There are no special CFC rules in Mongolia.

Tax credits and incentives

At present, the following types of incentives exist in Mongolia:

- Tax stabilisation of certain taxes per investment made (*see below*).
- Interest on government notes payable (bonds) is exempt from CIT.
- Income earned from the production and/or sale of produced equipment and spare parts intended for the activities of small or medium-sized production businesses in the territory of Mongolia is exempt from CIT.
- Income earned from the sale of a technique or equipment that economises natural resources, reduces environmental contamination, and is nature-oriented is exempt from CIT.
- Tax losses incurred by a business entity involved in the infrastructure and mining sector in a given tax year shall be deducted from taxable income for four to eight consecutive years after such tax year. The period will depend on the size of the investment, as defined from time to time by the responsible government agency.
- In the event that a business entity or a citizen has been found to have made a donation of up to MNT 1 million to support non-governmental organisations founded by citizens having developmental disabilities, such amount shall be deducted from taxable income of such business entity or citizen for the given tax year.
- A 50% tax reduction is available from CIT for an economic entity that produces or grows the following products:
 - Cereal, potatoes, and vegetables.
 - Milk.
 - Fruits and berries.
 - Fodder plants.
- Free Trade Zones (FTZs) have a special regime in terms of tax and customs (*see below*).

Foreign investment incentives

Tax stabilisation

The Law on Investment provides tax incentives, including exemptions from tax, tax credits, possibility to use accelerated depreciation for tax purposes, tax loss carryforward, and deduction of employee training costs from taxable income.

The Law also provides a 'stabilisation certificate' in order to create a more stable tax environment in Mongolia. By obtaining a stabilisation certificate, investors can stabilise applicable rates of the following taxes:

- CIT.
- Customs duties.
- VAT.
- Minerals royalties.

The holder of a stabilisation certificate can stabilise tax rates for a period from five to 18 years, depending on amount of investment, industry of investment, and geographic location of investment in Mongolia (*see Stabilisation certificate terms below*). Under the

valid period of a stabilisation certificate, investors also have the right to apply effective tax rates provided in general legislation if such rates are more beneficial for investors.

The criteria of issuing a stabilisation certificate are:

- the total investment amount specified in the business plan and feasibility study reaches thresholds specified in the stabilisation certificate terms (see below)
- an environmental impact assessment should be carried out
- the investment should create new permanent jobs, and
- the investment should introduce innovative technology.

An investor who made an investment in tobacco and alcohol related activities cannot benefit from tax stabilisation.

If certain conditions are met, the stabilisation certificate period may be extended by 1.5 times for some projects.

The conditions are that the projects:

- produce products that substitute for imported products or export-oriented products that are important for the long-term social and economic development of Mongolia, that will require investment of more than MNT 500 billion, and have a development period of more than three years, or
- produce value-added, processed products for export.

In addition to above, the law provides for incentives with respect to customs duty (exemption) and VAT (zero-rate) on imported equipment and machinery during the construction period of specific projects, as below:

- Construction of a factory for processing construction materials, petroleum, agricultural products, and products intended for export.
- Nano, bio, and innovation technology plant construction.
- Construction of power plants and railroads.

Stabilisation certificate terms

For the mining, heavy industry, and infrastructure sectors, a stabilisation certificate is issued as follows:

Stabilisation certificate terms (years)						
Investment amount (MNT in billions)	Ulaanbaatar Region	Central Region	Khangai Region	Eastern Region	Western Region	Period within which investment must be made (years)
		(Gobisumber, Dornogobi, Dundgobi, Darkhan-Uul, Umnugobi, Selenge, Tuw)	(Arkhangai, Bayankhongor, Bulgan, Orkhon, Uvurkhangai, Khuwsgul)	(Dornod, Sukhbaatar, Khentii)	(Bayan-Ulgii, Gobi-Altai, Zavkhan, Uvs, Khovd)	
30 to 100	5	6	6	7	8	2
100 to 300	8	9	9	10	11	3
300 to 500	10	11	11	12	13	4
more than 500	15	16	16	17	18	5

For any other sector, a stabilisation certificate is issued as follows:

Mongolia

Investment amount (MNT in billions)						
Ulaanbaatar Region	Central Region (Gobisumber, Dornogobi, Darkhan-Uul, Umnugobi, Selenge, Tuw)	Khangai Region (Arkhangai, Bayankhongor, Bulgan, Orkhon, Uvurkhangai, Khuwsgul)	Eastern Region (Dornod, Sukhbaatar, Khentii)	Western Region (Bayan-Ulgii, Gobi-Altai, Zawkhan, Uws, Khowd)	Stabilisation certificate terms (years)	Period within which investment must be made (years)
10 to 30	5 to 15	4 to 12	3 to 10	2 to 8	5	2
30 to 100	15 to 50	12 to 40	10 to 30	8 to 25	8	3
100 to 200	50 to 100	40 to 80	30 to 60	25 to 50	10	4
more than 200	more than 100	more than 80	more than 60	more than 50	15	5

Free Trade Zones (FTZs)

Establishing FTZs

According to the FTZ Law, FTZs can be established not only at the border ports but also in qualifying regions proposed by the government. The Parliament will decide the proposed plan.

FTZs are under state protection. A joint free border trade zone covering multiple countries' borders can be established and will be regulated through international agreements between the governments.

Tax and customs regime

CIT

Businesses that have invested 500,000 United States dollars (USD) or more in the FTZs operating to improve infrastructures, such as energy and heating sources, pipeline networks, clean water supplies, wastewater sewage, auto roads, railways, airports, and basic communication lines, shall receive a CIT discount equal to 50% of their invested capital in the FTZ.

For businesses with more than USD 300,000 invested in building warehouses, loading and unloading facilities, hotels, tourist camps, or manufacturers of export and import-substituted goods in the FTZ shall receive a CIT discount equal to 50% of their invested capital in the FTZ.

Loss-making entities in the FTZs can carry forward their losses reflected on their CIT return up to five years from the time of becoming fully operational to reduce their future tax payable.

Entities using innovated and enhanced technology in their businesses shall be fully exempted from CIT for the first five years from the time of starting operation in the FTZs.

VAT

Goods imported to the FTZs are not subject to VAT. If goods are to be transferred from the customs territory to the FTZs, there will also be no VAT on those goods, and any previously paid VAT will be reimbursed accordingly based on related documents.

There will be a 0% rate on VAT for domestic goods to be transferred from the customs territory to the FTZs.

In addition to purchases per Article 38.1.4 of the Law on Custom Tax and Tariff (which refer to goods for passengers' personal use), purchases in the FTZ of up to MNT 3 million made by passengers are exempt from VAT when entered into the customs territory.

There will be no VAT imposed on goods and services manufactured and sold by registered individuals and businesses in the FTZs.

Customs and excise

Goods imported to the FTZs are not subject to customs and excise taxes. If goods are to be transferred from the customs territory to the FTZs, there will be no customs and excise taxes on those goods, and any of these taxes previously paid will be reimbursed accordingly based on related documents.

In addition to purchases per Article 38.1.4 of the Law on Custom Tax and Tariff (which refer to goods for passengers' personal use), purchases in the FTZ of up to MNT 3 million made by passengers are exempt from customs tax when entered into the customs territory.

Any goods, except purchases made by passengers as mentioned above, are subject to customs and related taxes as required in the regulation when transferred from the FTZs to the customs territory.

Goods exported from the FTZs are not subject to taxation.

Land payments and property taxes in the FTZ

Individuals and businesses may request a land possession and usage right in the FTZs through either project bid or auction.

Entities operating in trade, tourism, and hotel sectors in the FTZs are fully exempted from land possession and usage right payment for the first five years from commencement of operation. This payment is further reduced up to 50% for the following three years.

Businesses operating to improve infrastructures in the FTZs, such as energy and heating sources, pipeline networks, clean water supplies, wastewater sewage, auto roads, railways, airports, and basic communication lines, will be fully exempted from land payment for the first ten years from start of operation.

Buildings and facilities built and registered in the FTZs are fully exempted from the immovable property tax.

Foreign tax credit

A foreign tax credit is available for foreign taxes paid up to the amount of the Mongolian tax liability that would have been due on the same amount based on an applicable DTT.

Withholding taxes

Dividends, interest, and royalties paid, and payments made for goods sold and work/services provided (directly or electronically), to non-residents are subject to WHT at a 20% rate. Interest provided to non-residents on bonds issued by Mongolian commercial banks and listed on the domestic or foreign stock exchange are subject to WHT at 10%.

Dividends, interest, and royalties paid to resident companies and individuals are all subject to WHT at 10%.

Notes

- 5% if the recipient is a company (excluding partnerships) and directly owns at least 10% of the capital of the company paying dividends.
- 5% if the beneficial owner is a company (excluding partnerships) and directly or indirectly holds at least 10% of the capital of the company paying dividends.
- 5% if the beneficial owner is a company that directly or indirectly controls at least 10% of the voting power in the company paying dividends.
- 5% if the beneficial owner is a company (excluding partnerships) and directly owns at least 10% of the company.
- 5% if the beneficial owner is a company (excluding partnerships) and directly owns at least 25% of the capital of the company paying dividends.
- No tax if dividends paid to the government/certain public bodies.
- 5% if the beneficial owner is a company and directly or indirectly holds at least 10% of the capital of the company paying dividends.
- 7% if interest is paid to a bank that is the beneficial owner of the interest and carrying on a *bona fide* banking business.
- 5% if the beneficial owner is a company and directly owns at least 25% of the capital of the company paying dividends.
- 5% if interest is received by a bank or a similar financial institution.
- 5% if the beneficial owner of the royalties in the meaning of any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 10% in all other cases.
- 5% if the beneficial owner of the royalties in the meaning of copyright royalties and other payments for production or reproduction of any literary, dramatic, and other work, royalties for the use of, or the right to use, computer software or any patent, or for information concerning industrial, commercial, or scientific experience; 10% in all other cases.

Tax administration

Taxable period

The tax year is the calendar year.

Tax returns

Companies must submit a quarterly return by the 20th day of the month following the end of each quarter and an annual return by 10 February after the end of the tax year.

A withholder must prepare and submit a quarterly return of the tax deducted by the 20th day of the first month of the following quarter and an annual return by 10 February after the end of the tax year.

Payment of tax

A taxpayer shall pay the taxes due in advance by the 25th day of each month in accordance with the payment schedule based on the previous year. Year-end settlement is made by 10 February of the following year (along with the annual tax statement).

In practice, the Mongolian tax authorities allow concessions as follows:

Where total tax paid exceeds the tax liability, the excess may be credited against other taxes due or credited against future tax payments. The overpayment also may, theoretically, be refunded; however, the practice of refunding in Mongolia is not clear or consistent.

An economic entity or organisation that has withheld tax from a payment of dividends, royalties, sale of rights, or a payment of income to a taxpayer should transfer the WHT to the tax authorities within seven working days. Tax withheld relating to the sale of immovable property should be transferred to the tax authorities within ten working days.

M

Tax audit process

The tax audit cycle is not clearly stated in the tax laws. However, the regular cycle in Mongolia is three to five years in practice, and it is very common if the company requests a refund from tax authorities or liquidates its company. Moreover, a tax audit can come anytime if the tax authorities suspect some risk or misuse of the legislation or receive information from a trustworthy source about tax evasion.

Statute of limitations

The statute of limitations in Mongolia is five years for tax arrears, fines, and penalties. However, the dispute settlement timeframe shall not pertain to payment of tax, fine, and penalty debts.

Topics of focus for tax authorities

The tax authorities normally focus their attention on issues like understatement of income, overstatement of expenses, and withholding obligations of taxpayers.

Another hot topic in Mongolia right now is transfer pricing. The transfer pricing concept is at a very early stage of development. Currently there is very limited (if any) established practice or commonly understood methodology being applied by the tax authorities. Nevertheless, the basic principle governing Mongolian transfer pricing rules is that transactions between related parties should be undertaken at fair market value.

PE is also becoming one of the focus areas of the tax authorities. Although it is possible for PEs to be registered as taxpayers, the filing requirements and the payment of tax are still in question.

Significant developments

There have been no significant corporate tax developments in Montenegro during the past year.

Taxes on corporate income

Entities operating in Montenegro are subject to a 9% corporate profit tax (CPT).

Resident taxpayers are taxed on their worldwide profit. Non-resident taxpayers are taxed on their Montenegrin-sourced income or income attributed to their Montenegrin permanent establishment (PE). Non-residents are also subject to withholding tax (WHT) on income sourced in Montenegro (*see the Withholding taxes section for more information*).

Local income taxes

No local (i.e. municipality) corporate income taxes exist in Montenegro.

Corporate residence

A legal entity is considered to be a tax resident if it is incorporated in Montenegro. In addition, a foreign corporation may also be deemed a Montenegrin tax resident if the corporation has a place of effective management in Montenegro. No explicit rules exist for determination of effective management. In practice, it usually is the place where key managerial decisions are made or where the board of directors sits.

Permanent establishment (PE)

Montenegrin tax legislation contains very basic PE rules following, in main features, the guidelines set out in the Commentary to the Organisation for Economic Co-operation and Development (OECD) Model Tax Treaty. PE is defined as a fixed place of business through which a non-resident carries out business in Montenegro. PE is deemed to exist in case of a non-resident having one of the following in Montenegro: place of management, branch office, office, factory, workshop, mine, gas or oil site, stone pit, or any other place of natural resources exploitation in Montenegro. A construction site constitutes a PE only if construction activities last longer than six months.

PE is not deemed to exist in case of a non-resident having storage of inventory in Montenegro only for the purpose of delivery of goods or having operations in Montenegro that are of a preparatory or auxiliary nature.

Other taxes

Value-added tax (VAT)

The main principles of the Montenegrin VAT are in line with the European Union (EU) Sixth Directive guidelines. Taxable supplies are subject to a general 19% VAT rate;

however, certain supplies are taxed at a reduced 7% rate (e.g. bread, milk, books, medicines, computers) and 0% rate (e.g. export of goods, supply of gasoline for vessels in international traffic).

In principle, the VAT base is comprised of consideration (in cash, goods, or services) received for supplies, including taxes, except VAT (e.g. customs, excise duty), and direct costs (e.g. commissions, cost of packing, transport). If the consideration is not paid in cash, or if an exchange of goods for services takes place, the tax base will be the market value of the goods or services received at the time of supply. The VAT base cannot be lower than the cost of goods sold.

Registration for VAT in Montenegro may be either voluntary or mandatory. Voluntary VAT registration is possible for small taxpayers who have not realised turnover exceeding 18,000 euros (EUR) in the last 12-month period. Once registered, a company may not apply for deregistration for at least three years. VAT registration is mandatory for an entity that realises turnover exceeding the EUR 18,000 threshold in any 12-month period.

VAT is calculated and paid on a calendar-month basis (i.e. a VAT return must be submitted and VAT liability cleared monthly). VAT calculated on imports is paid along with customs duties.

Customs duty

Exports

There are no export duties in Montenegro, nor is it forbidden to export any goods. Exceptionally, the Montenegrin government can impose quantity limitation of exports only in case of critical shortage of certain goods or for the purpose of protection of non-renewable natural resources, under certain conditions.

Imports

Customs duties are paid on goods imported into the customs territory of Montenegro in accordance with the rates and tariffs set forth in the Customs Tariffs, which is in line with the harmonised system of tariff codes prescribed by the World Trade Organization (WTO). Customs duties can be levied in two manners, as *ad valorem* or specific duty per unit of goods.

For agricultural and alimentary products, a combined duty has been determined, that is, both *ad valorem* and specific duty are charged simultaneously.

Ad valorem duties are prescribed within the scope from 0% to 30%. Specific duties range from EUR 0.04 per 1kg to EUR 1 per 1kg.

Customs rates stipulated by international agreements are only applied to goods of preferential origin from countries covered by such agreements. The most important free trade agreements that Montenegro signed are with the European Union, the European Free Trade Association (EFTA), the Central European Free Trade Agreement (CEFTA) states, Russia, Turkey, and Ukraine.

Excise duty

Legal entities that are importers or producers of the following products are subject to the excise duty:

- Alcohol and alcohol beverages.
- Tobacco products.
- Mineral oils, their derivatives, and substitutes.
- Mineralised water with sugar or aroma.

Montenegro

Excise duty can be prescribed as a fixed amount and/or as a certain percentage (*ad valorem*).

Tax on coffee

Tax on coffee is payable on coffee imported and produced in Montenegro. The tax rate varies from EUR 0.80/kg to EUR 1.30/kg, depending on the type of the coffee. Tax on coffee is also payable for products and beverages that contain coffee. The tax rate for these products is EUR 2.50/kg for one kg of net coffee contained in the final product.

Property tax

Property tax is payable by legal entities who own or have user rights over real estate located in Montenegro. The annual tax is levied at proportional rates, ranging from 0.25% to 1% on the market value of assets as of 1 January of the current year. In case of acquisition of new property, the taxpayer is obligated to submit a tax return to the tax authorities within 30 days from the acquisition date (i.e. registration return for property tax) and to declare annual property tax by the submission of annual returns. Tax is payable in two instalments, based on decisions issued by the tax authorities.

Property transfer tax

Transfer tax of 3% is payable on the acquisition of ownership rights over immovable property.

The taxable base is the market value of the immovable property at the time of the acquisition. A taxpayer (i.e. the acquirer of immovable property) is obligated to self-assess a tax liability, submit a tax return, and settle a tax liability within 15 days from the contract date.

Stamp taxes

No stamp taxes are in place in Montenegro.

Payroll tax

Employment income includes all receipts paid or provided to an individual based on employment (salaries, pensions, benefits in kind, insurance premiums, benefits, and awards above the non-taxable thresholds). Income generated through other types of personal engagements similar to employment (e.g. temporary jobs) is also considered employment income.

While employees are the taxpayers, the employer is responsible for calculating and withholding personal income tax (PIT) on behalf of its employees.

Employment income is subject to WHT at a flat rate of 9%. Gross salary exceeding EUR 720 is subject to 15% PIT. The 15% rate applies to the part of the salary exceeding EUR 720, while the 9% rate applies to the part of the salary below (and including) EUR 720.

Social security contributions

Social security contributions for pension and disability insurance, health insurance, and unemployment insurance are calculated and withheld by an employer from the salary paid to an employee. Unlike the other two types of social security contributions, pension and disability insurance contributions are subject to a specific annual cap (EUR 50,350 for 2016).

Social security contributions are payable by the employer and employee at different rates. The amount borne by the employer is treated as an operating cost while the portion payable by the employee is taken from the gross salary.

The rates paid by the employer are as follows:

- Pension and disability insurance 5.5%.

- Health insurance 4.3%.
- Unemployment insurance 0.5%.

The rates paid by the employee are as follows:

- Pension and disability insurance 15%.
- Health insurance 8.5%.
- Unemployment insurance 0.5%.

Environmental charges

Legal entities are subject to environmental charges for the following:

- Use of firing or electrical feed equipment with power greater than 1MW.
- Import of substances harmful to the atmosphere.
- Production or deposit of dangerous waste.
- Tax for use of road vehicles (vignettes).
- Charges for access to certain services that are of general interest (for use of mobile telephones, electricity, cable television connection, space denominated for consumers of tobacco products and acoustic devices).

Branch income

Non-residents carrying out business in Montenegro through a PE are taxed on their Montenegrin-source income at a rate of 9%. A branch is considered to be a PE.

Income determination

Taxable profit is calculated by adjusting the accounting profit (determined in accordance with International Financial Reporting Standards [IFRS] and accounting legislation) in accordance with the provisions of the CPT Law.

Inventory valuation

Inventory is valued by applying the average weighted cost method or the first in first out (FIFO) method. If another method is used for book purposes, an adjustment for tax purposes should be made.

Capital gains

Capital gains realised by the sale or transfer of real estate or other property rights, as well as shares and other securities, are subject to the 9% CPT rate.

Capital gains may be offset against capital losses occurring in the same period. A capital loss may be carried forward for five years.

Dividend income

Dividend income of the recipient is exempt from CPT in Montenegro if the distributor is a Montenegrin corporate taxpayer.

Interest income

Interest income is included in taxable profit and subject to 9% CPT.

Foreign income

A Montenegrin resident receiving foreign income is granted a tax credit in the amount of the tax paid abroad but limited to the amount that would be calculated using Montenegrin rates.

Montenegro

There are no provisions that provide for the possibility that taxation of income earned abroad may be deferred.

Deductions

Depreciation

Depreciable assets are tangible and intangible assets with a useful life of at least one year and an individual acquisition value of at least EUR 300.

Intangible and fixed assets are divided into five depreciation groups, with depreciation rates prescribed for each group (I - 5%, II - 15%, III - 20%, IV - 25%, and V - 30%). A straight-line depreciation method is prescribed for assets classified in the first group (real estate), while a declining-balance method is applicable for assets classified in the other groups.

Goodwill

Goodwill is determined according to IFRS and is subject to impairment. There are no other special provisions on goodwill.

Start-up expenses

There are no special provisions regarding treatment of start-up expenses. Therefore, they will be deductible if they are incurred for business purpose and properly documented under the general expense deductibility rule.

Interest expenses

Interest expenses are generally deductible if they are business related and properly documented. Also, interest and related cost of loans paid out to a creditor with the status of a related party are recognised as expenses only in the amount that does not exceed market interest rates between unrelated parties. The exceeding amount is not recognised as an expense, but it is included in the taxable profit and subject to 9% CPT.

Interest paid out to non-resident legal entities (unless it is revenue of a PE of a non-resident legal entity) is subject to WHT levied at 9%.

Bad debt

Write-offs and provisions for doubtful debts are considered deductible, provided that:

- written-off/provided receivables were previously included in the taxpayer's revenues
- doubtful debts were written-off as uncollectible, and
- proof of unsuccessful collection of these debts exists.

Charitable contributions

Charitable contributions for healthcare, scientific, educational, humanitarian, religious, environmental protection, and sports-related purposes are recognised for CPT purposes, up to a threshold of 3.5% of total revenue.

Fines and penalties

Penalty interest for late payment of taxes is not CPT deductible.

Taxes

The basic deductibility rule is that business expenses incurred for business purposes are CPT deductible. Following that rule, CPT Law provides for full deductibility of taxes.

Other significant items

The following expenditures are also recognised for CPT purposes, up to the prescribed threshold:

- Entertaining expenses, up to 1% of total revenue.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue unless the amount of the fees has been determined by law.
- Provisions for redundancy payments and jubilee awards recognised as expenditures, up to the amount prescribed by the labour law.
- Provisions made by banks and insurance companies, in an amount not exceeding the amount prescribed by the legislation that regulates operation of these entities.
- Provisions for special risks of brokers and dealers, up to the amounts prescribed by the securities law.
- Provisions for renewable natural resources, warranties for the sale of goods and services (guarantee period), and the expected loss from court process (delicate agreements) if accounted for in accordance with the accounting legislation.

Net operating losses

The taxpayer is entitled to carry forward losses incurred in an accounting period over the following five years. Carryback of losses is not allowed.

Payments to foreign affiliates

Supplies of goods or services from a foreign group entity not established in Montenegro to a Montenegrin entity must be valued at arm's length. Excess expenses recorded over market value are treated as non-deductible expenses.

With respect to payment of charges of a PE, CPT Law provides that administrative costs charged by the non-resident head office are non-deductible for CPT at the level of PE.

Group taxation

Tax consolidation is permitted for a group of companies in which all of the members are Montenegrin residents and the parent company directly or indirectly controls at least 75% of the shares in the other companies. Each company files its own tax return, and the parent company files a consolidated tax return for the entire group.

Each company is taxed based on its contribution to the consolidated taxable profit (or loss) of the group.

Tax consolidation is binding for at least five years.

Transfer pricing

The difference between the transfer price and arm's-length price is included in the taxable profit and is taxed accordingly. Parties considered to be related are the parties between whom special relations exist, which could directly impact the conditions or economical results of the transaction between them.

Methods permitted in determining arm's-length price are the comparable uncontrolled price (CUP) method (as the primary method), resale minus method, or cost plus method.

There are no other rules or guidelines introduced apart from the above rules in respect to transfer pricing.

Thin capitalisation

There are no thin capitalisation provisions in place in Montenegro.

Controlled foreign companies (CFCs)

There are no CFC rules in Montenegro.

Montenegro

Tax credits and incentives

The CPT Law provides four tax incentives related to businesses: one for newly established businesses in non-developed municipalities, one for non-governmental organisations (NGOs), a discount for settling of CPT liability by the prescribed deadline, and a foreign tax credit.

Tax exemption for newly established businesses in underdeveloped municipalities

Newly established production companies located in underdeveloped municipalities are entitled to an eight-year tax exemption. The maximum amount of tax exemption for the period of eight years is limited to EUR 200,000.

The incentive is applicable to companies whose business units are established in underdeveloped regions. In that case, tax holiday is proportional to the amount of profit generated by such unit over the total profit for the period of eight years from establishment of the unit.

The tax incentive is not applicable to a taxpayer operating in the sectors of (i) primary production of agricultural products, (ii) transport, (iii) shipbuilding, (iv) fishery, (v) steel production, (vi) trade, and (vii) catering, except primary catering facilities.

Tax exemption for NGOs

NGOs registered for business activity are permitted to decrease the corporate tax base by EUR 4,000, with the condition that profit is used for realisation of the main goals of an NGO.

Discount for settling CPT liability on time

A discount of 6% that is applied on the amount of the calculated CPT liability is available to taxpayers that settle their CPT liability by the prescribed deadline (i.e. by 31 March of the current year for the tax liability of the previous year).

Foreign tax credit

Resident taxpayers are entitled to a tax credit up to the amount of corporate tax paid in another country on income realised in that country. This tax credit is equal to the tax paid in another country but may not exceed the amount of the tax that would have been paid in Montenegro.

Withholding taxes

Montenegrin CPT Law imposes WHT on income realised from a Montenegrin source and distributed to a non-resident. The scope of the WHT applies to dividends and profit distribution, capital gains, interest, royalties, intellectual property rights fees, and rental income, as well as fees for consulting, market research, and audit services.

Distributions of dividends and share of profits are also subject to WHT if the recipient is a Montenegrin resident (either an individual or legal entity).

The general WHT rate is 9%.

Application of a double tax treaty (DTT) may reduce or eliminate Montenegrin WHT. To qualify for the beneficial rates prescribed by the treaty, a non-resident must prove tax residency of a relevant treaty country and beneficial ownership over the income. In order to qualify for a preferential tax rate according to a DTT, a non-resident will need to provide the tax residency certificate filled out and stamped by the relevant authority of its country of residence.

Although Serbia is regarded as the legal successor of the Serbia and Montenegro State Union that ceased to exist in June 2006, the Republic of Montenegro, upon its Decision on Independence (dated 3 June 2006), continues to honour international treaties that were applicable in the State Union, including those executed by State Union's legal predecessors (Federal Republic of Yugoslavia and Socialist Federal Republic of Yugoslavia, i.e. former Yugoslavia). However, a quite low statutory WHT rate of 9%, which was enacted after most of the treaties had been introduced, is usually more beneficial than treaty rates.

The list of the treaties is provided below:

Recipient	WHT (%)			Applicable from
	Dividends (1)	Interest	Royalties	
Non-treaty	9	9	9	
Treaty:				
Albania	5/15	10	10	2006
Austria	5/10 (8)	10	5/10 (4)	2016
Azerbaijan	10	10 (7)	10	2014
Belgium	10/15	15	10	1982
Belorussia	5/15	8	10	1999
Bosnia and Herzegovina	5/10	10	10	2006
Bulgaria	5/15	10	10	2001

Montenegro

Recipient	WHT (%)			Applicable from
	Dividends (1)	Interest	Royalties	
Turkey	5/15	10	10	2002
Ukraine	5/10	0/10 (7)	10	2002
United Arab Emirates	5/10 (8)	10	5/10 (4)	2014
United Kingdom	5/15	10	10	1983

Notes

1. If the recipient company owns/controls at least 25% of the equity of the paying company, the lower of the two rates applies.
2. A new DTT was signed with Egypt in 2005, but it is not applicable yet. Meanwhile, the old treaty is still applicable.
3. Instruments of ratification have not been exchanged between the two countries.
4. A tax rate of 5% will be applicable to literary, scientific, and work of art, films and works created like films, or other sources of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedure.
5. Only in cases when dividends are to be paid to Montenegrin residents. If paid to Malaysian residents, they are taxable at 9% in Montenegro.
6. A 5% rate is applicable for intellectual property and 10% rate for industrial property.
7. A 0% rate is applicable in cases when the income recipient is the government or government-owned banks.
8. A 5% rate is applicable in cases when the beneficial owner is a company that holds at least 5% of the capital of the payer of the income. In all other cases, a 10% rate applies.

Tax administration

Taxable period

The tax year in Montenegro is the calendar year.

Tax returns

Tax returns and supplementary documents (e.g. tax depreciation form) must be filed with the tax authorities by the end of March of the following year.

Payment of tax

CPT is paid by the end of March of the following year for the previous year. Alternatively, CPT may be paid in six annual instalments at the taxpayer's request. A discount of 6% is applicable on the amount of the calculated CPT liability for the timely payment of the tax due (*see the Tax credits and incentives section for additional information*).

Tax audit process

There are no particular provisions regarding the audit cycle in Montenegro.

Statute of limitations

The right to assess taxes expires within five years after the end of the year in which the tax should have been assessed.

The right to collect taxes expires within five years after the end of the year in which tax has been determined.

Topic on focus for tax authorities

According to our best knowledge, the focus of the tax authorities is proper documenting of expenses and VAT. Apart from this, we are expecting that in the near future the focus of the tax authorities will be transfer pricing, following trends of the countries in the region.

Other issues

Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)

Montenegro and the United States reached an 'agreement in substance' on a Model 1 IGA and consented to this status as of 30 June 2014. In accordance with this status, the text of such IGA has not been released, and financial institutions in Montenegro are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

New corporate income tax (CIT) rates

Prior to 1 January 2016, the normal CIT rate in Morocco was 30% (10% for companies for which the taxable income was equal to or lower than 300,000 Moroccan dirham [MAD]). See the *Taxes on corporate income section for the CIT rates applicable as of 1 January 2016 under Finance Law 2016*.

Minimum contribution carryforward

Prior to 1 January 2016, companies were allowed to carry forward the minimum contribution (minimum of CIT) in order to offset against the difference between the CIT and minimum contribution of future years (with a limit of three years).

Finance Law 2016 cancels the possibility of the above carryforward as of 1 January 2016; consequently, the minimum contribution payable for a specific fiscal year becomes a final income tax.

Tax penalties

Finance Law 2016 provides for the application of new rates for penalties and late payment interest as of 1 January 2016. See the *description of Penalties in the Tax administration section for more information*.

Taxes on corporate income

In general, the Moroccan tax code considers that all revenues and capital gains generated in Morocco are subject to Moroccan taxation.

Companies are taxed on the difference between their trading income and expenditure. Business expenses incurred in the operation of the business are generally deductible unless specifically excluded.

The CIT rates are as follows:

Taxable income (MAD)		CIT rate (%)
From	To	
0	300,000	10
300,001	1,000,000	20
1,000,001	5,000,000	30
5,000,001	and above	31

A higher CIT rate of 37% applies to leasing companies and credit institutions.

Non-resident companies can, under certain conditions, opt for an alternative tax at the rate of 8% of the amount of their contract, whatever the taxable income is.

Minimum contribution

CIT cannot be lower than a minimum contribution of 0.5% (or 0.25% for specific products) levied on the turnover and other specific revenues. The minimum contribution is not due during the first 36 months following the beginning of activities.

Prior to 1 January 2016, the minimum contribution paid in case of loss or the portion of minimum contribution that exceeded the amount of CIT could be offset against the portion of CIT that exceeded the minimum contribution until the third year.

Finance Law 2016 revokes the three-year carryforward for minimum contributions accrued as of 1 January 2016.

Local income taxes

There are no local taxes levied on income in Morocco.

Corporate residence

Companies, whether or not established in Morocco, are subject to CIT on all profits or income relating to property that they own, activities that they carry on, and profit-making transactions that they carry out in Morocco, even when these are of an occasional nature.

Permanent establishment (PE)

The notion of PE is not explicitly defined under Moroccan tax law.

However, the Moroccan tax authorities apply this concept for non-resident companies according to some determined criteria that are inspired from the various tax treaties that Morocco has signed with other countries.

Indeed, the question of whether an entity will be deemed to have a PE in Morocco is a question of fact, in particular, subject to having, in Morocco, any fixed place of business through which a foreign entity conducts industrial or commercial activity for an indefinite or substantial period of time.

The term fixed place of business includes, for instance, a place of management or operations, a branch, an agency, a premises used as a sales outlet, a construction of assembly project, or a purchasing office. Also, in some specific cases, a non-resident company may be deemed as having a PE if it operates in Morocco through a dependent agent.

Other taxes**Value-added tax (VAT)**

VAT is levied under the Moroccan Tax Code and is due on all industrial, commercial, and handicraft transactions taking place in Morocco, as well as on importation operations.

The standard rate of VAT is 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated operations.

The sale of goods is considered as taking place in Morocco, and thus subject to VAT, if the goods sold are delivered in Morocco.

The sale of services is considered as taking place in Morocco, and thus subject to VAT, if the services sold are consumed or used in Morocco.

Morocco

Two types of exemptions from VAT are provided. The first is an exemption with credit, equivalent to the zero tax concept. The second is an exemption without credit.

The zero-rated supplies include (but are not limited to) supplies of the following goods or services:

- Exported goods and services.
- Certain agricultural equipment supplied under prescribed circumstances.
- Investment goods recorded as fixed assets in the company accounting and acquired during the first 24 months following the beginning of activity.
- Offshore banks for certain specific operations, such as interest and commissions.
- Goods and services rendered to companies established in free trade zones (FTZs).
- Activities related to hydrocarbon exploration, etc.

Exempt supplies without deduction right include (but are not limited to) supplies of the following goods or services:

- Milk, sugar, bread, cereals.
- Fiscal stamps.
- Newspapers, books, documentaries.
- Interest on government loans.

Customs duties

Importation of goods in Morocco gives rise to payment of importation duties, the VAT on importation, and the special tax on importation called *Taxe Parafiscale à l'Importation* (TPI).

Customs duties are computed on the basis of the *ad valorem* value of the goods at the time of their entrance into Morocco.

Customs duties can be reduced if the imported products are covered by free trade agreements signed by Morocco or other specific regulatory dispositions.

Under Moroccan tax law, the importation operations are subject to VAT at the rate of 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated importations.

The Moroccan tax law also offers some economical customs regimes that provide VAT exemptions with credit (equivalent to zero rate).

The TPI rate is 0.25% levied on the value of the imported goods.

Excise taxes

Excise taxes apply to specific products imported or produced in Morocco, such as tobacco, alcohol, and lubricants.

Professional tax

A professional tax is levied on individuals and enterprises that carry out a professional activity in Morocco.

The tax consists of a tax on the rental value of business premises (rented or owned) and fixed assets. The tax rates range from 10% to 30%, with exemption for the five first years of activity.

The rental value is exempted for the portion of cost exceeding MAD 50 million.

Registration duties

Registration duties are due on all written or verbal conventions, such as property transfer of real estate, shares, or rights; company set up; equity increase; and goodwill transfer.

The rates of registration duties range from 1% to 6%. A flat rate of MAD 200 is also applicable to specific operations and conventions.

The company set up and the capital increase are subject to registration duties at the rate of 1%.

The transfer of non-listed shares is subject to registration duties at the rate of 4%. However, a 6% rate is applicable to the transfer of shares of real estate companies.

The applicable rate for the transfer of goodwill is 6%.

Payroll taxes

Individual income tax on salaries is paid by way of withholdings made by resident employers.

Social security contributions

The only mandatory social security regime in Morocco is the one managed by the CNSS fund (*Caisse Nationale de Sécurité Sociale*).

The CNSS rates are as follows and apply to the gross salary, excluding exempted allowances and indemnities:

	Employee portion (%)	Employer portion (%)	Computation basis ceiling (MAD)
Family allocation	-	6.40	-
Social allocation	4.29	8.60	6,000
Professional tax	-	1.60	-
Mandatory medical care	2.26	4.11	-

M

Branch income

Non-resident entities are subject to income tax at normal CIT rates derived from all profits or income relating to property that they own, activities that they carry on, and profit-making transactions that they carry out in Morocco.

The taxation is levied to the portion of income allocable to the branch located in Morocco.

In addition, a 15% 'branch tax' applies to a non-resident's after-tax profits. Some treaties may provide protection against the application of the branch tax.

For resident entities having branches in Morocco, the income is taxable in the hands of the head office at normal CIT rates.

Income determination

Inventory valuation

Cost of inventory must be determined in accordance with the first in first out (FIFO) or the average cost method. The last in first out (LIFO) method is prohibited.

Morocco

Capital gains

Capital gains are taxable as a part of ordinary business income.

Dividend income

Dividends received by corporate shareholders from Moroccan-resident entities subject to CIT must be included in business profits of the recipient company, but the dividends are 100% deductible in the computation of taxable income.

The participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

Interest income

Interest income received from tax resident entities (other than financial institutions) is subject to a withholding tax (WHT) at the rate of 20%. The WHT is deductible from CIT.

Rents/royalties income

Rents and royalties income are taxable as a part of ordinary business income.

Foreign income

The income derived from activities carried out in a foreign country is not subject to taxation in Morocco unless the taxation is granted by treaty dispositions.

Note that the participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

Deductions

Depreciation

Fixed assets are normally depreciated according to their economic life duration according to the provision of the accounting regulation.

Depreciation is computed according to two methods: the straight-line method and the declining-balance method.

The tax regulation (through administrative guidelines) has provided indicative depreciation rates applicable when the company activity or the asset to be depreciated is specific or particular.

Indicative depreciation rates are as follows:

Asset	Depreciation rate (%)
Business premises and buildings	4 to 5
Light construction (metal frame construction)	10
Production equipment, tools, and construction fittings	10 to 15
Huge computer facilities	10 to 20
Computers and related items (printers) and programs, as well as vehicles (cars, trucks, vans, lifters)	20 to 25
Office furniture and software	20
Non-significant tools	30

Goodwill

Under Moroccan tax law, goodwill cannot be subject to amortisation. However, a decrease of the value of goodwill is allowed to be recorded through provisions.

Start-up expenses

The development as well as incorporation expenses shall be capitalised and depreciated for tax purposes over a period of five years.

The carryforward of any loss due to the above expenses is limited to a period of four years.

Interest expenses

Interest on loans granted by direct shareholders is deductible if the capital is fully paid in. Also, the deductible interest is limited to (i) the portion of the loan that does not exceed the share capital equity and (ii) the interest rate provided, annually, by the Ministry of Finance (2.53% in 2016).

Bad debt

Bad debts that are definitively non-recoverable (after all recovery procedures have been undertaken) are treated, from a tax point of view, as deductible losses.

Charitable contributions

Charitable contributions made by companies are deductible only if they are granted to foundations and societies explicitly provided by law.

The contributions made to the community enterprise are deductible at up to 0.2% of the company turnover.

Fines and penalties

Fines and penalties are not tax deductible expenses if they relate to infringements to legal and regulatory dispositions.

However, expenses relating to late payment penalties (calculated in accordance with the provisions of the law) should be tax deductible.

Taxes

Taxes constitute deductible expenses, except CIT itself and recoverable taxes.

Net operating losses

Tax losses may be carried forward for a period of four years from the end of the loss-making accounting period. However, the portion of a loss that relates to depreciation may be carried forward indefinitely.

A carryback mechanism is not allowed under Moroccan law.

Payments to foreign affiliates

Payments to foreign affiliates are allowed under Moroccan law. However, such payments should respect the arm's-length principle and foreign exchange regulations.

Group taxation

Under Moroccan law, consolidation or group taxation is not allowed.

Transfer pricing

Morocco has a general provision within its tax legislation requiring transactions between related parties to be at arm's length.

Where a Moroccan company is directly or indirectly connected with enterprises situated inside or outside Morocco, profits transferred indirectly to such enterprises, by means of increases or decreases in buying or selling prices or by any other means, must be included among taxable profits on the tax return.

Morocco

In order to determine the amount to be included among taxable profits, Moroccan tax authorities will make comparisons with other similar companies carrying on normal business activities or by means of direct assessment based on information available to the tax authorities.

Thin capitalisation

No specific thin capitalisation rules exist in Morocco.

However, the tax law restricts the interest rate on debts issued by shareholders and the basis of calculating deductible interests.

Interest incurred is tax deductible if the shareholder's capital is fully paid. Additionally, the sum of the shareholder loans generating deductible interests should not exceed the equity capital subscribed, and the applicable interest rate should not exceed the official rate calculated annually on the basis of six months treasury bills.

Controlled foreign companies (CFCs)

There are no provisions for CFCs in Morocco.

Tax credits and incentives

The Moroccan tax law provides several tax incentives for specific sectors of activities.

Export companies

Export companies are exempt from CIT on their profits related to their export turnover during the first five years following their first export transaction. These companies benefit from a reduced CIT rate of 17.5% in subsequent years.

Hotel companies

Hotel companies are fully exempt from CIT on their profits relating to foreign currency turnover for the first five years following their first accommodation operation in foreign currency. They also benefit from a reduced CIT rate of 17.5% on such profits for subsequent years.

Mining companies

Exporting mining companies, including those that sell products to export companies, benefit from a reduced CIT rate of 17.5%.

Agricultural companies

Small-scale companies

Agricultural companies with a turnover of less than MAD 5 million qualify for a total exemption of CIT. If such companies realise a turnover that exceeds MAD 5 million in year (n), they become liable to CIT in year (n), year (n + 1), year (n + 2), and year (n + 3).

Moreover, such companies qualify for a reduced rate of 17.5% during the first five fiscal years following the first year during which they become liable to CIT.

Medium and large-scale companies

Finance Law 2014 provides for a progressive approach to tax medium and large-scale agricultural companies that realise a turnover exceeding MAD 5 million. As such, companies with a turnover exceeding MAD 35 million, MAD 20 million, or MAD 10 million should become liable to CIT, respectively, in 2016, 2018, and 2020.

Moreover, such companies qualify for a reduced rate of 17.5% during the first five fiscal years following the first year during which they become liable to CIT.

Capital risk companies

Capital risk companies are exempt from CIT on profits derived within the scope of their activities (these are profits related to purchases of companies' shares that support such companies' development and the sales of such shares thereafter).

Hydrocarbon companies

Companies holding hydrocarbon exploration and exploitation permits are exempt from CIT for ten years from the beginning of hydrocarbon regular production.

Banks and holding companies located in offshore zones

Banks and holding companies located in offshore zones benefit from a reduction in CIT for the first 15 years of operation.

Banks may opt for a minimum CIT of 25,000 United States dollars (USD) or pay the tax at a reduced rate of 10%.

Holding companies pay a flat tax of USD 500 during the first 15 years.

Casablanca Finance City (CFC)

A law was enacted in 2010 for the setting up of a finance area in Casablanca, called, Casablanca Finance City.

The CFC statute may be granted to specific financial institutions as well as non-financial institutions that offer such services as auditing, fiscal, legal, financial, actuarial, and human resources management advisory.

The above statute may also be granted to regional and international headquarters.

Entities established in Casablanca Finance City are exempt, for their export turnover, from CIT during the first five years following the date they obtain the CFC statute. These companies benefit, for the export turnover, from a reduced rate of 8.75% in subsequent years.

Free trade zones (FTZs)

The activities that must be necessarily performed by the companies established in the FTZs are mainly the following (the activities may vary for each FTZ):

- Food processing industries.
- Textile and leather industries.
- Metallurgic, mechanic, electric, and electronic industries.
- Chemical and special chemical industries.
- Services connected with the aforementioned activities.

Entities established in FTZs are exempt, for their export turnover, from CIT during the first five years. These companies benefit, for the export turnover, from a reduced CIT rate of 8.75% for the following 20 years.

Moreover, for entities established in FTZs, the dividends paid to non-residents relating to activities performed in the FTZ are totally exempted from the WHT on dividends.

Listed shares

Non-resident entities are exempt from capital gains derived from the sale of stocks listed on the Casablanca stock exchange, excluding the shares of real estate entities.

Foreign tax credit

Income tax paid on income earned from outside Morocco may be credited against CIT payable in Morocco if provided by treaty.

Morocco

Withholding taxes

WHT on dividends

The standard WHT rate on dividends is set at 15% according to the Moroccan law (unless reduced by treaty).

WHT does not apply to dividends paid to Moroccan companies subject to Moroccan CIT, subject to the delivery of a property attestation.

A branch tax of 15% applies to the net income transferred by the Moroccan branch to foreign entities (may be reduced by the tax treaty).

WHT on interests

The standard WHT on interest paid to non-resident entities is set at 10% as provided by the Moroccan law (unless reduced by treaty). However, the Moroccan law provides that interest on loans granted in foreign currency with a maturity exceeding ten years is exempt from WHT.

WHT on services paid to non-resident entities

According to the Moroccan tax code, all payments of all kinds of services rendered by non-resident entities are subject to WHT at the rate of 10%.

However, it shall be noted that treaty dispositions limit the scope of application of WHT only to remunerations that constitute royalties. Such dispositions overrule the domestic tax law provided by the Moroccan law.

Treaty WHT rates

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

Recipient	WHT (%)			
	Dividends		Interest (1)	Royalties
	Individuals and non-qualified companies	Qualifying companies		
Arab Maghreb Union (2)	(3)	(3)	(3)	(3)
Austria	10	5	10	10
Bahrain	10	5	10	10
Belgium	15	6.5	10	10
Bulgaria	10	7	10	10
Canada	15	10	10	5/10 (4)
China (People's Republic)	10	10	0/10	5/10
Czech Republic	10	10	10	10
Denmark	15	10	10	10
Egypt	12.5	10	10	10
Finland	15	10	10	10
France	15	10	10	5/10 (4)

Ukraine	10	10	10	10
United Arab Emirates	10	5	10	10
United Kingdom	15	10	10	10
United States	15	10	10	10

Notes

1. Some treaties provide for an exemption for certain types of interest (e.g. interest paid to public bodies and institutions). Such exemptions are not dealt with in this treaty chart.
2. The member states of the Arab Maghreb Union are Algeria, Libya, Mauritania, Morocco, and Tunisia.
3. There is no limitation on WHT under the treaty.
4. The lower rate (i.e. 5%) usually applies to copyright royalties and other similar payments in respect of the production or reproduction of any literary, artistic, or dramatic work (excluding cinematographic and television films), while the 10% rate applies to other types of royalties.

Tax administration

Taxable period

The taxable period corresponds to 12 months. The first taxable period can be less than one year but should never exceed it.

Tax returns

CIT returns must be filed within three months following the closing of the fiscal year.

Payment of tax

Payment of tax is made during the fiscal year by way of four instalments of 25% each based on the CIT of the previous year.

In case the CIT of the year exceeds the sum of the four instalments, the company should proceed to tax regularisation along with the submitting of the taxable income return after three months following the closing of the fiscal year (i.e. 31 March for fiscal year corresponding to the calendar year). Otherwise, the exceeding tax amount should be offset against the following instalments without limitations.

Morocco

Penalties

Finance Law 2016 provides for the application of new rates for penalties and late payment interest, as of 1 January 2016, as follows:

In case of late tax return:

- 5% penalty in case the tax return is submitted within 30 days following the legal deadline, or in case of corrective return.
- 15% penalty in case the tax return is submitted after the above mentioned 30 days.
- 20% penalty in case of automatic taxation due to non-submission of tax return.

In case of late tax payment:

- 5% penalty in case the tax payment is made within 30 days following the legal deadline.
- 10% penalty in case the tax is paid after the above mentioned 30 days.
- 20% penalty in case of non-payment or late payment of VAT and other WHTs.
- 5% interest related to the first month late tax payment and 0.5% interest for the following months.

Statute of limitations

The statute of limitations runs until the end of the following fourth year. This period may be extended in case of deficits or credits.

Topics of focus of tax authorities

The topics of focus of tax authorities depend on each specific situation (sector of activity, company size, etc.). However, it is very common to find the following points:

- Transfer pricing.
- Tax treatment of provisions.
- Taxation of indemnities and benefits granted to employees.

Other issues

Exchange controls

Foreign investors are allowed, following the accomplishment of some formalities, to freely transfer abroad the whole proceeds of their investments in Morocco (i.e. dividends, shares sale price, and liquidation income under the condition that the initial investment is realised in one of the foreign currencies listed by the Moroccan Central Bank).

However, some specific transfers of funds into and out of Morocco are subject to prior authorisations from the exchange control office.

Choice of business entity

The legal vehicles used by foreign companies for the purpose of setting up a business in Morocco are the branch and the subsidiary.

Under subsidiary form, the foreign entities generally opt for the corporation (SA) or the limited liability company (SARL).

The SARL is most adequate for companies with low investment capital while the SA is most appropriate for companies that are investing an important amount of capital. In general, the rules relating to the organisation and functioning of an SARL are more flexible than those required for an SA.

Significant developments

Regulation of the specific tax regime and tax benefits for mining activity

The Decree no. 28/2015 of 28 December did not bring changes or clarifications in relation to Law no. 28/2014 of 23 September.

Recalling some changes in the new regime, namely the tax on mining production (TMP), article 4.1 of this regulation establishes that the value of mining product is determined by the price of the last sale by the taxable person, which must match with the price of reference in the international market, or, if there was no sale, is determined by the price of reference in the international market.

This regulation reduced the rates for mining products, being 8% for diamonds, 6% for precious metals, precious stone and semi-precious stone, and heavy sand, 3% for base metals, coal, and others, and 1.5% for sand and stone. Such rates can be reduced to 50% when the products are used in Mozambique for the development of local industry.

The settlement of the TMP is now performed on the tenth day of the month that follows the production.

There are also changes regarding the rate of the surface tax (ST), which is based on the type of mining title and year of activities, with exception of the mining concession for mineral water that has an amount of 85,000 Mozambican metical (MZN) per mining title.

The additional settlement for the TMP and ST must be done within 30 days from the tax settlement.

At the end of each year, the taxpayer must report the yearly profit for each mining title, separately.

According to this regulation, the holder of the mining title also pays the tax on mining resource rent (TMRR), and, for its deduction, the concessionaire must provide information to the tax authorities on the accumulated net cash flows, corresponding to the taxable income.

The applicable rate for TMRR is 20%.

At the beginning of the fiscal year, each taxpayer must prepare a forecast to TMRR that must be regularly updated and presented by 31 May of the fiscal year. The TMRR is paid in two instalments (50% in August and 50% in November), based on the forecast.

It was expected that this regulation would bring more details about the calculation of TMRR, which was not the case.

Mozambique

Regulation of the specific tax regime and tax benefits for oil and gas operations

In accordance with the regulation of the specific tax regime and tax benefits for oil and gas operations, the obligation to pay the tax on oil production (TOP) is deemed to be at the time that the oil produced comes to the station defined in the concession agreement.

The settlement of the TOP is made by the taxpayer, which must submit the official form to the tax administration by the tenth day of the following month of the production, and, if the taxpayer fails to do so, the tax administration will make the necessary assessments based on the elements it has and the application of penalties established in article 22 of the mentioned regulation.

The TOP rates are the following: 10% for crude oil and condensate and 6% for natural gas and liquefied natural gas (LNG), which can be reduced by 50% in cases where the production is to be used for the development of local industry. It is considered local industry if the sale is for the national hydrocarbon company (ENH, E.P).

After the settlement made by the taxpayer, the tax administration shall evaluate the official model and can make corrections to it. If a correction is to be made, the tax administration has the prerogative to conduct an additional settlement, in which it must charge or cancel the calculated difference, and this amount must be corrected in 30 days from the tax assessment.

It is important to mention that the government has a period of time to notify the taxpayer to pay in kind, which is within 12 months in advance, starting from the first day of the month to which the tax relates, indicating the quantity of oil and delivery point.

In order to have benefits established in Law no. 27/2014 of 23 September, the taxpayer must apply to the Customs Services for the exemption. In this request, the applicant must attach the global list of the goods to import for the determination of eligible goods for the exemption.

The violation of this regulation is subject to impeditive sanctions (in case of violation of article 36 of Law no. 27/2014), suspensive sanctions (the practice of acts established in article 22.3 of the regulation), and extinctive sanctions.

Taxes on corporate income

Corporate entities and other entities with headquarters or permanent establishment (PE) in Mozambique are subject to corporate income tax (CIT) based on their worldwide income. On the other hand, corporate entities and other entities without headquarters or PE in Mozambique (i.e. non-resident entities) are only subject to CIT on the income earned in Mozambique.

CIT is levied on taxable profits, defined as accounting profits adjusted to comply with tax law rules, at a tax rate of 32%. For tax years ending prior to 1 January 2016, income arising from agricultural or cattle breeding activities was subject to a reduced rate of 10%.

Local income taxes

See Municipality taxes in the Other taxes section.

Corporate residence

Corporate residence is determined on the basis of a company's place of incorporation or effective management. Thus, all companies with headquarters in Mozambique, as well

as any PE of non-resident entities, are considered tax residents and are liable for CIT on their worldwide income.

Permanent establishment (PE)

Under the relevant internal legislation, a non-resident entity is deemed to have a PE in Mozambique whenever any of the following circumstances exists:

- It has premises or other fixed places of business through which industrial, trading, agricultural, rendering of services, or similar activities are totally or partially carried out.
- It has an office, branch, plant, workshop, mines, quarries, oil or natural gas wells, or other places of extraction of natural resources.
- It has a construction, installation, or assembly site when the duration of works exceed six months, including the activities of coordination, inspection, and supervision connected to these sites.
- It has persons or hired personnel, acting and dealing in Mozambique, who are not independent agents in the terms of the law but rather acting on behalf of the company with legal capacity to conclude contracts on its behalf and its name within the scope of the company's activities.

Other taxes

Value-added tax (VAT)

VAT is chargeable on the sale of most goods and services as well as on imports. The standard rate is 17%. Usually, VAT is recoverable by corporate entities, except for those engaged in special business activities (e.g. financial and insurance operations, leasing [exemption with restrictions], sale of immovable property, some exempt activities).

Customs duties

Customs duties are charged on importation of goods into Mozambique, and the applicable rates vary from 0% to 20%. Mozambique is part of the Southern African Development Community (SADC) protocol on commercial trade that exempts from customs duties some goods produced within the SADC region. However, in order to benefit from the exemption, the importer should provide proof of the origin of the said goods through the presentation of the certificate of origin of goods.

Mozambique also has signed agreements with the European Union (EU) based on which preferential rates are applicable on certain goods imported from such region.

Excise taxes

Excise duties are levied on certain goods manufactured locally or imported, which are identified in a specific table that is an integrant part of the Excise Duty Act and indicates the applicable rates. Amongst others, the said table includes goods such as tobacco, beer and other alcoholic beverages, vehicles, cosmetics, cloths, airplanes, boats, etc.

Examples of excise duty rates include the following:

- Alcoholic beverages: 40% (55% for wine of fresh grape).
- Tobacco: 75%.
- Air vehicle without engine: 35%.
- Boats and other recreational or sportive crafts: 35%.
- Cloths and respective accessories: 30%.

Property transfer taxes (SISA)

In Mozambique, a property transfer tax is charged on transfers of real estate, excluding the land, which is owned by the state. The rate of tax is 2% of the selling price of the

Mozambique

building. When the beneficiaries live in a country with a privileged tax regime, the applicable rate is 10%.

Stamp duties and service charges

Various documents require the payment of stamp duties. Service charges are payable for the performance of certain services for official purposes, such as those rendered by public notaries. These duties vary generally from 0.03% to 50% on the amount of the transaction supported by the document to be stamped. In some other cases, the stamp duty comprises fixed amounts, ranging from MZN 0.50 to MZN 5,000.

Payroll taxes

All remunerations paid to employees are subject to monthly withholding as per the definitive tax rates that are established in a specific schedule approved by law, depending on the gross amounts received and personal and family specific circumstances. The employer is obligated to withhold at source the tax due by the employees.

The monthly withholding rates vary from 0% to 32%, being withheld definitively at source.

The amounts withheld by the company shall be delivered to the tax authorities up to the 20th day of the following month.

The company is not allowed to support any taxes due by employees or third parties. In case any tax is paid by the company on behalf of employees, such cost will not be accepted as a deductible cost unless this is treated as part of the remuneration cost and taxed at the hands of the employee as employment income.

Social security contributions

Social security contributions are payable by employers and employees on monthly remuneration. The aggregate rate of contribution is 7%, with 4% paid by the employer and the remaining 3% by the employee.

Municipality taxes

Municipality taxes that should be considered for corporate purposes include the following:

Municipality tax on real estate

The municipality tax on real estate is levied annually on the value of immovable assets situated within the municipality and owned or possessed by corporate entities. Effective tax rates range from 0.4% (for housing purposes) to 0.7% (for office purposes or mixed activities) of the building value, depending on the municipality.

Municipality tax on economic activities

The municipality tax on economic activities is levied on commercial or industrial activities carried out within a municipal territory. The tax depends on the activity being carried out, adjusted by coefficients, which are based on the zone and total area of the premises in square metres. In Maputo, this tax is calculated based on the following formula:

Maputo tax on economic activities = Basis rate x Index of category x Index of location x Index of area occupied

Where the basis rate is the applicable maximum amount of the national minimum salary (MZN 8,050 for the year 2015).

Where the index of the location varies from 1.3 to 1.5, depending on the location of the premises within the municipality.

Where the index of the area occupied varies from 1.2 to 1.5, depending on the nature of the activities and the space occupied by the premises.

Municipal vehicles tax

The municipal vehicles tax replaces the vehicles tax within the municipality and is levied on the use of specific vehicles (e.g. light and heavy vehicles less than 25 years old, motorcycles less than 15 years old, aeroplanes, and boats for private use). This tax is due by the owners who are residents of a municipality, regardless of the place of registration of the vehicle owned.

The rate varies, depending on specific criteria such as type of fuel, engine capacity, period of registration, and weight.

This tax must be paid between January and March or within 30 days after the acquisition of the vehicle.

Branch income

From a tax perspective, branches are liable for Mozambican CIT as a separate entity; consequently, the regime is the same that would apply to a Mozambican resident company. However, on the grounds that branches do not distribute dividends, the 20% withholding tax (WHT) does not apply to the after-tax profits arising in Mozambique.

Income determination

Inventory valuation

All inventory valuation methods generally accepted according to international accounting principles are permitted for tax purposes, provided that the method is:

- used by the taxpayer consistently and
- based on arm's-length prices duly documented and effectively exercised.

Based on the above assumptions, last in first out (LIFO) and first in first out (FIFO) methods are allowed. Write-downs and depreciation of inventories are not allowed. Conformity between book and tax reporting is required.

Large companies began adopting International Financial Reporting Standards (IFRS) in 2010.

Capital gains

Capital gains less any capital losses derived from the sale or disposal of tangible fixed assets, including insurance indemnities received in case of accident, are taxed as part of normal income. If a taxpayer reinvests the sale proceeds within three tax years following the year of sale, the gain may be deferred until the end of the third year. A three-year reinvestment period may be accepted, provided a prior application is submitted to the Minister of Finance. However, if the taxpayer does not realise the reinvestment, the CIT that was not assessed during the three-year period will be assessed, along with compensatory interest.

Capital gains arising from indirect transfers of participating interests of assets located in the country are subject to taxation. Capital gains resulting from the disposal of shares, participating interests, or rights in general, between non-residents, whether direct or indirect, free or for consideration, are taxable in Mozambique, provided the transaction involves assets located in the country.

Mozambique

Dividend income

In the case of resident companies, income arising from dividends is excluded from taxable income, provided that the shares that a resident company holds in another resident company represents at least 20% of the total capital and are held for at least two consecutive years (or with an undertaking to hold the shares for this period). The same applies to income arising from risk capital companies and holding companies (*Sociedade Gestora de Participações Sociais* or SGPSSs) or from subsidiaries as a result of the application of technical reserves in insurance companies. However, in the case of holdings, the percentage of share capital decreases to 10% and shares should be held for at least one year.

If the shareholding falls outside the parameters indicated above, the tax withheld (20%) constitutes a payment on account. A tax credit corresponding to 62.5% of the CIT is attributable to the gross-up dividend.

Interest income

Interest is subject to 20% WHT. In the case of foreign entities, the WHT is considered as a definitive tax. In the case of resident entities, it is considered as an advance of the final tax.

Interests on treasury bonds and public debt bonds listed on the stock exchange are subject to definitive WHT at 20%.

Foreign income

Mozambican resident companies are taxed on the total income earned on a worldwide basis. Please note that there is no provision on tax deferral in Mozambique in relation to income earned abroad. Double taxation treaties (DTTs) allow tax paid abroad to offset Mozambican CIT. Mozambique has signed DTTs with Botswana, India, Italy, Macau, Mauritius, Portugal, South Africa, the United Arab Emirates, and Vietnam.

Deductions

Depreciation

Depreciation is a deductible cost for CIT purposes, according to the regulations of the CIT Code, subject to restrictive and specific rules.

The main legal principles regarding depreciation are as follows:

- The establishment of the applicable rates falls under the competence of the Ministry of Finance.
- The calculation is carried out on a straight-line basis in accordance with the rates applicable.

The main depreciation rates are:

Assets	Rate (%)
Tangible assets:	
Industrial buildings	2.00
Residential buildings	10.00
Office and administrative buildings	2.00
Machinery and installations, air conditioning, and telephone equipment	12.50
Lifts	8.33
Tools	25.00
Laboratory equipment	12.50
Telex and interior equipment	10.00
Furniture and filing systems	10.00

Assets	Rate (%)
Typewriters and accounting machines	16.66
Computers and printers	25.00
Computer servers	20.00
Warehouse and filing installations:	
Of concrete	6.66
Of wood	8.33
Of steel	7.14
Trucks	20.00
Automobiles	25.00
Intangible assets:	
Pre-operating expenses incurred prior to the commencement of business	33.33
Deferred expenses arising in connection with increases in share capital, changes in form of business enterprises, issuance of debentures, marketing and other studies, and financial expenses incurred for the acquisition or own production of fixed assets prior to completion	33.33
Patents	10.00
Manufacturing licences, concessionaire agreements, and similar rights	5.00 (1)
Trademark or premium of taking over leases of real estate	(2)

Notes

1. Subject to certain conditions set forth by the tax authorities.
2. Depreciation is only allowed in cases of effective reduction of value within the limits regarded as reasonable by the tax authorities.

Accelerated depreciation

New immovable assets, used for the furtherance of the business, may be depreciated by increasing to 50% the normal depreciation rates approved by law. This benefit is also granted to rehabilitated immovable assets, machinery, and equipment used in agro-industrial activities, provided there is an investment project duly approved by the government.

Goodwill

Although goodwill is considered for accounting purposes in Mozambique, there is no provision for goodwill in the tax legislation. Consequently, goodwill should be regarded as an intangible asset for tax amortisation purposes.

Interest expenses

A basic principle regarding acceptance of costs and expenditures requires that these are necessary for the company's/branch's activity (i.e. indispensable to generate the profits and gains obtained by the company). This concept includes, among others, interest and other financial costs that are, in principle, also deductible for tax purposes unless the tax authorities assume that the interest rate applicable in one transaction is higher than the applicable rate applicable in the market, with the exceeding amount being subject to taxation.

Interest and other types of remuneration above the Maputo Interbank Offered Rate (MAIBOR) plus two percentage points at time of payment on the shareholders' loans are not tax-deductible costs.

Provisions

In Mozambique, companies are able to create all the provisions necessary and relevant for the normal course of business. However, for tax purposes, only the provisions listed below can be deducted as a cost:

- Bad debts.

Mozambique

- Depreciation of stock.
- Ongoing judicial procedures.
- Credit institutions/Insurance companies.
- Reconstruction of mines.
- Rehabilitation of land.

Any other provisions reflected in the company's accounts will not be accepted as tax-deductible costs.

Bad debt

With regards to provisions for bad debts, companies are only allowed to deduct 1.5% per year (and 6% accumulated) of the provisions created for bad debts.

Charitable contributions

Donations can be deducted as costs for tax purposes, provided specific requirements are met and the beneficiaries thereof are:

- Social and cultural organisations that, acting without lucrative intent, carry out actions in art, education, science, health, preservation and restoration of cultural patrimony, or social activities: Donations can be deducted up to the limit of 5% of the previous year's taxable income.
- The Mozambican state: Donations can be fully deducted.

It is important to note that this deduction is not applicable automatically, as it is necessary to present proof that the donation was previously communicated to and approved by the Ministry of Finance.

Fines and penalties

Fines and other penalties paid due to any infringement, which do not have a contractual basis, including interest, are not accepted as tax-deductible costs.

Taxes

Taxes paid in relation to the activities of a company are tax deductible, excluding CIT itself.

Net operating losses

Carryback of losses is not allowed in Mozambique. On the other hand, losses may be carried forward for a period of five consecutive years.

Payments to foreign affiliates

Any payments to non-residents are allowed as deductible expenses, provided that the amount does not exceed normal rates and that the taxpayer is able to prove that a business transaction was carried out with the non-resident company. The tax authorities may redetermine taxable income if, due to a special relationship between the Mozambican and non-resident companies, certain conditions existed that allowed a calculation of profit that differed from the profit that would have been calculated without the existence of such relationship (i.e. the arm's-length principle).

Group taxation

There are no group taxation provisions available in Mozambique. Each member of a group of companies preparing consolidated accounts for accounting purposes must file separate tax returns in order to be taxed on its profits on a stand-alone basis.

Transfer pricing

The tax authorities may proceed with the necessary corrections for assessing the profits for tax purposes whenever:

- by virtue of special relations between the taxpayer and other entity, different conditions from those that should be normally agreed upon between independent entities have been established, and
- in consequence of those conditions, the profits for accounts purposes are different from those that would have resulted had such special relations not existed.

The corrections above shall be equally applicable whenever the profits for accounts purposes regarding non-resident entities are different from those that should have resulted if the non-resident entity were a separate entity carrying out similar activities in similar conditions and with total independence.

The corrections referred to above will also be applicable to entities that carry out activities simultaneously subject and not subject to the CIT Code, provided that similar evasion regarding such activities is verified.

Whenever these corrections are applicable to one taxpayer of CIT (Taxpayer 1) by virtue of special relations with another taxpayer of CIT or of individual income tax (Taxpayer 2), the adjustments reflecting the corrections made in the calculation of the profits for tax purposes of Taxpayer 1 shall be applicable in the assessment of the profits for tax purposes of Taxpayer 2.

The definition of 'special relation' has been introduced into the transfer pricing regime. However, specific transfer pricing regulations remain non-existent, although they are expected to be approved during this year.

Thin capitalisation

Where loans from related foreign corporations exceed twice the corresponding equity in the borrowing Mozambican corporation, the interest on the excess borrowing is not tax deductible. Thin capitalisation rules are in force.

According to the Mozambican thin capitalisation rules, subsidiaries are considered and treated as thinly capitalised companies if and to the extent that, as at any date of the tax period, any of their relevant debt-to-equity ratios exceed a factor of two.

'Relevant debt-to-equity ratio', within the context of the law, means the ratio between, on one hand, the amount of direct and indirect indebtedness of a Mozambican company towards a specially related non-resident, and on the other, the amount of equity that this non-resident holds in the Mozambican company.

A 'specially related non-resident', for these purposes, is an entity with special links with another, which includes any entity that:

- holds, either directly or indirectly, at least 25% of the share capital of the Mozambican company
- though holding less than 25%, has a significant influence on its management, or
- both taxpayer and non-resident entity are under control of the same entity, which has participation in their share capital, either directly or indirectly.

Under any of these circumstances, interest paid to such specially related non-residents is not allowed as a tax-deductible cost for the Mozambican company in the part that corresponds to the excessive indebtedness, unless the company can prove that it could have obtained the same level of indebtedness at comparable conditions from unrelated parties, taking into account the nature of its business, its sector of activity, dimension, and other relevant criteria.

Controlled foreign companies (CFCs)

In Mozambique, we do not have any specific provision regarding taxation of CFCs.

Tax credits and incentives

Foreign tax credit

Resident companies are allowed to deduct a credit correspondent to a tax paid abroad. The tax credit to be deducted should be equal to the lower of the amount of Mozambican corporate tax imputed to income obtained abroad or the amount of foreign tax effectively paid.

Inbound investment incentives

In addition to the guarantees of ownership and remittance of funds abroad, the Mozambican government also guarantees the concession of tax and customs incentives. The incentives vary depending on whether a company is starting a new venture or rehabilitating one and also on the nature of the project to be developed. The incentives discussed in this section are the generic benefits applicable to standard projects. Certain specific benefits also may be applicable depending on the activities of the industry for the investment project (e.g. agriculture, tourism, science and technology).

Exemption from import duties

An exemption from customs duties and VAT applies upon the importation of capital equipment, listed in Section K of the Customs Tariff Schedule.

Tax credit for investment

Investments in new fixed tangible assets used in the operations of an enterprise within the Mozambican territory may benefit from an investment tax credit equal to 5% to 10% of the total investment realised, for a period of five years. This investment tax credit is offset against CIT, up to the total amount of the tax assessment. This incentive does not apply when the investment in tangible fixed assets is with respect to the construction, acquisition, restoration, or extension of buildings, passenger vehicles, furnishings, and articles of comfort and decoration, leisure equipment, advanced technology, or other assets not directly associated with the production activity carried out by the enterprise. When the project is located outside Maputo City, this tax credit is increased to up to 10%.

Advanced technology incentive

The amount invested in specialised equipment classified as advanced technology, during the first five years from the date of commencement of activity, may be deducted from taxable income for purposes of calculating CIT, up to a maximum of 10% of taxable income.

Professional training incentive

Investment expenditures for professional training of Mozambican workers shall, up to a maximum amount of 5% of the taxable income (10% in case of professional training related to new/high technology equipment), be deductible from taxable income for the purposes of calculating CIT during the first five years from the date of the commencement of such activities.

Exploration incentives

During a period of five years counting from the date of exploration (i.e. the date the implementing company starts the activities approved under the investment project terms of authorisation), the following expenditures may be treated as deductible expenditures for purposes of calculating CIT:

- In the case of undertakings carried out in the City of Maputo, 110% of the value of expenditures for the construction and rehabilitation of roads, railways, airports, telecommunications, water supply, electric energy, and other works of public utility is deductible for tax purposes.
- In the case of undertakings carried out in the rest of the provinces, an amount equal to 120% of the expenditures referred to in the paragraph above is deductible for tax purposes.

- In the case of expenditures for the acquisition for personal ownership of works of art and other objects that are representative of Mozambican culture, as well as activities that contribute to the development of such works, 50% of the expenditures are deductible for tax purposes.

Withholding taxes

Any non-resident entity carrying out economic activities in Mozambique, without being registered as a taxpayer, is liable to a final and definitive 20% WHT that is applied on all income earned. An exception exists for (i) telecommunications and international transport, as well as the respective installation and assembly of equipment made by those same entities, (ii) construction and rehabilitation of production, transport, and distribution of electricity infrastructures in the rural zones under the public projects of rural electrification; and (iii) maritime vessels freight for fishing and coasting activities, all of which are subject to a 10% WHT rate.

Both Mozambican resident and non-resident recipients are liable to tax on dividends at a tax rate of 20%.

Tax treaties

In accordance with Mozambique's DTTs, the following tax rates are applicable to dividends, interest, and royalties:

Recipient	WHT (%)			
	Dividends	Interest	Royalties	Capital gains on shares
Botswana	0/12 (4, 5)	10	10	0
India	7.5	10	10	0
Italy	15	10	10	0
Macau	10	10	10	0
Mauritius	8/10/15 (1, 2, 3)	8	5	0
Portugal	10	10	10	(6)
South Africa	8/15 (1, 3)	8	5	0
United Arab Emirates	0	0	5	0
Vietnam	10	10	10	0

Notes

1. The 8% rate applies if the recipient of the dividends is a company that has more than 25% of the share capital in the company that distributes the dividends.
2. The 10% rate applies if the recipient of the dividends is a company that has less than 25% of the share capital in the company that distributes the dividends.
3. The 15% rate applies in all other cases.
4. The 0% rate applies if the recipient of the dividends is a company that has more than 25% of the share capital in the company that distributes the dividends.
5. The 12% rate applies in all other cases.
6. Gains are only taxed in the other state if assets of the entity sold are composed of more than 50% immovable assets.

Tax administration

Taxable period

The tax year is, as a general rule, the calendar year. A different tax year may be applied (if previously authorised by the Ministry of Finance) for companies that carry out activities that justify a different year (e.g. held at more than 50% by a company with a different year) or non-resident companies with a PE in Mozambique.

Mozambique

Tax returns

CIT assessment must be prepared by the companies on annual returns, based on the accounting records and on adjustments prescribed by the tax regulations.

The submission of the annual tax return is due by the last working day of May for companies using the calendar year as their tax year. For companies with a tax year that is not coincident with the calendar year, the presentation of the tax return is due by the last day of the fifth month subsequent to the respective year-end.

Payment of tax

Mozambican companies and non-resident companies with a PE in Mozambique must pay CIT as follows:

- In three advance payments (based on 80% of the preceding tax year's CIT), due in May, July, and September of the respective tax year; or, if the tax year chosen is not coincident with the calendar year, in the fifth, seventh, and ninth months of the respective tax year.
- In three special advance payments (based on 0.5% of the preceding year's turnover less the advance payments made in previous years, which cannot be less than MZN 30,000 or more than MZN 100,000) due in June, August, and October of the respective tax year; or, if the tax year chosen is not coincident with the calendar year, in the sixth, eighth, and tenth months of the respective year.

Final tax should be paid by the last working day of May or the fifth month after the tax year-end in cases where a different tax year is adopted.

Tax audit process

The tax authorities may carry out an inspection whenever necessary. Normally, the inspection occurs after the taxpayer files a refund application or on a random basis.

Statute of limitations

The statute of limitations period is five years, but the company documents must be kept for ten years.

Topics of focus for tax authorities

Based on our experience and through assistance provided to several clients during audit reviews, we noted that the Inspectors are focusing their attention on the following aspects:

- Confirmation of the amounts reported on the monthly VAT forms and the annual tax return to determinate if the figures are the same or not or if there are non-declared sales.
- Confirmation of whether the non-deductible costs were added back to the tax computation for CIT purposes.
- Deductibility of VAT.
- Analysis of supplier invoices to confirm the right of deduction of VAT.
- Analysis of the company's sales for verification of whether there are undisclosed sales.
- Authorisation for electronic invoicing.
- VAT on self-assessment.
- Mandatory books, namely, ledger (*diário*), day book (*razão*), and inventory and balance (*inventário e balanço*).
- WHT on payments to non-resident entities.
- Thin capitalisation.

Significant developments

A new Union Taxation Law 2016, Amended Income Tax Regulations, and Amended Commercial Tax Regulations were introduced and took effect from 1 April 2016.

A Special Goods Tax Law was introduced in April 2016 to replace the commercial tax on a list of special goods that are imported and/or purchased from local producers/manufacturers.

Taxes on corporate income

Foreign investors may register their companies under the Myanmar Companies Act (CA) or in conjunction with the Union of Myanmar Foreign Investment Law (MFIL). The differences between companies registered under the CA and the MFIL are in relation to their eligibility for tax incentives and longer land use terms, as well as minimum foreign share capital requirements.

Generally, resident companies are taxed on a worldwide basis, and as such, income from sources outside Myanmar is taxable. MFIL companies, although treated as resident companies, are taxed only on income derived from sources within Myanmar.

Non-resident companies are taxed only on income derived from sources within Myanmar. Income received from any capital assets within Myanmar and from any source of income within Myanmar is deemed to be income received within Myanmar. The income is generally subject to tax under the normal rules for residents, except that different tax rates applied prior to 1 April 2015. Upon the introduction of Union Taxation Law 2015, which became effective from 1 April 2015, the total income of non-resident companies is also taxable at the tax rate of 25%, which is aligned with the corporate tax rate applicable to resident companies.

A company registered under the MFIL is entitled to enjoy certain exemptions and relief from taxes (*see the Tax credits and incentives section for details*).

Type of taxpayer or income	Tax rate (%)
Companies incorporated in Myanmar under the Myanmar CA	25
Enterprises operating under the MFIL	25
Non-resident foreign organisations, such as a branch of a foreign company	25

Local income taxes

There is no separate corporate income tax at the local level.

Myanmar

Corporate residence

A resident company is a company as defined and formed under the Myanmar CA 1913 or any other existing law of Myanmar.

A non-resident company is one that is not formed under the Myanmar CA 1913 or any other existing law of Myanmar. Generally, foreign branches are deemed to be non-resident companies.

Permanent establishment (PE)

Currently, there is no definition of a PE under the Myanmar Income Tax Act. In current practice, the Myanmar tax authorities seek to collect taxes from a non-resident foreigner on its income received from Myanmar by way of a withholding tax (WHT) mechanism, regardless of whether the foreigner has a PE in Myanmar or not. The term 'PE' may be defined in the tax treaties that Myanmar has with other countries. Subject to the relevant tax treaty, a foreigner who is tax resident of the treaty country may not be subject to Myanmar taxes if it does not have a PE in Myanmar.

Other taxes

Value-added tax (VAT)

There is no VAT in Myanmar.

Commercial tax

Commercial tax, at rates ranging from 0% to 8%, is levied as a turnover tax on goods and services. Generally, commercial tax is imposed at the rate of 5%. The commercial tax that a business charges and collects is known as output tax, which has to be paid to the Myanmar tax authorities. Commercial tax incurred on business purchases and expenses are known as input tax. Businesses that are registered for commercial tax can claim commercial input tax if certain conditions are satisfied.

Commercial tax is imposed on a wide range of specified goods and services produced or rendered within the country, based on the sales proceeds, and on imported goods (*see Customs duties below for details*).

All services are subject to 5% commercial tax except for 29 types of services that are specifically exempt from commercial tax (e.g. home rental services, life insurance, banking services, microfinance, public transportation).

No commercial tax is imposed if the sales or receipts from services for a financial year are not more than 20 million Myanmar kyats (MMK).

Commercial tax is zero-rated on all exports, except for electricity and crude oil.

Companies registered under the MFIL that have obtained permits from the MIC may, at the discretion of the MIC, be granted exemption from commercial tax on goods that are manufactured for export (*see the Tax credits and incentives section for details*).

Special goods tax

With effect from 1 April 2016, the Special Goods Tax Law was introduced to replace commercial tax on a list of 16 special goods that are imported and/or purchased from local producers/manufacturers. The special goods include cigarettes, tobacco leaves, Virginia leaves, cheroots, cigars, pipe tobaccos, beers, wine, alcoholic beverages, gem stones, teak, vans, saloons, sedans and estate wagons and coupe cars above 1800 cc (except double-cab 4 door pick-ups), petroleum, gasoline, diesel, and jet fuel, as well as natural gas. The special goods tax rates range from 5% to 120%.

Under the Special Goods Tax Law, only a manufacturer of special goods can claim and offset the special goods tax incurred on purchase of raw materials/semi-finished goods against the special goods tax charged on sale of special goods.

On top of special goods tax, commercial tax of 5% will also be imposed on the special goods (on the selling price inclusive of special goods tax) at the point of importation of special goods by the importer and the sale of special goods by the local producers/manufacturers.

Customs duties

Customs duty is levied under the Customs Tariff of Myanmar (2012) at rates of up to 40%.

Companies registered under the MFIL that have obtained permits from the Myanmar Investment Commission (MIC) may, at the discretion of the MIC, be given relief from customs duty on machinery, equipment, instruments, machinery components, spare parts and materials used during the period of construction or expansion, and on raw materials for the first three years of commercial production (*see the Tax credits and incentives section for details*).

Excise duties

Excise duty is levied on alcoholic drinks and is collected by the General Administration Department under the Ministry of Home Affairs.

Property taxes

Immovable property (land and buildings) situated within the Yangon development area is subject to property tax. However, as foreign ownership of land and immovable property is currently expressly prohibited, property tax is not relevant for foreign investors.

Stamp duties

Stamp duty is levied on various types of instruments, and some rates are given below:

- 3% of the amount or value of the consideration for conveyances of properties, for the sale or transfer of immovable property, plus an additional 2%.
- 0.3% of share value for the transfer of shares.
- 2% of the amount or value secured for bonds.
- 1.5% of the annual value of rent for lease agreements between one and three years, and 3% of the average annual value of rent and premium where the term of the lease agreement is more than three years.

Capital gains taxes

Capital gains tax is levied on gains from the sale, exchange, or transfer of capital assets (i.e. any land, building, vehicle, and any capital assets of an enterprise, which include shares, bonds, and similar instruments). Intangibles may fall within the definition of capital assets, and capital gains arising from such assets would also be taxable.

Capital gains from the sale, exchange, or transfer of capital assets in the oil and gas sector are taxed at different rates from those in other sectors.

Type of taxpayer	Tax rate (%)
Resident companies	10
Non-resident companies	10
Transfer of shares in an oil and gas company or interest in production sharing contracts	40 to 50

Myanmar

Tax returns for capital gains must be filed within one month from the date of disposal of the capital assets. Capital gains tax payments are required to be made within one month from the date of disposal of the capital assets. The date of disposal refers to the date of execution of the deed of disposal or the date of delivery of the capital assets, whichever is earlier.

Registration taxes

There is a registration fee of MMK 1 million payable to the Directorate of Investment and Company Administration for setting up a company or a branch in Myanmar.

Payroll taxes

An employer is responsible for deducting income tax due from salaries at the time of payment to employees and must pay the amount within seven days from the date of deduction. If the employer fails to deduct and pay the tax, the employer is deemed to be a defaulter and held responsible for such payment. In addition, the employer is also responsible for filing the statement of annual salary within three months after the end of the income year, and failure to file by the stipulated deadline (i.e. 30 June every year) may result in a penalty of 10% of the amount of tax to be deducted on annual salaries.

Social security contributions

An employer with five or more employees is required to provide Social Security Scheme benefits to those workers, such as health and social care insurance and insurance against employment-related injuries.

The rates of contribution by employees and employers are 2% and 3% of the total salaries and wages, respectively. The contribution must be made in Myanmar kyats for all currencies that the salaries are paid in within 15 days of the following month, using the exchange rate prescribed by the Myanmar Foreign Trade Bank (MFTB) on the first day of the relevant month.

The maximum contribution is limited to MMK 9,000 by the employer and MMK 6,000 by the employee.

Contributions made by the employees are deductible for tax purposes in the hands of the employees. The employer is obligated to withhold the employees' contributions from their salaries.

Branch income

Generally, foreign branches are deemed to be non-resident companies. Non-resident companies are taxed only on income derived from sources within Myanmar. With effect from 1 April 2015, non-resident companies pay tax at the same rate as resident companies. This means a branch of a foreign company will pay tax at the 25% rate as opposed to the 35% rate chargeable in the past. The income is generally subject to tax under the normal rules for residents.

Income determination

Income is categorised as income from a profession, business, property, capital gains, other sources, and undisclosed sources, as well as income that has escaped tax assessment. Income from capital gains is assessed separately.

Tax is levied on total income, after the deduction of allowable expenditure and depreciation.

The Ministry of Finance, with the approval of the government, may, by notification, prescribe, amend, and add assessable income and rates of income tax.

Inventory valuation

There are no prescribed inventory valuation methods for tax purposes.

Capital gains

Income from capital gains is assessed separately. *See Capital gains tax in the Other taxes section for details.*

Dividend income

Myanmar has a one-tier corporate tax system, under which shares of profits received by a Myanmar taxpayer from an association of persons (i.e. partnerships, joint ventures, companies, etc.) are exempted from income tax.

Interest income

Interest income and income from movable property are treated as business income.

Partnership income

A partnership is taxed as an entity and not on the individual profit share of the partners. Partnership income is not taxed in the hands of the partners.

Foreign income

Resident companies are taxed on a worldwide basis, and, as such, income from sources outside Myanmar is taxable in Myanmar.

MFIL companies and non-resident companies are not taxed on their foreign income.

There is no deferral regime available to foreign income in Myanmar.

M

Deductions

In respect of business income, deductions are allowed for expenditure incurred for the purpose of earning income.

Non-deductible items include capital expenditure, personal expenditure, expenditure that is not commensurate with the volume of business, payments made to any member of an association of persons other than a company or a cooperative society, and inappropriate expenditure.

Depreciation and amortisation

Income from movable property is considered as business income, and depreciation allowance for the cost of such movable property can be deducted. Income from immovable property is generally computed in the same way as business income, except that no depreciation allowance can be deducted.

Technically, a taxpayer entity is required to claim tax depreciation on the qualifying assets used for its business purposes based on rates prescribed under the Myanmar Income Tax Law, using a prescribed tax depreciation claim form. A taxpayer is entitled to full year tax depreciation in the year the asset is acquired. On the other hand, no tax depreciation is allowed in the year the asset is disposed of.

With effect from 1 April 2016, the tax depreciation rates of fixed assets, as prescribed under the Amended Income Tax Regulations, are as follows:

- Buildings: 1.25% to 10%.
- Furniture and fittings installed in buildings: 5% to 10%.

Myanmar

- Machinery and plant: 5% to 10%.
- Various kinds of vehicles: 5% to 20%.
- Other fixed assets that are not prescribed: 5%.

Goodwill

There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of goodwill.

Start-up expenses

There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of start-up expenses. Generally, any operating expenses incurred before the commencement of business are not tax deductible. Myanmar tax authorities view pre-commencement expenses as capital in nature and not deductible for tax purposes. In current practice, capital expenditures incurred prior to the commencement of business should be allowed for tax depreciation where they relate to qualifying fixed assets.

Interest expenses

There is currently no specific provision in the Myanmar Income Tax Law indicating the tax treatment of interest expenses. In current practice, interest expenses and the related financing costs are likely deductible only in the year these expenses are incurred or paid, provided that the interest expenses incurred are commensurate with the volume of business or benefits that the taxpayer received. Interest expenses incurred before the commencement of business are not tax deductible or tax depreciable. Further, interest expenses on the loan in current practice should be deductible for Myanmar corporate income tax purposes when paid to the non-resident lender by a Myanmar corporate taxpayer only after the relevant WHTs on interest have been paid to the Myanmar tax authorities.

Bad debt

There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of bad debt.

Charitable contributions

Deductible charitable donations are limited to those made to the approved charitable organisations/activities and are subject to an overall limitation of 25% of total income.

Fines and penalties

Fines and penalties are generally not deductible as they are not incurred in the production of business income.

Taxes

There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of taxes paid.

Net operating losses

Ordinary losses

Losses from any source may be set off against income accruing from any other sources in that year, except where the loss is from capital assets or a share of loss from an association of persons. Losses that are not fully deducted in a year can be carried forward and set off against profits in the next three consecutive years.

There is no provision for the carrying back of losses.

Capital losses

Capital losses and a share of loss from an association of persons cannot be set off against income from other sources or carried forward.

Payments to foreign affiliates

A Myanmar corporation can claim a deduction for royalties, management service fees, and interest charges paid to affiliates, provided that these payments are commensurate with the volume of business.

Group taxation

There is no group taxation regime in Myanmar.

Transfer pricing regime

There are currently no transfer pricing rules in Myanmar.

Thin capitalisation rules

Generally, there is currently no specific safe harbour with respect to a debt-to-equity ratio in Myanmar. The Central Bank of Myanmar and the Myanmar tax authorities have recently indicated that Myanmar may introduce a debt-to-equity ratio in the near future. As of April 2016, there is no indicative timeline on when the ratio will be introduced.

Controlled foreign company (CFC) regime

There are currently no CFC rules in Myanmar.

Tax credits and incentives

Union of Myanmar Foreign Investment Law (MFIL) incentives

Under the new MFIL, companies registered under the MFIL that have obtained permits from the MIC are entitled to the following special benefits and tax incentives, which are granted at the MIC's discretion:

1. Exemption from income tax for up to five consecutive years for an enterprise. The exemption may be extended for a further reasonable period, depending on the success of the enterprise.
2. Exemption or relief from income tax on profits of a business that are maintained in a reserve fund and subsequently re-invested in Myanmar.
3. The right to deduct depreciation of machinery, equipment, building, or other capital assets used in the business at rates prescribed by the MIC.
4. Relief from income tax for up to 50% of the profits accrued from the export of manufactured goods.
5. The right to pay income tax on the income of foreigners at the rates applicable to citizens residing within the country.
6. The right to deduct from taxable income research and development (R&D) costs that are necessary for the country.
7. The right to carry forward tax losses for up to three consecutive years, provided the losses are sustained within two years from the end of the tax exemption in (1) above.
8. Exemption or relief from customs duty and/or other internal taxes on imported machinery, equipment, instruments, machinery components, spare parts, and materials used in the business, which are required for use during the period of construction.
9. Exemption or relief from customs duty or other internal taxes on imported raw materials for the first three years of commercial production following the completion of construction.
10. If the investor increases the amount of investment and expands the business within the approved timeframe, it may enjoy exemption and/or relief from customs duty or other internal taxes on machinery, equipment, instruments, machinery components, spare parts, and materials that are imported for the expansion of business.
11. Exemption from commercial tax on goods that are manufactured for export.

Myanmar

Except for item (1) above, the other exemptions and reliefs are subject to discretion of the MIC.

Special economic zones (SEZs)

In addition to foreign investment under the MFIL, foreign investors may invest under the Myanmar Special Economic Zone Law of 2014 (Myanmar SEZ Law).

The Myanmar SEZ Law is a basic law for any SEZ within Myanmar. The main regulatory body handling foreign investment under the Myanmar SEZ Law is the Central Body for the Myanmar SEZ.

The Myanmar SEZ Law contains provisions relating to the exempted zone, business promoted zone, other zone, exempted zone business, other business, developers and investors, exemptions and reliefs, restrictions, duties of developers or investors, land use, banks and finance management and insurance business, management and inspection of commodities by the customs department, quarantine, labour and guarantee of non-nationalisation, dispute resolution, WHT, bank and financial management and insurance business, etc.

Incentives under the Myanmar SEZ Law include:

For investors:

- Income tax holidays for the first seven years starting from the date of commercial operation in respect of those investment businesses operated in an exempted zone or exempted zone businesses.
- Income tax holidays for the first five years starting from the date of commercial operation in respect of those investment businesses operated in a business promoted zone or other business in a promoted zone.
- 50% income tax relief for the investment businesses operated in an exempted zone and a business promoted zone for the second five-year period.
- For the third five-year period, 50% income tax relief on the profits of the business if they are maintained for re-investment in a reserve fund and re-invested therein within one year after the reserve is made.
- Exemption on customs duty and other taxes for raw materials, machinery and equipment, and certain types of goods imported for investors in exempted zones; whereas, for investors in prompted zones, exemption on customs duty and other taxes for the first five years in respect of machinery and equipment imported that are required for construction starting from the date of commercial operation, followed by 50% relief of customs duty and other taxes for a further five years.
- Carry forward of loss for five years from the year the loss is sustained.

For developers:

- Income tax holidays for the first eight years starting from the date of commercial operation.
- 50% income tax relief for the second five-year period.
- For third five-year period, 50% income tax relief on the profits of the business if they are maintained for re-investment in a reserve fund and re-invested therein within one year after the reserve is made.
- Exemption on customs duty and other taxes for raw materials, machinery and equipment, and certain types of goods imported.
- Carry forward of loss for five years from the year the loss is sustained.

Land use may be granted under an initial lease of up to 50 years and renewable for a period of an additional 25 years. Developers/investors may rent, mortgage, or sell land and buildings to another person for investment purposes within the term granted with the approval of the management committee concerned.

Investors seeking to register an entity under the SEZ need to obtain an investment permit from the relevant SEZ Management Committee.

Foreign tax credit

There is no provision for unilateral relief. Relief may be available pursuant to a tax treaty, but the application of the tax treaties is at the sole discretion of the Ministry of Finance.

Withholding taxes

Any person making the following payments is required to withhold income tax at the time of payment at the rates listed below. The tax withheld must be paid to the Inland Revenue Department (IRD) within seven days from the date of withholding.

Tax withheld from payments to residents will be set off against the tax due on their final assessments. Tax withheld from payments to non-resident companies is a final tax.

The application of the tax treaties is at the sole discretion of the Ministry of Finance. In general, it is suggested by the Company Circle Tax Office (CCTO) under the IRD that enquiries be made with the CCTO before deducting WHT from payments made to non-resident companies from treaty countries listed below.

For payments for procurement made within the country and for services rendered, or under contracts or agreements or any other agreement made by a state organisation, local authorities, co-operatives, partnership companies, or entities formed under any existing laws, the WHT rates are 2% if the payment is made to a resident and 3.5% if it is made to a non-resident.

Recipient	Dividends (%) (1)	Interest (%)	Royalties (%)
Resident national or resident foreigner	0	0	15
Non-resident corporations and individuals:			
Non-treaty	0	15	20
Treaty:			
India	0	10 (2)	10
Korea, Republic of	0	10 (2)	10/15 (3)
Laos	0	10	10
Malaysia	0	10 (2)	10
Singapore	0	8/10 (2, 4)	10/15 (3)
Thailand	0	10 (2)	5/10/15 (5)
United Kingdom	0	Not covered	0 (6)
Vietnam	0	10 (2)	10

Notes

1. There is no WHT on dividends, branch profits, and share of profits of an association of persons that have been taxed.
2. Exempt if paid to the government.
3. Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
4. Lower rate if received by a bank or a financial institution.
5. The 5% rate applies for payments in connection with copyrights of literary, artistic, or scientific work, and the 10% rate applies to payments for services of a managerial or consultancy nature, and for information concerning industrial, commercial, or scientific experience.
6. Exempt if the amount is fair and reasonable.

Tax administration

Taxable period

The taxable period of a company is the same as its financial year (income year), which is from 1 April to 31 March. Income earned during the financial year is assessed to tax in the assessment year, which is the year following the financial year.

Tax returns

In general, annual income tax returns must be filed within three months from the end of the financial year, i.e. by 30 June of the financial year.

If a taxpayer discontinues one's business, returns must be filed within one month from the date of discontinuance of business. The failure of a taxpayer to file income tax returns, knowing that assessable income has been obtained, is deemed to have 'fraudulent intention'.

Payment of tax

Advance corporate tax payments are made in quarterly instalments before the end of the relevant quarter throughout the income tax year based on the estimated total income for the year. The advance payments and any taxes withheld are creditable against the final tax liability. The date for settling the final tax liability is specified in the notice of demand issued by the IRD.

Tax audit process

Under the Myanmar Income Tax Law, if it is found that there is a fraudulent intention to evade tax, the assessment or reassessment of income tax can be made at any time on the income that has escaped assessment of tax.

Failure by a taxpayer to file a return of income knowing that assessable income has been obtained, failure to comply with the notice of the IRD to submit accounts and documents, including the tax return and profit and loss accounts within the time prescribed, or submitting forged instruments and other documents are included within the meaning of fraudulent intention. If the tax authority in the course of investigation finds that a taxpayer has concealed income or particulars relating to income, the taxpayer may be permitted to fully disclose the facts within the specified time. In addition, the taxpayer must pay a penalty equal to 50% of the tax increased on account of the concealment. If the taxpayer fails to disclose the particulars within the specified time or discloses less than the income concealed, the taxpayer will also be subject to prosecution, in addition to paying the tax and penalty. If the taxpayer is found guilty, the taxpayer may be punishable with imprisonment for between three to ten years.

Statute of limitations

The statute of limitation to raise an assessment is three years after the financial year end. It does not apply in cases of fraudulent default. Mere filing of the income return and payment of advance tax in time does not constitute a final tax assessment.

Topics of focus for tax authorities

The following issues are currently being focused on by the tax authorities:

- Timely filing of tax returns and payment of taxes (i.e. corporate tax, commercial tax, and WHT).
- Stamp duty compliance (i.e. the application of the duty rates and timeliness of payment).
- Related-party transactions (e.g. payment of management fee to head office, shareholder loans).

Significant developments

2015 tax amendments

Income tax and value-added tax (VAT) amendments were enacted on 30 December 2015 and 29 December 2015, respectively, and entered into effect on those dates. The most significant amendments are listed below. *See the Taxes on corporate income section for more information.*

Corporate tax and withholding tax (WHT)

- Reduction of WHT rate on services from 25% to 10%.
- Non-mining corporate tax rate reduced from 33% to 32%, effective for financial years commencing on or after 1 January 2015.
- WHT on interest was introduced on cross-border loans and financing.
- WHT on royalties is now fixed at a rate of 10%.
- Taxability of disposal of oil and gas rights/licences (including the sale of shares in a company that owns such rights/licences).

Indirect taxes:

- The VAT threshold was increased to 500,000 Namibian dollars (NAD) *per annum*.
- Conditions and terms were introduced for allocation of import VAT (deferred payment) accounts.
- Introduction of mandatory security for import VAT accounts.

N

Taxes on corporate income

Namibia has a source-based tax system, which means that income from a source within Namibia or deemed to be within Namibia will be subject to tax in Namibia, unless a specific exemption is available.

Income earned by foreign companies from a source within or deemed to be within Namibia will be subject to tax in Namibia. In such cases, the foreign entity must determine whether it is obligated to register a local entity or branch. A foreign company is required to register a local company (local subsidiary) or an external company (branch) if it has established a place of business in Namibia.

In the event that Namibia has entered into a double tax agreement (DTA) with the country where the foreign company resides, such entity will only be taxable in Namibia if it has established a permanent establishment (PE) in Namibia. If a PE exists, only the portion of income attributable to the PE will be subject to tax in Namibia.

Non-residents who do not have a place of business in Namibia may, however, be subject to WHTs. *See the Withholding taxes section for more information.*

Namibia, Republic of

Calculation of taxable income

Gross income	The total amount, in cash or otherwise, received by or accrued to any person from a source within, or deemed to be within, Namibia, excluding receipts of a capital nature (provisions for specific inclusions in gross income and amounts deemed to be from a Namibian source exist).
Less: Exemptions	The Income Tax Act provides for certain amounts to be specifically exempt from tax.
Equals: Income	
Less: Deductions	Expenditures and losses actually incurred to generate income may be deducted, provided that these expenses are not of a capital nature.
	The Income Tax Act specifically provides for certain expenditures to be deductible and allows a deduction for capital allowances.
	Only expenses incurred to generate 'income' may be deducted. Expenses incurred to generate income exempt from tax are not deductible. Apportionment should be considered when expenses are incurred to generate both income and exempt income.
Equals: Taxable income	Taxable income is taxed at the corporate tax rate as set out under the tax rate section below.

Tax rates

The corporate tax rates are summarised below:

Entity	2015/16 tax rate (%)
Domestic companies and close corporations (excluding entities mentioned below)	32
Branches of foreign companies	32
Registered manufacturers (only applicable for the first ten years of registration)	18
Diamond mining companies and companies that render services to such companies in connection with diamond mining	55
Mining companies (other than diamond mining companies) and companies that render services to such companies in connection with mining	37.5
Long-term insurers (the rate is applied to gross investment income)	12.8
Petroleum income tax rate	35

Local income taxes

Namibia does not levy income taxes at the local, state, or provincial levels.

Corporate residence

The Namibian tax system is based on source and not on residency. Income derived or deemed to be derived from sources within Namibia are subject to tax.

The source is determined as the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Namibia, the source of income is deemed to arise in Namibia, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Namibia may, in the hands of a domestic company, be deemed to arise in Namibia and be taxed as such. Examples are interest and certain copyright royalties arising outside Namibia.

Permanent establishment (PE)

The term 'permanent establishment' is not defined or recognised in the Income Tax Act, but it is included in all DTAs concluded with Namibia.

A PE includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered.

Except for the PE concept embodied in the tax treaties and WHT on service provisions, corporate residence is of little tax significance since transactions are taxed on a source basis.

For the list of DTAs, please see the Withholding taxes section.

Other taxes

Value-added tax (VAT)

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Namibia that involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption in Namibia, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated).

Import VAT is payable on the greater of the free on board (FOB) value plus 10% or the market value. The payment may be deferred in terms of an import VAT account registered with the Directorate of Inland Revenue to the 20th day of the month following the month of importation. Penalties of 10% per month or part of a month and 20% interest on outstanding import VAT, according to the Customs Asycuda reports on import VAT account numbers, are levied by the Directorate of Inland Revenue.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard rated and zero-rated supplies) exceed NAD 500,000 in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may be deducted only as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due within 25 days following the month to which the VAT relates.

The Inland Revenue system automatically selects VAT periods for audits. An audit will focus on deposits made into bank statements and whether VAT was charged as required. It will also focus on whether tax invoices meet the criteria as set out in the VAT Act.

Customs and excise duties

Namibia is a member of the Southern African Customs Union (SACU), and customs duties are not levied on intra-SACU trade (i.e. between Botswana, Lesotho, Namibia, South Africa, and Swaziland).

Customs duties are payable according to the Common Customs Tariff of SACU on imports from outside SACU. Preferential duty rates apply on imports from Southern

Namibia, Republic of

African Development Community (SADC) countries, while goods may be imported free of customs duties from Zimbabwe in terms of the Namibia-Zimbabwe Free Trade Agreement.

Excise duties are levied on local production of excisable products (e.g. cigarettes, liquor, fuel) and are included on most excisable products imported from another SACU country in terms of the duty at source procedures. Identical excise duty rates are applied throughout the SACU. Importation of excisable products from outside the SACU is subject to customs duties and specific customs duties.

Current specific excise/customs duty rates for the above-mentioned products are as follows:

- Cigarettes: NAD 13.24/20 cigarettes.
- Beer: NAD 79.26/litre absolute alcohol (AA).
- Spirits (whisky, rum, brandy, gin, vodka, etc.): NAD 161.47/litre AA.
- Petrol: 3.909 cents/litre.
- Diesel and biodiesel: 3.817 cents/litre.
- Illuminating kerosene (paraffin): 3.817 cents/litre.

Ad valorem excise/customs duties are levied on certain products (e.g. motor vehicles, perfumes) in addition to the normal customs duties.

Ad valorem excise/customs duty rates are as follows for the above-mentioned goods:

- Motor vehicles: $([0.00003 \times A] - 0.75)\%$, with a maximum of 25%, where 'A' is the recommended retail price, exclusive of VAT.
- Perfumes: 7%.

Customs fuel levies are payable on petrol, diesel, and illuminating kerosene. The current customs fuel levies are as follows:

- Petrol: NAD 0.12/litre.
- Diesel: NAD 0.10/litre.
- Illuminating kerosene (paraffin): NAD 0.47/litre.

Fuel levies payable to the Namibian Road Fund Administration (RFA) may be claimed back for certain non-road operations (e.g. mining, farming, construction) under certain conditions (e.g. 81.7 Namibian cents of the current RFA fuel levy of 104 Namibian cents used in mining operations may be claimed back from the RFA).

Surety in the form of a provisional payment, bank, or insurance guarantee is required by Customs on most temporary imports to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs' bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

Namibia has introduced the AsycudaWorld customs clearing system, which is a web-based, Java-enabled system enabled at most points of entry. A few land border posts still need to be linked to the system during 2016.

Property taxes

Property taxes are levied by municipalities based on municipal valuations of properties.

Transfer duty

Transfer duty is payable at 12% of the acquisition value where property is acquired by non-natural persons (a sliding scale applies to property purchases by natural persons). While it is normally payable by the buyer, the agreement for the sale of the property may determine the person liable to pay these costs.

Amendments to the Transfer Duty Act were proposed to include transfer duty on the sales of shares/members interest in property/mining right-owning entities. These amendments have not been enacted or promulgated per the Government Gazette.

Stamp duty

Certain transactions may attract stamp duty. The amount of stamp duty payable differs and is based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

Transaction	Stamp duty
Agreements or contracts (other than those where duty is specifically provided for in the Act)	NAD 5
Lease agreement or lease	The stamp duty will be based on lease payments, together with additional considerations specified in the lease agreement
Transfer or issue of marketable securities and other share transactions	NAD 2 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction
Transfer deed relating to immovable property purchased	NAD 12 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction

Additional stamp duty of NAD 5 for every NAD 1,000 of debt secured is payable on the registration of a bond over immovable property.

N

Annual duty

Annual duty is levied in terms of the Companies Act at an amount of NAD 4 for every NAD 10,000 (or part thereof) of the issued share capital of a company, with a minimum duty of NAD 80 *per annum*. Issued share capital includes ordinary shares, share premium, and preference shares.

Since a branch does not issue share capital, the issued share capital of the head office will be used to calculate the annual duty payable in Namibia.

Employee taxes

Any remuneration paid by an employer to an employee will place an obligation on the employer to withhold employee taxes. The employee taxes are due on the 20th day of the month following the month during which the payment was made. *The tax tables applicable to individuals are provided in the Taxes on personal income section of Namibia's Individual tax summary at www.pwc.com/taxsummaries.*

Late payment of employee taxes will result in penalties of 10% per month and interest of 20% *per annum*. Both penalties and interest are limited to the amount of tax outstanding.

Social security contributions

Social security contributions are payable by the employer for employees working in Namibia. Social security is based on a principle of 50/50 contributions from employers and employees. It is calculated at 0.9% of earnings, with a minimum monthly contribution of NAD 2.70 and a maximum monthly contribution of NAD 81 each (i.e.

Namibia, Republic of

the total maximum monthly contribution of both the employer and the employee will amount to NAD 162).

Workmen's compensation

Under the Employees Compensation Act, employers are required to contribute to a fund that provides cash benefits for industrial injury, disability, and death. Contribution rates vary according to inherent occupational risk, from less than 1% in most low-risk commercial/administrative occupations to 8% for high-risk sectors (drilling, tunnelling, and rock-blasting). Employees whose annual remuneration exceeds NAD 81,300 are normally excluded from coverage.

Branch income

Branch income that is received or accrued from a source within, or deemed to be within, Namibia is taxable in Namibia based on the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may, therefore, not deduct fees paid to its foreign head office (unless a tax treaty provides for such a deduction), as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

Transfer pricing rules apply to transactions between a branch and cross-border related parties.

Income determination

Inventory valuation

Inventory is valued at cost for tax purposes in Namibia.

The last in first out (LIFO) basis of valuation is only accepted if:

- written consent was obtained from the Minister of Finance before such taxpayer renders one's income tax return for the first year of assessment for which the LIFO basis was adopted by the taxpayer, and
- various conditions are met by the taxpayer as determined by the Minister of Finance.

Capital gains

Other than profits on the sale of mining and petroleum licences/rights, and the transfer of any share/interest (whether directly or indirectly) in a company owning a mineral/petroleum licence or right, capital gains are not taxed in Namibia.

Mining and Petroleum licences/rights

The sale, donation, expropriation, cession, grant, or any other alienation or transfer of ownership of any share or member's interest in a company that holds a mineral or petroleum licence/right, whether directly or indirectly, has been included in the definition of gross income. The definition also specifically includes a sale of shares in a company for a licence or right to mine minerals or oil and gas in Namibia.

Dividend income

Dividends received are exempt from tax. Non-resident shareholders tax (NRST) should be withheld on dividends declared to non-resident shareholders. *For more information on NRST, see the Withholding taxes section.*

Interest income

Namibian companies are taxed on interest received from a Namibian source. Persons other than Namibian companies are subject to a final WHT on interest from banks and

unit trusts. Interest paid to non-residents is now subject to WHT on interest. *For more information, see the Withholding taxes section.*

Partnership income

The relevant partners of a partnership are regarded as the responsible taxpayers and not the partnership itself.

In practice, the assessment of a partnership is treated like that of a private business. The partnership is first treated as a business entity on its own in terms of income and expenditure. The profit or loss at the end of the year is then allocated to the individual partners. If they derived a profit from the partnership, it is added to their other non-partnership income; or if the partnership made a loss, the partners have the right to deduct it from their non-partnership income.

Rental income

Companies are taxed on rental income received from a Namibian source.

Royalty income

Companies are taxed on royalty income received from a Namibian source.

Foreign income

Corporate tax in Namibia is determined on the source basis; consequently, only income from a Namibian source or deemed Namibian source is subject to corporate tax.

Deductions

Capital allowances

The cost (including finance charges) of machinery, equipment, and other articles used by the taxpayer to generate income is deductible in three equal annual allowances. No apportionment is allowed where an asset is held for less than 12 months.

Buildings used by the taxpayer to generate income qualify for an initial allowance of 20% of erection costs in the year they are first brought into use. Thereafter, an annual allowance of 4% is deductible for the 20 following years. Additions to existing buildings (not alterations, improvements, or repairs) qualify for the same 20% and 4% deductions. Note that the allowance is calculated on the cost of erection and not the cost of acquisition. The allowance is also only calculated for a period of 21 years from the date of erection.

Registered manufacturers can claim 20% of the erection costs of the building in the year it is first brought into use, and 8% for ten years thereafter (*see Manufacturing in the Tax credits and incentives section*).

Mining exploration and initial development expenditure incurred before commencement of mining production are deductible in full in the first year that income is generated from the mine. Subsequent developmental expenditures are written off in three equal annual allowances.

Capital allowances may also be deducted with respect to patents, trademarks, leasehold improvements, etc.

A recovery or recapture of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recaptured by way of disposal, withdrawal from trade for non-trade purposes, or removal from Namibia. The recapture is calculated at the market value of the asset.

Namibia, Republic of

Goodwill

The amortisation of goodwill is not deductible for tax purposes and should be excluded from calculating taxable income.

Start-up expenses

Mining

The Income Tax Act allows exploration and initial development expenditure to be deducted in full during the year in which the mine commences with production. All exploration expenses incurred before the commencement of mining is therefore deferred until such time that the mine commences production.

All other industries

The general deduction formula determines that only expenses incurred in the production of income that are not of a capital nature may be claimed for tax purposes. The Income Tax Act defines income as 'income in any year or period of assessment'.

Interest expenses

A deduction is allowed in respect of financing expenditure incurred in respect of any financing agreement for the acquisition of fixed assets utilised in ordinary trade activities.

The general deduction formula determines that only expenses incurred in the production of taxable income that are not of a capital nature may be claimed for tax purposes. Therefore, where the interest can be argued to be incurred in the production of income, the interest expense will be deductible.

Thin capitalisation legislation may be applied to interest paid on cross-border, related-party loans (*see Thin capitalisation in the Group taxation section*).

Bad debt

The Income Tax Act allows a specific deduction for bad debts, provided that the amount written off was previously included in the taxpayer's income.

Charitable contributions/donations

A specific deduction for donations is allowed, provided that it is made to a registered welfare organisation or an approved educational institution. It is a further requirement that a certificate should be issued by the welfare organisation/educational institution in respect of the donation and submitted with the entity's tax return in order for it to qualify as a deduction. However, this allowance may not create or increase a tax loss.

Fines and penalties

In terms of practise applied by Inland Revenue, tax penalties and fines are not deductible for tax purposes.

Taxes

Taxes levied on income are not allowed as a deduction.

Net operating losses

Assessed tax losses may be carried forward indefinitely if the company continues the same trade. Tax laws do not allow losses to be transferred to other members of a group, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

If a company ceases to trade for a full fiscal year, its assessed losses are forfeited, regardless of subsequent activities. Assessed losses are also reduced in the event of a compromise agreement with creditors.

Namibian tax legislation does not provide for the carrying back of tax losses.

Payments to foreign affiliates

For information on payments to foreign affiliates, please refer to the Branch income section, Group taxation section, and Withholding taxes section.

Group taxation

No taxation of combined operations is allowed in Namibia where operations are conducted in a group.

Transfer pricing

Namibian transfer pricing legislation is aimed at enforcing the arm's-length principle in cross-border transactions carried out between connected persons. It is based on guidance set out by the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for multinational enterprises and tax administrations.

The objective of the transfer pricing legislation is to provide taxpayers with guidelines regarding the procedures to be followed in the determination of arm's-length prices, taking into account the Namibian business environment. It also sets out the Minister of Finance's views on documentation and other practical issues that are relevant in setting and reviewing transfer pricing in international agreements.

The transfer pricing legislation is essentially aimed at ensuring that cross-border transactions between companies operating in a multinational group are fairly priced and that profits are not stripped out of Namibia and taxed in lower tax jurisdictions. The legislation achieves this by giving the Minister of Finance (who essentially delegates to the Directorate of Inland Revenue) the power to adjust any non-market related prices charged or paid by Namibian entities in cross-border transactions with related parties to arm's-length prices and to tax the Namibian entity as if the transactions had been carried out at market-related prices.

In terms of the normal penalty provisions of the Income Tax Act, the Directorate of Inland Revenue may levy penalties of up to 200% on any amount of underpaid tax. Consequently, the Inland Revenue may invoke such provisions in the event that a taxpayer's taxable income is understated as a result of prices that were charged in affected transactions, which were not carried out at arm's length. Further, interest will be charged on the unpaid amounts at 20% *per annum*.

Thin capitalisation

The Minister of Finance may, if any amount of financial assistance provided by a foreign connected person is excessive in relation to a company's fixed capital (being share capital, share premium, accumulated profits, whether capital or not), disallow, for income tax purposes, the deduction of any interest or other charges payable by the Namibian person on the 'excessive portion' of the financial assistance provided by the foreigner.

There is no guidance that provides a definition for 'excessive'. Therefore, each case should be considered on the basis of the facts provided. The 3:1 ratio is applied by the Bank of Namibia for exchange control purposes, and this guideline is therefore deemed suitable until otherwise determined by Inland Revenue.

Controlled foreign companies (CFCs)

CFC rules are not applicable in Namibia.

Tax credits and incentives

Foreign tax credit

A tax credit may be claimed in Namibia for foreign taxes paid on dividends, royalties, and similar income, limited to the amount of tax payable in Namibia. Proof of the taxes paid in the foreign jurisdiction should be provided to Inland Revenue in order to claim the tax credit.

Manufacturing

The following is a high-level comparison of the different tax treatments for normal companies and registered manufacturing companies. This description does not consider the specific conditions that should be met in order for these incentives to be utilised.

Note that only the building allowance and preferential tax rate (*as set out below*) may create or increase a tax loss.

Building allowance

A building allowance is deductible with respect to buildings used for purposes of trade.

For normal companies, the allowance is calculated as 20% of the cost of erection in the year in which the building enters service and 4% during the 20 years that follow.

For registered manufacturing companies, the allowance is calculated as 20% of the cost of erection in the year in which the building enters service and 8% during the ten years that follow.

Employee allowances

For normal companies, expenditures for remuneration and training of employees are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of remuneration and training of employees that are directly engaged in the manufacturing process are deductible. However, this allowance may not create or increase a tax loss. Deductions sought for training should be approved by the government.

Export expenditure allowance

For normal companies, export expenditures incurred are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of costs incurred in an export country, in order to export Namibian manufactured goods to such country, may be deducted. However, this allowance may not create or increase a tax loss.

Export allowance

Any taxpayer (not required to be a registered manufacturer) that derives income from the export of goods manufactured in Namibia, excluding meat or fish, may deduct an export allowance equal to 80% of the taxable income derived from the export of manufactured goods.

Gross profit derived from the export of manufactured goods as a percentage of total gross profit should be used to determine the percentage of taxable income that is used to calculate the export allowance. However, this allowance may not create or increase a tax loss.

Transport allowance

For normal companies, land-based transport costs (i.e. transport by road or rail) are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of land-based transport cost in respect of material and components used in the manufacturing process or equipment imported for direct use in the manufacturing process may be deducted. However, this allowance may not create or increase a tax loss.

Preferential tax rate

For normal companies with a financial year commencing on or after 1 January 2015, the normal tax rate for companies other than mining companies or registered manufacturers is 32%.

The tax rate for a registered manufacturer for taxable income with respect to the manufacturing activity for which they are registered is 18%. This preferential rate is applicable for a period of ten years from registration as a manufacturer.

Export Processing Zones (EPZs)

In order to become an EPZ company, a particular entity must register with the EPZ governing body and obtain approval from Inland Revenue.

An EPZ company qualifies for the following benefits:

- The company is exempt from corporate tax.
- No VAT is payable on the sale of goods or services rendered in the zone.
- No VAT is payable on goods imported or manufactured in the zone.
- No customs or excise duty is payable on goods imported into the zone.
- No stamp duty or transfer duty is payable in relation to the transfer of movable or immovable property in the zone.
- A 75% refund of expenditures incurred in training Namibian citizens.
- Some of the provisions in the Labour Relations Act do not apply in the zone.

Enterprises must comply with the following requirements in order to qualify for EPZ status:

- Goods must be exported to countries other than countries in the SACU.
- Industrial employment must be created or increased.
- Namibia's export earnings must be increased as a result of manufactured goods exported.

EPZ companies may not be involved in retail business operations.

Withholding taxes

WHTs are applicable where certain payments are made to non-Namibian residents.

Dividends

Dividends declared by a Namibian company to a non-resident holding company are subject to NRST, a WHT. NRST is payable at the standard rate of 10% if at least 25% of shares are held in the Namibian company, unless DTA relief is available. Where less than 25% of shares are held in the Namibian company, the NRST payable is 20%, unless DTA relief is available.

NRST is payable within 20 days after declaration of a dividend.

Interest

A WHT of 10%, calculated on the gross amount of interest, is payable on interest accruing to any person, other than a Namibian company, from a registered Namibian banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Namibia, Republic of

Namibian companies, however, are taxed on interest at the corporate tax rate.

