others public revenues.

The tax administration may use the following audit techniques for the indirect determination of the taxable basis:

- The proportionality principle.
- The analysis of the liquidity of the taxpayer.
- The net position of the relation between the sales price to the total turnover.
- The amount of bank deposits and expenses in cash.

The procedure of notification of the taxpayer of the results of the tax audit is provided. More specifically, a temporary corrective assessment of tax is issued in case a differentiation of tax arises on the basis of the tax returns of the taxpayer and the results of the audit.

Following the submission of such decisions and within 20 days from the receipt of the notification thereof, the taxpayer may submit its views in writing, whilst after that point a final corrective assessment of tax sheet is issued, which is notified to the taxpayer, within a month from the end of the deadline for submitting the taxpayer's views in writing.

Audit Centre for Taxpayers with Great Wealth

The special audit authority 'Audit Centre for Taxpayers with Great Wealth', competent for the whole Greek territory, performs provisional, temporary, and ordinary tax audits, as well as the audit of real estate property and of the annual expenses of individuals. The audit of foreign real estate companies not disclosing their ultimate beneficiary individuals and of Greek real estate companies in which a foreign legal entity participates without disclosing the ultimate beneficiary individuals are also assigned to the Audit Centre for Taxpayers with Great Wealth. Moreover, the Audit Centre

for Taxpayers with Great Wealth is also competent for the certification and enforced collection of revenue of taxpayers with great wealth.

Audit Centre for Large Enterprises

The 'Audit Centre for Large Enterprises' is responsible for the performance of ordinary audits of taxpayers with annual gross income exceeding EUR 25 million for the fiscal year closing within 2009, of affiliated enterprises drafting consolidated financial statements irrespective of their gross income on the condition that the gross income of at least one of the affiliated enterprises exceeds EUR 25 million for the fiscal year closing within 2009, and unaudited cases prior to any business restructuring effected until 2011, irrespective of the gross revenues and the competent tax authority responsible for the taxation of their income, on the condition that the company or any of the companies resulting from the business restructuring falls within the ambit of the Audit Centre for Large Enterprises. The Audit Centre for Large Enterprises is also competent for the enforced collection of revenue of large enterprises located in the whole Greek territory.

Following the audit and the notification of tax audit findings, the company may in turn:

- File a mandatory administrative recourse within the framework of the special administrative procedure (out-of-court settlement procedure) before the Directorate for Dispute Resolution with the claim of reviewing any act of the tax authorities (including the tax assessment act), in case the content of the tax assessment act is questioned within a deadline of 30 days from the notification of the act or the realisation of the failure. The direct filing of a recourse before the competent administrative courts against acts of the tax administration is inadmissible.
- Take the case to court (filing of a recourse) against the explicit/tacit negative reply of the Dispute Resolution Directorate. For tax/customs cases exceeding EUR 150,000, the competent court is the Court of Appeal (of first and last instance, which could normally issue a decision within six to 12 months; said timeframe may be longer, taking up to one to two years in case the competent court is the Court of First Instance [i.e. for disputes of an amount less than EUR 150,000]). The Supreme Administrative Court may take up to three to four years.
- Criminal sanctions are also imposed on the company's legal representative under certain conditions.

Tax auditors' practice

In the past, complexity of the Greek tax legislation and the vagueness of its requirements enabled the tax auditors to dispute either the company's results reflected in its accounting records or to disallow expenses. This is true in all tax audits and, in spite of companies' endeavours to comply with the tax requirements, tax audits have always resulted in assessment of additional taxes and penalties.

The amount of additional taxes depends mainly on the following:

- Company's vulnerability because of nature of business and transactions.
- Taxes already paid on the basis of the company's income tax returns.
- Profits declared by competitors.
- Weaknesses and shortcomings that the tax auditors might reveal if a full audit is carried out.

In respect of deductible expenses, the legislation prescribes, among other requirements, that such expenses must be realised for the benefit of the company or in its ordinary course of normal business activity to represent, a valid transaction at a value that is not over or under the market value based on the data available by the tax administration, properly recorded in the company's books in the respective period to which they relate, and can be evidenced by appropriate documentation, without defining what a business expense is. Consequently, the tax auditors dispute the deductibility of various items

arguing that, in their opinion, they are not contributing to the company's business income.

Greek SAs and LLCs whose annual financial statements are subject to a statutory audit by individual Certified Auditors and audit firms are required to obtain an 'annual tax certificate' from their certified auditors upon the completion of a tax audit conducted, confirming compliance with Greek tax legislation. The tax audit is conducted on specific tax areas as defined by a special audit program issued by the Ministry of Finance in cooperation with the Committee of Accounting Standardization and Auditing (ELTE). The audit program will be updated annually and is in accordance with the provisions of International Standard on Non-Audit Assurance Engagements 3000. It should be noted that the annual tax certificate was applicable until the tax year 2015. Therefore, if no legislative amendment takes place extending the years for which a tax certificate is required, the annual tax certificate will not apply as from the tax year 2016 onwards.

Statute of limitations

The tax administration may issue an administrative, estimated, or corrective tax assessment within five years from the end of the year in which the deadline for filing the respective tax return lapsed.

This five-year prescription period may be extended for one year if:

- the taxpayer files an initial or amending tax return within the fifth year of the prescription period
- an application for the granting of information from a foreign state has been filed and commences from the date of the receipt of the respective information by the tax authority, or
- a mandatory administrative recourse has been filed and commences from the issuance of a decision that is not subject to recourse.

Exceptionally, for cases of tax avoidance, the tax administration has the right to issue an administrative, estimated, or corrective tax assessment within 20 years from the end of the year in which the deadline for filing the respective tax return lapsed.

In case of a corrective tax assessment resulting in an amendment of the tax assessment act for a year for which the prescription period of the state's right to audit has lapsed, the adaptation is made to the last year for which said right has not been prescribed.

Other issues

Intergovernmental agreements (IGAs) and cooperation

Greece and the United States have reached an agreement in substance and Greece has consented to disclose this status on the US Foreign Account Tax Compliance Act (FATCA) arrangements with effect from 30 November 2014.

In accordance with this status, the text of such IGA has not been released, and financial institutions in Greece are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Base erosion and profit shifting (BEPS)

Greece adheres, in general, to the BEPS guidelines.

Measures that have been adopted and that are in the spirit of the BEPS guidelines include the CFC legislation and General Anti-Avoidance Rule (GAAR) applicable.

Choice of business entity

The main differences between a subsidiary (i.e. *Société Anonyme* [SA] or limited liability company [LLC]) and a branch of a company, from a corporate establishment perspective, are the following:

- A subsidiary is a separate legal entity from its parent company, whereas a branch does not form a separate legal entity, does not have its own shareholders, and, consequently, the funds needed for its operation are transferred from the overseas parent company.
- The parent company of a branch must be either the equivalent of a Greek SA or an LLC, whereas there is no such restriction for subsidiaries.
- The day-to-day management of a branch is exercised by the legal representative, a person appointed by the parent company, whereas an SA is represented by its BoD and an LLC is administered and directed by the administrator(s).
- No minimum capital is required for the establishment of a branch or LLC; nevertheless, the share capital of the parent company should be, in principle, at least EUR 24,000 if the parent company has the legal form of an SA. However, from a practical perspective, the competent Greek General Commercial Registry might accept the establishment of a branch of an EU based SA, even if the share capital of the parent company is less than EUR 24,000.
- An SA appears to be a more popular type of company than a branch and an LLC. In particular, certain investors still tend to opt for the establishment of an SA company, particularly if they would like to participate in public tenders, etc.

The main legal differences between an SA and an LLC in Greece from a company law/establishment perspective are the following:

- An SA is managed by a BoD consisting of at least three members, whereas an LLC can be managed by only one individual, the administrator (legal entities are permitted to be appointed as BoD members or administrators). Both BoD members and administrators have to acquire a Greek tax registration number and a Greek residence permit (if applicable) prior to the establishment of the relevant companies. It should also be noted that the acquisition of a residence permit for non-EU citizens is a time consuming procedure.
- The shareholders of an SA are not required to be registered with the Greek tax authorities (however, if the said shareholders are also BoD members, they are required to be registered with the competent Greek tax authorities), whereas the partners of an LLC have to be registered with the Greek tax authorities.
- Establishment/incorporation of an SA is performed through the so-called One Stop Shop Authority (i.e. Notary Public). Any appropriate documents (applications, declarations, certificates, etc.) required for establishment process should be produced and submitted to the Notary Public by the founders of the SA, as said persons are defined in the Articles of Association (AoA) of the SA under establishment, or their representatives appointed by virtue of an (duly legalised as to the signature of the founders) authorisation. After the submission of the necessary documentation to the competent One Stop Shop Authority, the said authority accomplishes all the necessary steps for the establishment of the Greek SA, including the granting of the Greek tax registration number. Depending on the particular activity of the SA under establishment, the satisfaction of particular regulatory requirements, such as the acquisition of certain licences, might be required.
- Establishment/incorporation of an LLC is performed through the One Stop Shop Authority (i.e. Notary Public). Any appropriate documents (applications, declarations, certificates, etc.) required for the establishment process should be produced and submitted to the Notary Public by the founders of the LLC, or their representatives appointed by virtue of written authorisation (duly legalised as to the signature of the founders). After the submission of the necessary documentation to the competent One Stop Shop Authority, the said authority accomplishes all the necessary steps for the establishment of the Greek LLC, including the granting of the Greek tax

registration number. Depending on the particular activity of the Greek LLC under establishment, the satisfaction of particular regulatory requirements, such as the acquisition of certain licences, might be required. SA and LLC companies are supervised by the Greek Ministry of Development (joint supervision by the General Commercial Registry and the competent Prefecture of the registered seat of the SA), which necessitates certain filings to be performed (e.g. minutes of BoD, general announcements, financial statements).

The 'Private Company' (PC)

- The PC constitutes a legal entity and is commercial in nature, even if its object is not per se commercial. The capital of the PC can be freely determined by the partners and can amount to zero, whilst its partners participate in the PC by means of capital, non-capital, and guarantee contributions.
- The PC is not entitled to acquire, either directly or indirectly, its own capital parts.
- The PC has its registered seat in the municipality referred to in its AoA, while the transfer of the registered seat of the PC in another country of the European Economic Area does not necessarily result in the dissolution of the PC, provided that the recipient country recognises the transfer and the continuity of legal personality. The PC is not obligated to have its actual seat in Greece, whilst the PC is capable of establishing various types of secondary establishments either in Greece or abroad.
- The term of the PC is definite; if not otherwise stipulated in the AoA of the PC, the PC has a term of 12 years following its establishment.
- The PC is administered and represented by one or more administrators.
- The administrator represents the PC and conducts in its name all actions pertaining to the administration of the PC, the management of its assets, and, in general, the pursuit of its objects.
- The establishment of the PC is effected by means of its registration with the Greek General Commercial Registry (GEMI).
- The PC is dissolved: (i) at any time following a resolution of the partners, (ii) when its definite term has expired, unless the term of the PC is extended by virtue of a resolution of the partners, (iii) if the PC defaults, and (iv) in all other circumstances contemplated by the law or the AoA.

Significant developments

As of 1 January 2016, financial institutions, regardless of domicile, may deduct provisions for bad debt and guarantee liabilities.

Hitherto, this has not been explicitly authorised by the law. The point of departure was that losses on bad debt and guarantees could only be deducted once realised, not when provisioned for. It was possible to apply for an exemption on this in order to deduct provisions. However, the Greenland Tax Agency was of the opinion that access to exemption was only open to financial institutions domiciled in Greenland. This created a less favourable tax treatment for financial institutions operating as branches of foreign companies.

With the new amendment, all financial institutions, regardless of domicile, must expressly deduct provisions for bad debt and guarantee liabilities from their income in the year of provisioning.

Further, there has been a minor amendment that authorises that companies with a public licence to produce hydroelectric energy may be tax exempt to the extent this follows from the relevant licence. The purpose of this is to allow for replacement of corporate taxes with other payments stipulated by a licence grant, such as turnover based royalties or other forms of payment. This system duplicates the system already in place for licences under the Natural Resources Act (*råstofloven*), which comprises the exploitation of oil, gas, and minerals.

Taxes on corporate income

Greenlandic companies are taxable to Greenland on their worldwide income, except for income from real estate outside of Greenland, which is exempt. Non-resident companies are liable to tax in Greenland on business profits derived through a permanent establishment (PE) in Greenland. Further, non-resident companies are tax liable in Greenland for business profits derived in relation to the exploration for or exploitation of oil, gas, and minerals, regardless of the existence of a PE. Very few double tax treaties (DTTs) offer relief since Greenland only has full-fledged DTTs covering corporate tax with Denmark, the Faroe Islands, Iceland, and Norway.

The corporate tax rate is 30% for both Greenlandic and foreign companies. On top of the corporate tax, there is a 'surcharge' of 6% of the corporate tax payable; consequently, the effective corporate tax rate is 31.8%. Oil and mineral licence holders are exempt from the 6% surcharge according to current practice.

There are no industry-specific or special-tax regimes in Greenland. However, it is determined in all oil exploration licences that oil licensees pay a so-called 'surplus royalty' on top of the corporate tax.

Oil companies

All companies with mineral exploration licences (current and future) are required to pay a government royalty as a condition for grant of a production licence. The royalty terms form part of the licence conditions and vary with the age of the licence.

On licences issued prior to 2014, oil companies pay a 'surplus royalty' of 7.5%, 17.5%, and 30%, which should be paid when the internal rate of return exceeds, respectively, 21.75%, 29.25%, and 36.75% plus the official Danish discount rate, and carry the state-owned company with 12.5% (open door area 8%). Newer licences apply a gross royalty of 2.5% and a surplus royalty of 7.5%, 17.5%, and 30%, which should be paid when the accumulated turnover exceeds 35%, 45%, and 55%, respectively. Further, the state participation is reduced to 6.25% (carried).

Nonetheless, the model licence terms for upcoming rounds in Baffin Bay contain surplus royalty levels of 7.5%, 10%, and 12.5% at 35%, 45%, and 55% internal rates of return, respectively. In other words, royalty levels are likely to differ between licences and should therefore be scrutinised.

Mining companies

There has been a policy of implementing royalty terms in mining licences as well. A Strategy Report for 2014 through 2018 stipulated that mining companies shall pay a gross royalty of up to 5.5% (depending on the type of mineral) based on turnover, plus, in the case of gemstones, a 'surplus royalty' on future licences. Apparently, this is not only for licences awarded in the future but also, to some extent, for mining companies with existing exploration licences in order for them to obtain a production licence.

Since these changes are implemented predominantly through licence terms rather than legislation, it is not entirely clear when and to what extent the changes will be finally implemented.

There is authority for according breaks in the corporate tax corresponding to the royalties contained in licence terms.

Hydroelectric energy

There has been a minor amendment that authorises that companies with a public licence to produce hydroelectric energy may be tax exempt to the extent this follows from the relevant licence. The purpose of this is to allow for replacement of corporate taxes with other payments stipulated by a licence grant, such as turnover based royalties or other forms of payment. This system duplicates the system already in place for licences under the Natural Resources Act (*råstofloven*), which comprises the exploitation of oil, gas, and minerals.

Local income taxes

There are no local corporate income taxes or similar charges in Greenland.

Corporate residence

A corporation is resident in Greenland for tax purposes if it is registered in the Danish Companies Register with its principal seat of business in Greenland or if it has its effective seat of management in Greenland. The effective seat of management is typically the place where the management decisions concerning the company's day-to-day operations are made.

Permanent establishment (PE)

Non-resident companies are liable to tax in Greenland on business profits derived through a PE in Greenland. Generally, Greenland may be assumed to rely on the principles of the Organisation for Economic Co-operation and Development (OECD)

Greenland

model tax treaty in the determination of whether a PE exists. There is virtually no published practice on the issue. Apart from income from a PE, foreign companies are tax liable on income in connection with the exploration and exploitation of oil, gas, and minerals, regardless of whether a PE exists. This includes all activity ultimately serving the extractive industries, including all kinds of subcontractors and service providers to the industry.

Other taxes

Value-added tax (VAT)

There is no VAT in Greenland.

Import duties

There are no general import duties on operating equipment in Greenland. However, if present in Greenland for more than an eight-month period, operating equipment has to be declared to the Greenlandic tax authorities for statistical purposes. There are import duties on some assets, such as cars, etc.

There are also import duties on alcohol, cigarettes, food products, etc. The fares vary depending on the exact goods in question.

Excise duties

There are Greenlandic excise duties on fishing of some fish species, alcohol produced in Greenland, lottery and gambling activities, motor vehicles, and various other excise taxes. The duties depend on the exact circumstances.

Property taxes

There are no property taxes in Greenland.

Stamp taxes

Stamp tax is payable on a few documents, such as a deed of transfer of real estate and ships (1.5% of the transfer sum), including on transfer of shares in companies that own ships.

Capital gains taxes

There are capital gains taxes on receivables, equity instruments, real estate, financial contracts (derivatives), and depreciable assets, including oil, gas, and mineral licences. The tax rate is identical to the general corporate tax rate, effectively 31.8% (30% for oil, gas, and mineral licence holders).

Losses on financial instruments may only be deducted from gains on financial assets.

Social security contributions

Employers are obligated to pay 0.9% of all paid wages and salaries as social security contribution.

All Danish, Greenlandic, and Faroese employers are subject to Danish social security payments (ATP). This applies to both foreign and Danish employees. However, foreign employees are exempt unless they are working in Greenland for more than six months.

Foreign employers are exempt from ATP unless they employ Danish employees who are not residents in Greenland.

Payroll taxes

No additional payroll taxes are applicable in Greenland.

Branch income

Greenlandic PEs of foreign companies, and taxable income connected to oil, gas, and mineral activities, are taxed under the same rules and rates as Greenlandic resident companies. There is no branch profits remittance tax or other similar tax on branch profits. As a branch is considered to be the same legal entity as the headquarters, interest paid from the branch to the headquarters is not tax deductible.

Unusually, if one foreign company has more than one location or PE in Greenland, these are treated as separate taxable entities with no possibility of consolidation.

Income determination

Taxable income is generally calculated as income determined for accounting purposes, which is adjusted and modified for several items as prescribed by the tax laws. One typical timing difference is depreciation.

Inventory valuation

There are no formal rules about inventory valuation in Greenland. Generally, inventory is valued at acquisition cost according to a first in first out (FIFO) principle.

Capital gains

Capital gains are subject to capital gains taxes. *See Capital gains taxes in the Other taxes section for more information.*

Dividend income

Income from dividends is generally included in taxable income. There is no relief, such as participation exemption or the like, meaning that any form of Greenlandic holding structure is generally inefficient. Dividends from foreign companies, however, are tax free, provided that the recipient holds at least 25% of the shares in the distributing company for at least one year.

Interest income

Interest income is generally included in taxable income.

Rental income

Rental income is generally taxable in Greenland; however, rental income from real estate located outside of Greenland is not taxable.

Royalty income

Royalty income is taxable in Greenland.

Partnership income

Partnership income is treated similarly to other income. Partnerships are generally fiscally transparent.

Unrealised gains/losses

Unrealised gains/losses are not taxable in Greenland. Greenland does not use a mark-to-market principle on capital gains.

Stock transactions

Gains and losses on equity transactions are taxable.

Foreign currency exchange gains/losses

Foreign exchange gains/losses are taxable in Greenland if realised; however, only foreign exchange gains/losses on receivables are taxable, not on debentures.

Greenland

Foreign income

Greenlandic companies are taxable to Greenland on their worldwide income, except for certain income relative to foreign real estate; consequently, income from foreign PEs is taxable to Greenland.

The income of a foreign subsidiary may be taxed in the hands of its Greenlandic parent company if the subsidiary constitutes a controlled foreign company (CFC). *See Controlled foreign companies (CFCs) in the Group taxation section for more information.*

Deductions

The general deduction scheme is fairly standard, although the Greenlandic Tax Agency seems to have a restrictive view of the kinds of expenses that are deductible. One very unusual feature is that dividends paid are deductible for the distributing company.

Depreciation and amortisation

Tax depreciation is not required to be in coherence with book depreciation.

Operating assets can be depreciated by 30% a year on a declining-balance basis, ships and aeroplanes can be depreciated by 10% on a straight-line basis, and buildings and installations can be depreciated by 5% on a straight-line basis. Oil and mineral licences can be depreciated over ten years (oil) and four years (minerals) on a straight-line basis. If the lifetime of the licence is shorter than ten or four years, the licences are depreciated over the lifetime of the licence on a straight-line basis.

Depreciation allowances that are recaptured as part of a capital gain on the sale of an asset are generally fully taxable.

Unusually, companies are allowed a depreciation relief corresponding to gains on divested depreciable assets; however, this rule may not reduce the company's income to less than zero (or less than the balance of depreciable assets in the case of operating assets).

Goodwill

Goodwill can be depreciated as an operating asset (i.e. by 30% on a declining-balance basis).

Start-up expenses

No specific rules in Greenlandic tax law govern the treatment of start-up expenses. Instead, these expenses are treated according to general tax law.

Interest expenses

Interest expenses are generally deductible under Greenlandic tax law. However, there are some limitations (*see Thin capitalisation in the Group taxation section*).

Bad debt

Companies can deduct losses on bad debt for Greenlandic tax purposes only to the extent the losses are realised. Note that there is a high threshold for when a loss is deemed to be realised.

An exception to this rule is that financial institutions shall deduct provisions for bad debt and guarantee liabilities in accordance with the accounting rules applicable to them. The same applies to mortgage institutions, but only if they are domiciled in Greenland.

Charitable contributions

Contributions to charity are not deductible for Greenlandic tax purposes.

Pension expenses

Pension expenses are deductible as operating expenses.

Payments to directors

Payments to directors are deductible as operating expenses.

Research and development (R&D) expenses

R&D expenses may be deductible or not, depending on whether they are deemed operating expenses or capital expenses.

Bribes, kickbacks, and illegal payments

There is no published practice on the deductibility of bribes, kickbacks, return commissions, and the like. In Danish and Greenlandic practice, illegal payments are generally not deductible. Since 2008, any bribery payments, whether in or outside Greenland and whether towards a national or international authority, have been a criminal offence. Consequently, it may reasonably be inferred that no such payments are deductible.

Fines and penalties

Fines and penalties are not deductible for Greenlandic tax purposes.

Taxes

Income taxes are, in general, not deductible for corporate tax purposes. Excise duties are deductible.

Other significant items

A highly unusual item is that dividends distributed are deductible in the hands of the distributing company. If a decision to distribute is made before the deadline for filing the income tax return (1 May) on the basis of the preceding year's profits, the deduction may be carried back into the preceding year.

Net operating losses

Tax losses can be carried forward for up to five years. However, oil and mineral licence holders can carry losses forward indefinitely.

Tax losses may not be carried back and utilised in previous income years.

Tax losses are forfeited at 'significant' change of ownership or, unusually, activity of the company. Dispensation is available. 'Significant' is interpreted as 30% of ownership rights.

Payments to foreign affiliates

A Greenlandic corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm's-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction but is subject to thin capitalisation (see *Thin capitalisation in the Group taxation section*).

Group taxation

Joint taxation is not possible in Greenland.

Transfer pricing

Greenlandic transfer pricing rules apply to transactions between related parties (e.g. intra-group transactions). The rules apply when a company or person directly or indirectly owns at least 50% of the share capital or 50% of the voting rights in another company.

Greenland

Companies are obligated to disclose in the annual tax return certain information regarding type and volume of intra-group transactions. There is currently no practice regarding requirements for transfer pricing documentation.

Thin capitalisation

Greenland limits interest deductions according to the thin capitalisation rule. This rule works to disallow gross interest costs and capital losses on related-party debt to the extent the overall debt-to-equity ratio exceeds 2:1. Related-party debt is defined so as to include external bank debt if group member companies or shareholders have provided guarantees to the bank. This rule does not apply if the controlled debt is less than 5 million Danish kroner (DKK).

Controlled foreign companies (CFCs)

According to the Greenlandic CFC rules, a Greenlandic company has to include in its taxable income the CFC income of a foreign subsidiary if all of the following criteria are met:

- The Greenlandic company, alone or together with other group companies, individual owners, and/or their next of kin, controls the foreign company.
- During the income year, the subsidiary's financial assets, on average, make up more than 10% of the subsidiary's total assets.
- The foreign company is taxed 'substantially lower' than under Greenlandic taxation.

There is no black or white list that exempts subsidiaries resident in certain countries.

CFC income is defined in some detail and includes a broad spectrum of passive and financial income.

Tax credits and incentives

There are no tax credits or tax incentives in Greenland in general. However, current oil licence holders do, in their surplus royalty basis, qualify for an extra deduction in their capital and operating expenditure of 21.75%, 29.25%, and 36.75%, respectively, plus the Danish discount rate, provided that the surplus royalty basis never has been positive. This is akin to the so-called 'uplift' known to other oil tax regimes.

Newer licences are subject to different royalty regimes, including different 'uplift' regimes. *Please refer to Oil companies in the Taxes on corporate income section.*

It is also possible for mineral licence holders to get a tax holiday from the corporate tax. However, this is only possible if the corporate tax is replaced entirely by other forms of fiscal levies or duties that provide the Greenlandic government with at least the same income as the corporate tax would have done.

Foreign tax credit

According to Greenlandic tax law, relief is generally available to credit foreign tax paid on non-Greenlandic source profits against the Greenlandic tax on the same profits. If relief is offered by treaty, the level of relief is capped at the level offered by the treaty. There are only treaty provisions to this effect with Canada, Denmark, the Faroe Islands, Iceland, and Norway.

Withholding taxes

Greenland has the following withholding taxes (WHTs):

- Dividends: 36% to 44%, depending on the local municipality (may be reduced by treaty). It should be noted that paid dividends are deductible in the corporate tax base.
- Interest: There is no WHT on interest.
- Royalties: 30% (may be reduced due to treaty reduction).

Treaty rates are as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Denmark	35	0	10
Faroe Islands	No relief (36% to 44%)	0	25
Iceland	35	0	15
Norway	35	0	10

G

Tax administration

Taxable period

The taxable period is the calendar year. Permission can be granted to use a 12-month period other than the calendar year, provided that the period starts on the first day of a calendar month.

Tax returns

Tax returns are completed on the basis of audited financial accounts with adjustments for tax. Tax returns should be filed no later than four months following the end of the income year, meaning 1 May for companies using the calendar year as the income year.

The tax system, in practice, is based on self-assessment. Tax assessments are made by the tax authorities on the basis of the tax return.

Payment of tax

The corporate tax is due for payment by 20 November of the following year. Greenland does not have an on account tax system, so there are no advantages in paying the tax prior to this date.

Penalties

A tax surcharge of DKK 200 per day (maximum DKK 5,000) is levied for late submission of the tax return.

Tax audit process

Tax audit is a rather informal procedure, whereby questions for clarification and/or documentation may be asked by the Greenlandic Tax Agency. There are few rules governing audit other than statutory limitation rules.

Statute of limitations

The general statute of limitations is 31 October in the fifth calendar year after that of the end of the relevant income year.

Topics of focus for tax authorities

There does not seem, presently, to be particular focus areas of the Greenlandic Tax Agency, and none have been publically announced.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

In relation to the US FATCA, a Model 1 Intergovernmental Agreement (IGA) is treated as 'in effect' by the US Treasury as of 29 June 2014. The United States and Greenland have reached an agreement in substance, and Greenland has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in Greenland are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

There have been no significant corporate tax developments in Guatemala during the past year.

G

Taxes on corporate income

The tax system of Guatemala is a unitary system, whereby income of all kinds, other than capital gains, is lumped together and subject to a single tax. The components of gross income subject to tax are usually business income, interest, dividends, rent, salaries, and services. Companies are subject to income tax only on their Guatemala-source income. Dividends and other income payable abroad are taxed separately by way of withholding taxes (WHTs).

For income tax purposes, there are two main systems that taxpayers may subscribe to: the system on earnings from lucrative activities and the simplified optional system on income from lucrative activities. The taxpayer chooses what system the company is registered for. Once a system is chosen, it cannot be modified until the next tax period. The request for the modification must be requested before the tax authorities at least one month prior to the new tax period.

These systems are explained below.

System on earnings from lucrative activities

Under the system on earnings from lucrative activities, the tax is determined and paid at the end of each quarter, without prejudicing the end-of-period final tax liquidation. The tax rate is 25% on net income.

This system allows taxpayers to deduct costs and expenses incurred during the period, according to requirements established by law.

Simplified optional system on income from lucrative activities

Under the simplified optional system on income from lucrative activities, the tax is payable under flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date. The tax rate is 5% on gross income that ranges from 0.01 Guatemalan quetzales (GTQ) to GTQ 30,000 and 7% on the excess.

Local income taxes

There are no specific state or provincial government taxes on income other than the two systems previously described.

Guatemala

Corporate residence

The place of incorporation determines corporate residence. Entities incorporated under Guatemalan laws are required to have their fiscal and corporate residence in Guatemalan territory.

Permanent establishment (PE)

PE includes activities conducted in the country in a continuous manner, either in a fixed business place or facilities conducting work of any kind, except for insurance and refinancing activities, brokers, independent agents, etc. acting in the normal turn of events.

Other taxes

Value-added tax (VAT)

A 12% VAT is levied on the sale or transfer of merchandise and on non-personal services rendered or effected in Guatemala. The tax is payable to the government by way of the invoice method, whereby the tax charged to the customers is offset by the VAT paid over purchases, and the government collects the net resulting amount. The issuance and circulation of credit titles is VAT-exempt.

Sale of goods

The taxable amount on the sale of goods includes the sales price, less any discounts provided under sound commercial practices, plus other charges shown on the invoice.

Services

The taxable amount of services includes the price of the service, less any discounts provided under sound commercial practices, plus financial charges and products used to render the services.

Imports and leases

The tax base for imports is the value declared for import duties computation purposes.

The tax base for leases of movable or immovable property is the value of the lease.

Exempted sales and services

The following items are exempt from VAT:

- Importations made by:
 - cooperatives legally constituted as registered on imported machinery, equipment, and other goods relating to the activity or service of the cooperative
 - individuals and juridical entities under temporary importation regulations, and
 - diplomatic and consular missions accredited before the Guatemalan government.
- Banking institution services and their agents.
- The issuance, circulation, and transfer of credit bonds, value bonds, and stocks of any kind.
- Interest accrued by credit bonds and other obligations issued by mercantile partnerships, negotiated through an authorised stock exchange.
- Exports of goods and services.
- Contributions and donations to educational, cultural, assistance, or security service partnerships, constituted as not-for-profit entities.

VAT return

The amount payable to the *Superintendencia de Administración Tributaria (SAT)*, Guatemala's tax authority, is the difference between the debits and credits accrued during the tax period (one month) and is paid monthly by filing a tax return in the following calendar month at the end of each tax period.

Refunds of VAT

The VAT credit can be claimed on monthly, quarterly, or semiannual tax periods. The refund of VAT credit corresponds to exporter taxpayers who cannot offset the VAT credit with VAT debts.

In addition, the VAT credit can be claimed by those taxpayers who have a high percentage of sales to entities exempt from VAT.

Import duties

The Customs Duties on Imports (DAI) are contained in the Central American Tariff System (SAC), which contains the tax rates applicable to goods imported into the Guatemalan Territory, ranging from 0% to 20%.

The import duties apply to the customs value declared by the importer.

Excise taxes

Excise taxes are applicable to specific activities, such as Fuel Distribution Tax, Alcohol & Beverages Distribution Tax, and Tobacco Distribution Tax.

Real estate taxes

Real estate taxes are assessed annually at GTQ 2 per thousand on declared property values from GTQ 2,000 to GTQ 20,000, at GTQ 6 per thousand on values from GTQ 20,000 to GTQ 70,000, and at GTQ 9 per thousand on values in excess of GTQ 70,000 (e.g. property valued at GTQ 1 million will pay real estate taxes of GTQ 9,000).

Transfer of property

VAT is payable on the first sale of real estate, and subsequent sales are taxed under the stamp tax regime.

Stamp taxes

Other than sales invoices, contracts, and documents subject to VAT, and other minor exemptions, a stamp tax must be paid on all documents covering commercial and legal transactions (e.g. collection of dividends), either by preparing the document on *papel sellado*, which is special stamped paper, or by affixing stamps on the documents. This tax is also assessed on documents issued abroad, other than drafts or promissory notes and commercial invoices from foreign suppliers. Letters of credit and acceptances involving international transfers of funds are generally exempt from stamp taxes.

The normal tax rate is 3% and is calculated on the face value of the documents or on the gross value of the related transaction.

The stamp tax on dividend payments or credits has been repealed, and a 5% income tax should be paid on dividend payments or credits in account equity.

Solidarity tax (Impuesto de Solidaridad or ISO)

The ISO tax rate of 1% is assessed on the net assets of a corporation, or on the gross income of a corporation, whichever is higher, and there is no limit on the amount to be paid. Tax paid may be credited against the corporation's income tax. If the ISO exceeds the income tax, no reimbursement is possible.

The tax is to be paid quarterly on the basis of the corporation's opening balance sheet for each fiscal period.

Payroll taxes**Social security contributions**

Corporations contribute 12.67% of their monthly payroll and employees contribute 4.83% of their monthly salary to social security.

Guatemala

Branch income

In Guatemala, branches are taxed as any other legal entity. There are no specific taxes for branches.

Income determination

Inventory valuation

For tax purposes, taxpayers are authorised to use any of the following methods for valuing stocks (i.e. inventory), provided they technically fit the taxpayers' business and are consistently applied:

- Cost of production.
- First in first out (FIFO).
- Weighted average.
- Historical price of assets.
- Estimated cost at a fixed price (additional for livestock activities).

Capital gains

The regime of capital income, capital gains, and capital losses is established with the following tax rates:

- Real estate equity income: 10%.
- Income from trading movables: 10%.
- Capital gains and losses: 10%.
- Incomes from lotteries and raffles: 10%.

Capital losses can be netted only against capital gains, up to a maximum of two years.

Dividend income

Dividends earnings and profits are subject to a 5% income tax.

Interest income

All interest income is subject to a 10% income tax.

Foreign income

Foreign-source income received by a domestic corporation is non-taxable under Guatemalan income tax law, provided that it does not relate to a service or activity rendered in Guatemalan territory.

Deductions

Taxpayers under the system on earnings from lucrative activities may deduct costs and expenses from gross income, including the following.

Depreciation

Depreciation is calculated annually using the straight-line method. The tax authority may authorise a different method on request of the taxpayer. The annual maximum rates allowed as deductible expenses are the following:

Asset	Rate (%)
Building and improvements	5
Machinery and equipment	20
Furniture and fixtures	20
Vehicles	20

Asset	Rate (%)
Tools	25
Tree and vegetable species	15
Computer equipment	33.33
Any other depreciable asset	10

Intangible assets

Intangible assets (e.g. goodwill, trademarks, manufacturing processes, patents, software, know-how) may be deductible under the straight-line method of amortisation over a period that depends on the conditions of the acquisition or creation of the intangible asset concerned, and cannot be less than five years. Goodwill actually paid can be amortised over a period of a minimum of ten years.

Start-up expenses

Start-up expenses are deductible.

Interest expense

The deduction of interest expense may not exceed the result of multiplying the interest rate by three times the average net total assets reported by the taxpayer in the corresponding annual tax return.

Uncollectible accounts

Uncollectible accounts arising in normal business operations can be deducted individually or, alternatively, via an allowance for doubtful accounts, which shall not exceed 3% of the debit balances of accounts and notes receivable.

Charitable contributions

Duly proven donations made to the government, the municipalities, and their agencies, as well as to duly authorised not-for-profit welfare, social service, and scientific associations and foundations, universities, political parties, and guild entities, are deductible. The maximum deductible amount for income tax purposes of each period shall not exceed 5% of the donor's net income, up to a maximum of GTQ 500,000 per year.

Employee pension/retirement funds

The deduction of provisions to establish or increase employee pension and retirement funds or reserves is allowed, provided the government approves the related plans.

Severance compensation payments

Severance compensation payments are allowed as deductible expenses as well as limited allocations (not to exceed 8.33% of total annual salaries and wages) to a reserve for severance compensation. Provisions pertaining to actual liability for severance compensation per year are also allowed, provided the related plans, based on collective bargaining agreements, are approved by the employer and employees.

Fines and penalties

Charges, penalties, and interest charged by any government institutions are not deductible.

Taxes

All taxes are deductible, except income tax and VAT when these are not considered as a cost.

Net operating losses

Operating losses may not be carried forward for deduction from otherwise taxable profits. Guatemalan laws also do not permit carryback of losses.

Guatemala

Payments to foreign affiliates

Deduction for royalties will be allowed, up to 5% of gross income. The deductible expenses for technical services rendered from abroad shall not exceed 5% of gross income.

Expenses incurred abroad by non-residents in connection with income earned from Guatemalan sources cannot be deducted for income tax purposes by merely having the supporting receipts, as the regulations to the law do not permit such a deduction for these purposes, unless these expenses are related with the Guatemalan company operations and these expenses are needed for generating taxable income.

Group taxation

There is no consolidation for tax purposes, as each group entity is treated as an independent taxpayer that shall file its own tax returns.

Transfer pricing

All companies that have any transaction with a related party abroad should have a transfer pricing study.

From a Guatemalan transfer pricing perspective, the scope of application of the rules of valuation of transactions between related parties reaches any operation that has been carried out between a person living in Guatemala with a resident abroad.

Local legislation allows the selection of traditional methods and profit-based methods consistent with the Organisation for Economic Co-operation and Development (OECD) guidelines as well as a sixth method applicable to imports and exports.

Advance pricing agreements (APAs) are permitted, and it is also stated that the tax authority can reclassify activities according to its true nature in accordance with Tax Code statements.

Thin capitalisation

Thin capitalisation applies regarding deductible expenses for interest paid. The deductible amount for such costs may not exceed the value of multiplying the annual maximum simple interest rate determined by the Guatemalan Monetary Board for tax purposes by three times the amount of average total net assets submitted by the taxpayer in the annual income tax return.

Average total net assets is defined as the sum of total net assets of the previous year and total net assets at the end of the year in force (both values must correspond to the amounts filed in the annual income tax return of each period of final settlement) divided by two. Total net assets are defined by law to correspond to the book value of all goods that are actually the property of the taxpayer.

Controlled foreign companies (CFCs)

Guatemala does not have any provisions regulating CFCs.

Tax credits and incentives

Foreign tax credit

Guatemala has no provisions or agreements signed to avoid international double taxation, and no foreign tax credit is allowed.

Drawback industries (maquila)

The Law of Promotion and Development of Exports Activities and Drawback Industries is known in Guatemala as *maquila*. This law seeks to promote, encourage, and develop the manufacture of products within areas controlled by the Customs Authority for export to countries outside the Central American region, as well as to regulate exporting and drawback activities.

The exporter may apply for authorisation to operate under any of the following three systems provided by the law:

- Export under a temporary admission system.
- Export under the reimbursement of duties system.
- Export under the total added national component system.

Tax incentives and benefits of the law include the following:

- Exemption of taxes, import duties, and other charges on imports of machinery and equipment, including VAT.
- Discontinuance of VAT payments on temporary raw material imports.
- Exemption of income tax for ten years on profits obtained under this law.

Withholding taxes

The following WHT rates apply on payments to non-resident corporations or individuals:

Payment	WHT (%)
Dividends, international freight, telecommunications (1), electric energy	5
Interest (2)	10
Royalties; salaries; commissions; professional fees; professional, technical, economic, or financial assessment	15
Other	25

Notes

1. For international news transmission supplied from abroad to local entities, the rate is 3%.
2. Interests will not be taxed (i.e. no withholding applies) when:
 - These interests are paid to a multilateral entity.
 - These interests are paid from a Guatemalan banking or financial entity to a similar entity abroad.

Non-residents can operate in Guatemala with or without PE; accordingly, income tax treatment depends of the circumstance as follows:

- Non-residents with PE will be subject to income tax, choosing one of the two methods of payment established for residents.
- Non-residents without PE will be subject to WHT, applying specific rates according to the nature of the services rendered.

Tax treaties

Guatemala has no tax treaties in force.

Guatemala

Tax administration

Taxable period

System on earnings from lucrative activities

Under the system on earnings from lucrative activities, the annual final tax liquidation period begins on 1 January and ends on 31 December of each year.

Simplified optional system on income from lucrative activities

Under the simplified optional system on income from lucrative activities, taxes are paid on a monthly basis.

Tax returns

System on earnings from lucrative activities

Under the system on earnings from lucrative activities, returns are due after the end of the fiscal period (31 December) but no later than 31 March of each year.

The income tax return shall be accompanied by the documents required by the regulations, which might include a:

- balance sheet
- statement of results of operations
- statement of cash flows, and
- statement of cost of production.

Documents must be duly certified by a professional or an independent accounting firm. The financial statements that accompany the return shall agree with both those recorded in the financial statements ledger and those destined for publication.

Both the income tax return and exhibits thereto shall be signed by the taxpayers, their agent, or their legal representative or by any other responsible persons so determined by this law and the Tax Code.

Simplified optional system on income from lucrative activities

Under the simplified optional system on income from lucrative activities, there is an obligation to file an annual informative tax return, which is due on 31 March of each year.

Payment of tax

System on earnings from lucrative activities

Under the system on earnings from lucrative activities, taxpayers are required to prepay their estimated annual income tax liability in quarterly instalments. The balance is due upon filing the return.

Taxpayers may choose one of the following procedures for computing estimated quarterly tax liability:

- Tax on income shown by partial closure of accounts or computation of presumed liquidation of operations at the end of each quarter.
- Tax on 5% of overall gross income earned during the corresponding quarter of the preceding year (5% of the 30% income tax rate equals 1.5%).
- Tax equivalent to one-fourth of the tax paid for the immediately preceding tax year.

Simplified optional system on income from lucrative activities

Under the simplified optional system on income from lucrative activities, tax is payable via flat tax withholdings (the tax is to be retained by either the customer or the recipient

of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date.

Taxes on income are governed by the income tax law, *Ley de Actualización Tributaria*, and its related regulations. Administration of the law is vested with the SAT.

Taxpayers registered before the tax administration under this system will settle and pay the tax through the withholding system. Persons or entities obligated to withhold are those taxpayers who pay or credit into account for the acquisition of goods and services to the taxpayers registered under this system.

Tax audit process

The tax authorities can request specific information at any moment. If necessary, a tax audit can be carried out. The tax authorities must formally notify the taxpayer of any specific adjustments, and the taxpayer has 30 working days to file a response. After filing the response, the taxpayer will again be notified by the tax authorities if the adjustments are confirmed or overturned.

Statute of limitations

The right of the tax administration to checks, adjustments, corrections, or determinations of tax liabilities; settle and enforce interest and penalties; and enforce payment of taxpayers must be brought within four years. In the same period, taxpayers must exercise their right of recourse for overpaid or unduly charged taxes, interest, penalties, and fines.

Topics of focus for tax authorities

The tax authorities normally focus on the following:

- Deductible expenses.
- VAT credits.
- WHT.
- Capital gains.

Other issues

Accurate and current information regarding taxation in Guatemala is often difficult to obtain as the country lacks reporting services such as those available in other countries. It is also difficult to determine how the tax laws will be applied in practice in complex situations. The laws and regulations are limited and ordinarily cover only the most common situations. The system of legal precedent resulting from court decisions is narrowly used, and each issue is resolved by reference to the respective codes. Guatemala has shown little interest in tax planning, but it is possible to have informal consultations with the tax authorities and to obtain authoritative rulings in many cases. Discrepancies between government and management criteria are commonly brought to judgment by the Constitutional Court, whose binding sentences generally abrogate the laws in dispute.

Significant developments

Guernsey is committed to the adoption of the global Common Reporting Standard (CRS) for the automatic exchange of information. This is effective from 1 January 2016, with the first reporting taking place in 2017.

As a result of the repeal of the European Union (EU) Savings Directive, the EU member states committed to the adoption of the EU version of the CRS, which is the Directive on Administrative Cooperation (DAC). This is effective from 1 January 2016. The first exchange of 2016 data under the DAC will take place in 2017. The Guernsey tax authorities sent letters to the EU member states to obtain their confirmation that the repeal of the Directive suspends equivalent agreements they might have with Guernsey. The Guernsey Income Tax Office anticipates that this will be a formality. The repeal will have no impact on Guernsey as the DAC operates as an equivalent agreement to the CRS.

The exception is Austria, which will not be joining the CRS until 1 January 2017 (with the first reporting taking place in 2018.). Currently, consultations are taking place between Austrian authorities and Guernsey. The Guernsey authorities prefer that the operation of the EU Savings Directive with Austria would end from 31 December 2015 and that the exchange of information with Austria under the CRS will commence on 1 January 2017. This would result in a one year 'gap', where no information will be provided.

Guernsey has signed tax information exchange agreements (TIEAs) with 60 jurisdictions and full double taxation treaties (DTTs) with Cyprus, Hong Kong, Isle of Man, Jersey, Liechtenstein, Luxembourg, Malta, Mauritius, Monaco, Qatar, Seychelles, Singapore, and the United Kingdom.

The intention to introduce a Share Transfer Duty on Real Property was announced in the 2013 Guernsey Budget and reiterated in the 2015 Guernsey Budget. It has been recognised that Document Duty, a duty levied on the sale of real property, is being avoided where real property transactions have been through a corporate vehicle. The draft legislation is currently under consultation. It is expected that the duty will be in line with current Document Duty rates.

Following the 2016 Budget announced in October 2015, the 10% intermediate tax rate has been extended, with effect from 1 January 2016, to include profits arising to custody businesses. Furthermore, the 20% tax rate has been extended to include the importation/supply of hydrocarbon oil and gas.

Another significant development has taken place with regards to the taxation of retail businesses. The 20% income tax rate band will include income arising from retail businesses carried on in Guernsey where taxable profits are above 500,000 British pounds sterling (GBP).

Following public consultation, the Treasury and Resources Department rejected proposals to introduce a goods and service tax (GST), for the time being.

Taxes on corporate income

Resident corporations are liable to tax on their worldwide income. Non-resident corporations are subject to Guernsey tax on their Guernsey-source income.

Companies pay income tax at the current standard rate of 0% on taxable income.

Income derived from a banking business, insurance business, custody services business, and licensed fund administration business is taxable at 10%.

'Banking business' is broadly defined as income that arises as a result of the provision of credit facilities by any type of company and the utilisation of customer deposits. Income derived from licensed fiduciaries (with regulated activities), licensed insurers (in respect of domestic business), licensed insurance intermediaries, and licensed insurance managers is also taxable at 10%. In addition, income derived by licensed fund administration businesses from providing administration services to unconnected third parties falls within the 10% tax rate. Custody services businesses are taxed at 10% with effect from 1 January 2016. Relief is available for eligible expenses that are allocated against different streams of income.

Any income derived from the exploitation of property located in Guernsey or received by a publicly regulated utility company is subject to tax at the higher rate of 20%. From 1 January 2016, the 20% income tax rate band has been extended to include income arising from retail businesses carried on in Guernsey, where taxable profits are above GBP 500,000. The 20% income tax rate band has also been extended from this date to cover the importation and/or supply of hydrocarbon oil and gas.

Exempt companies

Some collective investment schemes (CISs) and unit trusts may qualify for exempt status, which will place them completely outside the Guernsey tax regime. In addition, anybody that forms part of, or contributes to, the overall structure of a CIS may claim exempt company status. This removes doubt in relation to the entities that are involved in the management or support of a CIS qualifying for exempt status. For each year for which exempt status is sought, a charge of GBP 1,200 is levied.

One of the following conditions, among others, must be met for the company to be considered exempt:

- The company is beneficially owned outside of Guernsey.
- No Guernsey-resident individual or company has a beneficial interest in the company (with the exception of shareholders, loan creditors, or nominees/trustees).

Loans to participators

If a company makes loans with preferential terms to an individual or entity connected with the company, this will be deemed to be income in the hands of the debtor, and the creditor company will be required to account for, withhold, and pay the tax. Certain exemptions apply.

Local income taxes

Guernsey does not operate any local government taxes.

Guernsey, Channel Islands

Corporate residence

All Guernsey-registered companies are regarded as tax resident on the island unless granted exempt company status. In addition, a company will be treated as a resident in Guernsey (regardless of where it is incorporated) if shareholder control is exercised by persons resident on the island.

Permanent establishment (PE)

The Income Tax (Guernsey) Law, 1975 defines PE as including:

- a branch
- a factory, shop, workshop, quarry, or building site, or
- a place of management.

Note that the fact that a body's directors regularly meet at a particular place does not, in itself, make that place a PE of that body.

Other taxes

Value-added tax (VAT)

Guernsey does not operate a VAT or GST.

Customs and excise duties

In accordance with the European Community (EC) Customs Code and the Implementing Regulation, Customs Import Duty is liable on all goods arriving in the Customs territory of the Community. The rates of duty are set by the European Community and are the same in all countries of the European Community.

The rates vary according to the commodity. Some may be as high as 22%, while, for other goods, the rate may be free.

The Channel Islands are not within the fiscal territory of the European Union, and, as such, the Community Regulations that concern excise duties do not apply. Excise duty is classed as an internal tax.

The rates are reviewed annually by the States of Guernsey and set at budget time, which is usually in November. These cover Guernsey and Alderney, while Sark has its own rates set by the Chief Pleas.

An additional 15% rate of duty is applicable on some goods originating in the United States.

Property taxes

Income from Guernsey land and buildings is subject to Guernsey income tax at 20%. No other property taxes apply.

Transfer taxes

Guernsey does not levy transfer taxes.

It is expected that, in 2016, new legislation will introduce a Share Transfer Duty on Real Property in order to counter avoidance of Document Duty by transferring property through corporate vehicles. Document Duty is a duty levied on the sale of real property.

Stamp taxes

Guernsey does not levy any stamp duties.

Social security contributions

An employer, for the purposes of Social Insurance, is anyone who has employees. An employee is anyone who is gainfully occupied in employment under a contract of service in Guernsey or Alderney.

In general, contributions are required from both employer and employee in respect of any employed person who is over school-leaving age and under 65. Employer social security contributions are levied on the gross employment income of the employee at 6.5%.

Employer social security contributions for 2016 are calculated on a monthly lower earnings limit of GBP 576.33, which is the level of earnings at which an employer becomes liable for the payment of contributions. The upper limit for 2016, which is the highest level of earnings on which contributions are calculated, is GBP 11,466 per month.

Payroll taxes

The Employee Tax Instalment (ETI) Scheme is a scheme whereby the employer deducts income tax from its employees and pays this over to the Guernsey Income Tax Office.

The ETI Scheme applies to all employees. For the purposes of the ETI scheme, an employee is an individual holding or exercising an office or employment, including a company director, part-time workers, casual workers, and sub-contractors.

The ETI Scheme operates on a quarterly basis. Throughout each quarter, the employer should deduct tax from their employees on each payday. Details of the gross weekly or monthly wage and deductions made must be recorded and returned with the relevant remittance by the 15th day of the month following the end of the relevant quarter (e.g. tax deducted during the first quarter needs to be submitted by 15 April).

Branch income

Branch income is taxed in the same manner as companies, at the appropriate rate according to the activity being undertaken.

No further tax is withheld on the transfer of profits abroad to group companies, provided no Guernsey-resident individual has an interest in the company.

Income determination

Inventory valuation

Inventory is valued at the lower of historical cost or net realisable value. Use of last in first out (LIFO) is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

Capital gains

Capital gains are not subject to tax in Guernsey.

Dividend income

All dividends paid by a standard tax-paying company (0%) are deemed to have been paid from income arising after 31 December 2007 (i.e. after the introduction of the zero/ten tax regime), unless the company elects to have them treated otherwise.

Stock dividends

Stock dividends may be treated as income.

Guernsey, Channel Islands

Interest income

Interest income received by a standard tax-paying company is taxable at 0%.

Please refer to the Taxes on corporate income section for further information on companies liable to tax at the company intermediate rate (10%).

Foreign income

Resident corporations are liable to tax on their worldwide income. Income tax is levied on foreign branch income when earned, and on investment income from foreign dividends, interest, rents, and royalties. Double taxation is mitigated either through unilateral relief (by giving credit for foreign taxation of up to three-quarters of the effective Guernsey rate) or by treaty relief.

Deductions

Normally, business deductions are allowed if they are incurred wholly and exclusively for the purpose of trade.

Depreciation

Annual allowances are granted for income tax purposes in respect of the following:

Assets	Basis	Rate (%)
Buildings:		
Stone, brick, concrete, or other substantial structures	Reducing-balance	1.25
Buildings of a less substantial construction	Reducing-balance	5
Farm Buildings	Straight-line	5 or 10 (depending on material utilised)
Motor vehicles, buses, lorries, and motorcycles	Reducing-balance	25
Computer hardware	Straight-line	20
Machinery and plant	Reducing-balance	20
Glasshouses:		
Expenditure in respect of initial allowance*	Straight-line	10
Other expenditure	Straight-line	5

* Section 123 (3) of the Law defines expenditure and circumstances on which initial allowances can be claimed in respect of glasshouses

Goodwill

The amortisation of goodwill is not a deductible expense in Guernsey.

Start-up expenses

Pre-trading expenditure incurred within the 12 months prior to the commencement of trade, which would have been allowable had it occurred on the first day of trading, may be allowed as a deduction in computing the profits of the first accounting period.

Interest expenses

Interest is a deductible expense where it is incurred wholly and exclusively for the purposes of trade.

Bad debt

Bad and doubtful debts discovered in the accounting period to have become bad or irrecoverable may be deducted from taxable profits, but the deduction may not exceed the amount written off as such in the books of the business.

Charitable contributions

Charitable donations by companies are not deductible for Guernsey income tax purposes.

Fines and penalties

Fines or penalties incurred are not deductible for Guernsey income tax purposes.

Taxes

Income tax paid is not deductible in computing taxable income.

Net operating losses

Losses from one class of income may be used to offset the profits from another class of income if both classes are subject to tax at the same rate. Unrelieved trading losses may be carried forward to offset future trading income.

Upon cessation of trade, operating losses arising from balancing allowances may be carried back to the previous two years of charge to be relieved against past trading profits.

Payments to foreign affiliates

Guernsey-source royalties and long-term interest are subject to taxation at source. Relief is obtained by the retention of the tax deducted. Short-term interest, unless owed to an authorised bank, is not deductible, unless the advance in respect of which it is paid is used wholly and exclusively for the purposes of trade. Other fees must be paid on an arm's-length basis.

Group taxation

Group loss relief may be claimed when both companies are members of the same group and the companies are either carrying on business in Guernsey through a PE or incorporated in Guernsey. Loss relief is available only against income taxed at the same rate.

A claim for group loss relief must be made by the claimant company within two years after the end of the calendar year in which the relevant accounting period ended, and the claim must be accompanied by a declaration by the surrendering company that it consents to the surrender.

Transfer pricing

Guernsey does not currently have specific transfer pricing legislation in place. However, the general anti-avoidance provisions do apply.

Thin capitalisation

Guernsey does not currently have specific thin capitalisation legislation in place. However, the general anti-avoidance provisions do apply.

Controlled foreign companies (CFCs)

Guernsey does not currently have specific anti-avoidance legislation in relation to CFCs. However, the general anti-avoidance provisions do apply.

Tax credits and incentives

In view of the low rate of tax, no special incentives are available to local businesses in Guernsey.

Guernsey, Channel Islands

Foreign tax credit

Guernsey has signed full DTTs with Cyprus, Hong Kong, Isle of Man, Jersey, Liechtenstein, Luxembourg, Malta, Mauritius, Monaco, Qatar, Seychelles, Singapore, and the United Kingdom and TIEAs with 60 jurisdictions.

If no bilateral agreement exists, relief available to Guernsey-resident companies is the lesser of the other territory's effective rate or three quarters of the Guernsey effective rate.

Withholding taxes

Companies paying dividends to Guernsey resident individuals are required to deduct or account for the difference between the tax incurred by the company and the shareholder's individual tax rate (20%) on actual distributions.

A company is required to withhold tax when it is acting as an agent and making payments to a non-resident liable to Guernsey tax.

Guernsey does not levy any other forms of withholding tax (WHT).

Double taxation treaties (DTTs)

The table below sets out the rates of WHT applicable to the most common payments of dividends and interest under Guernsey domestic law where such a liability arises and the reduced rates that may be available under an applicable DTT. Please refer to specific treaties to ensure the values are up to date.

Recipient	Dividends (%)	Interest (%)
Resident corporations	0 (1)	0/10 (1)
Resident individuals	20 (2)	0 (3)
Non-resident corporations and individuals:		
Non-treaty	0	0
Treaty (4):		
Cyprus	0	0
Hong Kong	0	0
Isle of Man	0	0
Jersey	0	0
Liechtenstein	0	0
Luxembourg	0/5/15 (5)	0
Malta	0	0
Mauritius	0	0
Monaco	0	0
Qatar	0	0
Seychelles	0	0
Singapore	0	0
United Kingdom	N/A (6)	N/A (6)

Notes

1. Resident corporations receiving dividends and interest are not subject to any WHT.
2. For resident individuals, if the income has been taxed on the paying company at 0%, a 20% deduction should be made. If the income has been taxed on the paying company at 10%, 10% WHT should be applied. If the income has been taxed on the paying company at 20%, there should be no deduction at source.
3. Resident individuals are paid interest gross, without any WHT; however, individuals are required to file an annual tax return and pay 20% income tax on any interest received.
4. Where a reduced rate of withholding is allowed by any treaty, whether on dividends or interest, it is usual for this reduced rate to be stated not to apply to amounts that are in excess of a normal

commercial rate of interest, or where the dividend or interest is effectively connected to a PE in Guernsey of the recipient; such general limitations are not specifically indicated in the table. Moreover, note the general requirement for dividends and/or interest to be beneficially owned by the recipient in order to access benefits under a treaty.

5. Dividends paid by a company that is a resident of Guernsey to a resident of Luxembourg may be taxed in Luxembourg. However, such dividends may also be taxed in Guernsey, and if the beneficial owner of the dividends is a resident of Luxembourg, the tax charged may not exceed 5% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends or 15% of the gross amount of the dividends in all other cases.
6. The Explanatory Note to the Guernsey-United Kingdom (UK) DTT specifically excludes dividends and interest from the scope of the DTT.

Tax administration

Taxable period

The tax year runs from 1 January to 31 December, although companies can adopt a year-end of their choice.

Tax returns

It is compulsory for all Guernsey companies to file their tax returns online.

Companies are required to file their income tax return on 30 November following the calendar year in which the accounting period ends. Should a company meet the conditions below, a simplified return may be filed without either a computation or financial statements.

In order to qualify for a simplified return, a company must have none of the following:

- Guernsey employees (other than directors).
- Guernsey-resident individual beneficial owners.
- Income from utilities (e.g. Guernsey water or electricity companies).
- Income from Guernsey properties.
- Income from a banking business.
- Income from domestic insurance business.
- Income from a licensed fund administration business providing administration services to unconnected third parties.
- Income from the provision of custody services.
- Income from the importation/supply of hydrocarbon oil and gas.
- Income from a retail business, where the profits are above GBP 500,000.
- Loans to Guernsey participators.
- Distributions made to Guernsey-resident individuals.

Should a company have Guernsey-resident individual beneficial members and/or make loans to participators, it will be required to submit quarterly returns accounting for distributions and loans advanced.

Payment of tax

In Guernsey, tax is payable in two instalments, on 30 June and 31 December in the year of charge (calendar year). If liabilities have not been determined, this may necessitate initially raising estimated assessments based on prior year figures and raising a final assessment when the figures are agreed. Once the Income Tax Office has received the company's income tax return, they will issue an assessment detailing the final balancing income tax payment due. This amount will be due to be paid within 30 days of the issuing of the final assessment.

Tax audit process

The Income Tax Office will assess each company tax return as and when it is received, and the turnaround time from submission of a return to the issue of a final assessment

Guernsey, Channel Islands

varies dependent upon the workloads of the Income Tax Office but is generally dealt with in around three months.

Statute of limitations

The Director can raise an assessment in respect of any income that has not been assessed at any time no later than six years after the end of the year of charge in which the income arose.

Topics of focus for tax authorities

There are no current areas that the Guernsey Income Tax Office is particularly focusing on in regards to corporate taxpayer compliance.

Other issues

United States (US)-Guernsey intergovernmental agreement (IGA)

On 13 December 2013, Guernsey signed an IGA regarding the implementation of Foreign Account Tax Compliance Act (FATCA). The IGA has been ratified by Guernsey's Parliament and is embodied in The Income Tax (Approved International Agreements) (Implementation) (United Kingdom and United States of America) Regulations 2014. Its operative provisions came into force from 30 June 2014.

UK-Guernsey IGA

On 22 October 2013, Guernsey signed a FATCA-style IGA with the United Kingdom (UK-Guernsey IGA) under which mandatory disclosure requirements may be imposed in respect of 'Investors in the Fund' who are UK resident or who are non-UK entities controlled by one or more UK resident individuals, unless a relevant exemption applies. The UK-Guernsey IGA has been ratified by Guernsey's Parliament and is embodied in The Income Tax (Approved International Agreements) (Implementation) (United Kingdom and United States of America) Regulations 2014. Its operative provisions came into force from 30 June 2014.

Common Reporting Standard (CRS)

Guernsey is committed to the adoption of the global CRS on Automatic Exchange of Information with effect from 1 January 2016, with first reporting taking place in 2017.

The United Kingdom has also indicated that it would wish to replace the UK IGA with the CRS. Currently, consultations are taking place to ensure that there are no gaps between both reporting requirements.

Significant developments

In the recent national budget, the Honourable Minister of Finance proposed the following measures:

- Removal of excise tax on motor vehicles under four years old under 1500cc.
- Reduction of excise tax from 50% to 10% on motor vehicles under four years old between 1500cc and under 2000cc.
- Restriction on the importation of used and/or reconditioned vehicles under eight years old from date of manufacture to date of importation.
- Ban on importation of used tyres and reduction of taxes on new tyres.
- Ban on Styrofoam used in packaging of beverages, food, and food products, except Styrofoam containers of a type used for packaging frozen fish and seafood.
- Exemption from custom duties on all bio-degradable containers used in the packaging of food and beverages.
- Reintroduction of a broad-based environmental tax.
- Increase of the income tax threshold from 600,000 Guyanese dollars (GYD) to GYD 660,000.

To date, these measures have not been enacted, and, as such, are not currently law.

Taxes on corporate income

Resident companies are liable to tax on their worldwide income. Non-resident companies that carry on a trade or business in Guyana are subject to tax on the income that is derived from Guyana.

The current rates of corporate tax are as follows:

Type of company	Corporate tax rate (%)
Telephone companies	45
Commercial companies *	40
Other companies (non-commercial)	30

* A commercial company is one that derives at least 75% of its gross income from goods not manufactured by it or if it is engaged in telecommunication, banking, or insurance (other than long-term insurance).

Minimum Corporation Tax (MCT)

Commercial companies (other than insurance companies) are subject to tax at the rate of 40% of chargeable profits or 2% MCT of turnover, whichever is higher. Any excess MCT over tax at the normal rate is carried forward for setoff against corporation tax payable in subsequent years, provided that in no year is the tax payable reduced to less than 2% of turnover.

Local income taxes

There are no additional income taxes imposed on companies.

Guyana

Corporate residence

Corporate residence is determined by reference to the location of the central management and control of the business of a company. There are no specific provisions within the law, and, as such, common law principles established by the courts are generally applied in determining residence. The place of incorporation is regarded as merely one of the factors to be taken into account in determining where central management and control are located.

Permanent establishment (PE)

There are no specific provisions in the legislation dealing with PE, so common law principles are applied.

Other taxes

Value-added tax (VAT)

VAT is charged at the rates of 16% or 0% on the taxable supply of goods and services within Guyana by a registered person.

Zero-rated supplies include goods for export, electricity supplied by Guyana Power and Light, water supplied by Guyana Water Incorporated, and international travel. Exempt supplies include educational services, residential rent, and financial services.

Customs duties

Customs duty is paid on all goods imported into Guyana. The rates of duty vary between 5% and 150%, depending on the classification of the item in question. Rates of duty are highest on 'luxury items', which include perfumes.

Excise taxes

Excise tax is imposed on specific imported or home-produced products. These products include alcoholic beverages, tobacco products, petroleum products, and motor vehicles.

Property taxes

Property tax is an annual tax charged on the net property of a person at the end of each year. 'Property' for the purpose of this tax refers to movable or immovable rights of any kind and effects of any kind. Net property is the amount by which the total value of the property exceeds the total value of all debt owned by the person at that time.

The tax is payable on 30 April at the following rates:

Net property of a company (GYD)	Property tax rate (%)
On the first 1.5 million	0
On every dollar of the next 5 million	$\frac{1}{2}$
On every dollar of the remainder	$\frac{3}{4}$

Stamp taxes

Stamp duty is levied at various rates on several instruments, including affidavits, statutory declarations, deeds of conveyance, mortgages, share transfers, awards of arbitrator, powers of attorney, agreements, bills of exchange, receipts, and policies of insurance.

Capital gains taxes

Capital gains tax is imposed at the rate of 20% on the net chargeable gains derived from the disposal of capital assets. Gains derived from the disposal of an asset within 12 months of its acquisition are treated as ordinary income and subject to corporate tax

at the applicable rates. Gains derived from the disposal of assets held for more than 25 years are exempt from tax.

Payroll taxes

Employers are required to deduct and remit pay-as-you-earn (PAYE) to the tax authority by the 14th day of the month following that in which the employment income was paid. The rate of tax is 30%.

Employment income includes salaries, wages, overtime pay, leave pay, sick bonus, stipends, commissions, compensation for termination of service, and the estimated value of any accommodation provided.

Social security contributions

As an employer, a company is also required to deduct and remit social security contributions on behalf of employees. Social security contributions are due on monthly earnings of employees up to GYD 143,455 and weekly earnings up to GYD 33,105. The rates of contribution are 7.8% for employers and 5.2% for employees.

G

Branch income

A branch is subject to tax in Guyana on all income directly or indirectly accruing in or derived from its operations in Guyana. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction of corporate tax and reinvestments, are subject to withholding tax (WHT) at the rate of 20%. The position noted may be varied by the provisions of any applicable double tax treaties (DTTs).

Income determination

Inventory valuation

Inventory is valued at the lower of cost and net realisable value. Cost is generally determined using the average cost method for accounting and tax purposes, but the first in first out (FIFO) method is also acceptable.

Capital gains

Gains derived from the disposal of an asset within 12 months of its acquisition are treated as ordinary income and subject to corporate tax at the applicable rates. Gains derived from the disposal of assets held for more than 25 years are exempt from tax. Otherwise, gains are subject to capital gains tax. *See Capital gains taxes in the Other taxes section for more information.*

Dividend income

Corporate tax is payable on dividends received by resident companies from non-resident companies. However, dividends paid by resident companies to other resident companies are exempt from tax.

Interest income

Interest income is taxed at the applicable rate of corporate tax.

Foreign income

Income earned by a non-resident company in Guyana is subject to tax in the year the income was earned. There is no deferral regime in Guyana.

Guyana

Deductions

All revenue expenses wholly and exclusively incurred in the production of income are generally deductible.

Depreciation

Tax depreciation rates (wear and tear allowances) apply to the following classes of assets, as follows:

Class of assets	Depreciation rate (%)
Aircraft	33 ¹ / ₃
Boats	10
Buildings (housing and industrial)	5
Furniture and fittings	10
Motor vehicles	20
Office equipment, including computers and computer software	50
Other	15
Plant and machinery	20

Buildings that house machinery are depreciated using the straight-line method. Other assets may be depreciated using the declining-balance or straight-line methods.

Goodwill

Goodwill expense is generally not allowable in arriving at chargeable income.

Start-up expenses

No specific rules exist in respect of start-up expenses, but such expenses are generally not deductible.

Interest expenses

Interest expense incurred in the production of income is deductible. There is no restriction to the deductibility of this expense.

Bad debt

A bad debt is deductible where it has been incurred in the trade in which the company is engaged and has been respectively estimated to the satisfaction of the tax authority to have become bad in the year of income when the claim is made.

Charitable contributions

Charitable donations are not deductible unless they are made under a deed of covenant.

Fines and penalties

Fines and penalties are not generally deductible.

Taxes

Taxes are not generally deductible in arriving at taxable profit.

Net operating losses

Companies may carry forward losses for an unlimited number of years, but the losses may not reduce the taxable income in any year by more than 50%. Loss carrybacks are not permitted.

Payments to foreign affiliates

A corporation engaged in business in Guyana may claim a deduction for royalties and interest charges paid to foreign affiliates, provided the appropriate WHT is deducted and properly accounted for. Deductions for administrative, technical, professional, or other

management services fees paid to a non-resident company or branch, referred to as 'head office expenses', are restricted to 1% of the annual turnover.

Group taxation

There is no provision under the legislation for group taxation in Guyana. All companies are taxed separately.

Transfer pricing

There is no transfer pricing legislation or rules in Guyana, although the issue has been discussed and is expected to be more formally considered in the future. However, the current Act contains a general anti-avoidance provision, and the tax authority monitors multinationals to ensure that their transactions are conducted at arm's length and in conformance with the applicable tax legislation.

Thin capitalisation

There are no thin capitalisation rules in Guyana.

Controlled foreign companies (CFCs)

CFCs are not covered under Guyana tax laws.

Tax credits and incentives

Various tax incentives are available, depending on the nature of the industry that the companies are engaged in, including the following:

- Customs duty and VAT exemption on most plant, machinery, and equipment.
- Customs duty and VAT exemption on raw materials and packaging materials used in the production of goods by manufacturers and small businesses.
- Unlimited carryover of losses from previous years.
- Accelerated depreciation on plant and equipment.
- Full and unrestricted repatriation of capital, profits, and dividends.
- Tax deduction for scientific research expenses.
- Initial and annual allowances.
- Tax holidays.

Tax holidays are granted in respect of pioneering activities, that is, to companies whose trade or business are wholly of a developmental and risk-bearing nature and likely to be instrumental to the development of the resources of and beneficial to Guyana.

This does not include trade or business carried on by a gold or diamond mining company or a company carrying on petroleum operations.

Tax holidays are granted for a period of up to ten years.

Foreign tax credit

Foreign tax relief is available under DTTs with Canada, the United Kingdom, and Caribbean Common Market (CARICOM) countries.

Unilateral relief is also available for foreign taxes paid in non-treaty countries with tax systems and legislation similar to those in Guyana. For British Commonwealth countries, the relief is 50% of the relief that would be available if the foreign country were a treaty country. For other countries, the relief is 25% of such available relief. The available relief is the lower of the tax rate in Guyana and the tax rate in the other country.

Withholding taxes

WHT is chargeable on gross payments to non-residents and must be remitted to the tax authority within 30 days of making the payment. In cases where the treaty rate is higher than the statutory rate, the lower statutory rate applies. The rates of WHT for various payments are shown in the table below.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	20	20	20
Treaty:			
Canada	15	15	10
United Kingdom	10	15	10
CARICOM	0	15	15

Tax administration

Taxable period

The tax year is the calendar year. Tax is assessed during a tax year on income earned during the year of assessment, which is generally the calendar year preceding the tax year. Companies with an accounting year other than a calendar year may, however, be allowed to account for taxes by adopting their accounting year as their income year.

Tax returns

Tax returns must be filed by 30 April of the tax year.

Payment of tax

Corporate tax is payable in advance quarterly instalments on the preceding year's tax liability. Advance tax payments are due on 15 March, 15 June, 15 September, and 15 December of the calendar year prior to the tax year. However, the Commissioner of Inland Revenue may require the company to calculate the payments based on estimated income for the current year.

Any balance of tax due must be paid by 30 April of the tax year.

Penalties

Failure to file a tax return and pay the balance due by 30 April of the tax year incurs a further charge of 45% on the outstanding tax for the first year and 50% thereafter.

Tax audit process

Companies are generally selected at random for audits, and the frequency is usually every three years. Companies are generally required to provide financial information and supporting documentation to the tax personnel.

The tax authority is the Guyana Revenue Authority.

Statute of limitations

A company carrying on business in Guyana is required to keep proper accounts and records and is required to retain these accounts for a period of at least eight years after the completion of the transactions, acts, or operations to which they relate.

The Commissioner is empowered to raise an assessment for tax or additional tax within seven years after the expiration of the year of assessment.

Topics of focus for tax authorities

The following issues are currently being focused on by the tax authorities:

- Tax evasion and corruption.
- Strengthening tax administration.
- Creation of tax policies and forecasting analysis capability.
- Business registrations and compliance.

Other issues

Intergovernmental agreements (IGAs)

Guyana has entered into the following IGAs:

- United States (US) Foreign Account Tax Compliance Act (FATCA).
- Income Tax (Exchange of Information) (United States of American) Order.

Foreign investment restrictions

There are no restrictions on the repatriation of capital and investment income, and residents and non-residents have unlimited access to foreign exchange markets and to repatriate funds.

Exchange controls

There are no exchange control rules in place in Guyana.

Choice of business entity

Businesses operating in Guyana may establish a local company or register an external company. Additionally, companies may operate through a joint venture.

Significant developments

Effective 2 July 2015, Decree No.56-2015 reforms the social security contributions as follows:

- Sickness and maternity: 5% for employees on income, up to a maximum monthly ceiling of 7,717.50 Honduran lempiras (HNL) on income.
- Invalidity, old age, and death: 3.5% for employees on income, up to a maximum monthly ceiling of HNL 8,882.30 on income.
- Professional risk: 0.2% for employees on income, up to a maximum monthly ceiling of HNL 7,717.50 on income.

Taxes on corporate income

Honduran resident companies are taxed on their worldwide income. Non-resident companies are subject to corporate income tax (CIT) only on income derived from Honduran sources.

The CIT rate for a resident company is 25% of its net taxable income.

Non-resident companies providing sea, land, and aerial transport services are subject to 3% income tax on the annual gross income from Honduran sources in cases where the tax calculation resulting from the application of the CIT rate is less, based on the taxable base established by the corresponding regulation.

Minimum tax

Domiciled companies are subject to a 1.5% tax on gross income equal to or greater than HNL 10 million when the CIT is less. There is a reduction of the rate to 0.75% for the cement industry, public services provided by government companies, the human pharmaceutical and medicine industry, the oil and petroleum products industry, and bakeries. There are some exceptions to the rule.

Solidarity Contribution

The Solidarity Contribution is a non-deductible surcharge levied on all companies on taxable income over HNL 1 million. The Solidarity Contribution tax rate is 5%.

Income tax anti-evasion measures

A law created in response to tax evasion and fraud establishes payment of an income tax of 1% on gross income equal to or greater than HNL 100 million for all taxpayers who report losses for two years in a row or two out of five. The 1% tax paid will be considered as a credit in the resulting income tax, surtax, or net asset payable in the annual returns. There are some exemptions to the rule.

Municipal income taxes

Industry, commerce, and services tax

Companies doing business in Honduras are levied the following municipal tax on annual gross income:

From (HNL)	To (HNL)	Range (HNL)	Tax per '000
1	500,000	500,000	0.3
500,001	10,000,000	9,500,000	0.4
10,000,001	20,000,000	10,000,000	0.3
20,000,001	30,000,000	10,000,000	0.2
30,000,001	And over		0.15

Corporate residence

The place of incorporation is regarded by Honduran authorities as the corporate residence. Non-resident companies are companies incorporated/registered outside of Honduras.

Permanent establishment (PE)

There is a provision in the transfer pricing rules that provides the following definition of PE:

“Permanent establishment is a fixed place of business where a natural or juridical person resident or domiciled in another state performs part or all of its activities in Honduras. Likewise, a foreign resident will be considered to have a permanent establishment in Honduras when it acts in the national territory through an independent agent that is not acting under the regular framework of its activity.”

There are some exceptions to the rule.

There is no treaty definition of PE since, at the present time, Honduras is not a signatory of any double taxation treaty (DTT) with another jurisdiction in the world.

Other taxes

Sales tax

Sales tax is charged on all sale and purchase transactions of goods and services made in Honduran territory.

The general sales tax rate is 15%. It applies to most goods and services, with the exception of machinery and equipment, basic grains, pharmaceutical products, raw materials for the production of non-taxable goods, petroleum products, school supplies, and insecticides, among others.

The import and sale of beer, other alcoholic beverages, cigarettes, and other tobacco products are subject to 18% sales tax.

There is a 15% sales tax applicable to some PCS, cellular, internet broadband, cable TV, and energy services, depending on the amount of consumption billed by the supplier.

There is an 18% sales tax levied on first class and business class air tickets.

Honduras

Customs duties

The duty assessed by the Honduran government at the time of customs clearance ranges between 0% and 15% for most items.

Honduras is a member of the Central American Common Market (CACM), which also includes Costa Rica, El Salvador, Guatemala, and Nicaragua. Honduras' rates on most goods from outside CACM are currently within the 0% to 15% range. Under the Dominican Republic-Central America Free Trade Agreement (CAFTA-DR) with the United States (US), about 80% of US industrial and commercial goods can enter the region duty-free, with the remaining tariffs to be phased out over ten years. Nearly all textile and apparel goods that meet the Agreement's rules of origin are duty-free and quota-free, promoting opportunities for US and regional fibre, yarn, fabric, and apparel manufacturing (the Agreement's tariff treatment for textile and apparel goods was made retroactive to 1 January 2004).

It is necessary to first obtain the appropriate Harmonized System (HS) classification number for determining when a particular product can enter the CAFTA-DR region duty-free. With this number, it is then possible to check the country and product-specific tariff elimination schedule.

Ad valorem import taxes can be as high as 20%. In addition, imports are subject to the sales tax of 12% or 15% that applies to the sum of the cost, insurance, and freight (CIF) value, the *ad valorem* duty, and the customs fees.

Excise taxes

There is an excise tax levied on the production and importation of cigarettes, sodas, beer, and alcoholic beverages.

Cigarettes are levied at HNL 350 per thousand units.

Excise tax on sodas, beer, and alcoholic beverages are levied according to the following table:

Description	Tax rate per litre (HNL)
Soda/other prepared drink	0.678
Beer	4.82
Wine	6.05
Brandy, cognac, vermouth	32.67
Whisky	32.67
Rum 40°	19.89
Rum 38°	18.90
Rum 36°	17.90
Gin, vodka, tequila, liquor, creams, prepared beverages	32.67
Aguardiente 45°	14.22
Aguardiente 40°	11.70
Aguardiente 38°	9.78
Aguardiente 30°	7.02

Net assets tax

The net assets tax is an annual 1% tax on the net asset value of the company. It applies to the gross value of assets less reserve for accounts payable and any accumulated depreciation allowed under the income tax law and other deductions allowed by law. The law also allows a special deduction of HNL 3 million.

The net assets tax is in lieu of CIT when CIT is less than the amount due for net asset tax. Resident companies during their preoperative period (i.e. the period in which the

company started operations but has not issued its first invoice) and companies operating in free trade zones (FTZs), among others, are exempt from the net assets tax.

Non-resident companies are not liable for the net assets tax.

Transfer taxes

Transfer taxes are levied on real estate transactions at HNL 1.5 per every HNL 1,000.

Stamp taxes

There are no provisions for stamp taxes in Honduras.

Capital gains tax

In general, a 10% tax is applied on capital gains, regardless of the person's residence status. Under the Zolitur law territory, a special regime, the tax rate is a 4% flat tax on capital gains.

The payment of capital gains tax must be made within ten business days after the agreed amount of the transaction has been determined.

In instances where a transaction is subject to the capital gains tax and a non-resident is involved, the buyer has an obligation to withhold 4% of the transaction amount as an advance payment to this tax and must pay it to the government within ten business days of the date of the transaction.

The government offices make a corresponding 10% withholding tax (WHT) on capital gains on payments made due to purchase and sale transactions of goods, indemnifications, purchase of rights, and securities.

Payroll taxes and contributions

Payroll taxes and contributions are paid by employers at the following rates:

- Social security tax contributions are assessed as follows:
 - Sickness and maternity: 5% for employees on income, up to a maximum monthly ceiling of HNL 7,717.50 on income.
 - Invalidity, old age, and death: 3.5% for employees on income, up to a maximum monthly ceiling of HNL 8,882.30 on income.
 - Professional risk: 0.2% for employees on income, up to a maximum monthly ceiling of HNL 7,717.50 on income.
- Institute of Professional Education (*Instituto Nacional de Formación Profesional* or INFOP): 1%.
- Housing fund ('*Régimen de Aportaciones Privadas*' or RAP/'*Fondo Social para la Vivienda*' or FOSovi): 1.5%. Note that this contribution is optional.
- Provisional Individual Accounts of the Complementary Pillar of the Pension Fund (*Pilar Complementario de Cuentas Individuales Provisionales en el Régimen del Seguro de Previsión Social*): The employer will contribute 1.5% on the excess of the employee's income of HNL 8,882.30.

Special temporary contributions

For the term of five years starting 1 January 2014:

- Under the Special Temporary Security Contribution on Financial Transactions (*Contribución Especial por Transacciones Financieras Proseguridad Poblacional*), financial transactions are subject to 0.2% WHT, with some exceptions.
- Companies providing mobile communication services will pay a special temporary contribution of 1% on gross monthly income.
- Under the special temporary contribution for the protection of the environment from the mining sector, there is a 2.5% contribution on the freight on board (FOB) value of the exports filed for non-metallic activity and a 6% contribution for metallic activity.

Honduras

- The special temporary contribution from the food and beverages business under special tax regimes is 0.5% on gross monthly income.
- The cooperatives special contribution is 3.6% on annual net surplus.

Municipal taxes

Companies doing business in Honduras are also subject to the rules and regulations of the respective municipalities. Taxes and obligations are ruled by the '*Plan de Arbitrios*'. Some of these tax obligations include the following:

- Industry, commerce, and service tax, which is based on gross income per year (*see the Taxes on corporate income section*).
- Public services fee, which is paid for services such as waste management.
- Real estate tax, which is a tax on urban and rural real estate.
- Sign tax, which is a tax on public advertising.

Branch income

Branch income is subject to income tax on income generated from Honduran source at the rates applicable for corporate income.

Income determination

Income is computed in accordance with generally accepted accounting and commercial principles, subject to certain adjustments required by the tax law.

Inventory valuation

Inventories are generally valued using the first in first out (FIFO), last in first out (LIFO), and weighted-average cost methods.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. *See Capital gains tax in the Other taxes section for more information.*

Dividend income

The income from dividends is considered 'other income', thus non-taxable under the general income tax rates. There is a 10% WHT rate applicable on the dividends paid to non-residents.

In the first quarter of 2015, the government abolished the double taxation on dividends. Any dividends or distribution of profits that were subject to the corresponding 10% dividend WHT will not be taxed again in case of redistribution.

Stock dividends

Stock dividends are also not taxable.

Interest income

Honduran Bank interests are subject to a 10% WHT at the moment the interest is given, when the sum is over HNL 50,000. Interests from abroad are considered as other income. For income tax reconciliation, interest income is considered non-taxable when subject to the 10% WHT.

Royalty income

Royalties are taxed in the same manner as general income if the recipient is a local company or branch. If the recipient is a non-resident, then the application of a WHT will apply.

Foreign income

Deferral and anti-deferral of foreign income are not regulated in Honduras.

Deductions

The net taxable income of an enterprise is determined by deducting all the ordinary and necessary expenses incurred in the generation of income, including amortisation and depreciation; municipal taxes; donations made in favour of the state, the central district, the municipalities, and legally recognised educational institutions, charities, and sporting facilities; mandatory employer-employee contributions to the social security system; and 'reasonable' charges for royalties and management services.

In general, all expenses incurred in the generation of taxable income are considered as deductible for income tax purposes. However, there are some 'non-deductible' expenses, even if incurred in the generation of income (e.g. interest paid to owners or shareholders, capital losses).

Depreciation

Depreciation may be computed using the straight-line method. Companies may also obtain authorisation from the tax authorities to use other depreciation methods. However, after a company selects a depreciation method, it must apply the method consistently thereafter. The following are the applicable straight-line method rates for some common assets.

Asset	Rate (%)
Buildings	2.5 to 10
Plant and machinery	10
Vehicles	10 to 33
Furniture and office equipment	10
Tools	25

Goodwill

Goodwill can be amortised over a period of five years.

Start-up expenses

Organisation or reorganisation expenses are deductible for the total amount as long as they do not exceed 10% of the initial capital stock. These expenses can be amortised over five years.

Interest expenses

Interest expenses are deductible as long as they are incurred in order to generate income. Interest paid to stockholders, owners, or their spouses is not deductible.

Bad debt

Taxpayers can record a bad debt provision of 1% of the total credit sales, which will not exceed 10% of the accounts receivable balance.

Charitable contributions

Contributions to organisations legally recognised by the government are deductible.

Capital losses

Capital losses are not deductible to determine the net taxable income. Capital losses can only be netted against capital gains, which are subject to a tax rate of 10% (*see Capital gains tax in the Other taxes section*).

Honduras

Contingent liabilities

Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes; actual payments during the fiscal period, for those liabilities, are considered to be deductible expenses.

Fines and penalties

Fines and penalties are not deductible.

Taxes

With the exception of the Solidarity Contribution, net asset taxes, CIT, and sales tax (i.e. if sales tax paid is used as a credit to net the sales tax payable to the government), taxes and contributions paid to district or municipalities are deductible expenses when determining taxable income.

Net operating losses

Companies engaged in agriculture, manufacturing, mining, and tourism may carry forward losses for three years. However, certain restrictions apply. Losses may not be carried back.

Payments to foreign affiliates

Payments to foreign affiliates are deductible as long as the service is effectively received.

Group taxation

No provisions exist for group taxation in Honduras.

Transfer pricing

The Transfer Pricing Law for Honduras published in the *Diario Oficial La Gaceta* establishes the transfer pricing regulations applicable in Honduras effective as of January 2014.

Thin capitalisation

At the present time, there are no provisions for thin capitalisation in Honduras.

Controlled foreign companies (CFCs)

At the present time, there are no provisions in the Honduras legislation for CFCs.

Tax credits and incentives

Companies operating under a special tax regime are exempted from CIT, sales tax, customs duties, and some municipal taxes. These special tax regimes are the following:

- FTZs.
- Industrial processing zone (*Zona Industrial de Procesamiento* or ZIP).
- Temporary import regime (*Régimen de Importación Temporal* or RIT).
- Tourism incentive law.
- Law promoting the generation of electric energy with renewable resources (*Ley de Promoción a la Generación de Energía Eléctrica con Recursos Renovables*), which provides tax exemptions for ten years for projects generating 50MW and over.
- In the regulations for the FTZs there is a consideration for international service companies (e.g. business processing operations [BPOs], call centres and contact centres, shared service centres) that will have the same tax exoneration provided by this regime.
- The Call Centre and BPO Promotion Law, which provides a tax holiday on import of tools, parts, accessories, furniture and office equipment, and all goods involved with

the company's active business as well as an income tax holiday on revenue from all the business activities carried out within the FTZs.

Companies must comply with some governmental requirements to operate under one of the above mentioned special regimes.

Companies under special tax regimes are allowed to sell their partial or total production in the local market; income from local sales will be subject to the regular corporate tax regulations.

The Organic Work Regions and Economic Development Law (*Ley Orgánica de las Zonas de Empleo y Desarrollo Económico*) allows the beneficiaries of this law to use reduced rates for income tax, sales tax, property tax, real estate tax, and flat tax.

There is a reform to the tariff and customs legislation that grants tax exonerations in general; the government established in the Decree No. 278-2013 a list of the valid tariff and customs tax exonerations decrees that continue to have the corresponding benefits (*contact your local PwC practice for more information*).

There is also a reform to the income tax legislation that grants tax exonerations in general; the government established in the Decree No. 278-2013 a list of the valid income tax exonerations decrees that continue to have the corresponding benefits (*contact your local PwC practice for more information*).

Effective 1 January 2014, the term of tax exoneration is limited to 12 years to those companies under special tax regimes with no specific term for their tax benefits specified in their corresponding resolution issued by the government.

Effective 5 June 2014, the Law for the Promotion and Protection of Investment (*Ley para la Promoción y Protección de las Inversiones*) was amended, establishing a 15-year term for tax stability agreements, except for Public and Private Alliances projects. At the same time, it repeals the special income tax discounts granted by this law.

Drawback industries

Special benefits exist for industries that import semi-manufactured materials for assembly in Honduras and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

Foreign tax credit

There are no provisions for foreign tax credits in Honduras.

Withholding taxes

WHT for residents

Distribution or payment of dividends or any other form of distribution of retained earnings or reserves to resident or domiciled individuals and/or legal entities is taxed via WHT at 10%.

The tax authority is empowered to withhold 3% on CIF from import operations for commercial purposes as an advance payment to income tax to those companies or individuals not duly registered with the tax authority, not complying with CIT filing, or in liquid arrears for any tax administered by the *Dirección Ejecutiva de Ingresos* (DEI). There are some exceptions to the rule.

Honduras

WHT for non-residents

For non-residents in Honduras, any income derived from Honduran sources is taxable under the following table of the Income Tax Law:

Income source	WHT (%)
Real estate and movable property rent, except dividends and interest	25
Royalties from mining operations and other natural resources	25
Salaries paid for services and other remuneration for rendering of services within national territory or abroad	25
Profit transfers from branch office to head office	10
Dividends	10
Royalties	25
Interest paid on commercial operations, bonds, securities or negotiable instruments, and other types of obligations	10
Income from operation of airplanes, ships, and vehicles	10
Income from operation of telecommunication companies	10
Insurance premiums	10
Income obtained from public shows	25
Films and video tapes for cinemas, TV, video clubs, and cable TV	25
Any other income not mentioned previously	10

Tax treaties

Honduras has not signed any tax treaties with foreign jurisdictions.

Tax administration

The DEI is the tax authority in Honduras. It is responsible for the administration of the tax and customs system. Taxpayers may request approval from the DEI regarding direct or indirect taxes (e.g. accelerated depreciation methods on new assets acquired by corporations with monetary activities requiring constant technological update, higher installed production capacity and productive re-conversion processes in order to maintain and strengthen their competitive advantage).

Taxable period

The statutory tax year runs from 1 January through to 31 December. However, taxpayers may apply to use a special tax year by requesting an authorisation from the DEI.

Tax returns

Companies must file a CIT return on 30 April every year.

Payment of tax

Mandatory advance tax payments are payable each quarter, based on the income tax paid for the preceding tax year. Final tax is due with the CIT return on 30 April every year.

Tax audit process

The audit cycle can begin after (i) the date the tax return should have been filed or (ii) sometime after the taxpayer made a request before the tax authority (e.g. tax credit, loss carryforward).

Statute of limitations

The statute of limitation for legal actions is applicable for taxpayers, in order to challenge and request payment, and for the fiscal authority, to review, notify, and request payment. Such limitation is established according to the following terms:

- Four years for those conducting operations in the customs regime and five years for registered taxpayers.
- Ten years for those who have the obligation to be registered and currently are not.
- Ten years for those who have withheld information when declaring/filing.

Limitation of actions and powers of the fiscal authority will be interrupted according to the following:

- Determination of the tax by the fiscal authority counted from the day following notification of resolution.
- Notification of the resolution in which the fiscal authority confirms assessment, interests, penalties, or fines in liquid payable amounts, counted from the day following the resolution's notification.
- Legal appeal filed by the taxpayer, counted from the day following the filing of the appeal.
- Express acknowledgement from the debtor, counted from the day following the acknowledgement.
- Payment plan agreement granted to taxpayers according to law, counted from the day following the formal agreement.
- Exercise of the appropriate legal actions, counted from the day following their initiation.

Relapse in the lack of complete or partial payment from the taxpayer, as established in the Tax Code, will be considered as criminal tax fraud.

Topics of focus for tax authorities

The tax authority is currently focused on the adoption of the new Invoice, Other Fiscal Documentation, and Printers Registry Regime (*Regimen de Facturación, Otros Documentos Fiscales y Registro Fiscal de Imprenta*) by the taxpayers. This regime establishes the type of fiscal documents accepted and the requirements those documents have to fulfil.

Other issues

US Foreign Account Tax Compliance Act (FATCA)

The government of Honduras signed the intergovernmental agreement (IGA) regarding FATCA with the government of the United States, formalising the exchange of information for tax purposes on American and Honduran citizens and/or companies.

Significant developments

New legislation enacted

The following piece of legislation was enacted/became effective in the past 12 months:

- Inland Revenue (Amendment) (No. 2) Ordinance 2015: This ordinance extended the current profits tax exemption for offshore funds to private equity funds. It became effective on 17 July 2015 and takes retrospective effect, applying in respect of tax chargeable for any year of assessment commencing on or after 1 April 2015.

Taxes on corporate income

Hong Kong adopts a territorial basis of taxation. Profits tax is payable by every person (defined to include corporation, partnership, and sole proprietorship) carrying on a trade, profession, or business in Hong Kong on profits arising in or derived from Hong Kong from that trade, profession, or business. However, capital gains and receipts that are capital in nature are not subject to tax. Dividends from local companies chargeable to tax are exempt, whereas dividends from overseas companies are generally offshore in nature and not subject to tax in Hong Kong. The tax residence of a person is generally irrelevant for profits tax purposes. The tax treatments of public and private companies are the same.

Certain income that would not otherwise be subject to Hong Kong profits tax is deemed to arise in or be derived from Hong Kong from a trade, profession, or business carried on in Hong Kong and thus becomes taxable in Hong Kong. This includes royalties received by a non-resident for the use of or right to use a patent, design, trademark, copyright material, secret process or formula, or other property of a similar nature in Hong Kong, or for the use of such intellectual properties outside Hong Kong, but the royalties paid can be claimed as a deduction by a person for profits tax purposes.

The tax rates are 16.5% for corporations and 15% for unincorporated businesses.

There are special rules for determining the tax liabilities of certain industries, such as shipping, air services, and financial services. There is also a special tax framework for Islamic bonds (i.e. *sukuk*) that provides for the same tax treatments for *sukuk* vis-à-vis their conventional counterparts.

Incomes from certain qualifying debt instruments (QDIs) are either tax exempt or subject to a concessionary tax rate (i.e. 50% of the regular profits tax rate). However, there is a specific anti-avoidance provision under which the concessionary tax rate/tax exemption does not apply to incomes derived from QDIs by a person who is an associate of the issuer of the QDIs.

Before year of assessment 2015/16, offshore funds having Hong Kong fund managers and investment advisors with full discretionary powers were exempt from Hong Kong profits tax on profits derived in Hong Kong from six types of 'specified transactions'

that were carried out or arranged by 'specified persons'. Effective from year of assessment 2015/16, the types of 'specified transactions' has been expanded to cover transactions in certain private companies, and the 'specified persons' requirement has been relaxed in certain circumstances such that offshore private equity funds may also enjoy the tax exemption. However, there are also specific anti-avoidance provisions in the Inland Revenue Ordinance (IRO) deeming certain resident persons to be subject to profits tax on their share of the non-resident person's tax-exempt profits.

Profits derived from the business of reinsurance of offshore risks and qualifying offshore captive insurance business are subject to profits tax at a concessionary tax rate (i.e. 50% of the regular profits tax rate).

Corporate residence

In general, for Hong Kong profits tax purposes, corporate residency is not important in determining taxability of an entity. The decisive factors for taxability are (i) whether a corporation is carrying on a trade, profession, or business in Hong Kong, and (ii) whether the profits are arising in or derived from Hong Kong.

However, where it is necessary to determine the corporate residence, such as for the purpose of a comprehensive double tax agreement (CDTA), companies incorporated in Hong Kong and companies that are normally managed or controlled/centrally managed and controlled (depending on the provisions of the relevant CDTA) in Hong Kong are generally considered as a Hong Kong tax resident.

Permanent establishment (PE)

For Hong Kong profits tax purposes, whether a foreign corporation is carrying on a trade, profession, or business in Hong Kong and the source of profits, rather than whether there is a PE in Hong Kong, are the decisive factors in determining taxability. The existence of a PE is generally irrelevant for profits tax purposes except in the situation where a CDTA of Hong Kong is applicable.

Other taxes

Value-added tax (VAT)

Hong Kong does not have a VAT, goods and services tax, or sales tax.

Customs duties

There is no tariff on general imports in Hong Kong.

Excise tax

Duties are levied on limited categories of dutiable commodities (i.e. tobacco, liquor, methyl alcohol, and hydrocarbons), regardless of whether they are imported or locally manufactured.

Property tax

Property tax is charged annually to the owner of any land or buildings (except government and consular properties) in Hong Kong at the standard rate of 15% on the net assessable value of such land or buildings. Net assessable value of a property is the consideration payable to the owner for the right to use the land or buildings less rates paid by the owner and a 20% notional allowance.

Rental income derived by a company from a Hong Kong property is subject to profits tax. The company that is subject to profits tax may apply for an exemption from property tax in respect of the property. If no exemption is applied, the property tax paid can be used to offset against the profits tax payable by the company.

Hong Kong

Stamp duty

Stamp duty is charged on transfer of Hong Kong stock by way of sale and purchase at 0.2% of the consideration (or the market value if it is higher) per transaction. Hong Kong stock is defined as stock the transfer of which must be registered in Hong Kong.

For conveyance on sale of immovable property in Hong Kong, the stamp duty payable depends on the property consideration. There are two sets of stamp duty rates (i.e. Scale 1 rates and Scale 2 rates). Scale 2 rates range from 100 Hong Kong dollars (HKD) (for property consideration of up to HKD 2 million) to 4.25% (for property consideration exceeding HKD 20 million) and are applied to residential property acquired by a Hong Kong permanent resident who does not own any other residential property in Hong Kong at the time of acquisition. Scale 1 rates range from 1.5% (for property consideration of up to HKD 2 million) to 8.5% (for property consideration exceeding HKD 20 million) and are applied to all other cases. The stamp duty payable is computed by applying the relevant rate to the consideration or market value of the property (whichever is higher), with marginal relief upon entry into each higher rate band.

For lease of immovable property in Hong Kong, stamp duty is calculated at a specified rate of the annual rental that varies with the term of the lease. Currently, the applicable rate ranges from 0.25% (for lease period of not more than one year) to 1% (for lease period of more than three years).

Exemption is available for certain transactions, such as transfer of shares between associated corporate bodies, transfer of shares or units of exchange traded funds listed in Hong Kong, and certain stock borrowing and lending transactions, provided that the specified conditions for exemption (if any) are satisfied.

Special Stamp Duty (SSD)

There is an SSD on resale of residential property within 36 months from the date of acquisition. The SSD is imposed on top of the stamp duty payable on conveyance on sale or agreement for sale of residential property, with a few exemptions. The SSD payable will be calculated based on the stated consideration or the market value (whichever is higher) of the resold property at the regressive rates indicated below.

- 20% for residential properties held for six months or less.
- 15% for residential properties held for more than six months but for 12 months or less.
- 10% for residential properties held for more than 12 months but for 36 months or less.

Buyer's Stamp Duty (BSD)

A BSD is payable on acquisition of Hong Kong residential properties by any person (including Hong Kong and foreign companies) other than a Hong Kong permanent resident. The BSD is charged at a flat rate of 15% on the stated consideration or the market value of the property acquired, whichever is higher. The BSD is imposed on top of the stamp duty and the SSD (if applicable), with exemptions in certain situations.

Business registration fees

Every person who carries on a business in Hong Kong is required to apply for business registration with a fee within one month from the date of commencement of the business. The business registration certificate has to be renewed either on an annual basis or every three years with a payment of a business registration (renewal) fee. Special registration and licence fees are applicable to banks and deposit-taking companies.

Capital duty

There is currently no capital duty in Hong Kong.

Government rates and rent

Rates are an indirect tax levied on properties in Hong Kong. Rates are charged at 5% of the rateable value, which is the estimated annual rental value of a property at the designated valuation reference date of 1 October.

Privately owned land in Hong Kong is normally held by way of a government lease under which rent is payable to the Hong Kong SAR Government in return for the right to hold and occupy the land for the term (i.e. duration) specified in the lease document. Currently, government rent is calculated at 3% of the rateable value of the property and is adjusted in step with any subsequent changes in the rateable value.

Payroll taxes

Mandatory Provident Fund (MPF) contribution

Under the MPF scheme, an employer is required to make a mandatory contribution for an employee in the amount equal to 5% of the monthly income of that employee. The maximum level of income for contribution purpose is HKD 30,000 per month. An employer may make voluntary contributions in addition to the mandatory contribution required.

H

Branch income

The tax rate for branches is the same as that for corporations. The Hong Kong profit of a foreign corporation with a branch in Hong Kong is determined according to the accounts maintained for the Hong Kong operation (or business). If the Hong Kong accounts do not disclose the true profits arising in or derived from Hong Kong attributable to the Hong Kong operation, the Hong Kong profit will be computed according to the ratio of turnover in Hong Kong to total turnover (or the proportion of Hong Kong assets over total assets) on the worldwide profits. Alternatively, the Hong Kong Inland Revenue Department (HKIRD) tax assessor may estimate the profits of the Hong Kong branch. In certain situations, the profits of the Hong Kong branch can be estimated based on a fair percentage of the turnover in Hong Kong.

Income determination

Inventory valuation

Inventory may be stated at the lower of cost or market value. Last in first out (LIFO) may not be used for tax purposes. First in first out (FIFO) must be consistently applied.

The prevailing accounting standards require financial assets and liabilities held for trading purpose (e.g. shares and securities held as trading stock) to be carried at market value, with fluctuations in values of such assets and liabilities taken to the profit and loss accounts, irrespective of whether the profits or losses are realised. Following the court decision in the *Nice Cheer* case, the increases (unrealised gains) in the market values of trading securities are not taxable while the decreases (unrealised losses) may be deductible when they are recorded in the financial statements.

There are special tax provisions for valuation upon cessation of a business under which inventory is valued at market value, unless it is sold to a person carrying on business in Hong Kong, who may deduct a corresponding amount as the cost of the inventory in computing the assessable profits.

Capital gains

Gains from realisation of capital assets or receipts that are capital in nature are not taxed.

Hong Kong

Dividend income

Dividends from local companies chargeable to tax are exempt, whereas dividends from overseas companies are generally offshore in nature and not subject to Hong Kong profits tax. Hong Kong corporations may declare bonus issues (i.e. stock dividends), which are not taxable in the hands of the recipients.

Interest income

Hong Kong sourced interest income received by or accrued to a corporation carrying on a trade or business in Hong Kong is subject to profits tax. Exemption is provided to interest income derived from any deposit placed in Hong Kong with a financial institution, unless the deposit secures a borrowing the interest expense of which is deductible. This exemption, however, does not apply to interest accruing to a financial institution.

Interest accruing to a bank or financial institution will be deemed to be sourced and taxable in Hong Kong if the interest arises through or from the carrying on of business in Hong Kong by the bank or financial institution.

Royalties

Royalties paid or accrued to a non-resident for the use of or right to use in Hong Kong or outside Hong Kong (if the royalties are deductible in ascertaining the assessable profits of a person for Hong Kong profits tax purposes) a trademark, patent, design, copyright material, secret process, or other property of a similar nature, or for the use in Hong Kong of cinema or television tape or any sound recording, are deemed to be taxable in Hong Kong.

A total of 30% of the sum receivable is deemed to constitute profits subject to tax in normal situations. Where such royalties are received by or accrued to an associated corporation, however, 100% of the sum is deemed to constitute profits under certain circumstances.

Partnership income

Partnership business is taxed as a single entity, although an individual partner can use its share of losses incurred by a partnership to offset against the assessable profits of its other business. In general, there is no special registration requirement other than business registration for a partnership. The assessable profits of a partnership are basically determined in the same way as those of a corporation, with certain special rules (e.g. salaries or other remunerations paid to a partner or a partner's spouse are not deductible).

Unrealised exchange gains/losses

In general, unrealised exchange gains/losses are taxable/deductible if they are recognised in the profit and loss accounts in accordance with Generally Accepted Accounting Principles (GAAP), provided that they are revenue in nature and with a Hong Kong source. The nature and source of exchange gains/losses are determined by the nature and source of the underlying transactions. Exchange gains/losses arising from ordinary business transactions (e.g. trade receivables or payables) are taxable/deductible whereas exchange gains/losses arising from capital transactions (e.g. sale of capital assets) are non-taxable/non-deductible.

Foreign income

Hong Kong resident corporations are not taxed on their worldwide income. Foreign-sourced income, whether or not remitted to Hong Kong, is not taxed. As such, there is no specific tax provision dealing with deferral or non-remittance of foreign earnings. Nor does Hong Kong have any controlled foreign company (CFC) legislation.

Deductions

Expenses that are incurred for producing profits chargeable to tax and that are not capital in nature are generally tax deductible. In addition, special tax relief is available for certain capital expenditure. There are special rules for deduction of certain expenses (e.g. interest expenses).

Accounting treatments are usually followed in determining the assessable profits, except when there is an explicit rule in the IRO. Accrued expenses recognised in the profit and loss accounts in accordance with GAAP are usually deductible if they are incurred for producing profits chargeable/subject to tax and are not capital in nature.

Expense items for which a tax adjustment is necessary in determining the amount of taxable profits from the accounting profits include: tax depreciation allowance vs. accounting depreciation, expenses that are capital in nature, general provisions that are non-deductible, and non-deductible interest expenses on borrowings used to finance non-income producing assets.

Set out below are the Hong Kong profits tax treatments of some common expense items.

Tax depreciation of fixed assets

Tax depreciation allowances/deductions are available for capital expenditure incurred on the construction of buildings or structures and in the provision of machinery and plant for trade or business purposes, as follows:

- Industrial buildings and structures: An initial allowance of 20%, in addition to an annual allowance of 4%, of the cost of construction or cost of purchase from a developer is granted for an industrial building or structure occupied for the purpose of a qualifying trade. Provision is made for balancing allowance or charge in the year of assessment in which the building is disposed of to adjust the written-down value of the building to the disposal price. Balancing charges are restricted to the total of initial and annual allowances previously given.
- Commercial buildings and structures: An annual allowance of 4% of the capital expenditure incurred on the construction is applicable. A balancing allowance or charge applies upon disposal. Balancing charges are restricted to the total annual allowances previously given.
- Plant and machinery: An initial allowance of 60% of the capital expenditure on plant and machinery is given for the year of assessment during the basis period in which the expenditure is incurred. An annual allowance is also given for depreciation at three prescribed rates on the reducing value of each of the three depreciation rate 'pools'. The three prescribed rates are 10%, 20%, and 30%, and the reducing value of each of the three depreciation rate pools is original cost less initial and annual allowances and sales proceeds. Provision is made for balancing charges when plant and machinery within one of the three depreciation rate pools is sold or disposed of and the reducing value of that pool is less than the sale price, which is capped at the original amount incurred in the pool. In addition, balancing allowances or charges may be applicable upon cessation of business. Otherwise, sales proceeds are deducted in calculating the reducing value on which the annual allowance is calculated.

Book depreciation is adjusted for tax purposes in accordance with the above depreciation allowances granted under the IRO.

Goodwill

Cost of acquisition of goodwill/amortisation of goodwill is not deductible as it is capital in nature.

Hong Kong

Organisational and start-up expenses

In general, company formation/start-up expenses that are incurred before the commencement of a trade, profession, or business and that are for the establishment of the overall income producing structure are capital in nature and not tax deductible.

Research & development (R&D)

There is a specific provision allowing the deduction of expenditure incurred on R&D (including payments made to an approved research institute and in-house expenditure), provided that certain specified conditions are met.

Interest expenses

There is no thin capitalisation rule in Hong Kong. However, deduction of interest expense is subject to stringent and complicated rules that are designed to guard against loan arrangements with an intention to avoid Hong Kong profits taxes.

Bad debts

A bad or doubtful debt incurred in any trade, business, or profession, proved to the satisfaction of the HKIRD to have become bad during the basis period for a year of assessment, is deductible. The deduction is limited to debts that were included as a trading receipt in ascertaining the taxpayer's assessable profits or debts in respect of money lent in the ordinary course of a money-lending business in Hong Kong.

If any bad or doubtful debt that has previously been allowed as a deduction is ultimately recovered, it will be treated as taxable profits of the basis period in which it is recovered.

Charitable contributions

A deduction is allowed for cash donations to approved charities made in the basis period for a year of assessment if the aggregate of such donations is not less than HKD 100. The deduction is limited to 35% of the assessable profits of the year of assessment.

Pension expenses

A deduction is allowed for regular/ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme made by an employer in respect of an employee to the extent that the contributions do not exceed 15% of the employee's total emoluments for the period to which the contributions relate.

Special payments, other than the ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme, are capital in nature but can be deducted evenly over a five-year period under a specific provision of the IRO.

There are also specific rules for deduction of provisions for contributions to a mandatory provident fund scheme or recognised occupational retirement scheme.

Payments for directors

Director fees or other remunerations paid by a corporation to its directors are generally deductible under the normal deduction rule. Nevertheless, no deduction is allowed on salaries or other remunerations paid to a sole proprietor or any partners or partners' spouses of a partnership business.

Contingent liabilities

Generally speaking, general provisions for expenses are not deductible, whereas specific provisions are deductible if the HKIRD is satisfied that the amount has been incurred (i.e. the taxpayer has a legal/contractual obligation to pay such amount in future) and that the provision represents a reasonably accurate estimate of the future liability.

Special deductions

There are special deduction rules for expenditures incurred:

- for refurbishment of a building or structure, other than a domestic building or structure
- on environmental protection installation and machinery
- on environment-friendly vehicles
- on machinery or plant used specifically and directly for any manufacturing process, computer hardware (other than that which is an integral part of machinery or plant), computer software, and computer systems (collectively known as prescribed fixed assets)
- for registering trademarks, designs, or patents used in the production of taxable profits, and
- on the purchase of patent/know-how rights and specified intellectual property (IP) rights (i.e. copyrights, registered trademarks, or registered designs), provided certain specified conditions are met.

Fines and penalties

Fines and penalties are generally not deductible, as the HKIRD does not consider them to be expenses incurred for producing profits chargeable/subject to tax.

H

Taxes

Taxes paid on corporate profits are generally not deductible for the purpose of calculating the assessable profits. However, the HKIRD generally accepts that a foreign tax that is an expense that must be borne regardless of whether or not a profit is derived (e.g. a foreign withholding tax [WHT] levied on the gross amount of interest or royalties received), as opposed to a charge on the profits themselves, is deductible under the general deduction provision. Where interest income or gains from the sale of a certificate of deposit or bill of exchange are deemed to be subject to profits tax, a deduction is allowed for foreign taxes of substantially the same nature of Hong Kong profits tax paid in respect of the same income, provided that the taxpayer is not eligible for double taxation relief under a CDTA.

Net operating and capital losses

Net operating losses incurred in an accounting year can be carried forward indefinitely to offset future profits of the business. A corporation carrying on more than one business may have losses in one business offset profits of the others, with any balance being carried forward. Net operating losses cannot be carried backward.

Capital losses are not tax deductible.

Payments to foreign affiliates

Royalties and service fees paid/payable by a Hong Kong corporation to foreign affiliates are deductible, provided they are incurred for the production of profits chargeable/subject to tax. There is no special restriction on the deductibility of these payments. Interest payable by a Hong Kong corporation to a foreign affiliate is not deductible if the recipient is not chargeable/subject to Hong Kong profits tax on the interest income received (except where either the payer or the recipient is a financial institution as defined in the tax law).

Group taxation

Hong Kong does not have a consolidated or group taxation regime.

Transfer pricing

Strictly speaking, there is no comprehensive transfer pricing legislation in Hong Kong. While a few existing provisions in the IRO may be employed by the tax authority to tackle non-arm's-length transactions, such provisions are primarily aimed at transactions with closely connected non-residents or tax avoidance transactions rather than specific legislation on transfer pricing.

Hong Kong

There are two Departmental Interpretation and Practice Notes (DIPNs) issued by the HKIRD to address the transfer pricing issues in Hong Kong. DIPN 45 focuses on the administrative/procedural issues involved in providing double tax relief in a treaty context, such as when such relief is available and what are the procedures for claiming such relief. DIPN 46 outlines the HKIRD's view on the legislative framework for transfer pricing in Hong Kong (including the statutory provisions in the IRO and the articles in a CDTA that are relevant to transfer pricing) and provides guidance on numerous transfer pricing related issues, such as the application of the arm's-length principle and the acceptable transfer pricing methodologies, which are largely in line with the Organisation for Economic Co-operation and Development (OECD) transfer pricing guidelines. The DIPN also spells out the documentation that taxpayers should consider retaining to support their transfer pricing arrangements and explains the interaction between the transfer pricing and sourcing rules in Hong Kong.

In general, the HKIRD adopts the arm's-length principle and will seek to apply the OECD transfer pricing guidelines except where they are incompatible with the express provisions in the IRO.

An advance pricing arrangement (APA) program is available in Hong Kong. The objectives of the APA program are to help taxpayers obtain tax certainty on their complex or significant transfer pricing arrangements and reduce the risk of double taxation arising from related-party transactions. Resident enterprises or non-resident enterprises with a PE in Hong Kong may apply for an APA in respect of their transactions with associated enterprises under a CDTA, provided that certain conditions (including the threshold for an APA application) are met.

Currently, the HKIRD is primarily focused on bilateral APA or multilateral APA applications in respect of cross-border related-party transactions involving countries that are CDTA partners with Hong Kong.

DIPN 48, issued by the IRD, provides guidance on various aspects of the APA regime, such as the timeframe and threshold for an APA application, the various stages involved in the APA process, an audit involving years covered by a concluded APA, and possible rollback of the transfer pricing methodology agreed under an APA to prior years. The appendices of the DIPN include various sample documents for use in an APA application.

Thin capitalisation

Hong Kong does not have thin capitalisation rules.

Controlled foreign companies (CFCs)

Hong Kong does not have a CFC regime.

Tax credits and incentives

Foreign tax credits

Foreign tax credits are available if foreign taxes are payable/paid on income derived from a jurisdiction that has entered into a CDTA with Hong Kong and the same income is subject to tax in Hong Kong. *See the Withholding taxes section for a list of jurisdictions that have entered into a CDTA with Hong Kong.*

Foreign investment incentives

Hong Kong does not have any specific incentives for foreign investment, except that offshore funds may be exempt from profits tax under certain circumstances.

Withholding taxes

There is no WHT on dividends, interest, or royalties. However, the 4.95%/16.5% (for corporations) or 4.5%/15% (for unincorporated businesses) tax on royalties received by non-residents (*see Royalties in the Income determination section*) is, in effect, similar to a WHT.

Resident consignees are required to furnish quarterly returns to the HKIRD showing the gross proceeds from sales on behalf of their non-resident consignors and to pay to the Commissioner of Inland Revenue (CIR) a sum equal to 0.5% of such proceeds. The HKIRD normally accepts this as satisfying the Hong Kong tax obligations of the non-resident.

Hong Kong has so far entered into 35 treaties with different jurisdictions. The following table shows the applicable WHT rates for payments made from Hong Kong payers to non-treaty and treaty country corporate recipients. The rates shown in the table are the lower of the domestic and treaty rates. For WHT rates on payments received by Hong Kong recipients from treaty country payers, please refer to the summaries of the respective treaty countries.

Recipient	Dividends (%) (1)	Interest (%) (1)	Royalties (%)

Notes

1. Hong Kong IRO does not impose WHT on dividends and interest currently. However, the treaties provide for a maximum WHT rate on dividends and interest should Hong Kong IRO impose such WHT in the future. Some of the treaties also provide for a reduced WHT rate on dividends and interest if conditions specified in the treaties are met.
2. Generally, royalties paid to non-resident corporations that are not otherwise chargeable to Hong Kong profits tax are subject to WHT at 4.95%. The 16.5% rate applies if the royalties are received by or accrued to a non-resident from an associate, unless the Commissioner is satisfied that no person carrying on business in Hong Kong has, at any time, wholly or partly owned the property in respect of which the royalties are paid.
3. Since a higher rate is specified in the treaty, the lower domestic/non-treaty rate of 4.95% will apply.
4. The 0% rate applies to payments for the use of or the right to use industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience. The 3% rate applies to all other cases.
5. Ratified and effective.
6. Not yet ratified.

Tax administration

Taxable period

A year of assessment (or tax year) begins on 1 April of a year and ends on 31 March of the following year. The period that is used to compute the taxable profits for a year of assessment is called the basis period, which is normally the financial year ended in the year of assessment.

Tax returns

Tax returns are issued on the first working day of April each year. The filing deadline is usually within a month from the date of issue. However, corporations whose financial year ended after 30 November and are represented by a tax representative are normally granted with an extension for filing their returns. The exact filing due date depends on the accounting year-end date of the taxpayer.

The basis of assessment is the accounting profits of the financial year ending within the year of assessment, with appropriate adjustments for tax purposes. A tax return is usually filed together with a tax computation showing the tax adjustments to the accounting profits in arriving at the taxable profits or allowable tax losses for a given year of assessment.

Corporate taxpayers are also required to attach their audited accounts as supporting documents when filing a profits tax return, unless they qualify as a small corporation as defined by the HKIRD (i.e. mainly those with gross income for a basis period of not exceeding HKD 2 million plus a few other conditions). Small corporations are not required to attach supporting documents with their profits tax returns but are still required to keep those documents and submit them upon request. A branch of a foreign corporation doing business in Hong Kong is required to file a profits tax return annually, and the HKIRD may require audited accounts of the foreign corporation to support the Hong Kong branch's profits tax return.

Notice of assessment will be issued after the tax return has been examined by the HKIRD. Taxpayers may be subject to post-assessment investigation or field audit under the computerised random selection procedures of the HKIRD at a later date.

Payment of tax

The dates of payment of tax are determined by the CIR and specified in the assessment notice. A system of provisional tax payments applies whereby estimated tax payments are made during the current year. The provisional profits tax payable is normally estimated based on the previous year's profits tax liability. The provisional profits tax already paid is credited against the final profits tax assessed for a year of assessment, which is determined after filing of the return.

For companies with an accounting year-end date of 31 December, the provisional tax payments for a given tax year (to be paid in two instalments) are usually due in November of the current year and January of the next year, whereas the final tax payment for a given tax year is usually due in November of the year in which the return is issued.

Tax audit process

There is no specific tax audit cycle in Hong Kong. Tax audit targets are selected with reference to certain criteria determined by the HKIRD.

Statute of limitations

An additional assessment may be made by an HKIRD tax assessor if a taxpayer chargeable to tax has not been assessed to tax or has been assessed at less than the proper amount. The assessment must be made within the relevant year of assessment or within six years after the end of that year of assessment. The time limit for making additional assessments is extended when a taxpayer either has not been assessed, or is under-assessed, due to fraud or wilful evasion. In that case, an additional assessment may be made up to ten years after the end of the relevant assessment year.

A statement of loss is not an assessment, and the above six-year time limit does not apply to issue or revision of a statement of loss. A tax loss year remains technically open until the sixth year after the first year in which the taxpayer has an assessable profit after utilising all the tax losses brought forward.

Topics of focus for tax authorities

Profits tax issues that are often subject to close scrutiny of the tax authority include offshore claim of profits, capital claims of income, transactions with related parties and closely connected non-residents, and deductibility of expenses (e.g. interest expenses, share-based payments, intra-group management/service fees).

General anti-avoidance rules (GAAR)

The IRO includes a GAAR (i.e. section 61A) allowing the HKIRD to disregard a transaction or counteract the tax benefit conferred by a transaction if the sole or dominant purpose of entering into such a transaction is to obtain a tax benefit. Whether the sole or dominant purpose of entering into a transaction is for obtaining a tax benefit will be assessed according to a set of factors stipulated in section 61A. Another GAAR in the IRO is section 61, which empowers the HKIRD to disregard a transaction that reduces or would reduce the amount of tax payable by any person if that transaction is considered artificial or fictitious. Although both GAARs could be used, in practice, section 61A is more often invoked by the HKIRD in tackling tax avoidance schemes.

Specific anti-avoidance provision for related party transactions

In addition to the general anti-avoidance provisions described above, there is a specific anti-avoidance provision dealing with transactions with closely connected non-residents. Under the specific provision, if a resident person carries on a business with a closely connected non-resident person such that no profits or less than the ordinary profits are derived by the resident person in the course of such business, the non-resident person can be assessable and chargeable to tax in respect of profits derived from such business in the name of the resident person.

Other issues

Tax information exchange agreements (TIEAs)

Currently, Hong Kong has entered into seven TIEAs with different jurisdictions as shown in the following table.

- | | |
|-------------|-----------------|
| • Denmark | • Norway |
| • Faroes | • Sweden |
| • Greenland | • United States |
| • Iceland | |

All of the above TIEAs are ratified and effective.

In addition to the signing of the HK-US TIEA, Hong Kong signed a Model 2 intergovernmental agreement (IGA) with the United States in November 2014 to facilitate financial institutions in Hong Kong to comply with the Foreign Account Tax Compliance Act (FATCA).

Foreign investment restrictions

In general, Hong Kong does not impose restriction to foreign investors to make investments in Hong Kong, and wholly foreign owned companies are allowed. The only exception is the restriction on foreign ownership of Hong Kong's licensed television/sound broadcasters, of which the collective foreign ownership ceiling is 49% of the voting power. In addition, an approval from the Broadcasting Authority must be obtained for holding, acquisition, or exercise of voting control by a foreign investor of more than 2% of a licensee.

Exchange controls

Hong Kong does not have any foreign exchange control. There is no restriction on entry or repatriation of capital or remittance of profits from investments. Funds can be freely remitted to persons outside Hong Kong by various means, such as dividends, interest, royalties, service fees, and branch profits, etc.

Choice of business entity

The principal forms through which a business can be conducted in Hong Kong are as follows:

- Company incorporated in Hong Kong (either private or public via listing on the Stock Exchange of Hong Kong).
- Branch of a foreign company.
- Representative or liaison office of a foreign company.
- Joint venture (can be set up either as a company or partnership).
- Partnership.
- Sole proprietorship.

Of the above, privately incorporated companies and branches of foreign companies are most commonly used by foreign investors, as limited liability is usually desirable.

Intellectual property (IP) regulations

The Intellectual Property Department is responsible for monitoring the IP regime and ensuring the protection and enforcement of IP rights in Hong Kong. The Department is also responsible for investigating complaints against infringements and has extensive powers of search and seizure. Registration and protection of patents, copyrights, trademarks, and registered designs are each governed by a separate ordinance.

Merger and acquisition (M&A) activities

There are no specific restrictions on M&A activities in Hong Kong. The following tax considerations are relevant in the M&A context:

- Dividends or other forms of distribution of profits (e.g. distribution of branch profits to the head office) are generally not taxable.
- Capital gains arising from an M&A transaction are not taxable in the hands of the transferor, whereas amortisation of the goodwill in the transferee's accounts is not tax deductible due to its capital nature.
- For a share deal, stamp duty is payable on the transfer of Hong Kong shares at 0.2%, unless an exemption applies; for an asset deal, stamp duty is payable on conveyance of immovable property in Hong Kong at progressive rates of up to 8.5%.
- Gains derived from transfer of revenue items (e.g. trade receivables) in an asset deal will be subject to profits tax.
- There is no special tax concession/incentive relating to M&A transactions.
- Tax losses in the acquired company can generally be carried forward indefinitely to set off against future assessable profits. However, there are specific anti-avoidance provisions in the IRO that prevent the transfer of shares of a company with accumulated tax losses to owners of a profitable company for the sole or dominant purpose of utilising the tax losses (i.e. offsetting the tax losses against the profits generated from other trade, profession, or business of the transferee).

Significant developments

As of 1 January 2016, the following significant changes were introduced to the Hungarian tax system. The changes are mainly related to corporate income tax (CIT) and indirect taxes.

Corporate income tax (CIT)

- The advertisement tax rate has been changed to 0% on up to 100 million Hungarian forint (HUF) of the tax base and 5.3% on over HUF 100 million of the tax base.
- Regarding local business tax (LBT), the underlying provision results in a double benefit regarding deductibility of the research and development (R&D) costs: (i) its total amount may be expensed as a tax-base decreasing item and (ii) an additional 10% tax incentive may be used.
- The tax authority now classifies a taxpayer as 'reliable' or 'risky'. Reliable taxpayers receive benefits, while risky taxpayers fall under stricter rules.
- International Financial Reporting Standards (IFRS) has been adopted in Hungary. For many companies, adoption is optional from 2016 and mandatory from 2017.

Excise duties

Change in the rate of reclaimable excise duty

As of 1 January 2016, the amount of reclaimable excise duty of commercial diesel was reduced from HUF 11 per litre to HUF 7 per litre.

Private distillation

As of 1 January 2016, the special rules in connection with private distillation changed significantly. A tax stamp of HUF 700 was introduced, and this stamp replaces the annual HUF 1,000 payment liability effective in 2015. One tax stamp entitles the distiller to produce one litre of spirits with an alcohol content of 42% by volume. Private distillers may purchase no more than 86 tax stamps annually and are allowed to distil spirits in the corresponding quantity.

Registration tax

As of 1 January 2016, the tax rate on purely electrical vehicles, plug-in hybrid electrical vehicles, increased range plug-in hybrid electrical vehicles, and zero-emission vehicles is HUF 0.

Public health product tax

Tax allowance for health promotion programmes

As of 1 January 2016, taxpayers subject to the public health product tax are allowed to deduct up to 10% of their tax liability to finance 'health promotion programmes'.

Taxpayers can take advantage of this favourable opportunity without incurring additional costs as they can deduct the costs of financing health promotion programmes from the public health product fee they are required to pay.

The following qualifies as health promotion programmes: activities aimed at promoting healthy diet and lifestyle and encouraging participation in sports. One important condition for the tax allowance is that the health promotion programme must be made available to private individuals free of charge.

Food chain supervision fee

Change in fee rates

As of 1 January 2016, the progressive fee rates introduced in 2015 were abolished, and, as the main rule, the supervision fee is 0.1% of the previous year's net turnover, which is based on those activities of the operator that are subject to the supervision fee (excluding excise duty and public health product tax).

Special tax of financial institutions

Decreasing tax rates and a new tax base have been implemented in connection with the special tax of financial institutions.

Pending legislation

Please note this information is current as of 1 June 2016. It does not reflect the tax law changes expected to be enacted on 7 June 2016. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2016. You will find changes in relation to intellectual property related CIT base and local business tax base deductions, some changes in connection with tax proceedings, including tax audit of binding rulings and the conditions concerning 'reliable' taxpayers, as well as a modification concerning the utilisation of loss carryforwards and some changes in connection with excise duties. Further changes will enter into force from 1 January 2017.

Taxes on corporate income

Resident taxpayers are subject to all-inclusive or unlimited CIT liability. Non-residents are subject to CIT on their income from their Hungarian branch's business activities.

The CIT rate is 10% on the first HUF 500 million of a positive CIT base, without any further preconditions. The tax base above this limit is subject to 19% CIT.

Minimum tax base

If a company's CIT base or the pre-tax profit, whichever is higher, is less than 2% of its total revenues reduced by the income of its foreign permanent establishments (PEs) (i.e. the 'minimum tax base'), the company can choose to file a declaration and pay CIT either according to the general provisions or on its minimum tax base.

Real estate holding companies

The owner of a real estate holding company is subject to Hungarian CIT in the case of alienation or withdrawal of its shares in the real estate holding company.

The tax base of the owner of a real estate holding company in cases of share transfers and share capital decreases is the positive amount of the consideration minus the acquisition price of the shares less the costs of acquisition and of administration. The tax rate is 19%.

A company and its related parties are defined as real estate holding companies if at least 75% of the book value of their assets is domestic real estate and if they have a foreign shareholder that is not resident in a country that has a double tax treaty (DTT) with Hungary or the treaty allows capital gains to be taxed in Hungary.

Hungary

Please note that the definition of the payer for CIT purposes is very different from the definition used for stamp duty purposes.

Energy suppliers' income tax

Mines, energy producers, and energy distribution system operators are subject to energy suppliers' income tax. The scope of the definition of 'energy suppliers' also includes universal suppliers and authorised distributors of electricity and natural gas.

The base of energy suppliers' income tax is similar to the CIT base with certain additional adjustments. The tax rate is 31%.

If the energy supplier entity possesses a development tax incentive (*see the Tax credits and incentives section*), then it is possible to claim this tax incentive for up to 50% of energy suppliers' income tax liability as well. Additionally, the settled amount of mining royalty can be claimed for up to HUF 1.5 billion from energy suppliers' income tax liability.

From an accounting point of view, energy suppliers' income tax falls under the same treatment as CIT.

Advertisement tax

Advertisement tax applies to certain advertising services, including advertising services made available over the internet. The tax applies in respect of advertisements that are published in Hungarian, or where the advertisement is not published in Hungarian but is available on a website/webpage that is mainly in Hungarian.

In the case of primary taxpayers (*see below*) the tax is based on net sales revenue. The advertisement tax rate is 0% on up to HUF 100 million of the tax base and 5.3% on over HUF 100 million of the tax base.

Primary and secondary taxpayers

The company providing the advertising service is the primary taxpayer, and the progressive rates above apply to the company's sales that are within the scope of the tax. The tax is not a withholding tax (WHT), and the customer is not obligated to withhold tax on payments made to the advertising service provider.

The person/company that orders and pays for the advertisement is considered to be the secondary taxpayer. Secondary tax obligation does not arise if:

- the secondary taxpayers are in possession of a declaration from the primary taxpayers stating that they are the primary taxpayers and that they will fulfil their obligations under the regulation
- the primary taxpayers apply for a registration to the database of the Hungarian tax authority, stating that they are primary taxpayers and that they fulfil their obligations on time or they do not have advertisement tax payment obligation in the tax year because they will not exceed the HUF 100 million threshold, or
- the secondary taxpayers notify the tax authority with the name of the primary taxpayer and the value of the services and they are able to prove that they requested the declaration but have not received it.

Otherwise, the secondary taxpayer is subject to a tax equivalent to 5% of the value of the advertising fee (provided that the secondary taxpayer spends at least HUF 2.5 million in a month for advertisement services). In addition, such advertisement expense would not be a deductible CIT expense for the secondary taxpayer when filing its CIT return (in cases when such yearly spending exceeds HUF 30 million).

Local business taxes (LBTs)

All municipalities are entitled to LBTs. LBTs are deductible for Hungarian CIT purposes and are not normally treated as ‘income tax’ in the application of the tax treaties.

The LBT base is the net sales revenue reduced by the cost of goods sold, subcontractors’ work, the costs of materials, mediated services, and R&D costs. However, taxpayers are only allowed to deduct from the LBT base part of the cost of goods sold and part of the value of mediated services as calculated based on brackets determined in relation to their annual sales revenues. In the case of related parties, an aggregated LBT base has to be determined if the ratio of the sum of the cost of goods sold and mediated services to the net sales revenue exceeds 50%. This ratio has to be examined separately at the level of each company, and only those related party tax bases that meet the 50% condition have to be aggregated. The LBT is deductible by 10% of the direct costs accounted for in the relevant tax year relating to basic research, applied research, or experimental development.

General service fees, depreciation, and labour costs are typically not deductible for LBT purposes. In addition to expensing all toll fees paid abroad or in Hungary, 7.5% of the toll fees can also be deducted from the LBT. 100% of royalty, interest, or dividend income and the LBT base of a foreign PE of a Hungarian company are exempt from LBT.

The LBT rate may differ from municipality to municipality but is capped at 2% by law.

Innovation contribution

Companies defined as such in the Accounting Act, except for small and medium-sized enterprises and branches, are also subject to an innovation contribution. The tax base of the innovation contribution is the same as the LBT base. The tax rate is 0.3%.

Corporate residence

Corporations are residents for CIT purposes if they are incorporated in Hungary, although foreign corporations may also be deemed to be Hungarian residents for CIT purposes if their place of effective management is in Hungary. Tax residents also include the Hungarian trust asset (*see Hungarian trust in the Other issues section for further information*).

Foreign entities may carry out business through resident corporations or through branch offices (PEs for tax purposes). Commercial representative offices may be opened for auxiliary activities that do not create a taxable presence.

Permanent establishment (PE)

Hungary treats PEs as ‘distinct and separate enterprises’, and profit is attributed to a PE based on the principles set out in the Organisation for Economic Co-operation and Development (OECD) guidelines.

In the CIT Act, a PE is defined as fixed business premises (machinery or equipment) through which the entrepreneurial activity of an enterprise is partly or wholly carried on, regardless of the title of the taxpayer to those premises. A PE may consist of any of the following: a place of management; offices, including representative offices registered in Hungary; factories and workshops; and mines, crude oil or natural gas wells, quarries, or other places from which natural resources are extracted.

Construction sites (including assembly) and related supervisory activities constitute a PE if they last, in the aggregate, for at least three months in a calendar year. All activities carried out at the same construction site qualify together as a single PE, regardless of whether they are based on separate contracts or were ordered by different persons.

Hungary

Construction sites are defined as sites that represent a unit for economic, business, and geographical purposes.

PEs are also created by the direct utilisation of natural resources by a foreign person. A foreign person (except from real estate funds established in a European Economic Area [EEA] member state and not being subject to any tax that may be substituted for CIT) is deemed to have a PE in Hungary if it utilises natural resources or immovable property for consideration, including the alienation or capital contribution of any rights related to the immovable property or natural resources.

A non-resident enterprise is considered to have a PE with respect to activities undertaken on its behalf by another person if its agent is authorised to conclude contracts in Hungary on behalf of the non-resident entity and the agent regularly exercises this right or maintains a stock of goods and products from which it regularly makes deliveries in the name of the non-resident entity.

The insurance of risks occurring in Hungary and insured on behalf of the non-resident person by another person constitutes a PE of the foreign insurer, except for reinsurance activities.

Furthermore, as mentioned above, a foreign taxpayer must also be treated as having a PE if it has a Hungarian branch.

The definition of a PE does not include the following:

- Establishments used solely for the purpose of storing and presenting the goods or products of a non-resident person.
- The stockpiling of goods and products of a non-resident person solely for the purpose of storing, presenting, or processing by another person.
- Establishments used for collecting information, or purchasing goods and products, exclusively for the non-resident person.
- Establishments used for other activities of a preparatory or auxiliary nature.
- Activities of independent agents, provided they are acting in their ordinary course of business.

Note that a different definition of a PE is applicable for LBTs, and no definition is available for special taxes.

Other taxes

Value-added tax (VAT)

VAT is payable on sales of goods and the supply of services. VAT is also payable on the importation of goods, on the intra-Community acquisitions of goods, and on the purchase of certain services provided to Hungarian taxable persons by foreign taxable persons.

VAT rates

The general VAT rate is 27%.

A reduced VAT rate of 18% is applicable for some products (e.g. milk, certain dairy products, products made from cereals, flour, and starch). The 18% VAT rate is also applicable to commercial accommodation services and to services that grant admission to musical and dancing events.

A reduced VAT rate of 5% is available for new residential property, certain pharmaceutical products, audio books, printed books, newspapers, district heating

services, certain live performance activities, certain products of the animal sector (e.g. live and processed large animals, such as pig, sheep, goats, cattle).

Exempted, out of scope transactions

Certain services are exempt from VAT, including, but not limited to, medical, cultural, sporting, and educational services provided as public services. VAT exemption is also available for financial and insurance services. The intra-Community supplies of goods, services, and exports are also treated as exempt transactions.

Generally, the supply of a building or parts of a building, the land on which it stands, and the rental of real estate are VAT exempted. An option is available to apply VAT on the supply or rental of this real estate. VAT exemption cannot be applied to the supply of building plots.

There are some special transactions that may be out of scope of the Hungarian VAT, provided that special conditions are met. These include the acquisition of any contributions in kind, the acquisition of any assets by way of succession, and the transfer of business as a going concern.

Reverse-charge mechanism

A domestic reverse charge applies between Hungarian taxable persons for the following activities:

- Services related to immovable property (e.g. construction, maintenance).
- Sales of certain steel products.
- Sales of waste materials.
- Sales of carbon quotas.
- Sales of real estate and land if the application of VAT was chosen.
- Sales of certain agricultural products (e.g. maize, wheat, barley, rye).
- Leasing staff or making available personnel and the use of student-work placement offices.

VAT recovery

VAT deduction is available only for the business-related element of purchases that were made partially for non-business purposes.

If a taxpayer has a negative VAT balance in a VAT period, the amount can be recovered, provided that the VAT balance reaches or exceeds an absolute value of HUF 1 million for monthly filers, HUF 250,000 for quarterly filers, or HUF 50,000 for annual filers.

As a general rule, the deadline for remitting VAT reclaims is 75 days, irrespective of the amount concerned. However, if all incoming invoices, regarding which the VAT was deducted in the VAT return, are settled (paid fully to the suppliers) until the due date of the related VAT return, a 45-day deadline can be applied.

Directive for refunds of foreign taxable persons

Taxable persons with their establishment in a European Union (EU) country, other than Hungary, or in Switzerland or Lichtenstein, can recover local VAT. The refund applications have to be submitted electronically. Reclaim requests should be submitted to the tax authority of the country where the EU-registered taxable person is established.

Reporting obligations

All types of intra-Community transactions have to be reported in the periodic Intra-Community List in Hungary.

Taxpayers registered in Hungary have to submit domestic recapitulative statements about those transactions where the VAT amount reaches or exceeds HUF 1 million together with the basic data of the related business partner. In respect of the incoming

Hungary

invoices, those cases also have to be considered and included where the sum of the VAT on all transactions carried out by the same partner in a given VAT period reaches or exceeds HUF 1 million. Taxpayers liable to file the statement may opt to report their transactions even below this threshold to the tax authority. If a domestic recapitulative statement has to be prepared (i.e. there are transactions with a VAT amount higher than the referred threshold), the VAT return can only be submitted in electronic form.

An Electronic Road Freight Control System (EKAER) number needs to be requested from the tax authority for specific road shipments. The taxpayers who do not fulfil this reporting obligation can face serious consequences (e.g. the tax authority is entitled to levy a default penalty of up to 40% of the value of goods transported, and also to seize the goods).

Group taxation

The VAT Act allows all companies that have established business presences in Hungary and qualify as related enterprises to form a VAT group. The essence of a VAT group is that its members act under a single VAT number in their transactions (i.e. they issue invoices under a shared VAT number and submit a single, joint tax return) and the supplies of products and services between the members do not qualify as business transactions from a VAT perspective.

Customs duties

Hungarian customs legislation and policies have been fully harmonised with EU legislation.

As a general rule, the rate of the customs penalty is 100% of the customs duty shortfall.

The EU customs legislation is comprised of the following main regulations:

- Council Regulation 2913/92/EEC establishing the Community Customs Code.
- Council Regulation 2454/93/EEC laying down provisions for the implementation of Council Regulation 2913/92/EEC establishing the Community Customs Code.
- Council Regulation 1186/2009/EEC setting up a Community system of reliefs from customs duty.
- Council Regulation 2658/87/EEC on the tariff and statistical nomenclature and on the Common Customs Tariff.

Excise duties

The following goods are subject to excise duty:

- Mineral oils.
- Alcohol and alcoholic beverages. Any product with an alcohol content of 1.2% or more by volume qualifies as an alcohol product.
- Beers.
- Wines.
- Sparkling wines.
- Intermediate alcoholic products.
- Tobacco products.

As of 1 January 2016, the excise duty rates are as follows:

- Petroleum products: HUF 110,350 to HUF 124,200 per thousand litres or HUF 4,655 to HUF 116,000 per thousand kilograms, depending on the type of petroleum product.
- Alcohol products: HUF 333,385 per hectolitre of pure alcohol. Special rules are applicable to spirits manufactured in private distilleries and contract distillation.
- Beer: HUF 1,620 per alcohol degree and per hectolitre, HUF 810 per alcohol degree and per hectolitre for beer produced in a micro-brewery.

- Wines: HUF 0 for grape wines and for certain mixtures of grape wines and sparkling water; HUF 9,870 per hectolitre for wines made from other types of fruit.
- Sparkling wines: HUF 16,460 per hectolitre.
- Intermediate alcoholic products: HUF 25,520 per hectolitre.
- Cigarettes: HUF 15,700 per thousand cigarettes plus 25% of the retail sale price, but a minimum of HUF 28,000 per thousand cigarettes. The tax base per cigarette also depends on the length of the cigarette (without filter). It is double if the length of the cigarette is 8 cm to 11 cm, triple if the length is 11 cm to 14 cm, and so on.
- Cigars and cigarillos: 14% of the retail price, but a minimum of HUF 4,000 per thousand cigars or cigarillos.
- Fine-cut tobacco: HUF 14,000 per kilogram.
- Other tobacco: HUF 14,000 per kilogram.

The Customs Body of the National Tax and Customs Authority is responsible for excise duty (and municipal tax authorities for the excise duty of private distillers). The European Union's excise duty rules apply in Hungary.

Property and land taxes

Hungarian municipalities have the right to levy property tax and land tax at their own discretion until the below caps are reached.

Property tax

The owner of a building is subject to property tax liability annually on the first day of the calendar year.

The local government can determine the tax base in either of the following ways:

- The net floor space of the building expressed in square metres, with a maximum tax rate of HUF 1,100 per square metre.
- The adjusted market value of the building, with a maximum tax rate of 3.6% of the adjusted market value.

Land tax

The owner of land is subject to land tax liability annually on the first day of the calendar year. Undeveloped plots of land situated within the area of jurisdiction of a local government, including peripheries, are subject to this tax. The local government can determine the tax base in either of the following ways:

- The actual area of the plot expressed in square metres, with a maximum tax rate of HUF 200 per square metre.
- The adjusted market value of the plot, with a maximum tax rate of 3% of the adjusted market value.

Stamp duties

The most common types of stamp duty are gift duty and duty on transfers of property for consideration. Stamp duty is levied on movable and immovable property and property rights if they were acquired in Hungary, unless an international agreement rules otherwise.

Gift duty

Gift duty arises on the date when a contract concerning a gift is concluded.

Transfers of movable property, immovable property, and property rights without consideration are subject to gift duty. In these cases, however, gift duty is only incurred if the transaction was formally documented; except for movable property with a market value of more than HUF 150,000, where gift duty must be paid in any event.

Hungary

The base of gift duty is the net value of the gift, which is the market value minus any liabilities related to the gift. The general duty rates vary, depending on the type of property: 9% on residential property and 18% on other assets. In general, the transaction shall be reported to the state tax authority within 30 days.

Transfers of movable assets without consideration and acquisitions of claims without consideration, including waivers of claims and assumptions of debts, are exempt from gift duty, provided that the recipient is a company. However, this exemption only applies if in the country where the non-resident beneficiary is based, both the rate of the tax corresponding to the corporate tax and the rate of the tax on the sale of the shareholding are no less than 10%. The same conditions apply to the exemption of preferential exchange of shareholdings, preferential asset transfer, and transfer of assets between related parties.

Duty on transfer of property for consideration

The obligation to pay duty on the transfer of movable and immovable property for consideration arises on the date when the contract is concluded.

Transfer of real estate, property right, and the transfer of companies that own domestic real estate are subject to stamp duty. In this latter case, stamp duty only applies for acquisitions of direct or indirect participations (stocks, shares, co-operative shares, investor shares, converted investor shares) of at least 75% in a company that owns domestic real estate. For stamp duty purposes, a company that owns domestic real estate is a company (i) in which the book value of the domestic real estate represents at least 75% of the assets or (ii) that holds at least 75% of the shares of another company in which the book value of the domestic real estate represents at least 75% of the assets. Note that for classification purposes, liquid assets, receivables, prepaid expenses, and accrued income have to be disregarded when determining the 75% ratio. The stamp duty for the transfer of real estates and the transfer of companies that own domestic real estate is 4% up to HUF 1 billion and 2% of the amount exceeding HUF 1 billion, up to a maximum of HUF 200 million per real estate.

There are special rules for real estate trading companies and financial leasing service providers. Under certain circumstances, exemptions are available more generally.

Stamp duties are also levied on certain court procedures (e.g. Court of Registration) and on submissions to certain authorities (e.g. appeals to the tax authority). Stamp duty is, for instance, levied in an amount of:

- HUF 100,000 on the registration of a private stock company or a limited liability company
- HUF 600,000 on the registration of a European company
- HUF 100,000 on the registration of any other entity with legal personality (except from European companies)
- HUF 50,000 on the registration of a branch office, and
- HUF 50,000 on the registration of a representative office.

Registration tax

Registration tax is charged on passenger cars, motor homes, and motorcycles before they can be registered and put into service in Hungary. The registration tax is also payable by fleet operators. The duty is payable with the first domestic registration, import, intra-Community purchase, or in the case of a conversion.

The registration tax rate from 1 January 2016 is applied as follows:

- Passenger cars: HUF 45,000 to HUF 4.8 million, depending on the technical features of vehicles (cc, engine type) and environmental classification.
- Hybrid cars: HUF 76,000.

- Purely electrical vehicles, plug-in hybrid electrical vehicles, increased range plug-in hybrid electrical vehicles, and zero-emission vehicles: HUF 0.
- Motorcycles: HUF 20,000 to HUF 230,000, depending on technical features of the motorcycles (cc).

The registration tax is levied by the Customs Body of the National Tax and Customs Authority.

Mining royalty

Mineral resources and geothermal energy, at the places where they are found in nature, are state property and subject to concession.

The mining company must pay a mining royalty, based on the quantity of the mineral resources extracted under authority permit.

Employment-related tax and social security contributions payable by employers

The social tax base is the gross income paid to the employee. The tax rate is 27%.

The rate of training fund contribution on employment income is 1.5%. The tax base is the gross income paid to the employee.

Other non-income taxes

The following non-income taxes may also impact corporations in Hungary:

- Public health product tax.
- Environmental protection product fee.
- Environmental load charges.
- Energy tax.
- Food chain supervision fee.
- Telecommunication tax.
- Tax on financial transactions.
- Special tax on financial transactions.
- Insurance premium tax.
- Accident tax.

See the *Other taxes* section of *Hungary's Corporate tax summary* at www.pwc.com/taxsummaries for more information.

Branch income

Foreign companies may establish branch offices in Hungary. A branch office is an organisational unit of a foreign company without legal personality, vested with financial autonomy, and registered in the Hungarian companies register as a branch office of the foreign company. The provisions of the Hungarian Accounting Act apply to branch offices, which must prepare reports using double-entry bookkeeping. Statutory audits are obligatory, except for the branches of corporations whose registered office address is in the European Union.

A branch office is regarded as established when it has been entered into the companies register. A branch office may start operating once the application for registering the branch office has been submitted to the Court of Registration, provided that it indicates 'under registration' on its corporate correspondence. Until a branch has been registered, it cannot carry out any activities that are subject to official permission. A branch office is considered dissolved upon its removal from the companies register.

Hungary

Branch offices are treated as PEs for taxation purposes. They have to determine their tax base according to the general rules applicable to Hungarian companies. The profit for the year (calculated on the basis of the Hungarian accounting system and adjusted by specific provisions of the Corporate Tax and Dividend Tax Act or CDTA) is subject to CIT of 10% on the first HUF 500 million of the positive CIT base. The tax base above this limit is subject to 19% CIT. The definition of PE is similar to that in the tax treaties but somewhat broader. For treaty countries, the respective treaty definition applies.

A foreign company's CIT base is determined for all its domestic PEs (except for branches) collectively and for its branches separately. A branch should account for costs and revenues as if it were independent from its foreign parent company.

For a Hungarian PE, earnings before taxes are reduced by cumulated administrative costs incurred proportionately at the headquarters and any of its PEs, with the maximum proportion defined as the revenues of the PE compared to all revenues of the foreign company.

However, if there is a treaty between Hungary and the other country, the provisions of the treaty have priority over domestic law. Therefore, the provisions of the treaty have to be followed in the first instance, and all costs related to the activity of the branch have to be allocated to the branch, without the above restrictions in domestic law, and all profit realised with respect to the branch must also be allocated to the branch. The allocation method must be consistent from year to year, unless there is a good reason for changing it.

The foreign parent must continuously provide the assets and funds required for the operation of the branch office and the settlement of its liabilities. The employees of a branch office are in a legal relationship with the foreign company, and the foreign parent exercises employer's rights. A branch is considered to be related to its parent company/headquarters. Therefore, the prices used in inter-company transactions have to be at arm's length, and the transfer pricing documentation requirements have to be taken into consideration.

Income determination

The CIT base should be calculated by modifying the accounting pre-tax profit by adjustments and deductions as provided by the CDTA.

Inventory valuation

Inventories are generally valued at their historical cost unless their fair market value is significantly lower than their book value, in which case the fair market value should be recorded. Cost may be determined on the basis of first in first out (FIFO) or average cost.

Capital gains

Capital gains (losses) are treated as ordinary income (losses) for tax purposes. The gain on the sale of depreciable assets equals the sales revenue reduced by the net value of the asset for CIT purposes.

If a participation (of at least 10%) is registered within 75 days, or an intangible asset is registered within 60 days, of acquisition and held continuously for at least one year, capital gains from the sale or contribution in kind of the participation, or the intangible asset, are exempt from CIT in general. Any additional acquisitions in the case of a registered participation may also be registered, provided that the 10% participation was already registered.

Stock transactions

Shareholders of a real estate holding company are also subject to CIT on their income from the alienation of the shares in the real estate holding company. Transfers of direct or indirect participations in companies that own real estate may be subject to CIT.

Dividend income

Except in the case of controlled foreign companies (CFCs) (*see the Group taxation section*), dividends received and accounted for as income in the given tax year are tax-free.

Interest income

No specific provision exists in Hungary for interest income; consequently, interest income is taxable for CIT purposes.

Royalty income

50% of royalty income is deductible for CIT purposes, up to 50% of pre-tax profit. Royalties as revenues are derived from (i) permission for the exploitation of patents, from the industrial design of assets under industrial law, and from know-how; (ii) permission to use trademarks, business names, and business secrets; (iii) permission to use copyrights and similar rights attached to protected work; and (iv) transfers of the property described above (except for trademarks, business names, and business secrets).

Unrealised exchange gains/losses

Tax deferral may be chosen for unrealised exchange gains/losses.

Foreign income

Taxpayers resident in Hungary and foreign entrepreneurs must calculate their CIT base exclusive of any income that is subject to taxation abroad if so prescribed by an international treaty. In any other case, a foreign tax credit is available for income taxes paid abroad (*see Foreign tax credit in the Tax credits and incentives section for more information*).

In Hungary, there are no provisions under which income earned abroad may be tax deferred.

Deductions

In general, costs and expenses incurred in relation to the taxpayer’s income-generating business activity are deductible for CIT purposes.

Accrued expenses are recognised for taxation purposes in the tax year they affect.

Depreciation and amortisation

Accounting depreciation that is accounted as expenditure, and thus included in the accounting profit, should be added to the CIT base. Tax depreciation calculated according to the CDTA reduces the tax base, even if the tax depreciation is higher than the accounting depreciation. The tax depreciation of tangible assets should be calculated using the straight-line method on the basis of the historical value from the time when the asset was first used for business purposes.

Examples of tax depreciation rates include the following:

Assets	Depreciation rate (%)
Computers and other high-tech machinery	33 or 50
Vehicles	20
Other tangible assets	14.5

Hungary

Assets	Depreciation rate (%)
Buildings (long-life structure)	2
Rented buildings	5

Assets newly acquired since 2003 can be depreciated at 50% annually; these instruments include, among other items, machinery and intellectual property (IP).

Generally, there is no prescribed amortisation rate for intangibles; the historical value, the residual value, and the useful life should be considered. However, goodwill can be amortised at an annual rate of 10%, provided that the business of the taxable person is in line with its intended purpose and that depreciation of goodwill can also be recognised for accounting purposes. Additionally, extraordinary amortisation might also be recognised for CIT purposes.

In the case of transformations, specific amortisation rules apply.

Organisational and start-up expenses

Companies are not obligated to capitalise the costs of formation/reorganisation. The capitalisation of these costs is at the company's discretion, but the company should comply with its accounting policy. Furthermore, only the direct costs of formation/reorganisation that are not classified as investments or renovations and are likely to be recovered ultimately can be capitalised.

Interest expenses

Interest expenses are deductible if the following conditions are met:

- Interest incurs in relation to the company's profit generating activity.
- Thin capitalisation rules are fulfilled (*see Thin capitalisation in the Group taxation section*).
- Interest is not paid to a CFC.

Bad debt

Under the Accounting Act, bad debts are only deductible for CIT purposes if they are supported by legally valid third-party documents stating that the receivable cannot be collected. Expenses claimed that cannot be enforced in court and expired claims are not deductible for CIT purposes.

In addition to the above, 20% of eligible bad debts are deductible from the CIT base if the debt was not settled within 365 days from the due date.

Charitable contributions

Grants made or assets that are transferred without consideration, as well as liabilities assumed or services provided free of charge, will qualify as business expenses if the taxpayer has a declaration from the recipient stating that the recipient's profit will not be negative without the income received.

Grants will always qualify as non-business expenses if they are provided to a foreign person or foreign resident company.

In the case of film and sports (football, basketball, handball, ice-hockey, and water polo) sponsorship grants, the amount of support is deductible both from the CIT base (as an expense) and from the CIT amount, provided that an official sponsorship certificate is available.

Development reserve

50% of pre-tax profit may be assigned as development reserve. The maximum value of the reserve is HUF 500 million. In general, the period within which the development tax reserve can be released, consistently with the cost of investment, is four years.

Intellectual property (IP) reserve

There is a possibility to create an IP reserve from the profit derived from the sales or capital contribution of intangible assets that generate royalty income, deeming that income non-taxable. The IP reserve should be shown as part of the tied-up reserve in the companies' books. It may also be used to buy intangible assets that generate royalty income at the company within three years from its creation; otherwise, CIT and late payment penalty should be paid on the amount.

Tax base allowance regarding R&D

A tax base allowance is only applicable for R&D activities if the taxpayer carries out basic research, applied research, or experimental research activities within its own scope of activities.

'R&D activities carried out within the taxpayer's operations' shall mean R&D activities carried out:

- using the taxpayer's own assets and employees, at the taxpayer's risk and benefit
- R&D activities carried out by the taxpayer's employees using the taxpayer's own assets on behalf of others, or
- (joint) R&D activities carried out under an R&D agreement (e.g. cost sharing agreement).

The direct cost of the R&D activity or the amount of depreciation on the research activity (if the cost of R&D activity is capitalised) is deductible when calculating the pre-tax profit. Additionally, an extra deduction is granted from the tax bases in the form of a downward tax base adjustment.

300% of the direct costs of research activity (up to a maximum of HUF 50 million) are deductible from the tax base if the research activity is carried out jointly with a higher education institution, the Hungarian Academy of Sciences, or a research institute established by them.

The same deductibility rule is applicable if a cooperation agreement is concluded with a research institution operating either as a central budgetary organ or as a majority state-owned business organisation.

Taxpayers may also deduct from their CIT base the direct costs of R&D activity carried out with own assets and employees of their related parties if, based on the choice and the declaration of the related party, the deduction was not utilised on its side and the R&D also serves the business of the taxpayer who utilises the deduction.

Employee benefit expenses

Employee benefits and the fringe benefit tax payable on them are tax-deductible.

Bribes, 'kickbacks', other illegal payments

Bribes, 'kickbacks', and illegal payments are not recognised as business costs for CIT purposes and are non-deductible from the tax base.

Fines and penalties

Fines and penalties are not deductible for CIT purposes.

Hungary

Taxes

Taxes are usually deductible for CIT purposes, except for CIT, recoverable VAT, and the income tax of energy suppliers and public utility service providers.

Net operating losses

Losses can be carried forward according to the following:

Year the tax loss was generated	Period of utilisation
Before the tax year starting in 2014	Until the tax year including 31 December 2025
During the tax year starting in 2014	Until the tax year including 31 December 2025
During the tax years starting after 2014	During the following five tax years

In the case of acquisition or legal transformation, the company's tax losses carried forward cannot be utilised if:

- the majority of the company's shares are directly/indirectly acquired by an independent entity (an entity who was not one of the company's owners in the preceding two financial years)
- the activity of the company changes significantly in the two years following the transformation, or
- the successor company does not generate any revenue from at least one activity of the predecessor.

Losses carried forward may only be used to offset up to 50% of the tax base calculated without losses carried forward. However, as of 2015, losses carried forward and acquired by the successor company in the course of corporate transformation may be written off in a tax year only in proportion to the ratio of the sales or other revenues gained in the tax year in respect of the continued business activity and the average sales or other revenues gained by the predecessor company in the last three tax years preceding the transformation.

Note that earlier tax losses must be used first (FIFO principle), and the losses of predecessors are also deductible from the successor company's CIT base if the aforementioned conditions are met.

Losses cannot be carried back (except for agricultural companies, who may account deferred losses by self-revision or by correcting the amount of tax paid in the previous two tax years).

Payments to foreign affiliates

There is no general restriction on the deductibility of a consideration due to a foreign entity, provided the payment is a justifiable business cost. General anti-avoidance provisions (abuse of law, substance-over-form) may also result in non-deductibility. If the parties are considered to be related parties under the definition of the CDTA, the Hungarian tax office is entitled to adjust the Hungarian party's tax base to reflect the market price (arm's-length price) if the parties did not make the adjustment themselves.

Considerations due for services are only deductible if the actual performance of the services is supported and the Hungarian taxpayer can prove that it benefits from the service.

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity (*see Thin capitalisation in the Group taxation section*).

The consideration paid to a CFC is not deductible for CIT purposes unless the taxpayer is able to prove and keeps documentation that it serves the purposes of business operations. *For further details on the CFC rules, see the Group taxation section.*

Group taxation

Group taxation is not available for CIT purposes in Hungary. However, in the case of certain taxes (e.g. LBTs), an aggregated tax base has to be determined for related parties if certain conditions are met.

See *Value-added tax (VAT)* in the *Other taxes* section for a description of group taxation for VAT purposes.

Transfer pricing

If parties qualify as related parties (as defined in the Hungarian CDTA) and the price applied differs from the arm's-length price, the CIT base should be modified by a proper transfer pricing adjustment. In addition, the foreign PEs of a Hungarian company and the Hungarian head office also qualify as related entities and are subject to transfer pricing regulations.

Taxpayers are obligated to prepare transfer pricing documentation on intra-group transactions. The documentation has to be prepared for every contract between related parties (including in-kind contributions made at the time of establishment).

Transfer pricing documentation is not required to be prepared:

- For transactions between a resident taxpayer's PE and a related company if the resident taxpayer under the provisions of an international treaty adjusts the corporate tax base ensuring that it does not include the foreign taxable income.
- For transactions covered by an advanced pricing agreement (APA) issued by the state tax authority.
- If the consideration due for goods or services supplied by a third party is recharged in full to a related party.
- In the case of liquid assets transferred without consideration.
- If the aggregated value of the transaction does not exceed HUF 50 million during the tax year.
- In the case of individuals, small or micro enterprises, transactions conducted on the stock exchange, or at an officially set price.

When determining the transfer prices applied between related companies, in addition to the traditional methods (comparable uncontrolled price, resale-minus, and cost-plus methods), it is also possible to use the transactional net margin method and the profit-split method. In addition to these methods, companies may continue to use other methods if the traditional methods are inadequate.

Taxpayers are allowed to prepare two types of documentation: country-specific documentation or consolidated transfer pricing documentation. Taxpayers may prepare consolidated transfer pricing documentation if this does not jeopardise comparability, and the contracts:

- have the same subject matter and all their terms and conditions are identical or only slightly different or
- closely relate to each other.

Taxpayers are required to make a declaration in their CIT returns as to which type of documentation they choose.

Country-specific documentation must include the following:

- A functional analysis.
- Industry and company analyses.
- An economic analysis.

Hungary

- A financial analysis.
- An account of the process of selecting the transfer pricing methodology.

Consolidated transfer pricing documentation must consist of two main parts:

- The core documentation, which includes the standard data for each company within the group that is resident in any EU member state.
- Country-specific documentation, which describes the agreements between the taxpayer and its related parties.

The documentation has to be available no later than the filing deadline for the CIT return in any given year; otherwise, the tax authority may assess a default penalty of up to HUF 2 million for each case of missing or deficient documentation. In the case of a repeat offence, it is up to HUF 4 million for each missing or deficient documentation. For the repeated lack or deficiency of the same documentation, the penalty may go up to four times the original penalty levied. Note, however, that this documentation only has to be prepared and kept in the company's files, rather than being filed with the tax authority.

As per the CDTA, taxpayers are required to apply the interquartile range when determining and presenting the arm's-length nature of the transfer prices of their inter-company transactions if they meet all of the following conditions:

- The arm's-length price is determined by applying the resale minus, the cost plus, the transactional net margin, or the profit split method, or by other methods.
- The arm's-length price or range is determined based on information from databases that are publicly accessible or verifiable by the tax authority.
- The comparability analysis covers the data of at least ten comparable companies for at least three financial years or the sample range exceeds 15%.

The above provisions must first be applied for 2015 tax year documentation purposes.

Thin capitalisation

As a general thin capitalisation rule, interest payable is not a deductible expense for CIT purposes if the amount of a company's outstanding liabilities owed to non-financial institutions exceeds three times the value of the equity.

Debt means the average daily balance of outstanding loans, outstanding debt securities offered privately, bills payable (with the exception of bills payable to suppliers), and any other liability shown in the balance sheet that entails the payment of interest from the taxpayer's profit. Debt includes non-interest bearing loans as well.

Equity means the average daily balance of registered capital, capital reserve, accumulated profit reserve, and tied-up reserve. This means that revaluation reserves and current year profit and loss have to be disregarded when computing the equity for Hungarian thin capitalisation purposes.

Back-to-back arrangements are exempted from the thin capitalisation calculation.

Controlled foreign companies (CFCs)

CFCs are foreign persons or entities established abroad and/or foreign resident entities if, among other conditions, they are owned by a resident private individual/entity who is deemed to be the beneficial owner (i.e. has a certain ownership share or voting ratio or dominant influence in the enterprise) or if the majority of their income derives from Hungarian sources and, in both cases, the effective tax rate of the persons/entities is lower than 10%. If a foreign company's tax base is negative or zero and a multi-rate corporate tax system is in place in the given country, the lowest tax rate must be no less than 10% in order for an entity not to qualify as a CFC.

Certain exceptions may be available (for companies in EU member states, OECD member states, and treaty countries if a real economic presence can be proved). It is the taxpayer's obligation to provide proof on the (lack of) CFC status.

Tax credits and incentives

Foreign tax credit

Foreign tax credit is available for income taxes paid abroad, up to the Hungarian tax payable on the creditable income (at a maximum of 90% of income tax paid abroad).

The foreign income has to be classified by country of origin and revenue type. The deducted tax may not exceed the lesser of either the applicable foreign tax or the applicable tax based on the taxation treaty between Hungary and the given country.

If there is no taxation treaty, 90% of the tax payable abroad is credited against the tax liability, up to a hypothetical tax liability calculated by using the average Hungarian tax rate. Full tax credit is applicable if so described by a tax treaty. The average tax rate is the CIT rate, reduced by the applicable tax allowances, divided by the tax base. Indirect costs should be allocated in proportion to the revenue of the branch office to the total revenue of the whole company.

Development tax incentive

Each development tax incentive may be claimed for a ten-year period (beginning on the completion of the development) on the CIT returns over a maximum period of 14 years from the original application for the incentive. In any given tax year, the tax incentive is available for up to 80% of the tax payable but is limited, in total, to the state aid intensity ceiling.

Claiming the tax relief is subject to a government decree, based on authorisation by the European Commission, if the total amount of state aid required for the investment project exceeds the amount that can be provided at the same municipality for an investment project with eligible expenses exceeding 100 million euros (EUR). If the investment is below this threshold, taxpayers only need to notify the Ministry for National Economy before starting the investment. However, the beneficiary will also have to obtain prior consent of the European Commission if it has closed down the same or a similar activity in the European Economic Area in the two years preceding the aid application or intends to close down the same or a similar activity elsewhere in the European Economic Area in the two years after the completion of the investment.