It is the obligation of the financial institution to withhold the tax and pay such tax to the revenue authorities.

WHT of 10% is payable on the interest accruing or paid to a non-resident company. The WHT is payable within 20 days after the interest payment was made. Interest is deemed to be paid on the earlier of the date on which the interest is paid or becomes due and payable.

Treaty relief may be available.

Royalties or similar payments

WHT on royalties are payable when a Namibian company pays a royalty to a non-resident. WHT is levied at a fixed rate of 10% and is payable within 20 days after the end of the month during which the liability for payment is incurred.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula, or process, or any other property or right of a similar nature. A royalty also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Namibia. The nature of fees payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty. It also include payments made for the use or right to use industrial, commercial, or scientific equipment (i.e. rentals).

Treaty relief may be available.

Services

Any Namibian resident paying a management, consultancy, entertainment, or directors fee to a non-resident must withhold tax at 10%.

Management and consulting fees are specifically defined as: "any amount payable for administrative, managerial, technical, or consultative services or any similar services, whether such services are of a professional nature or not".

A branch is specifically included in the definition of a resident.

The rate is subject to DTA relief, where applicable.

Summary of WHT payable

The WHT rates and treaty relief for Namibian DTAs can be summarised as follows. Note that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, interest, and royalties in the various treaties should also be considered.

Recipient	WHT (%)				
	Dividends	Interest	Royalties	Management, administrative, technical, and consulting fees	Directors fees
Non-treaty	10/20 (1)	10 (2)	10	10	10
Treaty:					
Botswana	10	10	10	10 (7)	10
France	5/15 (3)	10	10	0	10
Germany	10/15 (3)	0	10	0	10

India	10	10	10	10	10
Malaysia	5/10 (1)	10	5	5	10
Mauritius	5/10 (1)	10	5	0	10
Romania	10 to 15 (4)	10	5	0	10
Russian Federation	5/10 (5)	10	5	0	10
South Africa	5/15 (1)	10	10	0	10
Sweden	5/15 (3)	10	5	10 (7)	10
United Kingdom	5/10/15 (6)	N/A	5	0	10

Notes

1. Lower rate applies where at least 25% of shares are held in the Namibian company. Higher rate applies otherwise.
2. Namibian companies are taxed at the corporate tax rate on interest received.
3. Lower rate applies where at least 10% of shares are held in the Namibian company. Higher rate applies otherwise.
4. Rate depends on shareholding.
5. Lower rate applies where at least 25% of shares are held in the Namibian company and recipient directly invested at least 100,000 United States dollars (USD) in the equity capital of the company paying the dividend. Higher rate applies otherwise.
6. 5% where at least 50% of shares are held in the Namibian company. 10% where at least 25% of shares are held in the Namibian company. 15% otherwise.
7. Local rates are lower than the 15% rate per the treaty.

Mining royalties

The Minerals (Prospecting and Mining) Act levies a royalty on minerals won or mined by a licence holder in Namibia, based on the table below:

Group of minerals	Market value of minerals levied as a royalty (%)
Precious metals	3
Base and rare metals	3
Semi-precious stones	2
Nuclear fuel minerals	3
Industrial minerals	2
Non-nuclear fuel minerals	2
Oil and gas	5

Source: www.chamberofmines.org.na/index.php/mining-tax-regime

Tax administration

Taxable period

The tax year for companies and close corporations is aligned with the financial year.

Tax returns

The income tax return is due within seven months after the financial year-end of the company and can be extended to five months after the seventh month due date, provided that no other prior year income tax returns are outstanding.

Payment of tax

The first provisional payment for income tax is due within six months from the commencement of the company's financial year (at least 40% of tax payable at year-end is paid on first submission). The second provisional payment is due on/before the last day of the respective tax year (at least 80% of tax payable at year-end is paid on second submission). The final provisional payment is due within seven months after the financial year-end of the company.

WHT on dividends are due within 20 days after declaration of the dividend.

Namibia, Republic of

WHT on royalties or similar payments are due within 20 days after the end of the month during which the liability for payment of the royalty was incurred.

WHT on services is payable to Inland Revenue within 20 days after the end of the month during which the amount was deducted or withheld.

WHT on interest is due within 20 days after the end of the month during which the interest was paid. Interest is deemed to be paid on the earlier of actual payment or when the interest becomes due and payable.

It is advised that if relief is available under the DTA, a nil form should still be submitted when payment is made to non-residents. The amount of DTA relief claimed should be disclosed on the form submitted.

Penalties and interest

The penalties and interest due for late submissions and payments can be summarised as follows:

Tax area	Reason	Penalty	Interest (%)
1st provisional tax	Late submission	NAD 100 per day penalty for outstanding provisional tax returns	None
	Late payment	10% per month *	20 per annum *
	Under-estimation	Up to 100% of underpaid amount	None
2nd provisional tax	Late submission	NAD 100 per day penalty for outstanding provisional tax returns	None
	Late payment	10% per month *	20 per annum
	Under-estimation	Up to 100% of underpaid amount	None
Income tax return	Late submission	10% one-off penalty if taxes were paid late	None
	Late payment	Where tax return is submitted late, then 10% one-off penalty	20 per annum
	Omission/incorrect statement	Up to 200%	20 per annum
WHT	Late payment	10% per month *	20 per annum

* Both penalties and interest are limited to the amount of taxes outstanding.

Anti-avoidance

Note that the Income Tax Act, Act 24 of 1981, contains an anti-avoidance section, Section 95, which enables the Receiver of Revenue to disregard the implications of a transaction or scheme if it can be proven that:

- such transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
- such transaction or scheme was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, and
- such transaction or scheme was entered into or carried out solely or mainly for the purposes of the avoidance or the postponement of liability for the payment of any tax duty or levy.

The Receiver of Revenue can, at its sole discretion, impose Section 95 on any transaction or scheme, which will place the onus on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

Tax audit process

The tax audit process is a discretionary process instituted by Inland Revenue. Inland Revenue will inspect the validity of invoices and whether such expenses are deductible for tax purposes.

Generally, income tax audits are initiated on amounts being refunded to taxpayers, with the focus being on high-value refunds.

Subsequent to an audit, a letter will be sent to the taxpayer indicating changes made to the return of income.

In the event that the taxpayer agrees with the outcome, an assessment is issued. Where the taxpayer is not satisfied with the outcome, an objection may be lodged within 90 days.

Statute of limitations

There is no statute of limitation in respect of claiming a refund for excess income tax paid. Debts to the state prescribe after 30 years.

Topics of focus for tax authority

Topics of focus for the tax authority include import VAT, general compliance, the construction industry, and employee taxes.

Significant developments

The corporate tax system of the Netherlands contains a number of well-known features providing for an attractive investment climate, such as: the fiscal unity regime with tax consolidation for group companies, a full participation exemption for capital gains and dividends from qualifying participations, and several favourable tax regimes (e.g. for patent income, investment vehicles, and income from ocean shipping activities).

On 15 September 2015 (Budget Day), the Dutch Ministry of Finance published the 2016 Dutch Tax Package. The 2016 Dutch Tax Package has been reviewed and approved by the House of Representatives and by the Senate. It has been incorporated into Dutch law as of 1 January 2016.

One of the most important aspects of the Tax Package is the implementation of the recently approved amendments to the European Union's (EU's) Parent-Subsidiary Directive into national law. The amendments to the Directive include a new general anti-avoidance rule (GAAR) and the adoption of a specific clause to prevent double non-taxation as a result of mismatches in tax effects. The amendments to the Directive have been implemented into the Dutch tax system with effect as of 1 January 2016. All EU member states have had to implement this clause as of 1 January 2016. Therefore, similar rules now apply in the entire European Union.

The implementation of the GAAR resulted in only minor substantive changes to the Dutch corporate tax system. The participation exemption regime in the Dutch Corporate Income Tax (CIT) Act and the taxation of dividends in the Dividend Tax Act, as such, remain largely unaltered.

The wording of the substantial holding regime in the Dutch CIT Act has been adjusted slightly to reflect the wording of the GAAR of the Directive. Pursuant to the application of the substantial shareholding regime as it applies from 1 January 2016, an entity resident outside the Netherlands that holds a substantial shareholding (i.e. 5%) in a Dutch resident company will be subject to Dutch CIT if the holding is held with tax avoidance as one of the main purposes and without valid commercial reasons that reflect economic reality. These changes to the wording of the substantial holding regime, however, do not bring forth any significant changes in practice. Also, the wording of the Dividend Tax Act has been slightly amended to reflect the wording of the GAAR. Pursuant to the application of the legislative text as it applies per 1 January 2016, a co-op resident in the Netherlands is obligated to withhold dividend tax on dividends distributed to its members if tax avoidance is one of the main purposes of the arrangement and the arrangement has been put into place without valid commercial reasons that reflect economic reality. Valid commercial reasons may exist if the co-op has a sound economic relevance. Even though the phrasing of the law is changed to fit the GAAR, no significant changes in the current practice are intended in this respect.

In addition, the scope of the current minimal substance requirements has been broadened to include certain intermediate holding companies. In general, however, in this respect, no significant changes in the current practice have been intended.

The implementation of the new specific clause in the directive has led to an amendment of the participation exemption regime. The regime has been amended to include a specific phrase to prevent double non-taxation as a result of mismatches in tax effects. As of 1 January 2016, corporate taxpayers are ineligible to benefit from the operation of the participation exemption or participation credit for received distributed profits if and to the extent that such distributed profits are deductible by the subsidiary.

The 2016 Dutch Tax Package also included new obligations for transfer pricing documentation; it introduces a country-by-country (CbC) report, a master file, and a local file. In line with the Organisation for Economic Co-operation and Development's (OECD's) initiatives regarding base erosion and profit shifting (BEPS), this legislation aims to enable the Dutch tax authorities and other tax administrations to analyse potential transfer pricing risks and other risks that relate to calculating the tax base.

Further, the 2016 Dutch Tax Package included the introduction of a step-up in respect of cross-border mergers and demergers. The step-up should prevent profit reserves of foreign merging or demerging companies being brought under a Dutch dividend withholding tax (WHT) claim. It also included the obligation for foundations, associations, and government enterprises to pay tax on benefits from an interest as a limited partner in a limited partnership. Further, it introduced a reorganisation exemption for government enterprises.

On 16 September 2014, a proposal introducing CIT liability for public sector entities (public bodies or publicly owned entities) carrying out economic activities was published. The proposal contains a number of general exemptions that will apply for activities related to governmental tasks and activities. In addition, a number of specific exemptions for publicly funded education, academic hospitals, and seaports (with grandfathering rules) are included. The proposal is a reaction to the invitation of the European Commission (EC) to end the current system, which, according to the EC, is liable to have a distortive effect on the competition between public and private enterprises. The amendments have become effective as of 1 January 2016.

On 16 June 2014, the European Court of Justice (ECJ) decided that the Dutch fiscal unity regime violates EU law to the extent it denies a fiscal unity between a Dutch resident parent company and its Dutch resident subsidiaries because of a non-Dutch resident EU/European Economic Area (EEA) intermediary holding company and insofar as it disallows a fiscal unity between two Dutch resident 'sister' companies that are held through a joint non-Dutch resident EU/EEA parent company. In October 2015, a legislative proposal was published allowing a fiscal unity between Dutch entities that are linked through an EU/EEA entity. The proposal still has to be approved by the House of Representatives and by the Senate. In practise, it is already possible to request for such a fiscal unity based on a Decree by the State Secretary for Finance that was issued in December 2014.

In 2014, the EC opened an investigation to examine whether a specific, individual ruling issued by the Dutch tax authorities on the calculation of the taxable basis for CIT purposes complies with the EU rules on state aid. The EC has concluded that this ruling does, in fact, constitute state aid. The full decision and the arguments of the EC have not yet been published to the public. The Dutch Ministry of Finance has said that it does not agree with the EC's decision and will appeal.

It is expected that the EC may also investigate other tax rulings. However, the EC has explicitly stated that it does not expect to encounter systematic irregularities in Dutch tax rulings.

With respect to the current BEPS discussion, the Netherlands underlines the importance of addressing the issues through international cooperation.

Netherlands

Treaty developments

The Netherlands pursue an active tax treaty policy in order to maintain and extend its wide tax treaty network. Most Dutch bilateral tax treaties are based on the OECD Model Tax Convention. The Netherlands has concluded bilateral tax treaties for the avoidance of double taxation on income and capital (DTCs) with over 90 countries worldwide.

The new DTC with Germany, signed on 10 August 2012, entered into force on 1 January 2016.

Taxes on corporate income

In general, a Dutch resident company is subject to CIT on its worldwide income. However, certain income can be exempted or excluded from the tax base. Non-resident entities only have a limited tax liability with regard to income from Dutch sources.

Standard corporate income tax (CIT) rate

The standard CIT rate is 25%. There are two taxable income brackets. A lower rate of 20% applies to the first income bracket, for taxable income up to 200,000 euros (EUR).

Fiscal investment fund regime

In general terms, under the existing fiscal investment fund regime, the CIT rate for fiscal investment funds is 0%, provided that their profit is made available to the shareholders and holders of certificates of participation no later than eight months after year end.

Fiscal investment funds may also invest in real estate development (or redevelopment) activities, provided that these activities take place through a subsidiary subject to Dutch CIT and the development (or redevelopment) activities are exercised for the benefit of real estate that is (or will be) forming part of the fund's own portfolio, an affiliated fiscal investment fund's portfolio, the portfolio of a company in which the fund or the affiliated fund has a substantial interest, or for the benefit of the subsidiary's own portfolio ('project development' subsidiary). Fiscal investment funds that invest in real estate are allowed to hold a taxable subsidiary that provides customary services in relation to the real estate held by the Dutch real estate investment trust (REIT). Examples are conference facilities or the exploitation of an in-house restaurant.

Exempt investment fund regime

The exempt investment fund regime exists next to the fiscal investment fund regime described above. In accordance with the exempt investment fund regime, investment funds as defined in the Dutch Financial Supervision Act (*Wet op het financieel toezicht*) that meet certain conditions can request an exemption from CIT. Apart from the exempt status for CIT purposes, the exempt investment fund is not obligated to withhold dividend WHT with regard to profit distributions to its shareholders.

Innovation box regime

A special regime applies with respect to profits, including royalties, derived from a self-developed intangible asset (developed after 31 December 2006). In this so-called innovation box, the taxpayer may opt, under certain conditions, for the application of a lower effective rate on taxable profits derived from these intangible assets. The effective tax rate of the innovation box is 5%.

The innovation box is applicable if at least 30% of the profits have been originated by the patent. Companies that have incurred certain qualified research and development (R&D) costs for the development of intellectual property (IP) for which no patent was granted are also entitled to the favourable effective tax rate. This is subject to the condition that these qualified R&D assets became part of the company's assets after 31 December 2007.

The lower effective tax rate of 5% only applies to positive income, allowing innovation losses to be taken into account in full. It is also possible to include profits from an intangible asset derived in the period between the patent application and the granting of the patent in the innovation box regime (not for R&D assets).

The outcomes of the OECD/G20's BEPS project may influence the Dutch innovation box regime. It is expected that the innovation box regime will be brought in line with the modified nexus approach as developed as a minimum standard in that project. Concrete proposals have yet to be proposed.

Tonnage tax regime

In order to stimulate entrepreneurs engaged in ocean shipping, a favourable regime (known as the Dutch tonnage tax regime) may be available to certain shipping companies. Under this regime, the taxable profit of a sea-going vessel is based on its registered net tonnage multiplied by a fixed amount of deemed profit per ton instead of the actual profits from the exploitation. The regime only applies to the calculation of the profit related to the qualifying shipping activities. These activities include operating vessels in international traffic (including transportation for the purpose of the exploitation of natural resources at sea), cable and pipe-laying activities at the bottom of the sea, and towing and dredging and connected activities. The profits from the qualifying activities are taxed at a deemed tonnage profit according to a five bracket regressive scale system. The tonnage tax regime applies upon request and for a fixed period of ten years or multiples of the ten-year period.

Local income taxes

There are no provincial or municipal corporate income taxes in the Netherlands.

Corporate residence

In the Netherlands, corporate residence is determined by each corporation's facts and circumstances. Management and control are important factors in this respect. Companies incorporated under Dutch law are deemed to be residents of the Netherlands (although not with respect to certain provisions, such as the participation exemption and fiscal unity).

Permanent establishment (PE)

Non-resident companies that are neither incorporated nor effectively managed in the Netherlands are limited in their liability to tax in the Netherlands if they receive Dutch-source income. This could be, for instance, business income derived from a Dutch PE or permanent representative. The definition of a PE for Dutch tax purposes is largely inspired by the OECD Model Convention definition and commentary.

The concept of a PE is also of relevance for resident corporate taxpayers. The Netherlands provides international double taxation relief, amongst others, with respect to income attributable to business activities carried on through a PE abroad.

The outcomes of the OECD/G20's BEPS project may influence the definition of a PE to be included in new or newly renegotiated Dutch tax treaties. The Netherlands has announced that the outcomes of the final report on Action 7 ('Preventing the Artificial Avoidance of Permanent Establishment Status') have now become part of Netherlands' tax treaty policy.

Netherlands

Other taxes

Value-added tax (VAT)

VAT, known in Dutch as the *Belasting over de Toegevoegde Waarde* or BTW, is payable on sales of goods and on services rendered in the Netherlands as well as on the importation of goods and on the 'intra-European' acquisition of goods. There are three VAT rates, which are 21%, 6%, and 0%.

The main VAT rate is 21%.

The reduced 6% VAT rate is applicable on certain prime necessities (and also on certain energy-saving insulation activities on houses).

The special 0% VAT rate is applicable mainly to intra-EU supplies, exports, imports stored in bonded warehouses, services rendered in connection with the above, and certain other services.

The following are exempt from VAT:

- The supply of immovable property two years after putting it into use and lease. However, if the lessee's use of the immovable property is 90% or more for input VAT-deductible purposes, the lessor and lessee may opt to be subject to VAT on rent, in which case the lessor may deduct the VAT charged in respect of the property.
- Medical, cultural, social, and educational services.
- Services provided by banks and other financial institutions in connection with payment transactions and the granting of credit facilities.
- Insurance transactions.
- Transactions in shares.

Customs and excise tax

Many goods imported to the Netherlands from outside the European Union are subject to customs and excise duties. The tariffs and rates that apply to the different goods vary widely and change regularly.

An excise tax is levied on certain consumer goods (e.g. cigarettes, cigars, mineral oils, alcoholic products). If the goods are used solely as raw materials, no excise tax is levied. The excise tax is refundable if the article is exported.

Immovable property tax

Municipalities impose an annual immovable property tax on the owners of immovable property. The rates depend on the municipality. The taxable basis is the market value of the immovable property. Please note that the (assessment of the) value is also of importance for CIT, as depreciation might be limited based on this value (*see Limited depreciation of immovable property in the Deductions section*).

Transfer tax on immovable property

Acquisition of economic or legal ownership of immovable property in the Netherlands is subject to a 6% transfer tax on market value. Some exemptions are available. Real estate transfer tax on dwellings is 2%.

Transfer tax on acquisition of shares in a real estate entity

The acquisition of shares in an entity that owns real estate may also be subject to transfer tax if that entity is characterised as a so-called real estate entity. The threshold for qualifying as a real estate entity is met if more than 50% of the assets of the entity consist of real estate and at least 30% consist of Dutch immovable property.

Stamp duty

There are no stamp duties in the Netherlands.

Capital tax

The Netherlands do not levy capital tax on capital transactions (e.g. issue or increase capital).

Insurance tax

An insurance tax is payable on insurance premiums if the insured is a resident of the Netherlands or if the insured object is in the Netherlands. The insurance tax rate is 21%. Several exemptions are available (e.g. insurances of ships and aircraft operated in international traffic are exempt from insurance tax). In certain situations, an insurer outside the European Union may be required to take on a tax representative in the Netherlands.

Waste management contribution

Companies annually bringing 50,000 or more kilograms of packing material on the market must pay a 'waste management contribution' (*Afvalbeheersbijdrage*). The amount payable varies to the total weight and type of packaging. The contribution aims to cover the costs of recycling package materials.

Producers and importers of packaging expecting to exceed the threshold must register with the Packaging Waste Fund (*Afvalfonds Verpakkingen*) upfront. In the current year, they must file an estimation of the expected total volume of packing material. The contribution is then provisionally calculated. Before 1 April of the next calendar year, the actual amount and type of packaging must be reported. The actual contribution payable is recalculated accordingly.

Payroll taxes

Employers must withhold wage tax from the employee's gross salary and transfer the amount to the tax authorities. Employees may treat the withheld wage tax as an advance levy of income tax. The income tax due is settled with the withheld wage tax. *The tax tables applicable to individuals are provided in the Taxes on personal income section of the Netherlands' Individual tax summary at www.pwc.com/taxsummaries.*

Social security contributions

Employers must withhold national insurance contributions from the employee's salary at an aggregate rate of 28.15% calculated on the first EUR 33,715 of each employee's gross salary and transfer the amount to the tax authorities. The employer bears the burden of the employee's insurance contributions, which are also calculated by reference to the employee's salary. Under circumstances, it may be required to pay or withhold a contribution based on the Health Care Insurance Act.

Branch income

Rates for Dutch branch profits are the same as for other corporate profits, but no tax is withheld on transfers of profits to the head office. The tax base is, in principle, calculated on the same rules as for Dutch-resident companies.

Income determination

Inventory valuation

In general, stock/inventory is stated at the lower of cost or market value. Cost may be determined on the basis of first in first out (FIFO), last in first out (LIFO), base stock, or average cost. The LIFO system may be used for commercial/financial and tax purposes.

There is no requirement of conformity between commercial/financial and tax reporting.

Netherlands

Capital gains

Capital gains are taxed as ordinary income. However, capital gains realised on disposal of shares qualifying for the participation exemption are tax exempt (*see Dividend income below*).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired assets. Except in special circumstances, the reserve cannot be maintained for more than three consecutive years. If the reserve has not been fully applied after three years, the remainder will be liable to taxation.

Capital losses are deductible, unless attributable to the disposal of a shareholding qualifying for the participation exemption.

Dividend income

Subject to meeting the conditions for the participation exemption, a Dutch company or branch of a foreign company is exempt from Dutch tax on all benefits connected with a qualifying shareholding, including cash dividends, dividends in kind, bonus shares, hidden profit distributions, capital gains, and currency exchange results.

Participation exemption

The participation exemption will apply to a shareholding in a Dutch company if the holding is at least 5% of the investee's capital, provided the conditions are met.

As a general rule, the participation exemption is applicable as long as the participation is not held as a portfolio investment. The intention of the parent company, which can be based on particular facts and circumstances, is decisive. Regardless of the company's intention, the participation exemption also is applicable if the sufficient tax test (i.e. the income is subject to a real profit tax of at least 10%) or the asset test (i.e. the subsidiary's assets do not usually consist of more than 50% of portfolio investments) is met.

For portfolio investment participations not qualifying for the participation exemption, double taxation will be avoided by applying the tax credit method, unless the portfolio investment shareholding effectively is not subject to tax at all. For EU shareholdings, it is optional to credit the actual underlying tax.

On 15 September 2015, the Netherlands published a legislative proposal implementing the recent amendments to the EU's Parent-Subsidiary Directive. Because of this implementation, the participation exemption regime is amended to include a specific clause to prevent double non-taxation as a result of mismatches in tax effects. A corporate taxpayer will not be eligible for the participation exemption or participation credit for received distributed profits to the extent that such distributed profits are deductible by the subsidiary. The proposal was incorporated into Dutch law as of 1 January 2016. All EU member states have had to implement the changes by 1 January 2016. Therefore, similar rules apply throughout the European Union.

Dividends not qualifying under the participation exemption are taxable in full at the ordinary CIT rate.

Interests of 25% or more in a company of which the assets consist (nearly) exclusively of portfolio investments should be annually valued, as an asset, at the fair market value.

Costs related to the acquisition and disposal of a participation (e.g. legal fees, compensations, notary fees) are not deductible for corporate tax.

Losses arising from the liquidation of a (foreign) subsidiary are deductible for CIT, subject to certain conditions.

Note that a provision limits the deduction of excess interest on debts that are deemed to be related to the financing of participations (*see Anti-abuse rules regarding interest and loans in the Deductions section*).

Profits derived from a company that was created by converting a foreign PE only qualify for the participation exemption after they exceed the losses from the PE during the previous years insofar as those losses reduced the taxable profits in the Netherlands before 1 January 2012. Under certain circumstances, such as the alienation of (part of) the shares of the company, all non-recaptured losses will be added to the profits of the Dutch parent company at once. Note that the scope of these anti-abuse provisions has been extended by including situations in which a foreign intermediate holding company is interposed.

In April 2015, new legislation was adopted introducing the compartmentalisation doctrine, based on case law. The legislation has retroactive effect to 14 June 2013. Based on the compartmentalisation doctrine, a taxpayer that derives income from a participation that first qualified but at a certain point in time no longer qualifies for the participation exemption, or *vice versa*, must attribute the income to the taxable and the tax-exempt period accordingly. The legislation applies to all changes in the application of the participation exemption regime irrespective of whether caused by a change in facts and circumstances or change in legislation. It applies to both capital gains and dividend distributions. Changes that occurred before 14 June 2013 are affected. However, if in favour of the taxpayer, changes caused by modification of legislation before 1 January 2007 are not taken into account. In April 2015, the Dutch State Secretary for Finance announced its willingness to limit the retroactive effects in such cases.

Stock dividends

Stock dividends are taxed as dividend income to the extent that they are paid out of earned surplus. They are not taxable if paid out of share premium ('*agio*'), provided the share premium account was not created pursuant to a share-for-share merger, in which only Dutch companies were involved. In the case of a share-for-share merger, in which shares in foreign subsidiaries were contributed to a Dutch company, the Dutch company can distribute the difference between the fair market value and the paid-in capital of the subsidiaries being contributed as a stock dividend without triggering Dutch dividend WHT (step-up in basis), provided certain requirements are met.

Work in progress

Profits with regard to work in progress should be accounted before actual completion, to the extent that the work is completed. All project costs should be recognised in the year the costs occurred.

Foreign income

In general, a Dutch resident company is subject to CIT on its worldwide income. However, certain income can be exempted (e.g. due to the application of the participation exemption described above) or excluded from the tax base.

Certain foreign-sourced income (foreign branch income, real estate income, and other income) is 'excluded' from the Dutch taxable base. The so-called 'object exemption', a method to provide relief for international juridical double taxation in situations of Dutch companies with a PE abroad, is designed as a tax base adjustment instead of a real exemption. Consequently, losses of foreign PEs can no longer be offset against profits of the Dutch head office (except for final losses), but currency exchange results are still included in the tax base. Also, if the foreign activities cease, any losses upon 'liquidation' can, in principle, be deducted. For certain low-taxed passive PEs, the object exemption is replaced by a credit system.

Double taxation of foreign dividends, interest, and royalties is relieved by a tax credit provided by Dutch tax treaties or unilaterally if the payer of the income streams is

Netherlands

a resident of a developing country designated by Ministerial Order. If no treaty or unilateral relief applies, a deduction of the foreign tax paid is allowed in computing the net taxable income.

However, relief by exemption is given for dividends from foreign investments qualifying for the participation exemption, as discussed above. In that case, there is no Dutch tax to credit against taxes withheld in the subsidiary's country of residence.

In most circumstances, the foreign dividend is exempt for Dutch CIT under the participation exemption, as previously discussed. As a consequence, foreign WHT cannot be credited, and the WHT constitutes a real cost for the companies concerned. A credit of the foreign WHT is granted against Dutch dividend WHT due on the distribution to foreign parents of the Dutch company. The credit amounts to a maximum of 3% of the gross dividend paid, to the extent that it can be paid out of foreign-source dividends received that have been subject to at least a 5% WHT and the foreign company is liable for CIT. This tax credit does not result in taxable income for CIT purposes.

Deductions

Depreciation, amortisation, and depletion

Generally, depreciation may be computed by a straight-line or a reducing-balance method or, in accordance with any other sound business practice, on the basis of historical cost. Depreciation is applied from the date the asset comes into use. Dutch tax law includes specific rules (*see below*) that potentially limit the depreciation of assets (e.g. immovable property, goodwill, and other fixed assets).

A depletion allowance for natural resources may be granted for tax purposes, when it conforms to sound business practice and is appropriate for accounting purposes.

Limited depreciation of immovable property

There are special provisions for depreciation of immovable property. A distinction is made between immovable property held for investment purposes and buildings used in a trade or business.

Investment property cannot be depreciated to an amount lower than the official property's fair market value for tax purposes, which is known as *WOZ-waarde*. In other words, a property will not be subject to depreciation unless the carrying amount of the building and the land on which it is located is higher than its value for tax purposes. This value is determined by the municipal tax authorities annually. As this value is based on the assumption that the property is free of lease, the value for tax purposes of commercial real estate may be lower than fair market value.

Alternatively, the depreciation of buildings employed in a trade or business is limited to 50% of the property's value for tax purposes. It should still be possible to value immovable property at fair market value if this is demonstrably lower than the current book value. In addition, anti-abuse measures apply to prevent the division of land and buildings into separate legal entities or to related individuals.

Note that maintenance costs continue to qualify for tax relief and any maintenance-related value increase does not lead to a compulsory upward revaluation of the property. Moreover, a property is not required to be revaluated as its value increases due to market developments.

Depreciation of land is not permitted.

The sale of depreciated assets triggers tax on the difference between the sale price and the depreciated book value unless a reinvestment reserve is set up (*see Capital gains in the Income determination section*).

Limited amortisation of goodwill and depreciation of fixed assets

With regard to goodwill, the amortisation for tax purposes is limited to 10% of the purchase price per annum. Furthermore, the tax depreciation of other fixed assets (i.e. inventory, equipment) is limited to 20% of the purchase price or production costs *per annum*.

Accelerated depreciation

The law provides accelerated depreciation of several specific assets. Accelerated depreciation applies to investments in assets that are in the interest of the protection of the environment in the Netherlands and that appear on the so-called VAMIL (*Vervroegde Afschrijving Milieu-investeringen*) list. From 2011, the accelerated depreciation facility for investments in environment-improving assets is limited to 75% of the total (investment) costs. Prior to 2011, 100% of the investment costs were eligible for the facility.

Accelerated depreciation also is available for certain other designated assets (e.g. investments of starting entrepreneurs).

Also eligible for accelerated depreciation are certain investment made in new business assets in 2009, 2010, and 2011 and between 1 July 2013 and 31 December 2013. Certain conditions apply. Investment costs minus residual value of sea-vessels that are operated mainly from the Netherlands may be depreciated straight-line over five years. Instead of accelerated depreciation, these taxpayers may choose immediate taxation (*see Tonnage tax regime in the Taxes on corporate income section*).

Anti-abuse rules regarding interest and loans

Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction as well as the loan, or of taxation of the interest in the hands of the recipient at an effective tax rate that is considered adequate by Dutch standards, the interest may be deductible.

Furthermore, interest paid on certain profit participating loans will be qualified as a dividend and will not be tax deductible. Interest received upon these loans may meet the definitions for the participation exemption if the creditor also holds a qualifying participation in the debtor. Intra-group conduits may be denied a credit of foreign WHT with respect to royalties or interest received if no economic risk is deployed.

If the interest payment to a group company relates to a loan that is directly or indirectly granted by a group company in order to finance an acquisition or capital contribution, the interest will be deductible only if the loan and the underlying transaction are based predominantly on sound business considerations or if the interest received is effectively and sufficiently taxed by Dutch standards.

When the debt ultimately is financed externally (outside the group) and a direct relationship exists between the internal debt and the ultimate external financing, it can be substantiated that there are sound business reasons for the loan. Furthermore, the use of tax losses or similar relief claims by the recipient of the inter-company interest may adversely affect the deductibility of the interest paid. Also, the law states that the interest deduction related to indebted dividend distributions, paid back capital, and capital contributions is not only possible in case of sound business reasons but also if the interest is taxed in the hands of the creditor at an effective tax rate that is considered adequate by Dutch standards. The latter requirement means that the interest needs to be subject to an effective tax rate of at least 10% over taxable profits determined according

Netherlands

to Dutch standards. For the determination of 'a taxable base according to Dutch tax standards', the tax base limitation for the innovation box is not taken into account.

If the taxpayer makes a reasonable case that the interest is taxable at an effective tax rate of at least 10%, the tax authorities, nevertheless, have the option to substantiate that either the liability or the corresponding transaction is not based on sound business reasons. The tax authorities also have the option to substantiate that the liability is incurred in order to compensate losses or other rights that were formed in that year or that will be formed shortly thereafter. This is also applicable to existing loans.

In addition, the deduction of interest (including costs and currency exchange results) on excess acquisition debt is restricted if the acquired company subsequently joins a Dutch fiscal unity with the taxpayer. The acquisition debt is considered excessive in so far as it exceeds 60% of the acquisition price. The interest expenses may only be deducted from the acquiring company's 'own profits', meaning that the profits of the target company that was added to the fiscal unity are not taken into consideration. The restriction is not applicable if the interest on the debt does not exceed EUR 1 million. Contrary to the other existing interest deduction restrictions illustrated above, this measure also relates to interest on loans obtained from third parties.

Furthermore, a provision limits the deduction of excess interest on debts that are deemed to be related to the financing of participations. Under this rule, the taxpayer is deemed to have debt relating to the financing of participations to the extent that the average cost price of its participations exceeds its average equity. This is a mathematical test. However, a few exceptions apply. For example, the cost prices of the participations that at the time of the initial acquisition led to an extension of the operational activities of the group are not taken into account for the purpose of the mathematical test. The 'participation debt' calculated may consist of both loans from affiliated and third parties. The interest on the deemed participation debt is not deductible to the extent the amount of the interest exceeds EUR 750,000. The provision for excessive participation interest also contains a number of specific anti-abuse measures.

Provision for bad debt

It is possible to make a provision for future expenses with a cause existing on the balance sheet of the tax year in question. Therefore, a provision may be made for bad debts.

Charitable contributions

Charitable contributions are deductible if certain conditions are met. The gift must be documented in writing and contributed to a qualifying charity (ANBI or SBBI). The deductible amount may not exceed 50% of the taxable profits, with a maximum of EUR 100,000.

Limited deductibility of costs relating to remuneration by way of shares

Any remunerations by way of shares, profit-sharing certificates, option rights on shares, or similar rights are not deductible. However, grandfathering rules exist for situations where option rights have been granted to employees before 24 May 2006.

Costs related to so-called stock appreciation rights for employees that earn an income that exceeds EUR 500,000 are not deductible.

Fines and penalties

Most criminal fines and tax penalties are not tax deductible. This applies, for instance, to fines imposed by a Dutch criminal judge, administrative fines, disciplinary fines, and penalties from a European institution.

Taxes

Certain taxes, such as the tax on insurance transactions, are deductible. Tax paid on the transfer of immovable property must be included in the cost price and taken into account in the course of normal depreciation. The CIT itself is not deductible.

Other significant items

Deduction of certain expenses (e.g. costs for food, drink, and entertainment) paid by employers for employees are not deductible, in part. These costs are often referred to as mixed costs. The non-deductible portion is 0.4% of the total taxable wages of all employees but never less than EUR 4,400 per year. Alternatively, the employer may choose to deduct only 73.5% of the actual expenses.

Net operating losses

Tax losses can be carried back one year and carried forward nine years. This also applies to start-up losses.

With regard to losses arising in the years 2009, 2010, and 2011, corporate taxpayers may opt for a temporary extension of the carryback period for losses from one to three years. This option, however, also means that the maximum period for loss carryforward will be limited to six years (instead of nine). Furthermore, the extended measure is limited to EUR 10 million loss carryback per extra year.

Complex rules may prohibit the utilisation of net operating losses after a change of 30% or more of the ultimate control in a company. Furthermore, limitations exist on loss utilisation for holding/finance companies. Based on these rules, losses incurred by a mere holding or group finance company can be offset only against holding or finance income in preceding and following years, provided that certain strict conditions are met. These conditions are meant to counter tax planning, whereby the Dutch company concerned acquires (e.g. by way of equity contribution or exchange) other assets that enhance its income streams and its capacity to make use of the losses. Companies carrying out significant other activities (with 25 or more full-time employees) are, in principle, unaffected by these loss relief restrictions.

N

Payments to foreign affiliates

A Dutch corporation generally can claim a deduction for royalties, management service fees, and most other charges paid to foreign affiliates, to the extent that the amounts are not in excess of what it would pay an unrelated entity (i.e. arm's-length principle). Dutch companies are obligated to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices.

Group taxation

Fiscal unity regime

A Dutch-resident parent company and its Dutch-resident subsidiaries (if the parent owns at least 95% of the shares) may, under certain conditions, file a tax return as one entity (fiscal unity). Group taxation is available for companies having their place of effective management in the Netherlands, both for Dutch tax and treaty purposes.

The main feature of the fiscal unity is that profits of one company can be offset against losses of another company forming part of that fiscal unity. Furthermore, inter-company transactions are eliminated.

In February 2010, the ECJ decided that the Dutch fiscal unity regime does not violate EU law (the freedom of establishment), insofar as it disallows a cross-border fiscal unity. However, the ECJ has not yet explicitly dealt with the effects of the fiscal unity regime, other than cross-border loss utilisation, such as the transfer of assets between group

Netherlands

companies without immediate taxation and the use of 'final losses'. The Dutch Supreme Court will possibly deal with those issues at a later stage.

On 16 June 2014, the ECJ decided that the Dutch fiscal unity regime does violate EU law to the extent it denies a fiscal unity between a Dutch resident parent company and its Dutch resident subsidiaries because of a non-Dutch resident EU/EEA intermediary holding company and insofar as it disallows a fiscal unity between two Dutch resident 'sister' companies that are held by a non-Dutch EU/EEA parent company.

In October 2015, a legislative proposal was published allowing a fiscal unity between Dutch entities that are linked through an EU/EEA entity. It is not yet clear when the legislative proposal will become effective. In practise, it is already possible to request for such a fiscal unity based on a Decree by the State Secretary for Finance that was issued in December 2014.

Transfer pricing rules

Based on a general transfer pricing provision in the corporation tax law, all transactions between related parties must be at arm's length. Furthermore, a specific transfer pricing provision exists with respect to the transactions of an interest and royalty conduit company. Dutch companies are obligated to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices. If a transaction between related parties is not at arm's length, the taxable income may be corrected by the tax authorities. Moreover, transactions that do not meet the arm's-length test may constitute a contribution of informal capital or a hidden profit distribution.

On the basis of a decree of the State Secretary for Finance regarding transfer pricing, companies may request an advance tax ruling (ATR) and an advance pricing agreement (APA). An ATR may be requested on the classification of activities and an APA may be required on the classification of activities and the arm's-length character of the transfer price.

As of 1 January 2016, the Netherlands implemented the OECD outcomes in the area of country-by-country (CbC) reporting. The new documentation obligations include the requirement for eligible taxpayers to produce a CbC report, a master file, and a local file.

Thin capitalisation

There are currently no thin capitalisation rules in the Netherlands.

Controlled foreign companies (CFCs)

Dutch tax law does not provide for specific legislation regarding CFCs. However, interests of 25% or more in a company of which the assets consist (nearly) exclusively of low-taxed portfolio investments should be annually valued, as an asset, at the fair market value. The participation exemption is not applicable to portfolio investment participations unless these participations are qualifying portfolio investment participations for the participation exemption. A portfolio investment participation can only qualify for the participation exemption if either the intention of holding the participation is not an investment intention or if the participation is, in itself, either subject to sufficient tax or if the participation holds sufficient qualifying assets. This rule prevents shareholders of low taxed portfolio investment participations from benefiting from the Dutch participation exemption because dividends not qualifying under the participation exemption are taxable in full at the ordinary CIT rate. Double taxation is avoided by applying the tax credit method, unless the portfolio investment shareholding effectively is not subject to tax at all. For EU shareholdings, it is optional to credit the actual underlying tax.

Tax credits and incentives

Foreign tax credit

See *Foreign income in the Income determination section* for a description of the foreign tax credit regime.

Small investments

There is a system of deductions for small investments, the so-called small scale investment deduction. To calculate this annual deduction, investments of more than EUR 450 each are totalled to determine the percentage of the deduction.

Total of investments (EUR)	Deduction
0 to 2,300	0
2,301 to 56,024	28% of the value of the total of small investments
56,025 to 103,748	EUR 15,687
103,749 to 311,242	EUR 15,687 minus 7.56% of the amount exceeding EUR 103,748
Above 311,242	No deduction

Investments in energy-efficient assets

For investments in new energy-efficient business assets that meet the Energy List requirements, an additional deduction (EIA) from corporate income is available. The minimum investment amount per asset is EUR 2,500. The allowance equals 58% of the annual amount, with a maximum of EUR 118 million, of eligible energy investments. The right to the EIA is declared with the tax return, provided the investment is reported previously in good time to the Netherlands Enterprise Agency (www.rvo.nl). An investment can be reported in phases, but the minimum amount for notification is EUR 2,500.

Investments in environmental assets

For investments in certain new environmental improving assets that meet the Environment List requirements, an additional deduction (MIA) from corporate income is available. The minimum investment amount per asset is EUR 2,500. The allowance equals 36%, 27%, or 13.5% (depending on the ministerial classification of the assets) of the annual amount, with a maximum of EUR 25 million, of eligible environmental investments. The right to the MIA is declared with the tax return, provided the investment is reported previously in good time to the Netherlands Enterprise Agency. An investment can be reported in phases, but the minimum amount for notification is EUR 2,500.

New technology

Wage costs

Conducting certain R&D activities on applied new technology is subsidised by a reduction of wage tax to be paid on wages of employees engaged in R&D of technologically new products. The subsidy accrues to the employer when the employee is credited for the normal amount of wage tax. The subsidy is based on specific legislation (WBSO).

To obtain the relief under the R&D incentive programme, taxpayers must file an electronic/online application with the Netherlands Enterprise Agency. The taxpayer will receive an R&D declaration. The budget for this subsidy is fixed, so the amount of the subsidy is dependent on budget availability. Note that self-developed and utilised software falls within the scope of the R&D incentive under certain conditions.

As of 1 January 2016, the WBSO application for R&D includes not only salary costs but also other costs and expenses related to R&D. The benefit of the fiscal scheme is awarded in the form of a wage tax reduction. The benefit amounts to 32% of the first

Netherlands

EUR 350,000 of R&D costs (both salary and other costs and expenses). For start-ups, this amounts to 40%. For R&D costs above EUR 350,000, this amounts to 16%. The current limit is abolished. However, the maximum benefit cannot exceed the total amount of wage tax due. Instead of applying for the real costs and expenses (non-salary costs), the taxpayer may choose to take into account a fixed amount based on R&D hours. The fixed amount is EUR 10 per hour as long as the total R&D hours do not exceed 1,800 and EUR 4 for every hour above.

Withholding taxes

Dividends from Dutch corporations are generally subject to a 15% Dutch dividend WHT. In general, this does not apply to the Dutch cooperative (i.e. 'co-op') in a business driven structure, a widely used vehicle for holding and financing activities.

The Netherlands does not levy a WHT on interest and royalty payments.

Domestic corporations are required to withhold taxes as follows:

Recipient	Dividends (%) (1)
Resident corporations	0/15
Resident individuals	15
Non-resident corporations and individuals:	
Non-treaty situations	15
Treaty:	
Albania	0/5/15 (30)

Notes

1. A 0% WHT rate applies to payments to a resident corporation when its shareholding qualifies for the participation exemption and the shares form part of a company whose activities are carried on in the Netherlands. However, dividend WHT may be levied on certain profit participating loans.
2. The lower rate applies if the foreign company directly owns at least 25% of the capital of the Dutch company.
3. The 5% rate is applicable if the foreign company directly owns 10% of capital of the Dutch company. The 0% rate is applicable if the dividend originates from ordinary taxed profits and the dividend is tax exempt in the hands of the recipient.
4. Based upon the treaty concluded with former Yugoslavia.
5. Negotiations on (revisions of) tax treaties are currently pending with Angola, Aruba Australia, Belgium, Brazil, Chile, Colombia, Costa Rica, Curaçao, France, Indonesia, Kenya, New Zealand, Poland, Saint Martin, Singapore, Slovak Republic, and Spain. The new or revised treaties with the Czech Republic and Ethiopia are signed but not yet effective.
6. Indicates that this country is a member state of the European Union. The EU Parent/Subsidiary Directive applies from 1 January 1992. According to the Directive, dividends paid by a Dutch company (BV or NV) to a qualifying parent company resident in another EU member state must be exempt from Dutch WHT, provided certain conditions are met. Among other things, the EU parent company must hold at least 10% of the Dutch dividend-paying company's capital (or, in certain cases, voting rights) for a continuous period of at least one year. Please note that the Dutch tax legislation is more lenient with respect to the minimum holding; it only requires a holding of 5% at the moment of distribution. A provisional exemption from dividend WHT will apply from the start of the one-year holding period. The exemption will be cancelled retroactively if, following the dividend distribution, the one-year holding requirement is not actually met. The Dutch dividend-distributing company must provide to the Dutch tax authorities a satisfactory guarantee for the payment of dividend WHT that, but for the provisional exemption, would be due. The exemption is also applicable if the parent company is a resident of a EU member state and owns at least 10% of the (voting) shares in the Dutch company but only on the basis of reciprocity (Finland, Germany, Greece, Luxembourg, Spain, and United Kingdom). Should the WHT exemption not be available under the EU Parent/Subsidiary Directive, the treaty rate(s) set out in the right-hand side of the same column (following 'or') will apply.
7. The lower rate applies if the foreign company directly or indirectly owns at least 25% of the capital of the Dutch company.
8. The lower rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company.
9. The 0% rate applies if the foreign company directly owns at least 50% of the capital of the Dutch company, or invested more than EUR 250,000 in the Dutch company or directly owns 25% of the capital of the Dutch company and has a statement indicating that the investment in Dutch capital is, directly or indirectly, guaranteed by the government of Belarus.
10. The 5% rate applies if the foreign company directly or indirectly owns at least 25% of the capital or at least 10% of the voting rights in the Dutch company.
11. The treaty is not applicable for Hong Kong and Taiwan.
12. The 5% of rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the payer company. The 10% rate applies if the beneficial owner is a pension fund that is resident in the Netherlands. The 15% rate applies in other cases.
13. The lower rate applies if the foreign company owns at least 25% of the voting rights in the Dutch company.

14. The 5% rate is applicable if the Italian company owns at least 50% of the voting shares in the Dutch company for a continuous period of at least 12 months prior to the date chosen for distribution of a dividend. The 10% rate is applicable if the Italian company owns at least 10% of the voting shares in the Dutch company for the continuous period mentioned above. In other cases, the dividend WHT rate is 15%.
15. The 5% rate applies if the foreign company owns at least 10% of the voting shares of the Dutch company for a continuous period of at least six months immediately before the end of the book year to which the dividend distribution relates. No WHT is levied if the foreign company directly or indirectly owns at least 50% of the voting power in the Dutch company distributing the dividends for a period of six months. Also, no WHT is levied if the foreign company is a pension fund.
16. The lower rate applies if the foreign company directly or indirectly owns at least 10% of the capital of the Dutch company.
17. The 0% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company or if it has invested more than 1 million United States dollars (USD) in the Dutch company, insofar as the government of Kazakhstan has guaranteed the investment; the 5% rate applies if the recipient company owns at least 10% of the capital of the paying company.
18. These rates do not apply to dividend payments to Luxembourg '1929' holding companies.
19. In April 2015, the Netherlands signed into a new treaty with Malawi. In the new treaty, a 0% rate is only applicable to certain pension funds. The 5% rate is applicable only to shareholdings of at least 10%.
20. The 0% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company and invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company directly owns 25% or more of the capital of the Dutch company. The 15% rate is applicable on portfolio investments.
21. The rate is 15% unless the dividend is paid to a company holding at least 25% of the paid-up capital in the Dutch company. In this latter case, the WHT rate will be reduced to: (i) 5% if the dividends received are subject to a profits tax in the other state of at least 5.5% on the dividend or (ii) 7.5% if the profits tax is less than 5.5%. The combined CIT of the other state and Dutch dividend WHT for participations of at least 25% must not exceed 8.3%. Depending on the tax percentage levied in the other state, the Dutch dividend WHT will be restituted accordingly.
22. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns 10% of the capital of the Dutch company. The 0% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% of the capital of the Dutch company.
23. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% in the capital of the Dutch company with a minimum investment of at least EUR 75,000.
24. The Netherlands applies the treaty with the former Soviet Union unilaterally to Kyrgyzstan, Tajikistan, and Turkmenistan.
25. The lower treaty rate applies if the Spanish company owns 50% or more of the capital of the Dutch company or if the Spanish company owns 25% or more of the capital of the Dutch company and another Spanish company also owns 25% or more of that capital.
26. The 0% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company or invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company directly owns 20% or more of the capital of the Dutch company.
27. The lower rate applies if the foreign company directly owns at least 10% of the voting rights in the Dutch company. On 8 March 2004, the Netherlands and the United States signed a protocol amending the applicable tax treaty. Based on this protocol, the WHT on dividends will be reduced to 0% if the receiving company owns 80% or more of the voting power of the distributing company, provided that certain other conditions are also met. This reduction of the dividend WHT has taken effect as of 1 January 2005.
28. The 5% rate is applicable if the foreign company directly owns 25% or more of the capital of the Dutch company. The 0% rate is applicable if the dividend for that company qualifies for the participation exemption in the Netherlands. The 15% rate is applicable to portfolio dividends.
29. The 5% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company or invested more than USD 10 million in the Dutch company. The 7% rate applies to the foreign company owning, directly or indirectly, at least 25% of the capital of the Dutch company.
30. No dividend WHT is due if the share in the participation is at least 50% and at least USD 250,000 capital is paid in, in the participation. A dividend WHT of 5% is due if the share in the participation is at least 25%.
31. A dividend WHT of 5% is due if the share in the participation is at least 10%. No dividend WHT is due if the share in the participation is at least 50% and at least USD 2 million capital is paid in, in the participation.
32. Based upon most-favoured nation principle.
33. The 0% rate applies if a company controls at least 10% of the voting power of the Dutch company paying the dividends. The 15% rate applies to dividends arising from income from immovable property, distributed by certain tax exempt real estate investment vehicles (e.g. REITs or FBIs).
34. In case a Thai company holds at least a 25% share in a Thai company, the Dutch dividend WHT rate is 5%.
35. If a share of at least 50% is held by a company, no dividend WHT is due. If the share the company holds is less than 50%, 5% dividend WHT is due.
36. As of 29 December 2004, Switzerland and the European Union concluded a treaty in light of the EU Savings Directive. The treaty, amongst others, contains a clause that no dividend tax is withheld if certain requirements are met. The main requirements are that a shareholding of at least 25% is held directly for a period of at least two years and both corporations are not subjected to a special tax regime. Please note that even though the treatment of dividend appears to be equal to the treatment on the basis of the EU Parent-Subsidiary Directive, the Directive is, in fact, not applicable to Switzerland.

Netherlands

37. The 0% rate applies if the foreign company directly owns at least 5% of the capital of the Dutch company.
38. The 5% rate applies if the foreign company directly owns at least 25% of the capital of the Dutch company with a minimum investment of at least EUR 200,000 in the Dutch company.
39. The 0% rate applies if the foreign company directly owns at least 7.5% of the capital of the Dutch company.
40. The WHT rates are based on the Dutch '*Belastingregeling voor het Koninkrijk*'.
41. The WHT rates for the Caribbean Netherlands are based on the Dutch '*Belastingregeling voor het land Nederland*'.
42. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 10% (15% threshold for the Panama Treaty) of the shares of the Dutch company, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange. Also, no WHT is levied if the foreign company is a bank or insurance company, a state or political subdivision, a headquarter owning at least 10% of the shares of the Dutch company, or a pension fund.
43. The 0% rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company, is a pension fund, or, as far as Switzerland is concerned, the beneficial owner is a social security scheme.
44. Because the treaty with Mongolia is not applicable anymore, the national WHT rate applies.

Tax administration

Taxable period

Generally, the tax year is equal to the calendar year. However, corporate taxpayers may deviate from this by adopting a different financial year.

Tax returns

Corporate taxpayers are required to file a tax return annually. The due date is generally five months after the end of the company's financial year. This filing due date may be extended upon request by the taxpayer.

The Dutch tax authorities generally make a provisional assessment before issuing the final assessment after a full examination of the return. The final assessment must be issued within three years following the financial year. This period is prolonged with the time of the extension for filing the tax return. The Dutch tax authorities may issue an additional assessment if it appears that the amount of CIT payable (as calculated in the final assessment) is too low.

During the current tax year, a provisional assessment can be issued on the basis of prior years' taxable income or on an estimation provided by the taxpayer.

Payment of tax

The CIT assessed must be paid within two months of the date of the provisional or final assessment. Interest is payable on the CIT due. The interest is calculated from six months following the financial year. The minimum interest rate is 8%.

Refund of tax unduly levied

If a corporate taxpayer is entitled to a refund of Dutch CIT or WHT because the levy appeared to be in conflict with EU law, the Netherlands might be obligated to repay with interest for the period from the levy to the refund. The taxpayer must file a request at the Dutch tax authorities within six weeks after the refund.

Interest on late payment dividend WHT

Interest is calculated on late payments or refunds of Dutch dividend WHT.

Tax audit process

Corporate taxpayers might be subject to regular audits by tax inspectors. This forms part of the so-called vertical monitoring tasks of the national tax authorities. In recent years, there has been a tendency towards a more enhanced co-operation between tax authorities and taxpayers in the Netherlands (*see Horizontal monitoring in this section below*). Part of this trend is that there are to be less audits in retrospect.

Statute of limitations

Under certain conditions, the tax administration can impose an additional assessment within five years from the year in which the tax debt originated (if the filing due date was extended on request, this period is added). In case of income from abroad, the period for additional assessment is extended to 12 years. In 2013, the Dutch tax legislator published a proposal to reduce the period for the issuing of an additional assessment to three years after the tax return is received by the Dutch tax authorities. The same proposal also suggests extending that period to 12 years in case the taxpayer intentionally filed an incorrect tax return. The proposal is currently subject to amendments by the Dutch parliament. It is still unclear when or if this proposal will be adopted.

Advance pricing agreement (APA)/Advance tax ruling (ATR)

Taxpayers are able to obtain (legal) certainty concerning their CIT positions. They may request the Dutch tax authorities to conclude an APA with respect to the transfer pricing of controlled transactions. Taxpayers may also request the Dutch tax authorities to provide an ATR with respect to the CIT implications of a (contemplated) set of transactions.

Horizontal monitoring

If the taxpayer is willing, the Dutch tax authorities, in certain cases, shift their method from vertical monitoring to horizontal monitoring. Emphasis is placed on cooperation and on the responsibilities of the parties involved, instead of retrospective control. Horizontal monitoring is based on mutual trust, understanding, and transparency between the taxpayers and the Dutch tax authorities. It aims at reducing administrative burdens and providing legal certainty in advance. Taxpayers need to have a solid Tax Control Framework.

Topics of focus for tax authorities

The topics of focus for the Dutch tax authorities may vary.

N

Other issues**Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA) with the United States (US)**

The Netherlands signed an FATCA IGA with the United States on 18 December 2013. As of 1 July 2014, banks and insurers must be compliant with the FATCA provisions. This US-based legislation will be implemented in Netherlands' domestic law and will apply to all financial institutions worldwide. The FATCA IGA is based on the standard Model 1A IGA of 4 November 2013 and provides for specific exemptions.

Common Reporting Standard (CRS)

On 11 September 2015, the State Secretary for Finance published the draft law for implementation of the CRS. The amended EU Directive on Administrative Cooperation will also be implemented in the Netherlands through this law. The proposal entered into force on 1 January 2016.

Based on this law, financial service companies in the Netherlands must comply with certain administrative obligations and report information on foreign account holders to the Dutch tax authorities. This information may include account numbers and the balance on a bank account of foreign account holders.

Base erosion and profit shifting (BEPS)

According to the Netherlands, the BEPS issues should be addressed through international cooperation. As a member of the OECD, the Netherlands is an active participant in the BEPS project of the OECD and supporting its goals. As a consequence, the Netherlands will enact legislation when agreement is reached within the OECD

Netherlands

on the BEPS project and all parties agreed to implement. One example of this type of legislation is the OECD CbC reporting implementation package that has been published in the OECD report on Action 13 in 2015. The Netherlands has implemented the OECD CbC reporting package that corresponds with the system and methods as prescribed in the OECD CbC reporting package.

EU state aid

In 2014, the EC opened an investigation to examine whether a specific, individual ruling issued by the Dutch tax authorities on the calculation of the taxable basis for CIT purposes complies with the EU rules on state aid. The EC has concluded that this ruling does, in fact, constitute state aid. The full decision and the arguments of the EC have not yet been published to the public. The Dutch Ministry of Finance has said that it does not agree with the EC's decision and will appeal.

It is expected that the EC may also investigate other tax rulings. However, the EC has explicitly stated that it does not expect to encounter systematic irregularities in Dutch tax rulings.

Significant developments

Goods and services tax (GST) on online services

The Taxation (Residential Land Withholding Tax, GST on Online Services, and Student Loans) Act 2016 seeks to impose GST on digital products and other services (such as music, movie, and game downloads) purchased online by New Zealand consumers. The new law requires offshore sellers to register and pay GST from 1 October 2016.

The following measures have been introduced:

- Services and intangibles supplied remotely by an offshore supplier to New Zealand-resident consumers are treated as performed in New Zealand and therefore subject to GST.
- A wide definition of 'services' has been adopted, which includes both digital services and more traditional services such as legal and accounting services.
- The new rules only apply to business-to-consumer (B2C) transactions and not to business-to-business (B2B) transactions.
- From 1 October 2016, offshore sellers are required to register and return GST if their supplies of services to New Zealand-resident consumers exceed 60,000 New Zealand dollars (NZD) in a 12-month period.

In some situations, an 'electronic marketplace' or intermediary are required to register instead of the principal offshore supplier.

Debt remission

In February 2015, Inland Revenue released an Officials' Issues Paper on related parties debt remission. The paper sought feedback on proposed legislative changes to make the debt remission rules more certain for taxpayers. The proposed legislative changes are intended to ensure that there should be no debt remission income for the debtor when the debtor is in the New Zealand tax base, including controlled foreign companies (CFCs) and New Zealand subsidiaries of foreign companies, and:

- they are members of the same wholly-owned group of companies, or
- the debtor is a company or partnership (including look-through companies and limited partnerships) and all of the relevant debt is owed to shareholders or partners in the debtor, and the relevant debt is remitted or capitalised pro-rata to ownership.

The changes are proposed to have retrospective application from the commencement of the 2006/07 tax year. The proposals have been included in the Taxation (Annual Rates for 2016-17, Closely Held Companies, and Remedial Matters) Bill, which was introduced to Parliament in May 2016.

Simplifying tax administration

The government is seeking to modernise tax administration and reduce compliance costs. A green paper has been released that considers simplifying tax for businesses and individuals. Its proposals include using existing business processes and technology to

New Zealand

calculate provisional tax and streamline the collection of pay-as-you-earn (PAYE) and GST. The paper also proposes providing online returns for individuals, pre-populated with all known income information, to simplify their filing obligations.

Inland Revenue is also seeking to improve its digital services for a better tax system, releasing a discussion document that puts forward three key proposals. First, Inland Revenue would work with third parties, such as banks and business software developers, so that tax interactions are built into a customer's regular transactions rather than managing tax separately at specific times of the year. Second, Inland Revenue would provide assistance to those who do not have access to digital technology or the skills or knowledge to use it. Finally, Inland Revenue would develop a process to move certain individuals and businesses to digital services where possible.

The government will be releasing detailed proposals on these areas over the next few years as it seeks to simplify and improve New Zealand's tax administration system.

Double tax agreements (DTAs)

Samoa - New Zealand DTA

A new DTA was signed with Samoa in July 2015 and entered into force on 23 December 2015. The new DTA replaces the existing tax information exchange agreement (TIEA) between New Zealand and Samoa. Under the new DTA, the withholding tax (WHT) rates are:

- 15% for dividends, or 5% for an investor who holds at least 10% of the shares in the company that pays the dividends.
- 10% for interest payments.
- 10% for royalties.

DTAs under negotiation

New Zealand is currently negotiating DTAs with China, Luxembourg, Norway, Portugal, and the United Kingdom.

New Zealand is also negotiating new protocols to amend existing treaties with Austria, Belgium, India, and the Netherlands.

Taxes on corporate income

New Zealand resident companies are taxed on their worldwide income, and non-resident companies (including branches) are taxed on New Zealand-sourced income.

The New Zealand corporate income tax (CIT) rate is 28%.

Local income taxes

There are no state or municipal income taxes in New Zealand.

Corporate residence

Residence is determined by place of incorporation, location of head office, centre of management, or by directors' exercising control of the company in New Zealand.

Permanent establishment (PE)

Generally, DTAs to which New Zealand is a party define a PE by reference to a fixed place of business through which the company's business is carried on. A PE can also exist without a fixed place of business if the employees of the overseas company habitually

exercise an authority to conclude contracts in New Zealand or provide services in New Zealand for a period of time.

Other taxes

Goods and services tax (GST)

GST is a form of value-added tax (VAT) that applies to most supplies of goods and services. The narrow category of exempt supplies includes financial services. The rate applied to taxable supplies is currently 15% or 0%.

The 0% rate applies to a few supplies only, including exports and financial services supplied to other registered businesses. The 0% rate also applies to the sale of land between two registered parties if the purchaser acquires the land with the intention of using it to make taxable supplies and the land is not intended to be used as a principal place of residence for the purchaser or an associate.

There is also a 'reverse charge' mechanism that requires the self-assessment of GST on the value of certain services imported by GST registered persons.

Non-residents who do not make taxable supplies in New Zealand can register for GST, provided they meet certain criteria, allowing them to claim a refund for their input GST costs.

Customs duties

Customs duty is levied on some imported goods at rates generally ranging from 1% to 10%.

Excise duty

Excise duty is levied, in addition to GST, on alcoholic beverages (e.g. wines, beers, spirits), tobacco products, and certain fuels (e.g. compressed natural gas, gasoline). The excise duties are levied item-by-item at rates that vary considerably.

Property taxes

Local authorities levy tax known as 'rates' on land within their territorial boundaries. Rates are levied on properties based on the properties' rateable value.

Transfer taxes

There are no taxes on the transfer of property in New Zealand.

Stamp duty

Stamp duty has been abolished in respect of instruments executed after 20 May 1999.

Accident compensation levy

A statutory-based scheme of accident insurance is funded in part by premiums payable by employers and employees.

Premiums paid by employers (including the self-employed) fund insurance for work-related accidents. Employers are liable to pay a residual claims levy and an employer levy. The employer levy payable is determined according to the industry or risk classification of the employer and the level of earnings of employees.

Fringe benefit tax (FBT)

Employers are subject to a tax-deductible FBT on the value of non-cash fringe benefits provided to their employees. Employers can elect to pay FBT at flat rates (for the 2016/17 income year, 49.25% on attributed benefits and 42.86% on pool benefits, i.e. those benefits that cannot be attributed to a particular employee) applied against the value of

New Zealand

the benefit or can attribute fringe benefits to individual employees and pay FBT based on each employee's marginal tax rate.

Under the attribution option, the applicable FBT rate depends on the net remuneration (including fringe benefits) paid to the employee. The attribution calculation treats the fringe benefit as if it was paid in cash and calculates FBT as the notional increase in income that otherwise would have arisen.

The multi rates for the 2016/17 income tax year are:

Net remuneration (NZD)	FBT rate (%)
12,530 or less	11.73
12,531 to 40,580	21.21
40,581 to 55,980	42.86
Greater than 55,981	49.25

Fringe benefits include motor vehicles available for private use, loans at below prescribed interest rates, contributions to medical insurance schemes, and non-monetary employer contributions to superannuation schemes.

In relation to motor vehicles, employers can value a vehicle on an annual basis either using 20% of the cost price or market value (GST inclusive) of the vehicle (depending on whether the vehicle is owned or leased by the employer) or 36% of the vehicle's tax written down value (GST inclusive). In each case, the FBT value must be reduced proportionately for whole days when the vehicle is not available for private use at any time.

FBT is also applicable to benefits received by an employee from a third party where there is an arrangement between the employer and the third party and where the benefit would be subject to FBT if it had been provided by the employer.

Employer superannuation contribution tax (ESCT)

Employers' contributions to an approved superannuation fund (excluding foreign schemes) are subject to ESCT. This includes employer contributions to KiwiSaver (or other qualifying registered superannuation schemes).

ESCT is generally deducted at the employee's relevant progressive rate based on the total salary or wages and employer superannuation cash contributions paid to the employee in the previous year.

Salary or wages plus superannuation contributions (NZD)	ESCT rate (%)
Up to 16,800	10.5
16,801 to 57,600	17.5
57,601 to 84,000	30.0
Over 84,000	33.0

Non-resident contractor's tax (NRCT)

New Zealand imposes an obligation to deduct NRCT on those making contract payments to non-residents in relation to certain contract activities undertaken in New Zealand. Contract activities generally relate to services but also include the granting of a right to use property in New Zealand. The NRCT rate is generally 15% (or 30% for individuals and 20% for companies if the relevant paperwork is not provided). Some contractors are eligible to apply for a certificate of exemption or a reduced rate certificate.

In addition to a certificate of exemption, no NRCT is required to be withheld if the non-resident has full relief from tax under a DTA and is present in New Zealand for no more than 92 days in a 12-month period.

Payments for contract work amounting to less than NZD 15,000 in a 12-month period are also exempt from NRCT. In such cases, contractors themselves are responsible for paying any New Zealand tax owed at the end of the year (provided there is no relief from tax under a DTA).

Branch income

A non-resident company is taxed on income generated by business wholly or partially carried on in New Zealand. Branch profits are subject to ordinary corporate rates of taxation, and there is no WHT on repatriated profits.

Income determination

Inventory valuation

Inventory must be valued by a cost-valuation method or, where market-selling value is lower than cost, may be valued at market-selling value. If the inventory is shares, it must be valued at cost. Cost is determined under New Zealand Generally Accepted Accounting Practice (NZ GAAP). Acceptable cost flow methods are first in first out (FIFO) or weighted-average cost. Some valuation concessions are available to small taxpayers.

Capital gains

There is no separate capital gains tax. However, the income tax legislation specifically includes various forms of gain that would otherwise be considered a capital gain within the definition of 'income'. Taxable income includes gains on the sale of real estate in certain circumstances and on personal property where the taxpayer acquired the property for resale or deals in such property or where a profit-making purpose or scheme can be deemed or imputed.

Dividend income

Inter-corporate dividends paid between New Zealand resident companies are exempt where there is 100% common ownership.

Dividends from a foreign company

A dividend derived by a company resident in New Zealand from a foreign company is treated as exempt income unless it is:

- a dividend on a fixed rate share or a dividend for which the foreign company has received a tax deduction in its home jurisdiction, or
- a dividend from a portfolio foreign investment fund (FIF) (i.e. interests under 10%) that is exempt from FIF rules (e.g. an interest in an Australian listed company).

Dividends from foreign companies derived by taxpayers other than companies are taxable (generally with a credit for any foreign WHTs).

Supplementary dividend tax credit regime

Previously, the supplementary dividend tax credit regime (commonly referred to as FITC) ensured that foreign investors were not taxed at more than the New Zealand corporate tax rate by effectively rebating the New Zealand WHT to the extent that the dividend was fully imputed. As non-resident withholding tax (NRWT) rates have been reduced to nil on most fully imputed dividends, a supplementary dividend tax credit is generally no longer required.

The supplementary dividend tax credit regime applies only to fully imputed dividends paid to shareholders holding less than 10% of the shares in the company and NRWT rates of at least 15%.

New Zealand

Broadly therefore:

- only portfolio investors (i.e. those with less than 10% holdings) with NRWT rates of at least 15% will qualify for relief under the supplementary dividend rules, and
- a zero rate of NRWT applies to dividends paid to non-portfolio shareholders (i.e. shareholders with more than 10% holdings) and to any other dividends subject to lower tax rates, to the extent they are fully imputed.

The changes affect provisional tax calculations for taxpayers who take into account their anticipated supplementary dividend tax credits in calculating their provisional tax. Taxpayers should also consider the need to impute dividends where a tax treaty applies to reduce the NRWT rate.

Stock dividends

Bonus issues can be taxable or non-taxable. With a taxable bonus issue, the amount capitalised becomes available for tax-free distribution upon a subsequent share cancellation. With a non-taxable bonus issue, the amount capitalised is not available for tax-free distribution upon a subsequent share cancellation.

Shares issued under profit distribution plans (PDPs) are treated as taxable dividends.

Interest income

All interest derived by a company is income. The financial arrangement rules may require income for tax purposes to be recognised on an accrual basis. When this is not required (because the person is classified as a 'cash basis' person), interest income is recognised as and when it is received.

Other significant items

The taxation of debt and debt instruments is governed by the financial arrangements rules, a specific set of timing rules. Income or expenditure (including foreign exchange gains and losses) from financial arrangements must be recognised on an accrual basis (generally, yield to maturity or other commercially acceptable method). These rules do not apply to the income or expenditure of a non-resident if the financial arrangement does not relate to a business carried on in New Zealand.

Foreign income

A New Zealand corporation is taxed on foreign passive income as earned. Double taxation with respect to all types of taxable income, including interest, rents, and royalties, is avoided by the recognition of foreign tax credits.

New Zealand does not offer specific tax deferral rules.

Deductions

Depreciation and depletion

For tax purposes, depreciation of property can be computed under the diminishing-value method, the straight-line method, or a pooling method. The rates of depreciation depend on the following factors:

- Type of asset.
- Whether the asset is acquired new or second-hand (i.e. used).

Taxpayers must use the economic depreciation rates prescribed by Inland Revenue. Fixed-life intangible property (including the right to use land and resource consents) is depreciable on a straight-line basis over its legal life. Any depreciation recovered on the sale of an asset (up to its original cost) is taxable in the year of sale.

The double-declining-balance (diminishing value) method applies to most plant and equipment. Under the double-declining-balance method, equipment with an estimated useful life of ten years results in diminishing value depreciation deductions of 20% *per annum* (i.e. double the straight-line rate of 10% over the equipment's ten-year life). Buildings, certain motor vehicles, high-residual-value property, fixed-life intangible property, and property acquired prior to the introduction of the new rules cannot be depreciated under the double-declining-balance method.

The depreciation rate for buildings with an estimated useful life of 50 years or more is reduced to 0% as of the 2011/12 income year.

Goodwill

Goodwill is generally regarded as a capital asset, thus any payment for goodwill is non-deductible. There is a limited exception for payments made to preserve goodwill.

Start-up expenses

Expenses incurred by a company before the commencement of the business are generally regarded as outgoings of a capital nature and are therefore not deductible. However, certain expenditure on scientific research may be deductible, provided that it is incurred for the purpose of the company deriving assessable income.

Research and development (R&D)

R&D costs are tax deductible. Expenses written off as immaterial and not tested against certain asset-recognition criteria are not automatically deductible for tax purposes.

Unsuccessful software development costs

Taxpayers are allowed an upfront deduction for expenditure incurred on unsuccessful software development projects in the year that the development is abandoned.

Interest expense

Generally, interest incurred by most companies is deductible, subject to thin capitalisation rules (*see the Group taxation section*).

Bad debt

A company is allowed a deduction for bad debt in the income year in which the debt is physically written off by the company.

Charitable contributions

A company is generally allowed a deduction for charitable contributions it makes to an approved Inland Revenue donee organisation or a charity that performs its activities in New Zealand. The list of approved donee organisations is available on Inland Revenue's website. The deduction available for charitable contributions is limited to the company's net income for that income year.

Entertainment expenditure

Entertainment expenditure is generally only 50% deductible. However, entertainment expenditure incurred overseas is 100% deductible.

Legal expenditure

Legal expenditure is deductible if the expenditure is:

- incurred in deriving assessable or excluded income or
- incurred in the course of carrying on a business for the purpose of deriving assessable or excluded income.

However, the expenditure is not deductible if it is of a capital, private, or domestic nature.

New Zealand

Taxpayers with business-related legal expenditure of NZD 10,000 or less are able to deduct the full amount of the expenditure in the year it is incurred, whether or not it is capital in nature.

Fines and penalties

Generally, no deduction is available where a company has incurred expenditure on fines or penalties paid in breach of statute or regulation. Expenditure on other fines and penalties requires further evaluation before its deductibility can be determined.

Taxes

FBT is deductible, as is GST payable on the value of a fringe benefit.

Net operating losses

Losses may be carried forward indefinitely for offset against future profits, subject to the company maintaining 49% continuity of ownership. There is no loss carryback. Losses of a subsidiary are preserved on a spinout (i.e. when shares in the subsidiary are transferred to shareholders of its parent company).

Payments to foreign affiliates

A New Zealand corporation can claim a deduction for royalties, management service fees, and interest charges paid to non-resident associates, provided the charges satisfy the 'arm's-length principle', which forms the basis of New Zealand's transfer pricing regime.

Group taxation

Companies that are 66% or more commonly owned constitute a 'group'. Group companies are able to offset losses by election as well as by subvention payment. A subvention payment is a payment made by the profit company to the loss company and cannot exceed the amount of the loss company's loss. The payment is deductible to the profit company and assessable to the loss company. Certain companies subject to special bases of assessment (e.g. mining companies other than petroleum extraction companies) are excluded from the grouping provisions. Branches of non-resident companies may be included, provided they continue to carry on business in New Zealand through a fixed establishment.

Groups of resident companies that have 100% common ownership may elect to be subject to the consolidated group regime. The group is effectively treated as a single company and transfers of assets, dividends, interest, and management fees among members of the group are generally disregarded for tax purposes. The group files a single return and is issued a single assessment. Group members are jointly and severally liable for tax purposes, unless an election is made to limit the liability to one or more companies in the group.

Losses incurred by a dual-resident company are not available for offset by election or subvention payment.

Transfer pricing

The transfer pricing rules are based on Organisation for Economic Co-operation and Development (OECD) principles and require taxpayers to value all cross-border transactions with associates on an arm's-length basis.

The transfer pricing rules apply to arrangements for the acquisition or supply of goods, services, money, intangible property, and anything else (other than non-fixed rate shares) where the supplier and acquirer are associated persons. Similar rules apply to the apportionment of branch profits.

Various methods are available for determining the 'arm's-length consideration'. The taxpayer is required to use the method that produces the most reliable measure of the

amount that independent parties would have paid or received in respect of the same or similar transactions. Inland Revenue has published guidelines that make it clear that documentation is required to support a taxpayer's transfer prices.

Thin capitalisation

'Inbound' thin capitalisation rules apply to New Zealand taxpayers controlled by non-residents, including branches of non-residents. The aim of the rules is to ensure that New Zealand entities or branches do not deduct a disproportionately high amount of the worldwide group's interest expense. This is achieved by deeming income in New Zealand when, and to the extent that, the New Zealand entities in the group are thinly capitalised (i.e. excessively debt funded).

The Taxation (Annual Rates, Employee Allowances, and Remedial Matters) Act 2014 widens the inbound rules to include situations where non-residents are 'acting together' and to include trusts where the majority of settlements have come from non-residents or from entities subject to the thin capitalisation rules.

The 'outbound' thin capitalisation rules are intended to operate as a base protection measure to prevent New Zealand residents with CFC investments and certain FIF investments from allocating an excessive portion of their interest cost against the New Zealand tax base.

To reduce taxpayer compliance costs, the outbound thin capitalisation rules do not apply when the New Zealand taxpayer has 90% or more of their assets in New Zealand.

Further concessions are available under the 'outbound rules' to taxpayers who do not fall below this threshold. If the taxpayer's interest deduction and dividends paid for fixed rate shares (the finance cost) is below NZD 1 million, no apportionment of deductible interest is required. If the finance cost is above NZD 1 million, but below NZD 2 million, the interest apportionment may be reduced.

An apportionment of deductible interest is required under the thin capitalisation rules when the debt percentage (calculated as the total group interest bearing debt/total group assets of a New Zealand entity or group) exceeds both:

- 60% (for 'inbound' thin capitalisation) or 75% (for 'outbound' thin capitalisation) and
- 110% of the worldwide group's debt percentage.

The use of the debt-to-asset ratio differs from most thin capitalisation models, which apply to an entity's debt-to-equity ratio. All interest (both related and unrelated party) is subject to apportionment.

Foreign-owned banks operating in New Zealand are subject to specific thin capitalisation rules that deem income if the bank does not hold a level of equity equivalent to 6% of their New Zealand banking risk-weighted assets. In addition, banks are required to have sufficient equity to equity fund offshore investments that do not give rise to New Zealand taxable income in full.

Controlled foreign companies (CFCs)

The CFC regime imposes New Zealand tax on the notional share of income attributable to residents (companies, trusts, and individuals) with interests in certain CFCs.

Central to the regime is the definition of a CFC. When five or fewer New Zealand residents directly or indirectly control more than 50% of a foreign company, or when a single New Zealand resident directly or indirectly controls 40% or more of a foreign company (unless a non-associated non-resident has equal or greater control), that company is a CFC. For interests that do not meet the definition of a CFC, the investment may be taxed under the FIF regime (*see below*).

New Zealand

Note that a person with an income interest in a CFC does not have attributed CFC income or losses if:

- the Australian exemption applies or
- the CFC passes an active business test.

If the exemptions do not apply, only the CFC's passive (attributable) income is subject to tax on attribution (on an accrual basis). However, no income attribution is required if a New Zealand resident has an income interest of less than 10% in the CFC.

Active business test

A CFC passes the active business test if it has passive (attributable) income that is less than 5% of its total income. For the purposes of the test, taxpayers measure passive and total income using either financial accounting (audited International Financial Reporting Standards [IFRS] or NZ GAAP accounts) or tax measures of income.

CFCs in the same country may be consolidated for calculating the 5% ratio, subject to certain conditions.

Australian exemption

A person with an interest in a CFC does not have attributed CFC income or a loss if the CFC is a resident in, and subject to income tax in, Australia and meets certain other criteria.

Passive (attributable) income

Attributable, or passive, income is income that is highly mobile and not location-specific (i.e. income where there is a risk that it could easily be shifted out of the New Zealand tax base).

The broad categories of attributable income are as follows:

- Certain types of dividend that would be taxable if received by a New Zealand resident company.
- Certain interest.
- Certain royalties.
- Certain rents.
- Certain amounts for financial arrangements.
- Income from services performed in New Zealand.
- Income from offshore insurance business and life insurance policies.
- Personal services income.
- Income from the disposal of revenue account property.
- Certain income related to telecommunications services.

Taxpayers must disclose interests in CFCs in their annual tax returns. Failure to disclose CFC interests can result in the imposition of penalties.

Foreign investment funds (FIFs)

The FIF regime is an extension of the CFC regime, which subjects persons with interests in certain foreign entities (which are not CFCs) to New Zealand tax. It also applies when the investor does not have a sufficient interest in a CFC to be taxed under that regime.

Common examples of investments classified as FIFs include foreign companies, unit trusts, foreign superannuation schemes, and life insurance policies issued by foreign entities not subject to New Zealand tax.

The FIF rules can be split into two regimes:

- The portfolio FIF rules, which apply to interests of less than 10% in a FIF.

- The non-portfolio FIF rules, which apply to interests of 10% or more that are outside the CFC rules.

Portfolio FIF rules

The portfolio FIF rules apply to interests of less than 10% in foreign companies, foreign superannuation schemes, and foreign life insurance policies issued by non-resident life insurers (if the CFC rules do not apply). However, a New Zealand resident does not generally have FIF income when:

- the total cost of FIF interests held by the individual does not exceed NZD 50,000
- the income interest is less than 10% in certain Australian Stock Exchange (ASX) listed companies or certain Australian unit trusts, or
- the CFC rules apply.

There are also exemptions for interests in certain foreign employment-related superannuation schemes. These include interests held by returning residents and new migrants acquired before the person became a New Zealand resident or within the first five years of New Zealand residence.

When an interest is exempt from the FIF rules, distributions are subject to tax on a receipts basis in accordance with normal principles.

The taxable income of a New Zealand resident with an interest in a FIF that does not qualify for one of the exemptions is calculated using one of the following methods:

- Fair dividend rate (FDR).
- Comparative value.
- Cost.
- Deemed rate of return.

The nature of the interest held and the availability of information restrict the choice of method.

Taxpayers must disclose interests in certain FIFs in their annual tax returns. Failure to disclose can result in the imposition of penalties.

Non-portfolio FIF rules

The active income exemption (which applies for CFCs) also includes certain non-portfolio FIFs. If the FIF fails the active business test, passive income will be attributed to the New Zealand shareholders. There is also an exemption for shareholders with a 10% or greater interest in a FIF that is resident and subject to tax in Australia.

When investors do not have sufficient information to perform the calculations required under the active business test (or choose not to apply the active business test), they will be able to use one of the attribution methods for portfolio FIF investments (*see above*).

Tax credits and incentives

Foreign tax credits

If a New Zealand resident company derives overseas income that is subject to New Zealand income tax, the company is generally allowed a credit for the foreign income tax paid in respect of that income. Generally, the credit is limited to the lesser of the actual overseas tax paid on the overseas income or the New Zealand tax applicable to the overseas income.

Foreign tax credits can only be used if the taxpayer is in a tax paying position. If foreign tax credits are not claimed in the current year, they are forfeited.

New Zealand

Inbound investment incentives

There are limited, specific tax incentives designed to encourage the flow of investment funds into New Zealand.

Legislation encourages foreign venture capital investment into unlisted New Zealand companies. Gains derived by certain non-residents from the sale of shares (held on revenue account and owned for at least 12 months) in New Zealand unlisted companies that do not have certain prohibited activities as their main activity are exempt from income tax. The rules apply to foreign investors who are resident in all of the countries with which New Zealand has a DTA (except Switzerland) and who invest into New Zealand venture capital opportunities.

Capital investment incentives

Investment allowances on fixed assets are not available.

Trans-Tasman imputation

Elective rules allow trans-Tasman groups of companies to attach both imputation credits (representing New Zealand tax paid) and franking credits (representing Australian tax paid) to dividends paid to shareholders.

The regime allows eligible wholly owned groups of Australian and/or New Zealand companies to group for imputation purposes only. Groups with both Australian and New Zealand members are known as trans-Tasman imputation groups (TTIGs). New Zealand companies within a trans-Tasman group maintain a separate 'resident imputation subgroup' account.

Withholding taxes

Resident corporations paying certain types of income are required to withhold tax on gross income, as shown in the table below.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations	33 (1)	28 (1)	0
Resident individuals	33	max 33	-
Non-resident corporations and individuals		(2)	
Non-treaty	30 (3)	15 (4)	15

United States	0/5/15 (15)	0/10 (15)	5
Vietnam	5/15 (16)	10	10

Notes

1. Resident WHT applies to both interest and dividends. Unless the recipient corporation holds an exemption certificate, and if the recipient provides a tax file number, the default rate of the interest WHT is 28%. Recipients can elect for the rate of interest withholding to be 30%. The rate of interest WHT is 30% where the recipient does not provide a tax file number.

The rate of WHT on dividends paid is 33%, but the tax is reduced by the aggregate imputation and withholding payment credits attached to the dividend or taxable bonus share. Interest and dividends paid between group companies and in certain other limited circumstances are exempt from the WHT.

2. Resident corporations paying interest to non-associated, non-resident corporations and individuals need not withhold tax if they have approved-issuer status and the security under which interest is payable is registered with Inland Revenue. In this case, the resident corporation pays a 2% levy (tax deductible) on the interest payments instead of the WHT otherwise applicable.
3. Non-resident WHT is imposed on dividends at the following rates, regardless of the jurisdiction to which the dividends are paid:
 - 0% for fully imputed dividends paid to a shareholder holding 10% or more of the direct voting interests in the company and fully imputed non-cash dividends.
 - 15% for fully imputed cash dividends paid to a shareholder holding less than 10%.
 - 30% in most other cases, subject to any relief available under a DTA.
4. Net interest income is subject to reassessment at the company tax rate where the payer and the recipient are 'associated persons', but WHT is the minimum liability. Non-resident WHT is not imposed where the recipient of the interest has a fixed establishment in New Zealand.
5. The WHT on dividends is reduced from 15% to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 80% or more of the shares in the other company and meets other criteria. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.
6. The WHT on dividends is reduced from 15% to 5% for an investor who holds at least 10% of the shares in the company that pays the dividend. The WHT rate on royalties is reduced from 15% to 10% generally, with a further reduced rate of 5% for royalties relating to copyright, computer software, and others.
7. The WHT on interest is reduced to 10% if the interest received is derived from loans granted by banks or insurance companies. In all other cases, 15%.
8. The WHT on dividends is reduced from 15% to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 50% or more of the shares in the other company and meets other criteria. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.

New Zealand

9. The WHT rate on dividends is reduced from 15% to 0% for an investor who holds at least 10% of the voting power in the company paying the dividend (subject to certain conditions being met). The WHT rate on interest is 10% generally and 0% if it is payable to eligible financial institutions.
10. The 0% WHT rate applies where the foreign company owns at least 80% of the voting rights in the paying company (directly or indirectly) for 12 months prior to the date the dividend is paid. The 5% rate applies if the foreign company has a direct interest of at least 10% of the voting rights in the paying company.
11. The WHT rate on dividends will reduce from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend.
12. The standard WHT rate on dividends reduces to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend.
13. The WHT rate on interest is reduced to 10% if it is received by a financial institution or it is paid with respect to debt arising from a sale on credit of any equipment, merchandise, or services. The WHT rate is reduced to 10% for certain types of royalty.
14. The WHT rate on dividends is reduced to 5% if the beneficial owner is a company holding at least 25% of the capital of the company paying the dividends and 15% in all other cases. The WHT rate on interest is reduced to 10% if the interest is paid to a bank and 15% in all other cases.
15. The WHT rate on dividends is 5% for an investor who holds at least 10% of the shares in the company that pays the dividend; 0% if the investor holds 80% or more of the shares in the company and meets other criteria; 15% in all other cases. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.
16. The WHT rate on dividends is reduced to 5% if the beneficial owner is a company holding at least 50% of the voting power in the company paying the dividends and 15% in all other cases.

Tax administration

Taxable period

Tax returns are based on the fiscal year ending 31 March, although other fiscal year-ends are possible if permission is obtained.

Tax returns

The system is one of self-assessment, under which the corporation files an income tax return each year. For those not linked to a tax agent, returns must be filed by 7 July for balance dates between 1 October and 31 March, or by the seventh day of the fourth month following a balance date between 1 April and 30 September. The filing date for taxpayers linked to a tax agent is extended to 31 March of the following year.

Payment of tax

Terminal tax payment is due on 7 February for balance dates between 31 March and 30 September. For other balance dates, terminal tax payments are generally due on the seventh day of the 11th month following the balance date. The terminal tax due date is extended by two months for taxpayers linked to a tax agent.

Provisional tax payments are generally due in three instalments: (i) 28th day of the seventh month before the balance date, (ii) 28th day of the third month before the balance date, (iii) 28th day of the month following the balance date.

Calculating provisional tax

For the 2016/17 income year (i.e. year ending 31 March 2017), provisional taxpayers have the following four options:

- Where the 2015/16 return of income has been filed, 2016/17 provisional tax can be based on 105% of the 2015/16 residual income tax.
- Where the 2015/16 return of income has not been filed, due to an extension of time for filing, 2016/17 provisional tax can be based on 110% of the 2014/15 residual income tax, but only for the first two instalments. The final instalment must be calculated based on the first option above.
- Provisional tax can be based on a fair and reasonable estimate of the 2016/17 residual income tax.
- The GST ratio option.

The GST ratio option enables smaller taxpayers to align their provisional tax payments with their cash flow and reduce their exposure to use of money interest. The option is

intended to benefit those taxpayers with declining, seasonal, or fluctuating income. This option calculates provisional tax by reference to the taxpayer's GST taxable supplies in the relevant provisional tax instalment period.

Taxpayers can also make voluntary payments. Such payments can be made to minimise exposure to use of money interest. A taxpayer choosing to estimate residual income tax is required to take reasonable care when estimating.

When the taxpayer's return of income for the year is furnished, the provisional tax paid for that year is credited against the tax assessed. This results in either a refund or further tax to pay by way of terminal tax.

Where provisional tax paid is less than the amount of income tax deemed due on that instalment date, interest is imposed. If provisional tax is overpaid, interest is payable to the taxpayer. Interest is deductible for tax purposes by business taxpayers, and interest earned on overpaid provisional tax is gross income for tax purposes. As of 8 May 2016, the interest rate for unpaid tax is 8.27%, while the rate for overpaid tax is 1.62%.

Tax pooling

Taxpayers are able to pool their provisional tax payments with those of other taxpayers through an arrangement with a commercial intermediary. Tax pooling allows underpayments to be offset by overpayments within the same pool and *vice versa*.

Tax penalties

An initial late payment penalty of 1% applies if a tax payment is not made on the due date. A further 4% late payment penalty applies if the payment is not made within seven days of the due date. An incremental late payment penalty of 1% is then imposed monthly until payment is made.

Inland Revenue is required to notify a taxpayer the first time their payment is late rather than imposing an immediate late payment penalty. If payment is not made by a certain date, a late payment penalty will be imposed. Taxpayers will be entitled to one notification every two years. After receiving a first warning, Inland Revenue will not send further notifications for two years, and an initial late payment penalty will be imposed in the normal manner.

Shortfall penalties

Shortfall penalties, calculated as a percentage of the tax shortfall resulting from the action or position taken by the taxpayer in a tax return, may also apply.

There is a 50% discount on certain penalties where the taxpayer has a past record of 'good behaviour' and, in certain circumstances, a cap of NZD 50,000 on shortfall penalties for not taking reasonable care or for taking an unacceptable tax position.

Tax audit process

Inland Revenue maintains an active audit programme across all tax types and taxpayer profiles and regularly publishes information about their compliance focus. Often, Inland Revenue audits are preceded by a risk review where Inland Revenue requests information in order to evaluate the risk of non-compliance. Where this review detects an issue that requires further inspection, Inland Revenue will then advise that an audit will be commenced.

Statute of limitations

The general rule is that Inland Revenue has four years from the end of the New Zealand income tax year (31 March) in which the return is filed to re-assess the return, unless the return is fraudulent, wilfully misleading, or omits income of a particular nature or source.

New Zealand

Topics of focus for tax authorities

For multinational corporations, Inland Revenue highlights tax avoidance, transfer pricing, CFCs, and international financing arrangements as key risk areas, in tune with the OECD's current dialogue on the base erosion and profit shifting (BEPS) work. In particular, Inland Revenue is focussing on the following:

- Transfer pricing: lack of transfer pricing documentation, major downwards shifts in profitability, widely differing profits between local entities and their global group members, unsustainable levels of royalties or management fees, transactions with low or no tax jurisdictions, and chronically recurring losses.
- CFCs: technical compliance, possible New Zealand tax residency of CFCs through local management control or director decision making.
- BEPS concerns: taxation of digital goods and services provided over the internet, hybrid mismatches occurring as a result of variances in tax treatment between countries and misuse of tax treaties.
- GST: associated party transactions, non-routine transactions, and zero rating of goods or services.
- Non-residents: transactions with non-residents and non-resident contractors.

For small-to-medium sized enterprises (SMEs), Inland Revenue is focussing on GST errors, employer deductions, NRCT, and other minor filing errors.

Other key focus areas include the following:

- Aggressive tax planning.
- Central and local government.
- Life insurance providers.
- Trusts.
- Fraud and identity theft.
- Charities.
- The property sector.
- Under-reporting income and operating outside the system.

Other issues

International Financial Reporting Standards (IFRS)

The relationship between statutory accounting and taxable income is quasi-dependent. The year of final adoption for IFRS was 2007, and the impact on significant areas of tax law is provided in the *Other issues* section of New Zealand's Corporate tax summary at www.pwc.com/taxsummaries.

United States Foreign Account Tax Compliance Act (US FATCA)

The United States introduced FATCA in 2010. The Act comes into effect in stages from 1 July 2014. The rules require global financial institutions to report details of their US customers to the US Internal Revenue Service (IRS). FATCA aims to reduce tax evasion by US citizens who invest outside of the United States and then fail to declare the investments and the income from those investments.

The US Treasury and the New Zealand government have entered into an inter-governmental agreement (IGA) for the implementation of the rules, which came into force on 3 July 2014. Implementing FATCA under the IGA reduces compliance costs for New Zealand financial institutions by simplifying the reporting process and allowing them to report to and make arrangements directly with the New Zealand Inland Revenue rather than the US IRS. It also generally eliminates the prospect of 30% of payments being withheld, which would be a major business risk.

Significant developments

On 10 December 2015, the Congress of Nicaragua amended section 303 of Law 822 - Tax Law - by deferring the entry into force of the transfer pricing rules until 30 June 2017.

Taxes on corporate income

Nicaragua has a territorial income tax system under which only income generated in, or that causes effects in, Nicaragua is generally subject to income tax. The corporate income tax (CIT) is imposed on a corporation's profits, which consist of business/trading income, and passive income. Capital incomes and capital gains are subject to definitive withholding tax (WHT). General business expenses are allowed as a deduction in computing taxable income.

Corporate income tax (CIT) rate

CIT is levied only on domestic-sourced income at a flat rate of the higher of:

- 30% of net taxable income (i.e. gross taxable income less allowed deductions), or
- a definitive minimum tax of 1% on gross income obtained during the fiscal year.

If the company does not have net income, 30% of net income will not be greater than 1% of gross income.

The law establishes the following exceptions to the 1% definitive minimum tax:

- First three fiscal periods of recently incorporated entities. For tax purposes, the beginning of business operations is when a company generates taxable income.
- Taxpayers whose sales prices are controlled by the government.
- Taxpayers that ceased operations on account of *force majeure*.
- Investments subject to a period of development. The Treasury Ministry must approve such period.

Local income taxes

See *Municipal sales and services tax in the Other taxes section*.

Corporate residence

Legal entities considered as a tax resident must comply with one of the following criteria:

- Registered according to the Laws of Nicaragua.
- Have their fiscal domicile in the territory of Nicaragua.
- Have their place of management located in the territory of Nicaragua.

The legal forms permitted in Nicaragua to constitute a corporation are stock corporations or limited liability companies, either as subsidiaries or branches.

Nicaragua

Permanent establishment (PE)

Law 822 has incorporated a definition of 'permanent establishment' into the Nicaraguan income tax regime. This term means a place through which a non-resident taxpayer wholly or partially carries on business, including, *inter alia*, the following: a place of management; a branch; an office or agent; a factory; a workshop; and a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources.

Such definition also includes a building site or construction or installation project or connected supervision activities, but only if its duration exceeds six months; and the performance of consultancy services, provided that they exceed six months within an annual period.

A PE may also be created where a person other than an agent of independent status acts on behalf of a non-resident taxpayer if:

- this person has in Nicaragua authority to habitually conclude contracts or undertake acts in the name of the non-resident taxpayer, or
- even though this person does not have such authority, this person habitually maintains in Nicaragua a warehouse of goods or merchandise from which this person regularly delivers goods or merchandise in the name of the non-resident taxpayer.

These PE rules will not apply to a branch or PE of non-resident taxpayers operating business activities of marine and air transportation of cargo and passengers, as well as land cargo transportation.

Other taxes

Value-added tax (VAT)

The following transactions are subject to VAT when performed within Nicaragua:

- Supplies of goods.
- Supplies of services.
- Importations of goods.
- Exports of goods and services.

VAT is imposed at a 15% rate on the sale of goods, rendering of services, grant of use of assets, and import of goods. Export of goods and services are subject to a 0% rate.

VAT exemptions are available for certain items, including medicine, real estate transfer, sale of used goods, basic food products, credit instruments, tuition, and textbooks and educational supplies.

Taxpayers may recover VAT paid for the purchase of goods and services used to generate other goods and services subject to VAT. This is known as VAT liquidation, which is determined by subtracting VAT credits paid on transactions needed to generate taxable income for VAT purposes from VAT collected on the sales of goods or the rendering of services. Note that VAT paid on transactions to generate non-taxable income for VAT purposes are not allowed as VAT credits.

The exemption with right to deduct input VAT applies when:

- the input VAT is necessary in the business activity process for selling of goods or provision of services, and
- the tax is properly detailed in the invoice of a legal document.

VAT returns must be filed on a monthly basis, with payment due in full on the same day. Taxpayers registered as high taxpayers (with annual income greater than 60 million

Nicaraguan córdobas [NIO]) must present an advanced bi-weekly VAT return in the first five business days after the 15th day of each month and a definite return in the first 15 days of the following month.

Selective consumption tax

A selective consumption tax is applied to goods that are considered to be non-essential. The tax base is the cost, insurance, and freight (CIF) price for imported items, and the tax is levied and paid only at that stage (based on the list of products published as an appendix to Law 822).

Customs duties

Customs duties relate to the importation of any good within the Nicaragua territory for commercial purposes. The following taxes apply to imports, depending on the product:

- Import Custom Duties (DAI), which are the local tariff liens in the importation of goods agreed to in the Central American Import Tariff.
- Excise Tax (ISC), which is an indirect tax levied on selective consumption of goods (e.g. tobacco cigarettes).
- VAT.

Temporary Admission for Active Processing (TAP) regime

Exporters can apply for the TAP regime, which is designed to allow the importation of goods without payment of duties, import taxes, or other taxes, on condition of being transformed (i.e. subject to any subsequent operation) to be re-exported or exonerated.

Transfer taxes

Nicaragua's tax system does not impose transfer taxes.

Stamp taxes

Stamp duty is levied on certain types of documents issued in Nicaragua.

Payroll taxes

The employer is responsible to withhold and pay employee income tax on a monthly basis through withholding income tax return Form IR-122, according to progressive tax rates.

Social security contributions

In principle, social charges apply to nationals and legal residents from the first day of employment on a monthly basis. Social security contributions are calculated upon the gross salary of the employee, as follows:

	Social security rates (%)				Total
	Pension	Family health	Labour healthcare	War victims	
Employer	9.50	6.00	1.50	1.50	18.50
Employee	4.00	2.25	0	0	6.25

The employer must also pay 2% of its payroll, on a monthly basis, for Training Tax (INATEC).

Municipal sales and services tax

A monthly 1% tax is levied on all sales of goods and rendering of services in each of the municipalities of the country.

Municipal registration tax

An annual 2% tax is levied by each municipality on the average of income received in the months of October, November, and December of the previous year. In the case of the

Nicaragua

incorporation of a new establishment or enterprise, the municipal registration tax is 1% of the capital invested.

Real estate municipal tax

The real estate municipal tax is an annual tax that is levied at a rate of 1% on 80% of cadastral value, as recorded by the government. If the cadastral value is not available, the cost or fiscal appraisal value may be used.

Branch income

Branch income received is subject to the general CIT. The repatriation of income from the branch to the head office in the form of dividends, profits, capital gains, or any other form that suggests the income repatriated is an economic benefit is considered taxable.

Income determination

Taxable income is determined by the sum of all income derived from Nicaraguan sources, less allowable deductions, which generally include all expenses necessary to generate taxable income. Taxable income is computed according to International Financial Reporting Standards (IFRS) and modified, as required, by Nicaraguan income tax law.

Inventory valuation

Last in first out (LIFO), first in first out (FIFO), and the average cost methods are accepted for inventory valuation purposes. Tax authorities must authorise the change of a valuation method.

Capital gains and losses

Capital income and capital gains and losses are subject to definitive WHT and are not treated as ordinary taxable corporate income. The general rule is that capital income and capital gains for tax residents are subject to 10% WHT; however, the following exceptions apply:

- Capital gains derived from the sale or transfer of Nicaraguan shares that took place out of the territory of Nicaragua are subject to 5% WHT over the transaction value.
- Capital income derived from the lease of fixed assets and non-fixed assets for tax residents are subject to 7% and 5% WHT, respectively; in the case of tax non-residents, they are subject to 10.5% and 7.5% WHT, respectively.
- Capital gains derived from the transfer of assets subject to annotation in the public registry (e.g. real estate, vehicles) will be subject to a WHT based on the amount of the transaction, as follows:

Good value (USD*)		WHT rate (%)
From	Through	
0.01	50,000.00	1
50,000.01	100,000.00	2
100,000.01	200,000.00	3
200,000.01	or more	4

* United States dollars

Dividend income

Stock dividends paid by Nicaraguan entities to resident shareholders are subject to a 10% definitive WHT (15% in the case of non-resident shareholders).

Interest income

Interest received from a Nicaraguan source by residents of Nicaragua, as well as the interest gained by residents from deposits placed in the national financial system, is subject to a 10% WHT (15% in the case of non-residents).

Interest earned on government bonds and securities is considered taxable income subject to a 10% WHT.

The WHT will not apply if the beneficiary of the interest payment is included in the list of exempt International Credit Institutions and Agencies or Foreign Governments Development Institutions, provided in the Ministerial Agreement 24-2014, which requires that the beneficiary should request the Finance and Public Credit Ministry for the corresponding exemption recognition.

Foreign income

Business enterprises are subject to CIT only on Nicaraguan-source income.

Deductions**Depreciation**

Depreciation must be computed using the straight-line method. Depending on the type of construction and the estimated life of fixed assets, annual rates for depreciation are as follows:

Asset	Rate (%)
Buildings	3/5/10
Vehicles	12/20/33
Plant and equipment	10/14/20
Other assets	10/20/50

N

Alternative method of depreciation

Taxpayers under the TAP regime (*see Customs duties in the Other taxes section*) may, at their convenience, request a different depreciation rate (i.e. accelerated depreciation) from tax authorities. Used fixed assets acquired abroad may also be subject to a different depreciation rate.

Goodwill

Goodwill, meaning the excess paid over book value in a transaction, can be deductible for CIT purposes if the capital gain is considered in the seller's CIT return. However, the tax authorities must authorise the tax periods in which the goodwill will be amortised.

Start-up expenses

Start-up expenses are amortised over a three-year period of time after the beginning of business operations.

Interest expenses

As a general rule, deduction of interest is allowed when derived from loans of financial institutions; however, the interest paid derived from loans of non-financial institutions will be deductible up to the amount resulting from applying the average lending rate of the national bank at the date of obtaining the loan, if fixed, or at the date of each payment, if variable.

In order for interest paid to a non-resident to be deductible, the corresponding 15% WHT must be withheld and paid.

Nicaragua

Bad debt

Corporations are allowed a deduction for receivables as an allowance for doubtful accounts as long as there is supporting documentation of the credit, identification documents of the debtor and creditor, and administrative and judicial collection proof.

Charitable contributions

A deduction is allowed, at up to 10% of the corporation's income, for charitable contributions made to the government and its institutions, the Red Cross, and other organisations.

Compensation

A deduction of up to 10% of the accumulated profits before this expense is allowed for payments made to employees as bonuses or in addition to their salaries or wages.

Life insurance

A deduction is allowed for employee insurance payments made.

Fines and penalties

Penalties or charges made by tax, customs, social security, or municipal authorities are not deductible for CIT purposes.

Taxes

In principle, income tax expense is not deductible for CIT purposes. Municipal or local taxes (i.e. real estate tax, monthly sales and services tax, annual registration tax) are deductible from CIT.

Net operating losses

Losses may be carried forward and deducted from future profits, for up to three years. The carryback of losses is not allowed.

Payments to foreign affiliates

Payments made from affiliates to foreign related parties are deductible for CIT purposes, provided the following requirements are met:

- The expenses (i.e. royalties, interest, and services) are needed to generate taxable income.
- The expenses are duly supported (e.g. agreements, invoices, payment receipts).
- The expenses are incurred within the fiscal period.
- The WHT is applied and paid to the tax authorities.

Group taxation

Group taxation is permitted only when previously approved by the tax authorities. The economic group must submit a business case to the tax administration justifying the economic reason of their request.

Transfer pricing

The Nicaragua tax system recognises transfer pricing as a method of trading. Law 822 regulates transfer pricing rules based on the Organisation for Economic Co-operation and Development (OECD) regulations (including contemporaneous documentation requirements) and will become effective on 30 June 2017.

Thin capitalisation

The Nicaragua tax system does not impose any form of thin capitalisation rules.

Controlled foreign companies (CFCs)

Nicaragua does not have any CFC rules.

Tax credits and incentives

Foreign tax credit

The Nicaraguan tax system does not recognise any form of foreign tax credit.

Tourism incentives

Under present law, and on a case-by-case basis, new companies with tourist activities may request and the government may grant, during the facilities' construction phase, total exemption of customs duties and partial or total CIT exemption for a maximum period of ten years.

Renewable energy incentives

The renewable energy sector is covered by a special law with tax benefits or exemptions in CIT, VAT, customs duties, and municipal tax.

Free trade zones (FTZs)

The Nicaraguan government amended Decree No. 46-91, and enacted Law 915/20115 - Export Free Trade Zone Law, which provides for several types of export free zones (e.g. for processing, industrial production, logistics and outsourcing services).

Although the new law does not bring major changes with respect to Decree No. 46-91, it has modified the tax exemption period to FTZ users, and, as of the publication of this new law (i.e. 16 October 2015), they will qualify for a ten-year income tax holiday, which can be extended for an additional ten years. Once the full tax exemption expires, qualifying companies will be entitled to a 60% exemption. These incentives are subject to the approval of the National Free Zone Commission.

Qualifying companies are entitled to exemptions from capital tax and stamp duties, indirect and excise taxes, export taxes on locally made products, municipal taxes, and the immovable property transfer tax and capital gains tax on the alienation of immovable property if they are closing their operations in the FTZ and the immovable property will remain there.

Raw materials, machinery, equipment, spare parts, samples, molds, and accessories required for the operation of companies in the FTZs are exempt from import duties.

Withholding taxes

Payments to residents

Dividend payments to resident shareholders (corporations or individuals) are subject to 10% WHT.

Payments of royalties to resident individuals or corporations are subject to 10% WHT.

Interest paid to a resident individual or legal entity is subject to 10% WHT.

Professional services provided by an individual are subject to 10% WHT.

Payments on the local acquisition of goods and services are subject to 2% WHT.

Payments to non-residents

Payments of dividends, interest, royalties, and service fees to non-resident corporations are subject to WHT, as follows:

Payment	WHT rate (%)
Dividends	15

Nicaragua

Payment	WHT rate (%)
Interest:	
Non-financial companies	15
Financial companies	15
Royalties	15
Services provided in general	15
TV and Radio programming or subscription	15

Payments of any kind of income to non-resident individuals are subject to WHT of 15%.

In principle, Nicaragua has not signed any agreement or treaty with any country to avoid double taxation.

Transactions with tax havens

Expenses that are paid by Nicaraguan residents to an individual or entity that is a resident of a tax haven are subject to a 17% WHT. For this purpose, a tax haven may be:

- a foreign territory where the income tax is 'substantially' lower than the Nicaraguan income tax
- a foreign country or territory that has been listed, for the corresponding taxable year, as an un-cooperative jurisdiction by the Global Forum on Transparency and Exchange on Information for Tax Purposes, or
- a foreign territory that is listed by the Nicaraguan Public Credit and Finance Ministry.

Tax administration

Taxable period

The standard tax year in Nicaragua is the calendar year (from 1 January to 31 December); however, companies can obtain authorisation from the tax authorities in order to change or have a different year-end: 31 March, 30 June, or 30 September.

Tax returns

Without exception, all corporations are required to file CIT returns for a fiscal year within the following three months after the fiscal year-end.

Payment of tax

Corporations shall pay fiscal-year income tax in monthly advance payments. The monthly payable amount is calculated as 1% of gross income.

Final CIT payment is due with the final CIT return (i.e. within the following three months after the fiscal year-end).

Tax audit process

The tax authority is entitled to conduct a tax audit of the taxpayer when considered necessary. The taxpayer has the obligation to submit before the tax auditor the corporate information and documents related to the generation of income.

Statute of limitations

The statute of limitation in Nicaragua is up to the last four fiscal ended periods.

Topics of focus for tax authorities

In Nicaragua, tax audits are determined randomly; however, high taxpayers or taxpayers who request reimbursement of tax credit are more likely to be audited. For corporate tax compliance, the tax authority normally seeks information in regards to taxpayer operations through the advance income tax returns.

Significant developments

A new list of pioneer industries and products has been approved

The federal government of Nigeria embarked on a review of the pioneer incentive scheme in order to address identified lapses, abuses, and loopholes. Under the scheme, eligible companies are exempted from corporate income tax (CIT) for three years, which may be extended for an additional one or two years. The Ministry of Industry, Trade, and Investment has now released a list of only 44 industries and products that are eligible for the pioneer status. Irrespective of the introduction of the new list, the Federal Executive Council is reviewing the pioneer incentive and has suspended all pending applications for the incentive. It is not clear how long this suspension will last before the regulator is allowed to consider new and pending applications.

Nigeria joins the Organisation for Economic Co-operation and Development (OECD) Convention on Mutual Administrative Assistance in Tax Matters

The Nigerian government ratified the Convention on Mutual Administrative Assistance in Tax Matters, an initiative of the OECD. The Convention is designed to facilitate exchange of information on tax matters between the tax jurisdictions of the signatory countries and is in force from 1 September 2015.

The ratification of the Convention is a significant step in the administration of taxes in Nigeria. This is likely to give the Federal Inland Revenue Service (FIRS) new lines of enquiry about the tax affairs of multinational companies operating in Nigeria. It also means that the FIRS must surrender itself for peer review and must meet a minimum standard of tax administration by global benchmark.

The new OECD base erosion and profit shifting (BEPS) action plans and its impact in Nigeria

The OECD released its final BEPS package containing measures that will significantly change existing international tax rules. The report is the result of a two-year work and extensive consultations with a broad range of stakeholders, including Nigeria, that participated in the OECD Committee on Fiscal Affairs.

It is expected that different countries will begin to take steps to implement the BEPS recommendations through changes to existing legislation. Although Nigeria is not a member of the OECD, the BEPS documents will have an impact on the Transfer Pricing Guidelines as contained in the Nigerian Transfer Pricing Regulations.

A new order has been issued to amend the approved list of taxes and levies

The Schedule to the Taxes and Levies (Approved List for Collection) Act has been amended in an official gazette issued in May 2015 by the Finance Minister. The new Order amends the existing list of taxes and levies to be collected by the three tiers

Nigeria

of government and seeks to harmonise tax collection between the states and local governments. The changes are effective from 26 May 2015.

Nigeria is set to ratify double tax treaties (DTTs) with South Korea, Spain, and Sweden

The tax treaties with South Korea, Spain, and Sweden are still being ratified.

Stamp duties payable on banking transactions

The Central Bank of Nigeria has directed all deposit money banks and financial institutions to commence the charging of 50 Nigerian naira (NGN) on all receipts issued as an acknowledgement of banking transactions on electronic transfers and teller deposits of NGN 1,000 and above.

Taxes on corporate income

Resident companies are liable to CIT on their worldwide income while non-residents are subject to CIT on their Nigeria-source income.

The CIT rate is 30%, assessed on a preceding year basis (i.e. tax is charged on profits for the accounting year ending in the year preceding assessment).

Investment income paid by a Nigerian resident to a non-resident is sourced in Nigeria and subject to withholding tax (WHT) at source, which serves as the final tax.

In respect of business profits, a non-resident company that has a fixed base or a permanent establishment (PE) in Nigeria is taxable on the profits attributable to that fixed base. As such, it is required to register for CIT and file its tax returns. Any WHT deducted at source from its Nigeria-source income is available as offset against the CIT liability.

Small company rates

For small companies in the manufacturing industry and wholly export-oriented companies with turnover not exceeding NGN 1 million, the CIT rate is reduced to 20% in the first five calendar years of operation.

Petroleum profit tax (PPT)

PPT is a tax on the income of companies engaged in upstream petroleum operations *in lieu* of CIT.

The PPT rates vary as follows:

- 50% for petroleum operations under production sharing contracts (PSC) with the Nigerian National Petroleum Corporation (NNPC).
- 65.75% for non-PSC operations, including joint ventures (JVs), in the first five years during which the company has not fully amortised all pre-production capitalised expenditure.
- 85% for non-PSC operations after the first five years.

Tertiary education tax

Tertiary education tax is imposed on every Nigerian resident company at the rate of 2% of the assessable profit for each year of assessment. The tax is payable within two months of an assessment notice from the FIRS. In practice, many companies pay the tax on a self-assessment basis along with their CIT.

For companies subject to PPT, tertiary education tax is to be treated as an allowable deduction. For other companies, income/profit taxes are not deductible in arriving at

taxable income. Non-resident companies and unincorporated entities are exempt from tertiary education tax.

Minimum tax

Minimum tax is payable by companies having no taxable profits for the year or where the tax on profits is below the minimum tax. However, companies in the first four calendar years of business, companies engaged in the agriculture business, or companies that have foreign equity capital of at least 25% are exempt from minimum tax.

Minimum tax payable is calculated as follows:

- Where the turnover of the company is NGN 500,000 or below, minimum tax is the highest of:
 - 0.5% of gross profits
 - 0.5% of net assets
 - 0.25% of paid-up capital, or
 - 0.25% of turnover of the company for the year.
- Where the turnover is higher than NGN 500,000, minimum tax is the highest of the calculations listed above plus 0.125% of turnover in excess of NGN 500,000.

Alternative tax on distribution

There is a tax on distribution where a company pays a dividend in excess of its taxable profit. Such a company will be charged tax on the dividend paid as if the dividend is the taxable profit of the company for that year of assessment.

Enforcement of advance CIT on interim dividends

The new leadership at the FIRS has commenced the strict enforcement of advance CIT on interim dividends. Companies that declare interim dividends are required by the law to be subject to advance CIT at 30% of the interim dividend paid. The advance CIT is creditable against the final CIT computed at the end of the year.

Alternative tax on deemed profit

The law allows the FIRS to assess and charge companies to tax on a fair and reasonable percentage of turnover under the following circumstances:

- When the trade or business produces no assessable profits.
- When the trade or business produces assessable profits that, in the opinion of the Board of the FIRS, are less than might be expected to arise from that trade or business.
- When the true amount of the assessable profits of the company cannot be ascertained.

Local income taxes

CIT is payable only to the federal government. State governments collect income taxes of individuals and unincorporated entities, while local governments are only allowed to collect levies and rates but not income tax.

Corporate residence

A company is considered resident in Nigeria if such a company is registered or incorporated under the Companies and Allied Matters Act. This means that a company formed outside Nigeria under the laws in force in the foreign territory will be considered as a non-resident company for CIT purposes.

Permanent establishment (PE)

Fixed base is not defined but is generally considered to be a location with a degree of permanence. The following would generally not be considered to be a fixed base:

Nigeria

- The use of facilities solely for the purpose of storage or display of goods or merchandise.
- The use of facilities solely for the collection of information.

Other activities that could trigger a tax presence in Nigeria include a dependent agency arrangement, execution of a turnkey project, or artificial arrangements between related parties.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 5%. The government has confirmed that this rate will not change in 2016.

Zero-rated items include non-oil exports, goods and services purchased by diplomats, and goods and services purchased for use in humanitarian donor-funded projects. Exempt items include plants and machinery for use in export processing zones (EPZs) or free trade zones (FTZs), basic food items, medical products and services, pharmaceutical products, books and educational materials, and exported services. Commissions on stock market transactions are also exempted from VAT.

Government agencies and oil and gas companies are required to deduct at source VAT charged by their suppliers and remit it to the tax authority. All other organisations are required to collect VAT charged on their invoices from their customers for filing and payment to the tax authority.

The FIRS recently implemented a platform for auto tracking and remittance of VAT known as FIRS VAT-Collect. Some of the intended users of the system are domestic airlines (for instant remittance of VAT on their ticket sales) and other retailers. The effective compliance date for all domestic airlines to migrate to the VAT platform was September 2015.

Customs duties

Customs duties in Nigeria are levied only on imports. Rates vary for different items, typically from 5% to 35%, and are assessed with reference to the prevailing Harmonized Commodity and Coding System (HS code).

Excise duties

Excise duty is applicable on beer and stout, wines, spirits, cigarettes, and homogenised tobacco manufactured in or imported into Nigeria at 20%.

Property taxes

Property taxes in Nigeria are usually levied annually by the state government with varying rates depending on the state and the location of the property within the state. The two major property taxes are governor's consent fee and land registration fee. In Lagos (which is the economic hub of Nigeria), governor's consent fee, land registration fees, and other levies payable to the state give rise to a total levy of 3% of the fair value of the land.

Also, Right of Occupancy fee and tenement rates are chargeable by state and local government authorities.

Stamp duties

Under the Stamp Duty Act, stamp duty is payable on any agreement executed in Nigeria, or relating, whatsoever, to any property situated in or to any matter or thing done in Nigeria. Instruments that are required to be stamped under the Stamp Duties Act must be stamped within 40 days of first execution.

Stamp duty is chargeable either at fixed rates or *ad valorem* (i.e. in proportion to the value of the consideration), depending on the class of instrument. Stamp duty is imposed at the rate of 0.75% on the authorised share capital at incorporation of a company or on registration of new shares.

All deposit banks and financial institutions are required to charge stamp duties of NGN 50 on every eligible transaction above NGN 1,000. There are exemptions for transactions between accounts held by the same bank customer and for salary accounts.

Capital gains tax (CGT)

Gains accruing to a chargeable person (individual or company) on the disposal of chargeable assets shall be subject to tax under the CGT Act at the rate of 10%. There is no distinction between long-term and short-term gains and no inflation adjustment to cost for CGT purposes.

All forms of assets, including options, debts, goodwill, and foreign currency, other than those specifically exempt, are liable for CGT. The gains on the disposal of shares are exempt from CGT.

CGT is applicable on the chargeable gains received or brought into Nigeria in respect of assets situated outside Nigeria.

Capital losses are not allowed as an offset against chargeable gains accruing to a person from the disposal of any assets.

Information technology levy

A company with an annual turnover of NGN 100 million or more is required to pay 1% of its profit before CIT as information technology tax. This levy is deductible for CIT purposes when paid (typically in the year of assessment following that in which the payment was made).

This tax is applicable to:

- Banking and other financial activities, including capital and money market operators, mortgage institutions, and micro-finance banks.
- Insurance activities, including brokerage.
- Pension fund administration, pension management, and related services.
- GSM service providers and telecommunication companies.
- Cyber and internet services providers.

Levy on contracts awarded in the upstream oil and gas sector

The Nigerian Content Development Act was introduced to increase the level of Nigerian participation in the oil and gas industry. The Act imposes a levy of 1% on every contract awarded in the upstream oil and gas sector of the economy. Any violation of the Act is liable for a fine of 5% of the contract value and may result in outright cancellation of the contract.

Payroll contribution

Under the Employee Compensation Act, all employers were required to contribute 1% of their payroll cost in the first two years of commencement of the Act (2010 to 2012). Subsequently, assessments were expected to be issued by the Nigeria Social Insurance Trust Fund, the body empowered to administer and implement the Act. In practice, a contribution of 1% of payroll continues to apply.

Pension contributions

Employers with at least 15 employees are required to participate in a contributory pension scheme for their employees. The minimum contribution is 18% of monthly emolument (with a minimum contribution of 10% by the employer and 8% by

Nigeria

the employee). If the employer decides to bear all the contribution, the minimum contribution is 20% of monthly emolument. Mandatory and/or voluntary contributions by the employers are deductible for CIT purposes.

National Housing Fund (NHF) contributions

NHF contributions are applicable to Nigerian employees earning a minimum of NGN 3,000 *per annum*. The employer is required to deduct 2.5% of basic salary from employees earning more than NGN 3,000 *per annum* and remit it to the Federal Mortgage Bank of Nigeria within one month of deduction.

Branch income

Except in rare circumstances, it is illegal for a non-resident company to operate through a branch in Nigeria. The Nigeria-source income of a non-resident company is taxable at the CIT rate of 30% (*see the Taxes on corporate income section for more information*).

Income determination

The following income is subject to CIT in Nigeria:

- Profits accruing in, derived from, brought into, or received in Nigeria in respect of any trade or business.
- Dividends, interest, royalties, discounts, charges, or annuities.
- Rent or any premium arising from the right granted to any person for the use or occupation of any property, where applicable.
- Any source of annual profits or gain not falling within the preceding categories.
- Fees, dues, and allowances (wherever paid) for services rendered.
- Any amount of profits or gains arising from the acquisition or disposal of short-term money instruments like federal government securities, treasury bills, treasury or savings certificates, debenture certificates, and treasury bonds.

Inventory valuation

The first in first out (FIFO) valuation method is commonly used. Average and standard cost methods are also allowed, but last in first out (LIFO) is not permitted. Other than the accounting requirement in the local generally accepted accounting principles (GAAP), there are no special statutory provisions for inventory valuation.

Capital gains

Capital gains are not subject to CIT, but may be subject to CGT. *See Capital gains tax in the Other taxes section for more information.*

Dividend income

Dividends received by a Nigerian resident company from another Nigerian resident company are taxable at source (*see the Withholding taxes section for more information*) and not subject to further tax.

Dividends received from non-resident companies are taxable except if repatriated into Nigeria through government approved channels (i.e. any financial institution authorised by the Central Bank of Nigeria to deal in foreign currency transactions).

Dividends received from small manufacturing companies are exempt for CIT purposes during the first five years of operation. Dividends from investments in wholly export-oriented businesses are also exempt.

Stock dividends

Stock dividends (bonus shares) are not taxable at source or included in the taxable income of the recipient company.

Interest income

Interest payable to a non-resident investor is liable to WHT at 10%, which is the final tax. Recipients who are resident in a country with a DTT with Nigeria enjoy a reduced rate of 7.5%. Interest received by a Nigerian company is liable to tax at the CIT rate of 30% with tax withheld at 10% available as an offset against the final tax liability.

Interest on government bonds is tax exempt. Interest on foreign currency domiciliary accounts is also exempt.

Other significant items

The following entities' income or profit is exempt for CIT purposes:

- Statutory or registered friendly societies.
- Co-operative societies registered under any ecclesiastical, charitable, or education establishments of a public character.
- Profit of a company established within an EPZ or FTZ (*see the Tax credits and incentives section*).
- Profit of a registered trade union.
- Export profits, as long as proceeds are brought into Nigeria through government approved channels and invested in raw materials, spare parts, and plant and machinery (*see Export incentives in the Tax credits and incentives section*).

Foreign income

A Nigerian resident company is taxable on its worldwide income. On the other hand, a non-resident company is subject to tax only on income derived from Nigeria.

Dividends, interest, rents, and royalties earned abroad and brought into Nigeria through government-approved channels are exempt from Nigerian tax; otherwise, the income is taxable at the CIT rate of 30% and tertiary education tax at 2%. Government-approved channels mean the Central Bank of Nigeria and any bank or financial institution authorised to carry out foreign exchange transactions.

Taxable foreign income earned by a Nigerian tax resident entity cannot be legally deferred.

Deductions

Expenses are deductible for CIT purposes if they are wholly, reasonably, exclusively, and necessarily incurred for the business or trade.

Depreciation

Capital allowances are calculated on a straight-line basis. Capital allowances claimable in any year are restricted to two-thirds of assessable profits for all companies, except companies in the manufacturing and agricultural sectors, which are excluded from this restriction.

The following are the capital allowance rates on fixed assets (qualifying expenditures):

Qualifying expenditure	Initial allowance (%)	Annual allowance (%)
Building (industrial and non-industrial)	15	10
Furniture and fittings	25	20
Plant expenditure (1)	50/95	0/25

Nigeria

Qualifying expenditure	Initial allowance (%)	Annual allowance (%)
Mining expenditure	95	0
Plantation equipment	95	0
Motor vehicle (2)	50/95	0/25
Ranching and plantation expenditure	30	50
Housing estate expenditure	50	25
Research and development (R&D)	95	0

Notes

1. 95% initial allowance for plant used in agricultural production; others 50%.
2. 95% initial allowance is granted for motor vehicles used for public transportation if the company has a fleet of at least three buses; all other motor vehicles 50%.

The initial allowance is first deducted, and the balance is written off on a straight-line basis over a fixed period, depending on the rates of annual allowance. There is a requirement that assets not yet disposed of cannot be fully written off in the books. A nominal amount of NGN 10 per asset must be retained in the books till the assets are disposed of. However, where 95% has been claimed as an initial allowance, the 5% balance is the value that must be maintained in the books until the final disposal of the asset.

When assets are sold, the proceeds over the tax written-down value are taxed at 30% to the extent of the allowances already claimed.

Goodwill

There is no tax deduction for goodwill.

Start-up expenses

Start-up expenses are not specifically stated as non-deductible in the tax law, but, in practice, they are usually not allowed by the tax authority. This is based on the assumption that start-up expenses are not directly attributable to any taxable income of the company, which is a fundamental condition for tax deductibility of expenses.

Interest expense

Interest on money borrowed and employed in producing taxable income is a deductible expense. There is currently no thin capitalisation regulation in Nigeria, but general anti-avoidance rules are usually applied to limit deductible interest on related-party loans.

Bad debt

Bad debt incurred in the course of trade is deductible.

Charitable contributions

Donations are deductible, subject to the provisions of the law.

Fines and penalties

Any punitive payments for default or violation of law are expressly not deductible for CIT purposes. In practice, this is usually extended to include default surcharges and other avoidable fines.

Taxes

Any tax on income or profit is not deductible except where such tax was paid on profit earned outside Nigeria. In this case, if the source country has no DTT with Nigeria, the foreign tax paid is allowed as a deduction for CIT purposes. State and local taxes (business rates) and levies may be deducted from taxable income.

Other significant items

Other deductible expenses include the following:

- Sum payable by way of interest on capital borrowed.
- Rent for the period.
- Expenses incurred in respect of salary and wages.
- Expenses incurred for repair of assets.
- Liability incurred for purpose of trade.
- R&D costs.

Net operating losses

Losses can be carried forward indefinitely, except for insurance companies where losses can only be carried forward for four years. Losses made from one line of business cannot be relieved against another line of business. Losses cannot be carried back.

Payments to foreign affiliates

Payments considered to be artificial are not deductible for CIT purposes. Royalties, management fees, and technical fees require the approval of the National Office for Technology Acquisition and Promotion (NOTAP) for exchange control purposes and for tax deduction. NOTAP-approved royalties and technical fees are limited to a range of 1% to 5% of net sales, while management fees are limited to a range of 2% to 5% of profit before tax, and consultancy fees are limited to 5% of total project cost. Technical fees are limited to approved man-hour rates.

Trademark fees are disallowed where the trademark owner has more than 75% equity participation in the local company.

Group taxation

There are currently no provisions for group taxation, group relief, or group filing of tax returns in Nigeria. Each legal entity within a group is treated as distinct and separate for CIT purposes.

Transfer pricing

The transfer pricing regulations are applied in a manner consistent with the arm's-length principle in Article 9 of the United Nations (UN) and OECD Model Tax Conventions on Income and Capital; and the OECD Transfer Pricing Guidelines for Multi-national Enterprises and Tax Administrations. However, where there are inconsistencies between the model conventions and the local legislation, the provisions of the relevant local tax laws shall prevail.

The rules cover all transactions between 'connected taxable persons', which is broadly defined to include individuals, PEs created by head offices, subsidiaries, associates, partnerships, joint ventures, and trusts to the extent that they participate directly or indirectly in the management, control, or capital of another, or both of which have common control, management, or shareholders. Specifically, the rules apply to sale and purchase of goods; lease or sale of tangible assets; licensing, transfer, or use of intangible assets; provision of services; lending or borrowing of money; manufacturing arrangements; and any transaction that may affect profit and loss or any other incidental matter.

The rules are applicable to both domestic and cross-border related-party transactions.

Thin capitalisation

Nigeria has no thin capitalisation rules. However, interest charged between related parties is expected to reflect arm's-length transactions. The tax authority may disallow any related-party interest considered to be excessive.

Note that the tax authorities are currently considering introducing a formal thin capitalisation rule with a likely 3:1 debt-to-equity ratio.

Nigeria

Controlled foreign companies (CFCs)

There are no specific CFC rules in Nigeria.

Tax credits and incentives

Nigeria has various tax incentives intended to encourage investment in key sectors of the economy, as follows.

Tax holidays

Pioneer companies investing in specified industrial activities may, on application, be granted a tax holiday for three years initially, which may be extended for up to two years upon satisfaction of specified conditions. Examples of economic activities that may be granted a tax holiday include glass and glassware manufacturing, manufacturing of fertilisers, and steel manufacturing.

A new company that engages in the mining of solid minerals is exempt from tax for the first three years of its operation.

Rural location incentives

Certain incentives are available to companies located in rural areas. The incentives take the form of tax reductions at graduated rates for enterprises located at least 20 kilometres from available electricity, water, and tarred roads.

Export incentives

Export processing zones (EPZs) and free trade zones (FTZs) are locations within Nigeria designated by the government as free areas where export trade activities can be carried on free of tax and foreign exchange restrictions.

A company that is engaged in an approved manufacturing activity in an EPZ and incurs expenditures in its qualifying building and plant equipment is entitled to 100% capital allowance in that year of assessment.

In addition, a company that is 100% export oriented but located outside an EPZ will enjoy a three year tax holiday, provided the company is not formed by splitting up or reconstruction of an already existing business and the export proceeds form at least 75% of its turnover.

Profits of companies whose supplies are exclusively inputs to the manufacture of products for export are exempt from tax. Such companies are expected to obtain a certificate of purchase of the input from the exporter in order to claim tax exemption.

Where plant and machinery are transferred to a new company, the tax written down value of the asset transferred must not exceed 25% of the total value of plant and machinery in the new company. The company should also repatriate at least 75% of the export earnings to Nigeria and place it in a Nigerian domiciliary account in order to qualify for a tax holiday.

Profits of any Nigerian company in respect of goods exported from Nigeria are exempt from tax, provided that the proceeds from such exports are repatriated to Nigeria and are used exclusively for the purchase of raw materials, plant, equipment, and spare parts.

In order to streamline the administration of permissible taxes within the tax free zones, the Oil and Gas Free Zone Authority (OGFZA) has established the Free Zones Tax Administration (FZTA) Unit with effect from January 2015. Going forward, all tax matters relating to the free zones will be coordinated by the FZTA.

Gas utilisation incentives

Companies engaged in gas utilisation are entitled to:

- A tax-free period for up to five years.
- Accelerated capital allowance after the tax-free period.
- Tax-free dividends during the tax-free period.

Tourism incentives

25% of the income derived from tourism by hotels in convertible currencies is exempt from tax if such income is put in a reserve fund to be utilised within five years for expansion or construction of new hotels and other facilities for tourism development.

Interest incentives

Interest accruing on deposit accounts of a non-resident company is tax-exempt, provided the deposits are made by transfer of funds to Nigeria on or after 1 January 1990 and the depositor does not become non-resident after making the deposit while in Nigeria.

Interest on foreign-currency domiciliary accounts is also tax-exempt.

Interest on any foreign loans, and interest on any loan granted by a bank for the purpose of manufacturing goods for export, is exempt from tax as follows:

Repayment period	Moratorium	Exemption (%)
Over 7 years	Not less than 2 years	100
5 to 7 years	Not less than 1.5 years	70
2 to 4 years	Not less than 1 year	40

Interest on any loan granted by a bank to a company engaged in agricultural trade, fabrication of local plant and machinery, or as working capital to any cottage industry is 100% tax free if the loan has a moratorium of not less than 18 months and the rate of interest is not more than the base lending rate.

Investment allowances

An investment allowance of 10% on the cost of qualifying expenditures in respect of plant and machinery is available as a deduction from assessable profits in the year of purchase. There is no restriction to the full claim of capital allowance in any year of assessment for companies in the mining, manufacturing, and agricultural sectors.

Foreign tax credit

Nigeria does not grant automatic tax credits to Nigerian companies for foreign tax on income derived from other countries. The Nigerian tax laws already provides for tax exemption for dividends, interest, and royalties.

Foreign tax credits are only granted based on the provisions of existing DTTs and partial credits as applicable to Commonwealth countries. In this regard, full tax credits are usually provided for in the DTTs. Tax credits for members of Commonwealth countries are granted at up to half the Nigerian CIT rate.

Withholding taxes

WHT is applicable on specified transactions as indicated below. There is no distinction between the WHT rates for resident companies or individuals and non-resident companies or individuals.

Nigeria

Types of payment	WHT for companies (%)	WHT for individuals (%)
Dividends, interest, and rents	10	10
Directors fees	N/A	10
Hire of equipment	10	10
Royalties	10	5
Commission, consultancy, technical, service fees	10	5
Management fees	10	5
Construction/building (excluding survey, design, and deliveries)	2.5	5
Contracts other than sales in the ordinary course of business	5	5

The period for filing WHT is 21 days after the duty to deduct arose for deductions from companies.

The penalty for failure to deduct or remit tax is 10% of the amount not deducted/remitted.

Note that companies are required to submit, in electronic form, a schedule of all their suppliers for the month showing the tax identification number (TIN), address of the suppliers, the nature of the transaction, WHT deducted, and invoice number.

Double tax treaties (DTTs)

Nigeria has DTTs with the countries listed in the table below. Nigeria also has tax treaties with Kenya, Mauritius, and Poland; however, these treaties have not been ratified by the Nigerian National Assembly. The tax treaties with South Korea, Spain, and Sweden are still being ratified.

Recipient	WHT (%)			
	Dividend	Interest	Royalties	Management/Technical fees
Non-treaty	10	10	10	10
Treaty:				
Belgium	7.5	7.5	7.5	10
Canada	7.5	7.5	7.5	10
China	7.5	7.5	7.5	10
Czech Republic	7.5	7.5	7.5	10
France	7.5	7.5	7.5	10
Netherlands	7.5	7.5	7.5	10
Pakistan	7.5	7.5	7.5	10
Philippines	7.5	7.5	7.5	10
Romania	7.5	7.5	7.5	10
Slovakia	7.5	7.5	7.5	10
South Africa	7.5	7.5	7.5	10
South Korea *	7.5	7.5	7.5	10
Spain *	7.5	7.5	7.5	10
Sweden *	7.5	7.5	7.5	10
United Kingdom	7.5	7.5	7.5	10

* The tax treaties with South Korea, Spain, and Sweden are still being ratified.

Tax administration

Taxable period

The taxable period is the fiscal year, which runs from 1 January to 31 December.

Tax returns

Companies are required to register for tax and file their audited accounts and tax computations with the FIRS within six months of their financial year end on a self-assessment basis or 18 months after incorporation (whichever comes first). A company may file an application for extension of filing tax returns for up to two months at the discretion of the FIRS.

Upon registration, a company is issued a TIN, which serves as the company's file number for all federal taxes and future correspondence with the FIRS.

The company must file the following documents with the tax authority on an annual basis:

- Tax computation for the relevant year of assessment.
- The audited financial statements for the respective period; this should be in conformity with the International Financial Reporting Standards (IFRS).
- A duly completed and signed self-assessment form for CIT.
- Evidence of remittance of the income tax liability (partly or in full).

PPT is payable on an actual year basis. Estimated tax returns must be filed within two months of the fiscal year. Actual tax returns should be filed within five months after the end of the accounting period, that is, not later than 31 May.

Assessment

Nigerian companies file their tax returns based on a self-assessment system where the taxpayer prepares its annual returns and determines its tax liability. However, the FIRS may apply a best of judgment (BOJ) assessment where it is of the opinion that the tax returns filed are deliberately misstated or where no returns are filed within the stipulated period.

Payment of tax

CIT

A company that files its self-assessment within six months after the accounting year-end can apply to the FIRS in writing to pay its income tax in instalments. The maximum number of instalments the FIRS may approve is three. Evidence of the first instalment has to accompany the tax returns filed in order to qualify for the instalment payment. However, all payments have to be made not later than eight months after the financial year-end.

Assessments are made on a preceding year basis. This means that the financial statements for a period ended in 2015 will form the basis for the 2016 year of assessment.

PPT

Payments with respect to PPT in any accounting period of 12 months are made in 12 instalments, with a final 13th instalment (if there is an underpayment). The first instalment for the year is due by the end of March.

Penalty for non-compliance

Failure to file CIT returns attracts a penalty of NGN 25,000 for the first month and NGN 5,000 for each subsequent month of default. Late payment of CIT attracts a 10% penalty and interest at the commercial rate.

Nigeria

Late submission of PPT returns attracts an initial penalty of NGN 10,000 and NGN 2,000 for each day such failure continues, while late payment of tax attracts a penalty of 5% of the tax not paid.

Tax audit process

Generally, the tax authority will commence a desk examination of a taxpayer's returns immediately after filing. This may be followed by a tax monitoring exercise whereby tax officers visit taxpayers to conduct an interview and on-site high level review of their tax affairs.

Random or specific tax audit may be carried out usually within six years of filing tax returns. In unusual cases, a back-duty tax investigation may be conducted for more than six years, especially where a tax fraud or wilful default is suspected.

In the past, tax audits took a long time to conclude, usually between three to five years. However, the tax authorities are seeking ways to improve the average turnaround time.

New methodology for tax audit

FIRS has now implemented an audit methodology that contains a dashboard for monitoring the progress of tax audits. Altogether there is a timescale of three months from commencement of audit to completion broken into one or two weeks for different activities (field work, initial report, reconciliation meetings, assessment). Colour green, amber, or red are used to indicate if everything is 'on time', 'becoming due', or 'overdue' respectively.

Statute of limitations

The tax authority may carry out a tax audit and issue an additional assessment within six years from the relevant tax year. However, the limitation does not apply in the event of a fraud, wilful default, or neglect by the company.

Topics of focus for tax authorities

The tax authorities are currently exploring ways to generate more tax revenue. As a result, certain areas of taxation, such as transfer pricing, filing of tax returns by PEs, and review of tax incentives and waivers have become a central focus for tax authorities.

There has been increased scrutiny by the FIRS on related-party transactions as a way of preventing taxpayers from shifting profits away from Nigeria. It is expected that transfer pricing audits are expected to be an area of focus in the next one to two years.

Further, for non-resident entities that create a PE in Nigeria, the tax authorities are focused on ensuring that they file full tax returns, including audited accounts as opposed to filing on a deemed-profit basis. It is expected that the expenses of these PEs will be scrutinised for tax deductibility.

The tax authorities at the federal and state levels are sealing up companies, putting up non-compliance stickers, and holding principal officers of organisations to public scrutiny and prosecution under the tax law for non-compliance in terms of tax default or failure to make timely payments or to file tax returns. On a related note, the Lagos state government has set-up a rapid tax prosecution unit to prosecute tax evaders with considerations to a jail term.

Significant developments

National Budget for 2016: Tax changes

The National Budget for 2016 included several changes in the Norwegian tax legislation. The main changes are the following:

- The tax rate is reduced from 27% to 25% as of the income year 2016 and applies to both individuals and enterprises. The special tax rate for petroleum companies and the resource rent tax for hydro power companies have been increased by two percentage points so that the marginal tax rates of 78% and 58%, respectively, are maintained.
- The rules for limitation of tax deductible internal interest expense have been tightened as of the income year 2016. The limit for tax deductible interest expense is reduced to 25% of the taxable earnings before interest, taxes, depreciation, and amortisation (EBITDA).
- The research and development (R&D) tax credit scheme (SkatteFunn) has been strengthened. The upper limit for annual deductible costs under the R&D scheme has been increased to 20 million Norwegian kroner (NOK) for self-developed R&D and NOK 40 million for R&D purchased from approved institutions.

The government's follow-up of the proposed tax reform

In 2013, the government appointed a committee to propose changes in the Norwegian tax system (the Scheel Committee). On 7 October 2015, the government's follow up of the Scheel Committee's proposal for a Norwegian tax reform was published. The government states that, *inter alia*, the following amendments in tax law will be assessed in more detail:

- Reducing the corporate income tax (CIT) rate to 22% by the end of the income year 2018.
- Further tightening the intercompany interest limitation rules.
- Introduction of withholding tax (WHT) on royalties, interest, and certain rent payments.
- Amendments of the conditions for Norwegian corporate tax residence.

New tax rules for investments in security funds and taxation of security funds

New rules on taxation of security funds and income from such funds applies as of 2016. Under the former rules, investments in security funds owning at least one share were regarded as share investments regardless of the composition of securities in the fund. The new rules aim at taking into account the composition of the securities in the funds.

The amount of the distribution, which is to be considered as interest, should be calculated according to a set pattern based on the share of the interest bonds in the fund. The unitholders are taxed as follows:

- Distributions from security funds owning more than 80% shares are taxed as dividends.

Norway

- Distributions from security funds owning less than 20% shares are taxed as interest income.
- Distributions from security funds with a share interest between 20% and 80% will be split between dividend and interest income calculated on a *pro rata* basis based on the share interest in the fund.

The distribution will be tax deductible for the fund to the extent that it is regarded as an interest payment to the investor.

The taxation of the investor's gain or loss upon realisation of investments in security funds is based on the composition of securities in the year of investment and realisation in the fund.

New Tax Administration Act

In December 2015, the government proposed a new Tax Administration Act. The goal is to unite the tax administration rules in one law and to secure an effective and good tax administration. There are some proposed changes to the rules. Amongst others, a five-year general time limit for reassessing tax assessments is proposed. The final date for implementation is planned to be 1 January 2017.

Taxes on corporate income

A Norwegian resident company is, as a starting point, subject to CIT on its worldwide income. Non-resident companies are, as a starting point, liable for CIT in Norway when engaged in a business that is either conducted in or managed from Norway.

CIT is assessed at a rate of 25%.

As a general rule, income is taxable when the right to receive it arises and costs are deductible when the liability to cover the costs arises. The actual payment is generally not relevant.

Petroleum tax regime

All upstream petroleum activity on the Norwegian Continental Shelf (NCS) is taxable to Norway.

Taxation is based on net income at a marginal tax rate of 78%, which is comprised of the ordinary 25% CIT rate and a 53% special tax. All income is subject to 25% CIT, while only income from offshore production and pipeline transportation of petroleum from the NCS (offshore tax regime) is subject to the additional 53% special tax. The ordinary and special tax rate was changed in 2016 (from 27% and 51%). Although the total tax rate remains the same, the changes result in that uplift has an increased value due to a deduction of 53% for uplift (*see below*).

All upstream activity on the NCS must be consolidated within the company. There is no ring fence per oil field, and tax consolidation against other activity is limited. Crude oil sales from most of the fields are taxed at a predetermined market price set by an official board (i.e. the norm price). In theory, a norm price may be imposed on gas sales, but this has not been implemented. Instead, an extensive reporting requirement was implemented in October 2012. Investments in installations for the exploitation and production of petroleum, as well as investments in pipelines, are depreciated linearly over six years.

An investment-based 'supplementary depreciation' (uplift) of 22% (5.5% per year for four years) is granted on investments in installations for the exploitation and production of petroleum, as well as investments in pipelines. The rate of uplift was reduced from 7.5% to 5.5% for investments made on or after 5 May 2013. However, according to special

transitional rules, the 7.5% rate may still apply in some cases. The uplift is deducted against the special tax base. Losses and unused uplift may be carried forward indefinitely with an annual interest. Both depreciation and uplift may be claimed from the year of the investment, regardless of whether title has passed or the asset has been taken into use. If the upstream activity on the NCS ceases, the tax value of losses carried forward and unused uplift may either be sold or compensated by the Norwegian state. Exploration costs are tax deductible as incurred. If a loss is created due to exploration costs, the taxpayer may claim that the tax value of such a loss is repaid in the year following the income year in which the loss was created.

Special rules apply as to the deductibility of net interest costs in the special tax basis (53%).

A special regime ensures that transfer of licences on NCS is tax exempt; there is no step up in the tax basis.

Note that income taxed under the special tax is exempted from dividend WHT.

The Oil Taxation Office has a high focus on transfer pricing.

Hydro power tax regime

The hydro power tax regime is applicable for the taxation of income derived from the production, sales, transfer, or distribution of hydro power.

Taxation is based on net income at a marginal tax rate of 58%, which is comprised of the ordinary 25% CIT rate and a 33% resource rent tax. All income is subject to 25% CIT, while only income from hydro power production is subject to the additional 33% resource rent tax.

The resource rent is calculated per hydro power plant. The gross income is, with some exceptions, calculated based on spot market price per hour multiplied by actual production. In addition, actual income from green certificates is included in the gross income. Deductible costs will be the same as for CIT; that is, expenses related to the power plant except for interest expenses, which are not deductible. Uplift is granted. Special rules apply to the depreciation of investments in hydro power plants. Rent expenditure and depreciation related to waterfalls are not deductible, and waterfalls are not included in the basis for uplift. Tax consolidation is mandatory within the company and, provided the conditions for group taxation are fulfilled, available on a group level. Losses (negative resource rent) on a company (eventually on a group) level will be compensated by the Norwegian state.

Shipping tonnage tax regime

The tonnage tax rules in Norway are in line with those found in other European Union (EU)/European Economic Area (EEA) countries and imply that shipping income will be tax-exempt on a permanent basis.

Norwegian tonnage-taxed companies are allowed to keep only certain kinds of assets inside the tonnage regime (legal assets) and are not allowed to have income from non-tonnage-taxed activities except financial income. If the requirements are not fulfilled, the company will fall outside the scope of the model and be taxed at the ordinary rate (25%).

Qualifying assets

A tonnage-taxed company must own at least one qualifying asset (i.e. a vessel, for example bulk tankers, container vessels, car carriers, tugboats, and entrepreneurial vessels and auxiliary vessels for use in the petroleum industry), new building contracts, a 3% share in another tonnage-taxed limited company, or a 3% ownership interest in a partnership or controlled foreign company (CFC).

Norway

Qualifying and legal business activities/income

Qualifying business income is income from the operation of the company's own and chartered vessels. A tonnage-taxed company may, for example, charter vessels in and out on bareboat and time charter terms without limitations. Furthermore, gains upon disposal of vessels and new building contracts are exempt from taxation.

Income from related activities, such as the sale of goods and services onboard vessels, loading and discharging vessels, or leasing out containers and operations of ticket offices, is also exempt from taxation. The exemption also applies to income from the strategic and commercial management of the company's owned and chartered vessels, as well as vessels owned or operated by group companies (more than 50% joint ownership), and vessels operated according to a pool agreement. Pure management companies are not included (i.e. all companies must have at least one qualifying asset).

Financial income is permitted, except for income from shares in unlisted companies and ownership interests in partnerships that are not taxed under the tonnage tax system. The condition is that financial activities do not constitute a separate business. Net financial income is subject to ordinary taxation (25%). Currency gains and losses are partly taxable/deductible, and interest costs are partly deductible, depending on the proportion between the company's finance capital and total book capital.

Entrance into the tonnage tax system

Entry into the tonnage tax system is optional and may take place with effect from 1 January every year, provided that the company has fulfilled the conditions for the application into the tonnage tax system from the beginning of the year. Newly established companies will have direct entry and may enter into the tonnage tax system from the date of incorporation. All qualifying companies within the same group are obligated to make the same election (tonnage taxation or ordinary taxation).

Companies that enter into the tonnage tax system are subject to a formal ten-year lock-in period. If a company exits the tonnage tax system before the lock-in period expires, it will be excluded from the tonnage tax system until after the initial lock-in period has ended.

Upon entry into the tonnage tax system, the difference between market value and tax value of the company's assets (including vessels, new building contracts, ownership interests in partnerships, and shares in CFCs/tax exempt assets) is taxed as a capital gain (25%) that can be transferred to the gain and loss account. 20% of the balance will be entered as income each year (balance method). There is continuity for financial assets and assets covered by the tax-exemption rules (qualifying shares and derivatives).

Exit from the tonnage tax system

A shipping company may exit the regime on a voluntary basis or may be obligated to do so after breaching specific company requirements within the tonnage tax system. There should be no exit charge when leaving the regime, and the tax value on the company's assets will be adjusted to market value at the time of exit. However, a company that has untaxed gains calculated upon entry into the tonnage tax system could have a tax liability upon exit.

Local income taxes

There is no county or municipal CIT in Norway.

Corporate residence

Companies that are registered and incorporated in Norway in accordance with Norwegian company law are, as a general rule, regarded as tax resident in Norway and taxable for their worldwide income. If effective management at the board/director level is carried out outside Norway, residency in Norway for tax purposes may cease, and the

company may be subject to exit taxation. Note that several factors should be considered in order to determine whether tax residency has moved (e.g. other management functions and the overall connection to Norway).

Based on the proposal from the Scheel Committee, the government will assess in more detail if amendments of the conditions for Norwegian corporate tax residence should be introduced in the Tax Act, making all companies registered and incorporated in Norway tax resident in Norway.

Foreign corporations will be regarded as tax resident in Norway if the place of effective management is in Norway. The place of effective management will be deemed to be in Norway if, for example, the board of directors makes its decisions in Norway.

Permanent establishment (PE)

According to Norwegian domestic law, a foreign company is liable to tax in Norway when engaged in a business that is either conducted in or managed from Norway. The tax liability is limited to income that is derived from Norwegian sources. As a general rule, non-residents without a PE are not liable for tax on capital gains when selling Norwegian financial instruments. However, if the financial instrument is connected to a business that is conducted in or managed from Norway, the sale of the financial instrument can trigger taxation in Norway.

The legislation does not contain a reference to the treaty concepts of 'permanent establishment' or 'permanent representative'. The threshold for tax liability is normally lower under legislation than the taxing right afforded to source states under double tax treaties (DTTs).

With respect to DTTs, the Norwegian tax authorities will, to a large extent, follow the Organisation for Economic Co-operation and Development (OECD) Commentaries when interpreting the relevant DTT, if the wording is similar to the OECD Model Tax Convention.

N

Other taxes

Value-added tax (VAT)

The general VAT rate is 25% and applies to all supplies of goods and services not qualifying for another rate or an exemption. A reduced rate of 15% applies to supply of food and beverages, excluding tobacco, alcohol, medication, and water from waterworks. The reduced rate is not applicable to the supply of food and beverages consumed in restaurants and other food establishments.

A reduced rate of 10% applies to the television licence fee charged for broadcasting services provided by the Norwegian Broadcasting Company (NRK), domestic passenger transport services and procurement of such services, domestic ferry services related to transport of vehicles, accommodation services, cinema tickets, museum and gallery tickets, amusement park tickets, and sports events.

Exemptions with credit (zero-rated) include, but are not limited to, the following (please note that there might be specific conditions for the exemptions to apply):

- Export of goods and services.
- Goods and services for Norwegian offshore and non-resident ships.
- Transfer of a going concern.
- Supply of newspapers (including e-newspapers) and books (does not include e-books, which are subject to the 25% VAT rate).
- Sale of vessels and aircraft for use in taxable activity.

Norway

Exemptions without credit include, but are not limited to, the following (please note that there might be specific conditions for the exemptions to apply):

- Supply of works of art owned by the artist.
- Health services.
- Social services.
- Financial services, including banking, insurance, and the sale of shares. Please note that the Scheel Committee and the Norwegian government have proposed to subject financial services rendered for compensation, such as fees, to VAT from 2017.
- Educational services.
- Sale and lease of real estate (accommodation and lease of parking lots are taxable).
- Services supplied by cultural and entertainment institutions.

Exemptions, whereby an option to tax is available, include the letting of immovable property to VAT liable lessees following a specific VAT registration with the VAT authorities. Please note that an ordinary VAT registered business is not required to specifically register for letting of property.

The registration threshold is met when supplies subject to VAT in coherence with the Norwegian VAT legislation (including self-supplies) exceed NOK 50,000 during a 12-month period. For charitable and public utility institutions and organisations, the threshold is set at NOK 140,000.

Customs duties

There are quite extensive customs duties on agricultural products, which must be paid upon importation. However, it is often possible to avoid customs duties on these products partly or completely by applying for an exemption from the agricultural authorities in advance. Some of these exemptions are subject to tariff quotas.

Clothes and some other textile products are also subject to customs duties upon importation to Norway, but imports comprised by free trade agreements (such as the EEA with the EU) and the General System of Preferences (for developing countries) are exempt. As a result, clothes will, as a general rule, not be subject to customs duties as long as the importer presents the necessary certificates of origin.

There are no customs duties on other products than agricultural products, clothes, and textile products.

Excise taxes

Excise taxes are calculated on import and domestic production of the following:

- Petroleum products, including gas.
- Alcoholic beverages.
- Non-alcoholic beverages.
- Ethanol for technical purposes.
- Tobacco.
- Chocolate, candy, sugar, etc.
- Products containing the chemicals TRI/PER.
- Products containing the propellant gases HFK/PFK.

There are also excise taxes related to the following:

- Registration of vehicles.
- Use of vehicles (annual tax).
- Emissions of NOx.
- Sale of electricity.

Property taxes

Real estate may, under certain conditions, be subject to property tax. It is up to the different municipalities to choose whether it wants to impose property tax on real estate. Not all municipalities impose property tax on real estate. The applicable rate varies between 0.2% and 0.7%, which is decided by the municipality. The tax base will normally be the estimated market value (with some adjustments).

Hydro power producers must pay property tax on the hydro power plant's capitalised value using a capital interest rate of 4.5%. However, the basis for the calculation of the property tax should fall in the range of NOK 0.95 to NOK 2.74 per kWh of the power plant average production for the last seven years. For hydro power plants with nominal capacity less than 10,000 kVA, the property tax base will be the same as the tax value for income tax purposes.

Stamp taxes

A tax is levied on the registration of a change of ownership of real estate. The tax is calculated at 2.5% of the fair market value.

Net wealth taxes

There is no net wealth tax or other capital taxes for limited liability companies, investment funds, state-owned enterprises (according to the State-owned Enterprise Act), inter-municipal companies, and companies in which somebody owns a part in or receives income from, when the responsibility for the companies' liabilities is limited to the companies' capital.

Some institutional holders (e.g. mutual insurance companies, savings banks, cooperatives, taxable pension funds, self-owned finance institutions, mortgage credit associations) pay 0.15% (state) net wealth tax. The maximum net wealth tax rate for a corporate body is 0.85% (state and municipal tax figures for fiscal year [FY] 2016).

Shares in limited liability companies and equity funds are valued at 100% of quoted value for net wealth tax purposes as of 1 January of the year after the relevant income year. If quoted both on the Norwegian and a foreign stock exchange, the Norwegian stock exchange value will be applicable. If not quoted, the basis for taxation is, as a rule, the company's net taxable value for wealth tax purposes as per 1 January of the income year in question. The basis for taxation of non-quoted shares in foreign companies is, as a starting point, the assumed market value of the shares as per 1 January of the assessment year.

National insurance contributions

Employers are subject to pay employers' national insurance contributions on the employees' gross salary. The employers' contribution rate varies between 0% and 14.1% based on the municipality of the head office of the business. The contribution shall be reported and paid on a bimonthly basis.

Exit tax

The exit rules levy taxes upon the migration of assets or liabilities. The tax is calculated by reference to the accrued but unrealised gains at the time of migration at a rate of 25%. Exit tax is also levied if Norwegian CFC taxation lapses because the control requirement is no longer met or if:

- a Norwegian tax resident company transfers its tax residency (effective management) to another country
- a Norwegian tax resident company has assets or liabilities that are transferred to a PE that is tax exempt pursuant to a DTT, or
- a foreign company has assets or liabilities that are transferred from a Norwegian PE to the head office or a foreign PE of the same company.

Norway

Transfer of assets or liabilities from a PE of a Norwegian company to another PE in a country where the DTT in question is based on the credit method is, however, not regarded as a taxable event.

According to the rules, the tax treatment is different depending on the type of assets being transferred. Business-related operational equipment and financial assets being transferred out of Norwegian taxing jurisdiction are considered as taxable events, but the tax charge may be deferred if certain conditions are met. The main conditions are that the taxpayer is resident within the EEA/EU and has provided a guarantee for the deferred tax and interest charge. The transfer of intangible assets and inventory trigger immediate and unconditional exit taxation.

De minimis exception rules apply when determining whether the exit tax may be levied. Exit tax on the transfer of tangible assets is applicable only if the unrealised capital gains exceed NOK 5 million. Exit tax on the transfer of other assets and liabilities is only applicable if the unrealised capital gains exceed NOK 1 million.

Exit taxation at both the corporate and shareholder level will also be triggered when companies transfer tax residency (effective management) to another state.

Carbon dioxide (CO₂) tax

A CO₂ tax is calculated on petroleum that is flared and on natural gas emitted into the air, as well as on CO₂ that is separated from petroleum and emitted into the air, and on installations used for production or transportation of petroleum. The CO₂ tax is regarded as a normal operating cost for CIT purposes and is a fully deductible cost both for corporate and special tax calculations.

Type of Petroleum	NOK per l/Sm ³ /kg	NOK per tonne CO ₂
Petrol	0.97	419
Petroleum, high rate:		
Aviation turbine kerosene	1.08	423
Petroleum:		
Light oil, diesel oil	0.92	346
Residue	0.92	293
Petroleum, reduced rate:		
Light oil, diesel oil	0.31	116
Residue	0.31	99
Aviation turbine kerosene	1.08	423
Domestic used gas:		
Natural gas	0.84	422
LPG	1.26	420
Reduced rate natural gas	0.057	29
Reduced rate LPG	0.00	0
Continental shelf:		
Light oil, diesel oil	1.02	383
Residue	1.02	325
Natural gas	1.02	436

Natural resource tax

A NOK 0.013 per kWh natural resource tax applies to hydro power activities, based on one-seventh of the produced kWh for the income year in question and the six previous years. The natural resource tax is creditable against the standard CIT.

Branch income

Branch income is taxed at the corporate rate of 25% (the same as Norwegian companies). The basis for taxation is gross income less deductible costs. Both direct and indirect costs related to the activities carried out in Norway may be deductible.

There is no branch profit tax or other repatriation taxes. However, if assets and/or liabilities are transferred from a PE in Norway to the head office or another foreign PE of the same company, this may trigger exit taxation. The transfer of assets to another corporate entity is subject to regular taxation.

Income determination

Inventory valuation

Inventory is valued at cost. Cost is normally determined using the first in first out (FIFO) method. The last in first out (LIFO) method is not acceptable for tax purposes. Conformity between book and tax reporting is not required.

Capital gains

Capital gains realised in the course of a business activity are almost always regarded as taxable income. Gains resulting from real estate transactions are taxed, regardless of whether they are incurred in connection with business activity. Losses may be offset against the taxpayer's other income.

Capital gains realised on both business-related and non-business-related securities are, in principle, taxable. In general, any capital gains realised on bonds at maturity are regarded as taxable income. Correspondingly, realised losses will be eligible for deductions.

Tax-exemption rules for corporate shareholders

Under the tax-exemption rules, corporate shareholders are generally exempt from tax on dividends received and capital gains on qualifying shares and on derivatives where the underlying object is qualifying shares. Correspondingly, losses on shares are, in general, non-deductible. All operational expenses related to exempt income from shares are fully tax deductible. In order to limit the benefit of these deductions, the tax-exemption method is, with some exemptions, limited to 97% for received dividends, and the remaining 3% is taxable for Norwegian corporate shareholders (at a 0.75% effective tax rate). The 3% taxable income is calculated on dividends. Dividend distributions within a tax group (where the ultimate parent company directly or indirectly owns more than 90% of the shares and voting rights) are fully tax exempt. In addition, the tax-exemption method also applies for certain distributions from partnerships and, under certain conditions, to foreign-resident companies with taxable activity in Norway (3% of the income taxable at 25%). However, distributions on hybrid instruments will not be tax exempt if the distribution is deductible for the distributing company.

Note that an investment in a company resident in a low-tax country in the EEA has to fulfil certain substance requirements to qualify for the tax-exemption rules. These requirements are intended to be in line with the substance requirements of the European Court of Justice's (ECJ's) decision in the Cadbury Schweppes case. A country is considered a low-tax country if the level of effective taxation is less than two-thirds of the tax that would have been due had the foreign company been resident in Norway. This is the same test used for the CFC regime (*see the Group taxation section for more information*). The Directorate of Taxes has published a non-exhaustive list of low-tax jurisdictions (black list) and non-low-tax jurisdictions (white list).

However, for investments outside the EEA, the tax exemption rules apply only if a shareholder owns 10% or more of the share capital and the voting rights of the foreign

Norway

company for a consecutive period of two or more years. To be able to deduct losses on the realisation of shareholdings outside the EEA, the shareholder and/or a related party may not own 10% or more of the share capital and the voting rights of the foreign company in a two-year period prior to the realisation. For dividends, the holding period of two years does not have to be met when dividends are distributed, but can also be met after the dividend date.

Shareholdings in low-tax countries outside of the EEA do not qualify for the tax-exemption rules.

Acquisition and sales related costs (e.g. broker fees) must be added to the cost price of the shares for tax purposes. Costs incurred to manage acquired tax-exempt shares are, however, tax deductible.

Norway's internal tax rules do not allow taxation of a non-resident's capital gain on the disposal of financial instruments, including shares in Norwegian companies, unless the non-resident has a PE to which the financial instrument may be allocated.

Stock dividends

Stock dividends (bonus shares) are not taxable on receipt, provided that the dividends have been distributed in accordance with the Limited Liability Company Acts and distributed in proportion with the ownership level of the shares.

Tax treatment of investments in security funds

As of 2016, new rules for taxation of investments in security funds apply. Formerly, the taxation of the unitholders depended on whether the fund was regarded as a mutual fund or a bond fund.

As of 2016, investments in security funds are taxed according to the same rules. The taxation of the investment in security funds will be determined by the share ratio in the fund. Distributions from security funds with a share interest between 20% and 80% will be split between dividend and interest income calculated on a *pro rata* basis based on the share interest in the fund. Furthermore, distributions from funds with more than 80% shares will only be taxed as dividends, and funds with less than 20% shares will only be taxed as interest.

Interest income

In general, interest income is taxable on an accrual basis.

Foreign income

A Norwegian resident company is subject to CIT on its worldwide income. Double taxation of foreign-source income, including foreign-branch income and CFC income, is mitigated either through tax treaties or domestic tax provisions. A deduction for foreign tax may either be claimed as an expense or as a credit against Norwegian tax payable on that income. In most circumstances, foreign dividends are exempt according to the tax-exemption rules. As a consequence, foreign WHT may not be credited and constitute a real cost for the companies concerned.

Norway does not have any legislation for the deferral of tax on foreign income.

Deductions

Depreciation

In Norway, the declining-balance method of depreciation is mandatory for capitalised assets. The depreciation rates given below are the maximum rates.

There is a duty to capitalise an asset that has a value of NOK 15,000 or higher and has an economic life of at least three years.

Asset	Depreciation rate (%)
Office equipment machines, etc.	30
Acquired goodwill/business value	20
Trucks, lorries, buses, taxis, vehicles for persons with disabilities	20
Cars, tractors, other vehicular machinery, instruments, fixtures and furniture, etc.	20/30 (1)
Ships, vessels, offshore rigs, etc.	14
Aircraft, helicopters	12
Construction for transmission and distribution of electric power and electronic equipment in a power company	5 (2)
Buildings and construction, hotels, hostels, inns, etc.	4/6/10 (3)
Office buildings	2
Fixed technical installations in buildings, including heating plant, cooling and freezing plant, electrical installation, sanitary installation, elevator, etc.	10

Notes

1. An increased depreciation rate of 30% applies to machines, etc. for the first year of the investment.
2. Auxiliary and supplementary installations in industrial plants will be depreciated together with the building and constructions group (10% depreciation if expected operating time is less than 20 years). In addition, constructions for transfer and distribution of energy, and electronic equipment, used in other business activities than power generation will be depreciated at 5%.
3. The applicable rate is 10% if, from the date of its erection, the structure has an economic life of 20 years or less.

New Norwegian tax regulations for accelerated depreciation of wind power plants have been adopted with effect for investments made after 1 January 2015, provided that the European Free Trade Association (EFTA) Surveillance Authority (ESA) clarifies that the rules are in compliance with EU/EEA state aid rules. According to the new rules, the main assets in wind power plants acquired between 1 January 2015 and 31 December 2020 can be depreciated on a linear basis over five years.

Special depreciation rules apply to assets moved in and out of Norwegian jurisdiction to and from companies resident outside the EEA.

Goodwill

Acquired goodwill may be amortised according to the declining-balance method at a maximum of 20% *per annum*. The tax authorities have, however, on several occasions recently questioned the allocation to goodwill and claimed that a part of the purchase price should be allocated to intellectual property, concessions, etc. (which may not be depreciated unless it is of a time-limited nature). Other intangibles are amortisable on the condition that they are subject to an evident loss in value (impairment test) or if they are time-limited.

Start-up expenses

In general, start-up expenses are deductible, provided that the costs are borne by the company. Start-up costs could include costs related to registration in the Register of Business Enterprises, lawyers and accountants fees, drafting articles of association and shareholders agreement, etc.

Interest expenses

In general, interest expenses are deductible. Norway does not have a rule distinguishing between different income categories (as in the United Kingdom). If income is exempt from taxation in Norway pursuant to a tax treaty, corresponding costs or losses are not tax deductible.

Norway

Limitations on tax deductible inter-company interest expenses apply. *Please see the detailed description under Thin capitalisation in the Group taxation section for further information.*

Bad debts

In general, receivables are tax deductible if the debt is clearly irrecoverable or realised (e.g. if the receivable is sold to a third party, converted to share capital, or waived) and is sufficiently connected to the company's business (the business requirement). For accounts receivables, a calculated rate multiplied by the total account receivables at year-end may be deducted. The rate is calculated based on the two preceding years losses on such receivables multiplied by a fixed rate set by the Ministry of Finance.

Losses on receivables between group companies (with more than 90% direct or indirect mutual ownership of shares) and partnerships are, as a main rule, not tax deductible. However, trade receivables and losses on receivables created in connection with mergers or demergers are deductible for tax purposes.

Charitable contributions

Donations to certain charitable institutions are tax deductible. The upper limit for the tax deduction per year is NOK 25,000. The same limit applies to individuals and companies. The receiving entity must be pre-approved by the Norwegian tax authorities.

Fines and penalties

Fines and penalties are normally not tax deductible. This also applies to some administrative charges that are penal in nature. Charges that have no statutory basis in Norwegian law may be tax deductible, provided that the general conditions are fulfilled.

Taxes

Real estate tax, as well as foreign income and capital taxes paid by the taxpayer, are deductible when determining corporate income. Foreign taxes derived from income that is taxable in Norway are deductible only if they have not been credited against Norwegian tax payable.

Net operating losses

Losses may be carried forward indefinitely. Losses incurred in the year of ceasing business may be carried back for a period of two years.

Payments to foreign affiliates

Royalties and service fees paid to related foreign companies are fully deductible, provided they meet the arm's-length principle. As regards loans, the tax authorities require that the entity in question is able to service its debts. In addition, any loan terms should be comparable to those that would have been agreed upon by unrelated parties. Interest on financing, to the extent that these rules are not satisfied, may be regarded as dividends and thus non-deductible and, in addition, may be subject to Norwegian WHT. In addition, limitations on tax deductible inter-company interest expenses apply. *Please see the detailed description under Thin capitalisation in the Group taxation section for further information.*

Group taxation

Income taxes are assessed on companies individually, not on a consolidated basis. This may be avoided through group contributions between Norwegian companies, provided common direct or indirect (including foreign) ownership and voting rights is more than 90%. Furthermore, the Norwegian group contribution rules are, under certain conditions, also applicable to branches of foreign companies that are resident within the EEA. Note that group contributions are not deductible for companies engaged in oil and gas producing activities subject to the Petroleum Tax Act.

Assets may, pursuant to the Group Regulations, be transferred tax-free between group companies at tax book value for tax purposes and at market value for financial book purposes. However, a guarantee for the latent tax liability created by the transfer must be provided upon request by the tax authorities.

Payment must equal market value of the assets transferred. The same applies to payment in the form of shares. If the transferee loses the affiliation with the tax group while still owning the transferred assets, the transferor will be taxed for the difference between the tax book value and the market value of the assets.

Transfer pricing

In Norway, the arm's-length principle for related party transactions is incorporated into the Tax Act. The transfer pricing provision of the Tax Act states that the OECD Guidelines 'shall be taken into account' when addressing transfer pricing issues under Norwegian tax law.

Transfer pricing has increasingly become the focus of the tax authorities' attention in recent years. It is fairly common for the Norwegian tax authorities to choose test cases that are subject to substantial investment. During the most recent years, focus has been on business restructuring, commissionaire arrangements, and the financing of operations.

Norway has newly introduced an advance pricing agreement (APA) regime. It is also becoming more common to discuss complex cases with the tax authorities on a non-binding basis in advance of implementation or before assessment. However, there are no particular Norwegian safe harbour rules or any other official guidance of how to price specific transactions, etc.

Thin capitalisation

There is no fixed debt-to-equity ratio requirement in Norwegian tax law. However, for companies that are part of a group, adjustments may be made under the arm's-length provisions. Generally, these provisions apply only if the company has obtained a larger loan from a group company than an independent credit institution would have granted, or if the agreed level of interest is higher than an independent credit institution would have required. Naturally, this analysis will vary based on the actual company's credit worthiness, which consists of several elements, such as the nature of the business, financial status, future income possibilities, and group relationships. As such, there is no applicable 'safe harbour'. The company must also be able to service its debts.

If a Norwegian entity is regarded as being thinly capitalised, part of the entity's interest and debts may be reclassified to dividend and equity.

Limitations apply to tax deductible inter-company interest expenses. In general, interest expenses to related parties that exceed 25% of a Norwegian company's taxable EBITDA, with some adjustments, will not be tax deductible. The regulations only apply to companies that have more than NOK 5 million in total net interest expenses.

Two parties are related if one party directly or indirectly owns or controls the other party by at least 50%. Related parties may be resident in Norway or abroad.

External loans can also, under certain conditions, be regarded as intra-group loans if an entity has provided a guarantee for the debt of a related party. However, an exemption applies if the guarantee is provided by a company that is more than 50% owned by the borrower or a company that is controlled by the borrower or if the security is the shares in the borrower.

The interest deductibility limitation is calculated for each entity in the group. Disallowed interest deductions may be carried forward for ten years.

Norway

The limitation applies both to local and foreign companies that have a taxable presence in Norway, as well as partnerships, CFCs, etc.

Controlled foreign companies (CFCs)

Norwegian residents are taxed directly on their allocable part of the profits from a CFC's income if the company is resident in a low-tax country, irrespective of whether income is distributed to the Norwegian investor. A low-tax country, in this respect, is a country where the effective foreign income taxation of the company's profits is less than two-thirds of the effective taxation that would have been due had the company been resident in Norway. A condition for such taxation is that 50% or more of the foreign company's shares or capital is held or controlled, directly or indirectly, by Norwegian taxpayers (alone or together), based on the status at the beginning and end of the income year in question.

Note that if Norwegian taxpayers own or control more than 60% of the shares or capital at the end of the income year, Norwegian control exists irrespective of the level of control at the beginning of the year. Norwegian control ceases to exist if Norwegian taxpayers own or control less than 50% of the shares or capital at both the beginning and end of the income year or less than 40% of the shares or capital at the end of the income year.

On the condition that Norway has signed a tax treaty with the country involved and the company in question is covered by the treaty, the CFC rules will be applicable only if the income of the entity in question is mainly of a passive nature. Furthermore, CFC taxation may also be prohibited if the company in question is resident within the EEA and cannot be deemed as a wholly artificial arrangement as outlined in the ECJ's decision in the Cadbury Schweppes case. Hence, CFC taxation will be avoided for EEA companies that fulfil certain substance requirements.

Tax credits and incentives

Foreign tax credit

Norwegian limited liability companies that have paid taxes on foreign-source income may, under certain conditions, offset the Norwegian tax paid against the foreign tax paid. The tax credit is limited to the lower of the Norwegian tax paid on the same type of foreign income and the foreign tax actually paid. It is possible to carry forward unused foreign taxes for five years. A credit claimed in accordance with the regulations stated above may not be used in addition to deductions pursuant to other rules and regulations. These rules are very technical, and it should be noted that there are three different 'baskets' of income.

Roll-over regulations

Upon application, the Ministry of Finance has the authority to grant tax relief on the transfer of assets within a group. The transfer may be carried out between group companies (more than 90% ownership and voting rights) or partnerships (with mainly the same owners). If a tax relief is granted, the transfer would not trigger any taxation at the time of the transfer, but all tax positions, including the tax basis of the transferred assets, will be transferred to the acquiring company. A condition for the tax relief is normally that the companies remain within the group.

The Ministry of Finance also has the authority to grant tax relief on the realisation of property, business, shares, etc. during a reorganisation. The reorganisation must improve the efficiency of the business to qualify for tax relief, and, accordingly, administrative effects would not be sufficient. The tax relief must also help companies to carry out the reorganisation. In addition, the tax relief must not reduce the Norwegian tax base; the tax positions would be transferred to the new taxpayer.

SkatteFUNN research and development (R&D) tax incentive scheme

The SkatteFUNN R&D tax incentive scheme is a government program that is designed to stimulate R&D in Norwegian trade and industry. Businesses and enterprises that are subject to taxation in Norway are eligible to apply for tax relief.

All Norwegian companies and branches with R&D projects can apply for a deduction of up to 20% of incurred costs, limited up to a cost base of NOK 20 million for self-developed R&D and NOK 40 million for R&D purchased from approved institutions. If the company does not have taxable gain for the income year in question, the company will receive a cash refund for the year following the income year.

The main criterion for applying for SkatteFUNN is that the company has an R&D project with the aim of developing a new or improved asset, service, or production process. There are no requirements regarding type of business. A distinction is made against ordinary product development without developing new knowledge, functions, etc., the ordinary day-to-day business operations, etc.

The application for SkatteFUNN must be approved by Norges Forskningsråd (The Research Council of Norway) and is awarded for a period of a maximum of three years. If the application is approved, there is a requirement to submit a form attested by the company's auditor, together with the ordinary tax return, in order to obtain the tax incentive.

Withholding taxes

Norway does not levy WHT on payments of royalties and interest, except on interest derived from primary capital certificates ('Egenkapitalbevis').

The internal WHT rate is 25%, which may either be reduced under the tax-exemption rules or by an applicable tax treaty. To qualify for the tax-exemption rules, the recipient of the dividends has to be a corporate investor resident in an EEA country and must also fulfil certain substance requirements.

Dividends

Recipient	Regular rate (%)	Parent/subsidiary rate (%)
Non-treaty	25	25
Treaty:		
Albania	15	5 (1)
Argentina	15	10 (1)
Australia	15	0 (11)/5 (4)
Austria	15	0 (1)
Azerbaijan	15	10 (2)
Bangladesh	15	10 (3)
Barbados	15	5 (3)
Belgium	15	5 (1)

13. 10% of the capital for an uninterrupted 12-month period.

Tax administration

Taxable period

The income tax year normally runs from 1 January to 31 December, with assessments being issued in autumn of the following calendar year. Companies are liable for both advance payments and final settlements in the calendar year of assessment. Companies with a financial year other than the calendar year may use the financial year for tax purposes in certain instances (e.g. if they belong to a foreign group with a deviating accounting year, they may use the financial year of the group for tax purposes).

Tax returns

Companies are required to file their tax returns electronically by the end of May in the year following their financial year. Upon application, an extension of the time limit to file will normally be granted. The tax returns and the basic attachments are obligatory for all corporate taxpayers. Additional requirements may apply for specific business sectors, such as hydro power production. Under the petroleum tax regime, the filing deadline is the end of April.

Norway

The annual assessment is made by one of five regional tax departments, who notify the taxpayer if it has been determined that the taxable income will deviate from what was submitted in the tax return.

Payment of tax

Companies are required to make advance payments of tax on 15 February and 15 April in the year following the income year. The two payments should together cover all of the expected CIT to be assessed. Any balance must be paid three weeks after the assessment has been made public (i.e. in early autumn of the year following the relevant accounting year).

The above applies to all corporate taxpayers, except for taxpayers under the petroleum tax regime, where tax shall be paid in six instalments.

Tax audit process

The Norwegian tax system is tax return based. The Norwegian tax office carries out tax audits based on different selection criteria. A tax audit can be caused by the ordinary review of the tax return, random selection of companies or business sectors, information obtained from other parties, etc.

The tax office normally gives notice of an upcoming tax audit, but it can also be unannounced. The examination generally takes place by formal, written communication, and the process can take from a few weeks to several years.

Statute of limitations

The tax office has a ten-year limit for reassessing tax assessment for all open years (from the year after the income year in question). However, a two-year limit applies for negative adjustments and a three-year limit for positive adjustments if the taxpayer has provided sufficient and correct information in the tax return.

The taxpayer may file an appeal on the tax assessment within six weeks after the taxpayer receives it. The time limit for appealing other decisions is normally three weeks after the tax office's decision.

Topics of focus for tax authorities

The tax office's topics of focus can vary each year and from region to region. The primary topics of focus lately have been thin capitalisation, transfer pricing, and tax losses on receivables.

Other issues

Foreign Account Tax Compliance Act (FATCA) agreement with the United States

In April 2013, Norway entered into an FATCA agreement with the United States. The agreement is based on the US FATCA regulations and is the basis for information exchange between the Norwegian and US tax authorities with regards to financial transactions.

According to the agreement, Norwegian financial institutions can report to the Norwegian authorities instead of reporting to the US authorities. It is expected that this will ease the reporting liabilities for Norwegian financial institutions.

Significant developments

There have been no significant corporate tax developments in Oman during the past year.

Taxes on corporate income

The Income Tax Law seeks to tax worldwide income of entities formed in Oman and the Oman-source income of branches and other forms of permanent establishment (PE).

The rate of income tax is uniform for all types of business entities, regardless of whether it is a corporate entity and/or whether it is registered or not.

The income tax rate is as follows:

Taxable profits (OMR*)	Rate (%)
First 30,000	0
Over 30,000	12

* Omani rial

Petroleum income tax

Special provisions are applicable to the taxation of income derived from the sale of petroleum. The tax rate specified for such companies is 55%. However, the tax rates are applied on income as determined by the individual Exploration and Production Sharing Agreement entered into between the government of Oman and the company engaged in the sale of petroleum. Under these agreements, the government pays the company's share of income tax from amounts withheld from the government's share of production. Therefore, the income tax is not actually borne by the company.

Local income taxes

There are no local income taxes in Oman.

Corporate residence

The term 'resident' is not defined in the tax law.

Permanent establishment (PE)

PE is defined in very broad terms and includes places of sale, places of management, branches, offices, factories, workshops, mines, quarries, and building sites for construction. However, the mere use of storage or display facilities does not constitute a PE. The definition of PE references carrying on business in Oman, either directly or through a dependent agent.

Oman

Additionally, the definition stipulates that a total stay of 90 days during a 12-month period creates a PE in Oman. However, this 90-day period applies to rendering of consultancy services or other services only. Under this definition, while the sale of goods into Oman will not be deemed to be a taxable activity, a contract for the supply and installation of equipment is likely to attract tax. By the same criterion, services rendered by personnel visiting Oman will be treated as taxable activities, applying the 90-day rule.

Other taxes

Value-added tax (VAT)

Oman has announced its intention, along with several other Gulf Cooperation Council (GCC) member countries, to implement VAT from 1 January 2018. The features of the planned GCC common VAT framework have not been announced, although the main rate of VAT is expected to be in the region of 3% to 5%.

Customs duty

Customs duty of 5% of cost, insurance, and freight (CIF) value applies to most non-GCC source goods. Exemptions apply for certain food items, medical supplies, etc.

Excise taxes

There are no excise taxes in Oman.

Property taxes

There are no property taxes in Oman.

Stamp duty

Stamp duty is applicable on transfer of land and property at 5% of the value.

Payroll taxes

Social security contributions

A 17.5% social security contribution is applicable to employees who are Omani nationals, but not to expatriate employees. The employee pays a contribution of 7% of salary, and the employer pays the balance of 10.5%. The employer is also required to contribute for insurance for work-related injuries in the amount of 1% of the salary of the employee. This brings the total monthly social security and insurance contributions to be made by the employer to 11.5%.

Municipal taxes

Municipal taxes apply to the following items:

- Property rents: 3%.
- Hotel occupancy: 5%.
- Leisure and cinema houses: 10%.

Branch income

Branches of foreign entities (regardless of country) are subject to tax at the rate of 12% on income over OMR 30,000.

Expenses incurred by the head office that can be identified as directly related to the branch's activity are deductible. The deduction for other head office expenses is limited to 3% of the branch's gross income for the year. This rate is 5% for banks and insurance companies, and 10% for high-tech industrial activities.

Income determination

Inventory valuation

Inventory should be valued using a method that complies with International Accounting Standards.

Capital gains

Gains on sales of securities listed on the Muscat Securities Market are exempt from taxation. Gains on transfers of other assets are taxable as ordinary income.

Dividend income

Dividends received from Omani entities are exempt from taxation. Foreign-source dividends are taxable. Foreign-source dividends are taxed at the same rates as corporate income.

Stock dividends

There are no provisions in the tax law that address stock dividends.

Interest income

Interest income is taxable as business income.

Rent/royalty income

Rental income and royalties are taxed as business income.

Unrealised exchange gains/losses

Unrealised exchange gains are not taxable. Similarly, any unrealised loss is not deductible from the total taxable income.

Exempt income

The following income is exempt from income tax in Oman:

- Dividends received from an Omani company.
- Profits or gains on disposal of securities listed on Muscat Security Market.
- Omani marine companies, whether wholly owned by Omanis or with foreign and Omani ownership and registered in Oman, are exempt from tax. Foreign marine companies conducting activities in Oman through an authorised agent are exempted from tax with effect from the date of commencement of activity, provided that reciprocal treatment is afforded by the country of the foreign company.
- Income realised by foreign airlines carrying on business through PEs in Oman is exempt from tax. This exemption is limited to the extent of the income from operating airplanes for international transport, provided reciprocal treatment is accorded in the airline's home country.
- Income realised by investment funds established in Oman under the Capital Market Authority Law or established overseas for dealing in shares and securities listed on Muscat Security Market is exempt.
- Foreign companies engaged in oil and gas exploration activities, while taxable under the law, normally have their tax obligations discharged by the government under the terms of the Exploration and Production Sharing Agreement.
- Foreign companies working for the government in projects deemed to be of national importance may be able to negotiate a tax protection clause whereby any tax paid by them is reimbursed by the government.

See Exempt activities in the Tax credits and incentives section for a description of exemptions from tax for income from certain principal activities.

Oman

Foreign income

Worldwide income of an entity formed in Oman is taxed in Oman. Credit for foreign taxes paid is given under the law; however, this may not exceed the amount of Omani tax payable on such income.

The Oman tax law does not contain rules on deferral of foreign income.

Deductions

Depreciation

Depreciation is taken on a straight-line basis on the following classes of assets at the annual rates shown.

Asset	Rate (%)
Permanent buildings	4
Semi-permanent buildings	15
Docks, sea barriers in ports, pipelines, roads, and railway lines	10
Aircraft and ships	15
Hospital buildings, educational establishments, and equipment for scientific research	100

The rate of depreciation allowed is doubled in the case of buildings used for industrial purposes.

The tax law also provides for calculation of depreciation on a net book value basis for the following classes of assets. A 'pooling' concept is permitted, whereby assets subject to the same rate of depreciation may be pooled together for purposes of depreciation.

Pool	Rate (%)
First pool is comprised of machinery and equipment, including computer software installations, furniture and fixtures, and vehicles	33.33
Second pool is comprised of drilling equipment	10
Third pool is comprised of 'other machinery and equipment' not included above	15

Goodwill

Goodwill is amortisable for tax purposes, generally over the life assigned for International Financial Reporting Standards (IFRS) accounting purposes.

Start-up expenses

Expenses incurred before the commencement of business are allowed as a deduction in the first taxable year (or period).

Interest expenses

Deduction of expenses incurred for the purpose of earning income is generally allowed. Interest expense is allowed for loans from unrelated parties or on loans from banks. Interest paid to related parties is allowed only to the extent the loan terms are at arm's length.

Bad debts and other contingencies

Amounts charged to the profit and loss account for creating provisions in respect of bad debts, stock obsolescence, warranties, and similar types of contingencies are not tax deductible. Deduction is allowed only at the time of write-off. However, provisions created by licensed banks in respect of bad debts are allowable within the limits approved/required by the Central Bank of Oman.

Charitable contributions

Charitable donations are limited to specified institutions and organisations and are subject to an overall limitation of 5% of total income.

Meals, entertainment, officers' compensation, etc.

All expenses incurred for the generation of gross total income are allowed. There are no specific restrictions on deduction for expenses like meals and entertainment, compensation for officers, and life insurance payments for employees. There are limits on the deductibility of directors' fees.

Social security payments

Social security contributions paid by employers in respect of employees may also be deducted.

Pension payments

Contributions to pension funds, domestic and foreign, are deductible, provided the fund is licensed (in Oman or the country where it was established) and complies with certain other specified conditions.

Illegal payments

Payments of bribes or kickbacks, and other illegal payments, are not deductible.

Fines and penalties

Civil fines and penalties are not deductible.

Taxes

Taxes on income, whether incurred in Oman or elsewhere, are not deductible in arriving at taxable income. A credit may be available for taxes paid in a foreign jurisdiction.

Other significant items/restrictions on allowable expenses

The tax law has imposed restrictions on the deductibility of certain other expenses. The principal items affected are the following:

- Sponsorship fees paid to Omani sponsors are restricted to 5% of net taxable income before sponsorship fees. Net taxable income is determined after offsetting any losses carried forward.
- Charges or expenses allocated from the head office or other group companies are limited to 3% of gross income (5% for banks and insurance companies, and 10% for high-tech industrial activities).
- Commissions paid by insurance companies are restricted to 25% of net premiums collected.
- Leasing companies are treated at par with banks as far as deduction for loan loss provision is concerned. Leasing companies are allowed deductions for loan loss provisions, subject to the limits or recommendations of the Central Bank of Oman.
- Losses arising on sale of investments listed on the Muscat Security Market are not allowed as a deduction from taxable income.
- Any expense or costs that have been incurred to generate income exempted from tax are not allowed as a deduction from taxable income.
- Amounts paid as tax consultancy or advisory fees are disallowed.

Net operating losses

Carryforward of losses is limited to five years, except in the case of companies that incurred losses during a mandatory tax-exempt period, where the net losses may be carried forward indefinitely for offset against future profits.

Carryback of losses is not allowed.

Oman

Payments to foreign affiliates

Payments to foreign affiliates normally receive in-depth scrutiny from the tax authorities. Accordingly, proper documentation should be obtained in order to establish that these transactions are made at an arm's-length basis.

Group taxation

Businesses are taxed as separate entities, and the tax law does not recognise group taxation.

Transfer pricing

Transactions between related parties must be valued at arm's length. There is no specific guidance on acceptable methods for determining an arm's-length price.

Inter-company payments

All inter-company payments are scrutinised in detail to ensure that the profits are not transferred to avoid payment of tax.

Thin capitalisation

If the debt-to-equity ratio exceeds 2:1 in the case of related party debt, interest on the excess debt is not deductible for tax purposes. This rule does not apply to banks and insurance companies, PEs of foreign companies, or proprietary (Omani owned) establishments.

Controlled foreign companies (CFCs)

There is no CFC regime in Oman.

Tax credits and incentives

Foreign tax credit

A foreign tax credit is available to Omani companies or establishments (proprietorships) who suffer foreign taxes on income that is also taxed in Oman. The credit is limited to the amount of tax incurred in Oman. The taxpayer is required to submit an application to the Secretariat General for Taxation to claim such credit.

Exempt activities

Income from the principal activities listed below is exempt from tax, provided an exemption is applied for and obtained.

- Industry and mining.
- Export of products manufactured or processed locally.
- Operation of hotels or tourist villages.
- Agriculture and animal husbandry and the processing of agricultural produce.
- Fishing and fish processing and aquaculture.
- University education, college or institutes of higher studies, private schools, nurseries, training colleges, and institutes.

The exemption is valid for a period of five years from the date of commencement of production or the practice of activities and may be made subject to such conditions as the Minister of Commerce and industry may specify. The exemption is renewable for a period not exceeding five years, subject to approval by the Financial Affairs and Energy Resources Council.

See Exempt income in the Income determination section for a description of other income items exempt from tax.

Withholding taxes

Foreign companies that do not have a PE in Oman for tax purposes and that derive income from Oman in the nature of the following are subject to withholding tax (WHT) at 10% of gross income from such sources:

- Royalty.
- Consideration for research and development (R&D).
- Consideration for use of or right to use computer software.
- Management fees.

Such WHT is required to be withheld by the Omani-based company and paid to the tax department within 14 days of the end of the month in which tax is deducted or payments are due or made to the foreign company.

There is no WHT on dividends and interest payments.

The term 'royalty' has been defined under the law to include consideration for the use of intellectual property (IP), including computer software, cinematography films, tapes, discs, or any other media, patents, trademarks, drawings, etc. The term further includes consideration for using industrial, commercial, or scientific equipment and consideration for information concerning industrial, commercial, or scientific experience or consideration for granting rights to exploit mining or other natural resources.

Double tax treaties (DTTs)

The maximum WHT rates provided by the Oman DTTs are shown in the table below. There are also agreements with various countries that are not yet in force.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Belarus	5	5	10
Brunei	5	10	10
Canada	5 (1)/15	10	10
China	5	10	10
Croatia	0	5	10
France	0	(7)	7
India	10 (1)/12.5	10	15

Turkey	10 (2)/15	10	10
United Kingdom	0/10 (8)	0	8
Uzbekistan	7	7	10
Vietnam	5 (5)/10 (6)/15	10	10

Notes

1. 10% minimum shareholding required.
2. 15% minimum shareholding required.
3. 20% minimum shareholding required.
4. Interest received by financial institutions (including insurance companies) or loans/debt claims guaranteed by the government of the source state.
5. 60% minimum shareholding required.
6. 25% to 60% minimum shareholding required.
7. Only the country from which the payment is made (source country) may tax.
8. Dividends paid out of income derived from immovable property by an investment company or investment fund.

Tax administration

Taxable period

The tax year is the calendar year. Assessments can be made on the basis of a year-end other than 31 December, provided permission is granted in advance by the Omani tax authorities and the company then adheres to the year-end on a consistent basis.

Tax returns

A provisional declaration of tax must be submitted in the prescribed form within three months from the end of the accounting period to which it relates. The final annual return of income should be submitted in the prescribed format within six months from the end of the accounting period to which it relates. Reasonable time extensions can be sought and are normally provided for filing the provisional and annual returns of income, but these do not defer payment of tax, which will be subject to additional tax at 1% per month from the due date to the actual date of payment.

In the case of companies having a paid-up capital in excess of OMR 20,000, the annual return of income should be accompanied by audited accounts signed by an auditor registered in Oman. The law requires accounts to be drawn up in accordance with IFRS consistently applied. It specifically provides for accrual accounting unless prior permission of the Secretary General of Taxation (the Secretary General) has been obtained. The accounts must be submitted in local currency unless prior approval of the Secretary General has been obtained for submitting them in foreign currency.

Delay or failure in submitting the provisional or annual returns may attract a penalty of not less than OMR 100 and not more than OMR 1,000.

Failure to file the provisional or annual returns of income may result in an estimated profit assessment by the Secretary General.

Failure to submit audited accounts as required under the Law is deemed to result in an incomplete annual return of income and may attract an estimated profit assessment.

The law confers wide powers on the Secretary General for requesting information. Experience has shown that, notwithstanding the presentation of audited accounts, the tax department requests very detailed information and supporting documentation relating to revenue and expenses. Failure to provide such information or the provision of incorrect information can result in an additional assessment by the Secretary General and/or various penalties on the company and/or the officer responsible for providing the information.

Payment of tax

Any tax estimated to be payable in respect of an accounting period should be paid with the provisional assessment and 'topped up' for any additional amount computed as payable following submission of the annual return of income. Failure to pay taxes by the due date attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

The difference between the amount paid and the amount assessed, subject to filing of an objection, should be paid within one month from the date of the assessment. The additional amount assessed attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

Under the Law, the Secretary General has the authority, with the approval of the Minister and the Tax Committee, to sequester and sell the assets of a taxable entity to recover the taxes due.

If decisive proof is presented to the Secretary General that any person has paid tax for any year exceeding the tax due and payable for such tax year as finally settled, such person has the right to recover the tax. However, if any tax has become payable by such person in respect of another tax year, the excess amount will be adjusted against the future tax liability. Any request for recovery must be presented within five years from the end of the tax year to which it relates.

Where the taxpayer fails to declare correct income in the tax return for any tax year, the Secretary General may impose a fine not exceeding 25% of the difference between the amount on the basis of the correct taxable income and the amount of tax as per the return submitted.

Objections and appeals

A company has a right to object to any assessment issued by the Secretary General. The objection document should be prepared in writing (in English and in Arabic) and filed with the office of the Secretary General for Taxation within 45 days from the date of assessment. The Secretary General is required to give a judgment within five months, extendable up to another five months at the Secretary General's discretion, from the date of receiving the objection. The tax demanded may be kept in abeyance on request. No additional tax is payable until the Secretary General issues the judgment.

Statute of limitations

The tax authorities have a period of up to five years from the end of the year in which a tax return is submitted to complete the assessment for that tax year. However, where the entity has not submitted any tax return, the tax authorities have a period of ten years to complete the assessments.

Maintenance of records

The Law requires accounting records and supporting documentation to be maintained for ten years after the end of the accounting period to which these records relate.

Topics of focus for tax authorities

Related party transactions are likely to attract particular scrutiny by the tax authorities. Taxpayers should maintain documentation that proves that transactions are carried on at arm's length.

Significant developments

The following significant developments in corporate taxation have recently occurred in Pakistan:

- The corporate tax rate decreased from 33% to 32% for tax year 2016, 31% for tax year 2017, and 30% for tax year 2018 onwards.
- Super tax is levied at 4% for banking companies and 3% for other companies earning income of more than 500 million Pakistani rupees (PKR). Super tax is payable only for tax year 2015.
- Undistributed reserves of companies are taxed if in excess of 100% of paid-up capital at the rate of 10%.
- Withholding tax (WHT) rates for unregistered taxpayers are enhanced.
- New WHT provisions for banking companies are introduced whereby all transactions in excess of PKR 50,000 by unregistered taxpayers are subjected to WHT of 0.6%.
- Returns filed by taxpayers are automatically selected for audit if their income for the year is less than 25% of their last declared income.
- Powers to issue notifications by the Federal Board of Revenue are restricted.
- Tax exemptions are allowed for solar and wind power energy plant and equipment manufacturing, agricultural cold chain and warehousing, halal meat production units, electricity transmission projects, manufacturing of cellular phones, and new manufacturing units set up in Khyber Pakhtunkhwa and Balochistan.

Taxes on corporate income

A resident company is taxed on its worldwide income. Non-resident companies operating in Pakistan through a branch are taxed on their Pakistan-source income, attributable to the branch, at rates applicable to a company.

The federal corporate tax rates on taxable income are as follows:

Company type	Tax rate (%)
Banking company	35
Public company other than a banking company	32
Any other company	32
Small company (see the <i>Tax credits and incentives</i> section for more information)	25

Note that the corporate tax rate for tax year 2017 is 31% and for tax years 2018 and onwards is 30% for companies other than banking companies.

The term 'public company' implies a company listed on any stock exchange in Pakistan or one in which not less than 50% of the shares are held by the federal government or a public trust.

In the case of a *modaraba* (see the *Income determination section for a definition*), income, except relating to trading activities, is exempt from tax, provided that 90% of its profit is distributed to the certificate holders as cash dividends.

The final tax regime (FTR) for resident taxpayers, a presumptive tax scheme where taxes are withheld at the source on the sale of goods and execution of contracts or collected at the time of import (for other than industrial raw materials), is considered the final tax liability in respect of income arising from the sale, contract, or import.

In the case of exports, tax collected at the time of realisation of foreign-exchange proceeds is treated as the final tax for that income.

The FTR is also applicable to non-resident taxpayers, at their option. However, it is only applicable in cases of receipts on account of the execution of a contract for construction, assembly, or installation, including a contract for the supply of management activities in relation to such project as well as certain contracts for services and contracts for advertisement services rendered by television satellite channels.

Taxation of a permanent establishment (PE) of a non-resident

The following principles shall apply in computing taxable income of a PE:

- It is a distinct and separate entity dealing independently with the non-resident of which it is a PE.
- In addition to business expenditure, executive and administrative expenditure, whether incurred in Pakistan or elsewhere, will be allowed as deductions.
- Head office expenditure, including rent, salaries, travelling, and any other expenditure that may be prescribed, shall be allowed as a deduction in proportion to the turnover of the PE in the same proportion as the non-resident's total head office expenditure bears to its worldwide turnover.
- Royalties, compensation for services (including management services), and interest on loans (except in banking business) payable or receivable to or from a PE's head office shall be considered in computing taxable income of the PE.
- No deduction will be allowed for any interest paid on loans acquired by a non-resident to finance the operations of a PE (or for the insurance premium in respect of such loans).

Minimum tax on turnover

Where the tax payable by a company is less than 1% of the turnover, except where the company is in a loss position before charging depreciation and other inadmissible expenses, the company is required to pay a minimum tax equivalent to 0.5% of the turnover. Tax paid in excess of normal tax liability can be carried forward for adjustment against tax liability of a subsequent tax year. However, such tax can only be adjusted against tax liability of the five tax years immediately succeeding the tax year for which the amount was paid.

The minimum tax rate for companies providing services is 8% of the turnover, except for certain specified services sectors, which are allowed concessions with conditions.

Alternate Corporate Tax (ACT)

Under the ACT, the minimum tax liability of a company is the higher of 17% of accounting income or the corporate tax liability determined under the ordinance, including minimum tax on turnover. This concept is applicable for all companies except insurance companies, companies engaged in exploration and production of petroleum, banking companies, and companies enjoying a reduced rate of tax. Exempt income, income taxable under the FTR, gain on disposal of specified listed securities, income entitled to 100% tax credit on account of equity investment, and income of non-profit organisations, trusts, and welfare institutions are not taxable under the ACT.

Pakistan

Super tax

Super tax is introduced through Finance Act, 2015 whereby 4% of super tax is payable by banking companies and 3% by other companies if the income of the company is PKR 500 million or more. Super tax is payable only for tax year 2015.

Local taxes on income

No local taxes are payable in respect of income of companies.

Corporate residence

A company is resident in Pakistan if it is incorporated or formed by or under the law of Pakistan or if the control and management of its affairs is situated wholly in Pakistan in that year.

The term 'company' includes a trust, a cooperative society, a finance society, or any other society established or constituted by or under any law; a corporate body incorporated outside Pakistan; and any foreign association, incorporated or unincorporated, that the Central Revenue authorities may declare to be a company.

Permanent establishment (PE)

A PE is a place of business through which the business of a non-resident is wholly or partly carried out, including:

- A place of management, branch, office, factory or workshop, premises for soliciting orders, warehouse, permanent sales exhibition, or sales outlet, except a liaison office.
- An agriculture, pastoral, or forestry property.
- A mine, oil or gas well, quarry, or any other place of extraction of natural resources.
- A building site; a construction, assembly, or installation project; or supervisory activities connected with such site or project if such activity continued for more than 90 days within any 12-month period.
- The furnishing of services, including consultancy services, by any person through employees or other personnel engaged by the person for that purpose.
- A person acting in Pakistan on behalf of the person, other than an agent of independent status acting in the ordinary course of business.
- Any substantial equipment installed, or other asset or property capable of activity giving rise to income.

The definition of a PE provided in a double taxation treaty (DTT) will prevail in cases where a DTT is executed by Pakistan with the related country of origin of the PE.

Other taxes

Value-added tax (VAT)

VAT (locally termed as 'sales tax') is ordinarily levied at 17% on the value of goods, unless specifically exempt, after allowing related input credits.

Telecommunication services are levied VAT at the rate of 19.5%. VAT on services, including telecommunication services, is a provincial levy.

Significant zero-rated goods are as follows:

- Supplies and repair and maintenance of certain ships and aircraft.
- Supplies to diplomatic missions and diplomats.
- Supplies of raw materials, components, and goods for export processing zones.
- Supplies of locally manufactured plant and machinery to export processing zones and supplies of certain specified machinery to the exploration and production sector.

- Supplies to exporters.

Significant exemptions are as follows:

- Live animals and live poultry.
- Live plants.
- Vegetables, pulses, edible fruits (excluding imported fruits), certain spices, sugar cane, edible oils, etc.
- Milk preparations.
- Newsprints, newspapers, journals, periodicals, and books.
- Agricultural produce not subjected to any process.

Customs and import duties

Customs and certain other duties are collected at the import stage at varying rates classified under the Harmonized System (HS) Code.

Excise duty

Federal excise duty (FED) is levied at the rate of 17% on certain types of manufacturing, import of goods, and rendering of services, except telecommunications services, which are charged at the rate of 19.5%. FED, under the constitution, is to be levied and collected by the provinces. Sindh, Punjab, and Khyber Pakhtunkhwa provinces have promulgated their statute, and others are expected to follow.

Property taxes

Property owners are required to pay property tax levied and collected by provincial governments through municipal governments at varying rates.

Stamp duty

In the case of sale or transfer of immovable property, stamp duty is payable (with varying rates on the basis of location of the property) on the value of the property.

Social security contributions

Nominal social security and Employees Old Age Benefit contribution is collected from the employers and the employees. Employers are responsible to collect and pay on a monthly basis.

Payroll taxes

Employers are not responsible to pay any other tax in respect of their employees or their salaries.

Branch income

The rates of tax for a branch of a company incorporated outside Pakistan are the same as those applicable on resident companies, other than public and banking companies (i.e. 32% for tax year 2016, 31% for tax year 2017, and 30% for tax year 2018 onwards). Tax at the rate of 12.5% is levied on the transfer of profits to the head office, with an exception for companies engaged in the oil and gas exploration and production business.

Payments to a branch in Pakistan of a non-resident are subject to deduction of tax at source on the same basis as a resident in the case of sale of goods, rendering of professional services, and execution of contracts. In other circumstances, a reduced/0% WHT certificate can be obtained from the Commissioner of Income Tax.

Pakistan has signed agreements for avoidance of double taxation with over 60 countries.

Income determination

Inventory valuation

Inventories are to be stated at the lower of cost or market. The first in first out (FIFO) and average methods are accepted. Conformity of methods used for book and tax reporting is desirable, and the method used should be consistently applied.

Capital gains

Capital gain on the sale of immovable property, on which depreciation is not allowed, is taxed at the rate of 10% if disposed of within one year and 5% if disposed of within two years. However, if the retention period is more than two years, the gain is not taxable.

Gain on the disposal of shares of a resident company or a non-resident company, whose assets wholly or principally consist of immovable property situated in Pakistan or rights to explore/exploit natural resources in Pakistan, shall be Pakistan-source income.

Tax rates on capital gains on the sale of shares of public companies or *modaraba* (profit sharing) certificates are exempt from tax if held for a period of more than 48 months for tax year 2016 onwards. Capital gains on shares and *modaraba* are taxable at 7.5% if held for less than 48 months and more than 24 months, taxable at 10% if held for less than 24 months and more than 12 months, and taxable at 12.5% if held for less than 12 months.

Capital gain, other than on statutory depreciable assets, realised within one year of acquisition is fully taxed; after one year, 75% of such gains are taxed and 25% are exempt.

Capital gains on statutory depreciable assets (other than immovable property) are chargeable to tax as normal business income in the year of sale. They are measured as the difference between the sale proceeds and the tax written-down value of the relevant asset sold.

In the case of an asset disposal transaction that is on a non-arm's-length basis, fair market value of the asset shall be taken to be the consideration received by the seller, as well as the cost for the buyer.

Where assets are transferred outside Pakistan, the original cost is treated as the sale price, which means that the entire depreciation is recaptured at the time of export, except if the assets are used in oil or gas exploration, in which case only the initial depreciation is recaptured.

No gain or loss shall be taken to arise on disposal of an asset by a resident company to another resident company, provided certain conditions are met. The required conditions include, *inter alia*, that the transferor is 100% owned by the transferee or *vice versa* or both companies are 100% owned by a third company, and the transferee income is not exempt in the year of transfer. The scheme of arrangement is approved by the Securities and Exchange Commission of Pakistan or State Bank of Pakistan.

Any distribution to the shareholders of a company, to the extent that it relates to undistributed profits, is treated as a dividend.

Capital loss can be offset only against capital gains. Unabsorbed capital loss can be carried forward for adjustment against capital gains for six years.

Dividend income

Dividend income is subject to WHT of 12.5% or a lower tax treaty rate. The rate is 17.5% for persons receiving dividend income but not filing income tax returns (non-filers).

The deduction at source shall be the full and final discharge of tax liability on dividend income, except for non-filers, who can claim a refund of 5% upon filing of an income tax return.

Stock dividends

Stock dividends declared by resident companies are taxable as bonus shares at the rate of 5%.

Interest income

Interest earned by a company is taxed as its income from other sources. Interest earned by a non-resident company without a PE in Pakistan attracts WHT at the rate of 10%, except where a lower rate is provided in the related DTT, which is also the final tax on such income.

Income from royalties and fees for technical services (FTS)

Royalties received by non-residents are deemed to accrue or arise in Pakistan and are taxable if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan.

Income from 'fees for technical services' (FTS) is deemed to accrue or arise in Pakistan if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan. FTS means any consideration for the rendering of any managerial, technical, or consultancy services (including the provision of the services of technical or other personnel), but does not include consideration for any construction, assembly, or like project undertaken by the recipient or consideration that would be income of the recipient chargeable under the head salary.

Other significant items

Liabilities allowed as a tax deduction in a tax year and remaining unpaid for three subsequent years are deemed to be income in the first tax year following the said three years. Such items are then allowed as a deduction in the year the liability is discharged.

Agricultural income is exempt from income tax.

Foreign income

A resident company is taxed on its worldwide income and on its foreign income as earned. Double taxation of foreign income is avoided by means of foreign tax credits; this relief is allowed to the resident company on the doubly taxed income at the lower of the Pakistan or foreign tax rate. Undistributed income of a non-resident subsidiary is not subject to tax.

Foreign loss can only be offset against foreign income and can be carried forward for six years.

Modaraba

Modaraba (profit sharing) is a financing vehicle that enables a management company to control and manage the business of a *modaraba* company with a minimum of 10% equity participation. The management company is entitled to remuneration based on an agreed percentage (but not exceeding 10%) of annual profits of the *modaraba* business. A *modaraba* can be for a specific purpose or many purposes and for a limited or unlimited period. The income of a *modaraba* not relating to trading activity is free from tax if 90% of its profits are distributed as cash dividend.

Deductions

Depreciation

Normal depreciation is allowed at the following prescribed rates by applying the reducing-balance method.

Pakistan

Assets	Depreciation rate (%)
Buildings	10
Furniture	15
Machinery and equipment, including motor vehicles and ships	15
Computer hardware, including monitors and printers	30
Aircraft and aero engines	30
Below-ground installations in mineral oil concerns	100
Offshore platform	20

All depreciable assets put into service for the first time in Pakistan during a tax year, other than road transport vehicles not plying for hire, furniture (including fixtures), plant and machinery used previously in Pakistan, or plant and machinery for which a deduction has been allowed under another section of this ordinance, for the entire cost of the asset, shall be entitled to an initial allowance at 50% of the cost of the asset, except for buildings, for which the rate is 15%.

Book depreciation need not conform to tax depreciation. Unabsorbed tax depreciation not set off against the income of the year is carried forward and added to depreciation of the assets of the same business in the following year. Tax depreciation can be carried forward without limit until fully absorbed.

Amortisation of intangibles

The cost incurred on acquisition of a patent, invention, design or model, secret formula or process, copyright, software, quota, licence, intellectual property, or other like property or right, and any expenditure that provides an advantage or benefit for a period of more than one year, is allowed as a deduction on a straight-line basis over the useful life of the asset, but not exceeding a period of ten years.

Any payment made against acquisition of goodwill will also be amortised under these provisions.

Organisational and start-up expenses

Expenditure incurred before the commencement of a business wholly and exclusively to derive income chargeable to tax can be deducted over a period of five years.

Interest expense

Interest expense is allowed as an expense if required WHT is deducted and deposited in the government treasury.

Bad debt

Bad debts are allowed as deductible expenditure if the following conditions are satisfied:

- Debts are included previously in the income chargeable to tax.
- Debts are written off in the financial statements.
- There are reasonable grounds for believing that the debt is irrecoverable.

Charitable contributions

See Charitable donations credit in the Tax credits and incentives section.

Fines and penalties

Fines or penalties that are not paid or payable for the violation of any law, rule, or regulation are allowable as tax deductible expenses.

Taxes

Taxes on income are not deductible. Sales tax and excise tax are tax deductible where these are to be absorbed by the business; otherwise, these are passed on to the consumer.

Other significant items

Expenditure on scientific research incurred in Pakistan wholly and exclusively for the purpose of deriving income chargeable to tax is an allowable expenditure.

Exchange gains and loss on foreign currency loans specifically obtained for acquiring an asset are adjusted against the depreciable cost of the asset.

Any lease rental incurred by a person in the tax year to a scheduled bank, financial institution, approved *modaraba*, or approved leasing company shall be a deductible expense. However, financial charges paid for the above-mentioned leases are added back into the taxable income of the company.

Net operating losses

Operating losses may be carried forward and set off against the profits of the succeeding six years of the same business in which the losses were incurred. Unabsorbed depreciation can be carried forward indefinitely.

Carried forward losses of an entity in the case of group relief cannot be utilised if the ownership of the holding company is reduced to less than 55% and 75% if one of the companies is a listed company or none of the companies is a listed company, respectively.

Business losses can be carried forward up to a period of six years in the case of the amalgamation of two companies, with the condition that the same business is continued for a minimum period of five years.

The carrying back of losses is not permitted.

Payments to foreign affiliates

The deductibility of a head office expenditure of a non-resident taxpayer is limited to the same proportion of total head office expenditure as the Pakistan turnover has with the total world turnover. However, such domestic rules are overridden if the branch is a tax resident of a country having an agreement for avoidance of double taxation (treaty) and that treaty provides a different basis.

Group taxation

A locally incorporated holding company and subsidiary of a 100% owned group may be taxed as one group by giving an irrevocable option for taxation as one fiscal unit. The relief is not available for losses prior to formation of the group. The group is available if the companies are designated as entitled to avail group relief by the Securities and Exchange Commission of Pakistan.

Any company that is the subsidiary of a holding company may surrender its loss for the year to its holding company or its subsidiary, or between another subsidiary of the holding company, provided that the holding company directly holds 55% or more capital of the subsidiary if one of the companies is a listed company. However, if none of the companies is a listed company, the holding requirement is 75% or more. The loss can be surrendered for a maximum of three years, and the required holding is for at least five years.

Transfer pricing

The tax authorities have the power in respect of a transaction between associates to distribute, apportion, or allocate income, deductions, or tax credits between such associates to reflect the income that would have been realised in an arm's-length transaction.

Pakistan

Thin capitalisation

Where a foreign-controlled resident company (other than a financial institution or a banking company) or a branch of a foreign company operating in Pakistan has a foreign-debt-to-foreign-equity ratio in excess of 3:1 at any time during a year, a deduction shall be disallowed for the profit on debt (interest) paid by the company in that year on that part of the debt that exceeds the 3:1 ratio.

Controlled foreign companies (CFCs)

The only provision with any implications for CFCs is defined under Thin capitalisation above.

Tax credits and incentives

Any relief from Pakistani income tax that is provided in any other law and not provided for in the Income Tax Ordinance or a treaty is not valid.

Tax exemptions

Profits and gains derived from an electric power generation project set up in Pakistan are exempt from tax.

Profits and gains derived by a company from the export of computer software, information technology (IT) services, or IT enabled services are exempt from tax through 30 June 2016.

Profits and gains from solar and wind energy plant and equipment manufacturing are exempt from tax for five years if set up by 31 December 2016.

Profit and gains from agricultural cold chain and warehousing are exempt from tax for three years if set up between 1 July 2015 and 30 June 2016.

Profits and gains from halal meat production are exempt from tax for a period of four years if set up between 1 July 2015 and 30 June 2017.

Profits and gains from new manufacturing units set up in Khyber Pakhtunkhwa and Balochistan are exempt from tax for five years if set up between 1 July 2015 and 30 June 2018.

Profits and gains from electricity transmission projects are exempt from tax for ten years if set up between 1 July 2015 and 30 June 2018.

Profits and gains from manufacturing of cellular phones are exempt from tax for five years if business commenced between 1 July 2015 and 30 June 2017.

Small companies

Activities of small companies are encouraged with a reduced income tax rate of 25%.

A small company has been defined to mean a company that:

- is registered on or after 1 July 2005 under the Companies Ordinance, 1984
- has a paid-up capital plus undistributed reserves not exceeding PKR 25 million
- has an annual turnover not exceeding PKR 250 million, and
- is not formed by splitting up or the reconstitution of business already in existence.

Charitable donations credit

Companies are allowed a tax credit equivalent to 20% of their taxable income in respect of donations to:

- any board of education or university in Pakistan, established by or under federal or provincial law
- any educational institution, hospital, or relief fund established or run in Pakistan by federal government, provincial government, or local government, and
- any non-profit organisation.

Foreign tax credit

Where a resident taxpayer derives foreign-source income on which foreign income tax is paid within two years from the year in which it is derived, the taxpayer is allowed a tax credit equal to the lower of (i) the foreign income tax paid or (ii) the Pakistan tax payable in respect of that income. However, foreign tax paid is not refundable.

Withholding taxes

WHT on payments of royalty and FTS, when royalty or FTS is not attributable to a PE in Pakistan, is 15% or a lower treaty rate of royalty or gross fees. The tax withheld is deemed to be the final tax liability of the non-resident. In the case of a non-resident where royalty or FTS is attributable to a PE in Pakistan, the amount of royalty/FTS shall be chargeable to tax as normal income, and withholding on payments can be avoided, subject to approval of the commissioner. If a reduced rate is available in a tax treaty, such rate would be applicable.

Resident corporations making certain types of payments must withhold tax as follows:

Recipient (1, 2, 3)	Dividends (%)	Interest (%)	Royalties (%)
Resident individuals	12.5	10	N/A
Resident corporations	12.5	10	0
Non-resident individuals:			
Non-treaty	12.5 (9)	10	15
Treaty	12.5 (9)	(4)	(4)
Non-resident corporations:

Notes

1. This table is a summary only and does not reproduce all the provisions that may be relevant in determining the application of WHT in each tax treaty.
2. Resident and non-resident imply tax status.
3. Individuals and companies are required to render annual returns of income and pay tax at the applicable rates. Credit is given for WHT deducted.
4. WHT rates for interest and royalties given to non-resident corporations (treaty countries) also apply to non-resident individuals.
5. The following remarks for dividends should be noted:
 - The inter-corporate rate of tax on dividends received by a foreign corporation is 12.5%; corresponding treaty WHT rates in excess of 12.5% have been specified.
 - The rates given in the table for treaty countries relate to recipient corporations. The maximum rate, as stated above, in respect of inter-corporate dividends is 12.5%. The lower rates are

- expressly provided in respect of dividends paid to a parent/associated corporation that has a certain minimum holding in a Pakistan industrial undertaking. The level of holding are noted:
- Japan: 25% and 50%.
 - United States: 50%.
6. Certain treaties provide for tax exemption of interest paid to the government or the central bank of the contracting state and on foreign loans specifically approved by the federal government.
 7. No concession is provided under the treaty.
 8. Royalties are exempt from tax, provided the recipient does not have a PE in Pakistan.
 9. Inter-corporate dividend where companies are entitled to group relief is exempt.
 10. WHT rate depends on percentage of holding in the company.
 11. This rate applies if the paying company is engaged in the industrial undertaking.
 12. Consideration for technical know-how or information concerning industrial, commercial, or scientific experience.
 13. This rate applies if the beneficial owner is a company.
 14. This rate applies if the beneficial owner is a bank.
 15. This rate applies if the paying company operates in preferred areas.
 16. This rate applies if the company is owned by the government.
 17. 5% is applicable for royalties payable for copyright of a literary, artistic, or scientific work, but excluding cinematograph films and tapes for television or broadcasting. All other royalties are taxable at 15%.
 18. 18% is applicable for royalties payable for patent, trademark, design or model, plan, secret formula, or process of any industrial or scientific equipment, or for information concerning industrial and scientific experience; 15% for copyright of literary, artistic, or scientific work; and 10% for copyright of cinematograph films or tapes for television or radio broadcasting.
 19. 10% is applicable for royalties payable for copyright of literary, artistic, and scientific work. All other royalties are taxable at 20%.

Tax administration

Taxable period

The tax year is 1 July through 30 June. However, tax authorities are empowered to approve a special year end.

Tax returns

All companies are required to file an income tax return each year by 31 December for the preceding financial year (1 July through 30 June) by accounting for business income on an accrual basis. If the special year granted by the tax authorities ends on 31 December, then the tax return is required to be filed by 30 September following the year-end.

An across-the-board self-assessment scheme is in place whereby assessment is taken to be finalised upon filing of the return. The Commissioner, however, has powers to amend the assessment if it is believed that the ordinance has been incorrectly applied or there is definite information that the assessment made is incorrect. These powers are to be exercised within a prescribed time frame. In the case of transactions between associates, the Commissioner can substitute the transaction value with the fair market consideration. The Commissioner is also empowered to determine tax liability according to the substance of the transaction, disregarding formal arrangements between the parties.

Payment of tax

Companies are required to pay advance tax on the basis of tax liability of the immediately preceding tax year in respect of their income (excluding capital gains and presumptive income). The advance tax is to be paid after adjusting the taxes withheld at source (other than the tax withheld relating to final tax regime).

Advance tax is required to be paid in four quarterly instalments on or before 25 September, 25 December, 25 March, and 15 June in each financial year. Credit for tax paid in a tax year shall be allowed against tax liability of that year.

The total tax liability is to be discharged at the time of filing the return of income.

Advance taxes and taxes withheld are adjustable against the tax payable with the return of income.

Pakistan

Tax audit process

The Federal Board of Revenue is authorised to prescribe criteria for selection of audit of taxpayers who have filed their returns for a tax year. Based on such criteria, cases are selected through computer ballot separately for income tax, sales tax, and federal excise duty. The returns are examined by tax authorities, and related documents and information are requisitioned. Show cause notices are then raised and, on receipt of explanations from taxpayers, income or loss is assessed. In case of disagreement with assessments, the taxpayer has the right to agitate the issues before appellate forums.

Statute of limitations

An audit of the tax return filed by a taxpayer can be conducted by the tax authorities within five years of the end of the financial year in which the return is filed.

Advance rulings

A non-resident not operating in Pakistan through a PE can apply to the Federal Board of Revenue to issue an advance ruling setting out the Board's position regarding application of the provisions of the Income Tax Ordinance to a transaction proposed or entered into by the taxpayer. The tax ruling, once issued, is binding on tax authorities.

Topics of focus of tax authorities

Tax authorities focus on the following issues:

- WHT.
- Transfer pricing.
- Relationship of expenditure with the business of the taxpayer.
- Advance tax.
- Payment of tax dues within the time prescribed.
- Audit of returns filed.
- Compliance by taxpayers.
- Collection of arrears.

Other issues

Special rules

Special rules are applicable for computation of income from exploration and production of petroleum, mineral deposits, insurance business, and banking business.

United States (US) Foreign Account Tax Compliance Act (FATCA)

Pakistan is under active negotiation with the United States for executing an agreement for compliance with FATCA; however, banks and other entities affected by FATCA are required to register with the US Internal Revenue Service (IRS).

Significant developments

There have been no significant corporate tax developments in Panama during the past year.

Taxes on corporate income

Panamanian income tax is levied based on the territoriality principle. Panamanian-source income is subject to taxation whether it is received by a resident or non-resident entity. Residency is only relevant to determine if the entity is subject to withholding tax (WHT) or not.

Corporations are subject to income tax at a fixed rate of 25%.

The tax base (i.e. amount to which the tax rate will apply) for companies whose taxable income is greater than 1.5 million United States dollars (USD) is the greater of:

- net taxable income calculated on the normal basis or
- 4.67% of the gross taxable income (excluding exempted and non-taxable income and foreign-source income); this is called the alternate calculation of income tax (*Calculo Alternativo del Impuesto sobre la Renta* or CAIR).

If the entity's tax year results in a loss due to the alternative calculation, the taxpayer may request to the tax administration (the National Administration of Public Income, i.e. *Administración Nacional de Ingresos Públicos* or ANIP) not to be subject to the CAIR.

The taxpayer may also request not to apply the CAIR if its effective income tax rate is higher than the applicable income tax rate (i.e. 25%). Here is an example of such an instance:

Net taxable income		USD
a	Total revenues	2,000.00
b	Deductible costs and expenses	1,950.00
c	Net taxable income	50.00
CAIR		USD
d	Presumptive net taxable income (4.67% x a)	93.40
e	Income tax (25% x d)	23.35
CAIR effective tax rate		
f	Presumptive income tax (e)	USD 23.35
g	Net taxable income (c)	USD 50.00
h	Effective tax rate (f/g)	46.70%

Panama

The ANIP has a six-month period within which to reach a decision on such requests; otherwise, the petition will be considered as granted.

Local municipal tax

Local municipal tax is charged based on the gross income generated by the business through the corresponding accounting period; it also depends on the type of activity being conducted by the corporation. In most cases, it cannot exceed USD 2,000 per month for each activity performed.

An Annual Municipal Tax Return for the District of Panama must be filed before the Municipal Authorities in the first 90 calendar days after the ending of the fiscal year. In case the taxpayer does not file the return before the deadline, a USD 500 penalty will be applicable.

Corporate residence

A company is considered as a tax resident when it has been incorporated in Panama and if Panama is regarded as the place where the central management is located. Entities incorporated abroad may also be registered with the tax administration in order to avoid WHT.

Permanent establishment (PE)

Panama follows the Organisation for Economic Co-operation and Development (OECD) PE rules.

Under Executive Decree, the income attributable to a PE or fixed place is that which the PE or fixed place could have obtained if it were a distinct and independent enterprise, taking into account the activities performed, assets used, and risks assumed.

Other taxes

Movable goods and services transfer tax (ITBMS)

The movable goods and services transfer tax (*Impuesto de Transferencia de Bienes Muebles y Prestación de Servicios* or ITBMS) is the Panamanian value-added tax (VAT).

The general tax rate is currently 7%.

Alcoholic beverages and hotel accommodation are taxed at 10%, and tobacco and tobacco-derived products are taxed at 15%.

ITBMS is calculated on the value-added through a method of tax credits (i.e. ITBMS paid on transactions to produce taxable transactions) and tax debits (i.e. ITBMS collected on transactions).

Exports are not taxed, and the ITBMS paid to generate the exports may be refunded. The sale of goods such as medicines, foods, and certain products for babies are not taxed and may allow the supplier to recover the ITBMS as an exporter if certain criteria is met.

Medical services and transportation, among other services, are not taxed but do not produce ITBMS credit for the supplier.

The statute of limitations is five years.

Customs duties

All goods introduced into the Panamanian territory from another country are subject to customs duties. The duty rates are provided by the Panamanian Customs and Tariffs Office.

Customs duties may only be assessed by authorised customs brokers.

Excise tax (selective consumption tax)

The selective consumption tax is applied to goods (e.g. jewellery, expensive automobiles, guns, tobacco, alcoholic beverages) and services (e.g. mobile, cable TV, satellite TV) that are considered as non-essential. The tax base is the cost, insurance, and freight (CIF) price plus import duties for imported items and sales price for all other activities. The tax is levied at only one stage: on the importation of the taxed products; on the sale of taxed goods produced in Panama; and, for services, when the service is invoiced, the service is completely rendered, or upon receipt of advance payments, whichever occurs first.

Different tax rates apply depending on the type of service or good, with a minimum of 5% on sodas and 100% on tobacco products.

Immovable Property Tax

In Panama, all owners of real estate should pay Immovable Property Tax annually at a rate between 0% and 2.10%, depending on the value of the property.

Stamp duty

Stamp duty is charged at a rate of USD 0.10 per USD 100 (or fraction thereof) only on certain commercial contracts.

Capital gains tax

The transfer of real estate property and securities is subject to WHT on the gross transactions amount, but the taxpayer may make a special income tax assessment to pay the capital gain and may request a rebate of the difference between the WHT and the capital gain.

In the case of the transfer of real estate property, a 2% real estate transfer tax plus a 3% income tax advance payment must be remitted (calculated over the gross transaction amount or the cadastral value, whichever is greater). The 3% may be deemed definitive; contrariwise, the tax will be assessed at 10% of the gain and the 3% of the advance payment will be credited. Any amount in excess may be subject to rebate.

The rates as described in the table below will be applicable to the transfer of real estate if:

- the transferor's core business is the sale of real estate with new constructions
- it is the first transfer of the real estate after the new construction is built, and
- the construction permit was issued after 1 January 2010.

New housing construction	Rate (%)
Up to USD 35,000	0.5
From USD 35,000 up to USD 80,000	1.5
Greater than USD 80,000	2.5
New commercial construction	4.5

When transferring new housing real estate, the real estate transfer tax (2%) does not apply if the transfer occurs within the next two years after an Occupancy Permit is issued.

Panama

The transfer of securities is subject to a 5% WHT, and the tax rate on capital gain is 10%. The law establishes the application of a 5% WHT that will be applied by the buyer. The seller may accept the WHT as definitive or perform the calculation of the gain, apply the rate of 10%, and deduce the applied WHT. In case the WHT is superior, the taxpayer can choose to claim the return of payments made in excess.

Example:

Sales price (a)	1,000
Cost (b)	900
Benefit (c)	100
WHT at 5% of (a)	50
Tax at 10% of (c)	10
Payment in excess	40

The sale of fixed assets is subject to 10% on the capital gain, and there is no WHT.

Franchise tax

Franchise tax must be paid by all corporations on an annual basis (USD 300 per year). The deadline for payment depends on the date of incorporation of the company. If the company was incorporated on any date during the first six months of the year, the due date for payment will be on 15 July of each year. If it was incorporated in the last six months, the due date will be 15 January of each year.

Non-profit organisations, cooperatives, and civil partnerships are not subject to franchise tax.

Operations notice tax

The notice of operations is an annual tax on equity at a rate of 2%, with a minimum tax amount of USD 100 and a maximum tax amount of USD 60,000. In the case of free zones or special trade areas, the tax will be calculated at a rate of 1% up to a maximum tax amount of USD 50,000.

The tax base is the outcome from total assets less total liabilities (excluding liabilities with related parties abroad). Special considerations apply under certain double tax treaties (DTTs).

Payroll taxes

Social security taxes

Social security tax is assessed at a rate of 9.75% on wages and other compensation paid, including compensation in kind, for employees and 12.25% for employers. There is no maximum limit on the taxable amount.

Educational insurance tax

Educational insurance tax is assessed at the rate of 1.25% for employees and 1.50% for employers, on salaries and wages paid. There is no maximum limit on the taxable amount.

Professional risk tax

Professional risk tax is an additional tax applicable to employers at 0.33% to 6.25% according to the type of industry.

Branch income

For tax purposes, branches are considered separate entities from the head office and must therefore keep accounts separately and will have separate tax liability.

Branches located within the Panamanian territory must pay dividend tax through definitive WHT of 10% of net taxable income generated by the Panamanian branch, less all income taxes paid by the same corporation in Panama. This amount will be paid jointly on filing the corresponding income tax return.

Income determination

Under the territoriality principle, the following will not be considered as taxable income:

- All income produced outside Panama.
- All income generated from operations or services performed outside the Panamanian territory.

Inventory valuation

Inventory should be valued at the start of any business and, subsequently, at least once every accounting period. All assets must be grouped, depending on their nature, with certain characteristics indicated (e.g. the unit of measurement, the name of the asset, the price of the unit, the total value of units). Reference to the accounting records should also be included.

Inventories are generally stated at cost and can be valued using the compound average cost method, first in first out (FIFO) method, retail method, or specific identification method. Since all entities must keep legal records, any adjustment resulting from using different methods of inventory valuation for tax purposes and financial purposes should be recorded and must be reported to the proper authorities. Once a taxpayer adopts a method, they must maintain it for at least five years.

Capital gains

See Capital gains tax in the Other taxes section for a description of how capital gains are taxed in Panama.

Dividend income

Panamanian legislation establishes that distribution of dividends is subject to definitive WHT, applied at the moment of distribution. Generally, dividends are subject to income tax at a rate of 10% without taking into consideration the form of payment, types of stock, assets, or money.

Dividend tax applies at a 5% rate on dividends paid from foreign-source income, from income derived from exports, as well as exempt income from banking account interests and interests and earnings derived from securities issued by the government.

Free zone users are taxed at a 5% rate as well for local-source income.

Loans to shareholders are deemed as dividend distributions, subject to a 10% withholding even in the cases where the 5% tax rate applies.

Notwithstanding the aforementioned, if the entity's shares are issued to bearer, they will be subject to dividend tax at a rate of 20%.

Dividend tax is levied if the entity meets one of the following criteria: (i) requires an operation permit to operate in Panama, (ii) requires an operation key to operate at the Colon Free Zone, (iii) is established in a Fuel Free Zone, (iv) is established in a free zone

Panama

or special zone, (v) produces Panamanian-source taxable income. Dividend tax also does not apply to dividends paid on income received as a dividend if the entity is not required to withhold dividend tax or if the entity withheld the tax.

A complementary tax applies each tax year that the entity distributes less than 40% of the net profits after income tax. The complementary tax is an advance payment of the dividend tax, calculated on the difference of the distributed dividends and 40% of the net profits after income tax, and applies the corresponding tax rate. If complementary tax is paid, then the entity may offset the paid complementary tax with the dividend tax when the corresponding dividend is decreed.

Inter-company dividends

The distribution of dividends derived from income received as dividends from other entities is not subject to income tax or dividend tax as long as the entity that paid the dividend in the first instance was exempt from withholding any dividend tax, or if it was required to, made the corresponding withholding.

Interest income

Interest income is subject to income tax.

Foreign income

Panamanian resident companies are taxed on their income generated within the Panamanian territory. Any other income generated abroad will be exempt from income tax payment but may be subject to dividend tax (*see above*).

Deductions

Taxable income is determined by deducting from the Panamanian-source income all costs, expenses, and non-taxable income applicable and permitted by law. The deductibility of costs and expenses depend on the relation of such costs and expenses with the generation or preservation of income source. Special restrictions apply to the following:

- Depreciation.
- Bad debt.
- Charitable contributions.

Costs and expenses related to non-taxable income are not considered as deductible. Thus, the taxpayer must split the expenses and costs related to taxable transactions from those related to non-taxable transactions. The expenses and costs allocated to taxed transactions may not exceed the amount from multiplying the portion of taxable income from the total income by the total costs and expenses.

Example:	Taxable	Non-taxable	Total
Income	100	50	150
	66.7%	33.3%	100%
Costs and expenses	83.38	41.62	125

Depreciation and depletion

The straight-line and sum-of-the-years-digits methods of depreciation are allowed, as well as any other method.

Assets	Straight-line (%)
Buildings	3 $\frac{1}{3}$ as maximum
Machinery and equipment	33 as maximum

Assets	Straight-line (%)
Furniture and fixtures	33 as maximum
Vehicles	33 as maximum

In the case of mines, depletion will be deductible during the useful life or depending on the state contract methodology.

Goodwill

Goodwill expenses are deductible only when the transferring agent declares them as income.

Start-up expenses

Start-up expenses are deductible through the amortisation process, over a maximum term of five years.

Interest expenses

Interest expenses are deductible only in cases where the interest relates to the generation or conservation of taxable income from a Panamanian source. No thin capitalisation rules are in force.

Bad debt

A taxpayer may deduct bad debts by opting for one of the following options:

- Deducting gains and losses annually to the value of such accounts in the fiscal year.
- Charging an annual profit and loss figure for the establishment of a reserve to meet contingencies of this nature.

Charitable contributions

Donations made in cash or in kind to the government, charitable or educational institutions, activities to promote HIV disease awareness, or political parties are deductible, with certain restrictions and limited to 1% of taxable income.

Fines and penalties

Fines and penalties are not deductible.

Taxes

The national and municipal taxes that affect capital, sales, and other operations related to taxable income producing activity are deductible.

Net operating losses

Losses incurred by common taxpayers may be carried forward and deducted from taxable profits for the following five years, at a rate of 20% each year, but limited to 50% of taxable income. Loss carrybacks are not allowed, and losses are not allowed for estimated income tax purposes.

Payments to foreign affiliates

A payment to a foreign entity (including affiliates) in a foreign country will be subject to WHT anytime it represents a deductible cost or expense for the payer. The tax base will be 50% of the remittance, and the income tax rate applicable is 25%.

Group taxation

In Panama, there are no group taxation rules.

Panama

Transfer pricing

Transfer pricing rules are applicable for all transactions with non-domiciled related parties.

An informative return must be filed within six months after the end of the taxable year. An additional 'arm's-length' economic study must be kept and made available for tax authority inspection upon request.

Thin capitalisation

There are currently no thin capitalisation rules in Panama.

Controlled foreign companies (CFCs)

There are no provisions regarding CFCs in Panama.

Tax credits and incentives

Foreign tax credit

Foreign tax credits are not applicable in Panama.

Free zones

Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, and selective consumption tax derived from royalties on exportation and re-exportation activities. Aside from trading activities, the following businesses may also apply for the regime: higher education centres, scientific research centres, specialised centres for health services, high technology businesses, assembling businesses, semi processed or finished products processing businesses, services businesses, environmental service businesses, general services, logistics services businesses, and manufacturing businesses.

Tourism, industry, and agriculture allowances

The Incentive Law for Tourism Development grants several tax benefits (e.g. exemption from import duties on certain tourism services and related goods, exemption from property tax for companies dedicated to tourism), but only for those corporations with a signed tourism agreement with the government. Income tax exemptions may apply in special cases.

In general, income from individuals or corporations that engage in agricultural production activities will be exempted from income tax if annual gross income is lower than USD 250,000.