Tax incentives are available for investments if:

- the net present value of the investment is at least HUF 3 billion or
- the net present value of the investment is at least HUF 1 billion in certain designated areas and provided that in the four years following the year in which the tax incentive is first used against the tax base:
 - the annual average number of employees has increased by at least 150 compared with either the year before the investment was made or the average number of employees for the three years preceding the investment (by 75 in certain designated areas) or
 - the annual wage costs have increased by 600 times the minimum wage effective on the first day of the tax year (by a multiple of 300 in certain designated areas) compared with either the annual wage costs of the year before the investment was commenced or the average annual wage cost for the three years preceding the investment.

Further incentives may be granted, provided certain criteria are met, to companies that invest:

Hungary

- at least HUF 100 million in equipment for zoogenic food production
- at least HUF 100 million in environmental protection projects (including energy efficiency)
- at least HUF 100 million in the production of films and videos
- at least HUF 100 million in basic research, applied research, and experimental development projects
- at least HUF 100 million in projects financed by an issue of stock market-quoted shares if (i) the project is started before the last day of the third calendar year following the date of issue, (ii) the total nominal value of the shares issued by the fifth year following the start of the project continuously reaches 50% of the value of the registered shares, (iii) the total issue price reaches 50% of the eligible costs, and (iv) at the date of the application for the incentive the company has at least 25 shareholders or at least 25% of the issued shares are owned by shareholders where each of them does not have more than 5% of the issued shares' nominal value
- at least HUF 500 million in projects initiated by small and medium-sized enterprises, or
- at least HUF 100 million in projects implemented and operated in a free entrepreneurship zone.

Tax incentives may also be granted for projects that create new jobs. The restrictions prescribed in the CDTA regarding the headcount of staff and the percentage of new entrants to the labour market that may be claimed for such investments have been abolished, although the conditions prescribed in the relevant decree must still be met.

In addition, the law stipulates that a taxpayer will be required to submit the details of the investment in their tax returns submitted for the tax year in which the investment is put into operation, including, in particular, the date of completion and the eligible expenses actually incurred at present value.

Regional aid map of Hungary

Large enterprises based in Budapest will not be eligible for tax incentives, while those in Pest County will only be able to claim tax incentives for projects aimed at starting a new economic activity in certain assisted areas (most assisted areas will have a 5% increase in their maximum aid intensities from 30% to 35%).

Aid intensities will decrease by 5% in the Western and Central Transdanubia regions (from 30% to 25% and from 40% to 35%, respectively).

In the Northern Hungary, Northern Great Plain, Southern Great Plain, and Southern Transdanubia regions, the maximum aid intensity will remain the same (50%).

Free entrepreneurship zone

The free entrepreneurship zone contains over 900 settlements in the unprivileged areas of Hungary designated by the government and coordinated by the regional business development agency that is comprised of individual regions, separated by public administration, borders, and topographical lot numbers, that are treated jointly for regional development purposes.

Tax Credit for Growth (TCG)

As of 25 June 2015, a new possibility to defer tax payment obligation was introduced into the CIT Act. The rules of the TCG entitle the taxpayer to pay the tax on that part of pre-tax profit that exceeds the quintuple of the pre-tax profit of the preceding year (tax falling on the credit for growth) in the following two fiscal years instead of paying it in the current year.

As a consequence, the TCG is, in practice, a deferral of the tax payment liability. The applicant is eligible for payment of the tax according to the TCG rules if: (i) it became subject to CIT at least in the year three years before the current year; (ii) during this

period it did not participate in any transformation, merger, or demerger; and (iii) it reports this choice to the tax authority by the deadline of the CIT top-up. Companies that choose to take advantage of the TCG are already entitled to waive payment of the tax falling on the credit for growth at the CIT top-up of the current year. A preferential rule is attached to the TCG: the amount of the tax falling on the credit for growth not yet due can be reduced if the taxpayer engages in fixed asset investment or increases its employee headcount in the two fiscal years following the choice.

Tax holidays

Tax holidays may be granted in relation to film and theatre subsidies, developments, and small and medium-sized entities (SMEs).

Other tax incentives

Film, performing arts, and spectator sports incentives

In Hungary, companies are encouraged to subsidise film production, performing arts, and spectator sports through the high rate of tax savings available. As sponsors, companies are able to achieve tax savings of up to 104.75% of the financial support they provide for film makers, performing artists, or sport clubs. Also, the option of allocating some of the payable CIT to support sports and culture is available. These two regimes are not applicable in parallel within the same tax year.

As of 2016, the total amount of donations for performing arts (including supplementary donations and donations in the frame of disposition of tax) shall not exceed 80% of the annual revenue of the association realised from sale of tickets in the European Economic Area in the prior year and it cannot exceed HUF 1.5 billion (previously only an 80% limit was applicable).

Tax incentive for SMEs

A tax incentive is available for SMEs (basically, those with a maximum of 250 employees; annual net revenue of a maximum of EUR 50 million; or a maximum annual balance sheet total of EUR 43 million). SMEs that take a loan from a financial institution for the acquisition or production of tangible assets may deduct 40% of the interest paid on the loan from their tax due and may deduct 60% of the interest paid on loans that have been taken since 1 January 2014, up to a maximum deduction of HUF 6 million. However, taxpayers engaged in certain business sectors cannot use this tax incentive (e.g. transportation, agricultural activity).

In order to be eligible for the above tax incentives, the wages and salaries need to be kept at a certain required level, according to relevant regulations.

Withholding taxes

Under the domestic rules, there is no WHT on dividends, interest, or royalties paid to entities.

Tax administration

Taxable period

CIT must be calculated by reference to the accounting year, which is either the calendar year or, for group companies, the group's accounting year.

Tax returns

Returns must be lodged by the last day of the fifth month following the last day of the accounting year (31 May for a calendar year taxpayer). The tax payable is determined by self-assessment.

Hungary

Tax returns may be submitted either electronically or in paper format. However, those who are legally obligated to submit monthly tax and contribution returns (e.g. employers and payers) may only submit tax returns electronically.

Payment of tax

CIT instalments must generally be reported and paid quarterly or monthly (above HUF 5 million tax payable). The final ('top-up') payment is due by the last day of the fifth month following the last day of the accounting year (31 May for a calendar year taxpayer). In the case of taxpayers with net sales revenues of over HUF 100 million, 100% of the expected final payment is due by the 20th day of the last month of the accounting year. However, a late payment penalty is only levied if the company fails to pay at least 90% of the expected final payment by the above deadline. The late payment penalty is 20% of the difference between the tax advances paid (including the top-up payment) and 90% of the actual CIT liability.

Tax audit process

Generally, the tax authority selects the taxpayers subject to tax audit based on certain criteria, which are communicated to the public, and an elaborate risk assessment model. Tax audits can vary in the following ways: the tax authority can (i) re-audit tax returns, (ii) monitor the redemption of government guarantees, (iii) audit the fulfilment of certain tax obligations, (iv) gather data and information, (v) monitor compliance with duty payment obligations, or (vi) re-audit previously audited tax periods.

A tax audit period can cover any years that are not lapsed (five years after the last day of the calendar year in which the taxes should have been declared or reported, or paid in the absence of a tax return or declaration) or not closed by a re-audit of tax returns. The tax audit starts when a company receives the notice of audit and finishes when that company receives the report containing the tax authority's findings. The deadline for the completion of the tax audit is between 30 and 90 days, although, in special cases (e.g. related tax audit, request for assistance from foreign tax authorities), it can last over a year.

Once the tax authority has completed the audit process, it issues its minutes. The minutes detail all the findings of facts of the audit and serves as the background of the tax assessment, and the basis on which the tax authority will pass its first-instance resolution. Upon receipt of the minutes, the taxpayer has the opportunity to submit its remarks to the minutes and raise any disagreement with the findings of the audit.

In case of a dispute, the tax assessment of the tax authority may be appealed and challenged before the second-instance tax authority, which has the right to annul the first-instance resolution and decide on the merits of the case, or to instruct the first-instance tax authority to carry out a new audit if the facts and circumstances have not been appropriately and fully developed.

The decision of the second-instance tax authority is final and binding. Following the receipt of this decision, the company may appeal to the court. The court may uphold, amend, or annul the Resolution of Second Instance and, if it is necessary, may order a new process in relation to the tax audit.

The superior tax authority or the minister in charge of taxation (minister appointed for the supervision of the tax authority, i.e. Minister of Ministry for National Economy in Hungary) may take regulatory action on request by the taxpayer. The superior tax authority or the minister can also amend or annul the unlawful resolution, and, if it is necessary, a new procedure can be ordered.

Statute of limitations

In general, the statute of limitations is five years from the end of the calendar year in which the tax return should be filed. Self-revision interrupts the term of limitation.

Topics of focus for tax authorities

The tax authority will take more stringent measures against 'aggressive tax planning' (tax planning that takes advantage of unintended administrative or legal loopholes) using its international experience and cooperation agreements.

Generally, the following categories of taxpayers may expect to be scheduled for tax audits:

- Taxpayers whose records show frequent changes in registered address or ownership.
- Businesses that have operated for several years with substantial loans from their shareholders.
- Taxpayers that declared significant amounts of payable and deductible VAT during their pre-company period.
- Taxpayers that have been in continuous operation despite continuing losses.
- Taxpayers that spend a significant portion of their sales revenues on services.
- Taxpayers that have significant tax base decreasing items, tax allowances, and subsidies related to investments.
- Taxpayers that deduct R&D expenses.

The tax authority will also pay more attention to the actual content of transactions conducted between related parties and to the methods companies use to determine the arm's-length price.

Special taxpayer categories

As of 1 January 2016, two special taxpayer categories were introduced with different legal consequences. 'Reliable' taxpayers receive benefits, while 'risky' taxpayers fall under stricter rules.

Reliable taxpayer

The tax authority classifies a taxpayer as 'reliable' if all criteria defined are met, including:

- at least three years of continuous operation (or being VAT-registered)
- no more than HUF 500,000 net tax debt, and
- not being classified as a risky taxpayer.

Further conditions are that in the year in question and in the preceding five years:

- the tax difference on the taxpayer's expense should not be more than 3% of the total calculated tax liability of the year in question
- the taxpayer is not under foreclosure procedure
- the taxpayer is not under bankruptcy or under liquidation procedure, forced cancellation, or enhanced regulatory supervision by the tax authority, and
- the taxpayer's tax number is not under suspension or cancellation procedure.

Furthermore, the taxpayer cannot be classified as reliable if the sum of the default penalties in the previous two years before the year in question is more than 1% of the total calculated tax liability of the year in question.

Risky taxpayer

The tax authority classifies as 'risky' those taxpayers that are not under liquidation or forced cancellation, but are publicly listed due to a high tax deficit, tax debt, or employing an unreported workforce, or if the tax authority has had to apply business closure measures against the taxpayer repeatedly within a year. The classification of a risky taxpayer lasts for one year, but will be cancelled in the subsequent quarter if the taxpayer settles its tax deficit or the tax debt and the related penalty and default.

Other issues

Principal forms of doing business

- Branch.
- Partnership.
- Limited liability company.
- Private company limited by shares.
- Public company limited by shares.

Mergers and acquisitions (M&A) from a business and tax perspective

Mergers in Hungary are tax-free transformations if they qualify under the definition of preferential transformation. Preferential transformation means that a company, without going into liquidation, transfers all its assets and liabilities to another company in exchange for the issue to its shareholders of securities representing the capital of that other company, and a cash payment not exceeding 10% of the nominal value, or, in the absence of a nominal value, of the accounting par value of those securities.

In a preferential transformation, the predecessor company does not have to amend its tax base by the difference between the adjusted book value and the book value. The adjusted book value means the historical value of assets less any depreciation deducted from the tax base plus the readjusted amount of extraordinary depreciation. Furthermore, for shareholders, the income accounted in excess of the historical value of the shares they acquire in the preferential transformation is also not taxable for CIT purposes for as long as the shareholder holds its participation.

In any other case, if two companies merge, the difference between the market value and the book value of the assets and liabilities is taxable for the successor company. Furthermore, the predecessor company may decrease its tax base by the amount of the difference between the adjusted book value of its assets and their book value if the adjusted book value is the higher of the two. The company will increase its tax base if the book value is higher than the adjusted book value.

International Financial Reporting Standards (IFRS) adoption

Companies defined in Section 4 of Decision no. 1606/2002/EC (mainly companies listed on the stock exchange) have to prepare their consolidated annual reports according to IFRS. However, non-listed subsidiaries of EU-listed entities are exempt from the preparation of IFRS consolidated financial statements.

As of 1 January 2016, it is possible for Hungarian entities to prepare their financial statements according to the rules of IFRS. In Hungary, IFRS will be adopted in a multi-stage procedure. From 1 January 2017, the transition to IFRS will be obligatory for credit institutions, financial enterprises, and listed companies. From 1 January 2018, the adoption of IFRS is mandatory for cooperative credit institutions and other credit institutions taking part in the integration of cooperative credit institutions and smaller credit institutions. The companies applying IFRS for stand-alone purposes will have to base their tax liability calculations (e.g. CIT, LBT, and energy suppliers' income tax) on IFRS as well.

Foreign Account Tax Compliance Act (FATCA) agreement with the United States (US)

Hungary and the United States signed an intergovernmental agreement (IGA) on 4 February 2014 in order to implement the US FATCA. The Hungarian IGA is based on the 'Model 1 A' Agreement, which means a reciprocal information exchange between the Hungarian tax authority and the US Internal Revenue Service (IRS). As part of the negotiations regarding the IGA, Hungary can include further entities and accounts into Annex II of the Agreement with exempted or deemed-compliant status compared to the

originally issued Model Agreement. Changes to the local legislation for FATCA and IGA purposes are currently in the process of being adopted by the Hungarian Parliament.

Hungarian trust

Under a Hungarian trust contract, the settlor entrusts the trustee to manage (in its own name but for the benefit for the beneficiary) the assets, rights, and receivables (trust asset) transformed thereto by the settlor. A trust contract cannot have a term longer than 50 years.

The trustee can be either a natural person or a legal entity, and its private fortune is handled separately from the trust asset/fortune. The trustee is liable for the tax administration (tax number, tax returns, etc.) and the bookkeeping of the trust. The Hungarian National Bank keeps an authentic registry of the Hungarian trustees.

The trust asset is subject to Hungarian CIT and LBT and is considered to be tax resident under domestic law (thus, may have access to treaty benefits).

The Hungarian trust is a good business opportunity for companies since it may be inserted into a structure tax neutrally.

Significant developments

Value-added tax (VAT)

As of 1 January 2016, various tourism related activities, which were previously exempt from VAT, will be subject to VAT at the reduced rate.

Taxes on corporate income

Resident corporations pay tax on their worldwide income less operating expenses. Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income.

Corporate income tax (CIT) for limited liability companies (LLCs) and limited partnership companies is assessed at a rate of 20%. CIT for other types of legal entities (e.g. partnerships) is assessed at a rate of 36%.

Non-resident corporations receiving payments for services or business operations carried out in Iceland, as well as corporations operating a permanent establishment (PE) in Iceland or receiving a profit from such establishments, are subject to CIT for their Icelandic income at the same rate as applies to resident corporations.

Corporate residence

In general, all corporations incorporated and registered in Iceland are considered to be tax residents in Iceland. The same applies to corporations that have their home address in Iceland according to their articles of association or if the management of the company is carried out in Iceland.

Foreign corporations are regarded as Icelandic tax residents if the effective management is carried out in Iceland.

The Internal Revenue Directorate can decide with a ruling whether a corporation's residence is in Iceland. The ruling can be appealed to a court of law.

Permanent establishment (PE)

Apart from the above mentioned, when defining whether a business activity in Iceland constitutes a PE, definitions in tax treaties are taken into consideration as well as commentaries to the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Other taxes

Value-added tax (VAT)

VAT is a consumption tax levied on all stages of domestic business transactions. VAT is levied on all goods and services, as well as on the imports of goods and services, unless specific exemptions apply.

VAT rates

The general VAT rate is 24%.

The following goods and services are subject to a reduced VAT rate of 11%:

- Rental of hotel and guest rooms and other accommodation.
- Transportation of passengers, such as for whale watching, horseback riding, and snowmobile tours.
- The services of travel agencies and tour operators for services used in Iceland.
- Admission fees to spas, saunas, sanatoriums, and health facilities.
- Subscription to radio and television.
- Newspapers, periodicals, and magazines.
- Books, both Icelandic and translated, musical notation as well as their audio recordings. Same applies to compact discs and other similar media as well as electronic media.
- Geothermal hot water, electricity, and fuel oils used for heating houses and swimming pools.
- Food and other consumables for people as detailed in an addendum to the VAT Act.
- Access to roads and other transport related constructions.
- Compact discs, records, audio cassettes, and other equivalent mediums for music only and not videos. Same applies to electronically published music without video.
- Condoms.
- Reusable cloth diapers and diapers inserts.
- Guiding services.

Certain services and goods are zero-rated, which means that there is, in fact, no VAT charge. Zero-rated VAT mainly applies to exported goods and services provided abroad.

VAT entities

Businesses engaged in the trade of taxable goods and services for business purposes must register and collect VAT.

Services exempt from VAT

The VAT Act details certain services that are exempt from the tax, such as healthcare services, social services, the operation of schools, various education services, cultural activities, athletic activities, public transportation, postal services, sale of real estate (not including the rental of hotel and guest accommodation), rental of car parking lot, insurance activities, services of financial banks (as well as securities trading), lotteries and betting pools, artistic activities, funeral services, and all services of ministers of the church.

Those selling taxable goods and services totalling less than 1 million Icelandic króna (ISK) per 12-month period are also exempt from collecting and remitting VAT.

Agent for non-resident parties

Non-residents who are engaged in taxable transactions in Iceland but are neither domiciled nor have permanent residence in Iceland must appoint a VAT agent with residence in Iceland to report on their behalf. Both parties are liable for the VAT payments (responsible for ensuring remittance of VAT). If a non-resident does not appoint a VAT agent, the purchaser of the services/goods is responsible for paying the VAT (reverse charge).

Iceland

VAT accounting periods and due dates

VAT is generally filed and paid on a bimonthly basis. The due date for payment of VAT is one month and five days after the end of the settlement period. For example, the due date for the January and February payments is 5 April.

If the VAT is not paid on the due date, a 1% penalty charge is added for every day up to a total of 10%. Late penalty interests also apply.

VAT reimbursement

Foreign enterprises, which are neither residents of Iceland nor have a PE, may obtain reimbursement of VAT paid on goods and taxable services that have been purchased or imported for the commercial purposes of such enterprises in Iceland.

Such reimbursement can be effected to foreign enterprises that would be subject to registration in Iceland according to Article 5 and Article 6 of the VAT Act if the enterprises in question were engaged in such business in Iceland. This means that such enterprises as travel agencies, insurance companies, banks, and other financial institutions cannot obtain such reimbursement.

Another prerequisite is that the enterprise shall neither have sold goods nor taxable services in Iceland during the period to which the application refers.

Parties domiciled abroad can get partial VAT reimbursement on goods they have bought in Iceland if they take them abroad with them within three months from the date of purchase. They then must provide the goods, along with any necessary documents, to the appropriate reimbursement company or to the customs authorities on the date of departure, and the purchase price must amount to at least ISK 6,000.

Customs duties

The Directorate of Customs controls import, transit, and export and also collects duties, taxes, and various state revenue. The general rule is that import duties (customs, excise duties, VAT, and various other charges) are to be paid on imported goods unless otherwise stated in the law. For import of some products, other conditions, such as an import licence, may need to be submitted.

Iceland, Liechtenstein, Norway, and Switzerland are members of the European Free Trade Association (EFTA). The EFTA Convention established a free trade area among its member states. In addition, the EFTA states have jointly concluded free trade agreements with a number of countries in Central and Eastern Europe as well as in the Mediterranean region, Mexico, and Singapore. Also, the EFTA states entered into the Agreement on the European Economic Area (EEA) in 1992. The current contracting parties are, in addition to the three EFTA states, the European Community (EC) and the 25 EC member states. Iceland also has a bilateral agreement with its two neighbouring countries, Greenland and Faeroe Islands.

Excise tax

The general Icelandic excise tax has been abolished as of 1 January 2015.

Property taxes

A municipal property tax is applied annually on the assessed value of real estate in Iceland.

Stamp taxes

Stamp duty is levied on documents regarding change of ownership of real estate and land and ships registered in Iceland. However, stamp duty is not applicable when the change of ownership is related to a merger or division of a company.

The stamp duty rate is 0.8% and 1.6%, depending on whether the rightful owner is an individual or a legal entity.

When issuing deeds and purchase agreements of real estate and land, the stamp duty is levied on the officially registered value of the real estate and land. The same applies to the deeds and purchase agreements of ships.

All other documents bear no stamp duty.

Turnover taxes

There is an agricultural charge of 1.2% of agricultural turnover.

Payroll taxes

Social security contributions

Employers are responsible for social security contribution. The general rate is 7.35%. An additional social security contribution for fishermen is 0.65%. The social security contribution for taxpayers who have submitted the A1 form is 0.425%.

Pension contributions

The minimum contribution by employers into their employees' pension fund is 8% of each employee's salary. An employer's additional contribution into private pension funds is 2% against a maximum 4% contribution from the employee.

Rehabilitation fund

Employers must pay 0.1% of all salaries to VIRK, The Icelandic Rehabilitation Fund.

Taxes on natural resources

Carbon tax

A carbon tax for liquid fossil fuels is paid to the treasury. Liquid fossil fuels are gas and diesel oils, petrol, aircraft and jet fuels, and fuel oils. All importers of fossil fuels are liable for the carbon tax regardless of whether it is for retail or personal use. The tax rate is:

- ISK 6.00 per litre of gas and diesel oils.
- ISK 5.25 per litre of petrol.
- ISK 6.60 per kilo of mineral oil gas and other carbohydrate gases.
- ISK 7.40 per kilo of fuel oil.

Tax on electricity/hot water

A special tax is collected from parties that sell electricity and/or hot water to end users.

Carbohydrate tax

Corporations licensed for carbohydrate research, and/or processing, as well as anyone who directly or indirectly participates in the processing or distribution of carbohydrates, must pay a processing tax, which is independent of processing performance, and a carbohydrate tax on profits.

Bank taxes

Financial services permitted to operate as banks and savings banks are subject to 0.376% tax on total debt exceeding ISK 50 billion at year-end.

Financial Activities Tax (FAT)

A 5.5% tax is levied on all salary payments made by financial institutions, including insurance companies. The tax is collected monthly.

Iceland

An addition to FAT

In assessment year 2016, an addition of 6% to FAT will be levied and collected on total salary payments in excess of ISK 1 billion. This tax is paid by the same entities that are subject to the general FAT.

Accommodation tax

Those who sell accommodation that is subject to VAT are liable to collect and return a tax of ISK 100 for each sold night.

National Broadcasting Fee

There is a National Broadcasting Fee of ISK 16,400 per year.

Branch income

A branch is treated as an extension of a trading activity of the overseas parent company incorporated in another jurisdiction and is not a separate legal entity.

Due to the fact that a branch acts in the name of the overseas parent company, a branch's income is taxable in accordance with the parent company (i.e. if the parent company is an LLC, the branch is subject to a CIT rate of 20%).

Tax treaties may allow Icelandic CIT as a credit against foreign income tax imposed on the parent company.

There is no branch profits remittance tax on the repatriation of profits to the parent company.

Income determination

Inventory valuation

The valuation method of raw materials and finished goods is on a first in first out (FIFO) basis or via the average cost method. When computing the value of produced goods, both direct and indirect production cost must be taken into account. For tax purposes, inventories can be further written down at a rate of 5% of calculated value.

Last in first out (LIFO) is not permitted.

Capital gains

Capital gains are treated as taxable income in the year that transfer of ownership occurs and, as such, taxed as part of the general corporate income. Capital gains are generally not subject to withholding tax (WHT). There are rules that allow full deduction of net capital gains from the sale of shares, so, in general, corporations are not subject to taxation on capital gains from sale of shares.

Dividend income

Dividend income is treated as taxable income and taxed as a part of corporate income. There are extensive rules that allow full deduction of the dividend, so, in general, corporations are not subject to taxation on dividends. Dividends are subject to WHT (currently 20%), which is a temporary payment towards the final tax assessment.

Interest income

Interest income derived from bank deposits, mutual and investment funds, bonds, or other financial deeds; any kind of exchange rate profit; and any other income from monetary assets are subject to 20% tax.

Interest income of foreign parties is subject to 10% WHT in Iceland.

Profit from derivatives

Profits from derivatives, which were previously treated as interest income, are now treated as profits/losses from sales and are subject to 20% tax. Losses from derivatives can be used against profits from derivatives within the calendar year, which was not possible when profit was treated as interest income.

Foreign income

Income earned abroad is generally taxed as a part of corporate income since a resident company is subject to CIT on its worldwide income.

Controlled foreign company (CFC) rules stipulate that profits of companies in low-tax jurisdictions must pay income tax of such a profit in direct proportion to shares, regardless of distribution. A low-tax jurisdiction is defined as a jurisdiction where the CIT rate is less than two-thirds of Iceland's CIT rate (i.e. 13.3%, being two-thirds of 20%). *See Controlled foreign companies (CFCs) in the Group taxation section for more information.*

Double taxation of foreign income is avoided either through tax treaties or domestic tax provisions.

I

Deductions

Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income (e.g. interest expense, employee expense, travel expense, insurance expense).

Depreciation

Assets	Depreciation rate (%)
Ships, ship equipment, and personal vehicles	10 to 20*
Aircraft and accessories	10 to 20*
Heavy machinery, industrial machinery, and equipment	10 to 30*
Rigs, pipeline systems, and more for the use of research and production of hydrocarbons	10 to 30*
Office equipment	20 to 35
Machinery, equipment, and vehicles that are not covered in the above categories	20 to 35
Residential, commercial, and office accommodation	1 to 3
Factory buildings, garages, warehouses, etc.	3 to 6
Greenhouses, piers, and lots connected to these assets	6 to 8
Boreholes, powerlines, and temporary work camps	7.5 to 10
Purchased proprietary rights for ideas and trademarks, such as copyrights, publishing rights, information rights, patents, and logos	15 to 20
Purchased goodwill	10 to 20

* The depreciation base for these assets is their purchase value less earlier depreciations (book value).

The method used to calculate depreciation is the straight-line method.

Goodwill

Purchased goodwill can be written down at 10% to 20% per year.

Start-up expenses

Purchased fishing rights (quotas) cannot be depreciated.

Iceland

Start-up costs for agricultural production rights can be depreciated without revaluation over five consecutive years. The following assets can be depreciated in full in the year they are initiated or paid with steady payments over five years:

- Start-up costs, such as enterprise registration and obtaining operation licences.
- Cost of research, developments, marketing, and obtaining patents and trademarks. If the use of individual assets does not fall into the same depreciation category, the depreciation base will be dependent on how much of it is used, so that if an asset is used for three-quarters or more for the same operation, the whole asset will have the same depreciation percentage.

Interest expenses

Interest expenses are deductible, provided that the loan was taken for business purposes.

Bad debt

As a general rule, 5% of bad debt can be written off. Certain conditions must be met in order to write off a higher percentage of bad debts.

Charitable contributions

Charitable contributions at up to 0.5% of total income are deductible.

Pension expenses

Payments to obligatory pension funds for employees at a minimum of 8% of wages are deductible.

Fines and penalties

Fines and penalties are not deductible.

Taxes

Taxes levied on business profit are not considered to be deductible; consequently, CIT is not deductible. However, social security contributions and other labour taxes are deductible.

Net operating losses

Operating losses may be deducted from income from business and independent economic activity. Tax losses can be carried forward for ten years and utilised over ten years from the year that the loss was incurred.

No carryback of losses is allowed.

Payments to foreign affiliates

An Icelandic corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm's-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction on the condition that the loan terms are comparable to those that would have been agreed upon by unrelated parties.

Group taxation

Companies may opt for consolidated taxation if a company owns at least a 90% share in another company. Consolidated taxation means, among other things, that losses of one company can be offset against profits of other companies. Consolidated taxation cannot be extended to non-resident companies or PEs of foreign companies.

Transfer pricing

When pricing or terms of business or financial arrangements between related parties are different from what might be expected to be in similar transactions between unrelated parties, tax authorities have the power to evaluate what the correct pricing should be and reassess taxes of the party in question. This applies to the general purchase and sale of goods and services, tangible and intangible assets, and any financial instruments. Tax authorities can reassess taxes for up to six years prior to the year in which the reassessment takes place.

Legal entities are considered related when they are part of a group, when they are under the direct and/or indirect majority ownership or management control of two or more legal entities within the group, when majority ownership of one legal entity over another is present in a direct or indirect manner, or when they are entities directly or indirectly majority owned or under the administrative control of individuals who have family ties (e.g. individuals in a marriage or registered partnership, siblings and persons related to each other in a direct line).

If a legal entity's operating revenues in one fiscal year, or total assets at the beginning or at the end of the fiscal year, exceeds ISK 1 billion, it is bound to documentation duties from the next fiscal year regarding transactions with related legal entities abroad. The legal entity in question must then record information about the nature and extent of transactions with the related legal entity and information on what the price is based on.

The legal entity is obligated to keep data regarding transactions with related legal entities for seven years. If the tax authorities request access to documentation, the legal entity has 45 days to respond.

In addition to specific rules regarding transfer pricing in domestic law, it should be noted that there are also certain provisions in domestic law that contain the so-called 'arm's-length principle', which states that when a deal or transaction between the parties significantly differs from the norm in such transactions, the tax base can be determined and reassessed according to what the tax authorities consider to be normal in such circumstances.

Thin capitalisation

There are no specific rules regarding thin capitalisation in Iceland, but anti-avoidance principles can be applied (*see Transfer pricing above*).

Controlled foreign companies (CFCs)

Any individual who either directly or indirectly owns a share in any kind of a company, fund, or organisation domiciled in a low-tax jurisdiction must pay income tax on the profit of such corporations in direct proportion to one's own share, regardless of distribution.

The same applies to taxpayers chairing companies, funds, organisations, or associations in a low-tax jurisdiction from which they receive direct or indirect benefits. In order for the above to apply, the foreign party must be domiciled in the low-tax jurisdiction, half the ownership of the foreign party must be directly or indirectly in the hands of Icelandic taxpayers, or they must have effective management and executive control within the income year.

CFC regulations do not apply if a fund or an organisation is protected by a double taxation treaty (DTT) between Iceland and the low-tax country or if such entities are registered in another EEA member country where they have legitimate business operations and the countries have assigned a DTT between them.

Tax credits and incentives

Foreign tax credit

The Income Tax Act offers a foreign tax credit to mitigate the potential for double taxation. The credit applies only to taxes of a nature similar to the tax being reduced by the credit (i.e. taxes based on income). This credit is limited to the amount of tax attributable to foreign-source income.

Temporary Reimbursements in Respect of Filmmaking in Iceland

On account of Act No. 43/1999 on Temporary Reimbursement in Respect of Filmmaking in Iceland, it is possible to have 20% of production expenses incurred in the production of films or television material in Iceland reimbursed. When more than 80% of the total production cost of a motion picture or television programme is incurred in Iceland, the reimbursement shall be calculated from the total production cost incurred within the EEA. Production costs refer to all costs incurred in Iceland deductible from the revenues of enterprises pursuant to the provisions of the Income Tax Act. Payments pertaining to employees and contractors are only to be included in production costs if they are verifiably taxable in Iceland.

Application for reimbursement of production costs shall be submitted to the Ministry of Industry. The application, with supporting documentation, shall be submitted before production commences in Iceland.

In assessing whether a proportion of the production costs of a motion picture or television programme shall be reimbursed, the following conditions must be fulfilled:

- The production shall be suitable for promoting Icelandic culture and the history and nature of Iceland.
- The production shall be suitable for enhancing the experience, knowledge, and artistic ambition of the parties involved. A specific company shall be established in Iceland for the production; an Icelandic branch or agency of a company registered in another member state of the EEA shall be considered a specific company.
- Information about the subject of the production or programme shall be made available.
- An itemised estimate of the production costs and sources of funding shall be made available, together with confirmation by the funding parties and a declaration by the applicant to the effect that the production conforms to the aims of the Act.
- Information about the content of the proposed production of a motion picture or a television programme shall be made available, such as a script and information about filming locations.
- A statement shall be made available to the effect that the material to be produced is intended for general distribution to cinemas or television stations.
- The subject matter of the film or television programming should not violate the provisions of law relating to film inspection and the ban on violent films, nor the provisions of the General Penal Code concerning pornography.
- A confirmation that all taxes and debts in Iceland have been paid.

Act No. 43/1999 on Temporary Reimbursements in Respect of Filmmaking in Iceland expires at year-end 2016. All projects approved by that date will be reimbursed in accordance with the law.

Research and development (R&D)

Innovative companies are entitled to a special deduction from CIT amounting to 20% of expenses incurred on the projects, provided certain conditions are met.

The maximum amount on which the deduction is calculated within each company shall not exceed ISK 100 million for each operating year. In the case of purchased R&D services, maximum expenses shall not exceed ISK 150 million.

Withholding taxes

Dividends paid to a resident company are subject to 20% WHT. Dividends paid to a non-resident company are subject to 18% WHT. The final taxation of dividends paid to a company within the EEA is nil, as WHT will be reimbursed in the year following payment upon filing a tax return.

Interest paid to a resident company is subject to 20% WHT, and interest paid to a non-resident company is subject to 10% WHT.

Gross royalties paid to a non-resident are taxable at the standard 20% CIT rate and subject to withholding.

Notes

1. The lower rate applies to corporate shareholders with a minimum ownership of 10%.
2. The lower rate applies to corporate shareholders with a minimum ownership of 25%.
3. The lower rate applies to copyright royalties (except films, etc.) and royalties for computer software or patent, or for information concerning industrial, commercial, or scientific experience (except information provided in connection with a rental or franchise agreement).
4. The lower rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
5. The lower rate applies to the right to use computer software or patent concerning industrial, commercial, or scientific experience.
6. The lower rate applies to corporate shareholders with a minimum ownership of 10%, and which has been held for a period of at least 12 months preceding the date the dividends were declared.
7. The lower rate applies to Russian corporate shareholders with a minimum ownership of 25% of capital in the Icelandic company and the foreign capital invested exceeds 100,000 United States dollars (USD).
8. The higher rate applies to royalties for the use of trademarks, know-how in relation to a trademark, and films, etc.
9. The higher rate applies to royalties for the use of or the right to use any patent, trademark, design or model, plan, secret formula, or process.

Tax administration

Taxable period

The tax year is the calendar year. However, in certain circumstances and upon application, the Internal Revenue Directorate can allow a different fiscal year from the calendar year.

Tax returns

At the beginning of every year, the Internal Revenue Directorate determines the time limit for taxpayers to submit their tax returns and supporting documentation. The deadline for receipt of tax returns from corporations is generally 31 May each year. This deadline is extended upon application. Those who have their tax returns prepared by professional services can generally have the deadline extended until 10 September each year.

The final assessment must be completed no later than ten months after the end of the income year. Tax assessments for corporations will be available at the end of October.

Payment of tax

Advance tax payments are due on the first day of every month, except January and October. Corporations pay income tax in advance, which is in turn deducted from the final tax assessment in October each year. The advance tax is collected in the months of February to September and amounts to 8.5% of the income tax on each due date. In total, the advance tax payments amount to 68% of the income tax. Any deficit remaining when final tax is assessed must be paid in equal instalments by 1 November and 1 December.

Income tax payments on dividends and interest income are due every quarter. Due dates in 2016 are 20 April, 20 July, 20 October, and 20 January (2017), and the final deadline for payment is 15 days later.

Tax audit process

The Icelandic tax authorities select returns for examination using a variety of methods. Some returns are selected based on electronic selection; some are selected based on a formal supervisory plan. A tax audit can also be traced to information obtained by the tax authorities through efforts to identify participants of tax avoidance transactions.

The examination generally takes place by formal, written communication. The rules of the procedure are very strict, and the process can take from a few weeks to a year/years.

Appeal rights involve two administrative levels and also two judiciary levels.

Statute of limitations

Tax authorities in Iceland have the right to reassess tax returns for CIT six years prior to the year of the assessment (i.e. the statutory period of limitation is six years). The statutory period only reaches a maximum of two years in time if tax returns have been filled out properly and all necessary information presented for tax authorities to establish a correct assessment. This means that in the year 2016, tax authorities can, in theory, reassess the company's tax back to income year 2010.

Topics of focus for tax authorities

The topic of focus for tax authorities in Iceland is tax avoidance in general.

Other issues

Foreign currency financial statements/Accounting in foreign currencies

Companies can apply to the Registry of Annual Accounts for an authorisation to keep their books and prepare their annual accounts in a foreign currency. An application must be filed no later than two months before the beginning of the company's fiscal year. The authorisation is valid for five years, and the Registry of Annual Accounts is responsible for ensuring that the authorised companies continue to fulfil one or more of the following necessary conditions:

- The company's main business operations take place abroad or the company is a part of a foreign company group.
- The company owns foreign subsidiaries or shares in foreign companies, and its main business transactions are with those companies.
- The company's main place of business is Iceland, while a considerable number of their transactions are in foreign currencies.
- A considerable portion of the company's investments and related debts are in foreign currencies.
- The functional currency is registered at the Central Bank of Iceland or the company's commercial bank.

If the company deems that it no longer fulfils the conditions, it must notify the Registry of Annual Accounts. The Registry can postpone its decision of the authorisation's discontinuance for two fiscal years if the situation that is causing the fact that the company does not continue to fulfil the necessary conditions is deemed to be temporary.

The average exchange rate for the fiscal year must be used when converting income and expenses, depreciations included, into Icelandic króna. The exchange rate at the end of the fiscal year must be used when converting assets, debts, and capital. Exchange rate differences that may arise do not affect income on profit and loss accounts.

Rules on foreign exchange

In 2008, the Central Bank of Iceland issued rules on foreign exchange in order to restrict or temporarily prevent certain types of cross-border capital movements or foreign exchange transactions related thereto, which, according to the Central Bank of Iceland, can cause serious and considerable instabilities in exchange rates and financial matters. These rules were later added to Act No. 87/1992 on Foreign Exchange.

The Act on Foreign Exchange defines capital movements as:

Iceland

- The issue, sale, or purchase of shares, debt instruments, drafts, unit shares in mutual funds, and other long-term and short-term securities.
- Deposits in and withdrawals from accounts with depository institutions.
- Lending, borrowing, and the issue of securities not related to international transactions with goods and services.
- The import and export of share certificates and domestic and foreign currencies.
- Forward contracts, options, currency and interest-rate swaps, and other related foreign exchange transactions in which the Icelandic króna is one of the denominated currencies.
- Presents, grants, or other transactions equivalent to the ones detailed above.

Capital movements of foreign currencies

All capital movements of foreign currencies between countries are prohibited, with the exception of payments for the purchase of goods and services or other capital movements specifically exempt from the regulations, according to Act No. 87/1992 on Foreign Exchange.

Capital movements of domestic currencies

Capital movements between countries in domestic currencies are also prohibited. There are several exceptions to this rule.

Cross-border mergers

Rules regarding taxation in relation to cross-border divisions and cross-border mergers between Icelandic LLCs and LLCs from EEA and EFTA countries are now in the Icelandic Tax Act. Tax will be levied on uncapped profit, which can be postponed for five years.

Significant developments

Equalisation levy

Action Plan 1 (Digital Economy) of the Organisation for Economic Co-operation and Development's (OECD's) base erosion and profit shifting (BEPS) project discussed several options to tackle direct tax challenges in the digital environment. Taking cues from this, an equalisation levy has been introduced. *See Equalisation levy in the Withholding taxes section for more information.*

Country-by-country (CbC) reporting documentation as per BEPS

The government has now introduced the three-layered transfer pricing documentation requirements in line with the international standard as per the BEPS Action Plan 13. Taxpayers will now be required to prepare a master file, local file, and CbC report. The new regime will be applicable from financial year (FY) 2016/17. *See Transfer pricing in the Group taxation section for more information.*

Patent Box Regime

In order to encourage companies to locate high-value jobs associated with the development, manufacture, and exploitation of patents in India, the government has introduced a concessional taxation regime for income from patents. *See Patent Box Regime in the Tax credits and incentives section for more information.*

Tax framework for start-ups in India

With a view to providing an impetus to start-ups and to facilitate their growth in the initial phase of their business, a deduction of 100% of the profits and gains derived by an eligible start-up from a business involving innovation development, deployment, or commercialisation of new products, processes, or services driven by technology or intellectual property (IP) will be available. *See Start-up expenses in the Deductions section for more information.*

Reduced rate of tax for newly set-up companies

To provide relief to newly set-up Indian companies, a beneficial corporate income tax (CIT) rate of 25% (plus applicable surcharge and education cess) has been announced with effect from FY 2016/17. *See Start-up expenses in the Deductions section for more information.*

Taxes on corporate income

A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India.

The CIT rate applicable to an Indian company for the tax year 2016/17 is as follows:

India

Income *	Indian company		Foreign company	
	Rate of CIT (%)			
	Basic **	Including surcharge, education cess, and secondary and higher education cess (effective tax rate)	Basic	Including surcharge, education cess, and secondary and higher education cess (effective tax rate)
Less than 10 million Indian rupees (INR)	30	30.9	40	41.20
More than INR 10 million but less than INR 100 million	30	33.063	40	42.024
More than INR 100 million	30	34.608	40	43.26

* Surcharge is payable only where total taxable income exceeds INR 10 million.

** Basic tax rate in case the total turnover during the tax year 2014/15 does not exceed INR 50 million is 29%.

Minimum alternative tax (MAT)

Companies are liable to pay MAT on their adjusted book profits (other than income from life insurance business) where the tax liability under the normal provisions (excluding surcharge, education cess, and secondary and higher education cess) of the Income-tax Act, 1961 ('the Act') for the tax year is not more than 18.5% (excluding surcharge, education cess, and secondary and higher education cess) of such book profits. A credit of such MAT paid is available in subsequent years (up to ten years) where tax is payable under the normal provisions of the Act (i.e. other than MAT).

MAT provisions are not applicable to foreign companies that do not have a permanent establishment (PE) in India. Capital gains from the transfer of securities, interest, royalties, and fees for technical services accruing or arising to a foreign company (which has a PE in India) have been excluded from chargeability of MAT if tax payable on such income is less than 18.5% (exclusive of surcharge, education cess, etc.). Further, expenditure, if any, debited to the profit and loss account corresponding to such income shall be added back to the book profit for the purpose of computation of MAT.

Income *	Indian company		Foreign company	
	Rate of MAT (%)			
		Including surcharge, education cess, and secondary and higher education cess (effective		Including surcharge, education cess, and secondary and higher education cess
	Basic **	tax rate)	Basic	(effective tax rate)
Less than INR 10 million	18.5	19.055	18.5	19.055
More than INR 10 million but less than INR 100 million	18.5	20.389	18.5	19.436
More than INR 100 million	18.5	21.341	18.5	20.008

* Surcharge is payable only where total taxable income exceeds INR 10 million.

** Basic rate of MAT is 9.5% in case of a company located in an international financial services centre and deriving income solely in convertible foreign exchange.

Sick companies (i.e. companies whose losses have wiped out their net worth and that are doubtful of being revived and nursed back to profitability) are not subject to MAT.

A Special Economic Zone (SEZ) developer and a unit in an SEZ are also liable to pay MAT.

Tonnage tax scheme

The tonnage tax scheme, a presumptive tax provision, can be chosen by a non-resident company that has a place of effective management in India, owns at least one qualifying ship, and whose main objective is to carry on the business of operating 'qualifying ships'. The tonnage tax scheme is in place of CIT and is levied on the basis of tonnage of vessels owned, operated, or chartered by it instead of on net income generated by commercial operations. Under a presumptive tax system, taxpayers can opt to be taxed at a pre-designated tax rate on its revenues.

Under this scheme, deemed income shall be assessed at 7.5% of the amount paid or payable (whether in or out of India) for carriage of passengers, livestock, mail, or goods shipped from any port in India, and the amount received or deemed to be received in India on account of carriage of passengers, livestock, mail, or goods shipped to any port outside India shall be treated as profits and gains of business.

Treaty rates will apply to non-resident shipping companies if they are lower than the rates under the tonnage tax scheme.

A government company, or a public company formed and registered in India with the main object of operating ships, is eligible for a deduction not exceeding the lower of 50% of its profits and the sum transferred to a special reserve to be utilised in accordance with the provisions of the Act.

Local income taxes

There are no local, state, or provincial taxes on income in India at present.

Corporate residence

A company is treated as a resident of India in any previous year if:

- it is an Indian company or
- its place of effective management (PoEM) in that year is in India (*see below*).

A partnership firm, a limited liability partnership (LLP), and other non-individual entities are treated as resident in India if any portion of their control and management is in India. They are non-resident if their control and management is situated wholly outside India.

Place of effective management (PoEM)

Presently, a foreign company is considered resident in India if the control and management of its affairs is situated wholly in India.

To bring to tax those companies that are incorporated outside India but controlled from India, the concept of PoEM has been introduced. PoEM is an internationally recognised concept accepted by the OECD.

A company will be regarded as a resident in India if its PoEM is in India in that year. The term PoEM has been explained to mean a place where key management and commercial decisions that are necessary for the conduct of the business of an entity as a whole are, in substance, made. Determination of residency of a foreign company on the basis of POEM has been deferred by one year (i.e. it will be applicable from FY 2016/17) to provide clarity and address certain concerns with regard to its implementation. Necessary provisions will be introduced for adaptation, modification, and exceptions in the existing provisions of the Act for computation of income, set off and carry forward of losses, etc.

India

Draft guidelines for determination of PoEM have been issued by the Central Board of Direct Taxes (CBDT).

Permanent establishment (PE)

A PE is defined in India as a fixed place of business through which the business of an enterprise is wholly or partly carried on.

Other taxes

Value-added tax (VAT)/Central sales tax (CST)

The sale of movable goods in India is chargeable to tax at the central or state level. The Indian Constitution grants powers to state legislatures to levy tax on goods sold within that state. Such sales are, therefore, chargeable to VAT at the rates specified under the VAT laws of the relevant state. All goods sold in the course of inter-state trade are subject to CST.

Where goods are bought and sold by registered dealers on an inter-state basis for trading or for use in the manufacture of other goods or specified activities (such as mining or telecommunication networks), the rate of sales tax is 2%, provided Form 'C' is issued by the purchasing dealer. In the absence of Form 'C', the applicable rate would be the rate of VAT on such goods in the originating state. Inter-state procurement, on which CST is charged by the originating state, is not eligible for input tax credit in the destination state, and is a cost to the buyer.

Under the VAT regime, the VAT paid on goods purchased within the state is eligible for VAT credit. The input VAT credit can be utilised against the VAT/CST payable on the sale of goods. The cascading effect of taxes is thus avoided, and only the value addition is taxed.

Currently, there is no VAT on imports into India. Exports are zero-rated. This means that while exports are not charged to VAT, VAT charged on components purchased and used in the manufacture of export goods or goods purchased for export is available to the purchaser as a refund based on state VAT legislations.

State VAT is charged at different rates varying from 5% to 15%, with a few exceptions. The rate of VAT depends on the nature of the goods involved and varies from state to state.

A turnover threshold is prescribed so as to exclude small traders from the ambit of VAT. Under a composition scheme, tax may be levied on small traders within a specified turnover limit at a lower rate, in lieu of VAT.

Entry tax/Octroi duty

'Entry tax' is a tax on the entry of specified goods into the state from outside the state for use, consumption, or sale therein. Entry tax continues to exist under the VAT regime. However, in certain states, it has been made VATable and can be offset against the output VAT liability in the state. Where entry taxes have been imposed in lieu of octroi, there is no offset available, and hence they are a cost. Typically, the rate of entry tax ranges from 0.5% to 15%, depending upon the state.

The levy of entry tax has been considered unconstitutional by the High Courts in many states. The state governments have filed petitions before the Supreme Court to challenge these decisions, and, at present, the matter is pending final adjudication before the Supreme Court.

Octroi is a municipal levy that is levied at the time of entry of specified goods into the limits of the relevant municipal corporation. Thus, octroi is leviable, if there is

movement of goods from one city to another in the same state, if the cities fall under the jurisdiction of two different municipal corporations.

Customs duty

Customs duty is levied by the Central Government on goods imported into, and exported from, India. The rate of customs duty applicable to a product imported or exported depends upon its classification under the Customs Tariff Act, 1975. With regard to exports from India, customs duty is levied only on a very limited list of goods.

The Customs Tariff is aligned with the internationally recognised Harmonised System of Nomenclature (HSN) provided by the World Customs Organization.

Customs duty is levied on the transaction value of the imported or exported goods. According to section 14 of the Customs Act, 1962 (CA), the concept of transaction value is the sole basis for valuation for the purpose of import and export of goods. While the general principles adopted for valuation of goods in India are in conformity with the World Trade Organization (WTO) agreement on customs valuation, the Central Government has framed independent Customs Valuation Rules that apply to the export and import of goods.

The customs duty applicable to any product is composed of a number of components, which are as follows:

- Basic Customs Duty (BCD) is the basic component of customs duty levied at the effective rate under the First Schedule to the Customs Tariff Act (CTA) and applied to the landed value of the goods (i.e. the cost, insurance, and freight [CIF] value of the goods plus landing charges). The peak rate of BCD is 10%.
- Additional customs duty in lieu of excise duty (commonly known as Countervailing Duty [CVD]) is equivalent to, and is charged in lieu of, the excise duty applicable on similar goods manufactured or produced in India. CVD is typically calculated on the sum of the landed value of the goods and the applicable BCD. However, the CVD on specific consumer goods intended for retail sale in India is calculated on the basis of the maximum retail sale price (MRP) printed on their packs less the specified abatement. The present rate of excise duty is 12.5%, and, consequently, the rate of CVD is also 12.5%.
- Education cess at 2% and secondary and higher education cess at 1% are also levied on the aggregate of the customs duties (except in cases of safeguard duty, countervailing duty, and anti-dumping duty).
- An additional duty of customs (ADC) to countervail state taxes and VAT of 4% is charged in addition to the above duties on imports, subject to certain exceptions. ADC is calculated on the aggregate of the assessable value of the imported goods, the total customs duties (i.e. BCD and CVD), and the applicable education cess and secondary and higher education cess.

BCD, education cess, and secondary and higher education cess levied on the aggregate of duties of customs are a cost of any import transaction. The duty incidence arising on account of the CVD and ADC may be set off or refunded, subject to prescribed conditions. Where goods are imported for purposes of manufacture, the Indian manufacturer may take credit of the CVD and ADC paid at the time of import for offset against the output excise duty. In case of service providers, credit of only the CVD is available. Similarly, the Central Government provides exemption from payment of ADC on import of certain specified goods, subject to fulfilment of prescribed conditions. The Central Government has also prescribed a refund mechanism in relation to ADC paid on goods imported for the purpose of trading in India, subject to fulfilment of the conditions prescribed under the governing notifications and circulars issued in this regard.

India

CENVAT (Excise duty)

Central Value Added Tax (CENVAT) is an excise duty levied by the Central Government on the manufacture or production of movable and marketable goods in India.

The rate at which excise duty is levied on goods depends on the classification of the goods under the Central Excise Tariff Act, 1985. The excise tariff is primarily based on the eight-digit HSN classification adopted so as to achieve conformity with the customs tariff.

Excise duty on most consumer goods that are intended for retail sale is chargeable on the basis of the MRP printed on the package of the goods. However, abatements are admissible at rates ranging from 15% to 55% of the MRP. Goods, other than those covered by MRP-based assessments, are generally chargeable to duty on the 'transaction value' of the goods sold to an independent buyer. In addition, the Central Government has the power to fix tariff values for imposing *ad valorem* duties on the goods.

Presently, the excise duty rate is 12.5% with a few exceptions. However, a partial or complete exemption from payment of excise duties is also available for specified goods.

The central excise duty is a modified VAT, wherein a manufacturer is allowed credit of the excise duty paid on locally sourced goods and the CVD and ADC paid on imported goods. The CENVAT credit can be utilised for payment of excise duty on clearance of dutiable final products manufactured in India. Manufacturers of dutiable final products are also eligible to take advantage of the CENVAT credit of the service taxes paid on input services used in or in relation to the manufacture of final products and clearances of final products from the place of removal, subject to the fulfilment of certain conditions.

Service tax

Service tax is levied on all services provided or agreed to be provided in a taxable territory, except the following:

- Services on the negative list.
- Services specifically exempted by notification.

The present rate of service tax is 14% and a Swachh Bharat Cess is applicable at 0.5% on the taxable value of services with effect from 15 November 2015. Further, Krishi Kalyan Cess is applicable at 0.5% on taxable value of services with effect from 1 June 2016, making the effective rate of service tax 14.5%.

Typically, the onus of payment of service tax lies with the provider of services. However, for certain services (e.g. import of services), the onus of paying the service tax lies, either fully or partially, on the service recipient.

Goods and services tax (GST)

The Central Government took a major step towards the transition to a national integrated GST in 2006. A Working Group was constituted by the Empowered Committee (EC) to study global GST models and identify suitable models for introduction in India.

Earlier, the EC had released its First Discussion Paper on the proposed GST in India on 10 November 2009, in which the government had indicated that the GST shall have three components: one levied by the centre (Central GST or CGST), another levied by the states (State GST or SGST), and one that will be levied in case of inter-state transactions (Integrated GST or IGST). The CGST and the SGST would be applicable on all transactions of goods and services made for a consideration within the state, except for exempted goods and services, goods that are outside the purview of the GST, and transactions that are below the prescribed threshold limits. The exact date of

implementation of the GST is not yet decided. Details of taxes that would be subsumed into the dual GST are as follows.

The following taxes would be subsumed into the CGST:

- Excise duty.
- CVD/ADC.
- Service tax.

The following taxes would be subsumed into the SGST:

- VAT.
- Entertainment tax.
- Luxury tax.
- Lottery taxes.
- State cesses and surcharges.
- Entry tax not in lieu of octroi.

It is likely that CST will be phased out in the GST regime.

The Finance Minister had indicated that the GST would be implemented with effect from 1 April 2016. For the purpose of its implementation, the GST Constitutional Amendment Bill was presented before Parliament. The Bill has been passed by the Lower House of Parliament; however, the same is yet to be passed by the Upper House of Parliament. The proposed GST regime is expected to simplify the indirect tax regime as it would subsume most of the indirect tax laws (except stamp duty); consequently, it is touted as a major tax reform. There has been significant progress on the GST front recently. It is expected that the government will push for passage of the GST Constitution Amendment Bill during the upcoming Monsoon session. India finally seems to be on the cusp of implementing this much-awaited tax regime.

Advance ruling for customs, excise, and service tax

To enable foreign investors to ascertain their indirect tax liabilities arising from proposed business ventures in India, the Central Government has constituted the Authority for Advance Rulings (AAR) as a high-level, quasi-judicial body. The functions of the AAR consist of giving advance rulings on a specific set of facts relating to specified matters under customs, central excise, and service tax.

Advance rulings may be sought by any resident/non-resident investor entering into a joint venture in India in collaboration with another non-resident or resident of India, or by a resident setting up a joint venture in India in collaboration with a non-resident. Through the Finance Act 2005, this facility has also been made available to existing joint ventures in India. The Central Government is also empowered to include any other class or category of persons as eligible for the benefit of an advance ruling. Under the customs law, the Central Government has allowed a 'resident public limited company' to be eligible for an advance ruling. The Central Government has also allowed a 'resident public limited company' to apply for advance ruling under central excise and service tax law in relation to a proposed new line of business.

Further, the definition of 'activity' has also been expanded under the customs and excise law to enable the existing importer/exporter or manufacturer, as the case may be, to seek advance ruling for a proposed new line of business. In addition, an advance ruling can now be sought on the issue of admissibility of credit of service tax paid or deemed to have been paid on 'input services' used in or in relation to manufacture of excisable goods. Earlier, it was only limited to the 'inputs' used in or in relation to manufacture of excisable goods.

India

Property taxes

Municipal tax on a property is levied on the basis of the municipal law prevalent in each city. The rate of tax levied varies from city to city in India, and is generally related to the prevailing market prices for property in each locality.

Transfer taxes

Documents evidencing transfer of shares have to be stamped under the Indian Stamp Act. Transfer of other movable property is chargeable to stamp duty under the respective State Acts, or under the Indian Stamp Act, in case a state has not passed its own Stamp Act. *See the discussion under Stamp duties below.*

Immovable property or rights in it can be transferred by way of sale, lease, licence, or easement. Sale of immovable property requires a conveyance deed on which stamp duty is payable, and must be registered with the Registrar of Assurances of the state under the Registration Act 1908. A lease agreement also needs to be stamped and registered compulsorily. A licence is defined in section 52 of the Indian Easements Act (IEA) as a grant of a right to do something in or upon the property that would be unlawful but for such grant, which is not an easement or interest in the property. Easement is defined in section 4 of the IEA as the right given to an occupier of a land, to continue enjoyment of which one can do or prevent something from being done on land that is not one's own. An easement agreement also needs to be registered. Other non-tax laws governing transfers of immovable property include the Transfer of Property Act, 1882 and the *Benami* Transactions Prohibition Act. The last-mentioned Act prohibits, on pain of confiscation, the purchase and registration of property in the names of persons who are not the true beneficial owners, which has been used as a way of hiding undisclosed wealth. There are also some state-level Acts (e.g. the Maharashtra Ownership Flats Act).

Stamp duties

In India, stamp duty is charged on certain documents (not the transaction). No document that has not been duly stamped can be introduced as evidence in any court proceedings. However, this does not affect the legality of transactions. Improperly stamped documents can be impounded by any public officer. The Bombay Stamp Act also provides for imprisonment and fine for executing improperly stamped documents. The Registrar of Assurances can also refuse to register any document that the Registrar feels is improperly stamped. Stamp duty is charged at both central and state levels. State level stamp duties vary from state to state, and on document type.

The Indian Stamp Act, 1899 applies to the whole of India except to those states that have enacted their own Acts. Six states have so far enacted their own stamp law (Jammu and Kashmir, Maharashtra, Gujarat, Rajasthan, Karnataka, and Kerala), while some states have adopted Schedule I of the Indian Stamp Act, with or without modification. Even in states that have enacted their own Acts, stamp duty on certain instruments of commercial character, such as transfer of shares, is always leviable under the Indian Stamp Act because, under the Constitution of India, duty on certain instruments can only be levied by the Union of India, whereas, in respect of all other instruments or documents, either the state or the Union can levy duty.

An important source of revenue for state governments is the stamp duty charged on transfer of immovable properties, where rates are prescribed by each state in respect of transfer of property within their jurisdiction. The stamp laws do not define what immovable property is; the definition is imported either from section 3 of the Transfer of Property Act, 1882, or from the General Clauses Act, 1897. Payment of stamp duty is mandatory for immovable property transfers, whereas for other transactions involving movable assets other than actionable claims, stamp duty is not payable if there is delivery of possession without executing a conveyance.

Buyers of newly constructed properties are also required to pay service tax and VAT calculated as percentages of the total consideration, and are obligated to withhold tax

from the seller. The cumulative cash flow impact of these three tax requirements, in addition to stamp duty and registration charges, have greatly increased transaction costs of buying or selling immovable property in India.

Dividend distribution tax (DDT)

Indian companies distributing or declaring dividends are liable to pay DDT at 15% (*plus* surcharge [12%], education cess, and secondary and higher education cess [3%]). This rate is required to be grossed up; consequently, the effective rate of DDT is 20.36%. This tax is payable on declaration, distribution, or payment, whichever is earlier, and it is in addition to the CIT payable on business profits. Dividend income on which DDT is paid by the Indian company is exempt from tax in the hands of the recipient. However, non-corporate resident taxpayers earning more than INR 1 million of dividend are to pay tax at 10% (plus applicable surcharge and education cess) on the dividend income earned over and above INR 1 million in addition to the DDT paid by the company

A holding company does not have to pay DDT on dividends paid to its shareholders to the extent that it has received dividends from its Indian or foreign subsidiary company on which DDT has been paid by the respective subsidiary, subject to fulfilment of certain conditions. However, the benefit will not be available if the holding company is itself a subsidiary of another company.

Securities transaction tax (STT)

STT is applicable to transactions involving the purchase/sale of equity shares, derivatives, units of equity-oriented funds through a recognised stock exchange, or the purchase/sale of a unit of an equity-oriented fund to any mutual fund. The STT leviable in respect of such transactions varies for each kind of instrument, whether delivery based or non-delivery based. Rate of STT varies from 0.01% to 0.125% depending upon the nature of securities.

Wealth tax

All companies are liable to pay wealth tax assessed at 1% of the value of specified net assets if the value of net wealth exceeds INR 3 million. Valuation of assets is in terms of specific rules notified by the government. The term 'net wealth' broadly represents the excess of the value of certain assets over debts.

Note that wealth tax is not applicable with effect from tax year 2015/16.

Payroll taxes and social security payments

Contributions representing 8.33% of the employees' pay needs to be remitted by the employer to the Employees' Pension Fund in respect of all Indian nationals working in an establishment covered under the Employees' Provident Fund and Miscellaneous Provisions Act, 1952, within 15 days of the close of every month. A 'foreign worker' holding a passport of a country with which India has signed a social security agreement is required to contribute to the social security system 12% of one's salary. A similar 12% of salary is contributed by resident employees' for the Employees' Provident Fund and Employees' Pension Fund. However, foreign workers can detach themselves from the scheme under a special provision on obtaining a 'detachment/coverage certificate' issued by an appropriate social security institution indicating the period of employment in India being less than the maximum period of detachment agreed in the agreement.

Branch income

Branches of foreign companies are taxed on income that is received in India, or which accrues or arises in India, at the rates applicable to foreign companies. There is no withholding tax (WHT) on remittance of profits by the branch to its head office.

Income determination

Income computation and disclosure standards (ICDS)

The CBDT has notified ten ICDS to be followed by all taxpayers that follow the mercantile system of accounting for the purpose of computation of income chargeable to income tax under the head 'profits and gains of business or profession' or 'income from other sources' and not for the purpose of maintenance of books of accounts. In case of conflict between the provisions of the Indian Income-tax Act and the ICDS, the provisions of the Act shall prevail to that extent.

Inventory valuation

Inventories are generally valued at cost or net realisable value, whichever is lower. Generally, there is conformity between book and tax reporting. The first in first out (FIFO) and weighted average cost methods are acceptable, provided that they are consistently applied.

Capital gains

Capital gains refer to the gains made on the transfer of a capital asset. Transfer includes sale, exchange, relinquishment, or extinguishment of rights in an asset. Capital assets are either short-term capital assets or long-term capital assets. Long-term capital gains are eligible for a concessional rate of tax and indexation of cost of purchase and cost of improvement (*discussed below*).

Short-term capital assets are capital assets held for a period of not more than 36 months. In case of listed shares, listed securities, or units of specified mutual funds or zero-coupon bonds, the short-term holding period is not more than 12 months and in case of unlisted shares is not more than 24 months. Capital assets that do not qualify as short-term capital assets are considered as long-term capital assets.

Normally, long-term capital gains are determined after increasing the cost by a prescribed multiplier that varies with the period of holding, to adjust for inflation. In case of non-residents, capital gains on transfer of shares or debentures in Indian companies are computed in the foreign currency in which the shares or debentures were acquired, and the capital gains are then reconverted into Indian currency to compute the tax liability thereon.

Capital gains are taxed as follows:

- Long-term capital gains on the transfer of listed shares in a company, or units of an equity-oriented fund, that have been subjected to STT are exempt from taxation.
- Other long-term capital gains are subject to taxation at 20% (plus the surcharge, education cess, and secondary and higher secondary education cess). However, long-term capital gains arising from the transfer of listed securities, units, or zero-coupon bonds on which STT is not paid are taxed at 10% (without adjusting the cost for inflation) or at 20% (after adjusting the cost for inflation), whichever is more beneficial to the taxpayer. These rates exclude surcharge, education cess, and secondary and higher education cess.
- Long-term capital gains arising to a non-resident (not being a company) or a foreign company from transfer of unlisted securities, shares, debentures, etc. are taxable at 10% (plus surcharge, education cess, and secondary and higher secondary education cess) without any indexation benefit.
- Short-term capital gains on the transfer of listed shares in a company or units of an equity-oriented fund that are subject to STT are taxed at 15% (plus surcharge, education cess, and secondary and higher education cess).
- Other short-term capital gains are subject to taxation at the normal rates.
- In the case of certain overseas financial organisations (e.g. off-shore funds and foreign institutional investors), long-term capital gains arising on the transfer of units

purchased in foreign currency are taxable at 10% (plus surcharge, education cess, and secondary and higher education cess) on the gross amount.

- Long-term capital gains earned by non-residents on the transfer of bonds relating to Indian companies (issued abroad in accordance with government guidelines or approved schemes and acquired in foreign currency) are taxable at 10% (plus surcharge, education cess, and secondary and higher education cess) on the gross amount of gains.

The rules of carryforward and offset of loss for capital gains are as follows:

- Capital losses arising from the transfer of a short-term capital asset can be offset against capital gains arising from any other asset in the same tax year.
- Capital losses arising from the transfer of a long-term capital asset can be offset only against capital gains arising from the transfer of any other long-term capital asset.
- Capital losses that cannot be offset in the tax year in which they are incurred can be carried forward and offset against future capital gains at any time within a period of eight years after the year of loss.
- When depreciable assets forming part of a block of assets for tax purposes are transferred, as a result of which the value of the block becomes negative, or all the assets forming part of the block ceases to exist, the difference between the transfer price and the value of the block is treated as short-term capital gains.

Taxability of shares received by way of transfer at less than fair market value of shares

Where a partnership firm or a closely held unlisted company receives shares of another closely held company for no consideration or at a price that is lower than the fair market value of the shares, then the difference will be deemed to be the income of the recipient-company. The 'fair market value' is computed according to the formula prescribed under the Income-tax Rules.

Dividend income

Dividend income received from Indian companies is not taxable in the hands of all shareholders. This applies to resident as well as non-resident shareholders. However, the recent Budget introduced tax at the rate of 10% on income earned by way of dividend in excess of INR 1 million by an individual, Hindu Undivided Family (HUF), or a firm that is resident in India.

Income received by overseas financial organisations (offshore funds) from units of specified mutual funds, or from the Unit Trust of India, that are purchased in foreign currency is taxable at 10% on the gross amount of income. Dividends (other than those received from Indian companies) are taxable at 20% on the gross amount.

Income received from units of specified mutual funds is not taxable in the hands of the recipient. The distributing mutual fund is liable to pay a distribution tax of 25% or 30% (plus surcharge, education cess, and secondary and higher education cess). The above tax is not chargeable in respect of income distributed by an equity-oriented fund in respect of distribution under such scheme.

Stock dividends (bonus shares) distributed are not taxed at the time of receipt in the hands of the recipient shareholders, but capital gains provisions are applicable to the sale of these stock dividends.

Buyback of shares

An additional tax is payable on transactions involving buyback of shares by unlisted companies from its shareholders. A tax at 20% is payable by the company on the difference of consideration paid on buyback and the issue price of shares. The buyback consideration received will be tax exempt in the hands of the receiver. No tax credit will be allowed in case of such taxes paid either to the company or to the shareholder.

India

Interest income

Interest income received by an Indian company is taxable at normal CIT rates. Interest income received by a foreign company is taxed at a concessional rate of withholding at 5%/20%, subject to conditions.

Partnership/LLP income

A partnership firm and an LLP are taxed as separate legal entities. The share of income of partners from a partnership firm or an LLP is exempt from tax. Partnerships and LLPs are taxed at 30% (plus surcharge, education cess, and secondary and higher education cess).

The interest payment to partners on capital or current account is allowed as tax deductible expenditure. However, the maximum interest rate allowable for tax purposes is 12% *per annum*. A working partner can be paid salary, bonus, commission, or remuneration. The maximum permissible deduction in respect of remuneration payable collectively to all working partners is based on the book profit of the firm, at slab rates for different levels of book profit.

Unrealised exchange gains/losses

Principles for classification of foreign exchange gains or losses are as follows:

- Profit/loss is considered to be trading profit/loss if foreign currency is held on revenue account, as trading assets, or as a part of circulating capital invested in the business.
- Profit/loss is considered to be of a capital nature if a foreign currency loan is taken for a capital asset or fixed asset.

Foreign income

An Indian company is taxed on its worldwide income. A foreign company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India. This income is subject to any favourable tax treaty provisions. According to the current tax law, payments for allowing/transferring the right to use software, customised data, or transmission of any signal by satellite, cable, optic fibre, or similar technology are taxable as royalty income deemed to accrue or arise in India, whether or not the location of such right or property is in India. The CBDT has released draft rules for granting foreign tax credit to resident taxpayers in respect of taxes paid in overseas countries. The rules lay down broad principles and conditions for computation and claim of foreign tax credit, respectively.

Double taxation of foreign income for residents is avoided through treaties that generally provide for the deduction of the lower of foreign tax or Indian tax on the doubly taxed income from tax payable in India. Similar relief is allowed unilaterally where no treaty exists, in which case a resident would be taxed under the Indian tax law but would be allowed a deduction from the Indian income tax payable of a sum being the lower of the Indian tax rate on the doubly taxed income or the rate of tax prevailing in the other country in which income is already taxed.

Deductions

Expenses that are revenue in nature are, by and large, allowed as a deduction to businesses and professionals if they are:

- incurred wholly and exclusively for the purpose of the business or profession
- not in the nature of a personal expense, and
- not in the nature of a capital expense.

Depreciation

Depreciable assets are grouped in blocks, and each block is eligible for depreciation at a prescribed rate, which is summarised as follows:

Block	Rate (%)
Residential building	5
Office building	10
Furniture and fittings	10
Plant and machinery	15 to 100
Computers	60
Intangible assets	25

Where the asset is used for less than 180 days in a tax year, the depreciation is restricted to 50% of the prescribed rate. If money receivable on the transfer of a depreciable asset exceeds the opening written-down value plus acquisitions of assets falling within the block concerned, the excess is taxed as a short-term capital gain at the same tax rate as that applicable to business income.

Additional depreciation of 20% on the cost of new plant and machinery (other than ships or aircraft) is allowable in the year of commissioning for manufacture. This benefit is extended to power generating, transmission, or distributing business. Also, the benefit of initial depreciation to companies engaged in transmission of power will be available from tax year 2016/17. Power-generating or power-distributing companies have the option to either apply the reducing-balance method provided under the normal schedule or to charge depreciation on a straight-line basis. The straight-line rates are aligned with power companies' book depreciation rates.

Know-how, patents, licences, franchises, and similar intangible assets can form part of a block of depreciable assets, provided they are owned and put to use in the course of their business and are eligible for depreciation at the prescribed rate, which is 25%.

Additional depreciation of 35% (as against the current rate of 20%) has been made available on new plant and machinery acquired and installed during 1 April 2015 to 31 March 2020, in the year of installation in the states of Andhra Pradesh, Bihar, Telangana, and West Bengal. In line with the existing provisions, such incentive is not available to specified assets (such as office appliances, computer software, etc).

Tax depreciation is not required to conform to book depreciation. However, an Accounting Standard mandates companies to reconcile both and provide for deferred tax assets, liabilities, expenses, and incomes.

Investment allowance

An investment allowance benefit is allowed for companies engaged in the business of manufacture of articles or things. Taxpayers who have acquired and installed new plant and machinery during any financial year exceeding INR 250 million can avail of an allowance of 15% of the actual cost of investment made in plant and machinery. Further, the acquisition of the plant and machinery can be made in any financial year, provided the installation is made before 31 March 2017, in order to avail the benefit of investment allowance of 15%. In case installation of the new asset is in a year other than the year of acquisition, then the investment allowance shall be allowed in the year in which the new asset is actually installed. This shall be effective from the tax year 2016/17 to 2017/18. The assets have to be held for more than five years, and, if the asset is sold before this period, the investment benefit claimed will be reversed in the year of sale. The minimum limit of INR 250 million has been relaxed for investment in plant and machinery in the states of Andhra Pradesh, Bihar, Telangana, and West Bengal.

India

Investment in new plant and machinery will not include assets like plant or machinery used earlier in or outside India, any plant or machinery installed in any office premises or in residential accommodation (or guest house), any office appliances (including computers or computer software), vehicle, ship, or aircraft, the cost of which has been allowed as a deduction under any other provision.

Goodwill

Based on an Indian Supreme Court decision, goodwill and commercial brand equity that are acquired in the course of amalgamation are intangible assets entitled to depreciation.

Start-up expenses

Certain expenses are incurred by taxpayers either before the start-up of a business or after start-up of business, in connection with extension of the industrial undertaking, or in connection with setting-up a new unit. One-fifth of such expenditure is allowed as a deduction each year, over a period of five years.

Tax framework for start-ups in India

With a view to providing an impetus to start-ups and to facilitate their growth in the initial phase of their business, a deduction of 100% of the profits and gains derived by an eligible start-up from a business involving innovation development, deployment, or commercialisation of new products, processes, or services driven by technology or IP will be available.

The benefit of 100% deduction of the profits derived from such business shall be available for a period of three consecutive years out of five years beginning from the year the start-up is incorporated.

'Eligible start-up' means a company or an LLP engaged in the business mentioned above and which fulfils the following conditions, namely:

- it is incorporated on or after 1 April 2016 but before 1 April 2019
- the total turnover of its business does not exceed INR 250 million in any of the previous years beginning on or after 1 April 2016 and ending on 31 March 2021, and
- it holds a certificate of eligible business from the Inter-Ministerial Board of Certification as notified in the Official Gazette by the Central Government.

Reduced rate of tax for newly set-up companies

To provide relief to newly set-up Indian companies, a beneficial CIT rate of 25% (plus applicable surcharge and education cess) has been announced with effect from FY 2016/17. This beneficial rate is at the option of the company and is applicable on satisfaction of the following conditions, cumulatively:

- i. The company is registered and set-up on or after 1 March 2016.
- ii. The company is engaged in the business of manufacture or production of any article or thing and is not engaged in any other business.
- iii. The company has not claimed a benefit for establishing its unit in an SEZ, benefit of accelerated depreciation, or benefit of additional depreciation, investment allowances, expenditure on scientific research, and any deduction in respect of certain income.
- iv. The company has not claimed set-off of loss carried forward from any earlier assessment years, provided such loss is attributable to the deductions referred in (iii) above.
- v. The option of seeking the benefit of a reduced CIT rate of 25% is furnished in the prescribed manner before the due date of furnishing of income.

For companies other than Indian companies, the rate of CIT (plus applicable surcharge and education cess) shall remain unchanged.

Interest expenses

Any interest paid by a taxpayer on capital borrowed for the purposes of the taxpayer's business or profession is tax-deductible without any limit. However, if such interest is paid to certain related persons, then, to the extent the interest payment is considered excessive or unreasonable, the tax officer is empowered to disallow the deduction. If the capital is borrowed for acquiring a capital asset, then interest liability pertaining to the period until the time the asset is put to use cannot be allowed as a tax-deductible expense and will have to be added back to the cost of such asset. *See Expenses allowable on actual payment basis below.*

Bad debts

The amount of any bad debt, or part thereof, that has been written off as irrecoverable in the accounts of the taxpayer for the year is allowed as a tax-deductible write-off. If any part of the sum written off is subsequently recovered, the recovered sum is taxable in the year of recovery.

Charitable contributions

Any charitable contribution made by a company to any charity is allowed as a tax-deductible expense, subject to certain conditions. The tax deductibility ranges from 50% to 100% of the charitable contribution, depending upon the nature of charity.

Expenditure incurred on corporate social responsibility (CSR) activities

Expenditure incurred by a taxpayer on CSR activities mandated under the Companies Act, 2013 is not allowed as a deduction for tax purposes under the Income Tax Act.

Expenses allowable on actual payment basis

Certain expenses, such as, but not limited to, employees' provident fund dues (i.e. retirement benefit funds), bonus to employees, and interest payable to financial institutions and banks, are allowed as tax deductible expenses only on actual payment. Tax disallowances are attracted if certain payments are delayed beyond their due dates under the respective laws.

Bribes, kickbacks, illegal payments

Expenditure incurred by a taxpayer that is illegal is deemed not to have been incurred for the purposes of the business or profession, and no deduction of such expenditure will be allowed.

Fines and penalties

Under the tax law, there are various procedural compliances (viz., audit of books of accounts, submission of tax returns, disclosure of particulars of income, etc.) that need to be complied with by taxpayers by the respective due dates prescribed therein. Non-compliance/delayed compliances of these procedures attract interest and penal consequences. There are prosecution provisions as well for certain offences. Penalties and fines paid for infraction of, or non-compliance with, any law are not deductible as business expenditure. Prosecution proceedings are criminal proceedings, and, in such proceedings, courts presume a culpable mental state on the taxpayer's part. The burden of proving beyond all reasonable doubt (and not merely by preponderance of probability) the absence of such a state is on the taxpayer.

Taxes

All taxes (tax, duty, cess, or fees by whatever name called) relating to business (other than income tax and wealth tax) incurred during the tax year are usually deductible only in the year of payment.

Net operating losses

Losses can be carried forward and offset against income from subsequent year(s) for periods set out in the following table:

India

Types of losses	Time limit
Unabsorbed depreciation	Perpetually
Other business losses (other than speculation business losses)	8 years
Speculation business losses	4 years
Capital losses	8 years

There are no provisions in India for carrying losses back to earlier years.

Payments to foreign affiliates

Indian companies can claim deduction for payments on account of royalties, and for interest and fees for technical or management service provided by foreign affiliates, as long as they are not capital in nature. Such payments are deductible in the year the requisite WHT is paid into the government treasury.

Group taxation

Group taxation is not permitted under the Indian tax law.

Transfer pricing

Transfer pricing on international transactions

The Indian transfer pricing regulations (ITPR) stipulate that income arising from 'international transactions' between 'associated enterprises' should be computed having regard to the 'arm's-length price'. Furthermore, any allowance for expenses or interest arising from any international transaction is also to be determined having regard to the arm's-length price. The expressions 'international transactions' and 'associated enterprises' have been defined in the ITPR.

The ITPR also contain the concept of 'deemed international transaction' whereby a transaction between an enterprise and a third party (whether based in India or overseas) would be subjected to transfer pricing regulations in case there exists a prior agreement in relation to such a transaction between the third party and the associated enterprise of the transacting enterprise or if the terms of such a transaction are determined in substance between the third party and the associated enterprise of the transacting enterprise.

The ITPR also define a certain class of transactions undertaken by a taxpayer with its domestic related parties and whose aggregate value exceeds INR 200 million as specified domestic transactions to which the transfer pricing provisions apply.

Initially, the ITPR prescribed five methods for computation of arm's-length price. These are broadly in line with OECD Guidelines. A sixth method, termed as the 'other method', was notified in 2012. Taxpayers are required to adopt the most appropriate method for determining the arm's-length price.

Taxpayers are also required to maintain a comprehensive set of prescribed information and documents relating to international transactions and specified domestic transactions that are undertaken between associated enterprises, on an annual basis, within the prescribed timelines (due date of filing the income tax return). Further, taxpayers are required to obtain an Accountant's Report from an independent accountant certifying the nature and amount of international transactions. The certificate needs to be filed along with the income tax return. The burden of proving the arm's-length character of the transaction is primarily on the taxpayer.

The taxpayer is required to comply with the above requirements on an annual basis.

The ITPR adopt an arithmetic mean of comparable prices as the arm's-length price, with a flexibility of deviation from the percentage that is notified by the Central Government as $\pm 1\%$ for wholesalers and $\pm 3\%$ for others. The CBDT has also prescribed rules for use of range for determining arm's-length price, which is discussed subsequently. Where the transfer pricing officer is of the opinion that the arm's-length price was not applied, the officer may re-compute the taxable income after giving the taxpayer an opportunity to be heard. Stringent penalties are prescribed in cases of failure to comply with the provisions of the ITPR.

Notified Jurisdictional Area (NJA)

The Indian government is empowered to declare a country/territory with which there does not exist an effective mechanism for exchange of information as an NJA.

Any transaction between a taxpayer and a person located in an NJA or a transaction entered into by a taxpayer wherein one of the parties is located in an NJA will be covered under the ITPR. However, the benefit of the $\pm 3\%$ range and the option to be covered under the Safe Harbour Rules would not be available in this case.

Safe Harbour Rules

Safe Harbour Rules were notified in 2013. These rules prescribe who the eligible taxpayers are, which are the eligible international transactions, the target operating margin, procedural aspects, timeline for audit, etc.

The Safe Harbour Rules are initially applicable for a maximum of five tax years beginning with tax year 2013/14.

Where a taxpayer has opted to be covered under the Safe Harbour Rules and the transfer price declared has been accepted by the tax authorities, then such a taxpayer cannot invoke proceedings under a Mutual Agreement Procedure (MAP).

Advance pricing agreements (APAs)

An APA is an arrangement between the taxpayer and the tax authorities covering transactions, with a view to pre-empt potential transfer pricing disputes. The CBDT has notified detailed rules providing the procedures and necessary forms for application/administration of APAs.

The rules provide for constitution of an APA team, which shall consist of an income tax authority and experts from economics, statistics, law, and other necessary fields. APAs can be applied to existing, as well as proposed, transactions.

The rules have provided for both unilateral and bilateral/multilateral APAs. In cases where a bilateral APA negotiated between competent authorities is not acceptable to the taxpayer, the taxpayer may, at its option, continue with the process of entering into a unilateral APA without benefit of a MAP.

The salient features of the procedure laid down for APAs are application for APA, withdrawal of APA, defective application, procedure, compliances post-APA, cancellations of APA, and revisions and renewal of APA.

The legislation has provisions of roll-back of APAs for four years prior to the first year covered under the APA.

Rules prescribing the use of 'range' and multiple year data

The CBDT has notified the rules prescribing the scheme for the usage of the 'range' concept and multiple year financial data for determining the arm's-length price. These rules are applicable to international transactions and specified domestic transactions that are entered into by taxpayers on or after 1 April 2014.

India

The rules envisage the applicability of the 'range' concept and multiple year data only where the arm's-length price determination is done using either the transactional net margin method, resale price method, cost plus method, or comparable uncontrolled price method. Furthermore, the rules in connection with the applicability of the 'range' concept, *inter alia*, prescribe the adequate number of external comparables and the methodology for computing the upper and lower percentile. In case the number of external comparables identified is not adequate, the 'range' concept will not apply and the concept of arithmetic mean will continue to apply.

The multiple year data can only be used if the most appropriate method selected of benchmarking purposes is either transactional net margin method, resale price method, or cost plus method. Further, multiple year data entails use of data for the year under consideration (current year) and data for upto two preceding financial years. Data for the current year is compulsorily to be considered. If the data for the current year is available and is not comparable on account of either qualitative or quantile reasons, the comparable cannot be considered.

Country-by-country (CbC) reporting documentation as per BEPS

The government has now introduced the three-layered transfer pricing documentation requirements in line with the international standard as per the BEPS Action Plan 13. Taxpayers will now be required to prepare a master file, local file, and CbC report. The new regime will be applicable from FY2016/17. The first filing will be due by 30 November 2017. The CbC report will be applicable only for taxpayers having an annual consolidated group turnover of over 750 million euros (EUR) in the immediately preceding financial year (i.e. FY 2015/16).

For Indian subsidiaries with parent companies resident outside India, the CbC report will ordinarily be filed by the parent entity in their home country or by a designated entity in its home country. The Indian tax authorities will access the CbC report through mutual exchange of information agreements with such country, failing which the Indian subsidiary will be required to furnish the report. Significant penalty provisions will be attracted for non-compliance and furnishing inaccurate information.

Thin capitalisation

No prescribed debt-to-equity ratios or thin capitalisation rules exist under Indian taxation law. However, interest paid to related parties at rates or on terms that are considered unreasonably high are disallowable by the tax officer.

Controlled foreign companies (CFCs)

India currently has no CFC rules, so there will be no Indian tax on foreign profits that remain unremitted from offshore subsidiaries.

Tax credits and incentives

Tax incentive provisions normally have conditions applicable for the period within which the preferred activity should be undertaken and the period for which the tax incentive is available. It may also be necessary to fulfil certain other conditions such as 'forming' of a 'new' undertaking.

Real Estate Investment Trusts (REITs)/Infrastructure Investment Trusts (InvITs)

The Securities and Exchange Board of India (SEBI) has enacted regulations relating to two categories of investment vehicles, namely REITs and InvITs.

Pass-through status is provided to REITs in respect of income earned from renting, leasing, or letting out any real estate asset owned directly by the REITs. Thus, rental income is exempt in the hands of REITs. On distribution of rental income, REITs are not

required to withhold taxes. Tax is not required to be withheld by the tenants on payment of rent to the REITs.

The interest paid by special purpose vehicles (SPVs) to business trusts (BTs) is taxable at the investor level (as against the BT itself) when the BT distributes such amounts. Interest income to non-resident investors is taxable at a lower rate of 5% (plus applicable surcharge and cess), whereas residents are taxable at the applicable tax rates.

Dividends distributed by SPVs to the BTs are exempt from levy of DDT in the hands of the SPV. Such dividends are also exempt in the hands of BTs and investors if 100% of the equity shares of the SPV are held by BTs, except in case of shares mandatorily held by another entity as per law, and the dividends are distributed out of profits made after the acquisition of the SPV by BTs. Capital gains (e.g. on sale of shares of SPVs) are taxable in the hands of BTs at the applicable capital gains tax treaty rates. Any other income (including rental income) is taxable at the maximum marginal rate. Onward distributions of such income are exempt in the hands of the investors.

Transfer of units of BTs through stock exchanges are liable to STT, and gains earned by investors on such sale of units are exempt from tax if the units qualify as long-term capital assets. A lower rate of 15% (plus applicable surcharge and cess) is applicable to short-term capital assets. Taxability of capital gains arising to sponsors on exchange of shares in SPVs with units of BTs is deferred to the time of disposal of such units by the sponsor. The applicability of MAT on gains arising from the swap of shares of the SPV for units of BT is deferred to the stage when the units are transferred by the BT. No capital gains tax exemption is available on the swap of other assets with units of BTs.

Tax incentives for undertakings other than infrastructure development undertakings

New industrial undertakings located in 'backward' states and districts notified as such are entitled to full tax exemption of profits for the first three or five years of operation, followed by a partial tax exemption of 30% of profits for the next five years. The list of 'backward' districts has been categorised into category A and category B districts, depending upon the current level of infrastructure development in those areas. The initial tax holiday period is five years in the case of category A districts and three years in the case of category B districts. A similar incentive is also applicable for hotels satisfying prescribed conditions.

If certain conditions are met, a tax holiday is permitted on the profits earned by an undertaking engaged in any of the following:

- Integrated business of handling, storage, and transportation of food grains.
- Developing and building of housing project.
- Scientific research.
- Commercial production or refining of mineral oils.
- Setting up and operating a cold chain for agricultural produce.
- Processing, preservation, and packaging of fruits or vegetables.
- Operating and maintaining a hospital in a rural area.

The tax holiday periods range from five to ten years, and the percentage of the rebate is 30%, 50%, or 100% in initial years and 30% in the later years. The number of years constituting 'initial' and 'later' years varies from sector to sector.

Tax incentives for infrastructure development undertakings

Enterprises engaged in the business of power generation, transmission, or distribution; developing or operating and maintaining a notified infrastructure facility, industrial park, or SEZ; substantially renovating and modernising the existing network of transmission or distribution lines (between specified periods); or laying and operating a cross-country natural gas distribution network are eligible for a tax exemption of 100%

India

of profits for any ten consecutive years falling within the first 15 years of operation (first 20 years in the case of infrastructure projects, except for ports, airports, inland waterways, water supply projects, and navigational channels to the sea).

An investment-linked deduction will be available to Indian companies or their consortium engaged in the business of developing or operating and maintaining of a new infrastructure facility. The taxpayers should have entered into an agreement with the Central or State Government or local authorities in respect of such activities relating to specified infrastructure facilities. This is effective from tax year 2017/18 onwards.

Since now there are investment-linked deductions, the profit-linked deduction available for infrastructure facilities have a sunset clause of 31 March 2017 for commencement of the operations. Thereafter, deduction of 100% of capital expenditure incurred on setting up of the said infrastructure facility will be available with effect from 1 April 2017.

'Infrastructure facility' means roads, including toll roads, bridges, rail systems, highway projects, water supply projects, water treatment systems, irrigation projects, sanitation and sewerage systems or solid waste management systems, ports, airports, inland waterways, inland ports, or navigational channels to the sea.

Tax incentives for exports

Export profit from a new undertaking, satisfying prescribed conditions and set up in an SEZ, is eligible for tax exemption of 100% for the first five years, from the year in which manufacturing commences, followed by a partial tax exemption of 50% for the next five years. A further tax exemption of 50% of the export profit for five years is also available after that, subject to an equal amount of profit being retained and transferred to a special reserve in the books of account.

Tax incentives for units in the North Eastern Region of India

Measures are in place to facilitate the development of the North Eastern Region of India and of the state of Sikkim. Undertakings located in these states that (i) begin to manufacture or produce any eligible article, (ii) undertake substantial expansion, or (iii) commence an eligible business between 1 April 2007 and 1 April 2017 are eligible for a 100% deduction of profits for ten consecutive years.

A list of eligible businesses has been provided by the Indian government. The eligible businesses include hotels (not below two-star category), adventure and leisure sports including ropeways, the provision of medical and health services in nursing homes with a minimum capacity of 25 beds, operating a vocational training institute for hotel management, catering and food crafts, entrepreneurship development, nursing and para-medical training, civil aviation related training, fashion design and industrial training, running an information technology-related training centre, manufacturing of information technology hardware, and bio-technology. Businesses other than the above-listed eligible businesses are not entitled to claim the tax holiday.

Tax incentives for hotels/convention centres located in specified districts

Hotels located in a specified district having a World Heritage Site, that are constructed and that have started functioning at any time during the period 1 April 2008 to 31 March 2013, are eligible for a tax holiday for a period of five years.

Tax incentives for certain income relating to offshore banking units and international financial services centres

A scheduled bank, or any bank incorporated by or under the laws of a country outside India, that has an offshore banking unit in an SEZ or an international financial services centre with a specified income that is subject to prescribed conditions is eligible for a tax exemption of 100% of the specified income for five consecutive years beginning from

the year in which the permission under the Indian Banking Regulation Act, 1949 was obtained and of 50% of the specified income for five consecutive years.

To encourage the location of offshore fund managers in India, a specific regime has been laid down. In the case of an eligible investment fund, fund management activity carried out through an eligible fund manager acting on behalf of such fund will not constitute a business connection in India. An eligible investment fund will not be treated as resident in India merely because the eligible fund manager undertakes fund management activities in India. Offshore funds and fund managers are required to satisfy certain conditions to be eligible for the regime. The conditions are not applicable to funds set up by the government of a foreign state or the Central Bank of a foreign state, a sovereign fund, or such other funds as may be notified by the government of India and subject to fulfilment of conditions as may be specified. Further, the special regime shall be applied in accordance with guidelines and in such manner as the administrative board may prescribe.

Tax incentive for hiring new workmen

With a view to encouraging generation of employment, the benefit of deduction on hiring of new workmen has been extended to all taxpayers who are subjected to tax audit, instead of the earlier provision, which was applicable only to manufacturing units. Further, to enable smaller units to claim this deduction, the benefit has been extended to units employing 50 regular workmen.

To increase employment generation incentive to taxpayers across all sectors (who are subject to tax audit), where emoluments paid to an employee are less than or equal to INR 25,000 per month, the taxpayer will be eligible for deduction of 30% of additional wages paid to new regular workmen in a factory for a period of three years wherein the workmen are employed for not less than 240 days in a year. The benefits of this incentive would also be available in the first year of business, on emoluments paid to all employees. However, no deduction shall be allowed in respect of cost incurred on employees for whom the Government has paid the entire contribution under the Employees' Pension Scheme, and for employees who do not participate in a recognised provident fund. This will be effective from tax year 2016/17 onwards.

Amortisation of cost of spectrum fee for Telecom operators

There was no clarity as to whether spectrum fees paid for by a telecom service provider would be covered within the scope of amortisation provisions, or would be eligible for depreciation claim at the rate of 25%, treating the spectrum fees as an intangible asset. The government has now clarified, by inserting a new provision, that it will allow amortisation of capital expenditure incurred and actually paid by the taxpayer for acquiring the right to use spectrum for telecommunication services, in equal instalments over the period of useful life of the spectrum licence. This will be effective from tax year 2016/17 onwards.

Patent Box Regime

In order to encourage companies to locate high-value jobs associated with the development, manufacture, and exploitation of patents in India, the government has introduced a concessional taxation regime for income from patents. Accordingly, income by way of royalty in respect of a patent developed and registered in India earned by an eligible taxpayer shall be subject to tax at the rate of 10% (plus surcharge and cess) on a gross basis.

An eligible taxpayer means a person resident in India, who is the true and first inventor of the invention, and whose name is entered on the patent register as the patentee.

This will be applicable from the tax year 2016/17.

India

Tax incentive of capital expenditure on certain specified businesses

Capital expenditure is allowed at 150%/100% up to 31 March 2017 in respect of the following specified businesses:

- Setting up and operating cold chain facilities.
- Setting up and operating warehousing facilities for storage of agriculture produce.
- Setting up and operating an inland container depot, freight station, or warehousing facility for storage of sugar, beekeeping, and honey and beeswax production.
- Laying and operating a cross-country natural gas or crude or petroleum oil pipeline network for distribution, including storage facilities being an integral part of such a network.
- Building and operating a hotel of two-star or above category in India.
- Building and operating a hospital with at least 100 beds.
- Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government.
- Developing and building specified housing projects under an affordable scheme of the central/state government.
- Investing in a new plant or newly installed capacity in an existing plant for production of fertiliser.

In case of certain specified businesses (commencing operations on or after 1 April 2012), such as cold chain facility, warehousing for agriculture produce, hospital with at least 100 beds, notified affordable housing projects and production of fertiliser, the deduction is 150% of the capital expenditure incurred on or after 1 April 2012.

The following characteristics and conditions may be noted:

- Any sum received or receivable in cash or in kind on transfer, etc. of the capital asset shall be considered as business income if expenditure on such an asset has been allowed as a deduction under this section.
- Any loss computed in respect of the above specified businesses shall be allowed to be offset or carried forward and offset only against the profits and gains of specified businesses.
- The specified business should:
 - not be set up by splitting up or reconstruction of a business already in existence
 - not be set up by transfer of used machinery or plant exceeding 20% of the total value of the machinery or plant used in such business, and
 - have been approved by the prescribed authority (i.e. the government).

Research and development (R&D) expenditure

A weighted deduction of 200% and 175% of expenditure is available up to 31 March 2017 in respect of expenditure incurred on scientific research in an in-house R&D facility approved by the prescribed authority for companies engaged in specified businesses and in research associations, universities, etc., respectively. Such weighted deduction will be restricted to 150% of the expenditure from tax year 2017/18 to tax year 2019/20. Thereafter, deduction will be restricted to 100% of the expenditure.

A payment made to an approved research association undertaking research in the social sciences or in statistical research, or to an Indian company to be used by it for scientific research, is eligible for a weighted deduction of 125% of the payment made up to 31 March 2017. Such deduction will be restricted to 100% of the expenditure from tax year 2017/18 and onwards.

Contributions made to any National Laboratory, approved scientific research associations, universities, and the Indian Institute of Technology are eligible for a deduction of 200% of the contributions made up to 31 March 2017. Such weighted deduction will be restricted to 150% of the expenditure from tax year 2017/18 to tax year 2019/20. Thereafter, deduction will be restricted to 100% of the expenditure.

Foreign tax credit

See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Withholding taxes

There is an obligation on the payer (either resident or non-resident) of income to withhold tax when certain specified payments are credited and/or paid. Some of the expenses that require tax withholding are as follows.

Payments to resident companies

Nature of payment	Payment threshold for	
	WHT (INR) (1)	WHT rate (%)
Specified type of interest	None	10
Non-specified type of interest	5,000 (2)	10
Professional or technical service	30,000	10
Commission and brokerage	5,000	5
Rent of plant, machinery, or equipment	180,000	2
Rent of land, building, or furniture	180,000	10
Contractual payment (except for individual/HUF)	30,000 (single payment) 100,000 (aggregate payment)	2
Contractual payment to individual/HUF	30,000 (single payment) 100,000 (aggregate payment)	1
Royalty or fees for technical services	30,000	10
Deemed dividend	2,500	10

Notes

1. Payments have different threshold limits. The payer is only required to withhold tax if the total payment within a tax year to a single person (except where specified otherwise) is above the limits specified above.
2. The threshold limit for WHT for non-specified type of interest is INR 5,000, except in the case of interest received from a bank, co-operative society, or deposit with post office, for which it is INR 10,000.

If the Permanent Account Number (PAN) of the deductee is not quoted, the rate of WHT will be the rate specified in relevant provisions of the Income Tax Act, the rates in force, or the rate of 20%, whichever is higher.

The definition of 'royalty' also includes consideration for use of, or right to use, computer software. Transfer of all or any rights in respect of any right, property, or information includes transfer of all or any right to use computer software (including granting of a licence), irrespective of the medium through which such a right is transferred and irrespective of whether any right or property is located in India. Hence, while applying WHT on such payments in the nature of royalty, one needs to consider the definition of royalty as amended by the Budget 2012 with retrospective effect from 1 June 1976.

Payment to non-resident companies

Nature of payment	WHT rate (%)
Interest on foreign currency (subject to conditions)	5
Interest on money borrowed in foreign currency under a loan agreement or by way of long-term infrastructure bonds (or rupee denominated bonds)	5

India

Nature of payment	WHT rate (%)
Interest on investment in long-term infrastructure bonds issued by Indian company (rupee denominated bonds or government security)	5
Non-specified type of interest	20
Royalty and technical fees	10
Long-term capital gains other than exempt income	20
Income by way of winning from horse races	30
Other income	40

Notes

- Percentage to be increased by a surcharge, education cess, and secondary and higher education cess to compute the effective rate of tax withholding.
- Income from units of specified mutual funds is exempt from tax in the hands of the unit-holders.
- Dividends received from Indian companies are tax-free in the hands of the shareholder.
- Short-term capital gains on transfer of shares of a company or units of an equity-oriented fund would be taxable at 15% if they have been subjected to STT.
- Long-term capital gains on transfer of shares (through stock exchange) in listed companies or units of an equity-oriented fund are exempt from tax if they have been subjected to STT.
- There is no threshold for payment to non-resident companies up to which no tax is required to be withheld.
- If the PAN of the deductee is not quoted, the rate of WHT will be the rate specified in relevant provisions of the Act, the rates in force, or the rate of 20%, whichever is higher. The government is in the process of notifying the rules, pursuant to which mandatory quoting of PAN will not be required, subject to certain conditions.
- The payer is obligated to report specific information in the prescribed form (whether or not such payment is chargeable to tax).

Equalisation levy

Action Plan 1 (Digital Economy) of the OECD's BEPS project discussed several options to tackle direct tax challenges in the digital environment. Taking cues from this, an equalisation levy has been introduced, the summary of which is as follows:

- Rate of levy: 6% of the amount of consideration for specified service.
- Meaning of 'specified service': Online advertisement, any provision for digital advertising space, or any other facility or service for the purpose of online advertisement, which includes any other service as may be notified by the Central Government in this regard.
- On whom: Non-resident receiving consideration for specified services from:
 - a person resident in India and carrying on business or profession, or
 - a non-resident having a PE in India.
- Exemption from income tax: The income arising to the non-resident from the specified service and chargeable to an equalisation levy will be exempt from income tax.
- Due date for deposit: 7th day of the following month.
- Non-applicability in specified cases: Equalisation levy will not be charged in the following cases:
 - the non-resident providing specified service has a PE in India and the specified service is effectively connected with the PE
 - the aggregate consideration received or receivable in the previous year by the non-resident does not exceed INR 100,000, or
 - the payment for the specified service by the Indian resident or PE is not for conducting business or a profession in India.

Treaty rates

Some tax treaties provide for lower WHT rates from certain types of income, as follows:

Recipient	WHT (%)			Fee for technical services (12)
	Dividend (1)	Interest	Royalty (12)	
Albania	10	10	10	10
Armenia	10	10	10	10

Vietnam	10	10	10	10
Zambia	5 (10)/15	10	10	10

Notes

1. The treaty tax rates on dividends are not relevant since, under the current Indian tax legislation, most dividend income from Indian companies that is subject to DDT is exempt from income tax in the hands of the recipient.

2. 10% for equipment rental and ancillary services:
 - for other cases in the first five years: 15% if government or specified organisation is the payer and 20% for other payers.
 - for subsequent years: 15% in all cases (income of government organisations is exempt from taxation in the country of source).
3. If at least 10% of capital is owned by the beneficial owner (company) of the company paying the dividend or interest.
4. If at least 20% of capital is owned by the beneficial owner (company) of the company paying dividend or interest.
5. In absence of specific provision, it may be treated as business profits or independent personal services under respective treaties, whichever is applicable.
6. The 'most favoured nation' clause is applicable. The protocol to the treaty limits the scope and rate of taxation to that specified in similar articles in treaties signed by India with an OECD or another country.
7. If royalty relates to copyrights of literary, artistic, or scientific work.
8. If the company paying the dividend is engaged in an industrial undertaking.
9. If at least 25% of capital is owned by the beneficial owner (company) of the company paying the dividend.
10. If at least 25% of capital is owned by the company during at least six months before date of payment.
11. If paid on a loan granted by a bank/financial institution.
12. The tax rate for royalties and fees for technical services, under the domestic tax laws, is 10%. This rate is to be increased by a surcharge at 2.5% on the income tax and education cess at 2% and secondary and higher secondary education cess at 1% on the income tax including surcharge. As a consequence, the effective tax rate is 10.558%. This rate applies for payments made under an agreement entered into on or after 1 June 2005. Accordingly, a tax resident can either use the treaty rate or domestic tax rate, whichever is more beneficial.
13. If interest is received by a financial institution.
14. Taxable in the country of source as per domestic tax rates.
15. If royalty payments arise from the use or right to use trademarks.
16. Tax treaties of certain countries do not have a separate clause specifying the WHT rate for fees for technical services and fees for included services.

List of limited agreements between India and other countries

A list of the countries with which India has entered into limited agreements for double taxation relief with respect to income of airlines/merchant shipping, is given here.

Tax administration

Taxable period

In India, the tax year begins on 1 April and ends on 31 March.

India

Tax returns

Accounts for tax purposes must be made up to 31 March. For persons having business/professional income, the income tax return is required to be filed electronically on or before 30 September of the succeeding tax year. In case the transfer pricing provisions are applicable, the due date for filing of the tax return is on or before 30 November.

Quarterly WHT returns

Quarterly statement of taxes withheld are required to be filed electronically with the tax authorities on or before 31 July, 31 October, and 31 January for the first three quarters of the tax year and on or before 31 May following the last quarter of the tax year.

Obligation to submit tax return for assets located outside India

A resident taxpayer having any asset (including financial interest in any entity) located outside India or signing authority in any account located outside India is mandatorily required to furnish a tax return.

In cases where taxpayers have assets outside India, the extant time limits of four and six years for reopening tax assessments (where income has escaped assessment) has been increased to 16 years. In case of a person who is treated as an agent of a non-resident, the time limit for issuing reassessment notice has been extended from two years to six years.

Payment of tax

Tax is payable in advance (if tax payable for the year exceeds INR 10,000) in specified instalments for every quarter on or before 15 June, 15 September, and 15 December for the first three quarters of the tax year and on or before 15 March for the last quarter of the tax year. Any balance of tax due on the basis of the return must be paid on a self-assessment basis before the return is filed. A tax return will be treated as defective if the tax liability along with interest is not paid on or before the date of submission of the tax return. Interest levied for default in payment of advance tax is computed beginning from the first day of the assessment year to the date of the assessment order.

Tax audit process

Audit for income tax purposes

Persons carrying on business are required to get their books of account audited for income tax purposes if the business turnover exceeds INR 10 million. For persons carrying on a profession, crossing the turnover threshold of INR 5 million would attract the requirement to have its books of accounts audited from 1 April 2017. The penalty for non-compliance with this audit requirement is INR 0.15 million, subject to 1% of total turnover/gross receipts.

Special audit

Tax authorities, at any stage of proceedings, having regard to nature, complexity, and volume of accounts or doubts on correctness of accounts or other reasons, may, after taking necessary approval of Chief Commissioner, direct a taxpayer to get its accounts audited and to furnish the report.

Statute of limitations

The statute of limitations under the Act in the case of submission of returns is one year from the end of the relevant tax year, and for assessment of returns is 33 months (45 months in case transfer pricing provisions are applicable) from the end of the relevant tax year for which the return is filed. The statute of limitations for reassessment ranges from five years to 17 years from the end of the relevant tax year.

Topics of focus for tax authorities

WHT provisions and their applicability to cross-border deals are a topic of great current interest to tax authorities. Transfer pricing (i.e. pricing of international transactions

with associated enterprises) is also an area that is witnessing increased attention by tax authorities in recent years. Two other emerging areas of focus are data analysis and exchange of taxpayer-related information with other countries (*see Inter-governmental agreements in the Other issues section*).

General Anti Avoidance Rule (GAAR)

GAAR provisions introduced in the Act were based on the recommendations of a committee chaired by Dr. Parthasarathi Shome. The government has deferred the coming into effect of these provisions till March 2017. These provisions are being reviewed by the government as part of a comprehensive regime to implement the OECD's BEPS project (commissioned by the G-20 countries, of which India is an active participant). These provisions, if not deferred further, would empower the tax department to declare an 'arrangement', or any part or step thereof, entered into by a taxpayer with the main purpose of obtaining tax benefit to be an 'Impermissible Avoidance Agreement' (IAA), the consequence of which would be denial of tax benefit under the Act or under the applicable tax treaty. Recently, the CBDT has invited suggestions for guidelines it intends to issue to its officers in implementing the GAAR.

Other issues

Mergers and acquisitions

The expression 'merger' has not been defined in the Income Tax Act but has been covered as part of the definition of the term 'amalgamation'. Amalgamation is defined as a merger of one or more companies with another, or the merger of two or more companies to form a new company, in such a way that all the assets and liabilities of the amalgamating company or companies become the assets and liabilities of the amalgamated company, are held by the amalgamated company for a minimum period of five years, and shareholders holding not less than 75% in value of the shares in the amalgamating company or companies become shareholders of the amalgamated company. In case of demerger, the cost of acquisition and period of holding of the assets related to the demerged company shall be available to the resulting company.

Capital gains

No capital gains tax is levied on the transfer of capital assets by an amalgamating company to the amalgamated company, provided the amalgamated company is an Indian company. Similar is the position in case of a demerger by a demerged company to a resulting company.

In cases where shares of an Indian company are transferred by a foreign company or a demerged foreign company to any another foreign company or resulting foreign company, there is no tax payable, provided it satisfies certain specified conditions. Furthermore, the shareholder of the amalgamating company or demerged company is not liable to pay capital gains tax on the exchange of shares with that of the amalgamating company or the resulting company under the scheme of amalgamation.

Carryforward of accumulated losses of amalgamating company

The losses and unabsorbed depreciation of the amalgamating company are deemed to be those of the amalgamated company in the year in which the amalgamation takes place, provided it satisfies certain specified conditions.

In the case of amalgamation of a company owning an industrial undertaking, the amalgamated company shall achieve the level of production of at least 50% of the installed capacity of the undertaking before the end of four years from the date of amalgamation and continue to maintain the minimum level of production till the end of five years from the date of amalgamation. If these conditions are violated, the benefit claimed will be taxed in the hands of the amalgamated company in the year of default.

India

In case of demerger of a company, the accumulated losses or unabsorbed depreciation of the demerged company directly relatable to the undertaking or the division transferred is allowed to be carried forward and offset in the hands of the resulting company.

Amalgamations and demergers normally attract stamp duty at varying rates. Such rates are derived from the laws of the state involved. High court(s), stock exchange, and other regulatory clearances are required for amalgamations or demergers.

Inter-governmental agreements (IGAs)

The Indian government has signed an IGA with the United States (US) to implement the Foreign Account Tax Compliance Act (FATCA) in India. According to the IGA, foreign financial institutions (FFIs) in India are required to report tax information about US account holders to the Indian government, which will, in turn, relay that information to the US IRS. Furthermore, the US Internal Revenue Service (IRS) will provide similar information about Indian citizens having any accounts or assets in the United States. This automatic exchange of information began from 30 September 2015. Subsequent to the signing of the IGA, the Indian government enacted rules relating to FATCA reporting in India.

Significant developments

The government has issued several tax incentives to enhance the Indonesian economy. One prominent incentive is the temporary revamping of the fixed asset revaluation facility, which allows taxpayers to increase the value of their fixed assets by paying a certain amount of final tax on the incremental value. Although this facility has existed for quite a while, the applicable final tax rate for the period of October 2015 to 31 December 2016 is much lower (i.e. 3% to 6%, as opposed to 10% under the existing facility).

Improvements have also been carried out in the investment facilities area, such as the Income Tax Allowance and Corporate Income Tax (CIT) Reduction facilities, where the government has tried to streamline the process through a one-door policy in order to speed up the application process. The government has also expanded the eligible industries for both income tax facilities. Regulatory improvements have also been put in place, whereby an investment licence, under certain criteria, can be issued within three hours.

The government has announced the 10th Economic Policy that focuses on the draft amendment to the current Negative List of Investment (NLI) to be issued in mid-2016. The proposed NLI is intended to accelerate both foreign and domestic investments distributed across Indonesia and to develop the country's competitiveness in the international market. At the same time, this new NLI is also aimed to protect national strategic business as well as Indonesian small and medium enterprises (SMEs).

The government has also issued several value-added tax (VAT) facilities to boost the national transportation industry. This is in line with the President's maritime axis doctrine.

A new comprehensive facility called a Special Economic Zone (*Kawasan Ekonomi Khusus* or *KEK*) has also been introduced to develop several areas in Indonesia. So far, the tax facilities under this regime are the most complete as they cover CIT, VAT, luxury-goods sales tax (LST), import income tax, import duty, and excise facilities. In addition to these tax facilities, this regime also provides facilities in other aspects, namely traffic of goods, manpower, immigration, land procurement, and licensing. Currently, there are eight areas that have been designated as KEKs.

Separately, to maintain the stability of rupiah (IDR), the government has also put in place several measures, such as requiring the use of rupiah for general onshore transactions. A tax incentive in the form of lower interest withholding tax (WHT) is also given to exporters who put their export proceeds in time deposit accounts in banks in Indonesia, with rupiah currency accounts being given an even lower WHT rate than United States dollar (USD) currency accounts.

Indonesia also continues the reform of the tax system. In addition to the proposal of the bill of tax law amendments in its national regulatory programmes to be discussed in the Parliament for the next five years, the government has also put the tax amnesty bill in the programme to be discussed in 2016. Subject to the finalisation of the discussion, the

Indonesia

tax amnesty law is expected to be applied in 2016 and is intended to cover all undeclared assets, including offshore assets.

A regulation on the allowable debt-to-equity ratio for interest deduction purposes has also been issued, with a ratio of 4:1 to be applied starting fiscal year 2016.

In the international tax space, Indonesia signed a Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information on 4 June 2015 and is committed to applying this using the Common Reporting Standard (CRS) issued by the Organisation for Economic Co-operation and Development (OECD).

Separately, Indonesia and Netherlands signed a protocol to the 2002 Indonesia - Netherlands Tax Treaty in Jakarta on 30 July 2015. The key features of this protocol include a 5% WHT rate for certain dividends and interest. This protocol is currently pending the ratification process.

Taxes on corporate income

Resident corporations are taxed based on worldwide income. A foreign company carrying out business activities through a permanent establishment (PE) in Indonesia will generally be required to assume the same tax obligations as a resident taxpayer.

Taxable business profits are calculated on the basis of normal accounting principles as modified by certain tax adjustments. Generally, a deduction is allowed for all expenditures incurred to obtain, collect, and maintain taxable business profits. A timing difference may arise if an expenditure recorded as an expense for accounting cannot be immediately claimed as a deduction for tax (*see the Deductions section*).

Resident taxpayers and Indonesian PEs of foreign companies have to settle their tax liabilities either by direct payments, third party withholdings, or a combination of both. Foreign companies without a PE in Indonesia have to settle their tax liabilities for their Indonesian-sourced income through withholding of the tax by the Indonesian party paying the income.

Corporate income tax (CIT) rates

A flat CIT rate of 25% applies to net taxable income.

Public company discount

Public companies that satisfy a minimum listing requirement of 40% and certain other conditions are entitled to a tax discount of 5% off the standard rate, providing an effective tax rate of 20%.

Small company discount

Small enterprises (i.e. corporate taxpayers with an annual turnover of not more than IDR 50 billion) are entitled to a 50% tax discount of the standard rate, which is imposed proportionally on taxable income on the part of gross turnover up to IDR 4.8 billion. Certain enterprises with gross turnover of not more than IDR 4.8 billion are subject to final income tax at 1% of turnover.

Final income tax

Certain types of income are subject to a final income tax at a specified percentage of the gross amount of income, without regard to any attributable expenses.

Income	Tax rate (%)
Rental of land and/or building	10
Proceeds from transfers of land and building rights	5

Income	Tax rate (%)
Fees for construction work performance	2/3/4
Fees for construction work planning	4/6
Fees for construction work supervision	4/6
Interest on time or saving deposits and on Bank of Indonesia Certificates (SBIs), other than that payable to banks operating in Indonesia and to government-approved pension funds	20 (1)
Interest on bonds, other than that payable to banks operating in Indonesia and government-approved pension funds	15 (2)
Proceeds from sale of shares on Indonesian stock exchanges. To use this rate, founder shareholders must pay tax at 0.5% of the market price of their shares upon listing; otherwise, gains on subsequent sales are taxed under normal rules	0.1
Income from lottery prizes	25
Certain income received by individuals and corporates (except PEs) with gross turnover of not more than IDR 4.8 billion in one fiscal year	1 (3)

Notes

1. Different rates apply on interest received from time deposits sourced from export proceeds (*Devisa Hasil Ekspor*).
2. If the recipient is a mutual fund registered with the Financial Services Authority (*Otoritas Jasa Keuangan* or OJK), the tax rate is 5% until 2020 and 10% thereafter. If the recipient is a non-resident taxpayer, the tax rate is 20% or a lower rate in accordance with the relevant tax treaty.
3. Taxpayers must calculate, pay, and report the tax due to the Indonesian Tax Office (ITO) by themselves.

Resident companies, PEs, representatives of foreign companies, organisations, and appointed individuals are required to withhold the above final tax from the gross payments to resident taxpayers and PEs.

Special industries and activities

Companies engaged in upstream oil and gas and geothermal industries typically have to calculate CIT in accordance with their production sharing contracts (PSCs). Certain companies engaged in metal, mineral, and coal mining are governed by a contract of work (CoW) for the income tax calculation. Different provisions may apply to them, pertaining to CIT rates, deductible expenses, and how to calculate taxable income.

Note that such contractual-based concessions are no longer available to new mining projects since the enactment of the Mining Law in 2009. The Mining Law stipulates that general prevailing tax laws/regulations apply to mining projects; consequently, any tax facilities should be provided accordingly, except as otherwise stated in a particular mining licence.

Local income taxes

There are no local taxes on income in Indonesia. *For a list of other local taxes, see Regional taxes in the Other taxes section.*

Corporate residence

A company is treated as a resident of Indonesia for tax purposes by virtue of having its establishment or its place of management in Indonesia.

Permanent establishment (PE)

Under the Income Tax Law, a non-resident company may be treated as having a taxable presence if it runs a business or conducts activities in Indonesia, which can be in the form of:

- a place of management

Indonesia

- a branch of the company
- a representative office
- an office building
- a factory
- a workshop
- a warehouse
- a room for promotion and selling
- a mining and extraction of natural resources
- a mining working area for oil and natural gas
- a fishery, animal husbandry, agriculture, plantation, or forestry location
- a project of construction, installation, or assembly
- the furnishing of services in whatever form by employees or other person, insofar conducted not more than 60 days within a 12-month period
- a person or corporation acting as a dependent agent
- an agent or employee of an insurance company that is not established and domiciled in Indonesia that receives insurance premiums or insures risk in Indonesia, and
- the computers, electronic agent, or automated equipment owned, leased, or used by an electronic transactions provider to conduct business via the internet.

Where the non-resident company is resident in a country that has a tax treaty with Indonesia, the rules on a PE creation may be changed; usually there is a longer 'time test' for certain activities performed in Indonesia.

Other taxes

Value-added tax (VAT)

With a few exceptions, VAT is applicable on deliveries (sales) of goods and services within Indonesia at a rate of 10%. VAT on export of goods is zero-rated while the import of goods is subject to VAT at a rate of 10%. Zero-rated VAT is also applicable on exported services, but subject to a Ministry of Finance (MoF) limitation. Currently, only certain exported services, including toll manufacturing services, are subject to the 0% VAT rate. Services performed within the Customs Area for customers outside of the Customs Area are considered as locally delivered and are therefore subject to the regular VAT rate of 10%. Inbound use or consumption of foreign services or intangible goods, with a few exceptions, is also subject to a self-assessed VAT at a rate of 10%.

The VAT law allows the government to change the VAT rate within the range of 5% to 15%. However, since the enactment of the VAT law in 1984, the government has never changed the VAT rate.

In general, VAT collection is based on the accrual principle, whereby VAT must be collected at the time of delivery of taxable goods or services. The term delivery, in this case, is defined as the time when risk and ownership of goods have been transferred or when income from a service delivery can be reliably estimated or measured. In the accrual system, income or receivables are acknowledged when a transaction takes place, regardless of whether the transaction has been paid for or not. The recognition of revenue or receivables is indicated by the issue of a commercial invoice, which is a source document for this recognition and a basis for recording it.

VAT filing is done on a monthly basis, with payment and filing being due no later than the last day of the month following the taxable delivery.

Luxury-goods sales tax (LST)

In addition to VAT, some goods (e.g. certain household appliances, sport equipment, motor vehicles, luxury residences) are subject to LST upon import or delivery by the manufacturer to another party at rates currently ranging from 10% to 125%.

Import duty

Import duty is payable at rates from 0% to 150% on the customs value of imported goods. Customs value is calculated on the cost, insurance, and freight (CIF) level.

Group	Good	Rate (%)
Automobiles	Passenger and commercial	5 to 50
Automobile components	Incompletely knocked down	0 to 10
Vessels	Ships, boats, and floating structures	0 to 5
Electronic goods	Camera, television, refrigerator, cellular phone, and others	0 to 15
Footwear		5 to 30
Beverages, ethyl alcohol, and alcoholic drinks	Ethyl alcohol, juice, beer, wine, spirits, and other beverages	5 to 150, or IDR 14,000/litre
Essential oils and resinoids	Odoriferous substances	5 to 150
Agricultural products	Animal and vegetable products	0 to 30
Textile, textile products, and accessories	Bags, harnesses, apparels, clothing accessories, etc.	5 to 35
Others	Chemicals, pharmaceutical products, plastic, rubber, and others	0 to 30

As a commitment to liberalising trade, the Indonesian government is progressively lowering import duty rates on most products. Higher duty rates remain to protect certain industries and goods regarded as sensitive for security or social and cultural reasons.

Duty relief/exemption/deferral

The Indonesian government offers duty relief, duty exemption, and duty deferral concessions to foreign and domestic investors in order to promote the development of local and export industries. Such concessions include the *Badan Koordinasi Penanaman Modal* (BKPM) Masterlist, Bonded Zone, Bonded Warehouse, import duty exemption and drawback for exports, Free Trade Zone (FTZ) in Batam, Bintan, and Karimun, Association of Southeast Asian Nations (ASEAN) duty rates, Free Trade Area (FTA) agreement duty rates with several countries, Indonesia-Japan Economic Partnership Agreement (IJEPA), MITA (main partners) lanes, and Authorised Economic Operator.

Land and buildings tax

Land and buildings tax (*Pajak Bumi dan Bangunan* or PBB) is a part of regional taxes, which are governed under Regional Taxes and Retribution (*Pajak Daerah dan Retribusi Daerah* or PDRD) Law in which each regional government has to issue a regulation (*Peraturan Daerah* or PERDA) to regulate PBB in its territory.

The scope of PBB under PDRD Law covers all land and buildings except for the following industries, which are governed by separate regulations:

- Forestry.
- Plantation.
- Mineral and coal mining.
- Oil, gas, and geothermal mining.
- Other industries located in national waters outside the territory of the regional area.

Under PDRD Law, the PBB rate is maximum 0.3% and the tax due is calculated by applying the tax rate on the sale value of the tax object (*Nilai Jual Objek Pajak* or NJOP) deducted by non-taxable NJOP. The non-taxable NJOP is set at minimum of IDR 10 million. Any changes are to be made by issuing a PERDA.

Tax on land and buildings transfer

A transfer of land and buildings will cause income tax on the deemed gain on the transfer/sale to be charged to the transferor/seller. The tax is set at 5% of the gross

Indonesia

transfer value or the government-determined value, whichever is greater (*see Final income tax in the Taxes on corporate income section*).

Duty on the acquisition of land and building rights

In a land and building transfer, the acquirer is liable for duty on the acquisition of land and building rights (*Bea Pengalihan Hak atas Tanah dan Bangunan* or BPHTB) at a maximum of 5% of the greater of the transaction value or the government-determined value. Similar to PBB, BPHTB has been made a part of regional taxes.

Stamp duty

Stamp duty is nominal and payable as a fixed amount of either IDR 6,000 or IDR 3,000 on certain documents.

Payroll taxes

There are no additional payroll taxes applicable other than those for social security contributions and employee income tax withheld by employer on the salary payment.

Social security contributions

Employers are responsible for ascertaining that their employees are covered by the workers social security program managed by *Badan Penyelenggara Jaminan Sosial* (BPJS), which provides working accidents protection, death insurance, old age savings, health care, and pension. The program calls for premium contributions from both the employers and the employees. Employees' contributions are collected through payroll deductions. The premium contributions borne by employers are calculated as a percentage of regular salaries/wages, ranging from 0.24% to 4%.

The scheme applies to all employees, including expatriates who have been working in Indonesia for more than six months.

Regional taxes

A corporate taxpayer may be liable for a number of regional taxes and retributions. The rates range from 1.5% to 35% of a wide number of reference values determined by the relevant regional governments. The following are regional taxes, other than PBB and BPHTB, that may apply:

- Motor vehicle tax.
- Motor vehicle ownership transfer fee.
- Motor vehicle fuel tax.
- Surface water tax.
- Cigarette tax.
- Hotel tax.
- Restaurant tax.
- Entertainment tax.
- Advertisement tax.
- Road illumination tax.
- Non-metal and rock minerals tax.
- Parking tax.
- Ground water tax.
- Swallow-nest tax.

Branch income

Branch profits are subject to the ordinary CIT rate of 25%. The after-tax profits are subject to a WHT (i.e. branch profits tax or BPT) at 20%, regardless of whether the profits are remitted to the home country. However, a concessional WHT rate may be applicable where a tax treaty is in force (*see the Withholding taxes section for more*

information). The BPT may be exempt if the profits are entirely reinvested in Indonesia (see the *Tax credits and incentives* section for more information).

Income determination

Inventory valuation

Inventories must be measured at cost by using either the average or first in first out (FIFO) method. Once a costing method is adopted, it must be applied consistently.

Capital gains

Capital gains are generally assessable together with ordinary income and subject to tax at the standard CIT rate. However, gains from the transfer of land and buildings are not subject to regular CIT but rather are subject to final income tax at a rate of 5% of the transaction value or the government-determined value, whichever is higher.

The proceeds from sales of shares listed on the Indonesian stock exchange are not subject to normal CIT. Instead, the proceeds are subject only to a final WHT of 0.1% of the gross sales consideration. An additional tax of 0.5% applies to the share value of founder shares at the time an initial public offering takes place, irrespective of whether the shares are held or sold. Shareholders may elect not to pay this tax, in which case the actual gain will be subject to normal tax at the time the shares are sold.

Dividend income

In principle, dividend income received by a resident taxpayer from a limited liability company (generally referred to as a *Perseroan Terbatas* or PT) is taxable as ordinary income for the taxpayer receiving the dividend. However, if the dividend recipient is a PT with a minimum shareholding of 25% in the company paying the dividend and the dividend is paid out of retained earnings, it is exempt from CIT.

Where the recipient is not resident in Indonesia, a WHT rate of 20% applies, subject to variation by tax treaties (see the *Withholding taxes* section for more information).

The same rules apply to stock dividends (bonus shares), including dividends paid out of share premium (*agio*).

Interest income

Interest income on time or saving deposits and on Bank of Indonesia Certificates (SBIs) received by a resident company or a PE is taxed at a final tax rate of 20%.

Exchange gains and losses

Gains and losses arising from currency fluctuations are generally recognised on an accrual basis in accordance with the prevailing Indonesian Accounting Standards, which resemble International Accounting Standards in most respects.

Foreign income

Foreign branch income of an Indonesian company must be accounted for as Indonesian taxable income under the controlled foreign companies (CFCs) regulation. These rules apply to Indonesian tax residents owning at least 50% of the paid-up capital (shares) in a CFC. The rules make no reference to such terms as tax avoidance or tax evasion and therefore apply even if the CFC is domiciled in a non-tax haven country. The only situation in which the rules do not apply is when the CFC's shares are listed on a recognised stock exchange. In very broad terms, under the CFC rules, the Indonesian shareholder of the CFC is deemed to receive a dividend with respect to the CFC profits based on a shareholding proportional calculation.

Deductions

In general, expenses incurred in the ordinary course of business (to obtain, collect, and maintain taxable income) are deductible, subject to the requirements for documentary support.

Note that expenses relating to gross income subject to final income tax are not deductible for CIT purposes.

Depreciation, amortisation, and depletion

Depreciable/amortisable assets include both tangible and intangible property or costs, including the cost of extending building use rights, rights for business use, rights for use, and goodwill, with a useful life of more than one year, except land that is owned and used in business. Depreciation and amortisation may be calculated under the straight-line method or the declining-balance method on an individual asset basis. Once a method is chosen, it should be applied consistently. In calculating depreciation, depreciable assets are divided into the following classes:

Class	Depreciation/amortisation rate (%)	
	Straight-line method	Declining-balance method
Property:		
Useful life of 4 years	25	50
Useful life of 8 years	12.5	25
Useful life of 16 years	6.25	12.5
Useful life of 20 years	5	10
Buildings:		
Permanent	5	-
Non-permanent	10	-

Special rules apply for assets used in certain business fields and/or certain areas. Tax depreciation need not conform to book depreciation.

The costs incurred for acquiring rights, with a beneficial life of more than one year, for mining, oil, and natural gas concessions; forest concessions; and other rights to exploit natural resources should be amortised by the production-unit method. Except for the right to acquire oil and natural gas concessions, the depletion rate used should not exceed 20% *per annum*.

Organisational and start-up expenses

The costs of incorporation and expansion of the capital of an enterprise are claimed in full in the year in which the expenditure is incurred or are amortised using either the declining-balance or straight-line method at the above rates.

Costs incurred before the commencement of commercial operations with a useful life of longer than one year are capitalised and amortised according to the above rates.

Interest expense

Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes.

Interest on loans relating to time deposits (which income is subject to a final tax) is not deductible.

Interest on loans used to buy shares where dividends to be received are not subject to income tax is also not deductible.

A debt-to-equity ratio of 4:1 is generally applicable starting from fiscal year 2016, which means that the amount of debt allowable in order to obtain full deductibility of the financing cost is limited to four times the equity amount. Exemption applies to certain taxpayers.

Bad debts

Uncollectible debts are deductible for tax purposes, with the following conditions:

- The creditor has recognised the amount of uncollectible receivables as expenses in the commercial income statement.
- The taxpayer must submit a list of uncollectible account receivables to the Directorate General of Tax.
- A legal case to enforce collection has been brought to a District Court or government agency that handles state receivables, there is a written agreement on cancellation of receivables/debt release and discharge between the concerned creditor and debtor, it has been publicised in a general or a special publication, or the debtor has otherwise acknowledged that his/her debts have been cancelled.

Charitable contributions

Donations for national disasters, education facilities, sport development, and social infrastructures, with certain conditions, may be deductible in the fiscal year when the donations are provided.

Benefits in kind

Most benefits received in kind by employees, such as free housing, are not tax-deductible to the entity providing the benefit. Free motor vehicle and telephone expenses, including depreciation, are tax-deductible but only for 50% of the total expenses incurred. Expenses for meals and transportation made available to all staff are tax-deductible. Apart from these, certain benefits in kind (e.g. housing provided in remote areas as designated by the MoF, Integrated Economic Development Zones as designated by Presidential Decree) can also be claimed as tax-deductible expenses.

Fines and penalties

Fines, penalties, and interest on underpayment of taxes are not deductible.

Taxes

Land and buildings tax and regional taxes may be deducted from taxable income. With several exceptions, input VAT is also deductible against taxable income as long as it is not claimed as a credit against output VAT.

Net operating losses

Losses may be carried forward for a maximum period of five years. Carrying back of losses is not permitted. Offsetting losses within a corporate group is not permitted.

Payments to foreign affiliates

WHT is applied as a final tax on the recipient for payments of royalties, interest, and service fees to foreign non-resident companies. Excessive and non-arm's-length payments to related parties are disallowed as deductions. The tax law denies deductions for all payments from a branch to its head office for royalties, interest, and services provided by the head office (exceptions apply for loans between bank branches and their head offices).

Group taxation

Consolidated returns are not allowed in Indonesia.

Indonesia

Transfer pricing

Transactions between related parties must be consistent with the arm's-length principle. If the arm's-length principle is not followed, the Director General of Tax (DGT) is authorised to recalculate the taxable income or deductible costs arising from such transactions applying the arm's-length principle.

Under the General Tax Provisions and Procedures (*Ketentuan Umum dan Tata Cara Perpajakan* or KUP) Law, the government requires specific transfer pricing documentation to prove the arm's-length nature of related-party transactions.

Detailed transfer pricing disclosures are required in the CIT return, which include the following:

- The nature and value of transactions with related parties.
- The transfer pricing methods applied to those transactions and the rationale for selecting the methods.
- Whether the company has prepared transfer pricing documentation.

Transfer pricing disputes may be resolved through the domestic objection and appeal process, or, where the dispute involves a transaction with a related party in a country that is one of Indonesia's tax treaty partners, the parties may request double tax relief under the Mutual Agreement Procedures (MAP) article of the relevant tax treaty. There is a restriction that an MAP application cannot be lodged when the Tax Court has declared an end to the court hearing process, and an existing MAP will cease when the Tax Court announces its decision. If a party is not satisfied with the Tax Court decision, a judicial review by the Supreme Court is allowed.

The tax law authorises the DGT to enter into Advance Pricing Agreements (APAs) with taxpayers and/or another tax country's tax authority only on the future application of the arm's-length principle to transactions between related parties; consequently, taxpayers should not expect an APA to be 'rolled-back' to address any transfer pricing matters in open years in relation to the same/similar transactions. Once agreed, an APA will typically be valid for a maximum of three tax years after the tax year in which the APA is agreed or four years if the process involves cooperation with foreign tax authorities that escalate an APA application to be an MAP in order to settle any ongoing double taxation in accordance with a relevant tax treaty.

Increase in transfer pricing focused investigations

The number of tax audits with transfer pricing as the key focus area has continued to increase following the issuance of regulations relating to transfer pricing. The DGT has issued detailed guidelines that, broadly stated, typically follow OECD principles. Transactions under particularly close scrutiny include payments of royalties and technical or management services fees, inter-company services, royalty and financing transactions, and exports to related parties.

Where a taxpayer has no documentation available to substantiate these transactions, there is a high risk that deductions for the payments will be denied in full. In this regard, the 30-day time limit within which a taxpayer must produce any documentation requested by the ITO during an audit is being strictly enforced. Any documentation provided after the 30-day time limit is being disregarded by the ITO in its decision making process.

Transfer pricing specific audits are regularly conducted by the ITO, with the high priority targets generally identified based on:

- profit performance of the company (companies that have incurred consistent losses will be the highest priority, but there is also a risk of being selected for companies with profits below industry norms) and

- materiality of the company's related-party transactions.

The ITO has issued questionnaires to several taxpayers who are not under an audit that focus primarily on transfer pricing issues. It is possible that the information gathered by the ITO from these questionnaires will lead to follow-up investigations or audits in some cases.

The DGT has also reinforced tax audit procedures for taxpayers with related-party transactions. This regulation provides more clarity and is more relevant with the current transfer pricing issues in practice (e.g. the use of the median point as the basis of correction, mandatory use of the comparable uncontrolled price [CUP] method for interest, the use of multiple year data for comparables). Comprehensive forms required to be completed by the taxpayers during a tax audit are also provided in the regulation.

Thin capitalisation

The MoF is authorised to make a determination on an appropriate ratio of debt to equity. The general ratio of 4:1 is applicable for group companies, except for exempted taxpayers.

Controlled foreign companies (CFCs)

See Foreign income in the Income determination section for a description of the CFC regime.

I

Tax credits and incentives

Foreign tax credit

Tax paid or payable in foreign countries upon income from abroad received or obtained by a resident taxpayer may be credited against tax payable in Indonesia in the same fiscal year.

The amount of tax credit is the same amount as income tax paid or payable abroad, but shall not exceed tax payable calculated according to the Indonesian tax law.

Revaluation of fixed assets

Certain taxpayers may apply for fixed asset revaluation for tax purposes with approval from the DGT. The excess of the fair market value over the tax book value of the revalued assets is subject to final income tax at a rate of 10%. There is a special program for revaluation of fixed assets for submission made between the period from 20 October 2015 to 31 December 2016, which is subject to different rules. Below are the key features of this special program:

- Lower final income tax rates of 3%, 4%, and 6% apply to the applications submitted in 2015, the first half of 2016, and the second half of 2016, respectively.
- Revaluation can be conducted on some or all tangible fixed assets owned by a taxpayer.

Income tax concessions

CIT reduction

The MoF may provide an avenue for CIT reduction of 10% to 100% of the CIT due for 5 to 15 years from the start of commercial production. A maximum reduction of 50% may be provided to firms in telecommunication and information industries with new capital investment plans of IDR 500 billion to IDR 1 trillion. The period can be extended to 20 years if it is deemed necessary for the national interest.

This facility is provided to firms in pioneer industries that have a wide range of connections, provide additional value and high externalities, introduce new

Indonesia

technologies, and have strategic value for the national economy. Currently, this facility is available for the following business sectors:

- Upstream metal.
- Oil refinery.
- Base organic chemicals sourced from oil and gas.
- Machinery.
- Telecommunication and information.
- Sea transportation.
- Processing industry on agriculture, forestry, and fishery products.
- Processing industry in a Special Economic Zone (*Kawasan Ekonomi Khusus* or KEK).
- Economic infrastructure other than those under the Government Cooperation with Business Entities (*Kerjasama Pemerintah dengan Badan Usaha*).

The applicant must meet the following criteria to be eligible for this tax facility:

- Incorporated in Indonesia no earlier than 15 August 2011.
- Has a legalised new capital investment plan of a minimum of IDR 1 trillion (IDR 500 billion for telecommunication and information industries).
- Meets the applicable debt-to-equity ratio as required by the MoF.
- Provided a commitment letter to deposit a minimum of 10% of their planned investment value in banks located in Indonesia.

An application must be submitted to the Investment Coordinating Board (*Badan Koordinasi Penanaman Modal* or BKPM) Chairman. A proposal for the MoF's approval will be made by the BKPM Chairman after carrying out research on the applicant. Under the latest regulation, the proposal can be submitted to the MoF until 15 August 2018.

If the facility is granted, taxpayers should submit periodic reports on the realisation of their investment plans, the use of their funds deposited in the Indonesian banks, and the realisation of production. Failure to realise the investment plan and to submit the above periodic reports will result in the termination of the tax facility.

Income tax allowance

The MoF may provide the following tax concessions to PT companies following their investment in certain designated business areas or in certain designated regions:

- A reduction in net income of up to 30% of the amount invested, prorated at 5% for six years of the commercial production, provided that the assets invested are not transferred out within six years.
- Accelerated depreciation and/or amortisation deductions.
- Extension of tax loss carryforwards for up to ten years.
- A reduction of the WHT rate on dividends paid to non-residents to 10% (or lower if treaty relief is available).

The applicant must meet one of the following high-level criteria to be eligible for the above tax facilities:

- High investment value or for export purposes.
- High absorption of manpower.
- High local content.

Recommendation from the BKPM Chairman must first be obtained, together with the application for investment approval, before MoF approval for the tax facilities can be sought.

Special Economic Zones (Kawasan Ekonomi Khusus or KEKs)

Taxpayers conducting business in KEKs may enjoy tax facilities. The business should cover the main activities determined for each KEK and other activities in each KEK. The designation of an area as a KEK is set out in a specific government regulation. Currently, there are eight areas designated as KEKs.

Taxpayers must meet the following criteria to be eligible for tax facilities in KEKs:

- For taxpayers organising the KEK's business activity:
 - Have been stipulated by the relevant government agency to be a business entity that develop or manage a KEK.
 - Have an agreement on KEK with the relevant government agency.
 - Created area boundaries of the KEK's activities.
- For taxpayers carrying out business activity in the KEK:
 - Are a domestic taxpayer.
 - Have a legalised new capital investment plan from the Administrator of the KEK.
 - Have an information system connected to the Directorate General of Customs and Excise.

A CIT reduction facility may be granted for new taxpayers with new capital invested in the production chain of main activities in a KEK, as described below:

Investment plan (IDR, in billions)	Reduction period (years)	CIT reduction
Less than 500	5 to 15	MoF discretion
500 up to 1,000	5 to 15	20% to 100%
More than 1,000	10 to 25	20% to 100%

Taxpayers being rejected for the CIT reduction facility and taxpayers carrying out other activities in a KEK may apply for similar income tax allowance under income tax concessions.

In addition to the above income tax facilities, taxpayers in a KEK are also entitled to the following tax facilities:

- Non-collection of VAT and LST on importation or domestic purchases of certain goods.
- Non-collection of VAT and LST on the delivery of certain goods between taxpayers in a KEK.
- Non-collection of import income tax (Article 22).
- Postponement of import duty on capital goods and equipment, as well as goods and materials for processing.
- Exemption of excise on goods to be used to produce non-excisable goods.

Integrated Economic Development Zones (Kawasan Pengembangan Ekonomi Terpadu or KAPETs)

Companies conducting business in a KAPET may enjoy tax facilities. The designation of an area as a KAPET is set out in a specific Presidential Decree. Currently, there are 13 areas designated as KAPETs.

The tax facilities are as follows:

- Non-collection of VAT and LST on certain luxury goods transactions.
- Exemption from prepaid income tax on the importation of capital goods and other equipment (Article 22) directly related to production activities.
- Postponement of import duty on capital goods and equipment, as well as goods and materials for processing.
- Exemption from import duty for four years on machinery and certain spare parts.

Indonesia

Bonded Zones (Kawasan Berikat or KBs)

KB facilities are provided to companies producing finished goods that are mainly for export, with a domestic sales quota of 50% of the previous year export realisation value and/or sales value to other KBs.

The tax facilities are as follows:

- Postponement of import duty.
- Non-collection of VAT, LST, and Article 22 Income Tax.
- Exemption of excise.

The facilities are provided in respect of:

- Importation or domestic purchases of goods for further processing.
- Importation of office equipment to be used only by the KB company concerned.
- Importation of plant equipment and machinery related directly to manufacturing activities to be used only within or by the KB company concerned.

The traffic of goods between KB companies as well as between a KB company and its supporting contractors is also facilitated by means of the same tax facilities. As a result, VAT and LST do not need to be collected for the following traffic goods:

- Shipments of products from a KB company to another KB company for further processing.
- Shipments of goods and/or materials from a KB company to a non-KB company within the Customs Area in a subcontract arrangement, as well reshipment of goods processed by the non-KB company to the KB company.
- The lending of plant, machinery, or equipment by a KB company to another KB company or non-KB company within the Customs Area, and the reshipment of the same machinery or equipment to the KB company in a subcontract arrangement.

Bonded warehouse

The bonded warehouse concession is applicable for goods that support the manufacturing industry. The tax facilities are as follows:

- Postponement of import duty.
- Non-collection of VAT, LST, and Article 22 Income Tax.
- Exemption of excise.

Free Trade Zone (FTZ) in Batam, Bintan, and Karimun

Goods entered into and goods delivered amongst companies inside an FTZ (*Kawasan Perdagangan Bebas* or KPB) may also enjoy tax facilities.

Some administrative requirements in an FTZ are:

- Business Licence from the Management Board of the FTZ (*Badan Pengusahaan Kawasan* or BPK).
- The imported goods must be in line with the business licence.
- Customs procedures (including customs audit, customs penalties) are applicable in the FTZ.
- No requirement to be registered as a taxable enterprise (*Pengusaha Kena Pajak* or PKP) for VAT purposes.

The goods entered into and delivered amongst companies inside an FTZ are exempted from import duty and excise. In addition, the import taxes (i.e. VAT, LST, and Article 22 Income Tax) are not collected.

Transactions of intangible goods and taxable services are exempted from VAT, except for those delivered to other Indonesia Customs Area and KB companies.

When goods exit from an FTZ to other Indonesia Customs Area, the liable import duty and import taxes should be paid.

Reinvestment of branch profits

PEs that reinvest their after-tax profits in Indonesia within the same year or no later than the following year are exempt from BPT on these profits. The reinvestment should be one of the following forms:

- As a founder or a participant founder in a newly established Indonesian company through capital participation.
- As a shareholder of an established Indonesian company through capital participation.
- Acquisition of a fixed asset used by the PE to conduct its business or activities in Indonesia.
- Investment in the form of an intangible asset used by the PE to conduct its business or activities in Indonesia.

Shares in a newly established company shall not be transferred until, at a minimum, two years from the date that the company commences commercial production. With regard to the investment in an established Indonesian company, acquisition of a fixed asset, or investment of an intangible asset, the investment shall not be transferred until, at a minimum, three years after the investment.

Other incentives

Income earned by venture capital companies in the form of profit sharing from their investments in Indonesia is exempt from tax, provided that the following conditions are met:

- Entities are small or medium-scale businesses in one of the sectors designated by the Indonesian government.
- Investments are not listed on the Indonesian stock exchange.

Withholding taxes

Indonesian income tax is collected mainly through a system of WHTs. Where a particular income item is subject to WHT, the payer is generally held responsible for withholding or collecting the tax. These WHTs are commonly referred to using the relevant article of the Income Tax (*Pajak Penghasilan* or PPh) Law, as follows.

Article 23/26 Income Tax (PPh 23/26)

PPh 23/26 is levied on a variety of payments to corporations and individuals, resident and non-resident, at the following rates:

Recipient	WHT (%)				
	Dividends		Interest	Royalties	Branch profits (10)
	Portfolio	Substantial holdings			
Resident corporations	15	0	15	15	N/A
Resident individuals	10	10	15	15	N/A
Non-resident corporations and individuals					
Non-treaty	20	20	20	20	0/20

Domestic Article 23 WHT is also payable at the rate of 2% for most types of services where the recipient of the payment is an Indonesian resident.

Notes

- Service fees, including for technical, management, and consulting services, rendered in Indonesia are subject to WHT at rates of 5% for Switzerland; 7.5% for Germany; 10% for Luxembourg, Papua New Guinea, Venezuela, and Zimbabwe; and 15% for Pakistan.
- VAT is reciprocally exempted from the income earned on the operation of ships or aircraft in international lanes.
- The treaty is silent concerning BPT rate. The ITO interprets this to mean that the tax rate under Indonesian Tax Law (20%) should apply.
- Labuan offshore companies (under the Labuan Offshore Business Activity Tax Act 1990) are not entitled to the tax treaty benefits.
- Ratified but not yet effective, pending the exchange of ratification documents.
- A protocol amending the tax treaty has been signed, pending the ratification of the protocol and the exchange of ratification documents.
- A revised tax treaty has been signed, pending the ratification of the revised tax treaty and the exchange of ratification documents.
- Interest:
 - Exempt if paid to the government.
 - Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
- Royalties:
 - The use of, or the right to use, any copyright, patent, design or model, plan, secret formula or process, trademark, or other like property or right.
 - The use of, or the right to use, any industrial, commercial, or scientific equipment.
 - The supply of scientific, technical, industrial, or commercial knowledge or information.
 - The use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematography films and films or tapes for television or radio broadcasting.
- PEs that reinvest their after-tax profits in Indonesia within the same year or no later than the following year are exempt from BPT on these profits (see *the Tax credits and incentives section*).

The issue of beneficial ownership has come under tax office scrutiny. For treaty WHT rates to apply to passive income such as interests, dividends, and royalties, the

Indonesia

recipient of such income must be the beneficial owner. The recipient must also provide a Certificate of Domicile (CoD) in the form required by the ITO and certified by their home country tax authority that the recipient is a tax resident of that country. The CoD in the form prepared by the other country's tax authority may only be used in limited circumstances. Further, the CoD form also requires a number of declarations to be made by the recipient that acknowledges that the use of the treaty jurisdiction was not merely for obtaining the benefit of the treaty. These declarations place onerous obligations on both the Indonesian payer and the recipient entity. Without a certified CoD, a WHT at a rate of 20% will apply. These aspects need to be considered when paying income of this nature.

Article 22 Income Tax (PPh 22)

PPh 22 is typically applicable to the following:

Event	Tax rate (%)	Tax base
1 The import of:		Import value (i.e. CIF value plus duties payable)
a. Certain end customer goods	10	
b. End customer goods other than (a)	7.5	
c. Goods other than (a) and (b) using an Importer Identification Number (<i>Angka Pengenal Impor</i> or API):		
i. Soybeans, wheat, and flour wheat	0.5	
ii. Other than (i)	2.5	
d. Goods other than (a) and (b) without an API	7.5	
2 The auctioned imported goods	7.5	Auction prices
3 The sale of goods to the government requiring payment from the State Treasury and Proxy of Budget User (<i>Kuasa Pengguna Anggaran</i> or KPA) (1)	1.5	Selling prices
4 The sale of goods to State-Owned Enterprises (<i>Badan Usaha Milik Negara</i> or BUMN) and some of their subsidiaries (1)	1.5	Selling prices
5 The purchase of oil fuel by state-owned gas stations (2)	0.25	Selling prices
6 The purchase of oil fuel by private gas stations (2)	0.3	Selling prices
7 The purchase of oil fuel by parties other than state and private gas stations (2)	0.3	Selling prices
8 The purchase of gas fuel (2)	0.3	Selling prices
9 The purchase of lubricants	0.3	Selling prices
10 The purchase of cement by local distributors	0.25	Selling prices
11 The purchase of paper products by local distributors	0.1	Selling prices
12 The purchase of steel products by local distributors	0.3	Selling prices
13 The purchase of automotive products by local distributors	0.45	Selling prices
14 The purchase of pharmaceutical products by local distributors	0.3	Selling prices
15 The purchase of motor vehicles from Sole Agents (<i>Agen Tunggal Pemegang Merek</i> or ATPM), Agents (<i>Agen Pemegang Merek</i> or APM), and general importers (3)	0.45	Selling prices
16 The purchase of materials by manufacturers or exporters in forestry, plantation, agriculture, cattle breeding, and fishery (1)	0.25	Selling prices
17 The export of coal, metal, and non-metal minerals by exporters other than those engaged in a mining cooperation agreement or a contract of work with the government	1.5	Export value
18 The purchase of coal, metal, and non-metal minerals from companies or individuals holding a mining license (<i>Izin Usaha Pertambangan</i> or IUP) (1)	1.5	Selling prices

Event	Tax rate (%)	Tax base
19 The sale of gold bars from manufacturers (4)	0.45	Selling prices
20 The purchase of very luxurious goods	5	Selling prices

Notes

- In events (3), (4), (16), and (18), the PPh 22 collectors must withhold PPh 22 from the amount payable to a particular vendor, except payments for the purchase/use of:
 - oil fuel, gas fuel, lubricants, postal products
 - water and electricity
 - oil, gas (including upstream by products) from a contractor of a PSC or contractor's head office, and
 - geothermal and electricity from a contractor of a joint operation contract.

There is also an exemption for the purchase of goods with a value of up to IDR 2 million, IDR 10 million, and IDR 20 million for events (3), (4), and (16) respectively. In the other events, the importer or the buyer of the designated goods must pay PPh 22 in addition to the amounts payable for the goods imported or purchased.

- The withheld PPh 22 constitutes a pre-payment of corporate/individual income tax liabilities, except for the purchase of oil and gas fuel by distributors/agents, which is categorised as final tax.
- Exemption applies on the purchase of very luxurious motor vehicles since it is already subject to PPh 22 in event (20).
- Exemption applies on the sale to Bank Indonesia.

The tax does not apply, either automatically or with an Exemption Certificate issued by the DGT, on the following types of events:

- Import/purchase of goods not subject to income tax.
- Import of goods exempted from import duties and/or VAT, subject to 0% import duty, or where VAT is not collected.
- Goods that have been temporarily imported (i.e. goods for re-export).
- Goods for re-importing (i.e. exported and re-imported in the same quality or to be repaired/tested for subsequent re-exporting).
- Import of gold bars for the production of jewellery for re-export.
- Purchase of goods related to the use of government school operations subsidy (*Bantuan Operasional Sekolah* or BOS) fund.

Taxpayers without a Tax Identification Number will be subject to a surcharge of 100% in addition to the standard tax rate.

Tax administration

Payments of tax and tax returns filing

Tax liabilities for a particular period or year must typically be paid to the State Treasury through a designated tax-payment bank (*bank persepsi*) and then accounted for at the DGT office through the filing of the relevant tax returns. The tax payments and tax return filing for a particular tax must be undertaken monthly or annually, depending upon the tax obligation in question. These payments and filing obligations can also be conducted electronically. Tax payments should generally be conducted electronically starting from 1 July 2016.

Corporate tax liabilities may be settled either by direct payments, third party withholdings, or a combination of both. Monthly tax instalments constitute the first part of tax payments to be made by taxpayers as a prepayment of their current year CIT liability. A monthly tax instalment is generally calculated using the most recent CIT return. The tax withheld by third parties on certain income or tax to be paid in advance on certain transactions (i.e. imports) also constitute prepayments for the current year corporate tax liability of the income recipient or the party conducting the import. If the total amounts of tax paid in advance through the year are less than the total CIT due,

Indonesia

the company concerned has to settle the shortfall before filing its CIT return. Returns for transaction taxes, such as WHT, must be filed on a monthly basis.

A summary of these tax obligations is as follows:

Monthly tax obligations

Type of tax	Tax payment deadline	Tax return filing deadline
Article 21/26 (Payroll) WHT	The 10th day of the following month	The 20th day of the following month
Article 23/26 Income Tax	The 10th day of the following month	The 20th day of the following month
Article 25 Income Tax Instalment	The 15th day of the following month	The 20th day of the following month
Article 22 Income Tax on imports/ payments to Tax Collectors	The 10th day of the following month	The 20th day of the following month
Article 4(2) Final Income Tax	The 10th day of the following month	The 20th day of the following month
VAT and LST	Prior to the tax return filing deadline	The end of the following month

Annual tax obligations

Type of tax	Tax payment deadline	Tax return filing deadline
CIT	The end of the fourth month after the book year end before filing the tax return	The end of the fourth month after the book year end
PBB	Six months after the receipt of a Tax Due Notification Letter from the ITO	N/A

Penalties

Late payments of the above taxes incur interest penalties at 2% per month, with a maximum of 48%. Part of a month, for example a single day, is considered a full month.

Late filing of a tax return or failure to file a tax return incurs an administrative penalty at the following amounts:

Type of tax return	IDR
VAT return	500,000
Other monthly tax returns	100,000
CIT return	1,000,000

Tax assessments

Indonesia uses a self-assessment system under which taxpayers are trusted to calculate, pay, and report their own taxes in accordance with prevailing tax laws and regulations. However, the DGT may issue tax assessment letters to a particular taxpayer if it finds that, based on a tax audit or on other information, the taxpayer has not fully paid all tax liabilities. A tax assessment letter may also be issued by the DGT to a taxpayer who ignores a warning letter to file a tax return within a specified period. Failure to maintain books in accordance with the prescribed standards is another condition that may lead the DGT to issue an official tax assessment.

Tax audit process

The tax audit of a company may cover only a particular tax or all taxes for a particular tax period (a tax month) or tax year. It may be conducted at the company's premises, at the DGT offices, or at both.

Conditions triggering a tax audit

A tax refund request will always trigger a tax audit. Due to the requirement for the DGT to decide on a refund request within 12 months, a tax audit will typically begin from a few weeks to several months from the refund request date. A corporate tax refund request will normally trigger a complete tax audit covering all taxes. A refund request of any other tax will normally trigger a tax audit covering only one particular tax. The DGT will likely broaden the tax audit scope to include other taxes.

Other events that may trigger a tax audit include the following:

- A tax return in an overpayment position (not necessarily accompanied by a refund request).
- An annual income tax return presenting/claiming a tax loss.
- The taxpayer has changed its fiscal year or bookkeeping method or performed fixed assets revaluation.
- A tax return not filed within the prescribed time or filed after the deadline stated in a warning letter, which has been selected to be audited based on a risk analysis.
- A tax return meeting certain (undisclosed) DGT criteria.

Statute of limitations

The DGT can issue an underpaid tax assessment letter within five years after the incurrence of a tax liability, the end of a tax period (month), or the end of (part of) a tax year.

Topics of focus for tax authorities

Indonesia is largely a self-assessment tax environment, and enforcement remains a priority of the tax authorities. The DGT continues its efforts in improving compliance by targeting tax audits on transfer pricing and certain industries (particularly those in the oil and gas and coal mining industry).

On the other hand, the DGT has also made some efforts to collect more information from various sources and is issuing several incentives to increase tax compliance as well as boosting national tax revenue (i.e. incentives for the payment of tax in arrears and the sunset policy that eliminates or reduces administrative sanctions in certain cases).

Other issues

Business combinations and splits

Transfers of assets in business mergers, consolidations, or business splits must generally be dealt with at market value. Gains resulting from this kind of restructuring are assessable, while losses are generally claimable as a deduction from income. However, a tax-neutral merger or consolidation, under which assets are transferred at book value, can be conducted but are subject to the approval of the DGT. To obtain this approval, the merger or consolidation plan in question must pass a business-purpose test. Tax-driven arrangements are prohibited, and tax losses from the combining companies may not be passed to the surviving company.

Subject to a similar, specific DGT approval, the same concession is also available for business splits that constitute part of an initial public offering (IPO) plan. In this case, within one year of the DGT's approval being given, the company concerned must have made an effective declaration regarding registration for an IPO with the OJK. In the event of complications beyond the company's control, the period may be extended by the DGT for up to four years.

Tax information exchange agreements (TIEAs)

Indonesia has TIEAs with the following jurisdictions:

Indonesia

- Bahamas (2)
- Bermuda (1)
- Guernsey
- Isle of Man
- Jersey
- San Marino (1)

Notes

1. Ratified but not yet effective, pending the exchange of ratification documents.
2. The TIEA has been signed, pending the ratification of the TIEA and the exchange of ratification documents.

Mutual Administrative Assistance in Tax Matters

Indonesia signed the Convention on Mutual Administrative Assistance in Tax Matters on 3 November 2011 and ratified it on 17 October 2014. Indonesia also signed a Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information on 4 June 2015 and is committed to apply this using the CRS issued by the OECD.

US Foreign Account Tax Compliance Act (FATCA)

Indonesia has principally agreed to sign the InterGovernmental Agreement (IGA) 1 for FATCA compliance purposes.

Significant developments

There have been no significant corporate tax developments in Iraq during the past year.

Taxes on corporate income

All income derived from Iraq is subject to tax in Iraq, regardless of the residence of the recipient.

The effective corporate income tax (CIT) system presented in Iraq for juristic persons (except partnerships) is based on a statutory CIT rate of 15% at all income levels, with no progressive tax rate scale.

Foreign oil company income tax

The income realised in Iraq from contracts concluded with foreign oil companies, their branches or offices, and subcontractors working in Iraq in the oil and gas production sector and related industries is taxed at a rate of 35%.

Local income taxes

To the best of our knowledge, there are no local, state, or provincial taxes on income in Iraq.

Corporate residence

One of the key issues in determining when a company becomes taxable in Iraq is whether the foreign company is considered to be doing business 'in Iraq' or 'with Iraq'. In 2009, with Instructions No. 2/2008, and its amendment instruction #1 of 2014, the Iraqi tax administration provided a clearer distinction between business 'in Iraq' and business 'with Iraq'.

Once the determination has been made that the company is trading 'in Iraq', the company should register with the General Commission for Taxes (GCT). A company that is registered with the GCT will be subject to CIT and will be required to file a CIT return.

Permanent establishment (PE)

It is important to note that the current Iraq income tax law does not clearly define a PE; consequently, it is important to monitor commercial activity being performed in the country to ensure compliance with the registration requirements and tax law. The company should consult with their internal tax department and external advisers if they have signed a contract to provide any type of services inside Iraq to determine if the company should have a legal registration and begin to file CIT returns.

Other taxes

Sales tax

A sales tax of 300% is imposed on alcohol and tobacco (cigarettes), 15% on travel tickets, 15% on cars, and 20% on mobile recharge cards and internet. This is in addition to services rendered by deluxe and first class restaurants and hotels, which are subject to a 10% sales tax.

Customs duties

The Iraqi Custom Duty Law No. 22 of 2010 entered into force on 1 August 2015. As a result, the 5% 'Iraq reconstruction levy' applied to most of the goods imported into Iraq will be replaced by the customs duty rates as specified in the customs tariff and the agriculture agenda that are annexed to the Customs Duty Law.

Excise taxes

There is no tax provision in the Iraqi tax law addressing excise taxes.

Property taxes

A basic tax of 10% is assessed on the annual revenue for all real estate and is collected from the real estate owner or the long-term lessee (five years). In cases where the owner or long-term lessee cannot be located, the person occupying the real estate will be assessed. Note that the annual revenue for each real estate is discounted by 10% for expenses and maintenance before assessing the tax on that real estate.

Transfer taxes

There are no restrictions or taxes on transferring funds into or out of Iraq.

Stamp duty

Contracts are subject to stamp fees at rates that range between 0.1% and 3% of the contract value.

Payroll taxes

The payroll tax system in Iraq is similar to a pay-as-you-earn (PAYE) system, whereby the employer is obligated to withhold tax from salaries and wages paid to its employees and remit same to the tax authorities. Failure to do so will result in the employer being subject to penalties and late payment interest.

Social security contributions

With respect to contribution to the social security fund in Iraq, employers are divided into a number of categories, which is the driver for determining the contribution percentage. Employers that are categorised as prime contribute at the upper rate (25% from the employer and 5% from the employee), whereas other categories contribute at the lower rate (12% from the employer and 5% from the employee).

Determining to which category the employer relates is subject to the social security department discretion. The criteria for this determination is not crystallised in the law; however, in practice, the social security authorities make their determination based on the business sector the employer is involved in (e.g. those in the oil and gas related industries are expected to attract the upper rate).

Branch income

The tax treatment for a branch is similar to a local Iraqi corporation. In general, CIT is imposed on corporate entities and foreign branches with respect to taxable profit from all sources arising or deemed to arise in Iraq. However, certain limitations apply to head office expenses.

Income determination

A corporation has to determine its profit/loss according to its income statement for a tax period as established under the Unified Accounting System (Iraqi Generally Accepted Accounting Principles [GAAP]). However, to reach the taxable income, positive or negative adjustments have to be made to the profit/loss as determined according to GAAP.

Inventory valuation

There is no tax provision in the Iraqi tax law addressing inventory valuation.

Capital gains

Capital gains on sales of depreciable assets are taxed at the normal CIT rate. To the best of our knowledge and legal practice, gains derived from the sale of shares and bonds not in the course of a trading activity are exempt from tax. Capital gains derived from the sale of shares and bonds in the course of a trading activity are taxable at the normal CIT rate.

Dividend income

Under the tax law, dividends paid out of profits that have been subject to tax are not taxed again in the hands of the shareholder.

Interest income

Interest income deemed to arise in Iraq is taxed at the normal CIT rate.

Rent/royalty income

Rent and royalty income deemed to arise in Iraq are taxed at the normal CIT rate.

Foreign income

There is no tax provision in the Iraqi tax law addressing foreign income. However, as per the Iraqi tax law, tax shall be imposed on the income of an Iraqi resident that arises inside or outside Iraq (i.e. worldwide), regardless of place of receipt.

Deductions

In general, all expenses incurred by the taxpayer in order to produce income during the year are deducted from income, provided that such expenses are confirmed by acceptable documents, with some exceptions.

Depreciation

The Iraqi Depreciation Committee sets the maximum depreciation rates for various types of fixed assets (please contact us for additional information regarding the specific rates). If the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed.

The depreciation method is either a straight-line method or declining-balance method.

Goodwill

Iraqi tax law does not contain a provision that covers the deductibility of goodwill.

Start-up expenses

Iraqi tax law does not contain a provision that covers the deductibility of start-up expenses. However, as per Iraqi GAAP, such cost will be capitalised and amortised once the operation is started.

Iraq

Interest expenses

Iraqi tax law does not contain a provision that covers the deductibility of interest expenses.

Bad debt

Bad debt is deductible if it was included in earlier income and there is proof of the unsuccessful steps to collect it.

Charitable contributions

Charitable contributions to the Government and Socialist Sector departments and to scientific, cultural, educational, charitable, and spiritual organisations, which are legally recognised (provided that the Minister of Finance has issued a list containing the names of these organisations), are deductible.

Bribes and illegal payments

Bribes and illegal payments are not allowed or deductible.

Fines and penalties

Broadly speaking, fines and penalties are not deductible items.

Taxes

Broadly speaking, taxes are not deductible items.

Net operating losses

Under the tax law, losses of a taxpayer from some sources of income arising in Iraq, substantiated by legally accepted documents, are generally deducted from profits arising from other sources.

Losses that can be settled in this manner shall be carried forward and deducted from the income of the taxpayer over five consecutive years, provided that losses may not offset more than half of the taxable income of each of the five years and the loss is from the same source of income from which it has arisen.

Losses cannot be carried back.

Payments to foreign affiliates

Iraqi tax law does not contain a provision that covers the deductibility of payments to foreign affiliates.

Group taxation

Iraqi tax law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies.

Transfer pricing

The precise meaning of transfer pricing under the effective Iraqi tax system is rather unclear from a tax and legal perspective.

We note that while having no specific transfer pricing legislation, Iraq does have a 'third party' arm's-length provision contained within its tax legislation; whereby, if a non-resident taxpayer is engaged in business with a resident and it appears to the tax authority that due to the connection existing between the resident and the non-resident, and the substantial control of one over the other, that the business relationship is arranged in a manner that leaves no profits to the resident, or the profits left are much less than what is normally earned, the tax shall be assessed on the actual profits of the non-resident and charged to the resident as if the resident is the business agent for the non-resident.

Thin capitalisation

Iraqi tax law does not contain a provision that covers thin capitalisation.

Controlled foreign companies (CFCs)

Iraqi tax law does not contain any provisions for CFCs.

Tax credits and incentives

In accordance with the Iraqi Investment Law, approved industrial projects are given certain custom duty and tax incentives; however, oil and gas is not one of the sectors that is normally granted investment promotion exemptions incentives.

The tax incentives may include corporate tax, individual tax, and others; however, the tax incentives vary from one project to another.

The Board of Investment Promotion has the authority to add any sector or specific project to the list of sectors or projects that benefit from the investment promotion law incentives.

Foreign tax credit

Income tax paid to a foreign country on income earned in that country may be credited against tax paid to Iraq. The amount of the credit may not exceed the amount of tax assessed in Iraq.

Withholding taxes

Under the tax law, the amount due from any residing taxpayers to a non-resident, whether the payment is made in cash or credited to the account, is subject to withholding tax (WHT) at the rate of 15% if such amounts are related to interest on debentures, mortgages, loans, deposits and advances, as well as annual allowances, pension salaries, or other yearly payments. Dividends are not subject to WHT since dividends paid out of profits that have been subject to tax are not taxed again in the hands of the shareholder.

Additionally, industries/activities (non-upstream) contracted with oil and gas companies are subject to WHT on all payments at a rate of 3.3% or 7%.

Tax administration
Taxable period

The taxable year in Iraq is the calendar year.

Tax returns

The statutory time line for filing tax returns is before the first day of June of the year of assessment. If the self-assessment of tax is not accepted by the tax authorities, tax is assessed on the income of the taxpayer based on the information available to the tax authorities.

Failure to file a tax return may lead to an estimate of income and assessment of tax by the tax authorities; however, such an assessment does not relieve the taxpayer from responsibility for non-submission of the return within the statutory time line stipulated by law.

Iraq

Payment of taxes

Payment of the tax liability has to occur within 21 days from the assessment date by the tax authority. There is no requirement of quarterly payments during the taxable year.

Tax audit process

Tax inspection is mandatory in Iraq, as the tax authority will scrutinise the financial statements of the taxpayer to determine the tax liability and, accordingly, issue a tax clearance.

Statute of limitations

The statute of limitations is five years. However, the tax authority has the right to go back beyond five years in certain instances.

Topics of focus for tax authority

Obtaining a tax clearance from a tax audit/inspection is becoming increasingly important for importation and government bidding purposes, as well as for other areas that affect the continuation of operations.

Iraqi GAAP

The Iraqi tax law requires all taxpayers to maintain books and records in accordance with Iraq's local unified accounting system (Iraqi GAAP).

These books shall constitute tax books/accounts. This accounting treatment will determine when income is accrued and costs are incurred for computing taxable profits.

Significant developments

Ireland's International Tax Strategy and Road Map for Ireland's Tax Competitiveness

In autumn 2015, the Minister for Finance published an update to the Irish government's International Tax Strategy Statement to provide a clear and accurate picture of Ireland's corporation tax regime for the foreign direct investment (FDI) sector. The Minister for Finance reaffirmed Ireland's commitment to the 12.5% corporation tax rate for trading profits and also outlined other commitments relevant to multinationals.

For multinationals reassessing the location of their global operations, Ireland remains an attractive proposition. Ireland has engaged early with Organisation for Economic Co-operation and Development (OECD) recommendations in relation to the base erosion and profit shifting (BEPS) process. Finance Act 2015 introduced a number of measures to align with recent OECD policy, such as the creation of the Knowledge Development Box and implementation of Country-by-Country (CbC) Reporting. This is as well as continuing to strengthen the capabilities of Ireland's transfer pricing competent authority, expanding Ireland's tax treaty network, and maintaining an open and transparent tax regime.

Intellectual property (IP) regime

Knowledge Development Box

Finance Act 2015 built on Ireland's suite of offerings in relation to IP. The Knowledge Development Box meets the standards of the OECD's modified nexus approach and is the first fully compliant box in the world. Its introduction provides a 6.25% rate of corporation tax to certain profits arising from qualifying assets that are the result of research and development (R&D) carried out by the company qualifying for the relief for accounting periods on or after 1 January 2016.

Capital gains tax entrepreneur relief

A recent focus of the Irish government is to facilitate the creation of employment and encourage entrepreneurship. Finance Act 2015 introduced a number of improvements for entrepreneurs, including introducing capital gains tax entrepreneur relief, which allows for a reduction in the capital gains rate to 20% on the disposal of chargeable business assets from 1 January 2016 up to a lifetime limit of 1 million euros (EUR). This allows entrepreneurs to free up more capital for reinvestment and builds on Ireland's focus to drive investment in new businesses.

Country-by-Country (CbC) Reporting

As part of Finance Act 2015, the Irish government included legislation introducing CbC Reporting for Irish-parented multinational enterprises (Irish MNEs). The legislation requires Irish MNEs with consolidated annualised group revenue of EUR 750 million or more to comply with the new requirements, with the first CbC report to be prepared for fiscal years beginning on or after 1 January 2016. Under the legislation, Irish MNEs must file a CbC report annually to include specific financial data covering income, taxes, and other key measures of economic activity for each territory in which they operate.

Ireland

In certain circumstances, Irish subsidiaries of foreign headquartered MNEs may also be required to file an 'equivalent' CbC report in Ireland.

Taxes on corporate income

Corporation tax is chargeable as follows on income and capital gains:

Standard rate on income (<i>'trading rate'</i>)	Higher rate on income (<i>'passive rate'</i>)	Capital gains rate
12.5%	25%	33%

Resident companies are taxable in Ireland on their worldwide profits (including gains). Non-resident companies are subject to Irish corporation tax only on the trading profits of an Irish branch or agency and to Irish income tax (generally by way of withholding) on certain Irish-source income.

Non-trading (passive) income includes dividends from companies resident outside Ireland (with some exceptions), interest, rents, and royalties. Legislation provides that certain dividend income (e.g. income from foreign trades) is taxed at 12.5% (*see the Income determination section*). The higher rate (i.e. 25%) also applies to income from a business carried on wholly outside Ireland and to income from land dealing, mining, and petroleum extraction operations.

An additional 'profit resource rent' tax applies to certain petroleum activities. Depending on the profit yield of a site, the tax rate applicable can range from 25% to 40%.

Close companies (*see the Income determination section*) may be subject to additional corporate taxes on undistributed investment income (including Irish dividends) and on undistributed income from professional services. Examples of professional services include professions such as solicitor, accountant, doctor, and engineer.

Local income taxes

Ireland does not levy local or regional taxes on income.

Corporate residence

In an effort to further enhance Ireland's tax regime's transparency, Finance Act 2014 announced changes to Ireland's corporate tax residence rules. Broader corporate tax residence reform was introduced from 1 January 2015 to ensure that Irish incorporated companies can only be considered non-Irish resident under the terms of a double tax treaty (DTT). These provisions are effective from 1 January 2015 for newly incorporated companies. In order to give certainty to companies with existing Irish operations (i.e. incorporated prior to 1 January 2015), the changes include a transition period to the end of 2020. While current Irish companies should not need to take immediate action, in the transitional period to 31 December 2020, all groups with Irish operations need to carefully monitor the corporate tax residence position of Irish incorporated, non-resident companies that do not satisfy the sole exception contained within the Finance Act 2014 provisions. This includes, for example, considering the impact of any proposed merger and acquisition (M&A) transactions involving both change in ownership and business changes/integration measures.

For companies incorporated before 1 January 2015, a company incorporated in Ireland or that has its place of central management and control in Ireland will be regarded as resident in Ireland for the purposes of corporation tax and capital gains tax. However, the link between incorporation and residency does not apply if (i) an Irish incorporated

company is considered non-Irish tax resident under the terms of a DTT ('treaty exemption') or (ii) where the incorporated company or a related company carries on a trade in Ireland and either the company is ultimately controlled by a tax resident of a European Union (EU) member state or a country with which Ireland has a DTT, or the company or related company are quoted companies ('trading exemption'). Where the conditions of the trading exemption are met, the company's location of tax residence is determined by the jurisdiction where the company has its place of central management and control. However, the trading exemption does not apply if an Irish incorporated company's place of management and control is in a jurisdiction that only applies an incorporation test for determining residency (and the company would thus not be regarded as tax-resident in any jurisdiction).

Permanent establishment (PE)

Non-resident companies are subject to Irish corporation tax only on the trading profits attributable to an Irish branch or agency, plus Irish income tax (generally by way of withholding, though this is not the case with Irish-source rental profits) on certain Irish-source income.

Subject to the terms of the relevant DTT, a non-resident company will have a PE in Ireland if:

- it has a fixed place of business in Ireland through which the business of the company is wholly or partly carried on, or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in Ireland.

A fixed place of business includes (but is not limited to) a place of management; a branch; an office; a factory; a workshop; an installation or structure for the exploration of natural resources; a mine, oil or gas well, quarry, or other place of extraction of natural resources; or a building, construction, or installation project. A company is not, however, regarded as having an Irish PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

Other taxes

Value-added tax (VAT)

VAT is charged at 23% on the supply of most goods and services in the course or furtherance of business.

There are currently two main reduced rates of VAT. A 13.5% rate applies, *inter alia*, to most building services, labour intensive services, domestic fuel, and power. In addition, a reduced 9% VAT rate is applicable to certain supplies in the tourism sector. These include restaurant and catering services, hotel and holiday accommodation, and various entertainment services (e.g. admissions to cinemas, theatres, museums, sporting facilities).

Exports, most basic food items, oral medicines, books, and children's clothing and footwear are zero-rated.

Some supplies are exempt from VAT. The main exempt categories are most banking services, insurance services, medical services, passenger transport, education and training, and letting of immovable goods (although an 'option to tax' may be possible in certain circumstances).

Ireland

Zero rating is preferable to exemption because most VAT costs incurred in making a zero-rated supply can be recovered, while those incurred in making an exempt supply generally cannot.

If a business is fully engaged in a VATable business (irrespective of the rate), it will be entitled to reclaim VAT incurred, subject to the normal rules of deductibility. Businesses engaged in exempt supplies will not be in a position to reclaim VAT; consequently, it will be a real cost. Any business engaged in both VATable and exempt supplies will be required to apportion the VAT incurred appropriately.

Customs duties

Goods imported into Ireland from countries outside the European Union are liable to customs duty at the appropriate rates specified in the EU's Combined Nomenclature (CN) Tariff. These rates vary from 0% to 14% for industrial goods, with much higher rates applicable to agricultural products. Imports may qualify for a partial or full reduction in rates in specific circumstances.

The three main elements ('customs duty drivers') that determine the duty liability arising on goods imported into the European Union from a non-EU country are (i) the product's commodity code (Tariff Classification), (ii) its customs valuation, and (iii) its origin. Each of these elements will need to be considered when determining the customs duty cost at import.

There are special customs procedures that allow for the import of goods into the European Union from non-EU countries with full or partial relief from customs duty or under a suspension of customs duty. Examples of these are Customs Warehousing, Inward Processing Relief, Processing under Customs Controls, and Outward Processing Relief. There are different conditions attached to each customs special procedure, and an analysis of the trade footprint of the importer of the goods will need to be considered in order to determine whether or not they may avail of one of these reliefs. These procedures are important and are in place with the intention of stimulating economic activity within the European Union.

It should be noted that no customs duties arise on goods 'imported' from other EU member states, provided they originate in the European Union or have been customs cleared in another member state of the European Union.

Excise duties

Excise duties are charged on mineral oils (including petrol and diesel), alcohol products (including spirits, beer, wine, cider, and perry), and tobacco products where they are consumed in Ireland. Reduced rates of excise duty may apply when setting up a microbrewery in Ireland (depending on production quantities).

In addition, a diesel rebate scheme applies in Ireland. It provides hauliers or coach/bus owners with an opportunity to claim a partial refund of excise duty paid on fuel used in specifically designated vehicles for the purposes of transporting goods or passengers.

Excise duties are not charged on the export or sale of excisable goods to other EU countries, but special control arrangements apply to the intra-EU movement of such goods.

In addition, Ireland applies excise duties to electricity, betting, and the first registration of vehicles in the state (the latter is known as VRT). The VRT regime for motor vehicles is based on a CO2 emissions rating system and charged on the 'open market selling price' of the vehicle. Specific reductions in VRT apply to electric and hybrid vehicles, subject to certain conditions being met. In addition, there are reliefs available for cars imported temporarily by non-residents, or imported on transfer of residence to Ireland (such VRT reliefs require prior approval from the Customs authorities).

Stamp duty

Stamp duty is a tax on instruments. It is payable on transfers of land and on other assets where legal title cannot be passed by delivery. It is chargeable on instruments of transfer executed in Ireland and on instruments, wherever executed, that relate to Irish property or relate to matters to be done in Ireland. Stamp duty on the transfer of assets between associated companies may be fully relieved from stamp duty, provided the following key conditions are met:

- The companies have a 90% relationship (that is, one company is, directly or indirectly, the beneficial owner of at least 90% of the ordinary share capital of the other and is entitled to at least 90% of the profits available for distribution and at least 90% of the assets in the case of a winding-up of the other company, or a third company has these rights, directly or indirectly, in respect of both companies).
- This relationship is maintained for a period of at least two years after the transfer of the assets (to avoid the relief being clawed back).

There is an exemption for transfers of IP, and the categories of IP qualifying for this exemption are the exact same as those for which IP capital allowances are available (see *Intellectual property [IP] regime in the Tax credits and incentives section*).

Stamp duty is payable based on the higher of the consideration paid for the transfer or the market value of the assets transferring. Rates of 1% to 2% apply for transfers of residential property, 2% for transfers of non-residential property (commercial/industrial land and buildings, but also business assets, such as goodwill, debtors, contracts, etc.), and 1% on transfers of shares.

Capital duty on share capital

Ireland does not levy capital duty on share capital of companies.

Capital taxes

Ireland does not levy tax on the net worth of companies.

Payroll taxes

The 'pay-as-you-earn' system (PAYE system) places an obligation on employers to make deductions at source of income tax, universal social charge (USC), and pay-related social insurance (PRSI) from payments made to employees and an obligation to remit such deductions to the Irish tax authorities.

Pay-related social insurance (PRSI)

Employed persons are compulsorily insured under a state-administered scheme of PRSI. Contributions are made by both the employer and the employee. The employer is responsible for making PRSI contributions up to a rate of 10.75%, and these are an allowable deduction for corporation tax purposes.

Levies on insurance policies

A levy of 3% of gross premiums received by insurers applies in respect of non-life insurance policies relating to risks located in Ireland. This levy is payable four times *per annum*, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

A levy of 1% of gross premiums received by insurers applies in relation to certain classes of life insurance policies relating to risks located in Ireland. This levy is payable four times *per annum*, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

An additional contribution of 2% to the Insurance Compensation Fund applies to premiums received in relation to non-life insurance policies. Similar to the 3% non-life insurance levy, the contribution applies where premiums are received in respect of risks

Ireland

located in Ireland. The contribution is also payable four times *per annum* in conjunction with the non-life insurance levy on premiums.

Reinsurance business is excluded from the levy.

There is also a stamp duty liability of EUR 1 on each non-life insurance policy where the risk is located in Ireland.

Certain voluntary health insurance policies are subject to fixed levies, up to EUR 350 per policy.

Emissions allowances

Legislation was introduced in relation to the tax treatment of emission allowances under the EU Emissions Trading Scheme. The legislation distinguishes between allowances acquired free of charge from the Environment Protection Agency (EPA) under the EU Scheme and those that are purchased.

Emission allowances acquired free of charge from the EPA may not be subjected to taxation, where purchased allowances can be taxable on subsequent disposal.

Environmental taxes

In Ireland, a levy of 22 cents per bag is imposed upon consumers provided with a plastic bag when purchasing goods in supermarkets and other retail outlets. Under the applicable legislation, retailers are obligated to collect 22 cents in respect of every plastic bag or bag containing plastic, regardless of size, unless specifically exempted, that is provided to customers and remit all plastic bag levies collected to Irish Revenue. As a result of the levy, most non-supermarket retailers provide paper carrier bags, and many retailers provide 'bags for life', which are made from non-plastic material and, therefore, not subject to the environmental levy.

Carbon tax

A carbon tax is levied on mineral oils (e.g. auto fuels, kerosene) that are supplied in Ireland. The rates of carbon tax on oil and gas broadly equate to EUR 20 per tonne of CO₂ emitted. Relief applies where mineral oils are supplied to an Emissions Trading Scheme (ETS) installation or for electricity generation. Pure biofuels are exempt from carbon tax. There is full relief for the biofuel component of the fuel. Where biofuel has been mixed or blended with any other mineral oil, the relief from carbon taxes shall apply to the biofuel content of the mixture or blend, regardless of the percentage.

A carbon tax is also levied on natural gas and solid fuel where supplied for combustion. Again, reliefs apply where these fuels are supplied to ETS installations or used in electricity generation, chemical reduction, or in the electrolytical or metallurgical processes.

Local taxes

Local taxes, known as 'rates', are not based on income but rather are levied on the occupiers of business property by reference to a deemed rental value of the property concerned. The level of rates levied can depend on the region in which the property is located. Rates are an allowable deduction for corporation tax purposes.

Local authorities are also empowered to levy charges on all occupiers for specific services (e.g. water supply). These charges are also deductible for corporation tax purposes.

Branch income

Irish branches of foreign companies are liable to corporation tax at the rates that apply to Irish resident companies. No tax is withheld on repatriation of branch profits to the head office.

Income determination

Irish trading profits are computed in accordance with Irish Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS), subject to any adjustment required by law. Prior-year adjustments may arise on the first-time adoption of IFRS, which may result in double counting of income or expenses or of income falling out of the charge to tax. Generally speaking, in order to avoid such an outcome, transitional adjustments exist whereby amounts of income or expenses that could be double-counted or that would fall out of the charge to tax are identified and the amounts concerned are taxed or deducted as appropriate over a five-year period.

Inventory valuation

Each item of inventory is valued for tax purposes at cost or market value, whichever is lower, and this will normally accord with the accounting treatment. The method used in arriving at cost or market value of inventory generally must be consistent and must not be in conflict with tax law. The first in first out (FIFO) method is an acceptable method of calculation for tax purposes. The base-stock method has been held to be an inappropriate method for tax purposes, as has the last in first out (LIFO) method.

Capital gains

Companies are subject to capital gains tax in respect of gains arising on the disposal of capital assets. The taxable gain is arrived at by deducting from the sales proceeds the cost incurred on acquiring the asset (as indexed to reflect inflation only up to 31 December 2002). The resulting gain is taxable at 33%. In cases of disposals of interests in offshore funds and foreign life assurance policies, indexation relief does not apply; while a tax rate of 33% applies to non-corporate shareholders in respect of funds and policies located in EU/European Economic Area (EEA)/DTT countries, and a rate of 33% or 40% applies to funds or policies located in all other jurisdictions. A reduced rate of 25% exit tax applies to Irish corporate shareholders investing in Irish funds. Special rules apply to gains (and losses) from the disposal of development land in Ireland.

Companies that are tax resident in Ireland (i.e. are managed and controlled in Ireland or incorporated in Ireland and not qualifying for exclusion from Irish residence by virtue of being resident in a DTT territory) are taxable on worldwide gains. Non-resident companies are subject to capital gains tax on capital gains arising on the disposal of Irish land, buildings, mineral rights, and exploration rights on the Irish continental shelf, together with shares in unquoted (unlisted) companies, whose value substantially (greater than 50%) is derived from these assets. Non-resident companies are also subject to capital gains tax from the realisation of assets used for the purposes of a business carried on in Ireland.

Losses arising on the disposal of capital assets may be offset against capital gains in the accounting period or carried forward for offset against future capital gains. No carryback of capital losses is permitted. There is no facility to offset capital losses against business income or to surrender capital losses within a tax group.

Irish capital gains tax legislation facilitates corporate reorganisations on a tax-free basis in situations where there is a share for share exchange. Assets can be transferred within certain company groups without capital gains tax applying (*see the Group taxation section for further information*).

Ireland

Participation exemption from capital gains

A participation exemption is available to Irish resident companies on the disposal of a shareholding interest if:

- a minimum of 5% of the shares (including the right to profits and assets on winding up) is directly or indirectly held for a continuous 12-month period
- the shares have been held for a period of 12 months within which the date of the disposal falls or for a period of 12 months ending in the 24 months preceding the date of disposal
- the company whose shares are sold is resident in an EU member state (including Ireland) or in a country with which Ireland has a DTT at the time of the disposal (this includes tax treaties that have been signed but not yet ratified), and
- a trading condition is met at the time of the disposal whereby either: (i) the business of the company whose shares are disposed of consists wholly or mainly of the carrying on of one or more trades or (ii) taken together, the businesses of the Irish holding company and all companies in which it has a direct or indirect 5% or more ownership interest consist wholly or mainly of the carrying on of one or more trades.

If the Irish holding company is unable to meet the minimum holding requirement but is a member of a group (that is, a parent company and its 51% worldwide subsidiaries), the gain arising on the disposal should still be exempt if the holding requirement can be met by including holdings of other members of the group. Thus, the Irish company may be exempt from capital gains tax on a disposal of shares even if it does not directly hold a significant shareholding. The exemption also applies to a disposal of assets related to shares, such as options and convertible debt. However, it does not apply to a sale of either shares or related assets that derive the greater part of their value (more than 50%) from Irish real property, minerals, mining rights, and exploration and exploitation rights in a designated area. Shares deriving their value from non-Irish real property, minerals, and mining rights qualify for exemption if the other conditions are met.

Capital losses arising on the disposal of a shareholding where a gain on disposal would be exempt under the participation exemption are not deductible.

Capital gains tax entrepreneur relief

As part of Finance Bill 2015, a number of improvements for entrepreneurs include introducing capital gains tax entrepreneur relief, which allows for a reduction in the capital gains rate to 20% on the disposal of chargeable business assets from 1 January 2016 up to a lifetime limit of EUR 1 million. This will allow entrepreneurs to free up more capital for reinvestment and builds on Ireland's focus to drive investment in new businesses.

Dividend income

Dividends from Irish resident companies are exempt from corporation tax. Dividends paid out of the trading profits of a company resident in an EU member state or a country with which Ireland has a DTT (or a country with which Ireland has ratified the Convention on Mutual Assistance in Tax Matters) may be taxed at the 12.5% rate, provided a claim is made. The 12.5% corporation tax rate applies to the same type of dividends received from companies resident in non-treaty countries, provided the company paying the dividend is a listed company or is part of a 75% listed group the principal class of the shares of which are substantially and regularly traded on the Irish Stock Exchange, a recognised Stock Exchange in an EU member state or a country with which Ireland has a DTT, or on such other Stock Exchange as is approved by the Minister for Finance for the purposes of this relief from double taxation.

As outlined above, the 12.5% corporation tax rate is also applicable to foreign dividends paid out of trading profits of a company resident in a country that has ratified the Convention on Mutual Assistance in Tax Matters.

Foreign dividends received by an Irish company where it holds 5% or less of the share capital and voting rights in that foreign company are exempt from corporation tax where the Irish company would otherwise be taxed on this dividend income as trading income.

Dividends from Irish resident companies are not liable to further tax, other than a surcharge on close company recipients where the dividend is not redistributed. Broadly speaking, a close company is a company that is under the control of five or fewer 'participants'. Participants can include individual shareholders, corporate shareholders, loan creditors, any person with a right to receive distributions from the company, etc. Where not less than 35% of the shares of a company (including the voting power) are listed, a company will not be regarded as a close company.

A close company surcharge of 20% is payable on certain non-trading income (e.g. rental income, certain dividend income, interest income) if it is not distributed to shareholders within 18 months of the accounting period in which the income was earned. A close company making a distribution and the close company receiving a distribution have the option, jointly, to elect to have the dividend disregarded for surcharge purposes. This can give close companies the option of moving 'trading income' up to a holding company without incurring a surcharge. Generally speaking, close companies avoid the surcharge through the payment of dividends within the prescribed period. Capital gains accruing to a non-resident company that would be close if it were resident can be attributed to Irish resident participants in certain instances.

I

Stock dividends

Stock dividends taken in lieu of cash are taxed on the shareholder based on an amount equivalent to the amount that would have been received if the option to take stock dividends had not been exercised. If the recipient is an Irish resident company and it receives the stock dividend from a quoted (listed) Irish company, then there will be no tax. For a quoted (listed) company paying the stock dividend, dividend withholding tax (WHT) with the appropriate exemptions and exclusions applies. Other stock dividends (bonus issues) are generally non-taxable.

Interest income

Interest income earned by Irish companies is generally taxable at the rate of tax for passive income of 25% (interest may be regarded as a trading receipt for certain financial trader companies). It is possible to offset current-year trading losses against passive interest income arising in the same year on a 'value basis'. It is not possible to offset prior-year trading losses against current-year interest income unless that interest constitutes a trading receipt of the particular company.

Foreign income

Resident companies are liable to Irish tax on worldwide income. Accordingly, in the case of an Irish resident company, foreign income and capital gains are, broadly speaking, subject to corporation tax in full. This applies to income of a foreign branch of an Irish company as well as to dividend income arising abroad.

In general, income of foreign subsidiaries of Irish companies is not taxed until remitted to Ireland, although there are special rules that seek to tax certain undistributed capital gains of non-resident close companies.

Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland (see *Foreign tax credit in the Tax credits and incentives section*).

Deductions

In general, expenses incurred wholly and exclusively for the purposes of the trade are tax-deductible.

General accruals and provisions are not tax-deductible.

Capital items expensed to a company's profit and loss account are also not tax-deductible. However, depending on the nature of the capital item, they may qualify for tax depreciation (*see below*).

Depreciation

Book depreciation is not deductible for tax purposes (except in the case of certain IP assets). Instead, tax depreciation (known as capital allowances) is permitted on a straight-line basis in respect of expenditure incurred on assets that have been put into use by the company. The following rates are applicable:

Asset type	Tax depreciation rate (%)
Plant and machinery	12.5
Industrial buildings used for manufacturing	4.0
Motor vehicles	12.5
IP assets	Book depreciation or 7.0

The allowances are calculated on the cost after deduction of grants, except for plant and machinery used in the course of the manufacture of processed food for human consumption. In this case, the allowances are calculated on the gross cost. Allowances on cars are restricted to a capital cost of EUR 24,000 and may be restricted further (to 50% or zero), depending on the level of carbon emissions of the vehicle.

Accelerated capital allowances

A 100% first-year capital allowance is available in respect of expenditures incurred on certain approved energy-efficient equipment up to 31 December 2017.

Leasing

Ireland operates an eight-year tax depreciation life on most assets. A beneficial tax treatment applies to finance leases and operating leases of certain assets. For short life assets (i.e. those with a life of less than eight years), Ireland allows such lessors to follow the accounting treatment of the transaction that provides a faster write-off of the capital cost of an asset rather than relying on tax depreciation over eight years. This effectively allows the lessors to write-off their capital for tax purposes in line with the economic recovery on the asset.

Goodwill

The amortisation of goodwill is generally not allowable as a deduction. However, a tax deduction may be available for capital expenditure on the acquisition of certain goodwill (*see Intellectual property [IP] regime in the Tax credits and incentives section*).

Start-up expenses

A deduction may be allowed in respect of pre-trading expenses that are incurred for the purposes of a trade and within three years of the commencement of the trade. Such expenses may be offset against the income of that same trade.

Interest expenses

A deduction for interest is allowed only to the extent that borrowings are used for the purpose of a trade or acquisition of certain non-trading assets.

Research and development (R&D) expenses

Expenditure on scientific R&D and payments for the acquisition of know-how in general are allowable deductions, as are the costs of obtaining or extending patents and obtaining and renewing trademarks.

Bad debts

A deduction is available for bad debts written off in the accounts of a company as irrecoverable. Specific bad debt provisions may also be deductible once they satisfy Irish GAAP or IFRS accounting standards. The creation of a general bad debt provision is not a deductible expense.

Charitable contributions

Companies are entitled to a deduction, as a trading expense, for qualifying donations to approved charities, educational institutions, schools, churches, research foundations, sports bodies, and other approved organisations that satisfy certain conditions. To qualify for a tax deduction, the donation(s) to an organisation in a 12-month accounting period must amount to at least EUR 250.

Meals and entertainment

Costs incurred for third-party entertainment are not tax-deductible. Entertainment includes the provision of accommodation, food, drink, and any other form of hospitality, including the provision of gifts. Expenditure on *bona fide* staff entertainment is allowable as a deduction, provided its provision is not incidental to the provision of entertainment to third parties. Certain promotional costs are tax-deductible if they are incurred wholly and exclusively for the purposes of the trade.

Pension expenses

Contributions to certain employee pension schemes and the cost of setting up such schemes are deductible. Pension contributions are allowable as a deduction for employers in the year in which they are paid.

Fines and penalties

Fines and penalties imposed for breaking the law, civil penalties, interest, and late filing surcharges imposed by the Revenue Commissioners are generally not deductible.

Taxes

Taxes that are deductible in computing profits for corporation tax include VAT not recovered, the employer's share of PRSI contributions, and local taxes (i.e. rates levied on commercial property and local authority charges).

Net operating losses

Losses are computed for tax purposes in the same way as business profits. Trading losses can be offset against other income of any nature, either in the current or preceding accounting period (of equal length). The amount of losses required to shelter the income is dependent on the tax rate that would have been applied to the income in the absence of the loss relief. Any excess losses can be carried forward indefinitely against future trading income. Certain changes in ownership may prevent the carryforward of losses to future periods. Terminal losses that arise within 12 months of the date a company ceases to trade may be carried back three years.

Payments to foreign affiliates

Generally, deductions can be claimed for royalties, management service charges, and most interest charges paid to foreign affiliates, provided the amounts do not exceed what would be paid to unrelated entities. Depending on the circumstances, certain elections may be required. Ireland does not have any thin capitalisation rules.

Group taxation

The concept of 'fiscal unity' or consolidated group tax does not exist in Ireland. However, trading losses as computed for tax purposes may be offset on a current-period basis against taxable profits of another group company. As with loss relief in a single company, the amount of losses required to shelter the income is dependent on the tax rate that would have been applied to the income in the absence of the loss relief.

A group consists of a parent company and all of its 75% subsidiaries, with all group members being tax resident in Ireland, in another EU member state, in an EEA state with which Ireland has a DTT, or in another country with which Ireland has a DTT. It is also possible to trace through companies quoted on certain recognised stock exchanges (or 75% subsidiaries of companies so quoted). Non-Irish members may only surrender losses from activities that would, if profitable, be subject to Irish tax.

Both the claimant company and the surrendering company must be within the charge to Irish corporation tax. To form a group for corporation tax purposes, both the claimant company and the surrendering company must be resident in an EU country or an EEA country with which Ireland has a DTT ('EEA treaty country'). In addition, one company must be a 75% subsidiary of the other company, or both companies must be 75% subsidiaries of a third company. The 75% group relationship can be traced through companies resident in a 'relevant territory' being the EU, an EEA treaty country, or another country with whom Ireland has a DTT. In addition, in determining whether one company is a 75% subsidiary of another company for the purpose of the group relief provisions, the other company must either be resident in a 'relevant territory' or quoted on a recognised stock exchange.

Capital losses cannot be surrendered within a group.

Relief from capital gains tax is available on intra-group transfers of capital assets. Where a capital asset is transferred from a resident company to another resident company in a 75% group, no capital gains tax charge arises. A group, for capital gains tax purposes, consists of a principal company and its 75% subsidiary companies. A 75% subsidiary is defined by reference to the beneficial ownership of ordinary share capital, owned either directly or indirectly. A capital gains tax group can include companies resident in an EU member state or an EEA DTT country for the purpose of analysing the beneficial ownership of a company.

It also is possible for an Irish resident company and an Irish branch of an EEA company in the same group to transfer capital assets without crystallising a capital gains charge, provided the asset transferred remains within the scope of the charge to Irish capital gains tax.

Subsequent to an intra-group transfer, a charge to capital gains tax will arise when either:

- the asset is sold outside the group, in which case the tax is calculated by reference to the original cost and acquisition date of the asset when first acquired within the group, or
- a company owns an asset that was transferred by a group company and subsequently leaves the group within a ten-year period of the intra-group transfer. The gain on this intra-group transfer crystallises and becomes payable at this point.

Cash pooling and treasury activities

Ireland is a popular location for cash pooling and treasury activities, with a large number of multinationals centralising intra-group treasury activities to avail of the low corporation tax rate of 12.5%. To further enhance the attractiveness of Ireland as a treasury location, Irish tax legislation contains specific provisions to facilitate cash-

pooling activities and ensure favourable tax treatment of ‘short’ interest for tax purposes. Under a typical cash-pool arrangement, interest payments by the Irish cash-pool leader typically would constitute ‘short’ interest for tax purposes because of the overnight/short-term nature of these arrangements.

Short interest is generally regarded as interest on a loan/deposit where the term is less than a year. Essentially, the Irish company will be entitled to a tax deduction for the interest payable to any group company resident outside the European Union in a non-treaty country, provided the recipient country taxes foreign interest income at a rate equal to or greater than the Irish corporation tax rate of 12.5%. If the recipient country taxes foreign interest at a rate of less than 12.5%, then relief will be given in Ireland at that effective tax rate. If the recipient country exempts foreign interest, then no interest relief will be available in Ireland. It should be noted that this will affect not only cash-pooling operations but all forms of short-term lending (i.e. less than one year). A tax deduction for interest payable to a group company resident in the European Union or in a country with which Ireland has a DTT is also available, regardless of the rate at which the foreign country subjects that interest to tax.

Transfer pricing

Transfer pricing rules have been in place in Ireland since 2011. The legislation endorses the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and adopts the arm’s-length principle. The regime applies to domestic as well as international related-party arrangements.

The transfer pricing regulations only apply to related-party dealings entered into by a taxpayer engaged in a trade that is within the charge to tax under Case I or Case II of Schedule D (typically subject to tax at the 12.5% standard rate).

Therefore, income that is characterised as ‘passive income’ subject to tax at a rate of 25% falls outside the scope of the transfer pricing legislation. Passive income for the purposes of these rules may include interest, royalties, dividends, and rents from property where the income arising is not derived from an active trade. For example, interest income arising to a bank will clearly constitute income from an active trade; consequently, any interest arising to a bank from a related-party arrangement will fall within the scope of the transfer pricing rules.

The rules confer a power on the Irish tax authorities to re-compute the taxable profit or loss of a taxpayer where income has been understated or where expenditure has been overstated as a result of certain non-arm’s-length arrangements. The adjustment will be made to the Irish taxable profits to reflect the arrangement had it been entered into by independent parties dealing at arm’s length.

The legislation also places an obligation on a taxpayer to provide documentation ‘as may reasonably be required’ to support the arm’s-length nature of the related-party arrangements and that documentation will need to be prepared ‘on a timely basis’. Guidance notes issued by the Irish tax authorities on transfer pricing documentation support the legislative basis and indicate that a company is required to have transfer pricing documentation available for inspection if requested by the Irish tax authorities. Notably, the guidance notes state that “it is best practice that the documentation is prepared at the time the terms of the transaction are agreed”. Additionally, the guidance notes state that in order “for a company to be in a position to make a correct and complete tax return, appropriate transfer pricing documentation should exist at the time the tax return is filed”. It is worth noting that the taxpayer can maintain documentation in the form ‘of its choosing’. Additionally, where documentation exists in another territory that supports the Irish arrangement, this will also be sufficient from an Irish transfer pricing perspective, provided that the documentation is in English. The Irish tax authorities have also confirmed that they will accept documentation that has been

Ireland

prepared in accordance with either the OECD Transfer Pricing Guidelines or the code of conduct adopted by the EU Council under the title 'EU Transfer Pricing Documentation'.

Note that arrangements entered into between related parties prior to 1 July 2010 are 'grandfathered' and thereby excluded from the scope of the transfer pricing rules. There is also an exemption from the rules for small and medium-sized enterprises. Broadly speaking, small and medium-sized enterprises include enterprises employing less than 250 people and that have either a turnover of less than EUR 50 million or assets of less than EUR 43 million.

In 2015, a dedicated transfer pricing audit team was formed within the Large Cases Division of the Irish tax authorities and has begun to initiate specific transfer pricing audits to monitor compliance with Irish transfer pricing rules.

Country-by-Country (CbC) Reporting

Finance Act 2015 introduced CbC reporting for Irish-parented MNEs (Irish MNEs). The legislation requires Irish MNEs with consolidated annualised group revenue of EUR 750 million or more to comply with the new requirements, with the first CbC report to be prepared for fiscal years beginning on or after 1 January 2016. Under the legislation, Irish MNEs must file a CbC report annually to include specific financial data covering income, taxes, and other key measures of economic activity for each territory in which they operate.

In certain circumstances, Irish subsidiaries of foreign headquartered MNEs may also be required to file an 'equivalent' CbC report in Ireland.

Thin capitalisation

Ireland does not have any thin capitalisation rules.

Controlled foreign companies (CFCs)

Ireland does not have CFC rules.

Tax credits and incentives

The main tax incentives in Ireland are:

- 12.5% corporation tax rate on active business income.
- A 25% credit on qualifying R&D expenditures; total effective tax deduction of 37.5%.
- Ability to exploit IP at favourable tax rates.
- Accelerated tax depreciation allowances for approved energy efficient equipment.
- Ability to carry out investment management activities for non-Irish investment funds without creating a taxable presence in Ireland for such funds.
- An effective legal, regulatory, and tax framework to allow for the efficient redomiciliation of investment funds from traditional offshore centres to Ireland.

R&D credit

A tax credit of 25% applies to the full amount of R&D expenditure incurred by a company. This credit is in addition to the normal 12.5% revenue deduction available for the R&D expenditure thereby resulting in an effective corporation tax benefit of 37.5%.

A separate R&D tax credit is available in respect of expenditure incurred on the construction or refurbishment of a qualifying R&D building. In order to qualify, 35% of the building must be used for qualifying R&D activities, and this threshold is measured over a four-year period. This is of particular assistance where R&D is carried on in a manufacturing environment. The credit available is equal to 25% of the expenditure incurred on the construction or refurbishment of a qualifying building, and the

qualifying amount is restricted according to the R&D use. A full volume basis applies to the R&D tax credit for expenditure incurred on qualifying R&D buildings.

The R&D tax credit is available for offset against the current year corporation tax liability of the company in the first instance. Any excess can be carried back for offset against the prior-year corporation tax liability to generate a tax refund, and any further excess can be monetised over a three-year cycle. The amount that can be monetised is limited to the greater of the corporation tax payable by the company in the preceding ten years (subject to an adjustment dependent upon previous claims) or the payroll tax liabilities of the company for both the period in which the R&D expenditure is incurred and the prior year (subject to an adjustment dependent upon previous claims).

In addition, companies may account for the R&D tax credit through their profit and loss account or income statement in arriving at the pre-tax profit or loss. This immediately impacts the unit cost of R&D, which is the key measurement used by multinational corporations when considering the locations of R&D projects. Companies that are in receipt of an R&D tax credit have the option, in certain instances, to reward key employees through an alternative use of that credit. In effect, the company may surrender a portion of their R&D credit (that could otherwise have been used to reduce corporation tax) to 'key employees' to reduce their effective rate of tax to 23% (the average effective rate of tax for such employees would typically be in excess of 40% in the absence of such R&D tax credit). In order to qualify as a 'key employee', the individual must perform 50% or more of their employment duties on qualifying R&D activities.

The R&D regime caters for pre-trading expenditure incurred on qualifying R&D activities. Where a company incurs R&D expenditure but has not yet commenced to trade, an R&D claim in this regard must be made within 12 months from the end of the accounting period in which the company first commences to trade.

Sub-contracted R&D costs of up to the 15% of qualifying in-house R&D expenditure incurred by a company or EUR 100,000 (whichever is greater) can qualify for the R&D tax credit.

Payments to third level institutions of up to 5% of qualifying in-house R&D expenditure incurred by a company or EUR 100,000 (whichever is greater) can qualify for the R&D tax credit.

It should be noted that expenditure incurred on the acquisition of intangible assets that qualify for capital allowances under the IP regime and expenditure incurred in registering/applying for legal protection for intangible assets that are developed as a result of R&D activities do not qualify for the R&D credit.

Intellectual property (IP) regime

Legislation provides for a tax deduction for capital expenditure incurred by a company, which is carrying on a trade, on the acquisition of qualifying IP assets. The definition of IP assets is widely drafted and includes the acquisition of, or the licence to use, the following:

- Patents and registered designs.
- Trademarks and brand names.
- Know-how (broadly in line with the OECD model tax treaty definition of know-how).
- Domain names, copyrights, service marks, and publishing titles.
- Authorisation to sell medicines, a product of any design, formula, process, or invention (and rights derived from research into same).
- Applications for legal protection (e.g. applications for the grant or registration of brands, trademarks, patents, copyright, etc.).
- Expenditure on computer software acquired for commercial exploitation.

Ireland

- Customer lists acquired, other than 'directly or indirectly in connection with the transfer of a business as a going concern'.
- Goodwill, to the extent that it relates directly to the assets outlined above.

Capital allowances will be available at the same rate as the depreciation/amortisation charge for financial accounting purposes. Alternatively, the company may elect to claim allowances over a period of 15 years.

Finance Act 2014 provided positive improvements in the Irish IP regime. With effect from 1 January 2015, the annual tax deduction available for IP is 100% of the profits generated from the qualifying IP (i.e. the cap of 80% of IP profits has been removed).

A shorter write-off period of eight years has also been retained for acquired software rights under the existing capital allowances regime where the rights are not acquired for commercial exploitation (i.e. were acquired for end use by the company).

Knowledge Development Box

Finance Act 2015 introduced further improvements to the Irish IP regime from 1 January 2016. The introduction of the Knowledge Development Box provides a 6.25% rate of corporation tax to apply to certain profits arising from qualifying assets that are the result of qualifying R&D carried out by the company qualifying for the relief. This is the first Knowledge Development Box in the world to be compliant with the new standards of the OECD's 'modified nexus' approach.

Exemption for new start-up companies

A corporation tax holiday applies to certain start-up companies that commence to trade between 2009 and 2018. The relief applies for three years where the total amount of corporation tax payable does not exceed EUR 40,000 in each year. Marginal relief is available where corporation tax payable is between EUR 40,000 and EUR 60,000. The relief available is now linked to the amount of employer's PRSI paid by a company in an accounting period as it is intended to provide relief at companies generating employment.

The exemption also allows unused relief arising in the first three years of trading (due to insufficiency of profits) to be carried forward for use in subsequent years.

Section 110 company

Ireland has a favourable tax regime for entities known as 'Section 110' companies. A Section 110 company is an Irish resident special purpose company that holds and/or manages 'qualifying assets' and satisfies a number of conditions. A Section 110 company can provide an onshore investment platform, which should be eligible to access Ireland's DTT network where the Irish company is the beneficial owner of the income flow. The Section 110 regime has been in existence almost 25 years and, with appropriate structuring, can provide for an effective corporation tax rate of close to 0%. The regime is widely used by international banks, asset managers, hedge funds, private equity firms, and investment funds in the context of securitisations, investment platforms, collateralised debt obligations (CDOs), collateralised loan obligations (CLOs), acquisition of distressed loan portfolios, big ticket leasing, and capital markets bond issuances.

Section 110 companies are permitted to invest in financial assets, commodities, and plant and machinery. The term 'financial asset' is widely defined and includes both mainstream financial assets, such as shares, loans, leases, lease portfolios, bonds, debt, and derivatives, as well as assets such as greenhouse gas emissions allowances and carbon offsets.

In addition, the extension of the Section 110 regime to include plant and machinery has increased the attractiveness of Ireland as the preferred destination for aircraft financing and leasing activities.

Grants

Cash grants may be available for capital expenditures on machinery and equipment and industrial premises, training of employees, creation of employment, rent subsidies, R&D, manufacturing and exporting products, providing services to customers overseas, etc. The level of grant aid depends on a number of factors and is specific to each project. Rates depend on the location of the new industry.

Foreign tax credit

Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland. The calculation of the credit depends on the nature of the income item, but for income sources other than dividends and some related-party interest, the credit is limited to the Irish tax referable to the particular item of income. A system of onshore pooling of excess foreign tax credits applies to dividends from 5% or greater corporate shareholdings, and excess credits in the dividend pool can be carried forward indefinitely. A similar pooling system applies to some related-party interest and also to foreign branch income.

An Irish resident company with a branch or branches outside Ireland is generally taxable in Ireland on the foreign branch profits with a credit for foreign taxes paid on those profits. A unilateral form of credit relief for foreign taxes paid by foreign branches operating in countries with which Ireland does not have a tax treaty is also available. To the extent that there were foreign taxes on branch profits that were not utilised in the relevant period (that is, where credit for foreign tax exceeds the Irish tax payable), these unused credits can be carried forward indefinitely and credited against corporation tax on foreign branch profits in future accounting periods.

A form of pooling of tax deductions in relation to foreign tax on royalties may be applicable where the royalty income is taken into account in computing the trading income of a trade carried on by the company.

An additional tax credit is available on certain dividends received by an Irish Holdco from an EU/EEA subsidiary that is subject to either the 12.5% or 25% rate of Irish tax.

The additional tax credit will provide for a credit up to the amount of Irish tax in instances where the Irish nominal rate is lower than nominal rate of tax on the underlying profits in the country where the profits are sourced.

Withholding taxes

Irish resident companies are required to withhold tax on certain types of payments as set out below (*see sub-sections below for WHT exemptions and table at end of this section for WHT rate reductions*).

Recipient	WHT (%)		
	Dividends	Interest	Patents, royalties
Resident companies	0	20	20
Resident individuals	20	20	20
Non-resident companies and individuals	20	20	20

Ireland

Dividend WHT

Dividend WHT applies at 20% to dividends and other distributions. However, an exemption may be available where the recipient of the dividend is either an Irish company or a non-Irish company eligible for the Parent-Subsidiary Directive (which in Ireland requires a 5% or greater shareholding).

Exemptions from dividend WHT also are available where the recipient of the distribution falls into one of the categories listed below and provided an appropriate declaration is made to the company paying the distribution in advance of the distribution. In a move to significantly ease the administrative burden in applying for exemption for dividend WHT, this declaration is now self-assessed and valid for up to six years.

- Irish tax resident companies (a declaration is not required for Irish tax resident companies that hold a 51% or greater shareholding of the company).
- Non-resident companies that are resident in a country with which Ireland has a tax treaty or in another EU member state, where the company is not controlled by Irish residents.
- Non-resident companies that ultimately are controlled by residents of a tax treaty country or another EU member state.
- Non-resident companies whose principal class of shares is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance (or if recipient of the dividend is a 75% subsidiary of such a listed company).
- Non-resident companies that are wholly owned by two or more companies the principal class of shares of each of which is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance.
- Individuals who are resident in a tax treaty country or in another EU member state.
- Certain pension funds, retirement funds, sports bodies, collective investment funds, and employee share ownership trusts.

Companies that make a dividend distribution are required, within 14 days of the end of the month in which the distribution is made, to make a return to the tax authorities containing details of the recipient of the dividend, the reason for any exemption from dividend WHT, and to pay over any tax withheld.

Interest WHT

Financial institutions operating in Ireland are obligated to withhold tax (deposit interest retention tax or DIRT) out of interest paid or credited on deposit accounts in the beneficial ownership of resident companies, unless the financial institution is authorised to pay the interest gross. The rate is 41%. There is no DIRT on interest paid to non-residents where a written declaration of non-residence is completed. Certain annual interest payments are subject to WHT at 20%. Interest payments made by companies to companies resident in other EU member states or in treaty countries are generally not subject to WHT. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies.

Royalties WHT

Royalties, other than patent royalties, are not generally subject to WHT under domestic law. Patent royalty payments and certain other annual payments are subject to WHT at 20%. Lower WHT rates may be accessed under treaties, subject to certain documentation and reporting requirements. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies. Associated companies, for the purpose of this directive, are companies where one can directly control at least 25% of the voting power of the other or at least 25% of the voting power of both companies is directly controlled by a third company. In all cases, all companies must be resident in a member state of the European Union.

WHT on capital gains

Where any of the following assets is disposed of, the person by whom or through whom the consideration is paid (i.e. the purchaser) must deduct capital gains WHT at 15% from the payment:

1. Land or minerals in Ireland or exploration rights in the Irish continental shelf.
2. Unquoted (unlisted) shares deriving their value or the greater part of their value (more than 50%) from assets described in (1).
3. Unquoted (unlisted) shares issued in exchange for shares deriving their value or the greater part of their value from assets as described in (1).
4. Goodwill of a trade carried on in Ireland.

The requirement to withhold tax does not apply where the consideration does not exceed EUR 500,000 or where the person disposing of the asset produces a certificate from the Revenue Commissioners authorising payment in full. A clearance certificate may be obtained by making application on Form CG50 to the Revenue Commissioners supported by a copy of the agreement or contract for sale. The certificate may be obtained on the grounds that the vendor is Irish resident, no capital gains tax is due in respect of the disposal, or the capital gains tax has been paid. WHT is creditable against the capital gains tax liability of the vendor, and any excess is refundable.

I

To avoid the requirement to withhold, clearance must be obtained before the consideration is paid. There is no exemption from the withholding procedure where the asset is held as trading stock or where the transaction is intra-group and a capital gains tax liability does not arise. Failure to obtain the certificate will lead to the purchaser being assessed to capital gains tax for an amount of 15% of the consideration.

Professional services withholding tax (PSWT)

Individual income tax at the standard rate (currently 20%) is deducted from payments for professional services by government departments, state bodies, and local authorities. Credit is granted for any PSWT withheld against the corporation tax (or income tax for an individual) liability of the accounting period in which tax is withheld.

Relevant contracts tax (RCT)

RCT is a WHT that applies in the construction, forestry, and meat-processing industries in Ireland. It applies where a 'principal contractor' engages a sub-contractor under a 'relevant contract' to carry out 'relevant operations'. Compliant taxpayers can obtain Irish Revenue clearance for zero WHT.

The RCT system applies if the 'relevant operations' are carried out in Ireland, to include Irish territorial waters and any area over which Ireland has exploration and exploitation rights. Therefore, it is irrelevant whether or not the parties to the contract are resident in Ireland, the parties are liable to tax in Ireland, the contract is executed outside Ireland, or whether payments under the contract are made outside Ireland.

It is important to note that principal contractors who are liable to RCT may not necessarily operate in the above industries. In the case of construction, in particular, relevant contracts may be entered into by a variety of entity types. For example, companies involved in electricity generation, oil and gas exploration, and telecommunications undertakings are all classed as principal contractors. Relevant operations are also broadly defined. Examples are repairs to buildings and structures, ground works, installation alteration and repairs to various systems in buildings (e.g. electrical, ventilation, water supply, telecommunications, burglar and fire protection systems), mining, exploration works, and also certain haulage contracts.

Where RCT applies, the principal contractor must notify the contract and all payments under the contract to Revenue on the eRCT system in advance of payment being made. Once the principal notifies Revenue that they intend on making a payment to the

Ireland

sub-contractor, Revenue will then revert on a real-time basis and issue a Deduction Authorisation to the principal advising of the rate of RCT to be withheld from the gross payment. The current rates of RCT are 20% and 35% and depend on the Irish tax compliance position of the sub-contractor. The 20% rate will apply to sub-contractors who are registered with Revenue and have a good tax compliance record. The 35% rate will apply where the sub-contractor is not registered for tax in Ireland or has an inadequate tax compliance record. The sub-contractor is entitled to credit for, or offset of, the RCT withheld by the principal and paid to Revenue.

If, however, the sub-contractor has applied for and received zero rate authorisation from Revenue, then 0% RCT rate applies and the sub-contractor can receive payment gross without deduction of RCT. If a principal does not notify payments to Revenue in advance of making payment to the sub-contractor, then penalties will apply. It should be noted that the cost of non-compliance with RCT procedures are severe, therefore it is important that RCT is considered before undertaking any construction related activity, in addition to meat-processing and forestry activity.

WHT rate reductions and exemptions

Exemptions and rate reductions apply under domestic law and under tax treaties. Where an exemption from WHT is not available (*please see sections above for domestic law exemptions*), a reduced rate of WHT may apply under an applicable tax treaty. The table below sets out the reduced rates of WHT that may be available to payments from Ireland of dividends, interest, and royalties under an applicable tax treaty.

Recipient	WHT (%)		
	Dividends (1)	Interest	Patents, royalties (3, 4)
Non-treaty	20	20	20
Treaty:			
Albania	0/5/10	0/7	7

Irish tax legislation allows for favourable treatment in situations where a DTT has been signed but not yet ratified.

Ireland

Notes

1. Domestic legislation may also provide an exemption from the dividend WHT, subject to providing the necessary documentary evidence of qualification. An exemption may also be available under the EU Parent-Subsidiary Directive.
2. The EU Interest and Royalties Directive may provide an exemption from WHT for payments between associated companies.
3. In general, royalties WHT applies only in the case of patent royalties.
4. Under domestic legislation, WHT will not apply if the loans or advances are for a period of less than one year or if the interest is paid in the course of a trade or business to a company resident in an EU or treaty country and that country imposes a tax that generally applies to foreign interest receivable.
5. As of 1 January 2016, the treaty has been ratified but is not yet in force.

Negotiations with Azerbaijan, Kazakhstan, and Turkmenistan have concluded, and the new agreements are expected to be signed shortly.

Ireland is currently negotiating treaties with the following countries:

- Argentina
- Ghana
- Jordan
- Taiwan
- Tunisia

Tax administration

Taxable period

The tax accounting period normally coincides with a company's financial accounting period, except where the latter period exceeds 12 months.

Tax returns

Corporation tax returns must be submitted within nine months (and no later than the 23rd day of the ninth month) after the end of the tax accounting period in order to avoid a surcharge (maximum of EUR 63,485) or a restriction of 50% of losses claimed, to a maximum of EUR 158,715.

Payment of tax

Corporation tax payment dates are different for 'large' and 'small' companies. A small company is one whose corporation tax liability in the preceding period was less than EUR 200,000. Interest on late payments or underpayments is applied at approximately 8% per year.

Large companies

For large companies, the first instalment of preliminary tax totalling 45% of the expected final tax liability, or 50% of the prior period liability, is due six months from the start of the tax accounting period (but no later than the 23rd day of the month).

The second instalment of preliminary tax is due 31 days before the end of the tax accounting period (but no later than the 23rd day of the month). This payment must bring the total paid up to 90% of the estimated liability for the period.

The balance of tax is due when the corporation tax return for the period is filed (that is, within nine months of the end of the tax accounting period, but no later than the 23rd day of the month in which that period of nine months ends).

Small companies

Small companies are only required to pay one instalment of preliminary tax. This is due 31 days before the end of the tax accounting period (but no later than the 23rd day of the month).

The company can choose to pay an amount of preliminary tax equal to 100% of the corporation tax liability for its immediately preceding period or 90% of the estimated liability for the current period. As is the case for large companies, the final instalment is due when the corporation tax return is filed.

Tax audit process

A system of self-assessment and Irish Revenue audits is in operation in Ireland.

Statute of limitations

Irish Revenue may undertake an audit of a company's tax return within a period of four years from the end of the accounting period in which the return is submitted.

Topics of focus for tax authorities

In Irish Revenue's Annual Report 2015, a continued priority is to maintain the high levels of voluntary compliance in Ireland aided by an increased focus on non-compliance. The Irish authorities aim to do so by using emerging data sources to risk-assess cases and target new forms of non-compliance and aggressive avoidance.

Another of Irish Revenue's key aims is to make it easier and less costly for voluntary compliance through further use of digital channels and a range of initiatives to lessen the administrative burden for taxpayers.

Internationally, Irish Revenue have committed to further tax transparency and the exchange of information between authorities. Revenue also emphasises a continued focus on transfer pricing issues both at an EU and global level.

General Anti-Avoidance Legislation

The general anti-avoidance provisions are designed to counteract transactions that lack commercial reality and are put in place with a view to reducing or avoiding a charge to taxation.

The impact of the general anti-avoidance rule is that where a person enters into a transaction and it would be reasonable to consider that the transaction is a 'tax avoidance transaction', Irish Revenue may, at any time, deny or withdraw the tax advantage. In order to deny or withdraw that tax advantage, Irish Revenue may:

- make or amend an assessment
- allow or disallow in whole or in part any credit, deduction, or other amount that is relevant in computing tax payable
- allocate or deny in whole or in part any credit, deduction, loss, abatement, relief, allowance, exemption, income, or other amount, or
- recharacterise, for tax purposes, the nature of any payment or other amount.

The assessment made by Irish Revenue will stand unless the taxpayer successfully appeals it to the Appeals Commissioners/Courts.

Mandatory disclosure

In a move to promote transparency between taxpayers, practitioners, and tax authorities, provisions relating to the disclosure of tax schemes are applicable. These require promoters of such schemes to provide information to the tax authorities within a specified time of having made the scheme available. A transaction that comes within the new law and must therefore be reported to Revenue is not necessarily a tax avoidance transaction for the purposes of existing legislation. The rules are wide reaching and essentially cover all tax heads, including corporation tax, income tax, capital gains tax, stamp duty, VAT, customs duties, and excise duties.

Other issues

Asset management

Irish tax legislation contains provisions aimed at promoting Ireland as a leading location for the management of both Undertakings for Collective Investment in Transferable Securities (UCITS) and non-UCITS funds. *For more information, see the Other issues section of Ireland's Corporate tax summary at www.pwc.com/taxsummaries.*

International funds sector

Recent Irish legislation has introduced a number of provisions designed to support and enhance the international funds sector in Ireland. *For more information, see the Other issues section of Ireland's Corporate tax summary at www.pwc.com/taxsummaries.*

Islamic finance and insurance

Irish tax law facilitates most Islamic finance transactions. *For more information, see the Other issues section of Ireland's Corporate tax summary at www.pwc.com/taxsummaries.*

Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)

In December 2012, the Chargé d'affaires at the US Embassy in Ireland and the Minister for Finance of Ireland signed an intergovernmental agreement (the US-Ireland IGA), for which enabling provisions were enacted into Irish tax legislation in Finance Act 2013.

The Financial Accounts Reporting (United States of America) Regulations 2014 ('the Regulations'), which give effect to FATCA in Ireland, were signed into law on 20 June 2014 and took effect from 1 July 2014. The Regulations, together with the provisions of Section 891E Taxes Consolidation Act 1997, complete the legislative basis for the registration, due diligence, and reporting obligations of Irish financial institutions. Further guidance is provided in the Irish Guidance Notes issued by Irish Revenue. The due date for reporting accounts is 30 June. The first reporting cycle was completed in 2015 in respect of the period ending 31 December 2014, and reporting is required to be performed by Irish financial institutions annually thereafter.

The IGA changes the way in which FATCA affects Irish financial institutions. Its effect is to give Irish laws and regulations precedence in governing FATCA compliance for Irish entities, and it provides that reporting will be carried out to the Irish Revenue Commissioners, rather than to the US Internal Revenue Service (IRS). The reporting requirements will apply to all Irish financial institutions, as defined, regardless of whether the entity has US account holders or US assets.

US-Ireland IGA

The US-Ireland IGA defined the types of Irish financial institutions that are in scope for FATCA as:

- a custodial institution
- a depository institution
- an investment entity, or
- a specified insurance company.

Specific definitions are attached to each type of entity above.

For the asset management industry, the IGA covers investment funds, their administrators and investment managers, as well as other parties involved in the running of the fund. The Irish regulations clarify that the fund is the party with primary responsibility for complying with the relevant obligations, but that certain due diligence and reporting responsibilities can be delegated to a third party, such as the fund administrator, at the fund's discretion.

The US-Ireland IGA also defines the types of institutions that are either exempt from the scope of FATCA or that can qualify as 'Deemed-Compliant Financial Institutions'. Entities qualifying under the 'Deemed Compliant' status will benefit from a reduced compliance burden under FATCA. Such entities include non-profit organisations, financial institutions with a local client base, and certain collective investment vehicles. Collective investment vehicles may qualify under the 'Deemed Compliant' status where all of the interests in the vehicle are held by or through one or more financial institutions that are not non-participating financial institutions.

IGA benefits

Under the IGA and its enabling Irish provisions, reporting Irish financial institutions will not be required to sign an agreement with the IRS, as envisaged by the FATCA regulations. Instead, relevant entities must report account holder information annually to Irish Revenue Commissioners (by 30 June each year in respect of the previous calendar year). The Irish Revenue Commissioners will then collate and exchange this information with the IRS.

Under the US-Ireland IGA, reporting Irish financial institutions are considered to be compliant with local regulations, and, as a result, those entities should not suffer 30% FATCA WHT on US-source income or gross proceeds. Similarly, reporting Irish financial institutions should not be obligated to operate 30% FATCA WHT on such payments made to recalcitrant account holders or investors, provided the requirements of the IGA are met.

This is a very positive feature of the US-Ireland IGA, and means that the task of developing complex WHT systems to identify and withhold on payments to certain account holders is avoided in most cases.

IGA requirements

Some of the key requirements of reporting Irish financial institutions under the US-Ireland IGA include the following:

- Register as a reporting Irish financial institution and receive a Global Intermediary Identification Number (GIIN).
- Apply due diligence procedures to identify and report certain information on US Reportable accounts (as defined) and accounts held by non-participating financial institutions.
- Update account on-boarding procedures with effect from 1 July 2014 to identify whether the account holder is considered a US person (individual accounts) and classify and document the account into different categories of account holder (entity accounts).
- Annually report certain details on US reportable accounts.

Reporting

The Guidance Notes include a useful timetable demonstrating the phased in approach to Reporting over the next three years. They also contain a link to the IRS Schema and provide details on the transmission of the report to Revenue via Revenue's Online Service (ROS). Reporting can be done in US dollars or in the functional currency of the financial account. Nil reporting is required where a financial institution has no reportable accounts.

The draft Guidance Notes had stated that the IRS may contact financial institutions directly in the case of minor errors. This has now been removed, and the updated Guidance Notes state that where reporting errors are discovered by the IRS, the IRS will contact Revenue directly, who will liaise with the financial institution to resolve the issue.

Common Reporting Standard (CRS)

The CRS framework was first released by the OECD in February 2014 as a result of significant political will demonstrated by the G20 members. To date, more than 90 jurisdictions have publically committed to implementation, many of which are early adopter countries, including Ireland. For early adopters, CRS went live on 1 January 2016.

On 21 July 2014, the Standard for Automatic Exchange of Financial Account Information in Tax Matters (the Standard) was published, involving the use of two main elements, the Competent Authority Agreement (CAA) and the CRS. The goal of the Standard is to provide for the annual automatic exchange between governments of financial account information reported to them by local financial institutions relating to account holders who are tax resident in other participating countries.

The OECD leveraged FATCA to design the CAA and CRS, and, as such, the Standard is broadly similar to the FATCA requirements, albeit with numerous alterations. It will result in a significantly higher number of reportable persons due to the increased instances of potentially in-scope accounts and the inclusion of multiple jurisdictions to which accounts must be reported.

Requirements for financial institutions under CRS

A determination will be required to be made with regard to whether an entity falls within the definition of a financial institution for CRS purposes. The definition of a financial institution is similar to FATCA, albeit wider in scope. If an entity is regarded as a financial institution and it is located in a participating jurisdiction, CRS requires it to identify account holders who are tax resident in other participating jurisdictions and report their information on an annual basis to their local tax authority, for onward exchange to the tax authority in which the account holder is resident. CRS therefore has a much larger scope than FATCA. In particular, CRS will require substantially increased reporting on a greater number of customers compared with FATCA, which focuses solely on US 'specified persons'. Irish Revenue has adopted the 'wider approach' with regard to CRS, which means that Irish financial institutions need to report all account holders to Irish Revenue (apart from Irish and US account) who will then review this information and pass account information to tax authorities in participating jurisdictions to the extent there are reportable accounts that are resident in that participating jurisdiction.

Financial institutions are required to obtain a CRS self-certification from account holders for all new accounts opened on or after 1 January 2016. There are two types of self-certification forms, individual and entity. If an entity self-certification form is to be completed, then an individual self-certification must also be completed (along with the controlling persons section) for each of the entity's controlling persons.

Self-certifications must be reviewed for reasonableness against other information known about the account holder. As a result, the collection and validation of self-certifications must be an integral part of the anti-money laundering/know your customer (AML/KYC) process.

CRS requires separate due diligence review and timelines for pre-existing and new accounts, and for individuals and entities similar to FATCA. The first CRS reporting to the relevant tax authorities by financial institutions will be in June 2017 (in respect of 2016). As such, 'new account' opening procedures should be in place from 1 January. For pre-existing accounts, due diligence will need to be completed by 31 December 2016 or 31 December 2017, depending on the type of pre-existing account holder.

Significant developments

Land Development Tax Holiday

The Isle of Man 2016 budget introduced a Land Development Tax Holiday, which means, where certain conditions are met, a company can apply for exemption from income tax for up to five years on 'relevant' profits. These include:

- Profits on new commercial developments or improvements to existing commercial developments.
- Rental income received on a new commercial development or improvement to an existing commercial development.

However, both of the above must provide 'additional productive employment' in the Island.

Residential property is excluded as is any business that is beneficially owned by a tax-capped individual. The tax holiday will apply to income that commences after 16 February 2016. It will begin on the first date income is earned from the development and will continue for a period of up to five years.

Tax treaties

As of 6 April 2016, the Isle of Man had entered into ten comprehensive double tax agreements (DTAs), 13 limited scope DTAs, and 35 tax information exchange agreements (TIEAs) based on the Organisation for Economic Co-operation and Development (OECD) models. The Isle of Man also has a DTA with the United Kingdom (UK) that predates the OECD model.

Taxes on corporate income

Companies resident in the Isle of Man are taxed on their worldwide income and are required to file an annual income tax return reporting worldwide taxable profits calculated in line with local legislation and practice.

A non-resident company incorporated outside the Isle of Man but having a place of business or a permanent establishment (PE) on the Isle of Man will be taxed on the profit attributable to the Isle of Man establishment.

With effect from 6 April 2015, there are three rates of corporate income tax (CIT).

The 10% rate applies to income from:

- a banking business carried on in the Isle of Man on the basis of a deposit taking licence issued by the Isle of Man Financial Supervision Commission, and
- retail activities (i.e. the sale of goods to consumers through retail premises) carried on in the Isle of Man, but only if that income exceeds 500,000 Isle of Man pounds (IMP) in the year.

Isle of Man

The 20% rate applies to income from real estate situated in the Isle of Man (the 10% rate of tax applies to this income up to 5 April 2015).

The 0% rate applies to all other income.

Where an election is made, certain companies subject to Manx income tax at the standard 0% rate can elect to pay tax at the 10% rate.

The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, 20%, or a combination of these rates. Both resident and non-resident companies are taxed on their income at the same rates.

Unilateral relief from double taxation in respect of foreign-source income is given by way of tax credit.

Local income taxes

There are no profit based taxes levied by local government in the Isle of Man. However, commercial business rates are payable. Premises are assessed and given a 'rateable value' that forms the basis of the annual rates charge levied.

Corporate residence

A company incorporated in the Isle of Man is automatically resident for tax purposes and must therefore file an annual income tax return, whether it pays tax at 0%, 10%, 20%, or a combination of these rates.

A company that is incorporated elsewhere will be considered resident in the Isle of Man if it is 'managed and controlled' in the Isle of Man, and will be taxed on its worldwide income accordingly. 'Managed and controlled' is generally interpreted as being the place where the board of directors meets, although this is not always conclusive.

In cases where a company is resident in a country with which the Isle of Man has a tax treaty, then a tie-breaker may operate to determine residence.

Note that a company that is incorporated in the Isle of Man will not be resident if it can prove to the satisfaction of the Assessor that:

- its business is centrally managed and controlled in another country
- it is resident for tax purposes under the other country's law
- either it is resident for tax purposes in the other country under a DTA in which a tie breaker clause applies or the highest rate at which any company may be charged to tax on any part of its profits in that other country is 20% or higher, and
- there is a *bona fide* commercial reason for its residence status in the other country, which is not motivated by a desire to reduce Isle of Man tax.

Permanent establishment (PE)

A place of business includes a PE, such as a branch office or shop, factory, workshop, or mine. The definition of a PE is not set out in statute, and, in cases where the company is resident in a country with which the Isle of Man has a DTA, the terms of the agreement will determine the company's residence.

Other taxes

Value-added tax (VAT)

VAT is a transaction-based tax applied on the domestic supply of most goods and services and is currently charged at a standard rate of 20%. VAT is designed to be a tax

borne by the final consumer, and there is a mechanism for businesses to recover VAT incurred in a supply chain, subject to meeting certain conditions.

For VAT purposes, the Isle of Man forms a single territory with the United Kingdom, and the VAT rules are broadly identical. This means that VAT is charged on supplies between Isle of Man and UK businesses as if they were domestic supplies. The Isle of Man has its own tax authority for VAT and other indirect taxes, which works in conjunction with the UK tax authorities.

Some supplies are charged at 0%, including food, books and publications, and public transport, and there is also a 5% rate applied to domestic property repairs, amongst other things. Finally, some supplies are exempt from VAT, including insurance and financial services, betting and gaming, education, and healthcare.

Customs and excise duties

In addition to VAT, the Isle of Man forms a common jurisdiction for customs and excise duties with the United Kingdom, and, again, the rules are broadly identical. Customs duties are levied on most goods imported from outside the European Union (EU) into the Isle of Man, and there are various rates of duty that apply. Excise duties apply to such things as alcohol, tobacco, and fuels, and there are various rates of duty that apply. There is also a levy on commercial passenger flights known as Air Passenger Duty.

Property taxes

There are no property-related taxes for companies other than (i) income tax payable at a rate of 20% on their profits from the rental or development of land or property situated in the Isle of Man (the 10% rate of tax applied to this income up to 5 April 2015) and (ii) business rates *as detailed in the Taxes on corporate income section*.

Transfer taxes

There are no capital transfer taxes in the Isle of Man.

Stamp taxes

There is no stamp duty payable in the Isle of Man.

Betting duty

There are no other transaction taxes in the Isle of Man other than betting duty on gaming transactions, which is levied at differing rates of up to 15%, depending on the nature of the gaming transaction and whether it is online or land-based.

Payroll taxes

Employers in the Isle of Man are responsible for deducting tax from an employee's remuneration under the Income Tax Instalment Payments (ITIP) scheme. An employer is any person, which includes any individual, company, partnership, or public body, that engages or hires the services of someone and, in return, pays a wage or fixed payment.

The scheme covers everyone who receives remuneration and includes employees, office holders (e.g. directors), and pensioners. Any remuneration is subject to ITIP, and tax should be deducted in accordance with the individual's tax code.

For the purposes of ITIP, 'remuneration' means any payment of salary, wages, fees, commission, pensions, or annuities and some termination payments.

National Insurance contributions

In addition to deducting 'National Insurance' contributions from their employees' earnings, employers in the Isle of Man are required to make a 'secondary' National Insurance contribution in respect of each of their employees, depending on the individual's circumstances.

Isle of Man

The standard rate of secondary contribution is 12.8% on earnings over IMP 118 per week, but reduced rates apply in certain circumstances where the employee is a member of a pension scheme.

Branch income

The income of branches is taxed in the same way as other corporate income in the Isle of Man. Foreign companies with branches in the Isle of Man will be taxed at the appropriate rate on the profits attributable to the Isle of Man branch.

Income determination

The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, 20%, or a combination of these rates.

Inventory valuation

Inventories are generally stated at the lower of cost or market value. Any method of valuation that accords with sound commercial principles is acceptable for tax purposes, provided it is adopted consistently at the beginning and end of the accounting period and does not conflict with tax law. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base stock method or the last in first out (LIFO) method.

In general, the book and tax methods of inventory valuation must conform.

Capital gains

There is no capital gains tax in the Isle of Man.

Dividend income

Dividends are taxed at the standard rate of 0%. Dividends received from Isle of Man companies do not suffer withholding tax (WHT).

Banking income

Licensed banks are taxed at 10% on income from deposit taking, any related activities, and interest earned from the investment of regulatory reserves only.

Income earned on capital and reserves in excess of the regulatory capital, group funded lending, fiduciary deposits, assurance, insurance, custody, trust, and corporate services is not classified as banking business and is taxed at the 0% rate.

General expenses are allocated against 0% and 10% income streams on a *pro rata* basis.

The 20% rate applies to income earned by banks from real estate situated in the Isle of Man (the 10% rate of tax applied to this income up to 5 April 2015).

Rental income

Companies with profits arising on rental income in respect of land or property situated in the Isle of Man are charged to income tax at a rate of 20% (the 10% rate of tax applied to this income up to 5 April 2015). This rate applies whether or not the company is resident in the Isle of Man.

Foreign income

Resident corporations are liable to tax on their worldwide income (albeit the relevant rate of tax is often 0%).

Deductions

Relief is given in calculating the taxable profit of a company if the expense is incurred in the normal course of the business and is incurred wholly and exclusively for business purposes. However, certain expenses that are deducted in the computation of profits are not allowable for tax purposes. These include depreciation, unpaid but accrued pension and bonus payments, certain lease payments, and customer entertainment costs.

Depreciation

Depreciation charged in accounts in not allowable for tax purposes. Instead, relief for depreciation is given using 'capital allowances' based on a reducing-balance method. Plant and machinery, tourist premises, industrial buildings, commercial buildings within a designated area, fish processing buildings, and agricultural buildings and works have an initial allowance of 100%. There are restrictions on allowances for expensive motorcars.

Isle of Man government grants are not taken into account in determining the amount of expenditure on which allowances may be given.

Tax depreciation is not required to conform to book depreciation.

Upon disposal, allowances will be reclaimed on the sale proceeds, restricted to cost.

Goodwill

No relief is given against trading profits for the purchase of goodwill.

Start-up expenses

Start-up expenses incurred in the three years prior to the commencement of trading, which would have been deductible as a trading expense if incurred after the commencement of trading, are treated as a loss arising in the year trading commenced, and relief for these losses can be claimed, subject to the normal loss-relief rules.

Interest expenses

Interest paid to lenders subject to Isle of Man tax is allowable in full. Interest paid to lenders not subject to Isle of Man taxation is allowable if it is incurred in the normal course of the business and is wholly and exclusively for business purposes. Only interest charged at a reasonable commercial rate will be allowed as a deduction.

Bad debt

Relief against trading profits is only available in respect of specific bad debts. General provisions are not allowable.

Charitable contributions

Broadly, trading companies are able to claim a deduction for donations made to charities, subject to a maximum of IMP 15,000 or 1% of their taxable income, whichever is greater.

Fines and penalties

No relief is available for any payments made in respect of fines or penalties, whether related to income tax compliance or otherwise.

Taxes

Business rates, as detailed in the *Taxes on corporate income* section, are deductible when calculating net taxable profit.

Net operating losses

Losses can be carried forward indefinitely against future profits from the same trade.

Isle of Man

Trading losses incurred may be carried back against preceding year profits. There are additional rules that apply in the opening years of trade. Terminal losses in the last year of trade can be carried back against profits for the previous three years.

Payments to foreign affiliates

There is no formal transfer pricing regime in the Isle of Man, and payments made to foreign affiliates, such as royalties, management charges, and service fees, are deductible under normal principles. If, however, the Assessor of Income Tax is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction.

For details of WHTs, please see the Withholding taxes section.

Group taxation

Trading losses and excess capital allowances may be surrendered (subject to certain restrictions) between 75% affiliates resident in the Isle of Man. Similar concessions are available to members of a consortium, but only a fraction of the loss or excess may be set-off, that fraction being equal to the members' share in the consortium in the relevant year of assessment.

Transfer pricing

There is no formal transfer pricing regime in the Isle of Man. If, however, the Assessor of Income Tax is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction of tax liability.

Thin capitalisation

There is no specific thin capitalisation rule in the Isle of Man.

Controlled foreign companies (CFCs)

There is no CFC regime in the Isle of Man.

Tax credits and incentives

No special tax incentives are available in the Isle of Man.

Foreign tax credit

See Foreign income in the Income determination section for a description of foreign tax credits.

Withholding taxes

WHT should be deducted from certain payments made to non-residents by Isle of Man resident companies as follows:

- Rent from Manx land and property: 20% if paid to either a company or to an individual.
- Dividends: WHT is not required.
- Loan interest and royalties: WHT is generally not required, but there are certain exceptions that may apply.
- Other: The Assessor of Income Tax in the Isle of Man has the power to require WHT, at a rate determined by the Assessor (typically 20%), on payments of taxable income made to a non-resident (e.g. payments made to non-resident sub-contractors).

Tax administration

Taxable period

An accounting period for tax filing purposes can be no more than 12 months.

Tax returns

All companies are required to submit income tax returns on an accounting-period basis, whether they are liable to tax at 0%, 10%, 20%, or a combination of these rates. The tax return is due for submission one year and one day following the end of an accounting period. Where the financial statements cover more than 12 months, two (or more) returns may be required.

As of April 2015, companies are required to file their income tax returns online.

Fixed rate penalties apply if returns are filed late. The Assessor of Income Tax also has the powers to raise a default assessment where a tax return has not been filed.

Payment of tax

Payment of tax is due within one year and one day of an accounting period end. Interest is charged on tax paid late.

Tax audit process

There is no formal regular tax audit process in the Isle of Man. The Assessor of Income Tax can make an enquiry into a return within the time limits set out below.

Statute of limitations

Generally, the Assessor of Income Tax may make an enquiry into a tax return no later than 12 months from the date that the tax return is delivered to the Assessor.

If, however, the Assessor discovers that income tax has not been assessed that should have been assessed, the Assessor is able to make an assessment of that tax within a period of four years from the end of the relevant accounting period.

The Assessor also has powers to require the production of documents.

Topics of focus for tax authorities

The Isle of Man government is focussed on delivering openness and transparency across all areas of Isle of Man taxation. The government and the tax authorities work closely with international bodies such as the EU Code of Conduct group and the EU's Economic and Financial Affairs Council to ensure that the Island is fully compliant with international standards in areas such as tax transparency and exchange of information. The Island is already recognised on the OECD White List as being in the top tier of countries for transparency and information exchange.

The Isle of Man is focussed on reducing the avoidance of income tax and national insurance contributions of individuals using personal service companies and introduced legislation, which came into effect on 6 April 2014, to tackle this issue.

There is also more focus on the taxation of dividends paid to shareholders, particularly in relation to whether a payment is a *bona fide* dividend or disguised remuneration.

Other issues

Tax treaties

As of 6 April 2016, the Isle of Man had entered into ten comprehensive DTAs, 13 limited scope DTAs, and 35 TIEAs based on the OECD models. The Isle of Man also has a DTA with the United Kingdom that predates the OECD model.

Isle of Man

In December 2013, the Isle of Man signed an intergovernmental agreement (IGA) with the United States to improve international tax compliance and to implement the Foreign Account Tax Compliance Act (FATCA). Information has been exchanged with effect from 30 June 2015.

Additionally, in October 2013, the Isle of Man became the first British dependency to sign an agreement with the United Kingdom extending the automatic disclosure of tax information. The agreement is modelled on the requirements of FATCA. The UK and Isle of Man governments have agreed to start exchanging additional information with effect from 30 June 2016.

In October 2014, the Isle of Man was one of over 50 jurisdictions that signed an agreement in Berlin committing to adopt the Common Reporting Standard (CRS), the new global standard for tax information agreements.

Choice of business entity

There are several different entities through which businesses may operate in the Isle of Man. These include companies, limited liability companies, partnerships, limited partnerships, and protected cell companies.

Significant developments

Effective 1 October 2015, the value-added tax (VAT) rate has been reduced from 18% to 17%.

Effective 1 January 2016, the corporate tax rate has been reduced from 26.5% to 25%.

On 11 April 2016, the Israel Tax Authority (ITA) published a tax circular that addresses taxation of the 'digital economy' (i.e. taxation of foreign companies that operate in Israel online, both in e-commerce and online services).

I

Taxes on corporate income

Israel-incorporated companies and foreign companies that have a branch presence in Israel are both subject to Israeli corporate tax. An Israeli-resident entity is subject to Israeli corporate tax on worldwide income while a non-resident entity is subject to Israeli corporate tax only on income accrued or derived in Israel. Income sourcing rules determine when income is to be considered from an Israeli source.

The corporate tax rate is 25%.

Approved enterprises (AEs) are subject to reduced rates of tax depending upon the level of foreign ownership and location (*see the Tax credits and incentives section*).

Local income taxes

Israel does not impose local taxes on corporate income.

Corporate residence

The following are considered to be resident in Israel:

- A company incorporated in Israel.
- A company whose business is managed and controlled from Israel.

In the absence of a definition of the term 'management and control' either in Israeli legislation or a direct discussion of this term by the Israeli courts, it may be difficult to determine whether a company that is incorporated outside of Israel shall be viewed as managed and controlled from Israel. This is a complex subject that needs to be addressed on a case-by-case basis. When an entity is both an Israeli tax resident and a resident of a foreign jurisdiction that is party to an income tax treaty with Israel, most treaties provide a tiebreaker test in the determination of an entity's tax residency.

Israel

Permanent establishment (PE)

Foreign resident entities might be exempt from corporate tax to the extent that its activities do not constitute a PE under the tax treaty applicable between Israel and the foreign resident's country of residency.

Whether a non-resident has a taxable presence under Israeli domestic tax law is far less clear than the definition of PE under a relevant tax treaty. There is no detailed legislation or Israeli court decisions that directly address this issue. In general, where there is no tax treaty protection, a non-resident is subject to tax on income accrued or derived in Israel, which is a taxation threshold lower than the PE criterion.

Other taxes

Value-added tax (VAT)

The current rate of VAT is 17%.

Exports of goods and certain services and various other transactions are zero-rated, and certain transactions are exempt. Banks and other financial institutions pay VAT-equivalent taxes at the rate of 17% based on their total payroll and on profits. Not-for-profit organisations pay VAT-equivalent tax (wage tax) at the rate of 7.5% of their total payroll.

Customs duties

Customs duty is imposed on certain products imported into Israel. The rates of duty depend upon their classification according to the Harmonised Customs Tariff and the country of origin. Israel has concluded free-trade agreements with the United States, Canada, Mexico, the European Union (EU), and the European Free Trade Association (EFTA).

Excise taxes

Israel imposes excise taxes on a variety of goods (e.g. gasoline and diesel fuel used for transportation, tobacco, alcohol). The excise taxes are levied item-by-item, and the rates vary.

Municipal tax

Municipal tax is levied annually on buildings by local municipalities based on the size, location, and purpose of the property.

Property taxes

Property taxes are generally imposed on the occupier of commercial and residential real property. Unoccupied property is generally taxed on the property's owner. The tax is imposed at the municipality level.

Real estate capital gains

Capital gains on real estate are subject to the Land Appreciation Tax Law. The law relates to any real estate in Israel, including houses, buildings, and anything permanently fixed to land; real estate rights; and leases for 25 years or more. Tax calculations closely follow the calculation of company tax on capital gains (*see Capital gains in the Income determination section*).

The tax rate on the real gain is the applicable corporate tax rate (25%).

A special tax rate may apply with respect to real estate acquired prior to 1960.

Transfer tax

The purchaser of real estate is generally subject to acquisition tax at rates up to a maximum of 10% (the highest rate applies when the purchase price exceeds approximately 15.5 million Israeli shekels [ILS]).

Stamp taxes

There are no stamp taxes imposed in Israel.

Payroll taxes**Employer's national insurance contributions**

Employers are obligated to pay national insurance contributions based on a percentage of each employee's income on a monthly basis. Employers are responsible for withholding employees' contributions from wages and remitting these together with the employer's own contributions. The employer's contribution rates (current as of January 2016) for Israeli-resident employees are 3.45%, up to monthly income of ILS 5,678, and 7.5% on the difference between ILS 5,678 and the maximum monthly income of ILS 43,240.

For non-resident employees, the employer rates are significantly lower and are 0.49%, up to monthly income of ILS 5,678, and 2.55% on the difference between ILS 5,678 and the maximum monthly income of ILS 43,240. The minimal national insurance payments for non-resident employees do not provide any retirement benefit for the non-resident but generally provides a certain element of work accident coverage.

When an irregular salary payment in excess of one quarter of the usual salary is made, special provisions apply to the computation of social charges by which the application of this payment is equally attributed to the current month and to the past 11 months.

Israel has social security totalisation agreements with 14 countries that may allow for an exemption from Israeli national insurance throughout the employment period of the employee in Israel.

Branch income

A branch is liable for tax at the standard corporate rate on Israel-source income. No tax is withheld on transfers of profits to the foreign head office unless the branch is an AE (*see the Tax credits and incentives section*).

Income determination

In general, the annual results (i.e. the excess of income over expenses or *vice versa*) of an Israeli company or branch, as detailed in the taxpayer's financial statements, form the basis for computing the taxable income of the business.

The base amount is then adjusted pursuant to the provisions of the tax law to arrive at 'taxable income'.

Inventory valuation

Inventories are generally valued at the lower of cost or market value (i.e. net realisable value). Conformity is required between book and tax reporting of inventory. The first in first out (FIFO) or weighted-average basis of valuation is acceptable; the last in first out (LIFO) method is not accepted.

Israel

Capital gains

Capital gains tax is generally payable on capital gains by residents of Israel on the sale of assets (irrespective of the location of the assets) and by non-residents on the sale of the following:

- Assets located in Israel.
- Assets located abroad that are essentially a direct or indirect right to an asset or to inventory, or that are an indirect right to a real estate right or to an asset in a real estate association, located in Israel. Taxation applies only in respect of that part of the consideration that stems from the above property located in Israel.
- Assets that are a share or the right to a share in an Israeli entity.
- Assets that are a right in a foreign resident entity that is essentially a direct or indirect right to property located in Israel. Taxation applies only with respect to that part of the consideration that stems from the property located in Israel.

The cashless transfer of rights and assets arising from certain mergers, spin-offs, and asset transfers may be exempt from tax upon meeting various requirements.

Determination of the capital gain

Company tax on capital gains is imposed on the disposal of fixed and intangible assets where the disposal price is in excess of the depreciated cost.

Computation of real gain and inflationary components

For tax purposes, the capital gain is generally calculated in local currency, and there are provisions for segregating the taxable gain into its real and inflationary components. The inflationary amount is the original cost of the asset, less depreciation (where applicable), multiplied by the percentage increase in the Israeli consumer price index (CPI) from the date of acquisition of the asset to the date of its sale. The inflationary amount component is exempt to the extent it accrued after 1 January 1994 and is generally subject to tax at the rate of 10% if it accrued before that date.

The real gain component, if any, is taxed at the rates set out further below.

A non-resident that invests in capital assets with foreign currency may elect to calculate the inflationary amount in that foreign currency. Under this option, in the event of a sale of shares in an Israeli company, the inflationary amount attributable to exchange differences on the investment is always exempt from Israeli tax.

Sale of assets (including publicly and non-publicly traded shares)

The real gain is generally subject to tax at the corporate tax rate applicable in the year of the gain (25% in 2016). Special exemptions may apply for non-residents (*see further below*).

Special rule for retained profits upon sale of shares

In the case of a disposal by corporations of: (i) non-traded shares and (ii) traded shares when the seller generally directly or indirectly holds at least 10% of the sold Israeli company during the 12-month period preceding the sale, special provisions apply to such part of the real gain that is attributed to the seller's share of retained profits. The share of retained profits is the amount of gain equal to the proportional part of the retained profits of the company that the seller of the shares would have rights to by virtue of those shares. Detailed rules apply in determining this profit component.

Generally, the seller's proportionate part of the company's retained profits is taxed as if this amount had been received as dividends immediately before the sale (i.e. at a tax rate of 0% in the case of an Israeli-resident corporate shareholder or at a tax rate of 30% when the seller is a non-Israeli resident corporate shareholder that generally holds 10% or more in the rights of the Israeli company [it is unclear if this 30% rate may be reduced

by an applicable tax treaty]). The part of the retained profits that is attributed to the period ending on 31 December 2002 is subject to tax at the rate of 10%.

Special exemptions for non-residents

Publicly traded Israeli shares

Non-residents corporations not having a PE in Israel are exempt from tax on capital gains from the sale of shares of an Israeli company traded on the Israeli stock exchange or on a foreign stock exchange. Certain exceptions apply.

Where the shares were purchased by the non-resident prior to being publicly traded, *subject to the availability of exemptions detailed below*, capital gains tax might apply for the portion of the gain that was generated up to the day of the share's public listing but not to exceed the capital gain actually arising upon the sale of the share and provided that the value on the day of public listing was more than their value on the date of purchase and that the proceeds upon sale exceeded the value on the date of purchase.

Non-publicly traded shares

For purchases after 1 January 2009, an exemption exists under domestic law for non-residents, regardless of their percentage holding in an Israeli company, from gains derived from the sale of securities not traded on a stock exchange, provided the following conditions are met:

- The investment is not in a company in which, on the date of its purchase and in the two preceding years, the main value of the assets held by the company, directly or indirectly, were sourced from an interest in (i) real estate or in a real estate association (as defined in the Income Tax Ordinance [ITO]); (ii) the use in real estate or any asset attached to land; (iii) exploitation of natural resources in Israel; or (iv) produce from land in Israel.
- The capital gains were not derived by the seller's PE in Israel.
- The shares were not purchased from a relative (as defined in the ITO) or by means of a tax-free reorganisation.

A non-resident company shall not be eligible for this exemption if Israeli residents are controlling shareholders or benefit or are entitled to 25% or more of the income or profits of the non-resident company, either directly or indirectly.

For shares purchased between 1 July 2005 and 1 January 2009, more restrictive conditions apply in order to be eligible for the exemption. Detailed rules apply.

Treaty exemption

Non-residents may qualify for a tax treaty capital gain exemption, depending upon the particular circumstances and the provisions of the applicable tax treaty (e.g. in some tax treaties, no capital gains exemption is allowed where the holding in the sold Israeli company exceeds a certain percentage).

When assets are attributable to an Israeli PE or are real estate rights (including rights in a real estate association), a treaty exemption will generally not be available.

The ITA is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes.

Capital losses

Capital losses may offset all capital gains (including gains from Israeli or foreign securities) and gains from the sale of property (whether Israeli or foreign source).

Israel

Where the capital loss is from a non-Israeli asset (including when carried forward into future years), the loss must first be offset against foreign-source capital gains.

Capital losses derived from the sale of securities may also be offset against interest and dividend income generated from the sold security and also against interest and dividend income received from other securities (where the income was not subject to tax of more than 25%).

Capital losses from the sale of shares are generally reduced by any dividends received by the selling corporation during the 24 months preceding the sale, unless tax on the dividends of at least 15% was paid.

Capital losses can generally be carried forward indefinitely and set-off only against capital gains.

Exit tax

When an Israeli tax resident, including a company, ceases to be an Israeli resident for tax purposes, its assets are deemed to have been sold one day before it ceased being an Israeli resident. Although exit tax is primarily applicable to individuals, this might also apply to corporations incorporated outside of Israel whose management and control is transferred from Israel to another jurisdiction at a particular time.

Any gain attributable to the deemed sale of assets may be paid on the day the residency ceased or it may be postponed until the date the assets are actually realised. When the tax event is deferred to the sale date of the assets, the amount of the Israeli capital gain portion is determined by taking the real capital gain at the time of realisation, multiplied by the period of ownership from the day on which it acquired the asset until the day it ceased being an Israeli resident, divided by the entire period from the day of the asset's acquisition until the day of realisation. The Minister of Finance is authorised to prescribe provisions for the implementation of the exit tax, including provisions for the prevention of double taxation and the submission of tax reports, but no provisions have yet been issued.

Dividend income

Received by an Israeli-resident company

Dividends received by an Israeli-resident company from another Israeli-resident company that originate from income accrued or derived in Israel are exempt from corporate tax, except for dividends paid from income of an AE (*see the Tax credits and incentives section*). This affords the opportunity to transfer after tax profits within an Israeli group of companies for further investment.

Dividends received by an Israeli-resident company from a non-resident company, as well as dividends received from an Israeli company that arise from foreign-source income of the distributing company, are generally taxable for the receiving company at the rate of 25%. Under certain circumstances, the receiving company may elect to be taxed on such dividends at the corporate tax rate, in which case it will also be entitled to a foreign tax credit with respect to corporate taxes paid by the company distributing the dividend (i.e. an 'underlying' tax credit).

Received by a non-resident shareholder

Dividends received by a non-resident shareholder from an Israeli company are generally subject to tax at the rate of 25% (30% if paid to a 10% or more shareholder), subject to a reduced rate of tax under an applicable tax treaty.

Several of Israel's tax treaties have very beneficial withholding tax (WHT) rates for dividends being paid from Israel. The ITA is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business

substance in its country of residence that will support its residency for treaty purposes and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes. Furthermore, many of the treaties contain a beneficial ownership clause as a condition to enjoying the treaty WHT rates.

Interest income

Received by an Israeli-resident company

Interest income received by an Israeli-resident company is subject to the regular corporate tax rate (25%).

Received by a non-resident

Interest income received by a non-resident company is generally subject to tax at the rate of 25% or subject to a reduced rate of tax under an applicable tax treaty.

Interest received by a non-resident from deposits of foreign currency with an Israeli bank is exempt from tax, subject to certain conditions.

Rent/royalties income

Rent and royalty income, less allowable deductions for tax purposes, is subject to tax at the regular corporate tax rate (25% in 2016).

Partnership income

From an Israeli tax perspective, a partnership is, in principle, a fiscally transparent vehicle. Accordingly, Israeli tax law does not tax partnerships as such; however, generally, each partner is taxed in respect of its share of the partnership income, with the taxable income allocated to a corporate partner taxed at the regular company tax rate. Consequently, the actual distribution of partnership income to a partner is a non-taxable event.

Foreign income

An Israeli-resident company is liable for tax on its worldwide income. Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable double taxation treaty (DTT) (*see the Tax credits and incentives section*).

Under the controlled foreign company (CFC) regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of the undistributed profits of certain Israeli-controlled non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). *See Controlled foreign companies (CFCs) in the Group taxation section for more information.*

Deductions

Costs incurred by a branch or a company are deductible as a business expense for tax purposes where they are incurred 'wholly and exclusively in the production of income'. The amount of the deduction may be limited or disallowed further to other ITO provisions and income tax regulations.

Depreciation

The ITO and tax regulations prescribe standard annual rates of tax depreciation for assets serving in the production of taxable income. Depreciation is generally on a straight-line basis for industrial and other enterprises based on the specific asset types as set out in the tax regulations.

Israel

Accelerated rates of depreciation may be available in regard to certain activities (such as industrial) where there is unusual wear and tear due to additional shifts of equipment use. Detailed rules apply.

Depreciation is not permitted on land.

Goodwill

In general, under Israeli tax regulations, goodwill purchased may be amortisable by the purchaser over a ten-year period (10% annually).

Organisational and start-up expenses

Organisational and start-up expenses are generally not immediately deductible but, rather, are to be capitalised for tax purposes.

Interest expenses

Interest expenses incurred in the production of taxable income are generally deductible. Since there are no thin capitalisation rules in Israel, there are no specific debt-to-equity ratio requirements and there is no limit to the amount of debt that may be used in establishing a branch or local company operation in Israel. Interest and linkage payments arising from late tax payments are generally not deductible for tax purposes. Interest charges between related parties must be set based on transfer pricing principles. Detailed rules apply.

Bad debt

Provisions for bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

Charitable contributions

Charitable contributions do not constitute a regular business expense. However, a tax credit may be available (*see Tax credit for donations in the Tax credits and incentives section*).

Research and development (R&D) costs

Special tax relief is provided under the ITO for R&D costs incurred (*see the Tax credits and incentives section*).

Pension expense

Pension fund contributions made to recognised funds are generally deductible for the employer, provided, *inter alia*, the contributions do not exceed a prescribed level and are effected on a regular basis.

Directors' fees

Payments for commercially justifiable director fees should generally be deductible.

Accrued expenses

Payments are generally deductible on an accrual basis for commercially justifiable expenses representing arm's-length consideration. However, when payments made to foreign residents attract WHT, the deduction will generally be allowed, provided the payment is effected within the tax year. Alternatively, such payments may be deductible in a tax year if the applicable WHT is deducted within three months after the tax year-end and remitted to the tax authorities within seven days of the deduction, together with index linkage differences and interest accrued since the year-end.

However, accrued expenses for severance pay, vacation pay, recreation pay, holiday allowances, and sick pay are not deductible, even if there is an obligation to make these payments. They are only deductible in the year in which they are actually paid to the beneficiary or to a recognised fund.

Contingent liabilities

Based on Israeli court decisions, contingent liabilities may be deductible for tax purposes upon satisfying the following criterion: (i) according to accepted accounting principles, the taxpayer must include in its balance sheet a suitable provision for the potential liability; otherwise, its income will be considered to have been incorrectly reported; (ii) the circumstances of the case and the technical means according to accepted accounting practice must be provided, enabling a determination of the amount of the liability; and (iii) there is a high probability that the potential debt with respect to which the provision was made will become an absolute debt.

Excess (disallowed) expenses

Israeli tax law disallows the partial deduction of certain employee-related expenses incurred by a company doing business in Israel. These include so-called 'excess expenses'. Examples of these are (i) payments for business, travel, and meals that exceed allowable deductions; (ii) expenses incurred in respect of a benefit granted by an employer to its employees but that cannot be attributed to a particular employee; and (iii) certain vehicle maintenance expenses (all expenses relating to a company owned vehicle that was also designated for use of an employee are generally tax deductible as the employee is taxed in this regard upon an imputed amount).

A company is obligated to pay a monthly advance on excess expenses in the amount of 45% of the excess expense. The amount paid as an advance in respect of excess expenses is deemed a payment on account of the regular tax advances and payments that the company must pay for corporate tax and is offset against them, but it is not refundable (i.e. when a taxpayer's tax liability in a given year is lower than the excess expense advances paid, the unutilised amount shall be carried forward to future tax years). Detailed rules apply.

Fines and penalties

Payment of fines and penalties are generally not deductible.

Taxes

Municipality taxes incurred in the production of taxable income are generally deductible.

Net operating losses

Business losses can be offset against income from any source in the same year. Loss carrybacks are not allowed. Losses may be carried forward and set-off without time limit against income from any trade or business or capital gains arising in the business, but not against income from any other source.

Payments to foreign affiliates

Payments of interest, royalties, and management fees to foreign affiliates are deductible if based on normal commercial terms and practices and evidenced by an inter-company agreement and transfer pricing documentation. Where such payments attract WHT, the deduction will only be allowed where such tax has been withheld and paid in accordance with certain requirements. All cross-border payments to foreign affiliates for goods and services have to comply with arm's-length pricing standards (*see Transfer pricing in the Group taxation section*).

Group taxation

As a general rule, a parent company and its subsidiaries may not submit consolidated tax returns. Only groups of industrial companies in the same line of business, as well as parent companies that control industrial companies in the same line of business and have at least 80% of their assets invested in industrial companies, are eligible to file consolidated tax returns.

Transfer pricing

The ITO and its accompanying regulations contain elaborate transfer pricing provisions, including the arm's-length principle, that apply to any international transaction in which there is a special relationship between the parties to the transaction and for which a price was settled on for property, a right, a service, or credit. In general, the regulations are based upon internationally recognised transfer pricing principles (i.e. United States [US] tax regulations or Organisation for Economic Co-operation and Development [OECD] rules). These regulations generally require the taxpayer to support the pricing of international transactions with a transfer pricing study, inter-company agreements, and other documentation. In accordance to Israeli High Court Rulings, the terms of transaction conducted between related parties should be set in written contracts.

Since transfer pricing is a subject that receives considerable attention from the ITA in its examination of related inter-company transactions, transfer pricing principles and documentation requirements should be carefully adhered to.

A taxpayer is required to include in its annual corporate tax return a special form entitled 'Declaration of International Transactions' providing details for every cross-border transaction conducted with related parties. The taxpayer must sign the form, which includes a declaration that the transactions with related parties abroad were in accordance with the arm's-length principle, as defined in the Israeli transfer pricing regulations promulgated under the ITO. As a result of this form and declaration, the importance of appropriate transfer pricing documentation has increased.

Thin capitalisation

Israel has no statutory or regulatory provisions or other rules concerning thin capitalisation for tax purposes as exist in certain other jurisdictions. Since there are no thin capitalisation rules and Israel has no specific debt-to-equity ratio requirements, a company may be financed with minimum capital, and there is no limit to the amount of debt that may be used. Transfer pricing principles shall generally apply with regards to interest charges.

Controlled foreign companies (CFCs)

Under the CFC regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of certain undistributed profits of certain Israeli-controlled, non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). A CFC is a company to which a number of cumulative conditions apply, including that most of its income or profits in the tax year were derived from passive sources (e.g. capital gains, interest, rental, dividend, royalties) and such passive income has been subject to an effective tax rate that does not exceed 15%.

Tax credits and incentives

Foreign tax credit

Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable DTT. The foreign tax credit is limited to the Israeli corporate tax payable with respect to the same income. Foreign-sourced income is divided into 'baskets' (i.e. categories) on the basis of the income source (e.g. dividends, business income), and a particular credit limitation applies to each basket. Excess uncredited foreign income can be carried forward for the subsequent five tax years.

Approved enterprises (AEs)

AE status, which provides for cash and tax benefits, may be granted under the Law for the Encouragement of Capital Investments (the Law) to enterprises that increase the productive capacity of the economy, improve the balance of payments, or provide new employment opportunities. Qualification conditions include, *inter alia*, that the

enterprise is an 'industrial enterprise' as defined in the Law. It is important to examine if the contemplated business operations in Israel qualify as an industrial enterprise under the Law. R&D services performed in Israel on behalf of a foreign resident may qualify as an industrial enterprise, provided that an approval is received from the Office of Chief Scientist.

The extent of the benefits provided under the Law also depends upon the geographical location in which the industrial enterprise is located.

New AE programmes and expansion of prior existing AE programmes are governed by the Law, which underwent a major amendment on 29 March 2005 (2005 Amended Law) and also on 29 December 2010 (2011 Amended Law), effective for 2011 and thereafter.

AE programmes that commenced their period of benefits generally prior to 2005 may still be subject to the Law's provisions prior to these amendments.

The 2011 Amended Law is intended to simplify the manner of taxation that applies to income generated from an AE by applying a uniform tax rate for all AE-generated taxable income. Prior to these amendments, as summarised below, the corporate tax rate applicable to an AE depended upon many factors, including the tax route selected, the geographical area in which the industrial site is located, the level of foreign investment ownership, and attribution of taxable income between different tiers of AE plans further to complex formulas.

It should be noted that the 2011 Amended Law shall apply for income generated by an AE during 2011 and thereafter. Transition rules allow AE owners to elect to continue with the AE tax benefits allowed for under the Law prior to these amendments or to choose, in any tax year, to commence to apply the new provisions of the Law and to waive the remaining benefit period those AE benefits provided under the Law prior to its amendment. It should also be noted that once such an election is made by the taxpayer to implement the new provisions, it may not be altered in future tax years.

This general overview will address the Law as applicable prior to the 2011 Amended Law as well as setting forth the material tax law changes under the 2011 Amended Law.

Cash grants (also applicable under the 2011 Amended Law)

AEs located in certain development areas are eligible for cash investment grants, which vary according to the geographic location of the enterprise. Grant amounts and conditions are subject to governmental change from time to time.

AE tax incentives prior to 2011 Amended Law

Reduced tax rates

In addition to financial incentives for the establishment or expansion of an AE, various tax incentives are available once a new AE or expansion thereof is operational.

The reduced tax rates generally apply for a seven-year benefit period (or a ten-year period in certain cases of local companies established in development area A or in the case of a foreign investor company, *see below*), commencing with the year in which the AE first generates taxable income.

Generally, this seven or ten-year period of benefits is limited to 12 years from the year of implementation. For AE plans governed prior to the 2005 amendment to the Law, the period of benefits cannot extend beyond 12 years from the year the enterprise commenced its operations or beyond 14 years from the year in which approval of status as an AE was granted, whichever is earlier.

Locally owned companies

Income derived by a company from an AE during the maximum seven-year period of benefits is generally subject to company tax at a rate of 25%.

A WHT rate of 15% (subject to a possible reduction under a tax treaty) applies to dividends paid from profits of an AE earned during the benefits period if distributed either during the benefits period or during the subsequent 12 years. Note that dividends from non-AE profits that are paid to non-residents are generally subject to a maximum 30% WHT rate that may be further reduced under the terms of a relevant tax treaty.

Foreign investors' companies (FICs)

A company that qualifies as an FIC is entitled to enhanced tax benefits on AE income. In general, an FIC is a company having more than 25% of its share capital (in terms of rights to shares, profits, voting, and the appointment of directors) and its combined share capital and investor loan capital owned by foreign residents. To qualify for FIC status, a foreign investor must make an investment in the company of at least ILS 5 million.

An FIC benefits from reduced company tax on the profits of an AE for a period of ten years (instead of seven years) commencing with the first year in which taxable income is generated. The total period of benefits is restricted as discussed above.

An FIC enjoys reduced company tax rates applicable to its AE income as shown below:

Percentage of foreign ownership	Company tax rate (%)
Over 25% but less than 49%	25
49% or more but less than 74%	20
74% or more but less than 90%	15
90% or more	10

The foreign ownership percentage is annually determined as the lowest level retained during the specific tax year.

Dividends paid by an FIC out of the profits of its AE are subject to tax in the hands of the recipient at the rate of 15%, without limitation as to their distribution date, provided the dividends are distributed out of AE profits derived during the benefits period.

Alternative system of tax benefits for AEs (tax holiday)

Companies with new or expanding AEs may elect to forego all government cash grants and receive, instead, a total exemption (i.e. tax holiday) from company tax on undistributed profits of the AE for ten years in development area A, for six years in development area B, and for two years in development area C. The area of incentive is the area in which the company's facilities are located.

The tax holiday provides an Israeli tax exemption so long as the AE profits generated in the exemption period are retained within the company. Should a subsequent distribution of such profits occur, company tax and dividend WHT is imposed on the income distributed, at the rates which would have been applicable if the tax holiday had not been elected (i.e. 25% or at a lower rate if the company is an FIC with a foreign ownership percentage of 49% or more during those years).

Under certain anti-avoidance provisions applicable to tax holidays, amounts directly or indirectly paid or credited by an AE to a relative, a major shareholder, or to a related entity controlled by either a relative or a major shareholder may be treated as a deemed taxable distribution of profits by the AE.

Ireland track and strategic investment track

For companies having an AE in development area A that seeks to distribute dividends while maintaining a low company and dividend tax burden, there is an 'Ireland track' under which the aggregate Israeli corporate and dividend WHT for a foreign resident shareholder is 15% and for an Israeli resident shareholder is 24.8%. This track is in contrast to the standard alternative benefit track discussed above, which provides a tax holiday, provided that profits remain undistributed.

Furthermore, a 'strategic investment track' allows for an exemption during the benefit period from company tax and dividend WHT for a company having (depending on its location within area A of the country) very significant investment and revenue levels. This means that during the benefits period, a company eligible for benefits from income accrued under this track will have no tax liability whatsoever for its productive activity arising from such investment and for the distribution of profits. Detailed rules apply to these tracks.

Qualifying for AE status

Minimal investment amount

For entitlement of tax benefits under the alternative benefit track, there must be a certain minimal investment amount ('minimum qualifying investment') towards purchasing productive assets (e.g. machinery and equipment, but not buildings) within three years.

Automatic approval

Where an investment project meets all of the eligibility criterion under one of the alternative tracks (standard alternative track, Ireland track, or strategic investment track) as set out in the Law and in regulations to be issued, a project will automatically qualify for the AE taxation benefits under the Law with no need for prior approval from the ITA (i.e. a 'green lane').

Interruption of entitlement to benefits

Under the Law, following its amendment in 2005, the examination as to whether an owner is entitled to enjoy AE benefits for a tax year is determined on a year-by-year basis. Consequently, if in any tax year during the benefit period a company does not meet any of the conditions required under the Law, then for that tax year it is not entitled to benefits. However, if the company again meets the conditions during the benefit period, the company is entitled to the benefits during the remainder of the benefit period.

Mixed enterprises

Special rules govern the allocation of taxable income of 'mixed enterprises'. These are essentially entities that derive only part of their income from an AE or entities that operate under a number of approvals relating to separate investment projects. The company tax payable in respect of income from each part of a mixed enterprise is separately computed, and a composite WHT is applicable to dividends distributed by a mixed enterprise.

Neutralisation of assets

Assets used in the operation of an enterprise that are not part of an AE are regarded as non-approved assets. Consequently, turnover that is deemed to be generated from the non-approved assets will result in non-AE income that should be taxed at the regular Israeli corporate tax rate applicable for the relevant year.

AE 2011 Amended Law overview

In contrast to the FIC regime under the pre-2011 Law, under the provisions of the 2011 Amended Law, a company may elect to be taxed in regard to its AE income at flat tax rates, which vary depending upon the location of the AE. This is a major change in policy from the pre-Amendment FIC route discussed above, which encouraged foreign

Israel

investment in Israeli companies having AE programs by providing for increasingly reduced rates (e.g. 10% rate where 90% foreign owned). Further to the amendments, there will no longer be available any deferral of corporate tax for undistributed profits (i.e. cancellation of the tax holiday route) nor will there be any additional AE tax benefits specifically linked to foreign investment. Notwithstanding the cancellation of the tax holiday route, a distribution or deemed distribution of profits that were tax-exempted under the tax holiday route before the legislative change had taken effect shall continue to be subject to company tax at the applicable AE reduced rates, in addition to the dividend WHT that will be imposed on the income distributed.

The uniform tax rates legislated under the 2011 Amended Law as of 2014 and thereafter are 9% for a company located in area A and 16% if located in the rest of the country.

The 2011 Amended Law shall apply for income generated by an AE during 2011 and thereafter. Transition rules allow current AE owners to elect to continue with the AE tax benefits allowed for under the Law prior to the 2011 Amendments or to choose in any tax year to commence to apply the new provisions of the Law and to waive the remaining benefit period for those AE benefits provided under the Law prior to its amendment. Once such an election is made by the taxpayer to implement the new provisions, it may not be altered in future tax years. According to the approach of the ITA, the election in regard to an application to transition from the pre-2011 Law to the Amended Law must be filed by 31 May of the relevant tax year (e.g. 31 May 2017 in order to elect the 2011 Amended Law for 2017).

Dividends paid from generated profits from an AE governed by the 2011 Amended Law are subject to a WHT rate of 20% for distributions, subject to a reduction under the terms of an applicable tax treaty.

Research and development (R&D) incentives

Under special relief provided under the ITO, which was enacted for the purpose of encouraging taxpayers to invest in R&D activities, R&D costs can generally be deductible for tax purposes even when they represent capital costs.

The ITO provision generally distinguishes between two types of investors in R&D projects:

- The R&D project is conducted or sponsored by the owner of an enterprise in the fields of industry, agriculture, transportation, and energy, and it is intended to develop this enterprise.
- The R&D costs are borne by a taxpayer that is not the owner of an enterprise in the above mentioned fields or the taxpayer participates in R&D costs of another developer in consideration for a reasonable return, when such R&D projects also enjoy government grants.

In regard to the first group of taxpayers, the R&D expenses shall be deducted in the tax year incurred when such expense has been approved as an R&D expense by the relevant government department (the approval in regard to industrial related projects is generally granted by the Office of the Chief Scientist [OCS]). When such OCS approval is not obtained, the expense shall be deducted over three tax years.

The R&D expenses incurred by the second group of taxpayers shall generally be deducted over two tax years. The deductible expenses allowed to a participant in R&D costs of another developer generally may not exceed 40% of the taxable income of the investor in the year in which the expenses had been incurred.

For acquisitions between 1 January 2011 and 31 December 2015, an Israeli tax resident company that acquires a controlling interest in a private Israeli company that meets certain R&D activity levels shall be entitled to amortise its acquisition amount (i.e.

consideration paid for shares less the purchased company's positive equity capital if any) from its taxable income equally over five years beginning with the tax year following the acquisition. Entitlement to this deduction is subject to the fulfilment of detailed qualifying conditions, which include, *inter alia*, that both companies have AE plans in the year of acquisition, meet certain R&D investment levels, employ a certain prescribed percentage of employees having academic degrees in certain qualifying fields, and for the first three years of the amortisation period the R&D expenses of the acquired company are incurred for its own company or that of the purchasing company and at least 75% of such expenses are incurred in Israel. Detailed rules apply. On 30 December 2015, the Knesset Finance Committee approved an amendment to this Law. As part of the amendment, the above-mentioned benefits were extended, and a new track for receiving these benefits was added.

Tax credit for donations

A tax credit is granted in respect of donations to approved state and charitable institutions aggregating at least ILS 180 (for 2016) in a tax year. The donor is allowed a tax credit equal to the amount of the contribution times the corporate tax rate applicable during the year, provided the amount eligible for the credit does not exceed the lower of the following: (i) 30% of the corporation's taxable income in that year or (ii) ILS 9,212,000 (in 2016). The above figures are adjusted each year according to the CPI. Excess unused tax credits may be carried forward for three years, subject to detailed rules.

Incentive to promote foreign investment in Israeli corporate bonds

In order to promote foreign investment in the Israeli corporate bonds market, there is an exemption from tax with respect to interest income received by foreign investors on their commercial investments in Israeli corporate bonds traded on the Tel Aviv stock exchange (TASE). The exemption is not granted to a foreign investor that has a PE in Israel or is related to, or holds 10% more of the means of control in, the investee company. In addition, in order for the exemption to apply to a foreign investor that has 'special relations' with the investee company, regularly sells products to or provides services to the investee company, or is employed by the investee company, the investor must prove that the interest rate on the corporate bond was determined in good faith.

Withholding taxes

Under Israeli domestic tax law, a 25% WHT on payments of Israeli-source income is generally deducted by an Israeli paying bank from all income remittances abroad, unless a tax certificate is obtained from the ITA authorising withholding-exempt remittances or a reduced rate of tax pursuant to an applicable tax treaty.

Set out below is a listing of WHT rates for dividends, interest, and royalties under domestic tax law and pursuant to tax treaties in force. Detailed rules apply under certain tax treaties for eligibility to the treaty-reduced rates (e.g. beneficial ownership, having no permanent establishment in Israel). The applicable tax treaty should be consulted to determine the relevant WHT rate and to examine detailed conditions that may apply for the specific circumstance.

Recipient	Dividends (%)	Interest * (%)	Royalties (%)

Notes

* Some Israeli tax treaties provide for an exemption from WHT on interest involving governmental and quasi-governmental parties. Such exemptions are not separately indicated in the table above.

- Dividends between Israeli resident companies are generally exempt from Israeli tax. Dividends paid from a foreign resident company received via an Israeli payer (e.g. bank) to an Israeli resident company or individual are subject to WHT at the rate of 25%.
- 30% rate applies in the case of a 'substantial shareholder', which is, in general, a shareholder that holds 10% or more of the rights of the company (detailed rules apply).
- 10% where beneficial owner directly holds at least 25% of the capital of the company paying the dividends.
- At a rate that is 50% of the rate that would have been imposed but for this provision but not to exceed 12.5% and not less than 7.5%. A 10% rate applies where paid from profits generated by an enterprise entitled to special tax rates under the Encouragement of Investment Law.
- 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate applies in all other cases.
- 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 15% of the capital of the company paying the dividends; 15% rate in all other cases.
- 0% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 5% rate in all other cases.
- 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
- 5% if the beneficial owner is a company (other than a partnership) that directly controls at least 10% of the voting power in the company paying the dividends; 15% rate in all other cases.
- 5% if the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
- At the domestic Israeli tax rate.
- 5% if the recipient directly holds at least 10% of the capital of the company paying the dividends.
- 10% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
- 15% if the beneficial owner is a company (other than a partnership) that directly or indirectly holds at least 10% of the voting power of the company paying the dividends.
- 5% if the beneficial owner is a company that owns at least 25% of the voting shares of the company paying the dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.
- 5% if the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax at a rate that is lower than the normal rate of the corporation tax; 15% rate in all other cases.
- 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where the dividends are paid out of profits that by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempt from tax or subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
- 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
- 5% if the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends.
- 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
- With respect to dividends paid to a company that directly holds at least 25% of the capital of the company paying the dividends: (i) 10% where the dividends are paid out of profits that, by virtue of provisions in Israeli law for the encouragement of investment in Israel, are exempt from tax or subject to tax at a rate that is lower than the standard rate levied on the profits of a company resident in Israel; (ii) 5% where paid out of regularly taxed profits. A 15% rate applies in all other cases.

22. 10% if the beneficial owner is a company (excluding partnership) that directly holds at least 10% of the capital of the paying company.
23. 5% if the recipient directly holds at least 15% of the capital of the company paying dividends.
24. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
25. 5% if the beneficial owner directly holds at least 10% of the capital of the company paying the dividends.
26. 5% if the recipient directly or indirectly holds at least 10% of the capital of the company paying the dividends.
27. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that, by virtue of law of the state in which the payer is a resident, are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% of the gross amount of the dividends in all other cases.
28. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
29. 10% if the recipient holds at least 25% of the capital of the company paying the dividends.
30. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% in all other cases.
31. 12.5% but only if (i) during the part of the paying corporation's taxable year that precedes the date of payment of the dividend and during the whole of its prior taxable year (if any), at least 10% of the outstanding shares of the voting stock of the paying corporation was owned by the recipient corporation, and (ii) not more than 25% of the gross income of the paying corporation for such prior taxable year (if any) consists of interest or dividends (other than interest derived from the conduct of a banking, insurance, or financing business and dividends or interest received from subsidiary corporations, 50% or more of the outstanding shares of the voting stock of which is owned by the paying corporation at the time such dividends or interest is received). A 15% rate applies for payments from income derived during any period for which the paying corporation is entitled to the reduced tax rate applicable to an AE under Israel's Encouragement of Capital Investments Law (1959). A 25% rate applies in all other cases.
32. WHT is generally at a rate of 15% if the loan/interest is not linked to any index. Interest paid on a bond to a shareholder who holds less than 10% of the rights of the company is generally taxed at a rate of 35%. A WHT rate of 48% applies in the case of a substantial shareholder (in general, a shareholder that holds 10% or more of rights of the company). Detailed rules apply.
33. 5% for interest in connection with the sale on credit of any industrial, commercial, or scientific equipment or on any loan of whatever kind granted by a bank.
34. 5% for interest in the case of a bank or other financial institution.
35. 7% for interest received by any bank or financial institution.
36. 5% for interest paid on a loan granted by a bank.
37. 5% for interest paid on any loan of whatever kind granted by a bank.
38. 5% where in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank loans made by banks; 10% in all other cases. An election can be made to be taxed on the net amount of the interest as if such interest were business profits.
39. 5% for interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.
40. 7.5% for interest if received by any bank or financial institution.
41. 5% where paid on any loan of whatever kind granted by a bank.
42. 10% where paid to a bank or a financial institution.
43. 5% where paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.
44. 2% applies to government debt or government-assisted debt; 5% rate applies when paid to a financial institution; 10% rate applies in all other cases.
45. 5% in connection with the sale on credit of any industrial, commercial, or scientific equipment, or in connection with the sale on credit of any merchandise by one enterprise to another enterprise, or on any loan granted by a financial institution.
46. 7% for interest paid on any loan of whatever kind granted by a bank.
47. 10% for interest received by any financial institution (including an insurance company).
48. 10% for interest derived from a loan of whatever kind granted by a bank, savings institution, or insurance company or the like. 17.5% rate for other interest. An election may be made to be taxed on interest income as if that income were industrial and commercial profits.
49. 0% for literary, dramatic, musical, or artistic work copyright royalties (excluding in respect of motion picture films or films for use in connection with television).

50. 5% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films) or for the use of, or the right to use, industrial, commercial, or scientific equipment or road-transport vehicles.
51. 0% for copyright royalties for literary, dramatic, musical, artistic, or scientific work (excluding in respect of films for cinema or television).
52. 15% for trademark royalties.
53. The rate is 50% of the rate that would have been imposed but for the treaty provision but not to exceed 12.5% and not to be less than 7.5%.
54. 0% for copyright royalties for the production or reproduction of any literary, dramatic, musical, or artistic work (but not including royalties in respect of motion pictures).
55. For industrial, commercial, and scientific equipment royalties, the 10% rate applies to the adjusted amount of the royalties (70% of the gross amount of the royalties).
56. 0% for copyright royalties for literary, artistic or scientific work (excluding cinematograph films).
57. 0% for copyright royalties for literary, dramatic, musical, or artistic works.
58. 0% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films or tapes for television or broadcasting).
59. 2% for industrial, commercial, and scientific equipment royalties.
60. 5% for industrial, commercial, and scientific equipment royalties.
61. 10% for royalties for cinematograph films and films or video-tapes for radio or television broadcasting.
62. 5% for industrial, commercial, or scientific equipment royalties.
63. For royalties in respect of cinematograph or television films, the WHT rate shall not exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.
64. 5% for royalties for copyrights of literary, dramatic, musical, artistic work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
65. The definition of royalties does not include any royalty or other amount paid in respect of (i) the operation of a mine or quarry or of any other extraction of natural resources or (ii) in respect of cinematograph including television films.
66. 5% for royalties for literary, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio, or television broadcasting.
67. For royalties in respect of cinematograph or television films, tax may be imposed in Israel, but not to exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.
68. 10% for copyright or film royalties.
69. 5% of the gross amount of the royalties where such royalties consist of payments of any kind received as a consideration for the use or the right to use any copyright of literary, artistic, or scientific work (excluding cinematograph films).
70. 5% for royalties for any patent, design or model, plan, secret formula, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience; 7.5% for technical fees; 15% for all other royalties.
71. 0% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends or where paid to certain qualifying pension funds.
72. 0% if to a pension fund or if paid on publicly traded corporate bonds or in respect of a loan, debt-claim, or credit guaranteed or insured by an institution for insurance or financing of international trade transactions that is wholly owned by Israel.
73. 0% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends where such holding is being possessed for an uninterrupted period of no less than one year and the dividends are declared within that period; or where paid to certain qualifying pension funds.
74. An election can be made to be taxed on the interest income as if that income were business profits.
75. 0% if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends; 15% in all other cases.
76. 5% if the beneficial owner is a pension fund; 20% if the distributing company is a real estate investment company and the beneficial owner owns less than 10% of the capital of the company paying the dividends; 15% for all other dividends.
77. 0% if to a pension fund or if paid on publicly traded corporate bonds or if the company paying the funds or the beneficial owner is one of the contracting states or one of their central banks, political subdivisions, or local authorities.
78. A new tax treaty between Israel and Germany was signed in Berlin on 21 August 2014 but is not yet ratified. Under the new tax treaty, the following rates will apply:
 - Dividends will be taxable at a maximum rate of 5% if the beneficial owner is a company that directly holds at least 10% of the capital of the payer company; a 10% rate will apply in all other cases.
 - Interest will be taxable at a maximum rate of 5% and will be exempt in certain circumstances.
 - Royalties will be taxable only in the beneficial owner's state of residence.
79. An Income Tax Convention and Final Protocol between Israel and Macedonia was signed on 9 December 2015, and is still pending. Once ratified, the following WHT rates in relation to dividends shall apply: 5% of the gross amount of the dividends if the beneficial owner of the dividends is a company (other than a partnership or a real estate investment company) that directly holds at least 25% of the capital of the company paying the dividends; and 15% of the gross amount of the dividends in all other cases.

Tax administration

Taxable period

The tax year is generally the calendar year. Certain entities may apply to have their tax year-end on different dates, specifically, mutual funds, government companies, quoted companies, and subsidiaries of foreign publicly listed companies.

Tax returns

The Israeli system is based on a combined form of assessment and self-assessment.

The statutory filing date is five months following the end of the tax year, which for a calendar year taxpayer would be 31 May. It is possible, however, to secure extensions of the filing date.

Payment of tax

Generally, 12 monthly advance payments are levied at a fixed ratio of the company's turnover. Alternatively, a company may be required to make ten monthly payments beginning in the second month of its tax year, each payment being a fixed percentage of the previous year's tax assessment.

Penalties

Penalties are imposed on overdue advance payments and on delays in the submission of tax returns. For any tax due for a certain year that has not been paid by the end of that tax year, the taxpayer shall be charged interest at a rate of 4% and linkage differentials for the period from the end of the tax year until the date of payment. If the balance due is paid by the end of the first month following the end of the tax year, the taxpayer should receive a full exemption from any interest and linkage differentials. If the balance due is paid by the end of the second or third month following the end of the tax year, the taxpayer should receive a 50% or 25% exemption respectively from any interest and linkage differentials.

When the ITA determines that a taxpayer has a tax deficiency exceeding 50% of the total tax due and the taxpayer has not proven to the satisfaction of the ITA that it was not negligent in its tax reports filed (or where there was a failure to file reports), a penalty equal to 15% of the tax deficiency shall be imposed.

A penalty equal to 30% of the tax deficiency may be imposed when an additional tax liability exceeding ILS 500,000 is issued by the ITA further to a tax assessment and the tax deficiency is more than 50% of the total tax due (additional conditions apply).

Tax audit process

A tax return, once filed, constitutes a self-assessment that remains open to review by the ITA generally for four years from the end of the tax year in which the tax return is filed. If no return is filed and a tax officer believes a taxpayer owes tax, the tax officer may issue a 'best judgement' assessment without time limit.

An assessment issued by an Assessing Officer may be challenged by the taxpayer in writing within 30 days stating in the objection the reasons why the assessment is not correct. A different Assessing Officer will then review the facts of the case. If following the filing of the objection the taxpayer reaches an agreement with the Assessing Officer, the tax assessment shall be amended and a notice of tax served on the taxpayer. If no agreement is reached, the Assessing Officer may determine the tax by issuing a Written Order, which may confirm, increase, or reduce the original tax assessment. If following the conclusion of the statute of limitation period or within one year after the appeal was submitted, whichever is later, no agreement is reached and no Written Order was issued, then the taxpayer's objection shall be deemed to have been accepted.

An appeal of a Written Order may be made by the taxpayer directly to the Israeli district courts. There is no special tax court system in Israel. A decision of the district court may be appealed to the Supreme Court as a court of civil appeals.

Detailed rules apply to the procedural appeal process.

Topics of focus for tax authorities

Some key tax issues that the ITA has focused on recently include:

- Transfer pricing.
- Treaty shopping to reduce WHT and capital gains tax.
- WHT on payments to overseas service providers and for payments in regard to software.

Other issues

Choice of business entities

Investments and business operations in Israel may be structured in a variety of ways. The following are the common types of business entities in Israel: (i) Israeli public or private company; (ii) foreign company in Israel (i.e. a branch); (iii) Israeli general or limited partnership; (iv) foreign general or limited partnership; (v) other entities such as cooperative societies; and (vi) other arrangements (e.g. contractual joint ventures).

Mergers and acquisitions

Israeli tax law allows for non-taxable reorganisations in situations in which the ownership and business enterprise of the original parties is continued after the reorganisation takes place, allowing for the deferral of the tax liability until the shares or assets transferred in such reorganisations are actually sold. Different qualifying requirements and conditions apply (e.g. obtaining a ruling from the ITA in certain cases), depending upon the tax residency of the parties and the type of transfer.

US Foreign Account Tax Compliance Act (FATCA) in Israel

A Model Reciprocal Intergovernmental Agreement (IGA) was signed by Israel and the United States on 30 June 2014. The IGA provided clarity around the implementation of FATCA for the financial institutions and investment entities resident in Israel.

The IGA must be ratified under Israeli law by the Israeli Parliament (Knesset) before it comes into force, and, afterwards, it will be implemented into Israeli law. However, Israeli financial institutions are considered to have an IGA in effect as of the date of the signature of the agreement.

Guidance for the FATCA reporting regime is expected to be released in the coming months.

Significant developments

The major recent changes in the Italian tax rules that occurred in the last 12 months are the following:

- Corporate income tax (*imposta sul reddito sulle società* or IRES) rate reduction.
- Additional tax depreciation.
- Revisions to tax havens ('black list') and to controlled foreign company (CFC) rules.
- Changes to statute of limitations.
- Introduction of a country-by-country (CbC) report.
- Changes in the 'extraordinary' income regime.
- Introduction of an optional 'branch exemption' regime.
- Introduction of domestic tax consolidation between 'sister' companies.
- Review of the tax ruling procedures.

Please note that Italy tax updates are generally expected to occur between November and December in connection with the finance bill and approval of related laws. In this respect, we suggest visiting the Worldwide Tax Summaries website at www.pwc.com/taxsummaries in order to check whether or not relevant changes affect your business.

IRES rate reduction

Starting from fiscal year (FY) 2017, the standard IRES rate will be reduced from 27.5% to 24%.

Additional tax depreciation

Starting from 15 October 2015 to 31 December 2016, an additional IRES depreciation is granted for new investments on tangible assets. In particular, the purchase cost is increased by 40%, bringing the taxable basis of the asset to 140%.

Revisions to tax havens ('black list') and to CFC rules

As of FY 2016, expenses for transactions with tax havens are fully deductible and not subject to disclosure in the tax return. In addition, in the CFC rules, the reference to 'black list' countries has been repealed.

Changes to statute of limitations

As of FY 2016, the Italian tax authorities are entitled to make an assessment up to the end of the fifth calendar year following the year in which the tax return was filed (previously the deadline was the fourth calendar year).

Introduction of CbC reporting

For resident parent companies of groups that are obligated to file consolidated financial statements, with consolidated revenues in the previous year of at least 750 million euros (EUR), CbC reporting has been introduced.

Changes in the 'extraordinary' income regime

As of FY 2016, a new regime has been introduced regarding the waiver of credits by the shareholders.

Introduction of an optional ‘branch exemption’ regime

As of FY 2016, an optional branch exemption regime has been introduced allowing Italian companies to exempt from Italian taxation branch income and losses arising outside Italy.

Introduction of domestic tax consolidation between ‘sister’ companies

Following the European Court of Justice (ECJ) decision against tax consolidation regimes, which do not allow the consolidation of ‘sister’ companies held by a European Union (EU)/European Economic Area (EEA) resident, the domestic tax consolidation regime has been extended to ‘sister’ companies controlled by the same non-resident entity.

Review of the tax ruling procedures

Relevant developments have been introduced to the Italian tax ruling procedures and to the regime of ‘ruling on new investments’ for those enterprises that intend to make investments in Italy.

Taxes on corporate income

Applicable rates

Italian corporate entities are subject to a corporate income tax, known as *imposta sul reddito sulle società* or IRES, and to a regional production tax, known as *imposta regionale sulle attività produttive* or IRAP.

The standard rates are as follows:

- 27.5% for IRES.
- 3.9% for IRAP.

Starting from FY 2017, the IRES rate is reduced to 24%. Specific rules will apply for bank and financial entities.

The following increased IRAP rates are applicable for certain entities:

- 3.80% for entities with a determined governmental exclusive right to provide services.
- 4.20% for banks and financial entities.
- 5.30% for insurance corporations.

Regions have the power to slightly increase or decrease IRAP rates.

General rules

IRES

The IRES taxable base is determined according to the worldwide taxation principle, which states that, regardless of the location/jurisdiction where the income is produced, to the extent that the income is legally attributable to an Italian resident entity, the income is taxed in Italy. IRES is charged on the total net income reported in the financial statements of the company as adjusted for specific tax rules. Non-resident companies are taxed only on Italian-source income.

IRAP

There are different methods of computation for the IRAP taxable base, depending on the nature of the business carried out by the taxpayer. Provisions for liabilities and risks, as well as extraordinary items, cannot be taken into account when determining the IRAP taxable base.

Italy

For sales and manufacturing companies, the IRAP taxable base is broadly represented by the company's gross margin in its financial statements. In addition to the non-deductible items mentioned above, interest income and expense and provisions for bad debts are excluded for the purposes of the IRAP taxable base.

For banks, the IRAP taxable base is broadly defined as follows:

- Intermediation margin reduced by 50% of dividends.
- 90% of amortisation costs relating to fixed tangible and intangible assets.
- 90% of other administrative expenses.
- Net value of adjustments and reassessments for bad debts.

Special rules apply to financial institutions, other than banks.

IRAP is levied on a regional basis, and regions are allowed to increase or decrease the standard IRAP rate up to 0.92%. Companies with facilities in different regions must allocate their overall taxable base to the different regions on the basis of the employment costs of personnel located at the various sites. Facilities become relevant to the calculation of IRAP if they have been established for more than three months. Italian companies with permanent establishments (PEs) abroad, as well as shipping companies qualifying for the tonnage tax regime (*see Tonnage tax below*), are not subject to IRAP on the income earned through these PEs.

The deduction of labour costs for IRAP purposes depends on the type of hiring contract. In particular:

- Full deduction for costs related to employees hired with an open-ended contract.
- Deduction limited to contributions for compulsory insurance against accidents (i.e. *Istituto Nazionale Infortuni sul Lavoro* or INAIL) for temporary employees.

Moreover, for the companies that have no employees, a tax credit equal to 10% of IRAP is recognised to be used to offset other tax liabilities.

Substitutive tax on reorganisations (mergers, demergers, contributions in kind)

Corporate restructurings, such as contributions in kind, (assets *versus* shares transactions) mergers, and demergers, are, in principle, tax neutral even if, for financial accounting purposes, the transaction results in the recognition of higher values of the assets or of goodwill. Companies may elect to obtain partial or full recognition for tax purposes of the step-up in the financial accounting values of assets or of the goodwill arising from the corporate restructurings, provided they pay a substitutive tax.

The substitutive tax is calculated on the step-up in tax basis and is based on progressive rates of 12% to 16%. The first EUR 5 million is taxed at 12%, the tranche above EUR 5 million but less than EUR 10 million is taxed at 14%, and the amount in excess of EUR 10 million is taxed at 16%. The substitutive tax may also be paid in three annual instalments of 30% in the year of election, 40% in year two, and 30% in year three plus interest at the rate of 2.5% per year on the deferred amounts. The substitutive tax is not deductible for the purposes of IRES or IRAP.

In addition, stepped-up values of goodwill and trademarks, acquired from the reorganisation transactions carried out since 1 January 2016, may be depreciated for tax purposes over five tax years (previously to 2016 up to ten years) instead of the normally allowed 18 years by paying a substitutive tax of 16%. The higher tax depreciation arising from this election is effective from the tax period subsequent to the one in which the substitutive tax is paid. For example, if a merger transaction occurred in year one and the substitutive tax was paid in year two, the increased tax depreciation would begin in year three.

Tonnage tax

Italian tax resident shipping companies, as well as non-resident shipping companies operating in Italy through a PE, can qualify for and then elect to be subject to the Italian tonnage tax regime. The regime basically allows for the determination of presumptive income based on the net tonnage of the qualifying ships apportioned to the effective shipping days (tonnage income). The tonnage income is subject to IRES only.

To qualify for the tonnage tax, ships must: (i) have a net tonnage of more than 100 net tons (NT); (ii) be used for goods transportation, passenger transportation, salvage, towing, and other services; and (iii) operate in international shipping as defined by the rules disciplining Italian International Registry. Ships chartered out on a bare boat charter are excluded. Chartered ships with crew are included in the tonnage tax regime if their global net tonnage is less than 50% of the total net tonnage.

Tonnage income is calculated on the basis of the ship's net tonnage. The daily income is determined according to the following rate system:

Ship's net tonnage (NT)	Daily income in EUR per NT
0 to 1,000	0.0090
1,001 to 10,000	0.0070
10,001 to 25,000	0.0040
above 25,001	0.0020

No deductions are allowed from tonnage tax income.

Income and expenses from the following activities are all deemed to be covered by the tonnage income determined as previously discussed:

- Transport of goods.
- Transport of passengers.
- Salvage and towing.
- Other services that need to be performed on the high seas.
- Charges related to the above-mentioned activities (e.g. administrative and commercial expenses, insurances fees).
- Other operations performed in close connection with the transportation operations (e.g. loading and unloading).
- Other minor activities.

Capital gains or losses arising from the transfer of ships that have been acquired by a company while under the tonnage tax regime are also deemed to be included in tonnage tax income. Conversely, for capital gains arising from the transfer of a ship acquired prior to election for the tonnage tax regime, the difference between the sale price and the net tax cost as of the last tax period prior to the election for the tonnage tax regime is subject to the ordinary tax regime. Tax losses, in this latter case, are tax deductible.

An election for the tonnage tax regime should be made for all of a company's or group's qualifying vessels. So called 'cherry picking' is not allowed. Election for the tonnage tax regime is on a voluntary basis, but, once elected, it remains in effect for ten years. The election is renewable.

Corporate residence

Companies having their legal or administrative headquarters or their principal business activity within the Italian territory are considered to be resident companies and are taxable in Italy on their worldwide income.

Italy

A foreign company holding one or more Italian subsidiaries is deemed to be resident of Italy for tax purposes if at least one of the following conditions exists:

- The foreign company is, either directly or indirectly, held by Italian tax resident persons.
- The board of directors of the foreign company is made up mainly of Italian resident individuals.

Non-resident companies are subject to IRES and IRAP only on their Italian-source income. Specifically, Italian non-resident companies having a PE in Italy are subject to IRES and IRAP with respect of the taxable income generated from the PE in Italy.

Permanent establishment (PE)

The domestic definition of PE is substantially aligned with the Organisation for Economic Co-operation and Development (OECD) model.

Corporate residence of a trust

Trusts are considered as persons subject to corporate taxation.

Residence is defined on the basis of the location of the place of management and of the main object of the trust. In the first instance, trusts that operate through an appropriate structure are deemed to be tax resident in Italy if the said structure is located in Italy. In the absence of any such structure, trusts managed by a trustee will be deemed as tax resident in Italy if the trustee is tax resident in Italy. In addition, trusts that have the largest part of their assets located in Italy are deemed a tax resident in Italy.

Note that there are anti-avoidance rules for Italian non-resident trusts, setting out the specific conditions on which these trusts can become Italian tax resident.

Other taxes

Value-added tax (VAT)

Italian VAT (*Imposta sul Valore Aggiunto*) applies to the supply of goods and services carried out in Italy by entrepreneurs, professionals, or artists and on importations carried out by anyone. Intra-Community acquisitions are also subject to VAT taxation under certain situations.

The Italian standard VAT rate is 22%. Reduced rates are provided for specifically listed supplies of goods and services, such as 4% for listed food, drinks, and agricultural products and 10% for electric power supplies for listed uses and listed drugs. Intra-Community supplies and exports are exempt from VAT.

Specific supplies of goods and services expressly listed in the law are exempt from VAT (e.g. hospital and medical care, education, insurance services, specific financial services, supply, leasing of particular immovable property). Other specifically listed transactions are also out of the VAT application scope (e.g. transfer of money, transfer of going concern).

Input VAT on purchases of goods and services related to business activity generally is allowed for recovery. Special limitations apply in relation to specific items (e.g. cars, entertainment expenses) and to companies carrying out both exempt from VAT with no right to deduct and taxable transactions.

The filing deadline for the annual VAT return is 30 September of the following year.

Starting from the 2016 VAT return, the filing deadline is the end of February (previously 30 September) of the following year.

For information about service supply rules, time of supply for certain services, reporting obligations, reverse-charge mechanism extension, 'split payment', VAT credit offset with other taxes, and electronic invoicing to public entities, see the description of VAT in the Other taxes section of Italy's Corporate tax summary at www.pwc.com/taxsummaries.

Registration tax

Specific deeds and contracts must be filed with the local registration tax office either upon signature or if specific circumstances occur, and the relevant tax must be paid.

Depending on the nature of the contract and on the assets that are the object of the contract, as well as on the form of the contract, registration tax is levied as a fixed amount or as a percentage of the value of the goods and/or rights that are the object of the contract. As a general rule, no proportional registration tax is due in the case of transactions subject to VAT.

VAT and registration tax on lease of immovable properties

Leases of residential and commercial buildings, or portion thereof, generally are exempt from VAT with no right to deduction and subject to the registration tax at 2% or 1% rate.

Different VAT rates, VAT treatment, and registration tax treatment apply depending on the type of buildings the lease refers to (e.g. residential, commercial buildings) and the supplier (e.g. individual, constructions companies, taxable persons other than construction companies).

Specific rules apply in case of financial leases of residential and commercial buildings from a registration tax perspective.

Customs duties

At the moment of the importation of goods into the EU territory, customs duties are applied. The amount of customs duties to pay depends on the value and nature of the goods imported. In particular, for each kind of good, the Common Customs Tariff provides a tax rate to be applied to the value or number of the goods imported.

The correct classification of the goods is one of the most important issues to consider when an economic operator introduces goods in Italy. A wrong classification can give rise to the application of higher customs duties, and the operator could face a tax burden not due, or to the application of lower customs duties, and this situation could lead to a Tax Assessment by Italian Customs Authority.

The value of the goods is represented by the transaction value, hence, the price actually paid or payable for the goods when sold for exportation to the customs territory of the EU, provided that:

- there are no restrictions as to the disposal or use of the goods by the buyer
- the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued
- part of the profits of any subsequent resale, disposal, or use of the goods by the buyer will not be accrued, directly or indirectly, to the seller, and
- the buyer and seller are not related, or, where the buyer and seller are related, that the transaction value is acceptable for customs purposes.

In determining whether the transaction value is acceptable, the fact that the buyer and the seller are related is not, in itself, sufficient for considering the transaction value as not acceptable. Where necessary, the circumstances surrounding the sale are examined, and the transaction value is accepted if the relationship did not influence the price.

The price actually paid or payable is the total transaction amount paid for the imported goods and includes all payments made as a condition of sale of the imported goods

Italy

by the buyer to the seller or by the buyer to a third party to satisfy an obligation of the seller.

In determining the customs value, the following items shall be added to the price, to the extent that they are incurred by the buyer and are not included in the price (list not exhaustive):

- Commissions and brokerage.
- Royalties and licence fees related to the goods under assessment.
- The cost of transport and insurance of the imported goods.

At the same time, provided that they are shown separately from the price actually paid or payable, the following items shall not be included in the customs value (list not exhaustive):

- Charges for the transport of goods after their arrival at the place of introduction into the customs territory of the European Union.
- Charges for construction, erection, assembly, maintenance, or technical assistance, undertaken after importation of imported goods such as industrial plant, machinery, or equipment.
- Buying commissions.

A reduced or zero rate of duty at importation can be applied when the goods imported have a preferential origin. The preferential origin depends on the existence of commercial agreements between the European Union and other non-EU states or by facilities provided by the European Union to non-EU states unilaterally.

The application of a reduced or zero rate of duty can even depend on the existence of preferential tariff treatment or on the existence of a particular exemption provided by law for some kind of goods.

Any person may appoint a representative in one's dealings with the Customs Authority to perform the activities and formalities laid down by customs rules. Such representation may be direct, in which case the representative shall act in the name and on behalf of another person, or indirect, in which case the representatives shall act in one's own name but on behalf of another person.

For direct representation, a forwarding agent, holder of a particular licence, must be appointed.

The representative must be established within the European Union.

Excise duties

The following goods are subject to excise duties:

- Energetic products (e.g. petrol, gas oil, natural gas, coal).
- Alcohol and alcoholic drinks (e.g. wine, beer, ethylic alcohol).
- Processed tobaccos (e.g. cigars, cigarettes, tobacco).
- Electric power.

The subjection of a product to excise duties has to be verified on the basis of its customs combined nomenclature code.

The tax liability, depending on the products, arises:

- at the moment of importation or production (and the excise duties must be paid at the moment in which they are released for consumption in Italy)
- when the excisable goods are used for heating or as fuel, and

- when the excisable goods are released for consumption or used for own use.

As a general rule (with exception of natural gas and coal, coke, and lignite), with reference to excise goods released for consumption during a month, the payment of the relative excise duties has to be done within the 16th day of the following month.

With reference to excise goods imported, customs rules are applied as far as the procedure and terms of payment are concerned.

The production, processing, and holding of 'excise goods', except from natural gas, coal, coke, lignite, and electric power, are subject to a suspensive regime performed through a fiscal warehouse.

In order to manage a fiscal warehouse, it is necessary to acquire a licence issued by the Italian Customs Authority, and there are specific obligations for the owner of a fiscal warehouse (e.g. provide for a particular guarantee, keep a particular accounting system for the goods stored, be subject to controls performed by Italian Customs Authority, where requested).

The Italian legislation provides for many exemptions with regards to the use of 'excise goods'.

Furthermore, under certain circumstances, a tax refund is granted to the operator who released for consumption, if, afterwards, the products are not consumed in Italy.

Stamp duty taxes

Stamp duty taxes (*Imposta di Bollo*) apply on a certain list of deeds or documents provided for by the relevant law provision (e.g. checks, bills of exchange, statements of account, certificates, books of account, deeds of transfer of quotas, and, in some cases, invoices).

According to the kind of deed, stamp duty tax is due at the moment of the deeds' origin or in case of use (e.g. if the deed is filed to the Italian Registration Office). Moreover, it can be a fixed amount or as an amount proportional to the value of the deed or document.

Stamp duty tax can be paid:

- ordinarily, through a physical stamp attached on the document, or
- virtually, through electronic means (in this case, a specific authorisation from the Italian tax authorities and a specific process procedure are needed).

Stamp duty tax is usually alternative to VAT; however, in case of considerations partially subject to VAT and partially not subject to VAT, the invoice is subject to stamp duty tax if the total amount of the considerations not subject to VAT exceeds EUR 77.47. Moreover, some transactions are stamp duty tax exempted (e.g. inter-Community supply of goods). For transactions that are exempted from VAT (with restriction on VAT credit) and for transactions out of scope of VAT, exceeding EUR 77.47, an amount of EUR 2 is due as stamp duty tax for each issued invoice.

Unified municipal tax (*Imposta Unica Comunale or IUC*)

The IUC is composed of the following different taxes:

- *Imposta Municipale Unica (IMU)*: Real estate tax levied on the ownership of immovable properties (buildings, rural land, farmlands), except for immovable properties owned as primary private properties. The standard tax rate is 0.76%. Depending on the municipality and status of the taxpayer, the tax rate can be increased or decreased. The taxable base is generally determined on the basis of the

Italy

so called ‘cadastral value’ (i.e. capitalisation of the deemed standard income that is expected to be derived from the real estate).

- *Tributo per i Servizi Indivisibili* (TASI): A service tax due by real estate owners and by tenants. The amount due by the tenant can range according to the Regulation stated by the municipality.
- *Tassa sui rifiuti* (TARI): A waste tax levied on the owner or the user of immovable properties.

Financial Transaction Tax (FTT)

Italian FTT applies to (i) cash equities, (ii) derivatives, and (iii) high-frequency trading transactions.

Cash equities FTT applies to the purchase of shares and other equity instruments issued by Italian companies, as well as securities (wherever issued) tracking those Italian shares (e.g. ADRs). The taxable base is the net daily balance of transactions on the same financial instruments by the same person on the same settlement date. The rate is 0.2% on OTC trades or 0.1% on trades executed in a regulated market (or multilateral trading facility).

Derivatives FTT applies to any derivative contract or securitised derivative, whose underlying is directly or indirectly tied to Italian shares. The taxable base is the notional amount of the derivative (no netting applies), and it is subject to a special tax scale, on both the purchase and the sale legs; the amount is reduced to 1/5 for transactions executed on regulated markets and multilateral trading facilities.

High-frequency trading FTT applies to transactions on shares (wherever issued) in the Italian financial markets; trades amended or cancelled within half a second are subject to a 0.2% rate, to the extent they exceed 60% of overall trades.

Social security contributions

The Italian employer, in order to pay social security contributions for employees, must register with the Italian Social Security Administration (*Istituto Nazionale Previdenza Sociale* or INPS).

The total social security rate is around 40% of the employee's gross compensation (the rate depends on the work-activity performed by the company, the number of employees of the company, and the employee's position), and is shared as follows:

- Employer's charge is around 30%.
- Employee's charge is around 10%.

Branch income

The tax regime for PEs is the same as for corporate Italian entities (e.g. joint-stock companies). Accordingly, a PE is subject to IRES as well as IRAP. Both taxes are determined on the basis of the relevant financial statements related to the business activities carried out by the PE.

Transfer pricing principles apply to ‘transactions’ between the head office and its Italian PE.

Income determination

In principle, positive and negative components of a company's income statement are, respectively, taxed or deducted on an accruals basis (under the accrual principle) for tax purposes. Additionally, in order to be taxed/deducted, income items have to be certain

under a legal standpoint and either objectively determined or capable of objective determination as to their amount (under the certain and objective determination principle). Income statement items accrued in the statutory accounts not meeting the above criteria are not allowed for tax deduction nor taxed as income in the tax period. Deduction or taxation of income is correspondingly deferred to future tax periods when the criteria are met.

Expenses generally are deductible if they relate to activities generating revenues concurring to the company's taxable income (under the inherence to business principle) and provided they are included in the relevant statutory accounts (under the imputation principle). An exception to this general rule is made for those income statement items accrued in the statutory accounts relating to a tax period different from that in which they become relevant for tax purposes in accordance with the principles of certainty and objective determination as described above. These items are taken into account in determining taxable income in the tax period when the latter conditions are met.

For IRAP purposes, relevant income and expense are those reported in the financial statements.

Specific rules have been released for entities that have adopted International Financial Reporting Standards (IFRS) for Italian statutory financial reporting purposes. These provisions are aimed to align income determination rules with IFRS.

As of FY 2016, a new regime has been introduced regarding the waiver of credits (e.g. financial and/or commercial) towards the company by its shareholder. In particular, the part that exceeds the tax value of the credit is considered taxable income. Furthermore, the shareholder is required to provide a statement to the company pointing out the tax value of the credit. Without such statement, the company will have to tax the full amount of the waiver of the credit.

Inventory valuation

Italian tax law allows the application of all the most commonly used inventory valuation methods: last in first out (LIFO), first in first out (FIFO), average cost. For IRES only, the reference prices used to calculate the written down value of the inventory items cannot be lower than their market prices during the final month of the tax period.

Companies operating in the oil and gas sector are required to adopt either average cost or FIFO for tax purposes.

Capital gains

Capital gains are taxable in the tax period in which they are realised, as follows:

- **Fixed assets:** The gain realised on the sale of fixed assets is taxable for both IRES and IRAP purposes. Additionally, for IRES purposes, tax on capital gains can be spread over a maximum of five years. This treatment is allowed if the company owned the fixed assets for not less than three years.
- **Financial Investments:** A specific participation exemption regime (PEX) is applicable. Under this regime, capital gains realised by Italian companies on sales of shareholdings are 95% exempt from IRES.

PEX applies if all of the following conditions are met:

- The shareholding was held uninterruptedly for at least 12 months prior to the sale.
- The investment was classified under financial fixed assets in the financial statements relating to the first tax period of uninterrupted ownership.
- The subsidiary is actually carrying on a commercial activity (e.g. investments in companies mainly performing management of their own real estate are not entitled to PEX benefits).

Italy

- The majority of the subsidiary's income is not generated in a tax haven country or one with a privileged tax regime.

The third and fourth conditions must be met both at the time of the sale of the investment and in the three preceding years. If these conditions are not met, the capital gain realised by the company is ordinarily taxed. Capital losses arising from the sale or write-down of shareholdings meeting PEX conditions are basically not tax deductible. Likewise, the capital losses realised on sales of non-PEX investments are tax deductible. Specific exemptions are provided for those entities adopting IFRS for Italian statutory accounts reporting purposes.

Specific anti-dividend washing rules provide that where capital losses arise from the disposal of shareholdings that are not eligible for PEX, such losses are deductible only for the part exceeding the tax exempt amount of dividends (*see Dividend income discussion below*) received from the shares in question in the 36 months prior to the disposal.

Capital gains on financial investments generally are excluded from the IRAP taxable base.

Dividend income

Dividends received by Italian resident companies from Italian companies or from companies resident in countries other than tax havens (i.e. not included in the 'black list') are excluded from the IRES taxable base for 95% of their amount. Conversely, no exemption applies to dividends paid by entities that are resident in tax haven jurisdictions (unless those dividends derive from profits that were already taxed under the Italian CFC rules). There are specific rules for entities adopting IFRS for Italian statutory financial reporting purposes. For such entities, dividends from investments in shares and other financial instruments held for trading are fully taxable.

Dividends generally are excluded from the IRAP taxable base.

Interest income

Interest income is generally part of the taxable base.

Foreign income

An Italian resident corporation is taxable on all income whether produced in Italy or abroad. Profits earned by subsidiaries that are resident or located in countries or territories other than tax havens are taxed only on distribution of the relevant profits. Double taxation is, in principle, avoided by means of foreign tax credits.

As of FY 2016, an optional branch exemption regime has been introduced, which allows Italian companies to exempt from Italian taxation branch income and losses arising outside Italy, instead of the normal regime, which provides for taxation of worldwide income with foreign tax credit relief. This option affects all foreign PEs of the Italian company and is irrevocable. It must be exercised at the time the branch is incorporated and takes effect from that fiscal year.

Shell companies

Resident companies and PEs of non-resident companies can be qualified as non-operating entities if, alternatively, one of the following conditions is met:

- The entity is in a tax loss position for five consecutive tax periods.
- The average revenues recorded in the current fiscal year and in the prior four years are lower than the amount resulting by applying certain 'deemed return' percentages to the average balance sheet value of specific assets in the current fiscal year and the four previous years.

The main assets to be taken into consideration are shares and shareholdings, financial receivables, owned or leased real estate, and owned or leased tangible and intangible assets. The value of any assets acquired or sold during the fiscal year must be adjusted according to the ownership period.

These conditions must be checked every year. Therefore, it is possible for an entity to be 'non-operative' in one year and operative in the following year.

The shell company is assessed as having a minimum taxable income for both IRES and IRAP purposes.

For IRES purposes, the taxable income of a non-operative entity is determined as the sum of such values emerging from the application of specific percentages to the book values of the above-mentioned assets.

The current IRES standard rate for entities qualified as shell companies is 38% (27.5% plus surtax of 10.5%).

Tax losses generated in a tax period when the company was deemed to be non-operating cannot be carried forward.

For IRAP purposes, non-deductible items have to be added back to the deemed minimum IRES income as outlined above.

These rules are not applicable in the first year of a company's incorporation. Exemptions from these rules can be achieved:

- by means of an advance ruling from the Italian tax authorities aimed at assessing the specific circumstances that caused the company not to earn the minimum amount of income or
- by specific objective situations provided for by Italian law (e.g. company directly or indirectly held by listed companies).

Shell companies are also subject to limitations in their ability to recover VAT credits.

Deductions

The principles outlined in the section on Income determination also apply for deductible costs.

Depreciation and amortisation

All fixed assets that are used in the business of the company, except land, are depreciable for tax purposes (for both IRES and IRAP).

For IRES, the maximum depreciation rates for fixed tangible assets are set forth in a Ministerial Decree. Such depreciation rates are different, depending on the type of asset and on the economic sector in which the company operates. In the event that financial accounting depreciation exceeds the amounts allowed for tax purposes, temporary differences arise. Tax depreciation of fixed tangible assets is allowed from the tax period in which the asset is first used. In the first tax depreciation period, the depreciation rate cannot exceed one-half of the normal rates.

An additional IRES depreciation is granted for new investments on fixed tangible assets purchased from 15 October 2015 to 31 December 2016. In particular, the relating cost is increased by 40%, bringing the taxable basis of the asset to 140%. The eligible assets are those whose tax amortisation rate is higher than 6.5%.

Italy

It is worth pointing out that a project aimed at achieving the grouping of the tax amortisation rates has been announced by the government. Timing for the implementation of such a project is still uncertain.

Land is not a depreciable asset. Amortisation of goodwill derived from an asset deal and amortisation of trademarks are deductible for an amount not exceeding 1/18 of the cost in any year.

Patents, know-how, and other intellectual property (IP) may be amortised over a two-year period.

Concession rights may be depreciated with reference to the utilisation period as determined either by law or in the relevant agreement.

For IRAP purposes only, depreciation and amortisation (other than as related to goodwill and trademarks) are deductible in accordance with the amounts reported in the financial statements, regardless of the limits outlined above.

Finance leasing

Leasing expenses booked in the profit and loss statement pursuant to Italian Generally Accepted Accounting Principles (GAAP) are fully deductible from the IRES taxable base if the relevant agreement has a minimum duration period. In particular, if the agreement is executed as of 1 January 2014, the duration required is the following:

- For fixed tangible assets, at least half of the depreciation period as set forth in the above Ministerial Decree.
- For real estate, at least 12 years.

Longer minimum duration periods are provided for financial leasing agreements executed before 1 January 2014.

Interest expense

Generally, interest expense is fully tax deductible up to the amount of interest income. Thereafter, excess interest expense is deductible at up to 30% of the gross operating margin (interest deduction capacity) as reported in the financial statements. Gross operating margin is defined as the difference between operating revenues and expenses excluding depreciation of tangible and intangible assets and charges for leased assets as stated in the profit and loss account for the year.

Net interest expense in excess of the yearly limitation is carried forward indefinitely. Hence, net interest expense not deducted in previous years can be deducted in any future fiscal year as long as total interest in that year does not exceed 30% of gross operating margin. If net interest expense is lower than the annual limit (i.e. 30% of gross operating margin), this difference can be carried over to increase the company's interest deduction capacity in future years.

As of FY 2016, the inclusion of dividends received from their foreign subsidiaries in the computation of the 'earnings before interest, tax, depreciation, and amortisation' (EBITDA), used to determine the interest expenses deductibility limit, is allowed.

Moreover, the limits on the deductibility of interest expenses related to bonds not traded in 'white list' countries are repealed. Following to this amendment, the aforesaid interest expenses will be subject to the ordinary deductibility limits provided for tax purposes.

Where an election is made for the domestic tax consolidation regime (*as discussed in the Group taxation section*), the net interest expense limitation applies to the consolidated tax group. As a consequence, if a company participating in a tax group has an excess interest deduction capacity, this excess may be used against the interest

deduction deficit in another company belonging to the same tax consolidation group. Under specific conditions, non-resident subsidiaries can also be ‘virtually’ included in the tax consolidation for the sole purpose of transferring their excess capacity over 30% of gross operating margin in order to increase the overall interest deduction capacity of the Italian group.

The above-mentioned rules are not applicable for financial institutions, such as banks and insurance companies, where the deductibility of interest expense (for both IRES and IRAP purposes) is limited to a fixed amount of 96% of the interest expense shown in the income statement of these entities. Starting from FY 2017, holdings and banks will be allowed to fully deduct interests.

In 2016, the tax authorities provided some general guidelines regarding leveraged buyout (LBO) operations. The latter shall be considered legitimate and interests arising from related acquisition financing shall be considered, in principle, deductible within the ordinary limits (30% of EBITDA, transfer pricing rules, etc.).

Allowance for Corporate Equity (ACE)

The ACE is a deduction that corresponds to the net increase in the equity employed in the entity, multiplied by a rate yearly determined by the Ministry of Finance. This rate is equal to 4.75% for FY 2016 (previously 4.5%).

The relevant increase is determined by the equity contributions and by the retained earnings (except profits allocated to a non-disposable reserve) less the following items:

- Reductions of the net equity with assignment to shareholders, including, in particular, dividend distribution.
- Investments in controlled companies.
- Certain intra-group business acquisitions.

If the allowance for a year is higher than the net IRES taxable base, the difference will be carried forward to the next periods.

To calculate the equity increase, the reference equity is disclosed in the financial statements for the fiscal year current as at 31 December 2010, net of the profits for the same year.

Bad debts

Yearly provision for bad debts not guaranteed by third parties and relating to sales of goods and services is tax deductible at up to 0.5% of the receivables gross value. Deduction shall no longer be permitted when the total amount of the bad debts reserve exceeds 5% of the above-mentioned gross value of the receivables as of the end of the fiscal year.

Regardless of the above, losses on bad debts shall be deductible if supported by precise and objective elements or, in any case, if the debtor is subject to bankruptcy proceedings, including foreign ones.

A loss on a bad debt can be deducted for IRES purposes when the following conditions jointly apply:

- The term for payment has elapsed by six months.
- The receivable has a determined threshold. In particular, the item is up to EUR 2,500 for small companies and up to EUR 5,000 for big corporations (with turnover over EUR 100 million).

The loss is tax deductible, regardless of the amount, when the collection right is prescribed.

Italy

Further changes are intended to make certain the identification for the year attributable to the deductibility of the loss. Specifically, the deduction of the loss is allowed in the period charged to the balance sheet, even if that offsetting is performed in a tax year following the year in which there are the precise and objective elements, or the debtor is considered subject to bankruptcy proceedings.

Moreover, losses are tax deductible in case of derecognition of bad debts applied in compliance with accounting standards (both Italian GAAP and IFRS), always provided the inheritance test is met.

Charitable contributions

Deduction of charitable contributions is allowed. The amounts allowed for deductions depend on the specific features of the recipient entity, and specific limitations are set by the law.

Entertainment expenses

For IRES purposes, expenses for gifts and entertainment that meet the requirements (both qualitative and quantitative) contained in the specific Ministerial Decree are fully deductible in the tax period in which they are incurred. Entertainment expenses that do not meet these requirements cannot be deducted. As of FY 2016, the thresholds for the tax deductibility are increased.

Expenses related to gifts with a value of EUR 50 or less are entirely deductible.

Travel expenses

For IRES purposes, the deduction for travel expenses incurred within the municipality is limited to 75% of the amount incurred. However, the VAT related to such costs is fully recoverable.

Car costs

The IRES deductibility of expenses related to cars used by companies is as follows:

- 20% for cars that are not assigned to employees or are granted to employees solely for business use.
- 70% for cars granted to employees for both business and private purposes.

Car costs may be entirely deducted if (i) automobiles are absolutely necessary for the company's business or (ii) automobiles are an essential element in the company's activity (i.e. vehicles owned by a car rental company).

Telephone expenses

For IRES purposes, up to 80% of the total expenses related to both mobile and landline telephones are deductible.

Fines and penalties

Fines and penalties are generally not considered inherent costs and are, consequently, not deductible for tax purposes.

Taxes

The following IRAP items are deductible in determining the IRES taxable base:

- 10% of IRAP paid during the year.
- An amount determined on the IRAP paid on the cost of employees, net of the relevant deductions.

IMU is deductible for IRES purposes at up to 20% of the amount paid in the fiscal year, whereas no deduction is allowed for IRAP purposes.

Purchases from suppliers resident in tax haven jurisdictions

Expenses incurred for goods and services bought from entities resident in 'tax haven' jurisdictions are now fully tax deductible.

Previously to FY 2016, an official list of 'tax havens' was issued by the Italian Ministry of Finance (the so-called 'black list'), and the transactions were subject to specific deductibility conditions and to disclosure in the tax return.

Net operating losses

Tax losses can be carried forward for IRES purposes and used to offset income in the following tax periods without any time limitation.

Tax losses can only be offset with taxable income for an amount not exceeding 80% of the taxable income. Thus, corporations are required to pay IRES on at least 20% of taxable income.

Note that losses arising in the first three years of activity can be offset with 100% of taxable income.

For IRAP purposes, tax losses may not be carried forward.

Specific (tax anti-avoidance) rules limit the carryforward of tax losses in the event of:

- change of control and
- an effective change of the main activity (performed by the company carrying forward the losses).

The aforementioned changes must occur together in order for the limitations to be applicable. The change of the main activity is relevant for these purposes if it takes place in the tax period in which the change of control occurs or in the two subsequent or preceding periods.

Specific anti-abuse provisions are also applicable to net operating losses in cases of merger or demerger.

In Italy, tax losses may not be carried back.

Payments to foreign affiliates

Transactions with foreign affiliated companies should be at 'fair market value' and, generally, as defined by OECD guidelines. *See Transfer pricing in the Group taxation section for more information.*

Group taxation**Domestic tax consolidation**

Companies belonging to the same group can elect domestic tax consolidation. This regime allows the determination of a single IRES taxable base comprised of the taxable income and losses of each of the participating entities. The tax consolidation does not operate for IRAP purposes.

Where an overall tax loss position arises, this can be carried forward and used against future consolidated taxable income. Conversely, tax losses arising in fiscal years preceding the domestic tax consolidation election can be carried forward and used only by the company to which these losses belong.

Italy

The taxable basis determined by each company participating in the tax consolidation arrangement is included in its entirety. No apportionment is made in relation to the percentage of control.

In order to validly elect the Italian domestic tax consolidation regime, the following conditions must be met:

- The consolidating entity must be an Italian tax resident company, and it must hold, directly or indirectly, more than the 50% of the share capital of the consolidated entities (so called 'legal control').
- This control must be in place from the beginning of the tax period for which the tax consolidation is applied for.
- All of the companies participating in the group must have the same year-end.