Forestry plantations are totally exempted from income tax payment until 2018 if the lot planted has been duly registered at the Forestry Registry of the Environmental National Authority and resolution with approval from this authority has been issued.

Special laws

The Panamanian government has enacted special laws regarding tax exemptions for certain activities performed in Panama, such as call centres (Law No. 54 of 2001), and tax exemptions for certain appointed areas, such as the Panama Pacific Economic Zone (Law No. 41 of 2004) and Law No. 41 of 2007, which creates a special regime for the establishment and operation of regional headquarters in Panama.

By means of Law No. 8 of 2010, Real Estate Investment Societies may deduct the profits distributed to their shareholders, provided that these Real Estate Investment Societies:

- raise long-term funds in a securities market
- are registered in the National Securities Commission
- distribute no less than 90% of their free cash flow

- register in the General Direction of Revenues, and
- withhold 20% of the profits distributed as an income tax advance payment on behalf of the shareholder, which may be deemed the definitive tax to be paid by the shareholder.

Withholding taxes

Royalties and commissions on services paid to foreign entities are taxed through the application of the corresponding tax rate (i.e. 25%) over 50% of remittance under the concept of WHT (effective tax rate is 12.5%). The taxpayer may decide not to withhold taxes and consequently not deduct the expense.

Payment of interest is also subject to income tax on 50% of the interest paid to a beneficiary abroad on loans invested in Panama, but the payer must proceed with the WHT even if one does not deduct the interest.

If the beneficiary is registered as a taxpayer in Panama before the tax administration, no WHT may be required.

If, according to a special law, the payment of interest, royalties, dividends, fees, etc. is exempt from WHT, said exemption will not apply if the beneficial owner of the payment can credit the taxes that would have been paid in Panama in its country of residence. In the event that the credit application is not allowed in the country of residence, the taxpayer must request a formal opinion from an independent expert stating the non-applicability of the tax credit in the country of residence.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Foreign corporations	5/10/20	12.5	12.5

In case of treaties, special rules are applicable in order to avoid double taxation.

Recipient	WHT (%)			
	Dividends	Interest	Royalties	Fees
Barbados	5/7.5 (1)	0/5/7.5 (2)	7.5	0/7.5 (3)
Czech Republic	10	0/5/10 (18)	10	0
France	5/15 (6)	0/5 (4)	5	N/A
Ireland	5	0/5 (4)	5	N/A
Israel	5/15 (19)	0/15 (4)	15	N/A
Korea	5/15 (1)	0/5 (4)	3/10 (5)	0

United Arab Emirates	5	0/5 (4)	5	0/12.5 (17)
United Kingdom	0/15 (15)	0/5 (16)	5	N/A

Notes

1. Depending on the percentage of ownership held by the beneficial owner (at least 25% to apply the 5% rate).

Panama

2. Depending on the person or entity receiving the payment. If the beneficial owner is a bank, the 5% rate will apply; if the beneficial owner is the Central Bank of either state, the 0% rate will apply; in all other cases, the 7.5% rate will apply.
3. If the services are not rendered in any of the states, the income will only be taxed in the state where such income arose.
4. If paid to government financial institutions, the 0% rate will apply.
5. 3% for the use or right to use industrial, commercial, or scientific equipment.
6. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 5% rate).
7. Depending on the person or entity receiving the payment. If the beneficial owner is a bank, the 5% rate will apply; if the beneficial owner is the Central Bank of either state, the 0% rate will apply; in all other cases, the 10% rate will apply.
8. The 12.5% rate applies if the person rendering the services is in the other state for more than 60 days.
9. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 15% of the shares of the company paying the dividends, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange. Also, no WHT is levied if the foreign company is a bank or insurance company, a state or political subdivision, a headquarter owning at least 10% of the shares of the Dutch company, or a pension fund.
10. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 10% rate).
11. If the services are rendered in Panama, then the 10% rate will apply.
12. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 4% rate).
13. 5% WHT rate is levied if the recipient (excluding partnerships) is a shareholder with at least a 40% direct interest in the paying company; otherwise, a 10% rate is levied. No WHT is levied if the recipient is a shareholder with at least an 80% direct interest in the paying company, and (i) its shares are listed on a stock exchange, (ii) the recipient is at least 50% owned by residents from either of the two countries, (iii) the recipient is owned by shareholders resident for tax purposes in third countries by a proportion of less than 25%, and (iv) the recipient is owned (an interest of more than 25%) by residents in third countries, provided that a tax treaty for the avoidance of double taxation has been signed with the country of the company paying the dividends and that this tax treaty establishes the same or more favourable conditions. No WHT is levied for dividends paid to pension funds.
14. If the services are rendered in Panama, then the 7.5% rate will be applicable.
15. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 15% of the shares of the company paying the dividends, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange.
16. 5% but only if: (i) the interest is beneficially owned by: (i) an individual, (ii) a company with shares regularly traded on a recognised stock exchange, (iii) a financial institution or (II) the interest is paid by: (i) a state, political subdivision, or local authority, (ii) a bank, or (iii) on a quoted eurobond. The 0% rate will apply if it is paid to the Central Bank of either state.
17. If the person is more than 90 days in Panama, then the 12.5% rate will apply.
18. 0% applies for sales on credit and payments to the Central Bank; 5% for payments to banks in general; and 10% for all other cases.
19. 5% if the beneficial owner is resident of a contracting state or the beneficial owner is a pension scheme.

Tax administration

Taxable period

The accounting period is the period for which the company makes its accounts. Returns shall be made upon completion of the accounting period and may not exceed 12 months. For most companies, it is usually from 1 January to 31 December.

Tax returns

The due date for filing is three months after the end of the fiscal year, with the possibility for an extension of up to one additional month.

Payment of tax

Income tax payment shall be made depending on the income tax return and shall be made no longer than three months after closing of the corresponding accounting period.

Taxpayers must pay estimated taxes (usually the same amount as generated income) at the end of the sixth, ninth, and 12th month after the end of the corresponding accounting period.

Tax audit process

Tax authorities select the taxpayers subject to audit based on internal criterion.

Statute of limitations

The tax administration may audit the income tax returns filed within the last three years from the last day of the year on which the tax return was filed.

Topics of focus for tax authorities

Among the topics of focus are non-deductible expenses, withholdings, and VAT.

Other issues***US Foreign Account Tax Compliance Act (FATCA)***

Panama signed the Model 1 Intergovernmental Agreement (IGA) for FATCA purposes with the US Treasury in order for Panamanian Banks to subscribe to the terms of FATCA.

Significant developments

The 2016 National Budget was handed down on 3 November 2015. The budget contained no material changes to the tax regime, as most of the amendments were technical in nature.

Taxes on corporate income

Papua New Guinea (PNG) resident companies are liable for income tax on their worldwide income. Companies that are not resident in Papua New Guinea are only required to remit tax on income sourced in Papua New Guinea. A non-resident's PNG-sourced passive income, including dividends, interest, and royalties, is generally only subject to withholding tax (WHT). It is ordinarily the case that the payer of the dividend, interest, or royalty must withhold the relevant amount of the tax and remit this to PNG's Internal Revenue Commission (IRC).

Papua New Guinea levies corporate income tax (CIT) on companies on a flat rate basis. The operations of a company, rather than the company's taxable income level, will dictate the rate applied to the company's taxable income.

Generally, trading profits and other income (except income that is specifically exempt) of resident companies in Papua New Guinea are assessed tax at a rate of 30%, whereas non-resident companies operating in Papua New Guinea are assessed tax at a rate of 48%. There are, however, different tax rates for income derived from mining, petroleum, and gas operations.

Specifically, trading profits and other income from operations in Papua New Guinea are liable for CIT at the following rates:

Source of income	CIT rate (%)
Income other than income from mining, petroleum, or gas operations:	
Resident company	30
Non-resident company	48
Income from petroleum operations: *	
Existing projects	50
New projects	45
Incentive rate projects	30
Income from mining operations:	
Resident company	30
Non-resident company	40
Income from gas operations *	30

* The same rates of CIT apply to income from the petroleum operations listed above or gas operations derived by a resident or non-resident company.

Overseas shippers

Income derived by overseas shippers or charterers carrying passengers, livestock, mail, or goods out of Papua New Guinea is taxable in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 5% of the gross income, which is taxable at the non-resident rate of 48% in the case of companies. The IRC may exempt the overseas shipper from tax if the shipper's home country exempts PNG shippers from a similar tax.

Local income taxes

There are no local income taxes in Papua New Guinea.

Corporate residence

A company will be deemed a resident for CIT purposes if it meets either the (i) incorporation test or (ii) the management and control test.

Incorporation test

A company incorporated in Papua New Guinea is automatically regarded as a PNG tax resident. However, the operation of the law of another country and a relevant double taxation treaty (DTT) may result in a company also being treated as resident in another country.

Management and control test

A company is a PNG tax resident if it is managed and controlled in Papua New Guinea, regardless of where it is incorporated. Generally, a company is managed and controlled in Papua New Guinea if key decisions affecting the company are made at directors' meetings held in Papua New Guinea. This also includes a company incorporated outside Papua New Guinea that trades in Papua New Guinea and has its voting power controlled by resident shareholders.

Dual residence

An entity may be a tax resident of both Papua New Guinea and another country by application of domestic legislation. A DTT entered into between Papua New Guinea and another country may contain a tiebreaker test to determine the country of residence for the purposes of the DTT.

Permanent establishment (PE)

The concept of 'permanent establishment' has limited significance in the domestic taxation law of Papua New Guinea and is defined to mean a place at or through which a person carries on any business. Under domestic taxation law, Papua New Guinea will seek to tax the PNG-sourced income of a non-resident irrespective of whether or not that income is derived at or through a PE in Papua New Guinea.

Where PNG has entered into a DTT, the concept of PE becomes more important as it will then be one of the factors determining Papua New Guinea's taxing rights over income sourced in Papua New Guinea, particularly with respect to the business profits of a non-resident company. In general terms, Papua New Guinea's DTTs:

- define a PE to be a fixed place at or through which the business of an enterprise is wholly or partly carried on, and
- deem a PE to exist in various circumstances, including those relating to the presence of substantial equipment in the contracting state and the time spent by personnel of an enterprise furnishing services in a contracting state.

Papua New Guinea

Other taxes

Goods and services tax (GST)

The GST rate is 10% and applies to most goods and services supplied in Papua New Guinea. Exported goods and services attract a zero rate of GST. Goods and services, other than motor cars, supplied to mining, petroleum, or gas companies are also zero-rated. Some goods and services are exempt, including medical, educational, and financial services. Land is excluded from GST, but buildings and other improvements are subject to the tax.

An import GST deferral scheme was introduced in the 2015 National Budget and is effective from 1 January 2016. While no formal guidance on its administration has been issued, we understand taxpayers will need to have a good history of tax compliance in order to qualify.

Directors of companies that fail to comply with GST obligations are personally liable for a penalty equal to the outstanding tax liability that the company ought to have remitted to the IRC.

Customs duties

The majority of manufacturing inputs (including plant and machinery) attract no customs duties, and other customs duty rates are being progressively reduced. The remaining rates for customs duties vary depending on the nature of the good being imported and are assessed on the total value of the goods imported, including cost, insurance, and freight (CIF). Customs bonds may be issued for the temporary importation of goods that are to be re-exported within 12 months.

Excise taxes

Although customs duties are now minimal in many cases, some goods, most notably motor vehicles, now attract excise tax. Private motor vehicles generally attract excise tax at the rate of 60%, whereas work vehicles attract excise tax of 10%. Excise taxes can also apply to some domestically produced goods, including refined fuel products, alcohol, and tobacco. The tobacco excise tax is levied at 5% biannually (10% annually).

Land tax

Land tax is imposed annually by provincial governments on the unimproved value of the land, and the power to levy land tax is vested exclusively with the provincial governments. In Papua New Guinea, land tax is difficult to implement and faces major geographical and social problems.

Stamp duties

Stamp duty applies at varying rates on documents and certain transactions. Of particular note is duty charged on the conveyance of property, which rises to a maximum of 5% where the value of the property being transferred exceeds 100,000 PNG kina (PGK). The duty is payable by the purchaser, and a 5% duty on the unencumbered value of land may also be payable where there is a transfer of shares in certain landholding companies.

Other dutiable transactions include share transfers (including some share buy-backs), which are subject to a rate of 1%. The Collector of Stamp Duties has the power to amend assessments and refund overpayments of stamp duty.

The Stamp Duties Act was amended to implement a rental income compliance system. The amendment effectively makes it compulsory for a landlord to provide their Taxation Identification Number (TIN) on lease documents, as lease documents will not otherwise be stamped.

Stamp duty is payable on documents executed outside Papua New Guinea that relate to property or matters done or to be done in Papua New Guinea.

Export duties

Timber

Export duty on timber logs (not sawn timber or plantation logs) is calculated with reference to the freight on board (FOB) value per cubic metre of exported logs and rates that increase as the value of the exported logs increase.

Spices

Levies are imposed from time to time on the export of specified spices (e.g. vanilla).

Salary or wages tax (SWT)

Businesses paying salary or wages to employees are required to withhold SWT (calculated at the prescribed marginal rates) and remit to the IRC on the seventh day of the month following the month of payment.

Salary or wages is defined as remuneration paid to employees in cash or kind, including benefits such as accommodation and transportation.

Normal employment-related receipts and benefits also include any remuneration paid as consultancy fees or fees for professional services, where the remuneration is paid wholly or substantially for personal services performed in Papua New Guinea.

Directors are personally liable for any unpaid SWT obligations of their companies. Directors who fail to ensure their company complies with its SWT reporting obligations may be penalised at a rate of 20% of the unpaid tax liability *per annum*. After three months of non-payment of outstanding SWT, directors will not be able to obtain a remission of penalties imposed.

Contributions to employee superannuation funds

Contributions to employee superannuation funds are compulsory for entities with 15 or more permanent employees. The employer's compulsory contribution is 8.4% of each employee's gross basic salary. The employee's minimum contribution is 6.0%.

Membership is generally compulsory for citizens. Non-citizens are currently exempt; however, this is under continuing review.

Contributions must be paid to an authorised superannuation fund. Contributions paid to an authorised fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee's gross taxable salary. Contributions to non-resident funds are not tax-deductible.

Training levy

All businesses whose annual payroll exceeds PGK 200,000 are subject to a 2% training levy, calculated on the sum of the taxable salaries, including benefits, of all personnel. Qualifying expenses incurred in training PNG citizen employees are creditable up to the actual amount of the levy. The training levy, if payable, is not tax-deductible.

Departure tax

A departure tax is collected by airlines issuing tickets for persons departing Papua New Guinea.

Gaming machine tax

Papua New Guinea imposes a 74% tax on gross revenue from gaming machines.

Resource project production levies

Production royalties of 2% are payable to the national government on the net smelter return from mining operations. These royalties are tax-deductible. A royalty, at the rate of 2% of the wellhead value, is also payable from the production of petroleum and

Papua New Guinea

gas operations. Holders of new petroleum development licences are entitled to treat royalties as income tax paid. However, new petroleum projects will also pay a tax-deductible development levy calculated at the same rate of 2% of the wellhead value.

Mining projects are also required to pay a production levy to the Mineral Resources Authority calculated at a rate between 0.25% and 0.5% of the assessable income from production.

Branch income

Income derived by a non-resident contractor for services in Papua New Guinea is usually subject to a WHT at the rate of 12% of gross income. This amount is calculated on deemed taxable income of 25% of the gross contract income, which is taxed at the non-resident tax rate of 48% (subject to tax treaties). The provisions extend to payments for the following:

- The installation, maintenance, and use in Papua New Guinea of substantial equipment or machinery.
- Construction projects.
- For the lease or charter of any industrial, commercial, or scientific equipment or any machinery or vehicle.
- Consultancy or management services.

Where the non-resident contractor rules do not apply, the non-resident company will be subject to income tax at the non-resident tax rate of 48% on its PNG-sourced taxable income (*see the Income determination section for a definition of taxable income*).

PNG branch remittances are not liable for dividends WHT or any branch profits or similar tax.

Income determination

Taxable income is defined as the sum of assessable income minus allowable deductions. In practice, profits are calculated for tax purposes by reference to the profits reported in the financial accounts. Accounts must be prepared in accordance with PNG accounting principles, which follow the International Financial Reporting Standards (IFRS).

Inventory valuation

There is no form of stock relief or trading stock valuation adjustment to recognise the effects of inflation in Papua New Guinea. There is a once-only option to adopt the lowest of the cost amount, the market selling value, or the replacement value (which, in practice, may mean that book and tax valuations for trading stock are not aligned). Where the option is not exercised, the value of the stock is deemed to be the cost price; however, neither the income tax law nor the associated regulations provide detailed guidance on what constitutes 'cost price' (the Commissioner General of Internal Revenue has not produced any related guidance to date). It will generally be the case that where a taxpayer has determined a cost price in accordance with IFRS that cost price will also be accepted for income tax purposes.

In special circumstances, the Commissioner General of Internal Revenue may accept a lower valuation.

Capital gains

There is no general capital gains tax in Papua New Guinea. However, profits arising on the sale of property acquired for the purpose of resale at a profit, or from the carrying out of a profit-making scheme, are taxable as ordinary income.

Dividend income

Unless otherwise exempt from CIT, dividends are included in the assessable income of a shareholder.

Inter-company dividends

Dividends received by a resident company from other companies, whether resident or non-resident, while being assessable to tax, are generally subject to a full tax rebate and are effectively received tax-free. However, where a company has losses on other activities or losses carried over from earlier years, those losses are applied against dividend income before the calculation of the dividend rebate.

Stock dividends

In most cases, the payment of a dividend by way of the issue of shares is subject to the same taxation treatment as the payment of a dividend by way of cash or the distribution of other property. However, dividends paid by the issue of shares wholly and exclusively out of profits arising from the sale or revaluation of assets not acquired for the purpose of resale at a profit are exempt from income tax and dividends WHT.

Interest income

Unless exempt under specific provisions, interest paid or credited by a financial institution, the Central Bank, or a company to a person resident in Papua New Guinea is includable in income, and the person making the payment of or crediting interest in the account is liable to withhold and pay tax upon the amount.

Partnership income

A partner's share of the assessable income of the partnership less all allowable deductions to the partnership is includable in the partner's assessable income for the year of income. Likewise, the partner's individual interest in a partnership loss incurred in the year of income is an allowable deduction. Further, if income is exempt income to the partnership, this income will be exempt income to the individual partner relative to their individual interest.

Unrealised exchange gains/losses

Generally, foreign exchange gains realised and derived from debts made on or after 11 November 1986 or denominated in a currency other than the Papua New Guinea kina are included in assessable income.

Foreign income

PNG resident companies are liable for CIT on their income from all sources (i.e. including foreign-sourced income). A foreign tax credit may be available to offset foreign tax paid against PNG tax payable (*see the Tax credits and incentives section for more information*).

There are no provisions in Papua New Guinea that permit the deferral of the taxation of income derived outside Papua New Guinea. Subject to the operation of a DTT, foreign-sourced income derived by a resident of Papua New Guinea is subject to tax in Papua New Guinea in the year in which it is derived, irrespective of whether or not that income is repatriated to Papua New Guinea.

Deductions

General deduction provisions provide that all losses and expenditures, to the extent incurred in gaining or producing the assessable income or necessarily incurred in carrying on a business for the purpose of gaining or producing that income, are allowable deductions. However, the general deduction provisions do not allow a deduction to the extent a loss or expenditure is an outgoing of capital, or of a capital,

Papua New Guinea

private, or domestic nature, or incurred in relation to the gaining or production of exempt income.

Depreciation

Depreciation is allowed for equipment and other assets at prescribed rates. A taxpayer must use the diminishing-value method unless an election is made to use the prime-cost method. The applicable diminishing-value rates are 150% of the prime-cost rates.

Plant, machinery, and equipment

Plant, machinery, and equipment (including buildings) are depreciable at rates according to their estimated lives. A taxpayer other than a taxpayer who derives income from mining, petroleum, or gas operations may elect to claim special accelerated depreciation rates for certain capital items. For example, flexible depreciation rates (up to 100%) may be claimed on new industrial plant with a life exceeding five years that is used for manufacturing purposes. Other new plant and articles used in manufacturing, construction, transport, storage, communication, and agricultural production are eligible for an accelerated deduction equal to 20% of cost in the year of purchase. New plant and articles used for tourism are eligible for an accelerated deduction equal to 55% of cost in the year of purchase.

Motor vehicles

Motor vehicles are generally depreciable at 20% of prime cost. There is no upper limit in value for depreciation purposes.

Buildings

Buildings forming an integral part of plant, machinery, and equipment are depreciable at a prime-cost rate of up to 7.5%, depending on the construction materials. Buildings housing plants eligible for the one-year write-off deduction (*see comments on new industrial plant under Plant, machinery, and equipment above*) can be written off in the year of construction. Other income producing buildings may qualify for the accelerated deduction of 20% in the year of purchase.

Agricultural and fishing plants

Most items of new agricultural and commercial fishing plants qualify for 100% depreciation, as do boats and ships, including ancillary equipment, used solely as dive boats or for scuba diving by accredited tour operators. Other new items having a life exceeding five years used by a person carrying on agricultural operations are eligible for accelerated depreciation in the initial year of use.

Goodwill

A deduction is not available for goodwill or the amortisation of goodwill in Papua New Guinea (this being an amount not deductible under ordinary concepts and an item for which there is no specific deduction provision).

Start-up expenses

It will generally be the case that start-up expenses will not be deductible in Papua New Guinea. Such expenses are generally either capital, or of a capital nature, or incurred prior to the derivation of assessable income. There is no specific deduction provision for the deductibility of start-up expenses.

Interest expenses

A deduction is generally available for interest incurred on an arm's-length basis, subject to meeting the general principles for deductibility and the requirements under the thin capitalisation rules (*see Thin capitalisation in the Group taxation section*). Where interest is incurred in connection with the construction or acquisition of a plant or capital asset, that interest is not immediately deductible. Rather, such interest is deemed to form part of the cost of that asset (and in the case of a plant will then form part of the base from which future depreciation deductions may be claimed).

Bad debt

Bad debts are deductible if they have previously been included in assessable income and written off by year end or if the bad debt was in respect of money lent in the ordinary course of the taxpayer's business of money lending.

Double deductions

An additional amount equal to the actual amount of expenditure incurred is deductible in respect of certain expenditures (e.g. export market development costs, some staff training costs, certain donations). In other words, a 'double deduction' is available with respect to these items.

Donations

It is considered that donations made by a corporate taxpayer meet the general principles for deductibility and hence will generally be deductible (notwithstanding the specific provision dealing with gifts to charitable bodies has no current effect as there are no charitable bodies approved by the Commissioner General of Internal Revenue for this purpose). There are specific provisions in Papua New Guinea's taxation law dealing with the deductibility of certain donations, some of which provide a deduction for up to 200% of the value of the amount donated.

Pension expenses

Contributions paid to an authorised superannuation fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee's gross taxable salary. Contributions to non-resident funds are not tax-deductible. *See the Other taxes section for more information.*

Fines and penalties

There are no specific provisions denying a deduction for fines or penalties in Papua New Guinea taxation law; however, arguably, fines and penalties may not meet the general principles for deductibility, and their deductibility needs to be considered on a case-by-case basis.

Taxes

A deduction is not allowable in respect of payments of income tax or training levy. Other taxes may be deductible, subject to meeting the general principles for deductibility.

Net operating losses

Domestic

Trading losses may be offset against all income received in the same accounting period or carried forward and offset against future trading profits. The limitation period on the carryforward of losses is generally 20 years. Losses may not be carried back against prior years' profits. Primary production losses and resource project losses may be carried forward without a time limitation, although, again, they may not be carried back (*see the Tax credits and incentives section for more information*).

Note that the carryforward of losses is subject to a 50% or more continuity of shareholding and control test, or a continuity of business test where there is a breach of the ownership test.

Foreign

Losses incurred by a resident taxpayer from a source outside Papua New Guinea (other than in relation to export market development) are not deductible against assessable income derived within Papua New Guinea. In practice, overseas losses can be carried forward and offset against overseas income for up to 20 years.

Papua New Guinea

Payments to foreign affiliates

The deduction available to a taxpayer for management fees paid to an associated person is limited to the greater of:

- 2% of assessable income derived from PNG sources by the taxpayer or
- 2% of the total allowable deductions, excluding management fees incurred by the taxpayer in Papua New Guinea.

The limitation applies to both resident and non-resident taxpayers. Special rules apply to mining, petroleum, and gas companies. These limits may not apply where the recipient of the management fee is resident in a country with which Papua New Guinea has a DTT or where it can be demonstrated that the management fee arrangements do not have the purposes or effect of avoiding or altering the income tax payable in Papua New Guinea.

Group taxation

Companies are assessed for CIT separately, regardless of whether they are part of a group of associated or related companies. Losses of one company within a group cannot be offset for tax purposes against the profits of another company within that group.

The Companies Act allows two or more companies to amalgamate and continue as one, and provisions are in place to allow this to occur without any adverse CIT consequences.

Transfer pricing

Papua New Guinea has transfer pricing provisions that require transactions with foreign affiliates to be conducted on an arm's-length basis. Disclosure of such transactions is done through an international dealings schedule (IDS). Corporate taxpayers (including companies, superannuation funds, and unit trusts) that have transactions or dealings with international affiliates that exceed PGK 100,000 in an income year or have aggregate loan balances with international affiliates in excess of PGK 2 million at any time during an income year are required to prepare and lodge an IDS with their income tax return for that year of income.

Thin capitalisation

Thin capitalisation rules apply to prevent taxpayers from incurring excessive levels of debt. By excessively gearing their investments, companies are able to claim greater tax deductions through the interest expense charged on such debt. Thin capitalisation rules typically feature a debt-to-equity ratio that governs the ratio by which companies can borrow from related parties relative to their equity. Any interest charged on debt that exceeds this ratio will not be deductible for CIT purposes.

Papua New Guinea's thin capitalisation rules apply a debt-to-equity ratio of 3:1 to PNG resource companies and 2:1 to all other PNG companies.

These rules do not apply to licensed financial institutions and do not apply to interest paid under domestic debt for non-resource companies. If the ratio is breached, a proportion of the interest on foreign debt will be denied as a tax deduction. For resource companies, a proportion of interest on all debt will be denied.

Controlled foreign companies (CFCs)

Papua New Guinea does not have CFC rules.

Tax credits and incentives

In this section, we comment on the more significant tax credits and incentives available in Papua New Guinea, followed by a summary of those with more limited application.

Foreign tax credit

A foreign tax credit may be available to offset foreign tax paid against PNG tax payable. The foreign tax credit is limited to either the foreign tax paid or the average PNG tax payable on that foreign income, whichever is less. There is no mechanism to carry forward excess foreign tax credits for utilisation in a subsequent year.

Primary production incentives

Key incentives that are available with specific application to primary production activities include:

- Outright deductions for certain capital expenditures, including clearing, preparing, or conserving land for agriculture; eradicating pests; providing labourers' accommodation; and for the conservation and conveyance of water.
- A 100% deduction is available for a new plant used directly for the purposes of agricultural production, and an initial 20% accelerated depreciation deduction is allowed for a new plant with a life exceeding five years.
- Losses incurred in carrying on a primary production business can be carried forward indefinitely; they are not restricted to the 20-year limit that generally applies to company tax losses.
- Agricultural companies may transfer to their shareholders the benefit of the outright tax deduction available for many types of capital expenditures. The total deduction available to shareholders may not exceed the amounts paid on their shares.
- As part of promoting investment in primary production, a 20% tax rate is prescribed in respect of 'incentive rate primary production income' derived by a company (as opposed to the normal 30% tax rate for a resident company or 48% for a non-resident company) for up to ten years.

Agricultural production extension services deduction

A 150% deduction is available for expenditure on services provided free of charge to smallholder growers, including the provision of advice, training, and technical assistance in relation to primary production to assist growers with production, processing, packaging, and marketing issues.

Incentive rate for large-scale tourist accommodation facilities

A 20% tax rate applies to income derived by a taxpayer from the operation of a large-scale tourist accommodation facility or a substantially improved large-scale tourist accommodation facility. The concession applies where construction of such facilities commenced between 1 January 2007 and 31 December 2011, expenditure is 7 million United States dollars (USD) or more, and the taxpayer is registered with the IRC. The rate applies for 14 years after the end of the year of income in which the taxpayer first derives income from the facility.

Double deduction for staff training costs

Certain staff training costs, including the cost of full-time training officers and tourism training, are eligible for a double deduction. The total tax saving is limited to 75% of the expenditure incurred.

Double deduction for export market development costs

Expenditure incurred in the promotion for sale outside Papua New Guinea of goods manufactured in Papua New Guinea or tourism promotion is eligible for double deduction. The total tax saving cannot exceed 75% of the expenditure incurred.

Export incentives

Prior to 1 January 2015, the net export income from the export sale of certain types of goods was exempt for the first four years of income, with a partial exemption in the following three years. This exemption is not applicable from 1 January 2015 (except in respect of goods that qualified for the exemption prior to that date).

Papua New Guinea

Tax credit for infrastructure development by agricultural, mining, petroleum, and gas companies

A tax credit is available to agricultural, mining, petroleum, gas, and certain tourism companies that incur expenditure on a prescribed infrastructure development. In the case of taxpayers engaged in mining, petroleum, and gas operations, the credit is limited to 0.75% of the assessable income or the amount of tax payable for the year (in respect of that mining, petroleum, or gas project), whichever is less. Excess expenditure over the 0.75% or tax payable may be included in the following year's rebate claim.

Unutilised credits or excess expenditure can generally only be carried forward for two years. In the case of taxpayers engaged in agricultural production, the credit is limited to 1.5% of the assessable income or the amount of tax payable for the year, whichever is less.

A prescribed infrastructure development includes a school, aid post, hospital road, and other capital assets that have been approved as such by the Department of National Planning and the IRC. It cannot be an expenditure required under the Mining Act or the Oil and Gas Act.

Other tax incentives in Papua New Guinea

Other tax incentives available in Papua New Guinea include:

- Manufacturers' wage subsidy.
- Immediate deduction for the costs of acquiring and installing solar heating plant.
- A ten-year tax exemption for qualifying new business located in prescribed remote areas of Papua New Guinea.
- A specific deduction for environmental protection and clean-up costs.

Incentives for petroleum, mining, and gas operations

Special incentives and rules apply to mining, petroleum, and gas exploration, extraction, and production activities. The main aspects are as follows:

Project basis of assessment

A project basis of assessment (ring-fencing) is adopted for all resource projects. This means losses from other operations, regardless of whether or not they are resource related, cannot generally be offset against resource project income from a particular ring-fenced project. However, there are some concessions to the ring-fencing principle in respect of exploration expenditure and expenditure in respect of discontinued projects and losses arising from site restoration costs.

In general, all costs incurred in the exploration and development phases of the project are accumulated and amortised over the life of the project. Once production starts, an immediate deduction is allowed for 'normal' operating and administration expenses. Capital expenditure incurred after the start of production are capitalised and amortised over the life of the project.

Rate of tax

The rates of tax in respect of income from a resource project are:

Source of income	CIT rate (%)	
	Non-resident companies	Resident companies
Mining	30	40
Petroleum:		
Existing projects	50	50
New projects	45	45
Incentive rate	30	30
Gas	30	30

Interest deductions

Interest is not deductible prior to the commencement of a resource project. Following the issue of a resource development licence, a person carrying on a resource project or exploration in relation to a resource project may claim a deduction against resource income for interest on money borrowed for carrying on the relevant operations or exploration. This is subject to a number of conditions, including the resource company maintaining a debt-to-equity ratio of 3:1 (see *Thin capitalisation in the Group taxation section*).

Capital allowances

Allowable exploration expenditures (AEE) are amortised over the life of the resource project. The deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. The amount of the deduction is limited to the amount of income remaining after deducting all other deductions, other than deductions for allowable capital expenditure. In other words, the deduction cannot create a tax loss.

Allowable capital expenditures (ACE) are amortised over the life of the resource project. The ACE is split into two categories: capital expenditures with an estimated effective life of more than ten years (long-life ACE) and capital expenditures with an estimated effective life of less than ten years (short-life ACE).

The annual deduction for long-life ACE is claimed on a straight-line basis over ten years.

Where the remaining life of the project is less than ten years, the rate at which the deduction is allowed is calculated by referring to the remaining life of the project. For short-life ACE, the annual deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. For new mining projects, the deductions for both long-life ACE and short-life ACE are calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less.

The amount of the deduction for ACE is limited to the amount of income remaining after deducting all other deductions. In other words, the deduction cannot create a tax loss.

Off-licence exploration expenditure

A major easing of the ring-fencing principle applies to taxpayers that are involved in a producing project where the taxpayer or a related party incurs exploration expenditure outside the area of the productive project. In this situation, the taxpayer can elect (whether or not it is currently involved in a producing project) to add such exploration expenditure to an exploration pool that can be amortised against income from the producing project.

The amount allowable as a deduction from this exploration pool in respect of resource operations carried on by the taxpayer or a related corporation is the lesser of:

- 25% of the total undeducted balance of expenditure in the exploration pool or
- such amount as reduces CIT (other than additional profits tax [see below]) that would, but for this deduction, be payable by the taxpayer and its related corporations in respect of those resource operations for that year of income, by 10% (or 25% for mining projects).

Management fees

Once a resource project derives assessable income, the deduction for management fees is restricted to 2% of operating expenses other than management fees. During the exploration phase of a project, the amount of management fees that can be treated as allowable exploration expenditure is limited to 2% of the exploration expenditure other than management fees. Furthermore, during the development phase, the amount of

Papua New Guinea

management fees that can be treated as allowable capital expenditure is limited to 2% of the allowable capital expenditure other than management fees.

Transfer of expenditure

When interests are transferred from one taxpayer to another, the vendor and purchaser can agree to transfer deduction entitlements for the unamortised balances of allowable exploration expenditure and allowable capital expenditure to the purchaser.

Liquefied natural gas (LNG) project

A number of provisions with specific application to the PNG LNG project have been included in the Income Tax Act, Stamp Duties Act, Goods and Services Tax Act, Customs Act, and Excise Act.

Other provisions were added or amended at the same time as the PNG LNG project-specific provisions, the most notable being the re-introduction of additional profits tax for all designated gas projects.

Additional profits tax

Designated gas projects are potentially subject to additional profits tax (this tax does not currently have application to mining or petroleum projects). This is essentially a tax on positive cash flows arising from a gas project in excess of a hurdle rate of return. There are two calculations required, and, in summary, they operate as follows:

- Under Calculation X, once the cash flows become positive, after exceeding a 17.5% accumulation rate, the positive cash flow is subject to tax at a 7.5% rate.
- Under Calculation Y, once the cash flows become positive, after exceeding a 20.0% accumulation rate and any additional profits tax paid under Calculation X, the positive cash flow is subject to tax at a 10.0% rate.

Withholding taxes

Dividends, interest, royalties, and technical/management fees

The following WHT rates apply to dividends, interest, royalties, and technical fees under PNG domestic law and tax treaties. PNG domestic legislation provides an exemption from WHT for dividends and interest in certain circumstances. The higher rates quoted are the maximum rates allowable under the treaties.

Recipient	WHT rate (%)			
	Dividends (1)	Interest (2)	Royalties	Technical fees
Resident	17	15	0	0
Non-resident corporations and individuals	17	15	10/30 (3)	17
Treaty:				
Australia	17	10	10	0
Canada	17	10	10	0
China	15	10	10	0
Fiji	17	10	15	15
Germany (4)	15	10	10	10
Indonesia	15	10	10	10
Korea, Republic of	15	10	10	0
Malaysia	15	15	10	10
New Zealand	17	10	10	0
Singapore	15	10	10	0
United Kingdom	17	10	10	10

Notes

1. The rate of WHT on dividends paid by mining companies is 10%. Dividends paid to a resident or a non-resident out of income from petroleum or gas operations are exempt from income tax and are not subject to WHT. There are also some other specific exemptions from WHT on dividends.
2. There is no WHT on interest when:
 - interest is paid or credited to a licensed financial institution in Papua New Guinea, the Bank of Papua New Guinea, or the state
 - interest is paid or credited by a resource company to a non-resident lender, or
 - the interest income is otherwise exempt income in the hands of the recipient.
3. A royalty paid to a non-resident associate of the payee will suffer a 30% WHT. Where the non-resident is not an associate of the payee, the WHT rate will be 10% (or 48% of the taxable income derived from the royalty if the non-resident chooses to lodge an income tax return in Papua New Guinea).
4. The treaty with Germany has not yet been ratified by Germany.

Business income WHT

Income derived by local contractors in certain industries is covered by the business income WHT regime. The industries affected include:

- Building and construction.
- Road transport.
- Motor vehicle repairs.
- Joinery and cabinet making.
- Security.
- Equipment hire.

Businesses affected are required to have a certificate of compliance and to produce it when entering into contracts with their customers. Payers are required to file an annual income reporting statement where they make either an eligible payment of PGK 500 or more in relation to one contract or eligible payments for several contracts exceeding PGK 5,000 in the year of income in relation to a single payee. Payers are required to deduct a 10% WHT if payees do not produce a certificate of compliance.

Non-resident insurer WHT

Premiums paid to non-resident insurers in respect of insurance contracts on property situated in Papua New Guinea or insured events that can only occur in Papua New Guinea are subject to tax in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 10% of the gross premium, which is taxed at the non-resident tax rates of 48% (companies) or 30% (unincorporated associations). Tax treaties may limit the rate of tax applied.

P

Tax administration**Taxable period**

The tax year is generally the period 1 January to 31 December; however, application may be made for a substituted tax year-end. These will normally be granted where the substituted tax year-end coincides with the accounting year-end of an overseas holding company. A company's tax year does not need to be the same as its accounting period.

Tax returns

Papua New Guinea operates on a full assessment basis, and companies are required to lodge an annual CIT return showing the calculation of taxable income for the year. In addition, the return must provide detailed disclosures in relation to income derived and expenses incurred during the year of income.

A company must file a tax return by 28 February in the year following the year of income to which the return relates. However, the following automatic extensions apply where the company lodges its return through a registered tax agent:

- Six months from the taxpayer's year-end for taxable returns and partnership returns.

Papua New Guinea

- Eight months from the taxpayer's year-end for resource company returns in a tax payable position.
- Ten months from the taxpayer's year-end for non-taxable returns.

Payment of tax

CIT is collected under a provisional tax system. Under this system, tax is paid in respect of a company's current year profits (i.e. payments made in the year of income are in respect of income derived in the same year as the payment is due).

Provisional tax is assessed by the IRC based on the last return lodged. In the event that no tax was payable on the previous year's return, the Commissioner General has the right to estimate the amount of tax based on any other information available.

Provisional tax is payable in three equal instalments by 30 April, 31 July, and 31 October.

Applications may be made to reduce provisional tax assessed if the tax due for the year in question is expected to be lower than the provisional tax assessed. Where estimated provisional tax is less than 75% of the income tax ultimately assessed, additional tax may be levied. Additional tax at a rate of 20% will be assessed, based on the difference between the estimate lodged and the provisional tax originally determined, or the actual tax payable, whichever is less. The Commissioner General has the discretion to require payment of additional tax.

Mining, petroleum, and gas companies are subject to advance payments tax, a system that broadly mirrors the provisional tax system in place for non-resource companies. The main difference for resource companies is they have the option to lodge an estimate of their taxable income for the year prior to 30 April, 31 July, and 31 October each year, which the IRC uses to assess each advance payments tax instalment.

Following the lodgement of the CIT return, the IRC will serve a notice of assessment on the company. The balance of tax payable for a year of income, after the application of provisional tax (or advance payments tax in the case of a resource company) and other tax credits or rebates, is due to be paid within 30 days of the date of service of the notice of assessment.

Tax audit process

There is no prescribed tax audit process in Papua New Guinea, and resource constraints have limited the IRC's audit activities.

Period for amendment of assessments

Where the IRC considers that a taxpayer made a full and true disclosure of all the material facts necessary for assessing their returns as originally assessed, the IRC may only amend an assessment that increases the tax liability of the taxpayer within three years from the date that tax became due and payable under the original assessment.

Where the IRC considers that a taxpayer did not make a full and true disclosure of all the material facts necessary for the assessment of their returns, and there has been an avoidance of tax, then:

- the IRC may amend any assessments previously issued to the participants if the IRC is of the opinion that the avoidance of tax was due to fraud or evasion (i.e. no time limit applies), or
- in cases of tax avoidance due to reasons other than fraud or evasion, the IRC may amend an assessment within six years from the date that tax became due and payable under the original assessment.

Topics of focus for the Internal Revenue Commission (IRC)

In late 2011, the IRC issued Taxation Circular No 2011/2, which provided guidance on transfer pricing matters in Papua New Guinea. The IRC continues to consider transfer pricing as an area of focus.

The IRC has indicated an increased focus on the effective collection of taxes and tax compliance through the implementation of a new Standard Integrated Tax Accounting System (SIGTAS).

The IRC has not otherwise publicly announced areas of focus for audit programs.

Significant developments

There have been no significant corporate tax developments in Paraguay during the past year.

Taxes on corporate income

Income is taxed in Paraguay according to the resource principle (i.e. the territorial system of taxation).

There are three tax systems in Paraguay, depending on the type of taxpayer, as follows:

- Commercial income tax (CIT): For income from commercial, industrial, and service activities, the general income tax rate of 10% applies. *See Capital gains and Dividend income in the Income determination section for a description of how such income is taxed.* Note that dividend distributions require an additional 5% tax that must be paid on the amount of dividend approved for distribution at the shareholder meeting.
- Agriculture income tax (AIT): For income from agricultural and cattle activities, the tax rate is 10% (determined by annual income).
- Little taxpayer income tax (LTTT): For those taxpayers with annual income of less than 100 million Paraguayan guaraníes (PYG), a single tax at a rate of 10% applies.

Local income taxes

There are no other income taxes (i.e. municipal tax on income, etc.) or patrimony taxes in Paraguay.

Corporate residence

Corporate legal residence is determined as the place where direction or central management takes place, unless the corporation's charter states otherwise.

Permanent establishment (PE)

The Paraguayan Tax Law establishes the definition of a PE.

The following activities may be considered as a PE in the country:

- Branches or agencies.
- A factory, industrial plant, or cattle ranch entity.
- Mine activities, or any other natural resources extraction activities.
- Civil construction or assemble activities that exceed 12 months.

If a person provides instructions related to the agreement of certain operations on behalf of a foreign entity, this operation may be considered as a PE in the country, except in cases where the mentioned instructions are related to the purchase of goods.

Other taxes

Value-added tax (VAT)

VAT applies to all corporations and to individuals or associations of individuals rendering personal services.

The general VAT rate is 10%, but a special VAT rate of 5% applies for selling real estate, basic groceries, farming products, and pharmaceutical products.

Customs taxes

As products are introduced into Paraguay directly by the local importer, the importer is responsible for payment of the related taxes (VAT on imports) before clearing the goods from Paraguayan customs, apart from customs tariffs. The other expenses involved in the import of products are the following:

- Port rates (between 0.65% and 1.50% of customs valuation).
- Customs valuation service (0.5% of customs valuation).
- Consular fee (approximately 50 United States dollars [USD] for each commercial document receiving a visa or legalisation from the Paraguayan consulate at the originating country).
- Indian contribution fee (7% on consular fee).
- IT system utilisation fee (between USD 15 and USD according to importation value).

Other expenses should be added to the above, such as photocopying, handling fees, customs agent fees, etc.

Excise taxes

The excise tax, called the selective tax on consumption, is assessed on local goods and imported products listed, either specifically or generically, in the legislation. The importation of goods listed and the first sale of goods produced in Paraguay are taxed. The selective tax on consumption is collected independently of customs duty.

Some goods subject to this tax include whiskey and other alcoholic beverages, beer, tobacco products, petroleum, etc.

Real estate tax

Real estate tax is levied annually at 1% of the fiscal value of the property, which is generally less than actual value (or market value). A tax rate of 0.5% applies if the area of rural property is smaller than five hectares and is used for agricultural or cattle ranching. In certain areas, an additional tax is levied on the fiscal value of vacant and semi-vacant land when the area of the built-up portion falls within certain determined percentage limits. Large tracts of land in rural areas are subject to an additional tax determined on a percentage basis and to a proportional tax of 0.5% to 1% on the fiscal value of tracts with areas ranging from 10,000 to 60,000 or more hectares.

The 1992 Paraguayan Constitution established that municipalities and departments are entitled to the tax revenues directly related to real estate. Collection of these taxes is the responsibility of municipal governments.

Stamp taxes

There are no taxes on acts and documents in Paraguay.

Social security contributions

In Paraguay, there is a compulsory social security system through which it is required that the employers register their employees.

The calculation basis constitutes every wage item, in cash or goods, except the annual mandatory bonus and family allowance.

Paraguay

The monthly rates are as follows:

Contribution	Commercial entity (%)	Financial entity (%)
Employee	9.0	11
Employer	16.5	17
Total	25.5	28

The employee's contribution is withheld from salary by the employer, which is a designated withholding agent. The employer's contributions are computed on total payroll and are paid together with the employee's withholding to the Social Security Institute.

Branch income

Branches are taxed at the same rate as domestic corporations. Profits transferred or credited to the head office are subject to a 15% withholding tax (WHT) when remitted to the head office abroad.

Additionally, the payment of dividends (by the head office's instructions) is subject to a tax rate of 5%, which has to be paid at the time of the remittance and charged to the local entity.

Income determination

Inventory valuation

Taxpayers may adopt any method of inventory valuation, provided it is technically acceptable according to tax administration criteria (e.g. first in first out [FIFO], average cost). The valuation must be applied consistently and may be changed only with the prior approval of the Treasury Ministry.

Damaged, deteriorated, and obsolete inventories may be written down to fixed values by the taxpayer. The tax administration can reject valuations that are not realistic.

Capital gains

Gains on all assets, tangible and intangible, are taxable as part of profits and subject to income tax at a rate of 10%. Foreign currency exchange gains are also taxable at the same tax rate.

Dividend income

Dividends are taxable income when the recipient (or shareholder) is a non-resident, in which case a 15% WHT applies. An additional 5% tax is charged to local entities when the income or dividend is distributed to a local (resident) or foreign (non-resident) shareholder.

Stock dividends

Stock dividends are not taxable income, except when dividends represent more than 30% of the taxable income of an investor.

The mentioned exemption is not applicable in relation to the 15% WHT (in case of foreign shareholders) and 5% additional tax for dividend distribution (charged to the local entity that made the distribution).

Interest income

Interest income of a Paraguayan resident from capital abroad is subject to income tax. This case is the only exception to the resource principle rules enacted under Paraguay Tax Law.

Foreign income

Foreign-source income is not taxable. However, interest, commissions, and capital gains are considered Paraguayan-source income and subject to CIT when the investor is resident in Paraguay.

Deductions

Depreciation and depletion

The maximum allowable depreciation rates range from 2.5% for urban buildings to 25% for computer equipment. Depreciation is calculated using the straight-line method based on the useful life of assets as determined by the Treasurer. The Treasurer may also authorise the use of other depreciation or depletion methods that are deemed to be technically justified and generally accepted.

Fixed assets must be revalued annually based on the increase of the price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

Goodwill

Amortisation of goodwill is not deductible.

Start-up expenses

Amortisation of start-up expenses may occur over three to five years, depending on the taxpayer's decision.

Interest expenses

The interest expenses on loans taken for Paraguayan residents or Paraguayan taxpayers may be considered as deductible expenses.

Additionally, it is important to mention that certain investment projects may be subject to a special exemption of the taxes on the interest, commission, and other expenses for loans taken for banking entities abroad (*see Investment incentives in the Tax credits and incentives section*).

Extraordinary losses/bad debts

The deduction of extraordinary losses and bad debts require the meeting of certain conditions (e.g. communication to the tax authority, evaluation of the actual loss in monetary terms, audit review).

Charitable contributions

The deduction of a donation is subject to formal registration of the beneficiary entity as a public benefactor before the Treasury Ministry.

Executive remuneration

The deduction of executive remuneration is limited to a percentage defined according to the enterprise's profits. However, in the event that the executive employees are subject to personal income tax (PIT), the deduction of their salaries is not limited for CIT purpose.

Fines and penalties

Fines and penalties are considered as non-deductible expenses for income tax purposes.

Paraguay

Taxes

In general, all taxes mentioned in the *Other taxes section* are deductible. Income tax and any fiscal surcharges or fines are not deductible.

Other significant items

General provisions for expenses or other potential losses are not deductible.

Other specific non-deductible items include:

- Interest on capital, loans, or any other investment by an owner, partner, or shareholder in a business.
- Personal expenses of an owner, partner, or shareholder, except when they are subject to PIT.
- Money drawn on account of future earnings.
- Direct expenses incurred in earning non-taxable income.
- Earnings from any fiscal period that are retained in the business as capital increases or reserve accounts.

Net operating losses

Net operating losses are not permitted to be carried forward and applied against future years.

Losses may not be carried back in Paraguay. However, a taxpayer may modify one's tax returns at a later date.

Payments to foreign affiliates

There are no limits on the deductibility of payments to foreign affiliates, including management fees, royalties, research and development (R&D), and general and administrative expenses, provided that the taxpayer maintains corresponding legal documentation that includes the country of origin and applies appropriate WHT. *See the Withholding taxes section for the applicable WHT rates.*

Group taxation

Group taxation is not permitted in Paraguay.

Transfer pricing

There are no transfer pricing rules in current Paraguayan legislation requiring compliance with certain conditions or minimum prices for the purpose of fiscal deductions, except for the following regulation applicable to importations and exportations:

“In the case of importers, it will be assumed that, in the absence of proof to the contrary, the cost of goods introduced to the country may not exceed the wholesalers price ruling in their place of origin plus freight and insurance costs and expenses to Paraguayan territory, and therefore, the excess of such value will constitute taxable income for the importers.

In the case of exporters, where a price has been fixed or the price declared is lower than the wholesalers price in Paraguay plus the freight and insurance costs and expenses to point of destination, this latter aggregate value shall be taken as the basis for determining the exporter's taxable income.

To this effect, the nature of the goods and the transaction mode adopted will be taken into account.” (Section 16 of Law No. 2421/04).

Thin capitalisation

There are no thin capitalisation rules in Paraguay.

Tax credits and incentives**Foreign tax credit**

Foreign tax credits are not applied to local tax payments in Paraguay.

Investment incentives

The framework of economic investment was established in the Law No. 60/90, which offers some special tax exemption benefits to foreign and local investors.

The benefits of the Law No. 60/90 may be available for the following investments:

- Cash, financing, provision of credit, or other financial instruments, under the conditions established by the administration of the President of Paraguay and the corresponding ministries.
- Capital goods, raw materials, and inputs for local industry for the fabrication of capital goods.
- Transfers of licensing rights with respect to trademarks, industrial processes and models, and other technologies.
- Technically specialised services.
- Capital leases.
- Other forms that the administration of the President of Paraguay and the corresponding ministries determined by law.

The investment incentives included in Law No. 60/90 that remain enacted after tax law modification (Law No. 2421/04) are the exemptions from certain fiscal, municipal, and customs duties taxes.

When the amount of financing for an investment is equal or greater than USD 5 million, it will be exempt from WHTs on interest, commissions, and capital that have to be paid to financial or banking entities abroad. This benefit is for five years.

If the investment is at least USD 5 million and the project is approved by the tax authorities, the dividends and profits derived from the project are tax exempt. The mentioned exemption is granted for five years and may be extended to ten years.

Maquila tax exemptions (Law No. 1064/97)

Under the 'Maquila' Regime, investors may import goods or products to be assembled, repaired, improved, worked on, or processed with the purpose of exporting such goods or products, prior to the addition of value or the 'Paraguayan component'. This regime is subject to a special tax treatment: a 1% tax rate applies to the value added within Paraguayan territory.

Innovative regulations allow for virtual commerce between *maquila* factories, which improve the utilisation of goods imported under the temporary regime (called 'virtual maquila').

This regime also establishes the service *maquila*, which enjoys the same tax benefits, and its main purpose is to provide support to entities abroad (currently, there are call centres that benefit from this regime).

Paraguayan legislation does not impose restrictions in terms of the types of products and services that the *maquila* industry may comprise. The *maquila* activity's national policy is regulated and supervised by the National Council of the *Maquila* Industry for Export

Paraguay

(CNIME). Both individuals and legal entities domiciled in Paraguay, whether national or foreign, may take advantage of these regulatory benefits.

This industry has been receiving broad government support, given that it is considered an element of social interest in the strive to combat unemployment. There are currently over 57 *maquila* companies in the country.

Duty and tax-free zones (called ‘zona franca’ Law No. 523/95)

Duty and tax-free zones, where all types of commercial, industrial, and service activities may be carried out, constitute a relevant incentive for business.

The legal framework governing such zones offer several advantages in terms of tax exemptions, as well as a special tax regime with an income tax rate of 0.5%.

The main purpose of free trade zones is the development of activities in connection with foreign markets; however, operations within the country are also allowed.

Act 523/95, ‘which authorises and establishes the Free Trade Zone Regime’, and its regulatory decree 15.554/96, ‘which regulates the Free Trade Zone Act’, among others, establish the guidelines related to activities within free trade zones.

The aforementioned regulation establishes two main entities, the ‘concessionaire’, responsible for providing the necessary infrastructure for freight operational management, and the user, responsible for carrying out the commercial, industrial, or service activity. The regulation therefore establishes the administrative measures that enable operations in free trade zones and its supervision, control, and development.

There are currently two free trade zones located in the Alto Paraná region (northeastern region, in close proximity to the border with Brazil and Argentina), in which national and international companies actively operate.

Other incentives

- Exports are exempt from certain customs duties and from VAT.
- A Capital Market Law (No. 1284/98) established incentives for issuance of bonds abroad.
- Under the Export Incentives Regime, exports are VAT exempt. The legislation recognises a tax credit for pre-production stages. A Temporary or Provisional Admission Regime is also in place, which exempts imports from import tariffs and VAT.

Withholding taxes

In accordance with the regulations in force, foreign entities may be subject to income tax withholdings in respect of services rendered to them deemed to be of Paraguayan source, including payments made by the branch or affiliate of a foreign home office.

Business income tax regulations consider that branches, agencies, or PEs of foreign entities are taxpayers, independently from the foreign home office status.

The withholdings are to be made from the payments made by local entities for such services.

WHT on payments made by a domestic corporation

Recipient	WHT (%)				
	Dividends (1)		Interest (2, 3)	Royalties (3, 4)	Fees (3, 5, 6)
	Portfolio	Substantial holdings			
Non-resident corporations	15	15	30	30	30
Non-resident individuals	10	10	30	10	10
Tax treaty with Chile:					
Non-resident corporations	10	10	10/15 (7)		
Non-resident individuals	10	10			

Notes

- Local entities are required to pay an additional 5% WHT when the income or dividend is distributed.
- The WHT on interest is based on 100% of the amount paid when remitted to the head office abroad. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The tax rate is 30%. For financing loans, the WHT effective tax rate is 6%.
- In the case of financing operations (loans), VAT is withheld at a rate of 10%. VAT is withheld on royalties and other services provided for non-resident corporations or individuals at a rate of 10%.
- The WHT on royalties is based on 100% of the amount paid when remitted to the head office abroad. The tax rate is 30%. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The tax rate is 15%.
- The WHT on fees is based on 100% of the amount paid when remitted to the head office abroad. The tax rate is 30%. In other cases, it is based on 50% of the amount paid. The tax rate is 15%.
- Fees for technical assistance services rendered by non-resident corporations are subject to WHT at a rate of 15% on the amount paid. In case the mentioned services are rendered by the head offices or direct shareholder, the tax rate is increased to 30%.

Fees for personal services rendered by non-resident individuals are subject to PIT. The withholding of PIT has to be made on 50% of the amount paid. The tax rate is 20% (effective tax rate of 10%).

- In case of a loan to Chile, the WHT on the interest is 15% if the loan is provided by a bank or insurance company. On the other hand, if the loan is provided by an associated company or head office, the tax rate is 10%. Regarding VAT WHT, see Note 3.

Tax administration**Taxable period**

For the CIT and LTTT, the taxable period is the calendar year. Regarding the AIT, the taxable period is as follows:

- In the event a taxpayer is subject to AIT exclusively, the tax period is from 1 July to 30 June of the following year.
- If a taxpayer is subject to AIT and CIT according to the activities performed, the taxable period is the calendar year.

Tax returns

Income tax returns are submitted on a fiscal-year basis as a self-assessment and must be filed by the fourth month following the end of the fiscal year.

Payment of tax

Income tax is due on varying days in the fourth month following the end of the fiscal year, depending on the taxpayer ID number, according to a calendar established by the Treasury Ministry. Four equal advance payments are made throughout the year, calculated based on 100% of the tax due in the previous year. Payments must be made in May, July, September, and November of each year after the due date for filing the income tax return, according to the calendar established by the tax authorities.

Paraguay

Penalties

Tax legislation provides the following penalties:

- Late payment of income tax is penalised by a fine varying from 4% to a maximum of 14%, plus interest at 0.116% per day.
- Tax fraud is punished by a charge of from one to three times the value of the tax in default.
- Tax law infringements are penalised through fines varying from the equivalent of USD 10 to USD 250.
- Omission of payment incurs a fine of 50% of the tax pending.

Tax audit process

The auditing process is performed by the tax authorities when there is a certainty or suspicion of tax evasion. Additionally, the taxpayer may be audited according to a draw process that is made by the tax authority.

The tax law also establishes an obligatory tax audit, which has to be made by external auditors, when the taxpayer obtains PYG 6 billion of gross income during the year. An annual audit report on tax compliance rules is presented to and reviewed by the tax authorities. When a tax issue is identified, the tax authority may apply a penalty to the taxpayer.

Statute of limitations

The tax authority may audit the last five fiscal years.

Significant developments

Special deduction regime for projects related to scientific research, technological development, and technological innovation

A special deduction regime has been established for projects related to scientific research, technological development, and technological innovation as of 2016. According to this incentive, taxpayers investing in these projects will be able to deduct 150% or 175% of the expenses incurred in them. *See the Tax credits and incentives section for more information.*

Tax credit incentive for reinvestment made by universities

A tax credit incentive has been envisaged for private universities that reinvest their profits in infrastructure, educational equipment, technological and scientific research and innovation, training of teachers, social work, high qualification sports, and sport programs support, as well as granting scholarships.

Universities reinvesting their profits in these activities will be granted a tax credit of 30% of the reinvested amount, but not exceeding the income tax of the year in which the reinvestment is made.

Exemption from capital gains from the sale of shares

An exemption has been granted as of January 2016 until December 2018 for the sale of shares performed through the Peruvian stock market exchange as long as these requirements are met:

- No more than 10% interest is transferred.
- The stock has market presence.

Taxes on corporate income

Companies incorporated in Peru are considered resident in Peru for tax purposes and thus subject to a corporate income tax (CIT) rate of 28% for 2015 to 2016 (27% for 2017 to 2018, and 26% from 2019) on worldwide net income.

For purpose of determining taxable income, such entities are allowed to deduct expenses to the extent that they are necessary to generate or maintain the source of taxable income. Requirements, limitations, and/or caps may apply to the deduction of certain expenses (thin capitalisation rules), bad debt provisions, salaries, travel expenses, gifts, donations, penalties, etc.

The Peruvian Income Tax Law (PITL) allows crediting for various payments against income tax, including income taxes paid in advance, amounts paid for certain other taxes, and income taxes paid in foreign tax jurisdictions, provided that the foreign

Peru

country's tax rate is not higher than the Peruvian CIT rate and the taxable income qualifies as foreign-source income for Peruvian income tax purposes.

Dividends and any other type of profit distributions are taxed at a rate of 6.8% for 2015 to 2016 (8% for 2017 to 2018, 9.3% from 2019) upon distribution, when the distribution is made to a non-resident entity (either individuals or legal entities) and to resident individuals, or when the distribution is agreed to by the shareholders, whichever happens first (resident legal entities are not subject to withholding tax [WHT] over dividends received from other Peruvian corporations). The entity distributing dividends or profits is liable for WHT at the aforementioned rates.

Nevertheless, enterprises are subject to an additional tax rate of 6.8% for 2015 to 2016 (8% for 2017 to 2018, 9.3% from 2019) on every amount or payment in kind that, as result of a tax audit, is construed as taxable income to the extent that it is an indirect distribution of such income that escapes further control from the tax administration, including income that has not been declared.

On the other hand, companies incorporated abroad are considered as non-domiciled in Peru for tax purposes and thus subject, in most cases, to an income tax rate of 30% over the gross Peruvian-source income. As a general rule, foreign companies are not allowed to deduct expenses and are taxed on gross income.

Local income taxes

There are no local or provincial taxes on income in Peru.

Corporate residence

For income tax purposes, the following entities, among others, are considered as resident entities in Peru:

- Corporations duly incorporated in Peru.
- Branches, agencies, and permanent establishments (PEs) in Peru of non-resident individuals or entities.
- Partnerships and limited liability companies.

Permanent establishment (PE)

According to the PITL, a foreign company is considered to have a PE (i) if it has a fixed place of business through which it carries out business activities in whole or in part; (ii) if an individual has a power of attorney of a foreign entity and uses it on a regular basis to sign agreements on behalf of the foreign entity; and (iii) if the person with powers of attorney of the foreign entity keeps in Peru inventory and/or goods to be negotiated in Peru on behalf of the foreign entity.

The consequence of a PE presence in Peru is that the PE will be obligated to comply with all the formal and substantial tax obligations of any domiciled taxpayer, meaning that it will have to be registered before the tax administration (get a tax identification [RUC] number), keep full accounting books, file monthly and yearly tax returns, withhold taxes, allocate a reasonable income for its Peruvian source activities, etc. If a PE presence is determined, then the tax contingency will have to be quantified by calculating the taxes, fines, and interest accrued as from the moment in which the PE presence can be deemed, except for the period barred by statute of limitations.

Other taxes

Value-added tax (VAT)

The general rate of VAT is 18% and is applicable to the following operations:

- Sale of goods within the country.
- Rendering or first use of services within the country.
- Construction contracts.
- The first sale of real estate made by construction firms.
- Import of goods.

For all transactions, the vendor is subject to VAT, except in the case of importation of goods or services rendered abroad, but economically used within Peru, for which VAT is self-assessed by the importers and users, respectively.

The VAT law follows a debit/credit system, and input VAT may be offset by output VAT. Should excess input VAT be obtained in a particular month, it shall offset output VAT obtained during the following months, until it is exhausted.

The export of movable goods (including the sale of goods in the international zone of ports and airports) is not subject to VAT, nor is the exportation of certain services. Thus, VAT paid upon the acquisition of goods, rendering of services, construction agreements, and the importation of goods related to exported goods or services creates a positive VAT export balance.

The positive balance may offset output VAT, income tax, or any other outstanding tax debt in favour of the central government. If the positive balance is not completely offset, as the amount of the aforementioned tax obligations is insufficient, the taxpayer may apply for a refund.

Tax Obligatory Payment System (SPOT)

The SPOT is applicable to the sale of certain goods and the rendering of services subject to Peruvian VAT. The main purpose of the SPOT is to generate funds to enable the payment of tax obligations by the VAT payer.

According to the SPOT, all the sales of goods and services listed in the appendices of the Resolution that are levied with VAT will be subject to withholding, applying the rates established for each kind of good and service (1.5%, 4%, 9%, 10%, or 15%).

Any service subject to VAT, except expressly excluded, will be subject to the SPOT with a withholding rate of 10%.

The purchaser or service recipient must withhold a percentage of the transaction price and deposit such amount within the seller's or service provider's State Bank (*Banco de la Nación*) account. It is important to note that the right of the purchaser or user of the service to offset input VAT related to such goods and services may be exercised only after the deposit with the State Bank has been executed.

The amount deposited is applied towards the payment of the seller's or service provider's Peruvian tax obligations (not just VAT). If after four consecutive months such amount is not used, the seller or service provider may request a refund or use the amount to pay withholdings applicable to purchasers or services recipients.

Customs duties

Customs duties applied to imports are linked to their classification under the Customs Tariff, given by NANDINA subheading that is determined by the information provided by the importer (through the invoice and other complementary information), as well as the physical recognition by the Customs Officer at the time of customs clearance.

As such, the taxes required are:

- *Ad valorem* customs duty (rates of 0%, 6%, and 11%, as the case may be).
- VAT (16%).

Peru

- Municipal promotion tax (2%).

Other taxes that may apply, depending on the equipment, include the following:

- Selective consumption tax.
- Specific duties.
- Antidumping and compensatory.
- VAT perception.

There are no restrictions on imports and exports, although there is a limited list of products that cannot be imported or exported. Exports are not subject to any taxes. The importation of most capital goods is subject to the 0% rate.

The government is empowered to grant duty exemptions under certain circumstances and also to temporarily suspend the assessment of duties on certain products. Customs duties are imposed on an *ad valorem* basis (the carriage, insurance, and freight [CIF] value of the imported goods). Goods are classified for customs duty purposes under the Harmonized System.

Pursuant to the drawback regime, an exporter may apply for a refund of customs duties paid upon: (i) the importation of goods contained in exported goods or (ii) the importation of goods that are consumed during the production of exported goods.

The refund rate is currently 4% of the freight on board (FOB) value of the exported good, provided such amount does not exceed 50% of the good's production cost. The refund will proceed for each type of good exported and for the first 20 million United States dollars (USD) worth of goods exported per year (the excess will not be subject to refund).

For such purposes, the beneficiaries of the drawback regime are the manufacturer/exporter companies whose cost of production has been increased by the customs duties paid upon the importation of: (i) raw material, (ii) intermediate products, or (iii) pieces incorporated or consumed in the production of exported goods. Note that fuel or any other energy source used to generate heat or energy for purposes of obtaining the exported good is not considered as raw material.

Excise tax

The sale of specific goods, including fuel, cigarettes, beer, liquor, and vehicles, is subject to excise tax.

Excise tax rates, and the manner on which the tax is applied, depend on the type of goods or services.

Real estate property tax

The real estate property tax is levied on the value of urban and rural real estate property. Individuals and legal entities owning the referred real estate properties are considered taxpayers for such purposes. The taxable base is calculated taking into account the value of all the properties owned in a specific local district, as reflected in the internal records of the corresponding local authorities.

The tax is calculated and paid on an annual basis applying the following progressive cumulative scale:

Real estate's value	Real estate property tax rate (%)
Up to 15 tax units	0.2
For the excess of 15 tax units and up to 60 tax units	0.6
Over 60 tax units	1.0

Real estate transfer tax

The real estate transfer tax is levied on all transfers of urban and rural real estate property. The taxpayer is the purchaser of the property. The taxable base is equivalent to the consideration agreed upon by the parties to the transaction, provided it is higher than the property's value (in the relevant year for purposes of the real estate property tax) as reflected in the internal records of the corresponding local authorities.

The tax rate is 3% and must be borne exclusively by the buyer, regardless of whatever the parties agree. The first ten tax units (approximately USD 11,285) of the taxable base are exempt from this tax.

Stamp taxes

There are no stamp taxes in Peru.

Financial transactions tax (FTT)

FTT is applied at a rate of 0.005% on all debits and/or credits on bank accounts held by the taxpayers.

The following operations, among others, are exempted from the FTT:

- Operations made between accounts of the same holder.
- Credits to bank accounts for payment of salaries.
- Credits and debits to bank accounts of diplomatic representations and international organisations recognised in Peru.

Payments of FTT are deductible as expenses for income tax purposes.

Temporary net assets tax (TNAT)

Companies subject to income tax are obligated to pay TNAT, except for companies that are in preoperative stages or that commenced business on 1 January of the fiscal year in which TNAT must be paid.

The taxable basis is the value of the assets set forth in the taxpayer's balance sheet as of 31 December of the year prior to that of the tax payment, adjusted for deductions and amortisations accepted by the Peruvian law.

The amount of TNAT is determined by applying the following rates on the taxable basis:

- Up to 1 million Peruvian nuevos soles (PEN): 0%.
- Excess of PEN 1 million: 0.4%.

The amount paid for TNAT may be credited against the taxpayer's income tax. If not totally used, the remaining TNAT may be refunded by the tax administration.

Special taxation on mining industry

The new mining royalty (NMR) regime, special mining tax (SMT), and special mining contribution (SMC) are economic considerations paid to the Peruvian government for the exploitation of mineral resources. The NMR applies to metallic and non-metallic mineral resources, while the SMT and SMC only apply to metallic mineral resources.

The SMC is only applicable to mining companies with projects with tax stability agreements in force. Such companies have voluntarily entered into agreements with the Peruvian government with the purpose of paying this contribution. This special contribution is determined for each stability agreement entered into.

In all three cases, the tax basis is the operating profit of the company, and the special rates and considerations are explained below:

Peru

	New mining royalty (NMR)	Special mining tax (SMT)	Special mining contribution (SMC)
Concept	No tax stability	No tax stability	With tax stability
Regime	Previous mining royalty modified	New	New
Cumulative progressive scale based on operating margin	1% to 12%	2% to 8.4%	4% to 13.2%
Minimum payment	1% of the sales revenue	N/A	N/A

The amounts paid will be deductible for income tax purposes as long as they are actually paid during the fiscal year.

Energy and Mining Investment Regulatory Agency (OSINERGMIN) contribution

The basis for calculating the OSINERGMIN contribution is the monthly invoicing of activities directly related to OSINERGMIN's regulatory scope (mining activities), after deducting the VAT. The applicable rate is 0.16% in 2016.

Agency for Environmental Assessment and Enforcement (OEFA) contribution

The basis for calculating the OEFA contribution is the monthly invoicing of activities directly related to OEFA's regulatory scope (mining activities), after deducting the VAT. The applicable rate is 0.13% in 2016.

Payroll taxes

Payroll taxes in Peru are only those characterised as social security contributions.

Social security contributions

Health contributions

Employers shall make monthly health contribution payments equal to 9% of the compensation paid to employees.

Employees shall be affiliated either to the National Health System (EsSalud) or the Private Health System (EPS), according to what option they choose. In the latter, a portion (25%) of the amount paid to the EPS may be used by the employer as a credit to be offset against EsSalud contributions.

Insurance for high-risk work

Employees who perform high-risk activities established in Law 26790, such as mineral extraction and iron and steel smelting, among others, must have a complementary insurance for high-risk work, which provides coverage such as health care, temporary or permanent disability pensions, and burial expenses relating to work accidents or professional diseases. This insurance is compulsory and must be paid for by the employer.

Pension funds contributions

Employers shall apply monthly withholdings for pension funds contributions equal to 13% of the remuneration received by the employee in cases where the employee is affiliated with the National Pension System (ONP) or approximately 12.4% in cases where the employee is affiliated with the Private Pension System (AFP). In this last case, 10% corresponds to the personal pension account and almost 2.4% to insurance and commissions for managing the fund.

Regarding the termination of employment of foreign individuals who leave the country, their pension funds in an AFP may be wired to an account of the employee in a foreign bank (the aforementioned 10%).

Branch income

Branches, agencies, and PEs of non-resident companies or entities incorporated in Peru are subject to income tax at a rate of 28% for 2015 to 2016 (27% for 2017 to 2018, 26% from 2019) on their Peruvian-source income.

For tax purposes, branches or subsidiaries are subject to the same obligations applicable to all companies in Peru, including income tax, VAT, FTT, filing of the corresponding income tax and VAT returns, issuance of invoices, etc.

Nevertheless, the following important differences between subsidiaries and branches resident in Peru must be taken into account:

- Branches are subject to income tax only for their Peruvian-source income, while subsidiaries are subject to income tax on their global-source income (both Peruvian and foreign income).
- For branches, the WHT on profit for distribution is applied on the date the annual income tax return is submitted. Subsidiaries are subject to the WHT on the date in which the corresponding shareholders agreement took place or the date when the beneficiary receives the dividends, whichever occurs first. For non-domiciled shareholders, the withholding will be applied whenever the dividend is actually paid, without taking into account the moment in which the shareholder agreement is executed.

Income determination

Inventory valuation

The first in first out (FIFO), average, specific-identification, retail, and normal or base-stock methods are allowed for inventory valuation. The last in first out (LIFO) method is not permitted.

Capital gains

Capital gains are taxed as ordinary income. However, capital gains derived from the sale of stock issued by a Peruvian company through the Lima Stock Exchange are taxed at a 5% rate.

An exemption has been granted as of January 2016 until December 2018 for the sale of shares performed through the Peruvian stock market exchange as long as these requirements are met:

- No more than 10% interest is transferred.
- The stock has market presence.

Dividend income

Cash dividends distributed to resident corporations are not subject to any taxes.

Interest income

The PITL establishes that the WHT rate on interest arising from loans is 4.99%, provided the following requirements are met:

- In case of cash loans, the entrance into Peru of the foreign currency must be duly accredited.

Peru

- The credit must not accrue an effective interest that surpasses that of the London Interbank Offered Rate (LIBOR) plus 7 points (for loans proceeding from Europe or the United States).
- The loan must be destined to finance business or taxable activities.
- The parties involved must not qualify as related parties for tax purposes.

If any of the above mentioned conditions are not met, or to the extent they are not fulfilled, a withholding rate of 30% over the gross interest will be applied. A 30% withholding rate will also apply whenever the debtor and creditor are related parties or when the participation of the creditor only aims to conceal a transaction between related parties.

Foreign income

A Peruvian corporation is taxed on foreign-source income. Foreign-source income is recognised upon accrual. No tax deferral is allowed on this type of income (*see Controlled foreign companies in the Group taxation section*). Double taxation may be avoided by means of foreign tax credits.

Deductions

Acceptable payment methods

Obligations that are fulfilled through cash payments exceeding PEN 3,500 must be made via bank account deposits, wire transfers, payment orders, credit cards, non-negotiable cheques, or other means of payment provided by entities of the Peruvian financial system. Failure to use one of these payment methods when such an obligation exists will result in the disallowance of deductions for any expenses or costs for income tax purposes and the disallowance of a credit for the corresponding VAT.

Expenses derived from transactions entered into with entities resident in tax havens

Certain expenses are not tax-deductible, including expenses incurred with respect to transactions with (i) entities resident in tax havens on the list attached to the PITL regulations, (ii) PEs located in tax havens, or (iii) entities that generate revenues or income through tax havens.

Nonetheless, expenses incurred from the following transactions are excluded from the above mentioned limitations, provided the consideration paid falls within market value:

- Interest on loans.
- Insurance premiums.
- Leases of aircraft or ships.
- Maritime freight.
- Fees for passing through the Panama Canal.

Depreciation

Assets may be depreciated for tax purposes via the straight-line method, capped at the following rates, but without exceeding the amount of the financial depreciation:

Assets	Depreciation rate (%)
Cattle (both labour and reproduction) and fishing nets	25
Vehicles (except trains) and any kind of ovens	20
Machines and equipment used for mining, oil and construction activities, excluding furniture, household, and office goods	20
Equipment for data processing	25
Machines and equipment acquired as of 1 January 1991	10
Other fixed assets	10

Buildings must be subject to a flat 5% depreciation rate, regardless of the financial depreciation.

Amortisation of intangible assets

The amortisation of property rights, trademarks, patents, and manufacturing procedures, as well as other similar intangible assets, are not deductible for income tax purposes. However, the price paid for intangible assets of a limited duration, at the taxpayer's choice, may be considered as an expense and applied to the results in a single year or amortised proportionally over a ten-year term.

The Peruvian tax administration, prior to an opinion from the corresponding technical organism, is permitted to determine the real value of those intangible assets for tax purposes, when the price does not reflect the real one.

Organisational and start-up expenses

Organisation expenses, pre-operating expenses (including initial operations and further expansion of operations), and interest accrued during the pre-operating period may be expensed in the first period of operation or amortised using the straight-line method over a maximum of ten years. However, once a company has elected to recover start-up costs via the straight-line method, it may revoke such election only upon receiving approval of the tax authorities.

Interest expenses

In general terms, interest on loans and related expenses are deductible, provided they are related to the acquisition of goods or services incurred, or to be incurred, in order to obtain or produce taxable income or to maintain the source of such income.

In the case of loans entered into between related parties, the amount of interest to be deducted is limited to interest from indebtedness not exceeding three times the net equity of the debtor as of the end of the previous fiscal year (*see Thin capitalisation in the Group taxation section*).

Bad debts

Write-offs of bad debts and equitable provisions are deductible, provided that the accounts to which they belong are determined. For the provisions of bad debts, it is necessary that:

- there is a debt due and the taxpayer can provide evidence of the financial difficulties of the debtor that could foresee a risk in the collection of the debt and
- the provision is registered separately in the inventory and balance book at the fiscal year closing. In this sense, generic bad debt provision will not be deductible in the assessment of the net taxable income, nor will bad debts whose terms have not yet elapsed.

Bear in mind that the following debts are not considered bad debts:

- Debts incurred between related parties.
- Debts guaranteed by banks or financial companies by means of rights over real property, money deposits, or purchase-sale agreements with reservation of right of legal ownership.
- Debts that have been subject to renewal or express extension.

Charitable contributions

Donations made to entities of the public sector, except companies, and to non-profit associations with certain purposes are deductible, provided that the receiver of the donation is duly qualified by the tax administration.

Peru

The deduction will be limited to 10% of the net income of the donor and only during the fiscal year in which it is granted (carryforward of the donation is disallowed). This means that if the donor does not obtain taxable income in the fiscal year in which the donation is made, no deduction will be available.

Profit sharing

Entities with more than 20 employees, provided they obtain taxable income during the fiscal year, must distribute a percentage (5%, 8%, or 10% depending on the industry) of their profits (the basis is the tax profit of the fiscal year) among their employees. The amount of distribution for each employee depends on the effective working days during the year and annual remuneration.

Employee's retributions and health insurance premiums

Employee's retributions paid during a fiscal year may be deducted in such year, provided the payments are made by the employer before the term to file its annual income tax return expires. Likewise, health insurance premiums for employees, their spouses, and children are deductible.

Vehicle expenses deductions

Vehicle expenses may be deducted, provided the vehicles are essential to a company's business activities and are continually used for such purpose. There is a limitation on the tax deductibility of car expenses used for administrative or representation purposes, depending on the amount of income generated by the company. The number of company cars assigned to directors, managers, and representatives of a company may not exceed five under any circumstances.

Fines and penalties

Fines and penalties are not deductible for income tax purposes.

Taxes

Other taxes assessable on properties and activities generating taxable income are deductible for income tax purposes.

Net operating losses (NOLs)

Tax losses may be offset according to either of the following systems:

- Against net income generated within the following four fiscal years after the year in which the loss is incurred. Any losses that are not offset within such period may not be carried forward to any future year.
- Against 50% of the net income generated in the following fiscal years after the year in which the loss was generated. Under this system, there is no time limitation for carrying forward the losses.

After choosing one of the aforementioned systems, the taxpayer will not be able to change the system until the accumulated tax losses from prior fiscal years are exhausted. Losses will not be carried back to years prior to the year in which the loss is generated.

Payments to foreign affiliates

Payment of royalties to non-resident affiliates is permitted and deductible from gross income.

Group taxation

Group taxation is not permitted in Peru.

Transfer pricing

The rules related to market value and transfer pricing establish that, in any kind of transaction, the value assigned to the goods and services must be the market value for tax purposes. If such value differs from the market value, either by overvaluation or sub-valuation, the tax administration will proceed to adjust it for both the purchaser and the seller, even when one of them is a non-domiciled entity, provided that the value agreed to results in a lower tax than the one that would have applied if transfer pricing rules had been applied. The adjustment will be imputed in the taxable period in which the operations with related parties were performed.

In case of transactions between related parties or those entered with tax havens, the market value will be equivalent to the value agreed with independent parties in similar transactions, being mandatory to support such value with a transfer pricing study.

The law states that transfer pricing rules will not apply for VAT purposes.

Tax price adjustments

Adjustments to prices are only required whenever the price paid generates a higher tax deduction or a lower income tax in Peru; consequently, the existence of a tax prejudice will be required for an adjustment to be requested.

Adjustments are performed individually (on each operation) and not in an overall or global manner.

The adjustment of the value assigned by the tax administration or the taxpayer will be effective for both the transferor and the purchaser or transferee, without any constraints. Previously, such bilateral adjustment was conditioned to both parties being domiciled or incorporated in Peru, a condition that has now been rejected. In the case of non-domiciled parties, the bilateral adjustment will only proceed on transactions that could trigger taxable income in Peru and/or deductions for determining the income tax in Peru.

The adjustments are attributed to the corresponding tax period, according to the attribution rules depicted in the PITL (accrual regime for corporate taxpayers). However, when, under such rules, the adjustment cannot be attributed to a particular period, the adjustment will be allocated among all tax periods where income or expense has been allocated, in proportion.

Operations where no consideration has been paid are subject to transfer pricing rules. In this kind of transaction, the adjustment shall be allocated to the period or periods in which revenue would have accrued if consideration had been paid and the income was to be acknowledged by a domiciled taxpayer. On the other hand, if the income was to be recognised by a non-domiciled taxpayer, it would be attributed to the period or periods where the expenses accrued, even if it was a non-deductible expense.

Commodities

There is a specific methodology for determining prices in the sales of internationally traded commodities to tax havens or intermediaries.

In this methodology, it is required to determine the price of the specified operation based on the international price without taking into account the particularities of each case. Such method will not be applied as long as the taxpayer has entered into futures contracts for hedging purposes in respect of imported or exported goods, or irrefutably accredit that the international intermediary has real presence in the territory of residence and their core business does not consist of obtaining passive incomes, or brokering in the sale of goods to members of the same economic group.

Thin capitalisation

In the case of loans entered into between related parties, the amount of interest to be deducted is limited to interest from indebtedness not exceeding three times the entities net equity as of the end of the previous fiscal year. In this connection, even though Peruvian corporate law has no requirements as to a minimum amount of share capital to incorporate a legal entity, it should be noted that having a small share capital may jeopardise the deductibility of interest payable for loans granted by related entities since, in case of newly incorporated entities, the share capital (equity) to be considered for calculating the thin capitalisation limit is the original one (this is, the one with which the entity was incorporated). In any case, this will only trigger a deductibility problem for the fiscal year in which the entity is incorporated, since for the following fiscal year the thin capitalisation rule will be calculated on the basis of the net equity at the end of the prior fiscal year (which, at that moment, may have already been increased through new contributions or capitalisations).

Controlled foreign companies (CFCs)

CFC rules are in force in order to avoid the deferral of income tax on passive income obtained from CFCs (defined as at least 50% of ownership, voting rights, or gains) by domiciled taxpayers, provided such companies are situated in tax havens or jurisdictions with nil or reduced tax rates.

Taxation of indirect disposal of shares in Peruvian entities

The indirect transfer of Peruvian shares of a foreign entity that, in turn, owns (directly or indirectly through other entities) shares of a Peruvian entity is levied with income tax, provided that both of the following conditions are met:

- During the 12 months prior to the transfer, the market value of the Peruvian entity's shares owned by the foreign entity equals 50% or more of the market value of the foreign entity's shares.
- During any given 12-month period, shares representing 10% or more of the foreign entity's share capital are transferred.

Tax credits and incentives

Foreign tax credit

Pursuant to the PITL, taxpayers may deduct the foreign income taxes paid due to their foreign-source income levied by the PITL, provided that it doesn't exceed the amount that results from applying the average rate of the taxpayer to the incomes obtained abroad, or the tax paid abroad. The amount that, for any circumstance, is not used in the corresponding fiscal year cannot be set off (or compensated) in others fiscal years or be refunded.

Also, the following will be taken into account:

- Tax credit will be granted for the entire tax paid abroad that falls upon income taxed by the PITL.
- Taxes paid abroad, whatever its denomination, shall bear the characteristics of income taxes.
- Tax credit will only be granted when the payment of the foreign income tax is supported by reliable documentation.

Special deduction regime for projects related to scientific research, technological development, and technological innovation

A special deduction regime has been established for projects related to scientific research, technological development, and technological innovation as of 2016. According to this incentive, taxpayers investing in these projects will be able to deduct 150% or 175% of the expenses incurred in them.

In that sense, the taxpayer may have the following deductions:

- 175% of the expenses incurred if the project is executed directly by the taxpayer or through centres of scientific research, technological development, and technological innovation domiciled in Peru.
- 150% of the expenses incurred if the project is executed by non-domiciled centres of scientific research, technological development, and technological innovation.

There are some requirements that must be fulfilled in order to access the benefit.

Early recovery of VAT

Companies in a preoperative stage with large projects in process may apply for early recovery of VAT prior to commencing operations. An investment agreement with the government (the Ministry of its sector) is required.

Stability agreement

Investors may enter into stability agreements with the government, either under the general regime or specific regimes (i.e. mining and petroleum).

Under the general regime, investors may enter into Juridical Stability Agreements that guarantee the following advantages for a ten-year period:

- Stability of the income tax regime in force at the time the agreement is entered into with respect to dividends and profit distribution.
- Stability of the Peruvian government monetary policy, according to which there is a complete absence of exchange controls, foreign currency can be freely acquired or sold at whatever exchange rate the market offers, and funds can be remitted abroad without any previous authorisation.
- Right of non-discrimination between foreign and local investors.

Under the mining regime, local mining companies may enter into stability agreements of guarantees and investment promotion measures that guarantee the following for 10, 12, or 15 years:

- Stability of the overall tax regime.
- Stability of the overall administrative regime.
- Free disposition of funds (foreign currency) arising from export operations.
- No exchange rate discrimination.
- Free trade of products.
- Stability of special regimes for tax refunds, temporary importation, etc.

Oil and gas companies may enter into stability agreements that guarantee the following for the term of the contract:

- Stability of the overall tax regime.
- Free disposition of funds (foreign currency) arising from export operations.
- Free convertibility of its funds.
- Free trade of products.

Investment promotion in the Amazon

Certain tax benefits with regard to VAT and income tax have been established for taxpayers located in the area designated by the law as the 'Amazon' and that are engaged in the following activities:

- Agriculture and livestock enterprises.
- Aquaculture.
- Fishing.
- Tourism.

Peru

- Manufacturing activities linked to the processing, transformation, and commercialisation of primary products originating in the activities listed above and in forest transformation, provided these products are produced in the area.

Special zones - Centres of Export, Transformation, Industry, Commercialisation, and Services (CETICOS)

CETICOS are geographical areas duly delimited with customs primary zone status and special treatment, destined to generate development poles through industrial, *maquila*, assembling, or storage activities. CETICOS are located in Paita, Ilo, and Matarani cities.

Agribusiness and agro-exporting activities may be performed within a CETICOS. Agribusiness activity is primarily the transformation of agro-farming products produced in the country. Such transformation must be carried out at CETICOS.

Companies engaged in industrial, *maquila*, or assembling activities, established or set up in the CETICOS, until 31 December 2022, are exempt from income tax, VAT, excise tax, municipal promotion tax, as well as from any other taxes, fees, contributions levied by the Central Administration, and even taxes that require express exempt regulation.

Withholding taxes

Domestic corporations are required to withhold income tax with respect to income paid to non-resident entities at the following rates:

Type of payment	WHT (%)
Dividends or profit distributions	6.8
Interest on non-related party loans, provided certain requirements are fulfilled	4.99
Interest on related party loans	30
Interest paid by Peruvian financial entities or banks to foreign beneficiaries for credit lines used in Peru	4.99
Royalties	30
Digital services	30
Technical assistance	15
Lease of vessels or aircraft	10
Other income	30
Sale of securities within Peru (Lima Stock Exchange)	5
Sale of securities outside Peru	30

Note that resident taxpayers may not deduct the WHT of a third party, except in the case of loans provided by non-resident creditors, to the extent that the debtor has contractually assumed the obligation of bearing the WHT cost.

If the retribution for technical assistance exceeds 140 tax units, a report issued by an audit firm will be required, in which is stated that the technical assistance has been effectively rendered in order to apply the 15% WHT rate; otherwise, a WHT rate of 30% will apply.

Capital gains derived from the sale of stocks issued by a Peruvian company through the Lima Stock Exchange are taxed at a 5% rate. *See Capital gains in the Income determination section for a description of an exemption granted as of January 2016 until December 2018.*

In the case of the services mentioned below that entail the execution of activities both in Peru and abroad, non-resident entities are subject to a 30% WHT on deemed Peru-source income determined by applying the following percentages to gross income:

Type of payment	Deemed Peruvian-source income (%)
Insurance	7
Lease of vessels	80
Lease of aircraft	60
Air transport	1
Maritime transport	2
Telecom services	5
International news services	10
Distribution of movies, records, and similar products	20
Supply of containers	15
Demurrage of containers	80
Rights for broadcasting live foreign TV shows within Peru	20

Tax treaties

Peru has entered into treaties with Brazil, Canada, Chile, Korea, Mexico, Portugal, and Switzerland regarding double taxation on income tax under the Organisation for Economic Co-operation and Development (OECD) Model. Double taxation treaties (DTTs) with Spain and Thailand are not in force, as ratification by the Peruvian Congress is still pending. In addition, Peru, as a member of the Andean Community, which also includes Bolivia, Colombia, and Ecuador, is subject to a double-taxation standard (based in source income and not on the OECD Model).

Please see the chart below for the reduced WHT rates that apply under DTTs in force.

Recipient	Dividends (%)	Interest (%)	Royalties (%)	Technical assistance (%)	Digital services (%)
Non-treaty	6.8	4.99/30	30	15	30
Treaty:					
Brazil	10/15 (1)	15	15	15	15
Canada	10/15 (1)	15	15	N/A	N/A
Chile	10/15 (1)	15	15	N/A	N/A
Korea	10	15	15	10	N/A
Mexico	10/15 (1)	15	15	N/A	N/A
Portugal	10/15 (1)	10/15 (2)	15	10 (3)	N/A
Switzerland	10/15 (1)	10/15 (2)	15	10	10

Notes

1. The lower rate applies in case the beneficial owner is a company that controls at least 20% (Brazil), 10% (Canada, Portugal, and Switzerland), or 25% (Chile and Mexico) of the voting power in the company paying the dividends.
2. The lower rate applies to loans from banks (Portugal and Switzerland) and sale on credit of industrial, commercial, and scientific equipment (Switzerland).
3. The treaty rate applies to technical assistance in connection with copyrights, goods, or rights that generate royalties.

Tax administration

Taxable period

According to law, the fiscal year is the calendar year.

Tax returns

The filing deadline for the income tax return is generally the first week of April. The system is one of self-assessment, but the tax return filed with the tax authorities is subject to review.

Peru

Payment of tax

Income tax payments are due in 12 monthly instalments. The due date for the final income tax payment for a year is generally the first week of April.

The estimated payment calculation system has been established, and the amount of the estimated payment will be the greater of the result of multiplying the net revenue of the month by (i) 1.5% or (ii) the applicable coefficient. The coefficient is calculated by dividing the income generated in the previous fiscal year by the income tax that was determined.

Tax authority

The National Superintendency of Customs and Tax Administration (SUNAT) is responsible for administering all of the aforementioned taxes (income tax, VAT, etc.). Companies resident in Peru must be registered with the tax administration (Taxpayer's Registry).

The Tax Court is a specialised administrative tribunal, which depends on the Ministry of Economy and Finance, but is otherwise autonomous regarding its specific functions. Its mission is to rule over tax controversies that may arise between the tax administration and the taxpayers, by interpreting and applying the corresponding tax legislation, issuing mandatory observance jurisprudence, and establishing homogenous criteria that continue to support the progress of the tax system.

Finally, taxpayers are entitled to file an appeal before the Judiciary (Court) against resolutions issued by the Tax Court, but payment of the tax debt must be performed or guarantees must be provided.

Tax audit process

The tax audit performed by the SUNAT includes all the aspects of the tax and period being subject to review. The tax audit is formal and the process is fully regulated.

The SUNAT is also able to conduct partial audits of limited scope.

Statute of limitations

Pursuant to the Peruvian tax legislation, the SUNAT is entitled to audit taxpayers in order to assess their tax liabilities, request the payment of any due tax, and assess any applicable penalty for up to (i) four years from 1 January of the year following the date the corresponding tax return had to be filed, (ii) six years to the extent that the corresponding tax return was not filed, and (iii) ten years when the tax withheld by the taxpayer has not been paid to the SUNAT.

Topics of focus for tax authorities

The SUNAT mainly focuses on the following topics:

- Deduction of expenses, including cost share expenses.
- Market value of transactions between related parties.
- Peruvian source income WHT.
- Income tax advance payments.

General Anti-avoidance Rule (GAAR)

The GAAR (provision XVI of the Tax Code) allows the SUNAT to consider the acts, situations, and economic activities performed, established, or desired by the taxpayers in order to determine the real nature of the taxable event. To this extent, provision XVI establishes that when tax evasion is detected, the SUNAT is entitled to collect the tax debt and fines; reduce the amount of balances due, NOLs, or tax credits; or eliminate any tax advantage, without prejudice, to recover any amount that was wrongfully reimbursed.

While interpreting the tax legislation, substance should be selected over a legal form. The fact that a taxpayer's transactions are legal does not imply that they are acceptable with reference to the underlying meaning embedded in the tax rules. Thus, where there is no business purpose except to obtain a tax benefit, the SUNAT should challenge such transactions as artificial and apply the corresponding tax rules.

However, the faculty of the SUNAT to apply provision XVI of the Tax Code has been suspended, with the exception of the first and last paragraphs of said provision.

Other issues

Foreign Account Tax Compliance Act (FATCA)

A Model 1 Intergovernmental agreement (IGA) is treated as 'in effect' by the United States (US) Treasury as of 1 May 2014. The US and Peruvian governments have reached an agreement in substance, and Peru has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in Peru are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

Approval of the Tax Incentives Management and Transparency Act (TIMTA)

Republic Act (RA) No. 10708, also known as the Tax Incentives Management and Transparency Act, seeks to enhance fiscal accountability and transparency in the grant and management of tax incentives. It was signed into law on 9 December 2015.

Under the law, entities registered with the concerned investment promotion agencies (IPAs) are required to file and submit tax returns and complete annual tax incentives reports. Non-compliance with reporting requirements is subject to penalties ranging from a fine of 100,000 Philippine pesos (PHP) (first violation), PHP 500,000 (second violation), and cancellation of its registration (third violation).

Additional modes of payment of taxes

The Philippine Bureau of Internal Revenue (BIR) has adopted additional modes of payment of taxes through credit, debit, and prepaid cards ('Card Payment Facility') under Revenue Regulations No. 3-2016, dated 12 January 2016. Under the Regulations, taxpayers opting to pay through the Card Payment Facility shall bear the cost of bank and or credit card charges and other fees, including the Merchant Discount Rate.

See further discussion under Payment of tax in the Tax administration section.

Tax treaty updates

From a tax treaty network perspective, the double taxation agreement (DTA) signed by the Philippine government with the Republic of Turkey in March 2009 entered into force on 11 January 2016 and applies on income derived or accrued beginning 1 January 2017.

In addition, two protocols were signed to amend the existing DTAs between the Philippine government and the following countries (note that, as of 25 April 2016, the official signed copies of the full text of the treaties below haven't been released):

- Germany: The renegotiated DTA between the Philippine government and the Federal Republic of Germany for the Avoidance of Double Taxation with Respect to Taxes on Income and on Capital entered into force on 18 December 2015. The renegotiated treaty shall take effect on any taxable period beginning on or after the first day of January 2016.
- New Zealand: The renegotiated DTA between the Philippine government and the Government of New Zealand for the Avoidance of Double Taxation and Prevention of Fiscal Evasion with Respect to Taxes on Income entered into force on 2 October 2008. It shall apply to taxes covered for any taxable period beginning on or after 1 January 2009.

See updated tax treaty rates in the Withholding taxes section.

Taxes on corporate income

A domestic corporation is subject to tax on its worldwide income. On the other hand, a foreign corporation is subject to tax only on income from Philippine sources (*see the descriptions of Resident foreign corporations and Non-resident foreign corporations below*).

Domestic corporations

The following corporate income tax (CIT) rates apply to domestic corporations:

Income	CIT rate (%)
In general, on net income from all sources.	30
Minimum corporate income tax (MCIT) on gross income, beginning in the fourth taxable year following the year of commencement of business operations. MCIT is imposed where the CIT at 30% is less than 2% MCIT on gross income.	2
Proprietary educational institutions and non-profit hospitals, on net income if gross income from unrelated trade, business, and other activities does not exceed 50% of the total gross income from all sources.	10
Non-stock, non-profit educational institutions (all assets and revenues used actually, directly, and exclusively for educational purposes) and other non-profit organisations.	Exempt

Certain passive income from domestic sources is subject to final tax rather than ordinary income tax (*see the Income determination section*).

Improperly accumulated earnings tax

An improperly accumulated earnings tax of 10% is imposed on improperly accumulated income. The tax applies to every corporation formed or used for the purpose of avoiding income tax with respect to its shareholders, or the shareholders of any other corporation, by permitting earnings and profits to accumulate instead of being divided or distributed. Exceptions are made for publicly held corporations, banks and non-bank financial intermediaries, and insurance companies.

Resident foreign corporations

Resident foreign corporations (i.e. foreign corporations engaged in trade or business in the Philippines through a branch office) are taxed in the same manner as domestic corporations (except on capital gains on the sale of buildings not used in business, which are taxable as ordinary income), but only on Philippine-source income.

International carriers are subject to an income tax of 2.5% on their gross Philippine billings unless a lower rate is available under an existing tax treaty. Exemption from this tax is also available under international agreements to which the Philippines is a signatory or on the basis of reciprocity in cases where the home country of the international carrier grants income tax exemption to Philippine carriers.

Income of offshore banking units (OBUs) and foreign currency deposit units (FCDUs) of depository banks from foreign currency transactions with non-residents, other OBUs, or FCDUs and local commercial banks (including branches of foreign banks) authorised by the *Bangko Sentral ng Pilipinas* (central bank) to transact business with OBUs and FCDUs are exempt from all taxes except net income specified by the Secretary of Finance upon recommendation of the Monetary Board. Interest income from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to a 10% final income tax.

Regional or area headquarters of multinational corporations that do not earn or derive income from the Philippines, and that act as supervisory, communications, and coordinating centres for their affiliates, subsidiaries, or branches in the Asia-Pacific region and other foreign markets are not subject to CIT.

Philippines

Regional operating headquarters (ROHQ) pay a tax of 10% on their taxable income. An ROHQ is a branch established in the Philippines by a multinational company that is engaged in any of the following services: general administration and planning, business planning and coordination, sourcing and procurement of raw materials and components, corporate finance advisory services, marketing control and sales promotion, training and personnel management, logistic services, research and development services and product development, technical support and maintenance, data processing and communication, or business development.

Non-resident foreign corporations

In general, non-resident foreign corporations are taxed on gross income received from sources within the Philippines at 30%, except for reinsurance premiums, which are exempt. Interest on foreign loans is taxed at 20%. Dividends from domestic corporations, however, are subject to a final withholding tax (WHT) at the rate of 15% if the country in which the corporation is domiciled does not impose income tax on such dividends or allows a tax deemed paid credit of 15%.

Lower rates or exemption on the above income may be available under an applicable tax treaty.

Rentals and charter fees payable to non-resident owners of vessels chartered by Philippine nationals are subject to a final tax of 4.5%. Rentals, charters, and other fees derived by non-resident lessors of aircraft, machinery, and other equipment are subject to a final tax of 7.5%.

Local income taxes

See Local government taxes in the Other taxes section for a description of local taxes on sales or receipts.

Corporate residence

A domestic corporation is a corporation that is created or organised under Philippine laws. A foreign corporation that is duly licensed to engage in trade or business within the Philippines is referred to as a 'resident foreign corporation'.

Permanent establishment (PE)

The business profits provision in most Philippine treaties permits the Philippines to tax only those profits attributable to a PE. While Philippine treaties adopt the United Nations (UN) Model Convention, Organisation for Economic Co-operation and Development (OECD) commentaries have often been cited by tax authorities to support their interpretation of treaty provisions. The main implication is that most Philippine treaties contain a rule deeming a PE to arise when services are performed in the Philippines for a specified period of time.

Other taxes

Value-added tax (VAT)

VAT applies to practically all sales of services and imports, as well as to sales, barter, exchange, or lease of goods or properties (tangible or intangible). The tax is equivalent to a uniform rate of 12%, based on the gross selling price of goods or properties sold, or gross receipts from the sale of services. On importation of goods, the basis of the tax is the value used by the Bureau of Customs in determining tariff and customs duties plus customs duties, excise taxes, if any, and other charges. Where the valuation used by the Bureau of Customs is by volume or quantity, the VAT basis is the landed cost plus excise taxes, if any.

Certain transactions are zero-rated or exempt from VAT. Export sales by VAT-registered persons are zero-rated.

Certain sales of services exempt from VAT, including services provided by financial intermediaries, are subject to percentage taxes based on gross sales, receipts, or income. A 3% percentage tax also applies to persons who are not VAT-registered because their annual sales or receipts do not exceed PHP 1,919,500.

Customs duties

Applicable customs duties are determined based on the tariff classification of the import product. As with the rest of the Association of South East Asian Nations (ASEAN) countries, tariff classification in the Philippines is based on the ASEAN Harmonised Tariff Nomenclature (AHTN), which is patterned after the Harmonised Commodity Classification and Coding System (HS) Convention and its 2002 revisions. The latest edition, HS Code 2012, entered into force on 1 January 2012. With HS Code 2012, the overall AHTN tariff lines were reduced by 247, or an approximately 4% cut in the number of AHTN tariff lines in 2010. Although 267 classification rulings were issued to address commonly raised valuation and tariff classification, it is still advisable that tariff classification rulings from the Philippine Tariff Commission be secured prior to importation into the Philippines in case of uncertainty as to the correct classification of a product. Note that while the tariff classification rulings issued by the Philippine Tariff Commission do not prevent the Bureau of Customs from conducting its own verification, these rulings carry persuasive reference in support of the classification and duty rate used by an importer.

The Philippines adopts the World Trade Organization (WTO) Valuation Agreement, where the declared invoice price is used as the basis for determining customs duties.

As a protective measure, the Philippines retains higher tariff rates (20% to 50%) on sensitive agricultural products, such as grains, livestock and meat products, sugar, certain vegetables, and coffee. A few agricultural commodities are subject to minimum access volumes, but these represent less than 1% of all tariff lines.

In view of the existing free trade agreements in the region, such as the ASEAN Free Trade Area (AFTA), ASEAN-China Free Trade Area (ACFTA), ASEAN-Korea Free Trade Area (AKFTA), the ASEAN-Australia-New Zealand Free Trade Area (AANZFTA), the ASEAN-Japan Comprehensive Economic Partnership Agreement (AJCEPA), and the ASEAN-INDIA Free Trade Area (AIFTA), the Philippines has taken steps to progressively eliminate tariffs. Tariff reductions for the Philippines range from 10% to 35% for most products included in the Normal Track list.

Excise taxes

Excise tax is payable at varying rates on alcohol products, tobacco products, petroleum products, mineral products, and automobiles. Excise tax is also payable on all goods commonly or commercially known as jewellery, whether real or imitation; perfumes and toilet waters; and yachts and other vessels intended for pleasure or sport at 20% of the wholesale price or value of the importation used by the Bureau of Customs in determining tariff and customs duties.

Documentary stamp tax (DST)

DST is payable at varying rates on various documents and transactions. The following table contains selected examples:

Taxable document/ transaction (tax base)	DST rate
Original issue of shares	PHP 1 for every PHP 200 or fractional part of par value

Philippines

Taxable document/ transaction (tax base)	DST rate
Sale, barter, or exchange of shares of stock listed and traded through the local stock exchange	Exempt
Other sales agreement, agreement to sell, memoranda of sales, delivery or transfer of shares or certificates of stock	PHP 0.75 for every PHP 200 or fractional part of par value
Certificate of profits, interest in property or accumulations	PHP 0.50 for every PHP 200 or fractional part of face value
Non-exempt debt instruments	PHP 1 for every PHP 200 or fractional value of the issue price.
Bank check, draft, certificate of deposit not bearing interest, other instruments	PHP 1.50 for each instrument
Life insurance policy	PHP 10 to PHP 100 depending upon the amount of insurance
Lease/hiring agreement	PHP 3 for the first PHP 2,000 or fractional part of amount stipulated in contract, and PHP 1 for every PHP 1,000 or fractional part in excess of PHP 2,000 for each year of contract term
Mortgage, pledge, deed of trust	PHP 20 for the first PHP 5,000 of amount secured, and PHP 10 for every PHP 5,000 or fractional part in excess of PHP 5,000
Deed of sale, conveyance of real property	PHP 15 for each PHP 1,000 of consideration/value or fractional part thereof

Capital gains tax

Capital gains arise from the sale or exchange of 'capital assets'. Capital assets are property held by the taxpayer (whether or not connected with its trade), other than the following:

- Inventories or property held primarily for sale to customers in the ordinary course of business.
- Real property or depreciable property used in trade or business.
- Property of a kind that would be included in the inventory of the taxpayer if on hand at the close of the taxable year.

Capital losses are deductible only to the extent of capital gains.

There are no holding period requirements for capital assets of corporations.

A 6% final tax is imposed on the higher of the gross selling price or fair market value upon the sale, exchange, or disposition of land or buildings not actually used in the business of a corporation. The tax is withheld by the buyer at the time of sale.

Net capital gains derived from the sale, exchange, transfer, or similar transactions of shares of stock not traded through a local stock exchange are taxed at 5% on the first PHP 100,000 of gains, and 10% on gains in excess of PHP 100,000. Sales of shares of stock listed and traded on a local stock exchange, other than the sale by a dealer in securities, are subject to a stock transaction tax of 0.5% based on the gross selling price, provided the listed corporation observes a minimum public ownership of at least 10% based on the company's issued and outstanding shares, exclusive of any treasury shares or such percentage as may be prescribed by the Securities and Exchange Commission (SEC) or Philippine Stock Exchange (PSE), whichever is higher; otherwise, the 5%/10% tax shall apply.

Capital gains from the sale of bonds, debentures, or other certificates of indebtedness with a maturity of more than five years are exempt from tax.

A tax is levied on every sale, barter, exchange, or other disposition through an initial public offering (IPO) of shares of stock in closely held corporations. A 'closely held corporation' is any corporation of which at least 50% in value of the total outstanding capital stock, or at least 50% of the total combined voting power of all classes of stock entitled to vote, is owned directly or indirectly by, or for, not more than 20 individuals. The tax rates provided hereunder are based on the proportion of the gross selling price, or gross value in money, of the shares of stock sold, bartered, exchanged, or otherwise disposed of to the total outstanding shares of stock after listing on the local stock exchange.

Proportion of sale to total shares	Tax rate (%)
25% or less	4
Over 25% but not over 33.33%	2
Over 33.33%	1

Fringe benefits tax

A final tax of 32%, payable by the employer, is imposed on the grossed-up monetary value of fringe benefits (e.g. housing, expense accounts, vehicles of any kind, household personnel, interest on loans at lower than market rates [the current benchmark rate is 12%], membership dues for social and athletic clubs, foreign travel expenses, holiday and vacation expenses, educational assistance, insurance) furnished or granted to managerial or supervisory personnel by the employer. An exception is for fringe benefits required by the nature of or necessary to the trade, business, or profession of the employer, or when the fringe benefit is for the convenience or advantage of the employer.

The following fringe benefits are not subject to the tax:

- Those authorised and exempted from tax under special laws.
- Contributions of the employer for the benefit of the employee to retirement, insurance, and hospitalisation benefit plans.
- Those granted to rank-and-file employees (however, the employees may be subject to WHT on compensation).
- Those of relatively small value or *de minimis* benefits.

The fringe benefits tax is payable on a calendar quarter basis and is an additional deductible expense for the employer. Fringe benefits already subjected to fringe benefits tax will no longer form part of the employee's taxable income.

The grossed-up monetary value of the fringe benefit is generally computed by dividing the actual monetary value of the benefit by 68%.

Payroll taxes

Social security contributions

Corporations doing business in the Philippines must be registered with social institutions, such as the Social Security System (SSS), Home Development Mutual Fund (HDMF), and Philippine Health Corporation (PHIC), upon employment of any employee and prior to the due date of the remittance of any social contributions.

Employee contributions for social security are deducted from the employee's salary payments. For 2016, the maximum monthly deductions remain at PHP 581.30 for SSS, PHP 100 for HDMF, and PHP 437.50 for PHIC.

Employers are also required to make contributions. Employers' maximum contribution for each employee is PHP 1,208.70 per month. Employer contributions for HDMF and PHIC are generally of the same amount as the employee contributions.

Philippines

Local government taxes

Local government units impose local business taxes, which are generally based on the gross sales or gross receipts of the prior year, and real property taxes, which are levied annually on the basis of a fixed proportion of the value of the real property (taxable value). The local business tax rate varies depending on the location of the business, but generally shall not exceed 3%. Real property located in a province may be subject to real property tax of not more than 1% of its taxable value, while real property in a city (or municipality in Metro Manila) may be subject to real property tax of not more 2% of its taxable value.

Branch income

The income tax rate on branch profits is the same as on corporate profits. In general, profits remitted abroad by a branch office are subject to a 15% tax rate, based on the total profits applied or earmarked for remittance, without any deduction for the tax component thereof. A lower rate may apply under certain tax treaties. Profits from qualified activities remitted by a branch registered with the Philippine Economic Zone Authority (PEZA) are tax exempt.

Income determination

Inventory valuation

Inventories are generally stated at cost or at the lower of cost or market. Last in first out (LIFO) is not allowed for tax purposes. Generally, the inventory valuation method for tax purposes must conform to that used for financial reporting purposes.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. *See Capital gains tax in the Other taxes section for more information.*

Dividend income

Dividends received by a domestic or resident foreign corporation from another domestic corporation are not subject to tax. These dividends are excluded from the taxable income of the recipient.

Dividends received by a non-resident foreign corporation from a domestic corporation are subject to a general final WHT at the rate of 30%. A lower rate of 15% applies if the country in which the corporation is domiciled either does not impose income tax on such dividends or allows a tax deemed paid credit of 15%. Treaty rates ranging from 10% to 25% may also apply if the recipient is a resident of a country with which the Philippines has a tax treaty.

Stock dividends

A Philippine corporation can distribute stock dividends tax-free, proportionately to all shareholders.

Interest income

Interest on bank savings, time deposits, deposit substitutes, and money market placements received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%, while interest income derived from FCDU deposits is subject to a final tax of 7.5%. Such income is excluded from gross income reportable in CIT returns.

Interest income of OBUs and FCDUs from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to 10% tax.

Royalty income

Royalties received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%.

Other significant items

Other items exempt from CIT include the following:

- Proceeds of life insurance policies.
- Return of policy premium.
- Gifts, bequests, and devises.
- Interest on certain government securities.
- Income exempt under a treaty.
- Gains from sale, exchange, or retirement of bonds.
- Gains from redemption of shares of stock in mutual fund companies.

Foreign income

A Philippine (domestic) corporation is taxed on its worldwide income. A domestic corporation is taxed on income from foreign sources when earned or received, depending on the accounting method used by the taxpayer.

Income earned through a foreign subsidiary is taxed only when paid to a Philippine resident shareholder as a dividend. Meanwhile, income earned through a foreign branch is taxed as it accrues. The losses incurred by the foreign branch are deductible against other income earned by the Philippine corporation.

Double taxation is generally relieved through a credit for foreign taxes. However, a taxpayer can take a deduction for foreign taxes instead, if that leads to a more favourable outcome.

Deductions

Corporate taxpayers can avail themselves of the optional standard deduction computed at 40% of gross income. The optional standard deduction is in lieu of the itemised operating expenses.

Depreciation and depletion

Depreciation is generally computed on a straight-line basis, although any reasonable method may be elected if the aggregate amount of depreciation, plus salvage value at the end of the useful life of the property, will equal the cost of the property. Gain on the sale of depreciated property is taxable as ordinary income. Generally, tax depreciation should conform to book depreciation, unless the former includes incentives.

Properties used in petroleum operations may be depreciated over a period of ten years using the straight-line or declining-balance method, at the option of the service contractor. Properties used in mining operations with expected life of more than ten years may be depreciated over any number of years between five years and their expected life.

A cost depletion allowance is available as follows:

- For oil and gas wells, depletion is based on actual reduction in flow and production ascertained, not by flush flow, but by the settled production or regular flow.
- For mines, depletion is allowable up to an amount not to exceed the market value, as used for purposes of imposing the mining *ad valorem* taxes, of the products mined and sold during the year.

Goodwill

Goodwill is not deductible for tax purposes.

Philippines

Start-up expenses

Start-up expenses are deductible when incurred.

Interest expenses

The allowable deduction for interest expense is reduced by an amount equal to 33% of interest income that is subject to final tax.

Bad debts

Bad debts are deductible expenses when written-off, subject to certain requirements.

Charitable contributions

The deduction for charitable contributions ordinarily may not exceed 5% of taxable income. However, contributions to certain institutions are 100% deductible, subject to certain conditions.

Entertainment expenses

Entertainment, amusement, and recreation expenses should not exceed 0.5% of net sales for taxpayers engaged in the sale of goods or properties, or 1% of net revenue for taxpayers engaged in the sale of services, including professionals and lessors of properties.

Special deductions

Special deductions are allowed for certain businesses (e.g. insurance, mining, petroleum, and real estate investment trust).

Fines and penalties

Fines and penalties are deductible as necessary and ordinary business expenses. Surcharge and compromise penalty imposed for non-payment or late payment of taxes is not deductible for tax purposes.

Taxes

Corporate taxpayers can claim a deduction for all taxes paid or accrued within the taxable year in connection with their trade or business, except for the following:

- Philippine CIT.
- Income taxes imposed by authority of any foreign country, unless the taxpayer elects to take a deduction *in lieu* of a foreign tax credit.
- Estate and donor's taxes.
- Taxes assessed against local benefits of a kind tending to increase the value of the property assessed.

In the case of a foreign corporation, deductions for taxes are allowed only if they are connected with income from sources within the Philippines.

Net operating losses

A net operating loss for any taxable year immediately preceding the current taxable year, which had not been previously offset as a deduction from gross income, may be carried over as a deduction from gross income for the next three consecutive taxable years immediately following the year of this loss (except losses during the period when the taxpayer was tax-exempt), provided there has been no substantial change in the ownership of the business or enterprise.

For mines, other than oil and gas wells, a net operating loss calculated without the benefit of incentives provided for under Executive Order (EO) No. 226, or the Omnibus Investments Code of 1987, as amended, incurred in any of the first ten years of operation may be carried over as a deduction from taxable income for the next five years immediately following the year of such loss.

Loss carrybacks are not allowed.

Payments to foreign affiliates

A Philippine corporation can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are equal to what it would pay an unrelated entity, and the appropriate WHTs are withheld and remitted.

The registration of licensing and management agreements, now known as technology transfer arrangements (TTAs), has been liberalised. Only TTAs not conforming to certain provisions of the Intellectual Property Code require approval by, and registration with, the Documentation, Information, and Technology Transfer Bureau of the Intellectual Property Office (formerly Bureau of Patents, Trademarks, and Technology Transfer) to render the contracts enforceable.

Head office expense allocations

A resident foreign corporation is allowed to claim allocated head office expenses as a deduction, subject to certain requirements.

Group taxation

There is no group taxation in the Philippines.

Transfer pricing

Transfer Pricing Regulations govern the cross-border and domestic transactions between associated enterprises. The Regulations state that the 'arm's-length principle' shall be adopted in determining the transfer price in related-party transactions. The application of the arm's-length principle may follow a 'three-step' approach prescribed by the BIR under the Regulations, to wit: (i) the conduct of a comparability analysis, (ii) the identification of the tested party and the appropriate transfer pricing method, and (iii) the determination of the arm's-length results.

Taxpayers must keep adequate documentation supporting their transfer prices so that they can defend their transfer pricing analysis, mitigate the risk of transfer pricing adjustments arising from tax examinations, and support their applications for Mutual Agreement Procedure (MAP). There is also a 'contemporaneous' requirement that transfer pricing documents must exist or be brought into existence at the time the taxpayers develop or implement any arrangements that may raise transfer pricing issues. This can generally mean that while transfer pricing documentation is not required to be submitted together with the tax returns, such documents should be retained and submitted to the BIR when required or requested. There is no prescribed period within which such documentation may be made available, but it should be available in cases of audit/investigation.

An Advance Pricing Arrangement (APA) is an agreement entered into between the taxpayer and the BIR to determine in advance an appropriate set of criteria (e.g. method, comparables, appropriate adjustments thereto) to ascertain the transfer prices of controlled transactions over a fixed period of time. It is currently available to taxpayers, but the BIR is still in the process of drafting more detailed guidelines. The APA is not mandatory, but may be advisable since the purpose of the APA is to reduce the risk of transfer pricing re-examination and double taxation.

Transactions entered into prior to the Transfer Pricing Regulations becoming effective in February 2013 shall be governed by the laws and other administrative issuances prevailing at the time the controlled transactions were entered into.

Thin capitalisation

There are generally no thin capitalisation rules in the Philippines.

Philippines

Controlled foreign companies (CFCs)

There are no CFC rules in the Philippines.

Tax credits and incentives

Foreign tax credit

Domestic corporations are allowed to claim a credit for any income taxes paid to a foreign country, provided that the taxes are not claimed as deductions. Foreign corporations are not allowed foreign tax credits.

Credits for foreign taxes are determined on a country-by-country basis. The amount of foreign tax credit in respect of the tax paid in a country shall not exceed the same proportion of the tax against which the tax credit is taken, which the taxpayer's income from the country bears to its entire taxable income. There is, however, a further limitation based on the total amount of foreign-sourced income that the taxpayer earns. The total amount of foreign tax credits shall not exceed the same proportion of the tax against which the tax credit is taken that the taxpayer's foreign-sourced income bears to its entire taxable income.

Export incentives

Tax incentives available to export enterprises registered with the Board of Investments (BOI) are as follows:

- Income tax holiday (ITH) giving full exemption from CIT for six years for pioneer firms and those locating in less-developed areas and four years for non-pioneer firms. The ITH period starts to run from the date of commercial operation, or target date of operation, whichever is earlier. If prescribed conditions are met, the ITH period may be extended by up to three years. In no case, however, can the total ITH period exceed eight years. Expanding export-oriented firms are also allowed a three-year ITH on the incremental income. Subject to certain exceptions, new and expansion projects located in the National Capital Region (NCR) or Metro Manila are no longer entitled to ITH.
- Tax and duty exemption on imported spare parts and supplies for export producers with a customs bonded manufacturing warehouse exporting at least 70% of annual production, if foreign-owned, or 50%, if Filipino-owned.
- Full deduction of the cost of major infrastructure undertaken by enterprises in less-developed areas.
- Additional deduction of 50% of the incremental labour expense if the prescribed ratio of capital assets to annual labour is met and 100% of the incremental labour if located in less-developed areas within five years from date of registration (this incentive cannot be availed of simultaneously with the ITH).
- Ten-year exemption from taxes and duties on importation of breeding stock and genetic materials.
- Tax credit on domestic breeding stocks and genetic materials (ten years).
- Exemption from wharfage, any export tax, duty, impost, or fees.
- Tax credits equivalent to taxes and duties paid on purchases of raw materials, supplies, and semi-manufactured products forming part of the products for export.

Other incentives

Export and free-trade enterprises, information technology (IT) enterprises, and special economic zone developers/operators (including IT buildings located in Metro Manila and IT parks) registered with PEZA are entitled to an ITH of six years for pioneer firms and four years for non-pioneer firms. Foreign articles brought into the zones will be exempt from import duties and taxes. Local purchases of goods from VAT-registered suppliers outside the economic zones are zero-rated. After the lapse of the ITH period, enterprises registered and operating within special economic zones/export processing zones will pay only a 5% special tax on gross income earned from registered activities *in lieu* of all local and national taxes.

A regional or area headquarters established in the country as a supervisory, communications, and coordination centre for a corporation's subsidiaries, affiliates, and branches in the Asia-Pacific region, and whose headquarters do not derive income from the Philippines, are not subject to any CIT nor VAT and are entitled to certain non-tax incentives.

An ROHQ that is allowed to derive income in the Philippines by performing qualifying business services to its affiliates, subsidiaries, or branches in the Philippines, in the Asia-Pacific Region, and other foreign markets may avail itself of the following incentives:

- Income tax at the preferential rate of 10% of its taxable income.
- Exemption from all kinds of local taxes, fees, or charges imposed by a local government unit, except real property tax on land improvements and equipment.
- Tax and duty-free importation of equipment and materials for training and conferences that are needed and used solely for its functions as an ROHQ and are not locally available, subject to the prior approval of the BOI.
- Importation of new motor vehicles, subject to the payment of corresponding duties and taxes.
- Exemption from travel tax, specific immigration fees, and requirements, subject to certain conditions.

The following are the incentives granted to exporters under the Export Development Act (Republic Act No. 7844):

- Exemption from Presidential Decree No. 1853 (requiring 100% of Letter of Credit), provided that the importation shall be used for the production of goods and services for export.
- Tax credit for incremental export performance. The tax credit for increase in current export revenues shall be computed as a percentage to be applied on the incremental export revenue converted to pesos at the current rate. The percentages or rates are as follows:
 - For the first 5% increase in annual export revenues over the previous year: 2.5%.
 - For the next 5% increase: 5.0%.
 - For the next 5% increase: 7.5%.
 - In excess: 10%.

Note that this incentive is not available for exporters enjoying ITH or VAT exemption or whose local VAT is below 10%.

- In addition to the above incentives, all existing incentives being enjoyed by the enterprise if registered with the BOI, PEZA, Subic Bay Metropolitan Authority (SBMA), Clark Development Corporation (CDC), or other ecozone regulating agencies.

Withholding taxes

Corporations and individuals engaged in business are required to withhold the appropriate tax on income payments to non-residents, generally at the rate of 30% in the case of payments to non-resident foreign corporations or 25% for non-resident aliens not engaged in trade or business. *For WHT on resident corporations, see the discussions in the Income determination section.*

Tax treaty rates

For countries with which the Philippines has concluded tax treaties, the maximum rates of taxes to be withheld are as follows:

As of 21 April 2016:

Philippines

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%)
Australia	15/25 (3, 4)	10/15 (5)	15/25 (6)
Austria	10/25 (3, 7)	10/15 (5, 8)	10/15 (6, 9)
Bahrain	10/15 (7)	10	10/15 (10)
Bangladesh	10/15 (11)	15	15
Belgium	10/15 (7)	10	15
Brazil	15/30	10/15 (5)	15/25 (12)
Canada	15/25 (3, 7)	10/15 (5)	25 (9)
China, People's Republic of	10/15 (7)	10	10/15 (13)
Czech Republic	10/15 (7)	10	10/15 (14)
Denmark	10/15 (11)	10	15
Finland	15/30 (3, 7)	10/15 (5)	15/25 (15)
France	10/15 (3, 7)	10/15 (5)	15
Germany	5/10/15 (11, 24)	10	10
Hungary	15/20 (3, 11)	15	15 (9)
India	15/20 (3, 7)	10/15 (5, 17)	15/30 (6)
Indonesia	15/20 (3, 11)	10/15 (5)	15/25 (6)
Israel	10/15 (7)	10	15 (9)
Italy	15	10/15 (5)	15/25 (6, 18)
Japan	10/15 (3, 7)	10	10/15 (19)
Korea, Republic of	10/25 (3, 11)	10/15 (5)	10/15 (6)
Malaysia	15/25	15	15/25 (6, 18)
Netherlands	10/15 (7)	10/15 (5, 16, 17)	10/15 (6)
New Zealand	15	10	15
Nigeria	12.5/15 (7)	15	20
Norway	15/25 (3, 7)	15	7.5/10/25 (9, 20)
Pakistan	15/25 (3, 11)	10/15 (5)	15/25 (6)
Poland	10/15 (11)	10	15
Qatar	10/15 (7)	10	15
Romania	10/15 (11)	10/15 (5, 16, 17)	10/15/25 (21)
Russia	15	15	15
Singapore	15/25 (3, 22)	10/15 (5)	15/25 (6, 18)
Spain	10/15 (7)	10/15 (5, 16)	10/15/20 (23)
Sweden	10/15 (11)	10	15
Switzerland	10/15 (7)	10	15
Thailand	15/30	10/15 (5)	15/25 (6, 18)
Turkey	10/15 (11)	10	10/15 (13, 19)
United Arab Emirates	10/15 (7)	10	10
United Kingdom	15/25 (3, 7)	10/15 (5)	15/25 (6, 19)
United States	20/25 (3, 7)	10/15 (5)	15/25 (6, 9)
Vietnam	10/15 (11)	15	15

Notes

1. The lower rate generally applies if the beneficial owner of the dividends is a company with a substantial ownership in the dividend paying company.
2. Interest derived by a foreign government or its agencies is typically exempt from Philippine tax. Many treaties also contain special rules for both Philippine and home country taxation of interest paid on instruments secured by a government agency of one of the countries. Such provisions have been excluded from the analysis.
3. A 15% rate applies under domestic law if the home country exempts the dividend from tax or permits a 15% or greater credit for corporate taxes paid by the company paying the dividend.
4. Entitlement to the lower rate depends on how the dividend will be taxed in Australia.
5. The 10% rate applies to interest paid in respect of the public issues of bonds, debentures, or similar obligations.
6. The lower rate applies to royalties paid by an enterprise registered with the Philippine BOI and engaged in preferred areas of activity.

7. The threshold for substantial ownership is 10%.
8. The 10% rate also applies to interest paid by a company registered with the BOI and engaged in preferred pioneer areas of investment in the Philippines.
9. The treaty also contains a most-favoured-nation rule, limiting the Philippine tax on royalties to the lowest rate of Philippine tax that may be imposed on royalties of the same kind paid in similar circumstances to a resident of a third state.
10. The 15% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films or tapes for television or broadcasting.
11. The threshold for substantial ownership is 25%.
12. The 25% rate applies to royalties arising from the use or the right to use trademarks and cinematographic films, films or tapes for television or radio broadcasting. The 15% applies to any other royalties.
13. The 10% rate applies to the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. Strictly, application of the rate is generally at the discretion of the Philippine Competent Authorities, but the BIR has never raised this as an issue.
14. The 10% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work (other than copyright of cinematograph films), any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
15. The 15% rate applies to royalties paid by an enterprise registered and engaged in preferred areas of activities, and to royalties in respect of cinematographic films or tapes for television or broadcasting, and for the use of, or the right to use, any copyright. The 25% rate applies to other royalties.
16. The 10% rate also applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment.
17. The 10% rate also applies to interest paid on any loans granted by a bank.
18. The 15% rate also applies to royalties in respect of cinematographic films or tapes for television or broadcasting.
19. The 15% rate applies to royalties paid for the use of, or the right to use, cinematographic films and films or tapes for radio or television broadcasting.
20. The 7.5% rate applies to the lease of containers. The 10% rate applies to royalties paid by an enterprise registered with the BOI. The 25% rate applies to other royalties.
21. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 15% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 25% rate applies to all other royalties.
22. The threshold for substantial ownership is 15%.
23. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 20% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 15% rate applies to all other royalties.
24. The threshold for substantial ownership is 70% for the 5% rate to apply.

Tax administration

Taxable period

The accounting period must follow a 12-month fiscal period but may or may not follow the calendar year. Most Philippine companies have a fiscal year that ends in December or March.

Tax returns

Corporations should file their returns and compute their income on the basis of an accounting period of 12 months.

Corporate taxpayers file self-assessed returns. Electronic filing and payment of taxes are available under the Electronic Filing and Payment System (eFPS) of the BIR.

The following corporate taxpayers who are not covered by eFPS are required to use Electronic BIR Forms (eBIRForms) in filing their tax returns:

- Accredited tax agents/practitioners and all their client-taxpayers who authorised them to file on their behalf.
- Accredited printers of principal and supplementary receipts/invoices.
- One-time transaction taxpayers.
- Those who shall file a 'No Payment' return, except senior citizen or persons with disabilities filing their own return, employees deriving purely compensation income and the income tax of which has been withheld correctly, employees qualified for substituted filing but opted to file for an income tax return and are filing for purposes

Philippines

of promotion (Philippine National Police and Armed Forces of the Philippines), loans, scholarship, foreign travel requirements, etc.

- Government-owned or controlled corporations.
- Local government units, except barangays.
- Cooperatives registered with the National Electrifications Administration and Local Water Utilities Administrations.

Taxpayers who are required to file their returns using eFPS or eBIRForms but fail to do so shall be subject to a penalty of PHP 1,000 per return and civil penalties equivalent to 25% of the tax due.

A domestic or resident foreign corporation is required to file income tax returns on a quarterly basis. Within 60 days from the close of the first three quarters of its taxable year, the corporation must file a return summarising its gross income and deductions for the year to date. A final annual income tax return must be filed on or before the 15th day of the fourth month following the close of the taxable year.

Corporate taxpayers must file their income tax returns using one of three different forms, depending on their tax regime (i.e. subject only to the regular income tax, tax exempt, or with mixed income subject to multiple tax rates or special/preferential rates).

Payment of tax

Every corporation files cumulative quarterly income tax returns for the first three quarters and pays the tax due within 60 days after each quarter. A final adjustment return covering the total taxable income of the preceding taxable year must be filed on the 15th day of the fourth month following the close of the taxable year. The balance of the tax due after deducting the quarterly payments must be paid, while the excess may be claimed as a refund or tax credit. Excess estimated quarterly income taxes paid may be carried over and credited against estimated quarterly income tax liabilities for succeeding taxable years. Once the option to carry over has been made, such option is irrevocable, and no cash refund or tax credit certificate (TCC) is allowed, except upon liquidation of the company.

Since additional modes of payment of taxes are now available through credit, debit, and prepaid cards under recently issued Revenue Regulations, taxpayers may choose from the available online payment facilities provided by the Electronic Payment Service Provider (EPSP) to process tax payments. However, only accredited Authorised Agent Banks (AABs) may accept such payments, and accreditation of AABs is subject to compliance with certain conditions under existing Regulations.

Payment of taxes through the Card Payment Facility shall be deemed made on the date and time appearing in the system-generated payment confirmation receipt issued to the taxpayer-cardholder by the AAB-acquirer, provided that the payment was actually received by the BIR. The taxpayer is not relieved of, and has a continuing liability for such taxes, until the payment is actually received by the BIR.

Annual statutory audit

An annual statutory audit is required for all corporations with authorised capital stock or paid-up capital exceeding PHP 50,000, including branches of foreign corporations. It is also required for any corporation whose gross sales or earnings exceed PHP 150,000 in any quarter.

Statute of limitations

There is no statutory obligation on the Tax Commissioner to make an assessment for internal revenue taxes, and most taxes are collected based on the taxpayer's self-calculation. If an assessment is to be issued, however, it must be done within three years from the deadline or the date of actual filing of the return, whichever is later. The taxpayer and the Commissioner can, however, agree in writing to extend this period.

In the case of a false or fraudulent return or of failure to file a return, the tax may be assessed or a proceeding in court for collection may be commenced without assessment at any time within ten years from the discovery of the falsity, fraud, or omission.

Any internal revenue tax that has been assessed within the period of limitation may be collected by distraint or levy or by a proceeding in court within five years following the assessment of the tax.

The prescription periods are suspended in certain circumstances, such as when the offender is absent from the Philippines, when the Commissioner grants a taxpayer's request for a reinvestigation, or when the taxpayer and the BIR agree to extend the prescriptive period for assessment through a written waiver.

In the case of overpayment of tax, a claim for refund or credit may be filed with the BIR within two years from the date of erroneous payment of the tax. If the claim is denied or no decision is received from the BIR, a petition for review may be filed with the Court of Tax Appeals (CTA). This must be filed before the two-year period expires, and in the case of a denied claim, within 30 days from the receipt of the denial.

Topics of focus for tax authorities

During audits, the BIR generally covers all applicable internal revenue taxes. With the issuance of certain regulations in recent years, assessment issues involving transfer pricing, intercompany advances, donor's tax, and improperly accumulated earnings tax have become more prevalent.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

FATCA took effect on 1 July 2014. Under FATCA, financial institutions outside the United States shall report each year to the US Internal Revenue Service (IRS) information about accounts held by US citizens. The said financial institutions that fail to comply with FATCA are subject to a 30% WHT on US-sourced 'fixed, determinable, annual, or periodic income', which shall be withheld by their counterparties in the United States.

In the absence of an intergovernmental agreement (IGA), participating foreign financial institutions (FFIs) in the Philippines individually signed an FFI Agreement with the IRS.

Under Model 1 of the IGA, FFIs will provide information on US accounts to the BIR, which information will be relayed to the IRS.

Currently, Model 1 IGA is treated as 'in effect' by the US Treasury as of 30 November 2014. The United States and the Philippines have reached an agreement in substance, and the Philippine government has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in the Philippines are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

However, as of 25 April 2016, the BIR has not yet issued the reporting guidelines for Model 1 of the IGA, pending its ratification by the Philippine Senate. Thus, the reporting deadline for participating FFIs is currently on hold.

Significant developments

Changes in transfer pricing rules

New regulations, binding from 1 January 2016, introduce a number of significant changes to the Polish transfer pricing regulations and imposes new requirements on taxpayers conducting related-party transactions.

In general, more information on related-party transactions will need to be disclosed to the tax authorities.

The new Polish regulations generally follow guidelines of the base erosion and profit shifting (BEPS) Action 13 report; however, certain specific local requirements have also been introduced. According to the new regulations, taxpayers will be obligated to prepare much more extensive transfer pricing documentation (compared to the current requirements) after exceeding certain statutory thresholds, conducting benchmarking studies, and submitting additional returns summarising related-party transactions conducted.

On the other hand, the new regulations introduce some changes favourable for taxpayers. In particular, the materiality thresholds are increased for transfer pricing purposes.

Country-by-country reporting is also introduced by the new regulations. Regulations on country-by-country reporting are binding as of 1 January 2016, whereas other changes become effective as of 1 January 2017.

Dividend income

As of 1 January 2016, European Union (EU) Council Directive no. 2015/21 dated 27 January 2015 was introduced to the Polish tax system. According to the new regulations, the participation exemption on dividends and other profit-sharing payments will not apply to the legal transaction or series of legal transactions that, having been put into place for the main purpose or one of the main purposes of obtaining a tax advantage, are not genuine, having regard to all relevant facts and circumstances.

Tax on certain financial institutions

As of February 2016, certain financial institutions, such as banks, insurance, and re-insurance companies (including branch offices in Poland), as well as so-called lending companies, are subject to tax on certain financial institutions (so-called 'banking tax'). Tax at the rate 0.44% per year (0.0366% per month) is levied on the assets of the taxpayers exceeding certain thresholds.

Taxes on corporate income

The corporate income tax (CIT) is the only tax levied on corporate income. The standard CIT rate is 19%.

Polish tax residents are subject to tax on their worldwide income. Non-residents are taxed only on their Polish-sourced income. The tax authorities' right to tax a non-resident is further limited if the non-resident's country of residence concluded a double tax treaty (DTT) with Poland. In this case, the Polish tax authorities are, as a rule, entitled to tax only the portion of the non-resident's income that may be attributed to a permanent establishment (PE) located in Poland if such income has arisen in Poland for the foreign tax resident. Exceptions relate to specific types of income, such as royalties, interest, dividends, and capital gains, which may be in Poland even if no PE exists.

Polish companies with foreign participation may be set up as either limited liability companies or joint-stock companies. There is no limitation on the percentage of foreign participation. Both types are subject to the general CIT rules, including the standard 19% tax rate (and other rates, depending on the type of revenue sourced in Poland). The same rate applies to branches of foreign companies (*see the Branch income section for more information*).

Certain entities are explicitly excluded from the group of taxpayers under the CIT law (e.g. Treasury, National Bank of Poland). Polish and EU/European Economic Area (EEA) based investment funds are also exempted on the grounds of such provision.

Local income taxes

There are no local income taxes in Poland.

Corporate residence

A company is considered to be a resident in Poland if its registered office or management is located in Poland.

Permanent establishment (PE)

PE under Polish CIT law

According to Polish CIT law, the following are understood to be a PE:

- A permanent place of business through which a non-Polish tax resident conducts its business activities, in whole or in part, within the territory of Poland; in particular, a branch, agency, office, factory, workshop, or place of extraction of natural resources.
- A construction site, construction, assembly, or installation works carried on within the territory of Poland by a non-Polish tax resident.
- A person who, on behalf and for the benefit of a non-Polish tax resident, operates in Poland, provided such person holds and exercises a power of attorney to enter into agreements on one's behalf.

We note that Polish CIT law:

- does not encompass any provisions concerning the period required for construction works to create a PE
- does not include provisions indicating that an independent agent does not create a PE, and
- does not include provisions indicating that actions of an auxiliary or preparatory character do not lead to creation of a PE in Poland.

PE from a DTT perspective

In general, the provisions of DTTs concluded by Poland are based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital (OECD Model), except for provisions related to taxation of royalties, which are based on the United Nations (UN) Model Double Taxation Convention.

Poland

As a principle, treaties based on the OECD Model provide for the following concepts, which determine whether activities of a foreign entrepreneur constitute a PE (usually in Article 5):

- Fixed place of business concept.
- Dependent agent concept.
- Construction PE concept.

Note that some DTTs concluded by Poland also encompass other PE concepts (e.g. service PE concept or offshore PE concept).

Other taxes

Value-added tax (VAT)

Polish VAT applies to the following activities:

- Supplies of goods and services within the territory of Poland.
- Exports of goods outside the territory of the European Union.
- Imports of goods from countries that do not belong to the European Union.
- Intra-Community acquisitions of goods (imports from countries belonging to the European Union).
- Intra-Community supplies of goods (exports to the countries belonging to the European Union).

VAT rates

The VAT rates are 23% (standard rate), 8%, 5%, 0%, and exemption.

The standard 23% VAT rate generally applies to the supply of all goods and services, except for those that are covered by special VAT provisions that provide other rates or treatments.

Supplies covered by a reduced rate of 8% include, among others, supplies of pharmaceutical products and passenger transport services and also supply of goods for the Social Housing Programme (no greater than 150 square metres).

Supplies covered by a reduced rate of 5% include books and journals, unprocessed food, and basic food.

Zero-rated activities include, among others, exports of goods to countries outside the European Union.

VAT-exempt supplies include, among others, certain financial, insurance, and educational services.

Basic calculation rules

In general, the VAT due equals the VAT on outputs decreased by the VAT on inputs (in other words, input VAT is deducted from output VAT). Input VAT may be deducted from output VAT when a business (with a VAT payer status) receives an invoice for goods or services purchased. Input VAT may not be deducted unless a purchased supply is linked to the VATable activities. Furthermore, the deductibility of input VAT is restricted by the VAT law with respect to the purchase of certain goods and services. In addition, subject to numerous conditions, output VAT may be reduced when receivables, resulting from VATable sales, become uncollectible.

VAT refunds

The Polish VAT law allows direct refunds when input VAT (available for deduction) exceeds output VAT.

A Polish business may also be entitled to the VAT refund owed by another country under certain circumstances. Likewise, a foreign business having seat or fixed place of business for VAT purposes outside of Poland may be, in most cases, entitled to the refund of Polish VAT. If the respective countries belong to the European Union, the procedure is substantially simplified due to the EU Directive, which provides favourable rules for businesses based in EU countries that are seeking VAT refunds in other EU countries (i.e. electronic VAT refunds are possible).

International services

The treatment of international services largely depends on the place of supply since it is determinative of whether particular services are subject to the Polish VAT. The Polish VAT applies only to those services that are supplied within Poland.

Reporting rules

Generally, the VAT reporting period is one month. VAT returns should be submitted by the 25th day of the month following the VAT reporting period. All taxpayers may opt for a quarterly, instead of monthly, reporting period.

Customs duties

As a member of the European Union, Poland belongs to a customs union, thus only goods imported from non-EU countries or exported from Poland to non-EU countries are subject to customs duties and formalities. Moreover, all the Community customs regulations are directly applicable in Poland. The most important act is the Community Customs Code and its implementing provisions, as well as the Community Customs Tariff.

These regulations are supplemented with certain Polish national rules, especially in respect to procedures and specific areas that are not defined in the Community customs law (e.g. strict regulations concerning the export of works of art and animals, limits on the amount of cash that may be brought from Poland to non-EU countries).

Excise duties

Excise duties are levied on the production, sale, import, and intra-Community acquisition of 'excise goods', which are listed in the excise duty law and include (among others) alcohol, cigarettes, energy products (e.g. petrol, oils, gas), passenger cars, and electricity.

Depending on the excise goods in question, one of four methods of calculating excise tax may be applicable:

- A percentage of the taxable base.
- An amount per unit.
- A percentage of the maximum retail price.
- An amount per unit and a percentage of the maximum retail price.

The excise rate for car petrol is 1,540 Polish złoty (PLN) per 1,000 litres.

Passenger cars are subject to the following excise rates:

- 3.1% for cars with engine cubic capacity that does not exceed 2,000 cc.
- 18.6% for cars with engine cubic capacity that exceeds 2,000 cc.

Notwithstanding the above, Polish excise duty law provides for a wide system of excise duty exemptions as well as 0% taxation. Under specified circumstances, such preferential treatment may apply to specified goods that are otherwise taxed based on general rules. This concerns, for example, specific energy products used for other purposes than as a fuel or for heating.

Poland

There is also an excise duty placed on coal. Depending on the type of coal product, the excise rates are PLN 30.5 per 1,000 kg of coal, PLN 11 per 1,000 kg of lignite, and PLN 35.2 per 1,000 kg of coke. In practice, there are a wide range of excise duty exemptions (practically, Poland has used all the exemption options provided in the EU Directive); nevertheless, many new administrative obligations have been set for entities producing, distributing, and using coal. The fulfilment of those obligations is necessary in order to apply an excise duty exemption.

Property taxes

Property tax rates are fixed by municipalities within limits set in the Law on Local Taxes and Fees. In 2016, land used for business purposes is subject to a rate limit of PLN 0.89 per square metre. Buildings used for business purposes are subject to a rate limit of PLN 22.86 per square metre.

Transfer taxes

A transfer tax may apply to certain civil law transactions, determined as a percentage of the transaction (i.e. such as sale, loan, donation). A tax obligation on civil law transactions does not arise when one of the parties of the transaction is a VAT payer.

Stamp duty

In Poland, some activities are charged a stamp duty. Payment is required, for example, in connection with the submission of a power of attorney, after completion of an official act, or the issue of a certificate or permit.

Capital tax

A share capital increase (in case of corporations) and contribution/contribution increase (in case of partnerships) is subject to a 0.5% capital tax, payable by a company or partnership that receives a capital contribution. This tax applies equally to limited liability companies as well as joint-stock companies. A merger, division, or transformation of a corporation into another corporation is not subject to capital tax, even if the transaction results in a share capital increase. A similar exemption applies to a capital increase resulting from (i) an in-kind contribution of an enterprise or its organised part or (ii) contribution of shares of the other corporation giving the majority of votes in this corporation or contribution of additional shares in case the corporation to which the shares are contributed already has the majority of votes.

Tax on certain financial institutions

As of 1 February 2016, a new tax on certain financial institutions (so-called 'banking tax') was introduced. This tax is levied on:

- Banks, branches of foreign banks, branches of credit institutions, and credit unions.
- Insurance companies, reinsurance companies, branches of international insurance companies and international reinsurance companies, and main branches of international insurance companies and international reinsurance companies.
- The lending institutions within the meaning of the Consumer Credit Act.

Tax at the rate 0.44% per year (0.0366% per month) is levied on the assets of the taxpayers less (i) PLN 4 billion in case of banks, (ii) PLN 2 billion in case of (re-) insurance companies, and (iii) PLN 200 million in case of lending institutions. In case of (re-)insurance companies and lending companies, tax is levied on the consolidated assets of the capital group companies.

Payroll taxes

Social security contributions

Both the employer and the employee are obligated to contribute to the Polish social security system. Apart from paying its own share, the employer is obligated to withhold

the employee's share of the social security contributions and remit them to the Social Security Authorities (ZUS). In both cases, the relevant payments shall be made monthly.

The employer pays total contributions in a range of 19.48% to 22.14% of the employee's gross salary (the employer's contribution rate includes an accident insurance element that varies according to the number of employees insured and the business sector). The contribution rate for the employee is 13.71% of gross salary. The social security shares payable by the employer and the employee are tax-deductible items in their respective income tax settlements.

The rates apply to salaries below the cap of PLN 121,650 in 2016. The cap changes every year. After exceeding this cap, the salary is subject to a contribution rate of 3.22% to 6.41% payable by the employer and 2.45% payable by the employee.

Branch income

Foreign businesses are allowed, under certain conditions, to establish their branch offices (exclusively within the scope of their 'foreign' business activity) and representative offices (exclusively with regard to promotion and advertising) in Poland.

A branch office almost always has PE status in Poland. Once a branch is established, the foreign company pays CIT at the standard rate of 19%, based on the income attributable to the operations of the Polish branch. For this purpose, as well as for accounting purposes, a branch is obligated to keep accounting books that include all the data necessary to establish the taxable base. In this respect, general income determination rules relevant to Polish companies apply to branches as well. In the few cases in which a branch can demonstrate, based on a DTT, that its business presence in Poland does not constitute a PE, its profits are not subject to Polish CIT.

Income determination

The tax base for CIT purposes is the overall income, which is the difference between aggregated taxable revenue and aggregated tax-deductible costs. A tax-deductible cost is defined as a cost incurred for the purposes of deriving revenues, as well as for the purpose of securing or preserving a source of revenue.

Subject to numerous exemptions, the tax base includes all sources of income. Consequently, there is no special treatment for income such as capital gains or interest.

In practice, taxable income is calculated by adjusting the profit reported for accounting purposes. The relevant adjustments are necessary due to differences between tax and accounting treatment of numerous revenue and cost items. As a result, the taxable base is usually higher than the accounting profit.

Inventory valuation

Generally, the value of inventory shortages may be included as a tax-deductible cost. Other write-offs in the value of inventory are not recognised for tax purposes until the inventory in question is sold.

When inventory is lost or sold, a tax deduction is allowed for the costs incurred when the inventory was purchased. The methods acceptable for inventory valuation for tax (and accounting) purposes are standard cost, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO).

Poland

Capital gains

There is no separate capital gains tax. Capital gains or losses are aggregated with an entity's other taxable income or losses. Capital losses are tax-deductible.

Dividend income

Domestic dividend income

Dividends received from Polish residents (domestic dividends) are excluded from overall income. Instead, such dividends are subject to a 19% withholding tax (WHT), which is withheld and remitted to the tax office by the payer of dividends. Based on a participation exemption, however, domestic dividends are not subject to the 19% WHT if the Polish beneficiary holds at least a 10% share in the paying company for at least two years.

The revenue arising from voluntary redemption of shares is not treated as a dividend for tax purposes and does not enjoy the benefits of the participation exemption (i.e. the method of redemption, whether voluntary or automatic, will matter).

Dividend income from abroad

Generally, dividends received by a Polish corporate tax resident from a non-resident are treated as regular income and taxed at the standard CIT rate. CIT on such dividends paid in other countries may be credited proportionately against Polish CIT.

Additionally, dividends received from entities seated in the European Union (including Poland), EEA member states, or Switzerland can benefit from CIT exemption if the Polish company owns, respectively, at least 10% (in respect to companies seated in the EU/EEA member states) or 25% (in respect to companies seated in Switzerland) in the share capital of the payer for two consecutive years (and certain other conditions are met).

Dividends received from non-EU/non-EEA member states may benefit from underlying tax credit. If a Polish company or a PE of a company from an EU/EEA member state located in Poland receives a dividend from a company seated in a non-EU/non-EEA country, it may deduct the tax paid by the payer on profits out of which the dividend was paid. The deduction is only possible if the Polish company/company from EU/EEA, which PE is located in Poland, holds (for two consecutive works) at least 75% of shares of the dividend payer. The tax may be deducted in an appropriate proportion. Furthermore, the deduction is possible if there is a DTT. Based on the provisions of the relevant DTT or other agreement concluded by Poland, the Polish tax authority may exchange tax information with its counterparty.

Anti-avoidance regulations

As of 1 January 2016, the participation exemption on dividends and other profit-sharing payments will not apply to the legal transaction or series of legal transactions that, having been put into place for the main purpose or one of the main purposes of obtaining a tax advantage, are not genuine, having regard to all relevant facts and circumstances.

Based on the introduced provisions, a 'not genuine' legal transaction is such transaction that is undertaken in order to benefit from the tax exemption but does not reflect economic reality (i.e. it is not conducted for valid commercial reasons and its result is, in particular, transfer of shares' ownership of the company paying the dividend or achieving, by this company, income [revenue] paid in the form of dividend).

Interest income

Interest income is aggregated with an entity's other taxable income.

Foreign income

Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland (*see Foreign tax credit in the Tax credits and incentives section*).

Controlled foreign company (CFC) rules entered into force as of 1 January 2015 (*see Controlled foreign companies (CFCs) in the Group taxation section for more information*).

Deductions

Generally, a tax-deductible cost is defined as a cost incurred for the purposes of deriving revenues, as well as for the purpose of securing or preserving a source of revenue. The last element of the definition of a tax-deductible cost was added to reduce uncertainties surrounding the deductibility of business expenses that do not directly generate revenue.

The CIT law provides a list of items that are not deductible for tax purposes, even if the items meet the general conditions described above. This list contains over 60 items including, among others, the following:

- Written-off, lapsed accounts receivable.
- Entertainment costs.
- Accrued but unpaid interest.
- Accounting and comparable provisions.
- Tax penalties and penalty interest.
- A portion of the insurance premium paid on a passenger car (i.e. the portion calculated on the excess of the car value over 20,000 euros [EUR]).
- A portion of the depreciation write-offs made on a passenger car (i.e. the portion calculated on the excess of the car value over EUR 20,000).

Furthermore, expenses incurred in connection with the acquisition of fixed and intangible assets (e.g. licences, trademarks, know-how) are not directly deductible. Instead, the acquired assets are subject to depreciation. If such assets are sold, a business is entitled to deduct the net value (cost of acquisition reduced by the overall value of the tax depreciation allowances made). Similar treatment relates to the acquisition of shares or land, except that these particular assets are not depreciable. Therefore, the full cost of an acquisition of shares or land may be deducted when such assets are sold.

Depreciation

Depreciation write-offs are treated as a tax-deductible cost. Generally, depreciation allowances are calculated based on the straight-line method and the maximum rates provided in the CIT law. If this is the case, a taxpayer deducts equal annual write-offs, calculated by multiplying the maximum rate of depreciation by the asset's initial value until the total value of write-offs equals the initial value (typically, the initial value equals the purchase price).

For certain categories of machinery and vehicles (but not passenger cars), the reducing-balance depreciation method may be applied. Under this method, the tax depreciation may be accelerated during the initial period of the asset's use by multiplying the statutory maximum rate by two. The rate is then applied to the net value of fixed assets (i.e. initial value reduced by earlier annual write-offs). The reducing-balance method is applied until the annual depreciation write-off equals the hypothetical write-off that would be made under the straight-line method. From this point, the depreciation allowance is taken based on the straight-line method for its remaining useful life.

Poland

The main categories of assets and the related statutory annual tax depreciation rate are as follows:

Assets	Depreciation rate (%)
Various buildings and constructions	1.5 to 10
Machinery and equipment (general)	7 to 20
Machinery for road building and construction	18 to 20
Machinery for paper industry	14
Office equipment	20
Computers	30

Apart from the above, the Polish CIT law includes provisions for accelerated depreciation (within specified limits) for assets used in deteriorated conditions and for second-hand assets.

Goodwill

Under the provisions of CIT law, goodwill is subject to tax amortisation if it is created as a result of acquisition of an enterprise, or its organised part, made in one of the following ways: (i) purchase; (ii) payable use, provided that the user of such enterprise/organised part of an enterprise makes the depreciation write-offs; or (iii) contribution to a company based on commercialisation and privatisation regulations. The goodwill is amortised for tax purposes for a minimum period of five years.

Start-up expenses

There are no specific provisions in the Polish CIT law relating to start-up expenses; the general rules of tax deductibility described above apply.

Interest expenses

Accrued interest on loans and credit that were paid or capitalised are deductible for CIT purposes. Polish CIT law provides some exceptions, such as instances where costs are not associated with earning revenue.

In Poland, there are also some limitations of interest tax deductibility connected with thin capitalisation regulations. *See Thin capitalisation in the Group taxation section for more information.*

Bad debt

As a general rule, debts written off as uncollectable cannot be considered as tax deductible. However, in certain situations, the provisions of Polish CIT law provide some exceptions. According to these provisions, only strictly defined uncollectable debts (which based on the CIT law were booked as taxable revenues) may be considered by the taxpayer as a tax-deductible cost, provided that their uncollectability was properly documented (e.g. by a court decision). In some cases, uncollectability may be considered probable (e.g. debtor's death).

Charitable contributions

Companies are entitled to deduct donations for the purposes of public benefit and to volunteer activity organisations up to a total amount not exceeding 10% of income; however, deductions may not be made for donations to:

- natural persons or
- legal persons or organisational units having no legal personality who carry on economic activity consisting in the production of electronic goods; fuel; tobacco; spirits, wines, beers, and other alcohol beverages containing over 1.5% alcohol; products made of noble metals or containing such metals; or incomes received from trading in such goods.

Donations for religious practice purposes can be deducted up to a total amount not exceeding 10% of income.

Additionally, the donations of food products made for the purposes of so-called public benefit constitute tax deductible costs in the amount of production costs or purchase price.

Fines and penalties

Fines and penalties can be recognised as tax deductible items if they meet the general conditions. However, the Polish CIT law provides some exceptions, which include contractual penalties and indemnities for defects in supplied goods, works, and services performed; delayed supply of non-defective goods; and delay in the elimination of defects in goods, works, and services performed.

Taxes

Income tax, certain industry-specific taxes (e.g. banking tax), and, in most cases, VAT incurred on purchases are not deductible. However, as a rule, VAT is deductible for CIT purposes if it cannot be offset against the company's output VAT. Other taxes, if paid in the course of business activities, are generally deductible in full.

Net operating losses

A tax loss reported in a tax year may be carried forward over the next five consecutive tax years; however, in any particular tax year, the taxpayer may not deduct more than 50% of the loss incurred in the year for which it was reported. For example, a taxpayer that incurred PLN 100 annual loss in 2016 may carry it forward to 2017 through 2021. However, the maximum loss deduction in any of these years may not exceed PLN 50 (assuming that there are no other losses available for deduction).

Currently, there is no possibility to carry back tax losses in Poland.

Payments to foreign affiliates

Deductions may be claimed for royalties, management services, and interest charges paid to foreign affiliates. However, note that interest expenses are subject to the thin capitalisation restrictions (*see Thin capitalisation in the Group taxation section for more information*). Furthermore, note that transactions with related companies should be made according to the market conditions. Where a company shifts income to another entity (especially a foreign entity), the tax authorities may adjust the taxable base upward (*see Transfer pricing in the Group taxation section for more information*).

P

Group taxation

The CIT law includes provisions on group taxation (i.e. in theory, a group of companies). If a group of companies meets certain conditions, it can be treated as a single taxpayer. However, the required conditions are extremely demanding and very few taxpayers of this type exist.

Transfer pricing

Transactions between related parties should be conducted in accordance with the arm's-length principle. The tax authorities may increase the taxable base if the pricing used between related parties differs from what would have been used between unrelated parties in a similar business transaction and the difference results in income being shifted from a Polish taxpayer to another entity (whether a Polish resident or not). Similar rules apply to transactions between Polish residents and the residents of tax haven countries. These transactions may be subject to the transfer pricing principles even if the parties thereto are not related. The CIT law also contains detailed requirements for transfer pricing documentation.

Poland

Transfer pricing regulations are currently undergoing major changes. As of 2016, the biggest Polish capital groups (with consolidated revenues exceeding EUR 750 million) are obligated to provide, in Poland, information on their taxable income, tax paid, and their place of business unless the consolidating entity is a subsidiary of a foreign party. In this case, the obligation is shifted abroad.

As of 1 January 2017, taxpayers will be obligated to prepare expanded transfer pricing documentation covering not only the description of a transaction but also 'other events included in the accounting books' if they were agreed to by related parties and influence the taxpayer's taxable income or loss. If the taxpayer's revenue or expenses exceed EUR 10 million in the preceding financial year, the requirements increase such that the taxpayer will be obligated to provide a benchmarking study verifying the arm's-length character of related-party transactions. Furthermore, taxpayers whose annual revenues or expenses exceed EUR 20 million in the preceding financial year will also be obligated to provide documentation (masterfile) presenting the character of settlements from the group perspective. According to the new regulations, taxpayers whose revenue exceeds EUR 10 million will be obligated to attach to their tax return a summary of their related-party transactions using a special form.

Taxpayers can reduce the transfer pricing risk by applying for an advance pricing arrangement (APA). An APA decision shall be issued by the Minister of Finance in response to a taxpayer's application. An APA will obligate a taxpayer to follow a specified methodology when calculating the transfer prices applicable to transactions between related entities. In exchange, the tax authorities may not challenge the agreed upon methodology.

Thin capitalisation

As of 1 January 2015, new thin capitalisation rules became effective. The Polish thin capitalisation rules are now considerably stricter than the previous rules, in particular:

- Interest exceeding the debt-to-net equity ratio of 1:1 is non-deductible (the previous allowable ratio was three times share capital).
- The list of qualified lenders includes indirect shareholders with at least 25% of the borrower's shares (previously only direct shareholders and sister companies were treated as qualified lenders).
- Taxpayers are able to choose an alternative method that would limit interest deductibility to 50% of operational income and certain benchmark rates.
- Grandfathering rules apply to loans granted and cash physically transferred before 2015.
- Applicability of the grandfathering rules to loans with capitalised interest remains unclear.

Controlled foreign companies (CFCs)

As of 1 January 2015, CFC rules entered into force. An additional income tax is imposed on direct and indirect shareholders of companies deriving their income mainly (more than 50%) from so-called passive sources (i.e. dividends, income from alienation of shares and liabilities, interest, guarantees, intellectual property [IP] or industrial property rights [including the sale of these rights]). The regulation also applies to the income from business carried on through a PE situated abroad (additional tax will not be levied on taxpayers who already take into account profits of their PEs in determining the taxable basis for CIT in Poland).

The new tax regime affects taxpayers that are owners of foreign PEs, direct and indirect shareholders with the right to a minimum of 25% participation in foreign companies' income (in certain cases, the threshold will be calculated based on number of votes at shareholders' meetings or shareholding in the company's registered capital), as well as shareholders of companies registered in countries recognised as applying harmful tax competition.

Income of CFC companies/PEs derived from the sources listed above are taxable in Poland only if such companies/PEs are taxable at tax rates lower than 14.25% or the income is exempt from taxation in their jurisdictions (the CFC regulation does not affect the income derived from dividends that are tax exempt based on the EU Parent-Subsidiary Directive).

Under the new regime, income earned by CFC subsidiaries or PEs is subject to 19% CIT. As a general rule, taxpayers are allowed to decrease the tax due in Poland by the amount of tax already paid abroad by the CFC companies/PEs. The tax base is to cover the whole amount of income earned by the CFC companies/PEs (including the passive income and the income earned on the actual business) that can be allocated to the Polish shareholders. The tax base is calculated proportionally to the period in which particular taxpayers were foreign entity shareholders. If CFC companies are located in tax havens, the shareholders are to pay the tax on the whole amount of income earned by the CFC companies (independently of their actual share in the income).

Tax on gains from CFCs will not be levied only if the controlled corporation will perform actual economic activity, i.e.:

- Incorporation must correspond with an actual establishment intended to carry on genuine economic activities. In particular, the controlled corporation should physically exist in terms of premises, staff, and equipment.
- CFC does not create an artificial arrangement without a link with economic reality.
- There is proportionality between the actual economic activities carried out by the controlled corporation and the extent to which a corporation exists in terms of premises, staff, and equipment.

Tax credits and incentives

Foreign tax credit

Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland. In all other cases (in particular, when the income is not covered by any treaty), Poland uses the ordinary credit method to avoid double taxation. Therefore, a Polish resident is liable for income tax imposed on its worldwide income, but the tax is proportionately reduced by the income tax paid abroad.

Special Economic Zones (SEZs)

Polish legislation provides investment incentives related to business activities carried out in 14 zones defined as SEZs. A business entity can benefit from tax incentives, provided that the entity obtains a permit from the Ministry of Economic Development to conduct business activities there and meets other legal requirements. Note that a CIT credit applies only to income earned on activity conducted within the territory of SEZs and covered by permit.

In general, the amount of the tax incentive depends on project location and size of the enterprise. For large enterprises, it can be 15% to 50% of eligible expenditures (i.e. investment expenditures or two-year labour costs). In other words, the CIT credit allows the investor to avoid paying income tax up to the limit calculated on the basis of eligible expenditures and state aid intensity (percentage as above). In case of investment valued PLN 20 million and intensity aid of 40%, the investor would be entitled not to pay tax due up to PLN 8 million. If the available limit of the tax credit exceeds the annual tax due generated on SEZ activity, the excess may be utilised in the following tax years. Consequently, in the case of significant investments, it is possible for businesses that run activities in the SEZs to enjoy exemption from income tax for a considerable period.

Poland

According to current regulations, the deadline for utilising the available tax credit is the end of 2026 (previously 2020).

Note that in the case of small enterprises, the limit of the tax credit may be increased by 20%. In the case of medium-sized enterprises, the limit of the tax credit may be increased by 10%.

Tax relief for research and development (R&D)

Since 1 January 2016, entrepreneurs have gained the possibility of a tax deduction from 110% to 130% of costs incurred for R&D. The value of the deduction varies depending on the size of the company and type of eligible costs.

To benefit from the tax relief, each entity needs to perform R&D works and record the eligible costs in separate accounts. It is not important whether the R&D works end with success or the level of innovativeness of future effects of those works. Tax relief is also allowed for qualifying projects in progress (e.g. projects launched in previous years).

According to current plans (March 2016), the level of tax relief in 2017 should be increased to 130% to 150% of costs incurred. Unofficially, the government plans to increase those levels up to the maximum of 200%, which may potentially happen from the beginning of 2018.

Withholding taxes

Domestic provisions: General rules

The general domestic WHT rate for dividends is 19%. Dividends also encompass income from liquidation of a company and the income from the redemption of shares (with the exception of gain from voluntary redemption, which is treated as a capital gain subject to the 19% CIT rate in Poland if the gain is realised by a taxpayer from a non-treaty country or the treaty includes a so-called real estate clause).

The general WHT rate on interest and royalties paid to non-residents is 20% (10% regarding services of sea or air transportation). These WHT rates may be reduced by DTTs.

There is also a 20% WHT on payments made to non-residents for intangible services (such as consulting services). However, if a payment is made to a country that has a DTT with Poland, this tax may be avoided with the completion of certain minimal administrative formalities. Few treaties treat payments for technical services as royalties (e.g. India).

Special treatment: EU Directives

The CIT law provisions and certain EU Directives provide special treatment for dividends, interest, and royalties paid to numerous European countries.

In general, the transitional rules on interest and royalty payments paid by Polish corporate residents to associated EU or EEA companies, as well as the full exemption after 1 July 2013, only apply to interest and royalty payments between associated companies (parent-subsidiary relationships or sister-sister relationships) in which capital involvements are significant, i.e. the paying company owns or is owned at least 25% by the company receiving interest or the company that pays interest and the company that receives interest are owned at least 25% by the same parent company. Shareholding should be kept for a minimum of two consecutive years.

Dividends paid to corporate residents of EU and EEA countries are exempt from WHT, subject to certain conditions specified in the CIT law. The basic requirement is that the

foreign beneficiary holds at least 10% of the shares in the Polish company for a minimum of two consecutive years.

In relation to all given payments (i.e. dividends, interest, royalties), the condition regarding holding shares is also fulfilled if two years pass after the day of the dividend/interest/royalty payment. If the period is interrupted afterwards, the company is obligated to pay the tax at the standard rate with interest.

Note that several additional conditions have to be met for the reduced rate/exemption from the WHT based on the Directive to be applied (e.g. the company receiving the dividend/interest/royalty cannot be exempt from tax on all its income, regardless of its source; the recipient has to have ownership title to the shares in the Polish company).

Additionally, the CIT law states that in order to enjoy the exemption from WHT on dividends and decreased WHT rate on interest and royalties, based on the Directives' provisions, the relevant DTT or other agreement concluded by Poland should allow exchange of tax information between the tax authorities of Poland and the country of the payment recipient.

Given the fact that Poland did not conclude a DTT with Liechtenstein, payments made to tax residents of Liechtenstein should not benefit from the Directive.

Treaty rates

If EU special rules do not apply, the domestic WHT rates can be decreased by a DTT concluded between Poland and the payment recipient's country of residence if certain administrative conditions are met (i.e. the payer obtains a valid certificate of a fiscal residence of the payment recipient/beneficial owner).

The following table lists the WHT rates as provided in the treaties concluded by Poland. Notably, the following table shows only rates that result from general treaty provisions; the treaties themselves occasionally include special provisions (applicable in special circumstances or to special entities) that provide lower WHT rates than the ones listed.

Furthermore, if a treaty rate is higher than a domestic one, the latter should apply.

Notes

- When the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends.
- When interest is paid to the government, the central bank of the state, including local authorities or other government bodies.
- When the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
- When interest is paid to the government, a political subdivision, or a local authority in connection with:
 - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
 - a sale on credit of any industrial, commercial, or scientific equipment, or
 - any loan granted by a bank.
- When the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends.
- When the interest is paid:
 - to the Central Bank of Poland
 - to the Central Bank of Bangladesh
 - to the government of the Republic of Poland or the government of the Republic of Bangladesh, or
 - in respect of a loan made or guaranteed or insured by the government of the other state, or any agency including a financial institution owned or controlled by the government.
- When the beneficial owner is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends.
- When the beneficial owner is a company (other than a partnership):
 - that directly holds at least 25% of the capital of the company paying the dividends or
 - that directly holds at least 10% of the capital of the company paying the dividends, and the value of investments in the company is at least EUR 500,000 or is equal to the amount in the other currency.
- When interest is paid:
 - on a loan granted, guaranteed, or insured, or a credit granted, guaranteed, or insured, by a general system organised by the state, including political subdivisions or local authorities for purposes of promoting exports
 - on a loan of whatever kind, except in the form of bearer securities, granted by a banking company, or
 - to other states, including political subdivisions and local authorities.
- When interest is paid to the government, including local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government.
- When interest is paid in respect of a loan made, guaranteed, or insured by the state or agreed public body.
- Copyright royalties and other similar payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work (not including royalties in respect of motion picture films and works on film or videotape for use in connection with television).
- When the beneficial owner is a company that directly controls 20% of the voting stock of the company paying the dividends.
- For the use of, or the right to use any industrial, commercial, or scientific equipment.
- When interest is paid:
 - to the government, a local authority, and the central bank or any financial institution wholly owned by that government or
 - to the other resident of the other state with respect to debt-claims indirectly financed by the government of the other state, a local authority, and the central bank or any financial institution wholly owned by the government.

16. For the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films, and films or tapes for radio or television broadcasting, or any patent, know-how, trademark, design or model, plan, secret formula, or process.
17. The Protocol of 22 March 2012 has entered into force. The Protocol introduces a maximum 5% rate of WHT on dividends and exempts dividends paid to an immediate parent company (other than partnership) that owns at least 10% of the capital of the company paying the dividend.
18. When the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends.
19. When the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends, where such holding is being possessed for an uninterrupted period of no less than one year and the dividends are declared within that period.
20. When the beneficial owner is a pension fund or other similar institution providing pension schemes in which individuals may participate in order to secure retirement benefits, when such pension fund or other similar institution is established, recognised for tax purposes and controlled in accordance with the laws of the other state.
21. When interest is paid:
 - on a loan of whatever kind granted, insured, or guaranteed by a financial institution owned or controlled by the state
 - in connection with the sale on credit of any industrial, commercial, or scientific equipment
 - in respect of a bond, debenture, or other similar obligations of the government of the state, or of a political subdivision or local authority, or
 - to the other state, or to a political subdivision or local authority.
22. When interest is paid to the government of the other state, including local authorities and the central bank.
23. When the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
24. When interest is paid to the government of the other state, including political subdivisions and local authorities, the central bank, or any financial institution owned by the government or on loans guaranteed by the government.
25. From copyright of literary, artistic, or scientific work.
26. When the beneficial owner is the government of the other state or central bank.
27. When the interest, subject to certain exceptions related to silent shareholders, is paid:
 - to the government of Poland or Germany on a loan of whatever kind granted, insured, or guaranteed by a public institution for purposes of promoting exports
 - in connection with the sale on credit of any industrial, commercial, or scientific equipment
 - in connection with the sale on credit goods between companies, or
 - on any loan of whatever kind granted by a bank.
28. If the following conditions are met:
 - Interests paid to:
 - the government, a political sub-division, or a local authority of the other contracting state or
 - the central bank of other contracting state.
 - When the beneficial owner is a resident of the other contracting state and is derived in connection with a loan or credit extended or endorsed by:
 - Bank Handlowy (in scope of financing export and import) - for Poland
 - the Export-Import Bank of India (in scope of financing export and import) - for India
 - any institution in the other contracting state in charge of public financing of external trade, or
 - any other person, provided that the loan or credit is approved by the government of the first mentioned contracting state.
29. When the beneficial owner is the government, ministry, other governmental institution, municipality, central bank, or any other bank wholly owned by the government of the other contracting state.
30. When the beneficial owner is a resident of the other contracting state and directly holds at least 25% of the voting power of the company paying the dividends.
31. Interest paid in connection with:
 - the sale on credit of any industrial, commercial, or scientific equipment
 - the sale on credit of any merchandise by one enterprise to another, or
 - on any loan of whatever kind granted by the bank.
32. When the beneficial owner is a company that directly holds at least 15% of the capital of the company paying the dividends.
33. If the following conditions are met:
 - When the payer of interests is the government or contracting state or a local authority of thereof.
 - Interest is paid to the government of other contracting state or local authority thereof (including financing institutions) wholly owned by other contracting state or local authority thereof.
 - Interest is paid to any other entity, including financial institutions, in relation to loans made in application of an agreement concluded between governments of contracting states.
34. When beneficial owner is the government of other contracting state, including local authorities thereof, the central bank, any financial institutions controlled by that government or any resident of the other contracting state with respect to debt-claims, guaranteed or indirectly financed by institutions mentioned above.
35. For payments connected with copyrights, literary, artistic, and scientific activity, including payments connected with films for cinemas and films and tapes for TV.
36. When the beneficial owner is a company that directly or indirectly holds, at least 20% of the capital of the company paying the dividends.
37. When interest is paid to the government or local authorities.
38. When interest:
 - arising in contracting state and received by the government of the other contracting state, including political subdivision or a local authority thereof or the central bank of that other contracting state
 - arising in contracting state is paid in respect of loans and credits made or guaranteed:

- by the Bank Handlowy - for Poland
 - by the Export-Import Bank of Korea and Korea Development Bank - for Korea
 - is paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or
 - is paid in connection with the sale on credit of any merchandise by one enterprise to another.
39. Interest paid to government or central bank.
40. When the beneficial owner is:
- the government of the other contracting state, entity, or any governmental institution or
 - a company that is a resident of the other contracting state and at least 25% of its capital is directly or indirectly owned by the entities mentioned above.
41. If the following conditions are met:
- When the beneficial owner is:
 - the government of the other contracting state, entity, or governmental institution or
 - a company that is a resident of the other contracting state and at least 25% of its capital is owned directly or indirectly by the entities mentioned above.
 - When interest is paid in connection with loans guaranteed by the entities mentioned above.
42. When interest is paid:
- to the government, including the local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government or
 - to the resident in the other contracting state.
43. If the following conditions are met:
- When the beneficial owner is other contracting state.
 - When interest is paid in connection with loans and credits granted by bank.
44. Dividends paid by:
- a resident of Poland to a resident of Malaysia who is subject to Malaysian tax in respect thereof or
 - a resident of Malaysia to a resident of Poland who is subject to Polish tax in respect thereof.
45. Interest paid to resident of Poland on an approved loan or a long-term loan.
46. Royalties paid to resident of Poland by resident of Malaysia and approved by the competent authority of Malaysia.
47. If the following conditions are met:
- When the beneficial owner is:
 - a contracting state, a political subdivision, or a local authority, or The National Bank of Poland or Banco de Mexico or
 - a recognised pension or retirement fund provided that its income is generally exempt from tax in this state.
 - When interest:
 - is paid by any of entities mentioned above
 - arises in Poland and is paid in respect of a loan for a period not less than three years granted, guaranteed, or insured by Banco de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C. or Banco Nacional de Obras y Servicios Publicos S.N.C., or
 - arises in Mexico and is paid in respect of a loan for a period not less than three years granted, guaranteed, or insured by PKO S.A., Corporation of Credit Insurance, and Bank Handlowy in Warsaw.
48. If the following conditions are met:
- When the beneficial owner is a bank or insurance company.
 - When interest is derived from bonds and securities that are regularly and substantially traded on a recognised securities market.
49. When dividends are paid to the company that directly holds at least 10% of the capital paying the dividends on the day they are paid and has done (or will do) so for an interrupted 24-month period from which that date falls.
50. When interest is paid:
- by a resident of Pakistan to a Polish company or enterprise on loans approved by the Ministry of Finance of the government of Pakistan
 - to the State Bank of Pakistan from sources in Poland, or
 - to Bank Handlowy in Poland from the sources in Pakistan.
51. For payments of any kind received in consideration for the use of, or the right to use:
- any copyright, patent, trademark, design or model, plan, secret formula, or process
 - an industrial, commercial, or scientific equipment, or
 - motion picture films, and works on films and videotapes for use in connection with television.
52. For payments received in consideration of technical know-how concerning industrial, commercial, or scientific experience.
53. Interests paid in respect of:
- a bond, debenture, or other similar obligations of the government, state, political subdivision, or local authority thereof or
 - a loan or credit extended, guaranteed, insured, or refinanced by:
 - Central Bank of Philippines - for Philippines
 - Central Bank of Poland - for Poland, or
 - other lending institutions as specified and agreed in letters of exchange between competent authorities of the contracting states.
54. When dividends are paid to the company that directly holds at least 25% of the capital stock of the company paying the dividends for an uninterrupted 24-month period prior to the payment.
55. If the following conditions are met:
- When the debtor of such interests is the government, a political subdivision, or local authority.
 - When the interest is paid to the government of other contracting state, a political subdivision, or local authority thereof, or an institution or body in connection with any financing granted by them under an agreement between the governments of the contracting states.

Poland

- Loans or credit made on central banks of contracting states and any other financial institution controlled by the state and financing external business that may be agreed upon between the competent authorities of the contracting states.
- 56. Interests paid to government, administrative, territorial, or the central bank.
- 57. Dividends paid by:
 - the company that is a resident of Singapore to a resident of Poland (as long as Singapore does not impose a tax on dividends in addition to the tax chargeable on the profits or income of a company) or
 - to government of either contracting state with respect to shares in joint stock companies of that other state.
- 58. Interest paid to government.
- 59. Interests paid to government, local authorities, or the central bank.
- 60. Interests:
 - received by any banking institution that is a resident of contracting state
 - derived from contracting state of the other contracting state either directly or through any agency, or
 - accruing to any company, partnership, or other body of persons resident in the contracting state for any loans in money, goods, and services or in any other form, granted by them to the government of the other contracting state, or to a state corporation, or to any state institution, or to any other institution, to the capital of which, the other contracting state has made any contribution, or to a credit agency, or an undertaking in that other contracting state with the approval of the government of the same state.
- 61. For payment in consideration, for the use of, or the right to use, any copyrights or cinematograph films.
- 62. As long as Switzerland will not tax royalties paid to foreign recipients, the payments are taxed only in the country of residence of the recipient (currently there is no WHT in Switzerland).
- 63. If the following conditions are met:
 - When recipient is a contracting state, or one of its local authorities, or the statutory body of either, including the central bank; or when interests are paid by a contracting state, or one of its local authorities, or the statutory body of either.
 - Such interest is paid in respect of any debt-claim or loan guaranteed, insured, or supported by a contracting state or another person acting on state's behalf.
- 64. Payments payable to contracting state or a state owned company in respect of tape or films.
- 65. Royalties made as consideration, for the alienation, or the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic films or tapes for television or broadcasting.
- 66. When the beneficial owner is the government or a government institution.
- 67. When dividends are paid to a company that is the resident of the other contracting state and that directly holds at least 10% of the capital, paying the dividends on the day they are paid and has done (or will do so) for an uninterrupted 24-month period from which that date falls.
- 68. When interests are paid to the government, a political subdivision, or a local authority in connection with:
 - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
 - the sale on credit of any industrial, commercial, or scientific equipment, or
 - any loan granted by a bank.
- 69. When the beneficial owner is a company that directly holds at least 10% of the outstanding shares of the voting stock of the company paying the dividends.
- 70. When the beneficial owner is a company that directly holds at least 20% of the capital of the company paying the dividends.
- 71. When the beneficial owner is:
 - the government or a local authority or
 - the National Bank of Poland or the Central Bank of Uzbekistan Republic.
- 72. For payment of any kind, received in consideration, for the use of, or the right to use:
 - any patent, design or model, plan, secret formula, or process or
 - any information concerning industrial or scientific experience.
- 73. Treaty allows application of the domestic tax rate.
- 74. As long as Iceland does not levy tax at source of income, interest is taxable only in the contracting state of which the beneficial owner of the interest is a resident.
- 75. When interest is paid to the government, a political subdivision, or a local authority in connection with:
 - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
 - a sale on credit of any industrial, commercial, or scientific equipment
 - any loan granted by a bank
 - in respect of a bond, debenture, or other similar obligations of the government of a contracting state, or of a political subdivision or local authority thereof, or
 - to the other contracting state, or to a political subdivision or local authority thereof.
- 76. When the tax is charged by Poland.
- 77. When the dividends are paid by a company resident of Poland to a resident of Malta that directly holds at least 10% of the capital company paying the dividends on the day they are paid and has done so or will have done so for an uninterrupted 24-month period in which that date falls.
- 78. When the recipient is the beneficial owner.
- 79. According to the Protocol of 22 March 2012, which has entered into force, the maximum WHT rate on interest paid is 5%. However, when interest is paid to the government, including political sub-divisions and local authorities, the central bank, or any statutory body of the state with respect to loans or credits made or guaranteed by the government of the other state, including political sub-

- divisions and local authorities, the central bank, or any statutory body of the other state, it shall be exempt from tax in the first mentioned contracting state.
80. There is a WHT exemption on interest payable: (i) on any loan or credit granted by a bank; (ii) to the government of the other contracting state, including any political subdivision or local authority thereof, the central bank, or any financial institution owned or controlled by that government; or (iii) to a resident of the other state in connection with any loan or credit guaranteed by the government of the other state, including any political subdivision or local authority thereof, the central bank, or any financial institution owned or controlled by that government. The maximum rate of WHT on interest is 5%.
 81. The maximum WHT rate on royalties is 10%.
 82. The lower rate applies to fees for technical services.
 83. When interest is paid: (i) by the government of a contracting state, administrative subdivision, or local authority thereof; (ii) to the government of the other contracting state, administrative subdivision, or a local authority thereof; or (iii) to the central bank of the other contracting state or a corporate body (including financial institution) controlled or owned by that state, a political or administrative subdivision, or local authority thereof.
 84. If the recipient of the interest is the beneficial owner and interest is paid: (i) to the Republic of Poland or the State of Qatar; (ii) on a loan of whatever kind granted, insured, or guaranteed by a public institution for purposes of promoting exports; (iii) in connection with the sale on credit of any industrial, commercial, or scientific equipment; or (iv) on any loan of whatever kind granted by a bank.
 85. The treaty rate is 15% for all types of interest. However, by virtue of a most-favoured-nation clause of the protocol (and since the Chile-Spain treaty provides a reduced rate), the rate is reduced to 5% in respect of interest (i) paid to a bank or insurance company or (ii) derived from bonds or securities that are regularly and substantially traded on a recognised securities market.
 86. The general treaty rate is 15%. However, by virtue of a most-favoured-nation clause of the protocol (and since the Chile-Spain treaty provides a reduced rate), the rate is reduced to 10%.
 87. The Protocol of 22 March 2012 has not changed the WHT rate in relation to royalties; however, the beneficial owner clause was introduced. Additionally, the new DTT amends the definition of 'royalties'.
 88. When the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends, where such holding is being possessed for an uninterrupted period of no less than two years and the dividends are declared within that period.

Tax administration

Taxable period

The taxable period is the calendar year (between 1 January and 31 December). Companies are entitled to choose another (than calendar) fiscal year (e.g. between 1 April and 31 March).

Tax returns

The annual CIT return should be submitted to the tax office within three months following the end of the tax year.

Payment of tax

The same deadline as the CIT return applies to the settlement of the annual CIT liability. In financial terms, the final settlement is not significant since most of the annual liability is paid by CIT advances throughout the tax year.

The CIT advances should be paid for each month by the 20th day of the following month. Entities that started business activities (except for companies organised as a result of certain transformations) and entities whose gross sales revenue (including VAT) in the prior tax year did not exceed EUR 1.2 million are entitled to opt to make advance settlements on a quarterly basis (instead of a monthly basis).

Tax audit process

The tax authorities generally shall notify its intention to initiate a tax audit. The inspection shall be initiated not earlier than after seven days and not later than 30 days from the receipt of the notice.

The duration of all audits in one calendar year may not exceed the following:

- For micro entrepreneurs: 12 working days.
- For small entrepreneurs: 18 working days.
- For medium entrepreneurs: 24 working days.

Poland

- For large entrepreneurs: 48 working days.

Statute of limitations

Tax liability expires five years after the end of the calendar year in which the tax payment deadline passed. There are also situations when the statute of limitations can be suspended or interrupted (e.g. litigation).

Topics of focus for tax authorities

According to recent statements from the Ministry of Finance, the focus of the tax audit authorities is on transactions between related parties. Moreover, traditionally, tax audits usually cover:

- Validity of the VAT refund.
- Possibility to correct excise duty resulting from post-transaction rebate.
- Correctness of VAT returns concerning scrap sales.
- Correctness of settlements concerning the use of a trademark.

Other issues

United States Foreign Account Tax Compliance Act (US FATCA)

On 2 April 2014, the US Treasury announced that an intergovernmental agreement (IGA) was 'in effect' and, on 7 October 2014, the US Treasury and Poland signed and released the IGA. As of 4 May 2015, the President has signed the bill, which confirmed IGA ratification.

Significant developments

March 2016: 2016 State Budget Law published

Law 7-A/2016, dated 30 March 2016, approved the 2016 State Budget Law, which, in general, applies as of 31 March 2016. Several amendments to the tax law have been introduced, of which we highlight the following:

Corporate income tax (CIT)

- Participation exemption regime on dividends and capital gains: Increase to 10% (previously 5%) the minimum participation in the share capital or of the voting rights; decrease to one year the minimum holding period required (previously 24 months) (*see the Income determination section for more information*).
- Distribution of profits and reserves to non-resident entities: Increase to 10% (previously 5%) the minimum participation in the share capital or of the voting rights in a Portuguese subsidiary; decrease to one year the minimum holding period required (previously 24 months) (*see the Withholding taxes section for more information*).
- Carryforward of tax losses: Tax losses generated in tax years starting on or after 1 January 2017 can be carried forward for five years (currently 12 years).

Value-added tax (VAT)

- Supply of food (excluding certain beverages), including take away and home delivery meals: Subject to the intermediate rate from 1 July 2016 onwards (currently subject to the standard rate).

Transfer pricing

- Country-by-country (CbC) report: Applicable to entities belonging to an economic group with an annual consolidated revenue in the preceding tax year of at least 750 million euros (EUR); the report should be filed by the end of the 12th month following the end of the tax year to which it relates.

Legislative authorisations

- Patent box regime: The government was granted authorisation to revoke the current regime, which shall apply only to patents, industrial designs, and models registered up to 30 June 2016 (the respective tax benefits shall apply until 30 June 2021). The new regime shall foresee a 50% relief from taxation on income arising from patents, industrial designs, and models in respect of research and development (R&D) activities developed internally (R&D activities contracted from third parties will no longer qualify). The tax benefit will be capped at a proportion of the expenses incurred (an additional deduction of 30% of the cap will be available under certain conditions).

Portugal

- Mandatory automatic exchange of information regarding financial accounts: The government was granted authorisation to transpose into domestic law the latest amendment to Council Directive 2011/16/EU, dated 15 February 2016, on the matter of administrative cooperation on tax matters. This latest amendment foresees, among other situations, mandatory automatic exchange of information regarding account holders, account number and balance, and reporting financial institution.

February 2016: Transposition of amendment to European Union (EU) Parent/Subsidiary Directive (EU General Anti-avoidance Rule [GAAR])

Law 5/2016, dated 29 February 2016, amends the CIT Code in order to reflect the latest amendment to Council Directive 2011/96, dated 30 November (Parent/Subsidiary Directive), as per Council Directive 2015/121/EU, dated 27 January. The amendment concerns the introduction of a common minimum anti-abuse rule in case of profit distributions within the European Union, European Economic Area (EEA) member states, Switzerland, and countries with which Portugal has signed a tax treaty that foresees exchange of information.

Under the amendment introduced, the exemption from withholding tax (WHT) shall be denied in case of an arrangement or series of arrangements which main purpose or purposes is to obtain a tax advantage that defeats the object and purpose of eliminating double taxation on profits, in case such arrangement or series of arrangements is not regarded as genuine, all facts and circumstances considered. For completeness, an arrangement or series of arrangements is not regarded as genuine if it is not based on valid economic reasons and has no economic reality.

The same amendment was included in the Portuguese participation exemption regime applicable to dividends and capital gains realised by Portuguese tax resident entities.

July 2015: New Madeira International Business Centre (MIBC) special tax regime published

Law 64/2015, dated 1 July 2015, approved the new special tax regime of the MIBC. The new MIBC special tax regime applies as of 1 January 2015. Entities licensed until 31 December 2020 can benefit, until 21 December 2027, from a reduced CIT rate of 5% on income derived from transactions with non-resident entities. Other tax benefits are also available.

Taxes on corporate income

Resident companies in Portugal are taxed on their worldwide income.

There is an optional regime to exclude from taxation the profits and losses allocated to a foreign permanent establishment (PE) of a Portuguese company. The regime applies provided that (i) the profit allocated to that PE is subject to and not exempt from a tax foreseen in Article 2 of the EU Parent/Subsidiary Directive (Council Directive 2011/96/EU), or a tax similar to the Portuguese CIT where the legal rate is not lower than 60% of the standard CIT rate, and (ii) the PE is not located in a black-listed jurisdiction. The regime is not applicable to the profit allocated to the foreign PE up to the amount of the losses allocated to that PE that have been taken into account by the Portuguese taxpayer when computing the respective taxable income of the previous 12 tax years in case of losses generated in tax years starting on or after 1 January 2016. In case of tax years starting on or after 1 January 2017, the period to consider shall be five tax years (12 tax years in case of small and medium-sized companies). This is an optional regime that must cover, at least, all the PEs located in the same jurisdiction, and is mandatory for a minimum three-year period.

CIT is also applicable to Portugal-source income attributable to a PE of a non-resident company in Portugal. Special WHT rates apply to income generated in Portugal that is

attributable to non-residents without a PE in Portugal (see the *Withholding taxes section for more information*).

A flat CIT rate of 21% applies on the global amount of taxable income realised by companies resident for tax purposes in Portugal mainland or in the Autonomous Region of Madeira (also applicable to Portuguese PEs of foreign entities).

A reduced CIT rate of 17% applies to small and medium-sized companies on the first EUR 15,000 of taxable income (the standard CIT rate shall apply on the excess). Reference is made to the concept of micro, small, and medium-sized companies as foreseen in the EU Commission Recommendation 2003/361, concerning the definition of micro, small, and medium-sized enterprises.

Entities that do not carry out a commercial, industrial, or agricultural activity as their main activity are subject to a 21% CIT rate on the global amount of their taxable income.

A lower CIT rate of 16.8% applies to companies that are tax resident in the Autonomous Region of Azores, including PEs of foreign entities registered therein.

Surtaxes

The following surtaxes may also apply:

- A local surtax (*Derrama*) of up to 1.5% of taxable income, prior to the deduction of any available carryforward tax losses, is levied in certain municipalities. The local surtax is assessed and paid when filing the CIT return.
- A state surtax (*Derrama Estadual*) applies (prior to the deduction of any available carryforward tax losses) at the following rates:
 - 3% applicable to the taxable profit exceeding EUR 1.5 million and up to EUR 7.5 million.
 - 5% applicable to the taxable profit exceeding EUR 7.5 million and up to EUR 35 million.
 - 7% applicable to the taxable profit exceeding EUR 35 million.

The state surtax is levied on resident taxpayers carrying on commercial, industrial, or agricultural activity and by non-residents with a PE in Portugal. The state surtax is paid in three instalments.

A regional surtax (*Derrama Regional*) applies in the Autonomous Region of Madeira on the same terms as the state surtax.

Autonomous taxation

Autonomous taxation applies at different rates on certain expenses incurred by entities subject to CIT. It is self-assessed in addition to CIT (even if no CIT is due) at the following rates:

- Representation and entertainment expenses: 10%.
- Mileage allowance: 5%.
- *Per diem* allowance: 5%.
- Non-documented expenses: 50% (70% for partially or fully exempted taxpayers).
- Company car expenses (including depreciation, rentals, leasing, insurance, maintenance, repairs, fuel, and taxes), except fully electric cars, vehicles allocated to public transport, or vehicles that are taxed as income in kind for personal income tax (PIT) purposes, depending on the acquisition cost and regardless of the year of acquisition:
 - Acquisition cost lower than EUR 25,000: 10%.
 - Acquisition cost between EUR 25,000 and EUR 35,000: 27.5%.
 - Acquisition cost of EUR 35,000 or more: 35%.

Portugal

- Dividends distributed to wholly or partially exempt taxpayers regarding participations held for less than one year: 23%.
- The total amount of the expenses incurred with any compensation paid as a result of the termination of functions of managers or board members if not related to the productivity targets previously established under the existing labour relation; or the amount that exceeds the remuneration that would be received by the manager or the board member until the term of the labour agreement, in case of redundancy prior to that term; or, in all cases, if the liability for the payment is shifted to another entity: 35%.
- The total amount of the expenses incurred with bonuses paid to managers or board members if the respective amount corresponds to more than 25% of the annual salary and exceeds EUR 27,500: 35%.

All of the above-mentioned rates of autonomous taxation are increased by 10% if the taxpayer has tax losses in the tax year in which the expenses are incurred.

Corporate residence

A resident company is one whose head office or effective management is located in Portugal.

Permanent establishment (PE)

Under Portuguese tax law, any fixed place of business in Portugal through which the business of an enterprise is wholly or partly carried on is deemed to constitute a PE in Portugal.

A fixed place of business comprises, among others, a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, and also a building site or a construction or installation project if it lasts more than six months (time period may differ considering the applicable tax treaty).

A PE may also be deemed to exist in case of a person (a dependent agent), which is not an independent agent, acting, in the Portuguese territory on behalf of a company, with powers to intermediate and conclude binding contracts for that company, within the scope of its business activity.

No PE should exist where a fixed place of business in Portugal is used solely for carrying out ancillary or preparatory activities, or, in the case of a company, carries out its activities in Portugal through a broker, general commission agent, or other agent of an independent status, acting in the normal course of its business, bearing all related business risks.

Additionally, the term PE shall be deemed not to include the following actions:

- Use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display, or delivery.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise.
- Maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise, or of collecting information, for the enterprise.
- Maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character.

- Maintenance of a fixed place of business solely for any combination of activities mentioned above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)

VAT rates

There are three VAT rates: the standard rate of 23% (22% in the Autonomous Region of Madeira; 18% in the Autonomous Region of the Azores), the intermediate rate of 13% (12% in Madeira; 9% in the Azores), and the reduced rate of 6% (5% in Madeira and Azores).

The intermediate rate applies to supplies of some foodstuffs and to admissions to concerts, shows, theatre, cinemas, circus, and bullfighting. From July 2016 onwards, the intermediate rate will also apply to pre-cooked meals, in ready-to-eat and take away or home delivery regimes, and to food and beverage services rendered, excluding alcoholic beverages, soft drinks, juices, nectars, and carbonated water, or added carbon dioxide or other substances.

The reduced rate applies to the supplies of some basic foodstuffs, periodical publications, books, pharmaceutical products, hotel accommodation, agricultural goods, and passenger transport.

Exports and intra-EU supplies of goods are zero-rated.

Supplies of goods

Supplies of goods are subject to VAT in Portugal if the goods are located in Portugal at the moment their transport or dispatch to the customer begins. If the goods are located in Portugal and there is no transport or dispatch, then supplies of the goods are subject to VAT at the moment they are put at the disposal of the customer.

Supplies of services

Supplies of services are subject to VAT in Portugal whenever: (i) acquired by taxable persons that have their business, a fixed establishment, domicile, or residence in Portugal to which the services are provided (B2B rule) or (ii) supplied to non-taxable persons if the provider has established its business, a fixed establishment, domicile, or residence in Portugal from where these services are provided (B2C rule).

Regardless of the place where the service provider and the acquirer are established, and of the acquirer being a taxable person, the supply of the following services is subject to VAT in Portugal if physically carried out in Portugal:

- Services connected with immovable property in Portugal.
- Passenger transport for the distances covered in Portugal.
- Admission to cultural, artistic, scientific, sporting, educational, entertainment, or similar events in Portugal.
- Restaurant and catering services in Portugal.
- Short-term hiring of a means of transport (up to 30 days, for boats up to 90 days) if the means of transport are put at the disposal of the customer in Portugal.

The supply of the following services is subject to VAT in Portugal if physically carried out in Portugal and if the acquirer is a non-taxable person:

- Transport of goods, other than intra-Community transport of goods, for the distances covered in Portugal.

Portugal

- Intra-Community transport of goods, if the place of departure is Portugal.
- Valuations of and work on movable property.
- Services and ancillary services relating to cultural, artistic, sporting, scientific, educational, entertainment, or similar activities, such as fairs and exhibitions, including the supply of services of the organisers; and hiring of a means of transport, other than short-term hiring, when the acquirer is established, has one's permanent address, or usually resides in Portugal.

Telecommunications, broadcasting, television, and electronic services supplied to non-taxable persons are taxed in Portugal when the customer, a non-taxable person, is established, has one's permanent address, or usually resides herein.

Customs duties

Customs duties are regulated by the Community Customs Code. Therefore, the rules foreseen for the import and export of goods in Portugal are similar to the rules applicable in other EU member states.

The customs duties' rates applied in Portugal vary according to the origin of the goods. There are several origin agreements that exempt from customs duties the importation of goods from certain countries or that determine reduced rates.

Excise duties

There are different types of excise duties, such as petroleum and energy products tax, alcohol and alcoholic beverages tax, tobacco tax, and vehicle tax.

The tax applicable to petroleum and energetic products depends on the goods supplied, and it varies between EUR 578.95 per 1,000 litres for leaded petrol and EUR 2.84/gJ for natural gas used as fuel.

Due to the Green Tax Reform, there is an adding factor to excise duties on petroleum and energetic products, which, in 2016, is 2.271654 for gasoline and 2.474862 for diesel. The adding factor is extensive to petroleum, coal, natural gas, coke, liquefied petroleum gas (LPG), and fuel oil.

The excise duty applies on the supply of natural gas to final consumers at the rate of EUR 0.30/gJ.

The tax applicable to alcohol and alcoholic beverages also depends on the type of good supplied, varying between EUR 7.98 per hectolitre for a certain type of beer and EUR 1,327.94 per hectolitre for spirits.

The tax applicable to tobacco (*ad valorem*) also varies in accordance with the type of product supplied, namely it varies between 17% of the sale price for cigarettes, 20% for fine-cut tobacco for the rolling, 25% for cigars and cigarillos, and 50% of the sale price for tobacco used in a water pipe.

The tax applicable to vehicles varies in accordance with the type of vehicle, the fuel used, and the cylinder of the vehicle. The higher taxation is applicable for cars used for the transport of passengers using petrol as fuel and the lower taxation is applicable for motorcycles.

An excise duty on consumption of electricity is due by producers, traders, self-producers, and consumers that buy electricity in organised markets. The tax applicable to electricity varies between EUR 1/kw to EUR 1.1/kw.

Property tax (*Imposto Municipal sobre Imóveis* or *IMI*)

IMI is a municipal property tax computed on the tax registration value (TRV) of urban and rural properties located in Portuguese territory. For urban properties, the TRV

is determined by means of a valuation, based on the type of property, calculated by reference to a formula based on objective criteria, such as the construction cost per square metre, area, age, construction quality, and comfort indexes. IMI is due by the real estate owner, the usufructuary, or the holder of the surface right of a real estate unit with reference to 31 December of the year that it concerns.

IMI is levied at the following rates, in addition to corporate or individual tax assessed on actual income generated by real estate:

Real estate type	IMI (%)
Urban real estate	0.3 to 0.45
Rural real estate	0.8
Real estate owned by residents in a black-listed jurisdiction (except individuals)	7.5

The list of countries, territories, and regions that provide a more favourable tax regime ('black-listed jurisdictions') is presented below:

- American Samoa
- Andorra (1)
- Anguilla (1)
- Antigua and Barbuda (1)
- Aruba
- Ascension Island
- Bahamas
- Bahrain
- Barbados
- Belize (1)
- Bermuda (1)
- Bolivia
- British Virgin Islands (1)
- Brunei
- Cayman Islands (1)
- Channel Islands (1, 2)
- Christmas Island
- Cocos (Keeling)
- Cook Islands
- Costa Rica
- Djibouti
- Dominica (1)
- Falkland Islands or Malvinas
- Fiji Islands
- French Polynesia
- Gambia
- Gibraltar (1)
- Grenada
- Guam
- Guyana
- Honduras
- Hong Kong
- Isle of Man (1)
- Jamaica
- Jordan
- Kingdom of Tonga
- Kiribati
- Kuwait
- Labuan
- Lebanon
- Liberia (1)
- Liechtenstein
- Marianas
- Marshall Islands
- Mauritius
- Monaco
- Montserrat
- Nauru
- Netherlands Antilles
- Niue Island
- Norfolk Island
- Pacific Islands
- Palau Islands
- Panama
- Pitcairn Island
- Puerto Rico
- Qatar
- Queshm Island
- Saint Helena
- Saint Kitts and Nevis (1)
- Saint Lucia (1)
- Saint Pierre and Miquelon
- San Marino
- Seychelles
- Solomon Islands
- St. Vicente and the Grenadines
- Sultanate of Oman
- Svalbard
- Swaziland
- The Maldives
- Tokelau
- Trinidad and Tobago
- Tristan da Cunha
- Turks and Caicos (1)
- Tuvalu
- United Arab Emirates
- United States Virgin Islands
- Uruguay
- Vanuatu
- Western Samoa
- Yemen Arab Republic

Notes

1. The Portuguese authorities have signed tax information exchange agreements (TIEAs) with these jurisdictions (in case of the Channel Islands, only with Guernsey and Jersey). The following TIEAs are in force: Andorra, Bermuda, Cayman Islands, Gibraltar, Isle of Man, Jersey, and Saint Lucia.
2. Alderney, Brechou, Great Sark, Guernsey, Herm, Jersey, Jethou, Lihou, and Little Sark.

IMI rates are annually increased three times when urban real estate is vacant or in ruins for a period of over one year.

Portugal

IMI exemptions and reductions

Urban real estate subject to urban rehabilitation

IMI exemption applies to urban real estate subject to urban rehabilitation for a period of three or five years, counted from the date of (i) issuance of the municipality's license or (ii) completion of the rehabilitation works.

Real estate part of a tourism complex granted with tourism utility

Real estate that is part of a tourism complex granted with tourism utility benefits from IMI exemption for a period of seven years.

Urban real estate intended for the production of energy from renewable sources

Urban real estate exclusively intended for the production of energy from renewable sources benefits from a 50% reduction of the IMI rate.

Other benefits of environmental nature attributed to real estate

By resolution of the municipal assembly, municipalities may determine a reduction of up to 15% of the IMI rate, applicable to urban real estate with energy efficiency.

Tax incentives for forestry activity

IMI exemption is applicable to rural real estate corresponding to forest areas covered by a forest intervention zone and to rural real estate intended for forestry exploitation under a forest management plan.

Tax regime for investment promotion (RFAI)

Companies with investments that qualify for the RFAI can benefit from an exemption or reduction from IMI for a period of up to ten years regarding real estate acquired and regarded as an eligible investment.

Property transfer tax (*Imposto Municipal sobre as Transmissões Onerosas de Imóveis* or IMT)

IMT is a municipal tax levied on the transfer for consideration of real estate located in the Portuguese territory. The tax is due by the acquirer at the rates shown below, and the taxable basis is the same as for IMI or the price agreed upon by the contracting parties, whichever is higher. Note that the acquisition of more than 75% of the share capital of a company incorporated as a limited liability company (*Sociedade por quotas*), which owns real estate located in Portugal, is subject to IMT.

Real estate type	IMT (%)
Rural real estate	5.0
Urban real estate (for residential purposes)	up to 6.0
Other urban real estate and other acquisitions for consideration	6.5
The acquirer is a tax resident in a black-listed jurisdiction (except individuals)	10.0

IMT exemptions

- Acquisition of properties for resale by real estate trading companies.
- Acquisition of properties intended for urban rehabilitation.
- Acquisition of property or autonomous fraction of urban property intended to install a tourism complex to which has been attributed tourism utility.
- Acquisition of real estate by Real Estate Investment Funds for Residential Letting (REIFRLs).
- Restructuring operations or cooperation arrangements.
- Acquisition of buildings classified as of national/public/municipal interest.
- Exemption or reduction of the IMT rate, regarding the acquisition of property that constitutes eligible investment under the RFAI.

Stamp duty

Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis. Important examples include the following:

Item	Stamp duty (%)
Loans (on the principal):	
With determined term, over one year	0.5 to 0.6
Current account/overdraft/credit with undetermined term or determined term under one year	0.04 per month or fraction
Credit to consumers:	
With a term up to one year/current account, overdraft, or other form of credit with undetermined term	0.07 per month or fraction
With a term equal to or higher than one year	0.9
With a term equal to or higher than five years	1
Guarantees:	
Undetermined/five or more years	0.6
Over one year	0.5
Under one year or with undetermined term	0.04 per month or fraction
Bank interest and fees	4
Insurance premiums	3 to 9
Real estate transfer for consideration or donation	0.8
Letting or sub-letting (applied on the amount of a month of rent)	10
Donations and inheritances	10
Sale of business as a going concern	5
Social game prizes (on the amount exceeding EUR 5,000)	20
Ownership, usufruct, or surface right of urban housing buildings whose tax registration value is equal to or higher than EUR 1 million (1)	1
Collective Investment Vehicles (CIVs) investing in money market instruments and deposits (quarterly, on net asset value)	0.0025
Other CIVs (quarterly, on net asset value)	0.0125
Repos	0.5

Notes

- The rates apply as follows:
 - 1% for urban housing buildings or building plots wherein house construction is authorised or intended, according to the current rules of the IMI Code.
 - 7.5% for buildings, regardless of their use, owned by companies resident in black-listed jurisdictions.

Stamp duty exemptions

Some acts are exempt from stamp duty, such as the ones mentioned below (the exemption may depend on certain requirements):

- Guarantees on stock exchange dealings regarding securities and derivatives.
- Transactions between financial institutions, when directly related to lending/security operations.
- Short-term treasury needs (less than one year) granted by venture capital companies to companies in which they hold a participation, granted by any company to companies dominated by them or with a shareholding with voting rights of at least 10% or with a purchase price of at least EUR 5 million, as well as to financing between companies in a dominant or group relationship.
- Short-term shareholders' loans (less than one year) in case of direct shareholding of 10% or more, held for one year or more.

Portugal

- Shareholders' loans, including the respective interest, not reimbursed before one year, when provided by shareholders, of at least 10%, of the share capital and as long as the shareholding is maintained for a consecutive period of one year, or since the incorporation of the subsidiary, provided that, in this case, the participation has been maintained during that period.
- Interest on loans for permanent housing.
- Free transfer of property to spouse, or *de facto* spouse, descendants, and ascendants.
- Mergers or cooperation operations.
- Warranties provided in favour of the state or social security institutions upon the payment of debt by instalments under enforcement procedures or relating to the recovery of tax and social security credits.
- Under the RFAI, companies are exempt from stamp duty on the acquisition of real estate property that constitutes relevant investment, according to the terms of this regime.
- Securities repos or similar rights exchanged in stock markets, as well as repo and fiduciary sales in guarantee, performed by financial institutions and intermediated by central counterparts, are also exempt from stamp duty.

Financial sector contribution

Portuguese headquartered credit institutions, Portuguese subsidiaries of foreign credit institutions, as well as branches in Portugal of foreign credit institutions, including EU residents, are subject to a financial sector contribution, applicable on a taxable base composed as follows:

- Base I: Liabilities less deposits included in deposit guarantee schemes, such as the Deposit Guarantee Fund, only to the extent that they are effectively covered; for this purpose, liabilities are defined as the set of elements accounted for in the balance sheet representing liabilities towards third parties, irrespective of their form or nature (excluding, amongst others, items accounted for as equity, liabilities for defined benefit retirement plans; provisions, liabilities concerning the revaluation of financial derivatives).
- Base II: The notional amount of off-balance sheet financial derivatives, excluding hedging derivatives and back-to-back derivatives.

The financial sector contribution is applicable at a maximum of 0.11% on Base I and at 0.00030% on Base II.

Payroll taxes

Social security contributions

Employers are required to make monthly social security contributions at the standard rate of 23.75% on the monthly gross remuneration of their employees.

Social security contributions are deductible for CIT purposes.

Branch income

The profits of a Portuguese branch are taxed on the same basis as corporate profits. Income remitted by a Portuguese branch to the foreign head office is not subject to taxation in Portugal.

Income determination

Taxable profit is based on accounting income adjusted according to specific provisions of the tax legislation, when applicable.

Inventory valuation

Inventories are valued at the lower of the following values: cost or net realisable value. The first in first out (FIFO) and average-cost methods of valuation are accepted. The last in first out (LIFO) method is not allowed.

Inventory adjustments are deductible for tax purposes on the amount accounted for in the tax year, capped at the difference between the acquisition or production value and, if lower, the net realisable value (duly documented) with reference to the balance sheet.

Capital gains

Under the participation exemption regime, capital gains and capital losses realised on the transfer of shares can be exempt from taxation. This rule applies to all types of Portuguese companies (holdings and operational companies) and includes capital gains on the transfer of shares derived from a non-tax neutral merger, division, transfer of assets, or exchange of shares, and also in case of a transfer of supplementary capital entries. The regime applies provided that, at the date of the transaction, the following requirements are met:

- The shares are held for a consecutive period of at least one year.
- The taxpayer directly, or directly and indirectly, holds at least 10% of the share capital or voting rights in the entity from which the shares are transferred.
- The taxpayer is not covered by the tax transparency regime (i.e. imputation of profits to individual or corporate shareholders, regardless of effective distribution).
- The entity from which shares are transferred is not resident in a black-listed jurisdiction.
- The assets of the entity from which shares are transferred are not directly or indirectly comprised of more than 50% of real estate located in Portugal and acquired on or after 1 January 2014 (except real estate allocated to an agricultural, industrial, or commercial activity that does not consist of buying and selling real estate).

This regime also applies to capital gains and capital losses realised by a Portuguese PE of:

- An EU resident entity, which complies with the requirements foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An EEA resident entity, subject to tax cooperation obligations similar to the ones established within the European Union, provided that the entity complies with requirements that are comparable to those foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An entity resident in a state with which Portugal has concluded a double tax treaty (DTT) (except if resident in a black-listed jurisdiction) that foresees exchange of information and is subject and not exempt in its state of residence from an income tax similar to the Portuguese CIT, which legal rate is not lower than 60% of the standard Portuguese CIT rate (meaning 12.6%).

Where the participation exemption regime on the transfer of shares does not apply, the positive net difference between capital gains and capital losses arising from the transfer of shares is taxed as part of normal income. The same applies on the disposal of tangible fixed assets, intangibles, biological assets, and investment properties. In certain circumstances, only 50% of the net gains on disposal of tangible fixed assets, intangibles, and biological assets is taxed as part of normal income, provided the sales proceeds are reinvested.

The regime also applies to capital gains and capital losses realised and related with shares held by a company with head office or place of effective management in Portugal that transfers its tax residence to another EU member state or to an EEA member state.

Portugal

Capital gains and capital losses are determined by the difference between the sales proceeds, net of related costs, and the acquisition value, net of impairment losses and tax deductible depreciation or amortisation, adjusted by the inflation index (in the case of at least two years of ownership).

Dividend income

Under the participation exemption regime, profits distributed to a Portuguese parent company are exempt from taxation, provided that the following requirements are met:

- The taxpayer directly, or directly and indirectly, holds at least 10% of the share capital or voting rights in the subsidiary.
- The shares are held for a consecutive period of at least one year (or maintained for that period).
- The taxpayer is not covered by the tax transparency regime.
- The subsidiary is subject to and not exempt from CIT, an income tax mentioned in Article 2 of the EU Parent/Subsidiary Directive (Council Directive 2011/96/EU), or a tax similar to CIT with a legal rate that is not lower than 60% of the standard CIT rate.
- The subsidiary is not resident in a black-listed jurisdiction.

This regime also applies to profits distributed to a Portuguese PE of:

- An EU resident entity, which complies with the requirements foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An EEA resident entity, subject to tax cooperation obligations similar to the ones established within the European Union, provided that the entity complies with requirements that are comparable to those foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An entity resident in a state with which Portugal has concluded a DTT (except if resident in a black-listed jurisdiction) that foresees exchange of information and is subject and not exempt in its state of residence from an income tax similar to the Portuguese CIT.

Law 5/2016, dated 29 February 2016, amended the CIT Code in order to deny the participation exemption regime on profits in case of an arrangement or series of arrangements which main purpose or purposes is to obtain a tax advantage that defeats the object and purpose of eliminating double taxation on profits, in case such arrangement or series of arrangements is not regarded as genuine, all facts and circumstances considered. For completeness, an arrangement or series of arrangements is not regarded as genuine if it is not based on valid economic reasons and has no economic reality.

Interest income

Interest income obtained by Portuguese taxpayers is taxed as part of normal income and taxed at the standard CIT rate. Any WHT incurred in interest income received is treated as a payment on account of the final CIT liability, refundable even if no CIT is due.

Foreign income

A Portuguese company is taxed on all its foreign income; however, there is an optional regime to exclude from taxation the profits and losses allocated to a foreign PE (*see the Taxes on corporate income section for more information*).

Taxes paid abroad can be offset against corresponding Portuguese tax (*see Foreign tax credit in the Tax credits and incentives section for more information*).

There are no provisions concerning tax deferral of income earned abroad.

Deductions

Depreciation and amortisation

The qualifying cost of an asset for tax purposes is the acquisition or production cost.

Depreciation must be computed by using the straight-line method or the declining-balance method. The latter cannot be applied to buildings, passenger vehicles, furniture, social welfare equipment, or second-hand assets.

Straight-line rates of depreciation are normally consistent with rates privately used by business and industry and are increased, for the purposes of applying the declining-balance method, by coefficients of:

- 1.5 if assets have a useful life of less than five years.
- 2 if useful life is five or six years.
- 2.5 for useful lives in excess of six years.

Different depreciation methods may be applied without previous approval from the Portuguese Tax Authority (PTA) (annual depreciation cannot, however, exceed the depreciation resulting from using either the straight-line or declining-balance methods).

Some examples relating to the maximum straight-line depreciation rate are as follows:

Type of asset	Depreciation rate (%)
Office building	2
Industrial building	5
Electronic equipment	20
Computers	33.33
Ordinary tool and paintings	25
Engines and machine tools	12.5
Office equipment	20
Furniture	12.5
Software	33.33
Passenger vehicles	25

Rates can be reduced by 50% in any one year at the taxpayer's option. If the reduction is more than 50%, the difference is allowed for tax purposes at a future date. A total of 60% of additional depreciation on revaluation of fixed assets, as permitted by law from time to time, is allowed for tax purposes.

Depreciation rates of tangible assets may be increased by 25% in the case of companies with a schedule of two shifts (for three shifts, 50%), given the faster deterioration of those assets.

Assets with an acquisition value lower than EUR 1,000 can be depreciated in the acquisition year, unless the assets are part of a set of elements that should be depreciated as a whole.

Depreciation of yachts and airplanes that are not essential for business activities is not allowed as a cost for tax purposes.

Depreciation of passenger cars and certain other vehicles on the part of their cost of acquisition that exceeds certain amounts (as defined by law), with reference to their acquisition value, is also disallowed as a cost for tax purposes. The following caps apply (i.e. disallowed cost above the values below):

Portugal

- EUR 29,927.87 of acquisition cost, in the case of vehicles acquired until 31 December 2009.
- EUR 40,000 of acquisition cost, in the case of vehicles acquired between 1 January 2010 and 31 December 2010.
- EUR 30,000 of acquisition cost, in the case of vehicles acquired between 1 January 2011 and 31 December 2011 (EUR 45,000 in the case of electric vehicles).
- EUR 25,000 of acquisition cost, in the case of vehicles acquired between 1 January 2012 and 31 December 2014 (EUR 50,000 in the case of electric vehicles).
- EUR 25,000 of acquisition cost, in the case of vehicles acquired from 1 January 2015 onwards (EUR 62,500 in the case of fully electric vehicles; EUR 50,000 in the case of hybrid plug-in vehicles; EUR 37,500 in the case of vehicles that use LPG or compressed natural gas).

Development expenses, patents, trademarks, licences, and similar rights may be amortised for tax purposes if acquired for a limited period of time.

The cost of acquisition of certain intangibles with unlimited life (i.e. trademarks, permits, production processes, models, and other industrial property rights) can be amortised for tax purposes over a period of 20 years.

Depreciation of non-consumable biological assets is tax deductible.

Expenses relating to assets generated internally are deductible for tax purposes in the tax year in which the cost is incurred.

Goodwill

Goodwill acquired as a result of a corporate restructure or business combination can be amortised for tax purposes over a 20-year period, except if related with shareholdings.

Start-up expenses

Start-up and research expenses are deductible for tax purposes in the respective tax year.

Limitation on the deductibility of financing expenses

Companies may only deduct net financing expenses up to the higher of the following limits:

- EUR 1 million or
- 30% of the earnings before depreciations, amortisation, taxes, and net financing expenses.

Under the transitional period, a 40% cap applies in 2016, until reaching 30% in 2017 and following years. In the cases where the taxable year is less than a calendar year, the EUR 1 million limit is reduced proportionally to the duration of the taxable year.

Besides Portuguese tax resident entities, PEs of non-resident entities are also covered by the scope of this rule. Entities subject to the supervision of the Portuguese Central Bank (*Banco de Portugal*) and the Portuguese Insurance and Pension Fund Supervisory Authority (*Autoridade de Supervisão de Seguros e Fundos de Pensões*), as well as Portuguese branches of financial entities or insurance companies resident for tax purposes in the European Union, are excluded from this rule.

No distinction is made between bank and intra-group financing, domestic or foreign financing (EU or non-EU).

Financing expenses considered as excessive (not deductible) in a certain fiscal year may be deductible in the following five fiscal years, provided that, together with the net financing expenses of that year, the above-mentioned limits are not exceeded.

Additionally, where financing expenses do not exceed 30% (or the applicable percentage) of the earnings before depreciations, net financing expenses, and taxes, the unused difference is added to the maximum deductible amount in the following five tax years, until its total deduction.

For the purposes of the regime, net financing expenses consist of, among others, any amounts due in connection to the remuneration of financing, including interest on overdraft facilities, short-term loans, bonds, financial expenses related to financial leases, or exchange losses, deducted from the profits or gains of the same nature.

Where the special regime of group taxation applies, there is the option to make the calculation considering the net financial expenses of the group and the sum of all the respective earnings before interest, taxes, depreciation, and amortisation (EBITDA).

Interest on shareholder loans

If the rate applicable to interest and other compensation regarding loans provided by the shareholders to the company is higher than the Euro Interbank Offered Rate (EURIBOR) 12-month rate rounded up with a spread of 1.5% (at the date the loan was granted), the amount paid in excess is not tax deductible. This rule does not apply when the shareholder is a resident of a tax treaty country or when the interest rate is at arm's length under the transfer pricing provisions.

In the case of small and medium-sized companies, shareholders' loans with an interest rate of the EURIBOR 12-month rate plus a spread up to 6% are tax deductible.

Bad debt

Impairment losses on doubtful debts are deductible for tax purposes when an insolvency or recovery has been requested or the credits have been claimed in court.

The annual amount of accumulated impairment losses on doubtful debts due for more than six months, with evidence that measures towards its perception were taken, is capped at the following percentages of the debts:

- More than 6 and less than 12 months: 25%.
- More than 12 and less than 18 months: 50%.
- More than 18 and less than 24 months: 75%.
- More than 24 months: 100%.

Amounts guaranteed by insurance or mortgage, or due or secured by the state, autonomous regions, or municipalities, or due by related parties (e.g. 10% shareholding) are not considered as doubtful debts, and the respective impairment loss is disallowed for tax purposes.

The ageing of bills of exchange is calculated from the date when the respective payment is due.

Uncollectable debts are allowed as tax deductible costs if supported under insolvency, recovery enforcement, or in an out-of-court conciliation procedure for the viability of insolvent companies or companies in a difficult economic situation (mediated by the Institute for the Support of Small and Medium-Sized Enterprises or IAPMEI). This rule applies to the amount of the uncollectable debts that were not deducted for tax purposes as impairment losses (or for which the amount was insufficient).

Charitable contributions

Donations to authorised charitable institutions are allowable at up to 0.8% of turnover, with the possibility of the cost being raised up to 150%. Donations to authorised cultural institutions are allowable at up to 0.6% of turnover, with the possibility of the cost being raised up to 130%.

Portugal

Donations to the state, municipalities, and foundations where the state or municipalities participate in the initial capital are fully deductible, with the possibility of the cost being raised up to 140%. Special application may be made by certain entities in order to be included under the referred regime.

Donations of computers, software equipment, training, and consultancy in the area of computers granted to the state, municipalities, foundations, museums as well as to authorised charitable and cultural institutions are allowable at up to 0.8% of turnover, with the possibility of the cost being raised up to 140%.

Vacation accrual

Vacation allowance is tax deductible in the year in which the benefit accrues, regardless of the year in which payment is made.

Pension expenses

Pension, invalidity, and health schemes are tax deductible up to a rate of 15% of annual staff expenses, provided that, among other conditions, they are available to all employees and the management and disposition of the benefits are outside the control of the taxpayer, such as under an insured scheme with vested benefits.

Fines and penalties

Fines and penalties for infractions that do not have a contractual nature, including late assessment interest, are disallowed for CIT purposes.

Taxes

All taxes other than CIT, autonomous taxation, state surtax (*Derrama Estadual*), and local surtax (*Derrama*) constitute a normal business expense.

Other significant items

The costs borne from the acquisition of social passes are regarded as tax-deductible costs to the extent the employer attributes them on a general basis.

Uninsured losses, including indemnities to third parties, are disallowed unless the risk could not be insured.

Non-documented expenses are not tax deductible and are subject to a 50% autonomous taxation for fully taxable entities.

Net operating losses

Tax losses generated in tax years starting on or after 1 January 2016 can be carried forward for 12 years. Tax losses generated in tax years starting on or after 1 January 2017 can be carried forward for five years. The deduction of carried forward tax losses is capped at 70% of the taxable income.

Carryback of losses is not allowed.

The tax losses carried forward are lost in case of a change in direct ownership of the company of at least 50% shareholding or voting rights (not applicable in case of changes within the same group of companies, under certain conditions).

In special cases of economical merits, the Ministry of Finance may authorise the use of tax losses upon a request filed by the taxpayer before those changes occur.

Payments to foreign affiliates

A Portuguese corporation is allowed to deduct royalties, interest, and other costs paid to foreign affiliates, provided the amounts are at arm's length. Service fees paid are allowed if there is adequate proof that the service was effectively rendered (an invoice is required in cases where the supplier of the goods or services is obligated to issue such

document; otherwise, other supporting documents are required) and has economic substance, as well as if the amount is at arm's length.

Payments to non-residents in a black-listed jurisdiction

Payments made or due, indirectly, to non-resident entities in a black-listed jurisdiction, when the taxable person has or should have had knowledge of the final purpose given to such payments, will be non-deductible for tax purposes, except if the taxpayer demonstrates that such charges relate to genuine transactions and are not of an abnormal or exaggerated amount. Such knowledge is presumed whenever there are special relations between the taxpayer and the entities in a black-listed jurisdiction or between the taxpayer and the legal representative, fiduciary, or intermediary.

Group taxation

Special regime for group taxation

Taxation under the special tax regime for groups of companies is available, upon the filing of a special form with the PTA, to companies with head office and effective management in Portugal.

The group taxation regime may apply, provided one of the companies directly or indirectly holds 75% or more of the statutory capital of the others and more than 50% of the voting rights.

Tax grouping generally enables the group companies to offset losses incurred by one company against profits of another company.

Tax losses obtained prior to the beginning of the tax grouping can be carried forward only against the particular company's taxable income (*for the carryforward of tax losses regime, see Net operating losses in the Deductions section*).

To be taxed under this regime, the group companies must meet the following conditions:

- Must be tax resident in Portugal (even if held through an EU or EEA group company).
- Must be subject to the normal regime of taxation at the highest corporate tax rate.
- Must maintain a minimum holding participation of 75%.
- All companies must be held by the parent company for more than one year (excluding newly incorporated companies).
- Cannot be dormant for more than one year.
- Cannot be dissolved or insolvent.
- Cannot have tax losses in the three years prior to the regime application, unless the companies have been held by the parent company for more than two years.
- Cannot have a tax period different from that of the parent company.

Additionally, the parent company:

- should not be controlled by any other Portuguese-resident company that fulfils the requirements to be the parent company and
- should not have renounced to the application of this regime in the three previous years.

When the regime comes to an end or when one company ceases to qualify for this regime, the tax losses obtained during the regime cannot be carried forward and deducted against future individual taxable income of the companies. The parent company is responsible for demonstrating that the requirements for the application of the group taxation regime are met.

Portugal

It is possible to apply the group taxation regime if the dominant company has its registered head office or place of effective management in an EU or EEA country (in the later case, provided there is administrative cooperation on tax matters similar to the one in place with the European Union). In addition, among others, the following requirements must be met:

- The dominant company owns the dominated companies for more than one year with reference to the date at which the regime starts to apply.
- The dominant company is not directly or indirectly 75% held by a Portuguese dominant company.
- The dominant company is subject and not exempt from a tax as per Article 2 of Council Directive 2011/96.
- The dominant company is incorporated as a limited liability company.

Transfer pricing

The PTA is entitled to adjust taxable income if the taxpayer and another individual or entity, due to their special relationship, have established particular conditions that diverge from the conditions normally agreed upon between independent entities and distort the results that would arise if those relations were at arm's length. Portugal's transfer pricing legislation broadly follows the Organisation for Economic Cooperation and Development (OECD) guidelines.

Companies with sales and other profits higher than EUR 3 million are required to prepare transfer pricing documentation, which should be filed with the PTA if requested. Penalties arise from non-compliance with this obligation.

An advance pricing agreement (APA) mechanism allows taxpayers and the PTA to establish agreements on a taxpayer's future transfer pricing policy. This aims to guarantee compliance with the arm's-length principle. This regime applies to transactions carried out with related parties and between a PE and the respective head office.

The conclusion of an APA implies the payment of a charge calculated with reference to the taxpayer's turnover, capped at EUR 35,000. This charge is reduced by 50% in the case of a renewal or revision of an existing APA.

The assessment of an APA procedure takes 180 days for unilateral APAs, and 360 days for bilateral or multilateral APAs. This period is reduced to 100 business days for APAs concluded in connection with a relevant investment project in Portugal, as foreseen in the Tax Investment Code (*Código Fiscal do Investimento*).

For the PTA to confirm compliance of the transfer pricing method(s) with the terms and conditions set out in the APA, the taxpayer must prepare an annual report. The report must be made available to the PTA before the last business day of May in the year following that in which the transactions took place (i.e. when the tax year corresponds to the calendar year). Failure to comply invalidates the APA.

The 2016 State Budget Law introduced the country-by-country (CbC) report. It applies to entities belonging to an economic group with an annual consolidated revenue in the preceding tax year of at least EUR 750 million. The report should be filed by the end of the 12th month following the end of the tax year to which it relates (starting in 2016).

Thin capitalisation

Thin capitalisation rules have been revoked following the adoption of rules for the limitation on the deductibility of financing expenses. *See Limitation on the deductibility of financing expenses in the Deductions section for more information.*

Controlled foreign companies (CFCs)

Profits or income derived by an entity resident in a black-listed jurisdiction, or in a jurisdiction where it is subject to an effective tax rate equal to or lower than 60% of the Portuguese standard CIT rate, are imputed to the Portuguese taxpayer, provided it holds, directly or indirectly, at least 25% of the share capital (10% if more than 50% of the capital is held by Portuguese taxpayers), voting rights, or rights on income or assets of that entity. Upon distribution of the profits, a deduction is available for previously imputed income.

CFC rules also apply if the controlled entity (*as defined above*) is held by a Portuguese entity through a legal representative, fiduciary, or intermediary.

CFC rules do not apply if the CFC is resident in another EU country or in an EEA member state (bound to administrative cooperation on tax matters), provided that there are valid economic reasons underlying the incorporation and running of such company and it carries out agricultural, commercial, industrial, or services activities.

Upon a dividend distribution by the CFC, the tax credit of the tax paid abroad, which is not used, cannot be carried forward to subsequent tax years.

Tax credits and incentives**Foreign tax credit****International juridical double taxation**

Taxes paid abroad can be offset against corresponding Portuguese tax, capped at the lower of (i) the tax liability corresponding to the foreign income, net of costs directly or indirectly incurred, or (ii) the foreign tax paid. In both cases, it is limited to the foreign tax as foreseen in the applicable DTT. This foreign tax credit can be carried forward for five years. The computation of the amount of the tax credit is now determined per jurisdiction, considering the total amount of the respective income, except in relation to income obtained by foreign PEs (the deduction in this case is assessed individually).

International economic double taxation

Taxpayers may opt to apply a tax credit (underlying tax credit) for international economic double taxation regarding profits or reserves received, to which the participation exemption regime on profits does not apply, and provided that the taxpayer holds, (or becomes the holder of) at least 10% of the share capital of the subsidiary for a period of one year.

When choosing the abovementioned option, the taxpayer shall add to the taxable income the amount of the income tax related to the distributed profits or reserves that has been effectively paid abroad by the subsidiary.

General tax benefits and incentives**Contractual tax incentives**

Relevant investment projects up to 2020 (minimum investment of EUR 3 million) that qualify for strategic economic interest and promote the creation of jobs are eligible for tax incentives, as foreseen in the Tax Benefits Code and the Investment Tax Code. These are granted on a case-by-case basis under a government contract for a period not exceeding ten years and include a tax credit of 10% to 20% of the investment and exemptions or reductions from property transfer tax, property tax, and stamp duty.

Patent box regime

Income derived from the sale or granting of the temporary use of industrial property rights (i.e. patents and industrial drawings and models) is 50% exempt. The regime

Portugal

applies to income derived from industrial property rights derived from R&D developed internally or contracted from third parties. Transactions with associated enterprises, including entities resident in black-listed jurisdictions, are excluded. The regime applies to the above-mentioned industrial property rights registered on or after 1 January 2014.

Under the 2016 State Budget Law, the government was granted authorisation to revoke the current patent box regime, which shall apply only to patents, industrial designs, and models registered up to 30 June 2016 (the respective benefits shall, however, apply to 30 June 2021). A new patent box regime will be introduced, limited to the income arising from R&D activities developed internally. It shall be capped at a proportion of the expenses incurred although an additional deduction of 30% of the cap will be foreseen regarding R&D expenses incurred by the taxpayer.

Collective Investment Vehicles (CIVs)

CIT

The taxable profit of a CIV corresponds to the net income of the period, computed in accordance with the applicable accounting standards, while disregarding the following:

- Investment income, rental income, and capital gains (unless if derived from 'offshore' entities).
- Expenses related to the income referred to above.
- Non-deductible expenses under article 23-A of the CIT Code.
- Income and expenses related to management fees and other commissions reverting to the CIV.

Tax losses generated by the CIV follow the regime foreseen in the CIT Code, with the necessary amendments.

The taxable profit assessed by a CIV is subject to the standard CIT rate. CIVs are exempt from municipal and state surtax; however, they are subject to autonomous taxation rates as foreseen in the CIT Code.

CIT due by a CIV is assessed in the periodical CIT return. Respective payment should be made until the last day of the time limit foreseen for the submission of the form.

Stamp duty

Stamp duty is also levied on the net asset value of the CIV, as follows:

- For CIVs investing exclusively in money market instruments and deposits, at a rate of 0.0025%.
- For other CIVs, at a rate of 0.0125%.

The tax is assessed quarterly, in March, June, September and December of each year, and is due by the CIV before the end of the month following the taxable event.

Taxation of a CIV's investors

Regarding the taxation of income obtained by holders of participation units/shareholdings in the CIV, the taxation 'at exit' rule is applicable.

Income obtained by resident investors is subject to taxation at the PIT level (generally, at the rate of 28%) and CIT level (being considered in the taxable profit of the investors).

Income obtained by non-resident investors without PE benefit from a favourable tax regime:

- Taxation at the rate of 10% in case of income arising from Real Estate Investment Funds (REIFs) and Real Estate Investment Companies.

- Exemption in case of income arising from Securities Investment Funds and Securities Investment Companies.

This regime does not apply, being instead applicable the PIT and CIT regime foreseen for resident investors, whenever the investors are tax residents in 'offshore' jurisdictions or, as a general rule, are held more than 25% by tax residents in Portugal.

Pension funds

Pension funds are exempt from CIT and IMT.

The CIT exemption is applicable to pension funds incorporated under the Portuguese law as well as to pension funds established in another EU country or in an EEA member state (bound to administrative cooperation on tax matters) that cumulatively fulfil the following requirements:

- Exclusively assure the payment of retirement pensions granted from elderly, handicapped, surviving, pre-retired, health, and post-employment benefits, as well as death benefits when complementary and ancillary to the previously mentioned.
- Are managed by pension funds professional institutions to which Directive 2003/41/EC, of the European Parliament and Council, applies.
- Are the effective beneficiaries of the income.
- In the case of dividend distributions, the related shareholding should have been held for a consecutive one-year period.

Contractors for North Atlantic Treaty Organization (NATO) infrastructures

Contractors for NATO infrastructures are exempt from CIT.

Net young employment creation

150% of the costs related to net increase job creation, under labour contracts without term, for employees up to 35 years (including) of age and for long-term unemployed individuals may be deducted from taxable income. For this purpose, the fixed remunerations paid and the contributions made by the employer to social security should be considered. The maximum amount of annual increase on deductible costs for each eligible employee is 14 times the national minimum retribution (EUR 530 in 2016).

The increase in 50% of the expenses incurred with the same employer is applicable to more than one employee, provided that there are no special relations.

This tax benefit is not cumulative with any tax benefits or other incentives (e.g. social security) concerning the same employee.

This deduction applies for a period of five years for each employee.

Research and development (R&D) (*Sistema de Incentivos Fiscais em Investigação e Desenvolvimento Empresarial* or SIFIDE II)

Portuguese tax resident companies carrying out commercial, industrial, or agricultural activities, and non-resident companies with a PE in the Portuguese territory, are allowed to deduct from the CIT due, up to the respective amount, the value of eligible expenses incurred with R&D, in a double percentage as follows:

- Base rate: 32.5% of the R&D expenses incurred; this rate is increased by 15% in case of small and medium-sized companies that do not benefit from the incremental rate of 50% (applicable to entities that had completed two years of activity).
- Incremental rate: 50% of the difference between the R&D expenses made in the tax year and the average amount of the R&D expenses made in the previous two years, up to the limit of EUR 1.5 million.

Portugal

Expenses that, due to insufficient tax due, cannot be deducted in the tax year they were incurred can be carried forward for eight years.

Eligible expenses related to allowances paid to personnel directly involved with R&D tasks are capped at 55% of the operational expenses incurred.

Expenses incurred in connection with projects that include, exclusively, third parties, including contracts and R&D services, are not considered.

Expenses relating to staff with a minimum academic qualification of level 8 of the National Qualifications Framework are considered at 120% of their amount.

Expenses related to demonstrations are eligible for the SIFIDE II regime, provided they are notified up front.

Expenses incurred with the acquisition, registration, and maintenance of patents, essential for the performance of R&D activities and audits, are accepted only for micro, small, or medium-sized companies.

The deduction of R&D expenses requires that the entity develops agricultural, industrial, or commercial activities or services as its main business activity.

The applications should be submitted by the end of July of the year following the year in which the investment was made, and applications referring to years previous to that fiscal year will not be accepted.

The regime applies until 2020.

Incentives for the acquisition of companies in a difficult economic situation

The regime of incentives applicable to the acquisition of companies in a difficult economic situation may also apply to cases approved by IAPMEI within the scope of the Incentive System for the Revitalization and Modernization of Companies (SIRME). Under this regime, the acquiring company may deduct tax losses assessed but not yet used by the acquired company for a period of five years in proportion of its participation in the share capital of the acquired company, capped at 60% of the taxable income.

Tax regime for investment promotion (*Regime Fiscal de Apoio Ao Investimento* or RFAI)

RFAI establishes several tax incentives to investment realised within specific business sectors.