The consolidation arrangement operates on an elective basis. Taxpayers may select whether to be included or not, and it is not necessary for all the Italian group/sub-group companies to jointly elect for the tax consolidation.

Once the election is made, it cannot be revoked for three fiscal years.

The election is also allowed to Italian 'sister' companies or PEs in Italy of foreign companies resident in EU/EEA countries with which Italy has entered into an agreement that ensures an effective exchange of information. The Italian entity should be designated to exercise the option, acting as consolidating entity.

Worldwide tax consolidation group

A worldwide tax consolidation group is available, allowing the consolidation of foreign subsidiaries.

In addition to the requirements set out for the domestic tax group system, the following conditions apply:

- The ultimate parent company must be either owned by individuals who are tax residents of Italy or listed on the Italian Stock Exchange.
- The option must be exercised for all foreign companies (under the 'all in, all out' principle).

Income for each company is apportioned in the tax consolidation based on the actual percentage of control exercised by the ultimate parent company that is an Italian tax resident.

A number of additional requirements need to be fulfilled in order for a worldwide tax consolidation to be operative, including a mandatory audit of the financial statements of all the foreign subsidiaries.

Once the election is made, it cannot be rescinded for five fiscal years.

Country-by-country (CbC) reporting

In FY 2016, CbC reporting has been introduced for resident parent companies of groups that are obligated to file consolidated financial statements, with consolidated revenues in the previous year of at least of EUR 750 million.

The report is also requested for resident controlled entities if the foreign parent company filing the consolidated financial statements does not have a similar fulfilment requirement in its jurisdiction or if an agreement for information exchange with that jurisdiction is not in place.

Specific information is necessary to be disclosed to the tax authorities (e.g. revenues, profit before tax, tax paid).

Penalties are levied in case of missed or untrue communication.

Terms and conditions of the fulfilment are expected to be approved with a Regulation.

Transfer pricing

Income derived from operations with non-resident corporations that directly or indirectly control the Italian entity, are controlled by the Italian entity, or are controlled by the same corporation controlling the Italian entity have to be valued on the basis of the normal value of the goods transferred, services rendered, and services and good received if an increase in taxable income is derived there from. Possible reductions in taxable income as a result of the normal value rule are allowed only on the basis of mutual agreement procedures or the EU Arbitration Convention.

The normal value is the average price or consideration paid for goods and services of the same or similar type, carried on at free market conditions and at the same level of commerce, at the time and place in which the goods and services were purchased or performed. For the determination of the normal value, reference should be made, to the extent possible, to the price list of the provider of goods or services, and, in their absence, to the price lists issued by the chamber of commerce and to professional tariffs, taking into account usual discounts.

Penalty protection regime with transfer pricing documentation support

Transfer pricing rules provide for a penalty protection regime in case of transfer pricing audit, provided that the taxpayer has prepared proper documentation detailing the compliance of inter-company transaction to the arm's-length principle.

The Regulation applies to transactions incurred between Italian entities and non-resident entities belonging to the same group (transfer pricing rule are not applicable to domestic transactions). No specific methods have been introduced to test the arm's length of transactions; reference is made to the OECD guidelines. An exception exists for corporations involved in on-line advertising and related ancillary activities that are required not to use cost-based indicators for transfer pricing purposes, unless an advance pricing agreement (APA) has been defined with the tax authorities on this.

On the base of the transfer pricing Regulation, taxpayers can obtain penalty protection if they provide the Italian tax authorities with:

- Documentation to support the inter-company transactions drawn up in the specific format detailed in a Regulation issued by the Italian tax authorities and drawn up in Italian. The tax authority confirmed that information in annexes (inter-company contracts and transactions diagram) can be in English.
- Notification that documentation has been prepared and available by checking the box in the annual corporate income tax return.

The information required is based on the EU Code of Conduct for Transfer Pricing documentation.

Based on the group structure, a Master File and/or Country File have to be prepared.

Italian-based groups and Italian sub-groups owning non-Italian subsidiaries must produce both a Master File and a Country File. Italian subsidiaries of multinational groups need to produce a Country File only.

The sub-group provisions are onerous, especially so where they relate to branches. Where a foreign entity has an Italian branch but the company itself is also a holding

Italy

company, a Master File is required for the foreign entity's subgroup, even if there is no holding directly attributed to the branch.

Sub-holding companies based in Italy with at least one non-Italian subsidiary, which need to produce a Master File, may instead produce the Master File for the entire group in English. If it does not contain all the information in the Italian Regulation, they will need to supplement it.

Documentation must be signed by the legal representative of the company and provided to the authority upon request within ten days. Also, an electronic copy must be provided at authority request.

Small and medium companies (defined as those with an annual turnover of less than EUR 50 million) need to update the economic analysis only every three years, provided that no significant change in the business occurred. Otherwise, it is necessary to update the economic analysis each year.

The transfer pricing adjustments arising on tax audits are also relevant for IRAP for companies' financial years commencing on or after 1 January 2008. Moreover, penalties will not be levied in relation to the additional IRAP applicable to transfer pricing adjustments assessed by the tax authorities for the fiscal years from 2008 to 2012, unless the assessment has become final before 1 January 2014.

Relief from penalties is granted on the additional IRAP applicable to transfer pricing adjustments to taxpayers who have prepared transfer pricing documentation in line with Italian Regulation.

International ruling procedures are available, to agree transfer pricing methodology with the tax authorities.

The agreement executed between the tax authorities and the taxpayer is binding for the fiscal year during which the agreement is executed and for the following two fiscal years, unless significant changes in the circumstances relevant for the conclusion of the agreement executed by the taxpayer take place.

Thin capitalisation

Italy no longer has thin capitalisation rules *per se*. Instead, net interest expense is deductible only up to an amount equal to 30% of gross operating margin (*see Interest expense in the Deductions section for more information*).

Controlled foreign companies (CFCs)

An Italian company that controls, either directly or indirectly, a foreign enterprise, company, or other entity is required to consolidate the taxable income arising in proportion to the percentage of shareholding held, irrespective of whether the profits have been distributed or not.

Income from CFCs is taxed separately from the other taxable income of the business at the standard IRES rate (i.e. other tax losses cannot be used to offset CFC income). Foreign taxes paid by the CFCs are recoverable by way of a corresponding tax credit.

Dividends received by an Italian shareholder from a CFC are excluded from taxable income up to the amount of the taxable income attributed under the above CFC provisions. The excess of any dividends over income already included through the CFC regime is fully taxable in the hands of the shareholder.

Exemption from CFC rules can be achieved by means of an advance ruling from the Italian tax authorities.

The CFC rules are also applied to controlled companies that are located in a jurisdiction if the following conditions exist:

- The effective tax is less than 50% of the tax that would have been charged had the company been resident in Italy.
- More than 50% of revenue is derived from so-called 'passive income' or from intra-group services.

Tax credits and incentives

Foreign tax credit

Where foreign-source income definitively is taxed abroad, a tax credit can be claimed for use against a company's IRES liability. The amount of the tax credit that can be claimed is the lower of the foreign tax incurred and the proportion of the IRES liability related to the foreign-source income. For partially exempt income (e.g. dividends), the foreign tax credit is reduced in proportion to the amount of the income taxable in Italy.

If an Italian company receives foreign income from more than one country, this limitation is applied separately to each country.

Foreign taxes borne by the foreign PE of an Italian resident company are allowed to be offset against the overall consolidated tax liability (IRES).

Any excess of foreign tax credit over the maximum amount allowed for recovery in the same tax period can be carried back or carried forward for eight years and recovered if specific conditions are met (e.g. same source country of the income, occurring because of an excess of the IRES liability related to the foreign-source income).

Patent box regime

Italian resident companies and PEs of non-resident entities that carry out research and development (R&D) activity, either directly or by outsourcing it to universities or other research institutes or equivalent institutes, may elect to apply the Italian patent box regime. The regime exempts a portion of the income derived from the exploitation, either directly or by licensing, of 'qualifying intangible assets'.

The general exemption is 50%, but it is limited to 40% for 2016 (previously 30%).

The regime can be applicable to PEs only if the non-resident entity resides in a country with which Italy has concluded a tax treaty and that allows adequate exchange of information.

The election is effective for five years and cannot be revoked during that period. Qualifying intangible assets include patents; know-how, such as industrial, commercial, or scientific information, formulas, and processes that are eligible for legal protection; and trademarks.

Taxpayers must request a specific ruling from the Italian tax authorities to benefit from the regime when the qualifying intangible is either used directly by the company or licensed to a related party.

Inward investment, capital investment, and R&D investment incentives

A number of incentives have been established to attract new industry to southern Italy and certain depressed mountain areas in central and northern Italy.

The possibility of taking advantage of these rules, however, depends on the taxpayer fulfilling specific conditions and on the actual availability of financial resources by the Italian state. These financial resources generally are set in the annual state budget.

Italy

In particular, from FY 2015 through FY 2019, Italian companies that carry out qualifying R&D activities can benefit from a tax credit computed as a percentage of the R&D expenditures in excess of the company's average R&D expenditures in FY 2012, FY 2013, and FY 2014.

The credit percentage is 25% for depreciation of laboratory equipment and for technical expertise related to industrial or biotech IP. The percentage increases to 50% for costs related to 'highly qualified' personnel and R&D activities outsourced to universities or other similar research institutions.

The tax credit cannot exceed EUR 5 million per year per taxpayer, and requires qualifying R&D costs of at least EUR 30,000 per year.

Withholding taxes

A 26% base standard withholding tax (WHT) rate is applicable on the yields on loans and securities (bonds, shares, etc.) paid by Italian resident entities to both Italian and non-Italian resident investors.

The said standard WHT rate, however, does not affect the applicability of those rules allowing either the application of reduced WHT rates or the full exemption from the said withholdings (e.g. double tax treaties [DTTs], EU directives, special domestic tax rules).

Interest on government bonds is subject to a 12.5% domestic WHT.

WHT chart

Domestic corporations paying certain types of income are required to withhold as shown on the following chart. The numbers in parentheses refer to the notes below.

Recipient	Dividends (%)	Interest (%)	Royalties (%)

Notes

1. The actual applicable rate depends on the nature of the recipient. Applicable rates are as follows: 0% applies on loan agreements and ordinary notes when the recipient is a corporation; 26% rate in all other cases.
2. 0% is applicable on dividends received by 'qualified' shareholders (i.e. holding more than 20% of voting rights or 25% of the share capital, 2% or 5% in case of listed companies). The rate applicable to 'non-qualified investments' is 26%.
3. The rate is applicable on 75% of the gross amount of the royalty paid.
4. Pursuant to the EU Directives and provided that the requirements set forth therein are met, payments of dividends, interest, and royalties made by an Italian company to an EU resident group company can be WHT exempt. Specifically for the dividends, the minimum shareholding requirement (to benefit from this exemption) is currently equal to 10%; for interest and royalties, it is 25% of voting rights; a one-year minimum holding period applies for both.
5. Should the full WHT exemption not apply, 1.375% is applicable on dividends paid to EU tax resident corporations. As of FY 2017, the WHT will be reduced to 1.2%.
6. Pursuant to the 2004 Swiss EU tax agreement and provided that the requirements contained therein are met, payments of dividends, interest, and royalties made by an Italian company to a Swiss tax resident group company can be WHT exempt.
7. Non-resident persons have the right to obtain reimbursement for up to 11/26 of the withholding effected, upon proof of the actual taxation of the dividends in the foreign country where the recipient is a resident.
8. Provided that all conditions are met, domestic tax legislation is applicable if more favourable for the taxpayer. In a number of circumstances, tax treaties may provide for particular tax rates mainly dependent on the nature of the instruments and on the profile of the recipients/payers. In such cases, the applicable WHT must be verified from an analysis of the relevant tax treaty.
9. The treaty with the former USSR remains applicable with respect to Kyrgyzstan, Tajikistan, and Turkmenistan.

Tax administration

Taxable period

The ordinary taxable period is equal to 12 months. Conformity with the calendar year is not requested. In particular cases, the duration of the taxable period can be different from 12 months (e.g. newly established companies may be allowed to have taxable periods of up to 18 months; companies that are involved in extraordinary transactions [merger, de-mergers, etc.], as well as companies that are liquidated, may have taxable periods shorter than 12 months).

Tax returns

IRES and IRAP returns must be filed by the end of the ninth month following the tax year-end.

The ordinary filing deadline for WHT agent returns is 31 July for both the simplified WHT return and the ordinary WHT return.

Payment of taxes

For IRES and IRAP purposes, the tax law provides for both advance payments and settlement payments. As a general rule, the advance payments are equal to the net tax liability for the previous tax period and are due during the tax period to which they refer. The advance payments due are equal to 100%.

Advance payments are split into two instalments:

- 40% by the 16th day of the sixth month following the tax year-end.
- 60% by the end of the 11th month following the tax year-end.

Settlement payments are due by the 16th day of the sixth month following the tax year-end to which they refer.

Tax payments should be performed through a specific form to be electronically filed to the tax authorities (i.e. F24 form).

Offsetting of taxes

Payables and receivables (not claimed for refund) resulting from a return regarding different taxes are allowed for off-setting within a yearly limit of EUR 700,000.

Furthermore, in order to offset tax credits exceeding EUR 15,000, a so-called 'conformity mark' affixed by a qualified professional on the related return is required.

No offsetting is allowed in case of unpaid taxes resulting from an official payment notice and exceeding EUR 1,500.

Administrative penalties

Failure to file a tax return results in a penalty ranging from 120% to 240% of the taxes due. Minimum penalties (ranging from EUR 250 to EUR 1,000) are applicable if no tax liability emerged in the return.

A tax return showing either a taxable income lower than the one assessed or a tax credit higher than those owed to the taxpayer (i.e. an untrue tax return) results in a penalty ranging from 90% to 180% of the higher taxes ultimately due. Up to FY 2015, the penalty was ranging from 100% to 200%.

Omitted and/or late payments of taxes, of whichever kind and nature, result in a penalty equal to 30% of the unpaid/late paid tax. However, in cases where the delay is within 15 days, the penalty is equal to 1% per day; if the delay is between 15 and 90 days, the penalty is equal to 15%.

Italy

Special rules apply where similar violations are repeated over various years.

Self-disclosure of tax law breaches are allowed on payment of the higher taxes and of reduced administrative penalties. The reduced penalties are always computed on the floor of the applicable range of penalties. The starting of an audit does not prevent the possibility to amend tax returns or to carry out late tax payments.

The actual reduction of penalties depends on the time elapsed between the occurrence of the breach and the self-disclosure itself (i.e. different interim thresholds apply). The penalty is reduced from 1/30 (lower floor), if the correction is done within 14 days (for an omitted/lower tax payment only), up to 1/5 (upper floor), if the correction is carried out during a tax authorities audit or after the issue of a tax audit report (i.e. *processo verbale di constatazione*).

In any case, the possibility to apply the self-disclosure is prevented after the issuance of final notice of tax assessment (i.e. *avviso di accertamento*) or tax redetermination (i.e. *avviso di irregolarità*).

Statistical based assessment procedure (so-called ‘Studi di settore’)

The Italian Tax law provides for special tax control procedures for those enterprises whose total turnover does not exceed EUR 7.5 million. The controls, so-called ‘*Studi di Settore*’, are based on standardised economic models of the different business fields and are aimed at assessing whether or not a specific subject’s taxable income is in line with its own standard model (on statistical basis).

A higher possibility of undergoing tax audit should be considered for entities not meeting the expected profitability and/or turnover resulting from these automated controls.

Tax ruling

The tax ruling is an instance where the taxpayer directed a behaviour for tax purposes to the tax authority before implementing it; its scope is to seek clarification on the interpretation of a rule objectively uncertain, related to state taxes, to be applied to concrete and personal cases.

The procedure can also be started by non-resident taxpayers, by WHT agents, and by persons in charge of fulfilling the tax payments.

The tax authorities must admit to the procedure within 30 days from the receipt of the instance; however, tacit acceptance from the tax authorities applies. The procedure that involves a contradictory procedure between the tax authorities and the taxpayer ends within 180 days from the receipt of the instance.

The content of the instance could be on the transfer pricing, the application of rules to attribute profits and losses to a PE, the tax treatment of dividend, interest, royalties, or other incomes, etc.

In particular, a ‘ruling on new investments’ has been introduced for those enterprises that intend to make new investments in Italy for a value above EUR 30 million, disclosing tax treatment of the investment and all related extraordinary transactions. The tax authorities will be bound not to issue any deed inconsistent with the answers given.

The tax authorities’ answer must be notified within 120 days. The deadline can be extended for additional 90 days if the tax authorities asks for new additional information.

Tax audit process

For larger companies having a yearly turnover exceeding specific thresholds (that are in the process of being progressively decreased to EUR 100 million), administrative checks on tax returns may be carried out within the year following that in which the tax return has been filed.

Tax audit can take place at the taxpayer's premises as well as in the tax authorities' offices. The statute of limitations provides that tax auditors can stay at a taxpayer's premises for not longer than 60 working days (30 days ordinary term plus 30 days of extension). At the end of this period, the audit must come to an end. Tax auditors must take note of the observations and requests made by the taxpayer. At the end of their audit, the tax auditors must draw up a tax audit report whereby the outcome of the audit activity must be detailed and the findings (if any) must be illustrated and motivated. A copy of the report has to be filed with the tax office.

The tax office receiving the tax audit report examines the findings reported by the tax auditors and starts the assessment procedure, which may lead to the issuing of a tax assessment notice bearing the request for payment of higher taxes and/or penalties.

Tax controversy and dispute resolutions

Should the taxpayer accept all of the challenges raised by the tax authorities, it may take advantage of the application of reduced penalties. The reduced penalties may range from 1/6 to 1/3 of the minimum applicable penalties, depending on the status of the controversy.

In case the taxpayer decides not to accept the challenges by the tax authorities, a settlement procedure can be initiated. The favourable outcome of the settlement procedure brings forth (in addition to the agreed-upon reduction of challenged taxes) the reduction of penalties: ordinarily down to 1/3 of the minimum applicable penalties.

In case no settlement is either achieved or requested for, the taxpayer may start a tax dispute before the Court. The judicial proceedings are structured in three tiers:

- Provincial Tax Commission, in first instance.
- Regional Tax Commission, in second instance.
- Supreme Court of Cassation.

Statute of limitations

From the fiscal year in progress as at 31 December 2016, the Italian tax authorities are entitled to make an assessment in relation to corporate taxes (IRES and IRAP), VAT, and WHT returns up to:

- the end of the fifth calendar year following the year in which the tax return was filed (previously up to the end of the fourth calendar year), or
- the end of the seventh calendar year following the year in which the tax return would have been filed, for an omitted return (previously up to the end of the fifth calendar year).

Previous rules are applicable until FY 2015.

Topics of focus for tax authorities

Extraordinary transactions (such as mergers, de-mergers, etc.) continue to be a topic of focus for tax authorities due to the potential applicability of tax anti-abuse rules.

As a response to recent cases of carousel-frauds on VAT, cross-border transactions are being more heavily scrutinised.

Italy

Over the last few years, we experienced an increasing focus by the tax authorities on transfer pricing and PE related issues.

The beneficial ownership condition is very carefully scrutinised in case of payments where a nil or reduced WHT is applied based on EU Directive or applicable DTT, in particular when the ultimate owner of the group is non-EU.

Cooperative compliance programme

A new regime aimed at setting a cooperative compliance programme for Large Business Taxpayers has been introduced.

The regime falls within similar frameworks adopted by other foreign tax administrations, consistent with OECD recommendations.

The regime of cooperative performance represents for taxpayers the opportunity to start a new relationship with the tax authorities based on forms of communication and strengthened cooperation.

Taxpayers who have a turnover of EUR 10 billion are able to join the regime and required to adopt a Tax Control Framework.

The subjects involved in the regime will have benefits in terms of constant and continuous dialogue with the tax authority, reduction of penalties, and elimination of guarantees required for refund.

Other issues

Adoption of IFRS and taxation

Italian tax law provides for two basic principles and some specific rules for taxation of a company adopting International Accounting Standards (IAS)/IFRS in the statutory financial statements:

- Derivation principle (*'Principio della Derivazione'*): The taxable base of companies is determined starting from the net income arising from the profit and loss, increased or decreased by items directly booked to equity pursuant to the application of IAS/IFRS. To such income, the general tax adjustments set forth by the Corporate Income Tax Law apply. In this respect, as exception to the general tax criteria, the accrual principle, and the qualification and classification criteria stated by the IFRS are relevant for the calculation of the taxable base.
- Neutrality principle (*'Principio della Neutralità'*): Such principle aims to neutralise the effects deriving from the movement to IAS/IFRS (First Time Adoption or FTA). Conversely, such principle does not grant an equal treatment for companies adopting or not IAS/IFRS (in fact, specific rules are applicable only to IAS/IFRS adopters, e.g. taxation of dividend on held for trading securities, derivatives).

The following specific rules applicable to IAS adopters must be considered:

- Adjustments or recognitions of transactions made in equity and/or in the 'other comprehensive income (OCI)' are relevant for tax purposes, to the extent that such items are in compliance with general tax principles.
- For equity instruments, the legal classification is prevailing over the accounting one (debt vs. equity classification).
- Under certain conditions, unrealised profits and losses recognised in the profit and loss become taxable and deductible (e.g. fair value on securities other than shareholdings and on derivatives transactions).

- The tax treatment of transactions between IFRS adopters and non-IFRS adopters is based on the accounting principle adopted by each company (e.g. financial leasing transaction).
- Depreciation and amortisation are permitted within the rates provided by the tax rules and limited to the amount booked in the profit and loss statement. In this respect, the abolition of the imperative systematic depreciation of the goodwill and its substitution by the goodwill's review for impairment does not affect the tax deduction of the goodwill amortisation that should be made solely for tax purposes.
- Negative components booked in the income statement as expenses for personnel settled with equity instrument under IFRS 2 are, in principle, deductible for IRES purposes (stock options).
- In order to identify financial instruments with hedging purposes, IFRS adopters are allowed to give relevance to the classification made in the financial statement. In particular, financial instruments designated in the financial statement as hedging instruments in compliance with IFRS principles are considered also as hedging instruments for fiscal purposes (hedging accounting approach including the fair value option [FVO]).
- Given the possibility, under the IAS 39 accounting principle, to reclassify financial securities in a different portfolio from that of the initial booking, the value at which the security is booked in the new portfolio is tax relevant.

United States (US) Foreign Account Tax Compliance Act (FATCA)

As of 10 January 2014, Italy and the United States signed a bilateral intergovernmental agreement (IGA) in order to implement FATCA.

FATCA obligates Italian financial institutions to identify (starting from 1 July 2014) and classify account holders in order to report certain financial information (e.g. name, address, TIN, account balance) related to US persons to the Italian Revenue Agency (i.e. *Agenzia delle Entrate*). The Italian tax authority will then exchange such information with the US Internal Revenue Service (IRS) by the end of September of each year (starting from 2015).

The IGA requires the approval of the Italian Parliament in order to be incorporated into domestic law and thus be effective. The Italian IGA ratification law (Law no. 95/2015) was enacted in July 2015, and, in August 2015, the Italian Ministry of Economy and Finance approved a specific Regulation.

The new Law includes the first provisions regarding the due diligence requirements for the Common Reporting Standard (CRS) purposes. Starting from 1 January 2016, Italian financial institutions shall be required to identify and report non-resident (not only US) account holders, as provided by the CRS developed by the OECD.

Moreover, as of 9 December 2014, the European Council officially adopted the revised Directive on Administrative Co-operation and Mutual Assistance (DAC2), which has been amended in order to take into account the CRS provisions with respect to European member states. Italy implemented the above-mentioned Directive on 31 December 2015.

Significant developments

The FY16 Financial Law has enforced new tax rules related to the procedure for value-added tax (VAT) credits reimbursement and the procedure for VAT exemption certificates for the oil and gas industry and the mining industry.

Another significant change provided by the FY16 Financial Law is the extension of the investment code's provisions to shopping centres.

From a compliance perspective, the single tax return introduced since 2015 is effectively in force and used for tax returns and payments.

Taxes on corporate income

Taxable corporate income in Côte d'Ivoire is based on worldwide income for resident companies (*for exceptions, see Foreign income in the Income determination section*).

Tax on industrial and commercial profits in Côte d'Ivoire is levied at 25%, subject to a minimum tax. The rate is 30% for companies in the telecommunication, information technology, and communication sectors.

Non-resident entities are subject to withholding tax (WHT) at 20%, subject to existing double taxation agreements (DTAs), on their Côte d'Ivoire source income when they do not have a permanent establishment (PE). Non-residents with a PE are taxed in the same way as a resident.

Minimum tax

The minimum tax is based on total turnover and is calculated at the rate of 0.5% (0.15% for banking activities, 0.1% for oil companies), with a minimum tax of 3 million *Communauté financière d'Afrique* (Financial Community of Africa or CFA) francs (XOF) and a maximum tax of XOF 35 million.

Local income taxes

The income tax is levied at the national level. There is no local income tax.

Corporate residence

In Côte d'Ivoire, companies are considered resident in tax jurisdictions where they have a registered fixed establishment (e.g. subsidiaries, branches, representative offices).

Permanent establishment (PE)

A non-resident is considered as having a PE in Côte d'Ivoire when its activities involve a comprehensive commercial cycle in Côte d'Ivoire or when it operates through a dependent agent in Côte d'Ivoire.

According to DTAs, a non-resident is considered as having a PE in Côte d'Ivoire when it has a registered establishment, including a subsidiary, a branch, a representative office, a mine or an oil well, a building site, a manufacture plant, or a trading establishment. Sometimes, a time threshold of six months is considered.

Other taxes

Value-added tax (VAT)

VAT is a non-cumulative tax levied on the sale of goods and services at the rate of 18%. Subject to certain restrictions, VAT is recoverable.

The rate is reduced to 9% for milk, pasta products that contain 100% durum wheat semolina, and equipment designed for the production of solar energy.

Customs duties

Customs duties rates range from 0% to 35%, depending on the classification of the imported goods according to the customs tariff.

Upon import, goods are also subject to the statistical duty (1%), to community levy (0.5%), and to VAT (18%).

Special taxes, depending on the nature of the imported goods, may apply, such as excise duties.

Statistical duty

The statistical duty is levied together with the customs duties during the customs clearance procedures of imported goods.

The rate of the statistical duty is 1% on the cost, insurance, and freight (CIF) value of the imported goods.

Community levy

The community levy is due together with the customs duties during the customs clearance procedures of imported goods.

The rate of the Economic Community of West African States (ECOWAS) community levy is 0.5% on the CIF value of the imported goods.

Products imported from outside the West African Economic and Monetary Union (WAEMU) remain subject to the community levy at 1% for five years from January 2015.

The community levy does not apply to goods imported from member countries of the WAEMU, which includes Côte d'Ivoire, Senegal, Burkina Faso, Mali, Benin, Togo, Niger, and Bissau Guinea.

Excise duties

Excise duties apply on cigarette imports, alcoholic or non-alcoholic beverages, and oil products.

Real estate tax

A real estate tax is imposed at the following rates:

Ivory Coast (Côte d'Ivoire)

- 1.5% for undeveloped lands.
- 4% on land revenue.
- 11% on developed land or 15% when the built property is used by the company itself. The rate is reduced to 4% for unoccupied buildings.

Property renters paying the rents directly to the owners are required to withhold 15% of rents, payable on the 15th day of the month following the payment of the rent, to the tax authorities. This is an advance payment on the annual real estate tax due by the owner of the estate property.

Transfer taxes

In the case of the transfer of property through a direct sale, taxes are assessed at the following rates:

- 10% for lease transfers.
- 4% for the sale of real estate.
- 10% for the sale of businesses.

For mortgages, the rate is 5% for the financial lessor at the acquisition of the good and 1% for acquisition of the immovable property by the lessee from the exercise of the option.

Stamp duty

A direct tax is paid for any document subject to a registration procedure, for an acknowledgement of a cash payment, and for bills of exchange.

Special tax for equipment

A special tax is paid by all taxpayers for the purpose of the equipment of the government. The tax is calculated on 0.1% of total turnover and is paid monthly.

Business franchise tax

The business franchise tax includes a turnover tax and a proportional tax. The turnover tax is calculated on turnover at the rate of 0.5%, with a minimum tax of XOF 300,000 and a maximum tax of XOF 3 million. The proportional tax rate is 18.5% and is based on the rental value of the professional office location (based on general office rents).

Tax on banking operations

A cumulative tax of 10% is levied on bank services rendered. Tax on banking operations charged by banks to companies is fully deductible from output VAT.

Registration taxes

Registration of capital contributions is taxed, whether the capital contribution or increase in capital is made in cash or in kind. The rate is 0.3% for contributions exceeding XOF 10 million to XOF 5 billion and 0.1% for contributions over XOF 5 billion, with a minimum tax of XOF 18,000. Increases in capital by incorporation of reserves are taxed at 6%.

In the event of a capital increase through a merger, the increase in the share capital of the acquiring company is taxed at half of the rates above.

According to the new Article 764 bis of the General Tax Code enforced by the 2016 Tax Law (in force since 4 January 2016), the transfer of shares held in a company located in Côte d'Ivoire is liable to a 1% registration duty on the sale price or market value of the shares when the transfer does not trigger the disappearance of the company or the creation a new legal entity.

Tax on insurance premiums

Insurance premiums are subject to tax as follows:

Policy type	Tax rate (%)
Marine policies	7.0
Life policies	Exempted when contract's duration is more than three years
Fire policies	25.0
Health policies	8.0
Export credit insurance	0.1
Other (e.g. personal liability, transportation)	14.5

Premiums paid under commercial shipping insurance policies for maritime risks are exempt. The tax may be paid by the insurance company, its agent, or the subscriber in cases where the subscriber had to pay the premium to a foreign insurance company.

Tax on telecommunication companies

A specific tax of 5% is applicable on the turnover of mobile telecommunication, information technology, and communication companies.

Companies renting passive infrastructures and telecom towers to telecom companies are not within the scope of this tax.

Companies operating in the telecommunication, information technology, and communication sector must also invest 20% of the amount of dividends transferred abroad in bonds of the public Treasury or any borrowing instrument issued by the government of Côte d'Ivoire.

Tax on telecommunication services

A special tax of 3% is applicable on telecommunication services provided to the public. The tax is invoiced and collected by companies operating mobile or land telecommunication and internet services in Côte d'Ivoire.

Payroll taxes

Taxes are levied at the rates of 2.8% for local employees and 12% for expatriate employees on the total taxable remuneration, including salaries, benefits, and benefits in kind.

Social security contributions

Employers must contribute to the social security system (CNPS) at the following rates:

Contribution	Contribution rate (%)	Monthly ceiling (XOF)
Family allowance	5.75	70,000
Work injury	2.0 to 5.0	70,000
Retirement pension	7.7	1,647,315

Note that even though the retirement contribution ceiling (XOF 1,647,315) is calculated on the basis of 45 times the minimum wage, this amount has not been updated since the minimum wage increased from XOF 36,607 to XOF 60,000.

Branch income

The tax rate for branch income is the same as that for corporate income. After-tax branch earnings are subject to a 15% tax (*Impôt sur le revenu des valeurs mobilières* or IRVM) calculated on 50% of the taxable profit. This is analogous to the WHT on dividends.

Ivory Coast (Côte d'Ivoire)

Income determination

Inventory valuation

Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) methods are permitted. Book and tax conformity is required.

Capital gains

Capital gains are normally taxed at full corporate rates. However, the tax on capital gains, exclusive of recaptured depreciation, can be deferred if the gain is reinvested within three years.

Dividend income

Dividends are brought into taxable income at 50% of the net amount earned by the company (after 15% WHT).

The exemption is increased to 95% for dividends received from a subsidiary if a parent company domiciled in Côte d'Ivoire owns 10% of the subsidiary.

Stock dividends

Stock dividends are unusual, but in the event they are declared, they are not taxable to the recipient.

Interest income

Interest from loans is brought into taxable income at 50% of the net amount earned by the company (after 18% WHT).

Foreign income

Resident corporations are taxed on their worldwide income, except for profits derived from business conducted through a PE outside Côte d'Ivoire. Since income derived from business conducted outside Côte d'Ivoire is not taxable, no tax credit is allowed. Interest and dividends from foreign sources are entitled to certain deductions to alleviate instances of double taxation. Subject to provisions of tax treaties, no deductions or tax credits are allowed for revenue from royalties and services.

Deductions

Depreciation and depletion

Depreciation is generally computed on a straight-line basis over the useful life of the asset (e.g. 20 years for buildings, 3 years for automobiles). Accelerated depreciation is sometimes permitted for machinery. The following depreciation rates are generally accepted for tax purposes:

Assets	Depreciation rate (%)
Buildings	5
Machinery, equipment (rate depending on equipment)	8/10/20
Office furniture	10
Office equipment	20
Vehicles	33.3
Computing equipment	20 to 50

A time coefficient is applied to the rate of depreciation to obtain the declining balance. Depreciation rates may be amended, but only after agreement with the tax authorities.

New plants and equipment may be depreciated at twice the normal rate in the first year of use, provided they are depreciated over at least six years. Under certain circumstances, buildings used for staff housing may be depreciated at 40% of cost in

the first year. Annual depreciation must be booked to preserve tax deductibility. The whole or any part of the annual charge can then be deferred in annual accounts for fiscal years showing a tax loss. Recaptured depreciation is taxed at full rates. Tax and book conformity is obligatory.

Depletion allowances, as such, do not exist, but tax incentives are available for exploration to replace depleted natural reserves.

Goodwill

Goodwill (capital gain) deriving from the transfer of assets is included in taxable profit. The gain may be exempt from the income tax basis if the taxpayer commits to reinvest the purchase price of the transferred assets plus the goodwill in the three following years.

If the reinvestment is not completed in the three years, the gain will be subject to income taxation.

Start-up expenses

Start-up expenses (e.g. legal fees, registration duties on share capital subscription, the costs of any registration procedure, advertisement expenses) have to be amortised over a period from two to five years.

Interest expenses

Interest paid to shareholders may be deducted. The maximum interest rate allowed is related to the *Banque Central des Etats de l'Afrique de l'Ouest* (BCEAO) rate plus three points. The reimbursement of the loan must take place in the five years following the loan.

Bad debt

Provisions for bad debts are deductible, provided that a minimum set of collection procedures have been engaged.

Bad debts are deductible for income tax purposes unless the debt results from abnormal business decisions.

Charitable contributions

Charitable contributions to recognised sport and health associations are deductible.

Charitable contributions to individuals or non-recognised beneficiaries are not tax deductible.

Fines and penalties

Fines borne by corporations are not tax deductible.

Taxes

Regular taxes paid by corporations are deductible for income tax purposes.

Third party taxes (such as WHT on non-resident service providers) borne by corporations are not tax deductible.

Other significant items

In respect to legal reserves, 10% of net profit must be transferred to a reserve for legal fees until the reserve equals 5% of the paid-up share capital.

To be tax deductible, provisions must relate to existing liability or loss. General reserves are not deductible.

Ivory Coast (Côte d'Ivoire)

Net operating losses

Losses may be carried forward for five years.

Losses derived from depreciation can be carried forward indefinitely.

Losses cannot be carried back.

Payments to foreign affiliates

Reasonable royalties, interest, and management and service fees paid to foreign parent companies are tax deductible. However, the deductions should not exceed 5% of the turnover and 20% of the overhead. Otherwise, the portion exceeding the ceiling is not tax deductible. The onus is on the taxpayer to prove that expenses are justified and reflect real transactions.

Group taxation

Group taxation is not permitted in Côte d'Ivoire.

Transfer pricing

Profits directly or indirectly transferred to related non-resident companies are disallowed from the income tax basis.

The tax administration may inquire on transfer pricing when local subsidiaries having most of their transactions with non-resident group companies record losses.

Transfer price documentation is not generally requested.

Thin capitalisation

The deduction of the interest of loans granted on top of the share capital by related parties is subject to restrictions (*see Interest expenses in the Deductions section*).

When, because of losses, the equity of the company is less than 50% of the share capital, the company must be recapitalised in the two following years, unless the company is dissolved.

Controlled foreign companies (CFCs)

There are no CFC rules in Côte d'Ivoire.

Tax credits and incentives

Foreign tax credit

Since income derived from business conducted outside Côte d'Ivoire is not taxable, no tax credit is allowed.

Investment zones

The aim of the Investment Code is to:

- help create companies in other regions than the economic capital city (Abidjan)
- help the employment of nationals
- help companies doing business in a sustainable manner
- develop the regions of the country, and
- favour the existence of local small and medium-sized enterprises (SME).

The Investment Code regimes involve the creation of three zones (A, B, and C), depending on the location of the company:

Ivory Coast (Côte d'Ivoire)

- Zone A covers Abidjan District.
- Zone B covers any town in Côte d'Ivoire with more than 60,000 inhabitants.
- Zone C covers any town in Côte d'Ivoire with less than 60,000 inhabitants.

The duration for the granted tax benefit is:

- 5 years for Zone A.
- 8 years for Zone B.
- 15 years for Zone C.

The Investment Code includes two specific tax incentive regimes: the Investment Declaration Regime and the Investment Approval Regime. Both regimes apply to all economic activities, excluding finance and banking, non-industrial buildings builders, and commerce activities. However, investment related to the creation or the development of important shopping centres could qualify for the exemptions if certain conditions are met.

The Investment Declaration Regime has no minimum investment threshold, but has special requirements related to the activities of the company.

For the Investment Approval Regime, the minimum investment cost is XOF 200 million (VAT and working capital exclusive).

The benefit from the Investment Code is granted by the Centre for the Promotion of Investments (named CEPICI), after an application is filed by the requestor.

During the investment period, the beneficiary enjoys the following:

- Reduction of 50% of the customs duties on the equipment and materials included on the filed list together with the first spare parts, when the investment is less than XOF 1 billion.
- Reduction of 40% of the customs duties on the equipment and materials included on the filed list together with the first spare parts, when the investment is more than XOF 1 billion.
- Exemption from VAT on purchase of equipment, materials, and first spare parts.

After the completion of the investment, the beneficiary enjoys the following exemptions during a period that depends on the zone the company is located in:

- Exemption from corporate income tax (CIT).
- Exemption from business franchise tax.
- Exemption from real estate tax (only for Zone C in the Investment Declaration Regime).
- Exemption from registration taxes on share increases (only for Zone C in the Investment Declaration Regime).
- Reduction of the payroll taxes due on employee's wages. The reduction is 80% for Zone B and 90% for Zone C in the Investment Declaration Regime and 50% for Zone A, 80% for Zone B, and 90% for Zone C in the Investment Approval Regime.

These incentives may not be combined with sector-specific investment programs, such as those for mining and hydrocarbons.

Capital investment incentives

With prior approval of the tax authorities and varying with geographical location, 35% to 40% of the total investment in fixed assets related to commercial, industrial, or agricultural activity may be deducted from taxable income. The deduction is limited to 50% of taxable profits. The balance of deduction of the first year may be carried forward over the three following years.

Ivory Coast (Côte d'Ivoire)

Export incentives

No VAT is levied on export sales.

Export incentives for the mining industry

During the exploration phase, investments may be exempt from payroll tax; VAT on goods and services; additional tax (on the sale of goods) on imports and purchases; all import taxes and duties, including VAT on materials, machines, and equipment used in research activities; registration duties applicable to in-kind or cash share-capital contributions; real estate tax; CIT; and minimum tax.

In the exploration phase, mining subcontractors can benefit from the same import VAT and customs exemptions granted to mining title holders.

During the production phase, mining activities may have a five-year exemption from CIT and relief from all import duties, including VAT on recovered investments required for exploitation, special equipment tax, business franchise tax, etc. In addition, they may be granted temporary admission of machines and equipment that facilitate research and exploitation. Mining subcontractors are exempt from customs duties, including VAT on importing of liquid or gas fuels, lubricants, and chemical or organic products intended for the treatment of minerals, for the whole duration of the mine.

A tax on profit is levied as soon as investment funds are recovered. Mining enterprises may not combine these incentives with those of the Investment Code.

Export incentives for petroleum service contractors

A special and optional tax treatment applies to petroleum service contractors that meet established criteria. CIT, distribution (i.e. dividend) tax, payroll tax, income tax on salaries, and the tax on insurance premiums are calculated on the turnover of the contractor. The total taxes represent 5.786% of turnover. Standard rates apply for business franchise tax and social security contributions for local personnel. The exemption from customs duties and VAT for oil companies is extended to petroleum service contractors.

Withholding taxes

WHTs are levied as follows:

- *Impôt sur le revenu des valeurs mobilières (IRVM)*: 15% on dividends and directors' fees.
- *Impôt sur le revenu des créances (IRC)*: 18% on interest payments, reduced to 13.5% (individuals) and 16.5% (businesses) on bank deposit interest. The revenue realised by individuals on Treasury Bonds is subject to 10% tax on terms of up to 12 months and to 5% tax when ranging from three years to five years. Foreign banks are subject to 18% tax on loan interest or 9% on equipment loans with minimum three-year terms.
- *Impôt sur les bénéfices non commerciaux (BNC)*: 25% of 80% of revenues on royalties, licence fees, and management and service fees paid by Ivorian companies to foreign companies (effective rate: 20% of net amount paid). Treaties with Belgium, Canada, France, Germany, Italy, Norway, Switzerland, and the United Kingdom provide a maximum BNC rate of 10% on royalties and management fees. The tax treaty between the member states of the West African Economic and Monetary Union (UEMOA) provides a maximum BNC rate of 15% on royalties.
- Interest on certificates of deposit (*bons de caisse*): 25%.

WHT on public contracts for services

Any payment made by government bodies or public institutions to non-resident persons or companies for a contract for goods or services is subject to a 20% WHT, subject to DTAs (see *Impôt sur les bénéfices non commerciaux* above).

Resident persons or companies are not subject to this WHT, except for individual service (or goods) providers registered under the standard tax regime for small companies (see below).

WHT on small-size businesses

A 7.5% WHT is applicable on the remunerations paid to individual service providers registered under the standard tax regime for small companies.

A 10% WHT is applicable on payments made by government bodies or public institutions for a contract for services (or goods).

WHT on writers' revenue

A 7.5% WHT applies to occasional revenue paid to individuals or companies as royalties on books, scientific studies, and artistic productions.

I

Tax administration

Taxable period

Companies are required by law to have a 31 December fiscal year-end.

Tax returns

Financial statements are filed annually, according to local generally accepted accounting principles (GAAP). Taxpayers under the real taxation scheme (the normal real taxation scheme is for companies with a turnover above XOF 150 million, the simplified real taxation scheme is for companies with a turnover between XOF 50 million and XOF 150 million) are required to produce electronic and paper financial statements. The deadline for filing is 30 April for medium and large-size companies and 30 May for other entities.

Companies under the real taxation scheme are allowed to submit tax returns electronically and perform tax payments via wire transfer.

Payment of tax

Payment of CIT is made in three instalments in April, June, and September following the end of the fiscal year, depending on the sector of activity and taxpayer's office, as follows:

- Medium and large-size companies tax office:
 - 10 April, 10 June, and 10 September for industrial, oil and gas, and mining companies.
 - 15 April, 15 June, and 15 September for commercial companies.
 - 20 April, 20 June, and 20 September for service providers.
- Companies with other tax offices:
 - 15 April, 15 June, and 15 September.

Tax audit process

Many types of tax audits are available to the tax administration, which may request any accounting-related document for the purpose of tax audit.

The most common is the general tax audit of the taxpayer's situation, which covers the statute of limitation period. It is carried out with a notice at least five days before the beginning of the audit. The audit is carried out on the premises of the taxpayer for a

Ivory Coast (Côte d'Ivoire)

maximum of six months (with a possibility to extend for a period of three additional months), and a primary tax assessment is issued.

The taxpayer then has 30 days to agree or challenge the assessment, and the definitive assessment is issued within a maximum of two months following the primary tax assessment.

The tax administration is entitled to release tax assessments electronically.

Further challenge of the definitive assessment is possible before the head of the tax administration and the court.

Statute of limitations

The statute of limitations covers the current year and the three prior years.

Topics of focus for tax authorities

The tax administration generally focuses on compliance with the CIT filing deadline and on the payment of the instalments.

For consistency of the tax returns, the tax administration focuses on the filing of the additional records (Annual Financial Statements, Etat 301: Annual Salary Statement, Etat 302: Annual Fees Statement), records of the provisions, tax losses, and amortisations carried forward.

During tax audits, the focus is on transactions with non-resident related parties.

Significant developments

Special Economic Zones (SEZ)

The Special Economic Zones (SEZ) Act was passed in January 2016 and replaces the Jamaica Export Free Zones Act while establishing a regime to support the designation, promotion, development, operation, and management of SEZ. Under the Act, the Minister with responsibility for finance may designate certain geographical areas as SEZ.

A person may be declared to be a 'developer' or 'occupant' under the SEZ Act. A 'developer' refers to a company that is incorporated under the Companies Act and is established by a sponsor for the purposes of entering into a master-concession or a licence-agreement. An 'occupant' refers to a person, other than a developer, or a zone user who conducts business in the zone under a sub-concession made with the developer.

Tax incentives that are available to a developer or occupant under the SEZ Act include relief from asset tax, a reduced rate of income tax, property tax, transfer tax, general consumption tax (GCT), and customs duty. However, these incentives are not available to developers or occupants who are eligible for relief under a number of other enactments, including the Bauxite and Alumina Industries (Encouragement) Act and the Income Tax Relief (Large-Scale Projects & Pioneer Industries) Act.

A number of industries/business activities are specifically prohibited in the SEZ, including (but not limited to) mining or quarrying for natural resources, services pertaining to tourism, telecommunications, public utilities, financial services, construction, real estate, and property management.

Introduction of a new transfer pricing regime

Jamaica recently implemented a new comprehensive transfer pricing regime for income tax purposes, through the passage of the Income Tax (Amendment) (No. 2) Act 2015 and the accompanying Income Tax (Transfer Pricing Documentation) Regulations 2015. The new rules became effective from the year of assessment 2015 and are aimed at protecting the country's tax base by ensuring that transactions between related parties (including transactions with non-residents) are conducted using the internationally accepted arm's-length principles.

The legislation requires all taxpayers who engage in transactions with related persons to:

- Disclose information pertaining to the identity of connected persons, particulars, and pricing arrangements of such transactions, primarily through the annual income tax return and to retain this documentation in support of the income tax return. In particular, business entities with gross annual revenues of 500 million Jamaican dollars (JMD) or more will be required to comply with extensive Organisation for Economic Co-operation and Development (OECD) standard transfer pricing documentation requirements.

Jamaica

- Compute income tax liability using the deemed arm's-length consideration determined in respect of all such connected party transactions instead of the actual consideration.

'Arm's-length consideration' refers to the consideration that would be derived from a comparable independent transaction and determined in accordance with one of several pricing methodologies that are permitted by the legislation.

The new rules also empower the Commissioner General, Tax Administration Jamaica (TAJ) to treat unconnected persons as being connected under certain circumstances. This includes transactions with non-residents who are located in no-tax or low-tax jurisdictions unless the taxpayer can provide evidence (to the satisfaction of TAJ) that the non-resident is not connected. For this purpose, a low-tax jurisdiction is deemed to be one that imposes income tax at a rate that is less than 50% of Jamaica's income tax rate (i.e. 12.5%, being 50% of 25%).

Taxes on corporate income

A resident corporation is taxable on its worldwide income. Non-resident companies are subject to tax on Jamaican-sourced income. Tax is imposed on certain sources of income, such as interest, dividends, royalties, and fees, by way of withholding at a rate of 33 $\frac{1}{3}$ % for non-resident corporations. Lower rates of withholding are possible, provided that the recipient is resident in a country that has concluded a double taxation treaty (DTT) with Jamaica.

The current rates of corporate income tax (CIT) are as follows:

Classification	Definition	CIT rate (%)
Regulated company	A company that is regulated by the Bank of Jamaica (other than building societies), the Financial Services Commission (other than life assurance companies), the Office of Utilities Regulation, or the ministry with responsibility for finance.	33 $\frac{1}{3}$
Building society	An entity similar to a savings and loan association.	30
Life assurance companies		25
Unregulated company	A company that is not a regulated company.	25

The income of certain organisations is specifically exempt from income tax. These include pension and superannuation funds and charitable organisations that are approved by the Commissioner General, TAJ.

Local income taxes

Income tax is imposed at the national level. Income tax is not separately imposed at the local level.

Corporate residence

A corporation, wherever incorporated, is resident in Jamaica if the central management and control of its business is exercised in Jamaica. Normally, this is the case if meetings of directors and shareholders are held in Jamaica and major policy decisions of the corporation are made in Jamaica.

Permanent establishment (PE)

The definition of a PE in domestic law is similar in a number of respects to those contained in DTTs and is defined as a fixed place of business through which the business of a business organisation is carried on. This includes:

- a place of management
- a branch
- an office
- a factory
- a workshop, and
- a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources.

Other taxes**General consumption tax (GCT)**

GCT is a value-added tax (VAT), and the standard rate is currently 16.5%. Higher or lower rates of GCT are applicable to certain goods and services; for example, the provision of telephone services (including phone cards) and handsets is subject to GCT at the rate of 25%, while the tax is imposed on hotels and other businesses in the tourism sector at an effective rate of approximately 10%. However, operators within the tourism industry who were granted approval under the Hotel (Incentives) Act or the Resort Cottages (Incentives) Act and who have not elected to forego the remaining benefits to which they are entitled under these repealed enactments (in return for the new incentive regime introduced) are liable to GCT at the standard rate.

GCT is also charged on imported services. Where services are imported from a supplier who is not resident in Jamaica, the recipient of those services is deemed to be liable to account for GCT on the services. The recipient may be able to claim a credit for GCT incurred on imported services in certain circumstances; in particular, there are specific conditions where such services are received from overseas connected parties.

An additional 5% advance GCT is levied on the commercial importation of goods subject to GCT (with the exception of certain categories of imports, such as goods that qualify for exemption from customs duty under the productive inputs relief [PIR] regime).

The list of items exempt from GCT includes a range of basic food items, prescription drugs, medical supplies, construction, transportation, and financial services. Zero-rated goods and services include agricultural and fisheries inputs, exported goods and services, and purchases by diplomatic and international organisations and foreign governments.

A GCT group accounting mechanism has been implemented, whereby two or more affiliated entities approved by the Commissioner General, TAJ may be treated as a single taxpayer for the purposes of the GCT Act. Approval will be granted only where the Commissioner General, TAJ is satisfied the treatment of two or more affiliated entities as a single taxpayer “is not likely to prejudice the collection of tax, result in a significant loss of revenue or facilitate the obtaining of a tax advantage”. Regulations supporting the implementation of GCT group accounting have not yet been established.

Customs duties and related imposts

Customs duty is levied on the customs value of goods imported, which is determined in accordance with the World Trade Organization (WTO) rules on customs valuation. The rates are specified by a prescribed Customs Tariff, having regard (where appropriate) to the Common External Tariff agreed between Caribbean Community (CARICOM) member states.

Jamaica

In addition to normal customs duties, a customs administration fee (CAF) and an environmental levy are imposed on the value of imports. The CAF imposes a range of fees based on the nature of the service provided, while the environmental levy is imposed at the rate of 0.5%. Since 2015, the levy is also imposed on goods imported from other countries in the Caribbean Community and domestic sales of manufactured goods by local manufacturers, with an input tax credit available for any levy paid in respect of imported productive inputs. Other import levies apply in certain instances including additional stamp duty (ASD) and a standards compliance fee.

Special consumption tax (SCT)

SCT is imposed at various rates on the importation or manufacture of 'prescribed goods' (certain petroleum products, ethanol, alcoholic drinks, tobacco, and motor vehicles).

Property tax

All land in Jamaica is valued for property tax purposes on the 'site value' or 'unimproved value'. The property tax structure is applicable as follows:

Unimproved property values (JMD)	Rate of tax
Not exceeding 100,000	JMD 1,000
100,000 to 1 million:	
For the first 100,000	JMD 1,000
For every dollar thereafter	1.5%
Exceeding 1 million:	
For the first 100,000	JMD 1,000
For the next 900,000	1.5%
For every dollar thereafter	2.0%

Transfer tax

A transfer tax of 5% is applicable on the consideration payable (or market value in certain instances) on the transfer of land, buildings, securities, and shares (provided that a refund is available where the transfer tax charged exceeds 37.5% of the capital gain made). Transactions on the Jamaica Stock Exchange (JSE) are exempt from transfer tax, as are the transfer of registered corporate bonds, whether or not the company is listed on the JSE.

Stamp duty

There is stamp duty of 1% payable on the transfer/disposal of shares and 4% for real property sold/transferred. Transfers of shares on the JSE are exempt from stamp duty, as are the transfer of registered corporate bonds, whether or not the company is listed on the JSE. Stamp duty is also imposed at a nominal rate of JMD 100 on instruments effecting a refinancing of an existing mortgage. Where, however, the mortgage is increased, the normal *ad valorem* stamp duty rates shall apply to the amount by which the mortgage is increased.

Minimum business tax (MBT)

An MBT of JMD 60,000 *per annum* is levied on all corporate bodies incorporated under the Companies Act, the Building Societies Act, the Friendly Societies Act, or the Industrial & Provident Societies Act, as well as on individuals carrying on a trade, profession, or business whose chargeable income (less emoluments and an amount equivalent to the annual tax-free threshold) exceeds JMD 3 million *per annum*.

The MBT is payable in two tranches: JMD 30,000 on 15 June and 15 September of the year of assessment to which it relates. The MBT is creditable against the taxpayer's income tax liability for the year of assessment.

In the case of an individual taxpayer, any MBT paid in excess of income tax liability for the year of assessment may be refunded or carried forward. Companies, however, are not entitled to a refund or carryforward of excess MBT.

Asset tax

An *ad valorem* asset tax at the rate of 0.25% (previously 0.14%) is imposed on the 'taxable value' of the assets of deposit-taking institutions regulated by the Bank of Jamaica, as well as securities dealers and property and casualty insurance companies regulated by the Financial Services Commission. Life assurance companies are subject to asset tax at the rate of 1%. The taxable value of assets is broadly determined as the value of assets on the balance sheet with adjustments for certain items specific to each type of institution.

For other entities, a fee ranging from JMD 5,000 to JMD 200,000 (previously JMD 5,000 to JMD 100,000) is imposed and is payable on or before 15 March annually, depending on the aggregate value of assets. The minimum fee is payable where the aggregate value of the assets is less than JMD 50,000, and the maximum fee is payable where the aggregate value of the assets is greater than or equal to JMD 50 million.

Contractors levy

Payments to contractors (including sub-contractors) in respect of construction, haulage, and tillage operations are liable to a withholding of a contractors levy of 2% of the gross amount paid. This must be remitted to TAJ within 14 days of the end of the month in which the payment is made. The levy paid is allowable as a credit against the income tax liability of the contractor in the year of assessment in which the levy is deducted. To the extent that there is any excess, it is not refundable.

Guest accommodation room tax (GART)

GART is levied at a specific rate on hotels and other tourist accommodation facilities based on room occupancy. GART is tiered depending on the number of rooms at the hotel or other tourism accommodation facility.

Telephone call tax

Tax is imposed on telephone calls, including inbound calls terminating on fixed or mobile networks. The following rates of tax are imposed:

- JMD 0.05 per minute on calls originating and terminating on the local fixed network.
- JMD 0.40 per minute on all other calls (whether domestic or international) originating in Jamaica.
- 0.075 United States dollars (USD) per minute on international calls that terminate in Jamaica on a mobile network.

The telephone tax is included in the taxable base for the purpose of calculating GCT.

Payroll taxes

Payroll taxes are imposed at the national level on employees' emoluments, including (subject to certain conditions) expatriates who undertake work in Jamaica. The taxes comprise Pay-As-You-Earn (PAYE) Income Tax for employees only, Education Tax, and contributions to the National Housing Trust (NHT), the National Insurance Scheme (NIS), and the Human Employment and Resource Training (HEART).

Employers are obligated to deduct and remit payroll taxes by the 14th day of the month following the month of deduction. Employers and employees contribute at the following rates:

Jamaica

Payroll tax	Basis	Employee rate (%)	Employer rate (%)
PAYE Income Tax	Taxable emoluments (less the annual nil rate threshold)	25.00	N/A
Education Tax	Taxable emoluments	2.25	3.50
NHT contributions	Gross emoluments	2.00	3.00
NIS contributions	Gross annual emoluments up to a maximum of JMD 1.5 million	2.50	2.50
HEART contributions	Gross emoluments	N/A	3.00

Branch income

Branch income is taxed at the same rate as that of local corporations and on a similar basis. The transfer of profits to the head office is subject to a withholding tax (WHT) of 33⅓% or at a lower treaty rate, where applicable.

A branch operation, irrespective of the nature of its business activities, is subject to Jamaican tax on income derived from the island and elsewhere. In computing the income for tax purposes, expenses incurred, wholly and exclusively for the purpose of the branch's trade, are deductible, including a reasonable proportion of head office expenses.

Transactions between the branch, its head office, and affiliates should be at arm's-length values.

Income determination

Inventory valuation

Inventories are valued at the lower of cost or market value. The Commissioner General, TAJ has made no pronouncement, but last in first out (LIFO) is not generally permitted.

Any method of valuation that accords with standard accounting practice is acceptable for tax purposes, provided it is consistently applied at the beginning and end of the accounting period and it is not in contravention of the Income Tax Act.

Capital gains

There is no tax on capital gains. There is, however, a transfer tax on the market value of certain assets transferred and stamp duty payable on the transfer/disposal of shares or real property. *See the Other taxes section for more information.*

Dividend income

Ordinary dividends paid by Jamaican tax resident companies to Jamaican tax resident shareholders are liable to tax at the rate of 15%. The tax is to be deducted on payment by the distributing company and represents the final tax on such dividends. The Income Tax Act provides relief from taxation for dividends received by Jamaican tax resident corporate shareholders where they hold at least 25% of the voting rights of the distributing company (referred to as 'group relief').

Additionally, the dividend income on which tax is payable may not be offset by tax losses, and expenses incurred to earn the dividend are not deductible in arriving at chargeable income, with the exception of expenses incurred in respect of specified dividend income. Specified dividend income refers to the dividend income of companies that are subject to tax and are regulated by the Bank of Jamaica or the Financial Services Commission and whose dominant trade or business is comprised of making investments

in loans, securities, and other financial assets. However, this exception does not apply to dividends enjoying group relief.

Preference dividends that qualify as tax deductible expenses of the paying company (*see below*) continue to be liable to tax at a rate of 25% where the recipient is an individual and at the applicable CIT rate where paid to a company. Dividends paid to non-resident shareholders are subject to income tax thereon at the default rate of 33 $\frac{1}{3}$ % in the case of a company and 25% in the case of an individual (subject to any treaty protection or incentive relief available).

Subject to certain conditions being met, a company may claim an income tax deduction in respect of preference dividends paid during the year of assessment. However, to the extent that these preference dividends do not qualify for this income tax deduction, they will be treated on the same basis as ordinary dividends.

Stock dividends

Stocks issued by way of the capitalisation of retained earnings (referred to as ‘bonus issues’) do not create a taxable distribution in the hands of the shareholders.

Interest income

Interest income is included in chargeable income and is subject to tax when received. Where interest is paid by a prescribed person, tax is deducted at source at the rate of 25% (*see the Withholding taxes section for more information*). The interest payable on certain securities issued by the government of Jamaica has been designated as being exempt from tax.

Foreign income

Resident corporations are taxable in Jamaica on their worldwide gains or profits. This includes the income of a foreign branch of a Jamaican company, as well as dividends arising abroad.

Tax deferral is not permitted in Jamaica.

Deductions

Expenses are deductible to the extent that they were incurred wholly and exclusively to earn the income and are claimed in the year in which they were incurred.

Depreciation

Tax depreciation (referred to in Jamaica as ‘capital allowances’) is generally computed at specified rates over the anticipated normal working lives of assets on a straight-line basis. In the year of expenditure, initial allowances are available at rates ranging from 20% to 25% on certain buildings and plant/machinery. Capital allowances are also available for capital expenditure on a wide list of intellectual property (IP) rights as well as pure or applied science and research and development (R&D) costs.

The capital allowances regime was overhauled in 2014 and applied new rates of capital allowances to capital expenditure incurred on or after 1 January 2014. Capital expenditure incurred prior to 1 January 2014 continues to be written off for income tax purposes in accordance with the rates prescribed under the previous regime.

The rates of capital allowances that are applicable to capital expenditure incurred on or after 1 January 2014 are as follows:

Jamaica

Asset category	Initial allowance rate (%)	Annual allowance rate (%)
Buildings/leasehold:		
Industrial buildings	20	4 to 12.5
Other buildings	0	4 to 12.5
Plant and machinery:		
Machinery directly used in the production of primary products or in the manufacture of goods, or automated machinery used for packaging such primary products or manufactured goods	25	12.5
Automatic data processing equipment, calculators, cash registers, and other equipment falling within Tariff Headings 84.70 and 84.71, as well as parts/accessories thereof	25	20
Equipment falling with Tariff Headings 84.69 and 84.72, as well as parts/accessories thereof. Telephones and other equipment falling within Tariff Heading 85.17, as well as parts/accessories thereof	0	20
Other plant and machinery (excluding motor vehicles)	0	12.5
Motor vehicles:		
Private motor vehicles based on a cap of USD 35,000	0	12.5
Trade vehicles	0	20
R&D	0	20
IP rights:		
General	0	1 over the lower of 14 years and the period the rights may be used
Expenditure less than USD 10,000	0	20

Generally, capital gains on depreciable property are not taxed. However, a recharge limited to the extent of the capital allowances allowed (or balancing charge) is taxable. Tax depreciation may not conform to book depreciation.

Goodwill

The amortisation or write-off of goodwill is not an allowable deduction.

Start-up expenses

The costs of incorporation and other expenses incurred in connection with establishing a business are not deductible against income.

Interest expenses

A deduction is available for interest that is paid on capital employed in acquiring income. Additionally, where interest is paid to a non-resident, tax must be withheld and remitted to the tax authorities in order to secure a deduction.

Bad debts

A deduction is available in respect of specific debts that become bad during the year of assessment.

Charitable contributions

Approved donations (not exceeding 5% of taxable income) to certain qualified charities and educational institutions are deductible.

Foreign exchange gains/losses

Foreign exchange gains and losses arising from trading are included in or deducted from chargeable income when realised. Foreign exchange gains and losses arising on capital assets are not taxable or allowable for tax purposes; however, where they pertain to

fixed assets, on realisation, they may become part of the underlying acquisition cost and tax depreciation computed thereon.

Fines and penalties

Fines, penalties, and interest arising from tax arrears are not deductible.

Taxes

Taxes on income are not deductible. Additionally, GCT, contractors' levy, transfer tax and stamp duty incurred on capital assets, input tax credits for GCT purposes, MBT, as well as the asset tax, are generally disregarded for income tax purposes. Other taxes, such as property tax, payroll taxes, and other business taxes, are deductible, to the extent that they were incurred to earn the income.

Net operating losses

Any claim for deduction of tax losses incurred in a prior year will be capped at 50% of the taxpayer's chargeable income (before deduction of tax losses carried forward) of the year in which the claim is being made.

This cap will not apply:

- for the five years of assessment following the first year of operation of a new trade, profession, or business, or
- where the taxpayer's gross revenue from all sources for the relevant year of assessment is less than the amount referred to in section 27(1)(b)(i) of the GCT Act (JMD 3 million *per annum*).

There are provisions designed to disallow the deduction of tax losses where the company that has accumulated them is sold under certain circumstances.

Tax losses are not available for carryback.

Payments to foreign affiliates

Royalties, management fees, and interest charges paid to foreign affiliates are deductible to the extent that these payments are made at arm's-length rates. WHT should be paid in respect of such services, normally at 33 $\frac{1}{3}$ % where payment is to a company and 25% in the case of individuals, unless a lower rate is provided for under a DTT. Furthermore, interest paid to non-residents is not deductible until the WHT is remitted.

Group taxation

Group taxation is generally not permitted in Jamaica, with the exception of a mechanism to permit group filing of returns for GCT purposes.

Transfer pricing

Jamaica recently implemented a new comprehensive transfer pricing regime for income tax purposes, through the passage of the Income Tax (Amendment) (No. 2) Act 2015 and the accompanying Income Tax (Transfer Pricing Documentation) Regulations 2015. The new rules became effective from the year of assessment 2015 and are aimed at protecting the country's tax base by ensuring that transactions between related parties (including transactions with non-residents) are conducted using the internationally accepted arm's-length principles.

The legislation requires all taxpayers who engage in transactions with related persons to:

- Disclose information pertaining to the identity of connected persons, particulars, and pricing arrangements of such transactions, primarily through the annual income tax return and to retain this documentation in support of the income tax return.

Jamaica

In particular, business entities with gross annual revenues of JMD 500 million or more will be required to comply with extensive OECD standard transfer pricing documentation requirements.

- Compute income tax liability using the deemed arm's-length consideration determined in respect of all such connected party transactions instead of the actual consideration.

'Arm's-length consideration' refers to the consideration that would be derived from a comparable independent transaction and determined in accordance with one of several pricing methodologies that are permitted by the legislation.

The new rules also empower the Commissioner General, TAJ to treat unconnected persons as being connected under certain circumstances. This includes transactions with non-residents who are located in no-tax or low-tax jurisdictions unless the taxpayer can provide evidence (to the satisfaction of TAJ) that the non-resident is not connected. For this purpose, a low-tax jurisdiction is deemed to be one that imposes income tax at a rate that is less than 50% of Jamaica's income tax rate (i.e. 12.5%, being 50% of 25%).

Thin capitalisation

There are no provisions for thin capitalisation in the tax laws of Jamaica. It has been proposed, however, that such provisions should be introduced in the near future.

Controlled foreign companies (CFCs)

There is no CFC regime in Jamaica.

Tax credits and incentives

Jamaica grants relief from taxation to persons who have been approved under the following incentive legislation:

- The Special Economic Zones (SEZ) Act.
- The Urban Renewal (Tax Relief) Act.
- The Income Tax Act (Junior Stock Market Companies).
- The Income Tax Relief (Large-Scale Projects & Pioneer Industries) Act.
- The Bauxite and Alumina Industries (Encouragement) Act.
- The Charitable Organizations (Tax Harmonization) (Miscellaneous Provisions) Act.

Special Economic Zones (SEZ)

The Special Economic Zones (SEZ) Act was passed in January 2016 and repealed the Jamaica Export Free Zones Act. It has established a regime to support the designation, promotion, development, operation, and management of SEZ. Under the Act, the Minister with responsibility for finance may designate certain geographical areas as SEZ.

A person may be declared to be a 'developer' or 'occupant' under the SEZ Act. A 'developer' refers to a company that is incorporated under the Companies Act and is established by a sponsor for the purposes of entering into a master-concession or a licence-agreement. An 'occupant' refers to a person, other than a developer, or a zone user who conducts business in the zone under a sub-concession made with the developer.

Tax incentives that are available to a developer or occupant under the SEZ Act include relief from asset tax, a reduced rate of income tax, property tax, transfer tax, GCT, and customs duty. However, these incentives are not available to developers or occupants who are eligible for relief under a number of other enactments, including the Bauxite and Alumina Industries (Encouragement) Act and the Income Tax Relief (Large-Scale Projects & Pioneer Industries) Act.

A number of industries/business activities are specifically prohibited in the SEZ, including (but not limited to) mining or quarrying for natural resources, services pertaining to tourism, telecommunications, public utilities, financial services, construction, real estate, and property management.

The Urban Renewal (Tax Relief) Act

The Urban Renewal (Tax Relief) Act provides tax incentives to persons approved under the Act in connection with undertaking programmes of development in areas designated as special development areas (such as Downtown Kingston), with a view to improving or restoring them. The tax incentive provides certain tax benefits, including relief from income tax on rental income and interest earned by an investor in an Urban Renewal Bond. There is also exemption from stamp duty and transfer tax on the transfers of property.

A tax credit of 33 $\frac{1}{3}$ % of expenditure on capital improvement works in a designated special development area is also available. In addition, lessees of the improved properties, who satisfy certain criteria, are able to claim a tax deduction of double the rental paid.

The Income Tax Act (Junior Stock Market Companies)

Subject to certain conditions being met, a company listed on the Junior Market on or after 1 January 2014 (and by 31 March 2016) is eligible for relief of 100% of the income tax payable by it in the first five years from the date of its admission.

The income of companies listed on the Junior Market prior to 1 January 2014 qualified for the following remission:

1. 100% of the income tax payable in the first five years from the date of admission to the Junior Market.
2. 50% of the income tax payable by the company in the five years following the period specified in 1 above.

Employment tax credit (ETC)

The ETC is comprised of a non-refundable tax credit that is available to certain persons (referred to as 'eligible persons') in computing their income tax liability. A number of taxpayers are ineligible to claim this tax credit:

- Companies regulated by the Bank of Jamaica, Financial Services Commission, Office of Utilities Regulation, or the ministry with responsibility for finance.
- Persons approved under the Urban Renewal (Tax Relief) Act.
- Companies listed on the Jamaica Stock Exchange Junior Market and obtaining relief under the Income Tax Act (Junior Stock Market Companies) relief provisions.
- Approved group head office companies under the Income Tax Act.
- Approved free zone enterprises under the Jamaica Export Free Zones Act.
- Approved bauxite producers under the Bauxite and Alumina Industries (Encouragement) Act.

The ETC is the total of the statutory payroll levies (Education Tax and contributions to the National Housing Trust, the National Insurance Scheme, and HEART). In order to benefit from the ETC, the monthly statutory returns that report the statutory payments must be filed by the due dates and the payments remitted by that date (i.e. by the 14th day of the month following that to which they relate).

ETC is capped at 30% of the income tax payable on profits from business operations. With a headline income tax rate of 25%, the tax credit therefore provides tax-compliant businesses with an opportunity to reduce the effective income tax rate on their trading profits to as low as 17.5%.

Jamaica

The ETC may not be claimed against any income tax chargeable on non-trading income (e.g. passive investment income) nor can it be claimed in the year of assessment where the taxpayer incurred a tax loss on trading operations. The amount must be utilised in the year that the statutory payments are made. Unutilised amounts are not available for refund and may not be either carried forward or back to be utilised in other years of assessment.

Where a company makes a distribution (dividends and certain other benefits to shareholders), the credit is clawed back by TAJ to the extent of 10% of the distribution, less the tax payable by the recipient of the distribution (i.e. the ETC clawback only applies where tax imposed on the recipient of the distribution is less than 10%). The credit clawed back must be repaid to TAJ within 14 days of the end of the month in which the distribution is made.

Tax incentives for large-scale projects and pioneer industries

The Income Tax Relief (Large-Scale Projects & Pioneer Industries) Act is designed to encourage innovation and high-value investments. It provides a mechanism through which additional income tax incentives can be offered in circumstances where the Minister of Finance & Planning designates a project as an approved large-scale project or an economic activity as an approved pioneer industry. An approved large-scale project is one that is capable of generating high levels of investment and employment. An approved pioneer industry refers to an economic activity not currently being carried out in Jamaica on a substantial commercial basis and involving the innovative use of technology, cultural assets, or other available resources.

The Minister shall make this designation subject to affirmative resolution in Parliament. Participants in either a designated large-scale project or a pioneer industry may subsequently be approved by Ministerial Order, which will stipulate the extent of relief granted. The income tax relieved under all orders issued pursuant to this mechanism in any year will be capped at 0.25% of the country's gross domestic product (GDP) for the previous financial year.

Productive inputs relief (PIR)

A mechanism is in place to provide relief from customs duty and additional stamp duty on the importation of certain 'productive inputs'. Productive inputs include goods that are imported as raw materials, intermediate goods, consumables, and packaging materials that are directly used in the 'production of primary products' or the 'manufacture of goods'. In addition to the manufacturing and agricultural sectors, relief will also be granted on certain products imported for use in the tourism, creative arts, and healthcare industries. The manufacture of goods may involve a determination by the Commissioner of Customs as to whether the process involved in transforming raw materials or intermediate goods into a finished product qualifies as the manufacture of goods.

The relief is subject to the proviso that imported items are not available in adequate supplies from a local manufacturer or from a manufacturer within the CARICOM Common Market area.

The Bauxite and Alumina Industries (Encouragement) Act

Under the Bauxite and Alumina Industries (Encouragement) Act, the Minister of Mining may declare a person who is engaged in winning bauxite and producing alumina in Jamaica to be a recognised bauxite producer or a recognised alumina producer (or both) and grant such approval in writing. A recognised alumina producer is eligible to obtain the following tax concessions:

- Relief from customs duty and GCT in respect of the importation of plant, machinery, trucks and other vehicles, and other specified material and equipment that are

necessary for the winning, treatment, and transportation in Jamaica and shipping of bauxite and alumina.

- Obtain exemption from additional stamp duty in respect of the imported articles referred to above.
- Relief from customs duty or other similar impost on the importation of certain petroleum fuels and oils (excluding petrol) during the concession period.

Tax incentives for charitable organisations

The Charitable Organizations (Tax Harmonization) (Miscellaneous Provisions) Act provides a mechanism for registered charitable organisations to obtain exemption from income tax, customs duty, GCT, property tax, stamp duty, and transfer tax.

Non-resident deposits

Non-residents who place deposits with Jamaican banks can earn interest free of Jamaican tax in certain circumstances. The deposits may be designated in foreign currency or Jamaican dollars.

Employee Share Ownership Plan (ESOP)

Certain tax benefits accrue to employees and employers in respect of contributions to an approved ESOP as well as the allocation of shares from such plans.

Foreign tax credit

The avoidance of double taxation is achieved by means of foreign tax credits available under most tax treaties or by means of deduction in the case of the CARICOM treaty. Under the provisions of the Income Tax Act, a foreign tax credit is also available to companies in Jamaica that have paid or are liable to Commonwealth Income Tax. Where recourse cannot be had through either of these methods, by convention, in practice, partial relief by way of expense deduction is granted against income for the foreign tax.

Withholding taxes

The Jamaican Income Tax Act refers to deduction at source and not to withholding. The following references are to deduction at source. If it is proved that this exceeds the tax actually payable, refunds are made.

'Prescribed persons', primarily financial institutions, are required to withhold tax at source at a rate of 25% on interest income earned on investment instruments (subject to any lower rate as prescribed in a DTT). The Income Tax Act has been amended to provide a wider definition of the term 'interest'. 'Prescribed persons', as defined, include the Accountant General; banks operating under the Banking Act or the Bank of Jamaica Act; institutions operating under the Financial Institutions Act; building societies; societies registered under the Industrial and Provident Societies Act, unless certain conditions are met; the Ministry of Finance & Planning; life insurance companies; companies registered under the Companies Act in which the government or an agency of the government holds more than 50% of the ordinary shares and which issues interest bearing securities; issuers of commercial paper; unit trust management companies; and any person who is connected with any of the persons mentioned above (with the exception of the Accountant General).

As is indicated in the *Income determination* section, the Income Tax Act provides that there is a requirement to deduct tax at the rate of 15% where dividends are paid to Jamaican tax resident shareholders, excluding corporate shareholders who hold 25% or more of the voting rights of the paying company. The tax deducted at source represents the final tax in respect of the dividends.

Jamaica

WHT is also imposed at the rate of 15% on all insurance premiums paid by Jamaican residents to non-residents. However, premiums paid by registered Jamaican insurance companies will be exempt from this WHT, subject to satisfying certain conditions.

Generally, all WHTs, including taxes withheld from dividend, interest, royalties, and fees must be remitted to TAJ within 14 days of the end of the month in which the payment is made in order to avoid the imposition of interest and penalties.

WHT (%)					
Recipient	Dividends		Interest	Royalties	Management fees
	Portfolio	Substantial holdings			
Resident corporations	15 (1)	0 (1)	25 (3)	0	0
Resident individuals	15 (2)	15 (2)	25 (3)	0	0
Non-treaty:					
Non-resident corporations	33 $\frac{1}{3}$	33 $\frac{1}{3}$	33 $\frac{1}{3}$	33 $\frac{1}{3}$	33 $\frac{1}{3}$
Non-resident individuals	25	25	25	25	25
Treaty:					
Canada	15	22.5	15	10	12.5
CARICOM countries	0 (4)	0 (4)	15 (4)	15 (4)	15
China, People's Republic of	5 (5)	5 (5)	7.5 (5)	10	33 $\frac{1}{3}$
Denmark	15	10 (6)	12.5	10	10
France	15	10 (6)	10	10	10
Germany	15	10 (6)	12.5 (7)	10	10
Israel	22.5 (8)	15	15	10	33 $\frac{1}{3}$
Norway	15 (5)	15 (5)	12.5	10	10
Spain	10 (5)	5 (5)	10	10	10
Sweden	22.5 (5, 8)	10 (5)	12.5	10	10
Switzerland	15 (5, 6)	10 (5)	10	10	10
United Kingdom	15 (5, 6)	22.5 (5)	12.5	10	12.5
United States	15 (5, 6)	10 (5)	12.5	10	33 $\frac{1}{3}$ (9)

Notes

1. Substantial holdings refer to resident companies that hold 25% or more of the voting rights of the paying company.
2. Tax is withheld at the rate of 15% where a dividend is paid by a company resident in Jamaica to a resident individual shareholder, regardless of shareholding.
3. Tax is deducted from interest paid to Jamaican residents if payment is made by a prescribed person.
4. Rates apply only to specified member states.
5. The lower treaty rates do not apply if the recipient has a PE in the other territory that is 'effectively connected' with the company paying the dividend.
6. A rate of 15% applies to an individual regardless of shareholding.
7. Reduced to 10% if received by a bank recognised as a banking institution under the laws of that state.
8. A rate of 22.5% applies to an individual regardless of the shareholding.
9. Nil in the absence of a PE.

A WHT rate of 25% is required to be applied in respect of interest paid or credited by prescribed persons. However, certain categories of interest income earned on long-term savings accounts (LSAs) were made exempt from tax, including:

- Interest paid or credited in respect of investments or deposits made by individuals with prescribed persons if:
 - the deposit remains a minimum of five years without any withdrawal from the principal sum invested

- the deposit or investment (other than interest accrued or credited) does not exceed JMD 1 million in any year
- the account is not transferable, except on the death or bankruptcy of the depositor or investor, and
- not more than 75% of the interest accrued in any year is withdrawn during the year.
- Benefits derived from investments in certain life insurance policies may also be exempt from income tax if specified criteria are satisfied.

A WHT of 3% is imposed on payments in respect of 'specified services' purchased locally (above a *de minimis* amount of JMD 50,000 per invoice). This WHT was first imposed in 2015 and is being implemented on a phased basis. Similar to other forms of WHT, the tax withheld should be available for offset against the payee's income tax liability on the filing of returns.

Tax administration

Jamaica has established the following departments to handle tax administration:

- Tax Administration Jamaica (TAJ) operates as a semi-autonomous revenue authority whose functions include compliance and tax collection, administrative and legal support, audit and assessment of income tax, general consumption tax, stamp duty, and transfer tax. The Commissioner General, TAJ has responsibility for the direction, supervision, and administration of TAJ and is supported in undertaking this role by several Deputy Commissioner Generals.
- The Revenue Appeals Division of the Ministry of Finance processes appeals to decisions made by TAJ.
- The Jamaica Customs Agency has the powers of an executive agency and has responsibility for administering taxes at the ports of entry.

There is also a Financial Investigations Division in the Ministry of Finance, which investigates customs breaches and fraudulent acts in respect of tax legislation.

Taxable period

A corporation is subject to tax on its income for a calendar year. However, where the Commissioner General, TAJ is satisfied that a corporation normally prepares financial statements to a date other than 31 December, the company may be permitted to use the profits of its own financial year rather than the calendar year as the basis of assessment. The basis period should not exceed 12 months; however, a company wishing to file its income tax return for a period exceeding this period must obtain the approval of TAJ.

Tax returns

Income tax returns are due for filing by 15 March in the year following the year of assessment and are based on a system of self-assessment of the tax payable.

Payment of tax

Tax is payable in quarterly instalments on the 15th day of March, June, September, and December of each tax year. Quarterly instalments are based on an estimate of the year's liability or the actual tax payable for the previous year. The balance of income tax payable for a taxation year, after deduction of the instalments of estimated tax, is due on 15 March of the following year. Interest is charged on unpaid tax at a rate of 20% *per annum* while the amount remains unpaid. A penalty of up to 50% may also be imposed if TAJ issues an assessment.

TAJ has implemented an electronic tax system that taxpayers may use to file various tax returns and remit taxes.

Jamaica

Tax assessments and audits

The Commissioner General, TAJ is empowered to conduct audits on selected tax returns or to assess a taxpayer for additional tax at any time prior to the expiration of the statute of limitation, which is six years, except in certain cases. Tax audits can be carried out whether or not notices of assessment have been issued. Tax assessments may be raised where the Commissioner General, TAJ is of the opinion that a taxpayer has been assessed for less tax than the taxpayer ought to have been charged, or where the taxpayer failed to file a tax return.

Topics of focus for tax authorities

In support of the ongoing policy and legislative reform of the tax regime, the revenue authorities have been focusing on enhancing voluntary compliance, improving business processes and information technology infrastructure, modernising their operations so as to increase revenue collection and efficiency, as well as simplifying tax administrative processes. Initiatives being undertaken to achieve these objectives include enhancing web-based service offerings to facilitate greater levels of electronic tax filing/payments and improving the resources of the Large Taxpayer Office (LTO). Legislation has also been enacted to widen the range of offences across various tax types and to increase/harmonise the penalties for breach of those offences to more realistic levels.

Legislation is in progress to introduce thin capitalisation rules.

Other issues

Intergovernmental agreements (IGAs)

The government of Jamaica has entered into an agreement with the government of the United States (US) to improve international tax compliance and to implement the US Foreign Account Tax Compliance Act (FATCA). The agreement seeks to provide an effective mechanism for the automatic exchange of information for tax purposes and addresses the burden of domestic reporting and the legal impediments that Jamaican financial institutions may face in complying with FATCA.

Legislation is in progress to amend the income tax law to introduce the measures that are required by FATCA.

Corporate tax calculation

For a sample corporate tax calculation, see the Other issues section of Jamaica's Corporate tax summary at www.pwc.com/taxsummaries.

Significant developments

2016 Tax Reform

On 29 March 2016, the 2016 Tax Reform Act was approved by the Diet, and, on 31 March 2016, the 2016 Tax Reform Act, the Enforcement Orders, and Regulations were promulgated, which are effective for corporate tax years beginning on or after 1 April 2016, in principle.

The 2016 Tax Reform Act provides for tax measures to help realise 'economic virtuous cycles' by reducing the effective corporate tax rate from fiscal year 2016. In addition, several measures were approved to expand the taxable base to make up for the revenue loss from the tax rate reduction (i.e. changes in the depreciation method, changes in the incentive tax system, changes to the size-based enterprise tax system).

In addition, based on the recommendations of Action 13 of the final Organisation for Economic Co-operation and Development (OECD) base erosion and profit shifting (BEPS) report issued in October 2015, new reporting obligations for transfer pricing documentation are implemented.

Japan - Taiwan agreement on tax matters

On 26 November 2015, the *de facto* diplomatic organisations representing both Japan and Taiwan completed negotiations on a comprehensive income tax agreement. Along with treating residents and domestic corporations the same in each jurisdiction, residency tie-breaker rules, non-taxable income to Taiwan residents, arbitration measures for transfer pricing, and information exchange measures were also agreed to.

The above treatment is expected to take effect on income on or after 1 January 2018.

Consumption tax

The consumption tax increase remains on schedule to rise to 10% on 1 April 2017; however, concessions have been introduced with lower rates for selected goods to lessen the burden for the lower income tax brackets. To cope with the multiple consumption tax rates, an invoicing method will be introduced, although not until 1 April 2021, with transitional measures in place for the four-year interim.

Taxes on corporate income

A domestic corporation in Japan is taxed on its worldwide income, including foreign branch income, while 95% of dividends received by a company from a foreign company in which it has held at least 25% (or could be lower under relevant tax treaties) of the outstanding shares for a continuous period of six months or more can be excluded from the company's taxable income. *See the description of Dividend income in the Income determination section for more information.*

A foreign corporation is taxed only on its Japan-source income.

Japan

Corporation tax

The corporation tax rates are provided in the table below (effective from fiscal years beginning on or after 1 April 2016 and 1 April 2018).

Company size and income	Corporation tax rate (%)	
	1 April 2016	1 April 2018
Paid-in capital of over 100 million Japanese yen (JPY)	23.4	23.2
Paid-in capital of JPY 100 million or less, except for a company wholly owned by a company that has paid-in capital of JPY 500 million or more:		
First JPY 8 million <i>per annum</i>	15.0	Undecided
Over JPY 8 million <i>per annum</i>	23.4	23.2

National local corporate tax

Corporate taxpayers are obligated to file and pay the national local corporate tax at a fixed rate of 4.4% of their corporate tax liabilities. For fiscal years beginning after 1 April 2017, the national local corporate tax rate will increase to 10.3% while the inhabitants' tax (*see below*) will decrease.

Standard enterprise tax (and local corporate special tax)

Enterprise tax is imposed on a corporation's income allocated to each prefecture. This allocation is generally made on the basis of the number of employees and number of offices in each location. The local corporate special tax, which is a rate multiplied by the income portion of enterprise tax, will be abolished from 1 April 2017 and replaced by enterprise tax (including a size-based tax regime).

The standard rates of enterprise tax, including local corporate special tax, are shown below.

Taxable base	Enterprise tax (%)	Local corporate special tax
First JPY 4 million <i>per annum</i>	3.4	
Next JPY 4 million <i>per annum</i>	5.1	43.2% of the current enterprise tax
Over JPY 8 million <i>per annum</i>	6.7	

If the paid-in capital of a corporation is JPY 10 million or more and the corporation has places of business in more than two prefectures, the graduated rates above are not applicable.

For utilities and insurance companies, the standard tax rate is shown as follows:

Taxable base	Enterprise tax (%)	Local corporate special tax
Net revenue (net utility charges or net insurance premiums)	0.9	43.2% of the current enterprise tax

Size-based enterprise tax (and local corporate special tax)

Instead of the above general enterprise tax, a 'size-based' enterprise tax (*Gaikei Hyojun Kazei*) is applied to a company whose paid-in capital is more than JPY 100 million as of the year end.

Factors such as the size of a corporation's personnel costs and its capital (the amount of paid-in capital) will determine the additional amount of tax payable. The existing profit-based enterprise tax will also continue to apply at the tax rates indicated below. Therefore, a loss company in Japan may be required to pay tax based on value-added activities and the corporation's paid-in capital.

The applicable standard rates, due to the 2016 Tax Reform, are as follows:

Size-based enterprise tax (%)			
Taxable base	Before 2015 Tax Reform	2015 Tax Reform	2016 Tax Reform
Fiscal year beginning	1 April 2014	1 April 2015	1 April 2016
Value added base	0.48	0.72	1.2
Capital base	0.2	0.3	0.5
Income base *	First JPY 4 million	3.8 (2.2)	3.1 (1.6)
	Next JPY 4 million	5.5 (3.2)	4.6 (2.3)
	Over JPY 8 million	7.2 (4.3)	6.0 (3.1)
Local corporate special tax (the rate is multiplied by the income base of size-based enterprise tax), which is collected as national tax by filing corporate tax returns			
	67.4	93.5	414.2 **

* The rate shown for the income base is the total income-based tax including (i) the portion collected as part of the national tax return and (ii) the portion included as part of the enterprise tax return. The portion in parentheses of the income base column shows the amount collected as an enterprise local tax (the difference is collected as a national tax). The above rate changes for income base may not affect taxpayers who have elected consolidated taxation since consolidation is not applicable for local tax purposes.

** The local corporate special tax will be abolished from 1 April 2017 and replaced with an increase to the enterprise tax rate.

Inhabitant's tax

Inhabitant's tax is imposed on a corporation's income allocated to each prefecture and city (municipal borough). The allocation is generally made on the basis of the number of employees, in the same way as enterprise tax.

The standard tax rate is 3.2% as prefectural tax and 9.7% as municipal tax. However, the tax rate is increased to 4.2% for prefectural tax and 12.1% for municipal tax, depending upon the determination of each local government. From fiscal years beginning on or after 1 April 2017, the rate is increased as follows:

Inhabitant's tax	Current		Expected from 2017	
	Standard rate (%)	Maximum rate (%)	Standard rate (%)	Maximum rate (%)
Prefectural tax portion	3.2	4.2	1.0	2.0
Municipal tax rate	9.7	12.1	6.0	8.4
Local corporate tax rate	4.4		10.3	

In addition to the above, inhabitant's tax is imposed on a per capita basis, in the range from JPY 70,000 (in cases where the amount of paid-in capital is JPY 10 million or less and the number of employees in each prefecture and city is 50 or less) to JPY 3.8 million (in cases where the amount of paid-in capital is over JPY 5 billion and the number of employees in each prefecture and city is over 50). The inhabitant's tax amount is determined by the local government by the factors of paid-in capital and the number of employees.

Effective tax rate

The total corporate income tax burden (i.e. effective tax rate) varies depending upon the size of a company's paid-in capital. Since enterprise tax is deductible, the effective tax rate is less than the total of the statutory rates of corporation tax, inhabitant's tax, and enterprise tax.

Japan

The following is the summary of the effective applicable tax rates in the case of small and medium enterprises (SMEs) and large corporations operating in Tokyo (taking no thought of an additional-value-based tax and capital-based tax out of the enterprise tax above):

Tax year	Effective corporation tax rate (%)	
	SMEs	Large corporations
Beginning on or after 1 April 2016	34.81	30.86
Beginning on or after 1 April 2018	34.60	30.62 *

* Since the excess rate for fiscal year 2016 is not yet determined, the rate is calculated with the standard rate multiplied by the excess rate for 2016.

Corporate residence

Domestic and foreign corporation

A company that has its head office in Japan is a domestic corporation. The nationality of its shareholders or place of central management is not relevant.

A corporation other than a domestic corporation is regarded as a foreign corporation.

Permanent establishment (PE)

Under domestic tax law, the scope of Japan-source income in respect of which a foreign corporation is taxable depends upon the type of taxable presence that it has in Japan. The types of taxable presence that a foreign corporation may have in Japan include the following:

- Branch, factory, other fixed places in which business is conducted in Japan, mine, quarry, building for rent, etc., but exclude a specified place used only for the business of purchasing assets and for keeping them (Direct PE).
- Construction, installation, assembly project, or supervisory services related thereto for a period of greater than one year.
- Certain agents (Agent PE), as follows:
 - A person in Japan who has an authority to conclude contracts for a foreign corporation (excluding contracts to purchase assets) and exercises such authority continuously (Contracting Agent).
 - A person in Japan who keeps for a foreign corporation a certain quantity of assets sufficient to meet ordinary demand from the foreign corporation's customers and delivers the said assets to the customers according to their requirements (Fills Order Agent).
 - A person in Japan who, solely or principally for or on behalf of a foreign corporation, habitually performs an important part of solicitation of orders, negotiations, or other acts leading up to the conclusion of contracts with respect to the business of the foreign person (Secure Order Agent).

As a matter of law, the articles of Japan's tax treaties have precedence over domestic tax law. In general, there are no significant differences between the definitions of PE under domestic tax law and Japan's tax treaties. However, once a PE has been established for a foreign corporation under domestic law, all Japan-source income is taxable to the PE (as opposed to just income 'attributable to' the PE, as is the case under most treaties).

Note that Japanese domestic rules with regard to the taxation of PEs in Japan are consistent with the revised Model Tax Convention from tax years commencing on or after 1 April 2016.

Other taxes

Consumption tax

Consumption tax (value-added tax or VAT) is levied when a business enterprise transfers goods, provides services, or imports goods into Japan. The applicable rate is 8%. As of 1 April 2017, the rate will increase to 10%. Exports and certain services to non-residents are taxed at a zero rate. Specified transactions, such as sales or lease of land, sales of securities, and provision of public services, are not subject to taxation.

Consumption tax paid by the business enterprise attributable to taxable revenue shall be creditable/refundable by filing the consumption tax return to the extent that such transaction is recorded in the accounting book and relevant invoices are kept.

In response to the increase in consumption tax rate to 10% from 1 April 2017, lower consumption tax rates on certain goods will be introduced. Also, in response to the multiple tax rates, an invoice system will be introduced from 1 April 2021. In the four-year transitional period to the introduction of an invoice system, several measures will be implemented.

The lower consumption tax rate of 8% will still apply to food (excluding when purchased in restaurants) along with newspaper subscriptions where there is at least an issue twice per week. Until the invoice system is introduced, the credit for consumption taxes paid will follow the current method for tracking, where the lower tax rate on applicable items should be indicated in the invoice. With the increased administration cost of tracking the different rates, the simplified method of determining consumption taxes paid will be allowed.

After the new invoice system is introduced, qualified invoices issued by the registered businesses should be maintained for claiming credits of consumption taxes paid. Businesses (other than exempt entities) will need to file an application with their tax office to become qualified for issuing qualified invoices indicating details such as the business registration number, the applicable tax rate, etc.

Note that due to the 2015 Tax Reform, consumption tax is imposed on the cross-border provision of digital services (e.g. e-books, music, and advertising) by foreign service providers on or after 1 October 2015. In this respect, a reverse-charge mechanism has been introduced for business-to-business (B2B) transactions, and foreign service providers may need to register for consumption tax purposes with regard to business-to-consumer (B2C) transactions.

Also, Japanese sponsors are subject to a reverse-charge system for sports or music/art attractions in Japan provided by foreign entertainment providers. This amendment applies to the provision of services on or after 1 April 2016.

Customs duty

A customs duty is levied on imported goods based on the custom tariff table.

Excise taxes

Excise taxes were abolished by introduction of consumption tax.

Fixed assets tax

The annual fixed assets tax is levied by the local tax authorities on real property and depreciable fixed assets used for business purposes. Real property is taxed at 1.7% (standard rate including city planning tax) of the value appraised by the local tax authorities. The depreciable fixed assets tax is assessed at 1.4% of cost after statutory depreciation.

Japan

Stamp duty

A stamp duty is levied on certain documents prepared in Japan. The tax amount is generally determined based on the amount stated in the document.

Registration and licence tax

Registration and licence tax is levied where certain property is registered, at a rate from 0.1% to 2% of the taxable basis or at a fixed amount. The taxable basis depends upon the property being registered (e.g. the amount of paid-in capital registered by a company or the value of real estate as assessed by local tax authorities).

Payroll taxes

In general, the employer has an obligation to withhold payroll taxes monthly, and for annual year-end adjustment.

Labour and Social Insurance

There are four types of insurance systems in Japan that enterprises employing workers that meet certain conditions must enrol in. Workers' accident compensation insurance is borne entirely by the employer. Employment insurance, health insurance/nursing care insurance, and employees' pension insurance is borne by both the employer and employee.

The employer is generally liable to pay a share of the following contributions on salary or bonus, including fringe benefits, to be paid in Japan. The employer's share consists of the following contributions:

Contribution	Standard premiums on monthly salary	Standard premiums on bonus
Health insurance for the Metropolis of Tokyo (each prefecture has its own health insurance rate, and rates are slightly higher for individuals between the ages of 40 and 65)	4.985% (on a maximum of JPY 1,210,000 of wages per month)	4.985% (on an annual cap of JPY 5.4 million of irregular annual total payments)
Welfare pension, plus child allowance (1)	8.887% (on a maximum of JPY 620,000 of wages per month)	8.887% (on a maximum of JPY 1.5 million of irregular payments per month)
Employment insurance	0.85%	0.85%
Total (2)	14.722%	14.722%

Notes

- The rate of 8.737% for welfare pension will be applied from September 2014 to August 2015. Premiums on child allowance will be imposed separately at 0.15%.
- In addition, workers' accident compensation insurance will be imposed. The rate varies depending on the type of business.

Family corporation tax

If an individual shareholder together with family members own, either directly or indirectly, more than 50% of the total issued shares or voting rights of a Japanese corporation, the corporation is treated as a family corporation (with the exception of corporations with paid-in capital of JPY 100 million or less) and is subject to the family corporation tax in addition to corporation tax.

A family corporation is liable for an additional tax at the rates shown below on its undistributed current earnings in excess of specified limits.

Taxable undistributed current earnings	Family corporation tax rate (%)
First JPY 30 million <i>per annum</i>	10

Taxable undistributed current earnings	Family corporation tax rate (%)
Next JPY 70 million <i>per annum</i>	15
Over JPY 100 million <i>per annum</i>	20

Business premises tax

Business premises tax is levied and designated by each city in Japan, such as Tokyo, Osaka, Nagoya, Fukuoka, and other cities with a population of more than 300,000. A company that uses business premises in excess of 1,000 square metres and/or has more than 100 employees in a designated city is responsible to pay this tax based on the usage of the business (JPY 600 per square metre) and gross payroll (0.25% of gross payroll).

Branch income

Branch profits are taxed in the same manner as corporate profits. However, the family corporation tax does not apply to a branch of a foreign corporation. In addition, no withholding tax (WHT) is imposed on the repatriation of branch profits to the home office.

Income determination

The taxable income of a corporation is the aggregate income from all sources. There is no specific requirement to differentiate between the types of income. In principle, accounting for tax purposes follows Generally Accepted Accounting Principles (GAAP) in Japan, and income of a corporation is determined on an accrual basis.

Inventory valuation

Inventory cost should be determined by applying one of the following methods accepted for corporate tax purposes: actual individual cost, first in first out (FIFO), weighted average, moving average, most recent retail, selling price reduction, and lower of cost or market.

Capital gains

Capital gains and losses are classified as ordinary income and losses, respectively.

Under certain circumstances (e.g. qualified reinvestment, exchange property), taxes generally levied on capital gains may be deferred (i.e. provided rollover relief) as long as certain requirements are met. A special relief is available in the case of expropriation of real property by either the national or local government.

The recognition of capital gains or losses from the transfer of certain assets between group companies are to be deferred until the asset is transferred to another group company or a non-group company.

Dividend income

In the 2015 Tax Reform Act, the threshold ownership percentage for corporate dividend exclusion increased as illustrated in the following table.

The amendments apply to dividends received by a corporation on or after 1 April 2015. Before the amendments, the dividend income exclusion for an 'affiliated domestic corporation' was allowed to the extent that the shareholder ownership duration was for six months or more until the dividend declaration date. After the amendment, the holding period is changed to the six months or more until the fiscal year end for which the dividend will be paid. The dividend income exclusion for an 'other domestic corporation' and 'portfolio investment' is allowed by reference to the ownership percentage as of the fiscal year end for which the dividend will be paid.

Japan

Before amendments			After amendments		
Type of investment	Ownership %	Exclusion %	Type of investment	Ownership %	Exclusion %
Wholly owned domestic subsidiary	100%	100%	Wholly owned domestic subsidiary	100%	100%
Affiliated domestic corporation	25% or more	100% less allocable interest	Affiliated domestic corporation	More than 1/3	100% less allocable interest (1)
Other domestic corporation	Less than 25%	50% less allocable interest	Other domestic corporation	More than 5% but less than 1/3	50%
Investment trust (3) (including exchange trust fund [ETF], foreign currency denominated trusts, and other investment trusts)	A maximum of 50% of net income less interest expense of a domestic investment trust can be treated as a dividend from an 'other' domestic corporation (i.e. 50% less allocable interest is excludable). The percentage of income from an investment trust that can be treated as a dividend depends upon the type of investment trust. ETF: 100% Foreign currency denominated investment trusts: 25% Other investment trusts: 50%		Portfolio investment	Less than 5%	20% (2)
			ETF		20% (treated as a portfolio investment)
			Other investment trusts		0%

Notes

- Under certain simplified calculations to determine allocable interest, the 'base period' is the fiscal years beginning between 1 April 2015 and 31 March 2017.
- For dividends from portfolio investments received by insurance companies, the exclusion percentage will be 40%.
- Not including bond investment trusts, foreign investment trusts, and specific types of foreign currency denominated investment trusts.

95% of dividends received by a company from a foreign company in which it has held at least 25% of the outstanding shares for a continuous period of six months or more, ending on the date on which the dividend is declared, can be excluded from the company's taxable income.

If the foreign company is resident in a country with which Japan has concluded a tax treaty for the avoidance of double taxation, and such treaty provides for the allowance of an indirect foreign tax credit for taxes paid by the foreign company on the profits out of which the dividend is paid where the company holds a certain percentage of the foreign company's outstanding shares (e.g. 10% based on the tax treaty between the United States and Japan), that percentage will apply for the purpose of determining the availability of the above exemption to the extent that it is lower than 25%.

The BEPS Action Plan 2 proposed that measures be taken to neutralise the tax effects of so-called 'hybrid mismatch' arrangements where, because of differences in the treatment of certain payments between jurisdictions, an item of income is not taxed in either the payer or the payee country because the payment is deductible in the payer country but not taxable in the recipient country. Thus, the recommendation in the BEPS Action Plan is to modify local tax law in order for the recipient country to tax the receipt.

Before the 2015 amendment, any dividends received by a Japanese corporation from a foreign affiliate was 95% exempt from taxation in Japan regardless of the tax treatment in the payer country. This position was clarified in question and answer (Q&A) guidance issued by the National Tax Agency. Based upon the recommendation of the BEPS Action Plan 2, the 2015 Tax Reform Act excludes such types of dividends from the dividend exclusion regime. As a result, any dividends paid to Japanese corporate taxpayers under so-called 'mandatorily redeemable preferred shares' (MRPS) issued by Australian affiliates or by Brazilian affiliates where the dividends are paid in a manner similar to interest and deductible for Brazilian tax purposes will no longer be excluded from taxation in Japan.

To the extent any portion of the dividend is deductible for foreign tax purposes, the general principle is that all of the dividend should be taxable in Japan. However, if a portion of the dividend is not tax deductible in the foreign jurisdiction, dividend exclusion will be allowed only if the taxpayer discloses all of the appropriate information regarding the portion of the dividend that is not deductible in the foreign jurisdiction and backup details for the calculation in a timely filed tax return and maintains the relevant documents for inspection by the tax authorities.

Any foreign tax imposed on the taxable dividend in Japan will be eligible for foreign tax credit relief.

The new rules apply for any dividends received by a Japanese corporate taxpayer whose fiscal year began on or after 1 April 2016. However, if the Japanese corporate taxpayer owned the stock of the foreign affiliate as of 1 April 2016, dividends received for years beginning between 1 April 2016 and 31 March 2018 will be subject to the old rules (i.e. still eligible for exclusion).

The WHT for dividends is applicable at a rate of 15% national tax and 5% local tax or 20% (national tax) depending on the type of stock from which the dividends were received, and a tax credit may also be available for such WHT. The WHT (national tax) is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

Interest income

Interest received is included in taxable income. The WHT for interest is applicable at a rate of 15% national tax and 5% local tax and a tax credit may be available for such WHT. As with dividend income, the WHT (national tax) is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037. Note that under the 2013 Tax Reform, only national tax will be withheld at source for interest income received on or after 1 January 2016 by a corporate recipient.

Foreign income

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant's taxes for foreign income taxes paid directly. See *Foreign tax credit in the Tax credits and incentives section for more information.*

Undistributed profits of a foreign subsidiary (i.e. controlled foreign company [CFC]) located in a tax haven are included in the Japanese parent company's taxable income under certain conditions. See *Anti-tax haven (CFC) rules in the Group taxation section for more information.*

Deductions

Depreciation and amortisation

Depreciation is deductible in the calculation of taxable income for corporation tax purposes. Depreciable assets include tangible property (e.g. buildings, attachments to buildings, structures, machinery and equipment). Certain intangible assets are also eligible for amortisation (e.g. goodwill, patents, trademarks).

With regard to depreciation methods, a taxpayer may adopt one of the allowable methods for each of the type of depreciable property, except for buildings and structures and attachments to buildings. For selected structural improvements acquired on or after 1 April 2016, only the straight-line method will be permitted (i.e. the declining-balance accelerated depreciation method will no longer be allowed). Tangible property is generally depreciated using either the straight-line method or the declining-balance method. Intangible property is generally amortised under the straight-line method.

Useful lives for assets are set forth on the table in detail. For reference, the following is the brief table of useful lives for typical assets.

Types of assets	Useful lives (years)
Concrete buildings	21 to 50 (depending on uses)
Metal building	12 to 38 (depending on uses)
Electrical facilities and lighting	15
Heating and air conditioning	15
Motor vehicles	3 to 6 (depending on uses)
Personal computers	4
Digital telephone equipment	6
Machinery and equipment	3 to 22 (depending on uses)
Patents	8
Software	3 or 5 (depending on uses)

Start-up expenses

Start-up expenses, such as corporation organisation costs and opening costs (i.e. costs to begin business after the corporation is established), are treated as deferred assets and allowed to be amortised on a voluntary basis.

Interest expenses

Interest expenses on borrowing are deductible in the calculation of taxable income in principle. However, the interest payment to related parties in the corporate group may be disallowed to be deducted to some extent in certain cases. See *'Thin capitalisation' and 'Interest expense deduction limitation' in the Group taxation section*.

Reserves

Reserves recorded in the books of accounts, except for reserves for doubtful receivables and return of goods not sold, are not deductible for corporate tax purposes.

Reserve for doubtful receivables

A reserve for doubtful receivables is available to SMEs, banks, insurance companies, and other similar financial corporations.

The deductibility of a reserve for doubtful receivables is limited by the following two components: (i) an estimate of irrecoverable amounts from a debtor and (ii) a calculation of the limit in the aggregate based on either the actual historical bad debt percentage or statutory percentage (reduced for large corporations), excluding the irrecoverable amount of receivable in (i) above.

Reserve for return of goods not sold

A deductible reserve for return of goods not sold is available to corporations such as publishers, wholesalers of books, and others, provided that the corporation sells the merchandise under an unconditional repurchase agreement.

Charitable contributions

Except for certain designated donations, the tax deduction for charitable contributions is limited to certain amounts, as follows:

Donation	Deduction limit
General donation	$((0.25\% \text{ of capital plus capital surplus}) + (2.5\% \text{ of income})) \times 1/4$
Donation made to designated public purpose companies	$((0.375\% \text{ of capital plus capital surplus}) + (6.25\% \text{ of income})) \times 1/2$

Donations subject to this limitation include economic benefits considered to be given as a subsidy. Donations to foreign affiliates are not fully deductible.

In cases where a donation occurs between group companies (as defined), there will be no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee).

Directors' remuneration

The remuneration paid to directors is deductible only in the following three cases:

- Fixed monthly payments.
- Fixed payments in accordance with an advance notice to the tax office.
- Performance bonuses paid in proportion to the company's earnings to directors who engage in the operation of the company's business, to the extent that certain requirements are met.
- Corporations remunerating individuals with restricted shares in return for the provision of future services will be able to deduct the cost on the date of vesting. This treatment will apply to restricted shares granted by corporate resolutions on or after 1 April 2016. Remuneration by corporations to directors in the form of restricted shares will not require advance notice to claim a corporate deduction.

If the amount of remuneration is deemed unreasonable by the tax authority, only the reasonable amount is deductible for tax purposes.

Entertainment expenses

In principle, entertainment expenses are not deductible for tax purposes. However, an SME, defined as a company with paid-in capital of JPY 100 million or less (except for a company wholly owned by a company that has paid-in capital of JPY 500 million or more after the group taxation regime is effective) may take a tax deduction up to the smaller of the actual disbursement for the entertainment expense or JPY 8 million. With regard to expenses for eating and drinking, a company may deduct such expenses as far as the expense does not exceed JPY 5,000 per person (excluding expenditures for internal purposes) for tax purposes.

The corporations will be able to deduct 50% of the entertainment expenses for food and drink (excluding entertainment for internal purposes).

The above treatment is applicable to the fiscal years beginning before 31 March 2018.

Fines and penalties

Fines and penalties are not deductible.

Japan

Taxes

Enterprise tax and business premises tax are deductible in the calculation of the taxable income for corporation tax purposes on a cash basis. However, corporation tax and inhabitant's tax are not deductible. Fixed assets tax and other taxes are deductible, when assessed. Foreign income taxes also may be deductible if the Japanese corporation does not elect to claim a foreign tax credit.

Net operating losses

For corporation tax and enterprise tax purposes (indirectly for inhabitant's tax purposes), a tax loss can be carried forward to offset future income in the case that a taxpayer files a 'blue form' tax return (*see Tax returns in the Tax administration section*) or if the tax loss is incurred as a result of certain disaster events.

Based on the 2016 Tax Reform Act, changes in the limitation for the net operating loss deduction will be implemented over three years. Thereafter, the limitation will be reduced to 50%, although the limitation carryover period will be extended from the current nine years to ten years for losses incurred on or after years beginning on or after 1 April 2018. SMEs are not subject to the loss deduction limitation.

	Fiscal year 2015 (1)	Fiscal year 2016	Fiscal year 2017	Fiscal year 2018
Limitation ratio for large corporations	65%	60%	55%	50% (2)
Carryover period for loss utilisation as well as assessment by tax authorities and request for downward adjustment by taxpayer (assuming loss period financial documentation is maintained)	9 years	9 years	9 years	10 years (2)

Notes

- For fiscal years beginning on or after 1 April 2015 and before 1 April 2016 in which the taxpayer claims a net operating loss deduction.
- Applicable to tax losses incurred in fiscal years beginning on or after 1 April 2018.

Certain newly established corporations and companies coming out of a rehabilitation process will not be subject to the loss limitation rules for a certain period.

Type of corporation applicable	Years in which full deduction is allowable	Years where regular limitation applies even if full deduction otherwise allowable
Newly established corporations (1) and corporations coming out of the rehabilitation process (2)	Seven years from establishment of the corporation or seven years from the decision of the court to exit the rehabilitation process.	For years ending on or after (i) a company is listed on a stock exchange, or (ii) the company is deemed to be rehabilitated.

Notes

- SMEs, 100% subsidiary of larger corporations, or 100% parent corporation after share transfer are excluded.
- SMEs are excluded.

Where there is a change in ownership of a corporation followed by certain events, such as the cessation of business or a significant change in its business within a five-year period following a business acquisition, the utilisation of its tax loss is restricted.

Carryback of tax losses is generally available for one year for national corporation tax purposes. This carryback rule is suspended until the fiscal year ending 31 March 2018 (except in specified circumstances, e.g. year of liquidation).

No carryback of losses is allowed for enterprise tax and inhabitant's tax.

Payments to foreign affiliates

In order to support a deduction in Japan for expenses incurred by a foreign affiliate and charged to a Japanese corporation, in general, it should be demonstrated that the service arrangement between the foreign affiliate and the Japanese corporation satisfies arm's-length criteria for purposes of Japan's transfer pricing laws and regulations.

Generally, fees that are paid by a Japanese subsidiary to a foreign affiliate should be deductible for Japanese tax purposes if the following conditions are met:

- The services should have the same character as services that take place between non-related companies or such services are essential to Japan's activities.
- There is a written service agreement.
- The services were requested by the Japanese corporation.
- The rendering of services is documented with evidence (e.g. requests for services from the Japanese subsidiary, regular invoices sent by the foreign affiliate).
- The service charges are reasonable.

J

Group taxation

Consolidated tax regime

Under the consolidated tax regime, a consolidated group can report and pay national corporate income tax on a consolidated basis. A consolidated group may be formed by a Japanese parent company and its 100% owned (directly or indirectly) Japanese subsidiaries. The taxpayer may file an application to elect a consolidated group filing for tax purposes, but the election must include all of the parent's eligible subsidiaries. Once the election is made, the consolidated filing, in principle, cannot be revoked unless there is a specific event, such as an ownership change, that causes the qualifying conditions of a consolidated filing to fail or an application to discontinue the consolidated group has been approved by the Commissioner of the National Tax Agency (NTA).

The taxable income of the consolidated group is computed on a consolidated basis by aggregating the taxable income or losses of each member of the consolidated group followed by the consolidation adjustments. Profits from intra-group transactions, except for transfer of certain assets as defined, should be included in the aggregate taxable income. Gains or losses from the intra-group transfer of certain assets are deferred.

Pre-consolidation tax losses of a subsidiary can be carried forward into a consolidated tax group if certain conditions are met, but may only be offset against taxable income of the subsidiary for the calculation of consolidation income.

The consolidated national corporate income tax liability is determined by applying the corporate income tax rate to the consolidated taxable income and adjusted for consolidated tax credits. The total tax liabilities are allocated back to each member company. The parent company files the consolidated return and pays the national corporate income tax for the group; however, each member company remains jointly and severally liable for the consolidated group's total national corporate income tax liability.

Local corporate income taxes levied on member companies are paid on a separate company basis, but the amount of local tax payable may be affected because of the consolidated filing.

Japan

Group taxation regime

A group taxation regime is applicable to domestic companies that are wholly owned by a domestic company, foreign company, or individual ('group companies'). Unlike the consolidated tax regime, the group taxation regime automatically applies to group companies.

The key points of this regime are summarised as follows:

- The recognition of capital gains or losses from the transfer of certain assets (including the transfer of assets as a result of a non-qualified or taxable merger) between group companies is deferred until the asset is transferred to another group company or a non-group company. The scope of assets is the same as that under the tax consolidation system (i.e. fixed assets, land, securities, monetary receivables, and deferred expenses [excluding securities for trading purposes and assets with a book value of less than JPY 10 million]).
- Where a donation occurs between group companies, there are no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee). Note that this treatment is not applied to a group company owned by an individual. This is consistent with the treatment of a donation between members of a consolidated tax group.
- A dividend received from a group company can be fully excluded from taxable income without any reduction for allocable interest expense. This is consistent with the treatment of dividends between members of a consolidated tax group.

A group company that would otherwise qualify as an SME on a stand-alone basis is not eligible for SME benefits (e.g. reduced corporate tax rate, preferable allowable ratios for deductible portion of bad debt provisions, partial deductibility of entertainment expenses, carryback of tax losses) if the SME is owned by a parent company or two or more parent companies of the group that has paid-in capital of JPY 500 million or more.

Where a corporation that is a member of a 100% group is in the process of liquidation and is expected to be dissolved, any loss from the impairment or devaluation of the shares of the liquidating corporation cannot be recognised by the parent company as a tax deductible expense.

Transfer pricing

If a corporation that is subject to corporation tax sells property to or buys property from a foreign-related person, or provides services or conducts other transactions with a foreign-related person, and consideration is received or paid by the corporation, the transaction is required to be carried out at an arm's-length price for corporation tax purposes.

A foreign-related person is a foreign corporation that maintains certain special relationships with the subject corporation, such as parent-subsidiary, brother-sister, or substantial control relationship.

The arm's-length price for the sales or purchase of inventory may be determined using one of the following methods:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Berry Ratio method.
- Other method (i.e. profit split method and transactional net margin method [TNMM]).

The 'most appropriate method' should be applied in order to calculate the arm's-length price.

An advanced pricing agreement (APA) system is available to confirm the arm's-length pricing system proposed by a taxpayer. In general, corporations entering into an APA are advised to file a request for mutual agreement procedures (MAP) in order to obtain the agreement of the competent authorities of each country.

In October 2015, the OECD released the final BEPS reporting package with Action 13 relating to transfer pricing and related documentation. Taking into consideration the compliance costs for taxpayers along with increased transparency, the 2016 Japan Tax Reform Proposal requires the following documentation in order to adhere with the BEPS project:

Document	Required Information	Submission Deadline	Applicability
Country-by-Country (CbC) Report	Country revenue, pre-tax income, taxes payable, etc.	Must be e-filed within one year of the last fiscal day of the ultimate parent	Applicable for fiscal year of the ultimate parent entity beginning on or after 1 April 2016
Master File	Group company structure, business outline, financial conditions, etc.	By due date of tax return, to retain for seven years	Applicable for corporate tax in fiscal years beginning on or after 1 April 2017
Local File	Transfer pricing documentation		

Thin capitalisation

Interest paid on debt to controlling foreign shareholders is disallowed to the extent the average balance of debt on which that interest is paid is more than three times the equity of controlling foreign shareholders.

Interest expense deduction limitation

The deductible portion of a corporation's net interest expense to a related party is restricted to 50% of the adjusted income. The net interest is calculated as interest expense to related parties less corresponding interest income. The adjusted income is defined as taxable income, adding back interest expense, depreciation expense, and exempted dividend income but excluding extraordinary income or loss.

Anti-tax haven (controlled foreign company or CFC) rules

Undistributed profits of a foreign subsidiary (i.e. CFC) located in a tax haven are included in the Japanese parent company's taxable income under certain conditions.

Tax havens are defined as certain countries or territories that do not impose corporate income tax or that tax the income of a foreign subsidiary at a rate of less than 20%.

A Japanese corporation owning a 10% or more direct or indirect interest in a CFC is required to include its pro-rata share of the taxable retained earnings of the CFC in its gross income under certain circumstances.

A dividend paid by a CFC is not deductible when calculating its undistributed income.

Tax credits and incentives

Foreign tax credit

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant's taxes for foreign income taxes paid directly.

Japan

Creditable foreign taxes are defined as taxes that (i) are incurred directly by the taxpayer; (ii) are levied by foreign governments and local authorities in accordance with local tax laws; (iii) are levied on corporate income; and (iv) have the same characteristics as Japanese income tax, corporation tax, and local income-based taxes. A tax for which a refund can be claimed optionally by the taxpayer after the tax payment, or a tax whose payment grace period can be decided by the taxpayer, is not regarded as a foreign tax.

In order to prevent the credit from reducing corporation tax on Japan-source income, certain limitations are set on the amount of foreign taxes that can actually be credited. The ceiling is 35% for the foreign taxes paid in the tax years beginning on or after 1 April 2012.

A foreign tax credit is not applicable for enterprise tax purposes, although foreign branch income attributable to a business executed outside Japan is exempt from enterprise tax.

Generally speaking, the foreign tax credit system does not apply to the extent the dividend income from the foreign subsidiary is subject to the dividend exemption system.

Foreign corporations with a PE in Japan should note that when a foreign corporation's PE in Japan is subject to taxation in Japan as well as in jurisdictions other than its country of residence, double taxation may arise. To alleviate an unfair tax burden, a foreign tax credit regime is also applicable to PEs in Japan similar to that which applies to Japanese corporations. However, foreign tax (including WHT) paid in the enterprise's country of residency would not, in principle, be creditable under consequential changes to the foreign tax credit regime.

Tax credit for research and development (R&D) cost

The R&D tax incentive is the largest incentive in terms of tax benefit in the Japanese corporate tax system. Thus, the Tax Commission Report, on one hand, wanted to limit the tax revenue cost of the incentive, while also maintaining the benefit from a 'competitiveness' perspective. Thus, the trend in the legislation is to reward increases in R&D spending rather than support existing spending, which has been the case in the 2014 Tax Reform and is continued in the 2015 Tax Reform Act. In addition, there is focus on the 'special R&D', which is the type of R&D that is considered likely to develop innovative basic research. This is illustrated as follows:

The amendments apply for tax years beginning on or after 1 April 2015.

Category	Before amendments	After amendments
Permanent incentive (gross R&D cost base)	A credit against national corporate tax is allowed.	Limitation of credit: Reduced to 25% of corporate tax before credit.
	Credit amount: 8% to 10% of the gross R&D cost (rate depends upon the R&D costs, including special R&D costs).	Carry over: Carry over is no longer applicable.
	Limitation of credit: 30% of corporate tax before credit.	
	Carry over: Excess R&D cost may be carried over for one year.	

Category	Before amendments	After amendments
Special R&D cost based credit	<p>Joint R&D with or contracted R&D by university or public research institution.</p> <p>Credit amount: 12% of the gross special R&D cost.</p>	<p>Scope of special R&D cost: Royalty payments to SMEs shall be included in special R&D cost.</p> <p>Credit amount: Increased to 30% of the gross special R&D cost for the joint R&D with university or public research institution (20% for the joint R&D with other non-public corporations).</p> <p>A credit against local inhabitant's tax is also allowed for SMEs.</p> <p>Limitation of credit: 5% of corporate tax before credit (separately from other gross R&D cost credit).</p>
Gross R&D cost based credit for an SME	<p>A credit against national corporate tax and local inhabitant's tax is allowed.</p> <p>Credit amount: 12% of the gross R&D cost.</p> <p>Limitation of credit: 30% of corporate tax before credit.</p> <p>Carry over: Excess R&D cost may be carried over for one year.</p>	<p>Limitation of credit: Reduced to 25% of corporate tax before credit.</p> <p>Carry over: Carry over is no longer applicable.</p>
Temporary incentive (incremental R&D cost base)	<p>A credit against national corporate tax is allowed for a tax year commencing from 1 April 2013 to 31 March 2017.</p> <p>Credit amount: A credit against national corporate tax is allowed for the higher of (i) and (ii) but subject to the limitation of 10% of tax liability before the credit.</p> <p>i. 5% to 30% of incremental R&D costs or</p> <p>ii. R&D costs in excess of 10% of the average sales, times the 'tax credit ratio' (ratio is a mechanical calculation that increases the credit depending upon the relationship between the amount of R&D costs and average annual sales).</p> <p>Limitation of credit: 10% of corporate tax before credit.</p>	<p>Same as before amendments.</p>

Investment incentive to improve production efficiency

An investment incentive is available for corporations for investments in production facilities that improve production efficiency. Corporations eligible for the incentive are limited to enterprises that acquire new facilities to improve production efficiency. When certain requirements are met, a corporation is allowed to claim 25%, 50%, or 100% depreciation of assets when the assets are placed in service, or 2%, 3%, 4%, or 5% tax credit (limited to 20% of the corporate tax liability before the credit). This incentive is effective for assets acquired on or before 31 March 2017.

Special tax treatment for investment in certain equipment

SMEs filing 'blue form' tax returns may elect, under certain conditions, to claim accelerated depreciation of 100% of the base acquisition cost or a special tax credit

Japan

equivalent to 10% of the base acquisition cost on designated equipment to the extent that it is acquired between 1 April 2014 and 31 March 2017. The maximum tax credit is limited to 20% of the taxpayers' corporate tax liability.

The 'Incentive for New Investment into Production Facilities' is applicable to any industry that invests in new production facilities (30% special depreciation or 3% tax credit on acquisition cost, up to 20% of corporate tax liability, etc., and subject to certain conditions). In addition, an investment incentive applies to SMEs that invest in equipment and furnishings pursuant to certain facility remodelling (30% special depreciation or 7% tax credit on acquisition cost, up to 20% of corporate tax liability [one-year carryforward of any excess], and subject to certain conditions). The SME tax incentive is granted to an SME engaged in the distribution, retailing, service, and/or agriculture business. This incentive is effective for tax years beginning on or after 1 April 2013 through 31 March 2017.

Employment promotion taxation

If qualifying corporations increase the number of employees subject to employment insurance by 10% or more and by five people (two in the case of SMEs) or more from the end of the prior tax year, the qualifying corporations will be eligible for a tax credit equal to the increased number of the employees multiplied by JPY 400,000 with the limitation of 10% (20% in the case of SMEs) of the tax liability before the credit, subject to certain conditions for the tax years that commence from 1 April 2011 (excluding years ending before 30 June 2011) to 31 March 2018.

Another tax incentive allows an employer corporation to claim a tax credit based on increases in salary payments (tax credit equal to 10% of the increased salary amount with a limitation of 10% [20% in case of SME] of the tax liability, subject to certain conditions). The employer corporation is allowed to claim a credit by either increased employment incentive or employment promotion incentive as explained above. To take a credit, the employer corporation must be a 'blue form' filer. The credit is effective for tax years commencing from 1 April 2013 to 31 March 2018.

Incentive for venture capital investment

To assist venture capital investment, certain procedures to accredit venture capital partnerships were legislated in the Industrial Competitiveness Enhancement Law. Investment tax incentives were also introduced to allow corporate investors the ability to take a loss from a venture capital investment on an accelerated basis compared to current rules. A qualified investor is allowed to deduct a tax reserve for the investment loss at up to 80% of the book value of the investment. This incentive is effective for investors into a qualified partnership designated on or before 31 March 2017.

Incentive for corporate reorganisation

To promote business reorganisation within the same industry in order to improve business profitability, a corporation can apply to be a 'qualified' corporation by submitting a business reorganisation plan pursuant to the Industrial Competitiveness Enhancement Law. A qualified investor is allowed to deduct a tax reserve for the investment loss at up to 70% of the book value of the investment or loan. This incentive is effective for corporations designated on or before 31 March 2017.

Incentives for the revitalisation of local 'hubs'

A taxpayer is eligible for certain tax incentives if it relates to or expands certain kinds of operations in local areas (generally other than Tokyo, Osaka, or Nagoya). Details as to the kinds of operations eligible will be included in a future Revised Regional Revitalization Law.

Any qualifying investments have the following depreciation incentives with respect to investments in buildings:

Depreciation incentives	Investment pursuant to an approved relocation plan	Investment pursuant to expanding an existing operation
Type of depreciation (if plan is approved prior to 31 March 2018 and asset is acquired within two years of approval).	Additional first year depreciation of 25% of the acquisition cost (depreciation is accelerated).	Additional first year depreciation of 15% of the acquisition cost (depreciation is accelerated).

Alternatively, a taxpayer may choose to take a tax credit rather than accelerated depreciation, as follows:

Tax credits	Investment pursuant to an approved relocation plan	Investment pursuant to expanding an existing operation
Tax credits (if plan is approved and asset acquired prior to 31 March 2017)	Acquisition costs x 7%	Acquisition costs x 4%
Tax credits (if plan is approved prior to 31 March 2018 and asset is acquired within two years of approval)	Acquisition costs x 4%	Acquisition costs x 2%

Minimum investment is JPY 20 million for large corporations and JPY 10 million for SMEs.

In addition, an employment related tax credit is allowed for increased employment in a local hub if hired within two years of the plan approval. The credit shall be JPY 500,000 times the number of increased employees at a maximum (if certain conditions are not met, the credit becomes JPY 200,000 per employee).

In total, the amount of the above tax credits can only offset up to 30% of a corporation's tax liability.

Local government contributions

As part of the Regional Revitalization Act, 'blue form' corporate tax filers who make donations to approved regional donation plans up until 31 March 2020 will be able to claim a tax credit against corporate, enterprise, and inhabitant's taxes in addition to taking a deduction from the corporate tax. This is known as the corporate hometown tax, or *furusato nozei* system.

National strategic zones

For a 'blue form' filing corporation with an approved plan for qualified investment in a National Strategic Special Area up until 31 March 2018, a deduction of 20% of income is available for five years from the date of establishment.

Withholding taxes

Tax treaty network

As of 1 May 2016, Japan has entered into 65 tax treaties with 96 countries and/or regions. Companies making certain payments are required to withhold income taxes using the following rates.

Notes

1. The tax treaty rates apply only to corporate shareholders. The applicable treaty should be checked for conditions required to claim the reduced rate. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
2. The applicable treaty should be reviewed because certain tax treaties exclude film royalties and/or gain from copyright transfer from taxable income. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
3. 15% for publicly traded shares (minority interest [less than 3% ownership]) and investment trusts. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
4. Interest on bank deposits and/or certain designated financial instruments is subject to a 15% national WHT and 5% local inhabitants WHT (20% combined). Taxation of such interest is fully realised by tax withholding, so resident individuals are not required to aggregate such interest income with other income. Interest on loans made by resident individuals is not subject to WHT; instead, it is taxed in the aggregate with other income. Such WHT is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
5. Dividends, interest, and royalties earned by non-resident individuals and/or foreign corporations are subject to a 20% national WHT under Japanese domestic tax laws in principle. An exceptional rate of 15% is applied to interest on bank deposits and certain designated financial instruments. Interest on loans, however, is taxed at a 20% rate. A special exemption from WHT applies to certain long-term corporate bonds issued to non-residents in foreign countries. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
6. Tax treaties with many countries provide reduced tax rates, as indicated. Some treaties, however, provide higher tax rates (e.g. Brazil, Thailand) or do not provide rates (e.g. Egypt, New Zealand). In these instances, rates specified under Japanese domestic tax laws apply. Each treaty should be consulted to see if a reduced rate for dividends (in the case of substantial holdings) is applicable.
7. The tax treaty was concluded mainly for the purpose of information exchange.
8. The tax treaty with Brazil provides a 25% tax rate for certain royalties (trademark). However, the WHT rate cannot exceed 20.42% (including the income surtax of 2.1%) on any royalties to be received by a non-resident taxpayer of Japan under Japanese income tax law. Film royalties are taxed at 15%. Any other royalties are taxed at 12.5%.

Japan

9. The treaty with the former Czechoslovakia is applied to the Czech Republic and the Slovak Republic. It stipulates that cultural royalties are tax exempt.
10. Film royalties are taxed at 20%, and other royalties are taxed at 15%.
11. Cultural royalties are tax exempt.
12. The rate of 10% for royalties includes consideration for technical services.
13. The rate for royalties is reduced from 10% to 5% by Protocol.
14. Dividends received from subsidiaries, by parent companies that have met certain conditions, are exempt from WHT.
15. Dividends received from subsidiaries for which the parent company has over 50% shareholding are tax exempt. Interest received by government and other specific entities, or paid as a consequence of sale on credit of any equipment, merchandise, or service, is tax exempt.
16. A 5% rate is applied to a company that has over 50% shares with direct voting rights, and a rate of 7.5% is applied to a company that has over 25% shares with direct voting rights.
17. Film royalties are taxed at 15%. Any other royalties are taxed at 10%.
18. Cultural royalties are taxed at 10%.
19. Royalties paid for the use of certain equipment are taxed at 5%.
20. Interest paid to financial institutions is tax exempt, as well as film and copyright royalties. Patent royalties are subject to a 10% rate.
21. If certain conditions for beneficial owners are met, dividends are taxable only in the contracting state of which the beneficial owner is a resident.
22. Dividends paid by a corporation that is engaged in industrial undertakings are taxed at 15%. Interest paid to financial institutions is taxed at 10%.
23. Interest paid to financial institutions is taxed at 10%.
24. The treaty with the former USSR is applied to Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. It stipulates that cultural royalties are tax exempt.
25. The new treaty was signed but has not yet become effective.
26. The treaty will apply with respect to taxes levied on the basis of a taxable year for taxes for any taxable years beginning on or after 1 January 2016 and with respect to taxes not levied on the basis of a taxable year for taxes levied on or after 1 January 2016.
27. The treaty will apply with respect to taxes levied on the basis of a taxable year for taxes for any taxable years beginning on or after 1 January 2017 and with respect to taxes not levied on the basis of a taxable year for taxes levied on or after 1 January 2017.

Tax administration

Taxable period

The tax year is the corporation's annual accounting period specified in its articles of incorporation. A Japan branch of a foreign corporation must use the same accounting period that is adopted by the corporation in its home country.

Tax returns

Corporate income tax returns (i.e. the national corporation tax return, enterprise tax return, and local inhabitants' tax return) are self-assessment tax returns.

If a corporation meets certain conditions, such as keeping certain accounting books, and makes an application for it in advance, it is allowed to file a 'blue form' tax return. A 'blue form' filing corporation may benefit from loss carryforward and other benefits.

A corporation (including a branch) is required to file the final tax return within two months after the end of its annual accounting period. If a corporation cannot file the final return because of specific reasons, the due date of final return may be extended for one month (two months in case of consolidated tax filing) with the tax authority's approval.

Payment of tax

Income taxes payable on the final corporate income tax return should be paid on or before the filing due date of the final tax returns (usually two months after the end of the corporation's accounting period). If an extension of time for filing is granted, the taxes may be paid on or before the extended due date with interest accrued at a rate of 1.8% (for the year 2016) *per annum* for the period from the day following the original due date (i.e. two months after the end of an accounting period) to the date of the actual payment.

Provisional tax payments are required for a corporation that has a fiscal period longer than six months. Provisional taxes generally are computed as one-half of the tax liabilities for the previous year, but they may be reduced by the filing of interim tax returns that reflect semi-annual results of the operations. The provisional tax payment is required to be made within two months after the end of the sixth month of the corporation's accounting period.

Penalties

If the tax return is filed late, a late filing penalty is imposed at 15% to 20% of the tax balance due. In the case that a corporation voluntarily files the tax return after the due date, this penalty may be reduced to 5%.

An under-payment penalty is imposed at 10% to 15% of additional tax due. In the case that a corporation amends a tax return and tax liabilities voluntarily after the due date, this penalty may not be levied.

Under the 2016 Tax Reform, the above rate will be increased to 15% (for non-filing) and 10% (for amendment filing) once the tax audit notice is received. The changes will apply to both national and local taxes for which the filing due date will fall on or after 1 January 2017.

In addition, interest for the late payment of tax is levied at 2.8% *per annum* for the first two months and increases to 9.1% *per annum* thereafter (for the year 2016).

Consolidated taxation

The parent company will file the consolidated tax return and pay national corporate income tax for the group. The consolidated tax return and payment due dates are the same as previously discussed; however, the due date of the final return may be extended for two months.

For local corporate income taxes, each member of the consolidated group must separately file the returns and pay the taxes.

Tax audit process

Generally speaking, corporate tax audit is performed in cycles of three to five years' duration. However, this period may be shortened in the case that some significant tax matters were pointed out in the prior audit and so on. If taxpayers request a downward correction, a tax audit will be performed to make sure of it.

With regard to tax audit procedures, tax laws have not clarified them thus far. Prior to conducting a tax audit, in principle, tax agents are required to notify taxpayers, and, upon completion of tax audits, tax agents are required to provide to taxpayers a brief written summary of their findings, etc.

Note that due to the 2015 Tax Reform, once an audit is complete, the basic principle is that a second audit is not allowed. However, if newly acquired information is obtained by the tax authorities that lead them to conclude that the reported taxable income should have been different, then the tax authorities can conduct another audit of the taxpayer. This limitation on the ability of the tax authorities to conduct a second audit only applies if the first audit was conducted on-site. If a 'desk audit' is only conducted, where the tax authorities do not conduct the audit on-site, no limitation applies.

Statute of limitations

The statute of limitations to request a downward correction of prior year tax liabilities is five years (six years for transfer pricing) from when the original tax return was filed.

The statute of limitations with regard to upward corrections by the tax authorities is also five years (six years for transfer pricing).

Japan

Topics of focus for tax authorities

Tax authorities are often focusing on cross-border, inter-company transactions (i.e. transfer pricing or donation issues), PE, and significant group restructuring, among other issues. Any developments in discussion on the G20/OECD BEPS project will also be of great interest for Japanese authorities.

Other issues

Requirement for banks to collect and remit information regarding bank accounts owned by non-residents

The 2015 Tax Reform Act introduced a tax reporting system under which individuals are required to report information to the relevant branch of the financial institution, which will, in turn, submit such information to the tax authorities in Japan.

The person who contracts with the financial institution for a deposit to a bank account in Japan on or after 1 January 2017 will be required to report the relevant information to the bank, including (i) name, (ii) address, (iii) date of birth, and (iv) resident country. If the resident country is outside Japan, the individual will be required to report the taxpayer identification number in the taxpayer's resident country. The financial institution will be required to report the individual information collected as well as details regarding the account (balances, transactions, etc.) as of 31 December by the following 30 April.

Significant developments

There have been no significant corporate tax developments in Jersey during the past year.

Taxes on corporate income

Resident companies are generally taxed on their worldwide income. A permanent establishment (PE), e.g. a branch of a company, is taxed on profits attributable to the PE. Non-resident companies are taxable on Jersey real estate income.

Companies pay income tax at a rate of 0%, 10%, or 20% on taxable income. The general rate applicable is 0%; the 10% and 20% rates apply to certain companies/income streams as explained in this section. The tax rate applies to the company as a whole, the only exception being Jersey-source real property income, which is taxed at 20% regardless of the classification of the real property holding company.

Certain Collective Investment Funds and Securitisation Vehicles can elect to be exempt from tax on income, other than income from Jersey land or property, for an annual fee of 500 British pounds sterling (GBP).

The 20% tax rate applies to Jersey-based utility companies, such as telephone, gas, and electricity companies. Additionally, income from Jersey real estate, including rental income, property development profits, and income from exploiting Jersey land (e.g. quarrying activities) is subject to tax at 20%. Companies involved in oil importation and supply are also taxed at 20%.

The 10% rate applies to financial services companies. A company is defined as a financial services company if:

- it is registered under the 1998 financial services law to carry out investment business, trust company business, or fund services business as an administrator or custodian in relation to an unclassified or an unregulated fund
- it is registered under the 1991 banking business law, or
- it holds a permit under the collective investment funds law of 1988 as an administrator or custodian.

The 0% rate applies to all entities that are not exempt, financial services entities, or utility companies, including fund managers who do not hold any of the permits mentioned above.

Local income taxes

There are no local government taxes on income.

Jersey, Channel Islands

Corporate residence

A company is regarded as tax resident in Jersey if it is incorporated in Jersey or if it has its place of central management and control in Jersey. However, a Jersey incorporated company that is managed and controlled elsewhere will not be regarded as a Jersey resident, provided certain conditions are satisfied.

Permanent establishment (PE)

Under domestic legislation, a PE, in relation to a company, includes a branch of the company, a factory, shop, workshop, quarry, or a building site, and a place of management of the company; however, the fact that the directors of a company regularly meet in Jersey shall not, of itself, make their meeting place a PE.

For a definition of PE contained in Jersey's double tax agreements (DTAs), the relevant clause and agreement should be reviewed. In general, it may include a branch, management, or other fixed place of business, but not an agency, unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts or has a stock of merchandise from which the agent regularly fills orders.

Other taxes

Goods and services tax (GST)

The standard rate of GST is 5%.

Companies with taxable supplies of more than GBP 300,000 *per annum* are required to register for GST.

International service entity (ISE) status

To address the difficulty of irrecoverable input tax in the financial services sector, and to mitigate the administrative cost of GST for exporters in general, Jersey has introduced the concept of an ISE. Where an entity qualifies for this status:

- it will not be required to register for GST
- services to it will be zero-rated (i.e. treated as an export) where the supply exceeds GBP 1,000, and
- input tax on purchases of less than GBP 1,000 may be reclaimed.

ISE status is automatically available to a wide variety of service providers and administered entities based in Jersey, upon application and payment of the relevant fee, including licensed banks, licensed trust service providers, licensed fund administrators, fund managers, and managed managers.

Other entities not automatically eligible under one of the categories above, including companies, partnerships, trusts, unrecognised funds, and special purpose vehicles, may still obtain ISE status if they fulfil certain criteria.

The ISE may, at the election of the company, be included on a list maintained by the Comptroller of Taxes. The list will refer either to the entity itself or (e.g. for administered entities) a class of entities as submitted by the administrator.

Customs duties

A common customs tariff is applicable on all goods imported from outside the European Union (EU). The amount is dependent on what the goods are and where they are imported from.

Excise taxes

An excise duty tax is payable on imported alcohol, tobacco, and fuel at varying rates.

Property taxes

There are no property taxes in Jersey apart from income tax on Jersey-source property income, stamp duty on Jersey real estate, and rates levied by each parish.

Stamp duty

Stamp duty is payable on the purchase or transfer of Jersey real estate, with rates ranging from 0% to 7%. Mortgages secured by a charge over Jersey real estate are subject to stamp duty at rates of up to 0.5% of the amount borrowed. No stamp duty is payable on the transfer of shares.

Land transaction tax

A land transaction tax applies when shares in companies are transferred and the ownership of which confers a right of occupation of residential real estate in Jersey. The amount of land transaction tax payable is equal to the stamp duty that would have been suffered if the real estate were held directly.

Payroll taxes

Employers are required to deduct tax from salaries paid to employees and remit this to the tax authority to settle the employees' tax liability. Under the Income Tax Instalment System (ITIS), the tax authority issues each employee with an effective rate notice to pass to their employer indicating the deduction rate. If no such notice is provided, the default rate of deduction applied is 20%.

Social security contributions

Employers are responsible for paying employer social security contributions at a rate of 6.5% on each employee's gross earnings, up to the monthly standard earnings limit of GBP 4,094 for 2016 (annual limit GBP 49,128). Employer social security contributions of 2% apply to employees' earnings above the standard earnings limit, up to an upper earnings limit (GBP 13,542 monthly/GBP 162,504 annually).

A long-term care fund has been set up to help those who need long-term care.

Income taxpayers pay into this fund from 1 January 2015 with a new long-term care contribution. Those not liable for income tax do not have to pay the contribution.

The maximum long-term care contribution rate was 0.5% in 2015 and is 1% in 2016 of total income (taking into account allowances and reliefs), but it's likely that one's rate will be less than the maximum.

Branch income

Branch income is taxed at the rate applicable to the company. No further tax is withheld on the transfer of profits abroad.

Income determination

Inventory valuation

Inventory is valued at the lower of historical cost or net realisable value. The last in first out (LIFO) method is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

Capital gains

Capital gains are not subject to tax in Jersey.

Jersey, Channel Islands

Dividend income

Under the previous rules, an investment holding company was entitled to claim management expenses. Where an investment holding company was in receipt of a dividend from another Jersey company that carried a tax credit (i.e. a dividend that has been paid out of profits subject to the 10% or 20% tax rates), the investment holding company could set off the management expenses against the dividend and receive a repayment of the tax credit. This rule has been utilised by, amongst others, external investors to create acquisition structures that can result in significant amounts of corporate income tax being repaid.

To address this type of structuring, the 2016 Budget proposed that no tax credits will be repaid in respect of any dividend received by a company taxable at 0% on or after the day that the Draft 2016 Budget was lodged.

Any dividends received before 20 October 2015 will be treated in accordance with the Income Tax Law as it existed prior to that date. Any dividends received on or after 20 October 2015 will be dealt with under the Income Tax Law, as amended.

Furthermore, under the current rules, a financial services company receiving a dividend from which tax has been deducted by another Jersey company is entitled to a tax credit. The calculation of the tax credit available to a financial services company under these circumstances has been amended so as to limit the credit to the lower of the tax deducted from the dividend or the gross dividend at the rate of 10%.

Stock dividends

Stock dividends are not taxed as income.

Interest income

Interest income forms part of taxable income and is taxed at the rate applicable to the company.

Rental income

Income from Jersey real estate, including rental income, property development profits, and income from exploiting Jersey land (e.g. quarrying activities) is subject to tax at 20%.

Foreign income

Income tax is levied on foreign branch income when earned and on foreign dividends, interest, rents, and royalties. Double taxation is mitigated by either the granting of unilateral relief to the extent of taxing foreign income net of foreign taxes or by treaty relief, which gives credit for foreign tax. Concessional credit relief might be granted in certain limited circumstances upon application.

Jersey currently has DTAs with Australia, China, Denmark, Estonia, Faroes, Finland, France, Germany, Greenland, Guernsey, Hong Kong, Iceland, Isle of Man, Luxembourg, Malta, New Zealand, Norway, Poland, Qatar, Singapore, Sweden, the United Arab Emirates, and the United Kingdom. The scope varies from agreement to agreement, but most are of limited scope.

Deductions

Normally, business deductions are allowed if they are incurred wholly and exclusively for trade purposes.

Depreciation and depletion

Capital allowances are available using the diminishing-balance method on machinery and equipment, including vehicles, at a rate of 25%. For this purpose, all such assets are pooled, and the allowance is calculated by reference to the value of the pool.

On disposal of an asset, the lower of cost and sale proceeds of the asset is deducted from the pool. A balancing charge is levied if the proceeds exceed the balance of the pool.

Motor vehicles over a certain value and greenhouses are subject to special rules and are not pooled with other assets.

By concession, an alternative is to claim the full cost of replacement in the year of replacement.

Capital allowances are not applicable to buildings or the depletion of natural resources.

Goodwill

Goodwill expenditure is non-deductible for Jersey income tax purposes.

Start-up expenses

Once a company has commenced its trade, start-up expenditure will be allowable for tax purposes if it is not capital in nature and has been incurred wholly and exclusively for trade purposes.

Interest expenses

Interest expense will be allowable if it is incurred for the purposes of a trade or is paid in connection with a loan taken out for a qualifying purpose. Interest relief may be restricted if the interest exceeds the amount that could reasonably be expected to be charged on a commercial basis.

Bad debts

Trading bad debts are normally allowable for Jersey income tax purposes unless they relate to a general provision.

Charitable contributions

Charitable contributions are generally non-deductible for tax purposes, unless the contribution itself provides a benefit to the trade (i.e. marketing).

Fines and penalties

Fines and penalties are generally non-deductible for tax purposes.

Taxes

Local income tax paid is not deductible in computing taxable income. ISE fees paid are a tax-deductible expense.

Net operating losses

No distinction is drawn between different types of income or losses arising from different trades or sources, apart from Jersey property income, which is separately streamed.

Unrelieved losses may be carried forward and used to offset profits in future accounting periods. Alternatively, losses can be group relieved to group companies in the same income tax rate band.

There are now only very limited circumstances where a company can obtain relief for carrying back losses.

Jersey, Channel Islands

Payments to foreign affiliates

There are no withholding taxes (WHTs) on patent royalties paid by Jersey companies to non-residents.

Group taxation

Group taxation is not permitted in Jersey. However, there are provisions for group relief between group companies subject to the same rate of tax. It is not possible to relieve losses between two companies taxed at different rates. It is not possible for group companies to relieve losses from Jersey property rental income. Also, it is only possible to relieve losses from Jersey property development profits and from quarrying activities against profits arising from the same activities.

Transfer pricing

There are no specific rules in relation to transfer pricing in Jersey. There is, however, a general anti-avoidance provision in Jersey tax law. It may be applied by the Comptroller of Taxes if a transaction or a combination or series of transactions is entered into for the avoidance or reduction of Jersey income tax. In addition, interest relief may be restricted where the interest incurred exceeds the amount that could reasonably be expected to be charged on a commercial basis.

Thin capitalisation

There are no specific rules in relation to thin capitalisation in Jersey.

Controlled foreign companies (CFCs)

Jersey has no CFC legislation.

Tax credits and incentives

There are generally no special incentives for locally owned businesses in view of the low rate of tax.

Foreign tax credit

There is no local foreign tax credit regime in Jersey. DTAs need to be considered as appropriate. Unilateral relief may be available under very limited specific circumstances.

Withholding taxes

There are no WHTs on dividends or interest paid by Jersey companies.

Tax administration

Taxable period

The tax year is the calendar year. Companies are assessed on income earned in respect of the financial year that ends within the applicable calendar year of assessment.

Tax returns

The system relies on the filing of a return of information with the Jersey tax authority, which then raises an assessment (in the case of companies taxed at 10% or 20% on all or part of their income). Companies taxed at 0% are required to submit a tax return but are not required to submit accounts and tax computations.

There is a filing deadline for the corporate return of 6pm on 31 December following the year of assessment and a late filing penalty of GBP 250.

Payment of tax

For companies, tax is payable in arrears during the calendar year following the year of assessment.

Under the law, tax is due the day after the assessment is made. In practice, an estimated assessment is made by the tax office in February/March, which is then appealed based on information at that time. A payment is suggested based on the appeal with the company making a top up payment (if necessary) prior to the surcharge deadline (the Friday after the first Monday each December in the year following the year of assessment) or once a final computation has been produced and submitted.

Tax paid after a prescribed date (usually the first Friday in the December following the year of assessment) incurs a 10% surcharge.

Tax audit process

There is no formal tax audit process in Jersey.

Statute of limitations

There is no statutory limitation date, as such. If the Comptroller discovers profits have not been fully assessed, the Comptroller can issue an amended/additional assessment at any time not later than five years after the expiration of the year of assessment. If the error involves fraud, wilful default, or neglect, then the assessment can be revised at any time.

Topics of focus for tax authorities

The government has announced its intention to call for a tax disclosure amnesty in 2017.

Other issues

Intergovernmental agreements (IGAs)

On 13 December 2013, the Jersey authorities signed an IGA with the United States to facilitate tax reporting under the Foreign Account Tax Compliance Act (FATCA) regime. The Jersey authorities have also signed a similar IGA with the United Kingdom on 22 October 2013. The IGA with the United Kingdom is sometimes known as UK FATCA. This is because the information exchanged under the UK IGA is similar to that exchanged with the United States under FATCA. It's sometimes also referred to as CDOT (crown dependencies and overseas territories).

The overall aim of the UK IGA is to improve tax compliance through the automatic exchange of information.

Jersey is committed to the adoption of the global Common Reporting Standard (CRS) on Automatic Exchange of Information with effect from 1 January 2016, with first reporting of reportable financial accounts in 2017. The CRS will replace UK FATCA from 1 January 2016.

Tax information exchange agreements (TIEAs)

The Jersey tax authorities are committed to being tax transparent, with an increased emphasis on agreeing further DTAs and TIEAs. Jersey has signed TIEAs with 38 countries and is negotiating DTAs with several other jurisdictions (*see Foreign income in the Income determination section for a description of DTAs that have been signed*).

Significant developments

There have been no significant corporate tax developments in Jordan during the past year.

Taxes on corporate income

The corporate tax rates in Jordan are applied based on the industry/business activities from which the taxpayer generates income. According to the income tax law, the corporate tax rates are as follows:

- 35% for banks.
- 24% for telecommunication, insurance and reinsurance, financial intermediation companies (including exchange and finance leasing companies), companies that generate and distribute electricity, and companies that undertake mining raw material activities.
- 14% for the industrial sector.
- 20% for other companies.

Jordanian resident corporations are not subject to income tax on their worldwide income unless that income is raised from sources that originate and relate to Jordanian deposits and funds. For foreign branches of Jordanian resident corporations, all of the branch net income is taxed at a fixed rate of 10%.

Non-resident corporations are taxed through withholding tax (WHT) (*see the Withholding taxes section*).

Local income taxes

There are no local income taxes in Jordan.

Corporate residence

An entity will be deemed to be resident in Jordan if it has been established and registered in accordance with the provisions of the Jordanian legislation in force and (i) has an office or branch practicing management and supervision of its work in Jordan, (ii) whose management head office or actual office is located in Jordan, or (iii) which the government or any official or public institutions own more than 50% of its capital.

Permanent establishment (PE)

There are no clear provisions in the Jordan income tax law to define PE.

Other taxes

Sales tax

A general sales tax similar in operation to a value-added tax (VAT) is imposed at the rate of 16% on the following transactions:

- Sales of goods or services, or both.
- Importing any service or goods from outside Jordan or from the free zone areas and markets inside Jordan.

Special tax rates are applied on certain items (*see Excise tax below*).

A zero rate is applied to the export sales of goods and services outside Jordan, to the free zone areas and markets, to the Aqaba Special Economic Zone (ASEZ), and to development areas. A zero rate is also applied to sales inside Jordan of certain food items, books, magazines, manure, farm tractors, other agricultural tools, and salt.

Goods exempt from sales tax include fish, eggs, animals, bread, water packed in less than 5 litres, trees and plants, fruits, vegetable oils, honey, tea, sugar, gold, money, potash, emergency and fire vehicles, electricity, and pharmaceutical products.

Services exempt from sales tax include the following:

- Air transport.
- Education.
- Disposal of sewage and waste.
- Public health and similar activities.
- Activities of religious organisations.
- Activities of social organisations.

Customs duties

Certain goods imported to Jordan are subject to customs duties. Customs duties vary depending on the type and the origin of imported goods, as prescribed by the Customs Tariff. The Customs Tariff is based on the Harmonised Commodity Description and Coding System (HS Nomenclature).

Excise tax

Excise tax is the special sales tax that is imposed on certain goods and services, including cement, tobacco products, wines, spirits, cars, beer, fuel, and lubricants.

Property taxes

There is a property tax in Jordan that is paid annually, and the tax rate is determined by the municipality depending on the location and size of the property and, in case of buildings, depending on annual rental value.

Transfer property taxes

Transfer of property is subject to tax at a rate of 9% (registration fee at a rate of 5% and sale of property tax at a rate of 4%).

Stamp duty

Generally, an *ad valorem* stamp duty of 0.3% or 0.6% is levied.

Payroll tax

As per the income tax law, the payroll tax rates are imposed at progressive rates ranging from 7% to 20%.

Jordan

Social security tax

As of 1 January 2016, social security tax is imposed on the employer and the employee at rates of 13.75% and 7.25% (previously 13.25% and 7%), respectively, on the monthly salaries and certain allowances. The employer should report and withhold these contributions on a monthly basis.

Branch income

Operating branches of non-resident companies registered in Jordan are taxed based on their activities/business being carried out in Jordan at the prevailing corporate tax rates. Non-operating branches (regional or representative offices) of non-resident companies registered in Jordan are generally prohibited from carrying on any commercial activity in Jordan.

Income determination

Any income incurred in or from Jordan, regardless of the place of payment, shall be subject to tax. This includes, but is not limited to, income from:

- Professional services or activities.
- Interest, commissions, discounts, currency differences, deposit profits, and profits from banks and other legal resident persons.
- Royalties.
- Selling goods produced in Jordan, whether sold in Jordan or exported.
- Selling or leasing of movable properties located in Jordan.
- Leasing immovable properties located in Jordan and the income from key money.
- Selling or leasing intangible assets in Jordan, including goodwill.
- Insurance premiums due according to insurance and re-insurance agreements for risk in Jordan.
- All forms of telecommunication services, including international telecommunications.
- Transportation between Jordan and any foreign country.
- Re-export.
- Service compensation gained by a non-resident person from Jordan for a service provided to any person if the activity or the work related to this compensation was carried out or the output of this service was used in Jordan.
- Prizes and lottery if exceeds 1,000 Jordanian dinars (JOD), whether paid in cash or in kind.
- Any contract in Jordan, such as construction contracting, commercial agencies profits, and any other similar entities, whether their source is inside or outside Jordan.
- Any other source, which has not been exempted according to the provisions of the law.

The following shall be exempted from tax:

- The King's allocations.
- Income of public and official institutions and municipalities, excluding its income from any investment activities or annual surplus that the Council of Ministers decides, upon the recommendation of the Minister, to be subject to tax.
- Income generated by non-operating foreign companies, such as the regional office and the representative office, and which is received for its business abroad.
- Income of charity *awqaf* (public endowment) and income from the Orphans Development Fund.
- Income of unions, professional commissions, cooperation societies, and other societies legally registered and licensed from non-profit activities.

- Income of any religious, charity, cultural, educational, sports, or health institutions with a public character, not aiming to achieve profit.
- Income of exempted registered companies according to the companies' law, which is incurred from activities undertaken outside Jordan, except income derived from income sources subject to tax according to the provision of the law.
- Profits from stocks and dividends distributed by a resident to another resident, except profits of mutual investment funds incurred for banks, financial companies, main telecommunication companies, companies who undertake mining raw materials activities, and insurance and reinsurance companies, and juristic persons who undertake financial lease activities.
- Capital gains incurred inside Jordan, other than profits from assets subject to depreciation.
- Income derived from inside Jordan from trading in dividends and stocks, bonds, equity loan, treasury bonds, mutual investment funds, currencies, commodities in addition to futures and options contracts related to any of them, except that incurred by banks, financial companies, financial intermediation, main telecommunication companies, companies who undertake mining raw materials activities, and insurance and reinsurance companies, and legal persons who undertake financial lease activities.
- Income derived by non-Jordanian resident investors from sources outside Jordan that are initiated from their investments of their foreign capital, returns, profits, and proceeds from their investments' liquidation, returns, or selling of their projects, shares, or stocks after transferring them outside Jordan in accordance to the enacted Investment Law or any other law that will replace it.
- Compensation paid by insurance entities, other than what is paid as reimbursement for the loss of income from business activity or employment.
- Any income generated by banks and financial companies not operating in Jordan from banks operating in Jordan, such as deposit interest, commissions, and deposit profits from investment in interest-free banks and financial companies.
- Profits gained by re-insurance companies from insurance contracts concluded with insurance companies operating in Jordan.
- Income covered by double taxation agreements (DTAs) concluded by the government, to the extent of that which is covered under these agreements.
- The income of public or private pension funds and savings funds and any other funds approved by the Minister shall not be subject to tax if this income is derived from the employees and employers contributions.
- Certain types of local origin goods and services' exports outside Jordan may be totally or partially exempted from tax as set forth in regulations issued for this purpose.

Inventory valuation

Inventory is generally valued in accordance to the International Financial Reporting Standards (IFRS) accounting framework.

Capital gains

Capital gains are not taxable in Jordan, except for capital gains that are generated from depreciable assets and goodwill.

Dividend income

Dividend income received from a resident juristic person is not taxable in Jordan. However, dividend income received from a non-resident juristic person is subject to income tax.

Foreign income

Jordanian resident corporations are not subjected to income tax on their foreign income, except for foreign branches of Jordanian resident corporations, whereby, as per the income tax law, all of the branch net income is taxed at a fixed rate of 10%.

Deductions

Depreciation and amortisation

Depreciation and amortisation of fixed assets are determined using the straight-line method, provided that the provisions, procedures, and rates shall be defined by the depreciation regime issued for this purpose.

Goodwill

Purchased goodwill can be amortised using the straight-line method, provided that the provisions, procedures, and rates shall be defined by a regulation issued for this purpose.

Start-up expenses

There is no clear provision in the Jordan income tax law to define the treatment of start-up expenses; however, these expenses can be accepted at the establishment year.

Interest expenses

All interest charges are deductible for all taxpayers.

Bad debt

Bad debts are deductible under certain conditions.

Charitable contributions

A person may deduct any amount paid during the tax period as a donation to any of the governmental departments, public or official institutions, or municipalities from the gross income in the period in which the payment occurred.

Any person may deduct subscriptions and donations paid in Jordan without any personal benefit for religious, charitable, humanitarian, scientific, environmental, cultural, sport, and professional purposes if the Council of Ministers approves its character. The deductible amount according to the provisions of this paragraph shall not exceed 25% of the taxable income after deducting what is provided for in the first paragraph above and before making this deduction.

Fines and penalties

Fines and penalties are not acceptable expenses for income tax purposes.

Taxes

Taxes and fees paid on taxable activities are deductible.

Foreign income tax paid for income earned from sources outside Jordan that was subject to tax under the provisions of the tax law is deductible.

Other significant items

Approved expenses, including the following, are deductible:

- Insurance premiums.
- Amounts paid as civil compensation under contracts concluded by the taxpayer for the purpose of carrying out taxable activities.
- Amounts paid by the employer for employees to the Social Security Corporation.
- Hospitality and travel expenses incurred by the taxpayer.
- Expenditures for employees' medical treatment, meals during duty, travel, transport, and life insurance against work injuries or death.
- Marketing, scientific research, development, and training expenses.
- Expenses of prior tax periods that were neither defined nor final.

Net operating losses

Assessed losses incurred after 1 January 2015 may be carried forward up to five years. As for the assessed losses incurred before 1 January 2015, such losses may be carried

forward indefinitely, taking into consideration that these losses should be used first. The carryback of losses is not permitted.

Payments to foreign affiliates

A resident generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, taking into account the transfer pricing regime and the applicable WHT.

Group taxation

Group taxation is not permitted in Jordan.

Transfer pricing

Any disposition transaction that is not based on arm's length, is with parties that have mutual interests, and leads to a decrease in the taxable income is ignored, and the real profits are estimated according to the regular market value of the transactions.

Any illusionary or fake disposition transactions are ignored and the tax due is estimated as if there were no transactions.

Thin capitalisation

There is no thin capitalisation rule in Jordan. All interest charges are deductible for all taxpayers.

Controlled foreign companies (CFCs)

In the Jordanian tax laws, there is no definition of a CFC.

Tax credits and incentives

Jordan has had tax reductions for selective sectors categorised by development zones or free zone areas. Generally, these have required pre-approval.

Foreign tax credit

Foreign tax credit treatment is not available in Jordan.

Withholding taxes

Dividends paid

Dividends are not taxable in Jordan.

Non-resident WHT

With respect to services performed by a non-resident juristic or natural person, under the income tax law, "Amounts received or earned by the non-resident person from the Kingdom, which are derived from services provided to any person if the work or service related has been performed in the Kingdom or if the outcome of such services has been used in the Kingdom as well, is subject to tax in Jordan".

The WHT rate on services performed by a non-resident juristic or natural person is 10% of the payment.

Resident WHT

The following services are subject to resident WHT of 5% if provided by resident natural persons or civil companies: services provided by resident doctors, lawyers, engineers, auditors, experts, consultants, commissioners for taxpayers, insurance and reinsurance

Jordan

agents and brokers, arbitrators, customs brokers, commission brokers and agents, financial intermediaries, and commission shipping agents.

Tax treaties

Jordan has entered into income tax treaties with Algeria, Azerbaijan, Bahrain, Bulgaria, Canada, Croatia, the Czech Republic, Egypt, France, India, Indonesia, Iran, Iraq, Italy, South Korea, Kuwait, Lebanon, Libya, Malaysia, Malta, Morocco, the Netherlands, Pakistan, Palestine, Poland, Qatar, Romania, Sudan, Syria, Tunisia, Turkey, Ukraine, the United Kingdom, Uzbekistan, and Yemen.

Jordan has transportation agreements with many countries and is negotiating treaties with more countries.

Tax administration

Taxable period

A taxpayer's due tax shall be computed on a calendar-year basis.

A taxpayer who closes one's accounts on a date other than the end of the calendar year may calculate the due tax according to the fiscal year, provided that prior approval shall be obtained from the General Director of the income tax department.

A taxpayer who commences activity within the first half of the calendar year shall compute the due tax for the period from the establishment date until the end of the calendar year.

A taxpayer who commences activity within the second half of the calendar year may compute the due tax for the period from the establishment date until the end of the next calendar year.

Tax returns

Taxpayers are obligated to file tax returns before the end of the fourth month following the end of the tax period, including details related to income, expenses, exemptions, and tax due. Tax returns are submitted by any of the following means approved by the department according to terms and procedures to be determined by instructions:

- Registered mail.
- Banks.
- Any licensed company to undertake the tasks of public or private mail post approved by the Council of Ministries upon the recommendation of the Minister.
- Electronic means.

The date of filing is considered to be the earlier of the date of receipt by the department, post seal, or deposit receipt at a bank or licensed company. In the case of sending electronic mail, implementation instructions have not yet been introduced to determine the approved date of submitting the same.

Payment of tax

The tax balance is due before the end of the fourth month following the end of the tax period.

A taxpayer who is carrying out business activities and has gross income in the previous tax period exceeding JOD 1 million from these activities is required to remit two advance payments on the accrued income tax from these activities using the rates determined for each tax period mentioned in the following schedule. The advance payments are calculated according to the income tax in the financial statements presented to the income tax department for the concerned period. In the absence of the financial

statements for this period, the income tax included in the immediate preceding tax declaration will be used to calculate the advance payments.

Tax period	Rate on accrued income tax (%)
2015 and following years	40

The first advance payment is due within a period not exceeding 30 days from the last day of the first half of that income tax period.

The second advance payment is due within a period not exceeding 30 days from the last day of the second half of that income tax period.

Fines and penalties

Failure to pay tax on the assigned dates according to the provisions of the tax law will result in a delay fine at a rate of 0.4% of the value of the tax due or any deductible amounts for each full or partial week of delay.

Tax audit process

The tax audit is likely to take place within one year from the date of filing the return.

Statute of limitations

The tax auditor may not audit a tax return after four years from the date of filing the return.

Significant developments

In December 2015, Kazakhstan joined the World Trade Organization (WTO). Terms of accession were negotiated for several years and cover certain conditions specific to the Kazakhstan economy. For example, Kazakhstan managed to keep certain incentives for agriculture producers.

Currently, Kazakhstan is developing a new joint tax and customs code. The new code should be a merger of the currently effective separate Tax and Customs Codes with introduction of planned changes, including the following:

- Replacement of value-added tax (VAT) by a form of sales tax.
- Revision of taxation of subsurface users.
- Termination of ineffective special tax regimes.
- Analysis of charges for environmental pollution.
- Analysis of increase of individual income tax rate.
- Unification of the customs legislation with requirements of the WTO.

It is expected that the joint Tax and Customs Code and replacement of VAT will be introduced from 1 January 2018.