Among other incentives, companies that invest in certain regions can benefit from a deduction against CIT otherwise payable (capped at 50% of the CIT due) of 25% (for qualified investments lower than EUR 5 million) or 10% (for qualified investments higher than EUR 5 million) of the qualified investment. Companies are also able to carry forward any unused credit for ten years and may benefit from exemptions or reductions from property transfer tax (IMT), property tax (IMI), and stamp duty on the acquisition of real estate for investment purposes. IMT exemptions are subject to the approval of the municipality where the real estate is located and where the investment is made.

Loan interest and lease rentals on imported equipment

When paid by the state, regional authorities, and public services, loan interest and lease rentals on imported equipment can qualify for partial or full exemption from tax upon an appropriate application.

Real Estate Investment Fund for Residential Lease (REIFRL)

A regime is applicable to REIFRL and to Real Estate Investment Companies for Residential Lease (REICRL) incorporated in accordance with the Portuguese law until 31 December 2014.

The following benefits are established for this tax regime:

- CIT exemption on income obtained by REIFRLs.
- CIT exemption for the income obtained by participation unit holders, except for the capital gains arising from the sale of such participation units.

The above-referred tax regime and respective exemptions are not applicable to entities resident in a black-listed jurisdiction.

Incentives to urban rehabilitation

Incentives are applicable to real estate property covered by rehabilitation projects undertaken until 2020.

REIFs that have been incorporated between 2008 and 31 December 2013 may benefit from:

- CIT: The income obtained by REIFs is tax exempt when the funds are incorporated in accordance with the Portuguese law, and respective assets are comprised of at least 75% real estate subject to rehabilitation projects in qualifying areas.
- Property transfer tax: Urban property (buildings or autonomous units) destined for permanent residence and located in a rehabilitation area may benefit from an IMT exemption on the first transfer of such urban property upon undertaking of rehabilitation works. The granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.
- Property tax: The IMI exemption granted in respect of urban properties subject to rehabilitation works is extended from eight to ten years (it is granted for a five years term and renewable for an additional five-year period). Again, the granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.

Tax benefits and incentives for non-resident corporate entities

Capital gains

Capital gains on the sale of shares and quotas held in a Portuguese company by a non-resident company may be tax exempt. However, there are some important exceptions, such as:

- Where the non-resident shareholder (without a PE in Portugal) is owned more than 25%, directly or indirectly, by a Portuguese resident company, except when the following cumulative conditions are met in respect of the non-resident shareholder:
 - Is resident in an EU member state, an EEA member state (bounded by an agreement for administrative cooperation in tax matters similar to the EU's), or a state that has a tax treaty in force foreseeing exchange of information.
 - Is subject and not exempt from corporation tax as foreseen in EU Council Directive (Directive 2011/96/EU, dated 30 November) or a tax similar to the Portuguese CIT (in the latter case, provided that the legal rate is not lower than 60% of the standard Portuguese CIT rate that now stands at 21%).
 - Holds directly, or directly and indirectly, at least 10% of the share capital or of the voting rights of the Portuguese resident entity being sold for a minimum holding period of one consecutive year.
 - Is not part of an artificial scheme which purpose or main purpose does not aim at obtaining a tax advantage.
- Where the non-resident shareholder is located in a black-listed jurisdiction.

Portugal

- Where the assets of the company sold consist mainly of immovable property located in Portugal.

Government and corporate bonds

Interest and capital gains on government and corporate bonds are tax exempt (where held by entities not located in black-listed jurisdictions) under certain conditions.

Interest paid by resident credit institutions

Interest paid by resident credit institutions to non-resident financial companies deriving from loans as well as gains arising from swap transactions are tax exempt.

Tax regime applicable to external loans

Interest derived from *Schuldscheindarlehen* loan agreements signed by the Public Treasury Institute (IGCP), on behalf of the Portuguese Republic, is tax exempt, provided the creditor is not resident in Portugal and has no PE herein to which the loan can be allocated to.

Special tax regime applicable to debt securities issued by non-resident entities

Income from debt securities representing public and non-public debt issued by non-resident entities is tax exempt, provided that the income is considered to be obtained in Portugal, under Portuguese tax rules, and paid by the Portuguese state as a guarantor of the obligations undertaken by the entities in which it owns a participation, together with other EU member states.

Repo operations

Gains obtained by non-resident financial institutions on securities' repo operations undertaken with resident credit institution are exempt from CIT, provided that such gains are not attributable to Portuguese PEs of non-resident financial institutions.

Securities repos or similar rights exchanged in stock markets, as well as the repo and fiduciary sales in guarantee, performed by financial institutions intermediated by central counterparties, are also exempt from stamp duty.

Madeira International Business Centre (MIBC)

Entities licensed to operate in the MIBC until 31 December 2020 benefit from a special tax regime, which is applicable until 31 December 2027.

The MIBC special tax regime provides a reduced CIT rate of 5% on qualifying foreign-source income, based on thresholds of taxable income and job creation requirements. MIBC-licensed entities also benefit from an 80% exemption from stamp duty, property taxes, and municipal and regional surtaxes.

Non-resident shareholders (except if domiciled in blacklisted jurisdictions) of MIBC-licensed entities benefit from an exemption from WHT on dividend distributions, regardless of the percentage of ownership or holding period, and shareholders' loans.

Other non-resident entities, regardless of their tax residence, that carry out business with MIBC-licensed entities benefit from an exemption from WHT on interest, royalties, technical assistance, and service income received, regardless of their tax domicile, provided that the income received is related with the activity of the MIBC-licensed entity.

MIBC-licensed companies generally benefit from Portugal's network of DTTs. EU laws and regulations apply to Madeira.

The MIBC special tax regime is not available to entities pursuing intra-group services (head office activities and business and management consulting), financing, and insurance activities. Certain productive activities are also excluded.

Withholding taxes

General WHT rates

Recipient	Residents (%) (1)	Non-residents (%) (1)
Dividends	25 (2)	25 (3, 4)
Interest	25	0 (5)/25 (4)
Royalties	25	0 (5)/25
Banks deposits	25 (6)	25 (4, 6)
Property income	25	25
Service charges	0	25 (7)
Remuneration of board members	21.5	21.5
Other	25	25

Notes

- For residents, tax withheld constitutes a payment on account of final corporate or individual income tax due. For non-residents, tax withheld is the final tax, except for property income, in which case it is a payment on account.
- Not subject to WHT in the case of holdings of at least 10% owned for at least one year.
- Not subject to WHT if the non-resident entity, including a foreign PE located in an EU or EEA member state, has a head office that meets the following requirements:
 - Holds directly, or directly and indirectly, at least 10% of the share capital or of voting rights in the Portuguese subsidiary, for a minimum period of one year.
 - Is resident in an EU member state, an EEA member state (bounded to administrative cooperation in tax matters similar to the EU's), or a state with which Portugal has concluded a tax treaty that foresees exchange of information.
 - Is subject to and not exempt from an income tax mentioned in Article 2 of Council Directive 2011/96/EU, dated 30 November, or a tax similar to CIT, and in case of a resident in a tax treaty state, the applicable legal rate is not lower than 60% of the standard CIT rate.
 - Is resident in Switzerland and, among other requirements, holds a minimum shareholding of 25% in the Portuguese subsidiary for a minimum period of two years.
- WHT rate is increased to 35% when the income is paid or due to entities resident in black-listed jurisdictions.
- Not subject to WHT if the EU Interest & Royalty Directive 2003/49 applies.
- WHT rate is increased to 35% when the income is paid in bank accounts open in the name of one or more account holders but on behalf of non-identified third parties.
- Not subject to WHT if a tax treaty is applicable.

Tax treaty rates

Tax treaties reduce the above-mentioned rates as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Algeria (3)	10/15	15	10
Austria (1, 2)	15	10	5/10
Barbados (3, 12)	5/15	10	5

Uruguay (3)	5/10	10	10
Venezuela (7)	10	10	10/12

Notes

1. The lower of the listed rates applies to royalties when the beneficiary holds 50% or less of the paying company's share capital.
2. There is no WHT on dividends if the EU Parent/Subsidiary Directive applies.
3. The lower of the listed rates applies to dividends when the beneficiary directly holds 25% or more of share capital. Depending on each DTT, a two year holding period may be required.
4. The higher rate applies to interest on debentures raised in France after 1 January 1965 or on significant loans or debentures raised in Portugal or abroad under major development projects listed in the treaty annex.
5. The lower of the listed rates applies to bank loans, but if interest is payable from Portugal, the bank loans must qualify as being of economic or social interest or fall under an approved development plan.
6. The lower of the listed rates applies to interest received by financial institutions.
7. The lower of the listed rates applies to technical assistance.
8. The lower of the listed rates applies on interest related to loans with a minimum maturity of two years.
9. The rate of 5% regarding interest applies to bonds interest or other securities transacted in the stock market. The rate of 10% applies to loans from banks or insurance companies or credit selling of equipment.
10. The rate of 5% regarding royalties applies to equipment lease.
11. The rate of 10% applies if the company that is paying the dividends is a resident of Israel and the dividends derive from profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israel company tax. The rate of 5% applies if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends.
12. The treaty is signed but not yet in force.
13. The lower of the listed rates on dividends applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. Depending on each DTT, a one year holding period may be required.
14. The rate of 5% on dividends applies if the beneficial owner is a company (other than a partnership) that for an uninterrupted period of at least 12 months prior to the payment of the dividends or if the company paying the dividends has existed for less than 12 months, during the lifetime of the company, directly holds at least 10% of the capital of the company paying the dividends, or if the beneficial owner of the dividends is: (i) in the case of Portugal, the state, a political or administrative subdivision, or a local authority thereof, or the Bank of Portugal; and, (ii) in the case of Norway, the government of Norway, a political or administrative subdivision, or a local authority thereof, or the Central Bank of Norway.
15. A WHT rate of 5% on dividends applies in case of shareholdings of at least 25% on the company distributing the dividends, as well as for an exemption on dividends, in case of shareholdings of at least 25% held for at least two years. An exemption from WHT is also foreseen regarding interest and royalties, when paid between associated companies (shareholdings of at least 25% held for at least two years), in line with the Agreement between the European Community and the Swiss Confederation.
16. The lower of the listed rates applies to dividends if the beneficial owner is a company (other than a partnership) that (i) directly holds at least 10% of the capital of the Portuguese company paying the dividends or (ii) directly controls at least 10% of the voting rights of the Peruvian company paying the dividends.
17. The lower of the listed rates applies to interest related to credits of any nature granted by a financial institution.
18. The lower of the listed rates applies to royalties paid for technical assistance provided in connection with the use of, or the right to use of author's rights, or information concerning industrial, commercial, or scientific experience.

Tax administration

Taxable period

The tax year is, as a general rule, the calendar year. A different tax year is allowed in the case of companies obligated to accounting consolidation and of PEs of non-resident entities, which can adopt the tax period of the non-resident company. If this option is taken, the new tax period must be maintained for a minimum of five years. The five year minimum period is not applicable if the taxpayer is transferred to a group of companies that are subject to consolidation of financial statements and the holding company has a fiscal year different from the one that was being adopted by the taxpayer.

Portugal

Tax returns

The annual CIT return must be submitted by electronic data transmission by the last day of May of the year following the year of income. Whenever the tax year ends on a date other than 31 December, the annual CIT return shall be submitted by electronic data transmission by the last day of the fifth month following the year end. The system is one of self-assessment.

Payment of tax

Tax is paid in instalments. Three payments on account due in July, September, and up to 15 December of the year in which taxable income arises corresponding to 95% of the previous year's corporate tax assessment (for taxpayers with a turnover above EUR 500,000; 80% if below this amount). Payments on account are not required if the previous year's corporate tax assessment is less than EUR 200. The third payment may be suspended upon declaring that no further tax is due in respect of the current year. However, interest is assessed at a rate of 4% if this results in postponing more than 20% of the tax that would otherwise have been paid.

A last instalment is paid (or received) through self-assessment upon filing the annual tax return in May of the following year. If the tax year ends on a date other than 31 December, interim payments take place in the seventh, ninth, and up to the 15th of the 12th month of the tax year.

Filing of the annual tax return together with the final payment is in the fifth month following the close of the tax year.

Given the introduction of a state surtax (*Derrama Estadual*) three additional payments on account are due on the same dates as the interim payments mentioned above. The additional payments on account correspond to 2.5% of the taxable profit above EUR 1.5 million and up to EUR 7.5 million, 4.5% of the taxable profit above EUR 7.5 million and up to EUR 35 million, and 6.5% of the taxable profit above EUR 35 million, assessed in the previous year.

In particular situations, a special payment on account is due of a minimum of EUR 1,000 up to EUR 70,000, paid in March, or in March and October (the third or the third and tenth month of the tax year if it ends on a date other than 31 December).

Interest and penalties

Late assessment interest is due in case of delay on the assessment of taxes due. Late assessment interest is computed on a daily basis. The current rate of late assessment interest is 4% (year).

Late penalty interest is due in case of delay in the payment of the tax assessed. The current rate is 5.168%. Late penalty interest is computed on a daily basis. Tax penalties for companies are capped at EUR 165,000 in the case of intention and EUR 45,000 in the case of negligence. In general, in case of failure or late payment of CIT, companies are liable to a penalty varying between 30% and 100% of the tax due, capped at EUR 45,000 (in case of negligence).

Specific tax penalties apply regarding transfer pricing documentation and the CFC regime (between EUR 1,000 and EUR 10,000 for companies) and regarding omissions or inaccuracies regarding ruling requests (between EUR 750 and EUR 22,500 for companies in the case of urgent rulings or 25% of the previous amounts in the case of non-urgent rulings).

There is the possibility of applying for penalty reduction, provided certain requirements are met (e.g. regularisation of the tax situation/payment of the tax due; situation where there was no damage to the Revenue).

Tax audit process

Taxpayers are audited by the PTA based on several criteria, as detailed in a specific document prepared by the PTA.

The PTA must notify the taxpayers of the preliminary conclusions reached in cases where these may lead to tax assessment acts unfavourable to the taxpayers, further to which taxpayers may present their argumentation.

The PTA must then prepare a final report of the tax audit performed, identifying the facts detected.

Tax audits may be initiated within the statute of limitation (*see below*).

Tax audits must be concluded within six months. A prorogation of the deadline to one year may apply under certain conditions (e.g. complexity of the facts involved, necessity to make use of mechanisms of mutual assistance on tax matters).

The PTA releases, on a periodical basis, a list of taxpayers that, due to the nature of their activities, their turnover, or other criteria, are subject to regular monitorisation. There is also a specific department for major taxpayers.

Statute of limitations

The statute of limitation period is four years, but can be extended in case of tax losses. Regarding facts involving black-listed jurisdictions, the statute of limitation for the right to assess taxes is extended to 12 years while the time period allowed to collect taxes is extended to 15 years. The statute of limitation period is also increased from four to 12 years in case of facts related to deposit and securities accounts in financial institutions outside the European Union.

Topics of focus for tax authorities

Currently and mainly further to the Memorandum of Understanding between the Portuguese Republic, the European Commission (EC), the European Central Bank, and the International Monetary Fund (IMF), the PTA has been exhibiting a more aggressive approach, especially with regards to the fight against tax fraud and evasion, mainly by aggravating taxation in fields where tax avoidance is significant and by introducing additional compliance and reporting obligations.

Increased focus has also been verified on transfer pricing matters, mainly on the transfer pricing policies in transactions with non-resident entities and especially in case of payments made to entities that are resident in black-listed jurisdictions. In this regard, cooperation on transfer pricing matters with other tax administrations has been strengthened.

Situations of recognition of PEs in Portugal, usually triggered by inspections to VAT registers, are now recurrent.

Anti-avoidance

A general anti-avoidance provision is in force, pursuant to which contracts and other acts are ineffective whenever it is demonstrated that they were tax driven to reduce taxation that would be due under contracts bearing a similar economic effect, in which case taxation would be based on the latter.

The anti-avoidance procedure is initiated within the general term foreseen (statute of limitation) and is now more flexible in terms of proof by the PTA.

Anti-avoidance rules are not applicable in cases where a request for obtaining binding information is not answered by the PTA within 150 days.

Portugal

Binding rulings

Binding rulings can be:

- Urgent: A decision should be taken in 90 days; these are subject to the payment of a fee ranging between EUR 2,500 and EUR 25,500, depending on the complexity of the matter; if no decision is taken within the deadline established, there is a tacit approval of the taxpayer's understanding of the tax matter.
- Non-urgent: A decision should be taken in 150 days; no fees are charged; a decision is required (no tacit approval, as in case of an urgent ruling).

Fight against tax fraud and evasion

It is mandatory that payments above EUR 1,000 are made by a means that allows the identification of the recipient of the income (e.g. bank transfer, nominative cheque, or direct debit).

Council Directive 2011/16/EU, on the matter of administrative cooperation in the field of taxation, has been transposed to the Portuguese legislation, reviewing the exchange information mechanisms between tax authorities and aiming at a more effective action against tax evasion and fraud at an international level.

Significant developments

Pursuant to Act No. 77, a value-added tax (VAT) regime should have replaced the sales and use tax (SUT) regime, effective 1 June 2016. Furthermore, on 30 September 2015, Act No. 159 was signed into law to introduce technical amendments to the Puerto Rico Internal Revenue Code, including changes to the SUT and VAT regimes. Act No. 159 clarified certain general terms and definitions and expanded the exclusions from taxable services and business-to-business (B2B) services applied to the SUT regime.

Notwithstanding the above, on 26 May 2016, the Puerto Rico Legislature eliminated the implementation of the VAT regime; consequently, the SUT regime will continue to apply.

On 7 April 2016, the Governor of Puerto Rico approved Act No. 22-2016, known as the 'Electricity, Water and Sewer Services Subsidies and Overdue Payments Reform Act' (Act No. 22). Act No. 22 amends Act No. 73-2008 as amended, known as the 'Economic Incentives Act for the Development of Puerto Rico' (Act No. 73) in order to limit the utilisation of the research and development (R&D) credit.

Taxes on corporate income

A domestic corporation is taxable in Puerto Rico on its worldwide income. A foreign corporation engaged in trade or business in Puerto Rico is taxed at the regular corporate tax rates on income from Puerto Rico sources that is effectively connected income and at a 29% withholding tax (WHT) rate on its Puerto Rico-source gross income not effectively connected with that business.

The current corporate income tax (CIT) rate is comprised of a 20% normal tax and a graduated surtax (computed on the 'surtax net income').

The 'surtax net income' is basically the net taxable income subject to regular tax less a surtax deduction in the amount of 25,000 United States dollars (USD). The graduated surtax rates are as follows:

- 5% for surtax net income up to USD 75,000.
- USD 3,750 plus 15% of surtax net income from USD 75,001 to USD 125,000.
- USD 11,250 plus 16% of surtax net income from USD 125,001 to USD 175,000.
- USD 19,250 plus 17% of surtax net income from USD 175,001 to USD 225,000.
- USD 27,750 plus 18% of surtax net income from USD 225,001 to USD 275,000.
- USD 36,750 plus 19% of surtax net income in excess of USD 275,000 for a maximum nominal tax rate of nearly 39%.

The determination of the applicable surtax rate is made on a consolidated basis for controlled groups and related companies, so the net taxable income of all the

Puerto Rico

entities subject to tax in Puerto Rico within said groups has to be combined for the determination of the applicable surtax rate.

Alternative minimum tax (AMT)

The AMT includes various components in order to calculate the tentative minimum tax. Such tentative minimum tax is the higher of the following:

- 30% of the alternative minimum net income.
- The sum of the following components:
 - 20% of the expenses paid or incurred by a related party, including those expenses allocated from a home office to its Puerto Rico branch, as long as these expense or cost allocations are not subject to income taxes in Puerto Rico, plus
 - a percentage of the value of personal property purchases from related parties, including those transfers of personal property from the home office to the Puerto Rico branch. The percentage fluctuates from 2.5% to 6.5% depending on the amount of gross income earned during the taxable year.

For AMT purposes, expenses paid or incurred for services performed by a related party outside Puerto Rico are considered a permanent adjustment in the determination of the alternative minimum net income (i.e. non-deductible for AMT purposes).

In determining the alternative minimum net income, the net operating loss (NOL) would be limited to 70% of the alternative minimum net income. Also, the amount of the tax credit available with respect to the AMT paid in prior years that may be claimed against the current year regular tax is limited to 25% of the current net regular tax over the AMT for such taxable year. The AMT credit can be carried forward indefinitely.

Tax on deemed dividends

A tax is imposed on certain corporations for taxable years commencing after 31 December 2013. The tax is a 10% tax on the deemed dividend amount attributable to a foreign owner. A foreign owner is defined as any non-resident person (or entity not engaged in a trade or business in Puerto Rico), who directly owns 50% or more of the corporation's stocks. The deemed dividend amount is computed using the lesser of the average value of the total foreign assets or the accumulated earnings and profits of the corporation.

Pursuant to Act No. 159, a corporation is allowed to prepay the dividend WHT between 1 October 2015 and 31 December 2015 on future dividend distributions using the 8% preferential WHT rate.

Also, the prepaid amount is allowed to reduce the accumulated earning and profits subject to the tax on deemed dividends.

Tax on improper accumulation of income

A surtax of 50% is imposed on corporations that improperly accumulate earnings to prevent the imposition of tax on shareholders or partners rather than paying the earnings out as dividends. The tax is not imposed on accumulated earnings and profits but is imposed on the net income for the year computed without taking capital loss carryover or NOL carryover deductions, and reduced by the following items: Puerto Rico income taxes paid or accrued, disallowed net capital losses, and charitable contributions in excess of the deductible amount. The net income does not include industrial income exempted from income taxes under Industrial Incentives Acts. However, an exempt business can be subject to the penalty tax on non-exempt income.

Corporate residence

A corporation organised or created under the laws of Puerto Rico is a domestic corporation. A domestic corporation is a resident corporation even if it does not conduct business operations in Puerto Rico. A corporation created elsewhere is considered a foreign corporation.

Permanent establishment (PE)

The Puerto Rico Tax Code does not provide specific guidance on PE. Facts and circumstances need to be analysed in order to determine if a corporation has created a PE in Puerto Rico or not. However, having an office or fixed place of business in Puerto Rico may deem the corporation to be engaged in a trade or business in Puerto Rico (i.e. having a PE).

Sourcing rules pursuant to Act No. 154

Act No. 154's source rules are segregated into two parts. The first part treats a non-Puerto Rico resident manufacturing entity as having an office or fixed place of business in Puerto Rico merely as a result of engaging in transactions above a certain threshold with a related Puerto Rico entity. The second part treats a portion of the income earned by a non-Puerto Rico resident entity as Puerto Rico-source income.

Act No. 154's source rule applies where a non-Puerto Rico resident purchases goods and services from a related company that manufactures personal property or performs services in Puerto Rico that account for 10% or more of the total gross receipts of the seller from sales of such property or services in Puerto Rico, or at least 10% of the purchase cost of personal property and services acquired by the purchaser, for the taxable year or any of the three prior taxable years.

Where Act No. 154's source rule applies, a portion of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as Puerto Rico-source income that is effectively connected with the conduct of a Puerto Rico trade or business. The portion of the non-Puerto Rico resident's income that is treated as Puerto Rico source is determined under an equally weighted, four-factor (i.e. purchases, sales, property, and payroll) formulary apportionment method. Where the purchaser fails to provide adequate documentation regarding the formulary apportionment factors, 50% of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as sourced where the property is manufactured or produced (i.e. Puerto Rico). The source rule also will apply to agency and commissionaire arrangements, in addition to buy-sell transactions involving related parties. In addition, the source rule contains an anti-abuse provision that disregards a transaction, for purposes of the source rule, where one of the principal purposes of the transaction is avoidance of the source rule.

Other taxes

Sales and use tax (SUT)

As a general rule, the SUT shall be applied, collected, and paid on all transactions of taxable items in Puerto Rico. Taxable items consist of tangible personal property, taxable services, admissions, and what is known as bundled transactions. Excluded from this definition are professional associations and certain membership fees; stamps issued by professional associations, the Commonwealth of Puerto Rico, or the federal government; human blood, tissue, and organs; maintenance fees paid to resident associations; air and maritime tickets; real property; and bingos, raffles, and lottery. Other transactions that are exempt from SUT include export transactions; duty-free stores located at airport or maritime ports; prescription medicines; insulin; taxable items acquired for certain

Puerto Rico

manufacturing operations (e.g. raw materials); and food and ingredients for food (except for prepared food, diet supplements, sweets, and carbonated beverages).

As of 1 July 2015, the SUT rate is imposed at 10.5% (previously 6%) at the state level and an additional 1% at the municipal level, for an aggregate 11.5% (previously 7%). As of 1 October 2015, designated professional services and B2B services are taxed at a 4% SUT rate.

Taxable services that are excluded from SUT include, among others, the following:

- Services rendered by merchants with annual volume of business of less than USD 50,000.
- Services rendered by a non-resident to a related party that is engaged in a Puerto Rico trade or business and holds a tax grant pursuant to Act No. 73-2008, Act No. 83-2010, Act No. 20-2012, or any similar act.
- Intangible rights.
- Advertising and promotion services.
- Construction subcontracted services and subcontracted telecommunication services.
- Toll manufacturing services or contract manufacturing services.
- Repair, maintenance, and conditioning of aircraft provided by a merchant that holds a tax grant pursuant to Act No. 73-2008 or any other similar act.

SUT should be remitted to the Puerto Rico government as 10.5% or 4% to the Puerto Rico Treasury Department (PRTD) and the remaining 1% to the corresponding municipality.

Tangible personal property introduced into Puerto Rico is subject to use tax upon importation, holding the release on the ports until the use tax is satisfied, unless the taxpayer is a bonded merchant or an eligible reseller. The use tax paid upon importation of the merchandise can be claimed as a credit on the SUT return.

Every natural or juridical person who does or wishes to do business of any kind in Puerto Rico shall request registration in the Merchant's Registry of the PRTD at least 30 days before starting operations. Once the registration application is filled out and approved, the Secretary of the Treasury will grant a Merchant's Registration Certificate. This certificate constitutes the merchant's authorisation to do business in Puerto Rico and confirms the merchant's obligation as a withholding agent. The Merchant's Registration Certificate shall be displayed, at all times, in a visible place for the general public in the commercial establishment for which it was issued. Please note that if a merchant is doing business in one or more of the 78 municipalities in Puerto Rico, the merchant only needs to register with the PRTD.

Unless specifically exempted, all persons selling taxable items are required to file a monthly SUT return. This return shall be filed electronically with the PRTD no later than the 20th day of the calendar month following the month during which the sales occurred. Also, all persons that import tangible property to Puerto Rico must file a use tax on imports return no later than the tenth day of the calendar month following the import.

There is a credit for purchases of products manufactured in Puerto Rico for purposes of SUT. In general, the credit will be 10% of the excess of the purchases of eligible products over the average of the purchases of eligible products for three out of ten prior taxable years. This credit can be carried forward until exhausted. It is important to note that the credit used will be considered taxable income for income tax purposes of the year the credit is taken.

Customs duties and import tariffs

Puerto Rico does not have customs duty and import tariff provisions. Since Puerto Rico is a Commonwealth of the United States, it follows the United States' customs duties and import tariffs.

Excise taxes

There are certain articles subject to a special excise tax, such as cigarettes, fuels, crude oils, vehicles, alcoholic beverages, cement, sugar, and plastic products, among others.

Act No. 154's excise tax

Companies with manufacturing operations in Puerto Rico may be subject to an excise tax on goods or services provided to offshore-related entities under Act No. 154 of 2010, as amended. This Act created an excise tax that works in tandem with Act No. 154's source rules. Where the excise tax applies, it is in lieu of the tax that otherwise would arise from the application of Act No. 154's source rules. Under this excise tax rule, offshore purchasers that acquire goods from Puerto Rico sellers with gross receipts in excess of USD 75 million for any of the three preceding taxable years and that otherwise meet the source-of-income rule thresholds (set forth above) are subject to this excise tax equal to the 'applicable percentage of the value' of such personal property or services, which is essentially a scaled-back percentage. The excise tax rate phases out as follows:

- 3.75% between 1 January 2012 and 31 December 2012.
- 2.75% between 1 January 2013 and 30 June 2013.
- 4.00% between 1 July 2013 and 31 December 2017.

Various tax credits are provided to offset the excise tax mentioned above.

The excise tax is collected by the Puerto Rico seller on receipts from the sale of personal property or services rendered to a related offshore purchaser. The tax has to be deposited with the Secretary of the Treasury on or before the 13th day of the month following the sale. Each person required to collect the excise tax must file a quarterly excise tax return on 30 April, 31 July, 31 October, and 1 January and pay any remaining tax liability not deposited on a monthly basis, as outlined above.

Act No. 154 sets forth the process for which a credit may be claimed for (i) taxes paid to any of the states of the United States on the acquisition of personal property and services and (ii) taxes paid to Puerto Rico by another member of the taxpayer's controlled group on a series of purchases.

Personal property taxes

Every corporation engaged in a trade or business in Puerto Rico that on 1 January of each year owns personal property used in its trade or business within Puerto Rico, whether it is leased to another entity or not, is subject to tax on such property. The tax is self-assessed by the corporation, and it is paid together with the filing of an annual return. The tax ranges between 5.80% and 9.83%, depending on the municipality.

The tax return must be filed electronically through the Municipal Revenue Collection Center (MRCC) website (www.crimpr.net). In order to file the return, every taxpayer with over USD 3 million in volume of business and specialist who had prepared more than five returns for the prior taxable year need to register using this website. The signature and certification of the return will be satisfied by virtue of the electronic filing. Also, all returns filed electronically should be accompanied by the corresponding payment due on or before 15 May.

Every corporation must substantially satisfy its personal property tax liability, if any, through estimated tax payments. The amount of estimated taxes should be paid in equal instalments on the 15th day of August, November, February, and May of the taxable year of the corporation. The estimated payments should equal or exceed 90% of the actual

Puerto Rico

personal property tax for the year or 100% of the personal property tax as reflected in the personal property tax return for the preceding taxable year, whichever is less. Any tax not covered by the estimated tax payments should be paid along with the personal property tax return. Failure to pay the tax by the due dates indicated above may result in a penalty of 5% of the instalment due.

A 5% statutory discount is available if 100% of the personal property tax, as reflected in the personal property tax return for the preceding taxable year, is made by the first instalment date (15 August).

In general, all personal property not specifically exempted, including cash, finished goods inventory, supplies, and depreciable property, is subject to the tax. The personal property tax is generally based on the book value of the asset as of 1 January. Finished goods inventory, however, is assessed on the average of the monthly balances for the 12-month period preceding 1 January of each year.

The valuation of the personal property subject to tax is determined by multiplying the book value of such property by the applicable tax rate determined by the municipality in which the property is located. If the book value of depreciable property is below its estimated residual value, the property should be assessed at its estimated residual value.

Real property taxes

The property tax system is administered by the MRCC. The tax on real property is directly assessed by the MRCC and may be paid in two instalments. The tax, (which varies from a minimum of 8.03% to a maximum of 11.83%, depending on the municipality) is applied to an amount based on the hypothetical fair market value (FMV) of the relevant property in the year 1957. In general terms, this hypothetical FMV normally ranges between 40% and 50% of the cost of the property.

Transfer taxes

Puerto Rico does not have transfer tax provisions.

Stamp taxes

Puerto Rico does not have stamp tax provisions. However, recordation fees are imposed at the time of officially recording a real estate transaction with the Puerto Rico Property Registry.

Payroll taxes

Withholding taxes on salaries and wages

All employers are required to withhold Puerto Rico income tax from all wages paid to its employees.

Federal Social Security and Medicare (FICA)

The Federal Social Security and Medicare Law applies in full in Puerto Rico. The tax rate is imposed on both the employer and the employee. For 2016, the tax rate is 7.65%, which consists of 6.2% of Social Security and 1.45% of Medicare Tax. The Social Security Tax is calculated on the first USD 118,500 (year 2016) of wages received, and the Medicare Tax is calculated on the total wages, without ceiling.

In addition, an employer must withhold a 0.9% Additional Medicare Tax from wages paid to an employee in excess of USD 200,000 in a calendar year. The employer is required to begin withholding Additional Medicare Tax in the pay period in which wages are paid in excess of USD 200,000 to an employee and continue to withhold it each pay period until the end of the calendar year. Additional Medicare Tax is only imposed on the employee. There is no employer share of Additional Medicare Tax. All wages that are subject to Medicare tax are subject to Additional Medicare Tax withholding if paid in excess of the USD 200,000 withholding threshold.

State (PR) Unemployment Tax (SUTA)

The unemployment tax is paid only by the employer and is paid on the first USD 7,000 of total wages paid to each employee during the calendar year, based on an experience rating system. In addition, the employer must also pay a special tax equal to 1% of the wages subject to unemployment tax. However, the special tax together with the experience-based tax cannot exceed 5.4%.

Federal Unemployment Tax (FUTA)

Similar to the FICA, FUTA also applies in Puerto Rico. All persons who employ at least one individual during any 20-week period or pay USD 1,500 or more in salaries during any trimester of the calendar year are subject to the FUTA tax.

The employer is solely responsible for payment of the tax. The rate is 6.0% on the first USD 7,000 of total wages paid during the calendar year to each employee. However, a credit of 5.4% is granted for the PR unemployment tax paid. Therefore, the effective tax rate is 0.6% (6.0% less 5.4%).

Disability insurance

The Puerto Rico Department of Labor and Human Resources Bureau of Employment Security also administers the disability insurance program. This program is funded principally through the imposition of a tax, in equal amounts, on the employer and employee.

A contributory tax of 0.6% is imposed on the first USD 9,000 of the total wages paid in the year. From the total tax, half (0.3%) is paid by the employer and the other half by the employee.

Employers may establish private insurance plans if approved by the Puerto Rico Department of Labor and Human Resources.

Workmen's Accident Compensation Insurance

The Workmen's Accident Compensation Insurance Act (WACA) establishes a compulsory insurance program that covers employees who suffer injury, become disabled, or lose their lives due to a job related accident. The insurance premium is based on total wages paid during the government's fiscal year, which runs from 1 July to 30 June. The actual rates vary among industry types. The employer is solely responsible for payment of the assessed premium.

Chauffeurs' Social Security

Every employer having one or more drivers is subject to Chauffeurs' Social Security tax. It also applies to an employer whose employees are usually or regularly required or allowed to operate a motor vehicle as an inherent part of their work.

The tax is imposed on both the employer and the employee as follows:

- Every employer must pay USD 0.30 per week or fraction thereof for each covered employee.
- Every employee must pay USD 0.50 per week or fraction thereof.

Municipal license tax

Every corporation is required to file an annual volume-of-business declaration with each of the municipalities in which it establishes or conducts business operations during the year. The declaration must indicate the actual volume of business (i.e. net sales, gross income from any service rendered, and other gross receipts) attributable to each municipality. When a business operates in more than one municipality but does not receive income in all of them, the license tax shall be computed based on a distribution of sales apportioned to each municipality by square feet of the building used in each municipality.

Puerto Rico

For a non-financial business, the license tax payment varies from a minimum of 0.20% to a maximum of 0.50%, depending on each municipality. The payment must be made in two equal instalments on or before 15 July and 15 January on the basis of the volume of business generated by the entity during its accounting year ended within the immediately preceding calendar year before the due date of the declaration. A 5% discount is available when the tax is fully paid on the declaration due date (on or before five working days after 15 April of each year).

For the first six months after a new business is established, the new company is generally exempt from the municipal license tax, provided that the business informs the municipality that it has established a new business in the municipality within the first 30 days of operations and requests the provisional license tax as established in each municipality. A copy of the municipal licence is generally requested as a prerequisite for obtaining other licences and permits in Puerto Rico.

Branch income

Corporations operating in Puerto Rico as a branch may be subject to a 10% tax on the dividend equivalent amount (commonly known as the branch profit tax or BPT). The BPT should be determined and paid along with the CIT return. There will not be an income tax withholding at source at the time cash transfers are made by the Puerto Rico branch to its home office outside of Puerto Rico.

Income determination

The gross income of a corporation generally includes business income, profits from the sale of property, interest, dividends, and income derived from any source, unless specifically exempted by law.

A corporation's net income is generally calculated in accordance with the method used for financial statement purposes, except for various items of income and expenses, which are treated differently. For example, the cash method of accounting may not be used by a corporation with inventory or with an average annual gross income in excess of USD 1 million. Long-term contract methods and the instalment method can be used for regular tax calculations.

Inventory valuation

In general, inventory is valued at the lower of cost or market. Retail merchants can use the retail method of accounting.

Capital gains

Tax-advantaged treatment is provided for net long-term gains (holding period of more than one year) from the sale of capital assets. For corporations, net long-term capital gains, reduced by any short-term capital losses, are subject to an alternative (preferential) tax of 20% in lieu of the regular CIT rates.

Dividend income

Dividends from a corporation that derives 20% or more of its profits from sources within Puerto Rico are taxable in Puerto Rico. However, a dividends-received deduction may apply.

Dividends-received deduction

All corporations engaged in trade or business in Puerto Rico are entitled to an 85% deduction on dividends received from a domestic corporation but not in excess of 85% of the net income of the corporation. A 100% dividends-received deduction applies for

dividends received from taxable controlled domestic corporations (if ownership in a corporation is 80% or more).

Interest income

Interest income is generally taxable, except interest from obligations of the federal government or any state, or territory, or political subdivisions; the District of Columbia; and the Commonwealth of Puerto Rico or any of its instrumentalities or political subdivisions.

Royalty income

Royalties from property located in Puerto Rico or from any interest in such property are included in gross income.

Partnership income

The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership's taxable income (loss).

Other income

Service fees are generally taxable as ordinary income.

Foreign income

Generally, a Puerto Rico domestic corporation is taxed on its worldwide income, including foreign income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credit or deduction. In the case of resident foreign corporations, these are only taxed on their Puerto Rico-source income and on their effectively connected Puerto Rico income (i.e. foreign income won't be taxable for Puerto Rico purposes).

Deductions

All ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business are deductible by corporations operating in Puerto Rico.

Depreciation

A reasonable depreciation allowance is deductible for the exhaustion, wear and tear, and obsolescence of property used in business. The most common depreciation method used by corporations is the straight-line method. Nevertheless, any other consistent method may be used in lieu of the straight-line method as long as it is in accordance with the recognised trade practice. In addition, a corporation (other than one that is exempt under an Industrial Incentives Act) can elect an accelerated depreciation method for new or used tangible property acquired by purchase in taxable years commencing after 30 June 1995.

For property acquired after 31 December 2009, when using the straight-line depreciation method, the useful life has to be determined based on the same rules of accelerated depreciation.

Assets	Useful life (years)
3 year property (e.g. computers, electronic equipment)	3
5 year property (e.g. automobiles, transportation equipment)	5
7 year property (e.g. certain furniture and fixtures, air transportation equipment)	7
10 year property (e.g. furniture and fixtures, printing equipment, other machinery and equipment)	10

Puerto Rico

Assets	Useful life (years)
15 year property (e.g. certain air transportation equipment, natural gas plants)	15
20 year property (e.g. vessels, land improvements)	20
Real property leased for residential purposes	30
Other real property	35

For intangibles (other than goodwill) acquired or created after 1 September 2010, the deduction is calculated using the straight-line method over the lower of a useful life of 15 years or the intangible's useful life.

Goodwill

The cost of goodwill is generally capitalised and amortised ratably over 15 years.

Start-up expenses

Generally, start-up expenditures may be deducted in the tax year in which the trade or business begins or they may be ratably amortised over five years.

Interest expenses

In general, interest expense is deductible without limitation. However, interest expenses related to exempt income are not deductible. If interest is paid to a non-Puerto Rico resident related party, a 29% withholding at source applies. If the 29% withholding is not withheld, no deduction is available.

Bad debt

Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless (i.e. uncollectible). The reserve method is not admissible for Puerto Rico purposes.

Charitable contributions

Deductions for allowed charitable contributions are limited to 10% of net income, computed regardless of the contributions.

Rent expense

Corporations are entitled to a rent expense deduction if the rented property is used in the business.

Employee remuneration

Corporations may deduct payments of reasonable salaries or other compensation for services actually rendered.

Insurance premiums

Insurance premiums paid or accrued on risks related to a trade or business are deductible, as well as premiums on group life policies covering employees where the beneficiary is not the corporation. No deduction is allowed for premiums paid to an insurance company not authorised to provide insurance in Puerto Rico or through an agent or broker not authorised to operate in Puerto Rico.

Meals and entertainment

Meals and entertainment expenses are deductible, subject to a 50% limitation. Travelling expenses are fully deductible if the trip is for business purposes.

Automobiles expenses

A corporation is allowed to depreciate non-cargo automobiles used in a trade or business over a five year useful life (three years in the case of sales persons) up to a maximum base of USD 30,000 for a maximum annual depreciation of USD 6,000.

On the other hand, for non-cargo automobile maintenance expenses (e.g. gas, repairs, insurance), a deduction based on USD 0.60 per mileage is allowed.

Fines and penalties

Penalty payments, such as with respect to Commonwealth taxes, whether on account of negligence, delinquency, or fraud, are not deductible from gross income.

Taxes

A corporation is allowed a deduction for taxes paid (except for Puerto Rico CIT), including income tax paid to the United States, its other possessions, and any foreign country. The deduction is in lieu of claiming a foreign tax credit.

Other significant items

The cost of incidental repairs (not adding value to the property) is deductible as a business expense.

Subject to certain limitations, savings and retirement plans for the benefit of employees are deductible if qualified by the Secretary of the Treasury.

Net operating losses (NOLs)

All corporations are generally entitled to the NOL deduction in computing their tax. NOLs created from taxable years beginning prior to 31 December 2012 (and after 31 December 2004) may be carried forward for 12 taxable years (there are no carryback provisions). For taxable years beginning after 31 December 2012, the NOL carryforward period is ten years. The use of the NOL deduction is limited to 80% of the taxable income for the year. The NOL to be carried forward should exclude the deductible portion of the expenses or payments to foreign affiliates.

Also, losses from sales or exchanges of capital assets are allowed only to the extent of gains from such sales or exchanges. The carryforward period in this instance, however, is seven years. The use of capital losses is limited to 80% of the capital gains for the taxable year.

Payments to foreign affiliates

51% of expenses attributable to payments made to a related party that is not engaged in a trade or business in Puerto Rico or to the home office located outside of Puerto Rico (i.e. foreign affiliate) will not be deductible for purposes of computing the net taxable income, as long as these payments are not subject to income taxes in Puerto Rico.

The Secretary of the Treasury has the authority to grant a 100% deduction for the expenses paid or incurred with related parties not engaged in a trade or business in Puerto Rico via the waiver mechanism. However, the deduction is limited to 60% of the expenses that qualify for the waiver.

Expenses paid or incurred with related parties not engaged in a trade or business in Puerto Rico for which a waiver from the Secretary of the Treasury is not obtained do not generate NOL carryforward (i.e. the expenses are added back to the NOL). In other words, the non-disallowed portion of the payments to foreign affiliates/branches will not be allowed if this particular portion causes a NOL.

Group taxation

Puerto Rico does not have group taxation rules. In other words, corporations cannot file a consolidated return for Puerto Rico CIT purposes.

Transfer pricing

There are no specific transfer pricing rules in Puerto Rico.

Puerto Rico

Thin capitalisation

There are no specific thin capitalisation rules in Puerto Rico.

Controlled foreign companies (CFCs)

There are no specific CFC rules in Puerto Rico.

Tax credits and incentives

A corporation engaged in specific eligible activities may apply for a reduced CIT rate, among other incentives, through the request of a Tax Exemption Grant to the Puerto Rico Office of Industrial Tax Exemption (OITE) under Act No. 73 of 28 May 2008 (Act No. 73).

A corporation engaged in eligible activities related to the exportation of services may apply for a reduced CIT rate, among other incentives, through the request of a Tax Exemption Grant to OITE under Act No. 20 of 17 January 2012 (Act No. 20), instead of through Act No. 73.

Tax rate incentives

Under Act No. 73

Exempt entities may elect one of the following two scenarios:

- General scenario: 4% CIT rate with a WHT rate on royalty payments of 12%. Under this scenario, the amount of WHT on the royalty payments is creditable against the 4% CIT.
- Alternate scenario: 8% CIT rate with a WHT rate on royalty payments of 2%. Under this scenario, the WHT on royalty payments is creditable against the 8% CIT.

Companies may elect one of these scenarios at the time of applying for the benefits under the Act. However, there are other possibilities:

- 4% fixed income tax rate on Incentive Development Income (IDI), excluding income from certain investments provided by Section 2(j).
- Pioneer industries are eligible for a 1% CIT rate.
- Activities for the development in Puerto Rico of intangible property are eligible for a 0% CIT rate.
- Any exempt business having operations at a municipality located in a 'low or intermediate development zone' may reduce its CIT rate by an additional 5%.
- Any exempt business having operations in Vieques and Culebra may be totally exempt from income taxes during the first ten years of operations as established in the Act. The remaining years covered by its tax decree may qualify for a 2% CIT rate.

Under Act No. 20

- 4% CIT on export services income or
- 3% CIT when more than 90% of the eligible business's gross income is derived from export services and such services are considered strategic services, according to the criteria established in Act No. 20.

Special deductions

Special deductions under Act No. 73 are available for capital investment in buildings, structure, machinery and equipment, and the NOL carryforwards.

There are no special deductions allowed under Act No. 20.

Credits

The following credits are only available under Act No. 73. Please note that no credits are allowed under Act No. 20.

Credit for purchases of Puerto Rico manufactured product

Subject to certain limitations, the credit for purchases of products manufactured in Puerto Rico is 25% (35% in the case of recycled products).

Job creation credit

There is a credit for every incremental job applicable to exempt business starting operations after 1 July 2008. The amount of the credit (maximum of USD 5,000 per each employment) depends upon the location of the industrial development zone.

Research and development (R&D) investment credit

A 50% credit is granted for the eligible investment in R&D activities, including operational expenditures, clinical trials, infrastructure, renewable energy, or intellectual property (IP).

Act No. 22 amends Act No. 73 in order to provide that existing business that hold a tax grant under Act No. 73 will not be allowed to claim R&D credits against an electric energy, water, and/or sewer services bill, unless the PRTD certifies the availability of the credit.

Energy investment credit

A 50% credit is granted for the eligible investment in the acquisition of machinery and equipment for the creation of energy.

Energy cost credit

There is also a 3% credit (which could be increased up to 10% if certain employment requirements are met) for payments made to the Puerto Rico Power Authority during the corresponding taxable year. This credit is available for a ten-year period starting as of 1 July 2008. Additional credits (for the purpose of reducing the cost of energy) may be available to industrial units, subject to certain limitations. Act No. 22 of 2016 eliminates the energy credits to new applicants for tax grants under Act No. 73.

Technology transfer credit

A 12% credit (2% in the case of exempt businesses that opted for the alternate tax) is available for payments made to resident entities for the use or privilege of using intangible property in Puerto Rico.

Strategic projects investment credit

There is a 50% credit for eligible investment in strategic projects, including activities for the design, development, and construction of dams.

Industrial investment credit

There is a 50% credit, up to a maximum of USD 8 million, for cash invested in the purchase of 50% or more of the stock or operating assets of an exempt business that is in the process of shutting down operations, amounts used to start-up a small or medium-exempt business, or amounts used for a substantial expansion of an exempt business.

Property tax incentives

Similar to the previous incentives laws, Act No. 73 allows for a 90% property tax exemption on personal and real property. However, Act No. 73 introduced a methodology for the classification and assessment of real property owned by the exempt businesses. Under the provisions of Act No. 73, a taxpayer can self-assess one's real property tax responsibility (similar to the current personal property tax system) and remit the related tax liability due along with a real property tax return (to be issued by the MRCC) by 15 May of each year. The self-appraisal method is only applicable to real

Puerto Rico

property that has not been appraised by the MRCC and is mainly limited to machinery and equipment classified as real property. Note that this method is not available for assets such as land, buildings, and building equipment.

For purposes of Act No. 20, there is a 100% exemption from property taxes during the first five years of operations in the case of eligible services as call centres, management services, and shared services. After said five year period, a 90% exemption will apply during the term remaining under the Tax Exemption Grant.

Municipal license tax and other municipal tax incentives

Under Act No. 73, the municipal license tax exemption continues at 60% for exempted businesses. Exempt businesses operating in Vieques or Culebra are 90% exempt; small or medium-exempt businesses are 75% exempt; and central or regional corporate headquarters providing managerial services to affiliated companies are 100% exempt during the first five years after becoming eligible for the exemption.

There are no municipal tax exemptions under Act No. 20.

Foreign tax credit

Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction the foreign income and excess profit taxes paid or accrued during the taxable year to any foreign country. A foreign tax credit reduces the Puerto Rico income tax liability dollar for dollar, while a deduction reduces the Puerto Rico income tax liability at the marginal rate of the taxpayer. There are no carryforward provisions for foreign tax credit purposes.

Withholding taxes

Corporations not engaged in a trade or business in Puerto Rico are subject to a 29% WHT at source on certain gross income items (considered fixed or determinable, annual or periodical [FDAP]) from Puerto Rico sources.

FDAP income may include interest received from a related person, rents, royalties, salaries, annuities, compensation, remuneration, and net capital gains. However, if the payment received is from dividends, a 10% WHT should apply.

The payer, as a withholding agent, is responsible for the withholding and remittance of the 29% (10% in the case of dividends) to the PRTD. Such tax is due on or before the 15th day of the month following the receipt of the income by the non-resident corporation. An annual informative return is also required to be filed no later than 15 April of the following year.

Tax treaties

There are no tax treaties between foreign countries and Puerto Rico. However, the Puerto Rico Supreme Court has recognised that, although Puerto Rico is generally not a signatory party to a treaty entered into by the United States, if an international treaty with the United States does not explicitly exclude Puerto Rico, the treaty will be applicable to Puerto Rico.

Tax administration

Taxable period

The annual accounting period may be on the basis of the calendar year, a fiscal year ending on the last day of a month, or a 52/53 week year.

Tax returns

The Puerto Rico tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual income tax return by the 15th day of the fourth month following the close of its tax year. In general terms, a taxpayer can obtain an automatic extension of three months to file its income tax return. Failure to timely file can result in penalties.

A corporate taxpayer may also be subject to file a personal property tax return by 15 May and/or a volume of business declaration by the 5th business day after 15 April.

Payment of tax

A corporation must substantially satisfy its annual income tax liability, if any, through estimated income tax payments. The amount of estimated income taxes should be paid on equal instalments on the 15th day of the fourth, sixth, ninth, and 12th month of the taxable year of the corporation. The estimated payments should equal or exceed 90% of the actual tax for the year (including AMT) or, in cases where a CIT return was filed by the corporation in the preceding year, 100% of such tax liability. Any tax not covered by the estimated tax payments should be paid along with the CIT return. Failure to pay the tax by the due dates indicated above may result in a penalty of 10% of the instalment due.

Annual report

Every corporation is required to file an annual corporation report with the Puerto Rico Department of State. This annual report must be filed by the 15th day of April along with a USD 150 annual fee and a balance sheet as of the close of operations of the prior year. The report should be filed through the Puerto Rico Department of State's website. In the case of for-profit corporations, if the volume of business exceeds USD 3 million, the annual report must be accompanied by a balance sheet certified by a certified public accountant (CPA) licensed in Puerto Rico. In the event that the volume of business does not exceed USD 3 million, a balance sheet prepared under Generally Accepted Accounting Principles (GAAP) by a person with a general knowledge in accounting has to be submitted along with the corporate annual report. An extension of 60 days (an additional 30-day period may be requested) for filing the annual report can be obtained if timely requested. The Secretary of State is authorised to impose a penalty for failure to timely or accurately file the annual corporate report that would be between USD 75 and USD 2,000 if a non-profit corporation, and between USD 750 and USD 2,000 if a for-profit corporation.

Audited financial statements

Accounting records must be prepared in accordance with the GAAP followed in the United States. Domestic (i.e. incorporated in Puerto Rico) or foreign corporations with volume of business of more than USD 3 million must include, with their CIT return, audited financial statements of the Puerto Rico operations for the accounting year ended on or before the preceding 31 December. The financial statements should be submitted with an audit report issued by a CPA licensed in Puerto Rico.

Also, qualified and disclaimer opinions are now allowed to the extent that the qualification or disclaimer does not result from a restriction in scope. However, no adverse opinions are allowed. All groups of related entities engaged in a trade or business in Puerto Rico are required to file consolidated or combined financial statements (CFS), which should contain a consolidating schedule and general information of the related parties. The determination of the gross income threshold for purposes of the audited financial statement requirement should be made taking into consideration the volume of business of all the entities within a controlled group. In the case of foreign entities, these will be able to submit audited financial statements with their Puerto Rico operations on a stand-alone basis; in other words, the CFS will not be required. The requirement for audited financial statements will not apply to non-profit organisations.

Puerto Rico

With respect to the municipal license and personal property tax filings, the threshold amount for the audited financial statements requirement is gross revenues of more than USD 3 million, regardless of the corporate residency (i.e. foreign or domestic).

Supplemental information is also required to be included as part of the audited financial statements to be filed with the income tax return, volume of business declaration, and personal property tax return. The due date for the supplemental information is the last day of the month following the CIT due date, including extensions (i.e. 31 August 2016). The supplemental information must be submitted electronically and separately from the audited financial statements.

Tax audit process

Many taxpayers are under audit by the PRTD. The audits may include income, payroll, withholding, and sales and use taxes.

Statute of limitations

The PRTD generally has four years after an original return is filed to assess income, payroll, and sales and use taxes. A return will be deemed to have been filed on the later of (i) its due date or (ii) the date the return was actually filed.

Topics of focus for tax authorities

Currently, the PRTD is focused on SUT, intercompany loans, withholding at source, and payments to foreign affiliates, among others.

Significant developments

Implementation of a value-added tax (VAT) by 2018/19

Currently, there is no VAT or sales tax in Qatar or other Gulf Cooperation Council (GCC) countries. The GCC plans to introduce a VAT common framework, which will form the legal basis for the introduction of a VAT system in each of the GCC member states (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates [UAE]). Certain GCC member states (including Kuwait, Oman, and the UAE) have announced that VAT will be implemented by 1 January 2018. Other member states, including Qatar, are expected to make similar announcements shortly. The anticipated VAT rate across the GCC may be between 3% and 5%.

Wage protection system

Qatar recently introduced a wage protection system (WPS) requiring all salaries of employees of a Qatar branch or company in the State of Qatar to be paid into an employee bank account in Qatar and various details on each employee to be provided. This information may be used to cross reference to Minister of Labour records of registered employees and possibly to wages and salaries cost in financial statements.

Taxation of non-resident capital gains

Following a change in approach by the Qatar tax authorities, certain practical barriers to non-residents filing tax returns have been overcome. In particular, the historic requirement that in order to file a Qatar tax return a company must have a Qatar tax card (which is not possible where the non-resident does not have either a formal legal presence [i.e. a Commercial Registration] or is registered as a permanent establishment [PE] with the Qatar tax authorities) has been removed. As the practical barriers to non-residents in respect of filing a tax return have been removed, it may be necessary for non-residents to consider whether they have realised Qatar-sourced income and thus are required to file Qatar tax returns and pay the tax due. This may be of particular relevance to non-residents selling shares in a Qatar company as one must receive a no objection letter from the tax authorities or have the exchange officially stamped in order to register the change in share ownership.

Introduction of electronic tax administration

Any correspondence (e.g. tax returns, withholding tax [WHT] statements, extension requests, tax card applications, objections, appeals) should be submitted to the tax department through the new electronic filing system. However, hard copies had to be filed in addition to the online submission until April 2016. From 1 April 2016, taxpayers are required to file certain documents (application for tax registration and tax cards/ renewal of tax cards, submission of tax returns and audited financial statements, submission of monthly WHT statements, application for WHT refunds, application for approval in respect of sale/transfer of shares) only via the online tax administration system.

The Qatar Financial Centre (QFC) has also now introduced online filing. This was initially not mandatory; however, from 1 January 2016, all tax returns must be

Qatar

submitted online using the QFC Tax Portal. From this date, the QFC tax department does not accept hard-copy tax returns or tax returns submitted via email.

New Commercial Companies Law

According to the new Commercial Companies Law, which became effective on 7 August 2015, a number of significant changes to company corporate guidance have been introduced. In particular, the law established a minimum share capital of 200,000 riyals (QAR) for limited liability companies (LLCs), renewed a standard version of the Memorandum of Association and licence application forms, and introduced new fines and penalties amounting to a maximum of QAR 1 million. Entities that are subject to the new rules had to ensure that they were compliant with them before 7 February 2016.

Taxes on corporate income

An entity that is wholly or partially foreign owned and that derives income from sources in Qatar is taxable in Qatar. In the case of a joint venture, the tax liability of the joint venture is dependent upon the foreign partners' share of the joint venture's profit. Currently, no corporate income tax (CIT) is levied on a corporate entity that is wholly owned by Qatari nationals and GCC nationals.

Unless specifically exempt from tax, an entity will be taxable in Qatar if it has generated Qatar-source income, regardless of the place of its incorporation.

Taxable income generally is subject to a flat (CIT) rate of 10%, with certain exceptions available.

The following tax rates apply in the specific circumstances noted:

- If a special agreement was reached with the government of Qatar prior to 1 January 2010, the rate specified in the agreement continues to apply. If no rate is specified in the agreement, a rate of 35% will be used.
- The rate applied with respect to oil operations, as defined in Law No. 3 of 2007, may not be less than 35%.
- Payments made to non-residents with respect to certain service activities not connected with a PE in Qatar are subject to WHTs (*see the Withholding taxes section*).

The amount of tax payable is reduced for companies that are partly foreign owned, depending on the extent of local ownership.

Local income taxes

There are no local, state, or provincial government taxes on income in Qatar.

Corporate residence

It is important to recognise that residence is not the basis used to determine whether an entity is taxable for CIT purposes in Qatar. Accordingly, a CIT exposure in Qatar may arise even if a company is not resident in Qatar. However, residence is relevant when considering whether WHT will apply on payments received rather than CIT.

A company is resident in Qatar if it is incorporated in accordance with Qatari laws, its head office is situated in Qatar, or its place of effective management and control is in Qatar.

Permanent establishment (PE)

A PE is defined as a fixed place of business through which the business of a taxpayer is wholly or partly carried on. A PE is deemed to include a branch, office, factory,

workshop, mine, oil or gas well, quarry, a building site, an assembly project, or a place of exploration, extraction, or exploitation of natural resources. A PE also includes activity carried on by the taxpayer through a person acting on behalf of the taxpayer or in the taxpayer's interest, other than an agent of an independent status.

To date, the Qatar tax department has permitted a PE to register for tax purposes and file an annual tax return. However, if a PE is not registered in the commercial register, it is in contravention of the Foreign Investment Law. Following introduction of the tax administration system (TAS), the risk may increase of the Qatar tax department querying why the PE has not registered in the commercial register as the commercial registration number is ordinarily required as part of the online filing process.

Other taxes

Value-added tax (VAT)

Currently, Qatar imposes no VAT or sales tax on operations in Qatar. However, the introduction of VAT in the GCC under a common framework is expected by 2018/19. The anticipated tax rate may be between 3% and 5%.

Customs duties

Customs duties are applied to goods with an origin outside the GCC countries, normally at a rate of 5%. Higher rates sometimes apply for specific types of goods, such as tobacco products. Temporary import exemptions are sometimes available.

Excise taxes

There are no excise taxes in Qatar.

Property taxes

There are no property taxes in Qatar. However, fees may be payable to the government by the owner on the registration of property and by the landlord on the registration of leases.

Transfer taxes

There are no transfer taxes in Qatar; however, share transfers of state entities require formal confirmation of 'No Objection' from the tax authorities prior to the transfer being updated in the commercial register.

Stamp taxes

There are no stamp taxes in Qatar.

Social security contributions

Employers have to pay social insurance in respect of Qatari employees but have no obligations for employees of other nationalities.

Branch income

The profits of a branch owned by a foreign parent entity are subject to the same tax rules as apply to other forms of taxable entities.

Income determination

CIT is levied on a company's Qatar-source income. Some examples of Qatar-source income include:

Qatar

- Income derived from an activity carried on in Qatar.
- Income derived from contracts wholly or partially performed in Qatar.
- Income from real estate situated in Qatar, including income from the sale of shares of companies with assets consisting of mainly real estate situated in Qatar.
- Income from shares in companies resident in Qatar.

Inventory valuation

Inventory must be valued in accordance with International Financial Reporting Standards (IFRS).

Capital gains

Any chargeable gains on the sale of capital assets are taxed as ordinary income. Specific rules exist in respect of gains realised on the disposal of real estate. Capital gains generated by a non-resident on the sale of shares in a Qatar company are an area of focus for the tax authorities (*see the Significant developments section*).

Dividend income

Dividends are not taxable in Qatar if received from profits that have been subject to Qatar tax or from companies that are exempt from Qatar tax.

Interest income

Interest arising in Qatar and bank interest realised outside Qatar, if it results from the taxpayer's activity in Qatar, are taxed as ordinary income.

Foreign income

Non-Qatar-sourced income is not subject to tax in Qatar.

Deductions

Taxable income is determined after deducting all expenditures, costs, and losses incurred to generate gross income. A deduction is usually available for expenses that are not considered to be 'capital' in nature and are incurred in generating Qatar-source revenue.

Depreciation

Depreciation should be calculated in accordance with rates specified by the Qatar tax law and the related regulations. In practice, however, the deduction for depreciation is restricted to the amount of the accounting depreciation.

For certain assets, depreciation is calculated on the cost on a straight-line basis. The rates of depreciation are as follows:

Assets	Depreciation rate (% per annum)
Buildings and constructions, including roads, bridges, pipelines, storage tanks, and port ducts inside the establishment and excluding ready-made light constructions	5
Ships and boats	10
Airplanes and helicopters	20
Drilling instruments	15
Intangible assets:	
Pre-establishment expenses	50
Trademarks, patents, and the like	Amortised over the expected lifetime of the asset, provided that the amortisation allowance shall not exceed 15% per annum.

Other assets will be divided into groups and depreciated on a reducing-balance basis. The rates of depreciation are as follows:

Group	Asset	Depreciation rate (% per annum)
I	Computer hardware and software accessories	33.33
II	Machinery, plant, equipment, electrical devices, means of transportation of goods and persons, including cars, vehicles, trucks, and cranes	20
III	Furniture, fixtures and fittings, and other fixed assets	15

Goodwill

There are no specific provisions dealing with the taxation of goodwill. Accordingly, the accounting tax treatment should be followed from a tax perspective.

Interest expenses

Interest on loans used for the purpose of the taxpayer's activity is tax deductible, except where the loan is between a Qatar branch and its head office or a party related to the head office.

Bad debt

Bad debts approved by the tax authorities in accordance with the criteria set out in the tax law are deductible.

Charitable contributions

Donations, gift aid, and subscriptions to charitable, humanitarian, scientific, cultural, or sporting activities paid in Qatar to government authorities or public bodies are deductible, provided the value does not exceed 5% of net profit in the year in which the deduction is claimed.

Fines and penalties

Fines and penalties are not deductible for Qatar tax purposes.

Taxes

Taxes and duties, other than the income tax, provided for in the law are deductible.

Other significant items

Other deductible expenditures include the following:

- Employee costs (including salaries, wages, gratuities, and other end of service benefits).
- Losses resulting from the sale of assets.
- Rents.
- Insurance premiums.

Net operating losses

Losses may be deducted from net income during the year. Losses can be carried forward for three years after the year in which they were incurred. Losses cannot be carried back.

Allocations of overhead costs to branches

The branch's share of head office expenses (i.e. indirect or allocated overhead) generally is deductible only up to a certain limit. The deduction is capped at 3% (1% for banks) of the total revenue less certain other costs.

Group taxation

There is no definition of a 'group' for Qatar tax purposes; consequently, there is no concept of group taxation.

Transfer pricing

The executive regulations, which supplement Qatar's tax law, have made it clear that the anti-avoidance provision will be applied to related-party transactions. In determining the arm's-length value, the unrelated comparable price method should be used (i.e. the price of services or goods that would have been applied should the transaction be between unrelated parties). It is possible to make an application to the Qatar tax authorities to use another method approved by the Organisation for Economic Co-operation and Development (OECD).

Thin capitalisation

There are no specific thin capitalisation rules in Qatar, although consideration should be given to the anti-avoidance provision noted above.

Controlled foreign companies (CFCs)

There are no CFC provisions in Qatar.

Tax credits and incentives

Foreign tax credit

The executive regulations of Qatar's tax law provide that income tax paid outside Qatar is deductible as an expense for the purposes of determining taxable income, provided such income is taxable in Qatar.

Qatar Science and Technology Park (QSTP)

Qatar has established the QSTP, which is aimed at entities with research and development (R&D) activities. QSTP entities can be fully exempt from Qatar tax; however, tax exempt entities are required to file tax returns.

Other tax exemptions

An application for a tax exemption may be made for certain projects that are considered to be strategically significant to the Qatar economy. The exemptions are generally granted for a period of three or six years. Applications for an exemption are assessed based on certain criteria set out in the Qatar tax law.

Notwithstanding the fact that an exemption is granted, an entity that is exempt is still required to file a tax return under the Qatar tax law.

Withholding taxes

WHT is levied on certain payments made to non-residents in relation to royalties and technical services (the applicable rate is 5%) and on interest, commissions, brokerage fees, directors' fees, attendance fees, and any other payments for services carried out wholly or partly in Qatar (the applicable rate is 7%). The executive regulations have excluded certain payments from the scope of WHT. Dividends are not subject to WHT.

The company that makes the payment to its foreign supplier is required to withhold the tax and remit to the tax department the funds that were withheld by the 16th day of the following month. In the event that the company does not make a payment to the tax department, the company will be liable for a penalty equal to the amount of unpaid tax due, in addition to the WHT.

Retention system

Pursuant to circulars issued by the tax department, a retention system is in place whereby certain final contract amounts are required to be retained from payments made to Qatari resident entities and non-resident entities with a PE in Qatar in connection with services performed in Qatar. All ministries; government departments; public, semi-public, and private establishments; and Qatar taxpayers are required to retain. Companies resident in Qatar and permanent branches can secure a release of the final payment by presenting a tax card. A retention equivalent to the higher of 3% of the contract value (less the value of supply and work carried out abroad) or the final contractual payment will apply to temporary branches registered for activities of at least one year until they produce a no objection letter from the Qatar tax authorities. All other non-residents are expected to be subject to WHT in respect of payments that fall within the scope of WHT.

Tax treaties

Qatar has a growing double taxation treaty (DTT) network with over 60 DTTs currently in force. The WHT rates under these treaties in respect of dividends, interest, and royalties are as follows:

Recipient	WHT (%)			Effective date
	Dividends *	Interest	Royalties	
Algeria	0	0	0/5 (12)	1 Jan 2012
Armenia	5/10 (1)	5	5	1 Jan 2008
Austria	0	0	5	1 Jan 2012

Vietnam	5/12.5 (17)	0	5/10 (18)	1 Jan 2012
Yemen (11)				1 Jan 2004

* Dividends are not subject to WHT according to domestic tax law of Qatar.

Notes

- 5% if capital exceeds 100,000 United States dollars (USD), and 10% in all other cases.
- 0% if the beneficial owner is a company that owns at least 10%, 5% if 10% direct participation is held by an individual who has resided in the relevant state for a period of at least 48 months, and 10% in all other cases.
- 5% if the beneficial owner is a company that has owned, directly or indirectly, at least 25%, and 10% if participation is less than 25%.
- 5% if the beneficial owner is a company that owns at least 10%, and 10% in all other cases (i.e. less than 10% shareholding).
- 0% if the beneficial owner is a company that owns at least 7.5%, and 10% in all other cases (i.e. less than 7.5% shareholding).
- 5% if the beneficial owner is a company that owns at least 10%, and 15% in all other cases (i.e. less than 10% shareholding).
- 5% if the beneficial owner is a company that directly holds at least 10%, 10% if the beneficial owner is an individual that directly holds at least 10%, and 15% in all other cases.
- 10% if the beneficial owner is a company that has owned at least 25%, and 15% in all other cases (i.e. less than 25% shareholding).
- 0% where the beneficial owner of the interest carries on business in the other contracting state where the interest arises (i.e. through a PE therein), and 5% if the contracting company does not have a PE.
- 0% if interest arising in contracting state is derived from government debt, and 10% if the contracting company does not have a PE.
- It should be noted that there is limited information available in respect of the treaty with this country, and the date provided above may be the date on which the treaty was signed or entered into force rather than its effective date.
- Reduced to zero if the beneficial owner has a PE in the contracting state.
- 0% if the beneficial owner is a company, and 5% in all other cases.
- 5% if the beneficial owner is a bank, and 10% in all other cases.

15. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends. 7.5% in all other cases.
16. 0% if the interest derived from a contracting state and paid for the government or the central bank in the other state. 10% in all other cases.
17. 5% of the gross amount of the dividends if the beneficial owner is a company that holds, directly or indirectly, at least 50% of the capital of the company paying the dividends or has invested more than USD 10 million in the capital of the company paying the dividends. 12.5% in all other cases.
18. 5% of the gross amount of the royalties in respect of payments of any kind received as a consideration for the use of, or the right to use, any patent, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. 10% in all other cases.
19. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
20. 0% if the interest is derived from government debt or arises in respect of any debt instrument listed on a recognised stock exchange. 10% in all other cases.
21. 5% if the beneficial owner is a company that has owned, directly or indirectly, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power or of the total issued shares of the company paying the dividends, and if the company paying the dividends is not entitled to a tax deduction of dividends. 10% in all other cases.
22. 0% if interest is derived from government debt or if the beneficial owner is either: (i) a bank, (ii) an insurance company, (iii) a securities dealer, or (iv) any other enterprise, provided that, in the three taxable years preceding the taxable year in which the interest is paid, the enterprise derives more than 50% of its liabilities from the issuance of bonds in the financial markets or from taking deposits at interest and more than 50% of the assets of the enterprise consist of debt-claims against persons that are not associated with the enterprise. 10% in all other cases.
23. 10% if the beneficial owner is a company (excluding partnerships) that directly holds at least 10% of the capital of the paying company. 15% in all other cases.
24. 0% if dividends are paid to the other contracting state. 5% if the beneficial owner is a company (other than a partnership) that holds at least 10% of the capital of the company paying the dividends. 10% in all other cases.

Tax administration

Taxable period

The tax year is generally the same as the calendar year, although advance approval may be sought from the Qatar tax authorities to use a company's accounting year-end.

Tax returns

The tax return is due within four months from the end of a company's accounting period.

Payment of tax

The tax payable is based on the tax declaration and should be paid on the same day that the tax return is due.

Late filing penalties

The Qatar tax law contains a penalty regime, which imposes a penalty for the late filing of a tax return. In addition, a penalty applies where there is a late payment of tax.

Objection and appeals process

It is possible for a taxpayer to initially object directly to the tax department regarding a decision related to a tax position. If the objection is unsuccessful with respect to altering the tax department's decision, an appeal may be made by the taxpayer to the Tax Appeals Committee. Based on the Tax Appeals Committee's decision with respect to the appeal, a final appeal may be made by either the tax department or the taxpayer to the administrative chamber of the court. The law prescribes time limits for each stage of the appeal process.

Accounting and audit requirements

A company's CIT return is required to be accompanied by audited financial statements if the company's capital or profit exceeds QAR 100,000 or the head office is situated outside Qatar. The audit report must be signed by a Qatar registered auditor.

Qatar tax law requires accounts to be prepared in accordance with IFRS.

Qatar

Accounting record retention

All accounting books, registers, and documents relating to activity in Qatar are required to be retained in Qatar for a ten-year period.

Anti-avoidance provision

The Qatar tax law contains an anti-avoidance provision that gives the Qatar tax authorities wide powers to counteract transactions that have been carried out with a tax avoidance purpose. These powers include substituting an arm's-length value or re-characterising transactions.

Topics of focus for tax authorities

The following areas appear to be the focus of the Qatar tax authorities from a tax compliance perspective:

- Representative offices of non-residents are being required to file tax returns, notwithstanding the fact that they may only be promoting their business.
- The Qatar tax authorities are closely examining the taxpayer's activities to establish whether or not a PE exists. This is a particular area of focus where a taxpayer submits a claim for a refund of WHT on the basis of application of the provisions of a DTT. If a taxpayer has a PE, the Foreign Investment Law requires that PE to be formally registered as a company or a temporary branch.
- Related-party transactions and large and unusual items of expenditure are being scrutinised by the Qatar tax authorities. *See the Group taxation section for comments on the anti-avoidance provision and transfer pricing.*
- The allocation of head office general and administrative expenses to a Qatar branch of a foreign company.
- Capital gains generated on the sale of shares by a non-resident in a Qatari company.

Other issues

The Qatar Financial Centre (QFC)

The QFC was established in 2005 to attract companies in the financial services sector. The QFC has its own tax regulations and rules, and the State of Qatar tax laws do not apply to the licensed activities of entities established in the QFC.

The QFC is an onshore regime that operates within its own legal, tax, and regulatory framework, which is independent of, but runs parallel to, the existing framework in the State of Qatar. The QFC has its own Civil and Commercial Courts, as well as an independent Regulatory Tribunal. The legal framework is modelled closely after the English common law and existing major financial centres.

QFC-established entities can access the local market, be 100% foreign owned, are subject to no currency restrictions, and can repatriate 100% of their profit. Entities can be based at premises anywhere in Qatar (provided those premises are approved by the QFC).

Regulated activities

Regulated activities are those undertaken by financial firms (such as investment and retail banks, insurance companies, fund and wealth management firms, brokerage offices, and securities operations).

Non-regulated activities

Permitted non-regulated activities were originally limited to activities in support of financial firms (e.g. services by accounting, audit, and legal firms). The QFC subsequently introduced a number of changes to expand the scope of permitted non-regulatory activities to include services (as long as these are business-to-business [B2B]) such as intellectual property (IP) management and treasury for all sectors and consultancy services in relation to information technology (IT), real estate, recruitment,

and sports and event management. The opportunity now exists for a business that is not regulated and that might previously have set up contract-specific temporary branches under Qatar state law to incorporate within the QFC as a 100% foreign-owned entity. The QFC is also available to Qatari investors, and they can enjoy benefits similar to those awarded under the State Tax Law (i.e. exemption from CIT), provided the business is 90% Qatari owned.

Tax environment

The key features of the QFC tax environment are as follows:

- Unregulated QFC LLCs with a minimum 90% Qatari ownership benefit from a 0% concessionary CIT rate.
- Low general CIT rate of 10% on locally sourced profits.
- Extensive tax exemptions for qualifying activities, dividends, and capital gains.
- No WHT on payments from Qatar.
- Access to Qatar's DTT network with over 60 jurisdictions.
- VAT may be introduced in the future, but is currently not applicable.
- No personal income tax (PIT) for expatriate employees.
- Online tax administration system.
- Advance ruling services providing QFC entities with a high degree of certainty.
- Statutory protection for investors, whereby QFC tax authority must review tax returns within 12 months of filing.
- Group loss relief available.
- No tax exemption for profits of Qatari partners in joint ventures where the Qatari ownership is less than 90%.

Intergovernmental agreement (IGA) with the United States

The State of Qatar entered into a Model 1B IGA effective 7 January 2015, replacing the 'in principle' agreement previously in place. Practical considerations regarding the implementation of the Foreign Account Tax Compliance Act (FATCA) into local law, including form of reporting and local deadlines, remain under discussion.

Significant developments

Corporate taxation

- Starting 1 January 2016, the withholding tax (WHT) rate for dividend income derived by non-residents from Romania decreased from 16% to 5%. This is similar to the WHT rate that applies to the distribution of dividends to Romanian legal entities and Romanian resident individuals.
- The New Tax Code, effective as of 1 January 2016, unconditionally exempts from profit tax any dividends received by Romanian profit taxpayers from Romanian legal entities. For dividends received from foreign legal entities, the existing conditions for applying the participation exemption will remain effective (i.e. exemption applies if there is a minimum shareholding percentage of 10% for an uninterrupted period of at least one year).
- The New Tax Code, effective as of 1 January 2016, incorporates the recent amendments to the European Directive no. 2011/96/EU, relating to the application of a common system of taxation in the case of parent companies and subsidiaries of different member states. The legislation introduces the anti-abuse rule for preventing unlawful tax practices used to obtain tax benefits contrary to the Directive's principles. Also, dividends received by a Romanian legal entity from a foreign legal entity under certain conditions will not be taxed as long as those dividends are not treated as deductible expenses by the paying subsidiary.
- Starting from 1 January 2016, the amendments applicable to domestic mergers, total or partial spin-offs, transfer of assets, and exchange of shares have been harmonised with those applicable to similar cross-border transactions. The neutrality of in-kind contributions to a company's equity has been eliminated, except for cases involving a transfer of a going concern. Transfers carried out during a partial spin-off will not be subject to profit tax only if a transfer of a going concern takes place and the transferor maintains at least one line of activity.
- The Romanian anti-abuse rules in the New Tax Code, effective as of 1 January 2016, define 'artificial cross-border transaction' as a cross-border transaction or series of cross-border transactions that have no economic substance and that cannot be used regularly within ordinary business practices, their main purpose being to avoid taxation or to obtain tax advantages that could not be gained otherwise. Cross-border transactions are those transactions taking place between two or more entities, out of which at least one is situated outside Romania. Cross-border artificial transactions are not considered part of the scope of the conventions for the avoidance of double taxation.
- As of 1 January 2016, the construction tax for agricultural constructions is eliminated. For other constructions, it will be eliminated as of 1 January 2017.

Value-added tax (VAT)

- Starting 1 January 2016, the standard VAT rate of 24% has been reduced to 20%. As of 1 January 2017, it will be reduced to 19%.

- As of 1 January 2016, according to the provisions of Law no. 227/2015 regarding the new Fiscal Code, the supply of school manuals, books, newspapers, and some magazines, as well as the supply of services consisting of the allowance of access to castles, museums, cinemas, and others, is no longer subject to the 9% VAT rate, but, rather, to the reduced VAT rate of 5%. Additionally, sports events are also included in the category of operations subject to the reduced VAT rate of 5%.
- As of 1 January 2016, the VAT reverse-charge mechanism is applicable to the supply of buildings, parts of buildings, and plots of land, and to the supply of mobile phones, PC tablets, laptops, gaming consoles, and devices with integrated circuits. The reverse-charge mechanism will be applied to the supply of mobile phones, PC tablets, etc. only until 31 December 2018.

Taxes on corporate income

The standard profit tax rate is 16% for Romanian companies and foreign companies operating through a permanent establishment (PE) in Romania. Resident companies are taxed on their worldwide income, unless a double tax treaty (DTT) stipulates otherwise. Non-resident companies are taxed on all income derived from Romanian taxpayers, regardless of whether the services are rendered in Romania or abroad.

The profit tax due for nightclubs and gambling operations is either 5% of the revenue obtained from such activities or 16% of the taxable profit, whichever is higher.

Micro-company tax regime

Micro-companies are subject to a mandatory revenue tax rate (*see details below*) in lieu of the standard profit tax, provided they meet all the following criteria at the end of the previous year:

- Derive income from activities other than banking, capital markets, insurance and reinsurance, and gambling.
- Derive income from consulting and management activities that accounts for no more than 20% of their total revenues.
- Their annual turnover is lower than the Romanian leu (RON) equivalent of 100,000 euros (EUR) starting from 1 January 2016 (previously EUR 65,000).
- Their shares are held by entities other than the state or local authorities.
- Must not be involved in a registered procedure of dissolution with liquidation.

Payment of the tax and filing of the returns is made quarterly, by the 25th day of the month following the end of the quarter for which the tax is calculated.

Newly established companies are required to follow the micro-company tax regime starting with the first fiscal year. Newly incorporated Romanian legal entities that, upon registration with the Trade Registry, are due to perform banking, insurance and reinsurance, consultancy and management, or gambling activities are excepted from this rule. If, during a fiscal year, a micro-company registers a turnover above EUR 100,000, that company will pay profit tax starting with the quarter in which the limit was exceeded. Companies that, at the moment of incorporation, have a share capital of at least EUR 25,000 may opt to apply the profit tax rules during the first fiscal year.

Micro-companies have the obligation to communicate to the tax authorities the change in their tax system by 31 January of the year in which the tax is due.

Note that if revenues derived from management and consultancy activities exceed 20% of its total revenues, a micro-company becomes a profit taxpayer.

Starting from 1 January 2016, new legislative provisions have been introduced, as follows:

Romania

- A tiered system of micro-company tax rates, depending on the number of employees, has been introduced:
 - 1% for micro-companies with two or more employees.
 - 2% for micro-companies with one employee.
 - 3% for micro-companies with no employees.
- Taxpayers operating in the oil sector are excluded from the scope of the micro-company tax regime.
- A reduced rate of 1% has been introduced for newly set up Romanian legal entities that have at least one employee and have been incorporated for a minimum period of 48 months, with their shareholders not having held equity in other legal entities. This rate is only applied to the first 24 months from registration of the legal entity; the law also provides other requirements for the application of the reduced rate.
- The method for calculating the profit tax for taxpayers that shift from the micro-company tax regime to the profit tax regime during a fiscal year has been amended. For the purpose of calculating the profit tax, only the revenues and expenses recorded starting with the quarter in which the shift was made are taken into consideration. Under the prior legislation, all revenues and expenses recorded since the beginning of the fiscal year were considered.
- New deductions to the taxable base have been introduced, including the revenues obtained from a state with which Romania has concluded a DTT if these revenues have been taxed in the foreign state.

Local income taxes

There are no local taxes on corporate income.

Corporate residence

A company is considered tax resident in Romania if it was set-up under Romanian law or has its place of effective management in Romania.

Starting from 1 January 2016, a definition of the 'place of effective management' (POEM) is introduced, according to which POEM represents the place where strategic economic decisions necessary to ensure the management of the foreign company are taken and/or the place where the most senior person or group of persons who manage and control the activity of the foreign entity operate.

Permanent establishment (PE)

A PE is generally defined as being the place through which the activity of a non-resident company is conducted, fully or partially, directly or through a dependent agent.

Once a PE is created, Romania has the right to tax the profits of the non-resident parent company derived from the activities performed through the PE.

Starting from 1 January 2016, the provision according to which, in defining the PE concept, reference can be made to Article 5 - 'Permanent establishment' of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention has been transferred from the Methodological Norms to the Fiscal Code.

The Romanian legislation explicitly states the conditions that trigger a PE:

- Fixed base PE is created through a place of business with a certain degree of permanency through which business is conducted in Romania (with some exceptions).
- Agency PE is created through agents with a dependent status that operate in Romania on behalf of the foreign company.

The registration, reporting, and tax payment requirements for a PE are similar to those for a Romanian company.

Consolidation of PE revenues and expenses belonging to the same foreign legal entity is possible. *For further information, please see the Group taxation section.*

Other taxes

Value-added tax (VAT)

As of 1 January 2016, the standard VAT rate is 20% (previously 24%). The rate will be reduced to 19% as of 1 January 2017. The standard VAT rate is applied to all supplies of goods and services (including imports) that neither qualify for an exemption (with or without credit) nor for a reduced VAT rate.

The reduced VAT rate of 9% is levied on medicines for human and veterinarian use; accommodation in hotels or in areas with a similar function, regardless of the type of accommodation (accommodation with/without breakfast, half-board/full-board/all-inclusive accommodation); supply of prostheses and orthopaedic products; supply of medicines for human and veterinary use; accommodation and catering services, except for alcoholic beverages, other than beer; supply of food, including non-alcoholic drinks, for human and animal consumption; supply of drinking water; and irrigation water used in agriculture.

As of 1 January 2016, the supply of school manuals, books, newspapers, and some magazines, as well as the supply of services consisting of the allowance of access to castles, museums, cinemas, and others, is no longer be subject to the 9% VAT rate, but, rather, to the reduced VAT rate of 5%. Additionally, sports events are also included in the category of operations subject to the reduced VAT rate of 5%.

VAT exemption without credit applies to a range of activities, including the supply of services in relation to banking, finance, and insurance. However, some financial services are subject to 20% VAT (e.g. factoring, debt collection, managing, and depositing certain equity papers).

There are also operations exempt with credit (i.e. deduction right for the related input VAT), such as the following:

- Supply of goods shipped or transported outside the European Union (EU), and related services.
- Intra-Community supply of goods.
- International transport of passengers.
- Goods placed into free trade zones and free warehouses.
- Supply of goods to a bonded warehouse, a VAT warehouse, and related services.
- Supply of goods that are placed under suspensive customs regimes.
- Supply of services in connection with goods placed under suspensive customs regimes or goods placed into free trade zones.
- Supply of goods and services to diplomatic missions, international organisations, and North Atlantic Treaty Organization (NATO) forces.

VAT on imported goods will continue to be paid at customs until 31 December 2016, except for taxable persons registered for VAT purposes that obtain an import VAT deferment certificate from the customs authorities. For these taxpayers, the VAT is not paid in customs but shown in the VAT return as both input and output VAT. The import VAT deferment is available only to companies for which the value of imports performed in the previous year/previous 12 consecutive months has exceeded the threshold of RON 100 million to companies with Approved Economic Operators (AEO) status and to those authorised to perform in-house customs clearance formalities.

Romania

The rules for establishing the place of VAT taxation for supply of goods and services are determined based on the same rules as those presented in the EU 2006/112/EC and EU 2008/8/EC Directives. Services provided by non-resident entities to Romanian companies with deemed place of supply in Romania are subject to Romanian VAT under the reverse-charge mechanism, provided that no VAT exemption is applicable.

VAT consolidation

Companies that are legally independent but are closely related in terms of financial, economic, and organisational purposes may choose to form a tax group as long as they are administered by the same competent fiscal body. However, transactions between the members of the group fall within the scope of VAT.

Reverse-charge mechanism

Under the VAT reverse-charge mechanism, VAT is not actually paid, but only shown in the VAT return as both input and output tax, provided that both the beneficiary and the supplier are registered for VAT purposes.

The reverse-charge mechanism applies either for intra-Community acquisitions of goods performed in Romania or for services performed by non-resident entities that are not established, nor have a fixed establishment, in Romania. The place of supply of services is where the beneficiary is established or has a fixed establishment (e.g. consultancy, marketing services).

Domestic supplies of cereals and industrial plants performed between companies registered for VAT purposes will be subject to the reverse-charge mechanism. The measure applies until 31 December 2018.

As of 1 January 2016, the application of the reverse-charge mechanism has been extended to the supply of buildings, parts of buildings, and plots of land, as well as, until 31 December 2018, to the supply of mobile phones, PC tablets, laptops, gaming consoles, and devices with integrated circuits.

Limited VAT deduction right

The VAT deduction right related to the acquisition of road vehicles used for the transport of passengers and vehicles that meet certain characteristics, as well as the acquisition of fuel and all related services used for the respective vehicles, is limited to 50%, except for some specific exceptions (e.g. vehicles used by sales agents, taxi, transport services).

VAT compliance

The annual turnover threshold for VAT registration in Romania is the Romanian leu equivalent of EUR 65,000. Companies surpassing this VAT registration threshold will be obligated to collect VAT for the advance payments received before registering for VAT purposes, related to goods delivered/services performed after the registration date, as of 1 January 2016.

As a general rule, the fiscal period is the calendar month. For taxable persons registered for VAT purposes whose previous year-end turnover did not exceed EUR 100,000, the fiscal period is the calendar quarter.

Taxable persons must keep complete and detailed records for calculation of VAT liabilities.

VAT returns should be submitted to the tax authorities by the 25th day of the month following the end of the fiscal period; the VAT payment is due by the same date. The VAT return can be submitted by electronic means.

Taxable persons not registered for VAT purposes in Romania and not required to register are liable to pay VAT and to submit a special VAT return on services rendered by non-

residents with a deemed place of supply in Romania. These obligations must be fulfilled by the 25th day of the month following that when the services are supplied.

Taxable persons are required to file VAT statements related to acquisitions/supplies of goods/services performed on Romanian territory on a monthly/quarterly basis, based on invoices issued/received to/from taxable persons registered for VAT purposes in Romania.

A taxable person registered for VAT purposes who does not exceed the exemption threshold of EUR 65,000 during the course of a calendar year may request deregistration from the VAT registered persons record between the first and tenth day of each month following the fiscal period used (month or quarter).

The cash accounting VAT scheme (CAVS)

The CAVS is optional for taxpayers with a turnover lower than RON 2,250,000 registered in the previous year and for newly founded companies. The right to deduct the input VAT for the acquisitions of goods/services from companies applying the CAVS is deferred until the date the payment is performed.

Customs and international trade

Customs duties

The customs duties are those specified in the EU Common Customs Tariff and are expressed as a percentage applied to the customs value (i.e. *ad valorem* taxes), as a fixed amount applied to a specific quantity (i.e. specific taxes), or as a combination of the above.

Agricultural products (i.e. products from chapters 1 to 24 of the EU Common Customs Tariff) are subject to specific taxation.

In certain cases (e.g. meat), the customs duty rate is established with regard to the cost, insurance, and freight (CIF) or the entry price of the products. In other cases, the customs duty rate is established by adding additional duties, such as agricultural components, to the *ad valorem* tax.

Customs value

The customs value is determined and declared by importers in accordance with the provisions of the Union Customs Code and its Delegated and Implementing Regulations, which took over the rules set up by the World Trade Organization (WTO) Customs Valuation Agreement (i.e. the Agreement pertaining to the implementation of Article VII of the General Agreement on Trade and Tariffs [GATT]).

R

Authorised Economic Operator (AEO) status

Operators that obtain AEO status benefit from simplifications regarding customs inspection, obtaining customs authorisations, and performing customs formalities.

Moreover, through the AEO authorisation, the holder is recognised by the customs authorities as a reliable person, giving comfort as regards observance of the safety and security standards.

In addition, companies certified as AEOs may apply for the benefit to defer the payment of the VAT in customs upon importation.

Operators authorised as AEOs will be verified at least once every three years regarding their compliance with the certification criteria.

Romania

Binding Tariff Information (BTI)/Binding Origin Information (BOI)

Companies can obtain rulings (BTI) from the Romanian customs authorities on the tariff classification of imported goods that are binding for the customs authorities for a three-year period, whenever goods identical to those described in the BTI are imported.

A similar type of ruling can also be obtained regarding the origin of goods (BOI).

Trade measures

For some agricultural products, the European Union generally imposes specific measures (e.g. values or quantitative allowances) on imports from other countries. It is mandatory to obtain an import licence before importing such products.

Moreover, import/export licences from relevant authorities are also required for commodities regarded as potentially hazardous to human health or to the environment (e.g. some chemical products, certain types of waste and scrap), for commodities the end-use of which is controlled (e.g. explosives), or for dual use (i.e. both civil and military) products.

Excise duties

Harmonised excise goods

The following products are subject to harmonised excise duties: alcohol and alcoholic beverages, manufactured tobacco products, energy products (e.g. unleaded petrol, diesel oil, gas, coal), and electricity.

Excise duties are due when excise goods are released for consumption (e.g. imported into Romania, taken out of an excise duty suspension arrangement).

Ethyl alcohol and other alcoholic products are exempt from the payment of excise duties if they are denatured and used in the nutritional, pharmaceuticals, or cosmetics industry.

Some energy products subject to movement control are excepted from excise duty, provided that an end-user authorisation is obtained and the payment of excise duties is secured.

Manufactured tobacco is also exempt from excise duties when exclusively intended for scientific and quality testing.

In some cases, traders can claim a refund of the excise duties paid (e.g. excise duty paid for goods released for consumption in Romania, but intended for consumption in other EU member states; excise duties paid for goods released for consumption and then returned to the production tax warehouse for recycling, reprocessing, or destruction; excise duties paid for goods acquired from the European Union or imported and then returned to the suppliers; excise duties paid for goods released for consumption in Romania and then exported).

For cigarettes, the excise duty due is equal to the sum of the specific excise duty and the *ad valorem* excise duty. The specific excise duty expressed in RON/1,000 cigarettes is annually determined based on the weighted average retail price, the legal percentage related to the *ad valorem* excise duty, and the total excise duty. The specific excise duty on cigarettes for the period 1 April 2016 to 31 December 2016 is set at RON 329.30/1,000 cigarettes.

The excise duty rate for ethyl alcohol is RON 4,738.01/hectolitre of pure alcohol.

The excise duty level for fermented still beverages, other than beer and wines, is set at RON 47.38/hectolitre of product, while the excise duty level for apple and pear cider and mead is nil.

The excise duty level for intermediary products is set at RON 781.77/hectolitre of product, and the level for beer is set at RON 3.90/hectolitre/1 Plato degree.

The current levels of excise duties on gasoline and diesel are RON 2,035.40/1,000 litres and RON 1,897.08/1,000 litres, respectively.

Companies selling fuel in gas stations have to register with the tax authorities. The same obligation applies for companies that market wholesale fuel, alcoholic drinks, or tobacco products.

Other excise goods

Other excise goods are:

- Heated tobacco products, which by heating generate an aerosol that can be inhaled without the combustion of tobacco mixture (with the following tariff classification: CN 2403 99 90).
- Liquids containing nicotine for inhaling using an electronic device (i.e. electronic cigarette) (with the following tariff classification: CN 3824 90 96).

Excise duties are to be paid by the 25th day inclusive of the month following the one (i) in which they were sold on the national market for domestic products or (ii) when the actual receipt takes place for products received from EU countries, except for the excisable goods imported, for which the excise duty is to be paid when the goods are released for free circulation.

Economic operators performing directly intra-Community acquisitions/imports of such goods are entitled to request a refund of the excise duties paid if the products are exported, supplied to another EU member state, or returned to the supplier. For the production/intra-Community acquisitions/imports of such products, prior authorisation is requested.

Property taxes

Building tax

Starting from 1 January 2016, the building tax calculation method has been amended by differentiating between buildings depending on their destination usage:

- Residential buildings: Tax rate between 0.08% and 0.2% (applicable to the taxable value as per the specific table provided by the law for individuals and the value resulted from the evaluation report for legal entities).
- Non-residential buildings: Tax rate between 0.2% and 1.3%. In the case of a building used for agricultural purposes, the applicable tax rate is 0.4%.

Local authorities have been granted the authority to increase local tax allowances by 50%; previously, these could have only been increased by no more than 20%.

The increased tax rate for building tax due by legal entities is 5% (if no revaluation was performed during the last three years).

If a building was acquired during a fiscal year, the building tax for the entire year is due by the seller. The buyer is liable to pay the tax starting with the next year.

Romania

Building tax is paid annually, in two equal instalments, by 31 March and 30 September. For the payment of the entire annual tax by 31 March, a reduction of up to 10% is granted by the Local Council.

Land tax

Owners of land are subject to land tax established at a fixed amount per square metre, depending on the rank of the area where the land is located and the area or category of land use, in accordance with the classification made by the Local Council.

Similar to building tax, land tax is paid annually, in two equal instalments, by 31 March and 30 September. A 10% reduction is granted for full advance payment of this tax by 31 March.

Construction tax

There is a tax on constructions included in the first group of the catalogue for classification and normal useful life of fixed assets, which are not subject to building tax. The tax on constructions is calculated by applying a 1% rate to the value of the constructions recorded in the taxpayers' books as at 31 December of the previous year.

Fit-out works on buildings that are rented, taken under management, or put into use are not subject to construction tax.

As of 1 January 2016, the construction tax for agricultural constructions is eliminated. For other constructions, it will be eliminated as of 1 January 2017.

Transfer taxes

There are no transfer taxes for companies for the transfer of property. The income derived from such a transfer will be included into the taxable profits of the company and subject to the flat tax rate.

Stamp duty

For judicial claims, issue of licences and certificates, and documentary transactions that require authentication, stamp duty (in the form of notary fee) has to be paid.

Environmental taxes

For certain activities (e.g. selling ferrous and non-ferrous waste, activities involving the use of dangerous substances, activities that generate polluting air emissions, placement of packaging materials/tyres on the market), companies have to pay contributions and taxes to the Romanian Environmental Fund.

Companies that place packed goods on the national market are liable to contribute to the Environmental Fund. The contribution amounts to RON 2 per kilogram of packaging introduced on the market and is due for the difference between the quantities of packaging waste that have to be recovered/recycled according to the law and the quantity actually recovered/recycled.

A tax of RON 0.3/kg is levied on industrial oils and lubricants placed on the market.

Companies conducting activities that result in the discharge of air-pollutant emissions from fixed sources (e.g. nitrogen oxides, sulphur oxides, persistent organic pollutants, heavy metal emissions, such as lead, cadmium, mercury) have to pay contributions to the Environmental Fund that range between RON 0.02/kg and RON 20/kg. For air pollutants, the computation is based on the CORINAIR/AP-42 methodology, and the tax is applied based on the nature of the air pollutants.

The environmental tax contribution for tyres placed on the market amounts to RON 2/kg.

The contribution for plastic bags placed on the national market amounts to RON 0.1/ piece, which is due for bags and shopping bags that have an integrated or applied handle and that are manufactured from non-renewable resources.

In order to improve the regulatory system with respect to the Environmental Fund contributions, the modification and completion of the current regulations is likely to occur in the near future.

All producers/importers/exporters of electric and electronic equipment (EEE) and of batteries and accumulators are required to register with the National Agency for Environmental Protection as 'EEE producers' and as 'producers of batteries and accumulators', respectively.

Payroll taxes

Employers must contribute mandatory employer's social security contributions and withhold, on a monthly basis, the mandatory employee's social security contributions and the income tax (16%) from the employee's gross salary and wire the amounts to the Romanian tax authorities.

Social security contributions

Employers must pay pension contributions, calculated on the gross salary costs, at 15.8%, 20.8%, and 25.8%, depending on working conditions.

The monthly contribution is capped at five average gross salaries multiplied by the number of insured individuals employed under employment contract. For 2016, the national average gross salary is set at RON 2,681.

Other mandatory contributions on labour paid by employers for employees, calculated on gross salary costs, are:

- Contribution for medical leaves: 0.85%; the monthly contribution is capped at 12 gross minimum wages multiplied by the number of insured individuals. As of 1 May 2016, the gross minimum wage is RON 1,250 (previously RON 1,050).
- Health insurance fund: 5.2%.
- Unemployment fund: 0.5%.
- Guarantee fund: 0.25%.
- Labour accidents insurance fund: 0.15% to 0.85%.

The mandatory employee's social security contributions, which must be withheld by the employer, are:

- Pension contribution: 10.5%, capped at five times the average monthly gross salary.
- Health insurance fund: 5.5%.
- Unemployment fund: 0.5%.

Branch income

Branch

A foreign company can set up a branch in Romania, as long as the branch only operates in the same field of activity as the parent company. A branch is considered to have the same legal personality as the parent company and is not a separate legal entity (no own share capital, no separate name, etc.).

Profits derived by the branch are taxed at the standard profit tax rate of 16%.

Romania

Representative offices

Representative offices are often established as a first step to operating in Romania. A representative office can undertake only auxiliary or preparatory activities, cannot trade in its own name, and cannot engage in any commercial activities. A representative office can perform only a limited range of activities without being considered a PE for profit tax purposes.

Representative offices are subject to a flat annual tax of EUR 4,000 (payable in local currency, i.e. Romanian leu). The tax is paid in two equal instalments, by 25 June and 25 December. If a representative office is set up or closed down during a year, the tax due for that year is pro-rated for the months that the representative office was operational in that fiscal year.

Income determination

The taxable profit of a company is calculated as the difference between the revenue derived from any source and the expenses incurred in obtaining the taxable revenue throughout the tax year, adjusted for fiscal purposes by deducting non-taxable revenue and adding non-deductible expenses. Other elements similar to revenue and expenses are also to be taken into account when calculating the taxable profit.

For taxpayers that apply International Financial Reporting Standards (IFRS) (i.e. financial institutions and listed companies), there are specific rules in relation to the fiscal value assessment, profit tax computation, adjustments for step-down in value, amortisation, and fiscal treatment of deferred profit tax.

Inventory valuation

The methods permitted for inventory valuation under Romanian law are standard cost, detailed sale price, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO). The accounting method is also recognised for tax purposes.

Assets are generally valued at their acquisition cost, production cost, or market value. Fixed assets may be re-valued at certain points in time for various purposes.

Capital gains

Capital gains earned by a Romanian resident company are included in their ordinary profits and are taxed at 16%. Capital gains obtained by non-residents from real estate property located in Romania or from the sale of shares held in a Romanian company are also taxable in Romania. However, the income may be subject to treaty protection.

Participation exemption applies for capital gains derived by a Romanian legal entity from participations of at least 10%, held for a minimum period of one year, in a subsidiary established in a state with which Romania has a DTT.

Prior to 1 January 2016, capital gains derived from the transfer of shares in companies whose assets consisted of more than 50% real estate located in Romania were subject to tax at 16% (no domestic participation exemption). Starting from 1 January 2016, domestic participation exemption as detailed above is applicable in all cases, including in cases of sale of real estate shares.

Dividend income

Dividends distributed by a company resident in another EU member state to a Romanian company are tax exempt if the Romanian company has held, prior to the time of distribution, a minimum of 10% of the shares in the respective non-resident company for an uninterrupted period of at least one year.

The New Tax Code, effective as of 1 January 2016, incorporates the amendments to the European Directive no. 2011/96/EU, relating to the application of a common system of taxation in the case of parent companies and subsidiaries of different member states. The legislation introduces the anti-abuse rule for preventing unlawful tax practices used to obtain tax benefits contrary to the Directive's principles. Also, dividends received by a Romanian legal entity from a foreign legal entity under certain conditions mentioned above will not be taxed as long as those dividends are not treated as deductible expenses by the paying subsidiary.

Participation exemption applies for dividends derived by a Romanian legal entity from participation of at least 10%, held for a minimum period of one year, in a subsidiary established in a state with which Romania has a DTT.

Dividends received by a Romanian company from another Romanian company are not subject to profit tax, but are subject to a final WHT of 5%. Those payments are non-taxable if the shareholder held, at the time of distribution, a minimum of 10% of the shares in the other company for an uninterrupted period of at least two years.

Dividends received by a Romanian company from a non-qualifying foreign subsidiary are taxed in Romania at the normal profit tax rate of 16%. Credit is available for tax paid abroad.

Starting from 1 January 2016, new legislative provisions have been introduced, as follows:

- The non-taxable treatment of the revenues from dividends received from Romanian legal entities independent of any other conditions has been introduced; as regards the dividends received from foreign legal entities, the current conditions have to be further met for such profit tax exemption to apply (i.e. a minimum shareholding of 10% for an uninterrupted period of at least one year).
- The WHT rate for dividend income derived by non-residents from Romania has decreased from 16% to 5%. This is similar to the WHT rate that applies to the distribution of dividends to Romanian legal entities and Romanian resident individuals.

Interest and royalty income

Interest and royalty payments made by Romanian companies to other Romanian companies are taxable income in the hands of the beneficiary.

Romanian-sourced interest and royalty payments of an affiliated company, resident in an EU member state, are exempt from WHT, provided that certain conditions are met, e.g.:

- 25% minimum direct holding of the share capital (i.e. one company has a direct minimum holding of 25% in the share capital of the other company or a third company has a direct minimum holding of 25% in the share capital of both companies involved in the payment of the interest and royalties).
- The holding period must be maintained for an uninterrupted period of at least two years prior to the payment of the interest and royalties.
- The company receiving the interest or royalty payments must be the beneficial owner of these payments.

Fiduciary contracts

If the settlor of a fiduciary contract is also the beneficiary, then:

- the transfer of the patrimony from the settlor to the fiduciary is not considered a taxable transfer, and

Romania

- the fiduciary will keep separate bookkeeping entry for the fiduciary patrimony and will communicate to the settlor, on a quarterly basis, the income and expenses resulting from the administration of the patrimony.

If the beneficiary is the fiduciary or a third party, the expenses recorded from the transfer of the patrimony from the settlor to the fiduciary is considered non-deductible.

Other significant items

The other most relevant types of non-taxable revenue stipulated by the Romanian Fiscal Code are:

- Favourable fluctuations in the price of shares and long-term bonds registered by the company in which the shares and long-term bonds are held, as a result of capitalisation of reserves, benefits, or share premiums.
- Revenue from reversal or cancellation of provisions/expenses that were previously non-deductible, recovery of expenses that were previously non-deductible, and revenue from reversal or cancellation of interest and late payment penalties that were previously non-deductible.
- Revenue from the annulment of a reserve registered as a result of a participation in nature to the capital of other legal entities.
- Revenue from deferred income tax.
- Revenue resulting from the change in the fair value of real estate investments/biological assets owned by the taxpayers applying IFRS.
- Non-taxable revenue expressly provided for under agreements and memoranda enforced by regulatory documents.

Foreign income

Resident companies are taxed on their worldwide income unless a DTT provides otherwise. However, in case of foreign subsidiaries of Romanian companies, income is not taxed in Romania until remitted back. Otherwise, there is no specific tax deferral regime in place.

Deductions

Expenses fall into three categories: deductible expenses, limited deductibility expenses, and non-deductible expenses.

Deductible expenses

As a general rule, expenses are deductible only if incurred for the purpose of generating taxable income.

Starting from 1 January 2016, the general rule for deductibility of expenses has been amended and the expenses incurred for business purposes are to be considered as tax deductible.

Some of the deductible expenses specifically mentioned by the Fiscal Code include:

- Marketing and advertising expenses.
- Research and development (R&D) expenses that are not recognised as intangible assets for accounting purposes.
- Expenses incurred for environmental protection and resource conservation.
- Expenses incurred for management improvement; updating information technology (IT) systems; introducing, maintaining, and developing quality management systems; and obtaining quality compliance confirmation.
- Losses incurred when writing off client receivables in any of the following cases:
 - The bankruptcy procedure of the debtor was closed due to a court ruling.
 - The debtor is deceased and the receivable cannot be recovered from the heirs.

- The debtor is dissolved or liquidated.
- The debtor has major financial difficulties affecting its entire patrimony.
- Expenses related to losses from the valuation of shares and long-term bonds.
- Travel and accommodation expenses related to business; this also includes transportation of personnel to and from the workplace.
- Daily allowances for expenses incurred by employees in connection to travels in Romania and abroad.
- Expenses incurred from professional training and development of employees.
- Expenses related to benefits granted to employees as equity instruments settled with cash, at the moment of the effective granting, if the benefits are subject to personal income tax (PIT).
- Expenses incurred in connection to work safety, prevention of work accidents and occupational diseases, the related insurance contributions, and professional risk insurance premiums.
- Expenses incurred in connection to the acquisition of packaging materials, during the useful life set by the taxpayer.
- Fines, interest, penalties, and other increased payments due under commercial contracts.

Note that credit institutions apply IFRS rules, and certain deductibility rules are provided for this category of taxpayers.

Limited deductibility expenses

The deductibility of the following expenses is limited:

- Interest expenses and foreign exchange losses under thin capitalisation rules (*see the Group taxation section for more information*).
- Provision and reserve expenses (*see details below*).
- Depreciation and reduction in value of fixed assets under fiscal depreciation rules (*see details below*).
- Perishable goods and losses resulted from transport/storage, according to law.
- Protocol expenses are deductible at up to 2% of the accounting profit, adjusted with protocol and profit tax expenses. Output VAT related to gifts of at least RON 100 offered by taxpayers fall under the protocol expenses category.
- Social expenses are deductible at up to 5% of salary expenses and include, among other items, maternity allowances, expenses for nursery tickets, funeral benefits, and allowances for serious or incurable diseases and prostheses, as well as expenses for the proper operation of certain activities or units under taxpayers' administration (i.e. kindergartens, nurseries, health services supplied for occupational diseases and work accidents prior to admission to health establishments, canteens, sports clubs, clubs, etc.), gifts represented by money of in kind, including gift tickets given to employees and their children, and medical services granted in case of professional diseases and labour accidents until transfer to a hospital. Expenses incurred for benefits granted under a collective labour agreement are also deductible within the same limits.
- Expenses incurred with lunch vouchers and holiday vouchers given by employers, according to law.
- Technological losses within the internal consumption norm required for the production of a good or provision of a service.
- Expenses incurred for functioning, maintenance, and repairs corresponding to an establishment represented by an individual's personal property, used as well for individual purposes, deductible in the limit of the surfaces at the disposal of the company based on the contractual agreements.
- Expenses incurred with electricity at the level of the technological internal consumption norm or, in case it is missing, at the level of the norm approved by the National Authority for Energy, including the commercial consumption for the taxpayers in the electricity distribution business.
- Taxes and fees paid to non-government organisations or professional associations related to the taxpayer's activity are deductible up to the limit of EUR 4,000 per year.

Romania

- All direct expenses attributable to vehicles with up to nine seats that are not used exclusively for business purposes are 50% deductible for profit tax purposes, under certain conditions provided by law. These expenses are fully deductible for vehicles used for the following activities:
 - Emergency, safety and security, courier services, cars used by sales and acquisitions agents.
 - Paid transportation services and taxi activities.
 - Rental.
 - Driving schools.
 - Vehicles used as commodities.
- For vehicles with up to nine seats, tax depreciation is limited to a maximum of RON 1,500 per month for each vehicle starting from 1 February 2013.

Non-deductible expenses

Expenses deemed non-deductible include, among other items, the following:

- Domestic profit tax, including differences from previous years or from the current year, and profit tax paid in foreign countries, deferred tax registered according to accounting standards.
- Expenses with tax not withheld at source in the name of non-resident individuals and legal entities.
- Expenses related to non-taxable revenues.
- Interest, fines, and penalties due to Romanian or foreign authorities, according to legal provisions, with the exception of the ones pertaining to agreements concluded with these authorities.
- Expenses incurred for management, consultancy, assistance, or other supply of services performed by a non-resident located in a state that has no exchange of information agreement concluded with Romania. These provisions are applicable if the expenses are incurred in respect of transactions deemed as artificial.
- Sponsorship and patronage expenses and expenses for private scholarships. Taxpayers are, however, granted a fiscal credit of up to 0.5% (previously 0.3%) of turnover and 20% of the profit tax due, whichever is lower. Taxpayers that do not benefit from fiscal credit in the year when they grant sponsorship according to the law may carry forward the fiscal credit for the next seven consecutive years.
- Losses incurred when writing off client receivables, for the amount not covered by a provision, in any cases other than the following: a reorganisation plan was applied through a court decision in accordance to Law no. 85/2014; the bankruptcy procedure of the debtor was closed due to a court ruling; the debtor is deceased and the receivable cannot be recovered from the heirs; the debtor is dissolved or liquidated; or the debtor has major financial difficulties affecting its entire patrimony.
- Expenses resulting from the adjustment of acquired receivables, provided insurance contracts have been put in place.
- Expenses resulted from benefits granted to employees as equity instruments settled with shares/cash, unless subjected to PIT.
- Expenses in favour of shareholders, other than those related to goods or services provided by the shareholders at market value.
- Expenses incurred with insurance premiums unrelated to the risks and assets of the taxpayer's business, with the exception of those that relate to goods representing a banking guarantee for the loans used for business purposes.
- Expenses registered in the accounting records based on documents issued by an inactive taxpayer, according to the provisions of the Fiscal Procedure Code, with the exception of those representing acquisitions of goods performed during foreclosure procedures or from legal entities in bankruptcy procedure according to Law no. 85/2014.
- Expenses relating to missing or damaged non-imputable inventories or tangible assets, as well as related VAT, if the case. These expenses are deductible in case any of the following conditions are applicable to the inventory/assets:

- They were destroyed following natural disasters or major force situations in the conditions provided by the methodical norms.
- Insurance contracts have been set up in respect of these.
- They were degraded from a qualitative perspective, and the proof of destruction is available.
- They have a validity/expiry term that has passed, according to law.
- Expenses reflected in accounting records, irrespective of their nature, that later prove to be related to acts of corruption as defined under the law.

Note that credit institutions apply IFRS rules, and certain non-deductibility rules are provided for this category of taxpayers.

Depreciation

Romanian law makes an explicit distinction between fiscal and accounting depreciation. Fiscal depreciation is treated as an expense deductible from the tax base, while accounting depreciation is treated as a non-deductible expense. Companies should maintain a separate record to reflect the separate computation of the fiscal and accounting depreciation. Any accounting revaluations of fixed assets are not taken into account in computing the tax depreciation.

Assets are generally depreciated using the straight-line method. However, accelerated or degressive depreciation methods may be used to determine fiscal depreciation, while the accounting depreciation method may be different.

The useful lives to be used for tax purposes are the ones stated in the Official Fixed Assets Catalogue, published under government decision. Ranges are provided for classes of fixed assets, from which the taxpayers can choose the useful life (e.g. office and housing buildings: 40 to 60 years, commercial buildings: 32 to 48 years, commercial furnishings: 9 to 15 years, automobiles: 4 to 6 years).

For vehicles with up to nine seats, the fiscal depreciation is limited to a maximum of RON 1,500 per month for each vehicle. Certain categories of vehicles are exempt from this monthly deduction limitation (e.g. used exclusively for emergency, security, or delivery service; used for paid passenger transport; or used for paid supply of services).

Land cannot be depreciated.

Accelerated depreciation

Under the Fiscal Code, machinery and technical equipment, computers and their peripherals, as well as patents, may be depreciated by using the accelerated method, under which a maximum of 50% of the asset's fiscal value may be deducted during the first year of usage, while the rest of the asset's value can be depreciated using the straight-line method over the remaining useful life.

Goodwill

As a rule, goodwill is deemed non-depreciable from a Romanian fiscal perspective.

Start-up expenses

According to accounting rules, start-up expenses may be capitalised and depreciated over a maximum period of five years. However, according to the fiscal rules, start-up expenses should not be depreciated for tax purposes.

Provisions and reserves

As a general rule, provisions and reserves are non-deductible for profit tax purposes. However, there are certain provisions and reserves that are deductible, such as:

- Setting up or increasing the legal reserve fund up to 5% of the accounting profit, adjusted with profit tax expense, and until it reaches 20% of the share capital.

Romania

- Provisions related to guarantees for proper execution granted to the clients.
- Provisions for depreciation of receivables are deductible at up to 30% if the related receivables meet the following conditions simultaneously:
 - Not collected for a period exceeding 270 days from the due date.
 - Not guaranteed by another person.
 - Due by a person not affiliated with the taxpayer.
- Bad debt provisions are fully deductible if all the following conditions are met:
 - The debtor is a company declared bankrupt by a court ruling or an individual for whom insolvency procedure has been declared based on:
 - Reimbursement plan.
 - Asset liquidation.
 - Simplified procedure.
 - Receivables are not guaranteed by another person.
 - The debtor is not a related party.
- Specific provisions established by non-banking financial institutions and other legal persons according to their incorporation law.
- Adjustments for impairment set up by credit institutions that apply IFRS and prudential filters set up according to regulations issued by the National Bank of Romania.
- Technical reserves set up by insurance and reinsurance companies, in accordance with their regulatory legal framework, except for the equalisation reserve.
- Risk provisions for transactions carried out on financial markets, in accordance with the rules issued by the Romanian National Securities Commission.
- Provisions and adjustments for impairment of receivables that were acquired by legal persons from credit institutions in order to be collected, for the difference between the receivables value and the amount due to the assignee, provided several conditions are met.
- Reserves from revaluation of fixed assets and land, made after 1 January 2004, which are deductible through depreciation or through expenses triggered by assets sold or written off, are taxable at the same time and for the same amount as the tax depreciation deduction, i.e. when the assets are sold or written off.
- In case the level of the subscribed share capital was reduced, the part of the legal reserve corresponding to the reduction, that was previously deducted, represents an element similar to revenues.

The reduction or cancellation of any provision or reserve deducted from the taxable profit, due to changing the destination of the provision or reserve, distribution towards shareholders in any form, liquidation, spin-off, merger, or any other reason, is included in the taxable revenue and taxed accordingly.

Note that special rules are applicable to credit institutions that are required to apply IFRS rules.

Fiscal losses

Companies are allowed to carry forward fiscal losses declared in the annual profit tax returns for a period of up to five years (for losses incurred prior to 2009) or seven years (for losses incurred after 2009), based on the FIFO method. No related adjustment for inflation is allowed.

Any loss incurred by a PE of a Romanian company located in a non-EU/European Free Trade Association (EFTA) member state or in a country that has a DTT in place with Romania is only deductible for tax purposes from the revenue derived by that PE, and losses can be carried forward only for a period of five years.

For foreign legal persons, carryforward of losses applies only to revenue and expenses attributable to their PE in Romania.

Losses incurred by a company can be transferred within a merger/spin-off operation and can be recovered by the successors, in proportion to the assets and liabilities transferred. The successors of these restructuring operations are able to use such losses during the remaining period.

Carryback of losses is not available in Romania.

Payments to foreign affiliates

Transactions with Romanian-affiliated companies and with non-resident related parties fall within the scope of the investigations regarding compliance with transfer pricing legislation (*see Transfer pricing in the Group taxation section*).

Group taxation

There is no tax consolidation or group taxation in Romania, except for PE consolidation. Members of a group must file separate returns and are taxed separately. Losses incurred by group members cannot be offset against profits made by other members of the group.