In November 2015, Kazakhstan introduced a new law on obligatory social medical insurance. The law stipulates a new system for provision of medical services for certain individuals based on charges and contributions to a special fund. Charges will be made by employers, including those registered in forms of a branch, a representative office, or a permanent establishment (PE) of foreign entities, at own cost. The level of charges will be gradually increased every year starting from 2% of employees' salary in 2017 to 5% in 2020. Contributions should be withheld by employers and other agents (e.g. state, individual entrepreneurs, advocates) from employees' salary in the amount of 1% in 2019 (2% starting from 2020) and paid to the special fund.

Since 1 March 2016, the export customs duty rate on crude oil is determined based on the average market price of crude oil prevailing on the world oil markets for the prior period. The rate is calculated and established by the authorised body.

Taxes on corporate income

The tax rate for corporations is 20% and is based on a calendar year. All Kazakhstan legal entities and branches of foreign legal entities are subject to corporate income tax (CIT). Taxable income is determined as the taxpayer's aggregate annual income less allowable deductions.

Resident companies are taxable in Kazakhstan on their worldwide profits, while non-resident companies operating through a PE in Kazakhstan are subject to Kazakhstan CIT only on the profits attributable to that PE.

Non-residents without a PE in Kazakhstan that receive income from sources in Kazakhstan are generally subject to income tax withheld at source of payment on Kazakhstan-source income (*please see the Withholding taxes section for more information*).

Reduced CIT rates

A reduced CIT rate of 6% applies to the qualified agricultural income of legal entities producing agricultural products.

In addition, taxpayers operating in special economic zones (SEZs) may enjoy full exemption from CIT if certain statutory requirements established for such benefits are met (*see the Tax credits and incentives section for more information*).

Excess profit tax (EPT)

EPT rates are progressive and range from 0% to 60%. The tax base is comprised of the portion of net income of subsurface users exceeding 25% of deductions for EPT purposes. Subsurface users may include asset acquisition costs, capital costs, and losses (with certain limitations) as deductions.

Local income taxes

There are no local income taxes in Kazakhstan.

Corporate residence

Generally, Kazakhstan incorporated companies or other legal entities that have their place of effective management located in Kazakhstan are treated as Kazakhstan tax residents.

Permanent establishment (PE)

Non-resident legal entities having business activities in Kazakhstan may create a PE in the following cases:

- ‘Fixed place PE’: A non-resident enterprise carries on business activities in Kazakhstan through a fixed place, including, but not limited to, through a place of management.
- ‘Services PE’: A non-resident enterprise renders services in Kazakhstan through employees or other personnel engaged by the non-resident for such purposes, provided that these activities continue for more than 183 days within any consecutive 12-month period for the same or connected projects.
- ‘Construction PE’: A construction site, in particular a shop or an assembly facility, performance of projecting work, forms a PE, notwithstanding the timing of performing operations.
- ‘Agency PE’: A non-resident enterprise carries on business activities in Kazakhstan through a dependent agent. A dependent agent is an individual or legal entity that meets all of the following criteria simultaneously:
 - Has the contractual authority to represent the non-resident’s interests in Kazakhstan and makes use of this authority by acting and signing (negotiating) contracts on behalf of the non-resident.
 - The business is carried on outside the activity of either a customs broker or professional participant of the securities market or other brokerage type of business (except for activity as an insurance broker).
 - Carries on activities that are not limited to those of a preparatory and auxiliary nature.

Kazakhstan

Other taxes

Value-added tax (VAT)

The current VAT rate is 12%. This tax is applicable to the sales value of products, works, and services, as well as imports. Exports of goods are taxed at 0%. There is a list of goods, works, and services exempt from VAT (e.g. financial services provided by financial institutions, financial leasing services, notary and advocacy services, operations with financial securities and investment gold).

Goods and services are subject to VAT if they are deemed to be supplied in Kazakhstan under the place of supply rules.

VAT refunds are generally available with respect to excess input VAT, provided certain criteria are met.

The VAT reporting period is the calendar quarter.

Customs duties

Customs duties apply to goods imported to the Customs Union countries from third countries. The customs duties rates are established either based on a percentage (in general ranging between 0% and 30%; higher rates exist for certain goods) of the customs value of goods or in absolute terms in euros.

Goods of the Customs Union countries should be generally exempt from Kazakhstan customs duties.

In addition to membership in the Customs Union, Kazakhstan concluded a number of bilateral and multilateral Free Trade Agreements with the Commonwealth of Independent States (CIS), which provides for exemption of goods circulated between the CIS member states from customs duties, provided certain conditions are met.

Kazakhstan is a WTO member starting from December 2015.

Customs fees

A customs processing fee is assessed at 60 euros (EUR) for the main page of a customs declaration plus EUR 25 for each supplemental page.

Excise taxes

Excise taxes apply to the sale and import of crude oil, gas condensate, petrol/gasoline (excluding aviation fuel), diesel fuel, spirits and alcoholic beverages, beer, tobacco, and passenger cars.

Type of excisable good	Excise tax rate
Crude oil, gas condensate, petrol/gasoline, diesel	KZT* 0 to 5,000 per tonne
Alcoholic beverages and beer, tobacco	KZT 0 to 2,450 per item of measure (pieces or litres)
Passenger cars	KZT 100 per each cm ³ of engine capacity

* Kazakhstani tenge

Property tax

Property tax is assessed annually at a general rate of 1.5% of the average net book value of immovable property.

Land tax

Entities and individuals that own land plots (or land share in cases of commonly shared ownership of land plots) must pay land tax annually. Land tax rates vary based on the purpose for which the land is used as well as the size and quality of the land.

Transfer taxes

There are no transfer taxes in Kazakhstan.

Stamp taxes

There are no stamp taxes in Kazakhstan.

Vehicle tax

The vehicle tax rate is based on monthly calculation indices and determined in accordance with the type of vehicle, engine volume, operation period of the vehicle (aircraft only), and other factors.

Payroll taxes

Employment income (salary, compensation, etc.) is subject to withholding individual income tax paid at source. Tax paid at source should be calculated, withheld, and remitted by the Kazakh company acting as tax agent at the rate of 10%.

Social tax

Employers must pay social tax at the rate of 11% of gross remuneration (salaries and certain benefits provided) of all employees (local and expatriate).

K

Obligatory social insurance contributions

Obligatory social insurance contributions are payable by employers at the rate of 5% to the State Pension Centre of Pension Payments. Obligatory social insurance contributions are capped at 5% of ten times the minimum monthly wage (approximately 57 United States dollars [USD]) per month, and are deductible from social tax. Only Kazakhstan citizens and foreigners holding a residence permit in Kazakhstan are subject to obligatory social insurance.

Obligatory pension contributions

Obligatory pension contributions are withheld at a rate of 10% out of employees' gross income and paid to the State Pension Centre of Pension Payments. The gross income subject to obligatory pension contributions is capped at 75 times the minimum monthly wage (approximately USD 8,615) per employee per month. Only Kazakhstan citizens and foreigners holding a residence permit in Kazakhstan are subject to obligatory pension contributions.

Obligatory social medical insurance contributions

Starting from 2017, obligatory social medical insurance contributions should be made by employers at own cost based on the following rates:

- From 1 January 2017: 2% of employees' salary.
- From 1 January 2018: 3% of employees' salary.
- From 1 January 2019: 4% of employees' salary.
- From 1 January 2020: 5% of employees' salary.

Starting from 2019, obligatory social medical insurance contributions should also be withheld from employees' gross income and paid by employers at the following rates:

- From 1 January 2019: 1% of employees' salary.
- From 1 January 2020: 2% of employees' salary.

Kazakhstan

Mineral extraction tax

The mineral extraction tax applies to the monetary value of extracted volume of crude oil, gas condensate, natural gas, minerals, and groundwater.

The tax is calculated based on the value of the extracted content, which is computed by applying average global prices to the extracted volume (adjusted for content). The determination of average global prices is based on the list of publications that are considered official sources for computation of mineral production tax (Platts Crude Oil Marketwire and Crude Argus).

Currently, the tax rates for crude oil and gas condensate range from 5% to 18%, depending on the accumulated production volume for the calendar year. For hydrocarbons, rates can be reduced by 50% if they are supplied to domestic refineries on the basis of a sale/purchase agreement or tolling agreement.

The tax rate for natural gas is set at 10%. For domestic sales of natural gas, tax rates range from 0.5% to 1.5%.

Tax rates for minerals that have undergone initial processing (except for widespread minerals) and for coal vary between 0% and 22%.

Branch income

The net income of branches of foreign legal entities, after CIT at 20%, is subject to a branch profits tax at a rate of 15%, which may be reduced under an applicable double tax treaty (DTT). As such, the effective tax rate for the income of branches of foreign legal entities equals 32% if there is no reduction under a DTT.

Income determination

Kazakhstan legal entities are taxable on aggregate annual income earned worldwide. Non-resident legal entities, carrying out business activities through a PE in Kazakhstan, are taxable on income attributed to the activities of that PE. All taxpayers must apply the accrual method for recognition of income.

Inventory valuation

For tax purposes, inventory is valued in accordance with International Financial Reporting Standards (IFRS) and Kazakhstan financial accounting legislation. As such, permitted inventory valuation methods include first in first out (FIFO), weighted average, and specific identification methods.

Capital gains

Capital gains are subject to ordinary CIT rates. An exemption is available for capital gains realised from the sale of shares and participation interests in Kazakhstan legal entities or consortiums that are not engaged in subsurface activities and are held for more than three years.

Dividend income

Dividend income of a Kazakh resident company on inbound dividends is exempt from Kazakh taxation. Dividends from a Kazakhstan resident company to another Kazakhstan resident company are exempt from taxation, except for dividends paid by certain types of investment funds.

Interest income

Interest income should be included in the aggregate annual income of a taxpayer and taxed at the 20% CIT rate.

Foreign exchange gain

Foreign exchange gain should be determined in accordance with the provisions of IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange gain over foreign exchange loss should be included in the aggregate annual income of a taxpayer.

Foreign income

Foreign income is subject to ordinary CIT.

There are no provisions for tax deferrals in Kazakhstan.

For additional information, please refer to Controlled foreign companies (CFCs) in the Group taxation section.

Deductions

Allowable deductions generally include expenses associated with activities designed to generate income, unless specifically restricted for deduction by tax legislation. All expenses require supporting documentation.

Depreciation and depletion

Tax depreciation is calculated using the declining-balance method at depreciation rates ranging from 10% to 40%, applied to the balances of four basic categories of assets:

- Buildings and facilities (except for oil and gas wells and transmission facilities): 10%.
- Machinery and equipment (except for machines and equipment for oil and gas production, and also computers and equipment for information processing): 25%.
- Computers and equipment for information processing: 40%.
- Fixed assets not included in other groups, including oil and gas wells, transmission equipment, oil and gas machinery and equipment: 15%.

Goodwill

There are no special provisions in the Kazakhstan Tax Code with respect to deductibility of goodwill expenses.

Start-up expenses

The Kazakhstan Tax Code does not specifically address deductibility of start-up expenses, but, generally, expenses incurred in relation to business activities and aimed at earning revenue occurring at start-up should be deductible.

Interest expenses

Interest payable to unrelated third parties is deducted in full, except for interest payable to banks and micro-financial institutions, which are allowed a deduction within the amounts of actually paid interest. *For information about taxation of interest paid to related parties, please refer to Thin capitalisation in the Group taxation section.*

Bad debt

Amounts of receivables that were not paid within three years are to be recognised as bad debt expenses. Such expenses can be deducted in full by a taxpayer, provided that (i) these receivables are reflected in the books of a taxpayer and (ii) proper supporting documents are in place.

Charitable contributions

Charitable contributions are entitled to decrease taxable base but are capped at 3% of the company's annual taxable income.

Kazakhstan

Foreign exchange loss

Foreign exchange loss should be determined in accordance with the provisions of IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange loss over foreign exchange gain is allowed for deduction.

Fines and penalties

Generally, deductions are available for forfeits, fines, and penalties that are not payable to the state budget.

Taxes

Taxes remitted to the state treasury of Kazakhstan are deductible, except for the following:

- Taxes excluded prior to the calculation of the aggregate annual income.
- Income taxes paid in Kazakhstan and other countries.
- Taxes paid in preferential tax jurisdictions.
- Excess profit tax.

Net operating losses

Net operating losses may be carried forward for up to ten years. Loss carryback is not permitted under Kazakhstan tax legislation.

Payments to foreign affiliates

Payments to foreign affiliates are deductible for CIT purposes if the payments are intended to generate income, are supported by documentation, and comply with Kazakhstan transfer pricing law.

Group taxation

Kazakhstan tax law does not permit group taxation.

Transfer pricing

Under Kazakhstan transfer pricing law, both customs and tax authorities have the right to monitor and adjust prices used in cross-border and certain domestic transactions when prices are perceived to deviate from market prices, even if such transactions are with unrelated parties. If the authorities adjust prices, the re-assessed liability will include taxes, duties, penalty interest, and fines to the state budget.

Transfer pricing rules impact the following transactions:

- International commercial transactions.
- Domestic transactions that directly relate to international commercial operations where:
 - the sale relates to a subsurface use contract
 - one of the parties has tax preferences, or
 - one of the parties has losses for two years prior the year of the transaction.

Thin capitalisation

Deduction of interest paid to related parties, to unrelated parties under related parties warranties, or to parties registered in a country with privileged taxation depends on the borrower's capital structure; such that deductible interest will be limited with reference to an 'acceptable' proportion of debt-to-equity (7:1 for financial institutions, 4:1 for all other entities). The list of jurisdictions with privileged taxation, the so called 'black list' established by the government, includes 59 jurisdictions (*see the Group taxation section of Kazakhstan's summary at www.pwc.com/taxsummaries for a current list*).

Controlled foreign companies (CFCs)

Under the CFC rules, if a Kazakhstan legal entity has 10% or more of direct or indirect ownership in the share capital or voting rights in a non-resident company, registered or located in a country with privileged taxation (*see above*), the legal entity is subject to Kazakhstan CIT on the portion of the undistributed profits from the non-resident company.

Tax credits and incentives**Foreign tax credit**

In general, the Kazakhstan Tax Code allows taxpayers to credit the foreign income taxes paid against the income taxes payable in Kazakhstan, provided the documents confirming the payment of such taxes are available. However, a tax credit may not be granted in certain cases (e.g. for taxes paid in countries with privileged taxation).

Investment incentives

Investment incentives are available to certain Kazakhstan legal entities that fit certain criteria and possess objects (e.g. certain fixed assets) for which investment incentives may be applied. Generally, the investment incentives allow companies to fully deduct, for CIT purposes, the cost of the investment objects and the cost associated with their reconstruction and modernisation either at once or within the first three years of their use.

Based on the Investment Law, incentives are granted under an investment contract between the government and companies and focus on priority sectors of the economy, as determined by the government. A qualifying investment project is granted with (i) exemption from customs duties and (ii) state in-kind grants. Priority investment projects, alongside the above mentioned benefits, get (iii) tax incentives, and (iv) investment subsidies.

Special economic zones (SEZs)

Currently, the following SEZs have been established in Kazakhstan:

- 'Astana, the New City' in Astana (the expiry date is in 2027).
- 'Aktau Sea Port' in Aktau (the expiry date is on 1 January 2028).
- 'Ontustik' in Sairam district of South-Kazakhstan region (the expiry date is on 1 July 2030).
- 'National Industrial Petrochemical Park' in Atyrau region (the expiry date is on 31 December 2032).
- 'Burabai' in Akmola region (the expiry date is on 1 December 2017).
- 'Park of Innovative Technologies' (the expiry date is 1 January 2028).
- 'Saryarka' in Karaganda region (the expiry date is 1 December 2036).
- 'Horgos - the eastern gates' in Almaty region (the expiry date is 2035).
- 'Pavlodar' in Pavlodar (the expiry date is 1 December 2036).
- 'Chemical Park Taraz' in Taraz (the expiry date is 1 January 2037).

In order to enjoy the incentives available in SEZs, a legal entity must meet the following requirements:

- It must be registered by the tax authorities in the territories of SEZs.
- It must have no structural subdivisions beyond the boundaries of the territories of the SEZs.
- 90% of aggregate annual income must constitute income earned from activities in the SEZ consistent with the objectives of the SEZ's formation.

The general incentives available for legal entities in SEZs are:

Kazakhstan

- CIT: 100% reduction.
- VAT: 0% rate (for goods fully consumed during realisation of activities corresponding to purposes of creation of the SEZ and included in the list of goods established by the government of Kazakhstan).
- Land tax: 0% rate.
- Property tax: 0% rate.

Withholding taxes

Kazakhstan-source income of non-residents and the proceeds from the sale of shares in subsurface users are subject to withholding tax (WHT) at the rates shown in the table below.

A non-resident legal entity is exempt from dividend WHT if:

- the holding period of shares or participation interest is greater than or equal to three years
- the entity paying the dividends is not a subsurface user, and
- 50% or more of the charter capital value of the entity paying the dividends is not the property of a subsurface user.

In 2016 and 2017, a non-resident legal entity is exempt from WHT on certain dividends if:

- the holding period of shares or participation interest is greater than three years, and
- the subsurface user paying the dividends performed subsequent refinery of not less than 35% of produced minerals on own production capacities during the period of 12 months before dividends' accrual.

Types of income at a source of payment	WHT rate (%)
Dividends, capital gains, interest, royalties	15
Any income of an entity registered in a tax haven jurisdiction	20
Insurance premiums under risk insurance agreements	15
Income from international transportation services; insurance premiums under risk reinsurance agreements	5
Other income	20

Benefits paid by a company to a shareholder, founder, participant, or related party, falling under the definition of constructive dividends, are taxed at a rate of 15%.

The rate of WHT may be reduced under an applicable DTT. A list of DTTs concluded and ratified by Kazakhstan is detailed below:

WHT rates between Kazakhstan and treaty countries as of 1 January 2016

Recipient	Dividends (%)	Interest (%)	Royalties (%)

Kazakhstan

Notes

1. 5% if the beneficial owner is a company owning, directly (or indirectly in case of Canada and the United Kingdom), at least 10% of the voting power of the company paying the dividends.
2. 5% (10% in the cases of Moldova and Serbia) if the beneficial owner is a company that directly holds at least 25% of the capital of the paying company.
3. 10% if the beneficial owner is a company directly or indirectly holding at least 20% of the capital of the paying company.
4. 5% if the beneficial owner is a company (other than a partnership) that owns not less than 10% of the capital of paying company.
5. 5% if the recipient is a company (other than a partnership) that directly owns not less than 20% of the capital of paying company.
6. 10% if the actual owner is a legal entity that owns not less than 30% of the authorised capital of the legal entity paying the dividends.
7. 10% if the beneficial owner is a company that directly holds at least 30% of the capital of the company paying the dividends.
8. 0% if dividends are paid in consideration of an investment of at least USD 50 million in the paying company.
9. 0% if the company receiving the dividends directly or indirectly holds at least 50% of the capital of the paying company and has made an investment in the company paying the dividends of at least USD 1 million, which investment is guaranteed in full or insured in full by the government of the first contracting state, the central bank of that state, or any agency or instrumentality (including a financial institution) owned or controlled by that government, and has been approved by the government of the other contracting state.
10. 5% (or 12.5% in case of Pakistan) if the beneficial owner is a company that directly owns (or indirectly in case of the Netherlands and Pakistan) at least 10% of the capital of paying company.
11. 5% if the beneficial owner is a company directly or indirectly owning, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power of the company paying the dividends.
12. 5% if the beneficial owner is a company (other than a partnership) that directly owns not less than 15% of the capital of the paying company.
13. 5% if the beneficial owner is a company that directly owns at least 70% of the voting power of the paying company.
14. 0% if the beneficial owner is the government of the other contracting state or any governmental institution or any economic unit established by governmental or similar bodies; 5% if the beneficial owner is a company that directly holds at least 5% of the capital of the company paying the dividends; additionally, 5% if the beneficial owner of dividends is an individual person.
15. 0% if the beneficial owner is the government of the other contracting state or any governmental institution or any economic unit established by governmental or similar bodies.

Tax administration

Taxable period

The tax year in Kazakhstan is the calendar year.

Tax returns

Annual CIT declarations are due by 31 March of the year following the tax year-end. However, a taxpayer may be granted a 30 calendar-day extension of the deadline, upon request.

Certain taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

The deadline for other tax returns is the 15th calendar day of the second month following the reporting period. However, a taxpayer may be granted a 30 calendar-day extension of the deadline, upon request.

Payment of tax

For CIT, advance payments are due every 25th day of the month. Taxpayers with aggregate annual income during the tax period preceding the previous tax period of less than 325,000 times the amount of the monthly calculation index established for the relevant financial year (approximately USD 2.04 million) are exempt from the obligation to calculate and pay CIT advance payments. Payment of any outstanding CIT liabilities is required within ten calendar days following submission of the annual CIT declaration (i.e. 10 April).

Most other taxes are payable by the 25th day of the second month following the end of reporting period.

Fines and interest penalties

Interest penalties are assessed on late tax payments at 2.5 times the Kazakhstan National Bank refinancing rate. The National Bank refinancing rate is set at 5.5% *per annum*.

Substantial fines are imposed for understatement of tax liabilities. Generally, the fines amount to 50% of the understated tax, with lower rates for small and medium-sized businesses.

For advance CIT payments, an administrative fine of 40% applies to understated advance tax payments compared with the final declared CIT, provided the understated amount is greater than 20% of the final declared amount.

If a taxpayer is deemed to have concealed taxable income, a fine of 200% of the concealed amount may be assessed. Small and medium-sized businesses have lower rates.

Tax audit process

Kazakhstan tax authorities have the right to conduct regular tax audits (at least once a year). Before 2015, there were two types of audits, planned and unplanned. Planned tax audits ceased, starting from 2015. Information about misstatements in tax returns or any other discrepancy may trigger an unplanned tax audit.

Statute of limitations

The statute of limitations for tax purposes in Kazakhstan is five years. For taxpayers operating under subsurface use contracts, the tax authorities maintain the right to assess or revise the assessed amount of excess profit tax and other taxes and obligatory payments to the budget, where a methodology of calculation uses one of the following indices: internal rate of return (IRR) or internal revenue rate or R-factor (earning yield), during the effective period of a subsurface use contract and five years after the end of the effective period of a subsurface use contract.

Topics of focus for tax authorities

Tax audits may be comprehensive or thematic. Comprehensive tax audits cover all applicable taxes, while thematic tax audits may cover only some specific tax liabilities. As a rule, Kazakh tax authorities are form, rather than substance, driven during audits.

Other issues

Accounting system

Kazakhstan legal entities should maintain accounts and produce financial statements in accordance with IFRS or national accounting standards (depending on the size of the company and other factors). In most cases, tax treatment follows accounting treatment.

United States (US) Foreign Account Tax Compliance Act (FATCA)

Kazakhstan has no signed intergovernmental agreement (IGA) with the United States to implement procedures associated with the FATCA, but Kazakhstan financial institutions are allowed to register at the FATCA registration website.

Significant developments

In line with the Constitution, the new Public Finance Management (PFM) Act, 2012 sets out the fiscal responsibility to ensure that a reasonable degree of predictability with respect to the level of tax rates and tax bases shall be maintained, including taking into account any tax reforms that may be made in the future.

Tax Procedures Act (TPA)

The TPA, which came into force on 19 January 2016, aims to provide uniform procedures for consistency and efficiency in the administration of tax laws, facilitate tax compliance by taxpayers, and promote the effective and efficient collection of tax.

The TPA also harmonises and consolidates tax procedural rules. For example, the TPA provides that a taxpayer should keep records for five years. Previously, the different tax laws, such as the Value-Added Tax (VAT) Act 2013, Income Tax Act, and Excise Act, prescribed different timeframes that records should be kept by a taxpayer. Given that it is a relatively new piece of tax legislation, there are some inconsistencies when you mirror the TPA and other tax legislation, though we expect these inconsistencies to be addressed with time.

The Tax Appeal Tribunal Act, 2013

The Tax Appeal Tribunal Act, which came into operation on 1 April 2015, establishes one tribunal that will hear appeals for all tax areas. Previously, income tax matters would be heard by the Local Committee whereas VAT matters would be heard by the Tax Tribunal.

Proposed tax reforms

The government of Kenya's strategy on tax and revenue reforms aims to significantly grow revenue in the 2017/18 fiscal year. To this end, the following tax policies and revenue administration reforms are to be put in place:

- Further implementation of tax modernisation and revenue administration reforms. These include making greater use of technology, enhancing taxpayer education and awareness, and implementing a simplified tax regime for the informal sector.

There is a proposal to waive taxes on bonuses, overtime, and retirement benefits for low income earners in the Finance Bill, 2016, which may be included in the Finance Act, 2016.

Specific changes introduced in the Finance Act, 2015

Capital gains tax on listed securities

Following the reintroduction of taxation of capital gains (ToCG) on 1 January 2015, the Finance Act, 2015 clarified that there will be no ToCG realised on the disposal of listed securities.

Carryforward of tax losses

Tax losses may now be carried forward nine years following the period in which they are incurred. This effectively doubles the period within which losses must be utilised from five years to ten. This period may be extended further upon approval by the Cabinet Secretary responsible for Finance.

Tax on residential rental income

The Finance Act, 2015 introduced a simplified tax on residential rental income for Kenyan resident persons who earn rental income of 10 million Kenya shillings (KES) or less. This is to be paid at the rate of 10% of the gross rental receipts. The Finance Bill, 2016 proposes a monthly withholding tax (WHT) of 10% on qualifying residential income.

Tax amnesty on rental income

With respect to income from rental property, a tax amnesty has been introduced on:

- Principal taxes, penalties, and interest accrued in any period before and including the 2013 year of income.
- Penalties and interest relating to the 2014 and 2015 years of income.

The amnesty does not apply in cases where the tax has already been assessed on a person or the person is under audit or investigation in respect of the income.

Furthermore, where a person has no documentation to support their expenditure, they will be permitted a deduction of 40% of the gross rent charged.

The amnesty applies to both individuals and corporate entities.

Incentives for businesses operating in special economic zones (SEZs)

The SEZ Act contains a range of tax incentives for all licensed SEZ enterprises, developers, and operators on taxes and duties payable under the Excise Act, Income Tax Act, East African Community (EAC) Customs Management Act, and the VAT Act, 2013.

The Finance Act, 2015 introduced amendments to streamline the Income Tax Act with the SEZ Act, 2015. These are:

- Supply of taxable goods and services to SEZ enterprises, developers, and operators licensed under the SEZ Act, 2015 are VAT exempt.
- SEZ enterprises, developers, and operators will be subject to a reduced corporate income tax (CIT) rate of 10% for the first ten years of operation and 15% for the next ten years.
- Payments for services and interest to non-residents by SEZ enterprises, developers, and operators shall be subject to WHT at 10%.
- The Finance Bill, 2016 has proposed to further harmonise the incentives with those available for the export processing zone (EPZ) companies.

Wear and tear allowance on petroleum pipelines

The Finance Act, 2015 has clarified the rate of wear and tear allowance on petroleum pipelines as 12.5%.

Taxes on corporate income

Resident companies are taxable in Kenya on income accrued or derived from Kenya. Resident companies with business activities outside Kenya are also taxed on income derived from business activities outside of Kenya.

Kenya

Non-resident companies are subject to Kenya CIT only on the trading profits attributable to a Kenyan permanent establishment (PE).

The rate of CIT for resident companies, including subsidiary companies of foreign parent companies, is 30%. The CIT rate for branches of foreign companies and PEs is 37.5%.

Special rates

There are special rates for certain resident and non-resident companies as set out below.

Entity	CIT rate (%)
Export processing zone (EPZ) enterprises:	
First ten years	0
Next ten years	25
Thereafter	30
Registered unit trusts/Collective investment schemes	Exempt (subject to conditions)
Newly publicly listed companies:	
20% of shares listed: first three years after listing	27
30% of shares listed: first five years after listing	25
40% of shares listed: first five years after listing	20
Companies listed on securities exchange	25 (first five years)
SEZ enterprises, developers, and operators	10 (first ten years) 15 (succeeding ten years)
Rates on gross income of non-residents derived from Kenya:	
Transmission of messages	5
Ownership or operation of ships and aircraft	2.5

Local income taxes

There are no county or provincial taxes on income, as all taxes are collected by the national government. However, county governments are empowered by the Constitution to impose property and entertainment taxes at the county level.

Corporate residence

Kenya-incorporated companies are treated as Kenyan-tax resident. Additionally, companies incorporated overseas are also treated as Kenya resident if their "management and control is exercised in Kenya in a particular year of income under consideration". A company may also be declared a tax resident in Kenya pursuant to a declaration in a legal notice by the Cabinet Secretary to the National Treasury.

Permanent establishment (PE)

A business carried on in Kenya through a fixed place of business gives rise to a PE, as does a building site, or a construction or assembly project, that has existed for six months or more.

The definition of a PE has been extended to include a dependent agent that habitually concludes contracts on behalf of others. This definition is closer to that contained in the Organisation for Economic Co-operation and Development (OECD) Model Convention on Double Tax Treaties (DTTs).

Note that the definition of a PE may be modified by a DTT.

Other taxes

Value-added tax (VAT)

VAT in Kenya is governed by the VAT Act, 2013, which came into effect on 2 September 2013, read together with VAT Regulations, which are yet to be published. VAT is levied on the supply of taxable goods and services in Kenya, as well as on the importation of taxable goods and services into Kenya.

The following VAT rates apply in Kenya:

Activity	VAT rate (%)
All goods and services that are neither exempt nor zero-rated	16
Export of goods and taxable services, designated goods and services	0

Certain goods and services are designated as exempt from VAT. Exempt supplies do not count towards the VAT registration threshold, and the related input VAT is not recoverable.

Zero rating mainly applies to the export of goods or taxable services. Additionally, the supply of goods or services to certain designated persons and projects is also zero-rated.

The threshold for VAT registration is the supply of taxable supplies of KES 5 million per year. Registered persons must record their turnover using an approved electronic tax register or signature device. Only registered persons may recover input tax. Input tax recoveries must be made within six months of the relevant compliant tax invoice; otherwise, the claims are deemed time-barred.

Input tax claims are generally not deductible for several items, such as non-commercial vehicles and accommodation, restaurant, and entertainment services. Excess input tax credit may be carried forward to be offset against future output tax, or may be refunded to the taxpayer on application to the revenue authority. However, VAT refunds are only available to registered persons making zero-rated supplies, and the payment of the refunds may be subject to lengthy delays.

The transitional clauses provide for:

- Exemption from VAT of petroleum products for a period of three years with effect from 2 September 2013 to 2 September 2016. The Finance Bill, 2016 has extended this by another year to September 2017.
- Remission of tax on any taxable goods and services to continue for a period of five years.
- Remission of tax on taxable goods and services supplied to official aid funded projects where the agreement was concluded before commencement of the VAT Act, 2013. Such remission shall remain in force for a period of five years with effect from 19 September 2014.

Reintroduction of withholding VAT by government ministries, departments, and agencies

The Finance Act, 2014 reintroduced the withholding VAT system, which was abolished in 2011. Under this system, government ministries, departments, agencies, and any other person appointed by the Commissioner for domestic taxes are required to withhold 6% of the taxable value on any taxable supplies acquired and remit the same directly to the Commissioner (i.e. the supplier of the goods or services only receives 10% out of the 16% VAT, with the remaining 6% being paid directly to the revenue authority by the recipient of the goods or services).

Kenya

A notable difference with the re-introduced regime is its expanded scope, i.e. the Commissioner for domestic taxes is now empowered to appoint any taxpayer as a withholding VAT agent, which is a move from the traditional appointments, which were restricted to government ministries, departments, and agencies.

However, the provisions of the VAT Act regarding withholding VAT were deleted by the TPA with effect from 19 January 2016. Despite this, the Kenya Revenue Authority (KRA) has continued to appoint withholding VAT agents and enforce the withholding VAT obligations even without the requisite legal backing.

Import (customs) duty

Import duty is levied under the EAC Customs Management Act. Imported goods are generally subject to import duty at varied rates, including 0% for raw materials and capital goods (also exempt from VAT), 10% for intermediate goods, and 25% for finished goods. However, a different rate of duty can be prescribed by the Council of Ministers of the EAC partner states. Enterprises established in an EPZ are exempt from customs duty on machinery and inputs for products manufactured for export while licensed oil and gas contractors with a Production Sharing Contract (PSC) with the government of Kenya are exempt from customs duty on importation of machinery, spares, and inputs used in exploration activities, excluding motor vehicles. Where raw materials that are not subject to 0% import duty are used to manufacture goods for export outside the East African Community, one may apply for remission under the EAC duty remission arrangement. This is subject to a requirement for proof of export and one may be required to execute a bond/bank guarantee. Further, there is a list of other items and persons that are exempted from import duties under the Act.

Changes introduced by the EAC Gazette Notice No. 9 of 2015

The EAC Gazette notice dated 19 June 2015 introduced a number of changes, including increase in the import duty rates for plastic tubes for packing toothpaste (10% to 25%), iron and steel products (10% to 25%), rice (higher of 75% or 345 United States dollars [USD] per metric ton (MT), and sugar (higher of 100% or USD 460/MT). In addition, import duty was increased from 10% to 25% for paper and paperboards, electronic circuits, iron or steel bars and rods, made up fishing nets, towers and lattice masts, screws and bolts made of metal, aluminium milk cans, smart cards, oil or petrol filters, and prefabricated buildings. Duty for bridges and bridge sections and LPG cylinders was increased from 0% to 25%.

Excise duty

Excise duty in Kenya is governed by the Excise Duty Act, 2015, which came into effect on 1 December 2015. Prior to the introduction of this Act, excise duty was levied under the Customs and Excise Act, Cap 472, which has since been repealed.

Excise duty is imposed on the local manufacture or the importation of certain commodities and services. Excisable commodities include items such as bottled water, soft drinks, cigarettes, alcohol, fuels, and motor vehicles. Excisable services include mobile cellular phone services, fees charged for money transfer services, and other fees charged by financial institutions.

Further, excise stamps must be affixed on certain excisable goods, such as alcohol and tobacco products.

Below are the different categories of excisable products and their corresponding rates of excise duty:

Category	Goods description	Excise duty rates
Spirits	Spirits of undenatured ethyl alcohol; spirits liqueurs, and other spirituous beverages of alcoholic strength exceeding 10%	KES 175 per litre

Category	Goods description	Excise duty rates
Other alcoholic beverages	Wines	KES 150 per litre
	Beer, cider, perry, mead, opaque beer, and mixtures of fermented beverages with non-alcoholic beverages and spirituous beverages of alcoholic strength not exceeding 10%	KES 100 per litre
	Powdered beer	KES 100 per kg
	Cigarettes containing tobacco or tobacco substitutes	KES 2,500 per mille
Tobacco and tobacco products	Cigars, cheroots, cigarillos, containing tobacco or tobacco substitutes	KES 10,000 per kg
	Electronic cigarettes	KES 3,000 per unit
	Cartridge for use in electronic cigarettes	KES 2,000 per unit
	Other manufactured tobacco and manufactured tobacco substitutes; homogeneous and reconstituted tobacco; tobacco extracts and essences	KES 7,000 per kg
Soft drinks	Fruit juices and vegetable juices	KES 10 per litre
	Water and other non-alcoholic beverages, not including fruit or vegetable juices	KES 5 per litre
Other excisable products	Plastic shopping bags	KES 120 per kg
	Food supplements	10%
	Motor vehicles of tariff heading 87.02, 87.03, and 87.04 less than three-years old from the date of first registration	KES 150,000 per unit
	Motor vehicles of tariff heading 87.02, 87.03, and 87.04 over three-years old from the date of first registration	KES 200,000 per unit
	Motor cycles of tariff heading 87.11 other than motor cycle ambulances	KES 10,000 per unit
Excisable services	Mobile cellular phone services and other wireless telephone services	10%
	Money transfer services	10%
	Financial services by financial institutions (1)	10%

Notes

- Financial institutions include persons licensed under the Banking Act, Insurance Act, Central Bank of Kenya Act, Micro Finance Act, Sacco Societies Act, and Kenya Post Office Savings Bank Act. Interest on loan, return on loan, insurance premiums, and premium-based or related commissions are exempt from excise duty.

Stamp duty

Stamp duty is payable on transfer of properties, leases, and securities. For other properties, other rates of stamp duty apply as specified in the Schedule to the Stamp Duty Act. The rates of stamp duty are shown below:

Activity	Stamp duty rate
Transfer of immovable property:	
Urban	4%
Rural	2%
Creation or increase of share capital	1%
Registration of a company (nominal share capital)	0%
Transfer of unquoted shares or marketable securities	1%
Transfer of quoted shares of marketable securities	0% *
Registration of a debenture or mortgage:	
Collateral security	0.05%
Supplemental security	KES 20 per counter part
Lease:	
Period of three years and under	1% of annual rent

Kenya

Activity	Stamp duty rate
Period over three years	2% of annual rent

* Transfer of quoted securities is exempt.

Tax on capital gains (ToCG)

After being suspended for 30 years, the 2014 Finance Act reintroduced ToCG on transfer of property situated in Kenya. Therefore, gains derived on the sale or transfer of property by an individual or company carried out on or after 1 January 2015 are subject to a final tax at the rate of 5%.

Compensating tax

Where a company pays dividends out of profits that have not been subject to CIT, the company will be liable to pay a compensating tax. The compensating tax rate is 42.8%. The aim of this tax is to ensure that all dividends are paid out of profits that have suffered CIT.

Turnover tax for small business taxpayers

A resident taxpayer whose annual gross turnover does not exceed KES 5 million will be taxed at the rate of 3% per quarter of one's turnover. In such a case, the taxpayer will not be required to register for VAT. Turnover tax does not apply to rental income, management or professional fees, training fees, income subject to WHT as a final tax, and income of incorporated companies. Loss making businesses are allowed to make an election to be exempted from turnover tax. A written application for exemption has to be made to the Commissioner, and there is a procedure to be followed.

Business permit

Every person who carries on a business in Kenya is required to apply for a business permit from the relevant local authority. The business permit is usually based on the size of one's business and is renewable on an annual basis.

Tourism levy

The tourism levy is payable to the Tourism Fund by establishments dealing in tourism activities and services as listed in the Tourism Act at a rate of 2% of turnover.

National industrial training levy

All employers are required to pay to the Directorate of Industrial Training a monthly levy of KES 50 per employee. The only exemption is for employers remitting the tourism levy.

Railway development levy (RDL)

The RDL is payable on all imports into the country at 1.5% of the customs value of the goods. This was implemented to provide funds for the construction of a standard gauge railway track.

National construction levy

The National Construction Authority introduced a construction levy for all construction works that commenced after 6 June 2014. The levy is payable at the rate of up to 0.5% of the contract value of any construction project whose construction value exceeds KES 5 million. The levy is in relation to all construction projects relating to buildings, roads, water works, electrical works, and other works that require the service of a contractor.

Advance tax on motor vehicles

Advance tax is payable at varying annual rates depending on the motor vehicles and is creditable against any CIT payable for the year.

Fringe benefit tax (FBT)

The FBT is payable by an employer on interest-free or low-interest loans granted to employees, company directors, and their relatives. FBT is due, whether the employer is exempted from tax or not, at the resident CIT rate of 30%. The benefit is the difference between actual interest charged and the interest computed using the Commissioner's prescribed rate published quarterly. The directors and employees are not personally taxed on the benefit.

Payroll taxes

Payroll taxes are administered through the pay-as-you-earn (PAYE) mechanism of deducting income tax from employment income (salaries, wages, bonuses, commissions, etc.). PAYE also applies to taxable non-cash benefits.

It is the employers' obligation to deduct and account for payroll taxes on a monthly basis.

The tax tables applicable to individuals are provided in the Taxes on personal income section of Kenya's Individual tax summary at www.pwc.com/taxsummaries.

Employers' National Social Security Fund (NSSF) contributions

Employers and employees are obligated to contribute monthly to the NSSF a standard contribution of KES 200 each. However, the new NSSF Act provides for a higher contribution rate of 6% of pensionable earnings with matching contribution from the employer. The implementation of the new Act awaits conclusion of a pending court case.

National Hospital Insurance Fund (NHIF) contributions

An employer has an obligation to deduct and remit NHIF contributions on a monthly basis.

NHIF is payable by the employee at graduated bands, up to a maximum of KES 1,700 per month. The maximum contribution is reached at a salary level of KES 100,000 per month.

Local government rent and rates

Rent and rates are levied annually on properties in Kenya, and the rateable value that is payable to the county government shall vary in each county based on various forms of ratings, such as area rate, agricultural rental value, or site value.

Branch income

The profit of a PE is taxed at the branch income tax rate of 37.5%, but there is no further taxation on the distribution of branch profits. There are certain restrictions with respect to the tax deductibility of certain costs, such as royalties, interest, and management fees, paid to the head office. However, these payments are also not subject to WHT.

Income determination**Inventory valuation**

Inventory is stated at the lower of cost or net realisable value, with the exception of biological assets, whose value is prescribed by the Commissioner.

Capital gains

Tax on capital gains (ToCG) has been reintroduced. *See Tax on capital gains (ToCG) in the Other taxes section for more information.*

Kenya

Dividend income

Kenya-source dividends are taxable income in Kenya unless the recipient is a Kenya resident company holding 12.5% or more of voting power of the company paying the dividend. However, for companies holding less than 12.5% of the votes, and other resident taxpayers, the 5% WHT is the final tax. Dividends paid to non-residents and any overseas holding company attract 10% WHT.

Dividends issued in a ratio not proportionate to shareholding of the existing equity are considered as taxable dividends to the extent of the disproportionate increase in the value of the ownership of the company.

Interest income

Interest income is generally included in the determination of taxable income unless expressly exempted for income tax.

Foreign income

In Kenya, companies are taxed on income accrued or derived from Kenya. Resident companies with business activities outside Kenya are taxed on worldwide profits.

Deductions

The general principle in Kenya is that, unless expressly provided otherwise, expenses are tax deductible if they are incurred wholly and exclusively to generate taxable income.

Depreciation and depletion

No deduction is allowed for accounting depreciation or impairment. However, capital allowances are permitted at varying rates (on a straight-line basis) for certain assets used for business purposes, including buildings and machinery used in manufacturing, industrial buildings and hotels, machinery and plant, agricultural works, and mining.

Capital deductions	Rate (%)
Investment deduction:	
Qualifying investment exceeding KES 200 million (outside Nairobi or the municipalities of Mombasa or Kisumu)	150
Other qualifying investment	100
Industrial building allowance: *	
Certified education buildings (straight-line)	50
Qualifying rental residential or commercial building allowance (straight-line)	25
Other qualifying buildings (including hotels, straight-line)	1
Wear and tear allowance:	
Plant and machinery (reducing-balance):	
Class 1	37.5
Class 2	30
Class 3	25
Class 4	12.5
Telecommunication equipment (straight-line)	20
Other allowances:	
Computer software (straight-line)	20
Capital expenditure under a concessionaire arrangement	Equal proportions over the period of the concession
Mining specified minerals:	
Year one	40
Year two through seven	10
Farm works (straight-line)	100

* Different percentages apply for previous years.

Goodwill

Cost acquisition of goodwill and amortisation of goodwill are not deductible since they are capital in nature.

Start-up expenses

There is a specific provision allowing the deduction of certain start-up expenses, provided that the required conditions have been met.

Interest expenses

A deduction for interest is allowed only to the extent that the borrowings are used for the purpose of trade. Where a non-resident person controls a company alone or with four or fewer other persons, interest restriction or 'thin capitalisation' rules apply (*see Thin capitalisation in the Group taxation section*).

Bad debts

Bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

Charitable contributions

Donations to qualifying charities and for certain public works are deductible, subject to certain conditions.

Fines and penalties

Generally, fines and penalties are not deductible as they are not considered to be expenses incurred for producing profits chargeable to tax.

Taxes

Kenyan income taxes are not deductible while computing income tax of a person. However, foreign income taxes incurred are generally deductible as an expense if tax credit relief is not available under a DTT.

Net operating losses

Losses calculated under the tax rules may be carried forward against income from the same source for a maximum of ten years, including the year in which the losses arise. Losses cannot be carried back, except for petroleum companies, where losses can be carried back indefinitely.

Payments to foreign affiliates

Transfer pricing rules based on OECD principles apply to transactions with foreign affiliates (both companies and branches/PEs). Additionally, there are restrictions on the deductibility of expenses incurred outside of Kenya by non-residents with a Kenyan PE.

Group taxation

Each company in a group is taxed as a separate entity in Kenya.

Transfer pricing

A company that has related-party transactions is required to ensure such transactions are at arm's length. The company is therefore required to prepare a transfer pricing policy to justify the pricing arrangements. The Commissioner is allowed to specify conditions and procedures on the application of the methods for determining the arm's-length price and to adjust the prices if they do not conform to the arm's-length principle. The policy should be prepared and submitted to the KRA upon request.

Kenya

Thin capitalisation

In Kenya, a company is thinly capitalised if all of the following occur:

- The company is controlled by a non-resident person alone or together with four or fewer persons.
- The company is not a bank or financial institution.
- The highest amount of all loans held by the company at any time exceeds the sum of three times the revenue reserves (including accumulated losses) and the issued and paid up share capital of all classes of shares of the company.

A company that is thinly capitalised cannot claim a deduction on the interest expense incurred by the company on loans in excess of three times the sum of revenue reserves and issued and paid up capital of all classes of shares of the company. The company also cannot claim a deduction for any foreign exchange loss realised by the company with respect to any loans from its shareholders in the period that the company remains thinly capitalised.

For companies in the extractive sector, the debt-to-equity ratio is 2:1.

Deemed interest

The Kenyan tax legislation gives the Commissioner for Domestic Taxes the discretion to 'deem interest' on interest-free borrowings received by foreign-controlled entities in Kenya. The 'deemed interest' is based on the Commissioner's prescribed rates.

This means that WHT is due on the 'deemed interest' as if this was an actual finance charge. The WHT rate on payments of interest to non-residents is currently 15% (in the absence of a DTT).

Controlled foreign companies (CFCs)

Kenya has no specialised rules regarding CFCs.

However, there are restrictions on the deductibility of interest and foreign exchange losses of companies that are foreign controlled and thinly capitalised.

Tax credits and incentives

Foreign tax credit

For business income, there is no tax credit for foreign tax paid on business income except as provided for by a DTT (if applicable) between Kenya and the other country. However, foreign tax paid can be deducted as an expense.

Investment deduction

Qualifying investments exceeding KES 200 million incurred outside Nairobi or the municipalities of Mombasa or Kisumu are allowed an investment deduction of 150%. All other qualifying investments are allowed a 100% investment deduction in the year the asset is put into use.

Export processing zone (EPZ)

Companies located in an approved EPZ, principally to export goods, are taxed at a 0% CIT rate for ten years from its commencement and at a rate of 25% for the next ten years.

Special economic zones (SEZs)

Companies registered under the SEZ Act benefit from a reduced CIT rate of 10% in their first ten years of operation. The CIT rate in the succeeding ten years is then 15%.

Listed companies

Companies listed on the Nairobi Securities Exchange are entitled to reduced rates of income tax for a period depending on the percentage of share capital listed (*see the Taxes on corporate income section for the rates*).

Withholding taxes

WHT is levied at varying rates (3% to 30%) on a range of payments to residents and non-residents. Resident WHT is either a final tax or creditable against CIT. Non-resident WHT is a final tax.

Payments	Resident WHT rate (%)	Non-resident WHT rate (%)
Dividend > 12.5% voting power	Exempt	10
Dividend < 12.5% voting power	5	10
Interest:		
Bearer instruments	25	25
Government bearer bonds (maturity ≥ 2 years)	15	15
Bearer bonds (maturity ≥ 10 years)	10	N/A
Other	15	15
Qualifying interest:		
Housing bonds	10	N/A
Bearer instruments	20	N/A
Other	15	N/A
Royalty	5	20
Winnings from gaming and betting	10	20
Management or professional fees	5	20
Consultancy fees - Citizen of EAC member states	5	15
Training (including incidental costs)	5	20
Rent/leasing:		
Immovable property	N/A	30
Others (other than immovable)	N/A	15
Pension/retirement annuity	Varied *	5
Contractual fees	3	20
Sale of property or shares in oil, mining, or mineral prospecting companies	10	20

* This will vary depending on the payments paid out.

Oil and gas sector WHT rates

WHT rates applicable on payments to non-residents in the oil and gas sector are shown in the table below:

Payments	Non-resident (oil and gas) WHT rate (%)
Dividends	10
Interest	15
Natural resource income	20
Management or professional fees	12.5

Double tax treaties (DTTs)

Lower rates may apply to non-residents where there is a DTT in force. The table below shows the maximum rates of tax that recipients in those countries with a DTT

Kenya

with Kenya can be charged on dividends, interest, royalties, and management and professional fees. The table only includes agreements that are currently in force.

Recipient	WHT (%)		
	Dividends	Interest	Royalties and management/professional fees
Canada	15	15	15
Denmark	20	20 (1)	20
France	10	12	10 (5)
Germany	15	15 (1)	15
India	15	15	20 (4)
Norway	15	20 (1)	20
South Africa	10	10	10 (5)
Sweden	15	15	20
United Kingdom	15	15 (1)	15 (2)
Zambia	0 (3)	0 (3)	0 (3, 5)

Notes

1. Interest paid by the government and the Central Bank of Kenya is tax-exempt.
2. The rate is 12.5% for management and professional fees.
3. No Kenya tax is due if subject to tax in Zambia.
4. The rate is 17.5% for management and professional fees.
5. Management and professional fees subject to normal WHT rates.

Where the treaty rate is higher than the non-treaty rate, the lower rate applies.

Treaties awaiting conclusion and/or ratification: Iran, Italy, Kuwait, Malaysia, Mauritius, Netherlands, Qatar, Seychelles, Singapore, Thailand, and the United Arab Emirates.

Tax administration

Taxable period

A company has discretion to determine its financial year-end, provided it is a 12-month period. However, any changes in this must be approved by the Commissioner of the KRA.

Tax returns

Resident companies and PEs of non-resident companies must file a self-assessment tax return annually. The return is accompanied by a tax computation and financial statements, amongst other schedules. The return is due within six months following a company's financial year-end.

Payment of tax

Instalment tax payments must be made quarterly during the year based on the lower of 110% of the previous year's liability or an estimate of the current year's liability. Agricultural companies are required to pay estimated tax in two instalments of 75% and 25% during the year. Any balance of tax at the end of the year must be paid within four months of the financial year-end.

Payment of agency taxes

The tax withheld from payments must be paid by the 20th day of the month following the month in which the deduction is made.

Penalties for non-compliance

If a self-assessment tax return is not submitted by the due date, a penalty of 5% on the unpaid tax for the year may be imposed, subject to a minimum of KES 10,000. Failure or

late submission of an EPZ company return will be subject to a penalty of KES 2,000 per day for as long as the failure continues.

A penalty of 20% and interest at 1% per month are imposed on underestimation and late payment of instalment tax and any balance of tax. Interest is charged only on the principal tax due, capped at the amount of the principal tax due.

Failure to make a deduction or to remit the WHT deducted attracts a penalty equal to 10% of the amount of tax involved (subject to a maximum of KES 1 million) and accrues interest at 1% per month.

Tax audit process

There is no prescribed audit process, as an audit can be triggered by various factors as determined by the KRA. Generally, tax audits should be carried out after every two to four years. The audit or inspection will commence with a request from the KRA for the taxpayer to make available any such records or information as may be required.

Statute of limitations

The tax authorities must commence an audit before the expiry of seven years after the end of a year of income. The KRA may go back past seven years where fraud is suspected. There is no time limit for completing tax audits. However, they are normally completed within a reasonable time, especially if there are no major disputes.

Topics of focus for tax authorities

The KRA, in their 2015/16 to 2017/18 Strategic Plan, stated that they will focus on the following key areas:

- Enhancing revenue mobilisation by broadening the revenue base, enhancing compliance, and combating tax evasion and fraud using intelligence and risk-based, forward-looking enforcement.
- Strengthening revenue administrative capacity and enhancing transparency and fairness through organisational change and business process optimisation.
- Creating a staff establishment that is professional courteous, accessible, and proactive in solving customer problem.
- Enabling business by leveraging on technology to achieve full electronic customer service and enhance operational efficiency and electronic customer service and enhance operational efficiency and service delivery in line with the best practice to achieve high customer satisfaction level.

Significant developments

The latest amendments to Corporate Income Tax Law (CITL) and other major tax laws, most of which have effect for taxable years beginning on or after 1 January 2016, address the Korean government's efforts to revitalise the Korean economy by encouraging corporations to make investments and increase employment, meanwhile introducing a new rule for rationalised deduction of car expenses and net operating losses (NOLs).

To this end, some of the preferential tax treatments scheduled to expire at the end of 2015 have been extended for a few more years. Those extended preferential tax treatments include tax credit and reductions related to the development of research and manpower in new growth engine industries and source technologies, technology transfer among small and medium-sized enterprises (SMEs), merger and acquisition of technology innovative SMEs, investment in facilities for technology and human resources development, etc. To support youth job creation, the Special Tax Treatment Control Law (STTCL) has been amended to allow a company to claim a tax credit for the increased number of youth employees.

In order to prevent any private use of a company car, a new documentation requirement and deduction limit has been introduced. Furthermore, the amended CITL includes a limit in the deduction of tax loss carried forward in order to prevent excessive deduction of tax losses in a particular year. To fight offshore tax evasion through implementation of the Organisation for Economic Co-operation and Development (OECD) base erosion and profit shifting (BEPS) projects, the amended tax law includes the introduction of new reporting requirement for multinationals in Korea to submit information on their cross-border, related-party transactions. In an effort to strengthen the management of tax revenue from foreign sources, the exchange program of financial information with other countries has been tightened.

Taxes on corporate income

Resident corporations are taxed on their worldwide income, whereas non-resident corporations with a permanent establishment (PE) in Korea are taxed only to the extent of their Korean-source income. Non-resident corporations without a PE in Korea are generally taxed through a withholding tax (WHT) on each separate item of Korean-source income (*see the Withholding taxes section*).

The basic Korean CIT rates are 10% on the first 200 million Korean won (KRW), 20% for the tax base between KRW 200 million and KRW 20 billion, and 22% for the excess.

Additional tax on corporate income

In order to motivate corporations to utilise corporate retained earnings to fund facility investment, wage increases, and dividend payments, the CITL has introduced a 10% additional tax if the company's qualified expenditures for facility investment, wage

increases, and dividend payments fall short of a certain threshold (i.e. either 80% or 30% of adjusted taxable income, *see computation below*). Effective from the tax year beginning on or after 1 January 2015 through the tax year including 31 December 2016, the additional tax shall apply to companies whose net assets exceed KRW 50 billion (excluding SMEs) and companies belonging to business groups subject to restrictions on cross-shareholdings under the Act on Monopoly Regulation and Fair Trade.

Companies should elect one of the following methods in computing the additional tax (election valid for three years):

- ([adjusted taxable income for the year x 80%] - the total amount of facility investment, wage increases, and dividend payments) x 10%, or
- ([adjusted taxable income for the year x 30%] - the total amount of wage increases and dividend payments) x 10%.

Agriculture and fishery surtax

When a corporate taxpayer claims certain tax credits or exemptions under the STTCL, a 20% agriculture and fishery surtax is levied on the reduced CIT liability.

Minimum tax

Corporate taxpayers are liable for the minimum tax, which is defined as the greater of 10% (if the tax base is KRW 10 billion or less, 12% on the tax base exceeding KRW 10 billion but not more than KRW 100 billion, 17% on the tax base exceeding KRW 100 billion) of the taxable income before certain tax deductions and credits pursuant to the STTCL or the actual CIT liability after various deductions and credits.

For SMEs, the minimum tax is the greater of 7% of taxable income before certain tax deductions and credits or actual CIT liability after the deductions and credits. For middle market companies that exceed the size of SMEs (so-called 'medium-scale companies'), an 8% minimum tax rate is applicable for the first three years, starting from the year when the size exceeds an SME for the first time, and a 9% rate is applicable for the next two years.

Local income tax

The local income tax is a separate income tax that has its own tax base, tax exemption and credits, and tax rates. The local income tax rates for corporations are 1% on the first KRW 200 million, 2% for the tax base between KRW 200 million and KRW 20 billion, and 2.2% for the excess.

Corporate residence

A corporation having its head office or principal office in Korea is a resident corporation. A corporation with a place of effective management in Korea is also treated as a resident corporation.

Permanent establishment (PE)

A non-resident corporation is generally deemed to have a tax presence (i.e. PE) in Korea in the following cases, among others:

- It has any fixed place of business in Korea, where the business of the entity is wholly or partly carried on.
- It is represented by a dependent agent in Korea, who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- Its employee(s) provides services in Korea for more than six months within 12 consecutive months.

Korea, Republic of

- Its employee(s) continuously or repeatedly renders similar services in Korea for two or more years, even if each service visit is for less than six months within 12 consecutive months.

Exceptions to a PE in Korea for a non-resident corporation include fixed places of business used only for purchasing or storage of goods, advertising, publicity, collecting, or furnishing of information, or other activities that are preparatory or auxiliary in nature.

Other taxes

Value-added tax (VAT)

VAT is levied at a rate of 10% on the supply of goods and services, except zero-rated VAT on certain supply of goods and services (e.g. goods for exportation, certain eligible services rendered to non-residents earning foreign currency, international transportation service by ships and aircraft) and exemption on certain goods and services (e.g. basic life necessities and services, such as unprocessed foodstuffs and agricultural products; medical and health services; finance and insurance services; duty-exempt goods).

Electronic VAT invoicing is a compulsory requirement. If a taxpayer fails to issue the electronic VAT invoice or report electronically to tax authorities, the relevant penalties shall be imposed.

Customs duties

Customs duties are generally assessed on imported goods. 'Importation' refers to the delivery of goods into Korea (in case of goods passing through a bonded area, delivery of such goods into Korea from such a bonded area) to be consumed or to be used in Korea.

Property tax

An annual property tax ranging from 0.07% to 5% is charged on the statutory value of land, buildings, houses, vessels, and aircraft. Five times the property tax rate is applied to factories that are newly constructed or expanded in a designated metropolitan area for the first five years.

Securities transaction tax

Securities transaction tax (at the rate of 0.5% for unlisted shares or interest) is imposed on the transfer of shares or interest, but the government is authorised to adjust the tax rate in certain circumstances. The flexible tax rate prescribed by the Presidential Decree is 0.15% for shares traded on the Korea Stock Exchange and 0.3% for shares traded on the Korean Securities Dealers Automated Quotations (KOSDAQ) or the Korea New Exchange (KONEX).

Acquisition tax

Acquisition tax is charged on the price of real estate, motor vehicles, construction equipment, golf membership, boats, etc. The acquisition tax rate varies depending on the type of assets subject to the tax, ranging from 2% to 7%. A weighted rate is charged on acquisitions in a designated metropolitan area or on acquisition of luxury items, such as villas, golf courses, and yachts.

Stamp tax

Stamp tax is levied on a person who prepares a document certifying establishment, transfer, or change of rights to property in Korea. The stamp tax ranges from KRW 50 to KRW 350,000, depending on the type of taxable document. The electronic stamp system has been implemented to make it mandatory to use stamps bought online rather than paper stamps bought in banks or post offices.

Registration tax

Registration tax ranging from 0.02% to 5% is charged upon the act of registering the creation, alteration, or lapse of property rights or other titles and incorporation with the concerned authorities. Registration tax upon the registration of title or right and incorporation for corporations located in a designated metropolitan area may be subject to three times the normal rate of 0.4%.

Gift tax

Gift tax is imposed on a person who acquires property by gift. If CIT or individual income tax is imposed on the gifted property, however, the gift tax shall not be imposed. Gift tax ranges from 10% on not more than KRW 100 million in tax base to the top marginal tax rate of 50%.

Payroll taxes

Employers are required to withhold income taxes at source on a monthly basis, finalise their employees' tax liability, and file the final tax settlement receipt with the tax authorities no later than the tenth day of March of the following year.

Social security contributions

There are four types of social security contributions in Korea, namely national pension, national health insurance, employment insurance, and worker's accident compensation insurance. Employers and employees are almost equally required to bear a total amount of 8.39% of salaries for the first three types of social security taxes (i.e. national pension, national health insurance, and employment insurance), while the worker's accident compensation insurance is borne by employers only, which varies by industry, ranging from 0.7% (banking, insurance) to 34% (coal mining) of salaries.

K

Branch income

In general, a branch office of a foreign corporation is taxed in the same manner as resident companies.

Remittance of retained earnings from a Korean branch to its head office is subject to reporting to a designated foreign exchange bank in Korea under the Foreign Exchange Transaction Act.

If the tax treaty between Korea and the country in which a foreign corporation is residing allows the imposition of a branch profits tax, the tax is imposed on the adjusted taxable income of the Korean branch.

Where applicable, the branch profit tax is levied in addition to the regular CIT, which is imposed at the rate of 20% (or at a reduced rate as provided in a treaty) of the adjusted taxable income of the Korean branch.

Income determination

Gross income consists of gains, profits, income from trade and commerce, dealings in property, rents, royalties, and income derived from any transactions carried on for gain or profit.

Inventory valuation

Inventories generally are stated at either the lower of cost or market (LCM) or cost method. Any one of LCM and six cost methods, including specific identification, first in first out (FIFO), last in first out (LIFO), weighted-average, moving-average, and retail method, can be elected for tax purposes. The method elected should be applied consistently each year unless an application for change has been submitted before

Korea, Republic of

three months from the year-end. Different valuation methods may be used for different categories (i.e. manufactured goods and merchandised goods, semi-finished goods and goods in process, raw materials, supplies in stock) and different business places.

For inventory costing under Korean International Financial Reporting Standards (K-IFRS), LIFO is not an acceptable accounting method. Consequently, in a year when a taxpayer first adopts K-IFRS and duly reports the change of inventory valuation method from LIFO to one of the other costing methods (e.g. FIFO, weighted average), the taxpayer is allowed to exclude the inventory valuation gain arising from the change and include it in its taxable income over the next five-year period on a straight-line method.

Stock valuation

The valuation of securities or bonds shall be made using the cost method. For the cost method, the weighted-average cost method or moving-average cost method shall be applied for the purpose of valuation of securities and the specific identification method may be used for valuation of bonds.

Capital gains

For the purposes of taxation, gross income does not include income derived from gains from capital transactions, such as capital surplus, gains on reduction of paid-in capital, etc. However, gains from treasury stock transactions are taxed, and losses are deductible from taxable income.

Note that capital gains from the disposal of non-business purpose land or houses may be subject to additional capital gains tax at the rate of 10% (40% in the case of non-registered land or houses) in addition to the normal CIT.

Dividend income

All distributions to shareholders are taxed as dividend income, whether paid in cash or in stock.

However, a qualified domestic holding company that owns more than 80% (40% in case of listed subsidiary) share ownership in its domestic subsidiary will receive a 100% deduction for dividends while an 80% deduction is allowed for share ownership of 80% (40% in case of listed subsidiary) or less. A domestic corporation other than a qualified holding company will also receive a 100% deduction for share ownership of 100%, 50% for more than 50% (30% in case of listed subsidiary) share ownership, and 30% for share ownership of 50% (30% in case of listed subsidiary) or less.

Interest income

Except for certain cases, all interest income must be included in taxable income. Generally, interest income is included in taxable income as it is received.

Rental income

Income from the leasing of property shall be included in taxable income. In cases where a company is subject to an estimated tax by the tax authority due to the absence of books of accounts, the deemed rental income as calculated at a term deposit interest rate on the lease deposit received by the company will be included in taxable income.

Royalty income

Royalties are considered to be taxable income when earned.

Gains and losses on foreign currency translation

Companies are allowed to recognise unrealised gains and losses on foreign currency translation of their monetary assets and liabilities in a foreign currency. This recognition is also allowed with respect to currency forward transactions and swaps to hedge foreign exchange risks of such assets and liabilities. In this regard, a taxpayer can choose

whether to recognise unrealised gains and losses or not for tax purposes. Once elected, the same method must be consistently used.

Foreign income

Resident corporations are taxed on their worldwide income. A Korean company is taxed on its foreign-source income as earned at normal CIT rates. To avoid double taxation, taxes imposed by foreign governments the foreign-source income recognised by a resident company are allowed as a credit against CIT or as deductible expenses in computing the taxable income.

Generally, income of foreign subsidiaries incorporated outside Korea is not included in the taxable income of a resident company until the declaration of dividends from the foreign subsidiaries. Therefore, the Korean tax impact may be delayed through deferring the declaration of dividends unless the controlled foreign corporate (CFC) rule under the Law for Coordination of International Tax Affairs (LCITA) is applied.

The CFC rule provides that the undistributed earnings of a resident company's foreign subsidiary located in a low-tax jurisdiction (where the effective tax rate on the income before tax for the past three years averages 15% or less) are taxed as deemed dividends to the resident company that has direct and indirect interest of 10% or more in such subsidiary. The CFC rule does not apply in cases where a foreign subsidiary has fixed facilities (e.g. office, factory) in a low-tax jurisdiction for the conduct of business, it manages or controls the business by itself, and the business is mainly performed in the jurisdiction. Even in this case, however, where passive income (e.g. income from investment in securities) is more than 50% of gross income, the CFC rule shall be applicable. Furthermore, in cases where the passive income is between 50% and 5% of the foreign subsidiary's gross income, the CFC rule will apply in a limited manner (i.e. a CFC's undistributed earnings will be included in taxable income of the CFC's domestic related parties in proportion of such passive income to its gross income). However, dividends will be excluded in calculating the amount of passive income if they are derived from shares issued by the company that is 10% or more owned by a CFC.

If dividends from a qualifying subsidiary are included in taxable income of a resident company, the foreign tax paid by a qualifying subsidiary on the subsidiary's taxable income is eligible for a foreign tax credit in the hands of the resident company regardless of whether there are tax treaties with the relevant foreign countries. For this purpose, a qualifying subsidiary refers to the company in which a resident corporation owns 25% or more of its shares for the period of six consecutive months or more prior to the date of dividend declaration. Unused foreign tax credits can be carried forward for five years.

Deductions

In general, expenses incurred in the ordinary course of business are deductible, subject to the requirements for documentary support.

A corporation's disbursements of more than KRW 30,000 for goods or services provided are required to be supported by qualifying evidences, such as credit card sales vouchers, cash receipts, tax invoices, and those vouchers and invoices stored in the company's enterprise resource planning (ERP) system. The corporation is required to maintain these documents for five years. If the corporation fails to maintain proper evidences, a 2% penalty shall be levied on the amount of disbursement.

Accrued expenses are not deductible until the expenses are fixed or determined.

Depreciation and amortisation

Depreciation of all property, plant, and equipment (PP&E), which includes buildings, machinery, and vehicles, used to generate income is allowed as a deduction for CIT.

Korea, Republic of

Generally, interest on debt acquired to purchase, manufacture, or construct PP&E must be capitalised until the PP&E is operational. This does not apply to the interest associated with the expansion or improvement of existing PP&E. A detailed list of fixed assets, gross values (including capitalised interest), the useful lives of the assets, and the current year's depreciation charge must be submitted to the tax authorities when filing the annual CIT return.

The tax law allows the following methods for calculating depreciation:

- Straight-line or declining-balance method for tangible fixed assets, other than plant and buildings.
- Straight-line method for plant, buildings, and intangible assets.
- Service-output or straight-line method for mining rights.
- Service-output, declining-balance, or straight-line method for tangible fixed assets used in mining.

In determining depreciation using a straight-line method, salvage value of the assets is regarded as zero. However, where the declining-balance method is used, 5% salvage value is required. Changes in the depreciation method must be approved by the tax authorities in advance, and such approval may only be obtained in exceptional cases (i.e. merger between two corporations having different depreciation methods). Although the tax law specifies the standard useful lives for each type of assets, the useful life of a fixed asset can be increased or decreased by 25% of the standard useful life at the taxpayer's election. The elected depreciation method and useful life should be consistently applied. Also, a taxpayer can apply for a change to the useful life within 50% of the standard useful life, which requires an approval from tax authorities.

The standard useful life and the scope of elective useful life for assets are provided in the following tables:

	Standard useful life (years)	Scope of elective useful life (years)
Tangible fixed assets		
Vehicles (excluding those used for transportation businesses and leasing service of machinery, equipment, and consumer goods), tools, equipment, and fixtures	5	4 to 6
Ships and aircraft (excluding those used for fishery, transportation, and leasing service of machinery, equipment, and consumer goods)	12	9 to 15
All buildings and constructions of brick structure, block structure, concrete structure, mud structure, mud wall structure, wooden structure, wooden frame mortar structure, and other structures	20	15 to 25
All the buildings and constructions of steel-frame/iron bar concrete structures, stone structures, brick/stone structures, steel-frame structures	40	30 to 50

Note that machinery and equipment used for specific industries shall be subject to different useful lives from four years (e.g. bag manufacturing) to 20 years (e.g. water supply service).

	Useful life (years)
Intangible fixed assets	
Goodwill, design rights, utility model rights, trademarks	5
Patents	7
Fishery rights, extraction rights under the law of development of mineral resources at the sea bottom (may elect activity method), right of management for toll roads, water rights, right of use for electricity and gas service facilities, right of use for tap water facilities for industrial use, right of use for general tap water facilities, right of use for heating facilities	10

Intangible fixed assets	Useful life (years)
Mining rights (may elect activity method), right of use for exclusive telegraph and telephone facilities, right of use for exclusive sidetracks, right of management for sewage disposal, right of management for tap water facilities	20
Right of use for dams	50

Note that for used fixed assets (including assets acquired through mergers or spin-offs) that have been used for more than half of their standard useful lives, a new useful life may be filed with the tax authorities of between 50% of the standard useful life and the standard useful life.

According to the CITL, depreciation is allowed for tax deduction only when expensed for book purposes. However, in order to alleviate any dramatic increase in tax burden due to decreased depreciation expenses through the adoption of K-IFRS, additional expense deduction may be allowed through tax adjustment. For tax purposes, depreciable assets acquired on or before 2013 may be depreciated at the rate equivalent to the average of three years before the adoption of K-IFRS. Depreciable assets acquired after 2014 may be depreciated using the tax useful lives only if they are the same type of existing assets used for the same business line and the calculation method of deduction is regulated.

Deduction of company car expenses

For company cars provided to officers or employees (whether owned or leased), the amended CITL has introduced new requirements for a company to have appropriate operation records or sufficient evidence to claim the deduction and deduction limit. While the operation records should be prepared for an entire fiscal year, it will be allowed to be prepared from 1 April 2016. The new deduction rule will be effective for the expenditure incurred for fiscal years starting on or after 1 January 2016.

K

Goodwill

Amortisable goodwill for tax purposes is defined as “value transferred with consideration, apart from transferred assets included in business transfer, valued by taking into account business premium factors of the transferor such as permission/licence, legal privileges, geographical advantages, business secrets, credit, reputation, transaction partners, etc.”. Goodwill shall be amortised over five years using the straight-line method for tax purposes.

Start-up expenses

Start-up expenses, such as incorporation expenses, founders' salary, and registration fees and taxes, are deductible if the expenses are recorded per the articles of incorporation and are actually paid.

Interest expenses

Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes. There are, however, a number of exceptions to the general rule, as follows:

- If borrowings from a foreign shareholder, or from a third party under a payment guarantee by the foreign shareholder, exceed two times the equity of the relevant foreign shareholder, the paid interest and discount fee as to the relevant excessive portion will be disallowed and further treated as a dividend payment.
- Debenture for which the creditor is unknown.
- Bonds and securities on which recipient of interest is unknown.
- Construction loans and loans for the purchase of land and fixed assets up to the date on which the assets are acquired or completed must be capitalised as a part of the cost of the asset and depreciated over the life of the asset. Interest after the date of completion or acquisition is deductible as incurred.

Korea, Republic of

- Interest on loans related to non-business purpose assets or funds loaned to related parties.

Contingent liabilities

In general, contingent liabilities are not deductible, except for reserves under the following items, which are counted as losses within the tax limit:

- Reserves for bad debts.
- Liability reserves and emergency reserves prescribed in the Insurance Business Law.
- Reserves for non-profit organisations.
- Reserves for the write-off of a compensation claim set aside by trust guarantee funds in each business year.

The amounts enumerated below are also counted as losses in calculating income for the business year:

- The amount of gains from insurance claims used to acquire the same kinds of fixed assets as the lost fixed assets, or to improve the damaged fixed assets within two years after the first day of the business year following the business year in which the gains fall.
- The amount of a beneficiary's share of construction costs received by a domestic corporation engaged in the electricity or gas business, etc., used for the acquisition of fixed assets.
- The amount of the national treasury subsidies actually used for acquisition or improvement of fixed assets for business.

Bad debt

For companies that are not financial institutions, a doubtful accounts reserve is allowed as a deduction for tax purposes at the greater of 1% on the tax book value of the receivables at a year-end or actual bad debt ratio (deductible bad debts in a current year divided by the preceding year's tax book value of receivables). Bad debts are allowed as a deduction when certain legal proceedings are satisfied or the statute of limitations has lapsed.

Charitable contributions

Donations to public interest entities, such as government authorities and social welfare organisations, as well as donations for academic research, technical development, etc., are classified as *Bub-jung* donations. *Bub-jung* donations are tax-deductible at up to 50% of the total taxable income for the concerned fiscal year after deduction of NOL. *Ji-jung* donations to public entities prescribed by the CITL are also tax-deductible at up to 10% of the total taxable income for the fiscal year after the deduction of deductible *Bub-jung* donations and NOL.

The amount in excess of such limit may be carried over for five years. Donations other than the statutory donations above will not be deductible for tax purposes.

Employee remuneration

There is no statutory limit for employee remuneration, which includes salaries, wages, stipends, bonuses, retirement payments, pensions, and meal and housing allowances, as well as all other kinds of subsidies, payments, and compensation. Remuneration of foreign employees is determined according to their engagement contracts.

Pension expense

Employers hiring one or more employees are required to set aside severance pay or retirement pensions for their employees. Defined contribution (DC) and defined benefits (DB) are the two available schemes for the retirement pension system. Under the DC scheme, the premiums paid by the employer are deductible upon payment while deductions for the reserve under the DB scheme are subject to a limit.

Payment for directors

Bonuses paid to directors in excess of the amount determined in the articles of incorporation or at a shareholders' meeting, etc. are not deductible. Also, severance benefits paid to directors in excess of the amount prescribed in the tax law are not deductible.

Entertainment expenses

Entertainment expenses of more than KRW 10,000 on an event basis must be supported by corporate credit card vouchers, cash receipts, or tax invoices in order to be deductible. In addition, the entertainment expenses in excess of the tax limit are not deductible.

The deductible limit for entertainment expenses in a business year is computed as:

- an amount calculated by multiplying KRW 12 million (KRW 18 million [temporarily increased to KRW 24 million for the tax years beginning on or after 1 January 2015 and ending on 31 December 2016] for an SME) by the number of months in the respective business year divided by 12, plus
- an amount calculated by multiplying the amount of gross receipts for a business year by the rates listed in the following table (in the case of receipts from transactions between related parties, 10% of the amount calculated by multiplying the receipts by the following rates shall be applied).

Amount of gross receipts (KRW)	Rate
10 billion or less	0.2%
Over 10 billion up to 50 billion	KRW 20 million + 0.1% of the excess over KRW 10 billion
Greater than 50 billion	KRW 60 million + 0.03% of the excess over KRW 50 billion

K

Insurance premiums

Insurance premiums paid to an insurance company are deductible if the business enterprise is the listed beneficiary. Insurance premiums for which the beneficiary is the employee are also deductible; however, they are treated as salaries for the employees and are subject to WHT on earned income (this excludes the severance insurance premium or social security taxes that are borne by employers).

Fines and penalties

Fines, penalties, and interest on underpayment of taxes are not deductible.

Taxes

Income taxes are generally not deductible in determining income subject to CIT.

Net operating losses (NOLs)

In general, an NOL carryover is allowed for ten years. The amended CITL has introduced a strengthened rule restricting a company from deducting the NOL in excess of 80% of the taxable income of a particular year. This rule will be applied to the fiscal year beginning on or after 1 January 2016. However, SMEs and certain qualifying companies under recovery process, etc., which will be exempt from this rule, are allowed to deduct the NOL without limitation.

Generally, loss carrybacks are not allowed. However, SMEs can carry back an NOL for one year.

Payments to foreign affiliates

With sufficient supporting documentation and under an arm's-length principle, interest, royalty, and management service fees paid to foreign affiliates are deductible for CIT purposes.

Korea, Republic of

Under the LCITA, the following conditions must be met in order for a management service fee charged by a foreign related party to a domestic company to be deductible:

- The services must be provided based on an agreement entered into by the service provider prior to the service transaction.
- The provision of the service can be verified by a schedule of services, description of services, description of the company providing services and its employees, detailed explanation of expenses incurred, and other supporting documentation.
- A company must be able to anticipate the company's additional profit or reduced expense through the services provided by a foreign affiliate.
- Payment for the provided services should be consistent with arm's-length standards.

Group taxation

The consolidated corporate tax filing system can be adopted for a domestic corporation in cases where two or more wholly-owned subsidiaries exist. A taxpayer may elect the consolidated filing scheme upon approval from the tax authorities, but it cannot be revoked for at least five years after the election of the consolidated tax filing.

Transfer pricing

The LCITA authorises the tax authorities to adjust the transfer price based on an arm's-length price and to determine or recalculate the taxable income of a domestic company (including PE of a foreign company) when the transfer price for the transaction between the domestic company and its foreign related party is either below or above an arm's-length price.

The LCITA lists the following methods for determining an arm's-length price: the comparable uncontrolled price (CUP) method, the resale price method, the cost-plus method, the profit-split method, the transactional net margin method, and other reasonable methods. Other reasonable methods can be used only if it is unfeasible to apply one of the aforementioned methods.

The method used and the reason for adopting that particular one for an arm's-length price determination must be disclosed to the tax authorities by a taxpayer in a report submitted along with the taxpayer's annual tax return.

New transfer pricing documentation requirement

In line with the OECD BEPS Action 13, the recently amended LCITA includes a new reporting requirement for multinational companies in Korea to submit a consolidated report (including local file and master file) on their cross-border, related-party transactions, affecting not only Korean corporations but also foreign corporations having a PE in Korea that meet all of the following conditions: (i) annual gross sales of an individual entity exceeding KRW 100 billion and (ii) international related-party transactions exceeding KRW 50 billion per year. Required information to be submitted for reporting includes organisation, business, intangible assets, related-party transactions, etc. relating to the group and the local entity. Failure to comply with the reporting requirement will result in a penalty. This new rule will be applied to the required information for fiscal years starting on or after 1 January 2016.

Thin capitalisation

In cases where a Korean company borrows from its foreign-controlling shareholder and the debt-to-equity ratio exceeds 2:1, a portion of interest payable on the excess borrowing is characterised as dividends subject to Korean WHT (reduced rate if a tax treaty applies) while being treated as non-deductible in computing taxable income.

Controlled foreign corporations (CFCs)

Under the Korean CFC rule, when a Korean national directly or indirectly owns at least 10% in a foreign corporation and the foreign company's average effective income tax rate for the three most recent consecutive years is 15% or less, the undistributed earnings of the CFC shall be deemed to be paid as a dividend to the Korean national and subject to tax in Korea.

For more information on the CFC rule, see Foreign income in the Income determination section.

Related party transactions

Under the provision of the CITL, the tax authorities may recalculate the corporation's taxable income when CIT is unreasonably reduced due to transactions with related parties. Generally, if the discrepancy between the transaction price and fair market value exceeds 5% of the fair market value or KRW 300 million, the transaction will be subject to this provision.

Tax credits and incentives

Foreign tax credit

Taxes imposed by foreign governments on income recognised by a resident taxpayer are allowed as a credit within the limit against the income taxes to be paid in Korea, or as deductible expenses in computing the taxable income. The excess foreign tax credit can be carried forward five years.

Indirect foreign tax credit is also available for a Korean parent company in cases where the dividends from a foreign subsidiary are included in the taxable income of the Korean parent company. From 2015, the conditions on indirect tax credit are tightened to exclude the overseas grandson subsidiary and raise the shareholding ratio from 10% or more to 25% or more.

Investment incentives

Tax credits are generally available for qualified investment in facilities for productivity enhancement, safety, job-creating investments, etc.

Tax credit for investment in facilities for productivity enhancement

If a resident makes an investment in facilities or equipment to increase productivity by no later than 31 December 2017, then 3% (5% and 7% in the case of medium-scale companies and SMEs, respectively) of such investment amount shall be deducted from CIT. The unused tax credit can be carried forward to the next five years.

Tax credit for investment in facilities for safety

If a resident or a domestic corporation makes an investment in a facility (excluding any investment in used assets) for safety that is considered necessary for industrial purposes no later than 31 December 2017, then an amount of 3% (5% and 7% in the case of medium-scale companies and SMEs, respectively) of such investment shall be deducted from CIT. The unused tax credit can be carried forward to the next five years.

Tax credit for job-creating investments

The tax credit for job-creating investments consists of a basic credit and an additional credit. The basic credit is not available at all in the event of decreased employment by any one person with an exception to SMEs, which may claim the basic credit after a certain amount (KRW 10 million for each decreased employee) is subtracted. The basic credit includes a 0% to 3% tax credit for a company maintaining a status quo employment and an additional 3% to 6% tax credit for new job-creating investments. The additional tax credit for job creation does not exceed the ceilings set at KRW 10 million (KRW 15 million per youth employee between the ages 15 and 29, KRW 20

Korea, Republic of

million per specified occupational high school graduate employee) multiplied by the amount of new employment in net. This credit will apply to investments made no later than 31 December 2017. The unused tax credit can be carried forward to the next five years.

Tax credit to support youth job creation

To support youth job creation, the recently amended STTCL has allowed a company to claim a tax credit worth KRW 5 million (KRW 2 million for a large company) for the increased number of youth employees aged between 15 and 29. The new tax credit will be available from the fiscal year that includes 31 December 2015 to the year that includes 31 December 2017. The unused tax credit can be carried forward to the next five years.

Temporary tax credit for increase in corporate payroll

The amended law introduces a temporary 10% tax credit (5% for large corporations) on the incremental amount in average corporate payroll over a certain base level calculated in a prescribed manner by taking into account the average corporate payroll over the previous three years. This is conditional on there being no decline in the number of full-time employees from the previous year. The temporary credit is implemented from 1 January 2015 through 31 December 2017. The unused tax credit can be carried forward to the next five years.

Special tax treatment to facilitate dividend payments

In order to facilitate dividend payments to shareholders of listed companies to try and boost the growth of the stock market, a provision lowers the withholding rate on dividend income distributed by high-dividend paying listed companies from 14% to 9% (which will be reported per the final tax return of the shareholders) and allows the segregated taxation of such dividend income if those listed companies meet the requirements as prescribed in the tax law and the shareholders apply for the segregated taxation (in this case, 25% final tax rate applies). This special tax treatment applies to eligible dividend income from earnings of high-dividend paying listed companies for tax years beginning on or after 1 January 2015 and ending on 31 December 2017.

Tax credit for re-hiring retired female employees of SMEs

The amended law introduces a tax credit to promote the re-employment of female employees of SMEs who retired for pregnancy, childbirth, or care and other personal reasons as prescribed in the Presidential Decree. The tax credit is designed to allow SMEs to subtract the amount, as much as 10% of labour costs paid per re-hired female employee, from their corporation tax payable for the period of two years following the month of re-employment if prescribed conditions are met. This credit applies if the SME executes an employment contract for one year or more until 31 December 2017. The unused credit can be carried forward to the next five years.

Research and development (R&D) tax incentives

The STTCL provides various tax incentives to stimulate R&D activities. These include a tax credit for research and manpower development expenses, a tax credit for technology transfer, and tax credits for merger or acquisition of technology innovative SME.

Tax credit for development of research and manpower

Companies presently claim a tax credit in relation to qualifying R&D expenditure to the extent of either (i) 2% to 3% (8% to 15% for medium-scale companies, 25% for SMEs) of the current R&D expenses or (ii) 40% (50% for SMEs) of the incremental portion of the current R&D expenses over the average of the previous four years. The incremental method can be applied only when the R&D expenses for the prior year exceed the average R&D expenses for the previous four years. The tax credit has been extended to include R&D in relation to core technologies as authorised by government ministries as well as pre-designated strategic growth industries until the end of December 2018, and,

for these industries, the credit rate for the current R&D expenditure is 20% (30% for SMEs). The unused credit can be carried forward to the next five years.

Tax credit for technology transfer among SMEs (Korean patent box regime)

Tax credit and reductions have been introduced to facilitate the transfer of technology between companies so as to enhance technical competencies and the recovery of funds invested in technology more efficiently. CIT on income derived by SMEs and specified medium-scale companies from the transfer of patents, etc. to a Korean national is reduced by 50%. The amended law grants a 25% tax credit for income derived by SMEs and medium-scale companies from the leasing of patents or utility model rights where the company has first filed a registration of such rights. Also, SMEs are allowed to claim 7% of the amount paid to acquire patents, etc. from a Korean national (ceiling at 10% of CIT). This temporary credit is applicable to transfers, purchases, or leases taking place until the end of December 2018. The unused credit can be carried forward to the next five years.

Tax credit for merger or acquisition of technology innovative SME

In cases where a domestic company merges with a technology innovative SME in a qualified manner, the merger company shall be permitted to take a 10% tax credit with respect to the payment made in such a merger, up to the value of the acquired technology. This 10% tax credit will also be available for a company that acquires shares in a technology innovative SME in a qualified manner no later than the end of December 2018. In this case, if any of requirements for a qualified manner fails to be met, the amount of tax credited will be collected. The unused credit can be carried forward to the next five years.

K

Tax credit for investment in facilities for technology and human resources development

A corporation purchasing facilities no later than 31 December 2018 prescribed in the Presidential Decree with the purpose of R&D and job training is eligible for a tax credit of up to 1% (3% for medium-scale companies, 6% for SMEs) of such investment. The unused tax credit can be carried forward five years.

Energy/environmental incentives

Tax credit for investment in energy-saving facilities

If a resident makes an investment (excluding any investment in used goods) no later than 31 December 2016 in energy-saving facilities, 1% (3% for medium-scale companies, 6% for SMEs) of such investment shall be deducted from CIT. The unused tax credit can be carried forward five years.

Tax credit for investment in facilities for environmental protection

If a resident makes an investment (excluding any investment in used goods) in any facility for the purpose of environmental conservation no later than 31 December 2016, then 3% (5% for medium-scale companies, 10% for SMEs) of the investment amount shall be deducted from CIT. The unused tax credit can be carried forward five years.

Inbound investment incentives

The Korean government provides various incentives and benefits for inducing foreign investment under the Foreign Investment Promotion Law.

Among others, foreign-invested companies that engage in certain qualified high-technology businesses can apply for 100% exemption from CIT for five years, beginning from the first year of profitable operations (from the fifth year, if not profitable until then) and a 50% reduction for the following two years in proportion to the foreign shareholding ratio. An exemption from WHT on dividends, which was available for foreign investors in the same manner as above during the same grace period, is no longer granted for tax exemption applications filed on or after 1 January 2014. However,

Korea, Republic of

the WHT exemption on dividends already approved will not be affected by the tax law change. In addition, the taxpayer can apply for 100% exemption from acquisition tax and property tax on assets acquired for their exempt business for five years after the business commencement date and 50% reduction for the following two years. For local tax exemption, some local governments grant longer exemption periods (up to 15 years) and higher exemption ratios in accordance with their local ordinances. Qualified foreign investment also can be eligible for exemption from customs duties, VAT, and individual consumption tax on imported capital goods.

In addition, foreign investors satisfying specified criteria are provided with tax incentives and other benefits for investment in specially designated areas, including foreign investment zones (FIZs), free economic zones (FEZs), free trade zones (FTZs), and strategic industrial complexes exclusively developed for foreign invested companies. The tax incentives for qualifying foreign investors in individual type FIZs and FEZs and certain strategic industrial complexes that are approved by the related committee under laws governing the operation of the zones are similar to those of the above foreign invested high-tech companies. Qualifying investors in complex type FIZs, FEZs, FTZs, and strategic industrial complexes may receive the 100% exemption from corporate or individual income tax as well as local taxes for the first three years and 50% reduction for the next two years. They also receive exemption from customs duties on imported goods.

To receive tax incentives for inbound investment, an application for tax incentives, together with supporting documents, should be filed with the tax authorities by the end of the fiscal year that the business commencement date belongs to. In addition, effective 1 January 2015, foreign investment made via specific countries is excluded from the exemption from corporate or individual income tax and local taxes for inbound investment. They include those countries with which Korea has not entered into income tax treaties (including tax information exchange agreements [TIEAs] and investment promotion and protection agreements), such as Botswana, Republic of Cyprus, Dominican Republic, Guatemala, Lebanon, Nauru, Niue, Seychelles, and Trinidad and Tobago.

Foreign direct investment (FDI) incentive limitations

The FDI credit limits incentives granted to qualified FDIs. The ceiling has been set to encompass both investment amount and job-creation. In terms of investment amount, for applications filed from 1 January 2016 or the case where the first foreign investment per the application filed before 1 January 2016 is not made before 1 January 2016, the level of incentives for FDI has been reduced to 50% of the aggregated FDI amount for companies benefiting from a seven-year incentive period (30% ceiling for companies enjoying a five-year incentive period). In terms of job-creation, the level of incentives for FDI has been reduced to the lower of 40% of the aggregated FDI amount for companies benefiting from a seven-year incentive period (30% for companies enjoying a five-year incentive period) or KRW 10 million times the company's net increase in employment.

Companies that have enjoyed tax benefits based on job-creation will be subject to tax assessment in cases where there is a net decrease in employment within the subsequent two years in comparison to the year that the relevant tax credit was obtained.

Withholding taxes

Foreign corporations with income derived from sources in Korea are subject to CIT on such income. If the foreign corporation has no 'domestic place of business' in Korea, it will be subject to tax on its Korean-source income on a withholding basis in accordance with the tax laws and the relevant tax treaty, if applicable. Any Korean-source income attributable to a domestic fixed place of business of a foreign corporation will be subject to Korean CIT.

For residents of countries having a tax treaty with Korea, reduced WHT rates may apply. An application form must be submitted to the withholding agents in order to apply the treaty rate. If a beneficiary cannot be identified in the application form, the withholding agents should withhold the tax at the non-treaty rate.

For dividends, interest, and royalties, the WHT rates are limited as follows (as of April 2016):

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations (1)	0	14/25	0
Resident individuals (1)	14	14/25/30	0
Non-resident corporations and individuals:			
Non-treaty (2)	20	14/20 (36)	20 (39)

Notes

1. Dividends and interest paid to resident individuals by corporations generally are subject to a 14% WHT rate. In addition to this, there is a resident surtax of 10% on the CIT liability.
2. In addition to the indicated tax rate, a resident surtax is charged at a rate of 10% of the respective tax rate.
3. Lower rate applies in case of equity ownership of 10% or more.
4. 10% rate applies to royalties paid for the use of or the right associated with industrial activities.
5. 10% rate applies if the loan period extends to seven years or more, the recipient is a financial institution, and the loan is used for certain designated purposes.
6. 25% rate applies to royalties associated with the use of trademarks or trademark rights.
7. 5% rate applies in case of equity ownership of 15% or more.
8. Lower rate applies in case of equity ownership of 25% or more.
9. 10% rate applies if the term of loans exceeds three years.
10. 10% rate applies when a recipient of interest income is a bank and income is connected with a loan with a term in excess of seven years.
11. Lower rate applies in case of equity ownership of 20% or more.
12. 10% rate applies if a recipient is a bank.
13. 5% rate applies if a recipient holds 10% or more ownership in a paying corporation but, even in case of 10% or more ownership, 10% rate applies if the dividends are paid out of profits subject to tax at a lower rate than the normal corporate tax rate of a country where a payer resides. In other cases, 15% rate applies.
14. 7.5% rate applies when a recipient of interest income is a bank or a financial institution.
15. 2% rate applies to royalties paid for use of or the right to use industrial, commercial, or scientific equipment.
16. 10% rate applies if it is for the use of or the right to use industrial, commercial, and scientific equipment or information.
17. 15% rate applies if royalties are for use of or the right to use cinematography films or tapes for radio or television broadcasting or any copyright of literary or artistic work.
18. 0% rate applies in case of equity ownership of 10% or more.
19. 5% rate applies if a recipient is a bank.
20. 5% rate applies to royalties for use of copyrighted literature and music.
21. 10% rate applies if the term of the loans exceeds seven years.
22. Lower rate applies if it is for the use of or the right to use a patent, trademark, design, or secret formula, or industrial, commercial, and scientific equipment or information.
23. 10% rate applies in cases of equity ownership of 25% or more, or dividend paid by a resident company engaged in a preferred pioneer area and registered with the Board of Investment.
24. 10% rate applies in cases where the interest is paid in respect of public offering of bonds, debentures, or similar obligations or interest paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentive laws.
25. 10% rate applies in case of royalties paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentives laws.
26. 5% rate applies if a recipient holds 30% or more of equity interest in the amount of at least 100,000 United States dollars (USD).
27. 10% rate applies if a beneficial owner of the income is a financial institution (including insurance company) or resident of Thailand who is paid with respect to indebtedness arising as a consequence of a sale on credit by a resident of Thailand of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm's length.
28. 10% rate applies if the term of the loan exceeds two years.
29. 10% rate applies to royalties for use of copyrighted literature, music, films, and television or radio broadcasts. Otherwise, 15% rate applies.
30. 10% rate applies if equity ownership is 10% or more and not more than 25% of the gross income of a paying corporation for a preceding tax year consists of interest or dividends.
31. 10% rate applies when a recipient of interest income is a bank or an insurance company.
32. 5% rate applies when a recipient holds 25% or more of equity interest, and 10%, when a recipient holds 10% or more of equity interest. In other cases, 15% rate applies.
33. 5% rate applies to royalties paid for the use of or the right associated with industrial, commercial, or scientific equipment.
34. 0% rate applies to royalties paid for the use of academic rights.
35. 5% rate applies to royalties paid for the use of or the right associated with any copyright of literary, artistic, or scientific work, including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. 10% rate applies to royalties paid for the use of or the right to use a patent, trademark, design or model, plan, secret formula, or process. 15% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
36. 14% rate applies if interest arises from bonds issued by a Korean company or government bodies.
37. 0% rate applies if a recipient of interest income is government, central bank, etc.
38. 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
39. Fees arising from rental of industrial, commercial, scientific equipment, etc. are classified as rental income subject to 2% WHT.
40. 10% rate applies to royalties paid for technical support.
41. 7.5% rate applies if a recipient directly holds 10% or more equity share. In other cases, 10% rate applies.

Korea, Republic of

If a foreign company is located in a foreign jurisdiction designated as a tax haven by the Minister of Strategy & Finance, any Korean-source income of such foreign company will be subject to the domestic withholding rate of 20% regardless of whether or not the foreign company is resident of a treaty country. Currently, only Labuan is designated as such a jurisdiction. The foreign company may claim a refund of any excess WHT paid within three years if it proves to the Korean Tax Office that it is entitled to the reduced treaty rates as the substantive and beneficial owner of the income. Alternatively, a foreign company may attempt to seek a pre-approval in order to have the treaty benefits apply upfront by making an application to the Commissioner of Taxation.

Tax administration

Taxable period

In Korea, the taxable year is on a fiscal-year basis as elected by the taxpayer. However, it cannot exceed 12 months.

Tax returns

A corporation must file an interim tax return with due payment for the first six months of the fiscal year, and the filing/payment must be made within two months after the end of the interim six-month period.

A corporation must file an annual tax return with due payment for the fiscal year, and the filing/payment must be made within three months from the end of the fiscal year. In case the external audit is not completed and the financial statements are not fixed, a corporation can request for extension of tax filing by one month with delinquent interest of 1.8% *per annum*.

Payment of tax

Where the tax amount to be paid by a resident corporation is in excess of KRW 10 million, part of the tax amount to be paid may be paid in instalments within one month of the date of the expiration of the payment period (two months for SMEs).

Where the tax amount to be paid is KRW 20 million or less, the excess of KRW 10 million may be paid in instalments; and where the tax amount to be paid exceeds KRW 20 million, 50% or less of the tax amount may be paid in instalments.

Functional currency

In instances where the taxpayer adopts to use a foreign currency as its functional currency, there are three ways to calculate the CIT base: (i) calculate the tax base using the financial statements in functional currency and translate it into Korean won; (ii) prepare the financial statements in Korean won and calculate the tax base; or (iii) translate the financial statements into Korean won and calculate the tax base. Once elected, the same method must be consistently used.

Tax audit process

For large companies whose sales revenue exceeds KRW 300 billion, a tax audit will be conducted every five years. Other companies are selected by certain standards, which were announced by the National Tax Service (NTS).

Statute of limitations

The statute of limitations is generally five years from the statutory filing due date of the annual CIT return. However, the statute of limitations is extended further in the following cases:

- Seven years if a taxpayer does not file its tax base by the statutory due date.
- Ten years if a taxpayer evades taxes by fraud or unjustifiable means.

- 15 years for fraud or unjustifiable means involving cross-border transactions. For this purpose, a 'cross-border' transaction means when a party or parties to the transaction include(s) non-resident(s) or foreign corporation(s) (excluding domestic business places of non-resident(s) or foreign corporation(s)).

Along with the extension of the NOL carryforward period from five years to ten years, when a taxpayer uses the NOL incurred more than five years ago, the statute of limitation shall be one year from the filing due date of the fiscal year when the NOL is utilised.

Period of extinctive prescription for collection of national taxes

The period of extinctive prescription for collection of national taxes is five years (ten years for national tax payable worth KRW 500 million or more) from the date on which the government's right to collect a national tax becomes exercisable. Along with the five year extinction prescription period of national tax collection, the extinction prescription period of tax refund request of taxpayers is extended to five years, which was previously three years from the tax return filing due date, effective for tax refund requests made on or after 1 January 2015.

Topics of focus for tax authorities

The recent topics of focus for tax authorities are as follows:

- Increased focus on foreign exchange compliance during customs audits.
- Increased scrutiny for tax evasion of the underground economy through investigating financial information available under the revised Financial Information Unit (FIU) Act.
- Increased scrutiny for the prevention of offshore tax evasion through aggressive tax planning.
- Gift tax imposed on a transaction giving unfair share of works to an affiliated company that is deemed a gift to a controlling shareholder.
- Prevention of embezzlement through fictitious expenses or tax evasion using subcontractors.
- Deductibility of management service fees or allocated expenses incurred by foreign affiliates.
- International inter-company transactions and transfer pricing.

K

Other issues

Exchange controls

Most transactions involving foreign exchange generally do not require approval or reporting under the Foreign Exchange Transaction Act (FETA), with a few exceptions as prescribed by the FETA. Receipt of foreign exchange from outside Korea is freely permitted, and payments to foreign companies are not regulated. Most restrictions on Korean companies' foreign currency transactions with foreigners have been removed. However, the government continues to monitor certain flows of foreign currency in an attempt to minimise incoming speculative currency and outgoing capital flight.

Advance reporting is required for most capital transactions. For example, foreign currency loans obtained by a Korean resident or loans provided by a Korean resident to an overseas resident should be reported in advance. Foreign currency deposits should also be reported in advance. The agency to which the reporting should be made again differs based on materiality of the transaction amount or transaction type.

In addition, reporting in advance to the appropriate agency is required for the netting of receivables and payables with a foreign resident, third party payments where a payment is made to a foreign resident other than the transaction counterpart, and

Korea, Republic of

cross calculation, which is similar to netting, but the concerned company opens a bank account in which the offsetting takes place for future receivables and payables.

Ever since Korea's currency crisis, most restrictions on short-term as well as mid and long-term borrowings from overseas by corporations have been removed. Most foreign currency loans are allowed and are subject to reporting to a foreign exchange bank. There are no specific regulations, except the reporting requirements, on borrowings from overseas by foreign investment companies in Korea.

Intergovernmental agreements (IGAs)

Korea signed an agreement on automatic exchange of tax information with the United States in March 2014. If ratified by the parliaments of both countries, the agreement will mandate the tax authorities to collect from financial institutions and exchange data on interest, dividends, and other income subject to withholding paid to non-residents and provide the collected data to the governments where the non-residents are located by the end of September of the year following the concerned year.

Korea approved the regulations to comply with the US Foreign Account Tax Compliance Act (FATCA), effective from 1 July 2014. Based on the Law for Coordination of International Taxation Affairs and the Korea-US income tax treaty, the approval of these regulations will help Korean financial institutions participate directly with the FATCA. Korean financial institutions covered by the regulations include banks (including savings banks), mutual finance companies, securities companies, investment funds, insurance companies, etc. The coverage of financial accounts will include deposits, trusts, funds, insurance (only if the refund of insurance surrender value exceeds USD 50,000), and pension accounts. However, those accounts having annual deposit ceilings for tax incentive purposes shall be exempt from the reporting requirements.

Choice of business entity

The following types of commercial entities are permitted in Korea:

- Corporation (*Hoesa*): There are five classes of corporation, outlined as follows:
 - Limited corporation:
 - *Jusik Hoesa* (JH): A corporation incorporated by one or more promoters, with each shareholder's liability limited to the amount of contributed capital. This type of entity is the most commonly used in Korea.
 - *Yuhan Hoesa* (YH): A corporation incorporated by one or more members, with each member's liability limited to the amount of that member's contribution to the corporation.
 - *Yuhan Chegim Hoesa*: A corporation incorporated by one or more members, with each member's liability limited to the amount of that member's capital contribution. With significantly fewer restrictions for establishment and operation, *Yuhan Chegim Hoesa* provides more flexibility and self-control than YH.
 - Unlimited corporation:
 - *Hapmyong Hoesa*: A corporation incorporated jointly by more than two members who are responsible for corporate obligations if the assets of the corporation are insufficient to fully satisfy those obligations.
 - *Hapja Hoesa*: A corporation composed of one or more partners who have unlimited liability and one or more partners with limited liability.
- Partnership: *Hapja Johap* is a legal form of partnership allowed under the Commercial Code.
- Joint venture: A joint venture is generally established as a domestically incorporated corporation whose shareholders have limited liability regarding the obligations of the corporation under the Commercial Code.
- Branch: A foreign corporation can perform its business operation in Korea by setting up a taxable presence in the form of a branch office. The branch office can be classified as a corporation and be taxable under the CITL if one of the following

conditions is met; otherwise, the foreign entity shall be classified as an individual and be subject to the Individual Income Tax Law:

- The foreign entity is a corporation under the laws of one's home country.
- The foreign entity is composed of only limited liability members.
- The foreign entity has an independent ownership of assets or separate right of lawsuit from its members.
- An entity similar to the foreign entity is classified as a corporation under Korean law.
- Liaison office: A foreign corporation can establish a liaison office, which is not allowed to execute income-generating business activities in Korea.
- Sole proprietorship: Sole proprietorships are not a legal form of entity in Korea.

Guidance on taxation of an off-shore partnership

Under the CITL, a foreign corporation is defined as a corporation that has a head office or principal office in a foreign country (only if the foreign corporation shall not have the place of effective management in Korea).

Based on the nature of business, an offshore partnership would be categorised as a foreign corporation if one of the following conditions is met:

- Has a legal personality.
- Only comprised of partners with limited liability.
- Has the legal rights and liabilities that are distinct from its members, including taking possession of assets or having the legal capacity to be a party against a law suit.
- The same or the most similar kind of domestic business entity constitutes a corporation under Korean laws.

Off-shore partnerships with a legal personality like corporate entities prescribed in the Korean Commercial Act, such as stock corporations (*Chusik Hoesa*), limited corporations (*Yuhan Hoesa*, *Yuhan Chegim Hoesa*), and unlimited corporations (*Hapmyong Hoesa*, *Hapja Hoesa*), are treated as foreign corporations for Korean CIT purposes. Also, off-shore partnerships having the nature of limited corporations prescribed in the Korean Commercial Act, such as stock corporations (*Chusik Hoesa*) and limited corporations (*Yuhan Hoesa*, *Yuhan Chegim Hoesa*), are treated as foreign corporations.

Significant developments

Foreign Direct Investment (FDI)

Under the FDI Law, the Kuwait Direct Investment Promotion Authority (KDIPA) previously proposed to grant investors a tax holiday of up to ten years upon fulfilment of certain conditions.

Recently, however, after further studies, the KDIPA has proposed to adopt a different methodology by introducing an allowable credit framework (as opposed to a tax holiday) based on the below-mentioned criteria with a view of ensuring consistency of the FDI Law and to tailor their evaluation process based on global best practices:

- The transfer of advanced technology.
- Stimulation of the local market through engagement of local suppliers for operational purchases.
- Creation of job opportunities for local staff.

Capital Market Authority (CMA) Law

The CMA issued Law No. 22 of 2015 for amending some provisions of Law No. 7 of 2010 concerning the establishment of the CMA and regulating securities activities.

As per Article No. 150 of the Law No. 22 of 2015, in addition to the capital gains on trading of securities on the Kuwait Stock Exchange (KSE), dividends from such listed securities declared after 10 November 2015 are also exempt from tax in Kuwait.

United States (US) Foreign Account Tax Compliance Act (FATCA)

The state of Kuwait has signed an intergovernmental agreement (IGA) with the United States in light of FATCA dated 29 April 2015. In this regard, a Ministerial Order Number 48 of 2015 (MO No. 48) was issued on 3 September 2015, setting compliance framework for the financial institutions operating in Kuwait.

Financial institutions operating in Kuwait have a series of compliances to be adhered to within the deadlines provided by the MO No. 48, which primarily include registration, appointment of the Responsible Officer, and implementation of compliance requirements with extended deadlines up to 31 December 2015. While the MO No. 48 broadly provides for the timelines for compliances, there are still some open areas that are yet to be clarified in terms of reporting deadlines and method of reporting.

Taxes on corporate income

Kuwait does not impose income tax on companies wholly owned by the nationals of Kuwait or other Gulf Cooperation Council (GCC) countries, including Bahrain, Oman, Qatar, Saudi Arabia, and the United Arab Emirates. However, GCC companies with foreign ownership are subject to taxation to the extent of the foreign ownership.

Income tax is imposed only on the profits and capital gains of foreign ‘corporate bodies’ conducting business or trade in Kuwait, directly or through an agent.

Income earned from activities in Kuwait shall be considered subject to tax in Kuwait. In cases where a contract involves the performance of work both inside and outside Kuwait, the entire revenue from the contract must be reported for tax in Kuwait, including the work carried out outside Kuwait. *Please refer to the Income determination section for more information on income that is subject to tax in Kuwait.*

The current tax rate in Kuwait is a flat rate of 15%.

Foreign companies carrying on trade or business in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia are subject to tax in Kuwait on 50% of taxable profit under the law.

Zakat

Zakat is imposed on all publicly traded and closed Kuwaiti shareholding companies at a rate of 1% of the companies’ net profits.

Contribution to the Kuwait Foundation for the Advancement of Sciences (KFAS)

All Kuwaiti shareholding companies are required to pay 1% of their net profits as per their financial statements, after their transfer to the statutory reserve and the offset of loss carryforwards, to the KFAS, which supports scientific progress.

K

Corporate residence

A foreign corporate body is any association formed and registered under the law of any country or state other than Kuwait that is registered as having a legal existence entirely separate from that of its individual members. No Kuwait-registered company is subject to income tax. However, any foreign corporate body that is a shareholder in a Kuwait-registered company undertaking business in Kuwait is subject to tax (*see the Taxes on corporate income section*). For the purposes of this law, GCC residents and entities wholly owned by GCC residents are treated in the same manner as Kuwaiti business entities.

Permanent establishment (PE)

The interpretation and application of the tax laws in Kuwait is usually not consistent with international standards, and the taxing provisions are usually subjected to the widest possible interpretation by the tax department to tax all income from Kuwaiti sources. An insignificant presence of employees or short-term visits to Kuwait by the representatives of a company may render the entire revenue from the transactions as taxable in Kuwait. Full value of the contract, including the value of work performed outside Kuwait, is subject to tax in Kuwait.

Other taxes

Value-added tax (VAT)

There is currently no VAT system in Kuwait.

Customs tariffs

The GCC states have approved a unified customs tariff of 5% on cost, insurance, and freight (CIF) invoice price, subject to certain exceptions. A higher tariff is imposed on imports of tobacco and its derivatives and other products as notified.

Excise taxes

There are no excise taxes in Kuwait.

Kuwait

Property taxes

There are no property taxes in Kuwait.

Transfer taxes

There are no transfer taxes (e.g. stamp duty, real estate) in Kuwait.

National Labour Support Tax (NLST)

The purpose of the NLST law is to encourage the national labour force to work in the private sector by closing the gap in salaries and benefits between public and private sectors.

As per the law, Kuwaiti companies listed in the KSE are required to pay an employment tax of 2.5% of the company's net annual profits.

Payroll taxes

There are no payroll taxes applicable in Kuwait, other than those for social security contributions.

Social security contributions

For Kuwaiti employees, contributions are payable monthly by both the employer and employee under the Social Security Law. The employer's contribution is 11.5% and the employee's is 8% of monthly salary, up to a ceiling of 2,750 Kuwaiti dinars (KWD) per month. Benefits provided include pensions on retirement and allowances for disability, sickness, and death.

In addition to the above contributions, the employee must contribute 2.5% of monthly salary, up to a ceiling of KWD 1,500 per month, under the Social Security Law.

There are no social security obligations for expatriate workers. However, for foreign employees, it is generally necessary to make terminal indemnity payments calculated at 15 days' pay-per-year for the first three years of service and 2/3 month's pay-per-year thereafter.

Branch income

The tax rates on branch profits are the same as on corporate profits.

Income determination

Income tax is imposed on the profit of a business in Kuwait as calculated by the normal commercial criteria, using generally accepted accounting principles (GAAP), including the accrual basis. Note that provisions, as opposed to accruals, are not deductible for tax purposes. In addition, for contract accounting, revenue is recognised by applying the percentage of completion method.

Article 2 of the amended tax law provides that income earned from the following activities in Kuwait shall be considered subject to tax in Kuwait:

- Any activities or business carried out either entirely or partially in Kuwait, whether the contract has been signed inside or outside Kuwait, as well as any income resulting from supply or sale of goods, or from providing services.
- The amounts collected from the sale, rent, or granting of a franchise to utilise any trademarks, design, patents, copyright, or other moral rights, or those related to intellectual property (IP) rights for use of rights to publish literary, arts, or scientific works of any form.

- Commission earned or resulting from agreements of representation or commercial mediation, whether such commissions are in cash or in kind.
- Having permanent office in Kuwait where the sale and purchase contracts are signed and/or where business activities are performed.
- Profits resulting from the following:
 - Any industrial or commercial activity in Kuwait.
 - Disposal of assets, either through the sale of the asset, part of the asset, the transfer of the asset's ownership to others, or any other form of disposal, including the disposal of shares in a company whose assets mainly consist of non-movable capital existing in Kuwait.
 - Granting loans in Kuwait.
 - Purchase and sale of property, goods, or related rights in Kuwait, whether such rights are related to monetary assets or moral rights, such as mortgage and franchise rights.
 - Lease of property used in Kuwait.
 - Providing services, including profits from management, technical, and consultancy services.
 - Carrying out trading activities in the KSE, whether directly or through portfolios or investment funds.

Inventory valuation

Inventory is normally valued at the lower of cost or net realisable value, on a first in first out (FIFO) or average basis.

Capital gains

Capital gains on the sale of assets and shares by foreign shareholders are treated as normal business profits and are subject to tax at a 15% rate. The tax law provides for a tax exemption for profits generated from dealing in securities on the KSE, whether directly or through investment portfolios.

Dividend income

As per Article No. 150 of the Law No. 22 of 2015, dividends declared by companies listed on the KSE after 10 November 2015 are exempt from tax in Kuwait.

Interest income

In principle, tax is levied on the foreign company's share of the profits (whether or not distributed by the Kuwaiti company) plus any amounts receivable for any other income in Kuwait (e.g. interest, royalties, technical services, management fees). However, the Kuwait tax law will still subject the interest received from a Kuwaiti source to tax in Kuwait, whether this interest is the only source of income for the foreign entity in Kuwait or the foreign entity has more sources of income in Kuwait than the interest income.

Foreign currency exchange rates and related profits and losses

The tax treatment for realised and unrealised losses and gains related to foreign currency transactions are as follows:

- Unrealised foreign exchange gains are required to be reported in the tax declaration. However, unrealised gains may be excluded from taxable income for calculating the tax due for the fiscal year.
- Realised foreign exchange gains are taxable in Kuwait and are therefore added to calculate taxable profits.
- Unrealised losses are not considered as tax deductible costs and are therefore excluded for calculating taxable profits.
- Realised losses may be claimed as tax deductible costs, provided such losses are supported by adequate supporting information and documents.

Exempt income

The following sources of income are exempt from tax in Kuwait:

Kuwait

- Kuwaiti merchants purchasing, transporting, and selling goods imported on their own account where the foreign supplier has not been involved in Kuwait operations.
- Profits of a corporate body generated from dealing in securities listed on the KSE, whether such activities are carried out directly or through investment portfolios or funds.

Foreign income

The Kuwait tax law does not clearly state the tax treatment of foreign income. Such income is currently treated on a case-by-case basis.

Deductions

For expenses to be deductible, they must be incurred in the generation of income in Kuwait. Such expenses must be supported by adequate documentary evidence.

Depreciation

Depreciation is taken on a straight-line basis at specified rates. However, within 90 days prior to submission of the tax declaration, the taxpayer may request that the tax department calculate the depreciation using a different method than the straight-line method. The tax department shall accept this request if it is based on a reasonable basis in accordance with the tax accounting principles and rules.

The principal depreciation rates are specified in the law, as follows:

Type of fixed asset	Depreciation rate (%)
Buildings	4
Pre-fabricated buildings, furniture, and office equipment	15
Electronics and electrical equipment	15
Transportation and freight vehicles (trucks)	15
Tools and equipment	20
Cars and buses	20
Drilling equipment	25
Software	25
Computer equipment and accessories	33.3

Goodwill

In accordance with Executive Rule No. 30, amortisation of incorporated body goodwill is not allowed as a tax deductible expense.

Start-up expenses

Expenses incurred prior to signing of the contract are not allowed as tax deductible costs.

Interest expenses

Interest expenses are deductible if they are related to operations in Kuwait and are paid to a local bank.

Bad debt

Bad debt is deductible if related to operations in Kuwait and final resolution from the court is available.

Charitable contributions

Grants, donations, and subsidies paid to licensed Kuwaiti public or private agencies are deductible.

Fines and penalties

Fines and penalties are not tax deductible.

Taxes

Taxes and fees, except income tax, are deductible in Kuwait.

Subcontract costs

A subcontractor is any third party, provider, or beneficiary that in any way executes a portion of the contract or any phase thereof and is responsible for that portion or stage.

As per the Executive Rule No. 28, subcontract costs are deductible if the following conditions are fulfilled:

- The work performed by the subcontractor is related to the main contract.
- The cost of the subcontractor works does not exceed revenues for such works.
- The necessary documents (e.g. the contract, invoices, settlement documents) are available.
- In the event that the incorporated body implementing the contract sells or assigns it to the subcontractor or any other party, official written approval from the contracting body is provided.
- In the event that the subcontractor sells or assigns the contract to another subcontractor, official written approval from the contracting body and the incorporated body implementing the contract is provided.

During inspection, the tax department shall disallow the amounts paid to subcontractors if the incorporated body does not notify the tax department of the subcontractors or does not withhold 5% of the contract value signed with the subcontractor as income tax retention.

Net operating losses

As per the amended tax law, losses may be carried forward for a maximum of three years, provided that the following situations do not arise in the fiscal period following the period in which the loss was recorded:

- The tax declaration does not include any revenue from the business activities of the taxpayer in Kuwait.
- Change in the legal structure of the taxpayer.
- Merger of the taxpayer with another entity.
- Liquidation or ceasing of the activities of the taxpayer in Kuwait.

Please note that losses cannot be carried back in Kuwait.

Head office expenses/payments to foreign affiliates

The deduction of head office expenses (the overhead or the indirect expenses) is limited to 1.5% of the company's Kuwait revenue after deducting the subcontractors shares (if any).

The direct costs allocated by the head office (e.g. supply of goods, design and consultancy costs) are regulated as follows.

For goods costs incurred outside Kuwait:

Work conducted by	Maximum allowable costs as a percentage of revenue
Head office	85%
Affiliated companies	90%
Third parties	95%

Kuwait

For design costs incurred outside Kuwait:

Work conducted by	Maximum allowable costs as a percentage of revenue
Head office	75%
Affiliated companies	80%
Third parties	85%

For consultancy costs incurred outside Kuwait:

Work conducted by	Maximum allowable costs as a percentage of revenue
Head office	70%
Affiliated companies	75%
Third parties	80%

In case there is no separate revenue for the consultancy, design, or goods work, although the nature of the contract requires the existence of consultancy work, the following formula shall be applied:

Consultancy, design, or goods revenue = (consultancy, design, or goods costs / total direct costs) x contract revenue

Group taxation

If a foreign company conducts more than one business activity in Kuwait, one tax declaration aggregating the income from all activities is required to be submitted in Kuwait. In addition, in the case where two affiliates are involved in similar lines of business or work on the same project, their taxable results may be aggregated for the assessment of tax by the Department of Inspection and Tax claims (DIT).

Transfer pricing

Please refer to Head office expenses/payments to foreign affiliates in the Deductions section.

Thin capitalisation

Executive Rule No. 38 deals with the tax treatment of interest and letters of credit. Through this rule, the DIT will accept the interest paid by a company, provided it is fully supported, paid to a financial institution, and related to the Kuwait operations. However, the tax law provides the DIT the right to determine the proper tax treatment on a case-by-case basis (if required).

Controlled foreign companies (CFCs)

There are no CFC rules in Kuwait.

Tax credits and incentives

Foreign tax credit

Foreign taxes paid to a country with which Kuwait has a treaty for avoidance of double taxation may be eligible for credit, up to the maximum of the Kuwaiti tax that would have been payable on such income.

Leasing and Investment Companies Law No. 12 of 1998

Leasing and Investment Companies Law No. 12 of 1998 allows the formation of investment and leasing companies having their principal place of business in Kuwait, with Kuwaiti or foreign shareholders. The law grants a five-year tax holiday to non-

Kuwaiti founders and shareholders of such companies, beginning on the date of establishment of the companies.

Foreign Direct Investment Law No. 116 of 2013 (FDI Law)

The FDI Law gives several incentives and flexibility, including:

- More efficiency within the process by introducing the Kuwait Direct Investment Promotion Authority (KDIPA), which is responsible for determining, evaluating, and granting the licence and approval for foreign companies operating in Kuwait (compared to the old committee and Council of Ministers).
- More flexibility by allowing foreign companies to have the eligibility to structure and operate through a 'branch' and 'representative offices' in Kuwait.

The issuance and amendments made to the investment law, as well as the incentives granted to foreign investors in Kuwait, shall be applicable to activities within specific economic sectors, including all industries with the exception of activities listed on the negative list.

Kuwait Free Trade Zone (KFTZ)

Businesses set up in the KFTZ for carrying on specified operations are exempt from taxes on operations conducted in the zone. Foreign entities can own 100% of such businesses. Currently, the government of Kuwait has stopped issuing KFTZ licences.

Build, operate, and transfer (BOT)

Kuwait has begun to use the BOT method in respect of some large infrastructure projects. Tax and tariff concessions may be built into a BOT contract.

Circular No. 50 of 2002

As per Circular No. 50 of 2002 issued by the DIT regarding treatment of exempted companies under tax laws and/or other special laws and/or tax treaty, exempted companies shall comply with the provisions of submission of tax declaration, inspection, and assessment procedures like other companies in order to be eligible for exemption.

Some of the privileges under this law include:

- Exemption from income tax or any other taxes for a period of ten years from the commencing of the actual operations of the enterprise.
- Benefits under double taxation agreements.
- Benefits under investment encouragement and protection agreements.
- Total or partial exemption from customs duties on imports.
- Recruitment of required foreign labour.
- Allotment of land and real estate.

Withholding taxes

Kuwaiti tax law does not impose withholding tax (WHT). However, all public bodies and private entities are required to retain 5% from the contract, agreement, or transaction value or from each payment made to any incorporated body until presentation of a tax clearance certificate by the recipient of such payment from the Ministry of Finance (MOF) confirming that the respective company has settled all of its tax liabilities in Kuwait. The final payment should not be less than 5% of the total contract value.

Tax treaties

Kuwait has entered into tax treaties with several countries for the avoidance of double taxation. Treaties with several other countries are at various stages of negotiation or ratification.

Kuwait

However, little experience has been gained in Kuwait regarding the application of tax treaties. As a result, disputes about the interpretation of various clauses in tax treaties between taxpayers and the DIT are not uncommon. Disputes with the DIT regarding tax treaties normally arise with respect to the following issues:

- Existence of a PE.
- Income attributable to a PE.
- Tax deductibility of costs incurred outside Kuwait.

The domestic tax law in Kuwait does not provide for WHTs. As a result, it is not yet known how the Kuwaiti government will apply the WHT procedures included. *For the list of treaties, see the Withholding taxes section of Kuwait's Corporate tax summary at www.pwc.com/taxsummaries.*

Tax administration

Taxable period

Tax is imposed on profits arising in a taxable period, which is defined as the accounting period of the taxpayer and further assumed to be the calendar year. However, the DIT may agree to a written request from the taxpayer to change the year-end to a date other than 31 December. Also, at the taxpayer's request, the DIT may agree to extend the accounting period, provided it does not exceed 18 months.

Tax returns

The taxpayer must submit a tax return, based on the taxpayer's books of account, within three months and 15 days of the end of the taxable period. A foreign entity can request an extension of up to 30 days for filing the tax declaration. The maximum extension in time to be granted will be 60 days. If such an extension is granted, no tax payment is necessary until the tax declaration is filed, and payment must then be in one lump sum.

The taxpayer must keep in Kuwait certain accounting records, which are subject to inspection by the tax department's officials. Accounting records may be in English and may be in a computerised system used to prepare financial statements, provided that the system includes the required records and the tax department is previously informed.

The tax return should be supported by the following:

- Audited balance sheet and profit-and-loss account for the period.
- Detailed list of fixed assets (e.g. additions, disposals).
- List of inventory (e.g. quantities and values).
- List of subcontractors and the latest payments to them.
- Copies of current contracts and a statement of income and expenditure for each.
- Trial balance, forming the basis of the accounts.
- Last payment certificate from the client.
- Insurance companies must attach to the Public Budget and the tax declaration a detailed statement with the reinsured documents and the related terms and conditions.

As a general rule, an assessment is finalised only after inspection of records by the tax department. As indicated above, proper documentation must be kept to support expenditure and to avoid disallowances at the time of tax inspection. If support is considered inadequate, the assessment is apt to be made on the basis of deemed profitability. This is computed as a percentage of turnover and is fixed arbitrarily, depending on the nature of the taxpayer's business.

Payment of tax

Tax is payable in four equal instalments on the 15th day of the fourth, sixth, ninth, and 12th months following the end of the tax period. If an extension is approved by the DIT, all of the tax is payable upon the expiration date of the extension. Failure to file or pay the tax on time attracts a penalty of 1% of the tax liability for every 30 days of delay or part thereof.

Objection process

If a company disagrees with an assessment issued by the DIT, the company should submit an objection within 60 days from the date of the assessment. The DIT is required to resolve the objection within 90 days of the filing of the objection, after which a revised tax assessment is issued by the DIT. Upon issuance of a revised tax assessment, any additional tax is payable within 30 days. If the DIT issues no response within 90 days of filing the objection, this implies that the taxpayer's objection has been rejected.

Appeals process

In case the objection is rejected or the taxpayer is still not satisfied with the revised tax assessment, the company may contest the matter further with the Tax Appeals Committee (TAC) by submitting a letter of appeal within 30 days from the date of the objection response or 30 days from the expiry of the 90 days following submission of an objection if no response is provided by the DIT.

The matter is then resolved through appeal hearings, and a final revised assessment is issued based on the decision of the TAC. Tax payable per the revised assessment must then be settled within 30 days from the date of issuance of the revised assessment. Failure to do so results in a delay penalty of 1% of the amount of the tax due per the final assessment for each period of 30 days or part thereof of the delay.

K

Statute of limitations

The statute of limitations period is five years. Moreover, under Article No. 441 of the Kuwait Civil Law, any claims for taxes due to Kuwait or applications for tax refunds may not be made after the lapse of five years from the date on which the taxpayer is notified that tax or a refund is due.

Topics of focus for tax authorities

The DIT has implemented an active approach to ensure the compliance of local companies with the tax retention mechanism, especially those who have franchise operations and agreement with foreign franchisors in Kuwait. In some cases, the DIT has asked the Kuwaiti companies to settle the 5% retention where the franchisors have failed to comply with the tax law requirements.

Significant developments

Recently, Kyrgyzstan joined the Eurasian Economic Union (EEU); consequently, a number of major changes are expected with respect to Kyrgyzstan tax and customs legislation in the following years.

Effective from 1 June 2015, Kyrgyzstan has introduced a new article in the Tax Code regarding the specifics of profit taxation on earnings from large investments. Based on the article, profit earned by a local company from own-produced or re-processed goods in Kyrgyzstan using only new equipment (not used or bought before 1 May 2015) is subject to 0% profit tax if the taxpayer has:

- annual turnover exceeding 170 million Kyrgyzstani som (KGS)
- monthly profit tax exceeding KGS 150,000, or
- charter capital of the local company exceeding KGS 10 million.

Please note that companies in the tobacco, mining, alcohol, retailing, and information technology (IT) sectors are not able to apply such incentives to their profit.

Moreover, dividends of a foreign company that engaged in large investment projects in Kyrgyzstan, not related to permanent establishment (PE) activities in Kyrgyzstan, received as part of the profit with 0% profit tax is subject to 0% withholding tax (WHT).

Taxes on corporate income

Pursuant to the Tax Code, resident entities are subject to a corporate income tax, called the 'profit tax', on their aggregate annual income earned worldwide. Non-resident legal entities carrying out business activities through a PE in Kyrgyzstan are subject to profit tax on the income attributed to the activities of that PE.

Profit tax is calculated at a rate of 10% of aggregate annual income less allowed deductions.

Gold industry profit tax

The profit tax rate for taxpayers extracting and selling gold ore, gold concentrate, gold alloy, and refined gold is set at 0%.

Additionally, there is a tax ('income tax') specifically for taxpayers extracting and selling gold ore, gold concentrate, gold alloy, and refined gold.

Income tax is calculated at a varying rate of 1% to 20% (depending on the world price of a troy ounce of gold) of revenues from selling gold alloy and refined gold or of the value of gold in the gold-bearing ore and gold concentrate calculated on the basis of world prices.

Local income taxes

There are no local income taxes in Kyrgyzstan.

Corporate residence

There is no concept of corporate residence in the Kyrgyzstan tax legislation.

Legal entities formed under the Kyrgyz law should be taxed in Kyrgyzstan on their worldwide income, whereas foreign legal entities should be taxed only in relation to Kyrgyzstan-sourced income.

Permanent establishment (PE)

Under Kyrgyzstan tax legislation, a PE is a permanent place of business through which a non-resident carries out business operations, including activities performed through an authorised person. A PE includes the following:

- Any place of management, department, office, factory, workshop, mining, oil and gas wells, land, construction site, or project.
- Any services rendered by non-residents by hiring personnel working in the territory of Kyrgyzstan for a duration of more than 183 calendar days within any consecutive 12-month period.

A PE is not created in Kyrgyzstan if a non-resident is limited to the following activities in Kyrgyzstan:

- Use of warehouses or buildings exclusively for storage or demonstration activities.
- Use of a fixed place of business exclusively for preparatory purposes.
- Performance of activities in Kyrgyzstan through an agent in cases where such agent usually performs such activities in the ordinary course of business.

Creation of a PE may be connected with the establishment of a branch or subsidiary. Both branches and subsidiaries are considered appropriate business vehicles for foreign investors, and the choice between them is determined by the business the investor is engaged in, along with various other factors.

Other taxes**Value-added tax (VAT)**

In Kyrgyzstan, VAT is assessed on taxable supply and taxable imports. Input VAT assessed on purchases used for business purposes is generally offset against output VAT on taxable supplies. The VAT rate is 12%, except for certain zero-rated supplies and certain exempt turnover (*see below*).

All taxpayers registered for VAT purposes are required to charge VAT on their taxable supply and to calculate and report their VAT liabilities. Taxpayers are required to register for Kyrgyzstan VAT purposes if their taxable supply in the preceding 12 calendar months exceeds KGS 8 million. Even if an entity is not required to register for VAT purposes, it may still do so voluntarily by submitting an application to the appropriate tax committee.

Place of supply of goods

Goods and services are subject to VAT if they are deemed to be supplied in Kyrgyzstan under the place of supply rules. According to these rules, transactions are deemed to be made at the place where transport of the goods begins if the goods are transported by the supplier and at the place where the goods are transferred to the customer in all other cases. The rules regarding services are more complicated. Services that are not

Kyrgyzstan

specifically mentioned are deemed to be supplied at the place where the service provider has established a place of business. Certain other services are deemed to be supplied at the place of the purchaser.

Import of goods

Generally, imports of goods are subject to VAT.

Non-deductible input VAT

The input VAT is not allowed for offset if it is subject to payment in connection with the receipt of goods, works, or services not related to entrepreneurial activity, or if it relates to inputs for VAT-exempt supplies.

Zero-rated supplies

Certain supplies are zero-rated for VAT purposes. These include exports (except for certain limited types of export), international transportation, and services connected with the service of transit air flights related with international transportation. Supply of goods, works, or services for official use of diplomatic and consular representations is taxable, but may be refunded, provided that certain conditions are met.

Exempt supplies

Certain supplies are VAT-exempt, including supplies and exports of gold and silver alloy and refined gold and silver, supplies of pharmaceuticals, land plots, residual buildings and construction, financial services, and export of works and services. When a taxpayer generates both taxable and exempt supplies, input VAT proportional to the ratio of the exempt supply to the total supply is disallowed for offset.

VAT incentives

Certain imports are VAT-exempt, including imports of technological equipment, if used for one's own production purposes. A preferential offset method of VAT settlement in respect of certain fixed assets imported to Kyrgyzstan is also available, whereby the import VAT does not need to be paid to customs but is reflected simultaneously as input and output VAT in the VAT accounts.

Reverse-charge VAT

The current Tax Code does not have any provisions on reverse-charge VAT.

VAT liability calculation and VAT offset carryforward

In general, the VAT liability of a taxpayer is calculated as output VAT (i.e. VAT charged by a taxpayer) less input VAT (i.e. VAT paid by a taxpayer to its suppliers) in a reporting period. The excess of input VAT over output VAT may generally be carried forward against future VAT liabilities.

VAT compliance

The tax period for VAT is a calendar month. The submission of the VAT declaration is due by the 25th day of the month following the reporting period (except for major taxpayers, for which it is due by the end of the month following the reporting period). Payment of the VAT liability is due by the 25th day of the month following the reporting period.

Sales tax

Sales tax is assessed on Kyrgyz legal entities or foreign entities operating through a PE in Kyrgyzstan for any sales of goods or rendering of services. The sales tax mechanism differs from VAT, i.e. the sales tax is levied for the whole sales turnover and does not take into account the purchases (input turnover).

Sales tax rates are as follows:

- In case of sale of goods, works, or services that are VATable and VAT exempt:

- Trading activities: 1%.
- Other activities: 2%.
- In case of sale of goods, works, or services that are VATable and VAT exempt, paid via non-cash settlement: 0%.
- In case of sale of goods, works, or services not outlined above:
 - Trading activities: 2%.
 - Other activities: 3%.
- 2% for banks.
- 5% for mobile communication activities.

The Kyrgyzstan Tax Code further defines ‘trading activities’ as activities on sale of goods purchased for re-sale purposes.

The tax period of sales tax is a calendar month. Taxpayers have to submit tax returns and make payments of sales tax at the place of tax registration by the 21st day of the month following the reporting month.

Customs duties and regimes

According to the Customs Code, the customs value of goods imported to the customs territory of Kyrgyzstan is determined by applying the following methods:

- Transaction value of imported goods.
- Transaction value of identical goods.
- Transaction value of similar goods.
- Deductive method.
- Computed method.
- Provisional method.

K

Based on the Kyrgyzstan customs legislation, the rates of customs duties may be:

- *Ad valorem* - charged in percentage to customs value of the taxable goods.
- Specific - charged within established size for unit of the taxable goods.
- Combined - including both above mentioned types.

The rates in percentage range from 0% to 30%; however, the maximum rate of 35% may be charged if the country of origin is unknown.

Import restrictions

Generally, all entities or persons have equal rights to import and export or transfer goods into the Kyrgyzstan territory, including when carrying out foreign trade activity, except in special cases as stipulated by legislation and international treaties.

Import of certain goods (e.g. weapons, nuclear materials) is subject to licensing.

Temporary import relief

There is a temporary import regime under which foreign goods are used in Kyrgyzstan with full or partial conditional exemption from the payment of customs duties and taxes and without application of non-tariff regulatory measures. The term of the ‘temporary import’ customs regime may not exceed two years.

Customs duties incentives

Certain items are exempt from customs payments, including:

- Transportation vehicles used in the international conveyance of passengers and goods and items of material and technical supply in transit.
- Goods imported in the customs territory or imported from the customs territory for official and personal use by official state representatives of foreign states.

Kyrgyzstan

Kyrgyzstan provides preferential rates or exemptions on the importation (and export) of certain goods, including goods originating from the states that form free trade zones or a customs union with Kyrgyzstan and goods originating from developing countries, included on a special list provided by the government.

Documentation and procedures

Kyrgyzstan pays close attention to formalities/documentation, so it is necessary to furnish the customs authorities with a set of required documents. For import, such documents usually include cargo customs declaration, invoices, contracts, etc.

Warehousing and storage

There is a bonded warehouse customs regime in Kyrgyzstan. Under this regime, imports entering into Kyrgyzstan may be stored in special facilities or special areas that have the status of a customs warehouse under the customs legislation of Kyrgyzstan. This regime implies exemption from customs duties and taxes.

Generally, most goods (unless otherwise specifically provided for) can be placed under the bonded warehouse customs regime. The period for storage of goods at a bonded warehouse is determined by the person placing the goods into the customs warehouse but cannot exceed three years from the date when the goods were placed under the bonded warehouse customs regime.

Re-exports

The re-export regime is similar to that used in international practice. It is defined as a customs regime under which goods previously imported into Kyrgyzstan are exported without payment or with a refund of the paid amounts of import customs duties and taxes and without applying the non-tariff regulatory measures with respect to the goods in compliance with Kyrgyz legislation.

There are certain conditions under which goods can be re-exported. Customs duties and taxes are not charged for goods declared as goods intended for re-export. However, if the goods do not meet the re-export criteria, customs duties and taxes are paid in the amount that would be payable if the goods, at their importation, were declared for release for free circulation, as well as interest on them paid at the National Bank rates, as if deferment was provided with respect to the amounts at placement of the goods under the customs regime of re-export.

Excise tax

Certain goods manufactured in Kyrgyzstan or imported to Kyrgyzstan are subject to excise tax. These include certain alcohol and alcoholic drinks, fortified drinks, beer, tobacco goods, platinum, and oil products.

The rates of excise tax are adopted annually by the Kyrgyzstan government and range from KGS 30 for 1 litre of beer (pre-packaged and not packaged) to KGS 5,000 for 1 ton of fuel. The rate for tobacco goods (including cigarettes) range from KGS 400 to KGS 800 based on the type of tobacco. Note that the excise tax on cigarettes and tobacco products will increase in 2017.

Stamp taxes

There are no stamp taxes in Kyrgyzstan.

Subsurface use taxes

The subsurface use taxes consist of separate bonus and royalty taxes on subsurface users, both Kyrgyz legal entities and branches of foreign legal entities. Under Kyrgyz legislation, subsurface users are legal entities and individuals who perform exploration and/or extraction of mineral resources.

The government, depending on the type of mineral resources, establishes the bonus rates.

The royalty rates are estimated either as a percentage of sales turnover (1% to 12%) or in absolute terms in Kyrgyzstani som, depending on the type of mineral resources.

Payroll taxes

The employer is obligated to withhold and transfer to the budget the income tax from its employees' gross remuneration less allowable deductions. The income tax rate is 10%.

Social contributions

The social security system in Kyrgyzstan is comprised of the Pension Fund, Obligatory Medical Insurance Fund, and Employees Recovery Fund. The employer pays social contributions at 17.25% of employees' gross remuneration from its own funds.

The employer is also required to withhold social contributions at 10% out of the salary that is payable by the employees to the Pension Fund and State Saving Fund.

Local taxes

There are two local taxes in Kyrgyzstan, property tax and land tax.

Property tax

Property tax is a local tax payable quarterly by legal entities owning transport vehicles and immovable property in Kyrgyzstan, including apartment houses, apartments, boarding houses, holiday inns, sanatoria, resorts, production, administrative, industrial, and other buildings or facilities. Certain real estate may not be subject to this tax according to special lists approved by the government.

In respect of immovable property, the tax rate is established by the city or local authorities at a rate not to exceed 0.8% of the taxable base, except for apartment houses and apartments designated solely for residence, for which the rate may not exceed 0.35% of the taxable base. For transport vehicles, the tax is computed in Kyrgyzstani som, depending on engine volume and year of production.

Land tax

Land tax is paid quarterly by legal entities on the area of owned land. The basic rates are provided in the Tax Code, depending on the location and purposes of the land. The basic rates may range from KGS 0.9 to KGS 2.9 per square metre.

Branch income

Branch income is subject to the profit tax. There is no special branch profits tax in addition to profit tax.

Income determination

Aggregate annual income is comprised of all types of income, including, but not limited to, the following, in addition to gross revenue from the sale of goods, works, or services:

- Dividends.
- Interest income (except for income already subject to WHT).
- Royalties.
- Assets received free of charge.
- Rental income.
- Income from the reduction of liabilities.
- Foreign exchange gain.

Kyrgyzstan

- Write-off liability.

The Tax Code envisages some profit tax privileges aimed at developing certain areas of the business economy. Currently, these include privileges/preferences for:

- Charity organisations.
- Associations of invalids of I and II groups (i.e. persons with disability with different levels of physical disability); associations of blind and deaf persons.
- Agricultural organisations.
- Institutions of criminal-executive systems of Kyrgyzstan.
- Growing of berries, fruits, and vegetables.
- Credit unions.
- Companies that have been involved in the food industry for less than three years and included in the Kyrgyzstan government's list of exempt companies.
- Leasing companies (from 2017).
- Pre-school education organisations.
- Private medicine institutions focused on cardiac surgery.

Non-taxable revenues include, *inter alia*, the following:

- Property received as a charter capital contribution and income from realisation of shares of organisations.
- Property donated to special organisations using such property for development purposes under the government's social culture plan. Despite being designated as property used for social culture purposes, such property may still be used for other purposes (i.e. citizen defence projects, mining equipment, water intakes, heat networks, roads, stations).

Inventory valuation

There are no special provisions on inventory valuation in the Kyrgyzstan Tax Code. Inventory valuation is conducted in accordance with the International Financial Reporting Standards (IFRS).

Capital gains

Capital gains are subject to the ordinary profit tax rate. There is an exemption available for capital gains from selling shares that occur on the date of a given sale in the official lists of the stock exchange in the top two categories of listing.

Dividend income

Dividends from participation in Kyrgyz legal entities are exempt from profit tax. All other dividends are subject to the ordinary profit tax rate.

Interest income

Interest income should be included into the aggregate annual income and taxed at the standard profit tax rate, provided the tax has not already been withheld at the source of payment in Kyrgyzstan at the 10% rate.

Partnership income

Simple partnerships are not taxpayers in their own right, and income and expenses flow through to the partners for tax reporting purposes. Kyrgyzstan limited liability partnerships are taxed as corporations.

Foreign income

Generally, Kyrgyz legal entities are taxable on income earned worldwide. Foreign income is subject to the ordinary profit tax rate.

There are no tax deferral provisions in Kyrgyzstan tax legislation.

Deductions

Depreciation

The Tax Code establishes a deduction for depreciation based on the declining-balance method. Depreciable fixed assets are divided into several groups, for which maximum depreciation rates range from 10% to 50%.

Group	Assets	Maximum rate of depreciation (%)
I	Cars, automobile and tractor equipment for use on roads, special instruments, sundries, and accessories; computers, telephone sets, peripherals, and equipment for data processing	30
II	Automotive transport rolling stock: trucks, buses, special automobiles, and trailers; construction equipment; machines and equipment for all sectors of industry, including the foundry; smith-pressing equipment; electronic and simple equipment, agricultural machines. Office furniture, intangible assets	25
III	Depreciable fixed assets not listed in other groups and expenses equated to them	20
IV	Railroad, sea, and river transport vehicles, power machines, and equipment: thermal-engineering equipment, turbine equipment, electric motors and diesel-generators, electricity transmission and communication facilities, pipelines	10
V	Buildings and constructions	10
VI	Taxpayer's costs of geological preparation of deposit reserves, design and engineering-research works, and obtaining the licence for the use of deposits, as well as mining-capital and mining pre-works aimed at further extraction of minerals, as well as the fixed assets of the mining and/or mining-processing enterprises put into operation and actually used in deposit exploration	50

K

Certain expenses are deductible within specified limits, including expenses on repairs, expenses on procuring and producing capital production assets, and certain other expenses.

Goodwill

Kyrgyzstan domestic tax legislation does not stipulate the allowance of a deduction for goodwill for profit tax purposes.

Start-up expenses

Kyrgyzstan domestic tax legislation does not stipulate the allowance of a deduction for start-up expenses for profit tax purposes.

Interest expenses

Deductions for interest actually paid on debts, where the loan proceeds were used to fund expenses incurred for the taxpayer's business activity, are allowed within limitations provided in the Tax Code, depending on methodology and nature of the debt. For example, interest on loans connected with the purchase of depreciable assets is not deducted, but increases their value.

Bad debt

Bad debt amounts are deductible in Kyrgyzstan. The Tax Code defines a 'bad debt' as the amount the taxpayer is unable to fully receive as a result of the termination of an obligation by the court, bankruptcy, liquidation, or death of the debtor, or expiry of the limitation period provided by the civil legislation of Kyrgyzstan.

Kyrgyzstan

Charitable contributions

Deductions for donations of assets to charity and budget organisations are limited to 10% of taxable income.

Fines and penalties

Fines and interest penalties paid to the state budget are not deductible.

Taxes

The following taxes may be deducted:

- Land tax.
- Property tax.
- VAT not allowed for offset.
- Subsurface use taxes.

Other significant items

Generally, other expenses related to the earning of aggregate annual income are considered deductible for profit tax purposes, including:

- Business trip expenses that were actually incurred and supported by appropriate documentation (*per diems* during business trips are deductible only within the established statutory limits).
- Commissions on payroll expenses for labour.
- Material and social benefits provided to employees.
- Representational expenses connected with earning income (transportation, hotel, and translator services).
- Training and retraining of employees.
- Scientific development and exploration works (deductions are relevant for fixed assets).
- Any other costs related to earning income, which can be supported by appropriate documentation in terms of their nature and amount (e.g. invoices, payment orders, receipts).

The other categories of expenses that are not deductible include:

- Capital expenses and expenses connected with the purchase, production, and installation of equipment.
- Any expenses incurred on behalf of any other third persons, except in cases where documentation proves business needs for such expenses.
- Pricing losses caused by rates, understated below-market prices, and price incentives.
- Expenses connected with purchases of services in entertainment, vacations, and leisure.

Net operating losses

Net operating losses can be carried forward for up to five years. There are no provisions in Kyrgyz legislation allowing carryback of losses.

Payments to foreign affiliates

Payments to foreign affiliates are deductible for profit tax purposes if they are aimed at earning income and supported by documentation.

Group taxation

Group taxation is not permitted in Kyrgyzstan.

Transfer pricing

While there is no special law on transfer pricing in Kyrgyzstan, rules on transfer pricing are found in the Tax Code. The general transfer pricing provisions set in the Tax Code do not follow Organisation for Economic Co-operation and Development (OECD) guidelines (thus, no advance pricing agreement [APA] mechanism is provided). According to the Kyrgyz transfer pricing regulations, the tax authorities are empowered to determine the value of the following transactions:

- Transfers between related parties.
- Barter transactions.
- Cross-border transactions.

Thin capitalisation

There are no thin capitalisation limitations under the Kyrgyzstan Tax Code.

Controlled foreign companies (CFCs)

There are no provisions for CFCs in Kyrgyzstan.

Tax credits and incentives
Foreign tax credits

There is no possibility to offset the amount of tax paid outside Kyrgyzstan against the Kyrgyz tax if there is no double tax treaty (DTT) with the country.

Investment incentives

Kyrgyzstan has an article in the Tax Code regarding the specifics of profit taxation on earnings from large investments. Based on the article, profit earned by a local company from own-produced or re-processed goods in Kyrgyzstan using only new equipment (not used or bought before 1 May 2015) is subject to 0% profit tax if the taxpayer has:

- annual turnover exceeding KGS 170 million
- monthly profit tax exceeding KGS 150,000, or
- charter capital of the local company exceeding KGS 10 million.

Please note that companies in the tobacco, mining, alcohol, retailing, and IT sectors are not able to apply such incentives to their profit.

Moreover, dividends of a foreign company that engaged in large investment projects in Kyrgyzstan, not related to PE activities in Kyrgyzstan, received as part of the profit with 0% profit tax is subject to 0% WHT.

Special economic zones

There are four special economic zones in Kyrgyzstan: Naryn, Karakol, Bishkek, and Maimak. The special economic zones generally provide for a tax-neutral regime, exemption from customs duties, and a liberal currency control regime. However, there is a special fee for incentives, which varies from 0.1% to 2% of sales (depending on the region).

Park of Innovative Technologies

Activities of residents of the Park of Innovative Technologies are exempt from profits tax, sales tax, and VAT, providing they meet requirements of the Tax Code of Kyrgyzstan. The tax rate for employees of residents of the Park of Innovative Technologies and individual entrepreneurs is 5%.

Kyrgyzstan

Withholding taxes

Passive income from sources in Kyrgyzstan by a non-resident that is not connected with a PE is taxable at the source of payment, without deductions, at the following rates:

- Dividends and interest: 10%.
- Insurance premiums received under risk insurance or re-insurance agreements: 5%.
- Authorship fee and royalty: 10%.

Income obtained by a non-resident from performing activities and services in Kyrgyzstan, not connected with a PE, is taxable at the source of payment, without deductions (with the exception of VAT), at the following rates:

- Income from telecommunication or freight services in international communication and transportation between Kyrgyzstan and other countries: 5%.
- Income from management and consulting services: 10%.
- Other services and activities: 10%.

WHT applies to Kyrgyzstan-source income regardless of whether the payment is made within or outside of Kyrgyzstan.

The application of DTTs often effectively provides a reduction of WHT rates or, in the case of non-passive income, an income tax exemption. Note that the application of treaty privileges is not necessarily automatic, and taxpayers may need to comply with certain administrative procedures to secure relief.

Tax treaties

According to the Tax Code, the provisions of international tax agreements and other acts to which Kyrgyzstan is a party and ratified by the President or the Parliament (as appropriate) take precedence over the provisions of the Tax Code.

As of 1 January 2016, Kyrgyzstan has concluded DTTs with the countries listed in the following table, which shows the corresponding WHT rates:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	10	10	10
Treaty:			
Austria	5/10 (1)	10	10
Belarus	15	10	15
Canada	15	15	10
China	10	10	10
Finland	5/10 (1)	10	5
Germany	5/10 (1)	5	10
India	10	10	15
Iran	5/10 (1)	10	10
Kazakhstan	10	10	10
Korea, Republic of	5/10 (1)	10	5/10 (5)
Kuwait	10	10	10
Latvia	5/10 (1)	10	5
Lithuania	5/15 (4)	10	10
Malaysia	5/10 (2)	10	10
Moldova	5/10 (1)	10	10
Mongolia	10	10	10
Pakistan	10	10	10
Poland	10	10	10
Qatar	10	10	5/10

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Russia	10	10	10
Saudi Arabia	10	10	7.5/10
Switzerland	5/10 (1)	5	5
Tajikistan	5/10 (3)	10	10
Turkey	10	10	10
Ukraine	5/10 (3)	10	10
United Arab Emirates	10	10	5/10
Uzbekistan	5/10 (3)	10	10

Notes

1. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the paying company.
2. 5% if the beneficial owner is a company (other than a partnership) that owns not less than 10% of the capital of the paying company.
3. 5% if the beneficial recipient is a company that owns not less than 50% of the capital of the paying company.
4. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the paying company.
5. 5% from the total amount of royalty paid for the use of, or the right to use, industrial, commercial, or scientific equipment.

Tax administration

K

Taxable period

The taxable period for profit tax is one calendar year.

Tax returns

The Tax Code stipulates that the Aggregate Annual Income Tax Declaration must be filed with the tax authorities by 1 March of the year following the reporting year.

Tax authorities may grant an extension for filing a tax return for up to one month upon application by the taxpayer. Such extension does not relieve or prolong the taxpayer's obligation to pay the tax in a timely manner.

Payment of tax

Tax payments should be made as follows:

- Advance payments on profit tax: Taxpayers (except for zero-rated taxpayers and taxpayers exempt from profit tax) should file tax reporting and pay to budget a preliminary amount of profit tax on a quarterly basis (from the second quarter). The reporting period for the preliminary amount of the profit tax is established as the first quarter, first half year, and first nine months of the current fiscal period. The advance profit tax amount for the reporting period shall be determined in the amount of 10% of the profit calculated for the reporting period according to the rules established by Kyrgyz legislation on accounting. The advance profit tax amount payable to the budget for the reporting period shall be defined as the positive difference between the advance profit tax calculated for the reporting period and advance profit tax calculated for the previous reporting period.
- Final payments on profit tax: 1 March of the year following the reporting year.
- Tax withheld at the source of payment by a tax agent: by the 20th day of the month following the month when income was recognised.

Tax audit process

The State Tax Committee of the Ministry of Finance of Kyrgyzstan and its local tax authorities are the only state authorities that have the right to perform tax audits. The

Kyrgyzstan

Kyrgyzstan tax service consists of relevant subdivisions of the revenue committee of the Ministry of Finance of Kyrgyzstan and its local authorities.

A tax audit is performed based on a written notification from the Head of the State Tax Inspectorate, which specifies the name of the company to audit, the scope of the audit, and the terms of the audit. Tax audits may be performed not more than once a year by one of the tax authorities (district, city, region, or the state tax authorities) and should not last more than 30 days (50 days for large level taxpayers). If necessary, however, a tax audit may be extended for ten additional days with written approval from the State Tax Inspectorate.

Statute of limitations

The period of limitation for tax liability is six years.

Topics of focus for tax authorities

Generally, the Kyrgyz tax authorities focus on the support for profit tax deductions, correctness of tax calculations, and WHT issues during the tax audits. Recently, we have also observed a rising interest from the tax authorities in transfer pricing issues as well as sales tax and VAT on telecommunication companies.

Significant developments

There have been no significant corporate tax developments in Lao People's Democratic Republic (PDR) during the past year.

Taxes on corporate income

Profits tax (PT)

All companies (including all forms of legal entities) that are registered under Lao PDR law are subject to PT on their worldwide income. Companies formed under foreign law, operating a business in Lao PDR, and conducting business in Lao PDR are subject to tax on their income derived in Lao PDR.

The standard rate of PT for companies in Lao PDR is 24% of net profit after adjustments for non-deductible expenses and others according to Lao Tax Law 2011. The 24% rate applies to both domestic and foreign investors.

Tax holidays and reduced PT rates are applicable to companies whose investment activities qualify as promoted investment activities (*see the Tax credits and incentives section for more information*).

Lump-sum tax

The lump-sum tax is imposed on small and medium business operators that are not registered in the value-added tax (VAT) system and companies that did not prepare Lao accounting books. The lump-sum tax is paid in lieu of the PT, based on an agreement with the tax office; consequently, the lump-sum tax is regarded as a tax within the PT category.

Local income taxes

There are no provincial or local income taxes in Lao PDR.

Corporate residence

There is no definition of residence or permanent establishment (PE) provided in the Tax Law 2011. However, the concept of PE is provided in the Law on VAT 2009 (Article 3(9)). This article states:

'Permanent Business Establishment' is referred to as an establishment where a taxpayer operates her/his business on a regular basis. Establishments considered to be permanent include administrative offices, branch offices, factories, mining/extraction sites, construction fields or sites, and any site where undertakings take place.

According to the double tax treaties (DTTs) of Lao PDR, 'permanent establishment' means a fixed place of business through which the business of an enterprise is wholly or partly carried on.

Lao People's Democratic Republic

It is understood that the reason for having no PE definition in the law is because there is foreign contractor withholding tax (FCWHT) levied on foreign entities conducting their business activities in Laos. *For more information about the FCWHT, please see the Withholding taxes section.*

Other taxes

Value-added tax (VAT)

The standard VAT rate is 10%.

VAT is imposed on the final consumer of goods and services. Goods and services used for production, trading, and consumption in Lao PDR, goods imported into Lao PDR, and services rendered by foreigners to Lao PDR customers are subject to VAT.

Certain goods and services are exempt from VAT. Exempted items include unprocessed agricultural products, seeds, fertilisers, textbooks, education services, medical services, banking services, and insurance.

Exported goods and services are zero-rated. The conventional credit method is used to calculate the VAT payable (i.e. output VAT less input VAT). Excess input VAT can be carried forward for six months (extendable). Input VAT for exports is refundable.

Business operators engaged in production or trading of taxable goods and services must register in the VAT system if their annual revenue is 400 million Lao kip (LAK) or more. Companies below this threshold may voluntarily register. Only registered VAT payers may claim VAT refunds.

One unique feature of Lao PDR VAT is that VAT is imposed on the services rendered by overseas service providers to domestic service users (withholding VAT). Domestic service users have an obligation to withhold VAT out of the service fees paid to overseas service providers.

Import duties

All goods imported into Lao PDR are subject to import duty. Exemptions are available to enterprises operating promoted investment activities (*see the Tax credits and incentives section for more information*).

Lao PDR has adopted the General Agreement on Tariffs and Trade (GATT) valuation principles. Duty rates are based on the Association of Southeast Asian Nations (ASEAN) harmonised tariff nomenclature for imports from ASEAN member countries; otherwise, normal rates are applied. Duty rates range between 0% and 40%, depending on whether the goods are ASEAN or other source.

Excise taxes

There are no excise taxes in Lao PDR.

Property taxes

The land tax is based on both the location and the size of the land and is levied at annual rates per square metre. Land tax is payable in the first quarter of the relevant calendar year.

Transfer taxes

There are no transfer taxes in Lao PDR.

Stamp taxes

The stamp taxes in Lao PDR range from LAK 2,000 to LAK 20,000, depending on the types of documents.

Administrative fees

Under the Tax Law, government sectors can collect fees for issuing fiscal licences, business licences, permits, visas, advertisement boards, broadcasting rights, and other services. The charges and service fees are set periodically by Presidential Decree.

Payroll taxes

Income from salaries and wages, including extra allowances, over-time work, position allowance, career allowances, annual bonuses, meeting allowances for members of the executive board of the companies, and other benefits received in cash and in kind, are subject to income tax withholding by employers at the progressive rates ranging from 0% to 24%.

Social Security Scheme contributions

An enterprise with ten or more employees must register itself and its employees in the Social Security Scheme and make contribution to the scheme. Both the enterprise and its employees are obligated to contribute to the Social Security Scheme a combined 11.5% of the employees' basic salaries or wages. The enterprise contributes 6% and each employee contributes 5.5%. At the moment, the basic amount for Social Security Scheme calculation is capped at LAK 2 million.

Branch income

Branches of foreign companies are taxable on their income from carrying on business in Lao PDR.

Income determination

The PT calculation is based on an entity's actual accounting profits, prepared in accordance with the Lao Accounting Manual, as adjusted for tax purposes. The Lao PDR tax regulations are silent on the treatment of a large number of items. Generally, in such cases, the tax treatment will follow the accounting treatment. Some of the more common differences are depreciation, entertainment expenses, and the non-deductibility of reserves and provisions (until actually paid).

Inventory valuation

Inventory valuation for tax purposes follows the method used for accounting purposes in Lao PDR.

Capital gains

There is no separate tax on capital gains in Lao PDR. However, profits from the sale of shares are subject to tax at a rate of 10%, except for the sale of investments of listed companies in Lao PDR. The buyer of the shares is required to withhold and remit the tax.

The rate of income tax on sales or transfers of real property is 5%.

Dividend income

Dividends received from another Lao PDR company or a foreign company are taxed at a flat rate of 10%, except for dividend income of listed companies in Lao PDR.

Interest income

Interest income is taxable in Lao PDR, except for interest income derived from loans lent by commercial banks and interest income derived from money deposited with commercial banks. The rate of income tax on interest income is 10%.

Lao People's Democratic Republic

Rental/royalties income

Rental income and royalties income are taxable in Lao PDR. The rate of income tax on rental income is 10%, and the rate of income tax on royalties income is 5%.

Unrealised exchange gains/losses

Unrealised exchange gains are not taxable and losses are not deductible in Lao PDR.

Foreign income

There is no controlled foreign company (CFC) or similar regime in Lao PDR. Profits of a foreign subsidiary are taxable when remitted as dividends.

Deductions

Accrued expenses are deductible in Lao PDR. Reserves and provisions are not deductible until actually settled.

Depreciation

Depreciation rates are prescribed in the Tax Law and may differ from financial accounting. Depreciation is on a straight-line basis over prescribed useful lives, as follows:

Assets	Years
Buildings used for industrial purposes:	
With useful life of 20 years or less	20
With useful life over 20 years	50
Buildings used for commercial and residential purposes:	
Permanent structures	20
Semi-permanent structures	10
Machinery, equipment, vehicles	5
Software	2
Office equipment	5
Ships and passenger aircraft	10

Goodwill

There is no specific guidance on the deductibility of goodwill or amortisation in Lao PDR.

Start-up expenses

Start-up expenses are amortisable over two years in Lao PDR.

Interest expenses

Interest is deductible on an accrual basis following the accounting treatment. All interest payments must be supported by documents showing that the payments are commercially reasonable. Interest paid to a shareholder is not deductible.

Bad debt

Bad debt reserves are not deductible in Lao PDR. However, a deduction is allowed if a certain procedure has been followed, one still cannot recover the debt, and the debt is ultimately written off.

Charitable contributions

Charitable contributions in Lao PDR are limited to 0.30% of annual revenue.

Travel expenses

Travel expenses for administrative activities are limited to 0.60% of annual revenue.

Reception expense

Reception and telephone costs are limited to 0.40% of annual revenue.

Entertainment expenses

Entertainment expenses are non-deductible in Lao PDR.

Pension expenses

Pension expenses are deductible when paid in Lao PDR.

Bribes, kickbacks, and illegal payments

Bribes, kickbacks, and illegal payments are not deductible in Lao PDR.

Fines and penalties

Fines and penalties are not deductible in Lao PDR.

Taxes

PT and input VAT paid when purchasing fixed assets are not deductible for PT calculation purposes.

Net operating and capital losses

Tax losses can be carried forward for three years, but no carryback is allowed. A change in control will not impact a company's loss carryforward. Capital losses are treated as ordinary losses.

Payments to foreign affiliates

Payments to foreign affiliates are deductible if in the ordinary course of business.

L

Group taxation

Consolidation or grouping is not permitted, and each entity must file on a separate basis in Lao PDR.

Transfer pricing

There are no specific transfer pricing rules in Lao PDR. However, inter-company transactions should be at arm's length.

Thin capitalisation

The ratio of debt to capital must not exceed 70% of the total capital for concession investment activities. There are no thin capitalisation rules for general investment activities in Lao PDR.

Controlled foreign companies (CFCs)

There is no CFC or similar regime in Lao PDR.

Tax credits and incentives**Foreign tax credit**

There is no foreign tax credit regime in Lao Tax Law. However, certain tax treaties entered into by Lao PDR do have provisions for either deductibility of foreign tax or a credit.

PT incentives

PT incentives are provided under the Law on Investment Promotion 2011. This law divides investment areas into three zones, namely Zone 1, Zone 2, and Zone 3, and divides the investment activities into three different levels of promoted activities, namely

Lao People's Democratic Republic

Promoted Activity 1, Promoted Activity 2, and Promoted Activity 3. The PT exemptions are as follows:

Zone	Areas	Promoted Activity 1 (years)	Promoted Activity 2 (years)	Promoted Activity 3 (years)
1	Mountainous, plain, and plateau zones with no economic infrastructure to facilitate investments.	10	6	4
2	Mountainous, plain, and plateau zones with a moderate level of economic infrastructure suitable to accommodate investments to some extent.	6	4	2
3	Mountainous, plain, and plateau zones with good infrastructure to support investments.	4	2	1

PT exemption starts from the date of the enterprise beginning its business operations. For activities producing new products, research, and new technology, the PT exemption commences from the date the enterprise starts making profit. After finishing the period of PT exemption as mentioned above, the enterprise shall pay PT in accordance to the Tax Law.

Mining and hydro power concession and tree plantation shall comply with concerned laws.

Incentives related to customs duty and other taxes

In addition to the incentives related to PT, investors shall also be entitled to the following customs duty and other tax incentives:

- Exemption from PT in the next accounting year for a business that spends its net profit to expand its business.
- Exemption from import duty on raw materials, equipment, spares parts, and vehicles that are directly used for production. As for import tax exemption of these items, one shall comply with specific regulations.
- Exemption from export duty for exporting general products. As for export of natural resources and products from natural resources, one shall comply with concerned laws and regulations. Importation of all types of fuel is not exempted from import duties and taxes.
- Investors can transfer the annual losses to the next following year to be deducted from profit within the period of three years; however, the losses shall be audited and certified by the tax officer. After this period, the remaining loss is not allowed to be deducted from profit anymore. In the case of the Special and Specific Economic Zones, the incentives related to customs duties and other taxes shall comply with the Decrees on the establishment and management of each zone.

Specific promotion incentives

Investment in hospitals, kindergartens, academic schools, vocational schools, colleges, universities, research centres, and some activities related to public utilities shall obtain an exemption of rental or land concession as follows:

- Zone 1: Exemption of rental or land concession for 15 years.
- Zone 2: Exemption of rental or land concession for ten years.
- Zone 3: Exemption of rental or land concession for three years.

Investment in hospitals, kindergartens, academic schools, vocational schools, colleges, universities, research centres, and public utilities shall obtain an additional five-year period of PT exemption.

Withholding taxes

WHT is applied to various types of payments made to domestic and foreign recipients.

Payment	WHT rate (%)
Dividends and profit from sale of shares	10
Interest from lending activities, commission, and guarantee fees	10
Income from non-business activities of the State Organizations, Lao Front for National Construction, Mass Organization, and Civil Society	10
Prizes and lottery prizes	10
Intellectual property (IP) royalty	5
Sale or transfer of real property	5

Lao PDR has DTTs with the following countries, and WHT rates under the treaties are as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Belarus	5/10	8	5
Brunei	-	-	-
China	5	5	5
Kuwait (not in force)	-	-	-
Luxembourg	5/15	10	5
Malaysia	5	10	10*
Myanmar	-	-	-
North Korea	5	10	5
Russia	10	10	0
South Korea	-	-	-
Thailand	10	10	5
Vietnam	10	10	5

* The rate stipulated under Lao PDR law is lower than the limit provided in the DTT.

Foreign contractor withholding tax (FCWHT)

An FCWHT on payments to foreign contractors applies where a Lao PDR contracting party contracts with a foreign party that does not have a licence to do business in Lao PDR (regardless of whether the services are provided in Lao PDR or outside Lao PDR). The FCWHT comprises both a PT and VAT element and is the final tax on the foreign company. The FCWHT withholding and filing obligation rests with the Lao PDR customer.

For foreign contractors, PT must be withheld at a deemed percentage of taxable turnover. The deemed rates are determined according to the nature of the contract or activity.

Activity	Deemed profit margin (% of business revenue)	Deemed PT rate (%)
Commerce	5	1.2
Production	8	1.92
Transportation and construction	10	2.4
Service	20	4.8

The above rates are under Article 21 of Instruction No. 2137/MOF on Implementation of the Tax Law 2005. According to the Tax Department, these rates are applicable until the relevant supporting regulations of the Tax Law 2011 are issued.

Lao People's Democratic Republic

These PT rates are then added to the VAT at 10% to determine the total FCWHT. For example, a foreign service charge of LAK 1,000 would result in LAK 48 of PT and LAK 100 of VAT for a total FCWHT of LAK 148. Payments to overseas entities are subject to PT WHT and VAT WHT, while payments for goods are subject to PT WHT as VAT is paid before the goods enter Lao PDR.

Tax administration

Taxable period

PT is determined on a calendar-year basis.

Tax returns

The annual tax return is due by 10 March of the subsequent year. Submission of the final tax return will be followed by an audit by the Tax Department.

Payment of tax

PT is payable quarterly in advance, with a final payment after year-end. The first three payments must be paid by 10 April, 10 July, and 10 October of the current tax year. The final payment is due with the submission of the final tax return by 10 March of the subsequent year. The quarterly payments are based on the prior year's PT (or expected tax for the current year). Any excess PT payment can be carried forward to the subsequent year.

Tax audit process

According to Enterprise Law 2005, the audit of a large company, who has assets of more than LAK 5 billion, is mentioned. However, in practice, the tax authorities will access the company after the annual tax filing and issue a certificate after they complete their audit process to the company. Most large companies are audited annually in Lao PDR.

Statute of limitations

The statute of limitations is generally three years in Lao PDR.

Topics of focus for tax authorities

There are no areas of special focus in tax examinations in Lao PDR.

Significant developments

Payments to non-residents

Companies will be required to notify the State Revenue Service (SRS) of all amounts paid to non-residents on transactions made on or after 1 January 2017. This is in line with the requirements of Council Directive 2011/16/EU on administrative cooperation in the field of taxation, which provides for automatic exchange of information on non-residents' revenues.

Large investment relief

The information services sector has been added to the list of priority industries whose participants are eligible for large investment relief.

Solidarity tax

Solidarity tax has been introduced from 1 January 2016, leading to an increase in the total payroll tax burden. The new tax is charged on employment income that exceeds the maximum income (currently 48,600 euros [EUR] a year) attracting mandatory national social insurance contributions (NSIC). Solidarity tax is payable at the same rates as NSIC (i.e. 23.59% for employer and 10.5% for employee).

Value-added tax (VAT) on smartphones, tablets, laptops, and integrated circuit devices

A new section of the VAT Act states that where smartphones, tablets, laptops, or integrated circuit devices are supplied between registered taxpayers, the recipient of goods should account for VAT.

Taxes on corporate income

The standard corporate income tax (CIT) rate is 15%. The tax is assessed on a company's financial profit (loss) that has been adjusted by certain corrections required by law. There are no other taxes on corporate income stated either by the government of Latvia or by local municipalities.

Resident companies are taxed on their worldwide income.

Non-resident companies are taxed on their Latvia-source income through permanent establishment (PE) at the standard CIT rate. If no PE is created, non-residents may be taxed with 0% to 15% withholding tax (WHT) for qualifying payments (e.g. management fees, payments to tax havens).

Micro-business tax (MBT)

The Micro-business Tax Act gives existing and newly-formed businesses the opportunity of acquiring micro-business status and registering for MBT if they meet the following criteria:

- The shareholders are individuals.
- The turnover does not exceed EUR 100,000 in a calendar year.

Latvia

- The number of employees does not exceed five at any time.
- Members of the board are concurrently employees of the MBT payer.
- Remuneration of each MBT payer employee does not exceed EUR 720 per month.

The standard MBT rate is based on a micro-business's turnover, up to EUR 100,000, and covers payroll taxes, business risk duties, and CIT.

As of 1 January 2015, the standard MBT rate of 9% is applicable on a micro-business's turnover up to EUR 7,000, while the turnover part from EUR 7,000.01 till EUR 100,000 is subject to MTB at:

- 11% as of 2015
- 13% as of 2016, and
- 15% as of 2017.

Prior to 1 January 2015, the standard MBT rate was 9% on a micro-business's turnover up to EUR 100,000.

The standard rate may be increased in the following cases:

- If its quarterly staff count exceeds five, then 2% per extra employee will be added to the standard rate.
- If the turnover exceeds EUR 100,000 in a calendar year, the excess will attract a rate of 20%.
- If an employee's net income exceeds EUR 720 a month, the excess will also attract a rate of 20%.

There is no extra rate of MBT where a taxpayer has reported a steady revenue growth rate in the financial statements over the last two tax years, capped at 30% per year. Similar rules apply to a micro-business's headcount growth, capped at one to two employees per year.

If a micro-business has reported no revenue or if its MBT charge for the tax period (calendar year) does not exceed EUR 50, the MBT payer has to pay a charge of EUR 50 within 15 days after the date of filing the tax return for the fourth quarter of the tax year.

Minimum mandatory NSIC for MBT payers will be introduced as of 2017, with employers having the opportunity to choose a tax payment regime that fits their commercial activity in 2016.

A period of transition will operate in 2017 during which contributions will be payable on 75% of the national minimum wage. In 2018, mandatory NSIC will be payable on the full minimum wage (the minimum wage in 2016 is EUR 370).

Corporate residence

A company is resident in Latvia if it is incorporated or had to be incorporated in Latvia.

Permanent establishment (PE)

Under the Latvian Taxes and Duties Act, a non-resident has a PE in Latvia if all three of the following conditions are met simultaneously:

- The non-resident uses a fixed place for activities in Latvia.
- The place for activities is permanently used or is established for the purpose of being used permanently.
- The place for activities is used for the performance of commercial activities.

In addition, it is considered that a non-resident has a PE in Latvia if the non-resident performs in Latvia at least one of the following activities:

- Uses a construction site or performs building or installation activities or supervision or consultative activities related to the construction site or aforementioned activities.
- Uses equipment or installations, drilling platforms, and special ships intended for the research or extraction of natural resources, or carries out supervisory or consultative work related thereto.
- Within a time period, which together exceeds 30 days in any six-month period, provides services, including consulting, management, and technical services, utilising one's employees or associated personnel.
- Uses the activity of an individual, legal, or other person for the benefit of one's commercial activities, provided that this person is authorised to enter into contracts in the name of the foreign entity and the person regularly (more than once in a taxation period) exercises such an authority.

Note that the PE risk for entities located in treaty countries should be tested in accordance with the relevant double tax treaty (DTT).

Other taxes

Value-added tax (VAT)

The following VAT rates apply in Latvia:

Description of goods	VAT (%)
The standard rate on supplies of goods and services, commodity imports, services rendered by non-residents and treated as supplied in Latvia, and intra-Community acquisitions of goods.	21
A reduced rate on medicines, medical devices, specialised baby food, domestic public transport services, household heating charges, firewood and wooden heating material to households, textbooks, original literature publications, accommodation services, newspapers, and other periodical publications, except electronically supplied media information.	12
Exemption with credit on supplies of goods within the European Union (EU) to taxable persons registered for VAT in other EU member states.	0
Exemption with credit on commodity exports and supplier goods not released for free circulation in the European Union, supplies of goods and services to diplomats, and supplies of goods and services financed by foreign aid.	0

A number of services are exempt, including education, financial, medical, and insurance services; nursery fees; and the sale of used real estate, including land (except for building land, which is taxable).

Customs duty

Customs duty is levied on goods imported into Latvia. The rate of customs duty generally is between 0% and 20% of the value of imported goods, depending on the type and origin of such goods. Exports are generally exempt from customs tax.

Excise duty

An excise duty is levied on specific categories of goods, mostly as a fixed amount per unit. Excise duties are applied to the following goods, whether made in Latvia or imported:

Product	Excise amount
Oil and oil products	Up to EUR 455.32 per 1,000 litres, depending on the type of the product.
Alcohol	EUR 64 to EUR 1,337.50 per 100 litres, depending on the type of alcohol.

Latvia

Product	Excise amount
Beer	EUR 3.10 for each percent of absolute alcohol, but not less than EUR 5.69 per 100 litres of beer.
Tobacco products	<p>EUR 45 per 1,000 cigars or cigarillos.</p> <p>EUR 60 per 1,000 cigarettes less than 80 mm in length plus 25% of the maximum retail selling price, but not less than EUR 100 per 1,000 cigarettes.</p> <p>EUR 120 per 1,000 cigarettes plus 25% of the maximum retail selling price for cigarettes 80mm to 110mm in length, but not less than EUR 200 per 1,000 cigarettes.</p> <p>EUR 180 per 1,000 cigarettes plus 25% of the maximum retail selling price for cigarettes 111mm to 140mm in length, but not less than EUR 300 per 1,000 cigarettes.</p> <p>EUR 240 per 1,000 cigarettes plus 25% of the maximum retail selling price for cigarettes exceeding 140mm in length, but not less than EUR 400 per 1,000 cigarettes.</p> <p>EUR 60 per 1,000 grams of fine-cut smoking tobacco intended for the rolling of cigarettes.</p> <p>EUR 60 for other smoking tobacco.</p>
Coffee	EUR 142.29 per 100 kg.
Certain soft drinks	EUR 7.40 per 100 litres.
Natural gas	<p>EUR 17.07 per 1,000 m³ for use as heating fuel.</p> <p>EUR 99.60 per 1,000 m³ for use as fuel.</p>

Real estate tax

The real estate tax is payable annually for:

- Business properties, such as land and buildings used for economic activities, as well as engineering structures, such as motorways, streets, roads, parking places, bridges, elevated highways, tunnels, pipelines, communication lines, and power lines.
- Buildings that form part of a private dwelling house development (also if owned by a company but not used for living purposes).

Municipalities may determine the real estate rate within the interval from 0.2% to 3%. If a municipality does not announce the rates until 1 November before the taxation period, then statutory rates apply.

Municipalities can apply a tax rate higher than 1.5% if buildings are not maintained according to maintenance requirements.

Statutory real estate tax rates are as follows:

- The standard rate of 1.5% on the cadastral value of land, buildings, and engineering structures.
- A progressive rate for dwelling houses, their parts, and any parts of a non-residential building that are functionally used for living and not used in trade or business:
 - 0.2% of cadastral values up to EUR 56,915.
 - 0.4% of cadastral values exceeding EUR 56,915; but not exceeding EUR 106,715.
 - 0.6% of cadastral values exceeding EUR 106,715.
- Up to 3% for uncultivated land capable of agricultural use, unless it is up to one hectare in area or subject to statutory restrictions on agricultural activity. By law, uncultivated land capable of agricultural use is agricultural land that is not used for making or growing agricultural products (including harvesting, grazing, and keeping animals for agricultural purposes) or is not kept in good agricultural and environmental condition. Municipalities may also determine an additional rate of 1.5% for uncultivated land, thus the total rate for this land may reach 4.5%.

A rate of 3% applies for buildings under construction if the permitted construction period has expired. The tax is applicable until the building is accepted for service. The rate will be charged on the highest of cadastral value of the related land and the cadastral value of the building itself.

The residential property owned by companies is eligible for reduced rates (0.2% to 0.6%), but only in cases where the property is rented out and the rent rights are properly registered within the Land Register of Latvia.

Stamp duty

Stamp duties are levied on certain legal and other kinds of services, such as court trials, company formation and registration, licences for certain types of business activity, provision of information, notary services, operation of bills of exchange, and registration of real estate at the Land Registry (e.g. in case real estate is sold: 2% of the higher of deal value or cadastral value, capped at EUR 42,686.15 per property).

Stamp duty is not payable if re-registration of real estate in the Land Registry is necessary due to the reorganisation process. Stamp duty payable for re-registration of the title to immovable property in case of contribution in kind to a company's capital is 1%.

Payroll taxes

Payroll taxes consist of personal income tax (PIT) and national social insurance contributions (NSIC). The employer is responsible to withhold PIT, at a rate of 23%, and the employee's part of NSIC, at a rate of 10.50%, from gross employment income. The employer's part of NSIC, at a rate of 23.59%, is calculated on top of gross employment income. NSIC is payable on the annual income up to EUR 48,600. From 2016, a new solidarity tax has been introduced for annual income exceeding EUR 48,600 at the same rates as NSIC.

L

Natural resource tax

Any natural resources acquired as a result of economic activities (e.g. surface and underground water, dolomite, and quartz sand), the collection of edible park snails, taking advantage of useful features of the bowels of the earth by pumping natural gas or greenhouse gases into geological structures, pollution (waste, emissions, and pollutants), products harmful to the environment (e.g. lubricating oil, electric batteries, oil filters, and tyres), electrical and electronic equipment and appliances, radioactive substances, packaging, disposable tableware, means of transport, the volume of emitted greenhouse gasses that is not included in the number of emission quotas surrendered, coal, coke, and lignite are subject to a natural resource tax in Latvia. The rates are specific for each product and are based on weight, volume, or the amount of the product.

The taxpayer may reduce the natural resource tax by taking part in recycling programs for packaging, products harmful to the environment, electrical and electronic equipment and appliances, and means of transport. Taxpayers do not have an obligation to recycle, themselves, to be entitled to the relief; instead, they can conclude an agreement with the recycling company.

For some of the products, the taxpayer must also pay the disposal tax. The rates differ for a large variety of products.

Vehicle taxes

There are two vehicle taxes in Latvia, a vehicle usage tax and a light corporate vehicle tax. The first is payable for exploitation of trucks, and the second is payable for light vehicles held or owned by a company.

Latvia

Vehicle usage tax

The vehicle usage tax is payable on a yearly basis for the usage of vehicles, and it must be paid in full prior to the state technical inspection.

The vehicle usage (exploitation) tax amount depends on vehicle classification by vehicle features under statutory provisions. The amount of tax depends on various criteria, such as vehicle type (e.g. bikes, cars, trucks), vehicle gross weight, vehicle engine volume, vehicle maximal engine power, etc.

For example, the vehicle usage tax for trucks with gross weight up to 12,000 kg is payable only in accordance with the gross weight of these trucks in the following amounts:

- Up to 1,500 kg: EUR 17.07.
- Between 1,501 kg and 1,800 kg: EUR 34.15.
- Between 1,801 kg and 2,100 kg: EUR 64.03.
- Between 2,101 kg and 2,600 kg: EUR 76.84.
- Between 2,601 kg and 3,500 kg: EUR 102.45.
- Between 3,501 kg and 12,000 kg: EUR 145.13.

Light corporate vehicle tax (LCVT)

LCVT is paid for vehicle(s) owned or held (e.g. rented) by a person engaged in economic activity, which is registered for the first time after 1 January 2005, and with information on the engine volume in the registration certificate. There is a fixed rate of LCVT calculated according to the engine volume. As of 1 January 2016, the fixed rates of LCVT are as follows:

- Up to 2,000 cc: EUR 29 per month.
- From 2,001 cc to 2,500 cc: EUR 46 per month.
- Over 2,500 cc: EUR 62 per month.

For vehicles not mentioned in the above criteria, the LCVT will be EUR 46 per month.

Car and motorcycle duty

Cars and motorcycles registered for the first time or after modification are subject to a car and motorcycle duty. This duty is payable by any individual or entity registered as the owner of a car or motorcycle.

The applicable tax rates for new cars or cars registered in foreign countries after 1 January 2009 are calculated based on the carbon dioxide (CO₂) on each kilometre constituted by the car. The rates range from EUR 0.43 to EUR 7.11 where the CO₂ is from 120 grams to 350 grams for each kilometre. The rate for new motorcycles or motorcycles registered in foreign countries after 1 January 2009 is EUR 0.14 for each cubic-centimetre of the engine's capacity.

For other cars, rates range from EUR 106.72 to EUR 853.72, depending on age and capacity. For other motorcycles, the rate depends on age and is 25% of the rate for cars.

Lottery and gambling tax

A lottery and gambling tax is levied on licensed organisers of games or lotteries. Licence fees range from EUR 4,270 to EUR 427,000. Game organisers, gambling places, and gambling machines are subject to the gambling tax. The tax rates depend on the number and type of gambling machines or percentage of income for several gambling types.

Electricity tax

The electricity tax is levied on electricity supplied to final consumers or consumed by suppliers. The rate is EUR 1.01 per mega-watt-hour. Exemptions are available

to producers of electricity and for electricity used by domestic public transport and households.

Local duties

Certain activities are subject to local duties (e.g. construction permits).

Branch income

As a general rule, branches and resident companies are taxed alike, with certain adjustments for payments to the head office. Branch income is subject to a 15% CIT.

Income determination

Inventory valuation

Dictated by the matching and prudence concepts, stock should be valued at the lower of cost or net realisable value. Cost must be computed on a first in first out (FIFO) basis. Cost can mean purchase price or production cost. Any unrealised losses from stock revaluation are non-deductible.

Capital gains

Capital gains from trading in non-public shares, except shares of companies established in tax havens, are not taxable and losses are not tax deductible. Capital gains from trading in other non-public securities are taxable and losses are tax deductible. Transactions with public EU/European Economic Area (EEA) securities remain tax neutral, capital gains are not taxable and losses are non-deductible. Capital gains from other public securities (except shares) are taxable and losses are non-deductible.

Capital gain on the disposal of a capital asset is calculated as the difference between the sale proceeds and cost. This gain is subject to a 15% CIT as ordinary income. Unutilised losses arising on the sale of securities other than EU/EEA public securities before 2013 may be offset in chronological order against the company's taxable income of future tax periods.

Dividend income

Dividends received from any companies abroad or in Latvia are exempt from CIT, except for dividends from companies registered in blacklisted tax havens (a list of tax havens is provided by the Cabinet of Ministers).

Stock dividends

The distribution of new shares to a company's shareholders in proportion to their existing shareholdings (after a share capital increase by conversion of accrued capital) is not a taxable event for the shareholders.

Interest income

Interest income is taxed at the 15% CIT rate.

Foreign income

Resident companies are taxed on their worldwide income. Income is taxed for the given taxation period; there is no possibility to defer taxation until the profit is repatriated to Latvia. Income tax paid abroad included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad. Any unused tax credits may not be carried forward.

Deductions

Depreciation and amortisation

Fixed assets may be depreciated for tax purposes according to the reducing-balance method by applying the following rates to tax written-down values:

Types of property	Depreciation rate (%)
Buildings, structures, and perennial plantations	10
Technology and energy installations, fleet, railway	20
Computer hardware and software, information systems, electronic equipment	70
Light passenger cars (except special purpose vehicles), motorcycles, and air transport means	30
Oil rigs, oil exploration and extraction ships, sea and river transport means	15
Other fixed assets	40

The value of new technological equipment is multiplied by a coefficient (1.5 from 2009 to 2020) before claiming capital allowances. The effect of applying a coefficient is reversed if the new technological equipment is disposed of within five years from acquisition.

Non-business assets are ineligible for capital allowances.

Intangible assets are eligible for capital allowances on a straight-line basis over the following recovery periods:

- Concessions: Ten years.
- Patents, licences, and trademarks: Five years.
- Research and development (R&D) expenses: One year.

Any intangible assets not fitting into any of these categories (such as goodwill) are ineligible for capital allowances.

Start-up expenses

There is no specific treatment for start-up expenses. Generally, after registration of the company for tax purposes, expenses are deductible. Expenses accrued before registration of a company cannot be deducted for CIT purposes due to the lack of supporting documentation with company identifying information. However, input VAT on goods purchased or services received prior to registration for VAT purposes is recoverable if the goods purchased and services received or used will further be used for taxable transactions.

Interest expenses

The CIT Act imposes restrictions on deductibility of interest payable on loans or credits, factoring transactions, and finance leases under two methods. *For further details, see Thin capitalisation in the Group taxation section.*

Bad debts

Bad debts may only be deducted for CIT purposes if certain conditions are met.

Charitable contributions

Donations paid to charitable institutions, non-profit making foundations, churches and monasteries, and various other welfare institutions are not tax deductible, but may qualify for a tax relief if certain criteria are met (*see the Tax credits and incentives section*).

Luxury vehicles

Luxury vehicles (i.e. light passenger cars with a value greater than EUR 50,000, excluding VAT) are not eligible for capital allowances. A tax deduction is denied for expenses incurred in using and maintaining luxury vehicles and for lease or hire purchase payments associated with leasing such vehicles. These rules do not, however, apply to special purpose vehicles (such as emergency vehicles and special passenger vehicles).

Provisions

Any increase in general provisions and reserves for the tax period as compared with the previous tax period is non-deductible. These provisions include accruals for accrued benefits, bonuses and commissions, and other expenses.

Non-business expenses

A tax deduction is not allowed for any expense not directly related to business activities. In fact, non-deductible expenses have to be multiplied by a coefficient of 1.5 (except donations made to qualifying institutions). Effectively, such expenses are taxed at 22.5% (15% x 1.5).

Non-business expenses include costs that are not directly related to commercial activities; all expenses incurred for the leisure and recreation of owners and employees; entertainment trips taken by owners and employees in company vehicles; any benefits, gifts, credits, and loans turned into gifts to owners and employees; and any other disbursements in cash or in kind to owners or employees that are not part of remuneration or that are not related to the taxpayer's commercial activities.

Representation expenses

Under the Latvian CIT Act, representation expenses are costs that a company incurs in developing and maintaining its prestige at a level acceptable to society. Representation expenses include costs incurred in holding public conferences, receptions, and meals, and the cost of producing items to represent the company (e.g. items bearing its logo). 40% of representation expenses are deductible for CIT purposes.

Fines and penalties

Fines, contractual penalties, and statutory interest on arrears (including increase in principal debt) levied under the Taxes and Duties Act and specific tax laws are not deductible.

Taxes

Excise duties, employer's national social insurance contributions, natural resource taxes, customs duties, and real estate taxes are deductible.

Net operating losses

Tax losses may be carried forward for an unlimited period of time if accrued since 2008. Tax losses accrued before 2008 may be carried forward eight years (*for more details, please see table below*).

Year losses accrued	Last year losses can be used
2007	2015
2008 and after	Not limited

The carryback of losses is not permitted.

A company in which more than 50% of shares (a controlling interest) have changed hands may utilise its tax losses if it continues for five years the same business that it carried on during the two years prior to the change of control. When companies are reorganised by a merger or spin-off, it may be possible to utilise losses accrued.

Latvia

Payments to foreign affiliates

In general, a Latvian company may deduct the full amount of royalties, service fees, and interest (subject to statutory limits) made to related parties to the extent that such payments are made at arm's length. Such payments may be subject to a WHT (see the *Withholding taxes* section). However, if a taxpayer fails to deduct the WHT due, the amounts paid cease to be deductible for tax purposes.

Group taxation

Group consolidation is not permitted for tax purposes.

Transfer pricing

The Latvian Regulation governing the application of the CIT Act states that for transfer pricing calculation purposes, use may be made of the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, a document issued by the Organisation for Economic Co-operation and Development (OECD).

Latvian law requires that related-party transactions be in compliance with the arm's-length principle. Under the arm's-length principle, the conditions made or imposed between two related enterprises in their commercial or financial relations must not differ from those that would be agreed between independent enterprises engaging in similar transactions under similar circumstances.

A tax audit may examine and adjust the price of a transaction in the following circumstances:

- The transaction is between related parties.
- Barters and set offs.
- A price deviation exceeds 20% of prices that the taxpayer has applied to similar goods or services over a short period.
- Exports and imports.

The transfer pricing requirements for the arm's-length price of a related-party transaction primarily apply to transactions between two or more related companies. Also, Latvian legislation requires the taxpayer to adjust one's taxable income for the difference between the price applied to a transaction and the arm's-length value if the transaction involves:

- individuals related to the company
- related foreign companies
- companies exempt from CIT or enjoying CIT relief pursuant to other Latvian laws
- a Latvian-related company with which it forms a single tax group, or
- a company located in a jurisdiction with a more favourable tax regime.

This provision may apply to any transaction, including purchases and sales of fixed assets and goods, supplies of services, loans and borrowings, and intellectual property (IP). It is possible to use corresponding adjustments and adjust taxable income if a related party has made adjustments of its income according to transfer pricing rules. It is possible only if the related party is registered in the European Union or a country that has an effective DTT with Latvia and documentary evidence from the respective tax authorities is received.

Latvian taxpayers who enter into transactions with any of the parties listed above and whose annual turnover exceeds EUR 1,430,000, and related-party transactions amounting to EUR 14,300 or more, have to prepare transfer pricing documentation for those transactions exceeding statutory limits.

Within one month after receiving a request from the Latvian tax authorities, a taxpayer must submit full transfer pricing documentation containing the following information:

- Industry analysis giving a general overview of the industry in which the taxpayer operates.
- Company analysis.
- Functional analysis giving information on the related parties' functions, risks, and assets.
- Economic analysis, including:
 - a description of how the transfer pricing method was selected and
 - a benchmarking study.

While the full transfer pricing documentation requirement applies to entities exceeding statutory limits in respect of turnover and the annual amount of related-party transactions, other entities will still be required to prove that their transfer pricing is at arm's length. Normally, Latvian tax authorities expect taxpayers to be able to demonstrate which transfer pricing method is used and how it has been applied (i.e. a benchmarking study of third-party comparables showing that the prices applied by the taxpayer fall within the arm's-length range).

Latvian taxpayers can apply for an Advance Pricing Arrangement (APA) with the SRS. The APA is an administrative act issued by the SRS to address a taxpayer's request in relation to establishing the conditions and methodology to set transfer prices in related-party transactions for a maximum period of three years.

An option to apply for an APA with the SRS is available to companies whose value of the transaction with foreign related parties is expected to exceed EUR 1,430,000 a year.

L

The fee payable to the SRS for the APA application is EUR 7,114 per APA application payable in the following manner:

- 20% when submitting the APA application to the SRS.
- 80% after the SRS issues an official decision regarding the initiation of an APA with the taxpayer.

Please also note that in case the SRS refuses to initiate the APA with the taxpayer, they reserve the right not to refund the initial 20% of the APA fee.

Thin capitalisation

Thin capitalisation rules apply when claiming a tax deduction for interest payments on loans and finance leases.

Taxable income should be adjusted for either:

- interest paid in excess of interest calculated by applying to the liability 1.57 times the weighted average annual interest rate applied to domestic non-financial companies as determined by Latvian Bank (weighted average interest rate), or
- interest in proportion to the excess of the average liability over an amount equal to four times shareholders' equity at the beginning of the tax year less any revaluation reserve.

The higher of these calculations should be added to taxable income.

The following interest payments are fully deductible:

- Interest paid on borrowings from credit institutions resident in Latvia, EEA member states, or countries with which Latvia has an effective DTT.

Latvia

- Interest paid to the Latvian Treasury, Nordic Investment Bank, European Bank for Reconstruction and Development, European Investment Bank, European Council Development Bank, or the World Bank Group.
- Interest paid on Latvian or EEA debt securities in public trading.
- Interest expenses incurred by credit institutions and insurance institutions, regardless of the lender.

Interest paid on borrowings from a financial institution is deductible up to the amount of interest calculated by applying to the liability 1.57 times the weighted average annual interest rate applied to domestic non-financial companies as determined by Latvian Bank (weighted average interest rate). The qualifying financial institution must meet the following criteria:

- It is resident in Latvia, the EEA, or a country with which Latvia has an effective DTT.
- It provides lending services or finance lease and is monitored by the controlling institution that supervises credit institutions or the financial sector.

Controlled foreign companies (CFCs)

There is no CFC regime in Latvia.

Tax credits and incentives

Foreign tax credit

Tax paid abroad on income included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad and must be substantiated by confirmation from the foreign tax administration. Any unused tax credits may not be carried forward.

Donations to public benefit organisations

CIT charge may be reduced by 85% of amounts donated to qualifying state-funded institutions; Latvian-registered societies, establishments, and religious organisations; or to institutions qualifying as public-benefit organisations under the Public Benefit Organisations Act. Such a reduction may not exceed 20% of the total CIT charge. When making a donation, the donor is not permitted to impose an obligation on the recipient to carry out any acts that may be classified and treated as consideration.

Donation relief is also available for donations to EU/EEA entities that have statuses similar to public-benefit organisations in the country of residence.

Large investment relief

CIT relief is available for investments over EUR 10 million in qualifying industries in new, unused fixed assets (buildings and structures classified as industrial buildings and new plant and technological equipment) used for business purposes. The available tax relief is 25% of the amount of investments made (15% for investments over EUR 50 million). Investment projects must be completed within five years after the tax relief is granted by the Cabinet of Ministers.

Investments have to enable a company to launch a new line of business or to modernise its existing production, which includes manufacturing new goods, a shift of business activity from producing one type of goods to producing another type of goods, or a complete overhaul of the manufacturing process.

Free ports and special economic zones (SEZs)

Companies operating in SEZs are entitled to CIT and real estate tax relief. These areas include the free ports of Ventspils and Riga and the SEZs of Rezekne and Liepaja.

The qualifying companies may apply CIT relief of 80%. The CIT must be calculated at a 15% rate, resulting in an effective CIT rate of 3%. The companies may also apply 80% WHT relief for payments made to non-resident companies.

Real estate tax relief amounts to 80%, and the municipality may waive the remaining 20%. Therefore, when meeting certain criteria, qualifying companies may decrease real estate tax to zero.

The amount of total CIT and real estate tax relief that may be claimed by the company depends on the amount of qualifying investments made by the company in the free port or SEZ area. Depending on the size of the company, the total tax relief available ranges from 50% to 70% from the amount of investments made.

Deferred tax on asset replacements

Latvia will allow a deferred payment of tax on profits arising on the sale of a replaced asset in order to encourage manufacturing companies to replace inefficient and outdated plant and machinery.

If a company acquires a functionally similar asset within 12 months before or after the old equipment is disposed of, then any income (profit) on the disposal of the old equipment is ignored in this tax period (i.e. the profit is deductible from taxable income). Tax payment is deferred until the new equipment is sold and may be further postponed if the equipment is replaced.

Tax incentive for deductibility of research and development (R&D) costs

There is a possibility to apply accelerated amortisation of R&D related costs (for tax purposes, costs are multiplied by three). This relief is aimed at encouraging R&D and will apply to employment related costs and R&D service agreements signed with specific scientific institutions registered in an EU/EEA or a tax treaty country. The IP that results from the R&D activity must be the taxpayer's property for at least three years. To qualify for R&D costs relief, the taxpayer must have its own project documentation that meets certain rules.

L

Withholding taxes

The following types of payments to non-residents and, in some cases according to Latvian transfer pricing rules, to related Latvian companies using CIT reliefs are subject to WHT.

Management fees

Management and consulting fees are subject to a 10% WHT. The term 'management and consulting' means activities carried out by a non-resident directly or by outsourced personnel to ensure the management of a Latvian company or to provide necessary advice.

A Latvian company can rely on a DTT to reduce the rate of WHT to nil for management fees if the non-resident does not create a PE. To this end, the Latvian company must obtain a valid residence certificate for each type of payment to each recipient prior to filing the annual CIT return. A valid residence certificate is one approved by the foreign tax authority and the Latvian tax authority.

Rental payments

Rental payments for movable/immovable property in Latvia are subject to a 5% WHT, except payments for aircraft used in international flights and payments for the rights to use or use of industrial, commercial, or scientific equipment, which are exempt.

Latvia

Disposal of real estate

A 2% WHT applies to proceeds from real estate disposals. This applies to income from disposed shares or other participation in a Latvian or foreign-registered company or other entity if real estate in Latvia made up (in the period of disposal or the previous period, whether directly or indirectly, through shareholdings in one or more other entities established in Latvia or abroad) more than 50% of the asset value of the company being disposed of.

Dividends

Only dividends paid to residents of tax havens are subject to 15% WHT.

In case of extraordinary dividends paid to persons that are established, situated, or created in a tax haven, the applicable WHT rate is 30%.

Interest and royalties

Interest and royalty payments attract WHT only if they are made to companies in tax havens. In certain cases, the company may obtain SRS relief from WHT, provided that the payment has not been made to reduce the taxable base. A 5% rate applies on interest payments to tax havens made by Latvian credit institutions; a 15% rate applies on all other interest and royalty payments to tax havens.

Option for EU/tax treaty residents

In case of management fees, rental payments, and real estate disposal, EU/tax treaty residents may choose between a WHT payment calculated on total fees or 15% tax on profit if the non-resident can present proof of expenses. The Latvian company must first withhold the applicable tax, but the non-resident may later recover tax in excess of 15% calculated on profits (income less expenses) by submitting a separate tax declaration.

Reporting payments to non-residents

Companies will be required to notify the SRS of all amounts paid to non-residents on transactions made on or after 1 January 2017 regardless of whether the payment was subject to WHT or not. This is in line with the requirements of Council Directive 2011/16/EU on administrative cooperation in the field of taxation, which provides for automatic exchange of information on non-residents' revenues.

Summary of WHT rates

Please see the following table for WHT rates applicable to the payments described above:

	WHT (%)					
	Dividends(1)	Interest (1)	Royalties (1)	Rental payments	Management fees	Disposal of real estate
Recipient						
Non-resident companies and related Latvian companies using certain CIT reliefs	0	0	0	5	10	2
Companies in tax havens (2)	15/30	5/15	15	15	15	15

Notes

1. No WHT, excluding companies in tax havens.
2. 15% WHT applies to all payments to companies located in tax havens, with the following exceptions:
 - 5% for interest on deposits and current accounts paid by Latvian banks.
 - Repayments of loan principal are exempt.
 - Goods/securities acquired at market prices are exempt.
 - 30% for dividends that are paid more than once per year.

Tax administration

Taxable period

The fiscal year may not exceed 12 months and is normally based on the calendar year. However, companies are permitted to choose alternative start and end dates for the tax year. The first year of trading may last up to 18 months.

Tax returns

Tax returns are filed annually, together with annual accounts, within one month after they have been approved but not later than four months after the end of the financial year. Thus, if the financial year ends on 31 December, the CIT return and annual accounts must be filed not later than by 1 May of the following year. Larger companies may file the CIT return and annual accounts not later than seven months after the end of the financial year.

Payment of tax

CIT is paid monthly in advance on or before the 15th day of each month, with a final adjustment within 15 days after the annual CIT return is filed. Monthly tax instalments are based on the tax liability in the previous fiscal year and adjusted by the consumer price index. A company may choose quarterly instalments if its monthly advances in the previous period were less than EUR 711. For a new company, advance payments are voluntary.

Tax audit process

The tax audit commences with an audit note for open tax years (not more than three years since the tax payment was due, and, from 2013, five years in case transfer prices are audited). The duration of the audit may vary from a few weeks to a few months, in certain cases, not exceeding 90 days. It can be extended to 150 days if information is requested from foreign tax authorities. In case a simultaneous tax audit with a foreign tax administration is initiated, the prolongation of such tax audit is not limited.

Tax authorities should inform a taxpayer of a tax audit no later than ten working days prior to the commencement of the audit with notification about documents the tax authorities may like to receive.

During a tax audit, the auditor notifies the taxpayer about irregularities of calculation of tax payments and any possible fines that could be charged. Prior to issuing the tax audit decision, the auditors invite the taxpayer to final negotiations to discuss the tax audit results.

Following the tax audit and the notification of tax audit findings, the company may in turn:

- Negotiate with the tax authorities with a view to reducing the tax burden and achieve an 'out of court settlement'. The out of court settlement offers the possibility to reduce fines and late payment penalties calculated (not the additional principal amount of tax calculated) by 50% to 85%. The conclusion of such a settlement presupposes that the company accepts the findings of the audit for the audited years.
- Appeal the decision to the Director General of the SRS.
- Only after receiving the decision of the Director General of the SRS, may the taxpayer take the case to court. An advance payment of additional tax calculated and late payment penalties is required. The first decision normally takes up to two years and another two years until a decision by the Court of Appeal and Supreme Court is issued.

Latvia

Statute of limitations

The right of the Latvian tax authorities to collect unpaid taxes is three years since the relevant tax payment was due. Transfer prices may be examined for five years from 2013 onwards.

Topics of focus for tax authorities

Topics of interest to the Latvian tax authorities include:

- Transfer pricing, non-arm's-length lending, and other arrangements with related parties.
- Non-business, marketing, and representation expenses.
- Payments to and from non-resident companies, including tax haven companies.
- Obligation to register PE in Latvia.
- Unpaid payroll taxes or hidden employment relationships.
- Recoverability of input VAT.

Other issues

Double tax treaties (DTTs) and intergovernmental agreements (IGAs)

Latvia has effective DTTs with 56 countries and continues developing its tax treaty network.

Latvia has also signed an IGA with the United States (US) government to implement the tax reporting and withholding procedures associated with the Foreign Account Tax Compliance Act (FATCA). On 2 April 2014, the US Treasury announced that an IGA was 'in effect' and, on 27 June 2014, the US Treasury and Latvia signed and released the IGA.

Significant developments

The Ministry of Finance (MoF) is in the process of establishing new tax laws connected with the oil and gas sector in Lebanon. Our understanding is that the MoF will recommend a different treatment for such companies from the current tax law, whether related to the corporate income tax (CIT), value-added tax (VAT), or personal income tax (PIT). Therefore, this tax summary may not be applicable to oil and gas companies considering establishing in Lebanon.

A new Decision no. 142/1, dated 23 February 2015, relating to imposing an annual lump sum licence fee was introduced. With some exception for certain type of companies (holdings and offshore companies, institutions exempt from tax as per Article 5 of the income tax law), the annual lump sum licence fee for joint stock companies is 2 million Lebanese pounds (LBP), for limited liability companies is LBP 750,000, for establishments assessed based on real profit is LBP 550,000, and for taxpayers assessed on assumed profits is LBP 50,000. The above mentioned licence fees apply to local head offices, branches, outlets, and to any place in which the taxpayer carries on its activity or receives customers. For income tax purposes, the lump sum licence fee is considered as a non-deductible expense. This Decision will become effective in September 2016.

L

Taxes on corporate income

Under the income tax law in Lebanon, tax is levied based on income type. Accordingly, the income tax law divides income into the following three categories:

- Chapter I - profits from industrial, commercial, and non-commercial professions.
- Chapter II - salaries and wages and pension salaries.
- Chapter III - revenues from moveable capital (Chapter III mainly covers all types of dividend income, board member appropriations from profits, and interest income, including interest on bonds and treasury bills).

The income tax law does not provide for a single tax on income. Accordingly, where a taxpayer has income from different sources, each type of income is taxed according to the tax chapter it falls under. The applicable rates are as follows:

- CIT: 15%.
- Capital gains tax: 10%.
- Dividend distribution withholding tax (WHT): 10% (may be reduced to 5% in certain cases).
- Non-resident WHT: 7.5% for services and 2.25% for other than services.
- Payroll tax: from 2% to 20%.
- Moveable capital WHT: 5% or 10%.

Lebanon

Not all businesses are taxed in the same manner. Depending on the relative size and structure of a business, the tax method applied is assessed depending on real (or actual) profits or deemed profits.

Real profit method

In Lebanon, tax is charged on the total income or profits derived in Lebanon. Based on the income tax law and the principle of territoriality, the main premise for considering a profit to have been realised in Lebanon is if it was generated through an effort or activity exerted in Lebanon.

The tax base (the determination of profits) and the tax rates differ between resident and non-resident taxpayers.

For resident corporate entities, CIT is computed at 15% based on the taxpayer's accounting profits after adjustments resulting from tax rules through the schedule of accounting-to-tax calculation.

The use of the real profit method is mandatory for the following:

- Corporations (SAL).
- Limited liability companies (SARL).
- Companies of individuals.
- Branches of foreign companies.
- All entities employing more than four employees or importing goods.

Small entities may choose voluntarily to be subject to the real profit method; however, once they choose the real profit method, they cannot revert back to the deemed profit method.

Concerning tax on non-residents, WHT applies at 2.25% on payments for goods and 7.5% on payments for services.

Deemed profit method

A deemed profit method is imposed on insurance and savings institutions, taxable transport companies, oil refineries, and public work contractors.

Taxation is based on deemed profits and is levied at a flat rate of 15%.

The rate of deemed profit for public work contractors, as approved by the MoF, is currently set at either 10% or 15% of total amounts collected per year, based on the type of activity performed by the contractor.

For insurance companies, the deemed profit rate is 8% for all insurance activities.

Local income taxes

There are no local government taxes on income in Lebanon.

Corporate residence

Tax is levied on all corporeal/natural and incorporeal/artificial persons, resident in Lebanon or outside, on all profits that they generate in Lebanon. The main premise for considering profits to have been realised in Lebanon is when such profits have occurred from an effort exerted in Lebanon, irrespective of the identity of the taxpayer or place of residency.

Tax is levied on profits generated by two categories of taxpayers: resident taxpayers and non-resident taxpayers.

Resident taxpayers

A person, establishment, or company is considered resident for tax purposes, even if not physically resident in Lebanon, when any of the following two terms are satisfied:

- Have an office or a fixed place of business in their name in Lebanon, even when they are not undertaking their business in a normal and repetitive manner.
- Practising a profession or business activity in a normal or repetitive manner in Lebanon, even if they do not have a known registered place of business in Lebanon. This is because they are considered to have practised their profession from the place in which they contact their customers, even if such place is a hotel or a café.

Non-resident taxpayers

Non-resident taxpayers can consist of persons residing in Lebanon and persons residing outside Lebanon. A corporeal person residing in Lebanon is subject to the non-resident WHT (*see the Withholding taxes section for more information*) if neither of the following two terms are satisfied:

- Practise a certain trade in a normal and repetitive manner in Lebanon, irrespective of whether or not they have a known registered place of business.
- Have a known registered place of business in Lebanon.

A person residing outside Lebanon is subject to the non-resident WHT on the amounts, revenues, profits, or proceeds obtained from Lebanon as a result of undertaking an activity in whole or in part on Lebanese territory or as a result of exploiting rights in Lebanon.

Permanent establishment (PE)

There are no clear provisions in the Lebanese income tax law to define PE.

L

Other taxes**Value-added tax (VAT)**

The standard VAT rate in Lebanon is 10%. Unless specifically exempt, VAT is levied on all commercial transactions undertaken by business entities. Export of goods and services and export-related services, international transport, and some of the intermediate operations are zero-rated. Banking, financial services, and insurance operations are exempt from VAT.

Note that the recharge of expenses from an entity in Lebanon to another entity abroad is subject to VAT at 10%.

Customs duties

Modern, simple, and efficient assessment means are adopted by the customs authorities (e.g. electronic declarations, declaration in advance, applying international procedures in clearing the goods, selective inspection, auditing the goods after their release, and adopting the unique declaration).

Customs rates are imposed and modified according to decisions from the Lebanese customs authorities. These decisions are adopted based on the need of the Lebanese markets of some goods and the will to protect national production sectors.

Safeguard measures are provided for in relation to imported goods. The purpose behind such measures is to protect the domestic production sectors when an increase of imports is witnessed when compared to the same period during the previous year.

Lebanon

The rates are determined based on a specific schedule created in conformity with the Harmonised System of Nomenclature. This conformity with the unified system allows Lebanon to represent an 'importer friendly' environment for importers.

The normal rates are applied where there is no preferential agreement. When the origin of the good or part of the good is from a country with which Lebanon has a preferential customs treatment, preferential rates apply.

Customs rates in Lebanon are either determined in percentage or paid as a lump sum per unit of imported products.

Excise taxes

Excise taxes are mainly applicable in Lebanon on certain beverages and spirits, tobacco products, gasoline, and vehicles.

Built property tax (BPT)

The BPT is an annual progressive tax, ranging between 4% and 14%, on built property.

Stamp duty

Two kinds of stamp duties are levied. A proportionate stamp duty of 0.3% is levied on all deeds and contracts (written or implied) that mention specific payments or other sums of money. A fixed stamp duty ranging between a minimum of LBP 100 and a maximum of LBP 2 million is applicable on documents in accordance with schedules appended to the stamp duty law.

Capital gains tax

Under local legislation, companies are permitted to revalue their fixed assets every five years. Capital gains recognised from such a revaluation, as well as any profits that may be realised from the disposal of fixed assets, are subject to a capital gains tax of 10%.

Income from disposal of shares realised by a company is subject to 10% capital gains tax when the shares are classified as financial assets on the company's balance sheet.

Income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 15% CIT.

Registration taxes

The estimated cost of establishing a company in Lebanon is around 7,500 United States dollars (USD). This includes lawyer's fees and registration fees. The registration fees will increase if the company is established with capital exceeding the minimum requirement. However, the registration fees should not normally exceed 1% of the value of capital.

For branch offices and representative offices, establishment costs are lower and may be estimated at USD 5,000.

When transferring ownership of real estate, registration fees of approximately 6% are applicable.

Payroll taxes

Employers are responsible for withholding and declaring payroll taxes on behalf of their employees. Payroll tax is levied at progressive rates of 2% to 20%.

Social security contributions

Social security contributions are the following:

- Borne by the employer: 7% for the maternity and sickness benefit schemes, on a maximum of LBP 2.5 million per month, and 6% for the family benefit schemes, on a

maximum of LBP 1.5 million per month, in addition to 8.5% of total annual earnings for the end of service indemnity, with no ceiling.

- Borne by the employee: 2% for the medical scheme, on a maximum of LBP 2.5 million per month.

Branch income

Net income derived from a branch's operations in Lebanon is subject to Lebanese CIT, levied under the real profit method at a rate of 15%. Taxable profits of foreign branch offices are deemed to be distributed on a yearly basis and are subject to a dividend distribution tax at the rate of 10%.

Representative offices

Representative offices do not pay CIT as long as they do not carry out commercial activities. Representative offices are required to submit annual tax declarations along with detailed company information that includes employee information, a balance sheet, an income statement, a non-resident tax schedule, and a schedule of payments to professionals. The declaration, with all relevant documentation, should be submitted as one single set. All the information included should be based on accounting records. The deadline for submitting the declaration depends on the legal form of the parent company (i.e. before 1 June of the following year for SAL or SARL companies and before 1 May of the following year for others).

Income determination

Inventory valuation

For tax purposes, inventory is valued using the weighted average cost method.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. See *Capital gains tax in the Other taxes section for more information*.

Note that income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 15% CIT.

Dividend income

Dividends received as a result of a taxable person's activity are deemed trading income and are subject to 15% CIT. Dividends received as passive income are subject to 10% tax in Lebanon. However, dividends received from Lebanese entities are exempt from CIT, as the dividend tax is withheld at source, but are not exempt from further tax upon distribution from the recipient entity.

Stock dividends

The Lebanese law is silent on the tax implications of stock dividends. However, when share capital is increased by reducing retained earnings, no tax is applicable.

Interest income

Interest earned by corporations is added to taxable income. Relief is given for the WHT suffered on bank accounts, treasury bills, and bonds issued to the extent of the CIT due.

Rental income

Rental income should be deducted from the accounting result to reach the taxable result. Moreover, expenses related to property that is rented out should be added back to the accounting result to reach the taxable result.

A BPT is paid on rental income at progressive rates ranging between 4% and 14%.

Lebanon

Royalties income

Royalties received by a holding company from Lebanese companies for patents and the like are taxed at a rate of 10%. Royalties received by holding companies from abroad are exempt from tax.

Royalties received by other than holding companies are taxed as ordinary income at 15%.

Unrealised exchange gains/losses

Unrealised exchange gains and losses are not treated differently from any other gain or loss for tax purposes (i.e. unrealised exchange gains are subject to CIT at 15% and unrealised exchange losses are deductible for CIT purposes).

Foreign income

Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches.

Deductions

Depreciation

Depreciation of property, plant, and equipment (at rates fixed by ministerial decree) is deductible. The depreciation method to be used is the straight-line method. If a depreciation rate that is higher than the low rate is adopted, the MoF should be notified. The allowable depreciation rates are as follows:

Assets	Low rate (%)	High rate (%)
Buildings (commercial, touristic, and services)	2	5
Buildings (industrial and artisanal)	3	10
Buildings and constructions (commercial or industrial)	6	20
Freehold improvements and decorations	6	25
Technical installations and industrial equipment	8	25
Computer hardware and software	20	50
Vehicles (cars)	10	25
Vehicles (transport of goods/buses)	6	20
Sea transport	5	10
Air transport	20	25
Office equipment and furniture	8	25
Glassware and silverware (hotels, restaurants, etc.)	Inventory at year-end	Inventory at year-end
Gas cylinders	8	20

Goodwill

Under Lebanese tax rules, goodwill cannot be amortised.

Organisation and start-up expenses

Organisation and start-up expenses are amortised over three to five years for tax purposes.

Interest expenses

Interest on business loans is deductible, under certain conditions. Interest paid on the taxpayer's capital is not deductible.

Bad debt

Bad debts are deductible if all means for collection of the debt have been exhausted.

Provisions for bad debts are deductible if a debtor has been declared bankrupt. Surplus provisions are added to profits.

Charitable contributions

Charitable contributions are deductible if made to approved charitable, social, cultural, or sporting institutions, within certain limits.

Gifts

Gifts given by the company in cash are non-deductible.

Gifts given by the company in-kind to customers when the amount of each gift exceeds LBP 1 million per person per year and when the total amount of gifts in-kind exceeds 1% of the turnover are non-deductible.

Fines and penalties

Fines and penalties are not deductible in Lebanon.

Taxes

Taxes and duties incurred in the course of business (except CIT) are deductible.

Taxes due to foreign governments on income earned in Lebanon are non-deductible.

Exceptional taxes and fines are non-deductible.

Other significant items

Other deductible expenses include:

- Cost of goods sold.
- Cost of services rendered.
- Rent of business premises or, if the premises are owned by the taxpayer, their depreciation.
- Salaries, wages, and other employee benefits, including end-of-service indemnities.
- General business expenses, including insurance premiums.
- Reserves for severance payments, pensions, and disability payments. Surplus provisions are added to profits.
- Advertising and publicity expenses, within certain limits.
- Travel, telephone, and vehicle expenses, within certain limits.
- Entertainment expenses that are properly supported.
- Board remuneration against services performed.
- Accrued expenses as long as their occurrence is certain.
- Employees' life insurance premiums are deductible as long as they are included in the employees' benefits subject to payroll tax.

Other non-deductible expenses include:

- With the exception of normal maintenance expenses, costs that increase the value of the property, plant, or equipment (such costs should be capitalised and depreciated in accordance with the fiscal depreciation rates).
- Losses or share-in-costs resulting from enterprises, offices, and branches situated outside Lebanon.
- Representation allowances in excess of 10% of an employee's basic salary, as well as unjustifiable and unreasonable salaries.
- Personal expenses, such as payments deducted by an employer or partner for the management of the business and for certain business expenses incurred by the employer or partner.
- Appropriations made to board members that do not comprise remuneration for work done.

Lebanon

- Provisions, other than those specifically allowed by law. Examples of non-deductible provisions include provisions for bad debts, provisions for slow moving items, and provisions for bonuses, contingencies, and charges.

Net operating and capital losses

Tax losses may be carried forward for up to three years after the year in which they were originally incurred. The carryback of losses is not available.

Capital losses may be used to offset taxable profits of the current year but may not be carried forward.

Payments to foreign affiliates

Payments to foreign affiliates are generally subject to WHT.

Based on guidance issued by the MoF, recharges from the head office located abroad (including advertising) are deductible up to a certain limit, calculated as follows:

$(\text{Assets of the branch in Lebanon} / \text{Consolidated assets}) \times \text{Central administrative expenses}$

However, a ceiling of 3% of the branch's revenues is applied.

Group taxation

There is no group taxation in Lebanon.

Transfer pricing

In Lebanon, there are no clear and detailed transfer pricing or general anti-avoidance rules. However, even in the absence of clear transfer pricing rules, exchanges or transactions made between related parties should be done on an arm's-length basis.

The tax administration has the right to reassess related-party transactions and adjust their value in order to reflect the taxable amount related to the period under study.

Thin capitalisation

In Lebanon, there are no clear or detailed thin capitalisation rules.

Controlled foreign companies (CFCs)

There are no CFC rules in Lebanon.

Tax credits and incentives

Foreign tax credit

There are no specific regulations concerning foreign tax credit in Lebanon.

Holding companies

Lebanese holding companies are exempt from CIT and from WHT on dividends. However, they are subject to a tax on their paid-up capital and reserves. In any given tax year, total tax payments on paid-up capital and reserves are capped at LBP 5 million.

Interest, management fees, and royalties received by holding companies from abroad are exempt from tax in Lebanon.

Holding companies are subject to a 10% tax on interest received from loans granted for a period less than three years to companies operating in Lebanon. Management fees received by the holding company from companies operating in Lebanon are subject to

a 5% tax. Capital gains on financial assets in Lebanese companies held for less than two years are subject to a 10% tax. Royalties received from Lebanese companies for patents and the like are taxed at a rate of 10%.

Offshore companies

Offshore companies are exempt from CIT and from the WHT on dividends, and are instead subject to a lump-sum annual tax of LBP 1 million. Contracts related to offshore activities outside Lebanon are exempt from Lebanese stamp duty.

Offshore companies are required to be registered as SAL companies and, with a few exceptions, are subject to the same regulations as a SAL company. The business objectives of an offshore company are limited.

Permanent exemptions from CIT

Companies and organisations that are granted an indefinite exemption from CIT include the following:

- Educational institutions.
- Hospitals, orphanages, asylums, and other shelters that admit patients free of charge.
- Shipping, sea, and air transport associations (subject to certain restrictions).
- Farmers, provided they do not display farm produce and cattle outlets or sell products and meat after conversion tax.
- Syndicates and other types of professional associations.
- Miscellaneous non-profit organisations and co-operatives.
- Holding companies and offshore companies.
- Public sector bodies that do not compete with private institutions.

Reinvestment incentives

Industrial companies using operating profit to finance certain capital investments are exempt from up to 50% of their CIT liabilities for a period of up to four years, provided that such exemptions do not exceed the original investments made. In areas designated 'development zones', 75% of a company's tax liabilities may be exempt.

In order to take advantage of this regulation, investments should consist of capital expenditures designed to increase a company's manufacturing capacity or of investments in housing facilities for the company's staff and other employees.

Withholding taxes

WHT on interest

The income, revenues, and interest earned from accounts opened at Lebanese banks and from treasury bonds are subject to a 5% WHT that is non-refundable and cannot be carried forward. This WHT is considered as an advance payment on the current CIT due to the extent of that amount and acts as a minimum tax in situations where the tax due is lower than the tax on interest paid.

WHT on dividends

Tax is withheld from dividends paid to resident and non-resident shareholders/partners at a rate of 10%. The dividend distribution tax rate may be reduced to 5% under specific conditions.

Movable capital WHT

A 10% WHT is levied on income derived from movable capital generated in Lebanon. Taxable income is comprised of the following:

- Distributed dividends, interest, and income from shares.
- Directors' and shareholders' fees.

Lebanon

- Distribution of reserves or profits.
- Interest from loans to corporations.

Non-resident WHT

Revenues earned by non-residents in Lebanon are subject to an effective WHT of 2.25% on revenue from the sale of materials and equipment, and 7.5% on the revenue in the case of sale of services.

Double tax treaties (DTTs)

DTTs provide the following WHT benefits. Note that treaty rates do not override lower non-treaty rates. Treaty members may take advantage of the non-treaty rates.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	10	10	7.5
Treaty:			
Algeria	15	10	10
Armenia	5/10 (1)	8	5
Bahrain	0 (2)	0 (2)	0 (2)
Belarus	7.5	5	5
Bulgaria	5	7	5
Cyprus	5	5	0 (2)
Czech Republic	5	0 (2)	5/10 (3)
Egypt	10	10	5
France	0 (2)	0 (2)	7.5

United Arab Emirates	0 (2)	0 (2)	5
Ukraine	5/15 (9)	10	10
Yemen	10	5	7.5

Notes

- Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the equity capital of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
- Dividends, interest, or royalties arising in a contracting state and paid to a resident of the other contracting state shall be taxable only in that other state.
- Shall not exceed:
 - 5% of the gross amount of royalties paid for the use of, or the right to use, any industrial, commercial, or scientific equipment.

- 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting any software, patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience.
- 4. Where the dividends are paid by a company that is:
 - A resident of Lebanon to a resident of Malta who is the beneficial owner thereof, the Lebanese tax so charged shall not exceed 5% of the gross amount of the dividends.
 - A resident of Malta to a resident of Lebanon who is the beneficial owner thereof, the Malta tax on the gross amount of the dividends shall not exceed that chargeable on the profits out of which the dividends are paid.
- 5. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the equity capital of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
- 6. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the equity capital of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
- 7. Shall not exceed:
 - 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting.
 - 5% of the gross amount of royalties paid in other cases.
- 8. Shall not exceed:
 - 10% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 15% of the equity capital of the company paying the dividends.
 - 15% of the gross amount of the dividends in all other cases.
- 9. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the equity capital of the company paying the dividends.
 - 15% of the gross amount of the dividends in all other cases.
- 10. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company that has owned at least 10% of the capital of the company paying the dividends for a period of at least 12 months preceding the date the dividends were declared.
 - 15% of the gross amount of the dividends in all other cases.

Tax administration

Taxable period

Lebanon's fiscal year runs from January to December and is based on the Gregorian calendar. With the special approval of the local tax authorities, companies may, however, use their own accounting year.

Tax returns

Taxes on business income in any given year are based on the profits of the previous financial year.

Tax returns by artificial persons (entities) must be filed by 31 March of the year following the year of income. Tax returns by capital companies must be filed by 31 May of the year following the year of income.

Submission deadlines of annual declarations for institutions that are exempt from income tax (other than companies) are as follows:

- Before 1 February for institutions adopting the cash basis of accounting.
- Before 1 April for institutions adopting the accrual basis of accounting and for representative offices that represent non-corporate entities.
- Before 1 June for representative offices that represent corporations.

If taxpayers fail to submit a tax return, realisation penalties will be due.

Lebanon

Payment of tax

The same deadlines for tax returns apply for tax payments.

If taxpayers fail to make payment, late payment penalties will be due.

Tax audit process

The most common ways for the tax authorities to select companies for tax audits are the size of the company, the type of business, and certain risk assessment measures.

Tax audits typically cover a single type of tax.

In a typical situation, a tax audit is likely to take less than one year from first information request to substantive resolution.

Statute of limitations

The tax administration has four years to collect its rights. The period is calculated from the end of year that follows the current business year.

The taxable person may request the refund of excess tax within four years starting from the end of the year where the refund right was created.

The tax administration can exceed the statute of limitations in cases where a profit or revenue has been proven by a court order, arbitration, or inheritance clearance. The extension is limited till the end of the calendar year following the end of the year in which the tax administration was notified of such event.

Under the statute of limitations, a company should keep its accounting books and documentation for ten years.

Topics of focus for tax authorities

Lately, several topics have been of interest to the tax authorities in Lebanon, including transfer pricing, payments of royalties and management fees to non-resident parties, provisions, and employee compensation.

Other issues

Foreign ownership of real estate restrictions

The following restrictions apply to foreign ownership of real estate:

- Up to 3,000 square metres does not require Council of Ministers approval.
- Exploitation and normal lease right extending for a period of more than ten years cannot be attained without obtaining approval.
- Real estate owned by foreigners, for which approval has been obtained, cannot exceed, over all of the Lebanese territory, 3% of the total area of Lebanon. In each province, the total area owned should not exceed 3% of its area. With respect to Beirut, the total area owned should not exceed 10% of its area.
- The approval is nullified if not acted upon during a period of one year.
- When approval is granted, the building on the real estate should be constructed within a period of five years (renewable once by the Council of Ministers).

Choice of business entity

Lebanon's commercial law provides for a range of business entities available to both local and foreign investors. These consist of the following:

- Sole proprietorships.
- General partnerships.
- Limited partnerships.

- Joint-stock companies (SAL).
- Limited liability companies (SARL).
- Holding companies.
- Offshore companies.
- Representative offices and branches of foreign companies.

Legal structures commonly used by foreigners in conducting business in Lebanon are SALs, SARLs, and branch offices.

Joint-stock companies (Société anonyme libanaise or SAL)

Lebanese joint-stock companies are permitted to engage in all kinds of business activity. Shareholders of a SAL have no liability beyond their actual capital subscriptions.

With a small number of exceptions (such as real estate companies and banks), there are no limits on the amount of capital that can be held by foreign investors.

The management of a SAL is entrusted to a board of directors with a minimum of three and a maximum of 12 members. The majority of board members must be Lebanese, but the chairman may be a foreign national.

Certain types of businesses, such as banks and insurance companies, are required to incorporate as joint-stock companies.

The minimum capital is LBP 30 million, and the applicable CIT rate is 15% in addition to a WHT on dividends of 10%, reduced to 5% in certain cases, mainly if the shares are listed.

Limited liability companies (Société à responsabilité limitée or SARL)

Members of a limited liability company are partners, and the company's capital is divided into parts rather than shares. Partners are liable only to the extent of their parts, and individual partners' claims on the company's capital are fixed in the partnership deed.

All partners may be foreigners, with the exception of companies seeking to engage in commercial representation.

Limited liability companies may not be active in certain sectors of the economy, such as in insurance, banking, fund management, or air transportation.

The transfer of parts in a limited liability company is subject to the consent of partners representing at least three-quarters of the capital. Existing partners enjoy priority in the purchase of parts offered for transfer.

A limited liability company is managed by one or several directors (managers) who may or may not be selected from among the partners.

The minimum capital is LBP 5 million, and the applicable CIT rate is 15% in addition to a WHT on dividends of 10%.

Intellectual property (IP)

The law in Lebanon does not contain a clear definition of author's rights. It protects all products of the human intellect whether written, pictorial, sculptural, scriptural, or oral, regardless of its value, importance, destination, or form of expression.

The law provides patent protection for inventions and plant varieties and a *sui generis* protection for layout designs of integrated circuits. Furthermore, the law provides protection for undisclosed information. According to an assessment conducted by the World Intellectual Property Organization (WIPO) in July 2002, the Patent law

Lebanon

is in complete conformity with the WTO's Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS). It was also pointed out that the provisions of the Plant Varieties exceed the minimum requirements of the TRIPS Agreement.

The law does not explicitly protect notorious trademarks and geographical indications. However, those are provided protection via Lebanon's membership to the Paris Convention. Moreover, geographical indications are provided protection under the provisions of the Law on Customs, the Law on Fraud Control, and the Criminal Law.

The copyright protection originally available to literary and artistic works is now extended to computer software, video films, and all kind of audio-visual works. The law provides stiffer penalties for offenders and better compensation to the persons whose rights have been infringed. The manner in which the copyright is breached has also been extended.

Significant developments

Since 2011, there have been no significant corporate tax developments. We are aware that the relevant authorities are drafting new legislation with respect to Income Tax and Petroleum Law, but uncertainty exists as to whether these drafts will become legislation due to the current political uncertainty.

Taxes on corporate income

For any Libyan registered entity, income arising both in Libya and abroad (i.e. worldwide) is assessable for corporate income tax (CIT) purposes in Libya.

CIT is imposed annually on the same basis for Libyan controlled corporate entities, foreign controlled corporate entities, and branches of foreign companies.

CIT is levied on taxable profits at a flat rate of 20%.

Jehad Tax

There is a flat rate of Jehad Tax assessed at 4% on taxable corporate profits.

Local income taxes

Libya has no provincial income tax laws.

Corporate residence

Corporate residence is not specifically dealt with under the tax laws of Libya. The tax authorities will seek to assess any income derived from services provided in Libya.

Permanent establishment (PE)

Double tax treaties (DTTs) that have been signed introduce the concept of PE. However, general law requires that any foreign entity seeking to provide services in Libya should obtain a business licence, which necessitates it registering as a legal entity. Historically, unregistered foreign entities have provided services in Libya, but this is not in line with the law and it is becoming difficult to do so.

Other taxes

Value-added tax (VAT)

There is no VAT in Libya.

Customs duties

Customs duties were abolished in 2005, except for tobacco and tobacco products.

Libya

A service fee of 5% on the value on most imports also exists. There are various exemptions to this service fee, specifically under Investment Law and within the oil sector.

Other dues and taxes on importation are estimated at 0.5%. Initially, a temporary import licence is issued for six months that can be extended to a maximum of three years. A guarantee or a deposit can be provided by the importer to the Customs Department.

Excise taxes

Libya has no excise taxes.

Property taxes

Libya has no specific property taxes.

Transfer taxes

Libya has no transfer taxes.

Stamp duty

Stamp Duty Law levies a schedule of duties and rates on various documents and transactions. The most relevant to corporate entities is Schedule 28, which prescribes the rate of duties on contracts for the provision of services or supply. The duty on main contracts is 1% and on subcontracts is 0.1%. Note that there is a duty of 0.5% on all payments to the Tax Department as well.

Payroll taxes

An employer is responsible for collecting taxes and contributions for the state. When an entity is audited by the tax authorities, the assessment is effectively on the employer for failing in its statutory obligation to collect those taxes and contributions. Note that individuals are not required to file annual statements of income.

Social security contributions (INAS)

Social security contributions are payable by all persons working in Libya, including expatriates.

Social security contributions are computed on gross income, and current rates are as follows:

Gross income	Foreign branch (%)	Libyan entity (%)
Employee's contribution	3.75	3.75
Employer's contribution	11.25	10.50
Contribution from public treasury	-	0.75
Total	15.00	15.00

Social security is withheld by the employer and payable monthly, within ten days after the month end. For social security purposes, a late payment fine of 5% *per annum* is assessed on the amount due.

Branch income

Tax rates on branch profits are the same as on corporate profits. However, the Income Tax Law allows the Tax Department to assess income tax on branches of foreign companies as a percentage of turnover via the 'deemed profit' basis of assessment. Tax is therefore payable even where tax losses are declared.

The level of deemed profit applied to turnover varies according to the branch's type of business activity. This ranges from 10% to 15% for civil works and contracting (turnkey

projects), 15% to 25% for oil service, and between 25% and 40% in the case of design/consulting engineers. A deemed profit of between 5% and 7% is also assessed on supply. The deemed profit percentage applied to any year will be higher than the profit percentage declared in the annual tax return since the deemed profit basis is applied during the course of a tax audit and is effectively a revenue generating exercise for the tax authorities. Historically, tax audits have not resulted in credits or reimbursements.

Income determination

No specific rules apply on income determination for the following categories:

- Interest income.
- Partnership income.
- Rent/royalties income.
- Foreign income.

The Income Tax Law allows entities to account on an accrual basis or on a cash basis.

Inventory valuation

The Commercial Code allows inventory to be valued at the lower of cost and net realisable value.

Capital gains

Any chargeable gains on the sale of capital assets are taxed as ordinary income. For entities assessed on a deemed profit basis, capital gains should be added to the deemed taxable income.

L

Dividend income

Historically, dividend income has not been subject to any additional taxes.

Inter-company dividends

Libyan taxation laws do not contain any special provisions regarding inter-company dividends.

Stock dividends

Stock dividends are not specifically dealt with in Libyan taxation laws. The current practice is for dividend distributions not to be taxed.

Deductions

Taxable income is determined after deducting all expenditure and costs incurred in the realisation of the gross income (*for more details on the deemed profit basis of assessment on branches of foreign companies, see the Branch income section*).

For any entity (not a foreign branch) seeking to be assessed on an add-back basis, it should ensure, in accordance with Stamp Duty Law, that the majority of its costs can be supported by tax-registered documents, i.e. declared payrolls and registered contracts and invoices.

Depreciation

Depreciation should be calculated in accordance with the Executive Regulations of the law.

Libya

Assets	Depreciation rate (%)
Buildings:	
Building in which machines are fixed	4
Building without fixed machines	2
Moveable buildings	10
Means of transport:	
Passenger	20
Cargo and freight:	
Less than 3 tons	15
Over 3 tons	10
Ships	5
Fishing boats	5
Aeroplanes	8
Furniture:	
Office, ship, and domestic furniture	15
Hotel, restaurant, cafes, and hospital furniture	20
Work camps outside of cities	20
Food utensils and furnishings for restaurants, hotels, and the like	25
Machines:	
Office machines	15
Electric generators	20
Computers and accessories	25
Software	50
Other machines	15

Goodwill

Purchased goodwill can be amortised on a straight-line basis over five years.

Organisation and start-up expenditure

Organisational and start-up expenditure can be capitalised and amortised over five years on a straight-line basis.

Interest expenses

No specific rules apply for the deduction of interest expenses.

Bad debt

Bad debts are only recognised to the extent that they have been recognised as such legally.

Charitable contributions

Donations to charities recognised by the state are permitted at up to 2% of net income.

Fines and penalties

No specific rules apply for the deduction of fines and penalties.

Taxes

No specific rules apply for the deduction of taxes.

Net operating losses

Losses may be carried forward and deducted from future profits, for up to five years. The Income Tax Law has no provision for the carryback of losses.

Payments to foreign affiliates

No specific rules apply for the deduction of payments to foreign affiliates.

Group taxation

There is no recognition of a group for taxation purposes.

Transfer pricing

No transfer pricing rules exist in the general law.

Thin capitalisation

No thin capitalisation rules exist in the general law.

Controlled foreign companies (CFCs)

No rules on CFCs exist.

Tax credits and incentives

Foreign tax credit

Under general tax law, no provision exists for allowing the deduction of foreign tax credits.

CIT exemption

Exemptions to CIT exist, most notably, under the Investment Law. General projects registered under the Investment Law are permitted a five-year CIT holiday with a possibility to extend for a further three years.

Exemptions also exist for strategic infrastructure projects. Such exemptions must be awarded by the legislative body, either by ratifying the relevant contract, which includes a tax exemption clause, or by the issuance of a separate law.

Customs and stamp duties exemption

The Investment Law also provides exemptions for customs duties and stamp duty. The exemptions that exist are bestowed on subcontractors to the relevant projects.

The Petroleum Law provides exemption to customs duties on oilfield-specific equipment and materials, which is also provided to oil service companies.

Withholding taxes

Libyan law has no withholding taxes (WHTs). Generally, for unregistered foreign entities seeking to register a contract with the tax authorities, CIT will be assessed (and must be settled) on a deemed profit basis at the time of registration. It may be possible to negotiate a WHT in preference to the aforementioned general procedure for a significant contract where there is greater uncertainty as to the estimated contract value.

Tax administration

Taxable period

The tax year is generally a calendar year, although assessments can be made on the basis of a company's own year-end, provided permission is granted in advance from the Tax Department and the company then adheres consistently to the same date.

Tax returns

All corporate entities must make an annual filing within four months of its year-end or within one month of its audit report, whichever is earlier.

Libya

Payment of tax

CIT is payable on a quarterly basis (10 March, 10 June, 10 September, and 10 December) normally commencing the first quarter date after an assessment has been issued.

Late payment penalties

A late payment penalty is assessed on the tax due at the rate of 1% to a maximum of 12%. In addition, the remaining quarterly payments are due immediately for failing to make an instalment on time.

The law also imposes the following penalties:

- A fine of not less than three times the amount of unpaid tax due shall be applied to any person who fails to pay tax by the due date.
- Without prejudice to any harsher penalty, a fine of not less than four times the amount of tax due and unpaid will be applied to any person who, with intent to evade all or part of the tax, commits any of the following acts or abets, agrees, or aids a person who commits such an act:
 - The making of false statements in declarations submitted under this law.
 - The preparation of false accounts, books and records, reports, or budgets.
 - The use of fraudulent means to conceal or attempt to conceal taxable amounts due under this law.

Tax audit process

Tax audits typically occur every three or four years.

Statute of limitations

The statute of limitations for CIT purposes is seven years.

Topics of focus for tax authorities

The tax authorities' focus during audits continues to be on confirming revenue, ensuring major services providers contracts are tax registered, and seeking additional undeclared salaries and benefits.

Other issues

Statutory Books

Business entities operating in Libya are required by Libyan Law to maintain a General Ledger and a General Journal (i.e. the Statutory Books).

Before use, these must be stamped as registered with the Revenue Authorities and the Commercial Court. It should be noted that a Ledger or Journal will not be registered if it already contains accounting entries (i.e. one cannot register existing books of account).

Similarly, transactions pre-dating the date the books are registered will be disallowed. In theory, transactions should be entered daily, but in practice, most companies write up their statutory records on the basis of monthly transactions summaries.

The Tax Inspector will always request production of the Statutory Books at the commencement of a tax audit. If these are not available, a perfunctory audit of the English (or other language) books of account will be made, and it is likely that there will be a punitive increase in taxable income as a consequence.

The new Commercial Code allows approved computer-based ledgers to be used instead of the traditional manual ledgers.

Significant developments

The Liechtenstein Parliament passed the law on the automatic exchange of information (AIA law), with various amendments to the Liechtenstein Tax Act, on 6 November 2015. The AIA law corresponds mainly with the Organisation for Economic Co-operation and Development (OECD) Common Reporting Standard (CRS) and shall introduce a uniform standard for exchanging tax information with tax authorities of other countries. In the absence of any referendum, the AIA law entered into force on 1 January 2016.

Furthermore, the Liechtenstein Parliament passed the amending protocol to the agreement between the European Community and Liechtenstein on taxation of savings income in the form of interest payments ('European Union [EU] interest savings agreement') on 6 November 2015. The amending protocol changes the EU interest savings agreement into an AIA agreement. The amending protocol entered into force on 1 January 2016.

Recent developments with regard to tax treaties

- Double taxation treaties (DTTs) with Andorra, Georgia, Switzerland, and the United Arab Emirates have been signed.
- The DTT with Guernsey entered into force on 30 April 2015.
- The DTT with South Africa entered into force on 23 May 2015.
- The DTT with the Czech Republic entered into force on 22 December 2015.
- The DTT with Hungary entered into force on 24 December 2015.

Taxes on corporate income

In principle, all corporations, foundations, and establishments are subject to a profit tax at a flat rate of 12.5%. Resident companies are subject to unlimited tax liability on worldwide income. Non-resident companies are subject to limited tax liability on income from properties or branches within Liechtenstein.

Minimum tax

All legal entities are subject to an annual corporate minimum tax of 1,200 Swiss francs (CHF). This tax can be fully credited to the profit tax.

The full tax amount is due even if the corporation is not resident in Liechtenstein for the whole tax period.

Under a lone exception, minimum tax is not due if the total assets of a legal entity did not exceed CHF 500,000 during the last three years.

Liechtenstein

Corporate residence

A company is considered to be resident in Liechtenstein if its registered seat (incorporation) or place of effective management is within Liechtenstein.

Companies that have neither a domicile nor effective place of management in Liechtenstein, as well as special asset dedications without legal personality (e.g. trusts), are subject to limited tax liability for the following income:

- Corporate income from the cultivation of domestic real estate used for agriculture and forestry.
- Rental and lease income from real estate situated within Liechtenstein.
- Taxable net corporate income of permanent establishments (PEs) situated in Liechtenstein.

Permanent establishment (PE)

Please note that Liechtenstein has only a limited number of DTTs (*see the Withholding taxes section*). However, Liechtenstein is in the process of negotiating various new DTTs and has generally included PE definitions according to the OECD model treaty.

Other taxes

Value-added tax (VAT)

Liechtenstein has adopted the VAT law of Switzerland, while having its own VAT administration.

The general VAT rate is 8%. A reduced rate of 2.5% is applicable to deliveries of food, drugs, newspapers, magazines, and books. Furthermore, lodging/accommodation is taxed at a reduced rate of 3.8%. Note that various services are VAT-exempt (e.g. health, social security, education, banking, insurance).

Any person who, irrespective of legal form, carries on a business is liable for VAT. Any person liable for VAT that is involved in domestic entrepreneurial activity with a taxable turnover that is less than CHF 100,000 within a financial year can be exempted from taxation. Special regulations apply for non-profit institutions as well as for non-profit sport or cultural clubs. Reverse charge is applicable for services and certain deliveries from an entity domiciled abroad.

Customs duties/import tariffs

Based on the customs union treaty of 1923 between Liechtenstein and Switzerland, Switzerland customs duties and import tariffs are applicable for Liechtenstein as well. The tariffs and duties depend on various specific attributes of the products and are listed on comprehensive tariffs and duties lists. Therefore, the specific tariffs and duties must be checked for every case individually.

Excise taxes

Several excise taxes apply in Liechtenstein (e.g. petroleum tax, tobacco tax, car tax, CO₂ tax, beer tax, salt tax, taxation of distilled spirits).

Property taxes

No property taxes are applicable in Liechtenstein.

Stamp duty

Based on the customs union treaty of 1923 between Switzerland and Liechtenstein, the Swiss stamp duty tax law of 27 June 1927 is applicable in Liechtenstein. The stamp duty law, *inter alia*, includes the issuance stamp tax and the security transfer tax.

Issuance stamp tax

Upon the formation of legal entities whose capital is divided into shares (e.g. company limited by shares, limited liability company, establishment with capital divided into shares), the stamp duty amounts to 1% of the nominal value or the higher amount effectively paid (above par). The first CHF 1 million is tax exempt.

The same duty also becomes due when the capital is increased or when the shareholders make contributions without increasing the capital. There is no stamp duty tax on bonds and money market certificates.

Various exemptions should also be considered.

Security transfer tax

Security transfer tax is due on all transactions of qualifying securities if a security dealer is involved. The tax amounts to 0.15% for domestic securities (Switzerland and Liechtenstein) and 0.3% for foreign securities.

In particular, banks and financial intermediaries qualify as security dealers and are liable for the payment of the security transfer tax. Furthermore, legal entities with qualifying securities with a book value of more than CHF 10 million also qualify as security dealers and are also liable for the payment of the security transfer tax.

Formation tax (*Gründungsabgabe*)

Unless Swiss stamp duty law applies, a formation tax in the amount of 1% of the statutory nominal capital is levied upon the formation or relocation of legal companies in Liechtenstein (e.g. foundation, establishment) as well as for capital increases.

The general tax rate of 1% is reduced to 0.5% for amounts greater than CHF 5 million and to 0.3% for amounts greater than CHF 10 million. The first CHF 1 million is tax exempt.

Foundations are subject to the formation tax at a tax rate of 0.2%, but at least CHF 200.

Real estate profit tax

Capital gains from the sale of real estate, or equivalent actions with the same result, are subject to a separately assessed real estate profit tax. The taxable gain is generally the difference between proceeds of the sale and the original purchase price of the property plus any capital expenditure incurred. The basic tax rate can be up to 24%, depending on the amount of taxable real estate gain. The transfer of the economic ownership of real estate (e.g. via the sale of the majority of the shares in a real estate company) may trigger real estate tax as well.

Tax on insurance premiums

Liechtenstein levies a tax on certain insurance premiums. The tax rate amounts to 5% of the cash premium (2.5% for life insurance). Cash premiums in foreign currency have to be converted to Swiss francs at the time the tax claims arise.

Various exemptions should also be considered.

Social security contributions

Employers, in general, are required to account for social security contributions on the salaries of their employees. If the employee is subject to the Liechtenstein social security system, the following compulsory social security contributions are concerned:

- Old age, survivors', and disability insurance (9.3%, the employer's share is 4.75% and the employee's share is 4.55%).
- Family compensation fund (1.9%, fully employer financed).

Liechtenstein

- Unemployment insurance/supplementary unemployment insurance (1%, the employer's share is one half).
- Occupational accident insurance (approximately 0.1%, fully employer financed).
- Occupational pension scheme (2nd pillar) (contributions depend on pension plan, the employer's share is usually one half).

Branch income

The principles applicable to corporations also apply for branch income, provided that transactions with the head office or other branches are at arm's length. Liechtenstein taxation is imposed on the profit attributable to the branch. The corporate minimum tax of CHF 1,200 is also applicable.

There is no withholding tax (WHT) on profit transfer to the head office.

Income determination

The corporate profit tax is determined according to the taxable corporate net income, which is based on the financial statement under consideration of the following provisions.

Inventory valuation

Inventories must be stated at the lower of cost or market. Cost is generally determined by the first in first out (FIFO) or by the average cost method. The tax authorities permit a general reserve against stock contingencies of up to one-third of the inventory cost or market value at the balance sheet date without inquiry into its justification, provided a detailed record of inventory is available for review by the tax authorities. The need for a reserve in excess of this amount (e.g. for obsolescence, slow-moving-stocks) must be substantiated to the satisfaction of the tax authorities.

Capital gains

Capital gains derived from the sale of shares are tax-exempt. Capital gains from the sale of real estate are subject to a separately assessed real estate profit tax (*see the Other taxes section for more information*).

Dividend income

Dividend income and liquidation proceeds are tax-exempt.

Interest income

Interest income is taxable and must be at arm's length if it is in respect to related parties (*for safe harbour rates, see Interest expenses in the Deductions section*).

Income from investment funds

For corporate investors, income from investment funds is subject to corporate profit tax at a rate of 12.5%. Since units in investment funds do not constitute participations in legal persons, to the extent that investment funds in turn invest in participations in legal persons, dividends and capital gains (including non-realised capital gains) from such investments are tax-exempt. Since investment funds are subject to proper accounting rules, the net income shown in the financial statements provides for the taxable basis. If in practice, however, based on proper accounting, it is not possible to differentiate between income from dividends, capital gains, or interests, a simplified approach can be used to calculate the taxable basis for the fiscal year 2014 going forward. The simplified approach will be guided by the equity exposure of investment funds. Accordingly, the higher the investments in participations in legal persons are, the higher the lump sum tax exemption for dividends and capital gains will be.

Foreign income

Resident corporations operating locally are generally taxed on their worldwide income. However, income from foreign real estate and PEs situated abroad is exempt from taxation in Liechtenstein.

Deductions

Depreciation and amortisation

Depreciation of tangible fixed assets and amortisation of intangible assets is allowed if it is 'commercially justified'. For tax purposes, either the straight-line (depreciation based on the acquisition value) or the declining-balance method (depreciation based on the book value) may be used. Depreciation and amortisation not recorded in statutory accounts are not deductible for tax purposes.

A special (higher) rate of depreciation may be allowed for assets used only for short periods or for assets for which a rapid decrease in value can be proved.

The depreciation/amortisation rate *per annum* of various property types are provided below. Note that these depreciation rates relate to write-downs on the book value. If the write-down is performed on the acquisition value, then the rates enumerated below should be reduced by half.

Property type	Rate per annum (%)
Immovable assets:	
Real estate (dwelling houses, offices, shops, restaurant and hotel buildings, industrial buildings, factories, warehouses, and parking spaces)	5
Movable assets:	
Mobile structures, technical installations (air conditioning plant, gas and electricity mains for industrial purposes), elevators, investments in foreign real estate, high rack warehouses, and airplanes	15
Office furniture and machines, workshop, and storeroom equipment	20
Furniture used for the hotel and restaurant trade	25
Machines and accessories for production purposes, vending machines, telephone installations, and operating applications	30
Machinery used in more than one shift or used under heavy conditions, motor vehicles	35
Information technology (hardware and software), office furniture and machines, workshop and storeroom equipment, hotel and restaurant cookery, cutlery, and linen	50
Officially approved installations and equipment against water pollution, energy-saving equipment, and installations using solar energy	50
Intangible assets:	
Goodwill, patent, licence, and other rights of use	40

Start-up expenses

In general, the expenses for a start-up are tax deductible as long as they are economically justified.

Please see Formation tax (Gründungsabgabe) in the Other taxes section.

Interest expenses

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliates or shareholder) has to reflect the fair market rate and has to be at arm's length.

Liechtenstein

With respect to related parties, the tax administration of Liechtenstein annually issues safe harbour interest rates to be used on loans denominated in Swiss francs on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates are at arm's length and more appropriate in the present case.

Safe harbour rates 2016

Loans in Swiss francs	Minimum interest rate (%)
For loans made to related parties:	
Financed from equity and no interest-bearing debt capital	1.5
Financed from debt capital:	
Cost price	+ 0.5
At least	1.5
	Maximum interest rate (%)
For loans received from related parties	1.5

For loans in the following currencies, the same mechanism applies:

Currency	2016 (%)	2015 (%)	Currency	2016 (%)	2015 (%)
EUR	2.00	2.50	USD	3.25	3.00
GBP	3.25	3.50	JPY	2.75	2.50
SEK	2.25	3.00	NOK	3.00	3.50
CZK	2.25	2.50	PLN	3.75	4.00
AUD	4.25	5.00	HKD	3.25	3.50
CAD	3.00	3.00	ZAR	9.50	9.00

Furthermore, tax authorities ask for an economic justification if loans are not in the currency of the statutory accounts.

Notional interest deduction (NID) on equity

The NID on equity is a standardised deduction for interest on equity based on the multiplication of the 'modified' equity by the interest rate (according to the annual finance law). For 2015 and 2016, the equity interest rate is 4%. Losses due to the NID are not accepted; consequently, a negative result due to this deduction does not generate loss carryforward.

To determine the modified equity, the following terms have to be considered:

- Paid-in capital and open reserves plus taxed hidden reserves, such as:
 - Deduction of own shares.
 - Deduction of participations/shares.
 - Deduction of non-operating related assets.
 - Deduction of 6% of total assets (except the above mentioned assets).
- Equity increases and decreases, based on the capital at the beginning of the business year.

	Example 1	Example 2	Example 3	Example 4	Example 5	Example 6
Modified equity	1,000,000	500,000	500,000	1,000,000	1,000,000	1,000,000
Loans	0	500,000	500,000	0	0	0
Profit	100,000	100,000	200,000	1,000,000,000	30,000	60,000

	Example 1	Example 2	Example 3	Example 4	Example 5	Example 6
Interest on loans (4%)	0	(20,000)	(20,000)	0	0	0
Profit	100,000	80,000	180,000	1,000,000,000	30,000	60,000
Interest on equity (4%)	(40,000)	(20,000)	(20,000)	(40,000)	(40,000)	(40,000)
Taxable profit	60,000	60,000	160,000	999,960,000	0	20,000
Profit tax rate	12.50%	12.50%	12.50%	12.50%	12.50%	12.50%
Tax burden	7,500	7,500	20,000	124,995,000	0	2,500
Effective tax rate	7.50%	9.38%	11.11%	12.50%	0.00%	4.17%

According to the Liechtenstein Tax Act, modified equity is defined as the equity amount minus own shares, participations in corporations, and assets not operationally necessary.

In addition, modified equity must be further reduced by 6% of all assets qualifying for the NID. This means that, after deducting non-qualifying assets (own shares, participations, non-operating assets), an additional deduction of 6% on the remaining assets has to be made.

L

Furthermore, if a related-party loan has an interest rate below the level of the NID of 4%, the difference in the amount has to be deducted from the modified equity. However, no deduction has to be made if the loan arises from the operating business of the company.

Provisions

Bad debt provision

It is admissible to set up an accounting provision for specific impaired debt; additionally, it is possible to account for a general bad debt provision of up to 10% on receivables from Liechtenstein and Switzerland and up to 15% on receivables from any other country if no specific provision has been accounted for the corresponding debt. These provisions are not accepted regarding receivables to corporations and institutions under public law, banks, or for inter-company receivables.

Inventory provision

See *Inventory valuation in the Income determination section* for a description of the inventory provision regime.

Provisions on financial investments

Provisions on financial investments are possible but must be proved by an established corporate evaluation method or other suitable documents.

Other provisions

Provisions at the expense of the profit and loss statement are admissible for obligations during the business year whose amount is not yet determined or for other immediately imminent losses during the business year.

Charitable contributions

Charitable contributions to legal persons and special asset dedications with domicile in Liechtenstein, in another country member of the European Economic Area (EEA), or in

Liechtenstein

Switzerland, which are exempt from tax liability in light of exclusively and irrevocably common-benefit purposes, are deductible, up to the amount of 10% of the taxable corporate net income.

Deduction for income from intellectual property (IP)

A deduction of 80% is allowed on the net income from IP rights that was created or acquired after 1 January 2011. IP rights, in the sense of the tax law, consist of patents, supplementary protection certificates, utility models, trademarks, and designs, which must be protected by registration in a national, foreign, or international Register, as well as software and technical/scientific databases.

The Liechtenstein IP box has been approved by the European Free Trade Association (EFTA) Surveillance Authority (ESA).

Fines and penalties

Fines and penalties are not tax deductible, provided the penal nature predominates.

Taxes

Taxes are not deductible in Liechtenstein.

Net operating losses

A loss can be carried forward and offset against the profits for future years. There is no time limitation of loss carryforwards as well as loss offsetting. Losses cannot be carried back.

For assessments as of 2013, the loss carryforward is limited to 70%. The other 30% can still be carried forward indefinitely. As a consequence, 30% of the taxable profit is subject to annual taxation even if corresponding losses from previous years exist.

Losses from foreign PEs and group loss offsetting

Losses from a foreign PE can be offset with taxable net corporate income to the extent these losses were not already taken into account in the country where the PE is situated or in another country. If that PE records profits in the following years, these profits need to be added to taxable net corporate income again. The period a loss can be carried forward is limited up to five years. Afterwards, the losses will be added if not yet added to the taxable profit due to foreign loss offsetting. The same limitation of loss carryforward applies to group taxation as well.

Payments to foreign affiliates

Interest, royalties and licences, and other fees to foreign affiliates are allowed as deductions to the extent that they meet the arm's-length test (i.e. equivalent to charges that would be made by an unrelated third party).

For interest payments between affiliated companies or between shareholders and companies, Liechtenstein tax authorities publish safe harbour rules annually (i.e. generally accepted interest).

Group taxation

Resident and non-resident corporations have the possibility to opt for group taxation (i.e. tax group) if they meet the legal requirements (e.g. more than 50% of capital and 50% of voting rights). The ultimate group leader must either be a corporation domiciled in Liechtenstein or with the effective place of management in Liechtenstein.

In order to form multi-level group structures, sub-groups may also be built. The same rules are applicable for the group leader of the sub-group as for the primary group leader.

A written application for forming a tax group must designate the group leader and group members to be filed with the tax authorities. It is not necessary that all associated companies have to become group members. The group leader can decide, for each company that fulfils the conditions, which company will be included in the group or not. The group leader and the group members need to have uniform business years.

Losses of group members can be offset against profits of the (sub) group leader within the same year. The offsetting is only possible under the following conditions:

- Only losses incurred after the option for group taxation can be considered.
- Losses need to be calculated according to Liechtenstein profit calculation rules.

The losses are allocated to the (sub) group leader according to the direct participation quota of the (sub) group leader to the group member whose losses should be offset. If the losses cannot be used at the level of the (sub) group leader, they can be allocated to other group members. However, the minimum tax is applicable for each group member.

Losses that have been attributed to the (sub) group leader must be adjusted in the following cases:

- Losses can be offset against profits on the level of the group member.
- Exit of group member from the group.
- Reduction of participation quota of a group member.
- Depreciation is made on a participation due to losses.

The (sub) group leader must provide evidence annually that no adjustment needs to be made. Even if the conditions for adjustment are not fulfilled, losses that have been attributed to the (sub) group leader must be adjusted five years after attribution.

L

Transfer pricing

Liechtenstein does not have specific transfer pricing rules apart from the rule that intra-group transactions are carried out at arm's-length terms.

Thin capitalisation

Liechtenstein does not have thin capitalisation rules.

Controlled foreign companies (CFCs)

Liechtenstein does not have specific CFC rules. However, legal or actual structures that appear inappropriate to the economic circumstances and whose sole economic purpose consists in attaining tax advantages are considered abusive if:

- the granting of this tax advantage would violate the object and purpose of the tax law, and
- the taxpayer is unable to present any economic or other substantial reasons for the choice of this structure and if the structure does not yield any independent economic consequences.

Tax credits and incentives

The following tax incentives are currently applicable:

- Profit tax exemption for corporations that have an irrevocable charitable, cultural, or ideal purpose without commercial activity.
- Profit tax exemption of dividend income and capital gains on shares/participations (especially interesting for holding companies).
- NID on equity (*see the Deductions section*).
- Private asset structure (PAS).
- Deduction for income from IP (*see the Deductions section*).

Liechtenstein

Private asset structure (Privatvermögensstrukturen or PAS)

Liechtenstein offers tax privileges for PASs. A PAS must not conduct any economic activity. The purpose of a PAS is limited to acquiring, holding, administering, and selling financial instruments according to the Liechtenstein assets management law as well as cash and bank accounts. Participations may only be held if it can be proved that the shareholders or beneficiaries have no influence on the administration of this company.

The articles of the PAS must contain a clause that the regulations for PAS are applicable. Exemptions of this rule are applicable for legal entities that existed before the introduction of the tax law as of 1 January 2011.

The investors of a PAS must be individuals who administrate their own assets or structures acting in the interest of individuals.

The company or the audit company needs to confirm, upon formation or after major changes, that the conditions for the PAS structure are fulfilled. This is supervised by the tax authority or a neutral certified accountant.

A PAS only pays the minimum tax of CHF 1,200 annually.

This tax scheme was qualified as in conformity with the provisions on state aid set out in Article 61 of the Agreement on the European Economic Area by the ESA.

Avoidance of double taxation

Foreign taxes shall be allowable against domestic taxes (credit method) under circumstances where (i) the income is derived or wealth is owned in a country that has concluded an agreement for the avoidance of double taxation with Liechtenstein and such agreement provides for a tax credit or (ii) reciprocity is granted. Income or wealth shall be exempted from taxation in Liechtenstein (exemption method) if the agreement for the avoidance of double taxation provides tax exemption or if reciprocity is granted.

Withholding taxes

Coupon (withholding) tax

Until the end of 2010, Liechtenstein had a coupon tax of 4% on dividend payments and certain interest payments. The coupon tax was abolished as of the beginning of 2011. This means that no coupon tax is due on new reserves incurred after the end of 2010 or on interest payments. However, the coupon tax still applies with regard to old reserves (reserves existing on 1 January 2011).

Due to administrative and financial aspects, the Parliament raised the coupon tax on all old reserves as of 31 December 2015. The coupon tax rate had been reduced to 2.5% (instead of 4%) for the tax years 2014 and 2015.

Tax treaties

Currently, a comprehensive DTT on income is in effect with Austria, Czech Republic, Germany, Guernsey, Hong Kong, Hungary, Luxembourg, Malta, San Marino, Singapore, the United Kingdom (UK), and Uruguay, as well as a limited one with Switzerland. A regular DTT with Switzerland was signed on 10 July 2015. DTTs with Andorra, Georgia, and the United Arab Emirates have been signed but have not yet entered into force.

Liechtenstein has concluded tax information exchange agreements (TIEAs) with the following governments: Andorra, Antigua and Barbuda, Australia, Belgium, Canada, China, Denmark, Faeroe Islands, Finland, France, Germany, Greenland, Iceland, India, Ireland, Italy, Japan, Mexico, Monaco, Netherlands, Norway, St. Kitts and Nevis, St.

Vincent and the Grenadines, South Africa, Sweden, the United Kingdom, and the United States. Recently, a TIEA has been signed with Italy but has not yet entered into force.

The governments of Liechtenstein and the United Kingdom signed a Memorandum of Understanding (MOU) relating to cooperation in tax matters, which includes the Liechtenstein disclosures facility (LDF). According to these regulations, financial intermediaries in Liechtenstein are required to show that their UK costumers have been declaring their Liechtenstein investments to the tax authorities in the United Kingdom (i.e. Her Majesty's Revenue and Customs [HMRC]). In certain circumstances, even accounts or assets outside of Liechtenstein can be transferred in order to take advantage of the terms of the LDF. The LDF ended on 31 December 2015. However, based on an information leaflet of the Liechtenstein Banking Association dated July 2015, the HMRC has confirmed that a last, timely limited disclosure facility should be possible in the years 2016 and 2017 before the first data under the automatic exchange of tax information will be shared.

Tax administration

Taxable period

The tax year corresponds with the business year. Therefore, the applicable accounting period, which may end at any date within the calendar year, is the basis for corporate taxation.

Tax returns

Corporations resident in Liechtenstein or with PEs in Liechtenstein must file a tax return by 1 July of the calendar year following the fiscal year-end.

L

Due to a substantiated written request, the tax authority may extend the submission deadline by six months. A deadline extension requires the payment of the provisional invoice. In especially justified cases, the submission deadline may be extended once again. Such a request must be made before expiry of the first deadline extension.

The tax assessment issued by the tax administration is based on the company's tax return, including the attachments and the financial statements filed.

Payment of tax

Companies must pay tax within 30 days of receipt of the assessment. The defaults charge rate is 4%.

Tax audit process

Generally, the Liechtenstein tax system is based on self-assessment. In the past, the Liechtenstein tax authority assessed an entity based on the documents and information provided by the entity itself and additional documents or explanations requested by the tax authorities. Currently, however, the Liechtenstein tax authority aims to carry out external tax audits in-house. However, due to limited resources, profit tax audits happen rarely.

Statute of limitations

The limitation of the right to assess a tax is five years, starting after the end of the tax year in terms of periodic tax and after the end of the year in which the taxable incidence had taken place in terms of non-periodic tax. The tax claims, in any case, are prescribed ten years after the end of the year in which the taxes have been assessed on a final basis.

Topics of focus for tax authorities

The tax authority especially focuses on payments between affiliated companies (e.g. inter-company loans). Furthermore, all provisions and depreciations will be checked under the premise of economic necessity.

Other issues

Restructurings

Restructurings (e.g. change of corporate form, merger, spin-off) can be carried out tax neutrally, provided certain conditions are met.

All restructurings have in common that they can only be carried out tax neutrally if they are performed at tax book value and if the assets remain taxable within Liechtenstein. Furthermore, specific/additional conditions must be met for each kind of restructuring.

Foreign Account Tax Compliance Act (FATCA)

A Model 1 intergovernmental agreement (IGA) for the implementation of FATCA was signed between the governments of Liechtenstein and the United States on 16 May 2014.

Under the Model 1 IGA, Liechtenstein financial institutions will be required to report to local tax authorities on the accounts of US citizens. The Liechtenstein tax authorities will then send the tax information to the US Internal Revenue Service (IRS).

Automatic information exchange

Liechtenstein, *inter alia*, has committed to implement the CRS for automatic exchange of tax information, which the G20 Finance Ministers endorsed on 23 February 2014. Accordingly, Liechtenstein belongs to the group of early adopters leading to the first automatic information exchanges in 2017 for the year 2016. The Liechtenstein Parliament passed the law on the automatic exchange of information (AIA law), with various amendments to the Liechtenstein Tax Act, on 6 November 2015. The AIA law corresponds mainly with the OECD CRS and shall introduce a uniform standard for exchanging tax information with tax authorities of other countries. The AIA law entered into force on 1 January 2016.

Significant developments

The following recent amendments have been introduced into the Lithuanian tax legislation:

- A new tax administration system (i.MAS) will introduce e-services for taxpayers (e.g. like electronic invoicing and transport documents, electronic cash registers), improve tax administration capabilities, and reduce the administrative burden on the taxpayers.
- As of 1 October 2016, all tax returns (except annual personal income tax [PIT] returns) will have to be submitted electronically, excluding cases when it is not possible to submit tax returns by electronic means due to objective reasons or the submission of a return by electronic means would cause disproportionate administrative burden.
- As of 1 January 2016, Lithuania implemented certain information disclosure requirements related to international transparency movements, like the Foreign Account Tax Compliance Act (FATCA), in the national law. Financial market participants will be obligated to report their clients' (individual and corporate) opened and closed accounts, and all the relevant information, to the tax authorities if certain conditions are met. Lithuanian entities will be required to submit the information on services acquired from foreign companies where the value of the transaction or several transactions made with the same foreign entity within a year is 15,000 euros (EUR) or higher.
- As of 1 January 2017, new penalties, amounting from EUR 1,400 to EUR 4,300, for non-compliance with the transfer pricing documentation procedures for transactions between associated persons will be imposed. For a repeated breach, penalties can amount from EUR 2,900 to EUR 5,800.
- As of 1 January 2017, dividends paid out will no longer be a subject for tax exemption in cases where tax benefit is the main or one of the main objectives of a particular structure of companies. Dividends received from foreign companies will not be subject for tax exemption if they were deducted from taxable profit at the distributing company level. The amendments to the Lithuanian Law on Corporate Income Tax (CIT) are due to the implementation of EU Directive 2014/86/EU and the Organisation for Economic Co-operation and Development's (OECD's) initiative on the tax base erosion and profit shifting (BEPS).
- From 2017, the period to submit annual CIT returns will be shifted from the first day of the sixth month of the following tax period applied currently (1 June for companies using the calendar year) to the 15th day of the sixth month of the following tax period (15 June for companies using the calendar year).

Taxes on corporate income

The standard CIT rate is 15%. However, small companies and agricultural companies can apply a reduced CIT rate of 5% if certain conditions are met.

Lithuania

Generally, CIT is applied on taxable income received by a Lithuanian tax resident from its local and worldwide activities. Taxable income is calculated by reducing general income of a certain tax period with deductible expenses and non-taxable income.

Income of a tax resident company is not subject to taxation in Lithuania if it was received from activities through a permanent establishment (PE) in a foreign country that is in the European Economic Area (EEA) or that has a double tax treaty (DTT) with Lithuania and if the income was subject to taxation there.

Furthermore, CIT may be reduced or even not applied if foreign-sourced income received not through a PE is taxed with a withholding tax (WHT) in a foreign country and this country has a DTT with Lithuania.

Non-resident companies are generally taxed on Lithuania-sourced income received through a local PE and reduced by deductible expenses or on income subject to WHT in Lithuania.

Reduced CIT rate for small companies

Entities with fewer than ten employees and less than EUR 300,000 in gross annual revenues can benefit from a reduced CIT rate of 5%.

CIT regime for certain maritime activities

The rate of CIT on certain maritime activities is 15%, with the base set by reference to the functional capacity of the ship. This fixed CIT may be applied to maritime entities that fulfil certain conditions indicated in the law. An election must be made to the tax authorities to apply this regime.

Local income taxes

There is no local or municipal CIT in Lithuania.

Corporate residence

A company is resident in Lithuania if it incorporates there or its activities create a PE for tax purposes.

Permanent establishment (PE)

According to local legislation, a foreign company is deemed to have a PE in Lithuania when:

- it permanently carries out commercial activities in Lithuania in whole or in part
- it carries out its activities through a dependent representative (agent)
- it uses a building site or construction, assembly, or equipment objects, or
- it uses equipment, including drilling installations and ships, for exploration or extraction of natural resources.

DTTs may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty take precedence.

A PE must be registered as a taxpayer with the tax authorities in the territory where its activities are carried out. Its profits are subject to CIT at the rate of 15%.

Other taxes

Value-added tax (VAT)

Supply of goods and services for consideration within the territory of Lithuania, performed by a taxable person engaged in economic activity, is subject to VAT in Lithuania.

The standard VAT rate is 21%.

The reduced rate of 9% applies to:

- Books and publications.
- Public transport services.
- Supply of heating to residential premises and supply of hot water (applicable until 31 December 2016 but could be extended).
- Accommodation services.

The reduced rate of 5% applies to:

- Technical aid devices and their repair services for the disabled.
- Pharmaceuticals and medical aid devices (under certain conditions).

Supply of goods exported outside of the European Union (EU) as well as supply of goods to VAT payers registered in another EU member state is subject to VAT at the rate of 0% (exempt with credit). There are other supplies of goods and services that are exempt with credit (zero-rated), e.g. goods and services for vessels and aircraft, transportation and linked services related to export or import of goods, etc.

L

In order to apply zero-rated VAT on goods carried out from Lithuania, VAT payers must hold supporting documents as evidence that these goods were actually exported from the European Union or carried out from Lithuania to another EU member state.

Goods and services that are exempt without credit include, but are not limited to, the following:

- Supply of goods/services related to health care.
- Social services supplied by non-profit entities.
- Education and training services.
- Cultural and sports services rendered by non-profit entities.
- Services provided by political parties, trade unions, and other non-profit membership based legal entities to their members, meeting certain requirements.
- Services provided by religious communities, other communities, and centres to their members, meeting certain requirements.
- Postal services.
- Radio and TV broadcasting services provided by non-profit legal entities.
- All types of insurance and re-insurance services.
- Financial services meeting certain requirements (option to tax may be exercised for some financial services).
- Lotteries and gambling.
- Rent or sale of immovable property (option to tax may be exercised, certain conditions apply).
- Supply of goods where the VAT payer has not deducted any proportion of the VAT on purchases and/or importation thereof (certain conditions apply).

Sale and contribution in kind of a business or part of a business is treated as being out of scope of VAT (under certain conditions).

Lithuania

Customs duties

EU customs law is applicable in full.

EU customs law, also known as the Community Customs Code, compiles the rules, arrangements, and procedures applicable to goods traded between the European Community and non-member countries. The Community Customs Code indicates an obligation on a person to pay the amount of the import or export duties that apply to specific goods under the Community provisions in force. The application of the EU customs law means that:

- trade between Lithuania and other EU countries is customs-free
- imports from non-EU countries are subject to EU customs tariffs, and
- numerous free trade agreements concluded between EU and non-EU countries apply to Lithuania.

Excise taxes

Excise duty is imposed on the following goods produced in or imported into Lithuania: ethyl alcohol and alcoholic drinks, including beer and wine; processed tobacco, including cigarettes, cigars, cigarillos, and smoking tobacco; energy-related products, including petrol, kerosene, gasoline, fuel oil, lubricating oils, natural gas, and their substitutes and additives; coal, coke, and lignite; and electricity. The tax rate depends on the type and quantity of goods.

Land tax

Lithuanian and foreign entities are subject to land tax collected by the municipalities for the land they own in Lithuania. Roads for general use and forestland are exempt. The assessment and payment terms are set forth by the municipalities, which are also entitled to grant land tax incentives.

The annual land tax rate ranges from 0.01% to 4%, depending on local municipalities. There is a transitional period set for years 2013 to 2016 if the taxable value of land increases during this period. Please see the table below describing the main features of the land tax in force as of 1 January 2013:

Tax rate	0.01% to 4%, defined by municipality.
Taxable value	The average market value determined in the map of values established according to the mass valuation. The mass valuation is performed not rarer than every five years. A possibility to apply the value determined during the individual valuation if it differs from the market value by more than 20% (principles are similar to real estate tax).
Declaration	Template of a tax return is completed and sent by the tax authorities until 1 November.
Payments	One annual payment due 15 November.
Additional comments	Transitional application: Gradual increase of the tax from 2013 to 2016.

Land lease tax

State-owned land that is leased for Lithuanian and foreign companies is subject to land lease tax at a rate established by the municipalities. The minimum tax rate set by the government is 0.1%, and the maximum rate is 4% of the value of the land.

Real estate tax

The real estate tax rate ranges from 0.3% to 3%. Tax is levied on the value of real estate owned by individuals and used for commercial purposes or owned by legal entities (with certain exemptions). Municipal councils establish a specific tax rate for real estate situated in their territories annually.

State duties (stamp taxes)

There are no stamp duties applied in Lithuania; however, minor fees for the services of state institutions, such as the issuance of documents having legal force and other deeds, may apply (e.g. notary fees apply on share purchase agreements [SPAs] meeting certain criteria).

Environmental tax

Environmental tax is imposed on pollutants discharged into the environment, dumped waste, a few specified products (e.g. tyres, batteries), and certain types of packaging.

Tax on natural resources

A tax on natural resources is payable on the value of extracted natural resources.

Payroll taxes

There are no additional payroll taxes applicable to an employer other than the employer's part of social security contributions and the contributions to the Guarantee Fund.

Social security contributions

The rate of social security contributions ranges from 30.98% to 32.6% for employers and is 9% for employees. At present, there are no lower or upper limits set for social security contributions on employment related income.

Contributions to the Guarantee Fund

Contributions to the Lithuanian Guarantee Fund are calculated by employers at a rate of 0.2% on the gross salary payable to employees. The Guarantee Fund provides support to employees in case of employer's bankruptcy.

L

Branch income

A branch of a foreign company is defined as a structural subunit of a foreign company, which has an establishment in Lithuania and is entitled to engage in commercial activities in Lithuania as well as conclude contracts and undertake obligations according to the power of attorney issued to the branch by its founder. A branch does not have the status of a legal person. It is taxed in the same manner as a PE (*see the Taxes on corporate income section*).

Income determination**Inventory valuation**

Under domestic accounting legislation, stock used in the production and included in the cost of produced goods is valued in the financial statements by the first in first out (FIFO) method. The last in first out (LIFO), weighted-average, progressive-average, actual-price, or another method that corresponds to the stocks' movement can also be used. However, the method used must be disclosed in the notes to the annual accounts, and, among other things, the note must report the profit that would have been calculated if the FIFO method of valuation had been used. For CIT purposes, usage of another method than FIFO should be approved by the tax authorities.

Capital gains

Capital gains are taxed as part of the corporate profit of the enterprise.

Capital gains are treated as non-taxable income when they are derived from the transfer of shares in a company incorporated in the European Economic Area or in a country with which Lithuania has a valid DTT and that pays CIT or an equivalent tax. This holds true if the Lithuanian holding company holds more than 25% of voting shares for a

Lithuania

continuous period of (i) at least two years or (ii) at least three years when the shares were transferred in one of the established forms of reorganisation. Certain restrictions apply.

Dividend income

The receiving company does not include the dividends received from other entities in its taxable income.

Interest income

Interest income is treated as general taxable income and is subject to 15% CIT.

Exemptions from taxable income

The following additional types of income are exempt from CIT:

- Insurance indemnity not in excess of the value of lost property or other losses or damages, the refunded part of insurance premiums in excess of the premiums deducted from income in accordance with the procedure established, and the part of insurance indemnity in excess of the premiums deducted from income in accordance with the procedure established.
- Proceeds of a bankrupt company received from sale of its property.
- The balance of the formation fund of an insurance company as prescribed by the law on insurance.
- Investment income of investment companies with variable capital and closed-end investment companies acting in accordance with the law on collective investment undertakings and investment income of investment companies acting in accordance with the law on collective investment undertakings for informed investors, except for dividends and other distributable profits.
- Income derived by health care institutions for their services that are financed from the funds of the Compulsory Health Insurance fund.
- Income derived from revaluation of fixed assets and liabilities as established by laws and regulations, except for income derived from the revaluation of derivative financial instruments acquired for hedging purposes.
- Default interest, except for that received from foreign companies registered or otherwise organised in blacklisted territories or residents of such territories (*see Blacklisted territories in the Deductions section*).
- All or part of the profit gained from legal entities of unlimited civil liability that are payers of CIT and with income that is subject to CIT under the law or to a similar tax under respective statutes of foreign countries, with certain exceptions.
- Fees collected by seaports and airports, charges for air traffic navigation services, and funds collected from the lease of seaport-owned land.
- Results arising from adjustments made for the previous tax periods as prescribed by the law on accounting.
- Indemnification for damages received by the company, with certain exceptions.
- Compensation received according to the Lithuanian programmes of the EU financial support relating to taking fishing ships for scrap.
- Life insurance payments received by insurance companies, provided the term of the life insurance policy is valid for not less than ten years or at the date of the receipt of the insurance benefit the recipient has reached the pension age in accordance with the additional law on pensions. Additionally, life insurance investment income of insurance companies, except for dividends and other distributable profit, is exempt along with investment insurance income of insurance companies received according to the contracts of life insurance occupational pensions concluded in accordance with the law on accumulation of occupational pensions.
- Direct and other compensational allowances that are received by units performing agricultural activities to maintain their level of income, which meet the requirements established in the laws and other legal acts of Lithuania.

Foreign income

Income is not subject to taxation in Lithuania if it was received from activities through a PE in a foreign country that is in the European Economic Area or that has a DTT with Lithuania and if the income was subject to taxation there. Since such income is not subject to taxation in Lithuania, costs related to the income cannot be deducted from income that is subject to taxation in Lithuania.

Deductions

Allowable deductions include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit unless the law on CIT provides otherwise.

Depreciation

Tangible and intangible assets may be depreciated using a directly proportional (straight-line) depreciation method, a production depreciation method, or a double-declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law. For certain typical assets, depreciation rates relevant for tax purposes are shown in the chart below:

Asset	Depreciation period (years)	Annual depreciation rate (%)
New buildings used for business activities	8	12.5
Residential buildings	20	5
Plant and machinery	5	20
Trucks (not older than 5 years)	4	25
Computer and communications equipment	3	33.3
Software	3	33.3

Goodwill

Goodwill can be amortised for tax purposes in a straight-line method over 15 years after a merger of a purchasing company and an acquired company, provided that certain conditions are met.

Start-up expenses

Generally, startup expenses are deductible for tax purposes.

Interest expenses

Interest expenses are generally deductible for tax purposes. Interest expenses should be recognised as non-deductible for tax purposes if, after acquisition, a purchasing company and an acquired company are merged and debt used for acquisition of shares is pushed down to the acquired company and certain conditions are not met.

Interest paid to related parties may be non-deductible for tax purposes if thin capitalisation rules are infringed and the interest rate on a debt from related party does not correspond to a fair market interest rate (*see Transfer pricing and Thin capitalisation in the Group taxation section*).

Bad debts

Bad debts are deductible only if proved and specific criteria are met. Provisions are non-deductible.

Charitable contributions

Generally, double the amount of donation/sponsorship can be deducted for tax purposes (i.e. 200% deduction is available) but only if donation/sponsorship was provided to

Lithuania

registered recipients and only up to a limit of 40% of taxable result before deduction of sponsorship and utilisation of tax losses carried forward.

Fines and penalties

Fines and penalties are generally non-deductible for tax purposes.

Taxes

All taxes, fees, and other compulsory payments to the state budget are deductible for CIT purposes, except VAT paid to the budget and CIT. Note that VAT can be treated as deductible for CIT purposes if it is input or paid import VAT that is non-refundable for VAT purposes and this input or paid import VAT is calculated on deductible expenses.

Other significant items

Limited deductible expenses also include the following:

- Maintenance, repair, and reconstruction expenses of tangible fixed assets: If the repair or reconstruction increase the service period and improve the qualities (useful characteristics of the fixed assets), the value of repair or reconstruction shall be added to the acquisition value of the tangible fixed assets.
- Business travel expenses: Deductible with restrictions.
- Advertising and representation expenses: 75% of representation expenses are deductible.
- Natural losses: Deduction limited to not more than 1% of turnover.
- Contributions and expenses for the benefit of employees: Deductible with restrictions.
- Special provisions of credit institutions and insurance companies: Calculated according to the methods established by the Bank of Lithuania and the Commission of Insurance Supervision.
- Membership fees, contributions, and premiums: Deductible with restrictions.

Non-deductible expenses also include the following:

- Default interest (forfeit), fines, and late interest paid to the state budget as well as other sanctions imposed for violations of laws and regulations of Lithuania.
- Interest or any other indemnity paid due to non-performance of contractual obligations by related parties.
- Amount of the limited deductible expenses in excess of the established limits.
- Expenses attributed to allowable deductions more than 18 months past, although the payments for goods or services supplied by the entities registered or otherwise organised in blacklisted territories (*see below*) have not been made.
- Sponsorship and gifts that do not correspond to the requirements of CIT law.
- Payments to blacklisted territories (*see below*) if they are not verified and payments are not subject to WHT.
- Indemnification for damages inflicted by the entity.
- Dividends or otherwise distributed profits.
- Other expenses not related to the deriving of income and not attributed to operating activities of the entity as well as the expenses that are not considered allowable deductions under the law.
- Amounts resulting from adjustments and corrections of errors of previous tax periods.
- Expenses related to revaluation of fixed assets and securities, except for financial instruments acquired for hedging purposes.
- Deductible or limited deductible expenses attributed to non-taxable income.
- Expenses related to income from certain international maritime activities if a maritime entity chose to apply a fixed CIT.

Net operating losses

Operating losses may be carried forward for an indefinite period, provided that certain requirements are met.

Current year operating losses can be transferred to another legal entity of the group if certain conditions are met.

Losses incurred due to the transfer of securities and/or derivative financial instruments may be carried forward for five years (indefinitely for financial institutions).

Reduction of taxable profit by accumulated tax losses is limited to 70% of the taxable profit for the current year (except for entities that are subject to the reduced CIT rate of 5%). The rest of the accumulated tax losses can be carried forward for an unlimited period of time.

No carryback of losses is available in Lithuania.

Payments to foreign affiliates

Payments to foreign affiliates (e.g. interest, royalties, management fees, fees for other services) are deductible for tax purposes if the payment serves a business purpose, provides a benefit to the payer, is at arm's length, and is substantiated by sufficient documentation. Payments to foreign affiliates may also be subject to various WHTs. Certain payments to affiliates located in tax haven (blacklisted) countries are subject to 15% WHT rate.

Blacklisted territories

A blacklisted territory is a foreign country or territory that is included on a list of offshore territories established by the Minister of Finance that meets at least two of the following criteria:

- Similar tax rate in such territory is below 75% of that set in the Lithuanian CIT law.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the parent company (controlling entity) is registered or otherwise organised.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the business is conducted.
- The company (the controlled taxable entity) has entered into agreement with the tax administrator of that territory with regard to the application of a tax rate or tax base.
- There is no effective exchange of information in such territory.
- There is no financial and administrative transparency in such territory, the tax administration rules are not quite clear, and the application thereof is not communicated to tax administrators of other countries.

A list of 58 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any work or services, commodities, interest on funding, insurance premiums, guarantees, etc. are non-deductible for CIT purposes unless the Lithuanian entity provides evidence to the state tax authorities that:

- the payments are related to usual activities of the paying and the receiving business entities
- the receiving foreign business entity manages the property necessary to carry out such usual activities, and
- there is a connection between the payment and the economically grounded business operation.

Group taxation

Group taxation legislation and regimes are not available in Lithuania. Each Lithuanian entity is regarded as a separate taxpayer and may not deduct tax losses accumulated from previous tax periods at the level of any other group entity.

Transfer of current year operating tax losses incurred to an entity of the same group of companies is allowed if certain requirements are met.

Transfer pricing

All transactions between associated parties must be performed at arm's length. The tax authorities have a right to adjust transaction prices if they do not conform to market prices.

The Lithuanian rules refer to the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations established by the OECD to the extent that they do not contradict with the domestic rules.

According to the Lithuanian transfer pricing regulations, companies may apply the following methods, although traditional methods should be given preference:

- Comparable uncontrolled price method.
- Resale price method.
- 'Cost plus' method.
- Profit split method.
- Transactional net margin method.

All entities with an annual revenue exceeding EUR 2,896,000, as well as all banks, insurance companies, and credit institutions, are required to prepare transfer pricing documentation in a specifically prescribed form. The documentation may be in a foreign language, but upon request has to be translated to Lithuanian.

As of 1 January 2017, new penalties, amounting from EUR 1,400 to EUR 4,300, for non-compliance with the transfer pricing documentation procedures for transactions between associated persons will be imposed. For a repeated breach, penalties can amount from EUR 2,900 to EUR 5,800.

Advance pricing agreements (APAs) and binding rulings are available in Lithuania. Taxpayers can apply for an APA or a binding ruling from the Lithuanian tax authority in respect of future transactions.

Decisions in the form of a binding ruling or APA will be issued by the Lithuanian tax authority regarding the application of tax legislation provisions and pricing principles. The above mentioned decisions will be particularly relevant to companies planning to undertake new transactions where the taxation principles of such transactions are not clearly defined in the tax legislation and to international companies planning to perform significant transactions with associated parties.

Thin capitalisation

The Lithuanian thin capitalisation rules apply in respect to borrowings from related parties as well as borrowings from third parties guaranteed by related parties. The debt-to-equity ratio is 4:1. The above provisions do not apply if a Lithuanian company can prove that the same loan under the same conditions would have been granted by a non-related entity.

Controlled foreign companies (CFCs)

Positive income of a CFC, i.e. income not derived from operating activity (including interest, royalties, leasing, dividend income, etc.), shall be included in the taxable

income of a controlling Lithuanian company if a CFC is established or organised in a country that is:

- a blacklisted territory (see *Blacklisted territories in the Deductions section*)
- on the 'white' list of countries as defined by the Ministry of Finance but is eligible for special CIT or an equivalent tax relief in a country of establishment, or
- neither on the 'white' list nor on the 'black' list of countries and is subject to a CIT or an equivalent tax lower than 11.25% in a country of establishment.

Certain other conditions apply.

A Lithuanian company may reduce tax payable in Lithuania by the tax paid in a foreign country on the positive income of CFC included in the tax base of that Lithuanian company.

Tax credits and incentives

Foreign tax credit

A company may reduce tax payable on certain foreign-sourced income in Lithuania by taxes paid on that income in a foreign country if that Lithuanian company has received appropriate notice from that foreign country. The tax credit may not exceed the CIT rate payable in Lithuania.

Investment project incentive

Entities involved in an investment project are able to reduce their taxable profits by up to 50% of the actually incurred acquisition costs of long-term assets meeting certain requirements. Please note that depreciation (amortisation) expenses of such assets shall be deducted in a common manner.

Taxable profits can be reduced by such costs incurred from 2009 to 2018.

This relief is applied to the following categories of fixed assets:

- Machinery and equipment.
- Computer and communication equipment.
- Software and acquired intellectual property (IP) rights.
- Lorries, trailers, and semi-trailers.

The costs exceeding the above mentioned 50% limit can be carried forward for four years.

There are certain criteria defining what could be considered an investment project. The project should be precisely described to meet the criteria allowing a company to use the tax relief, and the tax authorities should be properly notified about the project.

Tax relief for research and development (R&D)

Expenses, except for fixed assets' depreciation (amortisation) expenses, incurred for R&D purposes can be deducted three times in the tax period when they are incurred, provided that R&D works performed are related to ordinary business activities.

A company applying tax relief for R&D has to prepare R&D documentation. This documentation has to cover the performed project, substantiate conformity with certain tax requirements, and specify the amount of expenses for R&D activities.

Lithuania

Funds granted for producing a film or a part of a film

Funds granted for producing a film or a part of a film can be deducted from taxable income and from CIT payable due during the period of 2014 to 2018 if the following conditions are met:

- The film meets the criteria of cultural substance and evaluation of the production.
- Not less than 80% of the film production expenses are incurred in Lithuania, and the amount exceeds EUR 43,000.
- Total amount of funds granted by all companies may not exceed 20% of total expenses of the film production.

Certain restrictions for reduction of taxable income and tax due apply.

Free economic zones (FEZs)

Entities that invest in Lithuanian FEZs are entitled to partial or complete CIT relief (depending on the investment amount), relief of tax on real estate, and 50% relief of land lease tax. In 1996, two FEZs were established for a period of 49 years: one in Kaunas and the other one in Klaipėda. As of 1 January 2012, five more FEZs were established in Akmenė, Kėdainiai, Marijampolė, Panevėžys, and Šiauliai. At the moment, however, the Akmenė FEZ is not operating since the procedures have not been finalised.

An association uniting all six FEZs operating in Lithuania was established at the end of 2015. Its goal is to create 2,000 new jobs and attract investments of more than EUR 400 million.

Withholding taxes

Domestic legislation

Generally, income of a foreign entity in Lithuania not derived through a PE is deemed to be Lithuanian-source income and is subject to WHT at the following rates:

- Interest on any type of debt obligations, including securities: 10%.
- Proceeds from the sale, transfer (with title), or lease of immovable property located in Lithuania: 15%.
- Income derived from sports activities or performers' activities: 15%.
- Income from distributed profits: 15%.
- Royalties: 10%.
- Annual payments (*tantiems*) to the members of the board or supervisory board: 15%.
- Indemnities received for the infringement of copyrights or neighbouring rights: 10%.

0% WHT is applied on royalties paid to related parties meeting requirements of the European Commission (EC) Interest and Royalty Directive.

Lithuanian WHT on interest paid to EU entities or DTT tax residents is 0%.

WHT is not applied on government securities issued on international financial markets, interest accumulated and paid on deposits, and interest on subordinated loans that meet the criteria established by legal acts adopted by the Bank of Lithuania.

Dividends distributed by a resident company to another resident company are subject to a 15% CIT, which is withheld by a distributing company.

The dividends distributed by a resident company are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the distributing entity is subject to 5% or 15% Lithuanian CIT rate. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklisted territories (*see Blacklisted territories*

in the Deductions section), as specified by the Ministry of Finance. Please note that the requirement of the 12-month holding period does not necessarily have to be fulfilled on the day of dividend distribution.

As of 1 January 2017, dividends paid out will no longer be a subject for tax exemption in cases where tax benefit is the main or one of the main objectives of a particular structure of companies. Dividends received from foreign companies will not be subject for tax exemption if they were deducted from taxable profit at the distributing company level. The amendments to the Lithuanian Law on CIT are due to the implementation of EU Directive 2014/86/EU and the OECD's BEPS initiative.

The receiving company may reduce its CIT payable for that period when dividends were received by the amount of CIT withheld from the received dividends. Any excess credit may be offset with other taxes payable.

Dividends distributed by a foreign entity are subject to a 15% WHT that is to be paid by the receiving Lithuanian entity.

Dividends distributed by a foreign company to a Lithuanian company are exempt from WHT if the distributing foreign entity is established in the European Economic Area and related profit is properly taxed in the domiciled country.

The dividends are also exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the receiving entity is subject to 5% or 15% Lithuanian CIT rate. This participation exemption satisfies the requirements of the EC Parent-Subsidiary Directive. The exemption also applies to dividends paid by non-EU foreign companies, except those registered or organised in blacklisted territories.

According to the changed provisions of the CIT Law, the payments received by a foreign entity for the activities of the members of the supervisory board in Lithuania are recognised as income of the foreign company in Lithuania, regardless of the frequency of such payments and whether they are paid as *tantiemes* or as other types of payments. These payments are subject to 15% WHT, which should be withheld by the paying company in Lithuania. The tax is applicable only if the member of the supervisory board is a foreign company (not an individual).

Tax treaties

Where a treaty for the avoidance of double taxation and prevention of fiscal infringement with the country in question contradicts the local regulations, the treaty provisions prevail. Lithuania now has 53 DTTs in force with foreign countries.

The following WHT rates apply to dividends, interest, and royalties paid to a recipient or beneficial owner resident in a tax treaty country. The lower of the domestic or the treaty rate is given.

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%) (3)

Notes

- Dividends are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the distributing entity is subject to a 5% or 15% Lithuanian CIT rate. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklisted territories (see *Blacklisted territories in the Deductions*

section), as specified by the Ministry of Finance. If participation exemption criteria are not met, the standard WHT rate of 15% should be applied. However, some of the DTTs allow applying WHT at a reduced rate of 5% or 10%.

2. Under the domestic law, the rate is nil if interest is paid to a company established in a country that has a DTT with Lithuania or is a member of a European Economic Area. In other cases, except for Latvia where 0% WHT is established in the DTT, 10% WHT rate should be applied.
3. Under the domestic law, 0% WHT is applied on royalties paid to related parties meeting requirements of the EC Interest and Royalty Directive.
4. Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.

Reduction of, or exemption from, WHT under a DTT may be obtained if a special residence certificate (Form DAS-1) is completed and approved by the tax authorities before a taxable payment is transferred. If a payment that would have been subject to a tax treaty has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund of the Lithuanian tax withheld at source (Form DAS-2) and obtaining the approval of the tax authorities.

In addition, the tax authorities may require completion of a special certificate giving information about income received and taxes paid in Lithuania (Form DAS-3).

Tax administration

Taxable period

The Lithuanian tax year runs from 1 January to 31 December. However, a corporation may apply to adopt a substitute year of reporting (e.g. 1 July to 30 June).

Tax returns

CIT

CIT returns must be submitted by the first day of the sixth month of the following tax period (1 June for companies using the calendar year). From 2017, CIT returns must be submitted by the 15th day of the sixth month of the following tax period (15 June for companies using the calendar year).

If advance CIT due is calculated based on activity results for the previous year, the advance CIT return for the first nine months of the tax period is to be submitted by the last day of the first month (usually January) of the tax period. The return for the remaining months of the tax period is to be submitted by the last day of the tenth month (usually October) of the tax period. If the taxpayer has chosen to pay the advance amount based on the projected amount of CIT for the current year, the return must be submitted not later than the last day of the first month of the tax period.

From 2017, advance CIT due based on activity results for the previous year should be calculated and declared as follows. The advance CIT due for the first six months of the tax period should be calculated based on results of the tax period before the last tax period. Advance CIT return for the first six months of the tax period should be submitted by the 15th day of the third month of the tax period (usually 15 of March). The advance CIT due for the remaining six months of the tax period should be calculated based on results of the last tax period. Advance CIT return for the remaining six months should be submitted by the 15th day of the ninth month (usually 15 of September) of the tax period.

WHT on dividends

A tax-withholding entity must submit to the tax authorities a special form of a return reporting the dividends paid and tax withheld within ten calendar days after the end of the month of the dividend payment.

Lithuania

WHT on payments other than dividends

A tax-withholding entity must submit to the tax authorities a special form of a return reporting the amounts of payments paid and taxes withheld during the calendar month no later than 15 days after the end of the month in which the amounts were paid.

Payment of tax

CIT

The final payment deadline for CIT is aligned with the annual CIT return submission deadline (i.e. currently, the first day of the sixth month of the following tax period; however, from 2017, the 15th day of the sixth month of the following tax period).

If advance CIT due is calculated based on the activity results for the previous year, the advance amount of CIT for the first nine months (from 2017, for the first six months) of the tax period is calculated based on the actual CIT amount for the tax period before the previous tax period. For example, the CIT for the first nine months of 2016 would be calculated based on the appropriate portion of the actual amount of CIT for 2014. The advance amount for the remainder of the tax period is based on the actual amount of CIT for the previous period, for example, tax for the last three months of 2016 (from 2017, for the last six months) would be based on the appropriate portion of the actual amount of CIT for 2015. Thus, the advance CIT amount for each quarter would be equal to one-fourth of the actual tax amount calculated for the tax periods discussed.

The taxpayer may choose to pay the advance amount based on the projected amount of CIT calculated for the current year. The advance amount of CIT calculated on the basis of the projected amount of CIT for the tax period shall account for not less than 80% of the actual amount of the annual CIT; otherwise, late payment interest shall be calculated in respect of each amount of advance CIT that was not paid for the quarter.

The advance tax must be paid no later than the last day of the respective quarter, and for the last quarter by the 25th day of the last month of the quarter.

If the amount of tax indicated in the annual CIT return exceeds the amount actually paid during the tax period (i.e. the advance CIT), the taxpayer is obligated to transfer the additional amount no later than the annual CIT return submission deadline (i.e. by the first day [from 2017, by the 15th day] of the sixth month of the following tax period). Overpaid tax can be offset with other tax dues or refunded in accordance with the law on tax administration.

WHT on dividends

WHT on dividends is to be calculated, withheld, and remitted by a Lithuanian company that pays dividends within ten (from 2017, 15) calendar days after the end of the month of the payment.

WHT on payments other than dividends

WHT on payments other than dividends is to be calculated, withheld, and remitted by a Lithuanian company or a PE of a foreign company no later than the return submission deadline.

Tax audit process

The Lithuanian tax system for companies is based on self-assessment; however, the tax authorities undertake ongoing compliance activity to ensure corporations are meeting their tax obligations. The tax authorities take a risk-based and materiality approach to compliance and audit activities, with efforts generally focused on taxpayers with a higher likelihood of non-compliance and/or material consequences of non-compliance. Compliance activities take various forms, including general risk reviews, questionnaires, reviews of specific issues, and tax audits.

Statute of limitations

Generally, the tax authorities may investigate current and five previous tax periods. However, the limit of ten previous tax periods applies where the tax authorities are of the opinion there has been fraud or tax evasion.

Topics of focus for tax authorities

The Lithuanian tax authorities are focusing on the following areas of corporate taxpayers' compliance:

- Topics driven by OECD movement on BEPS (e.g. economic substance of companies, business reasons of transactions).
- Obligation to register PE in Lithuania (investigations of foreign companies that perform activities in Lithuania without registering as local taxpayers).
- Compliance with transfer pricing rules and thin capitalisation rules.
- Applications of tax reliefs (e.g. investment project incentive, relief for R&D).
- Proper recognition of costs for non-business related assets and expenses.
- Social security contributions' optimisation schemes.

Other issues**Foreign Account Tax Compliance Act (FATCA) agreement with the United States (US)**

Lithuania signed an intergovernmental agreement (IGA) with the United States under the framework of FATCA. Lithuania and the United States will exchange information about the accounts of foreign (US or Lithuania, respectively) residents held in local financial institutions or local branches of foreign financial institutions.

L

Implementation of base erosion and profit shifting (BEPS) provisions

The OECD has announced a package of BEPS recommendations aiming to increase transparency of international taxation and prevent tax evasion and aggressive tax planning. Many OECD countries, as well as Lithuania (not an OECD member yet), have already started shifting certain provisions related to implementation of the BEPS recommendation package into their tax legislation. Lithuania started formal OECD accession talks in April 2015.

Significant developments

New tax measures for 2017

On 29 February 2016, the Finance Minister announced changes to the Luxembourg corporate and personal tax systems planned for 2017. The changes include, notably, a reduction of the corporate income tax (CIT) rates.

These measures, planned to take effect progressively from 1 January 2017, are now likely to be included in a Bill, to be voted by the Luxembourg Parliament in 2016.

Reduction of the CIT rate

The CIT rate is proposed to be reduced from 21% to 18% over the next two years. The announcement does not foresee any changes to the 'solidarity surtax' on the CIT rate nor any change in the rate of municipal business tax due by companies.

The CIT rate would be reduced to 19% for 2017, leading to an overall tax rate for companies of 27.08% in Luxembourg City for fiscal year (FY) 2017 (taking into account the solidarity surtax of 7% on the CIT rate, and including the 6.75% municipal business tax rate applicable).

The CIT rate would be further reduced to 18% for 2018, leading to an overall tax rate of 26.01% in Luxembourg City for FY 2018 (taking into account the solidarity surtax of 7% on the CIT rate, and including the 6.75% municipal business tax rate applicable).

Also, the CIT rate for small and start-up companies (i.e. companies having taxable income below 25,000 euros [EUR]) would be reduced in a single step to 15% for 2017, leading to an overall tax rate of 22.08% in Luxembourg City (taking into account the solidarity surtax of 7% on the CIT rate, and including the 6.75% municipal business tax rate applicable).

Restrictions on the use of future losses

The use of losses generated as of 1 January 2017 will be limited. It seems that such losses would only be available to offset the taxable profits of up to a maximum of 75% of the taxable profits of each subsequent period. Also, losses generated after 1 January 2017 would only be able to be carried forward for a maximum period of 17 years.

It should be noted that the losses that arose before 1 January 2017 should not be affected in any way by either of these limitations.

Other new tax measures

Other measures noted in the announcement of the Finance Minister that would benefit companies are as follows:

- With the aim of helping inter-generational transfers of family businesses, capital gains linked to real estate assets (both land and buildings) would benefit from a tax-neutral treatment.

- Farming businesses could deduct 30% of the amount of any new investment of up to a total of EUR 250,000 made in the business. Investment above this amount would attract a deduction of 20% of the excess.
- Research and development (R&D) will be encouraged through the increase of the investments tax credits. The complementary and global investment tax credits would respectively be increased from 12% to 13% and from 7% to 8% (the tax credit for investments exceeding EUR 150,000 would remain at 2%). Also, the investment tax credit for assets approved for the special depreciation regime would be increased from 8% to 9% (the tax credit for investments exceeding EUR 150,000 would remain at 4%).

Taxes on corporate income

Luxembourg taxes its corporate residents on their worldwide income and non-residents only on Luxembourg-source income.

Businesses with taxable income lower than EUR 15,000 are subject to CIT at a rate of 20%. The CIT rate is 21% for companies with taxable income in excess of EUR 15,000.

The CIT does not apply to tax-transparent entities (e.g. general or limited partnerships or European Economic Interest Groupings).

Although there used to be a minimum CIT for Luxembourg resident companies, no such minimum CIT is applicable as of 2016. It has been replaced by a minimum net wealth tax (see *Net wealth tax (NWT) in the Other taxes section*).

Solidarity surtax

A 7% solidarity surtax is imposed on the CIT amount.

Taking into account the solidarity surtax, the aggregate CIT rate is 22.47% for companies with taxable income in excess of EUR 15,000.

Municipal business tax on income

Municipal business tax is levied by the communes and varies from municipality to municipality. The municipal business tax for Luxembourg City is 6.75%.

The effective combined CIT rate (i.e. CIT, solidarity surtax, and municipal business tax) for Luxembourg City is 29.22%.

Corporate residence

Based on domestic law, a company is considered to be resident in Luxembourg if either its registered office or place of central administration is located in Luxembourg. The registered office is designated as such in the company's articles of incorporation.

The place of central administration is generally understood to mean the place where the company is managed and controlled. While this term is not legally defined, the location of the company's major establishment is determined by facts and circumstances, including the following:

- The place where meetings of the board of directors are held.
- The place where shareholders meetings are held.
- The place where the company's officers make their decisions.
- The place where the company's books and records are kept.
- The place where other, similar factors evidencing management control occur.

Luxembourg

Permanent establishment (PE)

The provisions on PEs included in the tax treaties concluded by Luxembourg generally follow the wording of the Organisation for Economic Co-operation and Development (OECD) model.

Under Luxembourg domestic tax law, a similar PE concept exists but is defined in a broader way and is to be understood as every fixed piece of equipment or place that serves for the operation of an established business.

Other taxes

Value-added tax (VAT)

Supplies of goods and services, which are deemed to take place in Luxembourg, are subject to VAT at the standard rate of 17% (lowest standard VAT rate in the European Union [EU]) or, on certain transactions, at 14% (e.g. certain wines, advertising pamphlets, management and safekeeping of securities), 8% (e.g. supply of gas or electricity), or 3% (e.g. food [except most alcohol beverages]; pharmaceutical products; books [except e-books]; radio and television broadcasting services [except adult entertainment]; shoes, accessories, and clothes designed for children under the age of 14). Some transactions, such as export and related transport, are zero-rated. Further to a Court of Justice of the European Union (CJEU) decision dated 5 March 2015 (C-502/13, *Commission v. Luxembourg*), the super reduced VAT rate of 3% is no longer applicable to the supply of e-books. The Luxembourg VAT Authorities have published a Circular stating that, as of 1 May 2015, the standard VAT rate of 17% applies to the supply of e-books.

Taxpayers whose activities are subject to VAT are entitled to offset against their VAT payable the amount of such tax charged to them by their suppliers or reverse charged (i.e. self-accounted) by them on import or acquisitions of goods or services from abroad.

Banking, financial, insurance, and reinsurance transactions are generally exempt activities. The VAT paid on costs that have a direct and immediate link with these transactions cannot be recovered except when related to services performed for persons established outside the European Union. VAT on expenses made in the context of 'passive' holding activities, which are considered as outside the scope of VAT, are not recoverable.

VAT returns must be filed on a monthly basis (as well as a recapitulative annual return). Derogations may be obtained, to file quarterly or only annual VAT returns, subject to certain conditions (level of turnover or incoming transactions subject to VAT and level of purchases of goods and services on which Luxembourg VAT must be self-accounted for).

A Standard Audit File for Tax (SAF-T), containing reliable accounting data, has been implemented by the VAT authorities. This specific .xml file is used by taxable persons to make information available to Luxembourg VAT authorities during a VAT audit. Only specific taxable persons (subject to the Luxembourg Standard Chart of Accounts) having a certain minimum number of transactions (+/- 500) and registered under a 'normal filing regime' with a turnover exceeding EUR 112,000 are currently concerned. On the other hand, some entities, banks and insurance companies, are not yet subject to these SAF-T obligations, although they may be required to provide all VAT-relevant data to the authorities in a structured electronic file.

Customs duties/import tariffs

Based on a European Regulation, goods entering within the territory of the European Union may be subject to customs duties/import tariffs. Applicable rates are based on the nature and on the quantity of the products.

Excise duties

In addition to VAT, some products are subject to specific excise duties. In Luxembourg, these products are electricity, mineral oils, manufactured tobacco, and alcohol.

Excise duties are not based on the sale price of the products but on the quantity. Excise duty becomes chargeable at the time, and in the EU member state, of release for consumption. Release for consumption occurs in any of the following instances:

- The departure of excise goods from a duty suspension arrangement.
- The holding of excise goods outside a duty suspension arrangement where excise duty has not been levied, pursuant to the applicable provisions of Community law and national legislation.
- The production of excise goods outside a duty suspension arrangement.
- The importation of excise goods, including irregular importation, unless the excise goods are placed, immediately upon importation, under a duty suspension arrangement.

Stamp taxes

There is no stamp duty in Luxembourg.

Net wealth tax (NWT)**NWT regime**

Both Luxembourg resident companies and Luxembourg branches of non-resident companies are subject to NWT on their net wealth, based on prescribed valuation methods. As of 1 January 2016, a new scale of rates has been introduced for NWT, as follows:

- 0.5% (i.e. the rate that applied in 2015) on a taxable base of up to EUR 500 million.
- On the taxable base exceeding EUR 500 million: NWT of EUR 2.5 million, plus 0.05% on the component of the NWT base above EUR 500 million. No cap is set.

In general, assets are to be taken into account at market value (except for real estate, which is subject to a special regime). Shareholdings qualifying for the participation exemption (*see Dividend income in the Income determination section*) generally are exempt from NWT.

Minimum NWT

A minimum NWT charge applies as of 1 January 2016 for all corporate entities having their statutory seat or central administration in Luxembourg. The measures imposing this new charge have very many similarities with the outgoing provisions for the minimum CIT charge.

Entities with aggregated fixed financial assets, transferable securities, intercompany receivables, and cash in excess of 90% of their total gross assets and EUR 350,000 will be subject to a minimum NWT charge of EUR 3,210. In line with announcements of the Luxembourg government, this minimum NWT charge would be increased to EUR 4,815 (including solidarity surtax) as of 2017.

All other corporations with a statutory seat or central administration in Luxembourg (including securitisation vehicles, *Société d'Investissement en Capital à Risque* (SICARs), SEPCAVs, and ASSEPs) will be subject to a minimum NWT charge ranging from EUR 535 to EUR 32,100, depending on company's total gross assets, as follows:

Total gross assets (EUR)	Minimum NWT charge (EUR)
Up to 350,000	535
350,001 to 2,000,000	1,605

Luxembourg

Total gross assets (EUR)	Minimum NWT charge (EUR)
2,000,001 to 10,000,000	5,350
10,000,001 to 15,000,000	10,700
15,000,001 to 20,000,000	16,050
20,000,001 to 30,000,000	21,400
30,000,001 and above	32,100

The minimum NWT charge due by a tax unity (*see the Group taxation section*) is capped at EUR 32,100.

The legislation makes it clear that the balance sheet to be used for these purposes is the closing balance sheet for the tax year concerned that is in conformity with all CIT provisions (n.b. rather than the NWT provisions for computing the normal NWT basis). Consequently, all figures to be used are those as shown in the commercial balance sheet, subject only to any specific revaluations necessary to apply CIT provisions. In practice, the computation rules for the gross assets figure are the same as under the outgoing minimum CIT charge provisions.

In particular, shareholdings that qualify for the participation exemption and Luxembourg-situs real estate must both be included in gross assets for these purposes. Conversely, foreign-situs real estate and other assets, such as those of a foreign branch, the income from which is excluded from the Luxembourg tax base under the provisions of a double tax treaty (DTT), are not to be included in gross assets.

NWT reduction

Since 1 January 2015, the CIT due in a given year N-1 (e.g. 2015) represents the limit for the NWT reduction for the following year N (e.g. 2016). The CIT to be taken into consideration for the limit of NWT reduction is the amount due, including the employment fund contribution, before any tax credits. As a second limit, the NWT reduction is limited by the minimum NWT as of 2016 (and to the minimum CIT until 2015). In other words, NWT cannot be reduced down to 0 by constituting a NWT special reserve. The minimum NWT remains due.

Subscription tax

Investment funds are subject to subscription tax (at various rates) on their total net assets valued at the last day of each quarter. Institutional funds and monetary funds are subject to an annual rate of 0.01% and the other funds to an annual rate of 0.05%. Funds of institutional funds and monetary institutional funds are exempt from subscription tax.

Exemptions from subscription tax are available for exchange traded funds, and an extension of exemption is available for funds dedicated to multi-employer pension vehicles or to several employers providing pension benefits to their employees.

Where a foreign Undertakings for Collective Investment (UCI) is managed by a Luxembourg-based management company (or where the foreign UCI's place of effective management is located in Luxembourg), the UCI will not be deemed to be domiciled in Luxembourg and therefore not be subject to subscription tax in Luxembourg.

General registration taxes

Registration taxes (inclusive of the transcription tax described below) are levied at 7% on the market value of real estate purchased or transferred (10% in the commune of Luxembourg City for some categories of property) and 1% on mortgages on real estate. The taxes are deductible for CIT purposes.

A fixed registration duty of EUR 75 is levied on certain transactions involving Luxembourg legal entities (i.e. incorporation, amendment to the articles of association, and transfer of seat to Luxembourg).

In case of Luxembourg real estate assets, contributions made to a company remunerated by shares are subject to a proportional registration duty of 0.6% (0.9% for Luxembourg City for some categories of properties) and a transcription tax of 0.5%. Contributions remunerated by means other than shares remain subject to a proportional registration duty of 6% (9% for some categories of property located in Luxembourg City) and a transcription tax of 1%. Transfers made within the framework of a corporate reorganisation may be exempt from any proportional registration duty under certain conditions.

Commune (municipalities) real estate tax

Communes (municipalities) levy an annual real estate tax, the basis of which is the unitary value of real estate, which represents its estimated value in 1941. The basic rate varies from 0.7% to 1% of the unitary value, according to the category of property, and is multiplied by a coefficient, which varies with communes and different types of property. For commercial property, the coefficient in Luxembourg City is 750%, which should be applied to 1% of the unitary value. The real estate tax is deductible for CIT purposes.

Payroll taxes

Payroll taxes have to be withheld by the employer. The top payroll tax withholding rate is 40%. A solidarity tax of a maximum of 9% of tax must also be applied.

Social security contributions

Compulsory social security contributions for employees are listed below:

- For sickness: 3.05% of gross periodic remuneration, which is limited to a monthly ceiling of EUR 9,614.82 (annual ceiling estimated at EUR 115,377.84 for 2016).
- For pension: 8% of gross remuneration, which is limited to a monthly ceiling of EUR 9,614.82 (annual ceiling estimated at EUR 115,377.84 for 2016).
- For dependency contributions: 1.4% of gross remuneration (reduced by EUR 480.74 per month [i.e. estimated at EUR 5,768.88 for 2016]) with no cap.

The social security contributions have to be withheld by the employer from the employee's gross salary.

Branch income

Income of a Luxembourg-based branch of a non-resident company is generally taxed at normal CIT rates. The municipal business tax generally only applies if the branch is carrying on commercial activity within Luxembourg.

Income determination

Inventory valuation

Inventories generally are valued at the lower of actual cost or market cost. There is no statutory specified method. In general, the first in first out (FIFO), the last in first out (LIFO), and the weighted-average costs methods of inventory valuation are acceptable for income tax purposes, provided the method is in accordance with the facts.

Dividend income

Dividends received by a Luxembourg resident company (or by a domestic PE of a non-resident company in certain cases) should, in principle, be subject to CIT.

Participation exemption regime

Dividends received may be tax exempt in Luxembourg, according to the so-called 'participation exemption' regime, if the conditions described below are satisfied:

Luxembourg

- The distributing company is:
 - a collective entity falling within the scope of the EU Council 'Parent Subsidiary Directive'
 - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the Luxembourg Income Tax Law (LITL), or
 - a non-resident joint-stock company that is fully liable (in its state of residence) to a tax corresponding to the Luxembourg CIT (i.e. as a general rule, it is required that the foreign tax is compulsorily levied at a rate of at least 10.5%, on a basis similar to the Luxembourg one).
- The beneficiary company is:
 - a Luxembourg resident collective entity, which is fully taxable and takes one of the forms listed in the LITL
 - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the LITL
 - a domestic PE of a collective entity falling within the scope of the Parent Subsidiary Directive
 - a domestic PE of a joint-stock company that is resident in a country with which Luxembourg has concluded a DTT, or
 - a domestic PE of a joint-stock company or of a cooperative company, which is a resident of a European Economic Area (EEA) member state (other than an EU member state).
- At the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly (or through a tax transparent entity, *see Transparent entities below*), for an uninterrupted period of at least 12 months, a participation in the share capital of the subsidiary of at least 10% or with an acquisition price of at least EUR 1.2 million.

Nevertheless, consistent with the general principle under Luxembourg income tax law, which denies the deductibility of expenses connected to exempt income, any expenses incurred during the year in which a dividend is received, and which have a direct economic connection to the exempt participation, may only be deducted insofar as they exceed the exempt dividend for the year in question.

General anti-avoidance regime

The Luxembourg participation exemption regime has been amended in order to introduce anti 'hybrid instruments' and 'common minimum anti-avoidance' rules derived from the amended EU Parent/Subsidiary Directive. These new provisions apply to income distributed or received after 31 December 2015.

The 'common minimum anti-avoidance rule' will preclude Directive-based benefits whenever there are any arrangements that, having been put into place with a main purpose of obtaining a tax advantage that defeats the object or purpose of the Directive, are 'not genuine'. A 'not genuine' determination should be based on all relevant facts and circumstances. For the 'common minimum anti-avoidance rule', an arrangement should be considered 'not genuine' insofar as it was not structured for 'valid commercial reasons that reflect economic reality'.

The Luxembourg tax authorities have not provided any substantive guidance or interpretation of these new EU-driven measures.

However, if the 'common minimum anti-avoidance rule' is determined to apply, the exemption from Luxembourg withholding tax (WHT) obligations provided by article 147 2. (a) (or (d)) LITL will not apply to a distribution made to a corporate entity in another EU member state, even if the participation would otherwise be considered a qualifying participation to which this specific exemption should apply. Exemption under other sub-parts of article 147 2. remains available, notably for distributions to a corporate entity that is fully liable for a tax similar to the Luxembourg CIT and which resides in

any country (including one within the European Union) that maintains a tax treaty with Luxembourg.

Dividends received from a corporate entity in another EU member state that normally would qualify for the participation exemption of article 166 LITL will be denied this exemption if the 'common minimum anti-avoidance rule' applies. However, if the corporate entity paying the dividend also is fully subject to a tax similar to the Luxembourg CIT, the participation exemption will remain available, since this alternative provision granting the exemption is not subject to the new anti-avoidance rule.

The article 166 LITL exemption will not be available if the income flow creates a corresponding tax-deductible expense (i.e. a hybrid mismatch) at its source when the source is a corporate entity in another EU member state.

The new measures do not affect capital gains or NWT components for Luxembourg corporate entities.

Capital gains

Capital gains (and losses) generally are taxed as ordinary income (or losses). It is possible to defer the taxation of gains on certain fixed assets where the proceeds are used to acquire replacement items. Under certain conditions, capital gains and hidden reserves may be deferred or exempted and remain untaxed in a merger or another form of reorganisation of resident companies or other EU companies.

In general, capital gains on the disposal of qualifying shareholdings held by entities eligible to the participation exemption regime are tax exempt, provided (i) the shareholding constitutes at least 10% of total ownership in the share capital or an acquisition price of at least EUR 6 million and (ii) the disposing company has held or intends to hold a qualifying shareholding for at least 12 months.

A recapture system exists wherein the capital gain realised will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation deducted during the year of realisation of the exempt capital gain and in previous years.

The purpose of the system is to avoid a taxation vacuum, which would be the result if the deductibility of expenses and write-downs connected to the participation was allowed, while the income arising from the participation is tax exempt. This system should, in principle, remain tax neutral, as the company should have available carryforward losses for an equivalent amount resulting from the aforementioned deductions (unless previously used to offset other taxable income).

Taxation of non-resident corporate investors on gains upon disposal of shares

In case a non-resident corporate investor (non-treaty protected) derives income from the disposal of an important participation (i.e. representing at least 10% of the share capital) in a Luxembourg company within six months of its acquisition, said capital gain will be subject to CIT in Luxembourg unless a tax treaty provides otherwise.

Non-resident investors are not subject to the aforementioned capital gains tax upon disposal of shares in a Luxembourg *Société d'Investissement à Capital Variable* (SICAV), *Société d'Investissement en Capital à Risque* (SICAR), and *Société de gestion de Patrimoine Familial* (SPF).

Interest income

Under Luxembourg accounting and tax principles, interest income is recognised on an accrual basis and is fully subject to tax at the effective combined CIT rate of 29.22% (for Luxembourg City).

Luxembourg

Transparent entities

From a Luxembourg tax perspective, a transparent entity is seen as having no legal personality distinct from that of its partners (those transparent entities are commonly referred to as 'partnerships') for CIT and NWT purposes, although it may be regarded as a separate legal entity from a civil/corporate law point of view. Provided that the partnership carries out a commercial activity, however, it may be liable to municipal business tax on its own.

Foreign income

A Luxembourg tax resident company is liable for CIT on its worldwide income. Foreign-source income is therefore taxable in Luxembourg, unless a DTT provides for an exemption.

Dividends from foreign subsidiaries are taxed when received, except where exempt as mentioned above (under conditions, the exemption method applies in many DTTs of Luxembourg). Profits of a foreign branch that are not exempt by means of a DTT may benefit from a foreign tax credit. Any foreign taxes paid in excess of the tax credit are deductible as expenses. Luxembourg is using the exemption method in most of its DTTs.

Deductions

Depreciation

Depreciation rates must be consistent with economic reality. The depreciation must be calculated on the total acquisition cost, bearing in mind the normal life of the asset and the estimated residual value. As generally provided by the Luxembourg tax law, the accounting depreciation should be followed for tax purposes.

Depreciation normally is calculated using the straight-line method. However, the declining-balance method is permitted for fixed assets, other than buildings and intangible assets. The depreciation rate may not, however, exceed three times the rate applicable according to the straight-line method, or 30% (four times the applicable rate in the case of assets used exclusively for scientific and technical research, or 40%).

It is permissible to change from the declining-balance method to the straight-line method, but the opposite is not allowed.

In the event of a sale of a depreciated asset, the net book value at the moment of the disposal must be compared with the sales price of that asset. If this comparison indicates a profit, corresponding income tax may be due unless the sales price is reinvested in eligible assets. Capital losses are deductible.

Under certain conditions, fixed assets with a value of less than EUR 870 or an economic life that is not in excess of one year can be expensed fully in the year of acquisition. Special accelerated depreciation on 80% of the cost of fixed assets is available for assets that protect the national environment, save energy in Luxembourg, or permit the development of workplaces for handicapped workers, under certain conditions.

Goodwill

Goodwill is generally amortised over its useful life. In cases where its lifespan cannot be reliably estimated, goodwill cannot be amortised for a period longer than ten years. The Luxembourg tax treatment will follow the applicable accounting treatment.

Start-up expenses

Formation expenses can either be directly charged to the profit and loss account of the year in which they are incurred or depreciated on a straight-line basis over a five-year maximum period. The accounting treatment is followed for Luxembourg tax purposes.

Interest payments

Interest payments are, in principle, deductible to the extent they comply with the arm's-length principle (*see Transfer pricing in the Group taxation section*).

Non-deductibility of the interest payments may arise in case they depend on the profits realised by the company or are derived from loans structured in the form of bonds or similar securities. Also, the deductibility will be limited in cases where the company is considered as being thinly capitalised (*see Thin capitalisation in the Group taxation section*).

Bad debt

Provisions for bad debts are generally tax deductible.

Charitable contributions

Gifts for scientific, charitable, or public purposes to institutions of general interest are deductible, subject to a maximum of 20% of the net income or up to an amount of EUR 1 million (the minimum being EUR 120), with a possibility to spread the deduction over two years in case of excess.

Shareholdings

Expenses connected to the business activity of a taxpayer are, in principle, tax deductible. However, expenses linked to a shareholding qualifying for the participation exemption, including write-downs in the value of the shareholding booked as a consequence of a dividend distribution, are not deductible, up to the amount of the exempt dividend.

In the event of disposal of a shareholding financed by debt, recapture rules may apply. Basically, the effect of this rule is that the proceeds will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation deducted during the year of disposal and the previous years.

L

Luxembourg resident companies are subject to the NWT based on their net wealth.

Severance payouts or 'golden handshakes'

Severance payouts or 'golden handshakes' are deductible for CIT and municipal business tax purposes, up to EUR 300,000.

Fines and penalties

Fines and penalties suffered by the taxpayer are not considered as operating expenses and are therefore not tax deductible.

Taxes

Several taxes are deductible in determining income subject to CIT, including the registration duties and real estate tax. Also, certain taxes are credited against the computed amount of income tax owed, including taxes withheld from Luxembourg dividend income received, tax withheld abroad from dividend and interest income received by a Luxembourg corporation (subject to limitations), and investment tax credits (*see the Tax credits and incentives section*). Foreign taxes are also deductible as expenses if not otherwise credited.

The main non-deductible taxes are CIT, municipal business tax, and NWT, as well as interest and penalties for late payment of said taxes.

Net operating losses

Net operating losses can be carried forward for an unlimited period but cannot be carried back. Nevertheless, the Luxembourg Finance Minister has proposed to limit the use of losses generated from 1 January 2017, which would only be available to offset the taxable profits of subsequent periods, up to a maximum of 80% of the taxable profits of each

Luxembourg

period. Also, losses generated after 1 January 2017 would only be carried forward for a maximum period of ten years.

Payments to foreign affiliates

Royalties, management service fees, and interest charges paid to foreign affiliates by a Luxembourg company are deductible items, provided they are equal to what the company would pay an unrelated entity for comparable services (application of the arm's-length principle).

Group taxation

Luxembourg permits tax unity. Generally, the conditions to qualify for tax unity include that:

- each company that is part of the tax unity is a fully taxable company that is resident in Luxembourg (the top entity may be a Luxembourg PE of a fully taxable non-resident company)
- at least 95% of each subsidiary's capital is directly or indirectly held by the head of the fiscal unity
- each company's fiscal year starts and ends on the same date, and
- tax unity is requested jointly by the top company and each subsidiary that becomes a member of the group.

Tax unity lasts for a five-year period (minimum), and the taxable income/loss of the tax unity is computed as the sum of the taxable income/loss of each integrated entity. Tax losses incurred before the consolidation period may be offset only against tax profits of the company that incurred the loss. Tax losses that are sustained by a group member during the consolidation period are offset against the tax profits of the other group members. Tax losses arising during the consolidation period that remain after the consolidation remain attributed to the parent company.

Horizontal tax unity

The tax unity regime in Luxembourg has been extended since 1 January 2016 in accordance with case law from the European Court of Justice in particular to allow horizontal integration. Qualifying companies that are held by a common parent company established in any EEA country, the latter being subject to a tax comparable to Luxembourg's CIT in its country of residence, may now form a tax unity.

A tax unity also may include a Luxembourg PE of a company established in any country that is subject to a tax comparable to Luxembourg's CIT. The PE would be considered as the 'integrated' entity.

The conditions for the regime to apply otherwise remain substantially the same, meaning that:

- each company should be a fully taxable company that is resident in Luxembourg (the top entity may be a Luxembourg PE of a non-resident company subject to an income tax comparable to the Luxembourg CIT [i.e. a company subject to tax at a rate of at least 10.5% on a basis comparable to the Luxembourg CIT])
- at least 95% of each subsidiary's capital should be directly or indirectly owned either by the Luxembourg head of the fiscal unity or, in the case of a horizontal fiscal unity, by the common parent company of the Luxembourg group being a resident of a member state of the European Economic Area, which should be fully subject to an income tax comparable to the Luxembourg CIT (i.e. such company is subject to tax at a rate of at least 10.5% on a basis comparable to the Luxembourg CIT)
- each company's fiscal year should start and end on the same date

- the tax unity should be requested jointly by the top company and each subsidiary that becomes a member of the group, and
- the tax unity must be maintained for at least a five-year minimum period; otherwise, it is retroactively unwound.

Transfer pricing

At arm's-length principle

Luxembourg transfer pricing legislation provides that transactions between related parties (cross border as well as domestic) have to be governed by the arm's-length principle endorsed by the OECD (restated Article 56 of the LITL as from 1 January 2015). In essence, this means when the two enterprises are, within their commercial or financial relations, subject to conditions made or imposed that differ from those that would be made between independent enterprises, the profits of these enterprises are to be determined under conditions prevailing between independent enterprises.

Luxembourg Transfer Pricing Guidelines

For intra-group financing on-lending transactions, specific guidelines are provided for in two circulars issued by the Luxembourg tax authorities in 2011. According to the Circular LITL No. 164/2 of 28 January 2011, the OECD arm's-length principle should be applied to determine the compensation of Luxembourg companies that are principally engaged in financial on-lending transactions. The remuneration of the Luxembourg company should be determined based on the functions performed, assets employed, and risks assumed. A written clearance (i.e. unilateral advance pricing arrangement [APA]) from the Luxembourg tax authorities on the set of criteria for the determination of the transfer pricing for the financial on-lending transactions can be obtained, provided that the Luxembourg company meets certain substance and equity at risk requirements. In respect of the equity at risk requirement, the Luxembourg company must be at risk for an amount equal to, at least, the lower of (i) 1% of the nominal value of the loan intermediated or (ii) EUR 2 million. In addition, the arm's-length remuneration has to be documented by way of a transfer pricing analysis.

For all other intra-group transactions, Luxembourg generally applies the OECD guidelines.

Documentation

As far as transfer pricing documentation is concerned, new Section 3 of Paragraph 171 of the General Tax Law of 22 May 1931 (*Abgabenordnung*) clarifies that taxpayers are required to:

- disclose their transactions with related parties and
- document their compliance with the arm's-length principle.

No specific guidelines are provided on the nature and extent of the documentation required, which should depend on the circumstances of the case under consideration. In practice, the OECD transfer pricing guidelines should be applied.

Although Action 13 of the OECD/G20 base erosion and profit shifting (BEPS) initiative has not yet been formally implemented in local law, it would be reasonable to expect such to happen.

Burden of proof, statute of limitation, and penalties

In terms of the burden of proof, taxpayers are required to provide the Luxembourg tax authorities with the documentation to demonstrate the application of the arm's-length principle. In the absence of such documentation, the Luxembourg tax authorities can challenge the correct application of the arm's-length principle and, without giving precise explanations, presume a reduction of the taxable income and apply corrections.

Luxembourg

In effect, this would result in an ultimate reversal of the burden of proof towards the taxpayer.

The statute of limitations is generally five years from the end of the year in which the tax liability arises. This period may be extended if a deferred payment is granted. In case of tax evasion or fraud, as well as in case of incomplete tax returns, the statute of limitations can be extended up to ten years.

There are no specific penalties in relation to transfer pricing in Luxembourg, but the penalty regime under the CIT will be applicable.

Advance pricing arrangement (APA)

Taxpayers can file unilateral and bi- or multi-lateral APAs with the Luxembourg tax authorities. An administrative fee in the amount of EUR 10,000 is due to the Luxembourg tax authorities for the filing of the APAs under the new Paragraph 29a of the above-mentioned General Tax Law of 22 May 1931.

Thin capitalisation

No thin capitalisation ratio is specifically provided by the Luxembourg tax law.

In practice, the tax authorities apply an 85:15 debt-to-equity ratio for the intra-group financing of participations. Should the 85:15 ratio not be complied with by the taxpayer, the surplus of interest can be re-qualified by the tax authorities as a hidden distribution of profits that would be non-deductible and potentially subject to a 15% WHT.

Controlled foreign companies (CFCs)

Luxembourg tax law does not provide for CFC rules.

Tax credits and incentives

Foreign tax credit

See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Inbound and capital investment incentives

Luxembourg tax law provides for various incentives, with specific requirements, in the areas of risk capital, audiovisual activities, environmental protection, R&D, professional training, and recruitment of unemployed persons.

The most commonly used incentives are the investment tax credits. Luxembourg tax law provides for two types of investment tax credits.