Consolidation of PEs

Foreign legal entities that perform economic activities in Romania through several PEs must register one of them as their PE designated to fulfil the fiscal obligations for all the PEs owned.

The revenues and expenses of all the PEs belonging to the same foreign legal entity will be cumulated at the level of the designated PE.

Transfer pricing

Transfer pricing requirements are applicable to transactions between Romanian related parties as well as foreign related parties.

Transactions between related parties should observe the arm's-length principle. If transfer prices are not set at arm's length, the Romanian tax authorities have the right to adjust the taxpayer's revenue or expenses so as to reflect the market value.

Traditional transfer pricing methods (i.e. comparable uncontrolled prices, cost plus, and resale price methods), as well as any other methods that are in line with the OECD Transfer Pricing Guidelines (i.e. transactional net margin and profit split methods), may be used for setting transfer prices.

Transfer pricing documentation

Taxpayers engaged in related party transactions have to prepare and make their transfer pricing documentation file available, irrespective of whether the transfer pricing documentation file has been requested by the Romanian tax authorities.

Transfer pricing audit activity has significantly increased during the past few years, and requests for presenting the transfer pricing documentation file have started to become common practice. We are aware of recent cases where the Romanian tax authorities adjusted the taxable result of local taxpayers in accordance with the applicable regulations.

The content of the transfer pricing documentation file has been approved by order of the president of the National Agency for Tax Administration. The Order is supplemented by the Transfer Pricing Guidelines issued by the OECD and the Code of Conduct on transfer pricing documentation for associated enterprises in the European Union Transfer Pricing Document (EUTPD).

Romania

The deadline for presenting the transfer pricing documentation file will not exceed three calendar months, with the possibility of a single extension equal to the period initially established.

Failure to present the transfer pricing documentation file or presenting an incomplete file following two consecutive requests may trigger estimation of transfer prices by the tax authorities on the basis of generally available information.

Advance pricing agreement (APA)

Taxpayers engaged in transactions with related parties have the possibility to apply for an APA. These taxpayers can also schedule a pre-filing meeting to discuss the feasibility of the APA.

The request for an APA is filed together with the relevant documentation and payment evidence of the fee (ranging between EUR 10,000 and EUR 20,000). The required documentation is based on the EUTPD and suggests, up front, the content of the APA.

The term provided by the Fiscal Procedural Code for issuance of an APA is 12 months for unilateral APAs and 18 months for bilateral and multilateral APAs. The APA is issued for a period of up to five years. In exceptional cases, such as long-term agreements, it may be issued for a longer period.

APAs are opposable and binding on the tax authorities as long as there are no material changes in the critical assumptions. In this view, the beneficiaries are obligated to submit an annual report on compliance with the terms and conditions of the agreement.

If taxpayers do not agree with the content of the APA, they can notify the National Agency for Tax Administration within 15 days. In this case, the agreement does not produce any legal effects.

Thin capitalisation

If the company's equity is negative or the debt-to-equity ratio is higher than 3:1, expenses incurred from interest charges and net losses related to foreign exchange differences on long-term loans are fully non-deductible. However, these expenses may be carried forward to the following fiscal years and become fully tax deductible in the year the debt-to-equity ratio becomes lower than or equal to 3:1.

Debt included in the calculation of the debt-to-equity ratio is represented by all such (non-financial institution) loans with a maturity period of over one year.

The equity includes share capital, share/merger premiums, reserves, retained earnings, current year earnings, and other equity elements. Both debt and equity are calculated as the average of values existing at the beginning and at the end of the period for which profit tax is calculated.

Starting from 1 January 2016, an amendment regarding the computation of the debt-to-equity ratio has been introduced. Loans with a reimbursement term of longer than one year for which no interest is due according to the contract are also taken into consideration.

The deductibility of interest expenses and net foreign exchange losses related to long-term loans (with a maturity period of over one year) is further subject to the safe harbour rule. The safe harbour rule limits the deductibility of interest on such loans to a maximum of 4% for loans denominated in foreign currency and to the National Bank of Romania's reference interest rate for Romanian leu loans. Interest expenses recorded over this limit are tax non-deductible and cannot be carried forward in future periods.

Controlled foreign companies (CFCs)

Under Romanian legislation, there are no CFCs rules.

Tax credits and incentives**Foreign tax credits**

- Tax credits for taxes paid to a foreign state may be obtained in Romania only if the DTT concluded between Romania and the foreign state applies and only if proper documentation confirming the tax was paid is available.
- A Romanian PE of a legal entity resident in the European Union or the European Economic Area (EEA) that obtains revenues from another EU or EEA member state, taxed both in Romania and in that member state, may claim a tax credit in Romania under the applicable tax law provisions.

Tax exemption for reinvested profits

- The profit invested in new technological equipment manufactured and/or acquired and commissioned during the period 1 July 2014 to 31 December 2016 is exempt from profit tax.
- In order to benefit from this incentive, the technological equipment should be used by the taxpayer for business purposes for more than half of its useful life, but for no longer than five years.
- The technological equipment for which this tax incentive applies cannot be depreciated by using the accelerated depreciation method.
- As of 1 January 2016, the applicability of the tax exemption of reinvested profits has been extended so as to include other fixed assets, such as computers, tax registers, and software.

Research and development (R&D) incentives

Companies can benefit from an additional deduction of 50% of the eligible expenses for their R&D activities. Moreover, accelerated depreciation may be applied for devices and equipment used in the R&D activity.

In order to benefit from this supplementary deduction, the eligible R&D activities must be applicative research and/or technological development relevant to the taxpayer's activity and must be performed in Romania or in the EU/EEA member states.

As of 1 January 2016, a new provision has been introduced, according to which the additional deduction for R&D activities is not available if the R&D project's objectives are not met.

R

Local tax exemptions for business located in industrial parks

No property tax is due for buildings and constructions located in an industrial park. Also, land within industrial parks is exempt from land tax.

The incentives granted for the set up and development of industrial parks include:

- Local tax exemptions/reductions for immovable assets and land related to the industrial park.
- Other incentives that may be granted by the local tax authorities.
- Development programmes for infrastructure, investments, and equipment endowments granted by local and central public administration, companies, and foreign financial assistance.
- Concessions and structural funds for development.

The companies operating within the industrial park benefit from:

Romania

- Various services offered by the park administrator free of charge or with reduced fees.
- Advantageous conditions with regard to location, use of the infrastructure, and communications of the park, with payment in instalments.

Local councils may grant land tax exemptions for owners of land situated in degraded or polluted areas, but not included in the area of improvement, at taxpayer's request and with the approval of the Ministry of Agriculture and Rural Development and the Ministry of Environment.

Land tax exemptions apply from the first day of the month following approval being obtained.

Employment incentives for special categories

For employment of recent graduates, employers can apply for a monthly grant of 1 to 1.5 (depending on the level of educational background) multiplied by the reference social indicator (currently set at RON 500) for each new graduate of a recognised institution for a period of 12 months. Employers benefiting from this incentive are obligated to keep this employment relationship for a time period of at least three years.

Moreover, employers may also be exempt for these 12 months from paying the unemployment contribution due for these graduates. In addition, grants amounting to the social security contributions for two years for recent graduates are available if they are still employed by the company for two additional years after the first three years pass.

The same incentives apply for the employment of recent graduates with disabilities, except that the period for which the exemption from contributions to the unemployment fund and the monthly grants apply is extended to 18 months.

Employers can also apply for exemption from unemployment fund contributions and for a monthly grant equal to the reference social indicator for each unemployed person with an age exceeding 45 years, or for each such person who is the sole family supporter. This monthly grant is available for a period of 12 months. Employers benefiting from this incentive have the obligation to keep this employment relationship for at least two years.

Employers running professional training programmes for their employees may apply for a refund of 50% of their expenses for up to 20% of their workforce, subject to certain conditions and limitations.

Other incentives granted to taxpayers

For justified claims of the taxpayers, the tax authorities may grant incentives for the payment of taxes, such as the rescheduling of tax payments due.

Rescheduling of tax payment obligations may be granted by the tax authorities to individuals and legal entities upon request. The time-frame for the rescheduling is a maximum of five years for taxpayers with tax liabilities below or equal to RON 300 million and up to seven years for taxpayers with liabilities higher than RON 300 million. The time-frame is set after taking into consideration the taxpayer's financial situation and the total tax burden.

In order to benefit from the rescheduling of tax payment obligations, taxpayers must meet certain conditions and also provide a guarantee that covers the rescheduled liabilities, interest, and also a supplementary percentage of the rescheduled liabilities, depending on the duration of the rescheduling time-frame.

Withholding taxes

Domestic dividend tax

Starting from 1 January 2016, the dividend tax rate for the dividend distribution between Romanian legal entities decreased from 16% to 5%. The tax is eliminated if there is a shareholding percentage of a minimum of 10% for an uninterrupted period of at least one year.

WHT for non-residents

The provisions of the Parent-Subsidiary Directive (2011/96) and of the Interest and Royalties Directive (2003/49) as transposed into the domestic fiscal legislation apply only to EU member states, with the member states of the European Free Trade Association (Iceland, Norway, and Lichtenstein) being excluded.

All income obtained by non-residents from Romanian taxpayers for the provision of services rendered in Romania or abroad is subject to 16% WHT rate in Romania.

Non-resident companies not operating through a PE are subject to a 16% WHT on revenue sourced in Romania, such as interest, royalties, revenue from services, commissions, and revenue derived from liquidation of a Romanian legal entity.

Starting from 1 January 2016, the tax rate for dividend revenues derived by non-residents from Romania has been reduced from 16% to 5%.

Certain specific provisions and exceptions apply to non-resident WHT, as follows:

- A 50% WHT applies to payments made by Romanian residents (e.g. dividends, interest, royalties, commissions, services) to non-residents in countries that do not have an exchange of information agreement concluded with Romania, regardless of whether the beneficiary of the income is resident of a state with which Romania has concluded a DTT or not. However, this WHT is applicable only to the extent such payments result from artificial transactions.
- As Romania is an EU member state, the provisions of the Parent-Subsidiary Directive apply. Consequently, dividends paid by Romanian companies to companies resident in one of the EU/EEA member states are exempt from WHT if the dividend beneficiary has held, at the time of distribution, a minimum of 10% of the shares of the Romanian company for an uninterrupted period of at least one year.
- Dividend and interest income obtained from Romania by EEA registered pension funds is exempt from WHT.
- Romania has implemented the Interest and Royalties Directive. Payments of interest and royalties made by a Romanian company to another company resident in an EU member state are tax exempt from WHT if the non-resident company held, for an uninterrupted period of at least two years, at least 25% of the share capital of the Romanian company prior to the time of payment.

In order to apply EU legislation, non-resident recipients of the income are required to present a certificate of tax residence and a declaration attesting to compliance with the necessary requirements provided by the European Directives.

The New Tax Code, effective as of 1 January 2016, incorporates the recent amendments to the European Parent-Subsidiary Directive no. 2011/96/EU. The legislation introduces the anti-abuse rule for preventing unlawful tax practices used to obtain tax benefits contrary to the Directive's principles. Also, dividends received by a Romanian legal entity from a foreign legal entity under certain conditions will not be taxed as long as those dividends are not treated as deductible expenses by the paying subsidiary.

The following categories of income derived by non-residents from Romania are exempt from WHT:

Romania

- Interest income and income derived from the sale of debt instruments issued by the Romanian authorities (e.g. government bonds).
- Revenue from international transportation and accessory services.
- Prizes obtained by individual non-residents from artistic, cultural, or sport festivals/competitions paid from public funds.
- Income obtained from a partnership constituted in Romania by a non-resident company (the related profits are subject to corporate profit tax).

Starting 1 June 2015, new measures have been introduced for the purpose of eliminating the discriminatory treatment applied to non-residents deriving interest revenues and/or revenues from freelancing activities in Romania that are subject to WHT applied to the gross value of the income.

Legal entities/individuals resident in member states of the European Union or the Economic European Area deriving interest revenues and/or revenues from freelancing activities in Romania may opt for the regularisation of the WHT by way of declaring and paying in Romania the corporate income tax/income tax related to the revenues obtained.

The tax withheld and paid is deemed as an advance payment in connection with the corporate income tax/income tax.

The possibility for regularisation of the WHT is only applied in the case of revenues derived from Romania by residents of member states of the European Union or the European Economic Area, provided that a Convention for the Avoidance of Double Taxation or a legal instrument for the exchange of information is concluded between Romania and those states.

Notes

- The lower rate applies to a participation of at least 25%.
- The lower rate applies to a participation of at least 10% where the dividends are paid out of profits that have been subject to a normal rate of company tax.
- The lower interest rate applies if one of the following requirements is fulfilled:
 - The payer or the recipient of the interest is the government of a contracting state itself, a local authority or an administrative-territorial unit thereof, or the Central Bank of a contracting state.
 - The interest is paid in respect of a loan granted, approved, guaranteed, or insured by the government of a contracting state, the Central Bank of a contracting state, or any financial institution owned or controlled by the government of a contracting state.
 - The interest is paid in respect of a loan granted by a bank or any other financial institution (including an insurance company).
 - The interest is paid on a loan made for a period of more than two years.
 - The interest is paid in connection with the sale on credit of any industrial, commercial, or scientific equipment.
- The lower rate applies to a participation of at least 10%.
- The treaty concluded with the former Socialist Republic of Yugoslavia (Socialist republic) signed in 1986.
- The zero rate applies to interest paid by public bodies.
- The lower rate applies to copyright royalties (excluding films), computer software, patents, and know-how.
- The 15% withheld at source in Romania on the commission paid to an Egyptian resident shall be given as a credit to be deducted from the income tax charged in Egypt.
- The lower rate applies to royalties for computer software and industrial, commercial, or scientific equipment.
- The lower rate applies if and as long as Germany, under its domestic law, does not levy WHT on interest paid to a resident of Romania.
- The higher rate applies to industrial royalties.
- The lower rate applies to a participation of at least 40%.
- The lower rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
- The lower rate applies if the recipient is a company that directly owns at least 25% of the capital of the company paying the dividends.
- The lower rate applies for royalties that consist of payments of any kind received as a consideration for the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience, or for the use of, or the right to use, industrial, commercial, or scientific equipment, cinematograph films, or tapes for television or broadcasting. The higher rate applies if the royalties consist of payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work.
- The lower rate applies if such recipient is the beneficial owner and if such interest is paid:
 - in connection with the sale on credit of any industrial, commercial, or scientific equipment
 - on any loan of whatever kind granted by a bank or other financial institution (including an insurance company)
 - on any loan of whatever kind made for a period of more than two years, or

- on any debt-claim of whatever kind guaranteed, insured, or directly or indirectly financed by or on behalf of the government of either contracting state.
- 17. The lower interest rate applies if the royalties are beneficially owned by a resident of a contracting state and refer to the right to use any copyright of literary, artistic, or scientific work, including motion pictures or films, recordings on tape or other media used for radio or television broadcasting, or other means of reproduction or transmission.
- 18. The lower rate applies to interest paid in connection with the sale on credit of any industrial or scientific equipment, of any merchandise by one enterprise to another enterprise, or on a loan granted by banks.
- 19. The lower rate applies to interest paid by public bodies.
- 20. The lower rate applies for cultural royalties; the higher rate applies for industrial royalties.
- 21. The lower rate applies for interest arising in a contracting state and derived by the government of the other contracting state, including local authorities thereof and administrative-territorial units thereof, the Central Bank of that other contracting state or any financial institution performing functions of a governmental nature, or by any resident of the other Contracting State with respect to debt claims guaranteed or indirectly financed by the government of that other contracting state, including local authorities thereof and administrative-territorial units thereof, the Central Bank of that other contracting state or any financial institution performing functions of a governmental nature.
- 22. The lower rate applies for royalties related to the right to use any patent, trademark, design or model plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
- 23. The lower rate applies if the beneficial owner of the dividends is the government of Kuwait or a company in whose capital the government directly or indirectly owns at least 51% and the remaining capital of such company is owned by residents of Kuwait.
- 24. The lower rate applies if the beneficial owner of the interest is a company, including a bank or a financial institution, that is a resident of Kuwait and in whose capital the government directly or indirectly owns at least 25% and the remaining capital of such company is owned by residents of Kuwait.
- 25. Interest shall not be taxed in the state where it arises if the indebtedness on which such interest is paid, guaranteed, insured, or financed by the other state or by a financial institution that is a resident of that other state.
- 26. The lower rate applies for interest to which a resident of Romania is beneficially entitled if the loan or other indebtedness in respect of which the interest is paid is an approved loan or a long-term loan.
- 27. The lower rate applies for royalties for the use of, or the right to use, any copyright, trademark, design or model, plan, secret formula or process, or for the use of, or the right to use, information concerning industrial, commercial, or scientific experience.
- 28. 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
- 29. The lower rate applies if, and as long as, the Netherlands does not levy a WHT on interest/royalties paid to a resident of Romania. Interest paid to a bank or financial institution (including an insurance company) and interest paid on a loan made for a period of more than two years are exempt.
- 30. The lower rate applies if, and as long as, the Netherlands does not levy a WHT on interest/royalties paid to a resident of Romania.
- 31. The lower rate applies if the recipient is a company (excluding partnership) and during the part of the paying corporation's taxable year that precedes the date of payment of the dividends and during the whole of its prior taxable year (if any) at least 25% of the outstanding shares of the voting stock of the paying corporation was owned by the recipient corporation.
- 32. The lower rate applies if such interest is paid:
 - in connection with the sale on credit of any industrial, commercial, or scientific machine or equipment, or similar installation
 - on any loan of whatever kind granted by a bank, or
 - in respect of public issues of bonds, debentures, or similar obligations.
- 33. 10% of the gross amount of the royalties, where the royalties are paid by an enterprise registered with the Romanian Agency for Development, in the case of Romania and with the Board of Investments, in the case of the Philippines and engaged in preferred pioneer areas of activities; 15% of the gross amount of the royalties, in respect of cinematographic films and tapes for television or broadcasting; 25% of the gross amount of the royalties, in all other cases.
- 34. As long as Poland does not introduce in its domestic legislation the WHT of commissions paid to non-residents, the provisions of paragraph 2 of Article 13 are not applying and the commissions are taxable only in the residence country of the beneficial owner of the commission.
- 35. The lower rate applies if the beneficial owner of the dividends is a company that, for an uninterrupted period of two years prior to the payment of the dividends, directly owns at least 25% of the capital stock (capital social) of the company paying the dividends.
- 36. The lower rate applies to participations of at least 50%; the 5% rate applies to participations of at least 10%.
- 37. According to the treaty concluded between Romania and the former Yugoslavia (Federal Republic of).
- 38. The lower rate applies to royalties for the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or industrial, commercial, or scientific equipment, or for information concerning, industrial, commercial, or scientific experience.
- 39. The lower rate applies if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends.
- 40. The lower rate applies if the dividends are beneficially owned by a resident of the other contracting state that is:
 - a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends

Romania

- a pension fund or other similar institution providing pension schemes, or
 - the government of that other state, a political subdivision, local authority, or administrative-territorial unit thereof, or the Central Bank of that other state.
41. The lower rate applies to the extent that such interest is paid:
- in respect of a loan, debt-claim, or credit that is owed to, or made, provided, guaranteed, or insured by that state or a political subdivision, local authority, administrative-territorial unit, or export financing institution thereof, or
 - by a company to a company of the other contracting state where such company is affiliated with the company paying the interest by a direct minimum holding of 25% in the capital or where both companies are held by a third company that has directly a minimum holding of 25%, both in the capital of the first company and in the capital of the second company.
42. The lower rate applies as long as the Swiss Confederation, in accordance with its domestic legislation, does not levy a WHT on royalties paid to non-residents.
43. The lower rate applies if the company paying the dividends engages in an industrial undertaking and the recipient company, excluding partnership, directly holds at least 25% of the capital of the former company.
44. 10% of the gross amount of the interest if it is received by any financial institution (including an insurance company); 20% of the gross amount of the interest in the case of interest on credit sale; 25% of the gross amount of the interest in other cases.
45. Interest arising in Romania and paid to government of Turkey or to the Central Bank of Turkey shall be exempt from Romanian tax.
46. Interest arising in a contracting state shall be exempt from tax in that state if it is derived and beneficially owned by the government of the other contracting state, a local authority or an administrative-territorial unit thereof, or any agency or bank unit or institution of that government, a local authority or an administrative-territorial unit, or if the debt-claims of a resident of the other contracting state are warranted, insured, or directly or indirectly financed by a financial institution wholly owned by the government of the other contracting state.
47. The lower rate applies for use or lease of any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific equipment.
48. 0% if the beneficial owner of the dividends is (i) the government of any contracting state or any governmental institutions or entity thereof or (ii) a company that is a resident of either contracting state and the capital of which is directly or indirectly owned (at least 25%) by the government or governmental institutions of either contracting states.
49. Interest arising in Romania and paid to the government of the United Arab Emirates or its financial institutions shall be exempted from Romanian taxes.
50. The lower rate applies for approved industrial royalties.
51. The lower rate applies if the beneficial owner is a company that directly or indirectly controls at least 25% of the voting power in the company paying the dividends.
52. The lower rate applies in the case of royalties received as consideration for the use of, or the right to use, any copyright of literary, dramatic, musical, artistic, or scientific work (including cinematograph films and films or tapes for radio or television broadcasting).
53. If certain conditions are met.
54. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

In order to apply the provisions of the relevant DTT, the non-resident recipient of the income should provide to the Romanian paying company a tax residency certificate attesting its tax residency for the purpose of the DTT.

If the tax rates prescribed by domestic legislation differ from those prescribed by the DTT, then the most favourable rate will apply. The tax rate applicable to income obtained by a resident of an EU member state in Romania is the most favourable rate provided under either domestic legislation, the EU Directives transposed into domestic legislation, or the DTT.

Tax administration

Taxable period

The fiscal year is the calendar year or the period during which the entity existed if it was set up or ceased to exist during that calendar year.

Taxpayers with a financial year different from the calendar year have the option to align the tax year to the financial year. The first amended tax year will start on 1 January and will end on the last day of the amended tax year.

Starting from 1 January 2016, the period in which a taxpayer has to communicate to the territorial tax bodies the intention of changing the fiscal year period has been reduced (i.e. within 15 days as of the beginning of the new fiscal year).

Tax returns

Taxpayers (except for non-profit organisations and taxpayers deriving most of their income from agriculture) must submit the profit tax returns by the 25th day of the first month following the first, second, and third quarters. The annual profit tax return is due by 25 March of the following year.

Non-profit organisations and taxpayers that obtain income mainly from agricultural activities have to declare and pay annual profit tax by 25 February of the year following the reporting period.

Taxpayers (except those specifically mentioned by law) may opt to declare and pay the annual profit tax by making quarterly advance payments (*see Payment of tax below*). The decision to take this option has to be communicated by 31 January of the fiscal year in which the taxpayer wants to apply the option and it has to be maintained for at least two consecutive years.

Large and medium-sized taxpayers have the obligation to submit fiscal forms online, using the www.e-guvernare.ro portal. The electronic signature of the tax returns can only be made using a qualified certificate issued by a legally accredited certification services provider. Other categories of taxpayers may file their tax return electronically as an alternative way of compliance.

Taxpayers required to withhold tax, with the exception of salary payers, are required to submit a statement to the tax authorities regarding the tax withheld for each beneficiary of income. This statement must be submitted for the previous year by the last day of February of the current fiscal year and refers to the tax withheld and paid by Romanian residents on income obtained in Romania by non-resident beneficiaries.

If taxpayers have failed to submit their tax returns, the tax authorities will assess, by way of default, all the tax obligations found in the taxpayer's fiscal liability records for each fiscal period in which tax returns were not submitted.

Payment of tax

Taxpayers (except for banks, non-profit organisations, taxpayers deriving most of their income from agriculture) must pay the quarterly profit tax by the 25th day of the first month following the first, second, and third quarters. The annual profit tax has to be paid by 25 March of the following year.

Banks and branches of foreign banks in Romania are required to apply the system of advance quarterly profit tax payments. Other taxpayers, with some exceptions mentioned by law, may use this system as an alternative reporting and payment procedure.

The anticipated quarterly payments are calculated as a quarter of the previous year's profit tax increased by the consumer price index (CPI) inflation rate, with the payments due by the 25th day of the month following the end of the quarter. The CPI inflation rate is published by Order of the Ministry of Finance by 15 April of the year for which the advance payments are made. For 2016, the CPI inflation rate is 100.5%. If taxpayers incur fiscal losses in the first year of the application of the option, the advance profit tax payments are calculated by applying the profit tax rate to the accounting profit for the period in which tax payments are made in advance.

Non-profit organisations and taxpayers that obtain income mainly from crop production have to pay annual profit tax by 25 February of the following year.

Romania

Newly established banks and branches of foreign banks in Romania (i.e. without a previous year history) or those that incurred fiscal losses in the previous year make quarterly advance payments at the level of the amount resulted from applying the profit tax rate on the accounting profit for the period for which the advance payment is made.

Starting from 1 January 2016, the deadline for declaring and paying the profit tax due for the last quarter of the fiscal year by taxpayers applying the advance payments system, whereby quarterly payments are determined as one-fourth of the profit tax due for the preceding year, has been amended. For the last quarter of the fiscal year, the deadline for the obligation to declare and make advance payment will be the 25th day of the last month of that fiscal year.

Late-payment penalty

The late-payment interest rate is 0.02% for each day of delay. Subsequent late-payment penalties also apply.

The penalty is set at 0.01% per day of delay. This penalty does not apply to main tax obligations not declared by the taxpayer and is established by a tax inspection authority decision.

Starting from 1 January 2016, a non-declaration penalty has been introduced, at 0.08% per day, starting from the day following the due date until the date of payment. This penalty applies to the main tax obligations declared incorrectly or not declared by the taxpayer and is established by a tax inspection authority decision.

Non-resident companies

Non-resident companies deriving income from the sale of real estate located in Romania or from the sale of shares held in a Romanian company (except if participation exemption applies) are subject to a 16% profit tax in Romania and are liable to declare and pay such tax. Non-residents may appoint a tax agent/representative to fulfil this requirement. However, if the buyer is a Romanian company or a Romanian PE of a non-resident company, the obligation to declare and pay the annual profit tax rests with the buyer.

Starting 1 January 2016, in case of income from sale/transfer of shares held by a non-resident in a Romanian entity, the obligation of the buyer to withhold the tax (in case the buyer is a Romanian entity) has been eliminated.

For capital gains tax declaration and payment, the Romanian legislation requires the following tax returns to be submitted:

- Quarterly statements, starting the 25th day of the month following the quarter in which the non-resident first earned capital gains taxable in Romania.
- An annual profit tax return.

The quarterly statements and annual return must be submitted during the entire period in which the non-resident is registered with the Romanian tax authorities, even if, throughout that period, it no longer carries out transactions generating taxable revenue in Romania.

Tax audit process

Tax inspections can be carried out in respect of all legal persons, irrespective of their organisational structure, that are bound to determine, withhold, and pay taxes, duties, contributions, and other amounts owed to the general consolidated budget.

The tax authorities may not inspect the same taxes for a period previously inspected unless additional data is obtained of which the tax inspectors were unaware when carrying out the first inspection or calculation errors were made.

Prior to the tax inspection commencing, the tax authorities must notify the taxpayer in writing, by sending a tax inspection notice, except in the cases explicitly laid down in the Fiscal Procedural Code.

Tax inspections are generally carried out at the taxpayer's business premises and may not exceed a six-month period in the case of large taxpayers or three months for other taxpayers. For taxpayers that have secondary offices, the tax inspections may not exceed six months. The tax authorities may suspend the tax inspection if they deem it necessary for the clarification of the taxpayer's tax status.

Before finalisation of the tax inspection, the tax authorities are required to inform the taxpayer of their findings and the tax consequences and allow the taxpayer to express its point of view, within three days from the ending of the tax inspection. Upon completion of the tax inspection, the authorities conclude a tax inspection report, based on which the tax assessment is made, which in turn is to be communicated to the taxpayer within 30 days from the ending of the tax inspection.

Statute of limitations

As a general rule, the statute of limitation is five years and, as of 1 January 2016, begins to run on 1 July (previously 1 January) of the year following that for which the tax obligation is for, if the law does not dispose otherwise. However, the statute can be suspended for the duration of a tax inspection but will recommence after the inspection has been completed.

Topics of focus for tax authorities

Areas of focus during tax audits include:

- VAT reimbursable positions.
- Deductibility of service expenses.
- Transfer pricing.
- Transactions with tax havens.

Other issues

Mergers and acquisitions

Mergers, spin-offs, transfers of assets, and exchanges of shares between two Romanian companies should not trigger capital gains tax.

In the case of a relocation of the registered office of a European Company (SE) and a European Cooperative Society (SCE) from Romania to another EU member state, no tax will apply on the difference between the market value of the transferred assets and liabilities and their fiscal value, if certain conditions are met. There will also be no tax on such movements at the shareholder level. Therefore, a tax basis step-up may be achieved in the case of Romanian shareholders.

If a Romanian company has a PE in another EU member state, and the Romanian company is dissolved as a result of a cross-border reorganisation, the Romanian tax authorities will not have the right to tax the PE.

There are provisions for the recovery of fiscal losses in the case of restructuring operations carried out by Romanian legal entities and those involving Romanian legal entities and residents of other EU member states. Herewith, the right to recover fiscal losses by legal entities that are successors of merger or spin-off operations is regulated. The recovery is correlated with the assets and liabilities transferred according to the merger/spin-off project. Also, some amendments are provided to the Romanian Company Law simplifying and, in some cases, reducing the time-frame for performing the legal steps that have to be followed in case of mergers and spin-offs.

Romania

For taxpayers going through a restructuring process, the right to carry forward non-deductible interest expenses and net foreign exchange losses is split between the beneficiary and the assignor in proportion to the assets and liabilities transferred.

Starting from 1 January 2016, the amendments applicable to domestic mergers, total or partial spin-offs, transfer of assets, and exchange of shares have been harmonised with those applicable to similar cross-border transactions. The neutrality of in-kind contributions to a company's equity has been eliminated, except for cases involving a transfer of a going concern. Transfers carried out during a partial spin-off will not be subject to profit tax only if a transfer of a going concern takes place and the transferor maintains at least one line of activity.

Intergovernmental agreements (IGAs)

A Model 1 IGA is treated as 'in effect' by the United States (US) Treasury as of 2 April 2014.

The Model 1 IGA between the US and Romanian governments was signed on 28 May 2015 in order to improve international tax compliance and to implement the Foreign Account Tax Compliance Act (FATCA). The agreement will enhance transparency between the two countries in the field of taxation, promote growing cooperation in combating tax evasion practises, simplify implementation of financial information transmission, and increase legal certainty for financial institutions in Romania.

The agreement between Romania and the United States to improve international tax compliance and implementation of FATCA was ratified by the Romanian Parliament and published in the Official Gazette on 30 October 2015.

Common Reporting Standard (CRS)

The status regarding the implementation of the CRS, as developed by the OECD, is the following:

- On 29 October 2014, the Romanian Minister of Finance signed the Declaration to comply with the provisions of the Multilateral Competent Authority Agreement (MCAA) on Automatic Exchange of Financial Account Information.
- On 1 November 2014, the Convention on Mutual Administrative Assistance in Tax Matters was enforced in Romania.
- In February 2016, the Romania government approved the draft law ratifying the MCAA.

These two official documents are part of the process of implementing the CRS issued in February 2014 by the OECD. Further on, Romania will sign bilateral agreements with other states with which the exchange of financial account information will be performed. At this stage, no such agreements have been signed.

Based on the Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information, Romania is expected to implement the first automatic information exchange by September 2017.

In addition, Romania transposed the provisions of Directive 2011/16/EU as amended and supplemented by Directive 2014/107/EU regarding the mandatory automatic exchange of information in the field of taxation. As such, Romania introduced in the national legislation a requirement for financial institutions to implement reporting and due diligence rules, which are fully consistent with the CRS developed by the OECD.

Significant developments

Recent significant changes in tax legislation

Tax incentives for green-field projects

According to the Federal Law No. 144-FZ adopted in May 2016, the preferential tax regime currently available for investors in the Far East is now available for the whole territory of Russia.

In particular, starting from 2017, any Russian constituent region may introduce a reduced profits tax rate for investors, provided they meet certain criteria. The main requirement is the volume of their capital expenditures must be a minimum of 50 million Russian roubles (RUB) during three years or a minimum of RUB 500 million during five years.

The special tax rate may be as low as 0% during the first five years from the date the first income from the sales under an investment project is generated, and then 10% over the following five-year period.

Taxes on corporate income

Profits tax

Russian legal entities pay tax on their worldwide income (credit relief is available for foreign tax paid, up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules).

The maximum profits tax rate for all taxpayers in the Russian Federation is set at 20% (2% is paid to the federal budget and 18% is paid to the budgets of constituent regions). The amount payable to the budgets of constituent regions may be reduced by the regions. So, the total minimum tax rate may come to 15.5% (e.g. a rate of 15.5% has been established for certain categories of taxpayers in Moscow, St. Petersburg, the Samara Region, the Kaluga Region, and several other regions).

Foreign legal entities pay tax on Russia-source income derived through a permanent establishment (PE) (at 20%) and are also subject to withholding tax (WHT) on income from Russian sources not related to a PE (at rates varying from 10% to 20%, depending on the type of income and the method used to calculate it).

Local income taxes

There are no local taxes on income in the Russian Federation.

Russian Federation

Corporate residence

Foreign legal entities managed from Russia can be recognised as Russian tax residents. Russian tax residency means that the worldwide income of such entities will be taxed in Russia.

The tax residence rules set basic and additional criteria for determining the place of management. With that, the rules specify situations that do not affect the residency status (e.g. preparation of consolidated financial statements in Russia). Nevertheless, when assessing the risk of a company being deemed as a Russian tax resident, it is advisable to evaluate all facts and circumstances, even if formally the activities exercised in Russia attributes to such exemptions.

The rules also specify four situations when a company may be deemed a Russian tax resident only on a voluntary basis:

- a company is a party of a production-sharing agreement
- a company is a foreign 'active' holding or sub-holding company (subject to compliance with certain conditions)
- a company is an operator of a new subsea field (or direct shareholder of such operator), or
- a company's core activity is offering for lease or sublease sea-going or mixed river-sea-going ships and/or international transportation of goods, passengers, and their baggage, and providing related services.

Permanent establishment (PE)

A permanent establishment' is broadly defined as 'a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Russia'.

Other taxes

Value-added tax (VAT)

VAT is a federal tax in Russia, payable to the federal budget.

There is no separate VAT registration in Russia. The established general tax registration requirements are applicable to all taxes, including VAT.

Taxpayers follow a 'classical' input-output VAT system, whereby a VAT payer generally accounts for VAT on the full sales price of the transaction and is entitled to recover input VAT incurred on inventory costs and other related business expenses. The Russian VAT system, although not originally based on the European Union (EU) model, has nonetheless moved more towards it. However, it still currently differs from the EU VAT system in various ways.

Output VAT

VAT usually applies to the value of goods, works, services, or property rights supplied in Russia. The standard VAT rate is 18% in Russia (with a lower rate of 10% applicable for certain basic foodstuff, children's clothing, medicines and medical products, certain printed publications, etc.). The same VAT rates apply for imports of goods into Russia.

Exports of goods, international transportation and other services related to the export of goods from Russia, international passenger transportation, and certain other supplies are zero-rated with a right for input VAT recovery. The application of a 0% VAT rate and recovery of the respective input VAT should be confirmed by submitting a number of documents to the tax authorities within certain time limits. Special rules are in place regarding the documentary confirmation of the right to tax export supplies to Eurasian

Economic Union member countries at a 0% VAT rate, including input VAT recovery rights.

The list of VAT-exempt goods and services includes basic banking and insurance services, services provided by financial companies (depositories, brokers, and some others), educational services by certified establishments, the sale of certain essential medical equipment, passenger transportation, warranty services, and certain other socially important services. Most accredited offices of foreign legal entities (as well as the accredited employees of these offices) may be exempt from VAT on property rental payments. Performance of VAT-exempt supply does not provide the right for recovery of attributable input VAT. Instead, costs associated with non-recoverable input VAT are, in most cases, deductible for profits tax purposes.

Withholding VAT

Russian VAT law provides rules for determining where services are supplied in terms of VAT. These rules divide all services into different categories in order to determine where they are deemed to be supplied for VAT purposes. For example, certain services are deemed to be supplied where they are performed, some where the 'buyer' of the services carries out the activity, and others where immovable property is located, etc.

Under the reverse-charge mechanism, a Russian company must account for VAT on any payment it makes to a non-tax registered foreign company if the payment is connected to a supply of goods or services considered to be supplied in Russia, based on the VAT place of supply rules and not falling under any VAT exemption based on domestic VAT law. In such circumstances, under the law, the Russian buyer shall act as a tax agent for Russian VAT purposes by withholding Russian VAT at the rate of 18/118 from payments to the foreign supplier and remit such withheld VAT to the Russian budget. The withheld VAT may be recovered by the Russian payers in accordance with the standard input VAT recovery rules as provided by law.

Input VAT recovery

Taxpayers are usually eligible to recover input VAT associated with the purchase of goods, works, services, or property rights, provided a set of rules established by the VAT legislation is met. Input VAT can potentially be recovered by the taxpayer in the following cases:

- VAT related to goods, works, or services acquired for the purpose of conducting VATable activities.
- VAT related to purchased goods, works, or services used in non-VATable transactions if a portion of expenses related to non-VATable operations does not exceed 5% of total amount of expenses for the respective quarter.
- Input VAT related to advance payments remitted to the Russian suppliers for goods (works, services).

R

VAT compliance requirements

Each taxpayer performing supply of goods, works, services, or property rights is liable to issue VAT invoices and provide them to customers. VAT invoices shall be issued within five days after the supply has taken place. The VAT invoice is a standard form as established by the government. Compliance with invoicing requirements is critical to the buyer's ability to recover input VAT.

Incoming and outgoing VAT invoices should usually be registered by taxpayers in special purchases and sales VAT ledgers.

VAT returns must be submitted electronically to the tax authorities on a quarterly basis. Purchases and sales books and respective journals of issued and received VAT invoices are attached to the electronic VAT return so that the tax authorities receive information on all VAT invoices and are generally able to reconcile all input and output VAT amounts

Russian Federation

in Russia. VAT must be paid to the Russian budget after the end of each quarter in three instalments not later than the 25th day of each of the three consecutive months following the quarter, except for remittance of VAT withheld by Russian buyers under the reverse-charge mechanism, which is to be transferred to the Russian budget on the date of the external payment.

Import VAT

Import VAT is payable to customs upon importation of goods. The tax base for import VAT is generally the customs value of the imported goods, including customs duties and excise payments. Either the 18% or 10% VAT rate may apply upon import of goods in Russia, depending on the specifics of the goods.

A limited scope of goods is eligible for exemption from import VAT. The list of such goods includes, for example, certain medical products and goods designated for diplomatic corps. Relief from import VAT is also available on certain equipment (including their components and spare parts) that is not produced in Russia. The list of such equipment has been established by the Russian government.

Import duties

In addition to VAT, customs duties are levied on assets imported into the Russian Federation. The rate varies according to the tariff code for goods imported and their country of origin (generally, the rate varies from 0% to 20% of the customs value of imported goods). The rates have been reduced for a number of goods due to Russia's accession to the World Trade Organization (WTO). There is special relief from customs duties for qualifying goods contributed to the charter capital of Russian companies with foreign investments.

The foundation of the Eurasian Economic Union, and deeper integration amongst Russia, Belarus, Kazakhstan, and Armenia (hereinafter, 'the EAEU'), has resulted in unification of the customs legislation of the EAEU members, as well as the creation of a single customs territory, within which goods in mutual trade between the member states are moved without any clearance formalities. Members of the EAEU should apply a unified customs tariffs and customs valuation methodology, as well as general rules of non-tariff regulation and uniform technical regulations, etc.

Customs processing fee

Goods transported across the Russian Federation's customs border are subject to a customs processing fee with a flat rate. The fee depends on a customs value of transported goods. The fee is usually small.

Excise duty

Excise taxes are generally paid by producers of excisable products on their domestic supplies. Excise taxes are also applied to import of excisable goods. Export of excisable products is generally exempt from excise taxes. Excise products include cars, tobacco, alcohol, and certain oil products. Special excise rates for each type of excisable goods are established in the Tax Code. The rates are widely variable and are based on various factors.

Property tax

The maximum property tax rate is 2.2%, and regional legislative bodies have the right to reduce this rate. The property tax is charged on fixed assets only (including leased out property). Intangible assets, inventories, work-in-progress, and financial assets are not subject to property tax in Russia.

Property tax is not charged on:

- fixed assets included in the first or second depreciation groups (equipment used for up to three years), or

- movable property entered into a company's books as of 1 January 2013 as fixed assets, except for property obtained as a result of:
 - reorganisation or liquidation of legal entities, or
 - transfer or acquisition from related parties.

From 2015 through 2034, a zero rate applies to trunk gas pipelines and structures constituting integral parts of said pipelines, as well as gas production project sites and helium production and storage facilities, subject to certain conditions (e.g. initial commissioning after 1 January 2015).

At the same time, the property of natural monopolies, which earlier was exempted, is now taxed. The tax rates applicable under the laws of Russia's constituent regions to public railroads, trunk pipelines, power lines, and facilities constituting an integral technical component of the above objects cannot exceed 1.3% in 2016, 1.6% in 2017, and 1.9% in 2018.

In most cases, the average book value of fixed assets is taxed.

Certain real estate objects are taxed based on their cadastral value (that is close to their market value), namely:

- Administrative and business centres.
- Shopping centres and premises therein.
- Offices, retail outlets, public eateries, and consumer facilities.
- Immovable property of foreign entities with no PE in Russia or not related to their operations through a PE in Russia.

The tax rate may not exceed 2% in 2016 and following periods.

Actual tax rates and special rules for determining the taxable base for certain objects are currently being set by constituent regions. According to the law of the City of Moscow 'On the property tax', the tax rates will equal 1.3% in 2016, 1.4% in 2017, and 1.5% in 2018.

Transfer taxes

There are no transfer taxes in Russia.

Transport tax

Transport tax is imposed on certain types of land, water, and air transport registered in Russia. Fixed rates apply (per unit of horsepower, gross tonnage, or unit of transport), which may differ based on engine capacity, gross tonnage, and type of transport. The actual rates in Russia's regions may be subject to a maximum ten-fold increase/reduction by the legislative bodies of the Russian Federation's constituent subjects. Reporting and payment rules have been established by regional legislative authorities.

A multiplier (up to three) depends on the age and cost of a car. For example, in Moscow, the tax may reach RUB 200,000 per year for the most high-end class of vehicle.

Payroll taxes

There are no payroll taxes in addition to social contributions that an employer is responsible for.

Social contributions

Annual salaries of all employees are taxed under the following rules (effective 2016):

- Contributions to the Social Insurance Fund: Only the first RUB 723,000 are taxed (at a rate of 2.9%).

Russian Federation

- Contributions to the Pension Fund: The first RUB 800,000 are taxed at 22%, and the excess is taxed at 10%.
- Contributions to the Medical Insurance Fund: A 5.1% rate applies to the total salary.

Remuneration of foreign nationals temporarily staying in Russia are covered by (i) pension insurance contributions at a rate of 22% within the threshold of RUB 800,000 and a 10% top-up charge on remuneration paid in excess of the threshold and (ii) social insurance contributions at a rate of 1.8% within the threshold of RUB 723,000. The only exception made is for highly qualified specialists (with a respective work permit).

Mineral Resources Extraction Tax (MRET)

The MRET calculation depends on the type of mineral resource.

The MRET for coal, oil, gas, and gas condensate is calculated using the extracted volume of the respective resource. The tax rate is established as a fixed rate multiplied by various coefficients linked to world prices and field characteristics. A zero MRET rate applies to oil extracted from green fields in certain regions of Russia (e.g. East Siberia, internal and territorial waters located in the northern polar zone, the Azov and Caspian Seas, and the Nenets and Yamal Regions) during their initial production stage.

The MRET on other natural resources depends on the value of the resources extracted. The tax rate varies from 3.8% to 8%. For instance, 3.8% for potassium salt, 4.8% for ferrous metals, 6% for products containing gold, and 8% for non-ferrous metals and diamonds.

Reduced MRET rates apply to investors in Russia's Far East (*see Regional incentives in the Tax credits and incentives section for more details*).

Environmental levy

The environmental levy must be paid by manufacturers and importers of goods to be disposed of after they are no longer fit for use/consumption because of wear and tear, broken down by certain groups of goods. These groups of goods include paper and paper products, rubber and plastic products, textile and leather, metals, and electronics.

It should be noted that the levy is not technically a tax, and is established by a special law outside the Tax Code. It is levied on entities operating in specific industries whose products are determined to have an environmental impact that warrants compensation.

The levy is calculated by multiplying three values: (mass/quantity of goods subject to utilisation [or mass of packaging]) * (levy rate) * (utilisation standard in relative units).

As of 9 April 2016, all the elements required for calculation of the environmental levy amount for 2016 were established. The levy for 2016 should be paid not later than 15 April 2017. Moreover, during March and April 2017, manufacturers and importers are also required to prepare and submit the appropriate reports to the Russian Federal Service for Supervision of Natural Resource Usage (*Rosprirodnadzor*).

The following groups of goods will be subject to the highest environmental levy amounts in 2016: rechargeable batteries, various rubberware and tyres, casings, and rubber bags.

Trade levy law

A new chapter on 'trade levy' was introduced into the Tax Code. It authorises local authorities to introduce the levy in their respective municipalities (or federal cities).

The levy is to be applied towards individual assets used in retail and wholesale trade.

To date, the levy has only been enacted by Moscow (with effect from 1 July 2015).

Branch income

Foreign legal entities pay tax on profits attributable to a PE. A PE's profits are computed on primarily the same basis as Russian legal entities, including composition of tax-deductible expenses. The Tax Code does not specifically mention the deductibility of expenses incurred abroad by a head office with respect to its PE in Russia (including a reasonable allocation of administration costs), although most double taxation treaties (DTTs) provide for such an option.

A special provision on taxable income of PEs has been recently introduced in Russian tax law. Taxable income of a PE in Russia should be determined while taking into account the PE's functions, assets, and economic/commercial risks. This provision does not contain any guidance on specific transfer pricing methods that taxpayers should follow. In addition, court practice regarding this approach has not yet been developed.

If a foreign legal entity conducts free-of-charge preparatory and/or auxiliary services for the benefit of third parties, then a PE would be considered to have been formed, and the tax base is calculated as 20% of its expenses relating to such activities.

Foreign legal entities operating in Russia through a PE must follow the filing and payment schedules established for Russian legal entities. Although they do not make monthly advance payments, they should pay profits tax on a quarterly and annual basis only.

Income determination

The accounting period in Russia is a calendar year. Different periods are not permitted. The taxable base is calculated on an accrual basis (only small-scale taxpayers are still allowed to use a cash basis).

Taxable income is to be computed following the rules and principles established in the Tax Code. Taxpayers must maintain tax accounting registers. Statutory accounts may be used for computing tax items for which accounting methods are the same. In practice, most taxpayers use statutory accounts as a basis and apply adjustments so as to arrive at taxable income.

Inventory valuation

Inventory can be valued using one of the following methods: first in first out (FIFO), average cost, and individual unit cost.

Capital gains

Capital gains are subject to the same 20% profits tax rate and are added to ordinary income in order to arrive at the taxable income.

The number of tax baskets for taxpayers performing operations with securities and derivatives is two: (i) general and (ii) results from operations with non-listed securities and non-listed derivatives. The loss on the second basket cannot be offset with the profits on the first basket (however, the opposite offset is possible). It is worth noting that, starting from 2016, the price in transactions with securities and derivatives should be compared with a market price only if a transaction is controlled under transfer pricing rules.

Gains from the sale of fixed assets and other property are equal to the difference between the sale price and their net book value for tax purposes. Losses resulting from the sale of fixed assets should be deducted in equal monthly instalments during the period, defined as the difference between their normative useful life and the actual time of use.

Russian Federation

A significant exemption is available for capital gains from the sale or other disposal (including redemption) of shares in Russian entities (interests in Russian entities' charter capital), provided that, as of the date of sale, they have been continuously held by the taxpayer on the basis of right of ownership or another proprietary right for more than five years. One of the following conditions must be met in order to apply a 0% tax rate:

- The shares have been non-listed securities over the entire period of the taxpayer's ownership.
- The shares are listed securities, and the company issuing shares has taken part in the technology/innovation sector of the economy over the entire period of the taxpayer's ownership.
- As of the date of acquisition by the taxpayer, the shares qualified as non-listed securities and, as of the date of their sale by this taxpayer or of another disposal (including redemption) by this taxpayer, they are listed securities of the high technology/innovative sector of the economy.
- Less than 50% of total assets of the company issuing shares are represented by real estate in Russia (directly or indirectly).

Beneficial tax treatment will only apply to shares and interests in charter capital acquired by taxpayers after 1 January 2011 (this means that the exemption may be first used in 2016).

Dividend income

Dividends received by Russian legal entities from Russian or foreign legal entities are taxed in Russia at a 13% flat rate.

Dividends received from 'strategic investments' are exempt from Russian income tax. An investment is considered strategic when:

- the owner (recipient of dividends) owns at least 50% of the capital of the payer of dividends or owns depository receipts entitling it to receive at least 50% of the total amount of paid dividends and
- the share or depository receipts have been owned for at least 365 calendar days on the day dividends are declared.

Dividends from companies residing in 'offshore' zones with preferential tax regimes are not eligible for this tax exemption. The list of offshore zones is established by the Ministry of Finance.

Tax on dividends from abroad withheld in the source country may be credited against Russian tax.

The standard 15% tax rate is applicable to dividends paid by Russian legal entities to foreign legal entities. The tax should be withheld by the Russian legal entity paying dividends. The tax may be reduced based on a relevant DTT, usually to 10% or 5% (*please see the Withholding taxes section for more details*).

Interest income

Interest income is taxed on an accrual basis. A standard tax rate of 20% is applied to interest income, except for interest on state and municipal securities, which is taxed at 0%, 9%, or 15%, depending on the type of security. The rate may be reduced (typically to zero) according to the relevant tax treaty.

The level of interest income recognised for tax purposes may be subject to control (*see Interest expense in the Deductions section for more details*).

Exchange gains and losses

Starting from 2015, foreign exchange gains and losses are recognised for tax purposes on an accrual basis only.

Under the previous rules, gains and losses from settlements in a local currency of amounts denominated in (tied to) a foreign currency were taxable (deductible) on payment. For contracts concluded before 1 January 2015, the previous rules still apply.

Foreign income

Russian legal entities pay tax on their worldwide income. Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

Current tax legislation does not contain provisions that allow tax deferral with respect to foreign income.

Deductions

Expenses are deducted on an accrual basis. The main criteria for deductibility of expenses is that the expense is (i) incurred in the course of an income-generating activity, (ii) properly documented, and (iii) not mentioned in the Tax Code as non-deductible for tax purposes.

Depreciation and amortisation

Two methods of depreciation are allowed: the straight-line method and the declining-balance method. The ranges of useful life of assets for tax purposes are established in the Classification of Fixed Assets adopted by the Russian government, for example:

Fixed asset	Useful life (years)
Personal computer	2 to 3
Automobile	3 to 5
Truck (more than five tonnes capacity)	7 to 10
Aircraft	10 to 15
Blast furnace	20 to 25

Accelerated depreciation is permitted in respect to some types of property (a special ratio of up to three may be applied). It is prohibited to apply several special coefficients to a normal rate of depreciation.

An upfront premium is allowed, which means that a taxpayer has the right to deduct 10% (or 30% for certain categories of fixed assets) of the cost of fixed assets purchased (or constructed) in the month when the depreciation started. The balance is depreciated over the useful life of the asset. A premium must be recaptured if a relevant asset is sold within five years of its acquisition (the requirement to recapture does not apply to sales to unrelated parties starting from 2013).

Intangible assets are amortised over their useful life or over ten years (two years for certain types of intangible assets) if their useful life cannot be determined.

Goodwill

Under tax law, a mark-up (the difference between the acquisition value and net assets of the business [property complex] purchased) should be recognised as goodwill for tax purposes and may be amortised by a buyer over five years. However, this tax regime often does not apply since a business (subject of a deal) needs to be registered as a property complex with the state authorities. However, sellers almost never do this.

Russian Federation

Start-up expenses

Russian tax law does not contain specific provisions on the deductibility of start-up expenses. In some cases, they may be deducted neither by a parent company nor by a subsidiary for tax purposes.

Interest expenses

Starting from 2015, the tax authorities can audit interest income and expenses only for transactions that are controlled under the Russian transfer pricing rules (this means transactions with related parties in most cases) and only in accordance with these rules.

The following table shows how the market corridors (safe harbours) are applied to interest accrued since 2016:

Debt currency	Type of loan	Safe harbour rates
Roubles	Rouble loans between Russian entities	75% to 125% of the CBRF key rate
	Other rouble loans	75% to 125% of the CBRF key rate
Euros (EUR)		EURIBOR +4% to EURIBOR +7%
Renminbi (CNY)		SHIBOR +4% to SHIBOR +7%
British pounds (GBP)	Foreign currency loans	LIBOR in GBP +4% to LIBOR in GBP +7%
Swiss francs (CHF) or Japanese yen (JPY)		LIBOR in relevant currency +2% to LIBOR in relevant currency +5%
Other		LIBOR in USD +4% to LIBOR in USD +7%

Bad debt

Losses in the form of bad debts written off are usually deductible. Companies may create a bad debt reserve. The method of accrual for a bad debt reserve for tax purposes may differ from that in financial accounting, as it is based only on the overdue payment period (i.e. if the delay exceeds 90 days, the full amount of the account receivable is included in the reserve).

Charitable contributions

Russian tax law does not foresee any benefits with respect to charitable contributions. Such expenses are not deductible for tax purposes.

Research and development (R&D) expenses

R&D expenses (including R&D with a negative result) are deductible within one year after completion. Certain R&D expenses may be deducted using a coefficient of 1.5. The list of R&D categories is determined by the Russian government. A provision for future R&D expenses may be accrued for tax purposes.

Insurance premiums

Expenses related to all types of obligatory insurance are deductible and subject to state tariff limitations, wherever established. Voluntary insurance expenses are deductible to the extent that they relate to the insurance of damage and losses related to certain classes of assets, and the insurance of construction activity risks. Contract liability insurance expenses are deductible to the extent that such insurance is required by an international treaty to which Russia is a party or a generally accepted international trade custom.

Long-term life and pension insurance is deductible within a limit of 12% of the payroll fund. Voluntary medical insurance is deductible within a limit of 6% of the payroll fund.

Fines and penalties

Fines and penalties paid to contractors for violating contractual terms may be deducted for tax purposes.

Fines and penalties paid to a budget are not deductible.

Taxes

Taxes paid by a taxpayer, as well as social contributions of employers, are deductible for tax purposes. Trade levy is credited against profits tax.

Net operating and capital losses

Tax losses may be carried forward for up to ten years without limitation (i.e. they can be used to offset the entire taxable profit before a loss carryforward deduction). Carryback of losses, however, is not allowed.

Losses from the sale of fixed assets are recognised evenly during the remaining useful life.

Losses and income from different tax baskets are determined separately (*please see Capital gains in the Income determination section for more details*).

Payments to foreign affiliates

There are no special tax provisions with respect to the deductibility of payments to foreign affiliates for services provided. They may be deducted in full if general deductibility criteria are met. Charges with respect to administrative support provided by foreign affiliates may be deductible. However, due care should be taken with regard to the documents used to support the nature and actual receipt of service.

Group taxation

Consolidated taxpayer regime

The consolidated taxpayer regime is available for large Russian groups. A group can comprise two or more Russian entities where the direct or indirect equity interest of one member in the charter/share capital of the other members comes to at least 90%. In order to establish and apply this regime, all group members should meet the following requirements:

- At least RUB 10 billion in total profits tax, VAT, excise tax, and MRET paid during the year preceding the year of registration of a group taxpayer.
- At least RUB 100 billion in sales proceeds and other income.
- Total cost of assets of at least RUB 300 billion.

The advantages of applying this regime are the following. Firstly, transactions among members are not controllable under the transfer pricing legislation (with one exception: transactions with mineral resources subject to MRET with a percentage rate are still subject to control). Secondly, for the purposes of calculating profits tax, it is possible to consolidate members' profits and losses.

A one-year moratorium has been imposed on the creation of consolidated groups in 2015. It is expected that the moratorium will be prolonged till 2019. The respective bill is currently under public discussion (it has not been submitted to the State Duma yet).

Transfer pricing

Russian transfer pricing legislation is essentially based on Organisation for Economic Co-operation and Development (OECD) principles, with certain important deviations. This legislation establishes criteria for related parties and controlled transactions, transfer pricing methods for determining arm's-length prices/profitability, a list of permitted information sources, and compliance requirements.

Russian Federation

Advanced pricing agreements (APAs) are available to Russian companies registered as the 'largest' taxpayers. Bilateral APAs are not presently available because relevant regulations have not yet been adopted.

Thin capitalisation

Under the Russian Tax Code, interest on loans received from foreign shareholders (as well as their Russian affiliates, or loans guaranteed by foreign shareholders or their Russian affiliates) owning more than 20% of capital is deductible, provided that the loans do not exceed the amount of equity by three times (12.5 times for banks and leasing companies). If loans exceed this limit, excess interest on the loans will be reclassified for taxation purposes as dividends paid to foreign shareholders. Such dividends are not deductible for profits tax purposes and are subject to WHT at the rate of 15% (treaty benefits may apply to reduce the rate).

Temporary changes (from 1 July 2014 to 31 December 2016) due to the significant drop in the Russian rouble's exchange rate in 2014 were also introduced. In particular, currency exchange rates were frozen as of 1 July 2014 with respect to 'old' loans (obtained before 1 October 2014) for the purpose of calculation of borrower's net assets because many taxpayers could not meet the 3:1 criteria.

Starting from 2016, interest on loans from independent banks are exempted from the thin capitalisation rules (provided the debt [both principal and interest] was not repaid by a foreign shareholder or its affiliates as a result of execution of a guarantee to the bank).

Significant developments in thin capitalisation rules will come into effect from 1 January 2017. The new version of the rules is aligned with transfer pricing rules (including, among other things, a transition from the 20% participation criteria to 25% or 50%, as appropriate, of each link in the ownership chain).

The major change involves expanding the scope of thin capitalisation rules to include loans from foreign related companies that do not hold a direct or indirect interest in a Russian borrower ('sister' companies). This position corresponds to the current Russian court practice; however, no criteria for the substance of a foreign sister company is provided to shield the loan from the scope of the rules.

Among other adopted changes:

- Loans exclusively within Russia will not be controlled (provided certain requirements are met).
- All listed liabilities of a taxpayer should be considered in aggregate to calculate the tax (this provision could considerably expand the scope of the rules).
- A debt arising upon the issue of Eurobonds is not subject to the rules.

Controlled foreign companies (CFCs)

CFC rules have been in effect starting since 1 January 2015. The new law introducing these rules was first signed in November 2014 and amended in 2015. New (latest) draft amendments to the law were released on 14 December 2015.

These rules apply to Russian tax residents (controlling parties) who control foreign tax resident companies and non-corporate structures (including trusts).

In particular, a controlling party of a CFC means an individual or legal entity with a direct or indirect interest in a CFC (for individuals, jointly with spouses and minor children) of:

- over 25%, or

- over 10% if total participatory interest of all Russian tax residents in the CFC is over 50%.

Please note that 2015 was a transition period, during which a higher participatory interest threshold of more than 50% was applied.

Taxpayers have to file several types of notifications to the tax authorities, including:

- Notification on participation in foreign companies (if direct or indirect participatory interest is above 10%), as well as on incorporation of foreign non-corporate structures or execution of the control over such structures (certain specific aspects should be taken into account with this respect), should be provided within a month's period starting from the date of beginning of participation. The fine for failure to provide the notification in time or provision of incorrect information is RUB 50,000 for each company.
- Notification on CFCs should be provided annually by 20 March (starting in 2017). The fine for failure to provide the notification in time or provision of incorrect information is RUB 100,000 for each CFC.

Profits of certain CFCs will be exempt from taxation in Russia (but not from the obligation to file respective notifications), provided that one of the following special exemptions apply:

- 'Active' companies and 'active' holding and sub-holding companies, which meet certain criteria.
- Companies that have (i) an effective tax rate of at least 3/4 of the average weighted Russian tax rate and (ii) their permanent location is a 'good' jurisdiction (i.e. treaty country, except for those countries that do not exchange tax information with Russia).
- A number of other exemptions.

In order to apply an exemption, a controlling party must submit documents to the tax authorities certifying compliance with the conditions under which CFC income is not taxable in Russia.

CFC income shall be subject to a 20% tax rate if a CFC is controlled by a legal entity and a rate of 13% if it is controlled by an individual. The amount of taxable profit can be reduced by the amount of dividends paid out of the CFC's profits (certain specific issues should be taken into account).

Only the profits of CFCs determined in periods starting from 2015 are subject to tax in Russia. CFC profits of 2015 shall be included to the annual income tax return for the first time by 28 March 2017 (for Russian legal entities) and by 30 April 2017 (for Russian individuals).

CFC profit is subject to tax in Russia if the amount of profit for the respective period exceeds the threshold of RUB 10 million (other thresholds will apply during the transition period: RUB 50 million for 2015, RUB 30 million for 2016).

Profits of a CFC shall be determined based on financial statements prepared in accordance with its personal law (provided that the CFC's financial statements are subject to mandatory audit under the CFC's personal law and the CFC's permanent location is a treaty country) or according to Russian tax rules (in all other cases). These provisions potentially may be mitigated.

Underpayment of CFC tax is fined at 20% on the underpaid tax amount, but not less than RUB 100,000. There is also a transition period exception, according to which fine is not levied for underpayment of CFC profits of 2015 to 2017 tax periods.

Russian Federation

Russian legislation allows one to credit tax paid by a CFC against CFC tax due by the controlling party in Russia.

There are a number of exemptions that allow one to structure the transfer of assets and to liquidate a foreign company without tax exposures in Russia. These exemptions are aimed at encouraging taxpayers to move assets from offshore jurisdictions to Russia. However, they are available for liquidations finalised by 2017 (the deadline may be extended under certain circumstances).

Tax credits and incentives

At present, there are several types of incentives in Russia:

- Regional incentives granted by regional or local authorities with respect to taxes paid to their budgets.
- Special tax regimes in special economic zones (SEZs).
- Incentives related to certain activities (e.g. activities related to R&D, information technology).
- Incentives related to particular projects (e.g. Skolkovo, the FIFA 2018).

The incentives are briefly described below.

It is also worth mentioning that Russian tax law provides for special tax regimes to support small and medium-size businesses. These include a unified and simplified regimes, as well as a unified agricultural tax.

Regional incentives

Regional incentives in the form of reduced rates for taxes payable to regional budgets (primarily profits tax and property tax) are granted to certain classes of taxpayers (typically large investors or entities operating in specific industries).

Russian Far East incentives

Tax breaks for investment projects in several Far Eastern and Siberian regions are available. The law establishes a zero rate for profits tax payable to the federal budget and allows investors in the 13 eligible regions to use lower regional tax rates. So, in contrast to the regular 20% rate, the beneficial tax rate adopted by most of these regions usually comes to 0% during the first five years from the date the first income from the sales of goods under an investment project is generated, and then 10% over the following five-year period.

In addition, reduced rates are applicable with respect to the MRET payable by participants in regional investment projects. They apply to a whole range of mineral resources, including gold, coal, ferrous and non-ferrous mineral ores, etc.

The law sets thresholds for capital investments and timeframes for their implementation according to the specifics of a given investment project of:

- at least RUB 50 million within three years, or
- at least RUB 500 million within five years.

An investment project must be focused on producing goods exclusively within one of the eligible Russian constituent regions.

Please note that starting from 2017 any Russian constituent region is entitled to introduce such a regime for investors in their territory.

In addition, Fast-track Development Zones (FDZs) will be created in the Russian Far East. FDZs will offer special terms for doing business for start-up companies, including tax holidays and simplified rules for hiring foreign employees.

Special economic zones (SEZs)

The following types of SEZ are established in Russia:

- Technical research and implementation zones for scientific projects.
- Industrial production zones to develop industrial products.
- Tourism-recreation zones for the development and effective use of Russian tourist resources.
- Port zones.

SEZ residents may take advantage of different combinations of benefits, such as reduced profits tax, exemption from property tax and land tax, and, in some cases, exemption from customs duty and VAT.

Activities incentives

The following 'activities' incentives are available to taxpayers in Russia:

- Certain R&D services are exempt from VAT.
- Certain R&D service-related expenses, as listed by the government, are deductible using a coefficient of 1.5.
- Fixed assets used in science and technology may be depreciated with an accelerated coefficient of up to 3.
- Reduced rates for contribution payments to social funds are established for information technology (IT) companies.

Special project incentives

Participants in the Skolkovo Innovation Centre enjoy a number of benefits, the primary of which are the following: exemption from profits and property taxes, exemption from VAT obligations, and reduced rates for mandatory contributions to social funds.

Foreign tax credit

Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

Withholding taxes

Under the general provisions of the Tax Code, income received by a foreign legal entity and not attributed to a PE in Russia is subject to WHT in Russia (to be withheld at source). WHT rates are as follows:

- 15% on dividends and income from participation in Russian enterprises with foreign investments.
- 10% on freight income.
- 20% on certain other income from Russian sources, including royalties and interest.
- 20% of revenue or 20% of the margin on capital gains (from the sale of immovable property located in Russia or non-listed shares in Russian subsidiaries where the immovable property located in Russia represents more than 50% of assets).

Taxation of margins (rather than gross income received from the above sales) may be applied only if proper documentary support of expenses is available.

Income of foreign organisations (not performing activities in Russia through a PE) from the sale of certain listed securities of Russian entities (and their derivatives) is not regarded as income derived from sources in Russia subject to WHT.

Russian Federation

The list of exempt income (not subject to WHT) also includes: (i) interest payments on Russian state securities; (ii) interest payments on tradable bonds, issued in accordance with the laws of foreign states; and (iii) payments made by Russian companies to finance coupons on Eurobonds issued by special purpose vehicles (SPVs) incorporated outside of Russia.

Tax should be withheld by the tax agent and paid to the Russian budget. WHT rates may be reduced under a relevant DTT, provisions of which may be applied based on confirmation of tax residence, which is to be provided by a foreign company to the Russian tax agent prior to the payment date (no advance permission from the Russian tax authorities is required) and also as long as general conditions are fulfilled (proof of beneficial ownership, etc.).

The Russian tax authorities recognise the terms of former Union of Soviet Socialist Republics' (USSR) treaties until they are renegotiated by the Russian government. Furthermore, the list of effective tax treaties is continuously updated.

'Beneficial ownership' concept

A concept of the actual owner of income (i.e. 'beneficial owner') was introduced into tax legislations by so-called deoffshorisation law. It determines the ability to apply lower tax rates under a DTT.

Tax authorities have not come up yet with a concise test of beneficial ownership, which means that Russian tax agents will not be entirely comfortable applying reduced tax rates on income paid abroad. Making any payments, they will have to consider the risk of additional tax and penalties to be paid at their own expense.

According to the law, a tax agent has the right to request a confirmation that a foreign organisation is a beneficial owner of income. If the tax agent becomes aware of who is the beneficial owner of income, the law allows for using a corresponding treaty with the country where this beneficial owner resides (for dividends, indirect interest is treated as direct interest).

If the beneficial owner is a Russian tax resident, the income paid is taxed under the Russian Tax Code rules (please note that a zero tax rate on dividends is applied under additional conditions). In such cases, the tax authorities must be notified about the payments made.

Treaty rates

The list below indicates the WHT rates mentioned in treaties.

Recipient	WHT (%)			Construction site duration before creation of PE (months)

Notes

1. In most cases, a 0% tax rate applies to interest payments to the governments of contracting states and to payments guaranteed by the government.
2. If the beneficial owner of the dividends directly holds at least 25% of the capital of the company paying the dividends.

Russian Federation

3. If the resident of the other contracting state contributed at least 40,000 United States dollars (USD) (or an equivalent amount in the domestic currency of either of the contracting states) to the authorised capital of the enterprise paying the dividends.
4. If the following conditions are met:
 - a. Dividends are paid to a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
 - b. The resident of the other contracting state has invested a minimum of 700,000 Australian dollars (AUD), or an equivalent amount in Russian roubles, in the capital of that company.
 - c. If the dividends are paid by a company that is resident in Russia, the dividends are exempt from Australian tax.
5. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends and the participation exceeds USD 100,000 or an equivalent amount in any other currency.
6. If the beneficial owner of the dividends is a company that owns at least 10% of the voting stock (or in the case of Russia, if there is no voting stock, at least 10% of the statutory capital) of the company paying the dividends.
7. 0% WHT is applied to the following types of Royalties:
 - a. Royalties for the production or reproduction of any literary, dramatic, musical, or other artistic work (but not including royalties for motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting).
 - b. Royalties for the use of, or the right to use, computer software.
 - c. Royalties paid to an unrelated party for the use of, or the right to use, any patent or any information concerning industrial, commercial, or scientific experience.
8. For the use of any industrial, commercial, or scientific equipment.
9. If the beneficial owner of the dividends is a company that directly holds at least 25% of the capital of the company paying the dividends (this share should be at least USD 100,000 or its equivalent in another currency).
10. If the beneficial owner of the dividends is a company (excluding partnerships) that directly holds at least 25% of the capital of the company paying the dividends.
11. If the beneficial owner of the dividends has directly invested in the capital of the company not less than 100,000 euros (EUR) or its equivalent in another currency.
12. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends, and the foreign capital invested exceeds USD 100,000 or its equivalent in the national currencies of the contracting states at the moment when the dividends become due and payable.
13. If the following conditions are met:
 - a. Where the beneficial owner of the dividends has invested in the company paying the dividends, irrespective of the form or the nature of such investments, a total value of at least 500,000 French francs (FF) or the equivalent in another currency; as the value of each investment is appreciated as of the date it is made.
 - b. Where that beneficial owner is a company that is liable to tax on profits under the general tax laws of the contracting state of which it is a resident and which is exempt from such tax in respect of such dividends.
14. If only one of the conditions of 13 (a) or 13 (b) are met.
15. If the beneficial owner of the dividends is a company that directly holds at least 10% of the basic or common stock of the company paying the dividends and such capital share amounts to at least EUR 80,000 or the equivalent value in roubles.
16. If the beneficial owner of the dividends is a company (other than partnership) that directly holds at least 25% of the capital of the company paying the dividends and the foreign capital invested exceeds USD 100,000 or its equivalent in the national currency of the contracting state.
17. If the beneficial owner of the dividends is a company that directly holds at least 10% of the capital of the company paying the dividends (this share should be at least USD 100,000 or its equivalent in another currency).
18. Literary, artistic, or scientific work including cinematograph films and films or tapes for radio or television broadcasting.
19. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends and invests not less than USD 100,000 or the equivalent in local currencies to the company paying the dividends.
20. The 0% rate applies to dividends paid to governmental agencies or financial institutions.
21. If the beneficial owner is a company (other than a partnership) that directly hold at least 25% of the capital of a company paying dividends and the capital invested exceeds USD 75,000.
22. Applicable to interbank loans only.
23. If the beneficial owner of the dividends directly holds at least 10% of the capital in the company paying the dividends and the investment exceeds EUR 80,000 or its equivalent in roubles.
24. The 15% rate applies to profits received from a joint venture by a resident of Malaysia.
25. Any patent, trademark, design or model, plan, secret formula or process, or any copyright of scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
26. Cinematograph films or tapes for radio or television broadcasting, any copyright of literary or artistic work.
27. If the invested amount equals or exceeds FF 1 million.
28. 5% where the participation interest is at least 20% (if the owner is not a partnership) and the investment exceeds EUR 100,000; 10% in all other cases.
29. If the beneficial owner of the dividends has invested in the capital of the company paying dividends of more than USD 500,000.
30. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends and has directly invested in the equity share capital of that company not less than the equivalent of USD 100,000.

31. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and has invested in it at least 75,000 European Currency Units (ECU) or its equivalent in the national currencies of the contracting states.
32. If the beneficial owner of the dividends is a company that, for an uninterrupted period of two years prior to the payment of the dividends, directly owned at least 25% of the capital of the company paying the dividends.
33. If the beneficial owner of the dividends is the government of the other contracting state or if the beneficial owner of the dividends is a company that directly holds at least 15% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or its equivalent in other currencies.
34. If residents of the other contracting state hold at least 30% of the capital of the company paying the dividends and have directly invested in the equity share capital (authorised fund) of that company an amount of not less than USD 100,000 or its equivalent in the currency of the first state.
35. If the following conditions are met:
 - a. The beneficial owner of the dividends is a company (other than a partnership) that has invested at least ECU 100,000 or its equivalent in any other currency in the capital of the company paying the dividends.
 - b. Those dividends are exempt from tax in the other contracting state.
36. If only one of the conditions of 35 (a) or 35 (b) are met.
37. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds 100% of the capital of the company paying the dividends; or, in the case of a joint venture, not less than 30% of the capital of the joint venture; and, in either case, the foreign capital invested exceeds USD 100,000 or its equivalent in the national currencies of the contracting states at the moment of the actual distribution of the dividends.
38. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends and the foreign capital invested exceeds 200,000 Swiss francs (CHF) or its equivalent in any other currency at the moment when the dividends become due.
39. Cinematography films, programmes, and recordings for radio or television broadcasting.
40. Any copyright of literary, artistic, or scientific work.
41. Any patent, trademark, design or model, plan, secret formula or process, any computer software programme, or for information concerning industrial, commercial, or scientific experience.
42. If a resident of the other contracting state has invested in its joint-stock capital (registered fund) at least USD 50,000 or its equivalent in the national currencies of the contracting states.
43. In the case of banks.
44. In the case of fees for technical assistance.
45. If the residents of the other contracting state have directly invested in the equity share capital of that company not less than USD 10 million.

Tax administration

All taxpayers are required to obtain tax registration and be assigned a taxpayer identification number, irrespective of whether their activities are subject to Russian taxation.

Taxable period

The taxable period runs from 1 January to 31 December.

Tax returns

An annual profits tax return must be filed by 28 March of the year following the end of the reporting year.

Payment of tax

Companies pay advance profits tax payments on a monthly or quarterly basis. The final payment for the year is due by 28 March of the following year.

Tax audit process

Tax dispute resolution at the pre-trial (administrative) stage

Tax disputes happen quite frequently in Russia. Most corporate taxpayers have to go through the tax litigation process at least once while doing business in the country.

At present, if taxpayers seek to challenge decisions and other documents/actions (or failure to act) of the tax authorities in court, before going to court, they must first contest such decisions/actions with the relevant higher tax office.

Russian Federation

In recent times, tax disputes have been increasingly resolved at the pre-trial (administrative, superior tax office) stage. However, taxpayers cannot formally negotiate tax audit results or enter into formal settlement agreements with the tax authorities at the pre-trial stage. So, in many cases, they still must litigate in order to uphold their rights.

Tax dispute resolution in court

Taxpayers can file claims against the tax authorities through *arbitrazh* courts (i.e. courts that review and resolve economic disputes mainly among legal entities/entrepreneurs or between legal entities/entrepreneurs and state authorities, including the tax authorities). Claims may be filed with a court within three months after a contested decision takes effect or within three months after a taxpayer discovers that its rights have been violated (provided that the taxpayer has already sought redress through the mandatory pre-trial stage mentioned above).

Courts of the first instance (first level) initially review disputes and issue decisions. Decisions of a first instance court can be appealed to appellate courts (second instance or level) and *cassational* courts (third instance or level). If litigation goes through all three instances (levels), the process usually takes up to a year.

Resolutions/decisions of courts at these three levels may be appealed to the Russian Federation Supreme Court (as a supervisory authority). However, in practice, very few such disputes are actually heard by the Supreme Court.

Statute of limitations

The statute of limitations is established for three years. For example, tax authorities may examine 2015, 2014, and 2013 profits tax returns by conducting a site tax audit in 2016.

Topics of focus for tax authorities

The recent court practice demonstrates that tax authorities concentrate on (i) tax evasion schemes and relationships with one-day contractors, (ii) financing structures and thin capitalisation rules, and (iii) royalties paid abroad.

Significant developments

Rwanda enacted a new investment code (Law no. 06/2015 of 28 March 2015) to replace the old code. The new code became effective from 27 May 2015 and is more focused on priority sectors. The priority sectors identified include exports, industrial manufacturing, energy, transport, information and communications technology (ICT), financial services, and construction of low-cost housing.

The new investment code has phased out incentives that did not achieve the code's strategic objectives, such as tax discounts, construction incentives, and those not conforming to East African Community (EAC) Customs Union rules.

See the Tax credits and incentives section for a description of the incentives available to a registered investor under the new investment code.

Taxes on corporate income

Rwanda operates both a source and residence-based taxation system. This means that any income that is deemed to be from sources within Rwanda will be liable to tax in Rwanda. In addition, resident entities are taxed on their worldwide income. However, where such income is taxed in another country, a tax credit is allowed, which does not exceed the tax that would have been payable on the same income in Rwanda.

Non-resident entities are taxed on income sourced in Rwanda through a permanent establishment (PE).

The standard corporate income tax (CIT) rate is 30%; however, small businesses and individuals (whose business has a turnover of less than 20 million Rwanda francs [RWF] in a tax period) pay profit tax at the rate of 4% of turnover.

Special CIT regimes

There are special CIT rates for certain industries or sectors of the economy.

Newly listed companies on capital markets are taxed as follows for a period of five years:

- If a company sells at least 20% of their shares to the public, the CIT rate is 28%.
- If a company sells at least 30% of their shares to the public, the CIT rate is 25%.
- If a company sells at least 40% of their shares to the public, the CIT rate is 20%.

Venture capital companies registered with the Capital Markets Authority in Rwanda enjoy a CIT rate of 0% for a period of five years. This is also the same rate applicable to companies that carry out micro-finance activities.

Rwanda

Registered investors in priority sectors can enjoy reduced CIT rates and tax holidays where certain conditions and thresholds are fulfilled. *See the Tax credits and incentives section for more information.*

Local income taxes

Rwandan legislation does not provide for any local taxes on income.

Corporate residence

Rwanda incorporated companies or associations are treated as Rwanda resident entities. In addition, companies incorporated overseas are also treated as Rwandan resident companies if they have a place of effective management in Rwanda at any time during the tax period. The term 'effective management' is not defined in the tax law.

Rwandan government companies are also considered to be residents in Rwanda.

Permanent establishment (PE)

The definition of a PE for Rwanda is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition. According to Rwandan tax law, a PE means a fixed place of business through which the business of a person is wholly or partially carried on.

For non-resident companies, CIT liability will arise if they have a PE in Rwanda through which a trade is carried on. The profits attributable to the PE will be taxed in Rwanda. However, there are no rules or guidance on how the PE's profit should be evaluated for Rwanda tax purposes. The general understanding is that entities are required to use transfer pricing methods to determine the level of profits that should be attributable to the PE based on the functions it performs.

In particular, the existence of the following triggers a PE: an administrative branch; a factory; a workshop; a mine, quarry, or any other place for the exploitation of natural resources; a building site; or a place where construction or assembly works are carried out.

There are a number of specific exceptions from the definition of a PE. A person is deemed not to have a PE if that person:

- a. uses facilities solely for the purpose of storage or display of goods or merchandise
- b. maintains a stock of goods or merchandise solely for the purpose of storage or display
- c. maintains a stock of goods or merchandise solely for the purpose of processing by another person
- d. has a place of operation aimed purposely at purchasing goods or merchandise or at collecting information related to one's business, or
- e. has a place of operation solely for the purpose of carrying on preparations of one's activities and performing any other activities that make them more effective.

Where an agent, except an independent person concerned with (e) above, acts on behalf of a company (or person) and the agent has capacity to conclude contracts in the name of that company, the company is considered as having a PE in respect of activities one's agent undertakes except if such activities of the agent are limited to those mentioned in (b) above.

However, a person is not considered as having a PE if it carries out activities through a broker, general commission agent, or any other private agent in accordance with procedures of the ordinary course of the activities of such an agent.

A company that controls or is controlled by another company does not, of itself, constitute either company to be a PE of the other.

Other taxes

Value-added tax (VAT)

VAT is levied on the supply of taxable goods and services in Rwanda as well as on the importation of taxable goods and services into Rwanda.

The threshold for VAT registration is taxable turnover of RWF 20 million in any relevant year or RWF 5 million in a calendar quarter.

The standard VAT rate is 18% and applies to goods and services that are neither exempt from VAT nor zero-rated.

Export of goods and services are subject to VAT at 0%. Supplies to privileged persons, such as goods imported for official purposes of diplomatic missions, supplies made under special arrangements between the government of Rwanda and donors, and supplies or importation made under special technical aid agreements, are subject to VAT at 0%. Persons entitled to zero rating of goods or supplies received by them are required to pay VAT at the time of receiving the supply and then apply for a refund of the VAT paid.

Some supplies are exempt from VAT, the main categories being supply of water service, goods and services for health purposes, educational materials and services, transport services, books and newspapers, financial and insurance services, lending or leasing interests in land or building for residential purposes, funeral services, energy supplies, all unprocessed agricultural and livestock products, mobile handsets, and equipment for information, communication, and technology.

Suppliers who provide zero-rated services or goods are entitled to recover input VAT incurred in making the supply. This is unlike exempt supplies, where input VAT recovery is not allowed. Therefore, zero rating is preferable to exemption.

The VAT returns and relevant payment are due to the Rwanda Revenue Authority (RRA) on a monthly basis by the 15th day of the following month. However, taxpayers with annual turnover of RWF 200 million or below may elect to file VAT returns or make payments on a quarterly or monthly basis.

Customs duties

Rwanda is a member of the East African Community, which uses the East African Community Customs Act (EACMA) for levying import duty. The EACMA prescribes Common External Tariffs (CET) for goods originating outside the Customs Union. Goods are generally subject to import duty of 0% for raw materials and capital goods, 10% for intermediate goods, and 25% for finished goods.

Goods will only enjoy the preferential community tariffs if they meet the EAC Customs Union Rules of Origin.

Certain industries and items are also entitled to exemptions under the customs law (e.g. assemblers of bicycles and motor cycle kits, importers of gas cylinders, certain hotel equipment, solar equipment, and energy saving bulbs).

Enterprises established in Free Trade Zones are exempt from customs duty on machinery and inputs for exported products. There also exists an import duty remission scheme, where import duty may be remitted for raw materials used to manufacture goods for export. This is subject to a requirement for proof of export and execution of the bond.

In 2015, a new law establishing the infrastructure development levy on imported goods was introduced. According to this law, all imported goods, except those listed as exempt, are subject to a levy of 1.5%. The levy is required to be computed on the customs value of imported goods.

Rwanda

Excise taxes

Excise tax is imposed on the manufacturer or importation of certain commodities, mainly soft drinks, bottled water, cigarettes, alcohol, fuels, and lubricants.

The following rates apply in respect of products and services for which excise duty is applied:

- Juice from fruits: 5%.
- Soda and lemonade: 39%.
- Mineral water: 10%.
- Beer: 60%.
- Wine, brandies, liquors, and whisky: 70%.
- Cigarettes: 36% of retail price of a pack (of 20 rods) and RWF 30 per pack.
- Telephone communication: 10%.
- Premium (excluding benzene) fuel and gas oil: RWF 183/litre on premium fuel and RWF 150/litre on gas oil.
- Lubricants: 37%.
- Powdered milk: 10%.
- Vehicles with an engine capacity of above 2500cc: 15%.
- Vehicles with an engine capacity of between 1500cc and 2500cc: 10%.
- Vehicles with an engine capacity of less than 1500cc: 5%.

Property taxes/fixed asset tax

Local government levies fixed asset tax on:

- the market value of parcels of land
- the market value of buildings and all improvements thereto registered with the land registration centre and for which the owner has obtained a title deed from the time the building is inhabited or used for other activities
- the value of land exploited for quarry purposes, and
- the market value of usufruct with a title deed.

The tax rate is fixed at a thousandth (1/1000) of the taxable value per year. The tax payment must be paid not later than 31 March of the year.

Transfer taxes

There is a fixed fee of RWF 20,000 on transfer of property. However, no transfer of ownership of a fixed asset can be effected without a tax clearance certificate issued by the concerned decentralised entity.

Stamp taxes

There are no stamp duties in Rwanda.

Trading licence fee

Districts charge a trading licence fee, which is paid by any person who commences a profit-oriented activity in Rwanda. The tax year starts on 1 January, and the trading licence fee must be paid for a whole year. If such activity starts after January, the taxpayer must pay a trading licence fee equivalent to the remaining months, including the one in which the activities started.

The tax declaration is done not later than 31 March of the tax year. The trading licence fee is calculated on the basis of turnover, and the amount of the fee varies between RWF 60,000 (for turnover of RWF 40 million) and RWF 250,000 (for turnover of over RWF 150 million).

The turnover applied is as per the amount approved in the previous year by the RRA. Every year, not later than 31 January, the RRA submits the necessary data to the concerned decentralised entity.

There are also different rates for the trading licence fee for other small traders, such as small-scale technicians, transport activities by boat, traders, and technicians.

Payroll taxes

Employers are required to withhold tax on payments to employees in respect of employment services that they have rendered. The tax is withheld through the pay-as-you-earn (PAYE) system. The tax deducted should be remitted to the RRA by the 15th day of the following month.

Social security contributions

All people working in Rwanda, both nationals and foreigners, are required to contribute to a national social security contribution fund managed by the Rwanda Social Security Fund. The employer is required to contribute 5% of the employee's gross salary to the scheme, while the employee's contribution is 3%.

Gross salary means total remuneration received by the employee, including allowances, bonuses, commissions, and all other cash benefits, as well as any fringe benefits, but excludes reimbursement of business expenses and transport allowances.

The social security contributions computed are required to be remitted to the RRA by the 15th day of the following month.

Branch income

The tax law does not prescribe special provisions for taxation of branches; consequently, tax rates on the profits of PEs are the same as for domestic corporations. PEs are subject to tax at a rate of 30% and treated as domestic companies.

A branch is considered a PE for the parent company; consequently, it is taxed on the income that is sourced from Rwanda only.

Income determination

Inventory valuation

Trading stock is valued at a lower of cost price or market price on the last day of the tax period. Work in progress is valued at cost.

Capital gains

There is a general capital gains tax law in Rwanda that provides that capital gains arising from the sale of commercial immovable property are subject to tax at the rate of 30%. However, capital gains arising from secondary market transactions on listed securities are exempt from taxation.

In addition, capital gains and losses arising on reorganisation are exempt from tax in respect of the transferring company. Reorganisation is defined to include the following:

- a merger of two or more resident companies
- the acquisition or a takeover of 50% or more of shares or voting rights by number or value in a resident company in exchange for shares of the purchasing company
- the acquisition of 50% or more of the assets and liabilities of a resident company by another resident company solely in exchange of shares in the purchasing company, or
- splitting of a resident company into two or more resident companies.

Rwanda

Dividend income

Dividend income includes income from shares and similar income distributed by companies, cooperative societies, public business enterprise, and partnerships. Dividend income is subject to withholding tax (WHT) at the flat rate of 15%.

If dividend distribution has been subjected to WHT, this becomes the final tax.

In determination of taxable business profit of a resident company or partnership, dividends and other profit-shares received from a resident entity are therefore excluded.

Interest income

Interest income includes income from loans, deposits, guarantees, and current accounts. It also includes income from government securities and bonds, as well as from negotiable securities issued by public and private companies.

Interest income is subject to WHT at the flat rate of 15%.

Foreign income

Resident companies and enterprises are taxed on their worldwide income. However, a foreign tax credit is granted in respect of taxes paid on the foreign income, subject to the limit of the tax that would have been paid in Rwanda on the same income.

There are no provisions in Rwanda for tax deferral of income earned abroad.

Deductions

A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for purposes of the company's trade, provided these costs are not capital in nature and are charged to the profit and loss account.

The Rwandan tax law stipulates that deductible expenses should fulfil the following conditions:

- Used for direct purpose of and in normal course of business.
- Actual expenses substantiated by proper documents.
- Result in a decrease in net assets.
- Used for activities related to the tax period in which they are incurred.

Depreciation and amortisation

Accounting depreciation of fixed assets is not allowable as a deduction for tax purposes. The same applies in the case of amortisation of assets. However, businesses are allowed specified deductions, referred to as tax depreciation in respect of specified classes of assets. This is deducted in arriving at taxable income.

Tax depreciation allowance is granted to persons who own depreciable assets at the end of the tax period and use such assets in the production of income.

Land, fine arts, antiquities, jewellery, and any other assets that are not subject to wear and tear or obsolescence are not granted tax depreciation. Cost of refining or reconstruction of building, equipment, and heavy machinery fixed to the walls attract tax depreciation at the rate of 5%.

Intangible assets, including goodwill that is purchased from a third party, enjoy tax depreciation at the rate of 10%, while computers and accessories, information and communication systems, software products, and data equipment are granted tax depreciation at 50%.

Tax depreciation allowance is also available on all other classes at the rate of 25%.

There is also an enhanced allowance in the form of an investment allowance that is granted to investors where they incur an investment of at least RWF 30 million. The rate is 40% where the investment is within Kigali city or 50% where the investment is within priority sectors defined by the Rwandan Investment Code or a registered business located outside Kigali. Businesses are required to hold the investment for at least three years in order to benefit from the investment allowance.

Note that the above incentives have been repealed by the new investment code. However, taxpayers who were enjoying the benefits can continue to do so until 27 May 2016. The new investment code introduces new incentives for registered investors (*see the Tax credits and incentives section*).

Goodwill

As mentioned above, purchased goodwill will attract tax depreciation at the rate of 10%, which is an allowable deduction. However, amortisation of goodwill is not tax deductible.

Start-up expenses

There is no clear guidance on the tax treatment of start-up expenses. However, in practice, start-up expenses of a capital nature are not deductible for tax purposes. Where they relate to purchase of assets, respective tax depreciation is claimed. Start-up expenses of a revenue nature are tax deductible.

Interest expenses

Interest on borrowed money used for earning business profit or interest in respect of an amount payable for property acquired to earn income is deductible, provided the interest paid is pursuant to a legal obligation and is reasonable under the circumstances.

Thin capitalisation rules can limit interest deductions when debt owed to related entities exceeds four times the amount of the corporation's equity (*see Thin capitalisation in the Group taxation section*).

Bad debt

A bad debt provision will be deductible for tax purposes if it fulfils the following conditions:

- The amount was previously included in the income of the taxpayer.
- Debt is written off in the books of accounts.
- All possible steps have been pursued by the taxpayer, and there is concrete proof that the debtor is insolvent.

It is the last condition that makes the criteria difficult to satisfy, and local taxpayers rarely obtain bad debt relief in practice.

However, licensed commercial banks and leasing entities duly licensed as such are allowed to deduct, in determining business profit, any increase of the mandatory reserve for non-performing loans as required by the directives related to management of bank loans and similar institutions of the National Bank of Rwanda. Similarly, the business profit is increased by the entire amount recovered from bad debts deducted from such reserves.

Charitable contributions

Donations and gifts to charitable organisations and other non-profit making organisations are tax deductible where the amounts are less than 1% of turnover. However, donations to profit making organisations are not allowed for tax, irrespective of the amount.

Rwanda

Fines and penalties

Fines and penalties imposed for breaking the law or for statutory offences, such as payment of taxes late, are not tax deductible.

The law does not specify which type of non-statutory fines or penalties are not allowed for tax. For example, there is no guidance on whether fines or penalties paid for breach of contract are deductible or not.

Taxes

Income tax paid on business profit and recoverable VAT are not deductible for tax purposes. This includes any back taxes paid by the business.

Net operating losses

Tax losses can be carried forward for the next five tax periods, earlier losses being deducted before later losses.

If the direct or indirect ownership of the share capital or the voting rights of an unlisted company changes more than 25% by value or by number during a tax period, such a company is restricted from carrying forward losses incurred during the tax period and previous tax periods.

There are no provisions for carryback of tax losses.

Payments to foreign affiliates

Royalties, management fees, and similar payments to affiliated non-residents are deductible expenses to the extent that they are incurred to earn income of the Rwandan company and the payments adhere to the arm's-length principle and comply with transfer pricing requirements.

Group taxation

There is no provision for group taxation in Rwanda. Each individual corporate group member is required to submit their own tax return on a stand-alone basis.

Transfer pricing

Rwandan transfer pricing legislation and the prescribed transfer pricing methods are generally consistent with OECD guidelines. The law requires that transactions between related parties be carried out under the arm's-length principle.

The tax law empowers the Commissioner General to adjust profits earned between related parties if the Commissioner General considers that the trading arrangements between related parties do not adhere to the arm's-length principle. The arm's-length principle requires that transfer prices charged between related parties are equivalent to those that would be charged between independent parties in the same circumstances.

Rwanda operates a self-assessment system; consequently, taxpayers are obligated to self-assess their compliance to the tax legislation, which includes transfer pricing policy. However, there are no specific transfer pricing documentation requirements currently in place.

Rwanda's transfer pricing legislation provides an opportunity for advance pricing agreements (APAs) with the RRA, a progressive development giving businesses operating in Rwanda a greater degree of certainty. Taxpayers can discuss and negotiate their transfer pricing arrangements with the RRA and obtain an advance ruling confirming that their transfer pricing arrangement is appropriate. This is intended to minimise the potential for future disputes.

Thin capitalisation

The interest paid on loans and advances from related entities is not tax deductible to the extent that the total amount of loans/advances exceeds four times the amount of equity during the tax period. For purposes of determining the above, equity excludes provisions and reserves. This provision does not apply to commercial banks and insurance companies.

Controlled foreign companies (CFCs)

There are no provisions in Rwanda for CFCs.

Tax credits and incentives

There are tax incentives in the form of lower CIT rates (*see Special CIT regimes in the Taxes on corporate income section*) for registered investors.

The new investment code also provides the following incentives to a registered investor with effect from 27 May 2015:

- A seven-year tax holiday for investments in the following specific sectors: manufacturing, tourism, health, exports, energy projects producing at least 25 MW (excluding investors having an engineering procurement contract [EPC] executed on behalf of the government of Rwanda, and ICT with an investment involving manufacturing, assembly, and service. The investment should be of at least 50 million United States dollars (USD) and the investor should contribute at least 30% of this investment in the form of equity in these sectors.
- A preferential CIT rate of 0% for international companies with their regional offices in Rwanda and that fulfil certain requirements.
- A preferential CIT rate of 15% for registered investors undertaking: (i) exportation (ii) energy generation, transmission, and distribution, (iii) transport of goods and related activities, (iv) mass transportation of passengers and goods, (v) ICT, (vi) financial services, including global business activities, private equity funds, fund management, wealth management, mutual funds, collective investment schemes, captive insurance schemes, venture capital, and asset backed securities, (vii) building of low-cost housing, and (viii) any another priority economic sector as may be determined by an Order of the Minister of Finance.
- Exemption from capital gains tax.
- Five-year tax holiday for micro-finance institutions.
- Customs exemption on products used in Export Processing Zones (EPZs).
- Prompt settlement of VAT refunds.

There are, however, certain conditions that have to be fulfilled to obtain the incentives above.

Note that a variety of tax incentives were given in the form of enhanced tax depreciation allowances (known as capital allowances) under the old investment code. The incentives were granted based on the type of assets purchased and used for business and the amount of investment made (*see Depreciation and amortisation in the Deductions section*).

Also note that there is a transition period of one year in which the registered investors who are eligible for some incentives under the old code can continue to benefit from these until 27 May 2016.

Foreign tax credit

Rwanda allows a foreign tax credit on income generated from business activities performed abroad by a tax resident. The income tax payable is offset by the foreign tax paid on that income. However, the foreign credit is limited to the amount of tax that would have been applicable on that income in Rwanda.

Rwanda

The credit is allowed where it is supported by appropriate evidence, such as a tax declaration, a WHT certificate, or any other similar acceptable document.

Withholding taxes

A resident individual or resident entity is required to deduct a WHT of 15% when making the following payments:

- Dividends.
- Interest.
- Royalties.
- Service fees, including management and technical service fees, with the exclusion of international transport.
- Performance payments made to an artist, musician, or sports person.
- Lottery and other gambling proceeds.
- Goods supplied by companies or physical persons not registered with the tax administration.

There is also a WHT of 5% that is applicable on goods imported for commercial use. Public institutions are required to retain 3% on payments to winners of public tenders. However, businesses that possess a tax clearance certificate are exempted from deduction of the above WHT.

The WHT deducted should be remitted to the RRA within 15 days following the month of deduction.

Tax treaties

Rwanda has double tax treaties (DTTs) with Belgium, Mauritius, Singapore, and South Africa.

The DTT between Rwanda and Belgium provides for a lower rate of 10% on interest and royalties, but 0% on dividends.

The DTT between Rwanda and Mauritius has been ratified and provides for a lower rate of 10% on royalties, dividends, and interest and 12% on management fees.

The DTT between Rwanda and South Africa provides for a lower WHT rate of 10%.

The DTT between Rwanda and Singapore provides for lower rate of 10% on interest, royalties, and management or professional fees, but 7.5% on dividends.

The DTT agreements contain conditions to be complied with for the preferential rates to apply; consequently, it is recommended that professional advice is sought before application.

Tax administration

Taxable period

The normal taxable period is between January and December. However, a different tax period can be allowed on approval by the Minister of Finance.

Tax returns

Companies are assessed with reference to accounting periods. This refers to the period for which a company prepares its accounts. However, an accounting period for CIT purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one CIT return.

Rwanda operates a self-assessment regime. Quarterly tax returns are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). The annual tax return/declaration must be filed within three months after the tax period. The tax declaration must include audited financial statements as well as any other documents that may be requested by the tax administration.

Payment of tax

Advance CIT is payable in three instalments. Tax payments are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). Each instalment is 25% of the tax liability as calculated in the tax return/declaration of the previous tax period. This amount can be reduced by WHT paid during the tax period. The final payment of CIT for taxpayers with a December year-end is 31 March of the following year. In the case of other accounting year-ends, the final CIT payment is due on the last day of the third month following the accounting year-end.

Tax audit process

Large taxpayers are selected for audit by the RRA on a regular basis. The RRA tends to audit two tax periods, but this can be extended on request by the taxpayer. Most audits are carried out onsite. The RRA may conduct a desk audit of the taxpayer's tax affairs where they note discrepancies on tax returns filed by the taxpayer, anomalies with turnover, or any other situations that justify an audit.

Under normal in-depth audits, the RRA is required to issue a taxpayer with a draft notice of assessment following the completion of the field audit. The draft assessment is referred to as a rectification note. The taxpayer is granted 30 days within which to respond. In case the tax issues are not resolved, a final notice of assessment is issued. The taxpayer is allowed 30 days within which to appeal. Once an appeal is submitted to the Commissioner General, the RRA has 30 days within which to respond to the objection. This can be extended by another 30 days but not beyond this period. At this stage, the appeal is handled by the appeal committee, and the taxpayer and the taxpayer's agent are invited for a meeting to provide explanations.

Once the final assessment is issued, the tax due is payable, although the Commissioner General has powers to suspend the payment pending the determination of the appeal.

There is a provision for resolving the dispute through an amicable settlement process. Taxpayers can opt for this approach while at the same time exploring the next stage of the appeal process.

A taxpayer that disagrees with the response on the final assessment can appeal to the high court within 30 days.

R

Statute of limitations

The RRA has powers to audit a taxpayer for a period going back five years, although this can be extended to ten years in case of fraud. Taxpayers are required to keep their records for a period of ten years.

Topics of focus for tax authorities

Topics of interest for the RRA include:

- Deduction of WHT on payments to non-resident persons and reverse VAT.
- Treatment of capital gains on disposal of assets.
- Recovery of reverse VAT on services that are regarded as being available in the local market.
- Reconciliation of turnover per financial statements to receipts as per taxpayer bank statements.

Significant developments

The government has announced that the withholding tax (WHT) rate of 10% will be increased to 15% on payments made to non-resident persons as described in the *Withholding taxes section*. In addition, the restriction on compensation expense, which is currently 75,000 East Caribbean dollars (XCD), is scheduled to be increased to XCD 90,000 from 1 June 2016. However, the amendments have not yet been finalised.

Taxes on corporate income

Companies incorporated in Saint Kitts and Nevis (St. Kitts-Nevis) pay corporate income tax (CIT) on their worldwide income with relief available under existing double taxation agreements (DTAs). Non-resident companies deriving income from St. Kitts-Nevis are liable for CIT and should be registered if they have a physical presence in St. Kitts-Nevis.

St. Kitts-Nevis imposes CIT at a flat rate of 33%.

Taxable income or assessable income is ascertained by deducting from income all expenses that are wholly and exclusively incurred during the year in the production of the income. Assessable income is normally arrived at by adjusting the net profit per the financial statements for non-taxable income, non-deductible expenses, and prior-period losses of up to 50% of chargeable income.

Where a person resident in St. Kitts-Nevis makes a payment to another person not resident in St. Kitts-Nevis, as noted in the *Withholding taxes section*, then WHT at a rate of 10% must be deducted and remitted to the Inland Revenue within 15 days.

A company that carries on business exclusively with persons who are not resident in St. Kitts-Nevis is exempt from all income, capital gains, and withholding taxes.

Companies registered under the Condominium Act are governed by that Act and are not required to pay CIT.

Corporate residence

A corporation is deemed to be resident if it is incorporated in St. Kitts-Nevis or if it is registered as an external company doing business in St. Kitts-Nevis under the Companies Act.

Permanent establishment (PE)

A PE is not defined in the Income Tax Act; however, any company that would meet the general definition of a PE must be registered.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 17%, while hotel accommodation, tour operators, and restaurants carry a reduced rate of 10%.

Most foods (excluding prepared food or meals from a restaurant, snackette, cafeteria etc.; live animals; and plants), medicines, and funeral expenses by a licenced funeral home are exempt from VAT.

Persons who have made or are likely to make taxable supplies in excess of XCD 96,000 for certain professional services and XCD 150,000 for other business activities in a continuous period of 12 calendar months are required to register for VAT.

Customs duties

All imports are subject to import duties, VAT, and customs service tax (CST). In all instances, certain exemptions will apply.

Customs duty is levied on a wide range of imported goods at rates from 0% to 70% as specified in the Custom Duties Act. VAT is applied at a rate of 17%, and CST at a rate of 6%. Customs duty is levied on goods based on the cost, insurance, and freight (CIF) values and rates determined by the Caribbean Community (CARICOM) Common External Tariff.

Excise tax

The excise tax applies to a small range of goods, such as alcoholic beverages, tobacco products, petroleum products, motor cycles, aerated beverages, and firearms. The excise tax rate ranges between 5% and 25%.

Property tax

Saint Kitts

Property tax in Saint Kitts is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property classes and rates of tax are as follows:

- Residential use property: 0.2%.
- Commercial use property: 0.3%.

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.
- No property tax is assessed on any buildings, condominiums, etc. that are under construction.
- New residential use properties and condominiums are exempt from tax for one year from the date certified by the valuation officer.

Note that residential use properties located in the South East Peninsula are assigned values based on fixed rates for land (XCD 20 per square foot) and building (XCD 300 per square foot). Property tax is then applied at a rate of 0.2%.

Where property situated in the South East Peninsula area is not developed within five years, a surcharge can be assessed at the rate of 1% of the assessed market value *per annum*, and increased annually at the rate of 1% thereafter until it reaches a maximum rate of 5% of the assessed market value while the property remains undeveloped. If

Saint Kitts and Nevis

property is less than one acre, undeveloped, and owned by a resident for the purpose of erecting a house, such property is exempt from the surcharge upon application in writing to the Comptroller of Inland Revenue.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% *per annum* on the unpaid taxes.

Nevis

Property tax in Nevis is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property class and rates are as follows:

Property class	Building tax rate (%)	Land tax rate (%)
Residential	0.156	0.075
Commercial	0.3	0.2
Accommodation	0.3	0.2
Certified farming	0	0.01
Institutional	0.2	0.15

Commercial use property is defined as property that does not include accommodation use property or property used for certified farming operations.

Accommodation use property is defined as property for short-term accommodation and includes a guest house.

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.
- No property tax is assessed on any buildings, condominiums, etc. that are under construction.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% *per annum* on the unpaid taxes.

Alien land holding licences

To hold land as an owner, a non-citizen must first obtain an alien land holding licence and pay 10% of the market value of property or XCD 750, whichever is greater.

A non-citizen is required to obtain a licence to hold shares in a company that owns land, to vote at shareholders meetings of the company, and to be a director of the company. Each licence costs XCD 250.

If a non-citizen purchases land in the Frigate Bay area, then there is no requirement to obtain a licence and only a minimal fee of XCD 50 is payable.

If a non-citizen wishes to purchase land in the South East Peninsula, the non-citizen is required to obtain a licence prior to purchasing the property; however, the payment of the 10% licence fee will be waived.

Stamp duty

Stamp duty applies to a very wide range of transactions (e.g. bill of sale, lease, mortgage, contract, bill of lading). Stamp duty on transfer of real property, transfer of shares, mortgages, and bank loans to aliens is specifically covered below.

Transfer of real property

Stamp duty is levied on the consideration for the sale or the value of property as assessed by the Property Valuation Officer, whichever is higher.

The vendor is responsible for the payment of all stamp duty on property transfers on the following basis:

Type of property transfer	Rate
a. Transfer of property for consideration in money or value in kind of not less than the value of the property	12%
b. Transfer of property for consideration in money or value in kind of less than the value of the property	12%
c. Transfer of property without consideration in money or value in kind	6%
d. Transfer of property in any Special Development Area other than the South East Peninsula	14%
e. Transfer of property situated in the South East Peninsula	18.50%
f. Transfer of property other than stock or debenture stock or funded debt or land	2%
g. Transfer of property between husband and wife and between parents and children and vice versa	XCD 100
h. Transfer of land by will or by similar instrument	XCD 100
i. Transfer of registered condominium units	5%

Where a developer has obtained concessions in connection with a house or building constructed on the land being transferred, the developer is required to pay stamp duty on the same basis as noted in a, b, and c above.

Where a developer has obtained concessions in connection with a house or building to be constructed on the land being transferred, then the developer will be required to pay stamp duty initially on the land on the same basis as noted in a, b, and c above. However, when the house or building is subsequently constructed on the land with the aid of the concession, the owner of the building shall pay stamp duty on the house or building as provided in a, b, and c above as if the concessions or any part thereof had not been utilised.

Where a developer has not obtained concessions in connection with a house or building constructed on the land being transferred, the developer will be required to pay stamp duty on the same basis as noted in a, b, and c in respect of the land only.

Transfer of shares

Stamp duty is levied on the value of the consideration for the sale of shares or debentures issued by or on behalf of a company or at the value assessed by the Property Valuation Officer, whichever is higher. The stamp duty is levied at a rate of 2%. If the company owns property and its value exceeds 50% of the value of the company's assets, then the stamp duty is calculated using the applicable rate on the transfer of real property (*see above*).

Mortgages

Stamp duty is levied on the total amount secured and is applicable to both the registration and discharge of the mortgage. The standard rate is 1%. For amounts secured in relation to a Special Development Area, the rate is 2%.

Saint Kitts and Nevis

Bank loans to aliens

Stamp duty is levied on the total amount of a bank loan to aliens. The standard rate is 2.5%. For loans to finance development in a Special Development Area, the rate is 5%.

Life insurance premium tax

A premium tax of 5% is levied on the premium income of all life insurance companies, whether resident or non-resident. In addition, a registration fee of XCD 2 per XCD 1,000 of income or XCD 30, whichever is less, must be paid to the Comptroller of Inland Revenue.

General insurance premium tax

A premium tax of 5% is levied on the premium income (net of agent's commission) of all general insurance companies, whether resident or non-resident.

Statutory payroll deductions

Social Security

The employer's portion of Social Security is 5% of chargeable income (on income of up to XCD 6,500 per month).

Housing and Social Development Levy (Social Services Levy)

The employer's portion of the Social Services Levy is 3% of chargeable income.

Employment Injury Benefit

The employer's portion of Employment Injury Benefit is 1% of chargeable income (on income of up to XCD 6,500 per month).

Severance Payment Fund

The employer's portion of the contribution to the Severance Payment Fund is 1% of chargeable income.

Branch income

Branch income is taxed on the same basis and at the same rate as the income of a corporation. A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Recharges of expenses from head office to the branch will be subject to WHT at a rate of 10%; however, the recharges have to be justified and cannot be based on a percentage allocation.

Income determination

Inventory valuation

Inventories are generally stated at the lower of cost or net realisable value. The first in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Comptroller of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. The last in first out (LIFO) method is not permitted for tax or book purposes.

Capital gains

Capital gains tax will be imposed if an asset is sold within one year of the date of acquisition. The maximum rate of tax will be 16.5% (one half the 33% CIT rate). Assets sold after one year will not attract capital gains tax.

Dividend income

Dividends received by a company resident in St. Kitts-Nevis from another company resident in St. Kitts-Nevis are taxed at source at the CIT rate of 33%. Credit is given to the recipient for the tax on the dividend in computing the tax liability.

Interest income

Interest income received by a company registered in St. Kitts-Nevis is taxed at the CIT rate of 33%. Interest earned on local and other CARICOM government securities are normally exempt from the payment of CIT.

Foreign income

A St. Kitts-Nevis corporation is taxed on foreign branch income when earned and on foreign dividends when received. Double taxation is avoided by means of foreign tax credits where tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom [UK] and CARICOM). There is also relief from British Commonwealth taxes. *See Foreign tax credit in the Tax credits and incentives section for more information.*

Deductions

Depreciation

Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates. An initial allowance of 20% is granted on industrial buildings or structures and in respect of capital expenditure incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of between 2% and 5% is allowed on all buildings constructed after 1 March 1994. Concrete buildings are depreciated at a rate of 2%, while the rate varies for other buildings depending on the type of material used in construction. Conformity between book and tax depreciation is not required.

Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

Initial allowances and annual allowances cannot reduce the tax that would have been otherwise payable by more than 50%. Any initial allowance or annual allowance not utilised may be carried forward indefinitely.

Goodwill

Goodwill and trademarks are not depreciating assets, and amortisation is not allowed.

Start-up expenses

There are no specific provisions in relation to deductions for start-up expenses. However, the policy is that certain start-up expenses, such as costs of incorporation and other initial start-up costs, may qualify for a three to five year straight-line write-off, depending on the total dollar value.

Interest expenses

No specific restrictions will apply to interest paid on loans owing to shareholders, directors, their spouses, children or relatives, or to any related parties. Interest is only deductible to the extent that it was incurred in producing chargeable income.

Restriction on bad debts

Specific bad or doubtful debts in excess of 5% of total trade receivables will not be allowed as a deduction.

Charitable donations

Charitable donations are not deductible for tax purposes.

Saint Kitts and Nevis

Contributions to a pension fund

Contributions made by an employer to a pension fund (approved by the Comptroller) on behalf of its employees are deductible, up to a maximum of 5% of annual earnings of the employee or XCD 2,000 *per annum*. Application should be made to the Ministry of Finance or to the Pension Fund Committee.

Restriction on compensation expenses

Salaries, wages, leave pay, fees, commissions, bonuses, gratuities, or any other perquisites or such other payments that an employee of a company receives in the course of their employment or the value of any benefit to such employee or to any member of an employee's family in excess of XCD 75,000 *per annum* will not be allowed as a deduction from chargeable profit.

Where an employee or shareholder receives remuneration in a tax year from two or more associated companies, the amount deductible in relation to the employee or shareholder in the tax year by all of the associated companies shall not exceed XCD 75,000. If the remuneration received by the employee or shareholder exceeds XCD 75,000, the amount deductible by each associated company will be equal to the allowable deduction of XCD 75,000 times the remuneration received from the associated company divided by the total remuneration paid to the employee or shareholder by all of the associated companies.

Fines and penalties

Fines and penalties imposed under tax laws of St. Kitts-Nevis are not deductible expenses.

Taxes

There are no provisions in the Income Tax Act in relation to the deductibility of taxes paid by a company. However, in general, VAT, VAT input tax, and adjustments under the VAT Act are disregarded for income tax purposes. Other taxes, including property tax, transfer taxes, payroll taxes, and insurance premium taxes, except income tax and share transfer tax, are deductible to the extent they are incurred in producing chargeable income.

Net operating losses

Income tax losses may be carried forward for five years following the year in which the loss was incurred. However, the chargeable income of a company after deducting initial and annual capital allowances in any one income year may not be reduced by more than 50% by losses brought forward. No carryback of losses is permitted.

Payments to foreign affiliates

A company incorporated in St. Kitts-Nevis may claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm's-length test, and WHT will be payable at a rate of 10%.

Restriction on related-party expenses

Amounts paid or payable to related or associated persons for administration fees, management fees or expenses, head office charges and allocations, technical services, shared costs, and other similar charges are restricted to 5% of the taxpayer's gross sales or revenues.

Group taxation

Group taxation is not permitted in St. Kitts-Nevis.

Transfer pricing

There are no provisions for transfer pricing in the tax laws of St. Kitts-Nevis.

Thin capitalisation

There are no provisions for thin capitalisation in the tax laws of St. Kitts-Nevis.

Controlled foreign companies (CFCs)

There are no specific rules relating to a controlled foreign entity.

Tax credits and incentives

Tax incentives are currently available under the following legislation.

Income Tax Act, No. 17 of 1966

The Income Tax Act provides that if a company is licensed under the Hotel Aids Ordinance and constructs a hotel with more than 30 rooms, the hotel will receive an exemption from CIT for a period of ten years beginning on the day it is first open for business. If the hotel has less than 30 rooms, then it will be entitled to a five-year tax holiday. During the tax holiday period, no initial deductions or annual capital allowance deductions shall be allowed. Thereafter, only the annual allowance will be allowed and will be computed on the total capital expenditure incurred during the holiday period less any assets sold. The net losses arising during the tax holiday period (i.e. the excess of accumulated tax losses over total profits) may be carried forward and set-off against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

The Income Tax Act also provides that if a licence is granted to a pioneer manufacturer under the Pioneer Industries Act, the manufacturer is entitled to a five-year tax holiday (or up to ten years, at the discretion of the government) as provided in the licence.

Hotel Aids Act

The Hotel Aids Act provides that a licence may be granted to any person who desires to construct or extend an existing hotel to import building material and equipment free from import duties, as specified in the licence, for use in the construction of the hotel and to furnish and equip the hotel. The holder of a licence may not dispose of any hotel equipment within three years of being imported free of duties and taxes. Permission must be received from the Comptroller of Customs to dispose of any building material and hotel equipment within the three-year period.

Fiscal Incentives Act

The Fiscal Incentives Act provides that if a company is declared to be an approved enterprise to manufacture certain 'approved products', then the manufacturer is entitled to a tax holiday period of between ten and 15 years depending on the classification of the approved enterprise. The net losses arising during the tax holiday period (i.e. excess of all losses over all profits) may be carried forward and set-off against profits of the approved enterprise for the five-year period following the tax holiday period.

Small Business Development Act, 2009

The Small Business Development Act provides the framework for the promotion of investment opportunities in St. Kitts-Nevis by introducing a system of registration of small businesses and a range of incentives that are available to locals. The incentives and concessions available to any small business that would be entitled for consideration are as follows:

- Concession on consumption tax applicable to professionals (e.g. engineers, doctors).
- Reduction in CIT for a minimum of three years to a maximum of five years.

Saint Kitts and Nevis

- Relief from CIT by way of an allowable deduction on any monies borrowed from any financial institution, including any bank, non-bank, or credit union.
- Export incentives.
- Rebate of CIT.
- Exemption from or reduction in customs duty on inputs imported for use in the small business.
- Exemption from or reduction in customs duty on any plant, machinery, equipment, or motor vehicle imported for use in the small business.
- Reduction of property tax by up to 75%.

A small business to which this Act applies must meet all of the following criteria:

- No more than 25 employees.
- Net assets or paid up capital not exceeding XCD 1 million.
- Annual sales not exceeding XCD 2 million.
- Owned by citizens of St. Kitts-Nevis.
- Not more than 25% owned or controlled by a company whose annual turnover or net assets exceed the limits noted above or by a subsidiary of a larger company.
- The composition of the board of directors is not controlled by a company whose annual turnover exceeds the criteria above.
- Has no agreement for managerial or other services to persons who are not citizens of St. Kitts-Nevis or other CARICOM territories.

The registration fee for an approved small business is XCD 100. Each approved small business must, within six months after the end of its financial year, submit to the Registrar (person designated by the Minister to perform the functions of Registrar of Small Businesses) financial statements audited by an auditor in accordance with generally accepted international auditing standards.

Other incentives

Approved manufacturing, agricultural, and tourist ventures are permitted to import building material and equipment free of customs duties.