First, a tax credit is available that amounts to 12% of the increase in investments in tangible depreciable assets made during the tax year. The increase in investment over a given tax year is computed as the difference between the current value of all qualifying assets and the reference value allocated to the same type of assets.

Independently, the company may benefit from a 7% tax credit on the first EUR 150,000 of qualifying new investments and a 2% tax credit on the amount of new investments exceeding EUR 150,000 in tangible depreciable assets as well as investments in sanitary and central heating installation in hotel buildings and investments in buildings used for social activities. The above 7% and 2% rates are increased to 8% and 4% for investments eligible for special depreciation (i.e. investments favouring the protection of the environment, the realisation of energy savings, or the creation of employment for handicapped workers). However, certain investments are excluded from the credit calculation, including investments in real property, intangible assets, and vehicles (unless specifically allowed by the law).

Domestic law requires that investments be physically operated in Luxembourg in order to be eligible for the incentive, unless the investment consists of shipping vessels operating in international waters. In addition, the tax benefit of the tax credit is limited to investments that are made within a Luxembourg business establishment and that are intended to be used permanently in Luxembourg.

Further to the CJEU decision dated 22 December 2010 (Tankreederei, C-287/10), the Luxembourg Tax Authorities issued a Circular letter confirming that the investment tax credit must be granted to any investment used within the EU and EEA member states.

Intellectual property (IP) regime

The existing Luxembourg IP regime (article 50 bis of the LITL) allows a tax exemption on 80% of the net income and capital gains derived or deemed to be derived from a wide variety of IP. The regime will begin to phase out on 1 July 2016, in line with the recommendations of the EU's Code of Conduct for Business Taxation Group and the OECD/G20 BEPS Project Final Report on Countering Harmful Tax Practices.

The existing IP regime will be repealed effective 1 July 2016 for CIT and municipal business tax purposes and 1 January 2017 for NWT purposes.

Taxpayers owning IP assets that currently benefit from the existing IP regime will continue benefitting during the transitional period through 30 June 2021.

IP assets acquired after 1 January 2016 also may benefit from the existing IP regime through 30 June 2021, provided that:

- they were developed or acquired from unrelated parties before 1 July 2016, or
- they were acquired from a related party before 1 July 2016 (including through a tax-neutral transaction) and were already eligible for the existing IP regime or benefited from a foreign country's IP regime that was similar to the existing IP regime in Luxembourg before the acquisition.

IP assets acquired from any related party between 31 December 2015 and 30 June 2016 that did not benefit from an IP regime before being acquired will only be eligible for the existing IP regime through 31 December 2016.

IP assets acquired or developed after 30 June 2016 cannot benefit from the existing IP regime. Those assets and related income and expenses will be subject to the standard tax regime and rates or may benefit from a future IP regime that could be based on the 'nexus' approach prescribed by the EU Code of Conduct Group and the OECD to counter harmful tax practices.

R&D incentives

Luxembourg entities involved in innovative and R&D activities can benefit from financial support in addition to the specific IP tax regime and general tax incentives.

Innovation loans may be granted by the *Société Nationale de Crédit et d'Investissement* and may carry a fixed interest rate lower than the market rate. Financial support may also be granted in the form of cash grants or interest subsidies.

R&D projects or programmes receive financial support up to a maximum eligibility (percentage of costs eligible for the incentives) depending on the size of the beneficiary (private research companies or organisations) as follows:

- Large (25% to 100% depending on the investment).
- Mid-size (35% to 100%).
- Small (45% to 100%).

Luxembourg

These incentives are available for:

- experimental development
- experimental development and cooperation
- industrial research
- industrial research and cooperation, or
- fundamental research.

Innovation in process and organisation and investment in innovation pools can benefit from financial support of between 15% and 35% (50% for public research companies).

Promotion and development of innovation pools can benefit from financial support of up to 50% for private organisations or 75% for public research companies.

Research regarding technical feasibility can benefit from financial support of up to 40% or 50% if prior to experimental development and up to 65% or 75% if prior to experimental research.

Other incentives by entity

Investment funds

Investment funds resident in Luxembourg generally are exempt from CIT, municipal business tax, and WHT on dividends. These investment funds are subject to the previously described subscription tax and to the general registration duty regime.

Financial participation company (Soparfi)

A Soparfi (*Société de Participation Financière*) is neither a specific type of company nor a special tax regime. It is rather a name used to refer to resident companies that hold and manage the shareholdings of subsidiaries. As any Luxembourg resident company, a Soparfi is subject to CIT, municipal business tax, and NWT; it benefits from Luxembourg's DTTs, EU Directives (e.g. Parent Subsidiary Directive), the domestic participation exemption on dividends received, and capital gains on qualifying participations.

Private wealth management company (Société de gestion du Patrimoine Familial or SPF)

The SPF has been tailored to enter the private sphere of individuals for the purpose of wealth management. Its corporate objective is restricted to the acquisition, holding, management, and disposal of financial assets, to the exclusion of any commercial activity. As a general rule, an SPF is exempt from Luxembourg taxation on income and NWT in Luxembourg. A yearly subscription tax of 0.25% is due on the basis of paid-up capital, share premium, and excessive debts. Subscription tax, however, is capped at EUR 125,000. No WHT applies on dividends distributed by an SPF. Non-resident investors are not taxed in Luxembourg on dividends paid by an SPF or on capital gains realised on shares in an SPF.

Securitisation companies (SCs)

An SC is a company that carries out securitisation activities or participates in securitisation transactions. SCs are subject to normal corporate taxation based on their net accounting profit (i.e. gross accounting profits minus expenses). However, the commitment to remunerate the holders of securities (both capital and debt) issued by the SC qualifies as interest on debt even if paid as return on equity. SCs are not subject to NWT in Luxembourg.

Venture capital vehicle (Société d'Investissement en Capital à Risques or SICAR)

The SICAR is an entity mainly used for private equity investments. Incorporated under a corporate form, the SICAR is subject to income tax at the normal rate with the benefit of an exemption on income and gains (e.g. dividends, capital gains, liquidation proceeds,

interest) from transferable securities qualifying as investments in risk capital as well as income arising from investments in liquid assets pending their investment in risk capital for a maximum of 12 months. In addition, it can benefit from the European directives and DTTs. SICARs are exempt from NWT. Under the form of a limited partnership, the SICAR is treated as a tax transparent entity, and investors are taxed according to the rules of their country of residence. SICARs treated as tax transparent entities do not benefit from the European directives and DTTs. The SICAR mainly targets qualified or informed investors (i.e. 'professional' investors).

Financial services companies

Banks, securities depositaries, insurance and reinsurance companies, as well as other financial service companies, may benefit from specific regulations when establishing their taxable basis for CIT (e.g. provision for the neutralisation of unrealised exchange gains, general banking risk provision, provision for guarantee of deposits, mathematical reserves, and/or catastrophe reserves).

Shipping companies

Luxembourg-resident shipping companies are not subject to municipal business tax and can benefit from investment tax credits and accelerated depreciation (even for used assets).

Withholding taxes

Dividends paid by a Luxembourg fully taxable company to its 'corporate' shareholders resident in a treaty country, which hold or commit themselves to hold a participation of at least 10% in the Luxembourg company (or shares with an acquisition price of at least EUR 1.2 million) for an uninterrupted period of at least 12 months, may be exempt from WHT (see Note 1 below for more details).

The following taxes are withheld on payments made. The WHT due on dividends paid to residents of a treaty country cannot exceed the non-treaty rate.

Notes

These notes are not extensive. The full text of the DTT should be checked for a comprehensive view on the conditions of application of reduced rates.

1. Under Luxembourg domestic law, no WHT is levied on dividends paid by a Luxembourg qualifying subsidiary to an entity that is:
 - a. a collective entity falling within the scope of the Parent Subsidiary Directive
 - b. a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the LITL
 - c. a PE of a collective entity falling under the previous categories
 - d. a collective entity that is resident in a country with which Luxembourg has concluded a DTT and is fully liable to a tax corresponding to the Luxembourg CIT, or a domestic PE of such an entity
 - e. a Swiss resident joint-stock company that is subject to Swiss CIT without benefiting from any exemption
 - f. a joint-stock company or a cooperative company that is resident in an EEA member state (other than an EU member state) and is fully liable to a tax corresponding to the Luxembourg CIT, or
 - g. a PE of a joint-stock company or of a cooperative company that is resident in an EEA member state (other than an EU member state), and
 - h. at the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly, for an uninterrupted period of at least 12 months, a participation of at least 10%, or with an acquisition price of at least EUR 1.2 million in the share capital of the income debtor.

Qualifying shareholders under (b) to (g) above need to be fully taxable collective entities subject in their country of residence to a tax similar to that imposed by Luxembourg. As a general rule, this requirement is met if the foreign tax is compulsorily levied at an effective rate of at least 10.5%, on a basis similar to the Luxembourg one.

2. Interest paid to non-residents generally is not subject to WHT in Luxembourg. However, interest that represents a right to profit participation on a bond may be assimilated to a dividend and subject to WHT. Further analysis should be made to determine the applicable reduced rate on the basis of the treaty (i.e. pursuant to dividend or interest clause).
3. Royalties paid to non-residents are not subject to WHT in Luxembourg, whether the companies are associated or not.
4. A WHT of 10% is withheld on defined interest income paid by a Luxembourg paying agent to resident individuals. Interest indirectly cashed through investment funds are out of the scope of this WHT.
5. DTTs have been concluded with Albania, Andorra, Botswana, Brunei, Croatia, Cyprus, Kuwait, Kyrgyzstan, Oman, Serbia, Ukraine, and Uruguay, but are not yet in force. New DTTs with Czech Republic, and Hungary were signed, but domestic transposition procedures are still pending.
6. The recipient company (other than a partnership, as the case may be) holds at least 10% of the Luxembourg company's capital.
7. The recipient company (other than a partnership, as the case may be) holds at least 25% of the Luxembourg company's capital.
8. The recipient company directly or indirectly owns at least 30% of the Luxembourg company's capital and with an investment equivalent to at least 300,000 United States dollars (USD).
9. The beneficiary of the dividends is a company (other than a partnership, as the case may be) that has directly held a participation of at least 10% of the distributing company's capital for an uninterrupted period of at least 12 months preceding the decision to distribute the dividend.
10. The recipient is a company (with the exception of general partnerships, limited partnerships, and cooperative societies) whose direct participation, held since the beginning of its financial year, in the capital of the company (with the exception of general partnerships, limited partnerships, and cooperative societies) paying the dividends is at least 25% or has an acquisition price of at least 250 million francs. The provisions of paragraph 1 (a) shall also apply where the dividends are paid to two or more companies (with the exception of general partnerships, limited partnerships, and co-operative

Luxembourg

societies) the sum of whose participations, held since the beginning of their respective financial years, in the capital of the company (with the exception of general partnerships, limited partnerships, and co-operative societies) paying the dividends is at least 25% or has an acquisition price of at least 250 million francs and where one of the recipient companies owns more than 50% of the registered capital of each of the other recipient companies.

11. The beneficiary of the dividends is a company (other than a partnership, as the case may be) that has held a participation of at least 10% in the distributing company's capital for an uninterrupted period of at least 12 months.
12. The rate of WHT is 5% if the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 100,000, or the equivalent in Georgian currency. No WHT is levied when the beneficiary company directly or indirectly owns at least 50% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 2 million, or the equivalent in Georgian currency.
13. No WHT is levied if the recipient company (other than a partnership) holds at least 10% of the Luxembourg company's capital or a participation with an acquisition price of at least EUR 1.2 million.
14. The recipient company holds at least 25% of the Luxembourg company's voting shares during the period of six months immediately before the end of the accounting period in which the distribution of profits takes place.
15. The recipient company (other than a partnership) holds at least 15% of the Luxembourg company's capital.
16. No WHT is levied when the beneficiary of the dividend is a company (other than a partnership) that has directly held a participation of at least 10% (or with an acquisition price of at least EUR 1.2 million) of the distributing company's share capital for an uninterrupted period of at least 12 months. The rate of 5% of WHT applies if said participation has been held for less than 12 months.
17. The recipient company (other than a partnership) holds at least 20% of the Luxembourg company's capital.
18. The beneficiary of the dividends is a company (other than a partnership) that has directly held a participation of at least 10% of the distributing company's capital for an uninterrupted period of at least 24 months (for Poland) / at least 12 months (for Sweden) preceding the payment date of the dividend.
19. The recipient company holds at least 10% of the Luxembourg company's capital and made an investment in the capital of the paying company of more than EUR 80,000, or the equivalent in roubles.
20. The recipient company (other than a partnership) holds at least 25% of the Luxembourg company's capital for an uninterrupted period of at least one year preceding the payment date of the dividend.
21. The 5% WHT applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the Luxembourg company's capital. No WHT is levied if the beneficial owner is a company that is a resident of the other contracting state and that directly holds, for an uninterrupted period of two years, at least 10% of the capital of the company paying the dividends, or if the beneficial owner is a pension fund.
22. A 5% WHT is levied on dividend distributions where the beneficial owner is a company that holds at least 10% of the voting power of the paying company. No WHT is levied when the US company has directly held, during an uninterrupted period of two years preceding the payment date of the dividend, at least 25% of the voting rights of the paying company and certain conditions regarding the nature of activities performed by the distributing company are met.
23. The rate of 5% of WHT applies where the recipient company directly or indirectly owns at least 50% of the share capital of the paying company or has contributed more than USD 10 million, or the equivalent in Luxembourg or in Vietnamese currency, in the capital of the company paying the dividends. The rate of 10% of WHT applies where the beneficial owner is a company that directly or indirectly holds at least 25% but less than 50% of the capital of the company paying the dividends and has contributed not more than USD 10 million, or the equivalent in Luxembourg or Vietnamese currency, in the capital of the company paying the dividends.
24. The 15% WHT applies if the beneficial owner is a collective investment vehicle treated as a body corporate in Taiwan. The 10% WHT applies in all other cases.
25. The 0% WHT applies if the beneficial owner is a company that directly holds at least 10% of the Luxembourg company's capital.

Tax administration

Taxable period

The taxable period for Luxembourg fully taxable resident entities follows the financial year (i.e. accounting year) of the company.

Companies generally use the calendar year for accounting purposes but may apply a different accounting year. The taxable period would, in such cases, correspond to this different accounting year. The tax year is the year in which the accounting year ends.

Tax returns

Companies must file their tax returns by 31 May of each year following the calendar year during which the income was earned.

Assessments are issued after the end of the tax year and normally can be finalised within five years, although the delay may extend to ten years if the declaration is found to be incomplete or inexact, with or without the intention of fraud. Once issued, the tax assessment notice is, in principle, final (unless new facts come to light).

Tax assessments are issued by the tax authorities immediately upon receipt of the tax return, based on the taxable profit reported by the company. The tax authorities may then reassess or request more information on the return within the period of five years that follows the receipt of the tax return.

Luxembourg companies are free to choose the currency in which they wish to prepare their commercial accounts to the extent that it is freely tradable currency. Luxembourg companies that expect to conduct most of their business in a currency other than euros will therefore generally opt to use that 'foreign' functional currency to draw up their financial statements. In particular, this will save such companies from having to recognise, for accounting purposes, foreign exchange gains and losses that do not reflect the economic reality of their business.

Nevertheless, as a general rule, Luxembourg taxpayers in such a situation have until now been required to file their tax returns in euros, basing these returns on euro-denominated tax balance sheets. Luxembourg taxpayers are allowed, upon request, to determine their taxable basis solely in a 'foreign' functional currency, and then only having to convert the final basis figure into euros. This has averted the need to establish a euro-denominated tax balance sheet simply for tax filing purposes.

Circular L.G.-A n°60 formalises this well-established practice and provides a clear framework.

L

Payment of tax

Quarterly tax advances must be paid. These payments are fixed by the tax administration on the basis of the tax assessed for the preceding year or on the basis of the estimate for the first year. This estimate is given by the company pursuant to the request of the Luxembourg tax authorities.

Final payment of CIT must be paid by the end of the month that follows the month of reception by the company of its tax assessment.

Topics of focus for tax authorities

Further to the introduction of a comprehensive legal framework in this respect, Luxembourg tax authorities focus increasingly on transfer pricing matters, and the methods used to determine the arm's-length remuneration of Luxembourg-based companies are being closely assessed by the Luxembourg tax authorities.

Other issues

Implementation of the Foreign Account Tax Compliance Act (FATCA)

FATCA is a set of information reporting rules designed to prevent and detect tax evasion by United States (US) persons. It reflects and promotes a global trend towards greater tax transparency and increased worldwide efforts to combat tax fraud in many sectors of the financial world. It also builds the basis for other international developments in this respect, such as the Common Reporting Standard (CRS) initiated by the OECD.

Even though FATCA originated in the United States, it also affects non-US entities. In general, FATCA imposes a 30% WHT on US-source income for payments made to non-compliant foreign entities.

Luxembourg

Luxembourg signed an Intergovernmental Agreement (IGA) Model 1 with the United States on 28 March 2014 under the terms of which FATCA will be applied in Luxembourg. The IGA was ratified on 24 July 2015 by the Luxembourg parliament.

Based on the IGA, Luxembourg financial institutions (i.e. depositary and custodian institutions, certain insurance companies, and investment entities that do not benefit from an exemption) have to comply with some due diligence and registration duties. In addition, they will have to report on FATCA to the Luxembourg tax authorities by 30 June 2016 (with respect to financial accounts existing in 2015) even though they do not have any US reportable accounts (in this case, a nil report is required). The Luxembourg tax authorities will then automatically exchange this information with the US Internal Revenue Service (IRS) by 30 September 2016. This reporting will be repeated annually.

Apart from Luxembourg banks, insurance companies, or funds, other entities that fall within the definition of investment entities (certain holding companies, securitisation vehicles, etc.) might be subject to full FATCA obligations despite the fact that they have neither US investments nor US investors. If the entity being an in-scope financial institution does not comply with its FATCA obligations as implemented under Luxembourg law, it risks being subject to local penalties in addition to the 30% WHT risk mentioned above.

It is worth noting that the IGA provides in its Annex II some deemed-compliant categories (e.g. Collective Investment Vehicle, Sponsored Investment Entity, Investment Advisors and Investment Managers) under which Luxembourg financial institutions, should they qualify for one of these categories, would be subject to lighter FATCA obligations.

Implementation of the Common Reporting Standard (CRS)

On 21 July 2014, the OECD released the Standard for Automatic Exchange of Financial Account Information in Tax Matters, including the Commentary on the CRS. CRS seeks to establish the automatic exchange of tax information as the new global standard. The automatic exchange of information involves the systematic and periodic transmission of extensive taxpayer information from the country in which a taxpayer's financial accounts are located to that taxpayer's country of residence.

Similar to the provisions of FATCA and the various IGAs between the US government and partner governments around the world, CRS imposes obligations on financial institutions (FIs), including some holdings companies, across the financial services market to review and collect information in an effort to identify an account holder's country of residence and then, in turn, to provide certain specified account information to that home country's tax administration.

The CRS has been incorporated in the amended Directive on Administrative Cooperation (DAC 2) officially adopted by the European Council on 9 December 2015. On 24 December 2015, the Luxembourg CRS law of 18 December 2015 was published, enacting the CRS into Luxembourg law with an entry into force as from 1 January 2016. Therefore, Luxembourg FIs will have, as of this date, to on-board new clients/investors according to specific procedures. In addition, they will have to review the CRS status of their pre-existing clients/investors no later than 31 December 2017 (and even 31 December 2016 for some clients/investors).

Based on the result of those on-boarding and due diligence procedures, the Luxembourg FIs will have to file their first CRS report to the Luxembourg tax authorities by 30 June 2017 (with respect to Financial Accounts maintained in 2016).

Tax authorities of EU member states will have to first report between themselves under the DAC 2 no later than the end of September 2017, as they will do with other OECD 'early adopter' countries.

Significant developments

Tax incentives for the tax year 2016

On 17 December 2015, the Legislative Assembly approved certain tax incentives proposed by the Chief Executive of Macau in the Budget for the financial year 2016. The key tax incentives include the following:

- The tax-free income threshold for complementary (corporate) tax has been increased from 32,000 Macanese patacas (MOP) to MOP 600,000 for income derived in the tax year 2015. Taxable income over MOP 600,000 is taxed at 12%.
- The standard MOP 3,500 reduction in property tax liabilities will continue to be available in the tax year 2016 for both self-use and rental properties. This incentive does not apply to corporate and Macau non-residents.
- Restaurants will continue to be exempt from tourism tax in the tax year 2016.
- Insurance policies written or renewed in the tax year 2016 and banking transactions in the tax year 2016 will continue to be exempt from stamp duty.
- Admission tickets for performances, exhibitions, and entertainment programs will continue to be exempt from stamp duty in the tax year 2016.
- Commercial and industrial operations will continue to be exempt from the annual industrial tax in the tax year 2016.

M

Taxes on corporate income

Complementary tax is imposed on the worldwide income earned by Macau-registered entities, irrespective of where their residence or headquarters are situated and irrespective of the nature of the income. The exception to the foregoing is rental income from leasing of immovable properties located in Macau, which is taxed separately under the property tax regime.

Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

According to the Macau Complementary Tax Law, complementary tax is imposed on a progressive rate scale ranging from 3% to 9% for taxable profits below or equal to MOP 300,000 and 12% for taxable profits over MOP 300,000. Taxable profits below MOP 32,000 are exempt from tax.

According to the Budget for the financial year 2016 approved by the Legislative Assembly (2016 Budget), the tax-free income threshold for complementary tax has been increased from MOP 32,000 to MOP 600,000 for income derived in the tax year 2015 (taxable income in excess of MOP 600,000 is taxed at 12%). The changes in the tax-free income threshold and the tax brackets are subject to approval by the Legislative Assembly on an annual basis, unless such amendments are written into the relevant tax laws.

Macau

Types of taxpayers and associated tax bases

Group A taxpayers

Taxpayer entities whose registered capital reached MOP 1 million, or whose average taxable profits reached MOP 500,000 per year in three consecutive years, will automatically become Group A taxpayers in the tax year following the year in which the relevant notification is issued by the Macau Finance Bureau (MFB). A taxpayer entity can also elect to become a Group A taxpayer by filing a Group A declaration form. Profits of Group A taxpayers are assessed based on the actual accounting income after making necessary tax adjustments.

Group B taxpayers

Group B taxpayers refer to any individual or any other form of companies not mentioned above and those taxpayers that do not keep detailed accounting records. Profits of Group B taxpayers are assessed on a deemed basis if the reported income is below the internal parameters set by the MFB for taxpayers in similar industries.

Corporate residence

Corporate residence is generally determined by reference to the place of establishment.

Permanent establishment (PE)

There is no specific definition of PE in the Macau Complementary Tax Law. Technically speaking, there are two major criteria for determining whether a foreign entity should be subject to complementary tax, and the key phrases are 'engaging in commercial/ industrial activities' and/or 'rendering services in Macau'. These phrases are also not defined. Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

Other taxes

Value-added tax (VAT)

There is no VAT regime in Macau.

Customs duties/import tariffs

Apart from consumption tax imposed on tobacco and spirits entering into Macau, there are no customs duties/import tariffs in Macau.

Consumption tax (excise duty)

Consumption tax is imposed only on tobacco and spirits entering into Macau.

There are two methods for determining the amount of consumption tax payable, by quantity or by value. The former method of assessment is based on the weight or volume of goods and the latter is based on the price of the goods imported into Macau. The rate of consumption tax varies depending on the classification of the imported goods.

Property tax

Property tax is imposed annually on the owner of buildings situated in Macau. This is first payable after acquiring a property or upon the expiry of the property tax exemption period, if applicable. Different exemption periods are granted, depending on the location of the property. Additional exemption periods may apply in special cases.

For leased properties, property tax is charged at 10% on the actual rental income, and by application, a maximum deduction based on 10% of the rental income derived to cover repair and maintenance expenses incurred will be granted, if approved by the MFB.

For self-use properties, property tax is charged at 6% on the official ratable value as established by the appointed committee of the MFB. A deduction of 10% of the official ratable value to cover repair and maintenance expenses will be automatically granted for self-use property. If the property is not occupied, the owner can apply for an exemption from property tax, the approval of which is entirely at the discretion of the MFB.

According to the 2016 Budget, there is a standard MOP 3,500 reduction in the property tax liabilities assessed in the tax year 2016 for both self-used and rental properties. This incentive does not apply to corporate and Macau non-residents.

Stamp duty

Stamp duty is payable on certain types of documents and stampable transactions at a small fixed amount or at rates ranging from 0.1% to 10% on the value represented by the documents and transactions.

The charge to stamp duty has been extended to property transfers and the irrevocable transfer of certain assets. Stamp duty at progressive rates ranging from 1% to 3% is payable on transfer of immovable property with a surcharge of 5% on the duty payable, resulting in effective stamp duty rates of 1.05% to 3.15%. The irrevocable transfer of certain assets without consideration is subject to a 5% stamp duty.

Insurance policies, written or renewed, and banking transactions have been exempt from stamp duty since 2005. This exemption has been approved by the Legislative Assembly and will continue to be available in the tax year 2016.

Admission tickets for performances, exhibitions, and any kind of entertainment programmes are exempt from stamp tax for the tax year 2016, as approved by the Legislative Assembly. This exemption, if extended, will be published by the Macau government on an annual basis.

M

Special Stamp Duty (SSD)

The transferor of a residential property, commercial property, office, car-parking space, or property under construction is subject to SSD at 20% on the value of the property if the property is resold within a year of its purchase. The SSD rate is reduced to 10% if the resale takes place between one and two years after the purchase. The SSD is also applicable to transfers of an 80% or more shareholding interest in a Macau company that has properties.

Buyer Stamp Duty (BSD)

A company, an entrepreneur, or a non-Macau resident acquiring a residential property in Macau is subject to BSD at a flat rate of 10%, on top of the existing Stamp Duty and SSD, if applicable.

Professional (Salaries) Tax

Professional Tax is payable by anyone receiving income from employment services performed in Macau or from a Macau employment. In Macau, the Professional Tax reporting, withholding, and remittance obligations rest with the employer.

Payroll taxes

There is a pay-as-you-earn (PAYE) system, similar to those used in other countries, which is applicable to salaried individuals only. The employing entity is obligated to report and collect the amount of professional tax payable from its employees each month and remit such payments to the MFB before the 15th day of the month following the quarter-end for local resident employees and foreign employees with valid work visas.

Macau

Social security fund contribution

Social security fund contribution in the total amount of MOP 45 per month is payable for resident employees. The employer contributes two-thirds of the amount (i.e. MOP 30) and the employee contributes one-third of the amount (i.e. MOP 15).

Annual industrial tax

The annual industrial tax has been exempted for the tax year 2016 and has been exempted on an annual basis by the Macau government since 2002.

Under the Industrial Tax Code, all commercial or industrial operations carried out in Macau are subject to industrial tax at the beginning of each year. The amount of the tax is dependent upon the nature of the business. The table below is an illustration of the tax amounts applicable to certain types of businesses in Macau.

Type of business	Tax (MOP)
Commercial banks	80,000
Construction companies	500
Hotels	500
Insurance companies	500
Textile companies	500

Special gaming tax

Special gaming tax is levied at 35% on the gross gaming revenue derived by gaming concessionaires authorised to carry on the operation of games of chance in Macau under Law 16/2001.

Tourism tax

Tourism tax is imposed at the rate of 5% on bills of services, excluding telecommunication and laundry services, and service charges of up to 10% rendered in Macau by establishments such as hotels, guest houses, dancing halls, night clubs, massage/sauna parlours, gymnasiums, karaoke, and the like. Such tax is generally borne by consumers.

Restaurants are exempt from tourism tax in the tax year 2016 and have been exempt, via an exemption published on an annual basis by the Macau government, since 2002.

Motor vehicle tax

Motor vehicle tax is imposed on the sale of new motor vehicles to consumers and the importation of new motor vehicles for self-use. Exemptions are available to certain persons and organisations and for certain specific usages. Generally, motor vehicle tax is levied based on the listed selling prices as registered with the MFB. The rate of motor vehicle tax varies depending on the type of motor vehicle and its value.

Land rent

Land rent is payable by lessees of leasehold land in Macau on an annual basis according to the amount specified in the relevant lease contract.

According to the 2016 Budget, land rent below MOP 100 shall not be collected by the MFB in the tax year 2016. However, any such amount already collected shall not be refunded.

Branch income

Branch income is subject to tax at the same rate as that for corporations. The taxable income is ascertained based on branch accounts.

Income determination

The paragraphs below describe the tax acceptable treatments under the prevailing Complementary Tax Law and are for reference only.

Inventory valuation

Inventory should be stated at actual cost, and conformity between book and tax reporting is required. Market selling price or replacement cost is allowed only in special circumstances, and prior approval of the Director of the MFB is required for adoption of such inventory valuation methods. The write-down of inventory values is not permitted.

Capital gains

Gains or losses from the realisation of capital assets of a corporate taxpayer are treated as current revenue or expense items for complementary tax purposes.

Dividend income

Dividends from all sources are subject to complementary tax in the hands of a recipient incorporated in Macau unless the dividends were paid out of profits that have been taxed at the corporate level in Macau. Where dividends to shareholders are paid out of profits of a Macau entity that have not been taxed in Macau, complementary tax will technically be charged on the dividend distribution to the shareholders.

Interest income

Interest income received by or accrued to a corporate taxpayer in Macau is subject to complementary tax.

Foreign income

Companies incorporated in Macau are subject to complementary tax on worldwide income, wherever received or credited. There are no provisions in the Macau Complementary Tax Law that allow foreign income to be deferred for tax purposes. Currently, double taxation relief is available under the respective double taxation agreements (DTAs) that Macau has with Cabo Verde, the People's Republic of China, Mozambique, and Portugal.

M

Deductions

Please note that the assessor is empowered to disallow any business expenses (e.g. entertainment, travelling) where the amount incurred is considered to be excessive.

Depreciation

An initial allowance of 20% is granted on buildings. The rates of tax depreciation are detailed in Decree-Law No.4/90/M, dated 5 March 1990. The Decree-Law prescribes the maximum annual tax depreciation rates and the number of years of asset life for different asset classes under the straight-line method. For illustration, the maximum depreciation rates and the maximum useful life currently applicable to the general types of assets are set out below:

Assets	Maximum annual percentage rate (%)	Maximum number of years
Industrial buildings	4	50
Office and residential buildings	2	100
Machinery and installations, air conditioning, elevators, equipment	10 to 20	20 to 10
Tools	20 to 33.3	10 to 6

Macau

Assets	Maximum annual percentage rate (%)	Maximum number of years
Laboratory, telex and interior telephone equipment, furniture, filing systems, typewriters, and accounting machines	16.66 to 25	12 to 8
Computer hardware	25	8
Office installations	14.29	14
Trucks	14.29	14
Automobiles	20	10
Intangible assets, pre-operating expenses incurred prior to commencement of business	33.33	6
Deferred expenses arising in connection with increases in share capital, changes in form of business enterprises, issuance of debentures, marketing and other studies, and financial expenses incurred for the acquisition or own production of fixed assets prior to completion	33.33	6
Patents	10	20
Manufacturing licences, concessionary agreements, and similar rights	*	*
Trademark	*	*

* At the discretion of the authorities.

In the case of commercial and industrial buildings, depreciation is not allowed for the value attributable to the cost of the freehold land. Where the value of the freehold land cannot be determined from the total cost of land and buildings, a portion equal to 20% is deemed to be attributable to the land value for the purpose of determining the value of buildings to be depreciated.

Depreciation can be claimed either on a prorated basis in accordance with the prescribed annual rates for assets that are not acquired at the beginning of the financial year or on an annual basis.

The cost of repairs and maintenance exceeding 10% of the acquisition cost of the asset in a given year is deemed to be an expense of a capital nature and should be capitalised and depreciated over the remaining life of the asset.

Goodwill

Cost of acquisition of goodwill/amortisation of goodwill is generally deductible to the extent it is incurred in the generation of assessable profits.

Interest expenses

There is no thin capitalisation rule in Macau. However, the MFB may assess the reasonableness of the interest rate charged for interest expense paid to related parties.

Bad debts

The amount provided against doubtful trade receivables is an allowable tax deduction, but the provision cannot exceed 2% of the total receivables, except in the case of banks, where the minimum provisions required under the local banking regulations are fully tax-deductible.

Debts considered uncollectible may be written off only when adequate proof can be shown, usually by way of bankruptcy court proceedings.

Charitable contributions

A deduction of up to 0.2% of the company's turnover is allowable for donations to charitable organisations recognised by the tax authority.

Pension expenses

The employer's contribution to the staff provident fund legally registered in Macau is fully tax-deductible, up to 15% of the employees' basic salary.

Fine and penalties

Tax fines are not deductible.

Taxes

Taxes, except for complementary tax and taxes paid on corporate profits, are generally deductible to the extent they are incurred in the generation of assessable profits.

Other significant items

- An amount provided against stock obsolescence of up to 3% of the total stock value at year-end is allowed as a tax deduction.
- Losses arising from insurable risks are not allowable as a tax deduction.
- Staff social welfare expenses paid for the benefit of employees, for example canteens and libraries, are fully tax-deductible.

Net operating losses

Agreed tax losses can be carried forward for three consecutive years for Group A taxpayers. Group B taxpayers are not allowed to carry their tax losses forward to future years. Tax losses cannot be carried back in Macau.

Payments to foreign affiliates

The regulations make no specific mention of royalties and service fees paid to foreign affiliates. The MFB generally monitors the deductibility of such payments. Payments to foreign service providers for consulting services or construction-related services are not deductible if such consulting contracts are not properly registered in Macau.

M

Group taxation

There is no provision for group taxation in Macau.

Transfer pricing

There is no transfer pricing provision in the Macau tax regime.

Thin capitalisation

There is no thin capitalisation provision in the Macau tax regime.

Controlled foreign companies (CFCs)

There are no CFC rules in the Macau tax regime.

Tax credits and incentives**Foreign tax credit**

There is no foreign tax credit provision in the Macau Complementary Tax Law. Foreign tax credit is only available under the relevant provisions of the comprehensive tax arrangements/agreements that Macau has entered into with the People's Republic of China, Portugal, Mozambique, and Cabo Verde, respectively.

Capital investment incentives

A 50% reduction in complementary tax and stamp duty on certain transactions, as well as exemptions from annual industrial tax (currently exempt for all taxpayers) and property tax (up to periods prescribed by the MFB), are allowable for taxpayers in the manufacturing industry (as defined in the Decree-Law) whose capital investment

Macau

is aimed at the introduction of new products or high technology, improvement of productivity, and increase in exports of goods to new markets.

Where profits are retained in reserves and reinvested in installation of new equipment within the following three financial years, the reinvested reserves can be deducted from taxable profits, provided that the reinvested reserves are attributable to profits earned from normal business operations and the investment is considered to be beneficial for the economic development of Macau.

Offshore services business incentives

Profits derived by approved offshore institutions from prescribed offshore service-related activities are exempt from all forms of taxes, such as complementary tax, annual industrial tax (currently exempt for all taxpayers), and stamp duties.

Incentives for owners of touristic facilities

Additional incentives, such as an extended property tax exemption period, exemption from annual industrial tax (currently exempt for all taxpayers), reduction in stamp duty, as well as acceleration of depreciation for complementary tax purposes, are available to owners of facilities that qualify as touristic facilities.

Withholding taxes

Currently, there is no provision in the Macau Complementary Tax Law for the withholding of taxes from payments made by domestic corporations to overseas companies.

Tax administration

Taxable period

The Macau tax year is on a calendar-year basis.

Tax returns

Assessments are made by the MFB upon review of the tax returns, which must be lodged before 31 March or 30 June of each year for Group B or Group A taxpayers, respectively.

Payment of tax

A provisional tax payment calculated based on the declared taxable profit for a Group A taxpayer or final assessed profit for a Group B taxpayer is payable in two equal instalments, in September and November. However, if the amount is not greater than MOP 3,000, payment will be requested in one lump sum amount in September. For Group A taxpayers, a final tax assessment will be issued upon completion of the tax assessment by the MFB and additional tax payment, if any, will be due around a month's time after issuance.

Tax audit process

There is no specific tax audit cycle in Macau. The MFB is empowered by the Macau Complementary Tax Law to carry out a tax audit whenever the information provided by a taxpayer in its tax return is considered unclear or insufficient, and subsequent replies to the MFB's queries, if any, are considered inadequate.

Statute of limitations

The statute of limitations period is five assessment years from the relevant year of assessment for both Group A and Group B taxpayers.

Topics of focus for tax authorities

The MFB generally focuses on the deductibility of expenses (e.g. staff costs, provisions, depreciation, management fees, payments made to overseas service providers, bad debts, donations).

Other issues

Choice of business entity

A foreign company conducting business (except for short-term projects) in Macau is obligated to set up a legal establishment, which can be in the form of a company or a branch.

There are two types of Macau companies: companies limited by shares and companies limited by quotas. The capital and corporate governance requirements for a company limited by shares are higher than a company limited by quotas, and, in general, a company limited by quotas is used by investors that are not in regulated industries.

Exchange of information

Law 20/2009 is the legislation that governs the exchange of information by Macau with other tax jurisdictions within the scope of bilateral tax treaties or arrangements. Its objective is to promote the transparency of the Macau tax administration and to demonstrate Macau’s willingness to cooperate with treaty partners in combating tax avoidance or tax evasion activities.

The information to be exchanged under Law 20/2009 is strictly confined to information collected for tax purposes only, and includes the following:

- Information collected within the jurisdiction of the MFB.
- Information collected by the MFB from financial institutions that are governed by the Macau Financial System Act and offshore institutions that are governed by the Macau Offshore Law (the Institutions).

So far, Macau has concluded tax information exchange agreements (TIEAs) or DTAs that comply with the latest internationally agreed standards with 20 different tax jurisdictions. The following tables summarise the TIEAs and DTAs that Macau has signed, and the TIEAs and DTAs that are in negotiation:

TIEAs have been signed by Macau with the following countries:

- | | | |
|-----------------|------------|--|
| • Argentina | • Guernsey | • Norway |
| • Australia | • Iceland | • Sweden |
| • Denmark | • India | • United Kingdom of Great Britain and Northern Ireland |
| • Faroe Islands | • Jamaica | |
| • Finland | • Japan | |
| • Greenland | • Malta | |

TIEAs are in negotiation with the following countries:

- Germany
- Ireland
- New Zealand

DTAs have been signed by Macau with the following countries:

Treaty partners	Effective date
Belgium	Not yet effective

Macau

Treaty partners	Effective date
Cabo Verde	11 January 2011
The Mainland of China	1 January 2004 (Note that the first protocol and the second protocol became effective on 15 September 2010 and 8 October 2011, respectively)
Mozambique	11 January 2011
Portugal	1 January 1999

DTAs are in negotiation with the following jurisdictions:

- Hong Kong
- Vietnam

It is believed that more comprehensive DTAs or TIEAs will be signed between Macau and other tax jurisdictions in the near future to demonstrate Macau's willingness to continue to cooperate with the Organisation for Economic Co-operation and Development (OECD) countries in combating tax avoidance or evasion activities.

As the information of a Macau taxpayer is becoming more transparent under comprehensive DTAs or TIEAs, it is important for Macau companies with cross-border transactions to perform periodic tax health checks to ensure that tax planning arrangements, if any, that have been put in place in the past, remain technically defensible. As Macau offshore companies continue to be a focus of investigations for many tax jurisdictions, it is important to ensure that such companies have adequate commercial substance in Macau and the companies' transfer pricing policies are supported by appropriate transfer pricing documentation and transfer pricing studies.

Principle agreement to facilitate the implementation of the United States (US) Foreign Account Tax Compliance Act (FATCA)

In late 2014, Macau and the United States finished negotiation and reached in substance an intergovernmental agreement (IGA) that will facilitate compliance with the US FATCA. The formal IGA will be executed in due course. Under the IGA, financial institutions in Macau are required to register and conclude separate individual agreements with the US Internal Revenue Service (IRS). Under these agreements, these Macau institutions shall seek the consent of their account holders who are US taxpayers for reporting their account information to the US IRS annually. The consensus reached under the IGA demonstrated Macau's commitment to further enhance tax transparency in the international community.

Significant developments

There have been no significant corporate tax developments in Macedonia during the past year.

Taxes on corporate income

Generally, all resident and non-resident legal entities operating through a permanent establishment (PE) are liable to pay corporate income tax (CIT) in Macedonia.

Macedonian resident entities are taxed on their worldwide income. Non-resident entities are taxed on the profit realised through their PE in Macedonia. Non-business organisations (including governmental bodies) are taxed on income from their business activities (if any).

The CIT rate is 10%.

The tax base for CIT is the profit realised for the current year, as determined according to the accounting standards, adjusted for the amount of non-deductible expenses incurred during the fiscal year (FY).

Under the previous CIT legislation, there were two separate tax bases for CIT, which were subject to filing of two separate tax returns. In the period between FY 2009 and FY 2013, CIT was payable separately on non-deductible expenses (on an annual basis) and on financial profit (only if distributed). By means of the applicable CIT Law, the accumulated profit realised for the period FY 2009 to FY 2013 is subject to taxation at the moment of distribution. Taxpayers are obligated to cover the losses from previous years prior profit distribution.

CIT is not payable on received dividend income from domestic taxpayers, under condition that such income was taxed at the level of the payer.

Simplified tax regime for companies

Companies (except companies that provide banking, financial, and insurance services, as well as services in the field of games of chance and entertainment games) can choose to benefit from the simplified tax regime based on their overall annual income. Provided other criteria prescribed in the CIT Law are met, companies will qualify for the simplified tax regime if their overall annual income from all sources is between 3 million Macedonian denars (MKD) and MKD 6 million. These companies will pay 1% CIT on their overall income from all sources as stated in their income statement and financial statements for the respective calendar year.

Provided their overall annual income in the following three years is within the above range, companies under the simplified tax regime cannot request to be excluded from the simplified tax regime.

Macedonia

Under the simplified tax regime, exemption from CIT is available for companies with an overall annual income from all sources of up to MKD 3 million.

Local income taxes

There are no local government taxes levied on corporate income.

Corporate residence

A company is resident in Macedonia for tax purposes if it is established or maintains its headquarters in the territory of Macedonia. Foreign legal entities with headquarters abroad are non-residents for tax purposes, but their Macedonian branches are liable for tax on any profit generated in the territory of Macedonia if they are considered as a PE for the foreign legal entity in Macedonia.

Permanent establishment (PE)

Generally, a PE is a fixed place of business through which the business of an enterprise is wholly or partly carried on, either directly or through a dependent agent.

More specifically, the domestic law provides that a PE may include a place of management, a branch office, an office, a factory, a workshop, mining activities, or any other place of extraction of natural resources.

A building site or construction or installation project, as well as related supervision activities, may constitute a PE if it lasts longer than six months.

Furthermore, the provision of services, including consulting services with regard to one or several related projects, is deemed to give rise to a PE if such activities last longer than 90 continuous days within any 12-month period. If one or several persons establish a PE as per above, any other non-related project on which they are working on becomes part of the PE, irrespective of its duration.

The PE should be registered as a corporate taxpayer at the beginning of its activity in the country for the purposes of obtaining a tax number.

Other taxes

Value-added tax (VAT)

In general, the VAT regulations are in line with the provisions of the sixth European Union (EU) VAT directive.

The standard VAT rate is 18%. This rate applies to overall turnover and imports of goods and services. A lower rate of 5% applies to supplies of certain goods and services, such as supply of food for human consumption; food for livestock; drinking water from public supply systems; computers and software; agricultural material and equipment; baby products; school supplies (e.g. school backpacks, notebooks, pencils); pharmaceuticals and medical equipment; publications, such as books, pamphlets, newspapers, and other printed material, except for publications mainly used for advertising purposes; transport of passengers; and accommodation services, bed and breakfast services, as well as half-board and full-board services provided by hotelkeepers in the country, etc.

All taxpayers whose total annual turnover exceeds MKD 1 million or whose total supplies, as projected at the beginning of the business activity, will exceed this amount are liable to register for VAT purposes.

Residents that do not meet the criteria above may voluntarily register for VAT purposes at the beginning of each calendar year.

The standard VAT period is one calendar month. However, if the total turnover in the previous calendar year did not exceed MKD 25 million, the tax period is the calendar quarter. The VAT period for voluntary VAT registered taxpayers is the calendar quarter.

The taxpayer is obligated to submit a VAT return for each tax period within 25 days following the end of the relevant tax period.

Customs duties

Customs duties generally apply to most products imported into Macedonia. The customs rates under the most favoured nation treatment for agricultural products are up to 31%, whereas the customs rates for industrial products are below 23%.

Macedonia has signed trade agreements with Turkey, Ukraine, and European Free Trade Association (EFTA) member states. The country is a member state to the Central European Free Trade Agreement (CEFTA) and has signed a Stabilisation and Association Agreement with the European Community.

The import of industrial products with preferential origin and certain raw precious metals is exempt from customs duties.

According to the Stabilisation and Association Agreement 2001 between Macedonia and the European Union, products with Macedonian origin can generally be exported into EU countries free of customs duties.

Excise duties

Excise duties are levied with respect to a limited number of goods produced or imported in Macedonia. Petroleum products, alcohol and alcoholic beverages, tobacco products, and passenger motor vehicles are subject to an excise duty at a flat or percentage rate. The excise period is one calendar month, and excise duty is payable within 15 days as of the end of the calendar month. The excise duty for alcohol beverages and tobacco goods is levied by way of purchasing excise stamps.

The amount of excise duty for petroleum products depends on the type of petroleum product and is payable per kilo/litre.

Alcohol and alcoholic beverages are taxable per litre/percentage of alcohol. Some categories of alcoholic beverages (e.g. wine) are subject to no excise duty. Maximum excise duty payable is up to MKD 340 per litre on pure alcohol.

The excise duty for tobacco products is combined and is calculated both per unit/kilo and as a percentage from the retail price. As of July 2014 up to July 2023, the rate of the specific and minimum excise duty on cigars/smoking tobacco will increase gradually every year.

The excise duty for passenger motor vehicles is calculated as a percentage of the market value or the custom value of the vehicle. It ranges from 0% for vehicles valued up to 3,000 euros (EUR) to 18% for vehicles valued above EUR 30,000.

Property tax

Property tax is paid annually on the ownership of real estate, including land (agricultural, construction, forest, and pastures) and buildings (residential buildings or flats, business buildings and business premises, administrative buildings and administrative premises, buildings and flats for rest and recreation, and other construction facilities, as well as installations constructed on the buildings or below and permanently attached to the buildings).

The person liable for property tax is the legal entity or the individual owner of the property. If the owner is not known or cannot be reached, the person liable for property

Macedonia

tax is the user of the property. A property taxpayer may also be the taxpayer who usufructs the property; and, if the property is owned by several persons, each of them is a property taxpayer proportionately for the portion owned. A property taxpayer is also the legal entity who uses real estate owned by the state and the municipality.

The property tax base is the market value of the real estate. The market value of the real estate is determined in accordance with the methodology prescribed by the government.

Property tax rates are proportional and range from 0.10% to 0.20%. The rates may be determined on the basis of the type of the property. As an exception, property tax rates on agricultural land not used for agricultural production may be increased outside the above range (i.e. from three to five times in relation to the basic rates).

The amount of the rates is decided by the Municipal Councils.

Transfer tax

The transfer of the right to ownership of real estate for or without compensation, as well as other means of acquiring real estate for or without compensation, between legal entities or natural persons is subject to transfer tax.

The person liable for transfer tax is the seller of the real estate. As an exception, a taxpayer may also be the buyer of the real estate if agreed in the sale and purchase agreement. When replacing real estate, the taxpayer is the party that replaces the real estate of greater value.

When selling real estate in bankruptcy and executive procedure, as well as when realising agreements on mortgage, the taxpayer may be the buyer of the real estate.

In the case of transfer of ownership of an ideal share in real estate, taxpayers are each of the owners separately.

The tax base is the market value of the real estate at the moment the tax liability arises.

When replacing real estate, the tax base is the difference between the market values of the real estate being replaced.

When selling real estate in bankruptcy and executive procedure, the tax base is the attained selling price.

The market value is determined by a special municipal commission in accordance to the methodology prescribed by the government.

Tax rates are proportional and range from 2% to 4%. The tax rates are determined by the municipal councils by way of decision.

There are certain exemptions from transfer taxes available for specifically determined cases (i.e. transfer of shares, sale of securities, the first sale of residential premises for the first five years from the end of their construction, etc.).

Stamp taxes

Stamp taxes are not payable in Macedonia.

Social security contributions and payroll taxes

Employers are obligated to calculate and withhold from employees' gross salary and pay into the accounts of respective funds the compulsory social security contributions and personal income tax (PIT). The current level of the compulsory social security contributions is as follows:

- Pension and disability insurance: 18%.
- Health insurance: 7.3%.
- Employment insurance: 1.2%.
- Additional health insurance: 0.5%.

The legislation prescribes the minimum and the maximum base for calculation of the social security contributions.

The Public Revenue Office (PRO) is the authorised body to control the calculation and the payment of the compulsory social contributions and PIT on salaries. All employers send their calculations to the PRO that controls them and, if correct, issues a declaration of acceptance that is used by the banks to perform the payment of the social contribution, PIT, and net salaries.

Garbage collection fee

A garbage collection fee is payable for immovable property, depending on the type of property and on the surface area used. It is calculated on the basis of a tariff and is collected together with the bills for water usage.

Companies and individuals are liable for paying communal taxes for usage of certain rights and services (mainly for usage of the urban space in the municipalities, posting commercials, etc.).

Branch income

Branch offices are registered in the Trade Registry. Branches are subject to CIT in accordance with the general statutory provisions. The foreign parent company is fully liable for the obligations of its established branch office in Macedonia.

A foreign company that is entitled to carry out commercial activities pursuant to its national legislation may establish a commercial representative office in Macedonia. Representative offices are not legal entities and may not carry out any commercial activities. Representative offices are not subject to CIT.

Income determination

Capital gains, as well as income from dividends, interest, rent, and royalties are treated as ordinary income of the taxpayer and are included in its general taxable base in accordance with accounting rules and standards. Dividend income received from domestic taxpayers is excluded from the tax base under condition that such income was taxed at the level of the payer.

Inventory valuation

There are no provisions in the tax legislation regarding inventory valuation.

Deductions

The CIT Law exhaustively lists the expenses that are not recognised for CIT purposes and are part of the CIT base.

Hidden profit distribution

The following transactions with shareholders or their related parties are considered as hidden profit distribution subject to CIT:

- Sales of goods/services on terms below the market price.

Macedonia

- Purchase of goods/services on terms above the market price.
- Providing loans with an interest lower than the market one.
- Arrangements under which gains are realised by the shareholders or their related parties.

Unjustified shortages are also taxed as hidden profit distribution if not reimbursed from the salary of the authorised person.

Some of the transactions above may be regulated under the transfer pricing provisions in the CIT Law as well. It seems that the purpose of these provisions is to tax the non-fair transactions with shareholders and their related parties that do not fall under the 'related-party' definition as per the CIT Law.

Non-business-related expenses

Expenses that are not related to the business activity of the taxpayer are taxable.

Depreciation

Corporate taxpayers can apply depreciation methods and rates as well as perform impairment of their fixed assets under applicable accounting standards without any tax consequences.

Goodwill

There are no specific provisions in the tax legislation with regard to goodwill.

Start-up expenses

There are no specific provisions in the tax legislation with regard to start-up expenses.

Interest expenses

Interest paid on non-business related credits of the taxpayer, as well as interest on credits for purchase of passenger vehicles, furniture, carpets, works of art, and decorative objects, is a taxable expense. Interest on business-related credit is also taxable, provided it falls under the thin capitalisation or transfer pricing rules (*see Thin capitalisation or Transfer pricing in the Group taxation section for more information*).

Uncollected receivables from loans

Uncollected receivables arising from loans (or transactions that are considered loans in their economic substance) that are not repaid in the year of granting are considered as taxable expenses. On the other hand, taxpayers are allowed to reduce their tax base in the tax period when such receivable is partially or fully collected.

Impairment and write-off of receivables

Impairment of receivables is not taxable for banks, saving institutions, and insurance companies if impaired in accordance to the methods prescribed by law. As to other corporate taxpayers, impairment of receivables is a taxable expense if not based on an effective court decision or reported and confirmed as debts in liquidation or bankruptcy procedure.

Write-off of receivables is a taxable expense for all corporate taxpayers.

The taxpayers are entitled to a tax credit for the tax paid on collected impaired receivables in the year of collection.

Charitable contributions

Donations and sponsorships expenses are taxable if not pursuant to the manner, the conditions, and the procedure set forth in the Law on Donations and Sponsorships in Public Activities. If compliant with the law requirements as per above, donations are taxable if the annual amount borne by the taxpayer exceeds 5% of its overall revenue,

whereas sponsorship expenses are taxable if above 3% of the overall revenue of the taxpayer.

Compensation expenses

Employees' related expenditures (e.g. organised transportation to/from work, organised food [cantina], business trip allowance, field allowance, family separation allowance, one-off severance payment, retirement allowance, annual holiday allowance, anniversary awards) are taxable if paid over the amount prescribed by law and collective agreement.

Voluntary pension insurance contributions are taxable if their annual amount per employee exceeds four average monthly gross salaries paid out in the previous calendar year.

The monthly allowances and expenses to the managing board members are tax-deductible, up to 50% of the average gross monthly salary paid out in the country in the previous year.

Insurance expenses

Personal insurance premiums paid for members of the management board and the employees (if not paid out of their salary) are taxable expenses. Only the collective insurance of the employees for work-related injuries is a non-taxable expense for corporate taxpayers.

Entertainment expenses

Expenses for gifts, business dinners, recreation, and entertainment are taxable, up to 90% of the annual amount borne by the taxpayer.

Scrapping

Expenses for scrapping exceeding the standards for the particular industry set forth in the rulebook on the standardised amounts of debris, scrap, waste, wreckage, and scattering of goods and specific products are taxable. Scrapping expenses caused by *vis major* or an uncontrollable event are not taxable.

Fines, penalties, and taxes

Fines and tax penalties, penalty interest on unpaid public duties, and expenses for enforced payments, as well as withholding tax (WHT) borne by the taxpayer on behalf of third parties, are taxable.

Net operating losses

The CIT Law stipulates that the loss realised in the income statement for the year, adjusted for the amount of non-deductible expenses, can be carried forward against future profits for a maximum period of three years as of the year when the profit has been realised.

The financial loss can be carried forward only in cases where the accumulated losses have been offset by the taxpayer according to the provisions from the Macedonian Companies Law and if approval by the tax authorities has been obtained.

Loss carrybacks are not allowed under the Macedonian tax legislation.

Payments to foreign affiliates

There are no specific provisions in the tax legislation with regard to payments towards foreign affiliates.

Macedonia

Group taxation

There are no tax consolidation provisions in Macedonia.

Transfer pricing

The transfer pricing provisions cover not only the expenses but also the revenues resulting from related party transactions. If the taxpayer incurs expenses/realises revenues from transactions with related parties that are higher/lower than the market level, the difference between the market price and the transfer price shall be considered as a taxable expense or understated revenue. Consequently, this difference would be subject to CIT.

The cost plus method, in addition to the comparable uncontrolled price method, are applicable. No reference is made to other methods accepted by the Organisation for Economic Co-operation and Development (OECD).

The part of the interest paid on loans to related parties that exceeds or is below the interest payable between unrelated parties is considered taxable.

Penalty interest imposed between related parties shall be considered as a taxable expense.

Transfer pricing rules do not apply on expenses for interest under credits and penalty interest paid to related parties that are banks or financial institutions.

Upon request by the Macedonian tax authorities, companies should provide enough documentation as evidence that the transactions with related parties were in line with the 'arm's-length principle'.

Thin capitalisation

A proportional part of the interest related to a loan received from a non-resident shareholder, who directly holds at least 25% of the capital in the company, that exceeds three times its share in the equity in the company will be taxable during a tax period. Thin capitalisation rules do not apply to loans received from banks or other financial organisations. Also, thin capitalisation rules do not apply for newly established companies within the first three years of operation.

Controlled foreign companies (CFCs)

There are no CFC rules in Macedonia.

Tax credits and incentives

Foreign tax credit

The taxpayer is allowed a tax credit for the tax paid on foreign income abroad, up to the amount of tax payable for that income in Macedonia. However, a tax credit for the WHT paid abroad is allowed only if a double tax treaty (DTT) is in place.

Reinvested profit

The CIT Law introduces a possibility for decreasing the tax base for the year for the amount of profit reinvested for development purposes of the local taxpayer. The amounts from the reinvested profit that would be recognised for the purposes of the above tax relief cover investments both in tangible and intangible assets, except for some explicitly listed types of assets intended for administrative purposes.

In order to be able to utilise the above tax relief, the taxpayers must maintain ownership over the assets purchased with the reinvested profit for a period of five years as of the day of their purchase.

Technological industrial development zones

A taxpayer that is a registered user within a technological industrial development zone is exempt from CIT payment for a period of ten years from the commencement of the performance of the activity in the zone under terms and conditions and according to a procedure determined with the Law on Technological Industrial Development Zones.

Withholding taxes

All domestic legal entities and domestic physical persons that are registered for carrying out an activity, as well as foreign legal entities or physical persons that are non-residents but have a PE in Macedonia, are obligated to withhold tax when paying certain types of income to a foreign legal person and to pay the tax withheld to a respective suspense account simultaneously with the payment of the income.

The WHT rate is 10% and is applied on the following forms of incomes payable abroad:

- Dividends.
- Interest.
- Royalties.
- Income from entertainment or sporting activities in Macedonia.
- Income from management, consulting, financial services, or services related to research and development.
- Income from insurance or reinsurance premiums.
- Income from telecommunications services between Macedonia and a foreign country.
- Income from the lease of immovable property in Macedonia.

As an exception, WHT is not applicable to the following forms of income:

- The after-tax profit of a PE transferred to its foreign headquarters.
- Interest from bonds issued or guaranteed by the government.
- Interest on deposits in banks located in Macedonia.
- Income from transactions in state securities on the international financial markets.

If a DTT is in place, WHT shall be payable in accordance with the provisions from the DTT. Taxpayers are obligated to obtain approval from the Macedonian tax authorities prior to applying the tax rates from the DTT.

Macedonia has signed DTTs with the 45 countries listed in the chart below:

Recipient	WHT (%)			
	Dividend	Interest	Royalties	Other income
Albania	10	10	10	0
Austria (1)	0/15	0	0	0
Azerbaijan	8	8	8	0

Notes

1. The lower rate applies to dividends paid out to a foreign company that controls at least 10% of the share capital of the payer of the dividends.
2. The lower rate applies to dividends paid out to a foreign company that controls at least 25% of the share capital of the payer of the dividends.
3. The zero rate applies to dividends paid out to pension funds.
4. These DTTs are still not in force.
5. The DTT with Federal Republic of Yugoslavia now applies both to Serbia and Montenegro.
6. The zero rate applies to dividends paid out to recognised pension funds and to foreign companies that continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company that controls at least 10% of the share capital of the payer of the dividends. The 10% rate applies to dividends paid out in all other cases.
7. The tax rate of 10% for royalties payments applies only for utilisation or right to utilise cinematographic films and films or tapes for radio and television transmission. The 5% rate applies on all other cases.
8. The DTT concluded between the Socialist Federal Republic of Yugoslavia (SFRY) and Belgium is still applicable for Macedonia.
9. The zero rate applies to dividends paid out to pension schemes and to foreign companies that continuously control at least 25% of the share capital of the payer of the dividends for 12 months

before the dividends payment. The 5% rate applies to dividends paid out to foreign company that controls at least 10% of the share capital of the payer of the dividends. The 15% rate applies to dividends paid out in all other cases.

10. The zero rate applies on interest paid on loans or prolonged credit paid from one enterprise to another enterprise and, on interest paid to the other contracting state, to one of its political divisions or municipalities or public entities of that state.
11. The zero rate applies in case the beneficial owner of the interest is the government, political or municipality subdivision; the Indian Reserve Bank, the Indian Export-Import Bank, and National Housing Bank; or any other institution based on additional agreement via exchange of letters by the authorised institutions.
12. The 10% rate applies on gross income from royalty or income from technical services (compensation for managerial, technical, and consulting services, income from services of technical and consulting personnel that is different from the income derived under article 14 and article 15 of the DTT).
13. The zero rate does not apply to income from lottery, races and horse races, card games, and other games of chance.
14. The 5% of the gross amount of dividends applies if the beneficial owner directly holds at least 70% of the share capital of the company paying the dividend. 10% applies if the beneficial owner directly holds at least 25% but less than 70% of the share capital of the company paying the dividend. 15% applies in all other cases.

Tax administration

Taxable period

The taxable period for which CIT is determined covers one calendar year.

Tax returns

Taxpayers are obligated to calculate and pay CIT on the basis of a CIT return, which must be submitted to the Public Revenue Office by the end of February of the following year or, if filed electronically, by 15 March of the following year.

Taxpayers who distribute profit arising from FY 2009 to FY 2013 are obligated to calculate and pay CIT on the basis of a tax return on profit distribution, which should be submitted to the tax authorities up to the date of profit distribution.

Small taxpayers who fall under the simplified tax regime are obligated to calculate and pay the tax due on the basis of a tax return on overall income, which should be submitted to the tax authorities by the end of February of the following year or, if filed electronically, by 15 March of the following year.

Payment of tax

Corporate taxpayers are obligated to pay monthly CIT advance payments during the year within 15 days of the end of each month.

Monthly CIT advance payments are calculated as one-twelfth of the CIT obligation for the previous calendar year, increased by the index of cumulative retail price growth as determined by the State Statistical Bureau.

The difference between the advance payments and the final CIT liability as determined in the CIT return should be paid within 30 days as of the deadline for submission of the CIT return. Daily penalty interest of 0.03% is due on late tax payments.

In case the sum of monthly advance payments exceeds the final tax liability in the CIT return, the taxpayer may request for a refund of overpaid tax. The tax should be refunded within 60 days as of the date of submitting the request. If the taxpayer does not ask for a tax refund, the overpaid amounts will be considered as advance payment for the following period.

Tax audit process

The tax audit may include one or more taxes, one or more fiscal periods, or only certain tax issues. The extent of the tax audit is determined solely by the tax authorities and is based on their estimation of risk in respect of the specific taxpayer. VAT audits are commonly conducted when VAT refund is requested by the taxpayer, and, in this case,

Macedonia

the tax audit is usually limited in the area of VAT. The advance notice for tax audit for big taxpayers and concerns is four weeks, whereas the advance notice for all other taxpayers is two weeks. In cases where the tax authorities find that it would represent an obstacle for the tax audit, an advanced notice will not be given to the taxpayer.

Statute of limitations

The statute of limitations is five years as of the end of the calendar year in which the tax event occurred. In case of tax evasion, the statute of limitations is ten years as of the end of the calendar year in which the tax event occurred.

Topics of focus for tax authorities

There are currently no topics of particular focus for the tax authorities.

Other issues

Choice of business entity

The Macedonian Trade Companies Law provides for the following types of entities:

- General partnerships.
- Limited partnerships.
- Limited liability companies.
- Joint stock companies.
- Limited partnerships by shares.
- Foreign business entities may register a branch office or a representative office in Macedonia.

Significant developments

Taxation of residents

The income tax exemption during the first two years of activity is no longer applicable.

Corporate residence

The notion of permanent establishment (PE) is introduced by the Financial Act 2016. It is inspired from the Organisation for Economic Co-operation and Development (OECD) rules.

Income determination

Capital gains realised from the sale of shares is subject to income tax at a rate of 20% if the value of such shares includes the value of assets or rights situated in Madagascar.

Taxes on corporate income

Taxation of residents

Resident corporate entities are subject to corporate income tax (CIT) based on realised worldwide income.

A corporate entity having an annual turnover of less than 20 million Malagasy ariary (MGA) is subject to CIT at a rate of 5% of 70% of turnover, with a minimum tax of MGA 16,000.

A corporate entity registered in Madagascar and having an annual turnover exceeding MGA 20 million is subject to CIT at a rate of 20%.

The tax payable cannot be less than 5/1,000 of turnover plus a fixed amount of MGA 100,000 for taxable persons carrying on agricultural, artisan, transportation, industrial, hotel, or mining activities. The minimum tax cannot be less than 5/1,000 of turnover plus MGA 320,000 for other activities.

Taxation of non-residents

Only Madagascar-source income is taxable for non-residents.

Revenue of foreign businesses providing services to a Madagascar taxpayer that do not have a PE in Madagascar is subject to withholding tax (WHT) at a rate of 10% of any income realised in Madagascar. However, dividend income is exempt and financial loan interest is subject to WHT of 20%. *See the Withholding taxes section for more information.*

Local income taxes

No other local income taxes are applicable in Madagascar.

Madagascar

Corporate residence

Companies are considered resident in Madagascar if they are registered in Madagascar or have a legal existence in Madagascar.

Permanent establishment (PE)

PE refers to a fixed place of business through which a company carries out the whole or part of its activities, including:

- Management offices.
- Branches.
- Offices.
- Factories.
- Workshops.
- Mining sites, oil or gas wells, quarries, or any other places for the extraction of natural resources.
- Building sites, construction or installation projects, or supervising activities lasting for more than six months in relation to those projects.
- Provision of services by a company, including advisory services, via employees or other staff hired by the company to this end, only if such activities are carried out in Madagascar for a total period of 183 days for a 12-month period either starting or ending during the fiscal year involved, for the given or a related project.

PE does not include:

- The use of facilities for the storage or display of goods or merchandise belonging to the company.
- Exploiting a stock of goods or merchandise belonging to the company for the sole purpose of either storage or display or of being processed by another company.
- Exploiting a fixed place of business for the sole purpose of:
 - either purchasing merchandise or collecting information for the company
 - carrying out any other activity of preparatory or auxiliary character for the company, or
 - pursuing any combination of the activities mentioned above, conditional on the overall activity of the fixed place of business, as resulting from this combination, remaining of preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)

The VAT rate is 20%, and the VAT rate on export is 0%. VAT input is recoverable under certain conditions.

VAT is applicable to all transactions realised in Madagascar by a VAT vendor. Services are considered to be performed in Madagascar if such services are used in Madagascar or invoiced to a taxpayer established in Madagascar.

Business engaged in e-commerce is subject to VAT.

Transport companies are allowed to claim VAT input on gasoline used for land transportation. The objective is to reduce the impact of cost of oil and gas on transportation fees.

Any corporate entity or individual person who realises an annual turnover exceeding MGA 200 million is a VAT vendor. For a business realising annual revenue less than MGA 200 million, VAT vendor registration is an option.

A foreign company that has no PE in Madagascar but renders services to a Madagascar taxpayer must appoint a tax representative to collect and pay VAT on its behalf. Otherwise, the beneficiary of the services must collect and pay VAT on behalf of the foreign supplier.

All transactions made by a VAT vendor with a non-VAT vendor must be done via the banking system when the value of the transaction exceeds a threshold fixed by Decree.

Any suppliers not registered as VAT vendors engaged in public market transactions are subject to VAT at a rate of 8%, which is representative of income tax. VAT is withheld by the public treasury and paid directly to the tax authorities.

Customs and import tax

The importation of goods is subject to payment of customs and import tax payable to the customs office.

In addition, Gasynet fee, corresponding to 0.5% of the cost, insurance, and freight (CIF) value of goods, is applicable on importation of goods.

Excise duty

Excise duty applies on a range of goods and services, such as tobacco, alcohol, lighters, and communication by mobile phones. Excise duty rates range from 10% to 325% or are a fixed amount per litre or per unit.

Real estate ownership tax

Real estate ownership tax is imposed annually at the rate of 5% to 10% on the rental value of the property. Land ownership is also taxable at a rate depending on the nature of the land.

Registration fees

Registration fees are applicable to transfers of title ownership (e.g. sales, donations) of movable and immovable assets, to transfers of interests, to share capital increases, and to lease agreements.

Registration fee rates are 0.5% to 5%, depending on the nature of the transaction. The rate of 5% is applicable mainly on transfers of assets and transfers of business.

Tax on insurance contracts

All insurance or life annuity conventions concluded with a company, insurance firm, or with any other Madagascan or other insurer are subject to an annual tax on insurance contracts at a rate of 3% to 20% levied on the insurance premiums.

Payroll tax

Salary income taxes, called *Impôt sur les Revenus Salariaux et Assimilés* (IRSA), are levied at a rate of 20% on the total taxable remuneration of employees, including salaries, allowances, and benefits in kind. Employers are responsible for withholding and paying salary income taxes on behalf of employees.

Social security contributions

Employers must contribute to *Caisse Nationale de Prévoyance Sociale*, Madagascar's national social security fund, which includes pensions and accident insurance. The contribution is capped at 13% of eight times the legal minimum salary per employee.

Health contributions

Employers must contribute to the health system assessment at a rate of 5% of the total amount of taxable remuneration of its employees. The contribution may or may not be capped at 5% of eight times the legal minimum salary per employee, depending on the health system organisation where the company is affiliated.

Madagascar

Branch income

The tax on branch income is the same as for corporate income. The branch income tax base is the income realised by the branch in Madagascar.

Income determination

Inventory valuation

There are no provisions for valuing inventories or determining inventory flows in Madagascar. The tax treatment will follow the accounting treatment.

Capital gains

Capital gains realised from the sale of shares held in a company of which the entire or partial value is derived, either directly or indirectly, from goods located in Madagascar, or from rights thereof, are subject to income tax at a rate of 20%.

Capital gains made by a company on the sale of assets and interests are considered as normal business income that is subject to CIT.

Dividend income

Dividends received by a company are considered as business income subject to CIT.

Certain dividends from a subsidiary may be excluded from CIT (*see Dividends exclusion in the Group taxation section*).

Stock dividends

Stock dividends are unusual, but they are considered as business income that is subject to CIT.

Interest income

Interest income received by a resident taxpayer from another entity established in Madagascar is subject to WHT at a rate of 20%. Revenue already subject to WHT is no longer taxable to CIT.

Foreign income

Foreign income earned by corporate bodies situated in Madagascar is considered as normal business income subject to CIT unless a tax treaty is established and indicates otherwise. There is no provision for tax deferral in Madagascar.

Deductions

Depreciation

The amount of deductible depreciation should not exceed the amount that is calculated according to the following rates of depreciation provided by the law:

Asset	Depreciation rate (%)
Industrial buildings	5
Plant and machinery	10
Mining exploration and development (licence)	33
Transportation (car)	20
Transportation (utility cars, vans, trucks)	25
Computers	25
Electricity generators	10

With the exception of buildings, it is also possible to practise a graduated depreciation. In this case, the annual depreciation corresponds to 30% of the net book value of the asset.

In case of loss, depreciation of assets can be deferred and carried forward to the next financial years until absorption.

Goodwill

There is no provision concerning deductibility of goodwill in the Madagascar tax code.

Start-up expenses

There is no specific tax provision on start-up expenses. Accounting rules are applicable for the profit and loss recognition.

Start-up and prospecting expenses for the installation of an overseas establishment, as well as the costs of running such a foreign establishment, for the first three years are tax deductible. However, the amounts deducted must be reported, in equal amounts, to the taxable income of the five consecutive years from the fifth year following the creation of the foreign establishment.

Interest expenses

Interest expenses are deductible. However, interests on inter-company loans are subject to thin capitalisation rules (*see Thin capitalisation in the Group taxation section for more information*). In addition, interest on inter-company loans is not deductible if the loan agreement is not documented by a written agreement submitted according to registration procedures.

Bad debt

To be tax-deductible, provisions for doubtful debt must be subject to justification of existence of amicable or judicial settlement.

Charitable contributions

Payments made for the benefit of educational, social, or cultural recognised public associations; accredited bodies for scientific research; or for the promotion and creation of businesses for achievement of planned economic and social development are deductible within the limits of 0.5% of annual turnover.

Gifts in kind or in cash granted in case of natural calamities and donations in cash granted to a corporation established by decree for the interest of the nation are also deductible.

Any other charitable contributions are not deductible.

Deductible wages

Salaries and wages that are not included in salary income taxes or not declared to *Caisse Nationale de Prévoyance Sociale* are not deductible.

Fines and penalties

Fines and penalties are not deductible for CIT purposes.

Taxes

Except for CIT, taxes in relation to business in Madagascar are deductible.

Third-party taxes borne by the company are not tax-deductible.

Net operating losses

Accumulated loss can be carried forward for the next five financial years following the period in which the loss occurs. Carryback of losses is not permitted in Madagascar.

Madagascar

Payments to foreign affiliates

For branches, the deductible amount of overhead that the head office can charge to the branch is limited to 1% of the turnover of the branch.

For interest on inter-company loans, see Thin capitalisation in the Group taxation section.

Payments to foreign companies established in a country having a very favourable fiscal regime

Payments made to a foreign company established in a country having a very favourable fiscal regime are not tax deductible unless there is proof of effectiveness of the services and reasonability of the amount.

Group taxation

There is no provision regarding group taxation in Madagascar, except for the following:

For entities subject to the actual tax regime, a parent-subsidiary regime option is established by which the net dividends received by the parent company from its subsidiary are excluded from the tax base of the parent company. However, a share of fees and expenses, uniformly fixed at 5% of the amount of dividends paid, must be reintroduced into the tax base.

Transfer pricing

There is a provision in the tax law allowing the tax authority to claim a tax adjustment in cases where the transactions between a Madagascar entity and a foreign entity controlling or controlled by the Madagascar entity are not concluded at fair market value.

The following transfer pricing methodologies are acceptable:

- Methods of comparable prices on the free market.
- Resale price method.
- Cost plus method.
- Transactional method on net margin.
- Transactional method on profit split.

Effectiveness of services and fair market value must be justified by appropriate documentation.

Thin capitalisation

Under Malagasy tax law, deductible inter-company financial interest cannot exceed the interest calculated on twice the share capital at the rate of the Central Bank of Madagascar plus two points (the rate of the Central Bank of Madagascar is 9.5%).

Inter-company loan agreements must be submitted according to registration formalities within two months from the execution date. Failure of submission of an inter-company loan agreement according to registration formalities implies non-deductibility of interest on the inter-company loan.

Dividends exclusion

Dividends received by a shareholder holding more than 75% share capital from its subsidiary are excluded from business revenue subject to income tax.

Controlled foreign companies (CFCs)

There is no special provision in relation to CFCs in Madagascar.

Tax credits and incentives

The following activities benefit from a special tax and/or customs regime:

Microfinance activity

Microfinance benefits are available for entities specialising in lending money on the basis of small or medium scale value. Entities duly licensed to practise microfinance activities are exempt from CIT during the first five years. After this period, the microfinance company is subject to CIT at a rate of 20%.

Free zone (free trade zone)

Free zone law is available for industrial and other service providers that export all of their products. If eligible under the free zone law, a CIT exemption is provided during the first two to five years and a reduced CIT of 10% is levied thereafter. Exemption from customs duties on importation is also provided.

Companies investing in renewable energy, tourism, industrial, civil work and construction, and transformation

Companies investing in renewable energy, tourism, industrial, civil work and construction, and transformation can benefit from a tax reduction equal to the tax calculated on 50% of the amount of investment that they realised during the related tax year. The right to reduction that can be used for the tax year cannot exceed 50% of tax actually due. The balance is carried forward with the same limitation to subsequent years, until clearance.

Big investment mining

A mining company committing to invest more than 50 million United States dollars (USD) is considered a big investment mining company. The big investment mining law provides a minimum income tax exemption, a reduced CIT rate for the transformation entity (i.e. the entity in charge of processing the extracted minerals), exemption from custom and importation duties, and VAT reimbursement on locally purchased equipment and investments.

Petroleum code

The petroleum code provides a custom and importation duties exemption for hydrocarbon research, exploration, and exploitation activities.

Leasing law

The leasing law provides that leasing activities can benefit from CIT exemption and reduction of tax rate during the first four years.

Foreign tax credit

Except under a tax treaty, there is no foreign tax credit rule under Malagasy tax law.

Withholding taxes

WHTs are levied as follows:

- Purchases of goods and services from non-registered suppliers by a registered supplier are subject to WHT at a rate of 5% payable to the tax authorities within 15 days following the month of payment of the supplier.
- *Impôt sur les revenus des capitaux mobiliers* (IRCM): WHT on interest of 20% is applicable on financial loan interest. However, interest paid to banks, financial institutions, and foreign financial organisations is exempt.
- WHT of 20% is applicable on remuneration of a member of a board of directors or a single director.

Madagascar

- Income tax for non-resident entity: Management fees, royalties, technical and assistance fees, licence fees, equipment rental fees, and any income realised by foreign suppliers is subject to WHT at a rate of 10%.

Madagascar has signed two tax treaties.

Recipient	Dividends (%)	Loan interest (%)	Royalties, management fees, services fees (%)
Non-treaty	0	20	10
Treaty:			
France	25 (max)	15	15 (max)
Mauritius	10 (max)	10	5 (max)

Tax administration

Taxable period

The financial year may be spread over any period of 12 months. There is no need to obtain prior authorisation in order to close the financial year on a date other than 31 December or 30 June.

Tax returns

CIT returns are due before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and no later than the 15th day of the fourth month from the date of closing of the financial year for all other year-ends.

Payment of tax

CIT is payable bimonthly in provisional instalments. The balance is payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and within four months from the date of closing of the financial year for all other year-ends.

Taxpayers can decide to suspend the payment of bimonthly income tax instalments, but they must pay a penalty of 80% if the final tax due is more than the previous year's income tax.

WHT on foreign services is payable to the tax authorities within one month of the date of payment.

WHT on interest and on payments to members of boards of directors are payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and no later than the 15th day of the fourth month from the date of closing of the financial year for all other year-ends.

Tax audit process

The tax authority carries out audits of a selection of tax returns, usually at the taxpayer's place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations.

During tax audit, tax authorities can access all the taxpayer data available on servers, terminals, and any supporting systems.

After examination of available information, the tax authority issues a notice of assessment, and the taxpayer has 30 days after the date of reception of the notice of

assessment to answer and submit its written objection to the tax authority. If the tax authority confirms its assessment, the taxpayer has two options:

- i. 15 days from the confirmation of assessment, the taxpayer may request the opinion of the Tax Administrative Appeal Commission (CFRA). 30 days from the CFRA opinion, the Director of Tax Audit issues the final decision. The decision of that body may be further appealed to the Court (State Council) within 30 days.
- ii. 30 days from the confirmation of assessment, the taxpayer may file a claim to the tax authorities. The Director of Tax will issue the final decision. Ultimately, decisions of the Director of Tax may be further appealed to the Court (State Council) within 30 days.

Statute of limitations

The tax limitation period is three years.

Topics of focus for tax authorities

Areas where tax authorities usually claim adjustment are:

- VAT reverse on foreign services.
- Completeness of VAT output on revenue.
- Sales without invoices.
- Expenses without invoices.
- Employees' remuneration not subject to salary tax.
- Payment to non-registered suppliers.

Significant developments

Effective 1 July 2015:

- Thin capitalisation was introduced, but the regulations are not yet provided; consequently, the acceptable ratio is not known currently.
- There is deemed interest on interest-free loans and outstanding balances due to related parties.
- Interest on outstanding tax liability has been revised to be calculated at the prevailing bank lending rate plus 5% *per annum*.

Taxes on corporate income

Malawi does not have separate legislation for the determination of taxable income of different types of legal persons. Taxation of all income is included in the Taxation Act.

Section 11 of the Taxation Act defines income as the total amount in cash or otherwise, including any capital gain, received by or accrued to a person in any year or period of assessment from a source within or deemed to be within Malawi. The taxpayer's assessable income excludes any amount exempt from tax under this act.

Income deemed to arise in Malawi

The liability for Malawi tax is based on whether the income is sourced from Malawi, irrespective of the residence of the recipient of such income. Certain transactions may be deemed to be from a source within Malawi even if carried out outside Malawi. Section 27 of the Taxation Act limits the income that may be deemed to have arisen in Malawi to the following:

- Remuneration for services rendered or work performed in Malawi.
- Remuneration for services rendered or work performed in or out of Malawi where the amount may be claimed as a tax-deductible expense by a permanent establishment (PE) in Malawi.
- Amounts incurred, claimed, or claimable in connection with a PE in Malawi.
- Realised exchange gains and losses arising in connection with a PE in Malawi or foreign exchange assets and liabilities held in Malawi.
- Capital gains and losses realised with respect to tangible property located in Malawi and interests in companies incorporated in Malawi.

Summary of tax rates

Entity	Income tax rate (%)
Locally incorporated companies (1)	30
Branches of companies not incorporated in Malawi	35
Companies in Export Processing Zones	30

Entity	Income tax rate (%)
Companies in priority industries (2):	
For a period not exceeding ten years	0
In all other cases for companies incorporated in Malawi	15
In all other cases for Malawi branches of external companies	20

Notes

1. In the case of a mining company, an additional resource rent tax of 10% is levied on profits after tax if the company's rate of return exceeds 20%. The basis for calculating rate of return has not been defined.
2. Agricultural produce processing and power generation are designated as priority industries.

Non-resident tax

Non-resident tax is payable on income due to a non-resident at the rate of 15% of the gross income.

Any income payable to a person who is not resident in Malawi (i.e. who has not been in Malawi for an aggregate period of 183 days) arising from a source within Malawi is liable to a final WHT of 15% of the gross of such income. Non-resident tax is applicable where the recipient of the income does not have a PE in Malawi from which the income emanated.

Non-resident tax may not be withheld on income of residents of countries that have a standing double tax agreement (DTA) with Malawi, subject to the provisions of the specific DTAs. *For details of applicable WHT rates, see the Withholding taxes section.* Currently, the following countries have a DTA with Malawi: Denmark, France, Norway, South Africa, Sweden, Switzerland, and the United Kingdom.

Local income taxes

There are no local income taxes in Malawi.

Corporate residence

A corporate entity is considered a resident for tax purposes in Malawi if it has a PE in Malawi.

Permanent establishment (PE)

The Taxation Act defines a PE as 'an office or other fixed place of business through which business activity is carried on'. This short definition is wide in scope. Care must be exercised when considering this definition in situations that may be affected by a DTA. Each DTA contains a specific and far more detailed definition of what constitutes a PE.

Other taxes

Value-added tax (VAT)

VAT is applicable on taxable goods and services. There are three classes of supplies for VAT: taxable supplies (at the rate of 16.5%), zero-rated supplies, and exempt supplies.

A taxable person can claim input VAT on inputs used in making taxable supplies.

A taxable person should complete VAT returns and make VAT payment, where applicable, on a monthly basis within 25 days after the end of the month.

Zero-rated supplies include exercise books, fertilisers, motor vehicles for the transport of goods, and salt.

Malawi

The following supplies are tax exempt: machinery, financial services, bread, and newspapers.

Customs duties

Customs duty is applicable on goods imported into Malawi. The basis for calculating duty is cost, insurance, and freight (CIF). There are three types of import duties: customs duty, import excise, and import VAT. The rate of custom duty varies from product to product.

The following are the customs and excise measures that are effective in Malawi:

- Returning residents will have to clear, duty free, a motor vehicle owned for more than 12 months under CPC 430.
- Duty free on importation of diagnostic and laboratory reagent under CPC 405 by Health Institutions.
- Removal of VAT on imported goods on water supply.
- Removal of duty on imported electronic fiscal devices.
- Removal of taxes applicable on large buses with seating capacity of more than 45 passengers (including the driver).
- Reintroduction of the Industrial Rebate System. This is a major relief to the manufacturing sector; however, given the abuse of the scheme in the past and the Minister's intimation, it will be subject to serious monitoring by the Malawi Revenue Authority (MRA). Taxpayers will be required to register with the MRA.
- Other measures are in alignment with the Common Market for Eastern and South Africa (COMESA) and South African Development Community (SADC) tariff structures.

Excise duties

Domestic excise is chargeable on certain goods manufactured in Malawi and on certain services, such as alcoholic drinks, tobacco, and cell phone airtime. The rate of excise varies depending on the goods and services.

Tobacco levy

Buyers of tobacco must pay a levy of 0.2% for every kilogram of tobacco bought.

Property taxes

There are no property taxes in Malawi.

Transfer taxes

There are no transfer taxes in Malawi.

Stamp duties

Stamp duties apply on certain documentation.

Turnover tax

Turnover tax is applicable for businesses with a turnover between 2 million Malawian kwachas (MWK) and MWK 6 million. The turnover tax rate is 2% of turnover.

Resource rent tax for miners

Miners pay resource rent tax of 10% on after-tax profits if the rate of return exceeds 20%. Since introduction of this tax, there has not been clear administrative guidance on its applicability, like a formula for the determination of the tax.

Payroll taxes

Under pay-as-you-earn (PAYE) regulations, the employer is required to withhold tax from employees' salaries and remit to the tax authority on their behalf. There are penalties for non-compliance with the regulatory requirements.

Social security contributions

Under the National Pension Scheme (NPS), an employee contributes a minimum of 5% of the pensionable emoluments while the employer contributes at least 10% of the employee's pensionable emoluments. Contributions by the employer are tax deductible up to a maximum of 15% of the employee's pensionable emoluments while those made by the employee are not.

Fringe benefits tax (FBT)

A fringe benefit is defined as any asset, service, or other benefit in kind provided by or on behalf of an employer to an employee if such benefit includes an element of personal benefit to the employee. The employer providing such benefits is liable for payment of FBT. FBT is charged at the rate of 30% of the taxable figure.

Take note that a benefit need not be wholly for personal use in order to be considered for FBT.

Note as well that no benefit in cash, no matter what it is termed as, can be treated as a fringe benefit. All monies paid in cash (rather than in kind) should be considered for PAYE deduction.

However, subsistence allowances, given to employees working out of their duty station for instance, presumably to cater wholly, exclusively, and necessarily for their needs, such as accommodation, meals, transport, etc., ought not be taxed. This applies also for reimbursement of expenses incurred in business.

Every employer shall register for FBT within the month in which one begins to provide fringe benefits.

The sums due as FBT shall be remitted to the MRA in quarterly instalments not later than 14 days after the end of each quarter of a period of 12 months ending 30 June, and remittance should be accompanied with a duly completed FBT return in Form FBT 2.

Note that the value for FBT should not be included in the employee's certificate of gross emoluments.

Assessment of housing fringe benefits

The taxable value of a housing fringe benefit is the greatest of (i) 10% of salary where the house is unfurnished, (ii) 12% of salary if furnished, or (iii) the rental value.

Where the house occupied by the employee is owned by the employer, the taxable value is reduced by 50%.

Motor vehicles

FBT is applicable on motor vehicles allocated for use by members of staff and does not include pool cars or cars that are strictly commercial in nature.

The taxable value is 15% of the original cost of the vehicle.

School fees (for children/dependants)

50% of the cost to the employer for school fees is a taxable benefit, where payment is made directly to the educational institution. Education allowances payable to employees are not subject to FBT as the allowance is considered part of normal salary and taxable as such.

Utilities, household items, vacations, travel, and domestic services

The taxable value of utilities (e.g. electricity, water, and telephone expenses), household items, vacations, travel, and domestic services (e.g. gardener, cook, house boy, guard, nanny) is the entire cost to the employer. Except that for a house owned by the employer,

Malawi

the cost of a gardener, security guard, and watchman shall not constitute a taxable benefit.

Interest free loans and loans given at interest lower than the commercial rate

Where an employer gives a loan to an employee that is interest free or bears interest that is lower than the predetermined commercial rate, the difference between the interest offered and the commercial rate is a taxable benefit.

Branch income

There is a 35% tax on taxable income of a branch of a foreign company.

No dividend WHT is applicable on repatriation of profits.

Income determination

Inventory valuation

Inventory is stated at cost or net realisable value (i.e. market price) for tax purposes. There is no specific requirement for the valuation of cost. The only legal emphasis is consistency in the application of the selected method. This means that one cannot change from one valuation method to another over different tax periods.

Capital gains

The tax basis for capital gains is the cost of the asset adjusted by the applicable consumer price index (inflation index). Once determined, the taxable gain is subject to corporate tax at the rate applicable to the particular entity.

Capital gains arising from the disposal of personal and domestic assets not used in connection with trade are exempt from corporate tax.

Capital gains arising from the sale of shares held for more than one year traded on the Malawi Stock Exchange are not taxable.

Rollover relief

If a business asset is sold and the taxpayer acquires a qualifying replacement asset, the taxpayer may claim rollover relief. This means that the taxpayer does not immediately pay the tax on the gain. Instead, the cost of the replacement asset is reduced by the amount of the gain. The taxpayer must declare this in the tax return.

A qualifying replacement asset is an asset similar to, or related in service or use to, the asset disposed of. The replacement asset must be acquired within 18 months of the disposal giving rise to the gain.

Dividend income

Dividend income is exempt from corporate tax; however, dividends received from Malawi sources are subject to a 10% dividend WHT, which is a final tax. Note that although the word 'final' has not been defined, it is applied as meaning that dividend WHT suffered may not be offset against an income tax liability.

Interest income

Interest is added to the other income categories and taxed at a rate applicable to the person that earns the income. There is a mandatory WHT on interest earned from financial institutions unless the earner is exempted.

Effective 1 July 2015, there is deemed interest on any interest-free loans and balances. The deemed interest is taxable income to the lender.

Foreign exchange gains and losses

Foreign exchange gains realised on foreign currency assets or liabilities are taxable.

Foreign exchange losses realised on foreign currency assets or liabilities are tax deductible.

Unrealised gains and losses are carried forward until realised and then included in income or allowable expenditures. The maintenance of records that accurately track unrealised exchange rate adjustments from year to year is necessary to ensure correct tax computations.

Tax-exempt income

The following are common examples of other tax-exempt income:

- The income of agricultural, mining, and commercial institutions or societies not operating for private pecuniary profit or gain of the members.
- The income of clubs, societies, and associations formed, organised, and operated solely or principally for social welfare or civic improvement or other similar purpose, provided that the income of such bodies may not be divided among or used for the benefit of the members or shareholders.
- The income of ecclesiastical, charitable, and educational institutions of a public character.

Foreign income

Generally, income whose source is not Malawi is not taxable in Malawi.

Deductions

Taxable income is calculated by deducting allowable items from assessable income. Section 28 of the Taxation Act defines tax-allowable deductions as any expenditures and losses (not being of a capital nature) wholly, exclusively, and necessarily incurred by the taxpayer for the purpose of trade or in the production of income.

Capital allowances

Capital allowances (i.e. depreciation allowances) are applicable as stipulated in the Taxation Act at various rates.

Capital allowances, which are available to companies and individuals in business, are allowed as follows:

Asset	Allowances (%)		
	Initial	Investment	Annual
Industrial and farm buildings, hotels, and docks (1, 2, 3)	10	40/100	5
Staff housing (3)	10	-	5
Plant, machinery, and equipment (1, 2, 3, 4)	20	40/100	10/20
Furniture and fittings (3)	20	-	10
Motor vehicles (3, 4, 5, 6)	20	-	20
Commercial buildings (7)	-	-	2.5
Computers	20	-	40

Notes

1. The 100% investment allowance is available only on new and unused qualifying assets, as indicated above, belonging to and used by a manufacturer or farmer. The rate for used qualifying assets is 40%. The investment allowance is claimable only in the first year of use.
2. Where an investment allowance is claimed, the initial allowance is not allowed to be claimed on the same asset. The initial allowance is claimable only in the first year of use.

Malawi

3. Annual allowances at the above rates are based on cost less investment and initial and annual allowances previously granted.
4. Investment allowance on plant and machinery excludes motor vehicles intended or adapted for use on roads.
5. A 20% annual allowance is standard, but the Commissioner General may vary the amount.
6. No initial allowance is granted on private motor vehicles. These include saloons, sedans, station wagons, and double cabin pickups. However, the restriction does not apply where the motor vehicle is used for hiring purposes.
7. The building must be newly constructed at a cost of no less than MWK 100 million.

On disposal, assets are subject to balancing charges (capital gains) or balancing allowances.

If an asset is subject to extensive use, such as machinery working double shifts, so that its expected economic life is reduced, the Commissioner General may agree to increase the rates of annual allowances.

Lease, patent, trademark, and copyright premium

The tax-deductible amount of a premium paid for the right of use or occupation of land or buildings, plant or machinery, patent design, trademark, copyright, or any other property of a similar nature is one of the following:

- The amount of premium or consideration divided by the number of years for which the right of occupation or use is granted.
- Where the period for which the right of occupation or use is granted exceeds 25 years, the deduction is one-twenty-fifth of the premium or consideration.

The premium is tax deductible only where the asset or right with respect to which the premium or consideration is paid is used for the generation of income. If a taxpayer acquires ownership of the asset or right, no further deduction of the premium or consideration is allowed from the date ownership is acquired.

Goodwill

The legislation does not prescribe treatment for goodwill. It has been the practice that goodwill is not deductible for tax purposes.

Pre-operating expenditures

A manufacturer may claim as a deduction any expenditure incurred in the course of establishing the business, provided that the following are true:

- The expenditure was incurred not more than 18 months before commencing business.
- The expenditure would have been allowed as a deduction if it had been incurred after commencing business.

Interest expenses

Interest that arises out of financing operations is allowable, while interest due to late payment of a debt is not allowable.

Bad debt

Specific bad debts are tax deductible and taxable in the following year. Bad debts written off are allowable and taxable upon eventual recovery.

Charitable contributions

Donations to approved charities and approved non-profit institutions formed for the purpose of social welfare, civic improvement, educational development, or other similar purposes are deductible. The minimum individual donation allowable is MWK 500. The minimum donation for other approved charities is MWK 250. In both cases, there is no maximum donation.

Social contributions

50% of social contributions towards construction of hospitals and schools, and sponsorship of school sports activities, are tax deductible.

Research and development (R&D) expenditures

Research expenditures are fully allowable as a deduction if they are for 'experiments and research relating to trade'.

Pension contributions

The tax-allowable amount of ordinary pension contributions made by an employer to an approved pension fund is subject to limitations. The limit with respect to each employee is the lowest of one of the following *per annum*:

- The actual contribution.
- Up to 15% of employee's annual salary.

Fines and penalties

Fines and penalties are not tax deductible in any way.

Taxes

Taxes are not allowed as deductible expenses, except where they are local taxes.

Net operating losses

Current taxable income may be offset against net operating losses brought forward, and current operating losses may be increased by net unexhausted trading losses brought forward. Losses may be carried forward for six years. Net operating losses may not be carried back.

Payments to foreign affiliates

A deduction is allowed for payments to foreign affiliates if such payments are expended wholly, exclusively, and necessarily for the production of income or for the purposes of trade, and it can be demonstrated that the transaction is at arm's length.

M

Group taxation

Group taxation is not permitted in Malawi.

Transfer pricing

There are transfer pricing regulations in Malawi. There is also a tax anti-avoidance provision that is used to check transactions between related parties. If transactions between related parties result in profits that are lower than what would be expected if the company was trading with an independent party, then the tax authorities can challenge the transaction.

Thin capitalisation

Effective 1 July 2015, thin capitalisation has been introduced in Malawi. However, the rules and regulations governing thin capitalisation have not been enacted. The acceptable level of gearing is therefore not yet provided.

Consequently, there are no restrictions on the level of external borrowings. If a Malawi company wants to borrow money from a foreign entity (whether or not a bank), it will require exchange control approval. In such instances, Reserve Bank does not consider the debt-to-equity ratio. It looks at the terms and conditions to see that they are what would be commonly available on the open market between unrelated parties. As you can see, this is an anti-transfer pricing measure.

Malawi

If a new application is made for exchange control approval of foreign ownership (normally this is when there is a new business/investment into Malawi), Reserve Bank will look at the external-debt-to-local-equity ratio. There are no fixed rules, but Reserve Bank does not normally like external debt to be more than twice equity (i.e. 1:2 equity to external debt). It does give approval for external ownership where the proportion of external debt is higher than this as it looks at each proposal on its own merit. The applicant would have to justify the higher level of external debt in such a case.

Controlled foreign companies (CFCs)

There is no CFC regime in Malawi.

Tax credits and incentives

Foreign tax credit

Malawi does not have a provision for recognition of a foreign tax credit because the taxation regime is based on source.

Export allowances

Exporters, including those manufacturing in bond, are entitled to claim additional tax allowances for non-traditional exports:

- On the export of non-traditional products, there is a 25% tax allowance on taxable income derived from exports.
- There is a 25% transport tax allowance on international transport costs for non-traditional exports. Traditional exports are tea, coffee, cane sugar, and unmanufactured tobacco and tobacco refuse.

Export allowances may not be claimed in respect of exports from mining operations.

Investment allowance

There is a 100% investment allowance on new and unused industrial buildings, plant, and machinery for taxpayers in the manufacturing industry. A 40% investment allowance for used versions of the same items is also applicable.

Farming operations

Farming operations receive a 100% allowance with respect to expenditures incurred during any year of assessment on the following:

- Stumping, levelling, and clearing of land.
- Work in connection with the prevention of soil erosion.
- Boreholes.
- Wells.
- Aerial and geophysical surveys.
- Water control work, including any canal, channel, dyke, furrow, and any flood control structure, whether or not of a permanent nature.
- Water conservation work, meaning any reservoir, water dam, or embankment constructed for the impounding of water. In the case of water conservation work, the Taxation Act limits the amount deductible to amounts actually paid, where the farmer incurs a liability in terms of any law relating to natural resources.

Where a farmer derives taxable income from growing timber, the farmer may elect that the taxable income is determined in accordance with the following rules:

- Carryforward the cost of planting the timber until the timber reaches maturity.
- Add annually to the cost of planting the timber an amount calculated as 5% of the cost of planting the timber until the timber reaches maturity.

- When the timber is sold, a proportionate amount of the total of the carryforward cost and annual added cost is deducted from the proceeds.
- In each year of assessment, the annual added cost is treated as taxable income in the hands of the farmer.

A farmer may not deduct any expenditure that has been recovered through a subsidy or claim a capital allowance on any assets where the expenditure has been recovered through a subsidy.

Mining operations

Mining operations receive a 100% allowance with respect to mining expenditures incurred during any year of assessment. Mining expenditures are defined as capital expenditures incurred in Malawi by a person carrying on or about to carry on mining operations in Malawi:

- In searching for or in discovering and testing or in winning access to deposits of minerals.
- In the acquisition of or of rights in or over such deposits, other than the acquisition from a person who has carried on mining operations in relation to such deposits.
- In the provision of plant and machinery and industrial buildings that would have little or no value to such person if the mine ceased to work.
- On the construction of any buildings or works that would have little or no value if the mine ceased to be worked.
- On development, general administration, and management prior to the commencement of mining operations.

Persons engaged in mining operations are not entitled to claim the export tax allowance on non-traditional exports or the 15% transport tax allowance on international transport costs for non-traditional exports.

M

Withholding taxes

Dividend WHT

Dividend WHT is a final tax and is charged at 10%. The dividend is not included in the taxpayer's taxable income, and the WHT is not deducted from the taxpayer's tax liability.

Resident WHT rates

Nature of payment	WHT rate (%)
Royalties	20
Rents	15
Payment of more than MWK 60,000 <i>per annum</i> for any supplies to traders and institutions	3
Commission	20
Payment for carriage and haulage	10
Payment to contractors and subcontractors in the building and construction industries	4
Payment for public entertainment	20
Payment of more than MWK 15,000 for casual labour	20
Services	20
Bank interest in excess of MWK 10,000	20
Fees	10

Non-resident WHT treatment under tax treaties

Recipient	WHT (%)				
	Dividends	Interest	Royalties	Rent	Management fees
Non-resident (1)	15	15	15	15	15
Treaty:					
France	0	0	0	15	0
Norway	5	10	5	15	0
South Africa	10	15	0	0	15
Sweden	0	0	0	15	0
Switzerland	0	0	0	15	0
United Kingdom	0	0	0	15	15

Notes

1. See *Non-resident tax in the Taxes on corporate income section*.

WHT exemption

There is WHT exemption on local supplies for compliant resident taxpayers. A 'compliant taxpayer' is defined as one that has settled all their tax liabilities with the tax authorities, including customs and excise.

Tax administration

Taxable period

The taxable period for income tax is a 12-month period ending on 30 June of each year. For businesses whose year-end is 31 July and 31 August, the applicable tax year-end is the preceding 30 June, while all the years ending in the subsequent months have the following 30 June as a year-end.

Tax returns

Income tax returns are due within 180 days after the end of the financial year.

Payment of tax

Tax is payable in quarterly instalments within 25 days of the month following the end of the quarter, with the balance of the tax being paid upon submission of the return.

Penalties and interest

The penalty for late submission of returns is MWK 200,000.

Interest on outstanding tax liability is charged at the commercial lending rate plus 5% per annum.

Tax audit process

The target for the tax authorities is to audit 30% of the taxpayers in any fiscal year. This translates to approximately three years per audit cycle.

Statute of limitations

There is no statute of limitations in Malawi, except for the mandatory seven-year period for keeping records.

Topics of focus for tax authorities

The tax authorities have recently focussed on transfer pricing and have consequently established a unit responsible for this. All multinationals are under scrutiny to check if they are dealing at arm's length with related entities.

Commissioner General's power to increase taxable income

The Commissioner General is empowered to increase the taxable income and liability of a taxpayer when of the opinion that the main purpose or one of the main purposes of a transaction was the avoidance or reduction of tax or where the main benefit that might have been expected to accrue from a transaction was the avoidance or reduction of tax.

Significant developments

Tax amnesty

The 2016 Budget Recalibration was announced on 28 January 2016. Among the measures introduced was a tax amnesty programme. This programme was first introduced for the period 1 May 2015 to 30 November 2015 and was introduced in the 2016 Budget Recalibration, a second time, for the period 1 March 2016 to 15 December 2016.

The tax amnesty programme is implemented in efforts to encourage tax compliance and expedite tax collection for the government. It provides a reduction in penalty and waiver of increase in tax for cases involving filing of backlog returns and settlement of taxes in arrears in respect of income tax, petroleum income tax, real property gains tax (RPGT), and stamp duty.

Green technology incentives

The Malaysian Investment Development Authority (MIDA) issued guidelines in December 2015 for green technology incentives. The guidelines extended the incentive period for existing green incentives and spelled out additional qualifying activities.

Please refer to the Tax credits and incentives section for details.

Taxes on corporate income

For both resident and non-resident companies, corporate income tax (CIT) is imposed on income accruing in or derived from Malaysia. The current CIT rates are provided in the following table:

Type of company	Chargeable income (MYR)	CIT rate for year of assessment 2016 (%)
Resident company (other than company described below)		24
Resident company:		
• with paid-up capital of 2.5 million Malaysian ringgit (MYR) or less	On the first 500,000	19
• that does not control, directly or indirectly, another company that has paid-up capital of more than MYR 2.5 million, and	In excess of 500,000	24
• is not controlled, directly or indirectly, by another company that has paid-up capital of more than MYR 2.5 million.		
Non-resident company		24

Petroleum income tax

Petroleum income tax is imposed at the rate of 38% on income from petroleum operations in Malaysia. An effective petroleum income tax rate of 25% applies on income from petroleum operations in marginal fields with effect from 30 November 2010. No other taxes are imposed on income from petroleum operations.

Local income taxes

There are no other local, state, or provincial government taxes on income in Malaysia.

Corporate residence

A company is tax resident in Malaysia in a basis year (normally the financial year) if, at any time during the basis year, the management and control of its affairs are exercised in Malaysia. Generally, a company is regarded as resident in Malaysia if, at any time during the basis period for a year of assessment, at least one meeting of the Board of Directors is held in Malaysia concerning the management and control of the company.

Permanent establishment (PE)

Generally, a non-resident entity is regarded as having a PE in Malaysia if it has a fixed place of business in Malaysia, where the business of the entity is wholly or partly carried on. A non-resident company may also be deemed to have a PE in Malaysia under certain circumstances, such as the following:

- It is represented by a dependent agent in Malaysia who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- It carries on supervisory activities in Malaysia for six/nine months in connection with a construction, installation, or assembly project.

M

Other taxes**Goods and services tax (GST)**

GST was implemented from 1 April 2015 at the standard rate of 6% and replaced the prior sales and service tax regime. Businesses making taxable supplies where the annual sales turnover exceeds MYR 500,000 must register for GST, which is administered by the Royal Malaysian Customs Department.

Import duties

Import duties are levied on goods that are subject to import duties and imported into the country. Import duties are generally levied on an *ad valorem* basis but may also be imposed on a specific basis. The *ad valorem* rates of import duties range from 2% to 60%. Raw materials, machinery, essential foodstuffs, and pharmaceutical products are generally non-dutiable or subject to duties at lower rates.

Excise duties

Excise duties are imposed on a selected range of goods manufactured and imported into Malaysia. Goods that are subject to excise duty include beer/stout, cider and perry, rice wine, mead, un-denatured ethyl alcohol, brandy, whisky, rum and tafia, gin, cigarettes containing tobacco, motor vehicles, motorcycles, playing cards, and mahjong tiles.

The rate of excise duties vary from a composite rate of MYR 0.1 per litre and 15% of the value for certain types of spirituous beverages, to as much as 105% of the value of motorcars (depending on engine capacity).

Property tax

Property tax is levied on the gross annual value of property as determined by the local state authorities.

Malaysia

Real property gains tax (RPGT)

RPGT is charged upon gains from disposals of real property, which is defined as:

- any land situated in Malaysia, as well as any interest, option, or other right in or over such land, or
- shares in a real property company (RPC), which is a controlled company holding real property or shares in another RPC or a combination of both, where the total defined value is not less than 75% of its total tangible assets.

RPGT is imposed on companies as follows:

Holding period from date of acquisition	RPGT rate (%)
Up to three years	30
In the fourth year	20
In the fifth year	15
Exceeding five years	5

Stamp duty

Malaysia imposes stamp duty, which is payable by the buyer/transferee, on chargeable instruments. Some examples are provided as follows:

Transaction type	Value chargeable	Stamp duty rate (%)
Sale/transfer of properties (excluding stock, shares, or marketable securities)	Market value	1 to 3
Sale/transfer of stock, shares, or marketable securities	Consideration paid or market value, whichever is higher	0.3
Service/loan agreements	Value of services/loans	0.5

Windfall profit levy

A levy is imposed on crude palm oil and crude palm kernel oil where the price exceeds MYR 2,500 per ton in Peninsula Malaysia, and MYR 3,000 per ton in the states of Sabah and Sarawak.

Contract levy

A levy of 0.125% on contract works having a contract sum above MYR 500,000 is imposed on every registered contractor by the Construction Industry Development Board.

Payroll taxes

Under the Monthly Tax Deduction scheme, employers are required to deduct the prescribed amount of tax from employees' salaries each month, to be remitted to the tax authorities not later than the 15th day of each calendar month.

Social security contributions

Employees' Provident Fund (EPF)

The Malaysian EPF is a compulsory pension scheme for all Malaysians. The EPF provides for compulsory retirement savings and contributions for all Malaysian citizens and Malaysian permanent residents who are working in Malaysia. It is not compulsory for non-Malaysian citizens and non-Malaysian permanent residents to contribute to the EPF, but they may elect to do so.

Contribution by	Malaysian citizens and permanent residents (mandatory)		Expatriates and foreign workers (voluntary)	
	% of contribution of employee's wages (minimum)			
	Employer	Employee	Employer	Employee
Up to age 60:				
Income > MYR 5,000	12.0%	11.0%*	MYR 5	11.0%*
Income ≤ MYR 5,000	13.0%		per person	
Age 60 and above, up to 75:				
Income > MYR 5,000	6.0%	5.5%*	MYR 5	5.5%*
Income ≤ MYR 5,000	6.5%		per person	

* Effective from March 2016 to December 2017, the minimum statutory rate of employees' contribution to the Malaysian EPF has been reduced from 11% to 8% (in respect of the employees below age 60), and 5.5% to 4% (for the employees between age 60 and 75). However, employees can opt to maintain the original 11% rate (or 5.5% for employees between age 60 and 75) by completing the requisite form and submitting it to their respective employers, who will then forward it to the nearest EPF office.

Social Security Organisation

Malaysia also has a Social Security Organisation (SOCSO) who administers the Employment Injury Insurance Scheme (EIIS) and the Invalidity Pension Scheme (IPS). All employees with monthly wages below MYR 3,000 are covered by the schemes, and employees who qualify for the schemes will continue to remain within the schemes notwithstanding that their monthly wages may subsequently exceed MYR 3,000. A monthly contribution must be made and may fall under one of two categories:

- Both the employer and employee make monthly contributions to EIIS and IPS. The sum is based on the employee's monthly wages and is restricted to a maximum of MYR 51.65 for the employer and MYR 14.75 for the employee.
- The employer makes a contribution to EIIS only for employees who are not eligible to be covered under the IPS, with the amount restricted to a monthly maximum of MYR 36.90.

Human resource development levy

Employers engaged in the manufacturing and services sectors that employ more than a specified number of employees must contribute to the Human Resource Development Fund (HRDF). The levy required to be paid is at the rate of 1% of the employees' monthly wages on a monthly basis.

Branch income

Tax rates on branch profits of a company are the same as CIT rates. No tax is withheld on transfer of profits to a foreign head office.

Income determination

Inventory valuation

Inventories are generally stated at lower of cost or net realisable value. Cost may be determined using one of several methods (e.g. unit cost, average cost, or first in first out [FIFO]), as long as the basis used is consistent for each year.

Capital gains

Generally, gains on capital assets are not subject to tax, except for gains arising from the disposal of real property situated in Malaysia, which is subject to RPGT (*see the Other taxes section for more information*).

Malaysia

Dividend income

Malaysia is under the single-tier tax system. Dividends are exempt in the hands of shareholders. Companies are not required to deduct tax from dividends paid to shareholders, and no tax credits will be available for offset against the recipient's tax liability. Corporate shareholders receiving exempt single-tier dividends can, in turn, distribute such dividends to their own shareholders, who are also exempt on such receipts.

Stock dividends

A Malaysian corporation may distribute bonus shares tax-free to shareholders.

Interest income

Interest income accruing in or derived from Malaysia or received in Malaysia from outside Malaysia is subject to CIT. However, exemption is provided on interest income received in Malaysia from outside Malaysia. Other exemptions granted include interest income earned by a non-resident person from deposits placed in designated financial institutions in Malaysia.

Foreign income

Under the Income Tax Act 1967, a Malaysian tax-resident company and a unit trust are not taxed on their foreign-sourced income, regardless of whether such income is received in Malaysia. However, income of a resident company from the business of air/sea transport, banking, or insurance is assessable on a worldwide basis.

Taxation on a worldwide basis does not apply when income attributable to a Labuan business activity of a Labuan branch or subsidiary of a Malaysian bank is subject to tax under the Labuan Business Activity Tax Act 1990. This exception will not apply if the Labuan entity has made an irrevocable election to be taxed under the Income Tax Act 1967 in respect of its Labuan business activity.

Relief from double taxation is available by means of a bilateral credit if there is a governing tax treaty or unilateral relief where there is no treaty. The relief is restricted to the lower of Malaysian tax payable or foreign tax paid if there is a treaty, or one-half of the foreign tax paid if there is no treaty.

Undistributed income of foreign subsidiaries is not taxable.

Deductions

Capital allowance

Capital allowance (tax depreciation) on industrial buildings, plant, and machinery is available at prescribed rates for all types of businesses. Initial allowance is granted in the year the expenditure is incurred and the asset is in use for the purpose of the business. Annual allowance at the prescribed rates calculated on cost is given for every year during which the asset is in use at the end of the basis year for the purposes of the business. The following are examples of capital allowance rates currently available:

Qualifying asset	Initial allowance (%)	Annual allowance (%)
Industrial building, whether constructed or purchased	10	3
Heavy machinery	20	20
General plant and machinery	20	14
Furniture and fixtures	20	10
Office equipment	20	10
Motor vehicles *	20	20*

Qualifying asset	Initial allowance (%)	Annual allowance (%)
Small value assets of less than MYR 1,300 (subject to a maximum total cost of MYR 13,000)	-	100

* Restrictions apply on maximum qualifying capital expenditure.

Accelerated capital allowance is available for certain types of industrial building, plant, and machinery, some of which includes buildings used as a warehouse, buildings used as a school or an educational institution, computers, information technology equipment, environmental protection equipment, waste recycling equipment, and plant and machinery used in specific industries.

Goodwill

Cost of acquisition of goodwill/amortisation of goodwill is not deductible, as these expenses are capital in nature.

Start-up expenses

In general, start-up expenses incurred before the commencement of a trade, profession, or business are capital in nature, as they were expended to put the person in a position to earn income. However, there are specific deductions allowed, such as incorporation expenses and recruitment expenses (conditions apply).

Interest expenses

Interest expense is allowed as a deduction if the expense was incurred on any money borrowed and employed in the production of gross income or laid out on assets used or held for the production of gross income. Where a borrowing is partly used to finance non-business operations, the proportion of interest expense will be allowed against the non-business income.

M

Bad debt

Debts must be specifically identified and reasonably estimated to be irrecoverable to qualify for a tax deduction.

Donations to charitable institutions

A deduction is allowed for cash donations to approved institutions (defined) made in the basis period for a year of assessment. The deduction is limited to 10% of the aggregate income of that company for a year of assessment.

Fines and penalties

Fines and penalties are generally not deductible.

Taxes

Taxes on income are generally not deductible, whereas indirect taxes are deductible.

Net operating losses

The carryforward of business losses and capital allowances is not available for deduction in subsequent years of assessment if the company does not meet the conditions of a shareholders' continuity test. However, per policy issued by the Ministry of Finance, these conditions currently apply only to dormant companies. Carryforward of business losses and capital allowances is unlimited in time for non-dormant companies.

Current-year business losses may be utilised against all sources of income. Utilisation of carried-forward losses is restricted to income from business sources only. Utilisation of capital allowance is also restricted to income from the same underlying business source.

Currently, there are no provisions to carry back losses to prior years of assessment.

Malaysia

Payments to foreign affiliates

A Malaysian company can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided that these are made at arm's length and the relevant withholding taxes (WHTs), where applicable, have been paid.

Group taxation

A company that qualifies for group relief may surrender a maximum of 70% of its adjusted loss for a year of assessment to one or more related companies if the following conditions are met by both the claimant and surrendering companies:

- Both must be resident and incorporated in Malaysia.
- Each has paid-up capital of ordinary shares exceeding MYR 2.5 million at the beginning of the basis period.
- Both have the same (12-month) accounting period.
- They are 'related' throughout the basis period for a particular year of assessment as well as the 12 months preceding that basis period.
- Both are not currently enjoying specific stipulated incentives, such as pioneer status, investment tax allowance, reinvestment allowance, etc.

'Related company' is defined by the Income Tax Act 1967 and involves the application of a two-tier test. The companies are regarded as 'related' if:

- either company owns at least 70% of the ordinary share capital of the other company or a third company owns at least 70% of each of the companies, and
- the holders of ordinary shares are entitled to at least 70% of the distributable profits and assets of the company on winding up.

Companies that wish to avail themselves of group relief must make an irrevocable election to surrender or claim the tax loss in the return to be filed with the Inland Revenue Board for that year of assessment.

Transfer pricing

The Director General of Inland Revenue (DGIR) is empowered to make adjustments on transactions of goods and services if the DGIR is of the opinion that the transactions were not entered into on an arm's-length basis.

The transfer pricing rules that apply to controlled transactions (defined, including financial assistance) specify the methods to determine the arm's-length price and the circumstances under which the DGIR may re-characterise transactions. The advance pricing arrangement (APA) rules that apply only to cross-border transactions outline the application procedures for unilateral, bilateral, or multilateral APAs.

Thin capitalisation

Under the provision for thin capitalisation, the portion of the interest charge that relates to the amount of financial assistance that is excessive is disallowed as a deduction. However, the implementation of specific rules relating to this provision has been further deferred to 31 December 2017.

Controlled foreign companies (CFCs)

There are no CFC rules in Malaysia.

Tax credits and incentives

Malaysia has a wide variety of incentives covering the major industry sectors. Tax incentives can be granted through income exemption or by way of allowances. Generally, when income is exempted, any dividends paid out of such exempt income are not taxable in the hands of the shareholders. Where incentives are given by way of allowances, any unutilised allowances generally may be carried forward indefinitely to be utilised against future statutory income. The following are the major types of incentives available in Malaysia.

Pioneer status (PS) and investment tax allowance (ITA)

Companies in the manufacturing, agricultural, hotel, and tourism sectors, or any other industrial or commercial sector, that participate in a promoted activity or produce a promoted product may be eligible for either PS or an ITA.

PS is given by way of exemption from CIT on 70% of the statutory income for five years and the remaining 30% is taxed at the prevailing CIT rate. An ITA is granted on 60% qualifying capital expenditure incurred for a period of five years to be utilised against 70% of the statutory income, while the 30% balance is taxed at the prevailing CIT rate.

A company that intends to undertake reinvestment before expiration of its PS or ITA status may opt for reinvestment allowance, provided it surrenders its PS or ITA status.

The PS and ITA incentives are enhanced for the following types of projects:

Qualifying industry	Pioneer status		Investment tax allowance	
	Incentive	TRP (1)	Incentive	TRP (1)
Projects of national and strategic importance involving heavy capital investment and high technology.	100% of SI (2)	5 + 5	100% QCE (3) against 100% SI	5
High-technology companies engaged in areas of new and emerging technologies.	100% of SI	5	60% QCE against 100% SI	5
Companies manufacturing specialised machinery and equipment.	100% of SI	10	100% QCE against 100% SI	5
Existing locally owned companies reinvesting in production of heavy machinery, specialised machinery, and equipment.	70% of increased SI	5	60% new QCE against 70% SI	5
Companies providing technical and vocational training, and private higher education institution providing qualifying science courses.	-	-	100% QCE against 70% SI	10
New companies investing and existing companies reinvesting in utilising oil palm biomass to produce value-added products.	100% of SI	10	100% QCE against 100% SI	5
Small scale companies (defined) that meet with specified conditions.	100% of SI	5	60% QCE against 100% SI	5
Hotel operators undertaking new investments in 4 and 5 star hotels in Sabah/Sarawak (for applications until 31 December 2016).	100% of SI	5	100% QCE against 100% SI	5
Hotel operators undertaking new investments in 4 and 5 star hotels in Peninsular Malaysia (for applications until 31 December 2016).	70% of SI	5	60% QCE against 70% SI	5

Malaysia

Qualifying industry	Pioneer status		Investment tax allowance

Providers of industrial design services (for applications until 31 December 2016).	70% of SI	5	-	-

Notes

1. Tax relief period (in terms of years).
2. Statutory income.
3. Qualifying capital expenditure.

Special incentive schemes

Reinvestment allowance

A resident company in operation for not less than 36 months that incurs capital expenditure to expand, modernise, automate, or diversify its existing manufacturing business or approved agricultural project is entitled to reinvestment allowance as follows:

- The allowance is given for 15 years from the first year of claim.
- An allowance of 60% of QCE incurred to be utilised against 70% of statutory income. The remaining 30% is taxed as the prevailing CIT rate.
- The 70% restriction does not apply to projects that achieved the level of productivity as prescribed by the Minister of Finance.
- The allowance will be withdrawn if the asset for which the allowance is granted is disposed of within five years.

A special reinvestment allowance is provided by extending the existing incentive period for up to three years, from year of assessment 2016 to 2018.

Approved service projects

A resident company undertaking a project approved by the Minister of Finance in the transportation, communications, utilities, and services subsectors may enjoy the following incentives:

- Investment allowance of 60% of QCE incurred within five years to be utilised against 70% statutory income.
- Alternatively, income tax exemption of 70% of statutory income for a period of five years.
- Buildings used solely for the purposes of such projects qualify for an industrial building allowance.

Export incentives

A resident company engaged in manufacturing or agriculture that exports manufactured products, agricultural produce, or services is entitled to allowances between 10% and 100% of increased exports (subject to satisfying prescribed conditions), which is deductible at up to 70% of statutory income.

Incentive for industrial area management

Newly established or existing companies, incorporated under the Companies Act 1956 and approved by a local authority for management of industrial estates, are given 100% income tax exemption of statutory income for five years, commencing from the date the company commences its specified activities (for applications from 1 January 2015 to 31 December 2017).

The company must undertake specified management, upgrading, and maintenance activities that comprise at least 70% of their annual income.

Regional operations

Principal hub

A principal hub is a locally incorporated company that uses Malaysia as a base for conducting its regional and global businesses and operations through management, control, and support of key functions, such as management of risk, strategic decisions, finance, and human resources. CIT exemption at tiered rates (0%, 5%, or 10%) is given for a period of up to ten years, subject to conditions being met (for applications from 1 May 2015 to 30 April 2018).

Other available non-fiscal incentives available include:

- No equity/ownership conditions.
- Foreign exchange administration flexibilities and expatriate positions.
- Customs duty exemption for raw materials, components, or finished products brought into free zones, licensed and bonded warehouses for production or repackaging, cargo consolidation, and integration before distribution to its final customers for goods-based companies.

International trading company

International trading companies are exempt for five years on income equivalent to 20% of increased export value, up to a maximum of 70% of statutory income. To qualify for the incentive, the company must meet the following three conditions:

- Be incorporated in Malaysia, with 60% Malaysian ownership.
- Achieve minimum annual sales of MYR 10 million, not more than 20% of which may be derived from the trading of commodities.
- Use local services (banking, finance, and insurance) and infrastructure (local ports and airports) in its operations.

M

Financial services sector

Islamic banking and takaful business

Effective from year of assessment 2007 until year of assessment 2016, full income tax exemption for ten years is granted to:

- Islamic banks licensed under the Islamic Financial Services Act 2013, on income from Islamic banking business conducted in international currencies.
- *Takaful* (Islamic insurance) companies licensed under the Islamic Financial Services Act 2013, on income from *takaful* business conducted in international currencies.

Islamic fund management

Full income tax exemption is available on statutory income on management fees received by resident fund management companies for managing funds of foreign and local investors established under Syariah principles (until year of assessment 2016). Such funds must be approved by the Securities Commission.

Special purpose vehicle (SPV) for Islamic financing

An SPV established solely for the purpose of issuance of Islamic securities under the Syariah principles (approved by the Securities Commission or established under the Labuan Companies Act 1990) is not subject to income tax and is not required to comply with administrative procedures under the income tax law. The company that establishes the approved SPV is deemed to be the recipient of the SPV's income and will be taxed accordingly, but that company will be allowed a deduction for the cost of issuance of Islamic securities.

Malaysia

Treasury management centre (TMC)

A locally incorporated company providing centralised treasury management services to its group of related companies (within or outside the country) in Malaysia may enjoy the following incentives (for applications until 31 December 2016):

- Income tax exemption of 70% of statutory income from qualifying treasury services rendered to related companies for five years.
- WHT exemption on interest payments on overseas borrowings from overseas used for qualifying activities.
- Stamp duty exemption on loan and service agreements for qualifying activities.
- Expatriates working in the TMC are taxed only on the portion of their chargeable income attributable to the number of days they are in Malaysia.

Tun Razak Exchange (TRX) (formerly known as Kuala Lumpur International Financial District)

The TRX is a joint property development comprising office towers for finance and banking, residences, and retail spaces in Kuala Lumpur. To accelerate the development of the TRX, the following incentives have been given:

- Stamp duty exemption on loan and service agreements for TRX Marquee status companies.
- Industrial building allowance and accelerated capital allowance for TRX Marquee status companies.
- Income tax exemption of 70% of statutory income for five years for property developers in TRX.
- Additional 50% tax deduction of rental payment incurred by TRX Marquee status companies for buildings used for business in TRX.
- Deduction of relocation cost incurred by TRX Marquee status companies to relocate to TRX.

It is also proposed that a full ten-year income tax exemption be given for TRX Marquee status companies.

Business Trust (BT)

BT is established under the Capital Market and Services Act 2007 and is a hybrid structure that combines elements of a company with elements of a unit trust. The BT is given income tax treatment similar to that of a company. The following incentives are given on a one-off basis at the initial stage of establishment of the BT:

- Stamp duty exemption on instruments of transfer of businesses, assets, or real properties acquired for instruments executed from 1 January 2013 but not later than 31 December 2017.
- The disposer of real properties or shares in RPCs to BT is given RPGT exemption for disposal of real properties or shares in RPCs from 1 January 2013 but not later than 31 December 2017.

Real estate investment trusts (REIT)/Property trust fund (PTF)

REIT/PTFs are vehicles that mobilise funds from unit holders comprising individuals and companies for investments in the property sector and related assets. REIT/PTFs are exempted from tax on all income, provided that at least 90% of their total income is distributed to unit holders. If the 90% distribution condition is not complied with, all income will be taxed at the prevailing income tax rate at the REIT/PTF level and tax credit will be claimed by the unit holders on distributions received from the REIT/PTF.

Unit holders are taxed as follows:

Unit holders	WHT rate
Individuals (whether resident or non-resident), body of persons, or other unincorporated persons	10% (until 31 December 2019)
Non-resident company	24%
Resident company	None (income to be included in annual tax return)
Institutional investor (pension fund, collective investment scheme, or other person approved by the Minister of Finance)	10% (until 31 December 2019)

Other incentives available are:

- RPGT and stamp duty exemptions on disposal/transfer of real property to an REIT/PTF.
- Tax deduction given for consultancy, legal, and valuation service fees incurred on the establishment of an REIT.

Foreign fund management company

A foreign fund management company providing fund management services to foreign clients is taxed at a concessionary rate of 10% in respect of income derived from the management of foreign funds, while income arising from services rendered to clients in Malaysia is taxed at the prevailing CIT rate.

A foreign fund management company is a Malaysian incorporated company licensed under the Capital Markets and Services Act 2007. Its activities are regulated by the Securities Commission.

Venture capital company (VCC)

A VCC investing in a venture company (VC), which is not the VCC's related company at the point of first investment, will be given a deduction on the value of investment made in a VC. Where the deduction is not claimed, the VCC is eligible for the following income tax exemption on income from all sources, other than interest income from savings or fixed deposits, and profits from Syariah-based deposits:

Conditions	Exemption period
• At least 70% of invested funds is invested in VC, or	10 years
• At least 50% of invested funds is invested in VC in the form of seed capital.	

Petroleum sector

The following incentives are provided for petroleum operations:

- Accelerated capital allowance on qualifying capital expenditure incurred from year of assessment 2010 to 2024 for petroleum operations in marginal fields.
- Investment allowance of 60% of qualifying capital expenditure to be utilised against 70% statutory income for a period of ten years.
- Exemption for a portion of chargeable income from marginal fields resulting in a reduction of the effective tax rate from 38% to 25% for petroleum operations in marginal fields.

Special economic regions

The following special economic regions were launched as part of the Malaysian government's plan for regional growth and development:

Economic region	Location
Iskandar Malaysia (formerly known as Iskandar Development Region [IDR]) www.iskandarmalaysia.com.my	Southern Johor

Malaysia

Economic region	Location
Northern Corridor Economic Region www.koridorutara.com.my	States of Perlis, Kedah, Penang, and northern Perak
East Coast Economic Region www.ecerdc.com.my	States of Kelantan, Terengganu, Pahang, and district of Mersing in Johor
Sabah Development Corridor www.sedia.com.my	Western, central, and eastern regions of Sabah
Sarawak Corridor of Renewable Energy www.sarawakscore.com.my	Central Sarawak

Special incentives, on top of the existing incentives given by the Malaysian government, will be customised for the purpose of each economic region. At present, special legislation has been enacted only in respect of Iskandar Malaysia (IM) to grant the following exemptions/incentives:

Entity	Incentive
IDR status company	10 years income tax exemption on statutory income from the provision of qualifying services to a person situated within designated nodes in the IDR or outside Malaysia. Operations commenced before 31 December 2015.
Developer	Income tax exemption on rental or disposal of buildings in designated nodes (until year of assessment 2020).
Development manager	Income tax exemption on statutory income from the provision of management, supervisory, and marketing services to an approved developer (until year of assessment 2020).
Non-resident service provider	Income tax and WHT exemptions on income from technical fees, interest, or royalties received (up to 31 December 2015) from approved developers and development managers in IDR designated nodes or IDR status companies.
Individuals working in IDR	A qualified knowledge worker is taxed at the rate of 15% on chargeable income from employment with a designated company engaged in a qualified activity (e.g. green technology, educational services, healthcare services, creative industries, financial advisory and consulting services, logistics services, tourism) in that specified region. Employment must have commenced between 24 October 2009 and 31 December 2015.

Incentive for less-developed areas

To enhance the special incentive package available in the economic corridors to include more less-developed areas, the following incentives are given to existing companies expanding to less-developed areas or newly established companies (for applications from 1 January 2015 to 31 December 2020):

- 100% income tax exemption for up to 15 years of assessment (5+5+5) commencing from the first year of assessment statutory income is derived, or
- income tax exemption of 100% of qualifying capital expenditure (ITA) that can be offset against 100% statutory income for ten years.

The company must undertake manufacturing or services activities in less-developed areas that create employment and rural development.

The other incentives available for less-developed areas are:

- Stamp duty exemption on transfer or lease of land or building.
- WHT exemption on fees for technical advice, assistance, or services, or royalty relating to manufacturing and services activities, up to 31 December 2020.

- Import duty exemption on raw materials and components, machinery, and equipment that are not produced locally and used directly in the manufacturing or services activity.

Information and communication technology (ICT)

MSC Malaysia

MSC Malaysia is Malaysia's initiative for the global information technology (IT) industry and is designed to be the research and development (R&D) centre for industries based on IT. It is an ICT hub equipped with high-capacity global telecommunications and logistics networks. MSC Malaysia is also supported by secure cyber laws, strategic policies, and a range of financial and non-financial incentives for investors. It is managed by the Multimedia Development Corporation (MDeC), a 'one-stop shop' that acts as the approving authority for companies applying for MSC Malaysia status.

MSC Malaysia status is awarded to both local and foreign companies that develop or use multimedia technologies to produce or enhance their products and services as well as for process development. MSC Malaysia companies are eligible for incentives, which include the following:

- PS (five + extendable by five years) of 100% on statutory income or ITA of 100% for five years for a new company or existing company on its additional income.
- Eligibility for R&D grants (for majority Malaysian-owned MSC Malaysia company).
- Exemption from indirect taxes on multimedia equipment.
- Unrestricted employment of local and foreign knowledge workers.
- Freedom to source funds globally for investments.
- Protection of intellectual property and cyber laws.
- No censorship of the internet.
- Globally competitive telecommunication tariffs and services guarantees, world-class physical and IT infrastructure, and excellent R&D facilities.

M

Green incentives

Green technology projects

Companies that undertake any of the following green technology projects will be eligible for an ITA of 100% of QCE against 70% statutory income for QCE incurred from 25 October 2013 to year of assessment 2020 (applications to be received by 31 December 2020):

- Renewable energy.
- Energy efficiency.
- Green building.
- Green data centre.
- Waste management.

Green technology services

Companies that provides services, such as advisory, design, feasibility study, testing, and commission, in the following areas will be eligible for income tax exemption of 100% of statutory income from year of assessment 2013 to 2020 (applications to be received by 31 December 2020):

- Renewable energy.
- Energy efficiency.
- Electric vehicle.
- Green building.
- Green data centre.
- Green certification and verification.
- Green township.

Malaysia

Green technology assets

Companies that purchase green technology assets listed on the MyHijau directory will be eligible for an ITA of 100% of QCE incurred from 25 October 2013 to year of assessment 2020 (applications to be received by 31 December 2020).

Waste eco parks (WEPs)

The following industry players in WEPs will be eligible for incentives for applications received from 1 January 2016 until 31 December 2020. The WEP incentive is to promote waste management in an integrated manner.

Entity	Incentive	Incentive period
Developer	70% income tax exemption of statutory income derived from rentals of buildings, fees from usage of waste collection and separation facilities, and fees from waste water treatment facilities located in the WEP.	Year of assessment 2016 to 2025
Manager	70% income tax exemption of statutory income derived from services related to management, maintenance, supervision, and marketing of the WEP.	Year of assessment 2016 to 2025
Operator	<ul style="list-style-type: none">100% income tax exemption for five years on statutory income derived from qualifying activities undertaken in the WEP, orITA of 100% of QCE incurred within five years, against 70% of statutory income.	Five years

Biotechnology industry

Companies undertaking biotechnology activity with approved bionexus status from Malaysian Biotechnology Corporation Sdn Bhd will be eligible for the following incentives:

- Full income tax exemption on statutory income for ten years from the first year in which the company derives statutory income or ITA of 100% on QCE incurred for a period of five years.
- Concessionary tax rate of 20% on statutory income from qualifying activities for ten years upon expiry of the tax exempt period.
- Accelerated industrial building allowance (over ten years) for buildings used solely for the purpose of its new business or expansion project.
- Exemption of import duty and sales tax on import of raw materials and machinery.

Research and development (R&D)

Contract R&D company

Companies that provide R&D services to third parties are eligible for:

- full exemption of their statutory income for a period of five years (extendable by five years), or
- ITA of 100% of QCE incurred within a period of ten (extendable by ten years) to be utilised against 70% of statutory income.

R&D company

The ITA incentive is also available to companies undertaking R&D services for their group and third parties.

In-house R&D

Companies undertaking in-house R&D projects are eligible for ITA at the rate of 50% of QCE incurred within a period of ten years (extendable by ten years) to be utilised against 70% of statutory income.

Commercialisation of resource-based R&D findings

A company that invests for the sole purpose of financing a project on commercialisation of resource-based and non-resource based (for applications until 31 December 2017) R&D findings (which is wholly owned by a public research institute or public institute of higher learning in Malaysia) is given a deduction equivalent to the value of that investment.

The subsidiary undertaking the commercialisation of R&D findings is granted 100% tax exemption on statutory income for ten years.

Other incentives

Shipping

A tax-resident person (including a partnership) carrying on shipping business using Malaysian ships is given income tax exemption of 70% of statutory income, determined on a per ship basis. The balance of 30% of statutory income is deemed to be total income chargeable to tax.

Incentives for Mines Wellness City (MWC)

The Malaysian Investment Development Authority has issued guidelines on incentives for MWC:

	Incentive	Application period
Operator	<ul style="list-style-type: none"> PS of 70% of statutory income for five years for income from qualifying activities in MWC. ITA of 60% on QCE incurred within five years, against 70% of statutory income. 	Applications received on or after 1 January 2013 to 31 December 2026.
Development manager	PS of 100% exemption on statutory income from management, consultancy, supervisory, or marketing services to MWC developer in MWC from the first year of assessment statutory income is derived until year of assessment 2023.	Applications received on or after 1 January 2013.
Developer	<ol style="list-style-type: none"> 100% exemption on statutory income from disposal of rights over land/building from the first year of assessment statutory income is derived until year of assessment 2023, or Income tax exemption on rental income from the first year of assessment statutory income is derived until year of assessment 2026, and Stamp duty exemption of 50% on instrument of transfer/lease of land/building. 	<ol style="list-style-type: none"> 1 and 2: Applications received on or after 1 January 2013. 3: Instruments executed from 1 January 2013 to 31 December 2023.

Capital allowance for increased automation

Manufacturing companies that have been in operation for at least 36 months are eligible for the following incentives, where they have incurred expenditure in automation equipment used directly in the manufacturing activities and resulting in reduced man hours and increased productivity:

- For high labour intensive industries (rubber products, plastics, wood, furniture and textiles industries): 200% automation capital allowance on first MYR 4 million QCE (years of assessment 2015 to 2017).
- Other industries: 200% automation capital allowance on first MYR 2 million QCE (years of assessment 2015 to 2020).

Foreign tax credit

See *Foreign income in the Income determination section for a discussion of the foreign tax credit regime.*

Malaysia

Withholding taxes

Corporations making payments of the following types of income are required to withhold tax at the rates shown in the table below. *See Note 5 for other sources of income subject to WHT.*

Notes

* Treaties pending ratification

Restricted tax treaties dealing with taxation of specific transport operations in international traffic have also been signed with Argentina and the United States.

- Dividends:
 - Malaysia has no WHT on dividends in addition to tax on the profits out of which the dividends are declared. Some treaties provide for a maximum WHT on dividends should Malaysia impose such a WHT in the future.
- Interest:
 - Interest on loans given to or guaranteed by the Malaysian government is exempt from tax.

Malaysia

- Interest paid to a non-resident by a commercial or merchant bank operating in Malaysia is also exempt from tax.
- 3. Royalty:
 - a. Approved royalty payments under certain treaty provisions are exempt from WHT.
 - b. Royalty income received by non-resident franchisors under franchised education scheme programmes by the Ministry of Education is exempted from tax.
 - c. Royalty does not include payments in respect of the operation of oil or gas wells, or the extraction of mineral deposits or other natural resources.
 - d. Royalty does not include amount paid in respect of motion picture films or of tapes for radio or television broadcasting.
 - e. Royalty does not include natural resource royalties.
 - f. Royalty does not include royalty paid in respect of (literary or artistic copyrights - Norway only) or of motion picture films or of tapes for television (or radio - Thailand only) broadcasting, or of the operation of a mine, oil well, quarry, or any other place of extraction of natural resources or of timber or other forest produce.
- 4. Special classes of income:
 - Contract payments to non-resident contractors in respect of services under a contract project are subject to a 13% deduction of tax (10% on account of the contractors' tax liability and 3% on account of their employees' tax liability). This deduction of tax at source does not represent a final tax, which is determined upon the filing of the tax return.
 - Payments made to non-residents in respect of the provision of technical services performed in Malaysia and rental of movable properties are subject to a 10% WHT (unless exempted under statutory provisions for purpose of granting incentives).
- 5. Other income:
 - WHT is also applied in respect of income of a non-resident from sources other than the following:
 - Sources shown in the preceding table.
 - A business source.
 - An employment source.
 - The rate of WHT on such income is 10%. This is applicable on payments made to residents of all the treaty partners listed, except for certain countries (including Germany, Turkmenistan, Bosnia and Herzegovina, Senegal, and Jordan) where the respective tax treaties have provided for such type of income to be taxed only in the contracting state in which the recipient is resident.

Tax administration

Taxable period

Assessment of income is on a current-year basis. A company is taxed on income from all sources (whether business or non-business) arising in its financial year ending in the calendar year that coincides with that particular year of assessment. For example, a company that closes its accounts on 30 June of each year is taxed on income earned during the financial year ending on 30 June 2016 for year of assessment 2016.

Tax returns

Under the self-assessment system, companies are required to submit a return of income within seven months from the date of closing of accounts. Particulars required to be specified in the return include the amount of chargeable income and tax payable by the company. The tax return is deemed to be a notice of assessment and is deemed served on the company upon the date the tax return is submitted.

'E-filing' or online filing of tax returns via the Internet is available. E-filing is encouraged by the Inland Revenue Board.

Payment of tax

Tax payable under an assessment upon submission of a tax return is due and payable by the last day of the seventh month from the date of closing of accounts.

Companies are required to furnish estimates of their tax payable for a year of assessment no later than 30 days before the beginning of the basis period (normally the financial year). However, a newly established company with paid-up capital of MYR 2.5 million or less that meets with certain specified conditions is exempted from this requirement for two years, beginning from the year of assessment in which the company commences operation. A revised estimate can be submitted in the sixth and ninth months of the basis period for a year of assessment.

Companies are then required to pay tax by monthly instalments (based on the estimates submitted) commencing from the second month of the company's basis period.

A company commencing operations in a year of assessment is not required to furnish estimates of tax payable or to make instalment payments if the basis period for the year of assessment in which the company commences operations is less than six months.

Tax audit process

Following the issuance of the general tax audit framework, tax audit frameworks for the financial and insurance industry and for WHTs were issued. These tax audit frameworks outline the rights and responsibilities of audit officers, taxpayers, and tax agents in respect of a tax audit. A tax audit may cover a period of one to three years of assessment determined in accordance with the audit focus. The years of assessment to be covered in a tax audit may, however, be extended depending on the issues identified during an audit.

Statute of limitations

Additional assessments can be made within five years after the expiration of the relevant year of assessment. This time limit is not applicable where fraud, wilful default, or negligence has been committed.

Topics of focus for tax authorities

Some issues that the tax authorities have focused on recently include:

- Deductibility of certain expenses (e.g. entertainment, provisions, management service fees, allocated expenses from foreign related counterparts).
- The correctness of tax incentive claims.

Other issues

Intergovernmental agreements (IGAs)

Malaysia and the United States (US) had, on 30 June 2014, reached an agreement in substance on a Model 1 IGA to implement the Foreign Account Tax Compliance Act (FATCA). Although not signed, Malaysia has, however, been included in the US Treasury's list of jurisdictions that are treated as having an IGA in effect with the United States.

Under the IGA, reporting Malaysia-based financial institutions will provide the Malaysian Inland Revenue Board with the required information of accounts of US persons. The information of which will then be exchanged between the Malaysian and US tax authorities. The IGA will be signed on a date to be announced.

Significant developments

The following are some of the more significant developments that were introduced in Maltese tax law during 2015 and the first few months of 2016:

- Partnerships may henceforth elect to be treated as companies for Maltese tax purposes.
- Maltese tax law has been updated so that the Maltese participation exemption will not apply on dividends in cases where tax deductibility was availed of in another European Union (EU) member state. This reflects the recent changes to the EU Parent Subsidiary Directive and entered into force on 1 January 2016.
- The possibilities of income tax consolidation and value-added tax (VAT) grouping are contemplated in Maltese tax law. Rules covering the precise terms and conditions of such income tax consolidation and VAT grouping are still to be issued.
- Wear and tear allowances previously restricted to industrial buildings, hotels, and car parks will also be available for office buildings.
- Introduction of a beneficial final 15% tax rate on commercial rent (excluding rents to group companies).
- The Common Reporting Standard (CRS) has been implemented into Maltese legislation with effect from 1 January 2016. Guidelines on the implementation and interpretation of CRS (including the EU Directive 2014/107) have also been issued by the Maltese Inland Revenue.
- Double taxation treaties (DTTs) with Andorra, Azerbaijan, and the Kingdom of the Netherlands in respect of Curaçao were signed by Malta but are still awaiting ratification.

Taxes on corporate income

A company incorporated in Malta is considered as both domiciled and resident in Malta and is consequently taxable on a worldwide basis. A non-Maltese incorporated company that is resident in Malta through management and control is subject to Maltese tax on income arising in Malta and on income received in/remitted to Malta.

Companies are subject to income tax at a flat rate of 35%. There is no corporate tax structure separate from income tax.

Petroleum profits tax

Petroleum profits tax is levied as income tax with similar deductions being allowed in respect of incurred expenditure. In the case of a Production Sharing Contract signed after 1 January 1996, any petroleum profits are taxed at the standard corporate tax rate of 35%. However, all other petroleum profits are subject to a 50% tax rate.

Insurance profits tax

Insurance profits tax is levied as income tax and subject to the normal standard tax rate of 35% as other corporate profits; however, the manner in which such profits are ascertained is subject to a number of detailed rules that take into account the special

nature of the insurance industry. In the case of non-resident companies, the computation is applied with reference only to business carried on in or from Malta.

Shipping profits tax

A tonnage tax system is applicable under Maltese law. Such regime covers profits from shipping activities as defined under the applicable regulations that are derived by qualifying Maltese-flagged and EU/European Economic Area (EEA) vessels as well as non-EU/EEA vessels satisfying certain additional rules. Furthermore, qualifying ship management activities are also entitled to the tonnage tax system.

Corporate residence

All companies incorporated in Malta are considered to be both domiciled and resident in Malta. Other bodies of persons (including companies incorporated overseas) are considered to be resident in Malta when the control and management of their business are exercised in the country.

Permanent establishment (PE)

Although Maltese tax legislation contains a number of references to the term ‘permanent establishment’, the term is not defined by Maltese legislation. Indeed, in terms of Maltese domestic tax law, a non-resident is, in principle, subject to Maltese tax on income arising in Malta, irrespective of the existence or otherwise of a PE in Malta (subject to any DTT provisions that would apply if in conflict with Maltese tax law).

In the event the Maltese Inland Revenue is required to interpret such a term, reference would typically be made to the definition contained in the Organisation for Economic Co-operation and Development (OECD) Model Convention.

M

Other taxes

Value-added tax (VAT)

Supplies of goods and services in Malta are subject to VAT at the standard rate of 18% (7% on accommodation in hotels and licensed premises; 5% on supply of electricity, the importation of works of art, collector’s items and antiques, certain confectionery, medical accessories, printed matter, and items for exclusive use by the disabled). Exports to countries outside the European Union, food, and certain other goods and services are exempt from VAT and provide a right to credit of VAT remitted.

Customs duties

Goods imported from outside the European Union may be subject to customs duties. A Customs Code provides for customs procedures and concepts, which are based on European Community requirements.

Excise duties

Excise duties are chargeable on certain energy products, certain alcoholic drinks, certain manufactured tobacco products, and mobile telephony services.

Property taxes

Maltese tax legislation does not contain any wealth taxes or other similar taxes on property, save for the property transfers tax outlined below.

Property transfer taxes

Transfers of immovable property situated in Malta are generally subject to a final withholding tax (WHT), which, in most cases, is charged on the transfer value of the property. In the case of transfers of Maltese immovable property made on or after 1 January 2015, the WHT on such transfer should, in general, be 8% or 10% (the latter

Malta

rate applying in the case where the property was acquired before 1 January 2004). Certain other rates of WHT may apply in specific circumstances.

Furthermore, as of 1 January 2016, the final tax rate on transfers of regenerated immovable property situated in urban conservation areas has been reduced to 5% of the transfer value, subject to the satisfaction of a number of conditions.

Stamp duty

Stamp duty is charged on, among other transactions, transfers of immovable property (5% for both residents and non-residents) and marketable securities (2%; 5% in the case of transfers of shares in property companies).

In the case of a transfer of immovable property situated within an urban conservation area or scheduled by the Malta Environment and Planning Authority, and where such transfer occurs between 1 January 2016 and 31 December 2016, the stamp duty chargeable is at a reduced rate of 2.5%. Such reduced rate is subject to the satisfaction of a number of conditions.

In the event that the market value of shares held by a person is reduced following a change in the company's issued share capital or voting rights and the value shifts onto the other shareholders, the transferor would be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a stamp duty liability (although certain exceptions/exemptions may apply).

Maltese legislation also provides for the possibility of a stamp duty exemption in a number of instances, subject to the satisfaction of certain conditions. Some of the more commonly availed of exemptions include the acquisition or disposal of marketable securities by or in the following: (i) licensed collective investment schemes; (ii) licensed persons providing management, administration, safekeeping, or investment advice to collective investment schemes; (iii) companies being owned more than 50% by non-Maltese residents and satisfying certain other conditions; and (iv) a company that carries on or intends to carry on more than 90% of its business outside of Malta.

Payroll taxes

In terms of the Final Settlement System (FSS) rules, an employer is required to withhold income tax and social security contributions at source from the employees' salaries. Such deductions of tax/social security should be forwarded by the employer to the Maltese Inland Revenue within specific timeframes.

Employer's social security contributions

Employers are required to pay social security contributions at the rate of 10% of the individual employee's salary and at fixed rates of 42.57 euros (EUR) per week for annual salaries exceeding EUR 22,138, in the case where the employee is born on or after 1 January 1962 (note that the employee is also required to pay an equivalent weekly amount).

The rates of social security generally increase annually and take effect from the commencement of the calendar year in question. These rates are generally published at the beginning of the year.

Branch income

The tax rate on branch income for branches set up in Malta is the same as that for Maltese resident companies. Other than the tax charged on a branch's income, no tax is withheld on transfers of profits to the head office.

Income determination

Inventory valuation

Inventory valuations are generally made at the lower of cost or market value. In general, the book and tax methods of inventory valuation will conform. However, the last in first out (LIFO) method is not accepted for taxation purposes. Obsolescence is accepted where proven, but there are no provisions to take into account the effects of monetary inflation on the inventory valuation.

Capital gains

Tax is chargeable on capital gains realised on the transfer of immovable property (real estate), shares and other securities, business, goodwill, business permits, copyrights, patents, trade names, trademarks, any other intellectual property (IP), interests in a partnership, and beneficial interests in a trust.

In respect of transfer of Maltese immovable property, a WHT system applies (*see Property transfer taxes in the Other taxes section*).

Furthermore, *similarly to the stamp duty situation set out in the Other taxes section*, in the event that the market value of shares held by a person is reduced following a change in the company's issued share capital or voting rights and the value shifts onto the other shareholders, the transferor will be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a tax on capital gains (although certain exceptions/exemptions may apply).

No tax is levied on investments that yield a fixed rate of return. A tax exemption applies in certain instances and subject to the satisfaction of certain conditions on the capital gain arising on the transfer of shares in a company listed on a recognised stock exchange other than shares held in certain collective investment schemes. If the capital gain arising on the transfer of listed shares is subject to tax, then special rules apply with respect to the calculation of the gain and such gain will be subject to tax separately at the rate of 15%.

Subject to the satisfaction of certain conditions, if the asset is transferred between group companies, no loss or gain is deemed to arise from the transfer. Note that a provision exists that brings to charge the transfer of shares in property companies (as specifically defined) that were originally subject to intra-group tax deferral when the transferor and the transferee cease to be members of the original group within six years from the date of such intra-group transfer.

Gains realised from the transfer of other assets fall outside the scope of the tax. Gains arising outside Malta and derived by a company that is either not domiciled or not ordinarily resident in Malta are not subject to tax. There are also a number of exemptions provided in the law. For example, capital gains realised by non-residents on transfers of units in Maltese collective investment schemes, similar investments relating to linked long-term insurance business and shares, or securities in Maltese companies (except for companies holding certain Maltese immovable property) are exempt from tax.

Rollover relief

Rollover relief is granted with respect to capital assets used in a business for a period of at least three years and transferred and replaced within one year by an asset used solely for similar business purposes (i.e. no tax is chargeable on the capital gain). In such instances, the cost of acquisition of the new asset is reduced by the gain on the transfer of the previous asset that would otherwise have been taxable.

Maltese tax law also provides for the surrendering and claiming of allowable losses between companies that form part of the same group (*see the Group taxation section*).

Malta

for more information) as well as for reorganisation relief, subject to certain specific conditions.

Dividend income

Dividends received by one resident company from another, whether or not a subsidiary, are taxable on the gross amount in the recipient's hands. If the distributed profits have been taxed, no further tax should be chargeable to the recipient company. However, for resident shareholders, if the corporate rate of tax in the year in which the profits are earned is lower than that in the year in which they are distributed, an amount equivalent to the difference in rates (topping up) is payable. If the distribution is made from untaxed income, the dividend will be tax-free in the hands of the recipient company.

Dividends and gains on disposal of shares received by a corporate investor from a non-resident company (or from a non-resident limited partnership), as well as profits from a PE, including a foreign branch, may qualify for a participation exemption in Malta, subject to the satisfaction of certain statutory conditions.

The participation exemption may also apply to gains upon the disposal of equity holdings in Maltese-resident entities. Distributions of taxed income by Maltese-resident companies are not subject to further tax under the full imputation system.

Stock dividends

A Maltese company may distribute bonus shares from profits, whether of an income or capital nature, and from share premium and capital redemption reserves. When bonus shares represent a capitalisation of profits, they are deemed to be dividends for tax purposes. Such bonus shares are subject to tax in the recipients' hands, gross of any tax paid at the corporate level on the relative profits, but tax credits equivalent to the gross-up of tax are available to stockholders.

Interest income

Interest is chargeable to tax under the provisions of Article 4(1)(c) of the Income Tax Act and subject to the standard corporate tax rate. Nevertheless, in the event the receipt of interest falls within the definition of 'investment income' as established by Maltese tax legislation, a WHT of 15% may be generally applicable. Furthermore, in the case of interest income payable to non-Maltese residents, such interest should be exempt from Maltese tax, subject to the satisfaction of certain statutory conditions.

Rental income

Corporates (and also individuals) in receipt of income from the rental of residential property have the option to apply a final 15% tax on the gross rental income (other tax rates may apply in specific circumstances).

In terms of the Budget Measures Implementation Act, 2016, the option of applying for the final 15% tax rate on gross rental income has been extended to the letting of commercial tenements and clubs, provided that such properties are not being rented to or from a related body of persons (as defined).

Otherwise, the rental income is subject to normal rates of tax, but special tax deduction rules apply.

Foreign income

A company is taxable on its worldwide income when it is ordinarily resident and domiciled in Malta. A company that is either not ordinarily resident or not domiciled in Malta is taxable on its foreign income only insofar as such income is remitted to/ received in Malta. Foreign tax is relieved by way of tax credits. This may occur under the terms of a DTT. Where no treaty exists, the foreign tax can be relieved through a system of unilateral relief. Relief for underlying tax is also granted with respect to dividend

income, either in terms of a DTT or as unilateral relief. Such relief may be available if, among other things, evidence of tax paid abroad is produced.

Profits of Malta resident companies are subdivided for Maltese tax purposes into five accounts: the Immovable Property Account, the Final Tax Account, the Maltese Taxed Account, the Untaxed Account, and the Foreign Income Account. The last of these includes, among other things, taxable profits of Maltese-resident companies resulting from foreign investments; profits of a foreign PE; and profits resulting from foreign investments, assets, or liabilities of an onshore bank licensed in Malta. Income allocated to the Foreign Income Account for which no evidence of tax paid abroad is available can qualify for a flat-rate foreign tax credit of 25%.

The Immovable Property Account includes profits and income derived directly or indirectly from immovable property situated in Malta. The Final Tax Account includes, among other items, profits that have been subject to a final tax at source or were exempt from tax and such exemption is extended to shareholders upon a distribution of such profits. The Maltese Taxed Account includes any other taxed profits while the Untaxed Account represents the difference between the distributable profits and the profits allocated to the other taxed accounts.

Under Malta's system of taxation of dividends, shareholders receiving distributions from the Maltese Taxed Account and/or the Foreign Income Account may be entitled to a tax refund of part or the full tax paid by the distributing Maltese company on such profits being distributed. The tax refund may be either a six-sevenths refund, a five-sevenths refund, a two-thirds refund, or a full refund of the tax suffered by the Maltese distributing company on the distributed profits. The type of the tax refund depends on the nature of the income to be distributed.

M

Deductions

The basic condition for deductibility of expenses is that deductions are allowable only with respect to expenditures that are wholly and exclusively incurred in the production of income.

In terms of the Budget Measures Implementation Act, 2016, in order to be in a position to claim a tax deduction, a further new rule has been introduced requiring a valid tax invoice/other equivalent document sustaining the expense. Such documents would have to be provided if requested by the Maltese Inland Revenue.

Apart from the general tax deductibility rule stated above, the Maltese Income Tax Act also provides a number of exceptions whereby specific expenses of a capital nature may also be tax deductible, subject to the satisfaction of the statutory conditions applicable thereto. The following are some further comments on specific items of expenditure.

Depreciation and depletion

Tax depreciation is computed on the straight-line method. The rate of depreciation on plant and machinery varies according to the category of the plant and machinery in question.

Maltese tax law prescribes the minimum number of years over which items of plant and machinery are to be depreciated as follows:

Category	Years
Computers and electronic equipment	4
Computer software	4
Motor vehicles	5

Malta

Category	Years
Furniture, fixtures, fittings, and soft furnishings	10
Equipment used for constructions of buildings and excavation	6
Catering equipment	6
Aircraft - aircraft airframe	6
Aircraft - engines	6
Aircraft - engine or airframe overhaul	6
Aircraft - interiors and other parts	4
Ships and vessels	10
Electrical and plumbing installations and sanitary fittings	15
Cable infrastructure	20
Pipeline infrastructure	20
Communications and broadcasting equipment	6
Medical equipment	6
Lifts and escalators	10
Air conditioners	6
Equipment mainly designed or used for the production of water or electricity	6
Other machinery	5
Other plant	10

The wear and tear rate on industrial buildings and structures (including hotels, car parks, and offices) may not exceed 2% *per annum*. New acquisitions of industrial buildings and structures are entitled to a concurrent extra 10% allowance in the year of acquisition. Tax depreciation is not required to conform to book depreciation.

The total allowances over the asset's useful life may not exceed 100% of its cost. If a surplus arises on disposal of a tax-depreciated asset, it is either added to the year's income or utilised to reduce the cost of any replacement. If the asset has been under-depreciated, a balancing allowance is granted.

No deduction is available for the depletion of natural resources.

The rules on tax deductions for wear and tear of plant and machinery provide for certain specific treatment in particular situations, including, among other things, the following:

- To establish the cost of an asset when it is transferred between related companies, the lower of the actual cost of the asset or the tax written-down value adjusted by any balancing charge or allowance incurred by the transferring company should be applied.
- Deductions for wear and tear are allowed only where proper records and documentation have been kept that support the cost of the respective assets.
- A proportional deduction is allowed where an asset is used partly in the production of income and partly for other purposes.

Intellectual property (IP)

Maltese tax law provides for a tax deduction for expenditure of a capital nature on IP or any IP rights incurred in the production of income. Such expenditure should be tax deductible over the life of the relevant IP but, in any case, over a minimum period of three consecutive years.

Goodwill

In the event that goodwill were to fall within the purport of IP for the purposes of the tax deductibility rules under Maltese tax law, then it may possibly be argued that an expenditure on goodwill may be tax deductible. However, this would need to be analysed on a case-by-case basis.

Start-up expenses

Certain pre-trading expenses (i.e. staff training, advertising, salaries/wages) are also allowed as a deduction, subject to the satisfaction of the following conditions:

- i The expenditure is incurred not more than 18 months before the commencement of the trade or business.
- ii The expenditure is not deductible in ascertaining the trading or business income of the person carrying on such trade or business but would have been so deductible under (i) above had it been incurred after that time.

In the event the above conditions are satisfied, such expenditure is treated as incurred on the day on which the trade or business is first carried on by the person.

Interest expenses

Interest on any borrowed money is an allowable deduction if it is paid on capital employed in acquiring income. The expense is allowable even though the borrowing would have been made for a capital purpose, but it is deductible only against the income derived in the same year from the employment of that capital. This special rule is in addition to the deduction for interest paid on money due on revenue account (such interest should be deductible under the general rule of deductibility), such as interest on trade debts or charged on normal business overdraft facilities. There is a restriction in respect of interest deductibility where the relevant advance is in connection with the financing of Maltese immovable property and subject to certain other conditions.

Bad debt

Bad debts incurred in any trade, business, profession, or vocation are allowed in the year they become bad if proved to the satisfaction of the tax authorities. No deduction is given for provisions for bad debts and for bad debts incurred in activities other than a trade, business, profession, or vocation. Any bad debt that is later recovered is deemed as income for the year in which it is received.

Charitable contributions

The general rule is that charitable contributions are not deductible for Maltese tax purposes unless expressly provided for by law.

Fines and penalties

The general rule is that fines and penalties are not deductible for Maltese tax purposes. Nevertheless, there is an exception to this general rule that provides that interest paid or payable by any person in terms of the Maltese VAT Act will be treated as expenses incurred in the production of the income of that person for income tax purposes.

Taxes

Technically, taxes suffered should not be deductible for Maltese tax purposes. However, the typical interpretation of the Maltese Inland Revenue is that as long as no relief of double taxation is claimed for the tax, then such tax should be available as a tax deduction.

Other significant items

Capital expenditures on scientific research and patents are written off over a number of years. In the case of scientific research, a deduction may be granted at 150% of the expenditure.

The Income Tax (Deductions) Rules of 2001 provide for specific conditions on deductions with respect to the use of cars and the payment of employee compensation. The cost on which capital allowances on certain motor vehicles may be claimed is restricted to EUR 14,000. Deductions for lease payments on cars are restricted in a manner that corresponds with the stated restriction of EUR 14,000 that applies to capital allowances on owned cars. With respect to payment of employee compensation, the

Malta

Deduction Rules require that in order for employee compensation to be allowed as a deduction for tax purposes in the hands of the employing company, it must have been duly accounted for. In particular, the employee compensation must have been reported on the appropriate forms and within the statutory time limit to the Maltese Inland Revenue. The rules also provide for restrictions on deductibility of emoluments with respect to the payment of certain fringe benefits to employees.

Net operating losses

Net operating losses may be carried forward indefinitely until absorbed. There is no carryback of losses, not even in terminal years. Unabsorbed capital allowances may be carried forward only against the same underlying source of income. Where the source ceases to exist, any remaining balance of unabsorbed capital allowances is lost.

The Budget Measures Implementation Act, 2016, has introduced certain rules relating to the discretion of the Commissioner for Revenue to allow tax losses/capital allowances to be taken over by the surviving company following a merger/division.

Payments to foreign affiliates

There are no restrictions on the deductibility of royalties, interest (except for interest, discount, or premium that are in any manner connected to Maltese immovable property and subject to the satisfaction of certain other statutory conditions, in which case, the interest/discount/premium should not be tax deductible in Malta), and service fees paid to foreign affiliates as long as the particular expenses are considered to be incurred in the production of the particular income and satisfy the applicable statutory conditions. Interest, discount, premium, or royalties derived by non-residents are exempt from tax, subject to the applicable statutory requirements.

Group taxation

Two companies that for tax purposes are resident exclusively in Malta, where one company is a 50% plus subsidiary of the other or both are 50% plus subsidiaries of a third Malta-resident company, qualify as members of a group of companies. Allowable losses may be surrendered by a company to another company within the group where both companies have concurrent accounting periods and form part of such group throughout the entire basis year for which this relief is claimed; however, such surrendering of losses may not occur where the surrendering or claimant company is carrying on the business of insurance. The possibility of income tax consolidation is contemplated in Maltese tax law; however, rules covering the precise terms and conditions of such tax consolidation are still to be issued.

Transfer pricing

Malta does not operate a sophisticated transfer pricing regime. There are some general anti-avoidance provisions and brief references to transactions at arm's length. However, the Maltese tax authorities will typically still consider it desirable that transactions between residents and non-residents broadly adhere to the arm's-length principle, that is, prices that would have been concluded between independent enterprises. However, no specific rules are available on the manner in which an arm's-length price is to be established.

Thin capitalisation

The Maltese tax regime does not contain thin capitalisation rules.

Controlled foreign companies (CFCs)

No anti-CFC rules or legislation are applicable in Malta.

Tax credits and incentives

Foreign tax credit

A credit for foreign taxes may be applied against the Maltese tax charge (*see Foreign income in the Income determination section for more information*).

Inbound investment

Investments by foreigners may be readily repatriated together with profits.

The Malta Enterprise Act and other related legislation provide a comprehensive package of incentives for inbound investment. These incentives are reserved for enterprises carrying on certain activities in Malta, mainly manufacturing activities. The focus is on high-value-added activities, and approval of a project's eligibility for benefits by the Malta Enterprise may be required. In general, eligibility does not depend on whether the company produces for the local or for export markets. The main tax incentives include the following:

- Enterprises carrying out qualifying activities, which mainly include manufacturing activities, qualify for investment tax credits whereby a percentage of qualifying expenditures are off-set against the tax charge (not against taxable income). The Investment Aid (July 2014) Regulations, 2014 (the 'Regulations') were issued on 24 October 2014, and guidelines in this regard have been published by Malta Enterprise. Such guidelines form the basis of the investment aid scheme that is in force until 31 December 2020. The Regulations apply to qualifying undertakings, which may benefit from investment tax credits in respect of certain qualifying activities, which are quantified as a percentage of qualifying expenditure incurred in terms of the guidelines. The tax credits range between 15% and 35% of the qualifying expenditure for projects commencing before 31 December 2017 and between 10% and 30% for projects commencing between 1 January 2018 and 31 December 2020, depending on the undertaking's size.
- Certain tax credits and special incentives may be available, subject to certain conditions. These tax credits are calculated on the basis of specific expenditures incurred by a company, while the special incentives grant tax exemptions on all or part of the chargeable income in specified circumstances.
- No further tax is charged on distributions from profits that had previously been taxed at a reduced rate. This benefit is also extended to amounts that were not subject to tax on account of the investment allowance, investment tax credits, and specific tax credits/special incentives.

The combination of certain tax treaties and Maltese domestic law lowers the Maltese tax rate on certain companies receiving certain industrial assistance (i.e. mainly assistance in terms of the Malta Enterprise Act, Business Promotion Act, and Business Promotion Regulations) to 15%.

International business profits

Other Maltese tax considerations that may be relevant in an international business context include the following:

- Maltese tax law provides for a beneficial tax treatment in respect of securitisation vehicles and similarly to re-insurance special purpose vehicles.
- A beneficial tax regime is available in respect of collective investment schemes.
- The Maltese fiscal implications relative to trusts and private foundations vary, depending on a number of circumstances, including: (i) the particulars of the parties involved (e.g. domicile or residence of the trustees/administrator or beneficiaries), (ii) the act or event under review (e.g. the settlement of property, transfers of beneficial interests, distributions of trust/foundation assets), and (iii) the nature of the trust/foundation assets. Furthermore, in certain circumstances, tax transparency provisions are set out in the law, particularly so as to allow, among other things, the

Malta

application of tax exemptions that would have applied to beneficiaries if there was no trust relationship or foundation.

- An option exists for a step-up in the cost of acquisition of assets situated outside Malta (including companies) effecting a change in domicile or residence or becoming Maltese companies as a result of cross-border mergers.

Other tax credits

A tax credit for micro enterprises is provided under the Micro Invest Scheme. The credit is of a maximum of EUR 30,000 over three consecutive years. Such tax credit is increased to a maximum of EUR 50,000 over three consecutive years to self-employed women, businesses that are majority owned by women, and start-ups established in Gozo.

Withholding taxes

Domestic corporations paying certain types of income are subject to deduction of tax-at-source obligations as follows:

Recipient	Dividends (%) (1)	Interest (%)	Royalties (%)
Resident corporations	0	35 (2)	0
Resident individuals	0/15 (5)	25 (2)	0
Non-resident corporations and individuals:

Notes

Treaties relating to international air and shipping traffic are in force with Switzerland and the United States (US).

The numbers in parentheses refer to the following notes:

1. No WHT is imposed on dividends distributed by Maltese companies (except for distributions of untaxed income to resident persons other than companies, *refer to Note 5*) because no additional tax is imposed on distributions other than the tax charged on the company with respect to the distributed profits. Malta makes no distinction between portfolio and substantial holdings. Under Maltese law, the dividend is grossed up by a figure representing the tax imposed on the company's profits when these were originally earned thereby. Under Malta's full-imputation system of taxation of dividends, the corporate tax is assimilated with the shareholder's personal income tax with respect to the dividend. In the shareholder's hands, the dividend is taxed at the gross amount, and the relevant amount of corporate tax offsets the shareholder's tax liability on income from all taxable sources with no further tax liability being imposed on the shareholder in respect of such dividends.
2. Withholding of tax may be required only where the interest is debenture interest or interest on any other loan advanced to a corporation for capital purposes. The WHT is, in effect, a prepayment of the recipient's final liability because a reassessment on income is made upon the submission of returns. Any resulting overpayment is refunded.
3. Interest and royalty income derived by non-residents is exempt from tax in Malta as long as certain conditions are complied with (e.g. they are not effectively connected to a PE of the recipient situated in Malta).
4. On the basis that Malta operates the full-imputation system of dividends, dividends are not subject to further tax when distributed by a company registered in Malta to a non-Maltese resident. Furthermore, if the rate provided under the Dividends Article in the respective treaty provides for a lower rate than the Maltese corporate tax rate incurred by the company on the respective profits (standard corporate tax rate of 35%), then this may result in a refund of Maltese tax in terms of Malta's full imputation system (such a refund situation may arise in the treaties with Austria, Bulgaria, Kuwait, Libya, and Romania). In a number of treaties, the rate of deduction and of tax is reduced to 15% in the case of companies enjoying certain tax incentives. *See also Note 1 with respect to Malta's full-imputation system of taxation of dividends.*
5. Distributions of dividends by a Maltese company where the dividend represents a distribution of untaxed income attracts a 15% WHT where the shareholder is (i) a Maltese resident other than a company, (ii) a non-resident person who is directly or indirectly owned and controlled by, or acts on behalf of, a Maltese domiciled and ordinarily-resident individual, or (iii) an EU/ EEA individual who has declared that at least 90% of worldwide income is derived from Malta.

Tax administration

Taxable period

The year of assessment is a calendar year, but a company may obtain authorisation from the Maltese Inland Revenue to have a different year-end (i.e. other than 31 December).

Tax returns

An income tax return for income earned during the previous year must be filed for every year of assessment. The tax return for a company must be submitted by the later of nine months following the end of the financial year or by 31 March following the year of assessment (however, in recent years, the Commissioner for Revenue has provided concessionary extensions to such statutory deadlines in the case where the tax return is submitted electronically). Penalties are incurred on late filing of returns. The tax return submitted by the company is a self-assessment, and the Commissioner for Revenue will not raise an assessment unless the Commissioner is not in agreement with the self-assessment.

Payment of tax

Companies pay tax in the currency in which their share capital is denominated.

During the basis tax year, a company is generally required to make provisional tax (PT) payments every four months. In general, the PT payments are based on the last self-assessment filed by the company, and payments are divided into three instalments of 20%, 30%, and 50%, respectively. Any tax liability that is still due at the tax return date after deducting all tax credits must be settled immediately with the submission of the return. Interest at 0.54% per month is charged on any unpaid tax.

In certain instances, especially for companies with mostly international operations, PT may not be payable, and the tax payment is normally paid on the earlier of the date profits are distributed or 18 months after the end of the relative accounting period.

Tax audit process

The Maltese Inland Revenue is entitled to raise an investigation and notify the taxpayer in writing that the department is initiating a tax enquiry. In such investigations, the taxpayer will typically be required to provide information and supporting documentation in respect of queries raised by the Revenue. The taxpayer has a right to appoint a representative on their behalf.

Statute of limitations

An assessment may be issued by the Maltese Inland Revenue no later than six years from the end of the respective tax year. In the event of non-full disclosure or wilful incorrect/misleading information, the aforesaid prescription period will not apply.

In respect of the payment of tax, additional tax, interest, or any penalty, an action may be taken during any time from the date on which it becomes due and payable up to eight years from that date or, where an assessment in respect thereof has been made, from the date on which that assessment becomes final and conclusive.

Topics of focus for tax authorities

The Maltese Inland Revenue is following closely international tax developments, such as the OECD Base Erosion and Profit Shifting (BEPS) initiative and the Anti-Tax Avoidance Package, and is also involved in discussions/representations on such matters in various fora.

Other issues

M

US Foreign Account Tax Compliance Act (FATCA)

The agreement concluded between the Republic of Malta and the United States to improve international tax compliance and to implement the FATCA (the 'Agreement') entered into force on 26 June 2014. On 18 November 2014, the FATCA Regulations were accordingly issued implementing the said intergovernmental agreement (IGA). Guidelines on the implementation and interpretation of the FATCA Regulations and the said Agreement have been issued by the Maltese Inland Revenue.

Furthermore, the Exchange of Information (United States of America) (FATCA) (Amendment) Order was enacted in 2015.

The Common Reporting Standard (CRS) and EU Council Directive 2014/107/EU

By virtue of LN 384 of 2015 entitled the 'Cooperation with Other Jurisdiction on Tax Matters (Amendment) Regulations, 2015', the EU Council Directive 2014/107/EU of 9 December 2014 amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation (DAC2) and the CRS have been accordingly implemented into Maltese legislation, with effect from 1 January 2016.

Guidelines on the implementation and interpretation of the DAC2 and CRS have also been issued by the Maltese Inland Revenue.

Significant developments

The conclusion of the negotiations on the India-Mauritius double taxation treaty (DTT) and the signing of the Protocol has ended an era of uncertainty. Investors have been re-assured of their tax positions for investments made prior to 1 April 2017, as these will remain exempt in India irrespective of when these are being disposed of.

The taxability of gains in India, as amended under the Protocol, applies only to shares, and it would appear that investments in mutual funds, derivatives, and debt instruments will not be impacted and will continue to be exempt from tax in India.

The effect of the Protocol on other jurisdictions that investors have traditionally used for investing into India cannot be ignored. For example, the exemption from tax on the sale of shares under the India-Singapore DTT Protocol is also likely to be void as this provision is specifically linked to the India-Mauritius DTT.

Overall, the Protocol has set new challenges around investing into India and may ultimately affect returns from investments. However, the reduced withholding tax (WHT) of 7.5% on interest payments may present new opportunities for Mauritius, as this is the lowest rate under any DTT that India has signed.

Taxes on corporate income

A corporation resident in Mauritius is subject to tax on its worldwide income. A non-resident corporation is liable to tax on any Mauritius-source income, subject to any applicable tax treaty provisions.

Corporations are liable to income tax on their net income, currently at a flat rate of 15%.

Mauritius has a credit system of taxation whereby foreign tax credit is given on any foreign-source income declared in Mauritius on which foreign tax of similar character to Mauritian tax has been imposed.

All corporate bodies incorporated in Mauritius (except companies holding a Category 2 Global Business Licence and certain approved funds and associations) are subject to income tax. This applies to all associations and other registered bodies. Income derived by local partnerships is shared and taxed in the hands of the partners. Foreign corporations carrying on business, or having a place of business, in Mauritius are also liable to income tax on income derived from Mauritius. Resident *sociétés* are not liable to corporate tax.

Société means a *société* formed under any enactment in Mauritius and includes:

- a *société de fait* or a *société en participation*
- a limited partnership

- a joint venture, and
- a *société* or partnership formed under the law of a foreign country.

Income tax is payable on total net income before distribution at the following rates:

Entity	Rate (%)
Global Business Category 1 (GBC1) companies and offshore trusts (<i>see below</i>)	15
Freeport operators or Private Freeport Developers carrying on Freeport activities other than providing goods and services on local markets	Exempt
Global Business Category 2 (GBC2) companies (<i>see below</i>)	Exempt
All other companies	15

Global Business Category 1 (GBC1) companies are liable to tax at the rate of 15%. However, they are entitled to a foreign tax credit equivalent to the higher of 80% of the Mauritius tax chargeable or the actual tax suffered abroad in respect of foreign-source income. The maximum effective tax rate is therefore 3%.

Global Business Category 2 (GBC2) companies incorporated under the laws of Mauritius are exempt from income tax and are not tax residents for treaty purposes. *For more information, see the Tax credits and incentives section.*

Alternative minimum tax (AMT)

AMT is repealed as of 1 July 2015.

Special levies

Banks

All banks are required to pay a special levy calculated according to their book profit and their operating income derived during, or its chargeable income in respect of, the preceding year. 'Operating income' means the sum of net interest income and other income before deducting non-interest expense.

The rates of the special levy on banks are as follows:

Year of assessment commencing	Rates
1 July 2015, 1 July 2016, and 1 July 2017	Segment A: 10% of chargeable income; Segment B: 3.4% on book profit; 1.0% on operating income

Segment A: Banking transactions with residents.

Segment B: Banking transactions with non-residents and corporations holding a Global Business Licence.

Except where the levy is computed on chargeable income, no levy shall be paid in a year where in the preceding year:

- the bank incurred a loss, or
- the book profit of the bank did not exceed 5% of its operating income.

Telephony service providers

Providers of public fixed or mobile telecommunication networks and services (including information and communication services, such as value added services and mobile internet), commonly known as 'operators', are liable to a solidarity levy. The solidarity levy is calculated according to the book profit and turnover for the preceding income year of the operator. The applicable rates are as follows:

Mauritius

Years of assessment commencing 1 July 2015, 1 July 2016, and 1 July 2017: 5% of the book profit and 1.5% of the turnover of the operator.

'Book profit' means the profit derived by an operator from all its activities and computed in accordance with International Financial Reporting Standards (IFRS).

No levy is to be paid in a year where, in the preceding year, the operator incurred a loss or the book profit of the operator did not exceed 5% of its turnover.

Corporate Social Responsibility (CSR) Fund

Every year, a company has to set up a CSR Fund equivalent to 2% of its chargeable income of the preceding year to implement a CSR Programme in accordance with its own CSR framework.

Note that the following entities are not subject to the CSR regulations:

- A company holding a GBC1 Licence under the Financial Services Act.
- A bank holding a banking licence under the Banking Act, in respect of its income derived from its banking transactions with non-residents or with corporations holding a Global Business Licence under the Financial Services Act.
- An Integrated Resort Scheme (IRS) company referred to in the Investment Promotion (Real Estate Development Scheme) Regulations 2007.
- A non-resident *société*, a foundation, a trust, or a trustee of a unit trust scheme.

The CSR Fund is either disbursed by the company on its own CSR framework or remitted to the Mauritius Revenue Authority (MRA) if not expensed fully.

A company has to submit, as an annex to its return of income, a statement showing the amount of CSR spent and the details of CSR projects implemented by the company during the income year.

Please also note the following:

- Any amount underpaid (not exceeding 20% of the Fund provided) in respect of a year can be carried forward to the following year to form a part of the CSR Fund for that following year, and the remaining amount should be remitted to the MRA.
- Any amount overpaid compared to the amount provided can be carried forward (in an amount not exceeding 20% of the amount provided) and offset in equal instalments against any amount to be remitted in respect of the five succeeding years. The carryforward does not apply to any excess arising in respect of more than two consecutive years.
- The CSR Fund in respect of a year includes any amount brought forward to that year.
- The CSR Fund shall apply in all respects to a resident *société*, other than a resident *société* holding a Global Business Licence under the Financial Services Act, and its net income shall be deemed to be its chargeable income and any distribution of its net income shall, for the purposes of the CSR Fund, be deemed to be dividends.

Local income taxes

Local income taxes levied by local administration, such as urban councils, do not exist in Mauritius.

Corporate residence

Under domestic law, a company is resident in Mauritius for tax purposes if it is incorporated in Mauritius or centrally managed or controlled in Mauritius.

A company not incorporated in Mauritius is resident in Mauritius only if it is centrally managed and controlled in Mauritius.

In the absence of a tax treaty, any income derived from the following is taxed in Mauritius:

- Any business carried on wholly or partly in Mauritius.
- Any contract wholly or partly performed in Mauritius.

A GBC2 company is not considered a resident in Mauritius for the purposes of DTTs.

Under a tax treaty, a company is considered a resident in Mauritius if it is incorporated in Mauritius or if its effective management is in Mauritius.

Permanent establishment (PE)

Generally, a PE is created under a tax treaty if one of the following criteria is met:

- Branch, office, factory, workshop, or installation used for extraction of natural resources.
- Building site, construction, installation, assembly, or supervisory services where the activity on the site lasts for a minimum of six months or 12 months, depending on the tax treaty.

Other taxes

Value-added tax (VAT)

VAT is charged by VAT-registered entities at the standard rate of 15% on all goods and services supplied by them in Mauritius (except those taxed at 0%), other than the following exempt supplies (not an exhaustive list):

- Bread, wheat, and cereal flours (excluding wheat flour).
- Medical, hospital, and dental services, including clinical laboratory services, services provided in a health institution, and veterinary services.
- Educational and training services provided by institutions approved by the Mauritius Qualification Authority.
- Construction of building for residential purpose, provided letter of intent relating to an IRS was issued prior to 1 October 2006.
- Sale or transfer of an immovable property, a building or part of a building, apartment, flat, or tenement.
- Banking services, except:
 - services provided to merchants accepting credit/debit card
 - services in respect of safe deposit locker, and issue and renewal of credit/debit cards
 - services for keeping and maintaining customer's accounts, and
 - services supplied by a bank holding a banking licence under Banking Act 2004 in respect of its banking transactions with non-residents and corporations holding a Global Business Licence.

As of 1 July 2015, an entity should register for VAT if turnover exceeds 6 million Mauritian rupees (MUR) a year. However, certain service providers (e.g. accountants and auditors, attorneys and solicitors, consultants, surveyors, valuers) should register for VAT irrespective of their turnover.

VAT-registered persons with annual taxable turnover exceeding MUR 10 million should submit their VAT return monthly and electronically by the end of the month following the end of the taxable month. Otherwise, VAT return filing is completed quarterly (i.e. within 20 days following the end of a taxable quarter). The taxable quarter is a period of

Mauritius

three months ending at the end of March, June, September, or December. Also, where the VAT-registered persons are filing pay-as-you-earn (PAYE) returns electronically under the Income Tax Act (ITA), they are required to file the VAT returns electronically by the end of the month following the taxable period.

Customs duties

Customs duty is levied on commodities imported into Mauritius. The rate of duty applicable is the rate in force under the Customs Tariff Act at the time the bill of entry is validated at the Customs.

A number of exemptions and concessions are available to industries, organisations, and persons under the Customs Tariff Act.

Excise taxes

An excise duty is levied at the time of importation on selected commodities, which includes spirits, vehicles, and petroleum products at corresponding prescribed rates. A levy is also chargeable on some specified excisable goods, whether the goods are for home consumption or not, at corresponding prescribed rates.

Campement site tax

Per the Land (Duties and Taxes) Act, every owner of a campement site situated in a specified zone is subject to an annual tax known as the campement site tax, varying between MUR 2 to MUR 6 per square metre.

The tax shall be payable to the authorised officer on or before 31 July in every year.

Land transfer tax

Per the Land (Duties and Taxes) Act, land transfer tax is levied on the transfer of land (excluding the value of any building thereon) and is payable by the transferor at the rate of 5%.

Land transfer tax is also payable at the above rates by the transferor upon transfer of the shares of a company owning immovable properties, based on the value of shares or property, whichever is the lower.

Leasehold tax

Per the Land (Duties and Taxes) Act, leasehold tax is levied on the registration of a deed of transfer of leasehold rights in state land. Both the lessor and the lessee are liable to leasehold tax (in equal proportion) at the rate of 20% on the open market value of the leasehold right at the time of transfer.

Registration duty

The Registration Duty Act provides for a duty at an effective rate of 5% of the sum of money paid as a condition of an exchange of immovable property, or a division in kind of immovable property, where such sum does not exceed MUR 100,000.

The transfer of shares of a company other than those listed on the Stock Exchange of Mauritius or traded on the secondary market is subject to registration duty if the company holds immovable property.

The following transactions are not subject to registration duty:

- A transfer of immovable property from ascendant to descendant (or vice versa).
- A transfer of property made to a company holding a letter of approval for the implementation of a project under the Real Estate Development Scheme, provided that the transferor holds shares in the company equivalent to at least the value of the land transferred.

- A transfer of immovable property or shares between companies forming part of a group of companies, as defined in the Companies Act 2001.
- A transfer of immovable property where such transfer takes place between companies having the same shareholders for the sole purpose of merging.

Stamp duty

Stamp duty is levied and paid to the Registrar General on every document at the time of registration, transcription, inscription, or erasure of inscription. Stamp duty varies from MUR 25 to MUR 1,000.

Payroll taxes

Every employer has to register with the MRA as an employer and has to withhold income tax from the emolument of the employee at the time the emolument is made available to the employee.

The employer has to remit the amount withheld within 20 days from the end of the month in which the tax was withheld. Where the employer has 25 or more employees, the PAYE return and tax withheld should be remitted electronically. In cases where the employer has less than 25 employees, the PAYE return and tax withheld may be remitted electronically.

Failure to comply with the above entails a penalty of 5% of the unpaid tax and an interest of 1% per month or part of the month during which the tax remained unpaid.

Social security contributions

National Pensions Fund (NPF)

Contributions to the NPF are payable by the employer at 6% of cash remuneration, up to a maximum remuneration of MUR 15,710 per month. Employees contributed to the NPF at 3%, subject to a maximum amount of MUR 471 per month.

National Savings Fund (NSF)

Employers are required to contribute 2.5% of remuneration to the NSF, subject to a maximum of MUR 393 per month per employee, and to pay a monthly levy of 1.5% of basic salaries and wages of every employee. Employees are required to pay a 1% levy, subject to a maximum amount of MUR 157 per month.

Branch income

Tax rates on branch income are the same as on corporate profits. No tax is withheld on the remittance of profits by way of dividend to a head office.

Income determination

Inventory valuation

Inventories should be valued at the lower of historical cost or net realisable value. The last in first out (LIFO) basis of valuation is not allowed for tax purposes.

Conformity is required between book and tax reporting. Where the MRA is not satisfied that the basis of valuation is acceptable (e.g. where the LIFO basis has been applied), it will make such adjustment as it believes is appropriate to determine the profits arising from the business carried on.

Capital gains

There is no tax on capital gains in Mauritius. However, certain transactions are taxed as ordinary business profit instead of capital gains. Where a transaction is in the nature of

Mauritius

trade, the MRA may take the view that it is an ordinary trading transaction and assess the gains derived as income.

Any gains derived from the sale of shares held for less than six months are classified as trading income and are therefore taxed as ordinary income.

Gains realised from the sale of any property or interest in property acquired in the course of a business, as part of a profit-making undertaking or scheme, are taxable as ordinary income.

Dividend income

Companies, whether resident or not, are exempt from tax on dividends received from resident companies.

Dividend income received from abroad by a company resident in Mauritius (non-GBC1 company) is subject to tax at the rate of 15%. Credit for any foreign tax withheld is given, subject to documentary evidence provided to the MRA.

Dividend income received from abroad by a GBC1 company is subject to tax at an effective rate of 3%.

Stock dividends

A resident company can distribute stock dividends (bonus shares) proportionately to all of its shareholders. Stock dividends *per se* or convertible into cash are not taxable in the hands of the recipient. Dividends in kind (i.e. other than cash or shares) are treated as taxable benefits.

Interest income

Interest income received by resident companies (non-GBC1 companies) is liable to tax at the rate of 15%.

A GBC1 company receiving interest income from abroad is liable to tax at the effective rate of 3%.

Interest income paid by any person, other than by banks or non-bank deposit-taking institutions under the Banking Act, to individuals and non-residents is liable to WHT at the rate of 15% (final tax).

Foreign income

Resident corporations are taxed on their worldwide income, but tax credit and treaty relief is generally available in order to avoid double taxation (*see Foreign tax credits in the Tax credits and incentives section for more information*).

Undistributed income of foreign subsidiaries is not subject to any special taxation as long as the income of the foreign subsidiary before distribution is not included in the accounts of the local parent company. Dividends paid by the foreign subsidiary to the local parent company will, however, be taxable to the latter, whether or not such dividends are actually received in Mauritius.

Deductions

Depreciation

Annual allowance rates vary between 5% and 100% of base value (unless stated otherwise), as per the following table:

	Rate of annual allowance	
	Percentage of	Cost
Capital expenditure incurred on	Base value	
Industrial premises, excluding hotels		5
Industrial premises dedicated to manufacturing	30	
Commercial premises		5
Hotels	30	
Plant or machinery:		
Costing MUR 50,000 or less		100
Costing more than MUR 50,000:		
Ships or aircraft	20	
Aircraft and aircraft simulators leased by a company engaged in aircraft leasing		100
Motor vehicles	25	
Electronic and high precision machinery or equipment, computer hardware and peripherals, and computer software		50
Plant and machinery (excluding passenger car) by a manufacturing company		50
Furniture and fittings	20	
Other	35	
Improvement on agricultural land for agricultural purposes	25	
Scientific research		50
Golf courses	15	
Acquisition or improvement of any other item of a capital nature that is subject to depreciation under the normal accounting principles		5

Tax depreciation need not conform to book depreciation. Depreciation is generally recaptured on disposal or sale when balancing charges or allowances are computed.

Goodwill

Goodwill amortised under normal accounting principles is not allowed as an expense for tax purposes. However, the cost amount can be capitalised, and an annual allowance of 5% of cost can be claimed.

Leasing agreements

There has been a substantial increase in leasing activity over the last decade. Where an asset is transferred under a financial lease agreement, the lessee is entitled to capital allowances on the value of the asset, including finance charges, as if it was an outright sale by the lessor.

On the other hand, the lessor cannot capitalise the leased assets in its books, and no capital allowance is claimed on the assets leased. However, the lessor is taxable on the interest income derived from the assets leased.

There are no special rules for operating leases.

Set-up costs

Set-up costs are not deductible for tax purposes as they are considered as pre-operational expenses.

Interest expenses

Expenditure incurred on interest is deductible, provided it is incurred in respect of capital employed exclusively in the production of income.

A request can be made by the tax authorities to support any claim made in respect of interest expense by a certificate from a qualified auditor certifying that the amount of

Mauritius

interest claimed has been incurred on capital employed exclusively in the production of gross income.

Interest paid by a GBC1 company to a non-resident is exempt from corporate tax.

The tax authorities may refuse to allow a deduction on expenditure incurred as interest where it is found that:

- the interest is payable to a non-resident who is not chargeable to tax on the amount of the interest, or
- the interest is not likely to be paid in cash within a reasonable time.

Bad debt

A provision for bad or doubtful debt is generally not deductible unless a court ruling has been obtained against the debtor.

Charitable contributions

Donations/gifts, whether to charitable institutions or not, are not deductible for tax purposes.

Fines and penalties

Fines and penalties are not deductible for tax purposes as they are expenses not exclusively incurred for the production of gross income.

Taxes

Income taxes and foreign taxes paid are not normally deductible; however, some taxes (e.g. municipal taxes relating to buildings, land transfer tax, irrecoverable input VAT) are deductible.

Other significant items

A bank or an approved financial institution may claim as deductions any irrecoverable loans due by a company in liquidation in respect of which winding-up procedures have started or by a company in receivership.

Net operating losses

Losses made in an accounting year are carried forward for a maximum of five years.

A company may claim to carry forward to an income year any loss it incurred in any former income year, provided the company can demonstrate a 50% continuity of shareholding at the end of those income years. Losses resulting from capital allowances can be carried forward indefinitely. Loss carrybacks are not permitted.

Where a company takes over another company engaged in manufacturing activities, or two or more companies engaged in manufacturing activities merge into one company, any unrelieved loss of the acquiree may be transferred to the acquirer in the income year in which the takeover takes place, on such conditions relating to safeguard of employment as may be approved by the Minister of Finance.

Payments to foreign affiliates

Royalties, interest, and service fees payable to foreign affiliates are allowed as expenses, provided they correspond to actual expenses incurred, are reasonable, and do not exceed what would be paid under an arm's-length agreement. There are certain limitations if the recipient of the interest is not liable to Mauritius tax. Royalties paid to non-residents by GBC1 companies, banks out of their foreign-source income as defined in the ITA, and trusts are tax-exempt.

Group taxation

There are no group taxation provisions in the Mauritius tax legislation other than the transfer of losses by tax incentive companies, sugar factory operators, subsidiaries located in the Island of Rodrigues, and manufacturing companies upon their take-over (see *Net operating losses in the Deductions section for more information*).

Transfer pricing

Mauritius does not have any specific transfer pricing legislation. However, it does contain an arm's-length provision requiring transactions between related parties to reflect a commercially objective value, which would be the amount charged for the services were the parties not connected.

Thin capitalisation

Mauritius does not have specific thin capitalisation legislation; however, it does have other anti-avoidance provisions as described below:

If a company has issued debentures to each of its shareholders, subject to the number, the nominal value, or paid-up value of the shares in that company, any interest paid on debentures and claimed as a deductible expense may be disallowed and treated as a dividend.

Controlled foreign companies (CFCs)

There are no CFC rules under Mauritius tax legislation.

Tax credits and incentives

Global Business Category 1 and 2 companies

A GBC1 company can trade with a Mauritian resident as well as non-residents.

However, any trading with residents should be only incidental to the main operations with non-residents and should be subject to the Financial Services Commission's (FSC's) approval.

Transactions made with a Mauritian resident are taxed at the rate of 15%, whereas transactions with non-residents are taxed at an effective tax rate of 3%.

The registration and application of GBC1 companies should be submitted to the FSC through a duly licensed Management Company on a prescribed form accompanied by the following:

- The certified supporting documents.
- The applicable processing fees and relevant fees.

A GBC1 company is tax resident in Mauritius and may apply for a Tax Residence Certificate (TRC) from the Director General of the MRA should this be required by the tax authorities in the jurisdiction in which the company is conducting its business.

Investors may benefit from an extensive network of DTTs. Entities holding a GBC1 Licence wishing to avail to the benefits of a DTT must obtain a TRC issued by the MRA.

A GBC1 company is encouraged to have more substance in Mauritius by ascertaining the following:

- It has at least two directors, resident in Mauritius, of sufficient calibre to exercise independence of mind and judgment.
- It maintains, at all times, its principal bank account in Mauritius.

Mauritius

- It keeps and maintains, at all times, its accounting records at its registered office in Mauritius.
- It prepares, or proposes to prepare, its statutory financial statements and causes or proposes to have such financial statements to be audited in Mauritius.

In addition to the requirements mentioned above, when determining whether a corporation is managed and controlled from Mauritius, the Commission shall also consider whether a corporation meets at least one of the following criteria:

- The corporation has or shall have office premises in Mauritius.
- The corporation employs or shall employ on a full-time basis, at the administrative/technical level, at least one person who shall be resident in Mauritius.
- The corporation's constitution contains a clause whereby all disputes arising out of the constitution shall be resolved by way of arbitration in Mauritius.
- The corporation holds, or is expected to hold, within the next 12 months, assets (excluding cash held in a bank account or shares/interests in another corporation holding a Global Business Licence) that are worth at least 100,000 United States dollars (USD) in Mauritius.
- The corporation's shares are listed on a securities exchange licensed by the Commission.
- The corporation has, or is expected to have, a yearly expenditure in Mauritius that can be reasonably expected from any similar corporation that is controlled and managed from Mauritius.

A GBC1 company can apply for a TRC to show substance in Mauritius. The TRC is generally issued within a period of seven days from the date of application, provided that the person has submitted the return required under the ITA 1995.

A GBC2 company is required to have, at all times, a registered agent in Mauritius. Only a management company shall act as the registered agent of a company holding a GBC2 Licence. A GBC2 company is defined as a resident corporation conducting business outside Mauritius and can engage in activities other than the following:

- Banking.
- Financial services.
- Holding, managing, or otherwise dealing with a collective investment fund or scheme as a professional functionary.
- Providing registered office facilities, nominee services, directorship services, secretarial services, or other services for corporations.
- Providing trusteeship services by way of business.

An applicant for a GBC2 Licence must submit the following forms/documents to the FSC through a management company:

- The application form, duly filled in and signed.
- The certified supporting documents.
- The applicable processing fees and relevant fees.

The fees payable to the FSC for registering a GBC1 and a GBC2 company are as follows:

Fee	GBC1 (USD)	GBC2 (USD)
Processing	500	100
Annual Licensing	1,750	235*

* This amount excludes the annual registration fee of USD 65, or such other fee as the Registrar of Companies may determine, payable to the Registrar of Companies.

The TRC is renewable on an annual basis and issued in two formats, one specific to India and one general for any other country.

A GBC2 company is a limited liability company incorporated in Mauritius. However, GBC2 companies are exempt from Mauritius tax and are not required to file tax returns. GBC2 companies are therefore not able to access the tax treaty network of Mauritius.

Companies in the Freeport zone

The income of a Freeport operator derived from Freeport activities is exempt from income tax, except for income that is derived from goods or services provided on the local market.

Income tax exemption for vessel owners

Owners of foreign vessels registered in Mauritius are exempt from income tax on income derived from the operation of such vessels, including any income derived from the chartering of such vessels. Owners of local vessels registered in Mauritius are also exempt to the extent that the income is derived from deep-sea international trade only.

Foreign tax credits

Generally, double taxation is avoided by means of unilateral credit relief for foreign tax paid. The net amount of foreign income that has borne tax is grossed up at the foreign rate of tax, and the foreign tax paid is allowed as a credit against the Mauritius tax payable. However, the tax credit cannot exceed the Mauritius tax referable to the relevant foreign income. Unused credit is not refunded.

Regarding foreign income derived from countries with which Mauritius has DTTs, a tax credit is given for foreign tax in accordance with the treaties. There are clauses in the DTTs that provide that income arising from certain specified foreign sources is to be exempt from Mauritius tax.

Mauritius has signed DTTs with 43 countries (*see the Withholding taxes section for a listing*).

The following treaties await ratification: Gabon, Kenya, Nigeria, Russia, and Morocco.

The following treaties await signature: Burkina Faso, Cabo Verde, and Jersey.

The following treaties are being negotiated: Algeria, Canada, Czech Republic, Gibraltar, Greece, Hong Kong, Lesotho, Malawi, Montenegro, North Sudan, Portugal, Republic of Iran, Saudi Arabia, Spain, St. Kitts and Nevis, Tanzania, Vietnam, and Yemen.

A GBC1 company may, in the absence of evidence of payment of foreign tax, claim as tax credit (presumed tax credit) an amount equal to 80% of the Mauritius tax chargeable on the foreign-source income. The presumed tax credit may also be claimed by a bank against the tax payable on income derived from banking transactions with non-residents and with GBC1 and GBC2 companies.

In the case of foreign dividends, the general tax credit includes foreign tax imposed on the profits out of which the dividends are paid (underlying tax), provided that the shareholding in the foreign company is at least 5%.

Mauritius also allows a tax-sparing credit under its local tax legislation.

Withholding taxes

There is no WHT in Mauritius for payments made by GBC companies to non-residents not carrying out any business in Mauritius. There is no WHT on dividends received from

Mauritius

resident companies and on payments made by a company having an annual turnover of less than MUR 6 million. The table below shows the rates of WHT applicable for the following payments:

Payment	WHT (%)
Interest payable by any persons (other than banks or non-bank deposit-taking institutions operating under the Banking Act) to individuals and non-resident companies	15
Royalties payable to:	
Residents	10
Non-residents	15
Rent	5
Payments to contractors and sub-contractors	0.75
Payments to providers of services (architect, attorney/solicitors, barrister, dentist, doctor, engineer, land surveyor, legal consultant, project manager in the construction industry, quantity surveyor, and property valuer)	3
Payments made by ministry, government department, local authority, statutory body, or the Rodrigues Regional Assembly on contracts, other than payments to contractors and sub-contractors and payments to providers of services as specified above:	
For the procurement of goods and services under a single contract, where the payment exceeds MUR 300,000	1
For the procurement of goods under a contract, where the payment exceeds MUR 100,000	1
For the procurement of services under a contract, where the payment exceeds MUR 30,000	3
Payments made to the owner of an immovable property or one's agent	5
Payments made to a non-resident for any services rendered in Mauritius	10

Reduced WHT rates with treaty countries are provided below.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	0	15	15
Treaty:	(1)		
Bangladesh, People's Republic of	10	(2)	(2)
Barbados	5	5	5
Belgium	5/10	10	0

United Arab Emirates	0	0	0
United Kingdom	10/15	(2)	15
Zambia	5/15	10	5
Zimbabwe	10/20	10	15

Notes

1. The domestic rate of WHT on dividends is 0%. For completeness, the treaty rates that would apply if the domestic rate was higher are provided.
2. Same rate as under domestic law.
3. 10% of the gross amount of the interest if the beneficial owner is a financial institution, an insurance company, or an investment company receiving income from financial investments; 15% in all other cases.
4. 10% of the gross amount of the interest if it is received by any financial institution (including an insurance company); 15% in all other cases.
5. 5% of the gross amount of the royalties received as consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematograph films, tapes, or discs for radio or television broadcasting. 15% is applicable on the gross amount of the royalties in any other case.

Tax administration

Taxable period

Companies are assessed for a year beginning 1 July and ending 30 June on their income for the preceding year ending 30 June. Where a company closes its accounts at a date other than 30 June, it may elect to adopt as a basis year the accounting year ending in the 12-month period preceding the year of assessment.

Tax returns

Every company, both taxpayer and non-taxpayer, must file a return of its income on the basis of the income year preceding the year of assessment. The return must be filed within six months of the financial year-end.

Payment of tax

Any tax due should be paid when the return is filed and within the six months deadline.

Advance Payment System (APS)

Every company (except non-resident trusts and non-resident partnerships) having gross income exceeding MUR 10 million or that has taxable income is required to submit an APS statement and pay any tax for the quarter immediately following the end of the accounting year.

Mauritius

Tax under APS can be calculated based on the following:

- 25% of taxable income for the accounting year immediately preceding the commencement of that quarter or
- the actual taxable income of the current quarter.

The APS statement shall be filed and tax (if any) shall be payable within three months from the end of the quarter.

Penalties

If timely payment is not made, a penalty representing 5% of the amount of tax due is payable. In addition, interest at the rate of 0.5% of the tax unpaid for each month or part of a month is payable until the tax is paid. A penalty of MUR 2,000 for each month or part of a month is also prescribed for failure to file a return, subject to a maximum of MUR 20,000.

Tax audit process

Tax audits are carried out on a sample basis throughout the year. Generally, the audits are fairly detailed, but more protracted enquiries are carried out into cases where fraud is suspected.

Statute of limitations

While there is no statutory time limit for recovering tax already assessed, the Director General is barred from making an assessment for a period beyond three years preceding the current tax year.

Topics of focus for tax authorities

The MRA pays special attention to the arm's-length nature of any transactions between related parties and evidence of foreign tax suffered predominantly for GBC1 companies in respect of their claim for actual foreign tax credit.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

On 27 December 2013, the government of the Republic of Mauritius and the government of the United States of America signed an Agreement for the Exchange of Information Relating to Taxes (the Agreement) to set the legal framework to enable exchange of tax information between the two countries. This was followed by the signing of another agreement known as the Inter-Governmental Agreement (Model 1 IGA) to improve international tax compliance and to implement FATCA. Both agreements have been published in the Government Gazette No. 61 of 5 July 2014 as GN 135 of 2014. Both the Agreement and the IGA entered into force on 29 August 2014.

The Agreement provides for exchange of tax information (upon request, spontaneous and automatic) between Mauritius and the United States. The IGA provides for the automatic reporting and exchange of information in relation to accounts held with Mauritius financial institutions by US persons and the reciprocal exchange of information regarding financial accounts held by Mauritius residents in the United States.

The MRA has issued guidance notes (available on MRA's website) to provide practical assistance to financial institutions, businesses, their advisers, and officials dealing with the application of FATCA.

Corporate Reporting Standards (CRS)

Mauritius signed the Organisation for Economic Co-operation and Development (OECD) Convention on Mutual Administrative Assistance in Tax Matters in June 2015 and, as a

member of the Early Adopters Group, the country had initially planned to implement the CRS early. The effective date of 1 January 2016 was subsequently deferred to 1 January 2017, and the first reporting will now start from 31 July 2018.

The Mauritius ITA was amended to enact the CRS, and the MRA is the competent authority to administer the process. Under the CRS, financial institutions (FIs) will need to report accounts held by non-residents to the MRA, which will be used for eventual exchange with other jurisdictions. In line with the OECD commentaries and handbook on the CRS, the MRA published a set of guidance notes in April 2016 (MRA Guidance Notes) to help identify which FIs have reporting obligations as well as set out the type of financial information and accounts that will need to be reported.

Significant developments

In autumn 2015, Congress approved modifications to the tax regime applicable to the 2016 fiscal year. The following reforms entered into force on 1 January 2016.

Accelerated deduction

Companies, including those dedicated to transportation infrastructure and those that invest in hydrocarbon-related activities and the generation of electricity, and individuals engaged in entrepreneurial or professional activities who have obtained revenues in the prior tax year of up to 100 million Mexican pesos (MXN) can apply an accelerated deduction for investments in new fixed assets that were acquired in the last quarter of the 2015 tax year, or in 2016 or 2017.

Tax Profit Accounts for Investments in Renewable Energy

Taxpayers dedicated exclusively to the generation of energy from renewable sources or efficient energy through co-generation systems and that have fully deducted their investments shall establish an account designated as a 'Tax Profit Account for Investments in Renewable Energy', which will allow for the distribution of dividends without payment of corporate income tax (CIT). This exception does not apply to the withholding tax (WHT) applicable to individuals who are resident in Mexico or abroad.

Thin capitalisation in the electricity industry

To determine the amount of debt that exceeds three times the accounting net equity of the taxpayer (under the thin capitalisation rule), debts incurred for the purpose of investment in infrastructure related to the generation of electricity are excluded from the calculation.

Reinvestment of profits

Individual shareholders of companies that reinvest profits generated from 2014 to 2016 are entitled to a reduction in tax on dividends of up to 5% to the extent such profits are distributed beginning in 2019.

Repatriation of capital

Legal entities (and individuals) that, in the first six months of 2016, repatriate, through the financial system, resources maintained outside of Mexico until 2014 shall be considered to have met their formal tax obligations, so long as they pay the respective tax within 15 days of the date of repatriation (without fees or fines) and satisfy other requirements, including that such investment remain in Mexico for three years.

Related-party transactions

As of the 2016 tax year, those taxpayers who are required to present an informational return with respect to their tax status (a DISIF for its acronym in Spanish) are required to present information relating to transactions carried out with related parties by 31 December of the year following the tax year in which the transaction occurred, by way of the following returns:

- Master Informational Return: Including information related to the multifunctional business group.
- Local Informational Return: Including information relating to the taxpayer and related-party transactions.
- Country-by-Country Informational Return: Including information on a tax jurisdictional level, based on the jurisdictions in which the multinational group operates, so long as the taxpayer is the controlling multinational company, a Mexican tax resident, or a foreign resident with a permanent establishment (PE) in Mexico and has been designated as the party responsible for presenting the tax return.

Tax deconsolidation

Companies that, until 2013, consolidated with their subsidiaries for tax purposes are entitled to reduce their deferred tax by crediting against the consolidated tax the tax on dividends paid between members of the group, and to reduce by up to 50% the consolidated tax by applying losses (valued at 15%) incurred by the controlled entities. Companies that exercise this option must meet several requirements, including participating for five years in a real-time verification program implemented by the Revenue Administration Service (*Servicio de Administracion Tributaria* or SAT).

In addition, the controlling company that incurred losses upon the alienation of shares issued by a controlled company and did not reverse such losses for purposes of calculating the deferred tax is entitled to rectify their tax status over ten payments.

Fiscal Certainty Agreement

The Mexican Executive Branch announced a unilateral agreement aimed to create fiscal stability and certainty to taxpayers, whereby the Mexican government committed, among others, to the following actions:

- Not proposing new federal taxes nor increasing the rates of existing federal taxes until the end of the current administration's term, which is 30 November 2018.
- Not limiting or eliminating the existing tax benefits or tax exemptions in regards to federal taxes until the end of the current administration's term, which is 30 November 2018.

FIBRA-E investment structure for the energy industry in Mexico

The FIBRA-E provides vehicles for investment by both investors and the general public that offer significant tax and economic advantages similar to the Master Limited Partnership (MLP) structures used in other countries (the main difference being the FIBRA-E does not allow for a tax deferral on the capital gain triggered by contribution of assets). This structure effectively permits a deferral of income tax of up to 5% of the taxable profits on the activity and eliminates the Mexican dividend WHT on distributions pertaining to the designated activities.

The FIBRA-E will be required to invest in entities (qualifying companies) that engage in, operate, and generate their revenues from one of the following 'exclusive activities':

- Those provided in Article 2 of the Hydrocarbons Law, not including the recognition, seismic testing, exploration, and production of hydrocarbons and the transfer, commercialisation, or sale to the public of hydrocarbons.
- The generation, transmission, and distribution of electricity.
- Investment projects involving contracts between the public and private sectors for the provision of services to the public sector or final user, provided that the projects are in operation at the time of the investments made and have a remaining term of at least seven years. The investment projects can be in any of the following areas:
 - Roads, highways, railways, and bridges.
 - Urban transportation systems.
 - Ports, maritime terminals, and port facilities.
 - Civilian airfields, excluding those with private services.

Mexico

- Growth of the nation's telecommunications network.
- Public safety and social regeneration.
- Drinking water, drainage, sewerage, and waste water treatment.

Taxes on corporate income

Federal corporate income tax (CIT)

CIT applies to Mexican resident taxpayers' income from worldwide sources, as well as to foreign residents on the income attributed to their PEs located in Mexico.

The federal CIT rate is 30%.

All corporate entities, including associations of a civil nature, branches, etc., are subject to the tax rules applicable to Mexican corporations (unless specifically ruled out, such as not-for-profit organisations).

Taxpayers engaged exclusively in agriculture, livestock, fishing, and forestry activities are subject to a reduction of 30% of their tax liability.

Provisions to recognise the effects of inflation for tax purposes in the areas of monetary assets and liabilities (annual monetary adjustment) and depreciable assets are provided in the income tax law, even though recent inflation rates have been decreasing.

Once a corporation has paid its CIT, after-tax earnings (i.e. earnings arising from the after-tax earnings account, *Cuenta de Utilidad Fiscal Neta* or CUFIN) may be distributed to the shareholders with no tax charge at the corporate level. A WHT on dividend payments to resident individuals or foreign residents (including foreign corporations) applies at the rate of 10%; this WHT does not apply to distributions of profits subject to corporate-level tax prior to 2014. If a corporation makes a distribution out of earnings that for any reason have not been subject to CIT, such as distributions of book earnings (i.e. not yet recognised for tax purposes in Mexico), the corporation will also be subject to CIT on the grossed-up distributed earnings (gross-up factor is 1.4286).

Tax paid on dividends distributed in excess of CUFIN can be credited against the CIT of the year or in the two fiscal years following the year in which the tax on the non-CUFIN distributions was paid. The CUFIN of the tax years in which the credit is applied must be reduced by an amount equal to the grossed-up dividend distribution.

Local income tax

There are no state taxes on corporate net income.

Corporate residence

The federal tax code provides that corporations are deemed residents in Mexico if the principal centre of administration or the effective place of management is located in Mexico. A specific definition of 'tax resident' in any tax treaty overrides domestic law definitions, provided the taxpayer is eligible to apply the treaty.

When a company ceases to be a Mexican resident in terms of the Mexican federal tax code or any tax treaty, it is deemed to be liquidated for tax purposes. In such cases, a notification is required at least 15 days before the change, and the CIT return must be filed with the Mexican tax authorities within 15 working days following the date on which the change of tax residency takes place.

Permanent establishment (PE)

The income tax law considers a PE to be any place in Mexico where business activities or services are carried out or rendered by non-residents, such as agencies, offices, mining exploration sites, or any other place of exploration, extraction, or exploitation of natural resources, regardless of the length of time involved.

A foreign insurance company could also be considered as having a PE when it engages in activities consisting of insuring risk or collecting premiums (with the exception of reinsurance activities) in Mexico through a party other than an independent agent.

Sites used for display, storage, or purchasing facilities; inventories imported in-bond to be processed by a third party; short-term construction services; and offices to carry out auxiliary or preliminary activities and information gathering or scientific research are not considered to create a PE in Mexico. Non-residents may also keep merchandise in bonded warehouses (including merchandise delivered for importation into Mexico) without being considered as having a PE.

Based on the Hydrocarbons Law, foreign residents are deemed to have a PE when conducting certain oil and gas activities in Mexico for more than 30 days. This implies that the foreigner would need to satisfy all enrolment, compliance, documentation, withholding, and tax filing and payment obligations applicable to Mexican branches of foreign residents.

A non-resident is not considered to have a PE in Mexico as a result of the legal or economic relationships maintained with companies carrying out certain inventory processing activities (i.e. *Maquiladoras*) that process goods or merchandise maintained in Mexico by the non-resident by using assets provided by the non-resident or any related party, as long as certain requirements are met. The requirements include the conditions that the non-resident be resident in a tax treaty country and that the *Maquiladora* complies with the transfer pricing provisions provided in the Mexican income tax law.

Maquila operations are generally defined as those with the following characteristics:

- Raw materials are supplied by a foreign resident (with which a *Maquila* contract is in place) and are temporarily imported to be processed, transformed, or repaired and are subsequently exported, including, for these purposes, virtual import-export operations.
- The *Maquila* is also permitted to import goods in accordance with the permanent importation regime. Additionally, local purchases are allowed, as long as such goods are consumed in production and/or exported with the temporarily-imported inventory.
- The processing, transformation, or repair of goods must be performed with temporarily-imported machinery and equipment (M&E) that is the property of the foreign principal. In this regard, the foreign principal must own at least 30% of such M&E. It is important to mention that this M&E may not have been previously owned by the *Maquila* or by any other Mexican-related party.

Companies that were operating under an IMMEX program (*Maquiladoras*/in-bond processing companies) prior to 31 December 2009 (grandfathering rule) were not obligated to comply with the rule requiring that 30% or more of the M&E used in the *Maquila* operation be owned by the foreign principal; however, beginning in 2014, all *Maquiladoras* are subject to the new *Maquiladora* rules. In this regard, a two-year period is established for *Maquiladoras* operating under the grandfathering rule to comply with this requirement on a prospective basis.

Parties resident abroad and engaged in *Maquila* operations through shelter *Maquila* companies may not be considered as creating a PE in Mexico when certain requirements

Mexico

are met and certain information is provided to the Mexican Tax Administration in relation to the gross revenues earned and income taxes paid by its non-Mexican-related party. This PE protection is limited to four years.

A definition of PE in any tax treaty overrides domestic law definitions where the taxpayer is eligible to apply the corresponding tax treaty.

Other taxes

Value-added tax (VAT)

VAT is payable at the general rate of 16% on sales of goods and services, as well as on lease payments and imports of goods and services. The sale of medicines, as well as the sale of most food products, is zero-rated. The principal VAT-exempt transactions are the sale of land, credit instruments (including equity shares), residential construction, interest paid by banks, medical services, education, salaries and wages, rentals of residential property, and the sale of non-amortisable participation certificates on real estate investment trusts (REITs), provided specific requirements are satisfied.

Temporary imports under IMMEX and similar programs are subject to the general 16% VAT rate. Such imports may qualify for VAT relief when obtaining special certification from the tax authorities related to the adequate control of such imports. The relief is applied in the form of an immediate VAT credit when clearing customs, which means that the temporary import is done on a cashless basis for VAT. Companies not covered by the certification may apply the same cashless treatment if they post a bond as payment guarantee.

The VAT law also taxes sales in Mexico of temporarily imported goods by non-residents to (i) other non-residents, (ii) *Maquiladoras*, or (iii) companies in the automotive industry.

The 0% VAT rate, which generally means that no VAT is payable, is applicable to a substantial number of transactions, including the sale of books, magazines, and newspapers published by the taxpayer, the exportation of goods and certain services (including some *Maquiladora* activities intended for exportation), the sale of certain basic foodstuffs, agricultural goods and services, sales and rentals of farm M&E, and other specified transactions.

VAT paid by business enterprises on their purchases and expenses related to VATable activities (including activities subject to the 0% VAT rate) may usually be credited against their liability for VAT they collect from customers on their own sales, services rendered, etc. The input VAT credit on goods or services of a general nature, or those not specially identified with either taxable or exempt activities for VAT purposes, is computed based on a VAT ratio proportional to the VATable versus VAT activities (taxable and exempt) carried out by the taxpayer. Creditable VAT paid on purchases and expenses in excess of VAT collected from customers is recoverable via either a refund, offset against other Federal taxes, or a credit against subsequent VAT liabilities.

VAT is a 'cash basis' tax, with few exceptions (e.g. VAT on some types of interest must be paid on an accrued basis); consequently, only the receipt of payment for goods or services triggers the output VAT liability, and an input VAT credit may be claimed only when the taxpayer pays VAT to its providers of goods and services. VAT is calculated for each calendar month as a final tax. In addition, VAT overpayments may be used to offset the tax liabilities arising from other federal taxes.

VAT must generally be withheld by Mexican residents acquiring or leasing tangible goods from non-residents if such foreign residents do not have a PE in the country to which income is attributed. Mexican business entities are required to withhold VAT

on payments to individuals or entities for services consisting of ground transportation of goods. Mexican corporations must also withhold VAT on commissions paid to individuals, as well as on independent services rendered by Mexican individuals, and on tangible goods leased from individuals.

An information return related to the VATable activities carried out by the taxpayer must be filed on a monthly basis. Definitive monthly VAT payments are required by the 17th day of the immediately following month.

Customs duties/import tariffs

Mexico's commercial conditions provide an excellent business and investment opportunity. Mexico is a member of the World Trade Organization (WTO), the Asia-Pacific Economic Cooperation Mechanism (APEC), and the Organisation for Economic Co-operation and Development (OECD).

Mexico lies in a strategic geographical location for international trade, sharing borders with the United States (US) and representing an easy entry to the rest of Latin America, while also facing Europe and Asia.

Mexico has signed multiple Free Trade Agreements (FTAs), which provide for preferential duty rates on foreign trade operations with many more countries. FTAs signed by Mexico include the North American Free Trade Agreement (NAFTA) and agreements with the European Union (EU), the European Free Trade Association (EFTA), and Japan, among many other countries. Most FTAs provide 0% duty rates for almost 90% of the goods to be imported into Mexico.

General Import Duty rates range from 0% to 35%, but most imports fall within the range of 3% to 20% (exceptionally, certain food products, shoes, and textiles pay higher duties).

In general, temporary imports are exempt from customs duties (except for fixed assets in certain transactions). *For VAT payments on temporary imports, see above.*

Excise tax

The excise tax law (*Impuesto Especial Sobre Producción y Servicios* or IEPS) levies substantial federal excise rates on the importation and/or sale of certain taxable items, such as gasoline (% variable), beer (26.5%), wine (26.5% to 53%), spirits (53%), and cigarettes and other tobacco products (160% plus an additional quota), and on certain services related to these activities, such as commission, mediation, and distribution of excise taxable items, as well as services for raffles and gambling (30%). Excise tax is also applicable to certain telecommunications services (3%).

The excise tax law applies to soft drinks at MXN 1 per litre and to 'junk' food at an 8% rate. In both cases, the excise tax is payable by the producer or importer.

In general terms, goods are exempt from IEPS when exported. The input IEPS paid by exporters on their purchases is not creditable, and that tax becomes an additional cost.

IEPS is payable (output tax) and creditable (input tax) on a cash basis. It is payable on the date that the charge invoiced is collected from the client and can be credited when the respective payment is made to the supplier. On imports, IEPS is creditable when paid at the customs offices.

In certain cases, the IEPS legislation allows taxpayers that are not subject to this tax to credit IEPS paid on the acquisition and/or the importation of certain goods.

There is a specific procedure to calculate the tax for beer producers, bottlers, and importers; however, the tax can never be lower than 26.5%.

Mexico

Among other obligations, IEPS taxpayers must file information returns before the Mexican Tax Administration periodically.

Property taxes

Annual taxes on real property are levied by Mexico City and all the states at widely varying rates applied to values shown in the property tax records. Assessed values have increased substantially recently in Mexico City and some other areas.

Title transfer taxes

The transfer of real estate is, almost without exception, subject to a variable transfer tax at rates averaging 3% to 4%. The tax is levied by most states and Mexico City.

Stamp taxes

There are no stamp taxes in Mexico.

Payroll taxes

Most Mexican states levy a relatively low tax on salaries and other income earned by employees, which is payable by the employer (e.g. Mexico City imposes a 2% payroll tax payable by the employer).

Social security contributions

Employers and employees are required to make contributions to the social security system. These contributions are based on the daily salary plus any other compensation paid to the employee.

Compulsory profit sharing

Although not a tax, every business unit with employees (irrespective of the type of organisation) is required to distribute a portion of its annual profits among all employees, except general directors and managers. The amount distributable to the employees is 10% of an adjusted taxable income. The main difference between the taxable income and the profit sharing base is that the tax losses cannot be applied against the profit sharing base.

No profit sharing is paid during the first year of operations. Also, special rules apply for personal service entities and for entities deriving their income from rental activities, both of which can limit their profit sharing payment to the equivalent of one month of regular salary.

The profit sharing amount paid out is a deductible item for CIT purposes, provided certain requirements are met.

Vehicle taxes

There is no federal tax on the ownership of vehicles; however, the states may impose a similar tax.

Tax is still levied on the acquisition of new vehicles. This tax is payable in addition to the VAT on the purchase. Note that some vehicles considered as 'hybrid' (e.g. battery assisted vehicles) are not subject to the new vehicle acquisition tax.

Branch income

Mexican branches of foreign corporations (i.e. PEs) are generally subject to the same tax rules as Mexican corporations, with some exceptions. Such exceptions include that branches may deduct pro rata allocations of head office expenses, provided certain requirements are satisfied (such as the existence of an applicable tax treaty and a comprehensive agreement for the exchange of tax information between the relevant

territory and Mexico), but may not deduct remittances to their head offices, even when such remittances are classified as royalties, fees, commissions, services, or interest.

In general terms, profit distributions to the head office (other than those regarded as a return to the head office of the capital invested into the branch, which are reflected in their 'remittances accounts') either in cash or in kind from branches or other PEs are subject to the statutory CIT rate on the grossed-up distribution, unless the remittance is made from the CUFIN account balance (i.e. the after-tax earnings account).

Branches are also subject to the 10% WHT on profit distributions, which can be reduced or eliminated based on any applicable tax treaty provision.

Income determination

Recognition of income

Income is generally recognised on an accrual basis. However, the service revenues of civil entities that render professional services (e.g. law and accounting firms) are reported on a cash basis.

Inventory valuation

The costing system to be used will be the incurred cost system, based on historic costs or pre-determined costs. If the requirements provided in the regulations of the income tax law are met, the direct cost system (based on historical costs) may be used.

Inventory may be determined by any of the following methods:

- First in first out (FIFO).
- Identifiable costs.
- Average cost.
- Retail.

The FIFO method must be applied to each type of merchandise and each movement. The monetary FIFO method may not be used. Taxpayers selling goods that are identifiable by serial numbers, at a cost exceeding MXN 50,000, must determine their inventory by the identifiable cost method.

Once elected, a method is compulsory for five years and can be changed only if the requirements established in the regulations of the income tax law are fulfilled. The monetary results of the change in method are amortised over the following five years.

For accounting purposes, different methods and certain variations can be adopted. However, a record of the differences must be maintained, and such difference will not be taxable or deductible.

The cost of imported goods may be deducted (and included in the cost of goods sold) only if it can be supported that the goods were legally imported into the country.

Capital gains

Capital gains are taxed as follows.

Securities

Gains on securities are included in regular taxable income.

The tax basis of shares of Mexican corporations sold may be increased by the inflation adjustment applicable for the holding period.

Mexico

When computing the tax basis of the shares, there are certain items to be considered, such as: (i) the movement in the after-tax earnings account (CUFIN) of the issuing company (including the possible negative CUFIN effects), as adjusted for inflation, (ii) the unamortised prior years' tax losses at the date of the sale, (iii) tax losses arising prior to the date on which the shares were acquired and amortised during the holding period, and (iv) any capital reductions of the issuing company.

When the sum of: (i) the CUFIN balance at the date of acquisition of the shares, (ii) the capital reductions paid, (iii) the unamortised prior years' tax losses at the date of the sale, and (iv) the negative CUFIN balance of the issuing corporation is higher than the sum of: (i) the CUFIN balance at the date of the sale and (ii) the tax losses arising prior to the date on which the shares were acquired, and amortised during the shares' holding period, the difference must be subtracted from the tax basis of the shares to be disposed of (potentially resulting in the shares' tax basis being equal to zero).

When the aforementioned difference exceeds the tax basis of the shares disposed of, this excess (restated by inflation) must be subtracted from the tax basis of the shares in any subsequent share sale by the same taxpayer, even if the shares are issued by a different company.

The aforementioned procedure allows the average cost (tax basis) of the shares to be determined, which is then updated and considered as the acquisition cost for future sales.

A different but simpler procedure is available (optionally) for computing the tax basis of shares held during a period of 12 months or less.

Deduction of losses arising from the sale of shares is limited to the value of gains from similar transactions in the same or the following ten fiscal years. Losses may not be deducted by non-residents selling shares.

A gain from the sale of shares is considered Mexican-source income when the transferred shares are issued by a Mexican resident or when more than 50% of their book value arises directly or indirectly from immovable property located in Mexico, including cases where the shareholding is structured in different levels.

In general terms, the sale by non-residents of shares issued by a Mexican company is subject to a 25% WHT applicable to the gross amount of the transaction (i.e. without deductions). However, there may be the option for gains realised by non-residents on the sale of shares issued by a Mexican company to be taxed by applying the 35% rate to the net gain (i.e. the value of the transfer less the tax basis of the shares). The tax rate for these purposes is generally the same as the top bracket rate for individuals, unless a lower tax treaty rate is applicable.

This net income election is available only if the foreign shareholder is resident of a country that is not considered a 'preferred tax regime jurisdiction' (tax haven) or a country with a territorial tax system. The non-resident seller must have previously appointed a representative in Mexico and have a public accountant assigned to issue a statutory tax audit report on the transfer of shares. The public accountant issuing the respective report must specify the accounting value of the shares sold and explain the factors used in determining the sales price and the market value of the shares if shares are sold between related parties.

The representative is jointly liable for the tax on the sale of shares, even when the statutory report is issued by a public accountant.

The tax authorities may authorise the deferral of taxes that would otherwise be triggered by the transfer of shares in a group reorganisation (the authorisation must be

obtained prior to the share transfer). The price used on the transaction must be at arm's length. The tax deferred, adjusted for inflation, is due upon the sale of the originally transferred shares outside the same interest group. An interest group consists of shareholders that have over 50% common voting stock of the companies.

In principle, authorisations for tax deferral are not granted if the party acquiring or selling the shares is resident in a tax haven or is a resident of a country that has not signed a comprehensive exchange of information agreement with Mexico. However, in the latter case, an authorisation may still be granted if the taxpayer provides documentation to the Mexican tax authorities stating that the taxpayer has authorised the foreign tax authorities to provide information to the Mexican authorities regarding the operation in question.

If the share sale qualifies as an exempt reorganisation under tax treaty rules, the non-resident must appoint a legal representative in Mexico prior to the sale and file a notice with the Mexican Tax Administration informing them of such appointment and the details of the reorganisation process intended to be carried out. Additionally, certain formal requirements are established in the regulations of the Mexican income tax law that must be satisfied when carrying out this type of transaction.

Tax treaty rules (optionally) override domestic law rules when the seller resides in a tax treaty country.

Shares sold through the stock market

Capital gains realised on (i) the sale of shares issued by Mexican companies, (ii) securities exclusively representing such shares, (iii) shares issued by foreign companies quoted in the Mexican stock market, and (iv) derivative financial operations referenced to stock indexes and/or to the aforementioned shares, when the sale is conducted in stock markets or in derivative markets recognised under the Securities Market Law, are subject to a 10% income tax rate.

The applicable income tax on the gain obtained must be withheld by the broker/intermediary; however, there is no obligation to make this withholding if the investor is a resident in a country with which Mexico has signed a tax treaty to avoid double taxation and provides the broker with a sworn statement explaining said situation and providing their registration number or tax ID issued by the proper authorities in their country. If this is not provided, the income tax must be withheld.

In certain cases, the 10% income tax on the sale of such shares does not apply, but the general treatment (i.e. 25% on the gross or alternatively 35% on the gain as above mentioned) must be applied.

Real estate

In determining the taxable gain of real estate, the cost basis of land and buildings may be adjusted (i.e. increased) for tax purposes on the basis of the period of time for which the assets have been held. This adjustment is performed by applying inflation adjustment factors to the net undepreciated balance. Similar rules apply to non-residents electing to pay tax on net income by appointing a legal representative in Mexico. The rate of tax on the net gain is 35% (or lower treaty rate). Otherwise, the 25% final WHT on gross income applies to non-residents.

Machinery and equipment (M&E)

Gains or losses from the disposal of machinery, equipment, and other fixed assets are also calculated after adjusting the basis in these assets, by applying inflation factors to the net undepreciated balance.

Mexico

Inflationary gain or loss

Taxpayers are required to calculate an adjustment for inflation (resulting in additional taxable income or deductible expense) on an annual basis by applying the percentage increases in the National Consumer Price Index (NCPI) to the value of essentially all liabilities, reduced by monetary assets, including bank balances, investments (except in shares), and some debt and receivables.

Dividend income

Dividends received by Mexican corporations from other Mexican corporations need not be included in gross income. Dividend income must be included within the recipient corporation's CUFIN.

No further corporate-level taxes apply on dividends distributed out of the CUFIN. However, non-CUFIN distributions (i.e. distributions that for any reason have not been subject to CIT) are subject to tax at the level of the distributing company at the general income tax rate on the grossed-up distribution at the effective rate of 42.86%. This tax is creditable in the year of payment or two subsequent years.

Interest income

Interest received by Mexican corporations is generally subject to tax on an accrual basis and included in gross income (*see also Inflationary gain or loss above*).

Foreign income

A Mexican corporation is taxed on foreign-source income when earned. Double taxation is reduced, or possibly eliminated, by means of foreign tax credits. However, the undistributed profits of a foreign subsidiary are not subject to Mexican tax until dividends are paid, with the exception of companies with investments in entities located in a tax haven or income subject to preferred tax regimes (PTRs) (*discussed below*), in which case income is generally taxable even if no distributions are received from those entities.

Investments in tax havens (income subject to PTRs)

Investments in tax havens include those made directly or indirectly in entities, branches, real property, shares, bank accounts, or investment accounts, and any kind of participation in entities, trusts, joint ventures, or investment funds, as well as in any other similar legal entities created or incorporated in accordance with foreign law and located in a tax haven, and including those that are carried out through an intermediary.

A business, entity, trust, or joint venture is considered to be located in a tax haven when it has a physical presence, an address, a post office box, or effective management in a tax haven, or when its bank account is held in or through financing entities located in a tax haven.

Unless it can be demonstrated that the taxpayer does not have management control of the foreign investments, the taxpayer must include the income generated through such entities or foreign vehicles in the proportion that corresponds to their direct or indirect participation in the capital of the entity or vehicle.

Income and profits subject to PTRs are taxed separately. This income cannot be combined with other taxable income or losses and it is not considered for purposes of making advance income tax payments. Tax applicable to this type of income is payable together with the annual CIT return.

The classification of a PTR is not based on the location of the investment but on the tax effectively paid on the income generated abroad. An investment is considered subject to a PTR if the income is not subject to tax or tax paid abroad is less than 75% of the income tax that would have been incurred and paid in Mexico if the income had been taxed under Mexican rules.

In general, interest income and the annual inflationary adjustment made to liabilities of the investment in the tax haven are included in taxable income without subtracting the annual inflationary adjustment on receivables. However, the annual inflationary adjustment on receivables may be subtracted from interest income earned, provided an information return is filed.

Tax on investments in a PTR is determined by applying the general CIT rate to taxable income. Additionally, net operating loss carryforwards associated with an investment in a PTR may be amortised against the tax profit of the following tax years arising from investments in a PTR, and tax deductions related to the investment may also be applied, as long as accounting records pertaining to those investments are available and the annual information return on the investments is filed on time.

Undistributed income from investments in entities located in a PTR need not be immediately included in taxable income (under the provisions discussed above) in certain particular cases (e.g. income arising from qualified active business activities in accordance with the applicable legislation and in the case of passive income from indirect investments in a tax haven when certain strict conditions are met).

Income earned in a PTR will be taxed until its distribution where the PTR income arises from a business activity. This treatment will not be applicable, however, if income such as interest, dividends, royalties, certain capital gains, and rents (i.e. passive income) represent more than 20% of the total income generated.

Other specific cases of income on which the tax may apply until distribution include the case of share transfers within the same group and for income derived from royalties and interest that do not represent a tax deduction for Mexican tax residents, to the extent that certain specific requirements are satisfied.

Maquiladoras

As discussed in the *Corporate residence* section, companies operating under an IMMEX program (*Maquiladoras*/in-bond processing companies) are considered to not have a PE in Mexico. This is the case for the non-resident principal that owns the M&E and inventory, to the extent it is a resident of a country that has a tax treaty in force with Mexico, complies with all the terms and requirements of the treaty, satisfies any mutual agreements between Mexico and its treaty partner, and complies with the transfer pricing provisions provided in the law.

Revenues associated with productive activities must be derived solely from *Maquila* activities. Additionally, the rules on M&E ownership are consistent with the IMMEX decree definition (i.e. 30% or more of the M&E used in the *Maquila* operation must be owned by the foreign principal).

The effective income tax rate on *Maquila* profits is 30%.

In terms of transfer pricing, only the safe harbour and advance pricing agreement (APA) alternatives are applicable to *Maquilas*.

Under a Presidential Decree published in Mexico's Official Gazette, the following benefits are also granted to the *Maquiladora* industry:

- An additional deduction for 47% of tax-exempt benefits paid to employees involved in the relevant *Maquila* operation (since 2014, the Mexican tax law limits this deduction to 53% of tax-exempt benefits). *Maquiladoras* applying this benefit should inform the Mexican tax authorities of the amount of the benefit granted, and how it was determined, in a report due March of each taxable year.
- For *Maquiladoras* operating under the grandfathering rule applicable to *Maquiladoras* established prior to 2010 (i.e. not obligated to comply with the rule

Mexico

requiring that 30% or more of the M&E used in the *Maquila* operation be owned by the foreign principal), the decree establishes a two-year period to comply with this requirement on a prospective basis.

- For sales of goods that are located in Mexico between a foreign resident and a *Maquiladora* that are taxed at the 16% VAT rate, the *Maquiladora* may credit the VAT in the same month of the sale if certain certification requirements are met. This benefit applies if a certification is secured.

Additionally, among other rules, the Miscellaneous Tax Regulations (MTRs) include further guidance in connection with the *Maquiladora* industry, as follows:

- Revenues associated with productive activities must derive solely from *Maquila* activities. In this regard, this rule provides that such revenues may also include those obtained for other *Maquila* services rendered to related parties resident abroad and other miscellaneous income, provided that the *Maquila's* books clearly identify every type of income and related expenses.
- Income relating to the manufacture and distribution of finished goods for resale cannot be considered as 'solely derived from *Maquila* manufacturing activities'.
- The MTRs also provided that a foreign principal may still apply safe harbour protection relating to PE immunity contemplated in the 2013 Income Tax Law, provided that the foreign principal is resident in a country with which Mexico has a double tax treaty (DTT) and the principal is fully compliant with any treaty requirements applicable to its Mexican activities.

Deductions

The applicable deduction requirements must be complied with no later than the last day of the tax year to which the deduction applies, although the invoice supporting the expense may be provided up to the date on which the tax return for the period in question is filed (or comes due). An expense invoice must contain a date within the year for which the deduction is claimed.

Deductions for certain business expenses are limited in the case of business meals and use of company-owned cars.

Depreciation and amortisation

Straight-line depreciation is permitted at the rates specified in the law (i.e. estimated lives for assets are 20 years for buildings, 3.3 years for computers, 4 years for cars [the deductibility threshold for cars has been raised from MXN 130,000 to MXN 175,000, starting from 2016], 10 years for certain M&E, etc.), and the deduction may be increased by applying the percentage increases in the NCPI from the month in which the asset was originally acquired. When an asset is disposed of or becomes useless, the remaining undepreciated historical cost may also be deducted, after application of the appropriate inflation adjustment factor to the undepreciated historical cost.

Starting from 2016, companies, including those dedicated to transportation infrastructure and those that invest in hydrocarbon-related activities and the generation of electricity, who have obtained revenues in the prior tax year up to MXN 100 million, can apply an accelerated depreciation (i.e. lump-sum deduction) for investments in new fixed assets that were acquired in the last quarter of the 2015 tax year, or in 2016 or 2017. The accelerated depreciation rate varies from around 60% to 90% depending on the type of assets and the year of acquisition (i.e. 2016 or 2017).

Intangible assets for the exploitation of goods that are in the public domain, or for rendering public services under concession, are considered deferred assets (i.e. not deducted as incurred). Therefore, these assets are subject to amortisation for income tax purposes.

Specific annual depreciation rates are established for goods used in certain industries.

Goodwill

Goodwill is a non-deductible item for Mexican tax purposes, and the corresponding input VAT (if any) will not be creditable.

Start-up expenses

Start-up expenses incurred prior to the commencement of operations may be amortised at the rate of 10% per year, after applying the adjustment factors.

Interest expenses

In general terms, interest expenses are deductible items if, among others, the principal is invested in the main activity of the Mexican taxpayer, withholding obligations are complied with, informative returns disclosing information related to the loan and transactions carried out with related parties are filed, thin capitalisation rules (3:1 debt-to-equity ratio) are satisfied, the transaction is at arm's length, and the interest does not fall into the deemed dividend criteria (*see the rules for the deductibility of interest payments at the end of this section*).

Bad debts

Bad debts may be deducted on the earlier of the date on which the debt prescribes or the date on which the taxpayer substantiates the practical impossibility of collection, as defined by the law, among other detailed rules.

Charitable contributions

The maximum amount for deductible donations is limited to 7% of the taxable income of the previous year.

Fines and penalties

In general terms, fines and penalties are non-deductible items for income tax purposes, except interest for underpayment of taxes.

Taxes

In general, all federal, state, and local taxes levied on a company (not including those required to be withheld from other parties) represent deductible expenses for CIT purposes, with the following exceptions:

- CIT.
- Federal VAT and excise tax when the company is entitled to credit the tax.
- Taxes on acquisitions of fixed assets and real estate, which must be capitalised and deducted as part of the total cost of such assets to be depreciated.

Net operating losses

Subject to certain limitations, losses incurred in prior years by a business may be carried forward and deducted from income earned over a subsequent ten-year period. Net operating loss carrybacks are not allowed.

Losses carried forward may be increased by the percentage increase in the NCPI between the seventh and 12th months of the fiscal year in which they are incurred and thereafter up to the sixth month of the fiscal year in which they are applied.

In the case of entities engaged in activities related to the exploration and production of hydrocarbons in maritime waters at depths of 500 metres or more, net operating losses (following the same adjustment rules mentioned above) may be used to reduce their taxable income within the following 15 years.

Tax loss carryforwards are non-transferable; however, they can be used by the surviving entity in a merger, with certain restrictions. In the case of a spin-off, tax loss

Mexico

carryforwards can be divided between the surviving entity and the spun-off entities in proportion to the following:

- Inventories and accounts receivable transferred in the case of commercial entities.
- Fixed assets transferred, in all other cases.

Current tax legislation limits the utilisation of tax losses in changes in ownership, with certain exceptions and limitations.

Payments to foreign affiliates

Taxable income and authorised deductions must be determined on the basis of prices that would be agreed with independent parties in comparable transactions (arm's-length values).

For this purpose, taxpayers must secure and maintain contemporaneous documentation supporting transactions with related parties residing abroad, demonstrating that income and deductions are based on market values. This documentation must be prepared per type of transaction and must include all operations carried out with related parties.

Domestic transactions must also be supported by the application of a recognised transfer pricing method selected in accordance with the preferred ordering methods determined in the legislation.

Payments made to residents of tax havens (or PTRs) are considered non-deductible unless it can be demonstrated that the price of the transaction is the same that would have been set between or among unrelated parties in comparable transactions. Unless the contrary is demonstrated, it is assumed that operations with companies, entities, or trusts resident in a PTR are carried out between or among related parties and that prices are not set as they would be in comparable operations between or among independent parties.

The sales price of shares (other than publicly traded shares) sold to a related party must be set at market value, and the transaction must be supported by the corresponding contemporaneous transfer pricing documentation.

Payments to non-residents of a prorated portion of expenses (i.e. allocations of expenses) are not deductible for Mexican corporations.

A deduction for expenses that are also deducted by another related entity is not allowed unless the corresponding income is included in the related entity's taxable income in the same or in a subsequent tax year.

Technical assistance, royalties, and interest payments

In order to be deductible, payments of technical assistance fees and for the transfer of technology or royalties must be made directly to companies with the required technical capabilities to provide the corresponding service and should correspond to services actually received.

A deduction for technical assistance, interest, or royalty payments (including those related to M&E leases) is not allowed when paid to a foreign entity that controls or is controlled by the Mexican entity and (i) when and to the extent that the recipient is a transparent entity whose owner or owners are not subject to tax in its jurisdiction, (ii) the recipient country of tax residence considers the payment to be disregarded, or (iii) the recipient does not include the payment as part of its taxable income under its jurisdiction's rules.

Group taxation

The income tax law contains a chapter that allows certain holding companies to file a consolidated income tax return with their majority-owned subsidiaries. Tax consolidation is applicable for CIT purposes but not for other taxes (e.g. VAT) or compulsory employee profit sharing.

Companies that, until 2013, consolidated with their subsidiaries for tax purposes are entitled to reduce their deferred tax by crediting against the consolidated tax the tax on dividends paid between members of the group, and to reduce by up to 50% the consolidated tax by applying losses (valued at 15%) incurred by the controlled entities.

The current income tax law repealed the tax consolidation rules that were in effect until December 2013, but also introduced a new simplified tax consolidation (deferral) regime.

Due to the repeal of the former tax consolidation regime, the new law provides three options for computing the deferred consolidated income tax benefit, which will be payable over a five-year period. MTRs provide an additional option and other rules for computing the deferred tax.

The principal requirements for a company to qualify as a holding company for the current tax consolidation regime are that it must be a Mexican tax resident with no more than 80% of its shares owned by other companies, regardless of their country of residence. Shares that qualify as placed among the general investing public and non-voting shares are not considered for this purpose.

Where more than 80% of the holding company's shares are held by a foreign corporation, the above qualifying rule precludes the possibility of filing a consolidated return for a Mexican group, for companies that would otherwise qualify. However, there is an exception in cases where the foreign corporation that owns the shares of the Mexican holding company is a resident in a country that has executed a comprehensive agreement for the exchange of tax information with Mexico.

As of May 2016, Albania, Argentina, Aruba, Australia, Austria, Bahamas, Bahrain, Barbados, Belgium, Belize, Bermuda, Brazil, Canada, Cayman Islands, Chile, China, Colombia, Cook Islands, Costa Rica, the Czech Republic, Denmark, Ecuador, Estonia, Finland, France, Georgia, Germany, Ghana, Gibraltar, Greece, Guernsey, Hong Kong, Hungary, Iceland, India, Indonesia, Ireland, Isle of Man, Italy, Japan, Jersey, the Republic of Korea, Kuwait, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Moldova, the Netherlands, the Netherlands Antilles, New Zealand, Norway, Panama, Poland, Portugal, Qatar, Romania, Russia, Samoa, Singapore, Slovak Republic, South Africa, Spain, St. Lucia, Sweden, Switzerland, Turkey, Ukraine, the United Kingdom, the United States, and Uruguay have agreements of this nature with Mexico; other agreements or tax treaties that might contain such an agreement are awaiting ratification or being negotiated.

The Mexican Tax Administration must authorise the application of the consolidation regime, and written consent of the legal representative of each of the companies must be filed before 15 August of the year prior to the first year of consolidation to request the proper authorisation. Special tax accounts should be kept by each of the companies of the group.

There are some entities that are non-qualifying entities for inclusion in the new consolidation regime, such as non-profit entities, credit institutions, insurance corporations, trusts, auxiliary credit institutions, stock exchange entities, foreign exchange houses and capital investment companies, non-resident companies, companies in liquidation, civil or social associations, cooperatives, and *maquiladoras*.

Mexico

In general terms, the current consolidation regime allows an individual company to offset losses against profits of other companies in the same group during a three-year deferral period.

The deferred income tax must be paid by each of the entities of the group on the same date on which they are required to file their annual income tax return for the year following that in which the three-year deferral period concludes. The deferred income tax will be paid updated with the accumulated inflation adjustment from the month in which the tax was deferred to the month in which the tax is paid.

The deferral benefit must be paid before the three-year deferral period if:

- a member leaves the consolidated group
- the ownership percentage is reduced, or
- the group is deconsolidated.

Transfer pricing

Mexican transfer pricing legislation is based on the OECD principles. This has resulted in the implementation of transfer pricing guidelines that are in line with the global economy and market liberalisation.

In general terms, from a Mexican transfer pricing perspective, all related-party transactions (including certain joint-venture relationships) must be reported at arm's length.

Those taxpayers who are required to present an informational return with respect to their tax status (a DISIF for its acronym in Spanish) are required to present information relating to transactions carried out with related parties by 31 December of the year following the tax year.

Local legislation allows the selection of both traditional methods and profit-based methods consistent with the OECD guidelines. However, the legislation requires a strict ordering for the application of a method, starting with the comparable uncontrolled price (CUP) method (other methods can only be used if the CUP method is justifiably inapplicable).

Mexican legislation is generally 'form over substance' oriented; consequently, contractual terms remain relevant when defining the economic substance of the transactions subject to the transfer pricing analysis.

Reliable financial information is not always publicly available for Mexican entities. Hence, reliance is often placed on foreign information, which is then adjusted to properly reflect local market conditions and render the transactions in question more comparable.

Thin capitalisation

Interest generated by excess debt lent by a related party is non-deductible for CIT purposes. Excess debt is defined as more than three times the value of shareholders' equity (i.e. a 3:1 debt-to-equity ratio) as per the taxpayer's Mexican Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS) balance sheet.

In principle, all liabilities are considered in determining the annual average liabilities for purposes of calculating the ratio and thereby the disallowed interest expense amount. However, certain liabilities incurred for construction, operation, or maintenance of the productive infrastructure associated with the strategic areas of Mexico may be excluded from this computation.

Taxpayers may also be able to obtain a ruling from the Mexican Tax Administration in order to apply a higher financial leverage (i.e. not the 3:1 debt-to-equity ratio), owing to the characteristics of their activities. Also, the thin capitalisation rules do not apply to the financial and electricity sectors.

In addition, taxpayers are entitled to use the sum of the average balances of the capital contributions account (CUCA) and the CUFIN to determine the 3:1 debt-to-equity ratio instead of shareholders' equity. Taxpayers that opt for this tax equity computation must continue to use it for at least five years. This alternative computation is mandatory for those taxpayers that do not account for capital following Mexican GAAP.

Specific provisions dealing with the disallowance of interest expenses for debt financing structured through back-to-back loans should also be closely observed.

Controlled foreign companies (CFCs)

See Foreign income in the Income determination section for a description of the taxation of undistributed profits of foreign subsidiaries.

Tax credits and incentives

Foreign tax credit

The income tax law allows Mexican corporations and individuals a foreign tax credit on income from foreign sources. The law provides that taxpayers may credit against their Mexican income tax liability the amount of income tax paid in foreign countries on their foreign-source income, as long as such income is subject to income tax in Mexico.

In general, credit is available in respect of foreign income taxes directly withheld from foreign-source income or paid with a tax return filed in the foreign country in the name of the Mexican resident or by a foreign branch of a Mexican corporation. However, in the case of dividends or distributions of profits received from corporations resident in a foreign country, when a Mexican corporation owns at least 10% of the capital of the foreign corporation for six months prior to the dividend, a deemed-paid credit can also be taken for the proportionate part of the underlying foreign CIT paid by that corporation, corresponding to the dividend or distribution of profits received. In calculating the amount of income subject to Mexican tax in these cases, the dividend or distribution must be grossed up to include the proportionate amount of tax paid by the foreign corporation. This credit is also allowed on tax paid on a second holding tier, provided certain requirements are met, which include mainly the existence of an exchange of information agreement between Mexico and the country of source.

The foreign tax credit will be allowed up to the effective Mexican rate of tax on the taxable income (tax result) shown by the annual return under a per country and per income type limitation. Taxpayers who are not in a position to take full credit for the taxes paid to a foreign country on foreign-source income are allowed a ten-year carryforward of such excess foreign taxes, provided certain compliance requirements are met and the credit is limited to the corporate tax rate of 30%.

The Mexican tax authorities have internal criteria that they follow to determine whether or not a foreign tax is considered as an income tax for purposes of applying the tax credit.

Duty-deferral programs

A deferral program is an authorisation provided by the Mexican Ministry of Economy to those companies importing raw materials or fixed assets to manufacture finished products within Mexico for export.

Mexico

In addition to the benefits described for CIT purposes in the *Income determination* section, *Maquiladoras* under the IMMEX program are entitled to the following customs benefits:

- No payment of import duties for temporarily imported raw materials, as long as they are exported.
- Temporarily imported raw materials and fixed assets will not be subject to VAT when the Mexican entity importing the goods obtains a VAT certification (*see VAT in the Other taxes section*) from the tax authorities related to the adequate control of such imports or posts a bond guaranteeing the VAT payment until the goods are exported.

Another program allowing preferential duty rates is the Sectorial Relief Program (known as PROSEC), which allows manufacturers to apply lower duty rates on the import of raw materials and machinery required for their productive processes, regardless of their country of origin and regardless of if they are for the Mexican market or for export. These programs were created by the federal government in order to establish competitive tariff conditions for Mexican manufacturers needing to import raw materials and fixed assets from non-NAFTA or trade partner countries.

Companies in Mexico that carry out import operations with values of MXN 300 million per semester, or IMMEX companies, can take advantage of significant customs and administrative benefits if registered into the 'Certified Company Registry' (authorised by the Ministry of Finance). In addition, companies that comply with certain requirements regarding controls and security within their supply chain, regardless of the MXN 300 million obligation, can also obtain the 'Certified Company Registry'; this specific type of registry is known as New Scheme of Certified Companies (NEEC for its acronym in Spanish), which is different from the newer VAT certification for IMMEX companies mentioned before.

In general terms, the main benefits provided by the Certified Company Registry allows simplified procedures to process imports and exports, including the reduction in time and number of reviews when clearing goods at customs facilities.

Research and development (R&D) incentives

An income tax incentive for taxpayers involved in certain technological R&D projects carried out during the year allows a cash subsidy to be yearly determined by the tax authorities, based on a budget to be approved by the Mexican Congress.

Employment incentives

An incentive offers a credit equivalent to 100% of the income tax corresponding to the salary paid to workers/employees with certain types of disabilities.

An additional deduction, equivalent to 25% of the salary paid to such workers/employees, is also available.

Both benefits cannot be applied in the same fiscal year.

Incentives for investments in movie production

A limited credit is applicable for investments in movie production activities through an immediate tax credit, which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.

Incentives for investments in theatre production

A limited credit is applicable for investments in theatre production activities through an immediate tax credit, which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.

Real estate investment incentives

Several tax benefits exist for qualifying real estate investment trusts (i.e. Mexican REITs or FIBRAS) in Mexico.

Capital investment

There are certain incentives to encourage risk capital investments in Mexico.

Other incentives

Certain other specific and limited tax incentives are available for taxpayers engaged in certain activities (e.g. those engaged in air or sea transportation of goods or passengers with respect to aircraft and ships with a federal government commercial concession or permit; in the agricultural and forestry sectors; and in-bond warehouses with respect to real property used for the storage, safeguarding, or conservation of goods or merchandise).

Taxpayers dedicated exclusively to the generation of energy from renewable sources or efficient energy through co-generation systems and that have fully deducted their investments shall establish an account designated as a 'Tax Profit Account for Investments in Renewable Energy', which will allow for the distribution of dividends without payment of CIT.

Individual shareholders of companies that reinvest profits generated from 2014 to 2016 are entitled to a reduction in tax on dividends of up to 5% to the extent such profits are distributed beginning in 2019.

Withholding taxes

Payments to Mexican residents

Payments to resident corporations and PEs in Mexico are generally not subject to WHT.

Payments by resident corporations to resident individuals are subject to WHT as follows:

Payment	WHT (%)
Wages, salaries, and other remuneration	0 to 35
Fees:	
Members of boards of directors and advisory boards	35.0
Other professional fees	10.0
Lease payments on real property	10.0
Interest on securities (1)	0.6
Interest on non-qualified securities	20.0
Dividends	10.0
Miscellaneous types of income of individuals, usually sporadic payments	20.0

Note

1. WHT on interest paid by financial institutions to Mexican resident investors is generally set at 0.6% of the invested capital.

Payments to non-residents

Income tax must usually be withheld from payments to non-resident corporations and individuals. In the case of non-tax treaty countries, the statutory withholding rates are as noted below.

Income tax of 40%, with no deductions, must be withheld on most payments made to foreign-related parties located in tax havens, in lieu of the tax provided in the domestic

Mexico

law for non-tax haven residents. This is not applicable in certain cases, such as on income not subject to Mexican taxation in accordance with the regular provisions for income earned by non-residents from a source of wealth located in Mexico, income from dividends, and certain types of interest, including interest payments made to foreign banks. In these cases, the regular provisions of the domestic law should be applied to determine the income tax withholding.

Additionally, revenues for intermediation services, including commissions for brokerage, agents, distribution, and assignment, and generally all income from the negotiation of third-party interests, are also subject to 40% WHT when paid to tax haven related residents. The 40% may be reduced if the beneficiary resides in a country with which Mexico has signed a comprehensive exchange of information agreement.

Non-residents' wages and salaries are taxed on the basis of a 12-month earnings period at the following income tax withholding rates:

Taxable income (MXN)		
From	To	WHT (%)
0	125,900	0
125,901	1,000,000	15
1,000,001	and above	30

The above mentioned rates are also applicable to retirement fund payouts.

However, no tax arises on compensation (wages, salaries, or fees other than board fees) paid by a non-resident with no establishment in Mexico (even if not subject to tax) to which the services relate, provided the individual remains in Mexico for fewer than 183 days (consecutive or not) in any 12-month period.

The tax, when applicable, is withheld if the income is paid by a resident (or a non-resident with a PE in Mexico). Otherwise, the tax is generally payable within 15 working days of the associated payment, by the party earning the Mexican-sourced income.

Statutory withholding rates (not mentioned above) under local legislation are as follows:

Payment	WHT (%)
Professional fees for services rendered in Mexico	25
Lease payments:	
Lease of real property	25
Lease of containers, airplanes, and ships authorised by the Mexican Government to be commercially exploited in the transportation of goods or persons	5
Lease of personal property	25
Time-sharing services (1)	25
Charter agreements	10
Sales:	
Real property located in Mexico (1)	25
Shares of Mexican companies (1, 2)	25
Transfers of ownership of Mexican public debt by other than the original creditors (intended to cover debt-for-equity swaps) (1)	25
Derivative transactions:	
On capital (1)	25
On debt (3)	Same rates applicable to interest

Payment	WHT (%)
Interest (4):	
Paid to foreign government financing entities, to duly registered foreign banks and other entities that provide financing with funds obtained by issuing publicly traded debt instruments abroad, registered with the Ministry of Finance (5)	10
Interest on debt instruments placed abroad (6)	4.9
Interest payments to specific foreign financial institutions (7)	4.9
Other interest payments (not otherwise included above) paid by Mexican financial institutions to residents abroad	21
Paid to foreign suppliers of M&E, to others to finance purchases of such assets or inventory or working capital loans if the lender is duly registered	21
Paid to reinsurance entities	15
Other interest payments	35
Financial leases (on the portion deemed to qualify as interest or finance charge)	15
Dividends (12)	10
Royalties (8):	
For the use of railroad cars	5
For the use of copyrights on scientific, literary, or art works, including motion pictures and radio and television recordings, as well as software and payments for the transmission of video and audio signals via satellite, cable, optic fibre, and similar media	25
On patents, invention or improvement certificates, trademarks, brand names, and advertising	35
For the use of drawings or models, plans, formulas, or procedures, and of scientific, commercial, and industrial equipment; on amounts paid for information regarding scientific, commercial, and industrial experience; and for technical assistance	25
Short-term construction and the respective installation, maintenance, technical direction, or supervision (9)	25
Reinsurance premiums	2
Income obtained by athletes and artists (1)	25
Income derived from prizes (e.g. lottery tickets or raffles) (10)	1/21
Other income (forgiven debts, indemnifications, rights to participate in business, investments, etc.)	35

Notes

- The non-resident may elect to pay tax at a rate of 35% (see Note 11 below for the rate applicable thereafter) on the net taxable profit in the case of (i) time-sharing services, (ii) share sales, (iii) sales of real property, (iv) activities of sportsmen/artists, and (v) derivative stock and debt transactions, provided that the non-resident recipient of the income has a legal representative resident in Mexico and to the extent that the following specific requirements are met:
 - For time-sharing services, the resident legal representative must keep the audited financial statements of the taxpayer available for inspection by the Mexican Tax Administration.
 - For share sales, a tax opinion issued by a registered public accountant is required.
 - For shares and debt-for-equity swap transactions, this election is available only where the foreign taxpayer is not a resident of a country classified as a tax haven or a country with a territorial tax system. It should be noted that there is an option to defer Mexican income tax arising from the sale of shares within the same group due to a corporate reorganisation, provided certain conditions are met and that no legal representative is required for sales of real property by public deed.
- The sale of shares through the Mexican Stock Exchange is subject to a 10% WHT. When the investor is a resident in a country with which Mexico has signed a tax treaty, such withholding will not apply if certain requirements are satisfied.
- The applicable WHT rate (based on the WHT rates for interest) for debt-derivative transactions is applied on a net basis. However, if the transaction is liquidated in kind, the applicable WHT rate (on the same net basis) is 10%.
- Interest payments to non-residents are exempt from Mexican income tax when they are paid on the following:
 - Loans to the federal government or to the Bank of Mexico (Central Bank) or bonds issued by the latter organisation to be acquired and paid abroad.
 - Loans for three or more years granted or guaranteed by duly registered financial entities that promote exports through special financing.

Mexico

- Preferential loans granted or guaranteed by foreign financial entities to institutions authorised to receive tax-deductible donations in Mexico, provided these institutions are properly registered and use the funds for purposes consistent with their status.
 - Loans derived from bonds issued by the federal government or the Bank of Mexico placed on a recognised national stock exchange, to the extent the beneficial owner is a foreign resident.
5. A 4.9% WHT rate is applicable when the interest is paid to banks resident in countries with which Mexico has signed a tax treaty.
 6. The 4.9% WHT rate applies, provided the placement is handled through banks or brokerage firms resident in a country with which Mexico has signed a tax treaty if there is compliance with the information requirements established in the general rules issued by the Ministry of Finance. If there is failure to comply with these requirements, the 10% WHT rate applies. The 4.9% and 10% WHT rates mentioned in the preceding paragraphs do not apply, and instead a 35% WHT rate is applicable to interest, when the direct or indirect beneficiaries of the interest, either individually or jointly with related parties, receive more than 5% of the interest arising from the instrument in question, and are either (i) holders of more than 10% of the voting shares of the issuing company, either directly or indirectly, either individually or jointly with related parties, or (ii) business entities holding more than 20% of their shares, either directly or indirectly, either individually or jointly with parties related to the issuer.
 7. The 4.9% WHT rate is applicable to interest payments made to foreign financial institutions in which the Mexican federal government or the Mexican Central Bank has equity participation.
 8. The WHT rate is applied to the gross amount of the payment.
 9. The non-resident taxpayer may elect to pay 35% tax on the net profit if the taxpayer has a resident legal representative and so advises the customer, who then makes no withholding. When business activities last for more than 183 days, the foreign taxpayer is deemed to have a PE in Mexico for tax purposes and is taxed in the same manner and subject to the same rules as a local resident corporation or branch.
 10. The 21% federal rate is applied only in the case of non-qualifying prizes (i.e. income derived from prizes that is subject to a state tax that exceeds a rate of 6%).
 11. The statutory WHT rates mentioned above may be reduced by applying tax treaty provisions. During the last two decades, Mexico has embarked on a policy of negotiating a network of tax treaties with its principal trading and investment partners (*see table below*).
 12. The 10% WHT on dividend payments to foreign residents does not apply to distributions of profits subject to corporate-level tax prior to 2014. If a corporation makes a distribution out of earnings that for any reason have not been subject to CIT, such as distributions of book earnings (i.e. not yet recognised for tax purposes in Mexico), the corporation will also be subject to CIT on the grossed-up distributed earnings (gross-up factor is 1.4286).

As of January 2016, the treaties with the following countries are pending ratification while waiting for the completion of specific formalities by the respective governments in order to become effective, have not been published yet in the Official Gazette, or are under negotiation: Argentina, Costa Rica, Guatemala, Jamaica, Lebanon, Malaysia, Morocco, Nicaragua, Oman, Pakistan, Philippines, Saudi Arabia, Slovenia, Thailand, and Venezuela.

As of January 2016, tax treaties with the countries listed in the following table have been published in the Official Gazette and are in force.

The WHT rates negotiated under the tax treaties are as follows:

Recipient	Dividends (%)		Interest (%)	Royalties (%)
	Portfolio	Substantial holdings		
Australia	15	0 (1)	10/15 (25)	10
Austria	10	5 (4)	10	10
Bahrain	0	0	4.9/10 (20)	10
Barbados	10	5 (1)	10	10
Belgium (37)	15	5 (2)	10/15 (16)	10
Brazil	15	10 (6)	15	10/15 (27, 29)
Canada	15	5 (4)	10	10
Chile	10	5 (6)	5/15 (26)	5/10 (29, 30)
China	5 (7)	5 (7)	10	10
Colombia	0	0	5/10 (17)	10
Czech Republic	10 (7)	10 (7)	10	10
Denmark	15	0 (3)	5/15 (17)	10
Ecuador	5 (7)	5 (7)	10/15 (16)	10

Recipient	Dividends (%)		Interest (%)	Royalties (%)
	Portfolio	Substantial holdings		
Estonia	0	0	4.9/10 (38)	10
Finland	0	0	10/15 (24)	10
France	0/5 (9)	0/5 (9)	5/10 (17, 29)	10 (29)
Germany	15	5 (1)	5/10 (18)	10
Greece	10 (7)	10 (7)	10	10
Hong Kong	0	0	4.9/10 (20)	10
Hungary	15	5 (1)	10	10
Iceland	15	5 (1)	10	10
India	10 (7)	10 (7)	10	10 (31)
Indonesia	10 (7)	10 (7)	10	10
Ireland, Republic of (36)	10	5 (4)	5/10 (17, 29)	10
Israel	10	5 (10)	10	10
Italy (37)	15 (7)	15 (7)	10 (29)	15
Japan	15	5 (8)	10/15 (25)	10
Korea, Republic of	15	0 (1)	5/15 (17)	10
Kuwait	0	0	4.9/10 (20)	10

Romania	10 (7)	10 (7)	15	15
Russia	10 (7)	10 (7)	10	10
Singapore	0	0	5/15 (17)	10
Slovak Republic	0 (14)	0 (14)	10	10
South Africa	10	5 (1)	10	10
Spain (36)	15	5 (3)	5/10/15 (21, 22, 29)	10
Sweden	15	5 (5)	10/15 (16)	10
Switzerland	15	0 (34)	5/10 (35)	10
Turkey	15	5	10/15 (41)	10
Ukraine	15	5	10	10
United Arab Emirates	0	0	4.9/10 (20)	10
United Kingdom	0	0	5/10/15 (21, 23)	10
United States	10	5 (4, 15)	4.9/10/15 (20, 23)	10
Uruguay	5 (7)	5 (7)	10	10

Notes

The applicable tax rates on dividends paid abroad in accordance with the tax treaties executed by Mexico are detailed below; however, under domestic law, no withholding is applied on distributions of profits subject to corporate-level tax generated prior to 2014, when the 10% dividend WHT started applying.

There are certain specific cases of interest paid to parties resident abroad that might be exempted by certain tax treaties (e.g. interest paid to a pension fund or paid by a bank, interest paid on certain loans

Mexico

granted or guaranteed by certain entities for exports under preferable conditions), which are not detailed in the information below.

The Tax Reform gives the Mexican tax authorities the ability to require that the foreign-related party provide a sworn statement through a legal representative that the item of income for which a treaty benefit is claimed would otherwise be subject to double taxation.

1. This rate applies when the recipient corporation that is the beneficial owner of the dividend (except for civil partnerships) directly owns at least 10% of the capital of the distributing corporation. In the case of Barbados, Hungary, and South Africa, the specific exclusion of civil partnerships is not included.
2. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 25% of the capital of the distributing company.
3. This rate applies where the company that is the beneficial owner of the dividends (except for civil partnerships) directly owns at least 25% of the capital of the company distributing the dividends. In the case of Norway, taxation is limited to the country of residence of the party receiving the dividends, provided the aforementioned substantial holding rule is satisfied.
4. This rate applies where the recipient corporation that is the beneficial owner of the dividend owns at least 10% of the voting shares of the paying corporation. The Mexico-US tax treaty contains a most-favoured nation clause.
5. This rate applies where a company that is the beneficial owner of the dividends (except for civil partnerships, although limited liability partnerships are included) directly owns at least 10% of the voting shares of the company distributing the dividends.
6. This rate applies where a company that is the beneficial owner of the dividends owns at least 20% of the voting shares of the company paying the dividends.
7. This is the maximum WHT rate for dividends, with no distinction for substantial holdings. In the case of Ecuador and India, the tax payable on dividends paid to residents in Mexico must not exceed a limit established in the treaty.
8. The 5% rate applies when a company that is the beneficial owner of the dividends owns at least 25% of the voting shares of the company paying dividends during the six months prior to the end of the tax period in which dividends are paid. Under certain particular rules and provided this ownership requirement is satisfied, dividend payments are only subject to tax in the country of residence of the recipient of the dividends.
9. No withholding applies when more than 50% of the shares of the recipient corporation are owned by residents of France or Mexico or when the beneficial owner of the dividend is a resident individual. Accordingly, the WHT applies to dividends when more than 50% of the recipient corporation's shares are owned by residents of other countries. However, the WHT must not exceed 5% when the party receiving the dividend is the effective beneficiary of said dividend. Dividends paid by a company resident in France to a resident of Mexico, other than a company that directly or indirectly holds at least 10% of the capital stock of the first-mentioned company, may also be taxed in France, in accordance with the law of France, but if the recipient of the dividends is the beneficial owner, the tax thus charged must not exceed 15% of the gross amount of the dividends.
10. The 5% rate applies where the company that is the beneficial owner of dividends directly or indirectly owns at least 10% of the capital of the company distributing the dividends. There is a 10% tax rate that applies when these same ownership requirements are satisfied, but the company paying dividends is a resident of Israel (provided dividends are paid from earnings taxed in Israel at a tax rate lower than the regular corporate tax rate in Israel).
11. The applicable tax rate on the gross amount of the dividends when the recipient company (beneficial owner) (except for civil partnerships) directly holds at least 10% of the capital of the corporation paying the dividend must not exceed 5% in the case of Luxembourg and 8% in the case of Mexico. The protocol of the Mexico-Luxembourg tax treaty states that this rate might be reviewed in the future by the contracting states if the WHT is not fully creditable, and can be adjusted under the principle of avoiding double taxation, provided the adjusted WHT rate is not lower than 5%.
12. Dividends paid by a company resident in Mexico to a company resident in the Netherlands (which is the beneficiary of said dividends) are subject to a maximum tax of 5% on the gross amount of the dividends if the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the company paying said dividends. However, as long as a company resident in the Netherlands is not subject to Dutch income tax on dividends received from a company resident in Mexico under the terms of the Dutch income tax law and any future amendments thereto, the dividends mentioned in the preceding paragraph may only be taxed in the Netherlands (not in Mexico).
13. The Mexico-New Zealand tax treaty contains a most-favoured nation clause that may be applicable in the future.
14. The exemption on dividend WHT is not applicable in the case of deemed dividends.
15. To the extent certain requirements provided in the Protocol are met, the WHT may be reduced to 0%.
16. The 10% rate applies to loans from banks.
17. The 5% WHT rate is applicable to interest paid to banks.
18. The 5% rate applies to interest on loans from banks, insurance companies, and retirement and pension plans.
19. The 10% rate applies to interest on loans from banks, insurance companies, and securities regularly and substantially traded on a recognised national stock exchange.
20. The 4.9% rate applies to interest on loans from banks and insurance companies and to interest on securities regularly and substantially traded on a recognised national stock exchange.
21. In the case of the Netherlands, the 5% rate applies to interest on loans from banks and to interest on securities regularly and substantially traded on a recognised national stock exchange. In the case of Spain and the United Kingdom, the 5% rate extends to interest paid to insurance companies.

22. The 10% rate applies to interest paid by financial institutions and interest paid to the original seller of M&E.
23. The 10% rate on interest applies in the case of interest paid to the original seller of M&E and interest paid by banks.
24. The 10% rate applies to interest on loans from banks and to interest derived from bonds or securities that are regularly and substantially traded on a recognised securities market, as well as to interest paid by the purchaser of M&E to a beneficial owner that is the seller of the M&E.
25. The 10% rate applies to interest on loans from banks and insurance companies, to interest on securities regularly and substantially traded on a recognised national stock exchange, to interest paid to the original seller of M&E in a sale on credit, and to interest paid by banks.
26. The 5% rate is applicable to interest on loans granted by banks and insurance companies, securities traded on a recognised securities market, and the sale on credit of M&E.
27. It is understood that the definition of royalties applies to any type of payment received for the provision of technical assistance services. The 15% rate applies to royalties arising from the use of, or the right to use, trademarks.
28. The original rate is 15% but has been reduced to 10% as long as the Netherlands does not impose a WHT.
29. The reduced WHT rate results from the application of the most-favoured nation clause.
30. The 5% rate applies to industrial, commercial, and scientific equipment.
31. The 10% rate also applies to fees for technical assistance, which are payments of any kind, other than those mentioned in Articles 14 and 15 of the treaty as consideration for managerial or technical or consultancy services, including the provision of services of technical or other personnel.
32. This rate applies where the company that is the beneficial owner of the dividends directly owns at least 25% of the capital of the distributing company.
33. The treaty broadly defines royalties and includes payments related to certain software.
34. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 10% of the capital of the distributing company.
35. The 5% rate applies on the gross amount of the interest paid to, among others, banks and insurance institutions.
36. Treaty being renegotiated.
37. The protocol of this treaty has already been renegotiated, but is not yet enforced.
38. The 4.9% rate applies on the gross amount of the interest paid to banks and pension funds or pension schemes; the 10% rate applies on the gross amount of the interest paid in any other case.
39. The 5% rate applies on the gross amount of the interest paid to and by banks; the 10% rate applies on the gross amount of the interest in all other cases.
40. The 5% rate applies on the gross amount of the interest if the beneficial owner of the interest is a bank; the 10% rate applies on the gross amount of the interest in all other cases.
41. The 10% rate applies on the gross amount of the interest if it is paid to a bank; the 15% rate applies on the gross amount of the interest in all other cases.

Tax administration

Taxable period

In general terms, the taxable period in Mexico is the calendar year.

Tax returns

Corporate taxpayers are required to file annual CIT returns for the preceding calendar year by 31 March of the following year.

Thereafter, taxpayers meeting certain size criteria or belonging to a group that, as a whole, meets these criteria must submit a tax-compliance informative return in the month of July of the following year.

In lieu of submitting the tax-compliance informative return, business taxpayers meeting certain size criteria may elect to file a tax-compliance audit report on an annual basis with the Mexican Audit Administration. This audit report covers all federal taxes other than customs duties and consists of audited financial statements and detailed schedules, together with a report by the auditor stating that no irregularities were observed in respect of the taxpayer's compliance with its federal tax liabilities. This report must be filled electronically, and the auditor must be an independent certified public accountant (CPA) registered with the Mexican Audit Administration. The amount of detailed information required to be filed, and the auditor's responsibility in connection therewith, is significant.

Employees' profit sharing payments are generally due by 31 May of the year following that in which the corresponding profit was obtained.

Mexico

Information returns must also be filed not later than 15 February each year, reporting on, amongst others, the following activities performed in the immediately preceding year:

- Payments made to parties resident abroad.
- Loans received from or guaranteed by non-residents.
- Transactions conducted through a business trust.
- Parties to which the taxpayer makes payments and withholds income tax.
- Parties to which the taxpayer has made donations.
- Parties to which the taxpayer has paid dividends, and the value of such payments.
- Transactions carried out with suppliers and clients, either local or overseas.

Taxpayers making salary payments are also required to file information returns reporting salaries paid and salary credit paid in the immediately preceding calendar year.

An annual information return must be filed on investments made or held in a tax haven. This must be filed in February of the immediately following year.

An information return on transactions carried out with non-resident-related parties must be filed together with the annual CIT return (no later than March of the following year).

Additionally, all taxpayers are subject to reporting relevant transactions on a quarterly basis (share acquisitions or dispositions, extraordinary transaction with related parties, corporate reorganisations, among others).

Payment of tax

Corporate taxpayers are required to make estimated payments of CIT by the 17th day of each month based on their estimated taxable income at the end of the previous month and calculated principally by applying the profit factor to the cumulative monthly gross income. The profit factor is determined by dividing the taxable profit by gross income shown in the annual return for the preceding year, or, if no profit factor is to be found in that annual return, the factor appearing in the year preceding that and so on, up to five years, with certain adjustments. For this purpose, gross income includes nominal income, excluding inflationary adjustments. The balance of CIT for the year is due at the same time as the annual return.

Special procedures are provided for computing advance CIT payments and for obtaining authorisation to reduce the amounts of monthly advances after the sixth month of the year. No advance payments or adjustments thereto are required in the first year of operations.

Tax audit process

In general terms, for taxpayers that elected to file a tax-compliance audit report, the tax audit (tax inspection) may start with a review of the audit report prepared by the independent CPA. At this point, the tax authorities may finish the audit if they are satisfied with the information provided by the CPA; otherwise, tax authorities may initiate a direct review on the taxpayer either at the tax authority's offices or at the taxpayer's facilities. Tax authorities may request several documents from the taxpayer and third parties that carried out transactions with the audited taxpayer.

Tax audits should be concluded within the following 12 months after the audit was initiated. The period to conclude tax audits for taxpayers that are either part of the financial system or consolidated for tax purposes is 18 months. In cases where the Mexican tax authorities request information to tax authorities from foreign jurisdictions, the period to conclude the audit is two years. The above periods might be suspended under certain circumstances (e.g. a judicial recourse or appeal initiated by the taxpayer

against the tax authorities). Upon conclusion of the audit, the tax authorities should issue either a notification explaining tax underpayments observed during the audit process or a notification of conclusion if no issues remain open at the end of the inspection.

Finally, tax authorities should issue a notification of assessment within the six months after the conclusion of the tax audit. At this point, all underpayments claimed by the tax authorities become due.

Concluding Agreements

The Prodecon is a decentralised Mexican government organisation that acts as the Ombudsman of Mexican taxpayers, providing advice and issuing recommendations to the tax authorities. In recent years, Prodecon's Concluding Agreements have become more common and have had a positive impact for taxpayers when it comes to reconciling differences with the tax authority in regards to an audit and controversial assessments.

The agreement applies when a taxpayer is dissatisfied with the authority's tax assessment as a result of an audit. The taxpayer then should file a petition to the Prodecon, noting the facts, omissions, and support elements to expose its defending arguments. The Prodecon then notifies the authority and proposes an agreement to settle the difference and conclude the audit without further procedures. The authority has 20 days to indicate whether or not it accepts the terms that arise in the Conclusive Agreement.

Statute of limitations

In general, the right of the tax authorities to collect taxes, review tax returns, or claim additional tax expires five years after the date the respective return is filed. However, in cases where the taxpayer has not secured a federal tax registration number, has no accounting records, has failed to keep accounting records for the required five-year period, or has not filed a tax return, the statute of limitations expires in ten years. Similarly, the period for claiming a refund of overpaid tax expires after five years.

Topics of focus for tax authorities

Although there are no formal written communications from the tax authorities dealing with their topics of focus, in recent years the tax authorities have focused audits on transactions with non-residents, inter-company transactions, transfer pricing, social security contributions, and customs duties, among other areas.

Other issues

Relevant transactions disclosure

All taxpayers are subject to reporting relevant transactions on a quarterly basis. Relevant transactions are defined as share acquisitions or dispositions, extraordinary transaction with related parties, and corporate reorganisations, among others.

Cash deposits reporting

Financial institutions are required to report, by 15 February of each year, to the SAT the information on customers making monthly cash deposits in excess of MXN 15,000.

International Financial Reporting Standards (IFRS) adoption

All companies listed on the Mexican Stock Exchange are required to submit annual consolidated financial statements accompanied by the opinion of a Mexican independent CPA. These financial statements must be prepared in conformity with IFRS and cover three years. Financial institutions and insurance companies must also file audited financial statements with the appropriate regulatory agency.

Mexico

The elective adoption of IFRS in Mexico for other companies presents great challenges and opportunities. Changing from Mexican Financial Reporting Standards (MFRS) to IFRS requires companies to review their financial reporting procedures and criteria. Major changes in the requirements often have a ripple effect, impacting many aspects of a company's information reporting organisation.

Nevertheless, the benefits to Mexican companies in reporting under IFRS are numerous. Among the greatest of these is the opening up of the Mexican Stock Market to overseas investors. By adopting IFRS, investors are able to compare two companies on different sides of the world with greater ease, and thus it is hoped that the change will encourage investment in Mexican companies.

Adoption of IFRS is not a straightforward process, and it will require time and effort on the part of the adopting entities to be able to ensure a smooth transition from MFRS to IFRS and ensure that the changes and benefits from this transition are duly implemented.

Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)

FATCA was enacted in 2010 by the US Congress to target non-compliance by US taxpayers using foreign accounts. FATCA requires foreign financial institutions (FFIs) to report to the US Internal Revenue Service (IRS) information about financial accounts held by US taxpayers or by foreign entities in which US taxpayers hold a substantial ownership interest.

Mexico signed an IGA with the US Treasury on 19 November 2012 under which Mexican financial institutions are required to report US-owned account information directly to the Mexican tax authority, rather than to the US IRS. The Mexican tax authority will then share that information with the US IRS.

The IGA provides that the United States will reciprocate with the sharing of information.

Mexican tax authorities have issued a set of administrative rules for banks and other financial and related entities to comply with the FATCA IGA.

Significant developments

There have been no significant corporate tax developments in Moldova during the past year.

Taxes on corporate income

Resident companies generally must calculate their taxable base for corporate income tax (CIT) purposes on their worldwide income. Permanent establishments (PEs), unlike resident companies, are only required to calculate their taxable base for CIT purposes on income sourced in Moldova.

The CIT rate is 12%. If the Moldovan Tax Authority (MTA), applying indirect methods, re-assesses the income amount compared to the declared gross income, a 15% CIT rate may be applied to the excess amount.

Individual entrepreneurs are subject to progressive rates of 7% for annual income up to 29,640 Moldovan lei (MDL) and 18% for annual income exceeding MDL 29,640.

Farming enterprises are subject to a 7% CIT rate.

Small and medium companies that are not registered as value-added tax (VAT) payers may opt for a special CIT regime of 3% on their turnover (under specific conditions).

Local income taxes

There is no separate CIT at the local level. CIT is distributed between the national state budget and local budgets depending on the establishment of the entity and its subdivisions in accordance with the existing rules.

Corporate residence

According to Moldovan tax law, a tax resident is a legal entity organised or managed in Moldova or that has its main place of business in Moldova. In practice, tax residency is determined by the place of incorporation.

Permanent establishment (PE)

Based on the Moldovan tax law, a PE is a fixed place of business through which a non-resident carries out, wholly or partly, either directly or through a dependent agent, entrepreneurial activity in the territory of Moldova.

Due to the regulatory environment in Moldova, as well as certain difficulties in operating a PE in Moldova, foreign enterprises operating through a PE in Moldova are not common.

Other taxes

Value-added tax (VAT)

The standard VAT rate in Moldova is currently 20%. It is generally applied to local supplies of goods and services as well as to goods subject to import and services subject to the reverse charge mechanism.

Apart from the above, certain types of supplies are subject to reduced VAT rates. For instance, local supplies of bread and bakery products; milk and dairy products; and specific phytotechnical, horticultural, and zootechnical products are subject to the reduced 8% VAT rate.

A number of supplies are subject to the 0% VAT rate (i.e. VAT exempt with the right to exercise the input VAT deduction), including international transportation and exports of goods or services. Certain supplies are subject to VAT exemptions, including financial services and the sale or rental of dwellings and land.

Starting from 1 May 2015, companies no longer have liability to calculate and pay VAT on supply of services or goods performed at the value below cost or below customs value.

Input VAT

Input VAT incurred on acquisitions of goods and/or services may be deducted, provided it is incurred by a VAT registered payer to perform VATable supplies within its business activity.

If input VAT relates to acquisitions destined to perform mixed supplies (i.e. both VATable and VAT-exempt ones), the input VAT deduction right is exercised on a pro-rata basis.

VAT refunds

Should a company register a deductible input VAT exceeding its output VAT, this balance can be partially refunded only if the company carries out a specific range of business activities (e.g. export supplies, international transportation services, production of bakery and dairy products, leasing activity). Otherwise, such VAT amount may be carried forward to the following months, offset against the company's future output VAT liabilities.

Additionally, VAT payers performing capital investments in Moldova may be entitled to refund the recoverable VAT related to these kinds of capital investments, provided such assets are used for product manufacture, service supply, and execution of works.

Companies investing in manufacturing buildings as of 1 May 2015 also have the right to benefit from VAT refund. The refund is allowed only for buildings put into use and used according to their destination.

The possibility to refund the VAT against future obligations to the national public budget is also now available, at the request of taxpayers not having debts to the national public budget.

VAT administration

A company is required to register for VAT purposes if the total turnover within the last 12 consecutive months reached the threshold of MDL 600,000. Also, as of 1 May 2015, companies can follow voluntary registration for VAT purposes if they only intend to perform taxable supplies.

All VAT payers registered for VAT purposes must submit electronic tax returns. VAT liabilities must be declared and settled monthly no later than the 25th day of the month following the reporting one.

Generally, VAT payers are required to issue VAT invoices for the VATable supplies performed, as well as to keep detailed records of their acquisitions and supplies in the correspondent VAT ledgers, according to a set of specific rules.

Additionally, all companies registered as VAT payers are required to register their VAT invoices with a taxable basis exceeding MDL 100,000 in the general electronic register of VAT invoices within ten working days from the date of issuing (with some specific exceptions).

VAT payers are entitled to a deduction of the amount of VAT paid to suppliers for material values and services purchased in Moldova if the VAT invoice is not registered by the seller in the register only on condition that the tax authorities are duly informed of such non-registration of VAT invoice.

Customs duties

Moldova's current customs framework is regulated by the Customs Code, Law on Customs Tariff, International Agreements concluded by Moldova to date, and by other legal acts.

Customs duties include customs procedural taxes, customs taxes, VAT, and excise duties. In general, any kind of goods and means of transport may enter and leave the territory of Moldova without any restriction. However, certain limitations specifically provided by the legislation are in force, which cover goods and means of transport crossing the border by breaching state security, public order, environment, etc.

Note that there are also some environmental pollution taxes related to specific packaging and goods that importers should pay.

Customs regimes

Definitive and suspensive customs regimes are provided under Moldovan law.

Definitive customs regimes refer to import and export, while suspensive customs regimes comprise transit, bonded warehouse, inward processing relief (with suspension), processing under customs control, temporary admission, and outward processing relief.

Customs valuation

Under Moldovan customs legislation, the customs valuation is generally performed in accordance with the customs valuation principles in the General Agreement on Tariffs and Trade (GATT).

The customs value is determined based on one of the six provided valuation methods (i.e. transaction value, transaction value of identical goods, transaction value of similar goods, deductive value, computed value, and reserve method). If the first method is not applicable, then the second method should be applied and so forth.

Preferential tariff treatment

Moldova has concluded free trade arrangements (FTAs) to date with most of the Commonwealth of Independent States (CIS) countries and is also a Central European Free Trade Agreement (CEFTA) contracting state. A preferential tariff treatment is granted for specific categories of goods, depending on their origin and in accordance with the FTAs to which Moldova is a party.

Also, further to the Association Agreement with the European Union (EU), the customs duties on goods originating in the other party are eliminated. The origin of goods can be proven with an EUR.1 movement certificate or an origin declaration.

Customs duties applicable on imports performed in the Republic of Moldova are eliminated, except for products free of customs duties within the limits of the tariff

Moldova

quotas. In case these limits are exceeded, the most-favoured-nation customs duty rate shall apply.

Customs duties applicable on imports performed in the European Union are eliminated, except for the following products:

- Products free of customs duties within the limits of the tariff quotas. In case these limits are exceeded, the most-favoured-nation customs duty rate shall apply.
- Products subject to entry price for which the *ad valorem* component of the import duty is exempted.
- Products subject to the anti-circumvention mechanism.

Elimination of the customs duties on some specific categories of goods will be gradually made.

Favourable tariff treatment

A favourable tariff treatment presumes a reduction or an exemption from customs duty upon import of specific goods into Moldova, depending on their type or final destination, according to domestic customs law or international agreements to which Moldova is a party.

Moldovan customs law provides the following exemptions, among others, from customs duty:

- Goods imported by individuals for personal use, not exceeding a specific threshold.
- Goods released in Moldova under transit, bonded warehouse, or inward processing relief regimes.
- Moldovan goods previously exported and released back within a three-year term in the same status, as well as compensatory products obtained under outward processing relief.
- Certain movable goods imported by legal entities carrying out leasing activities for the purpose of paying off their contractual liabilities derived from lease agreements concluded with Moldovan individuals or legal entities.
- Goods imported by legal entities for non-commercial purposes whose customs value does not exceed 100 euros (EUR).

Also, starting from 1 May 2015, the following have been exempted from customs duties:

- Samples of goods with customs value not exceeding EUR 22 for one import operation.
- Aircraft, helicopters, locomotives, multiple units for railways providing public transportation of passengers, and parts thereof (only certain tariff headings as provided by law).
- Certain vehicles imported free of charge (donation), regardless of the exploitation term, for certain special purposes.

Customs administration

Moldovan customs legislation provides for:

- the concepts and procedures of post clearance audit
- the obligation of individuals and companies to maintain the necessary documents for customs control for five years, and
- the obligation of individuals and companies that perform external trade transactions to maintain the related documents for the purposes of post clearance audit for five years.

The Customs Service of Moldova uses procedures for issuing binding tariff and binding origin information. Additionally, companies may use the electronic procedure

of customs clearance for the export of goods, as well as specific simplified customs procedures.

As of 1 May 2015, some concepts are introduced and adjusted related to the inspection system applied by the customs authorities (i.e. application for action, small amount delivery, blue corridor, subsequent inspection).

Excise duties

Excise duties apply to the production and import of cars, tobacco, alcohol, petrol and lubricants, and other goods. Special excise rates for each type of excisable goods are established in the tax code. The rates are widely variable and are based on multiple factors. The excise duty rates are generally indicated as a percentage applied to the value of goods or as a fixed amount for a certain quantity of excisable goods. However, for specific types of excisable duties, mixed excise duty rates are applicable.

The following are liable for excise duties:

- Any individual or legal entity producing and/or processing excisable goods in the territory of Moldova.
- Any individual or legal entity importing excisable goods, unless there is no specific exemption provided.

Businesses or individuals that produce and/or process excisable goods in the territory of Moldova (or intend to do so) must possess excise duty certificates, which must be granted by the tax authorities before these operations are actually carried out. It is mandatory for individuals or businesses, upon submitting the relevant applications to the tax authorities, to attach the details of the excise premises.

Under certain circumstances, excise duty exemptions may apply. Some excise-liable goods are subject to mandatory excise stamp marking and labelling.

Tax on immovable property

Tax on immovable property is a local tax paid on real estate (i.e. land and/or construction on the land) by the property owner or owner of material rights. Residents and non-residents owning real estate located in the territory of Moldova have similar obligations.

The 0.1% rate on immovable property used for entrepreneurial activity is applied either on the property's estimated value (if such exists) or on its book value, while the maximum tax rate on property used for agricultural activities is 0.1% of the property's book value.

Tax rates for real estate housing, including villages (communes) from Chisinau and Balti municipalities, are generally higher than for real estate housing from other municipalities.

Separate rates are applicable for agricultural land with construction buildings on it.

Tax on immovable property is paid in equal instalments on 15 August and 15 October for property owned before 30 June. For property acquired after 30 June, the tax is paid by 25 March.

Companies and individual entrepreneurs who own immovable property will be obligated to declare the immovable property tax by 25 July of the current fiscal period.

In the event of an owner change during the fiscal year, the previous owner may request recalculation of the real estate tax in proportion to the period in which they were subject to taxation.

Moldova

Transfer taxes

Transfer taxes may be applied for notary acts performed by authorised notaries and other persons empowered by law. Transfer taxes are applied upon authentication by a notary of sale-purchase agreements regarding plots of land; transfers of houses into private property; alienation agreements of houses, apartments, garages, and other constructions; authentication of mortgage agreements; and other evaluative contracts.

Stamp taxes

According to the law on state tax, stamp tax (state duty) is the amount charged by specifically authorised state bodies from individuals and legal entities for the exercise of certain actions or issuance of legal documents of interest to them.

Stamp taxes may be applied for, but not limited to, the following:

- Claims submitted to courts of justice.
- Registration of civil status documents.
- Issuance of passports to Moldovan citizens and other related documentation.
- Residence registration.
- Redemption of goods from the state.
- Registration of mortgage, for issue of extracts from the Real Estate Register.
- Notary acts (i.e. for notarisation of sale-purchase agreements of immovable assets).
- Application of the apostil.

Payroll taxes

Salaries and other remunerations provided by an employer to its employees are subject to personal income tax (PIT). Thus, an employer is liable to withhold and pay PIT from employees' taxable income, as follows:

- 7% for annual income up to MDL 29,640 (limit applicable for 2015).
- 18% for annual income that exceeds MDL 29,640 (limit applicable for 2015).

Also, there are available deductions, each resident taxpayer being allowed to claim a personal allowance and allowance for spouse of MDL 10,128 a year and allowance for each dependant of MDL 2,256.

Social security contributions

Employers must pay social security contributions of 23% of their employees' gross salary and other recompense to the Social Security Fund. Employees pay an individual contribution in the amount of 6% of their gross salary and other recompense (the percentage applies to an annual base capped at MDL 270,000). The legislation provides an annual fixed social security contribution for other categories of taxpayers in an amount approved for each year (e.g. MDL 6,372 applicable as of 28 April 2015).

Companies should generally submit reports on social security contributions on a monthly basis (under certain exceptions). The social security contribution due by both employer and employee must be transferred by the employer to the budget no later than the 25th day of the month following the reporting one.

A fine equal to double the amount of social security contributions is applied in case of diminishing or hiding the salary funds and other remuneration and the related social security contributions.

Health insurance contributions

The mandatory health insurance contribution, computed as a percentage of wages and other remuneration, as of 28 April 2015, is established at 4.5% for each payer category (employers and employees). The legislation also provides for an annual fixed amount of health insurance contribution paid by other categories of taxpayers in an amount approved for each year (e.g. MDL 4,056 applicable in 2015).

The mandatory health insurance contributions must be declared quarterly by the end of the month following the reporting quarter. The mandatory health insurance contribution due by both employer and employee must be transferred to the budget at the moment of payment of salary and other remunerations.

A fine equal to the amount of contributions is applied in case of diminishing or hiding the salary funds and other remuneration, from which the compulsory health insurance contributions are due.

Local taxes and duties

Local taxation in Moldova refers to the application of the following main types of taxes and duties:

- Taxes on the following natural resources:
 - Water.
 - Mineral exploration.
 - Geological exploration.
 - Mining operations.
 - Usage of underground areas for the construction of underground structures not related to mining operations.
 - Exploitation of underground structures within the performance of entrepreneurial activity, not related to mining operations.
 - Standing wood.
- Tax on immovable property.
- Duty for the right to perform local auctions and lotteries.
- Tax on advertising placement and tax on advertising devices.
- Fee for the right to use local symbols.
- Land improvement duty.
- Tax for commercial and/or services providing units.
- Parking tax.
- Hotel room occupancy tax.
- Resort fee.

M

Local authorities are authorised to establish the levels of tax rates for local taxes.

Road taxes

Road taxes are fees collected for the use of roads and/or protection zones of the roads outside the locality limits.

The system of road taxes includes the following:

- Tax for the use of roads by vehicles registered in Moldova.
- Tax for the use of roads of Moldova by vehicles not registered in Moldova (vignette).
- Tax for the use of roads by the vehicles with total mass, axle loads, or dimensions exceeding the admitted limits.
- Tax for the use of road protection zones outside the localities for carrying out construction or installation works.
- Tax for the use of road protection zones outside the locality limits for placing outdoor advertisements.
- Tax for the use of road protection zones outside the locality limits for placing roadside service objects.

Depending on the type of road tax, the tax law establishes the taxable person, deadlines for payment of the road tax, tax rates, exemptions (e.g. a legal entity or an individual shall pay road tax on vehicles registered in Moldova (i) on the date of state registration of vehicle or (ii) on the date of the vehicle inspection/annual technical testing of the vehicle).

Moldova

Road tax rates for the use of roads by vehicles registered in Moldova vary depending on the type of vehicle and its specific characteristics (engine capacity, weight, etc.).

The fixed tax rates for vignette vary from EUR 4 to EUR 50, depending on the period the vehicle stays in the territory of Moldova.

Branch income

Branches

Moldovan law does not distinguish between branches of non-resident companies and local companies established by a foreign investor. A non-resident's branch is established and registered in Moldova as a legal enterprise fully owned by the foreign investor. As such, it is subject to the same tax regime as local incorporated companies.

On the other hand, the concept of a tax PE does exist in Moldova. Generally, the PE of a non-resident entity will be subject to CIT in Moldova on any profits attributable to that PE. Since there is no local concept of a legal branch that is not a legal entity, non-residents do not typically intentionally operate in Moldova through a taxable PE.

Representative offices

Representative offices are often established by non-resident entities as a first step to operating in Moldova. According to the tax law, a representative office can engage only in auxiliary or preparatory activities. A representative office can perform only a limited range of activities without being considered a PE of the non-resident.

All representative offices must submit, by 25 March of the year following the reporting year, the required Tax Reporting Statement on the activity conducted during the year concerned.

Income determination

Resident legal entities are taxed on their worldwide income, while non-resident entities are taxed on their Moldovan-source income. Taxable income is computed as accounting profit adjusted in accordance with tax legislation.

Inventory valuation

Under the National Accounting Standards, the following inventory valuation methods are mandatory: specific identification, first in first out (FIFO), and weighted average cost.

Assets are generally valued at their acquisition cost, production cost, or market value.

Capital gains

Taxable gain is generally calculated as 50% of the difference between the sale price and the fiscal value of the capital assets (i.e. all costs related to the acquisition of capital assets). This taxable portion of the capital gain is then taxed at the normal tax rates.

This capital gain should be included in the total gross amount of income for the year in which the capital assets were sold (alienated). Capital gains may be decreased by capital losses registered in the current or previous year. Some examples of capital assets include shares, plots of land, options to purchase or sell capital assets, etc.

Dividend income

Starting with profits earned in 2012, dividends paid by Moldovan legal entities to other Moldovan legal entities are taxed with the applicable final 6% withholding tax (WHT),

while the distribution of dividends from profit earned during the period between 2008 and 2011 remain subject to the previously applicable final WHT of 15%.

Dividends received by Moldovan legal entities from foreign legal entities are included in taxable income and taxed at the applicable 12% CIT rate. According to Moldovan legislation, the beneficiary of such dividends is entitled to a credit for the tax paid in the foreign country, within certain limits.

Interest income

In general, the interest income derived by legal entities is included in the total taxable amount and taxed at the applicable 12% CIT rate, unless a specific exemption is provided (e.g. interest from state bonds).

Exchange gains and losses

Revenues obtained from foreign exchange differences are to be included in taxable income. Foreign exchange losses are CIT deductible in the period they are incurred.

In certain circumstances (e.g. high depreciation of the national currency), foreign exchange differences should be capitalised to the value of assets in relation to which the expenses were incurred.

Non-taxable revenues

Moldovan tax law provides for the following main types of non-taxable revenues:

- Contributions to the capital of an entity.
- Income earned while benefiting from income tax incentives.
- Money received from special funds in the form of grants from government-approved programmes.
- Income from reversing impairment losses on depreciation of fixed and other assets.
- Income obtained under international projects and grants that contribute to the long-term development of education and research.

M

Foreign income

Resident legal entities are taxed on their worldwide income. The legal entities, under certain conditions, can benefit from tax credits provided under a double tax treaty (DTT) or can apply for unilateral tax credits against income tax paid in any foreign country if this income is subject to taxation in Moldova. Such tax credit shall not exceed the amount that would have been estimated at the CIT rate applicable in the given tax period. Otherwise, there is no specific tax deferral regime.

Deductions

As a general rule, expenses incurred by a company are deductible for CIT purposes only if they are deemed as ordinary and necessary, aimed at deriving taxable income, and justified with adequate supporting documentation.

The rate of deductible expenses for business purposes (ordinary and necessary) that are not adequately supported by necessary documentation is 0.2% from taxable income.

Depreciation and amortisation

Fixed assets are subject to CIT depreciation under the diminishing-balance method if their useful economic life exceeds one year and acquisition costs exceed MDL 6,000.

According to the fiscal law, fixed assets are divided into five categories of property. These categories are set out according to specific rules, mainly on the assets' useful life (i.e. the number of years during which the assets' utilisation generates economic advantages;

Moldova

the useful life for each type of depreciating asset is regulated by governmental decision). The depreciation rates vary as follows:

- First category (e.g. buildings): 5%.
- Second category (e.g. constructions): 8%.
- Third category (e.g. roads, certain equipment): 12.5%.
- Fourth category (e.g. industrial equipment): 20%.
- Fifth category (e.g. cars, computers, furniture): 30%.

Intangible assets are subject to CIT amortisation according to the straight-line method. Moldovan tax law does not contain specific provisions regarding the useful life for intangible assets for tax purposes.

Goodwill

According to the National Accounting Standards, goodwill is not recognised as an intangible asset.

Start-up expenses

According to the National Accounting Standards, start-up expenses incurred by companies (e.g. stamp taxes paid upon company registration, drawing up of registration documents, manufacture of stamp) are not recognised as an intangible asset. Therefore, such expenses are to be treated as current expenses.

Interest expenses

Different CIT deductibility rules apply for interest on loans used for carrying out operational activities and for loans used for investment activities performed on an occasional basis.

As a general rule, deductions for interest expenses are allowed for CIT purposes, provided such expenses are deemed as ordinary and necessary for carrying out the activities of the business. Expenses should also be incurred for the purposes of obtaining taxable income and justified by adequate backup documentation.

If the interest paid by a Moldovan company relates to its operational or day-to-day activities, the related expenses are deductible for CIT purposes, taking into account the following:

- Interest expenses incurred by businesses, based on loan agreements, for the benefit of individuals and legal entities (except financial institutions, micro-financing organisations, and leasing companies), are deductible for CIT purposes within a specific limit established by law. Specifically, such interest expenses are deductible up to the limit of the average weighted interest rate on credit loans offered by banks to legal entities, depending on the period of the loan and its currency (e.g. different limits are applied for loans in Moldovan lei and those in foreign currency).
- If the loan is obtained for the purpose of acquiring/building fixed assets, the related interest expense should be capitalised to the initial fiscal value of such assets until they are put into exploitation. The deductibility of such interest expense is capped at the above limit. The excess difference is treated as a non-deductible expense for CIT purposes.

If interest relates to an investment activity, the interest expense is deductible for CIT purposes within the limit of the income derived from the investment.

Bad debt

Bad debts are deductible for CIT purposes, provided certain conditions are fulfilled and justifying documents are made available.

Charitable contributions

Charity and sponsorship expenses are deductible for CIT purposes if borne for the benefit of public authorities and public institutions financed from the state budget, as well as non-profit organisations and family-type foster homes within certain conditions, at up to 2% of taxable income.

Fines and penalties

Fines and penalties related to CIT, related to other taxes and due payments to the state budget, or for violations of legal acts are not deductible for CIT purposes.

Taxes

CIT incurred in line with requirements of the Moldovan tax law is not deductible for CIT purposes.

Other taxes are generally deductible for CIT purposes, except those paid on behalf of another person.

Other significant items

Among others, the following expenses are also generally deductible for CIT purposes:

- Research and development (R&D) expenses incurred during the fiscal year as current expenses, should certain conditions be met.
- Business trip expenses, protocol expenses, and expenses on insurance of business entities, within the limits approved by the government.
- Waste, spoilage, and perishability expenses, within the threshold approved by the company's manager.
- Leasing companies are allowed to deduct provisions to cover claims related to non-recovery of lease rates and interest rates up to 5% from the weighted average balance from the account receivables, provided certain conditions are met.
- Financial institutions are allowed to deduct loss loan provisions of assets and conditional commitments, calculated according to International Financial Reporting Standards (IFRS).
- Micro-finance organisations are allowed to deduct loss loan provisions, calculated according to requirements established by the National Commission on the Financial Markets.

Non-deductible expenses

Among others, the following expenses are generally not deductible for CIT purposes:

- Expenses not adequately supported by necessary documentation, except the 0.2% rate *as mentioned above*.
- Provisions, except for financial institutions, micro-finance organisations, and leasing companies *as mentioned above*.
- Losses incurred from transactions between affiliated parties.

Fiscal losses

Fiscal losses may only be carried forward in three equal instalments for three consecutive years following the year the losses were incurred, provided the company records taxable income. If the company recorded fiscal losses for more than one year, such losses are carried forward in the order in which they arose. Fiscal losses are recorded on off-balance-sheet accounts.

Losses may not be carried back.

Payments to foreign affiliates

A Moldovan legal entity generally may deduct expenses related to payments to foreign affiliates to the extent that these amounts were actually paid and are not in excess of what it would have paid to an unrelated entity (i.e. arm's length). However, the payer

Moldova

is required to hold documentary evidence for the actually performed transactions. Still, certain types of expenses may follow general rules of deductibility that would limit their amount (e.g. interest expenses on loan agreements).

Group taxation

Moldovan tax law does not provide for group taxation.

Transfer pricing

Currently, transfer pricing regulations in Moldova are at an initial development stage. However, according to the 2015 to 2017 Medium Term Tax Policy of the Moldovan government, as well as the available draft law, formal transfer pricing documentation requirements are expected to be introduced in the Moldovan tax law in the near future.

Moldova is currently not an Organisation for Economic Co-operation and Development (OECD) member country, and the domestic law does not provide for any reference to the possibility of applying the OECD Transfer Pricing Guidelines.

As a general rule, under Moldovan tax provisions, transactions concluded between related persons are taken into consideration only if the interdependence of these persons does not influence the outcome of the transaction. The arm's-length principle applies to transactions with both resident and non-resident related parties.

With reference to the transactions carried out by Moldovan companies with related parties, Moldovan tax law provides the following specific provisions:

- No deduction is allowed for losses incurred on the sale or exchange of property, performance of work, or supply of services between related parties, carried out either directly or through intermediaries (regardless of whether the transaction price corresponds to the market value).
- No deduction is allowed for expenses incurred in relation to related parties if no justification is available for payments and if such expenses do not represent necessary and ordinary business expenses.

In accordance with Moldovan tax law, a company is considered the taxpayer's related party if one of the following conditions exists:

- The company controls the taxpayer.
- The company is controlled by the taxpayer.
- Both the company and the taxpayer are under common control of a third party.

From a tax perspective, control is the ownership (either directly or through one or more related persons) of 50% or more in value of the capital or voting power of one of the companies. For this purpose, an individual will be treated as owning all equity interest that is directly or indirectly owned by members of one's family.

Two individuals are related parties if they are spouses or relatives up to the fourth degree.

Thin capitalisation

Moldovan tax law does not provide for a specific thin capitalisation regime.

The deductibility of interest expenses follows the deductibility regime as described under Interest expenses in the Deductions section.

Controlled foreign companies (CFCs)

Moldovan tax law does not contain CFC provisions.

Tax credits and incentives

Foreign tax credit

Income tax paid in any foreign country, if this income is subject to taxation in Moldova, is allowed for tax credit, provided that the taxpayer submits a document that justifies payment (withholding) of the income tax outside of Moldova, certified by the competent body of the respective foreign country, with its translation into the state language.

The amount of tax credit for any taxable year should not exceed the amount that would have been estimated at the rate applicable in Moldova with regard to this income.

A tax paid in a foreign country should be creditable for the year in which the income is taxable in Moldova.

Free entrepreneurial zones (FEZs)

FEZs are territories where domestic and foreign investors can carry out entrepreneurial activities on preferential terms (i.e. favourable tax, customs, visa, and other regimes). There are currently seven FEZs in Moldova.

The following types of activities may be carried out in an FEZ:

- Production of goods preferentially for export, excluding alcohol and alcoholic products.
- Sorting, packing, marking, and other similar operations of goods transiting the customs territory of Moldova.
- External commercial activities.
- Other supportive activities.

There is also an international free port (Giurgiulesti International Free Port) and airport (Marculesti International Free Airport) with status similar to FEZs that can benefit from specific tax and customs incentives.

FEZ incentives

For the 2015 year, the following CIT incentives for FEZ investors have been maintained:

- Entities that are established in the FEZ and export goods and services from the FEZ outside the customs territory of Moldova or deliver the produced goods to other FEZ residents for goods to be exported are entitled to apply only 50% of applicable CIT rate on such gains. For other cases, the CIT rate is 75% of the established one.
- The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova or from supply of the produced goods to other FEZ residents for goods to be exported is CIT exempted for a period of three years, provided that the FEZ residents invested in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ capital equivalent to at least 1 million United States dollars (USD).
- The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova or from supply of the produced goods to other FEZ residents for goods to be exported is CIT exempted for a period of five years, provided that the FEZ residents invested in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ capital equivalent to at least USD 5 million.

From a VAT standpoint, goods and services supplied in the FEZ from abroad, from the FEZ outside the customs territory of Moldova, in the FEZ from other areas of Moldova, and those supplied to residents of other FEZs are subject to 0% VAT (with some exceptions).

Moldova

According to the customs provisions, goods are introduced into the FEZ with no VAT or customs duty and are not subject to economic policy measures, according to specific criteria. However, certain taxes in specific situations might be incurred by residents of the FEZ. Investors in the FEZ are guaranteed and protected from changes in legislation for a general period of up to ten years, while under certain conditions this period may be extended to 20 years.

Withholding taxes

Residents

Resident legal entities making payments to individuals (other than salary payments) must withhold and pay WHT to the MTA at the following rates:

- Preliminary WHT:
 - 7% preliminary withholding of payments made for the benefit of resident individuals, unless such payments are tax exempt.
 - 15% preliminary withholding from interests.

The beneficiary deducts (i.e. recovers) the amount of preliminary WHT from annual income tax due.

- Final WHT:
 - 10% final withholding of an individual's income derived from leasing, rent, and usufruct of movable and immovable property.
 - 6% final withholding of dividends paid out to individuals, except for dividends for the profits received between 2008 and 2011, for which the WHT rate is 15%.
 - 15% from the amount withdrawn from the share capital related to the increase arisen from the distribution of net profit and/or other sources identified as equity among shareholders (associates) throughout the 2010 to 2011 fiscal period, in accordance with the share capital venture quota.
 - 2% from payments performed for the benefit of individuals, other than individual entrepreneurs and farmers, on income obtained from supplying phytotechnical, horticultural, and zootechnical products, except natural milk.

The tax charged to residents under this paragraph is a final one and exempts the recipient of such income from including it into gross income, as well as from declaring it.

The following tax treatment applies to royalty payments to residents:

- Practicing entrepreneurial activity: no WHT at source is applied.
- Resident individuals: a final WHT of 12% is applied, without including such income in the gross income of individuals (except royalty income of individuals aged 60 and over in the field of literature and art).

Additionally, according to Moldovan tax law, each payer of earnings should pay to the state budget a tax of:

- 18% of gambling earnings.
- 18% of promotional campaigns if the earned amount exceeds 10% of the personal allowance but does not exceed MDL 50,000.
- 25% of promotional campaigns if the earned amount equals or exceeds MDL 50,000.

Also, earnings from promotional campaigns and/or lottery earnings are considered non-taxable income sources if the value does not exceed 10% of the personal allowance (MDL 10,128 as of 1 May 2015).

Non-residents

The following WHT rates apply upon payments to non-residents:

- 6% for dividend payouts, except for dividends for the profits received between 2008 and 2011, for which the WHT rate is 15%.
- 15% from the amount withdrawn from the share capital related to the increase arisen from the distribution of net profit and/or other sources identified as equity among shareholders (associates) throughout the 2010 to 2011 fiscal period, in accordance with the share capital venture quota.
- 12% for other revenues.

Double tax treaties (DTTs)

The DTTs in force between Moldova and other countries may provide for more favourable tax rates than those provided by the local provisions. For their application, the foreign beneficiary of such income should provide the paying entity with its fiscal residency certificate before the payments are actually made.

Currently, Moldova has 48 operational DTTs, as outlined below:

Recipient	Dividends * (%)	Interest * (%)	Royalties * (%)
Albania	5/10	5	10
Armenia	5/15	10	10
Austria	5/15	5	5
Azerbaijan	8/15	10	10

Ukraine	5/15	10	10
United Kingdom	0/5/10	0/5	5
Uzbekistan	5/15	10	15

* If multiple rates are listed, then the WHT rate to be applied is subject to fulfilment of specific criteria provided by the DTT.

Tax administration

Taxable period

The tax year for CIT purposes is the calendar year. For new business entities, the fiscal year is considered the period beginning with the registration date until the end of the calendar year.

For WHT and VAT purposes, the fiscal period is the calendar month starting the first day of the month.

Tax returns

An annual CIT return must be submitted to the MTA by 25 March of the year following the reporting year.

WHT liabilities must be declared and settled monthly no later than the 25th day of the month following the reporting one.

Companies are also liable to submit specific annual tax reports on WHT and PIT withheld with disclosure on the beneficiaries of the income provided no later than 25 January following the reporting year.

Farming enterprises and individual entrepreneurs with an annual average number of employees not exceeding three and not registered as VAT payers must submit a unified annual tax return, provided certain conditions are met.

Adjusted tax returns

Taxpayers who discover that the tax return previously submitted contains an error are able to submit an adjusted tax return, provided that no written decision was issued by the tax authority in order to initiate a tax audit and the related tax period is not covered by a tax control.

Late interest payments will not be applicable in amounts higher than the tax liability resulting from the adjusted tax return submitted, and no fines will be applicable if the tax duties are paid before the announcement of a tax audit.

A fine will not apply in certain circumstances of fiscal violations specified by law, and, if already established, it will be entirely cancelled if no additional tax liabilities arise.

Companies that have miscalculated the taxes, and this was not detected in the previous tax audit, are absolved from fines and late interest payments for violations identified within the repeated tax audit.

Companies keeping the accounting records and preparing financial reports under IFRS or under the National Accounting Standards will not be fined for violation of accounting and record keeping for a period of up to two years from the date of implementation (transition) to those standards in case such violation represents an obstacle for performing tax audit.

Payment of tax

Taxpayers must declare and pay the applicable CIT by 25 March of the year following the reporting year. Taxpayers are also required to pay interim CIT, no later than 25 March, 25 June, 25 September, and 25 December, amounts equal to 25% of either the total estimated value of the CIT due for the current fiscal period or the total value of the calculated CIT for the previous fiscal period.

Fines and penalties

The MTA is entitled to apply a fine of 30% of the diminished tax liabilities (including CIT ones).

Under the tax law, the MTA is entitled to apply a fine in the amount of the undeclared tax if it is a result of tax evasion.

Taxpayers who settle amounts as assessed by the MTA within three business days and have no other outstanding liabilities may benefit from a 50% reduction of the fines applied by the tax authorities.

In addition, certain special provisions regarding tax evasion apply. The term 'tax avoidance' is defined under Moldovan tax law as diminishing the tax liabilities by more than MDL 30,000 by means of including in accounting, tax, or financial documents deliberately distorted data on income or expenses or by hiding other objects of taxation. Should the amount of the tax due exceed MDL 30,000, the tax evasion is regarded as a criminal offence. According to the Moldovan Criminal Code, legal entities can be punished for tax evasion with a fine up to MDL 120,000 and preclusion from performing certain activities or winding-up.

Among the most important fines and sanctions for non-compliance with applicable tax law, the following are worth mentioning:

- The fine for the performance by the taxpayer of an economic activity with the issuance of a bill without using the existing cash register is MDL 5,000.
- The fine for the failure to provide the VAT invoice in accordance with the tax law is MDL 3,600 for each VAT invoice but capped to MDL 72,000. The same fines are applicable for failure to register the fiscal invoice in the general electronic register managed by the tax authorities.
- The fine for hindering the execution of a tax audit by not providing access to production, storage, commercial, or other facilities is MDL 10,000.

The fine for submitting a tax return containing unauthentic information is MDL 1,000 for each tax return, capped to MDL 7,000.

Tax audit process

The rules governing the tax audit process are stated in the tax code. Generally, the tax audit duration and frequency depends on its type. For instance, a tax audit performed

Moldova

at the taxpayer premises should not exceed two months and should be performed no more than once per year for the same taxes and duties, except for specific circumstances provided by law.

Also, a tax audit can be performed on a more frequent basis within certain specific circumstances (e.g. refund of VAT and other taxes, reorganisation).

A repeated tax audit for already audited periods can be performed in a number of cases, for instance:

- In case the results of previous controls are inconclusive, incomplete, or not satisfactory.
- If certain circumstances are identified that attest to the existence of tax infringements.
- In case of reorganisation or liquidation.

Statute of limitations

Under the general tax rule, the Moldovan tax authorities can assess tax liabilities no later than four years after the last date established for the submission of the relevant tax report or for the settlement of that tax liability (if submission of the tax report is not required). This limitation term does not apply in case of tax-related crimes or non-submitting of the corresponding tax returns.

Topics of focus for tax authorities

There are no specific topics of focus for the tax authorities. Generally, it depends on the nature of the taxpayer and the specifics of the activity it performs. The main criterion for selection of a company to be subject to a tax audit is a risk based one.

Rulings

The law does not provide for the possibility of obtaining binding rulings. However, comfort letters can be obtained.

Taxpayers that inadequately computed tax liabilities due to incorrect written explanations issued by the MTA may not be subject to sanctions (i.e. fines and late-payment penalties). Tax liabilities may still be recomputed by the MTA. Written explanations are issued by the MTA free of charge and may remain valid for an indefinite period of time, unless cancelled by new legislation or other rulings. Such explanations are generally issued by the Moldovan competent authorities during a period of up to one month.

Other issues

The legislation and the approach of the state authorities in Moldova related to corporate taxation have been and are expected to be subject to changes.

Taxpayers should seek professional advice on specific issues, given that only limited interpretations have been issued by the MTA.

US Foreign Account Tax Compliance Act (FATCA)

On 30 June 2014, the US Treasury announced that an intergovernmental agreement (IGA) was 'in effect', and, on 26 November 2014, the US Treasury and Moldova signed the Agreement for Cooperation to Facilitate the Implementation of FATCA, based on IGA Model 2. Due to the fact that the IGA is not ratified, it cannot be applied in Moldova because it would counter legislation currently applicable in Moldova.

Significant developments

Tax Amnesty Law adopted for the second time

On 7 August 2015, the Mongolian Parliament adopted a new legislation offering amnesty from tax obligations and administrative penalties for individuals and companies that voluntarily disclose previously undeclared incomes, properties, and others, as well as get officially registered at the state registration, social insurance, and tax authorities, within the deadline of 20 February 2016.

As a preliminary result of the law adoption, incomes and properties of 34.7 trillion Mongolian tugrik (MNT) have been disclosed. Further, taxes of MNT 8.3 trillion and fines and penalties of MNT 2.5 trillion have been forgiven.

New Value-Added Tax (VAT) Law entered in force

A new VAT Law, approved by the Parliament on 9 July 2015, entered into force starting from 1 January 2016.

Under the new law, a number of new tax principles were adopted, such as an electronic VAT system, 20% tax refund to individual VAT payers, and a nationwide promotion lottery for VAT individual payers.

Capital City Tax Law introduced

On 19 June 2015, the Mongolian Parliament passed the Capital City Tax Law in order to promote development of the capital city by increasing its budget revenue. The law entered into force from 1 October 2015.

This indirect tax is imposed on all types of alcoholic drinks and tobacco, as well as services of hotels, resorts/camps, restaurants, and night clubs.

The Ulaanbaatar City Council has set a current tax rate of 1%, which is the highest rate permitted under the ceiling determined by the law.

Anticipated reforms in tax legislations and transfer pricing rules

Under the second tax reform program, the Ministry of Finance and the tax authorities have developed a number of draft legislations, such as draft laws on General Taxation, Corporate Income Tax (CIT), and Personal Income Tax (PIT), and draft regulations on transfer pricing rules.

We expect that the draft laws may be adopted in May or June 2016. Substantial policy changes, such as advanced rules on transfer pricing, thin capitalisation, and anti-avoidance, are included in the draft laws.

The new transfer pricing regulations define covered transactions more specifically, introduce tools for analysing transfer pricing, determine transfer pricing documentation requirements, and establish other important rules.

Mongolia

Taxes on corporate income

Mongolian resident economic entities are taxable on aggregate annual income earned worldwide. Non-resident economic entities carrying out business activities in Mongolia are taxable on the income earned in the territory of Mongolia and from Mongolian sources.

Mongolian CIT is levied at the following rates, using a progressive-rate scale that ranges from 10% to 25%, as follows:

- 10% applies to the first MNT 3 billion of annual taxable income.
- 25% applies to any excess of MNT 3 billion of annual taxable income.

However, the income described in the chart below is excluded when determining the annual taxable income and is taxed at different tax rates on a gross basis:

Source of income	Applicable tax rate (%)
Dividends	10
Royalties	10
Interest	10
Gambling, betting games, and lotteries (net)	40
Sale of immovable property	2
Sale of rights (e.g. mining licences, special activity licences, and other rights granted by the authorised organisations for conducting specific activities)	30

Local income taxes

CIT is levied at the state level in Mongolia. There are no local corporate income taxes.

Corporate residence

A resident legal entity is an economic entity formed under the laws of Mongolia or a foreign economic entity that has its place of management in Mongolia. There has not been further development of this concept, so it cannot be assumed that the standard place of effective management or control test will apply.

A non-resident company is a foreign economic entity that conducts its business in Mongolia and earns income from Mongolian sources.

Permanent establishment (PE)

Although there is a theoretical possibility to establish a branch of a foreign entity in Mongolia, it is currently not practically possible due to uncertainties in the law related to the legal status of such entity, filing procedures, etc.

It is also possible to register a PE in Mongolia with the tax authorities, although neither the legal status nor respective taxation rules are clear. According to the draft law on CIT, which is under Parliament discussion at this moment, PEs can be created in Mongolia only by non-residents from those countries that have double tax treaties (DTTs) with Mongolia.

Other taxes

Value-added tax (VAT)

According to the new VAT Law, effective from 1 January 2016, a person (covering legal entities, individuals, and PEs) whose sales income has reached MNT 50 million or

more has to be registered as a VAT withholder. The threshold for voluntary registration is MNT 10 million of sales income. A sale of fixed assets is not considered for the VAT registration thresholds.

VAT at the rate of 10% is imposed on the supply of goods, services, and works imported, exported, and sold in Mongolia.

One of specific features of the Mongolian VAT legislation is that works and services received from a non-resident (irrespective of whether they are supplied in Mongolia or not) are subject to VAT under the reverse-charge procedure (the RC VAT).

Customs duty

A flat customs tariff of 5% applies with respect to most goods imported into Mongolia, except for information technology, medical equipment, and pure-bred livestock, which are zero rated.

Export duties apply to certain exported goods, such as unprocessed camel wool, wood, and wooden materials.

Excise tax

Excise tax is levied on goods manufactured in or imported into Mongolia, such as tobacco, alcohol, gasoline and diesel fuel, and passenger vehicles. Excise tax is also levied on the physical units of special-purpose technical devices and equipment used for betting games and gambling and on the activities of individuals and legal entities that conduct such activities. The excise tax rate on the goods varies between MNT 290 and MNT 265,000, and for special-purpose technical devices and equipment it varies between MNT 4.3 million and MNT 116 million per unit according to the origin and type.

The excise tax rates for gasoline and diesel that are produced in Mongolia are as follows:

- Gasoline:
 - MNT 0 to MNT 15,950 per tonne (up to 90 octane).
 - MNT 0 to MNT 17,400 per tonne (above 90 octane).
- Diesel: MNT 0 to MNT 21,750 per tonne.

For imported gasoline and diesel, the excise tax rates vary between MNT 0 and MNT 850,000, depending on the port of import.

Immovable property tax

Immovable property tax is an annual tax that varies between 0.6% and 1%, depending on the decisions made by the local representatives' committee, on the value of the immovable property that is owned. For tax purposes, the value used is the value registered with the government registration authority. If the property is unregistered, the insured value is used. In the absence of either a registered or insured value, the accounting value is used.

This tax does not apply to property owned by persons and financed through the state budget, to any dwelling houses, or to any buildings and construction for public use.

Transfer taxes

Transfer of rights is treated as sale of right in practice and taxed at 30% under CIT Law.

In the case of transfers of property, stamp duty will be applied.

Stamp duty

Under the Law of Mongolia on State Stamp Duties, there are 45 types of activities subject to stamp duties, including the following:

Mongolia

- Settlement of a legal dispute by a court.
- Court involvement in arbitration.
- Notary services.
- Consulate services.
- State registration services for legal entities.
- Registration services for foreign invested economic entities and representative offices of foreign organisations.
- Other specific activities that need permissions and rights from the state authorities.

The amount of duty varies depending on the types of services or activities involved.

Fees and taxes applicable to the extractive industry

A range of fees and other taxes are payable for activities in the extractive industry. The primary ones include the following:

- Mining License Fee that is agreed to up front and stated in the mining licence.
- Royalties that are paid on the sale of mining products. The rate depends on the product being mined and the level of processing being performed in Mongolia.
- Water Pollution Fee.
- Air Pollution Fee.
- Land Use Fee.
- Natural Resources Usage Fee.

Payroll taxes

Social insurance contribution by employer

Employers' social insurance contribution depends on the industry type and is subject to rates between 11% and 13%, which is comprised of 7% for pension, 0.8% for benefits, 2% for health, 0.2% for unemployment, and 1% to 3% for industrial accident and occupational disease insurance. Employer charges are not capped. Social insurance taxes paid by employers are deductible in determining taxable income.

The employer should also withhold social insurance taxes (10%) from employees and submit returns electronically and by paper before the 5th day of the following month on a monthly basis. Payments should be made before the end of the month to the social insurance fund account.

Branch income

The repatriation of profits from branches of foreign legal entities is subject to branch profits tax at a rate of 20%.

Please note that it appears it is no longer possible for foreign legal entities to establish a branch in Mongolia. However, the above provision remains in place for branches that were previously established in Mongolia.

Income determination

Inventory valuation

There is no specific provision in the tax law for inventory valuation.

Capital gains

Capital and ordinary transactions are treated in the same way for tax purposes (i.e. included in annual taxable income). An exception is provided for income from sales of immovable property, which is subject to tax of 2% on gross sales proceeds.

Taxation of capital gains of non-residents is not clear. The CIT Law could be interpreted in a way that the net gain from disposal of shares in a Mongolian company should be subject to CIT. However, since there is no mechanism in practice for non-resident companies to declare income in Mongolia and show the basis for the taxable gain, only withholding tax (WHT) (20% on the gross payment) charged at source of payment is available. No mechanism for taxation of capital gains currently exists if the transaction takes place between two non-residents that have no taxable presence in Mongolia.

Dividend income

Dividend income earned by a Mongolian resident entity is subject to WHT of 10%. Dividend income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Interest income

Interest income is subject to a special income tax of 10%. Interest income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Partnership income

There is no transparent partnership concept in Mongolia. Partnership income is treated as income of a legal entity and is subject to CIT.

Rental income

Rental income is included in taxable income for tax determination.

Royalty income

Royalty income is taxed at a special rate of 10%. Royalty income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Unrealised currency exchange gains/losses

Unrealised currency exchange gains are not considered as taxable income, and, at the same time, unrealised losses are not deductible from taxable income.

Foreign income

Mongolian legal entities pay tax on their worldwide income. Unremitted earnings are taxed the same as ordinary earnings.

Credit relief is available with respect to foreign tax on income arising from countries that have DTTs with Mongolia, capped at the level of Mongolian tax that would have been due on the same income in Mongolia.

Deductions

Expenses mostly associated with generating aggregate annual income are deductible for CIT purposes (provided proper documentation is in place), and a list of these expenses is provided in the legislation. Expenses not on this list are not deductible.

Accrued expenses

Accrued expenses are deductible.

Contingent liabilities

Contingent liabilities are not deductible.

Mongolia

Depreciation and amortisation

Depreciation of fixed assets and amortisation of intangibles are deductible within the limits provided in tax legislation. A straight-line method is used and the years of usage are determined for tax purposes.

Non-current asset class		Useful life (in years)
1	Building and construction	40
2	Machinery and equipment	10
3	Computer, computer parts, and software	3
4	Intangible asset with undefined useful life	10
5	Intangible asset with defined useful life (includes licence for mineral exploration and extraction)	Period in force
6	Other non-current asset	10
7	Building and facilities of manufacture, management of technology park, unit production, and buildings within technology park	20
8	Machineries, mechanism, equipment, technical parts of manufacturing within the management technology park, unit production, and technology park	3

Goodwill

There is no specific provision in the tax law regarding the deductibility of goodwill.

Organisational and start-up expenses

Organisational and start-up expenses are not deductible.

Interest expenses

Interest expenses are deductible. However, there are limits with respect to the deductibility of interest expense. See *Thin capitalisation in the Group taxation section for more information*.

Bad debt

Bad debt provisions are not deductible. There is no clear guidance in the tax legislation as to whether bad debt is deductible or not; however, in practice, the tax authorities disallow deductibility of bad debt.

Charitable contributions

Charitable contributions are not deductible, except for donations to the fund of vocational training.

Pension expenses

Compulsory pension insurance premiums paid to the Social Security Authority of Mongolia are deductible. Additional voluntary insurance premiums are deductible but shall not exceed 15% of taxable income. Pension provisions or internal pension fund expenses are not deductible.

Payment for directors

If a payment for directors is a salary payment on which social insurance and PIT is levied, it is considered as deductible.

Bribes, kickbacks, and illegal payments

Bribes, kickbacks, and illegal payments are not in the list of permitted deductions. Per anti-corruption law, monetary amounts involved with respect to such payments will be confiscated and criminal proceedings will be instituted.

Fines and penalties

Fines and penalties are not deductible for tax purposes.

Taxes

Certain taxes paid by a taxpayer, as well as social contributions of employers, are generally deductible for tax purposes.

Tax losses

Tax losses generally may be carried forward for up to two years. However, the annual amount of carried forward losses deductible from taxable income may not exceed 50% of the taxable income in the tax year.

Legal entities involved in the infrastructure and mining industries may carry forward 100% of their losses for up to four to eight years, depending on their investment period and based on government regulations.

There is no provision for the carryback of losses.

Payments to foreign affiliates

Deductibility of payments to foreign affiliates depends on the nature of the payment, as follows:

- Interest payments are deductible but with restrictions (i.e. thin capitalisation rule may apply, interest paid on loans for construction of buildings and installation of equipment needs to be capitalised during that period).
- Dividend payments are not deductible.
- Technical assistance service payments are deductible.
- Payments for other services are deductible.

Group taxation

There are no rules permitting grouping for tax purposes in Mongolia.

Transfer pricing

Transfer pricing provisions are addressed in the CIT Law and the General Tax Law of Mongolia.

Per the CIT Law of Mongolia, if the following relation is present with a taxpayer, then it is considered as 'a related party':

- Holds 20% or more of the common stock.
- Has the right to receive 20% or more of the dividends or distributions.
- Has the right to appoint 20% or more of the management of the economic entity or is otherwise able to determine its policies.

If related parties have sold or transferred goods, performed work, or rendered services among themselves below or above fair market value, the tax authority shall determine gross taxable income of such goods, work, and services based on value involving transactions of similar goods, work, and services among non-related parties.

The General Tax Law provides for a broader definition of related entities for transfer pricing purposes, which is "entities authorised to directly and indirectly participate in management, control, and property rights of any foreign and Mongolian legal entities". Per Article 48.3 of the General Tax Law, "if prices, payments, and fees (hereinafter the 'price') used in cooperative production, in the provision of technical services, in sending human resources, in purchase and sales transactions between related entities abroad and Mongolia are higher or lower than fair market value, then the fair market value method shall be used in order to determine taxable income".

Mongolia

Thin capitalisation

A thin capitalisation rule applies to direct shareholders, and interest paid in excess of the 3:1 debt-to-equity ratio is not deductible and is treated as a dividend. This is applied on an investor-by-investor basis as opposed to the company as a whole; no restriction applies to interest that is not paid to an investor.

Controlled foreign companies (CFCs)