A Memorandum of Understanding (MOU) between the government and small hotel operators provides for certain conditions under which small hotel operators will be eligible for duty-free concessions on the refurbishment of their facilities every seven years, and on food and wine for their restaurant facilities where applicable. For purposes of this incentive package, a small hotel is defined as a hotel consisting of at least ten rooms and not exceeding 99 rooms.

Foreign tax credit

Double taxation is avoided by means of foreign tax credits where tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom and CARICOM). A foreign tax credit is also available to persons in St. Kitts-Nevis who have paid or are liable to pay income tax in a country that is a member of the British Commonwealth (other than the United Kingdom).

Commonwealth relief: Residents

The relief available for a person resident in St. Kitts-Nevis from tax payable in St. Kitts-Nevis is the income tax rate in the British Commonwealth country if that rate does not exceed one half of the tax rate in St. Kitts-Nevis. If the income tax rate in the British Commonwealth country exceeds the St. Kitts-Nevis tax rate, then the relief will be limited to one half the tax rate in St. Kitts-Nevis.

Commonwealth relief: Non-residents

The relief available in St. Kitts-Nevis for a person not resident in St. Kitts-Nevis from tax payable in St. Kitts-Nevis is one half of the income tax rate in the British Commonwealth country if that rate does not exceed the tax rate in St. Kitts-Nevis. In any other case, the

relief will be limited to the amount by which the St. Kitts-Nevis tax rate exceeded one half of the rate of income tax in the British Commonwealth country.

Withholding taxes

WHT at the rate of 10% should be withheld from payments made to non-residents in respect of the following:

- Dividends.
- Interest, annuities, premiums, and discounts.
- Rent, leases, contracts, and royalty payments.
- Natural resources.
- Commissions, remuneration, fees, and licences.
- Charges for the provision of personal services, commercial advice, and managerial skills.
- Administration, management, or head office expenses.
- Profits.
- Technical, professional, vocational, and any other service fees.
- Accounting, actuarial, legal, and audit expenses.
- Non-life insurance premiums.
- Any other annual or periodic payments or distributions.

Tax treaties

Recipient	WHT (%)				Entry into force
	Dividends	Interest	Royalties	Management fees	
Non-residents:					
Non-treaty	10	10	10	10	
Treaty:					
CARICOM	0	15	15	15	7 July 1995
Monaco	0/5 (1)	0 (2)	0 (2)	N/A	1 December 2011
San Marino	5/7.5/15 (3, 4)	0 (5)	0 (2)	N/A	12 February 2014
United Kingdom	0 (5)	0 (5)	0 (5)	N/A	28 January 1948

Notes

1. The rate is 5% if the beneficial owner is a company; 0% if the beneficial owner is an individual and resident of either contracting state or a partnership held by individuals and beneficial owners who are resident of either contracting state.
2. Taxable only in the state in which the beneficial owner is resident.
3. The rate of tax is 5% if the beneficial owner is a company that has directly held at least 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months prior to the decision to distribute the dividends.
4. The rate is 7.5% if the beneficial owner is a company that has directly held at least 10% but less than 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months prior to the decision to distribute the dividends.
5. Taxable only in the source state.

Tax administration

Taxable period

Taxes are assessed on a fiscal-year basis.

Tax returns

The taxpayer must file an information return on Form CIT-01 by the 15th day of the fourth month after the fiscal year-end along with the financial statements. The authorities either accept the self-assessment or issue a revised assessment. If a

Saint Kitts and Nevis

return is not filed on a timely basis, the authorities have the power to issue estimated assessments. There is a 5% penalty for late filing.

The taxpayer can object to assessments raised within one month and ask the Comptroller of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Commissioners of Income Tax. Assessments may be reviewed and revised by the Comptroller within the year of assessment or within six years of the expiration of the assessment year.

Payment of tax

Advance tax is payable in quarterly instalments on 15 March, 15 June, 15 September, and 15 December of each year and is ordinarily based on the tax chargeable and assessed in the previous fiscal year. The standard amount of each instalment is determined as one quarter of the tax chargeable in the previous fiscal year. If the assessment for the prior year has not been finalised, the Comptroller of Inland Revenue can raise an assessment based on best judgement.

The balance of tax due after the final assessment is issued, as notified in the assessment, is payable on or before the 15th day of the fourth month after the fiscal year-end. If the Comptroller of Inland Revenue revises the assessment, then payment of the balance of taxes due is due one month after the date of issue of the revised assessment.

Tax is deemed to be in default if not paid by the 15th day of the fourth month after the fiscal year-end or within one month of the date of the notice of assessment, whichever is later. Interest of 1% per month or 12% *per annum* is charged on unpaid taxes in default.

Anti-avoidance provisions

The Comptroller on Inland Revenue can, by notice in writing:

- distribute, apportion, or allocate amounts to be deducted in calculating income tax paid between related persons as is necessary to reflect the chargeable income or tax payable as if the arrangement had been done at arm's length
- re-characterise the source and type of income, loss, or payments made under an arrangement, the form of which does not reflect its substance or is classified as an avoidance arrangement, and
- disregard an arrangement, transaction, or part of an arrangement or transaction that does not have substantial economic effect or is classified as an avoidance arrangement.

Tax audit process

The St. Kitts-Nevis tax system for companies is based on self-assessment; however, the Inland Revenue Department (IRD) undertakes ongoing compliance activities to ensure that corporations are meeting their tax obligations. There is no specific approach used by the IRD in relation to compliance and audit activities. Compliance activities generally take the form of reviews of specific issues and audits.

Statute of limitations

Assessments may be reviewed and revised by the Comptroller of Inland Revenue within the year of assessment or within six years of the expiration of the assessment year.

Topics of focus for tax authorities

The IRD does not have any specific compliance program; however, when an audit is done, the focus is mainly on the detection of basic non-compliance, such as omission of income, inclusion of non-deductible expenses, and classification of items between expenses and capital items. In recent years, the IRD has been paying special attention to the application of WHT on payments made to non-resident persons and VAT on services imported into St. Kitts-Nevis, mainly between related parties.

Other issues

Tax Information Exchange Agreements (TIEAs)

TIEAs provide for the exchange of information on tax matters. TIEAs with Aruba, Australia, Belgium, Denmark, Finland, France, Guernsey, Liechtenstein, Netherlands, Netherlands Antilles, and Norway are in force. TIEAs have also been signed with the Faroes, Germany, Greenland, Iceland, New Zealand, Portugal, South Africa, and Sweden.

United States (US) Foreign Account Tax Compliance Act (FATCA)

On 4 June 2014, the United States and Saint Kitts and Nevis reached an agreement in substance and Saint Kitts and Nevis has consented to disclose this status. In accordance with this status, the text of such intergovernmental agreement (IGA) has not been released and financial institutions in Saint Kitts and Nevis are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

The Value Added Tax (VAT) Act was amended to increase the threshold for registration from 180,000 East Caribbean dollars (XCD) to XCD 400,000 in January of 2016. Taxpayers with annual sales below this threshold were encouraged to immediately deregister. The Act was also amended to allow registered taxpayers with zero-rated sales constituting a minimum of 50% of their total sales to apply for a refund after one month rather than the usual three month period stipulated for all VAT registered taxpayers.

Taxes on corporate income

Resident companies are taxed on gains or profits accrued directly or indirectly from all sources, whether in or out of Saint Lucia, and are subject to tax at a flat rate of 30%. The 30% tax rate is only applicable to companies that prior to income year 2003 have no tax arrears and have complied with the requirements of any enactment administered by the Inland Revenue Department (IRD). The tax rate of 33.33% will still apply to those companies that have tax arrears and have not complied with the requirement.

Non-resident companies are taxed on Saint Lucia-source income. The gross amount of such income is liable to 25% withholding tax (WHT), while WHT of 15% applies to interest.

Associations of underwriters are taxed at 30% on 10% of the gross premium arising in Saint Lucia, and life insurance companies are taxed at 30% on 10% of the gross investment income arising in Saint Lucia.

Corporate residence

Companies are regarded as resident if they are incorporated in Saint Lucia or managed and controlled through a permanent establishment (PE) in Saint Lucia.

Permanent establishment (PE)

A PE is defined in Saint Lucia as a fixed place or premises through which the business is wholly or partly carried on.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 15%. There is also a 0% rate charged on certain goods and services. In respect of the hotel sector and related services, a reduced rate of 10% is applicable.

The threshold for registered taxpayers is currently set at XCD 400,000 *per annum*. This means that it is not mandatory for businesses earning less than the threshold to register for VAT. The threshold is based on the annual sales turnover of the taxpayer.

The VAT rate of 0% has been legislated on certain supplies, which include, but are not limited to, the following:

- Goods to be exported.
- Goods for sale at duty-free shops.
- Fuel.
- Water.
- Electricity.

The following goods and services are exempted from payment of VAT, but this list is not exhaustive:

- Domestic residential rental.
- Educational services.
- Financial services.
- Insurance services.
- Medical services.
- Local transportation services.
- Certain food items (e.g. chicken, rice, milk, flour, bread).

The government secured the Caribbean Community and Common Market's (CARICOM's) approval to remove the import duty on medical supplies for a period of four years from 1 May 2012 to 30 April 2016. Although this was meant to be a temporary measure, the instrument instituting the exemption had no end date and there have been no official pronouncements terminating the exemption. Prescription drugs are currently exempt from VAT.

The government has also agreed to the establishment of a special VAT Refund Account in accordance with the provisions of the Financial Administration Act. This is to facilitate the timely processing and payment of refunds to taxpayers.

Customs duties

Customs duties are charged on a wide range of imported goods. Exemptions are granted for raw materials and plant and machinery used in manufacturing and for certain items imported by hotels under construction, extension, or refurbishing projects.

Excise taxes

Excise taxes are imposed on home-produced goods, mainly liquor, beer, and cigarettes. XCD 1.44 per litre of liquid applies to beer in glass bottles and XCD 3.50 per liquid gallon applies to beers in metal cans.

There is also an excise tax on fuel when fuel is imported by a wholesaler. Tax is included on the price of fuel paid at the gas pump. The tax rate formula is based on the current price provided by the supplier and regulated price at the gas pump.

Commercial property tax

Commercial property tax is assessed annually at 0.4% of the open market value of the property. The owner is required to obtain a commercial valuation assessing the open market value of the property. All new commercial properties completed after 1 April 2001 can benefit from a three-year tax exemption from commercial property tax.

Residential property tax

The property tax rate for residential property is 0.25% of the open market value.

Saint Lucia

Stamp tax

Stamp tax is charged on any document that evidences a legal or contractual relationship between two or more parties. Additionally, many types of commercial and legal documents must be stamped as evidence of the payment of taxes. Stamp tax may be charged either at a fixed rate or at an *ad valorem* rate, depending, for example, on the value of the property being transferred.

Instrument	Stamp duty rate
Conveyance or sale of immovable property (resident or non-resident purchaser)	2%
Conveyance or sale of immovable property:	
Non-resident vendor	10%
Resident vendor:	
XCD 50,000 to XCD 75,000	2.5%
XCD 75,0001 to XCD 150,000	3.5%
XCD 150,001 and over	5%
Conveyance or sale of debenture, stock, debt, or shares where less than 75% of assets comprise immovable property	Greater of 0.5% of net assets of company or XCD 10
Conveyance or sale of debenture, stock, debt, or shares where more than 75% of assets comprise immovable property:	
Non-resident vendor	10%
Resident vendor:	
XCD 50,000 to XCD 75,000	2.5%
XCD 75,001 to XCD 150,000	3.5%
XCD 150,001 and over	5%

Payroll taxes

Other than employers' portion of the statutory National Insurance Corporate (NIC) contributions (*see below*), there are no other payroll taxes, where the burden falls on the employer. Employers are, however, responsible for deducting the employees' income tax liability at source, through the pay-as-you-earn (PAYE) system.

Social security contributions

The employee's share of NIC contributions (for retirement, sickness, and disability benefits) is 5% of gross salary, up to a maximum contribution of XCD 250 per month (i.e. on a monthly salary of XCD 3,000). The employer matches the contribution and files monthly returns.

Branch income

The tax rate on branch income is the same as that on income earned by resident companies. No additional tax is withheld on transfers of profits to the head office.

Income determination

Inventory valuation

Inventory is generally valued at the lower of cost or market value. The Saint Lucia IRD will generally accept a valuation method that is in line with the common accounting practice of the particular trade or industry. First in first out (FIFO) or average costing are normally used both for book and tax purposes.

Obsolescence is permitted where it occurs, but there are no provisions to account for monetary inflation on inventory valuation.

Capital gains

There is no tax on capital gains except in instances where such gains comprise a portion of the income-earning activities of the business. In such instances, the corporate tax rate applies.

Dividend income

Dividends are tax exempt in Saint Lucia.

Inter-company dividends

Inter-company dividends are not subject to tax in Saint Lucia.

Interest income

The corporate tax rate applies to interest income. However, income earned on securities issued by member governments of the Eastern Caribbean Central Bank and income accruing from trading in securities under the Securities Act to any citizen or resident of any member state of the Organisation of Eastern Caribbean States or to any company incorporated in and registered in any member state of the Organisation of Eastern Caribbean States is tax exempt.

Any expenditure incurred for the purpose of producing exempt income is not deductible.

Royalty and rental income

The corporate tax rate applies to royalty and rental income. However, rental income from a residential accommodation shall be exempt from tax if certain requirements, as defined by regulations, are met.

Foreign exchange gains/losses

Foreign exchange gains or losses arising from foreign exchange transactions on trading items are assessable or deductible as realised gains or losses if settled within normal credit terms. Gains or losses on other instruments, including inter-company loans, are recognised only when actually realised.

Unrealised exchange gains/losses are not taxable/deductible.

Bribes, kickbacks, illegal payments

Bribes, kickbacks, and illegal payments received by a company are includible in taxable income.

Foreign income

Resident companies are taxed in Saint Lucia on income earned outside Saint Lucia. Reciprocal understandings exist with some countries for the avoidance of double taxation, and foreign tax is allowed as a credit against tax charged in Saint Lucia. Saint Lucia has no tax treaties with other countries, except for the member states that make up CARICOM. There is an agreement among the governments of CARICOM for the avoidance of double taxation. Where no agreement exists, the foreign tax offset is the lesser of the foreign tax paid or the tax payable on that income in Saint Lucia.

Tax deferral is not permitted in Saint Lucia.

Deductions

Accrued expenses are deductible as long as they are business related. Contingent liabilities are deductible expenses once they are recognised in the book of accounts.

Depreciation

The following capital allowances are available in Saint Lucia:

Saint Lucia

- An initial allowance of 20% is granted on the acquisition of industrial, agricultural, and commercial buildings (except for hotels and rental properties); on plant and machinery, including motor vehicles and furniture; and on fixtures and equipment.
- Thereafter, annual allowances for wear and tear, ranging from 10% to 33.33%, are granted on the reducing-balance method, except for industrial and agricultural buildings, which are allowed an annual rate of 5%, and commercial buildings (except for hotels and rental properties), which are allowed an annual rate of 2.5%.

The Comptroller of the IRD may also grant, on application, a higher rate for annual allowance for assets that have higher or abnormal wear and tear.

Gains on disposal are taxable as ordinary income to the extent of depreciation recovered, and any proceeds in excess of the cost of the asset are treated as a capital gain, which is not subject to tax. Where the proceeds on disposal are lower than the tax written-down value of the asset, a balancing allowance is granted for the shortfall.

Goodwill

Neither the amortisation of impaired goodwill nor the related write-off of it is an allowable deduction.

Organisational and start-up expenses

All expenditures incurred in connection with incorporation costs for the establishment of a new small business enterprise are allowable deductions. A small business enterprise is an enterprise incorporated during the year of income that:

- is wholly owned by citizens of Saint Lucia who have not been owners of previously incorporated businesses in Saint Lucia
- employs not more than 50 persons
- has gross income that does not exceed XCD 1 million
- engages in an activity on the listing of preferred business activities as approved by the Minister of Finance, and
- satisfies the provision of any law in force with respect to micro or small scale business.

Interest expenses

Interest on any loan, including interest payable on debentures, is an allowable deduction to the extent that the amount of such loan was used for the purpose of producing assessable income.

Bad debt

Bad debt expense is deductible, provided it has been brought to account in generating the company's assessable income for any income year and that the company has taken all reasonable steps to establish that the collection of such debt is unlikely.

Charitable contributions

Charitable contributions are an allowable deduction when the contributions are made under a deed of covenant for a period of not less than three years to any religious, charitable, medical, or educational institution; sporting body; or fund of a public character, approved by Cabinet, if such contributions are made to the Saint Lucia National Trust. However, the deduction with respect to such contributions shall not exceed 25% of the assessable income of the company for that income year.

Pension expenses

Current annual contributions to an approved pension fund are deductible expenses. However, where a special payment is made to an approved pension fund, in relation to a period of service by an employee prior to the setting up of the approved pension fund, or to meet any actuarially ascertained insufficiency in the resources of the approved pension fund to meet its obligations to its employees, such amount shall be deductible as follows:

- i. Where the special payment does not exceed the current annual contribution, such amount is wholly deductible.
- ii. Where the special payment exceeds the current annual contribution, the special payment is an allowable deduction in such years of income, not exceeding five in number, as in the opinion of the Comptroller is reasonable under the circumstances.
- iii. Where under (ii) above, annual deductions are allowable over a number of years of income, the first such deduction is allowable for the income year for which the special payment is made.

Taxes

VAT paid on goods imported or purchased, and sold in the ordinary course of business, are deductible for tax purposes. Property taxes are deductible where the property is used in producing assessable income. Income taxes, penalties, and interest on tax in arrears are not deductible.

Other significant items

Meals and entertainment, officer's compensation/life insurance, and payment to directors are deductible expenses, provided they are wholly and exclusively incurred by a company during that year of income for the purpose of producing its assessable income.

Net operating losses

Net operating losses may be carried forward for up to six years if the losses have not been fully absorbed earlier. In carrying losses forward, the amount that can be claimed in any subsequent year is restricted to one-half of the assessable income of that year. Losses may not be carried back.

Payments to foreign affiliates

There are no restrictions on the deductibility of interest paid to foreign affiliates if the transaction is carried out at arm's length and at commercial rates. However, deductions for management charges, allocations of head office expenses, royalties, and other charges that are subject to 25% WHT are restricted to the lesser of the aggregate of those charges or 10% of all allowable business deductions, excluding cost of sales and capital allowances.

Group taxation

Group tax filing is not allowed in Saint Lucia; however, group tax relief is available under certain circumstances to allow the trading losses, excluding the current loss, of a resident company within a group to offset the profits of another resident company within the same group. A claim for group relief requires the consent of the Comptroller of the IRD and is only available to resident companies.

Transfer pricing

Related party transactions are accepted if they are made on an arm's-length basis. The IRD has the power under the Income Tax Act to make any adjustment deemed necessary to place such transactions at arm's length.

Thin capitalisation

No provision exists for thin capitalisation in Saint Lucia.

Controlled foreign companies (CFCs)

There are no provisions relevant to CFCs in Saint Lucia.

Tax credits and incentives

Foreign tax credit

Where income has accrued to a resident and has been taxed in a foreign country with which there is no double tax agreement (DTA), or is income to which a DTA, if there is one, does not relate, credit for tax on such income is allowed for the lesser of the tax payable in the foreign country or the tax charged under Saint Lucia tax law.

Tax holidays

Tax holidays are available for manufacturing companies. The incentives are aimed at increasing the manufacturing base of Saint Lucia, the level of exports, and the use of local materials and labour in production. An approved manufacturing enterprise will be granted a tax holiday up to a maximum of 15 years. In determining the length of the tax holiday, the extent of the local value added to approved products is taken into account.

Investment incentives

Income tax incentives and other fiscal concessions are provided under the Fiscal Incentives Act, the Tourism Incentives Act, the Special Development Areas Act, and other concessions granted by the Cabinet of Ministers. The extent of the incentives and concessions granted are specific to the legislation or Cabinet conclusions and depend on the impact that the investment would have on local employment, exports, and the generation of foreign exchange earnings. The incentives granted include the following:

- Duty-free importation of raw materials, machinery, components, and spare parts and other inputs used in manufacturing, and the duty-free importation of construction materials, equipment, and other inputs used in the construction and operation of hotels and other hospitality products.
- Income tax waivers of up to 100% of the taxable income of companies engaged in manufacturing, tourism, and agriculture and other employment generating activities, for periods of up to 15 years.
- Whole or partial waivers of property tax, stamp duties, Alien Landholding Licence fees, WHT, and VAT with respect to investments in specific areas, or in specific industries and activities.
- Guaranteed repatriation of capital and dividends. Remittance of profits and dividends are tax-free as they are not subject to WHT.
- Export allowances for goods manufactured in Saint Lucia and exported. Companies that engage in such activity are given tax exemption on the export of such goods, up to a maximum of ten to 15 years.

Employment incentives

Employment incentives are available in the Income Tax Act for the following:

- Hiring university graduates. An additional deduction of 25% of salaries is provided for a maximum period of three years.
- Hiring persons in the offshore financial services industry with skills not available in Saint Lucia. A special tax concession is given to such persons that allows a prescribed percentage of an employee's or contractor's salary or fees to be exempt from income tax.

International Business Companies (IBCs) Act

IBCs are prohibited from conducting business in Saint Lucia and may elect to be exempted from income tax. Alternatively, IBCs may elect to be liable to income tax on its profits and gains at a rate of 1%. Freedom from exchange controls is granted to IBCs, as well as stamp duty on the transfers of any property, assets, shares, debt obligation, or other securities. No WHT is levied on remittances of dividends and distributions, royalties, interest, management fees, or fees or other income paid by IBCs to persons outside Saint Lucia. Supplies to an IBC are also deemed to be an export, and VAT is applied at the rate of 0%.

Other incentives

Complete or partial waivers of income tax are available on the taxable profits of companies engaged in providing services to the offshore financial services industry.

Special tax concessions are also available for capital construction in the hotel industry. Capital expenditures on the construction of a hotel may offset profits for up to 15 years.

Withholding taxes

Resident corporations and persons that make certain payments of an income nature to residents or non-residents are required to withhold tax on these payments as follows:

Recipient	WHT (%)
Resident corporations:	
Payments to contractors	10
Equipment hire	10
Non-resident corporations:	
Interest	15/15 CARICOM
Royalties	25/15 CARICOM
Management fees	25/15 CARICOM
Commissions or fees (not by way of employment)	25
Income of a trust	25
Premiums, including insurance premiums	25
Any other payment of an income nature	25

Saint Lucia has only one DTA. This treaty, between the Caribbean territories, is referred to as the CARICOM Double Taxation Agreement. CARICOM is comprised of the following states:

- Antigua and Barbuda
- The Bahamas
- Barbados
- Belize
- Dominica
- Grenada
- Guyana
- Haiti
- Jamaica
- Montserrat
- St. Kitts and Nevis
- St. Vincent and the Grenadines
- Suriname
- Trinidad and Tobago

S

Tax administration**Taxable period**

Returns must cover a 12-month period, which may be changed only with the Comptroller's permission.

Tax returns

Tax returns must be filed within three months of the company's fiscal year-end. An extension of the filing date may be obtained.

Saint Lucia

Financial statements must be submitted with the returns, together with a schedule reconciling taxable income with book income and various other schedules of additional information.

The system is one of self-assessment. Upon receipt of the returns, the IRD examines the information provided and issues a notice of assessment at any time, subject to the statute of limitations. The Revenue Department may also issue assessments in the absence of returns.

Payment of tax

Tax is payable in instalments on 25 March, 25 June, and 25 September in each year of income, based on the preceding year's income. Any remainder is payable within three months of the end of the fiscal year.

Penalties and interest

The following civil penalties and interest, which are non-deductible, are imposed:

- For late filing or for failure to file: 5% of the tax charge at filing date.
- For late payment: 10% of the unpaid tax at the due date.
- On tax and penalties unpaid: monthly interest at a rate of 1.04%.
- Tax knowingly evaded or sought to be evaded: 100% of the tax.

Appeals

Within 30 days after the date of service of a notice of assessment or reassessment, the taxpayer may submit a written objection to the Revenue Department on any matters in such assessment or reassessment. If the Revenue Department confirms its assessment, the taxpayer may file an appeal with the Appeal Commission, which comprises seven persons appointed by the Minister of Finance. A decision by that body may be further appealed to the Saint Lucia High Court within 30 days. An appeal against an order from this Court may be made to the Court of Appeal.

Tax audit process

The IRD carries out audits of a selection of tax returns, usually at the taxpayer's place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations, whether or not notices of assessment have been issued. The Revenue Department has wide powers in determining the information it requires for these audits.

Statute of limitations

Assessments are not final until six years after the end of the income year, within which period assessments may be made at any time. In cases of misrepresentation or failure to disclose any material fact, a reassessment can be made at any time.

Topics of focus for tax authorities

The tax authorities in Saint Lucia continue to focus on improving and increasing tax collection and improving compliance with filing requirements. The Prime Minister stated that there are four main objectives of the reform program. These are to enhance taxpayer service and compliance and re-organise the IRD along functional lines; to strengthen planning, design, and monitoring functions; to segment the taxpayer population and establish separate large, medium, small, and micro-taxpayer sections to focus on the peculiar needs of each segment; and to integrate the administration of VAT into the mainstream operations of the IRD. Out of these stated reform objectives, the government has restructured the IRD, and the Department is now separated into a small and micro taxpayers division and medium and large taxpayers division.

Other issues***Tax Information Exchange Agreements (TIEAs)***

TIEAs provide for the exchange of information on tax matters. TIEAs with Aruba, Australia, Belgium, Denmark, Finland, France, Germany, Iceland, Ireland, the Netherlands, Netherlands Antilles, Norway, Portugal, Sweden, the United Kingdom, and the United States are in force.

United States (US) Foreign Account Tax Compliance Act (FATCA)

On 19 November 2015, the government of the United States and the government of Saint Lucia signed an intergovernmental agreement (IGA) entitled, 'Agreement between the Government of the United States of America and the Government of St. Lucia to Improve International Tax Compliance and to Implement FATCA'. The IGA requires, in particular, the exchange of certain information with respect to US and Saint Lucia reportable accounts on an automatic basis, pursuant to the provisions of Article 4 of the Agreement between both Governments for the Exchange of Information with Respect to Taxes, done at Washington on January 1987 (the 'TIEA').

Significant developments

Name change for tax authority

The name of the Department of Zakat and Income Tax (DZIT) has been changed to General Authority for Zakat and Tax (GAZT) as per the royal decree No. (A/133) dated 30/7/1437 correspondence to 7 May 2016.

Introduction of new electronic filing system (ERAD) and unified tax/Zakat return

On 1 February 2016, the GAZT issued an internal circular pertaining to the introduction of a new electronic filing system (ERAD). All tax, withholding tax (WHT), and Zakat returns, as well as the returns subject to both tax and Zakat (i.e. mixed entities), will require to be filed on ERAD. This was applicable to all returns for the financial year ended 31 December 2015 and onwards as well as returns not yet filed.

As per the ERAD system, a new unified tax/Zakat online return has to be completed. The new return contains six pages and requires completion of 35 schedules. New schedules were introduced covering the detailed movement of balances affecting the Zakat/tax calculation; moreover, many of the previous schedules were amended to reflect much more details, such as the calculation of the percentage of completion, and the new unified return required additional breakdowns and details relating to various accounts that have been added. All data should be entered in the new ERAD system, and the GAZT has stopped accepting filing of hard-copy returns.

Value-added tax (VAT)

VAT will be introduced by 2018, according to the Saudi Finance Minister. *See Value-added tax in the Other taxes section for more information.*

Annual fees on ‘unexploited’ land in the Kingdom of Saudi Arabia

On 23 November 2015, the Cabinet passed, upon recommendation of the Shura Council, an annual fee of 2.5% on the value of the undeveloped urban land's owned by one or more persons (natural or legal). The Cabinet is expected to update the decision with implementation regulations ('new system') by June 2016, which will be issued by the Ministry of Housing in collaboration with relevant bodies. According to the provisions of article (15) of the law, the new system will come into force after 180 days from publishing it in the official gazette.

The Ministry of Housing will use fee income to spend on housing and infrastructure projects, which supports the supply in the housing sector and provides solutions and products.

Taxes on corporate income

Only non-Saudi investors are liable for income tax in Saudi Arabia. In most cases, Saudi citizen investors (and citizens of the Gulf Cooperation Council [GCC] countries, who are

considered to be Saudi citizens for Saudi tax purposes) are liable for *Zakat*, an Islamic assessment. Where a company is owned by both Saudi and non-Saudi interests, the portion of taxable income attributable to the non-Saudi interest is subject to income tax, and the Saudi share goes into the basis on which *Zakat* is assessed.

According to the income tax law, the following persons are subject to income tax:

- A resident capital company to the extent of its non-Saudi shareholding.
- A resident non-Saudi natural person who carries on activities in Saudi Arabia.
- A non-resident person who carries out activities in Saudi Arabia through a permanent establishment (PE).
- A non-resident person who has other income subject to tax from sources within Saudi Arabia.
- A person engaged in natural gas investment fields.
- A person engaged in oil and other hydrocarbon production.

The rate of income tax is 20% of the net adjusted profits. WHT rates are between 5% and 20%. *Zakat* is charged on the company's *Zakat* base at 2.5%. *Zakat* base represents the net worth of the entity as calculated for *Zakat* purposes.

It should be noted that although the income tax rate is 20%, income from the following two activities is subject to different rates:

- Natural Gas Investment Tax (NGIT) shall be determined on the basis of the internal rate of return (IRR) on the cumulative annual cash flows of the taxpayer derived from natural gas investment activities. The rate applicable will be 30% if the IRR is 8% or less. The rate increases progressively up to 85% if the IRR equals or exceeds 20%.
- Income from oil and hydrocarbon production is subject to tax at the rate of 85%.

Local income taxes

There are no local, state, or provincial government taxes on income other than the regular income tax or *Zakat* as mentioned above.

Corporate residence

A company is considered a resident company if it is formed under the Saudi Arabian Regulations for Companies or if its central management is located in Saudi Arabia.

Permanent establishment (PE)

According to the Saudi tax regulations, the following are the requirements for considering a non-resident party to have a PE:

- A PE of a non-resident in Saudi Arabia, unless otherwise provided below, consists of the permanent place of activity of the non-resident through which one carries out business, in full or in part, including business carried out through an agent.
- The following are considered a PE:
 - Construction sites, assembly facilities, and the exercise of its related supervisory activities.
 - Installations or sites used for surveying for natural resources, drilling equipment, or ships used for surveying for natural resources, and the exercise of its related supervisory activities.
 - A fixed location where a non-resident natural person carries out business.
 - A branch of a non-resident company that is licensed to carry out business in Saudi Arabia.
- A place is not considered a PE of a non-resident in Saudi Arabia if it is used in Saudi Arabia only to do the following:
 - Store, display, or deliver goods or products belonging to the non-resident.

Saudi Arabia

- Keep an inventory of goods or products belonging to the non-resident only for the purposes of processing by another person.
- Purchase of goods or products only for the collection of information for the non-resident.
- Perform any other activities that are preparatory or auxiliary in nature for the interests of the non-resident.
- Prepare contracts relating to loans, supply of products, or perform technical services for signature.
- Executing any group of the activities mentioned above.
- A non-resident partner in a resident personal company is considered an owner to a PE in Saudi Arabia in the form of a share in a personal company.

Furthermore, the agent mentioned in the above article is identified as a dependent agent who has any of the following authorities:

- Negotiate on behalf of a non-resident.
- Conclude contracts on behalf of a non-resident.
- Has a stock of goods, owned by a non-resident, on hand in Saudi Arabia to supply the clients' demands regularly on behalf of the non-resident.

A place from which a non-resident carries out insurance and/or reinsurance activity in Saudi Arabia through an agent is considered a PE of the non-resident even though the agent is not authorised to negotiate and conclude contracts on behalf of the non-resident.

Other taxes

Value-added tax (VAT)

There is currently no VAT system in Saudi Arabia. However VAT will be introduced by 2018, according to the Saudi Finance Minister. The decision to introduce VAT was agreed upon at the 102nd meeting of GCC Finance Ministers in Riyadh. The discussions took place at a gathering of the Committee on Financial and Economic Cooperation, which includes ministers from other GCC states.

The decision was based on an agreement taken by the Supreme GCC Council earlier in 2016 to introduce VAT in the six GCC countries. It was agreed that VAT would be introduced by 2018.

Reports indicate that the GCC bloc will introduce VAT of up to 5%. The tax would exclude 95 food items, but would be applicable for all citizens and residents. Health, education, and social services will likely be excluded.

Customs duties

Customs duties are imposed on imports according to tariff rates that are effective on the payment date in accordance with the Saudi Customs regulations. Customs duties are imposed on the price of the imported goods. This price is assessed based on the actual cost paid or on the agreed upon cost denominated in the currency of the exporting country. The price consists of the price of the imported goods as packed for shipping from the port of export plus freight and insurance cost to the Saudi port, which is converted to Saudi riyals at the exchange rates published by Saudi Arabian Monetary Agency (SAMA) on the date of the declaration. In case this procedure is not achievable, the imported goods will be priced based on the most proximate comparable value that could be ascertained. Imported goods that are subject to customs duties based on weight are assessed based on the gross weight or the net weight as shown in the tariff schedules. The gross weight of the goods includes the goods weight including all internal and external packing materials. Net weight of the goods excludes all internal and external packing materials, including the items used for separating and arranging the goods.

To encourage joint ventures in manufacturing, the government grants tariff protection from competing imports to locally produced, quality goods. Rates can be as high as 20%.

Penalties on smuggling goods vary from confiscation to collections of customs duties and penalties to imprisonment.

Payroll taxes

Since there is no individual income tax regime in Saudi Arabia, earnings from employment are not subject to income tax. Only the social insurance tax (*see below*) is applied on the payroll.

Social insurance tax

Social insurance tax is paid monthly based on (i) basic wage, (ii) cash or in-kind housing allowance, and (iii) commissions, with an upper limit of 45,000 Saudi riyals (SAR), is computed at 2% for non-Saudi employees, and is paid by the employer. For Saudi employees, the rate is 22% and is paid by both the employee (10%) and the employer (12%).

Based on Saudisation requirements, companies having a workforce of less than 50% of Saudi nationals have to pay SAR 200 monthly to the Labour Office for each expatriate employee.

Other taxes

There is no form of stamp duty, transfer, excise, sales, turnover, production, real estate, or property taxation except in so far as they may fall within the scope of *Zakat*, which is applicable only to Saudi nationals.

Branch income

Taxable income from a branch of a non-Saudi based corporation is taxed at 20%. Certain charges incurred by the headquarters are not deductible on the branch tax return.

Income determination

Inventory valuation

The weighted average-cost method is used for valuing inventory under Saudi tax law.

Capital gains

Capital gains are subject to income tax or *Zakat*, as appropriate, at the normal income tax or *Zakat* rate. However, capital gains realised from the disposal of shares in Saudi stock companies listed in the Saudi market are tax exempt, subject to certain conditions.

Dividend income

Dividend income that is received by a resident party is subject to income tax at the normal income tax rate. However, dividends paid to a non-resident party are subject to WHT at 5%.

Interest income

Interest income is subject to income tax at the normal income tax rate.

Imports and supply contracts

Saudi tax law provides that no profit will be considered to arise from a contract for the supply of goods to Saudi Arabia, provided delivery of the goods is either free on board (FOB) or cost, insurance, and freight (CIF) to a Saudi port. However, should the contract provide for the delivery and/or installation of materials at a point inside Saudi Arabia,

Saudi Arabia

the supplier may be considered to be carrying on business within Saudi Arabia, and, as a consequence, the contract may be subject to Saudi income taxation as follows:

- If the material cost was identified in the supply contract separately from the cost of work performed in Saudi Arabia, then, in the absence of a PE, a WHT on the work that will be performed in Saudi Arabia may be assessed, based on the type of services. However, if the contract qualifies the supplier to have a PE in Saudi Arabia, then income tax will be applied according to the Saudi tax regulations as for a normal taxpayer.
- If the supply contract indicates a total cost without segregation in the value of supply and the value of the other activities in Saudi Arabia, then the work performed in Saudi Arabia will be assigned a value equal to 10% of the contract value for each type of activity.

Foreign income

The gross income derived by a capital company resident in Saudi Arabia from its operations and of its branches inside and outside Saudi Arabia is subject to tax in Saudi Arabia. However, in order to avoid double taxation on the same income, the following exceptions and clarifications are to be considered:

- With respect to the income realised from investments in other resident capital companies and in order to avoid double taxation, such income is to be excluded from being subject to tax under the following conditions:
 - That such income was subjected to tax in Saudi Arabia.
 - The percentage of ownership in the company invested in is not less than 10%.
 - The period of ownership of shares is not less than one year.
- With respect to the income realised from investments and operations outside Saudi Arabia, it will be subject to tax in Saudi Arabia unless an effective double tax treaty (DTT) between Saudi Arabia and the country invested in stipulates different provisions.

There are no restrictions on repatriation of profits, fees, capital, salaries, or other monies.

Deductions

All expenses that are necessary and normal to the business, paid or accrued, are allowable deductions, provided the expense meets the following conditions:

- It is an actual expense, supported by a verifiable document or other qualifying evidence.
- It is related to the generation of taxable income.
- It is related to the subject tax year.
- It is of a non-capital nature.

Depreciation

A depreciation deduction is allowed under the following limitations as stipulated by the law:

- The asset is not intended for resale and is to be used, in full or in part, for the entity's purposes.
- The asset is of a depreciable nature that loses value because of use or because of wear and tear and obsolescence and has a value extending beyond the end of the taxable year.
- The asset is owned by the business, as per the ownership document for buildings and contracts and invoices for other assets.

- The asset depreciation is allowed even if the asset becomes inactive during the tax year.

Depreciation for tax purposes is calculated as follows, based on the following five categories of depreciable tangible or intangible assets, other than land:

Asset category	Depreciation rate (%)
Fixed buildings	5
Industrial and agricultural movable buildings	10
Factories, machines and equipment, computer application programs, passenger cars, and cargo vehicles	25
Expenditures for geological surveying, drilling, exploration, and other preliminary work to exploit and develop natural resources and their fields	20
All other tangible or intangible assets not included in previous categories, such as furniture, planes, ships and trains, and goodwill	10

The declining-balance method of depreciation, according to the above rates, should be followed for tax purposes. However, straight-line depreciation is allowed for *Zakat* payers as of 7 April 2013.

There are also rules for depreciation relating to assets either acquired or disposed of. Essentially, 50% of the allowable acquisition price or disposal proceeds is added to or subtracted from the asset pool in the first year, and the remaining 50% in the following year.

Assets under build, own, and transfer (BOT) and build, own, operate, and transfer (BOOT) are allowed to be depreciated over the contract period. This presumes, although it is not clear, that assets under the BOT and BOOT schemes actually will have a separate grouping in addition to the above prescribed groups.

Start-up expenses

Tax treatment of start-up expenses depend on how they were treated under Saudi generally accepted accounting principles (GAAP). Generally, they can be fully expensed at the first financial year or can be amortised.

Loan charges (interest expenses)

An interest deduction is limited to the lower of the loan charge incurred during the tax year, if related to income that is subject to tax, or the result of the following formula, whichever is less.

The taxpayer's total income from loan charges, plus 50% of (A minus B) as below:

A = income subject to tax other than income from loan charges.

B = expenses allowed under the law other than loan charge expenses.

Note that banks are not subject to this formula.

Bad debt

Bad debts are deductible, provided they meet all of the following conditions:

- The bad debt was previously declared in the appropriate year's income.
- The debt resulted from sale of goods or services.
- The company holds a certificate from the taxpayer's certified public accountant (CPA) certifying that the debt has been written off in the taxpayer's books and records, based on a decision by the taxpayer at the appropriate management level.

Saudi Arabia

- Serious efforts have been exerted by the taxpayer to collect the debt with no success and the inability of the debtor to pay has been proved based on a judicial ruling or bankruptcy.
- The debt is not from a related party.
- There is a commitment by the taxpayer to reinstate, as income, any written-off debt whenever collected.

Charitable contributions

In determining the tax base of each taxpayer, a deduction is allowed for donations paid during the taxable year to public agencies or philanthropic societies licensed in Saudi Arabia, which are non-profit organisations and are allowed to receive donations.

Allocations and reserves

Allocations and reserves formed during the year are deductible as follows:

- Bank allocations to a reserve fund for doubtful debts are allowable deductions. However, a bank must submit a certificate from the SAMA stating the amount of doubtful debts and the amount of doubtful debts collected during the year that should be reinstated in the tax base of the year of collection.
- Insurance/reinsurance companies may deduct, based on industry standards, a reserve for unearned premiums and for unexpired risks, provided that it is reported in the tax base of the following year.

A reserve for unearned premiums means a part of premium amounts collected or stated in books that covers risks related to the future tax year(s). A reserve for unexpired risks mean the amount of compensation claimed or reported, but for which the payment process falls short of completion during the tax year.

- A taxpayer may reduce its book profit by the amount of reserves used during the year that had been readjusted when made to increase income or decrease expenses in the year of formation. Examples of such reserves are end-of-service awards, doubtful debt, and drops in prices. Such amounts are deductible, provided the following conditions are met:
 - The used amount was paid or accrued during the year, and it is supported by documentation.
 - The reserve had been adjusted in the year of formation to increase the tax base.

School fees

School fees paid by taxpayers for their employees' children are deductible expenses, provided they meet the following conditions:

- They are paid to a local licensed school.
- This benefit is stated in the employment contract.

Pension fund

Employers' contributions to employees' pension funds or savings funds established under Saudi Arabia's rules and regulations are deductible, provided that such contribution, one payment or in aggregate, is not in excess of 25% of the employee's income before the employer's contributions and that the fund meets the following criteria:

- The fund is established according to special provisions that clearly stipulate conditions of subscription and rights of subscribers.
- Such obligation is stated in the employment contract or in the Articles of Association of the establishment.
- The fund has a character independent of the establishment and has separate accounts audited by an independent CPA.

Research and development (R&D)

A deduction is allowed for R&D expenditure incurred during the tax year in connection with the generation of income that is subject to tax. Such expenditure relates to technical, scientific, and engineering experiments; computer systems; or similar research. This provision does not apply to the acquisition of land and facilities, or to equipment used for research. Such facilities and equipment are subject to depreciation under the law.

Fines and penalties

Fines and penalties related to income tax, paid or payable in Saudi Arabia or to other countries, are not deductible.

Financial fines or penalties paid or payable to any party in Saudi Arabia, such as traffic fines or fines for causing damage to public utilities, are also not deductible.

Fines or penalties paid for breach of contractual obligations, such as fines on delayed or defaulted completion of contracts, are deductible, provided they are documented by the contracting party and the income from such penalties is reported in the year of recovery.

Taxes

Income taxes are not deductible.

Non-deductible expenses

The following expenses are non-deductible:

- Wages, salaries, and whatever is so deemed, in cash or in kind, paid to an owner, partner, or shareholder, or to a member of their families, being a parent, spouse, sons/daughters, and siblings (this provision does not apply to stockholders in a stock company).
- Compensation in cash or in kind paid to a partner, shareholder, or to a family member, including a parent, spouse, sons/daughters, and siblings, for a property or service to the extent that the compensation is higher than the fair market value of such property or service at time of transaction.
- Entertainment expenses incurred for events such as parties, sports competitions, entertainment trips and activities, etc.
- Expenses of a natural person for personal consumption, such as personal withdrawals, dependants' cost of living, or education.
- Any bribe or similar payment, which is considered an illegal practice in Saudi Arabia, even if paid abroad.
- Insurance commission in excess of 3% of total premiums collected in Saudi Arabia through an agent or others and regardless of whether or not the agent is a partner.

Net operating losses

A taxpayer may carry forward operational losses, as adjusted, to the years following the loss year until the cumulative loss is fully offset. The maximum profit percentage of any year that could be used to offset cumulative losses should not exceed 25% of the year's profit as reported in the taxpayer's return. Carryback of losses is not allowed.

Payments to foreign affiliates

Payments made to headquarter offices located abroad by wholly owned local subsidiaries or branches are not deductible. Such payments include:

- royalties or commissions
- loan charges (interest expense) or any other financial fees (except loan charges paid by branches of foreign banks in Saudi Arabia to their non-resident head offices, which are considered as tax deductible expenses), and
- indirect administrative and general expenses allocated on an estimated basis.

Saudi Arabia

The value of goods or services delivered to the taxpayer by related parties is not deductible to the extent that it is in excess of an arm's-length value.

Group taxation

Double taxation on the income of foreign investors realised from their investments in other resident companies is eliminated under the following conditions:

- Such income was subjected to tax in Saudi Arabia.
- The percentage of ownership in the company invested in is not less than 10%.
- The period of ownership of shares is not less than one year.

With respect to the income realised by a resident capital company from its investments and operations outside Saudi Arabia, it will be subject to tax in Saudi Arabia (unless an effective DTT between Saudi Arabia and the country invested in stipulates different provisions).

However, for *Zakat* purposes, the concept of consolidation is acceptable and relief may be obtained for wholly owned subsidiaries by Saudi/GCC companies that are subject to *Zakat*.

Note that an entity operating in Saudi Arabia that has undertaken more than one project under the same commercial registration is required to consolidate the results of such projects into the financial statements of that entity and subject them to taxation as a single operation.

Transfer pricing

There are no specific transfer pricing rules in Saudi Arabia that impose or deem a charge to arise where the GAZT has reason to believe that a transaction has taken place at a value other than on an arm's-length basis. However, there is a generic provision that allows the GAZT to re-characterise or re-allocate income or expenses arising from a transaction if it is undertaken for the purposes of avoiding or reducing a tax liability in Saudi Arabia.

In addition to the above and based on the Ministerial Resolution (No. 1776) dated 19 March 2014, the GAZT is to issue guidelines/regulations on transfer pricing of transactions between related parties in accordance with the internationally accepted standards.

Thin capitalisation

There is no special legislation governing thin capitalisation for tax purposes. A Saudi company may deduct interest payments to affiliates, but not the head office, provided that the amount of debt and rate of interest are at arm's length and that the interest deductibility formula is met. A Saudi company may be financed with minimum capital, and there is no limit to the amount of debt that may be used.

Controlled foreign companies (CFCs)

There are no special rules for CFCs in Saudi Arabia. However, *as mentioned above*, the gross income derived by a capital company resident in Saudi Arabia from its operations and of its branches outside Saudi Arabia is subject to tax in Saudi Arabia.

Tax credits and incentives

Foreign tax credit

Income tax and related fines and penalties paid or payable to Saudi Arabia or to other countries are non-deductible expenses.

Incentives for investment in less-developed regions

The government of Saudi Arabia has granted tax concessions to the following six less-developed regions in Saudi Arabia, with the intention of attracting more investment:

- Ha'il.
- Jazan.
- Najran.
- Al-Baha.
- Al-Jouf.
- Northern territory.

These tax privileges are granted for a period of ten years from the start of any project.

The qualifying investing company's annual tax bill may be reduced by:

- Half the annual training expenditure on Saudis.
- Half the annual salaries paid to Saudis.
- 15% of the non-Saudi capital share, subject to certain conditions.

More deductions are granted if investment capital for any project exceeds SAR 1 million and if more than five employees of Saudi nationality have jobs of a technical or administrative nature with contracts of at least one year.

Customs incentives

An exemption from customs duties is available on machinery and raw materials that are required for approved projects, provided that they are not available in the local market. Such exemptions should be applied for prior to their importation and are subject to certain terms.

Withholding taxes

Payments made from a resident party or a PE to a non-resident party for services performed are subject to WHT. The rates vary between 5%, 15%, and 20% based on the type of service and whether the beneficiary is a related party.

The WHT should be paid within the first ten days of the month following the month during which the payment was made.

The domestic rate for WHT is 5% on dividends, 5% on interest, and 15% on royalties.

Tax treaties

Saudi Arabia has entered into tax treaties with several countries. Treaties currently or about to be in force are listed below. A number of other treaties are at various stages of negotiation.

DTTs have not yet been effectively tested in Saudi Arabia. However, they generally follow the Organisation for Economic Co-operation and Development (OECD) Model Treaty and may provide certain relief, including WHT on dividends, interest, and royalties.

The following are the treaty WHT rates for payments made from Saudi Arabia to treaty country recipients. Each tax treaty should be studied carefully because there could be exceptions to the general rules:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	5	5	15
Treaty:			

Saudi Arabia

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Austria	5	5	10
Azerbaijan	5/7 (18)	0/7 (19)	10

Notes

- Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that has owned, directly or indirectly, at least 25% of the capital of the company paying the dividends for a period of at least 12 months preceding the date the dividends were declared.
 - 10% of the gross amount of the dividends in all other cases.
- Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
- Shall not exceed:
 - 5% of the gross amount of dividends if the beneficial owner is (i) a company or (ii) an entity wholly owned by the government.
 - 10% of the gross amount of the dividends in all other cases.
- Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
- Shall not exceed:
 - 5% of the gross amount of the dividends.
 - The contracting state of which the company paying the dividends is a resident shall exempt from tax the dividends paid by that company to a company (other than a partnership) that is a

- resident of the other contracting state, as long as it directly holds at least 25% of the capital of the company paying the dividends.
6. Shall not exceed:
 - 5% of the gross amount of the dividends:
 - if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends or
 - if the beneficial owner is central bank or an entity that is wholly owned by the government.
 - 10% of the gross amount of the dividends in all other cases.
 7. Shall not exceed:
 - 15% of the gross amount of the dividends where qualifying dividends are paid by a property investment vehicle.
 - 5% of the gross amount of the dividends in all other cases.
 8. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 50% of the capital of the company paying the dividends, or has invested 20 million United States dollars (USD) or more, or any equivalent currency, in the capital of the company paying the dividends.
 - 12.5% of the gross amount of the dividends in all other cases.
 9. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner is a company that holds, directly or indirectly, during the period of 183 days ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares or of the total issued shares of the company paying the dividends.
 - 10% of the gross amount of the dividends in all other cases.
 10. Shall not exceed:
 - 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
 - 10% of the gross amount of the royalties in all other cases.
 11. Shall not exceed:
 - 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
 - 8% of the gross amount of the royalties in all other cases.
 12. Shall not exceed:
 - 7.5% of the gross amount of such royalties that are paid for rendering of any services or assistance of a technical or managerial nature.
 - 10% of the gross amount of such royalties in all other cases.
 13. Shall not exceed:
 - 5% of the gross amount of the dividends.
 - The contracting state of which the company paying the dividends is a resident shall exempt from tax the dividends paid by that company to a company (other than a partnership) that is a resident of the other contracting state, as long as it directly holds at least 25% of the capital of the company paying the dividends or when paid to the government, the central bank, or any institution, agency, or fund wholly owned by the government of Ireland.
 14. Shall not exceed:
 - 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
 - 7% of the gross amount of the royalties in all other cases.
 15. Shall not exceed:
 - 5% of the gross amount of the dividends if the beneficial owner directly holds at least 20% of the capital of the company paying the dividends.
 - 15% of the gross amount of the dividends in all other cases.
 16. Shall not exceed:
 - 2.5% of the gross amount of income from debt-claims for banking institutions.
 - 5% of the gross amount of income from debt-claims in all other cases.
 17. The GAZT informed a taxpayer in a case where a royalty was paid by a Saudi company to an unrelated, third party that it was also taxable in Saudi Arabia, and requested settlement of 15% WHT, indicating that Saudi Arabia has the taxing right.
 18. Shall not exceed:
 - 5% of the gross amount of dividends if the beneficial owner is the government of the other contracting state, the central bank of that other contracting state, or any entity wholly owned by the government of that other contracting state.
 - 5% of the gross amount of dividends if the beneficial owner of dividends has invested to the capital of the company paying the dividends at least USD 300,000 or its equivalent in any other currency.
 - 7% of the gross amount of dividends in all other cases.
 19. Shall not exceed:
 - 0% if income from debt-claims arising in a contracting state and paid to the government or the central bank of the other contracting state or any entity wholly owned by the government of that other contracting state or under a loan agreement approved by the government shall be exempt from tax in the first-mentioned contracting state.
 - 7% of the gross amount of income from debt-claims in all other cases.

The GAZT offers a choice of automatic application of relevant tax treaty without going through the refund procedure. The choice is given to Saudi Arabia residents or PEs of non-residents that make payments subject to WHT in Saudi Arabia.

Saudi Arabia

They can apply reduced rates or full relief upon making the payment. The following conditions are imposed on taxpayers that choose to apply DTT automatically:

- Report, via monthly WHT returns, the full details of each payment made to non-resident parties (beneficiaries).
- Still file a request form for application of DTT together with tax residence certificate of the beneficiary.
- Undertake full responsibility for any understatement of tax, including penalties.

As mentioned above, the GAZT provides a choice; taxpayers can still withhold tax and comply with the refund procedure.

The GAZT's view on virtual PE

Usually, a treaty's articles do not address technical services (except Vietnam/Malaysia, where it is part of royalties), so the source country should not have a taxing right unless a PE is created by the non-resident in Saudi Arabia. Also, the treaty with Spain does not have a 'service PE' article. Effectively, the provision of technical services provided totally outside Saudi Arabia or other services not defined should be taxable only in the country of residence.

However, an internal circular issued by the GAZT should be taken into consideration when applying WHT refund claims by non-residents. The circular relates to the interoperation of services PE (article 5(3)(b), not OECD but the United Nations [UN] model).

Tax administration

Taxable period

Tax filings are based on the company's fiscal year.

Tax returns

Returns are due to be filed with the GAZT within 120 days after the taxpayer's year-end. The system is one of self-assessment.

According to the tax authority, companies that are owned by Saudis only, or by Saudis and non-Saudis, must file audited financial statements along with the tax return.

Payment of tax

Final tax due must be paid within 120 days after the taxpayer's year-end.

Three equal advance tax payments are required to be made on the last day of the sixth, ninth, and 12th months for a current tax year, provided that the taxpayer has earned income during the year. Each advance payment is equal to 25% of the amount resulting from the taxpayer's tax liability based on the previous year return minus the withheld tax on reported income, if any. The taxpayer is not required to make advance tax payments if the result of the said formula is less than SAR 500,000. Late payment of an advance payment is subject to a delay penalty of 1% of the amount due for every 30 days of delay.

Tax audit process

There is no specific audit process followed by the GAZT; however, the most common ways for the GAZT to select companies for tax audits are the size of the company, the companies' shareholders nationality (totally owned by foreigners and branches of foreign companies), and certain risk assessment measures.

Statute of limitations

The GAZT may, with a reasoned notification, make or amend a tax assessment within five years from the end of the deadline specified for filing the tax declaration for the taxable year, or, at any time, upon a written consent of the taxpayer.

The GAZT may make or amend an assessment within ten years of the deadline specified for filing the tax declaration for the taxable year if a taxpayer does not file its tax declaration or it is found that the declaration is incomplete or incorrect with the intent of tax evasion.

A taxpayer may request a refund of overpaid amounts at any time within five years from the end of the overpaid taxable year.

Topics of focus for tax authorities

The GAZT emphasises the submission of a certificate from the General Organisation for Social Insurance (GOSI) along with a reconciliation statement between salaries and wages subject to GOSI and salaries and wages charged to the taxpayer's accounts duly certified by a Saudi licensed CPA.

The GAZT focuses on the payments made to non-resident parties to verify compliance with the WHT regulations by requesting a reconciliation statement for such payments with the annual WHT form.

The GAZT has also been requesting import value lists from the Customs Authority in order to confirm the value of goods imported and declared by taxpayers in their annual declarations during the financial period.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

Saudi Arabia signed a Model 1 Intergovernmental Agreement (IGA) in light of the FATCA dated 24 June 2014. The draft regulations were issued in February 2012 and the final regulations were released on 17 January 2013 with an amendment to some of the deadlines issued through a notice on 12 July 2013. Saudi Arabia has consented to disclose this status. In accordance with this status, the text of such IGA has not been released, and financial institutions in Saudi Arabia are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

The ceiling for minimum corporate income tax (CIT) of 20 million *Communauté financière d'Afrique* (Financial Community of Africa or CFA) francs (XOF) has been reduced to its prior amount of XOF 5 million.

Taxes on corporate income

Branches and companies are liable for CIT at the rate of 30%.

Residents are taxed upon their worldwide income. Non-residents are generally taxed via the existence of a permanent establishment (PE) on Senegal-source income.

Withholding taxes (WHTs) may also apply to non-residents, as per the services delivered to Senegalese taxpayers, subject to the application of a double tax treaty (DTT).

Minimum CIT

A minimum CIT is due, in case of lack of profits, at the rate of 0.5% applied on the annual turnover. The minimum amount cannot be less than XOF 500,000 and the maximum amount cannot be more than XOF 5 million.

Local income taxes

See the Other taxes section for a description of local taxes based on turnover and property.

Corporate residence

Companies are considered as Senegalese residents if they have a registered fixed establishment. Nonetheless, foreign companies that are not registered locally may be deemed to have a PE in Senegal in relation to their local activity and will then be subject to tax liabilities.

Permanent establishment (PE)

The criteria for a PE were derived from the former General Tax Code (GTC) and are close to the Organisation for Economic Co-operation and Development (OECD) standards. The new GTC does not include a PE provision, but the former one should be applicable. DTTs can be applicable and can provide specific definitions. These DTTs are based on the OECD model in most cases. *See the Withholding taxes section for a list of countries with which Senegal has concluded DTTs.*

Other taxes

Value-added tax (VAT)

Subject to certain exclusions, most commercial operations are subject to an 18% VAT.

VAT on tourism activities is 10%.

A 17% special tax on financial activities (mainly banking, money transfers, and change operations) is applicable instead of VAT.

VAT returns must be filed monthly.

Customs duties/Import tariffs

In the case of import of goods, the following tariffs apply:

- Customs duties: 0%, 5%, 10%, or 20%, depending on the nature of the goods.
- Statistical import charge: 1%.
- Community solidarity levy: 1%.
- Economic Community of West African States (ECOWAS) levy: 0.5% (only applicable among ECOWAS countries).
- Senegalese Shippers Council (COSEC) royalty: 0.4% (only applicable on importation by sea).

Excise taxes

The products on which the Senegalese authorities levy excise tax, and the relevant excise tax rates, are as follows:

- Beverages: 40% for beverages containing alcohol, plus an additional tax ranging from XOF 1,500 to XOF 5,000 per litre; 3% for sparkling beverages.
- Tobacco: 45%.
- Coffee: 5%.
- Tea: 5%.
- Fat: Rate varies from 5% to 12%.
- Private cars with a horsepower (tax engine rating) superior to 13CV: 10%.
- Cosmetic products: 10% (increased to 15% for depigmentation products).
- Oil products (rates per nature and per hectolitre): XOF 21,665 for super-petrol, XOF 19,847 for conventional petrol, XOF 3,856 for petrol for the use of pirogues, XOF 10,395 for diesel.

Tax on built real estate

The tax on built real estate applies annually to owners of buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is 5% for common buildings and 7.5% for factories and industrial premises. It is applied on the basis of the rental value of the lands, buildings, etc.

Tax on non-built real estate

The tax on non-built real estate applies annually to owners of land without buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is fixed at 5%. It is applied on the basis of the rental value of the land.

Stamp/registration duties

There are many stamp and/or registration duties, depending on the operations, such as the following:

Operation	Stamp and/or registration duty
Commercial, house, or equipment lease	2% applicable on the basis of the annual rent
Transfer of real estate	5% on the sales price
Transfer of debt	1% on the debt value
Pledge	1% on the guarantee value
Increase of the capital in cash	1% of the increase where the share capital is greater than XOF 100 million
Transfer of business	5% on the sales price

Senegal

Operation	Stamp and/or registration duty
Transfer of shares	1% on the sales price (or the market value if higher)

Business licence tax

Business licence tax is an annual duty consisting of a fixed annual payment (fixed duty) and a proportional duty, calculated in most cases on the basis of the rental value of the premises used. The amounts and rates of these taxes are fixed according to the type and size of the activity carried out.

There is a table that includes several categories of business. For each category, a fixed tax is provided as well as the percentage that is applied on the assets at their fair value.

As an example, when the fixed tax depends on the level of the annual turnover, the following scale is applicable:

Level of turnover (XOF)		Fixed amount of tax (XOF)
Over	Not over	
0	50 million	75,000
50 million	150 million	125,000
150 million	250 million	175,000
250 million	500 million	300,000
500 million		800,000

In this case, the proportional tax is determined by applying the rate of 19% on the annual rental value of the offices, warehouses, sites, and other premises and installations considered as constructions, real estate, and assets in general that are used for the activities.

In the absence of a determined rent, the rental value is calculated by applying the following rates to the purchase price:

- Land: 3%.
- Buildings and installations: 4.8%.
- Fixed and movable tools: 5%.

Tax on telecommunication

The tax rate is 5% on telecommunication use and access. To offset the tax, the purchase of mobile telephones (and other types of telephones) remains exempt from VAT and customs duty.

There are also two specific taxes payable by companies in the telecommunications sector. These taxes represent 3% (for the tax called 'CODETE') and 1% (for the tax called 'PST') of the annual turnover less the payments made to other operators for networking services.

Tax on vehicles

An owner of a motor vehicle (car, truck, or motorbike) must pay an annual tax fixed at XOF 1,000 per hectolitre, except for the pirogue gasoline.

Company tax on vehicles

In addition to the tax on vehicles, companies owning or renting vehicles (more than 15 days a year) must pay a specific annual tax on them. Rates range from XOF 50,000 to XOF 200,000, depending on the type and horsepower of the vehicle.

Payroll taxes

Pay-as-you-earn (PAYE)

All compensation (including salary, cash allowances, and benefits in kind) paid to employees is generally taxable. For the calculation of the personal income tax (PIT) to be withheld by the employer, the tax administration provides a tax table determined on a monthly basis so that no calculation is necessary.

Employer tax

Employers are subject to a 3% tax based on the total gross salaries paid to employees.

Social Security contributions

Social Security contributions are borne exclusively by the employer.

The rate for the industrial accident/occupational disease branch has to be confirmed by the authority when registering the entity with the Social Security Office (applicable rate to be stated within the related certificate).

Sector	Rate of contributions (only payable by employers) (%)	Maximum monthly basis of calculation (XOF)
Family	7	63,000
Industrial accident / Occupational disease	1/3/5	63,000

Retirement contributions

Retirement contributions are payable both by the employer and the employees:

Regime	Rates of contributions (%)		Maximum monthly basis of calculation (XOF)
	Payable by employers	Payable by employees (withheld on the salary)	
General	8.4	5.6	300,000
Executive	3.6	2.4	900,000

Employment medical coverage

The employer shall subscribe for all employees a medical coverage. The level of coverage depends on the type of agreement concluded with the dedicated organism. Usually, the employee is reimbursed for 80% of medical expenses, even though the law provides a range between 50% and 80%.

The monthly rate is 6%, to be levied on a contribution rate between XOF 60,000 and XOF 250,000, for both the employee and the employer.

S

Branch income

In general, the tax on branch income is similar to that of corporate income. Nonetheless, a 10% duty is automatically applied to profits generated after CIT. It corresponds to an automatic application of the 10% tax on payment on dividends applicable to a company.

Headquarter expenses, which are a proration of the worldwide office expenses, may be allocated to the Senegal branch. This proration is based upon a ratio of the local turnover of the branch and the worldwide turnover of the parent company. It applies to the total amount of headquarters' expenses incurred by the company. In addition, the deductibility of headquarters expenses is limited to 20% of the accounting profits before the deduction. This limitation does not apply to other types of services provided by headquarters, such as technical assistance.

Senegal

Income determination

Inventory valuation

Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) are permitted. Book and tax conformity is required.

Capital gains

Capital gains derived from the transfer of assets are subject to the 30% CIT. There is no basket system. Sales of stocks by a non-resident are liable to the 30% CIT, subject to the application of a DTT.

Dividend income

If a parent company domiciled in Senegal owns 10% of the subsidiary (main condition for the application of the parent-subsidiary corporation special taxation status), a 95% reduction on the dividends received is applicable for CIT purposes.

If these conditions are not met, dividends received by a company are subject to CIT as follows:

- 40% of the dividends are added back to the taxable profit.
- The company benefits from a tax credit upon the CIT equal to 40% of the tax on distributions withheld (at the general WHT rate of 10%).

Stock dividends

Stock dividends are unusual in Senegal. However, this kind of distribution would be taxable at the general WHT rate of 10% on the basis of its real value.

Interest income

Article 105 of the General Tax Code provides a list of interests that are not subject to CIT. For instance, the following are not subject to CIT:

- Interest on sovereign debt.
- Interest on deposit accounts opened at the Housing Bank of Senegal (*Banque de l'Habitat du Senegal*).
- Interest on loans granted by the Central Bank.

Foreign income

In general, profits generated in Senegal are taxed under Senegal's income tax law. Profits generated outside Senegal and constituting a PE in the relevant country are not taxed in Senegal. A DTT can provide different rules.

Deductions

Depreciation and depletion

The rates of depreciation are not provided by the law. The rate is determined on the normal and predictable duration of use of the asset by taking into account normal wear and tear. In practice, there are standard rates for common assets. Accelerated depreciation can be applicable, subject to conditions.

Goodwill

There are no provisions in Senegal for goodwill.

Start-up expenses

Start-up expenses are deductible if justified and approved by the shareholders.

Interest expenses

Interests on current account advances or loans from a shareholder (directly or indirectly) are subject to restrictions as to their deduction from taxable income:

- The share capital of the company receiving the loan or advance shall be, beforehand, fully paid.
- The amount of the loan or advance shall not exceed the share capital of the company receiving it. It is not an individual but an overall ceiling on the total amount of loans and advances of all shareholders and seniors.
- The rate of interest shall not exceed the rate of advance of the Institute of Emissions plus 3 points. The rate published by the Ministry of Economy and Finance for 2016 is 3.5%.

Bad debt

There are no provisions in Senegal for bad debt.

Charitable contributions

Only payments made to specific chartered organisations are deductible, at a rate of up to 0.5/100 of turnover. On the contrary, payments made to non-chartered organisations are not deductible.

Fines and penalties

Fines and penalties are not deductible for CIT purposes.

Taxes

CIT and the company tax on vehicles are not deductible.

Other significant items

Provisions are deductible if they correspond to a risk or a probable cost that is more than possible and leads to a decrease in the assets. Provisions for paid holidays and retirement compensation are not deductible.

Net operating losses

Tax losses may be carried forward to the next three years. Losses corresponding to the depreciation of assets can be carried forward indefinitely. The carryback of losses is not allowed.

Payments to foreign affiliates

Reasonable royalties, interest, and management service fees paid to foreign parent companies are deductible. Supporting documents (e.g. invoices, contracts) will be necessary to prove that these expenses are justified.

S

Group taxation

Group taxation is not permitted in Senegal.

Transfer pricing

The transfer pricing regulations globally correspond to the OECD requirements standards (i.e. identifying related-party transactions, choosing the suitable transfer pricing method, and preparing documentation to support the selection of such method).

Thin capitalisation

There are no specific rules regarding thin capitalisation in Senegal. Nonetheless, the following tax and legal rules should be known:

- From a legal point of view (corporate law), the net assets must be equal to at least half of the share capital of the company. In case the net assets are lower than this

Senegal

threshold, the situation should be regularised by any lawful means within a period of two years following the financial year it appears. Otherwise, any third party can request the closing of the entity before the courts.

- The deductibility of interest paid to a shareholder upon a loan or an advance in general is limited to a maximum rate calculated on the Central Bank legal interest rate (currently fixed at 3.5%) plus 3 points, calculated on the amount of the share capital (*see Interest expenses in the Deductions section for more information*). Portions exceeding this limit are not deductible for CIT purpose.

Controlled foreign companies (CFCs)

There are no provisions in Senegal for CFCs.

Tax credits and incentives

Foreign tax credit

Usually, DTTs may provide some tax credit on the basis of the relationship between Senegalese entities and their partners located abroad. For each DTT, the specific process to enforce those tax credits either in Senegal or abroad (depending on the payments directions) are stipulated within that DTT. Nonetheless, as far Senegal is concerned, the practice consisting of enforcing foreign tax credits locally is very rare.

The Investment Code

The Investment Code applies to investments over XOF 100 million (mainly production, processing, industrial, tourism, agricultural, and complex trade). The benefits of the Investment Code include exemption from customs duties, suspension of VAT payment for three years, CIT limitation, etc. The tax benefits are directly integrated in the GTC and do not require administrative authorisation (i.e. as long the requirements are met, the taxpayers may benefit from those tax benefits).

Free export company status

Agriculture, industry, and telecommunications companies that have an exporting potential amounting to at least 80% of their turnover may qualify for the free export company status. There are several advantages for companies that qualify, including a CIT rate of 15%, exemption from dividend WHT, exemption from business licence tax, exemption from taxes on real estate, and exemption from registration duty for incorporation or bylaws change purposes.

Miscellaneous incentives

There are a wide range of investment laws (i.e. negotiations with the government to set up a specific tax regime different from common rules) for investments greater than XOF 250 billion, including the mining code and the petroleum code, among others. All of these tax benefits are directly included in the GTC.

Withholding taxes

Senegal has various WHTs. The primary ones are as follows:

- 20% WHT on remuneration paid for services (including royalties) rendered by a foreign individual or foreign company.
- 5% WHT on remuneration paid for services rendered by a resident individual (liable for tax under lump sum taxation, among others) or resident company that are not subject to CIT.
- 10% WHT on dividends distributed.
- 13% WHT on bond interest.
- 8% WHT on deposits or guaranteed interest on accounts with a bank.
- 16% WHT on other revenues, notably interest on loans.

These WHTs may be limited by DTTs.

Double tax treaties (DTTs)

The DTTs concluded by Senegal are based on the OECD model in most cases. Senegal has concluded such treaties with the countries listed in the table below.

Treaty WHT rates are as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Belgium	10	15	10
Canada	10	16	15
France	10	15	15
Italy	10	15	15
Mauritania	10	16	N/A
Mauritius	N/A	N/A	N/A
Morocco	10	10	10
Norway	10	16	16
Qatar	N/A	N/A	N/A
Spain	10	10	10
Tunisia	10	16	N/A
WAEMU *	10	15	15

* West African Economic and Monetary Union (member states are Benin, Burkina-Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, and Togo).

Tax administration

Taxable period

The tax year in Senegal is the calendar year.

Tax returns

Companies must file CIT returns by 30 April of the year following the tax year.

Also, in addition to the miscellaneous annual returns (business licence tax, company car tax, etc.) and other monthly tax returns (VAT, payroll taxes, WHT, etc.), taxpayers must file by 31 January for the prior financial year:

- An annual recapitulative payroll tax return.
- An annual recapitulative return on payment for services.

Payment of tax

CIT must be paid in two instalments (each equal to one-third of the previous year's tax) by 15 February and 30 April. The outstanding balance payment amount of the tax due must be paid by 15 June.

For the first financial year of a newly incorporated company, no instalment is due; the new company pays the whole CIT before 15 June of the following year.

Penalties

In case of late payment, a 5% interest of delay on the amount due plus an additional 0.5% duty per month of delay or portion of month of delay are applicable. This late payment is due when the taxpayer's regularisation is spontaneous.

On the other hand, if such payment is triggered by a tax audit from the authority itself after the deadline is crossed, the following penalties apply:

- 50% for any WHT and VAT.

Senegal

- 25% for other taxes (CIT, business licence tax, taxes on real estate, registration duties, company car tax).

Also, the late filling of tax returns triggers an XOF 200,000 penalty per return.

Tax audit process

The tax authorities may request information, clarifications, or justification to the taxpayers. The taxpayers have 20 days to answer to those requests.

The tax authorities may also implement an inspection of the accounting documents at the premises of the taxpayer or at any place the taxpayer would consider more appropriate for material reasons upon a specific request. In such cases, a notice is sent to the taxpayer at least five days before the beginning of the inspection.

The tax authorities are not allowed to process a new tax inspection on a period already inspected by their services unless a new element or document is revealed after the first inspection was processed.

Where the tax authorities estimate that the taxpayer has not fulfilled all of one's tax obligation, a tax reassessment shall be transmitted to the taxpayer, who has 30 days in order to answer or comment on the findings.

After the tax authorities have received those comments, they can confirm partially or totally the reassessment within a statutory delay of 60 days.

Statute of limitations

The statute of limitations is, generally speaking, four years.

Topics of focus for tax authorities

With regards to corporate tax compliance, the tax authorities are generally focusing on certain expenses with forbidden or limited deductibility, such as depreciation of assets, provisions, interest, royalties/services fees, insurance premiums, head office costs, etc., but they usually define their approach according to the business sector of the company.

Significant developments

The latest amendments to the tax laws were enacted in October and December 2015 and relate to the value-added tax (VAT), corporate income tax (CIT), personal income tax (PIT), and Law on Tax Procedure and Tax Administration.

Starting from 1 March 2016, fees paid by Serbian resident entities to non-resident legal entities for services rendered or used in the territory of Serbia are subject to 20% withholding tax (WHT), unless otherwise stipulated by an applicable double tax treaty (DTT). Other new CIT rules apply for the assessment of 2016 CIT liability.

According to the amended VAT Law, non-residents can register for VAT purposes by appointment of a fiscal representative. Additionally, there were certain changes in relation to the VAT rules regulating supply of goods and services in the field of construction.

Taxes on corporate income

Residents are taxed on their income generated in Serbia, as well as on their worldwide income. Non-residents are taxed only on their income sourced through a permanent establishment (PE) in Serbian territory.

The CIT rate is 15%.

Local income taxes

There are no local taxes on income in Serbia.

Corporate residence

A legal entity is considered to be a resident of Serbia if it is established or has its place of effective management and control in Serbia.

Permanent establishment (PE)

A PE is any permanent place of business through which a non-resident conducts its business.

Other taxes

Value-added tax (VAT)

The VAT was introduced on 1 January 2005 and generally follows the European Union's (EU's) Sixth Directive.

The standard VAT rate is 20% for most taxable supplies. A reduced VAT rate of 10% applies for basic food stuffs, daily newspapers, medicines, publications, public transportation services, utilities, etc.

Serbia

In addition to these tax rates, there is a 0% tax rate with the right of deduction of the input VAT that applies to the export of goods, transport and other services directly related to exports, international air transport, etc.

A 0% tax rate without the right of deduction of the input VAT applies to trading in shares and other securities, insurance and reinsurance, and the lease of apartments, business premises, etc.

A taxpayer for VAT purposes is a person who independently, and in the course of its business activities, undertakes the supply of goods and services or import of goods. Business activity is defined as the permanent activity of a manufacturer, salesperson, or service provider for the purpose of gaining income. A branch or other operating unit can be a taxpayer.

A non-resident can register for VAT purposes by appointment of a fiscal representative who has a registered seat in Serbia.

The usual taxable period is a calendar month, but if a taxpayer's total annual turnover is less than 50 million Serbian dinars (RSD), or is estimated (for the next 12 months) to be so, the taxable period is a calendar quarter. For newly established businesses, the VAT period is the calendar month for the current and next calendar year. Taxpayers are required to submit returns within 15 days of the end of each taxable period. Tax debtors who are not taxpayers are required to submit returns within 10 days of the end of the taxable period.

Customs duties

Goods imported into Serbia are subject to customs duty rates provided in the Law on Customs Tariff. These rates are *ad valorem* (the only exception is related to the importation of other cigarettes containing tobacco, where a combined *ad valorem* and specific customs duty rate is prescribed) and apply to goods originating in countries that have a most favoured nation (MFN) status in trading with Serbia. Goods originating in other countries are subject to MFN duty rates increased by 70%.

At the moment, the only trading partner with Serbia that does not have MFN status is Taiwan.

Customs duty rates in Serbia range from 0% to 57.6%, with most being under 30%. At the moment, the 57.6% rate only applies to cigarettes containing tobacco.

Excise duties

Excise duties are levied on producers and importers of the following goods:

- Oil derivatives.
- Tobacco products.
- Alcoholic beverages.
- Coffee (green, roasted, ground, and coffee extracts).

Excise duty in Serbia is specific (for oil derivatives, alcoholic beverages, cigars, cigarillos, and coffee), *ad valorem* (for pipe tobacco), and combined (specific + *ad valorem* on retail price for cigarettes).

Excise duties stated in Serbian currency are adjusted on a half-year basis according to variations of the consumer price index (CPI) declared by relevant government bodies in charge of statistics. For oil derivatives, the government can modify the specific excise duty amounts during the year according to changes in prices of crude oil on the market.

Property tax

Property tax is payable annually in Serbia by all legal entities and individuals who own or have rights over real estate located in Serbia, such as:

- Ownership rights.
- Right of occupancy.
- Tenancy rights over an apartment or a building for a period longer than one year or for an indefinite period.
- Urban land usage right (municipal, public, and other state-owned land) larger than ten acres in area.

Where the taxpayer keeps books, the property tax on real estate is levied at a flat rate that cannot exceed 0.40%.

Transfer tax

Transfer tax is levied on the transfer for a consideration of rights over real estate when VAT is not payable on such a transfer; intellectual property rights; ownership over used vehicles, vessels, and aircraft (unless owned by the state); right to use urban and/or public building land; as well as rights relating to expropriated real estate.

The contract price is used as a tax base; however, the tax authorities have the right to adjust the tax base in case they estimate that the price agreed to in the contract is lower than under market conditions. The tax is payable at a 2.5% rate.

Stamp taxes

There are no stamp taxes in Serbia.

Capital gains tax of non-residents

Capital gains realised by non-residents from both residents or other non-residents are subject to 20% capital gain tax. Non-residents should appoint a fiscal representative in Serbia who should submit a tax return within 30 days from the realisation of capital gain. Based on the tax return, tax authorities will issue a decision assessing tax liability (if any).

In order to benefit from application of a relevant DTT, the same rules are applicable as for WHT. Non-residents (i.e. the income recipient) must provide a tax residency certificate (on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident's country of residence or official translation of certificate issued by foreign tax authorities), and the income recipient must be the beneficial owner of the income.

Payroll taxes

The employer is liable to withhold PIT and social security contributions on payment of salaries to employees, at the following rates:

- 10% PIT.
- 19.9% social security contributions payable by the employee.
- 17.9% social security contributions payable by the employer.

The tax and contributions base is gross salary. The social security contributions base is limited to five average monthly salaries in Serbia.

Branch income

Non-residents carrying on business in Serbia through a branch are taxed on their Serbian-sourced income at the CIT rate of 15%. A branch is considered to be a PE.

Income determination

Taxable profit is determined by adjusting the accounting profit as stated in the profit and loss statement (determined in accordance with International Financial Reporting Standards [IFRS] and local accounting and audit legislation) and in accordance with the provisions of the CIT Law.

For taxpayers who, according to local legislation, are not obligated to apply IFRS, taxable profit is determined according to the special guidelines prescribed by the Ministry of Finance.

Inventory valuation

Cost of materials and the purchase value of merchandise are tax-deductible up to an amount calculated by applying the average weighted cost method or the first in first out (FIFO) method. If another method is used, an adjustment for tax purposes should be made.

Capital gains

Capital gains are generated by the sale or other transfer of real estate, rights related to industrial property, as well as shares, stocks, securities, certain bonds, and investment units. A capital gain is determined as the difference between the sale and purchase price of the asset concerned, determined in accordance with the provisions of the Law. If the amount is negative, a capital loss is realised.

Capital gains and operational profit are disclosed in the same tax return, but they are taxed separately. Consequently, capital gains/losses cannot be used to offset business losses/gains.

However, capital gains can be offset with capital losses occurring in the same period. A capital loss can be carried forward for five years.

The capital gains tax rate is 15%.

However, the rate applicable for capital gains incurred by non-residents is 20%, unless envisaged otherwise by a relevant DTT (*see the Other taxes section for more information*).

Dividend income

Dividends received by a Serbian company from another Serbian company are not subject to CIT.

Dividends received from a non-resident will be treated as taxable income of a Serbian company and subject to 15% CIT. However, a Serbian entity will have the right to decrease its tax liability by taking a tax credit for the WHT and underlying CIT paid in a subsidiary's country, provided that the taxpayer holds at least 10% of the shares in the subsidiary. If the taxpayer holds less than 10% of the shares in the subsidiary, the tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income (*see the Tax credits and incentives section for more information*).

Interest income

Interest income will be included in accounting profit determined in accordance with IFRS and will be taxable at the CIT rate of 15%. A Serbian resident has the right to decrease its CIT liability for WHT on interest paid abroad. The amount of the tax credit should not exceed the amount of CIT that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income.

Royalty income

Royalty income will be treated as business income and subject to the general CIT rate.

A resident taxpayer also has the right to decrease its CIT liability for WHT on royalties paid abroad. The amount of the tax credit should not exceed the amount of CIT that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income.

Unrealised currency exchange gains

Unrealised currency exchange gains will be included in accounting profits under IFRS rules. Serbian legislation does not provide any exception of taxation of this income.

Foreign income

Companies resident in Serbia are taxed on their worldwide income.

When profit generated in another country is taxed in the foreign country, a company has the right to decrease its tax liability by claiming a tax credit from the tax authorities in Serbia (*see the Tax credits and incentives section for more information*).

There are no provisions that provide for the possibility that taxation of income earned abroad may be deferred.

Deductions

Depreciation and amortisation

Fixed and intangible assets are divided into five groups, with depreciation and amortisation rates prescribed for each (Group I: 2.5%; II: 10%; III: 15%; IV: 20%; and V: 30%). A straight-line depreciation method is prescribed for the first group, which includes real estate, while a declining-balance method is applicable for assets in the other groups.

Assets subject to tax depreciation and amortisation are all tangible and intangible (except goodwill and renewable resources) assets with a useful life longer than one year that are recognised as non-current assets under IFRS.

Goodwill

Goodwill is not subject to tax amortisation.

Start-up expenses

Generally, start-up expenses are tax deductible for CIT purposes.

Interest expenses

Interest on related-party loans exceeding thin capitalisation and transfer pricing thresholds are not deductible (*see the Group taxation section*).

Bad debts

Bad debt provisions are generally tax deductible if they are at least 60 days overdue. Provisions have to be made individually for each receivable.

Write-off of individual debts, except for those from debtors who are at the same time creditors, is recognised as an expense under the following conditions:

- They were written off as uncollectable.
- The taxpayer has initiated a court procedure to collect debt or duly reported the receivables in case of liquidation or bankruptcy procedure over the debtor.

Taxable income should be increased for receivables that are written-off and do not meet the above requirements and for which tax deductible provisions were previously made.

Serbia

Charitable contributions

Expenses for health care, scientific, educational, humanitarian, religious, ecological, cultural, and sport related purposes, as well as humanitarian aid given to the Republic of Serbia, its autonomous provinces, and the local government for sanitation of consequences that emerged during emergency situations, are deductible, at up to 5% of total revenues.

Fines and penalties

Fines and penalties (both commercial and those charged by the authorities) are not deductible.

Taxes

All taxes, duties, and contributions that do not depend on the profitability of the company are deductible in the tax period that the liability in this respect was settled.

Other significant items

The following other expenses are not recognised for CIT purposes:

- Non-documented expenses.
- Provisions for receivables from entities that are creditors at the same time, up to the amount of the liability due to that entity.
- Presents provided to political organisations.
- Presents provided to related parties.
- Penalty interest for late payment of taxes, contributions, and other charges.
- Expenses related to forced collection of taxes and other liabilities.
- Non-business related expense.
- Share in the profit paid to employees or other individuals.
- Calculated but unpaid redundancy payments (deductible when paid).
- Expenses related to employment costs, apart from salaries (deductible when paid).
- Impairment of assets (deductible in tax period in which asset is disposed of or used).
- Direct write-off of receivables (under certain conditions).
- Long-term provisions (deductible when paid).

The following other expenses are recognised for CIT purposes only up to a certain limit:

- Advertising and promotional expenses, up to 10% of total revenues.
- Business entertainment expenses, up to 0.5% of total revenues.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue.

Net operating losses

The taxpayer has the right to carry forward and utilise tax losses incurred over the following five years.

Carryback rules do not exist in Serbia.

Payments to foreign affiliates

Generally, there are no restrictions on the deductibility of royalties and service fees paid to foreign affiliates, provided they are at arm's length, appropriately documented (by agreements, contracts, calculation sheets, etc.), and incurred for business purposes only.

Payment of interest to foreign affiliates is restricted and regulated by thin capitalisation rules and transfer pricing rules (*see the Group taxation section*).

Group taxation

Tax grouping/consolidation is allowed to a group of companies where all members are Serbian residents and one company directly or indirectly controls at least 75% of the shares in another company. Each company files its own tax balance sheet, and the parent company files a consolidated tax balance sheet for the whole group.

In the consolidated tax balance sheet, losses of one or more companies are offset by the profits of other related companies. Each company is liable for the portion of tax attributable to its share of the group's taxable profit.

Once approved by the Ministry of Finance, tax grouping/consolidation applies for at least five years.

Transfer pricing

A transfer price is the price of transactions between related parties. Related parties exist if there is a possibility of control or influence over business decisions between them. Ownership of 25% or more, or a majority of shares, is considered as potential control. Influence over business decisions exists when an associated party holds 25% or more, or individually holds the greatest portion, of votes in the taxpayer's management bodies. If the same persons participate in management or control of both companies, a connection between them will be deemed to exist.

Close family members are also regarded as related parties. Non-resident entities from tax havens are considered as related parties of resident entities. The Serbian Ministry of Finance prescribed the list of countries that are to be considered as tax havens for the application of relevant CIT Law provisions.

A company should disclose transactions with related parties separately at transfer prices and at arm's-length prices in its CIT calculation. Positive difference between these prices (adjustments of expenses) and negative difference (adjustments of revenues) is included in taxable profit.

Serbian CIT Law recognises the following methods for determining arm's-length prices:

- Comparable uncontrolled price (CUP).
- Cost plus.
- Resale minus.
- Transactional net margin (TNMM).
- Profit split.
- Any other method that allows determination of arm's-length prices if none of the above methods can be applied.

It is mandatory to prepare and submit transfer pricing documentation together with the CIT return.

Transfer pricing rules for intra-group loans

Any interest incurred on related-party loans exceeding the arm's-length interest rate is not tax deductible. Arm's-length interest is deemed to be the:

- weighted average key policy rate for the tax period, for loans denominated in dinars, and
- weighted average interest rate at which domestic banks borrowed from foreign lenders in related tax period, for foreign currency loans.

These indicators are determined by the National Bank of Serbia and published by the Ministry of Finance. However, taxpayers are entitled to determine market interest rates by using all general methods for determining arm's-length interest rates. In case the

Serbia

taxpayer decides to determine interest rates by applying general methods, it will be obligated to apply such interest rates for assessment of all related-party loans.

Transfer pricing rules in this respect are applied up to the amount of tax deductible interest determined in accordance with the thin capitalisation threshold.

Thin capitalisation

The interest and related costs will be fully deductible if the loans from related parties do not exceed four times the taxpayer's net equity (ten times for banks and leasing companies). The amount of a taxpayer's net equity for this purpose is calculated as the average of the total assets less total liabilities at the beginning and the end of the year, while the amount of loans from related parties is calculated as a daily average for the year.

In cases where the loans from related parties exceed the prescribed threshold, the amount of non-deductible interest will be calculated as proportional to the amount of loans exceeding the 4:1 (10:1) threshold.

Controlled foreign companies (CFCs)

There are no CFC rules in Serbia.

Tax credits and incentives

Foreign tax credit

A Serbian entity is entitled to a tax credit for the WHT paid on foreign-sourced dividends and underlying CIT paid abroad (by its non-resident subsidiary), provided that the taxpayer holds at least 10% of the shares in the subsidiary for at least one year before filing a return. If the taxpayer holds less than 10% of the shares in the subsidiary, the tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income. Non-utilised tax credit can be carried forward by the parent company for five years.

A resident taxpayer also has the right to decrease its tax liability for WHT paid abroad on interest and authorship fees. The tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income. Carryforward of unused tax credits is not allowed.

Tax holiday

A ten-year tax holiday is available for companies with a minimum investment in property, plant, and equipment (PPE) of RSD 1 billion. To qualify for the credit, a taxpayer must employ at least 100 new workers for an indefinite period. The tax holiday is available for the ten-year period in proportion to the investment made. The number of employees employed in the tax period in which the taxpayer qualified for the tax holiday must be retained throughout the whole tax holiday period.

Withholding taxes

WHT is calculated and paid at the rate of 20% on payments such as dividends/share in profit, royalties (including neighbouring authorship rights, intellectual property rights, and related rights), interest income, fees for services provided or used in Serbia, income from distributed surplus of a company in bankruptcy, revenues derived from the liquidation surplus of a company in liquidation, and lease payments for real estate and other assets made to a non-resident, unless a DTT applies to provide a reduced rate or exemption.

WHT is also payable on a non-resident's income realised on the basis of performing entertaining, artistic, sports, and similar programs in Serbia, which is not taxed as income of an individual (performer, musician, sportsman etc.).

In order to benefit from application of a relevant DTT, non-residents (i.e. the income recipient) must provide a tax residency certificate on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident's country of residence.

Special WHT rules apply in case of non-resident entities from tax havens. WHT is payable at the rate of 25% on royalties, interest, income from lease of immovable property and other assets, and service fees paid to non-resident entities from tax havens. Dividend payments to non-residents from tax havens are subject to WHT at 20%. The Serbian Ministry of Finance publishes a list of jurisdictions that are regarded as tax havens (<http://www.poreskauprava.gov.rs/pravna-lica/pregled-propisa/pravilnici/312/pravilnik-o-listi-jurisdikcija-sa-preferencijalnim-poreskim-sistemom.html>).

WHT rates envisaged by applicable DTTs are provided in the following table.

Recipient	WHT (%)			Applicable from
	Dividends (1)	Interest	Royalties (3)	
Albania	5/15	10	10	2006

Notes

1. If the recipient company owns/controls at least 25% (5% depending on the relevant DTT) of the equity of the paying company, the lower of the two rates applies.
2. The treaty has not been ratified by one of the parties.
3. A tax rate of 5% will be applicable to literary, scientific, and work of art; films and works created like films; or other source of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedures.
4. Only in cases when dividends are to be paid to Serbian residents. If paid to Malaysian residents, they are taxable at 20% in Serbia.
5. A 0% rate is applicable in cases when the income recipient is the government or government owned banks. In all other cases, a higher rate envisaged by the DTT should apply.
6. WHT rate refers solely to dividends distributed from Serbia. In Malta, WHT cannot be higher than CIT on profit before dividend distribution.
7. A new DTT was signed with Norway in 2015 and is applicable from 2016.
8. A 0% rate is applicable in cases when the dividend income recipient is the government of the contracting state.

Tax administration

Taxable period

The tax period in Serbia is the calendar year. However, entities have a possibility to opt for a different tax period other than the calendar year (subject to the approval of the

Ministry of Finance), but still 12-months long. Once approved, such tax period must be applied for at least five years.

Tax returns

CIT returns, together with all supporting documents (e.g. tax depreciation and tax credit forms), must be filed with the tax authorities not later than 180 days after expiration of the tax year (e.g. 30 June).

A newly established company needs to register with the tax authorities within 15 days of registration with the Serbian Business Registry.

Payment of tax

CIT is payable monthly in advance instalments by the 15th day of the following month for the prior calendar month. The amount of payable advances is determined on the basis of a company's CIT calculation for the previous year.

The due date for final settlement of CIT liability is the date of filing the annual tax return.

Tax audit process

The tax authorities may undertake an unlimited number of tax audits in respect of the same taxes within a reviewed period. In principle, re-performing of an audit of the same tax within a reviewed period is based on existence of new facts that were previously unavailable to the tax authorities.

Statute of limitations

The statute of limitations period for assessment of tax liabilities is five years from the year in which tax should have been assessed. The statute of limitations for collection of tax liabilities is five years from the year in which tax was due for payment. This is with the exception of pension insurance contributions, which do not become statute barred.

The statute of limitations commences from 1 January of the year following the year in which the tax return/liability was due.

Topics of focus for tax authorities

Historically, audits by the tax authority have been focused primarily on VAT, PIT, and social security contributions assessment.

Other issues

Intergovernmental agreements (IGAs)

United States (US) Foreign Account Tax Compliance Act (FATCA)

FATCA is a set of regulations of the United States adopted in order to combat tax evasion. It requires that foreign financial institutions or other financial intermediaries participate in preventing tax evasion by reporting (i.e. providing) information concerning US 'account holders', which include bank account holders, investors, and shareholders, to the US Internal Revenue Service (IRS).

The Model 1 IGA has not yet been signed by the United States and Serbia. However, the IGA is treated as 'in effect' by the US Treasury as of 30 June 2014. Serbia has consented to disclose this status since the United States and Serbia have reached an agreement in substance. In accordance with this status, the text of such IGA has not been released and financial institutions in Serbia are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

The 2016 Budget was announced on 24 March 2016. Corporate tax changes include the following:

- Increase in the corporate tax rebate for years of assessment 2016 and 2017 (income years 2015 and 2016) to 50% of the tax payable, subject to an annual cap of 20,000 Singapore dollars (SGD).
- Introduction of a 100% investment allowance for capital expenditure (capped at SGD 10 million per project) on approved automation equipment.
- Introduction of an anti-avoidance rule for acquisition of intellectual property (IP) rights.
- Extension of the safe harbour rule for exemption of gains on disposal of equity investments.
- Extension and/or enhancements of incentives to support internationalisation, mergers and acquisitions, productivity and innovation, intensification of land use, finance and treasury centres, the maritime industry, global trading, and corporate social responsibility.
- Extension of tax incentives for trustee companies and the insurance sector, with adjustments to various concessionary tax rules.

Other tax changes include the following:

- Introduction of a cap of SGD 80,000 on individual tax reliefs with effect from year of assessment 2018 (income year 2017).
- Deferral of a planned Foreign Worker Levy (FWL) increase for certain industry sectors.

For details of the 2016 Budget proposals, refer to our 2016 Budget Commentary at www.pwc.com/sg/en/budget-2016/sg-budget-commentary-2016.html

Taxes on corporate income

Companies (resident and non-resident) that carry on a business in Singapore are taxed on their Singapore-sourced income when it arises and on foreign-sourced income when it is remitted or deemed remitted to Singapore. Non-residents are subject to withholding tax (WHT) on certain types of income (e.g. interest, royalties, technical service fees, rental of movable property) where these are deemed to arise in Singapore (*for details, see the Withholding taxes section*).

Tax on corporate income is imposed at a flat rate of 17%. There is an exemption of up to SGD 152,500 out of the first SGD 300,000 of taxable income.

A three-year tax exemption on the first SGD 100,000 and a partial exemption of up to SGD 100,000 on the next SGD 200,000 of taxable income are available for qualifying

start-up companies. This exemption is not available to property development and investment holding companies incorporated on or after 26 February 2013.

In addition, for the years of assessment 2016 to 2017 (i.e. income years 2015 to 2016), there is a 50% corporate tax rebate. This rebate is capped at SGD 20,000 per year.

Singapore adopts a one-tier taxation system, under which all Singapore dividends are tax-exempt in the shareholder's hands.

Corporate residence

In Singapore, the tax residence of a corporation is determined by the place where the central management and control of its business is exercised. This is taken generally to mean the place where the directors meet to exercise *de facto* control, although the Inland Revenue Authority of Singapore (IRAS) has set out further guidance.

Permanent establishment (PE)

The presence of a PE is largely irrelevant, except for treaty purposes, as Singapore taxes with reference to the source of income rather than the presence of a PE.

However, a PE is a clear indication of source.

The definition of a PE in Singapore's double taxation agreements (DTAs) is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition.

It is generally taken to be a fixed place through which the business of an enterprise is wholly or partly carried on, and normally includes a place of management, a branch, an office, a factory, a workshop, and a place of extraction of natural resources, etc.

In addition, and subject to the terms of the relevant agreements, a non-resident may have a PE in Singapore if one:

- has a building site or a construction, assembly, or installation project that lasts longer than a specified number of months, or supervisory activities connected with the building site or construction project
- furnishes services (including consultancy services) through employees in Singapore for more than a specified number of days or months, or
- has an agent in Singapore who has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of the enterprise.

The Singapore tax legislation defines a PE more broadly than most of the DTAs; however, as mentioned above, this is largely irrelevant where a treaty can take precedence.

Other taxes

Goods and services tax (GST)

GST is charged at 7% on the supply of goods and services made in Singapore by a taxable person in the course or furtherance of one's business.

The only exemptions from GST are prescribed financial services (including life insurance) and the sale or rental of residential properties. Zero-rating only applies to the export of goods and international services.

Singapore

GST is also levied on imports of goods, at the time of importation. However, there are reliefs available to ease the cash-flow burden of import-export traders by suspending GST at the time of importation. GST is not currently charged on imports of services.

A taxable person is one who is, or is required to be, registered for GST. GST registration is required if one's taxable turnover exceeds SGD 1 million per year. Voluntary registration is permitted if the taxable turnover is below the registration limit, subject to conditions.

A supply of goods is made in Singapore if the goods are in Singapore at the time of supply, and a supply of services is made in Singapore if the supplier belongs in Singapore. Generally, a person belongs in Singapore if one's business (including carrying on a business through a branch or agency) or fixed establishment is in Singapore.

A taxable person is allowed to offset the input GST paid on taxable purchases against the output GST chargeable on supplies made. However, certain purchases are specifically denied an input GST deduction. These include supplies of goods and services such as non-business expenses, club subscription fees, family benefits, car rental expenses, motor vehicle expenses, medical expenses, and transactions involving betting, sweepstakes, lotteries, fruit machines, or games of chance.

A non-resident is not entitled to GST refunds except by appointing a resident tax agent to act on one's behalf. The resident tax agent can then recover import GST paid on behalf of the non-resident business but will be required to account for output GST on any subsequent supply of the non-resident's goods in Singapore.

Customs and excise duties

Singapore is essentially a free port with minimal import restrictions. Customs and excise duties are imposed on intoxicating liquors, tobacco products, motor vehicles, and petroleum products.

Property tax

Property tax is levied annually at the following rates on the annual value of houses, land, buildings, or tenements.

Property	Tax rate
Residential property (excluding residential land)	Graduated rates from 10% to 20%
Owner-occupied residential property (excluding residential land)	Graduated rates from 0% to 16%
Land and non-residential properties	10%

Stamp duties

Stamp duties are levied on written documents relating to stocks and shares and immovable property.

Stamp duties are typically payable by the buyer (i.e. buyer's stamp duty or BSD); however, seller's stamp duty (SSD) and additional buyer's stamp duty (ABSD) have been introduced as measures to cool the residential property market. Stamp duty rates on immovable property therefore vary, depending on the date of purchase, the holding period, the number of properties already owned, and whether the buyer is a foreigner, Singaporean, or permanent resident. Foreigners of certain nationalities who fall within the scope of the respective free trade agreements will be accorded the same treatment as Singaporeans.

Documents relating to the transfer of stocks and shares are subject to stamp duty of 0.2% on the purchase price or market value of the shares transferred, whichever is the higher.

For conveyance of immovable property, there is BSD of up to 3% on the purchase price or market value, whichever is the higher. There is an ABSD of up to 15% and an SSD of up to 16% on the price or market value of the property, whichever is the higher, depending on the type of property (residential or industrial), the residency status of the buyer, the holding period of the property, and the number of properties owned.

Leases attract duty at 0.4% of the total rent (for leases of up to four years) or 0.4% of four times the average annual rent for the period of the lease (for leases longer than four years), but leases with average annual rents not exceeding SGD 1,000 are exempt from stamp duty.

Foreign Worker Levy (FWL)

The FWL is a monthly levy of up to SGD 950 that employers are liable to pay for each foreign employee (Work Permit or S Pass holders) hired. The levy rate depends on the employee's qualifications, the employer's industry, and the ratio of foreigners to Singaporeans and permanent residents employed in the company. The government has announced that levy increases for Work Permit holders in the marine and process sectors that were originally proposed for 1 July 2016 will be deferred for a year. Other proposed increases will take place on 1 July 2016, as previously announced.

Payroll taxes

Singapore does not have payroll withholding. When a non-Singapore citizen employee ceases employment in Singapore, leaves Singapore for an overseas posting, or leaves Singapore for a period exceeding three months, the employer needs to notify the Singapore tax authorities once the fact of cessation is known to the employer, unless the employer is bearing full Singapore taxes for the employee, and withhold all monies due until tax clearance is issued. The notification must be made no later than one month prior to the date of cessation/departure, or two months from the date of cessation/departure where the employer is bearing full Singapore taxes for the employee. Non-Singapore citizen employees are also subject to tax on unexercised/unvested stock options/awards on a deemed gain basis when they cease employment or leave Singapore.

Social security contributions

Central Provident Fund (CPF)

The CPF is Singapore's national pension scheme. Contributions are payable by Singapore citizens and permanent residents only. Generally, employers and employees contribute 17% and 20%, respectively, of ordinary monthly wages up to an income ceiling of SGD 6,000. Their respective maximum contributions are therefore SGD 1,020 and SGD 1,200. The rates are applicable to employees aged 55 years and below.

These rates also apply to additional wages (e.g. year-end bonus), up to a maximum contribution of:

- the actual additional wages if the annual ordinary wages are not more than the ordinary wage ceiling of SGD 72,000 and the total wages are not more than the maximum contribution of SGD 102,000
- the difference between the maximum contribution of SGD 102,000 and annual ordinary wages if the total wages exceed the maximum contribution of SGD 102,000 but the annual ordinary wages are not more than the ordinary wage ceiling of SGD 72,000, or
- the lower of the difference between the maximum contribution and the ordinary wage ceiling (SGD 102,000 less SGD 72,000) or the actual additional wages if annual ordinary wages exceed the ordinary wage ceiling of SGD 72,000.

Reduced rates apply for employees above the age of 35 who are earning less than SGD 750 per month, and those above 55, although these rates are being gradually increased.

Singapore

Foreign nationals and their employers are precluded from making CPF contributions. Foreign employees who become Singapore permanent residents, and their employers, may contribute at reduced rates for the first two years.

Supplementary Retirement Scheme (SRS)

The SRS is a voluntary scheme to encourage employees and the self-employed to save for retirement over and above their CPF savings. The maximum amount to be contributed is subject to an income cap of SGD 102,000. Employers are allowed to contribute to their employees' SRS accounts. This is subject to a 15% contribution limit for Singapore citizens and permanent residents, and a 35% cap for foreigners. Employees will be taxable on these contributions, but will be allowed corresponding tax relief.

Branch income

Tax rates on branch profits are the same as on corporate profits. There is no branch profits remittance tax on the repatriation of profits to the head office.

Income determination

Inventory valuation

There are no special rules as to which valuation basis should be adopted for inventories (stock-in-trade) in the case of a continuing business, as long as the basis is consistent from one year to another. However, a last in first out (LIFO) basis of valuation is not permitted for tax purposes. Generally, tax reporting conforms to book reporting.

Capital gains

There is no tax on capital gains. Where there is a series of transactions or where the holding period of an asset is relatively short, the tax authorities may take the view that a business is being carried on and attempt to assess the gains as trading profits of the corporation. The United Kingdom (UK) Badges of Trade, which are used in judicial decisions to distinguish capital and revenue transactions, are generally applied in determining this issue. They include the existence of a profit-seeking motive, the number of transactions, the nature of the asset, the existence of similar trading transactions or interests, changes to the asset, the way the sale was carried out, the source of finance, the interval of time between purchase and sale, and the method of acquisition.

Gains derived by a company from the disposal of ordinary shares that take place between 1 June 2012 and 31 May 2022 will not be taxed if the company has held at least 20% of the ordinary shares in the investee company for a continuous period of at least 24 months prior to the disposal. This protection does not apply to gains derived by an insurance company or disposal of shares in certain companies that trade or hold immovable properties.

Dividend income

Singapore dividends are exempt in the hands of the recipient.

Interest income

Singapore-sourced interest income is taxable when it arises, and foreign-sourced interest is taxable when it is remitted or deemed to be remitted to Singapore. *For further details on foreign-sourced interest income and the availability of foreign tax credit, refer to Foreign income below.*

Foreign income

A corporation, whether resident in Singapore or not, is taxed on foreign income when it is received in Singapore. Legislative provisions govern the basis of treating foreign

income as received in Singapore. There are no special rules for taxing the undistributed income of foreign subsidiaries.

Where income is earned from treaty countries, double taxation is avoided by means of foreign tax credit granted under those treaties. For non-treaty countries, unilateral tax credit is given in respect of foreign tax on all foreign-sourced income. These foreign tax credits may be pooled, subject to certain conditions.

Foreign dividends, foreign branch profits, and foreign service fee income remitted to Singapore may be exempt from tax if they fulfil certain conditions.

Deductions

Depreciation

Tax depreciation is allowable at specified rates on buildings used in qualifying industry sectors, subject to conditions. In 2010, industrial building allowances were replaced by a Land Intensification Allowance. The latter provides for faster depreciation but is subject to approval as it is allowed as a tax incentive. Transitional provisions for industrial building allowances are available for taxpayers who committed to qualifying capital expenditure on or before 22 February 2010.

Tax depreciation is available on machinery and equipment on a straight-line basis over their specified working life for all types of business. In lieu of the straight-line basis, accelerated tax depreciation allowances can be claimed by all businesses on all machinery and equipment in equal instalments over three years.

A 100% depreciation allowance is available on capital expenditure incurred on computers, robots, standby generators, pollution control and energy-efficient equipment, certain diesel-driven vehicles, and prescribed automation equipment.

Writing down allowances on a straight-line basis over five years are allowable on the cost of acquisition of IP, subject to certain conditions. Taxpayers acquiring IP in the 2016 to 2019 income years may make an irrevocable election to claim the writing down allowances over 10 or 15 years instead of five.

In addition, enhanced allowances may be available for the acquisition of automation equipment and IP (*see Productivity and Innovation Credit [PIC] in the Tax credits and incentives section*).

Gains on tax depreciable property (i.e. the excess of proceeds over tax base) are taxed as ordinary income to the extent that tax depreciation has been allowed; that is, there is a clawback of tax depreciation on the disposal of the asset.

Goodwill

Payments for the acquisition of goodwill are generally capital in nature and not deductible.

Start-up expenses

Generally, expenses incurred prior to the commencement of business are not tax deductible. However, most businesses are allowed to deduct expenses incurred in the 12 months immediately preceding the accounting year in which the business earned its first dollar of trading income. Deductible expenses are those that would have been allowed a deduction had they been incurred after the business commenced operations.

In addition, deductions and writing down allowances are available for certain types of pre-commencement expenditure (acquisition of plant and machinery, research and

Singapore

development [R&D], etc.) that are deemed to be incurred on the first day on which the taxpayer carries on one's business.

Interest expenses

Interest incurred on capital employed in the production of income, and prescribed borrowing costs that are incurred as a substitute for interest or to reduce interest costs, will be allowed as a tax deduction.

Research and development (R&D) expenses

Expenses incurred in respect of R&D carried out in Singapore qualify for a tax deduction of 150% of the expenses incurred. If the R&D is carried out overseas, the expenses incurred can be deductible if they meet certain conditions.

Expenditure incurred in relation to R&D cost-sharing arrangements are accorded the same tax treatment as R&D expenses.

Enhanced deductions may also be available under the PIC scheme (*see Productivity and Innovation Credit [PIC] in the Tax credits and incentives section*).

Bad debts

Bad trade debts and provisions for trade debts are deductible to the extent that they are incurred in the business and previously included as trading receipts. Doubtful debts are deductible if they are properly estimated and specific. General provisions for bad debts are not deductible.

Businesses that have elected to align their tax treatment of financial instruments with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement) will be allowed a tax deduction for impairment losses on trade debts when they are incurred (regardless of whether they are general or specific provisions). Correspondingly, any reversal will be taxed.

Charitable contributions

Donations are deductible only if they are made in cash or another prescribed form and to an approved recipient. The deduction allowed for qualifying donations is generally 250% of the value of the donation; however, qualifying donations made in 2015 were eligible for a deduction at 300% of the value of the donations. Businesses that send employees to volunteer and provide services to approved charitable institutions from 1 July 2016 to 31 December 2018 will be allowed to deduct 250% of the wages and incidental expenses incurred, subject to certain conditions.

Fines and penalties

Fines and penalties imposed for violations of the law are not deductible.

Taxes

Income taxes are generally not deductible in determining corporate income. However, irrecoverable GST is deductible under certain circumstances. The FWL and property taxes are deductible to the extent they are incurred wholly and exclusively in the production of income.

Other significant items

Private automobile expenses are not deductible.

The tax deduction for medical expenses is limited to 2% of total payroll if the employer implements certain portable medical insurance or benefit schemes. Otherwise, the amount deductible will be limited to 1% of total payroll. Where the company is exempt or taxed at a reduced rate, the expenses disallowed are effectively taxed at the prevailing corporate rate.

A tax deduction for employee share-based remuneration (stock awards or stock option schemes) is allowed only if treasury shares in the company or its holding company are purchased to fulfil such obligations. A company may also claim a tax deduction when the share-based remuneration scheme is administered by a special purpose vehicle (SPV). The deduction is restricted generally to the lowest of the actual outlay incurred by the company, its holding company, or the SPV.

Net operating losses

Loss carryover, including unutilised tax depreciation allowance, is unlimited, provided shareholdings in the loss-making corporation have not changed beyond 50% of the total number of issued shares. Additionally, for tax depreciation allowances to be carried forward, the same trade needs to be continued. The tax authorities may exercise discretion to allow carryover of tax losses and unutilised tax depreciation even when there has been a change in shareholding beyond 50%, absent any tax avoidance motives. Losses and tax depreciation of up to SGD 100,000 incurred by the company in the current year can be carried back for one year. The carryback of losses and tax depreciation is subject to the continuity of shareholding test and the same trade test for carryback of tax depreciation.

Payments to foreign affiliates

Payments to non-residents, including foreign affiliates, are deductible, provided they are fair and reasonable, are revenue in nature, and can be seen to be relevant to earning the payer's income.

Group taxation

A company is allowed to transfer excess current year trade losses, current year tax depreciation, and current year approved donations to another company within the same group if certain conditions are satisfied.

Broadly, to qualify for group relief, companies must be incorporated in Singapore, belong to the same group of companies where, among other things, there must be at least a 75% ownership relationship between claimant and transferor, and have the same accounting year-end. In addition, a group must comply with certain prescribed offset and apportionment rules.

Transfer pricing

The Income Tax Act contains provisions that may be used in a transfer pricing context to effectively allow the IRAS to challenge and revise inter-company transactions. Additionally, specific transfer pricing provisions define the arm's-length principle and provide the IRAS with a right to make transfer pricing adjustments in cases where taxpayers do not comply with the arm's-length principle.

The IRAS has also issued transfer pricing guidelines to supplement the provisions in the Income Tax Act and the various treaties signed by Singapore. The guidelines cover the application of the arm's-length principle and the documentation requirements relating to all related-party transactions, including local related-party transactions. They provide guidance to taxpayers on how to substantiate their transfer prices with their related entities by maintaining adequate documentation to mitigate the risk of tax adjustment by the IRAS and to safeguard them from potential double taxation. The IRAS has also provided guidance on matters relating to mutual agreement procedures (MAPs) and advance pricing arrangements (APAs).

Although Singapore's income tax rates are traditionally lower than the majority of its trading partners, the IRAS is increasing its focus on transfer pricing issues, and now requires taxpayers to maintain contemporaneous transfer pricing documentation.

Singapore

Thin capitalisation

There are no formal thin capitalisation rules in Singapore. However, general anti-avoidance and transfer pricing provisions may operate in cases of abuse.

Controlled foreign companies

There are no CFC rules in Singapore.

Tax credits and incentives

There are various tax incentives available to taxpayers involved in specified activities or industries identified as being beneficial to Singapore's economic development.

Tax incentive applications are typically subject to an approval process during which the administering agency evaluates the applicant's business plans in detail. Successful applicants are required to satisfy rigorous requirements and are expected to make significant economic commitments in Singapore.

Generally, applicants are expected to carry out substantive, high value activities in Singapore, and will be required to commit to certain levels of local business spending and skilled employment. Some factors that will be considered include the use of Singapore as a base from which to implement regional growth strategies; introduction and anchoring of leading-edge skills, technology, and activities in Singapore; contributions to the growth of R&D and innovation capabilities; and potential spin-off to the rest of the economy.

Pioneer tax incentive

Corporations manufacturing approved products with high technological content or providing qualifying services may apply for tax exemption for five to 15 years for each qualifying project or activity under the pioneer tax incentive. Corporations may apply for their post-pioneer profits to be taxed at a reduced rate under the Development and Expansion Incentive, as discussed below.

Development and Expansion Incentive

Under the Development and Expansion Incentive, corporations engaging in new high-value-added projects, expanding or upgrading their operations, or undertaking incremental activities after their pioneer period may apply for their profits to be taxed at a reduced rate of not less than 5% for an initial period of up to ten years. The total tax relief period for each qualifying project or activity is subject to a maximum of 40 years (inclusive of the post-pioneer relief period previously granted, if applicable).

Investment allowance

Under the investment allowance, a tax exemption is granted on an amount of profits based on a specified percentage (of up to 100%) of the capital expenditure incurred for qualifying projects or activities within a period of up to five years (up to eight years for assets acquired on hire-purchase). Capital expenditure incurred for productive equipment placed overseas on approved projects may likewise be granted integrated investment allowances. Investment allowances of 100% of capital expenditure (net of grants) may be granted to businesses seeking to make substantial investment in automation, subject to a cap of SGD 10 million per project.

Incentives for internationalisation

A new International Growth scheme provides for a 10% concessionary tax rate on incremental income from qualifying activities for up to five years. This incentive is intended for larger Singapore companies that anchor key functions in Singapore as they venture overseas.

In addition, the double tax deduction scheme for internationalisation allows companies expanding overseas to claim a double deduction for eligible expenses for specified market expansion and investment development activities. With effect from 1 July 2015, this includes manpower expenses incurred when Singaporeans are deployed to overseas entities.

Productivity and Innovation Credit (PIC)

The PIC scheme provides for an enhanced 400% deduction for qualifying expenditure incurred in respect of six qualifying activities during the accounting periods that end between 2010 and 2017 (i.e. years of assessment 2011 to 2018). The six qualifying activities are:

- The acquisition or leasing of prescribed IT and automation equipment.
- Staff training.
- The acquisition of IP.
- The registration of IP rights.
- R&D.
- Design.

The enhanced deduction is available only on the first SGD 400,000 of qualifying expenditure incurred each year on each of the qualifying activities, although, for the years of assessment 2015 to 2018, qualifying small and medium enterprises may claim PIC benefits for up to SGD 600,000 of such expenditure for each qualifying activity a year. The cap may be combined for certain years of assessment. Certain activities are subject to approval or minimum ownership requirements.

For the years of assessment 2013 to 2018, the acquisition of IP rights includes licensing of those rights, other than trademarks and any rights to the use of software.

Mergers and acquisitions allowance

The mergers and acquisitions allowance allows a write-off, over five years, of 25% of the value of qualifying mergers or acquisitions deals executed between 1 April 2015 and 31 March 2020, subject to a cap of SGD 5 million (SGD 10 million for deals executed from 1 April 2016 to 31 March 2020) per year of assessment. This incentive is available only to companies that are incorporated, tax resident, and carrying on a business in Singapore. A 200% tax allowance is also granted on transaction costs (capped at SGD 100,000 per year of assessment) incurred on qualifying deals.

Financial services incentives

Financial sector incentive (FSI) scheme

The FSI scheme covers a broad range of financial institutions, including bond intermediaries, Asian currency units, derivative traders, fund managers, equity capital market intermediaries, operational headquarters, providers of high-value-added processing services supporting financial activities, futures members of the Singapore Exchange Limited, members of the Singapore Commodity Exchange Limited, providers of trustee and custodian services, and trust management or administration services. Financial institutions that plan to expand their Singapore operations and are prepared to meet various strict qualifying conditions may apply for this incentive.

Under the FSI scheme, income from certain high growth, high-value-added activities, such as services and transactions relating to the bond market, derivatives market, equity market, and credit facilities syndication, may be taxed at 5%, while a broader range of financial activities will qualify for a 12% tax rate. The tax incentive period may last for five, seven, or ten years, subject to certain conditions being met.

Singapore

Finance and treasury centre (FTC)

Income derived by an FTC from approved FTC activities is taxed at a reduced rate of 10% (8% from 25 March 2016). Approved activities include international treasury and fund management activities, corporate finance and advisory services, economic and investment research and analysis, and credit control and administration.

Interest payments to overseas banks and approved network companies are also exempt from WHT where the funds borrowed are used for approved activities.

Debt securities incentives

A package of tax concessions is available to various players in the Singapore bond market, including those involved in certain Islamic financing arrangements.

Offshore insurance incentives

Approved insurance companies engaged in the business of insuring and reinsuring offshore risks are taxed at a rate of 10% on qualifying income arising from offshore risks business. The tax exemption for approved insurance companies for qualifying income from the writing of marine hull and liability risk insurance expired on 31 March 2016 and was replaced with a 10% concessionary tax rate for awards granted or renewed from 1 April 2016. The tax exemption for offshore specialised risk insurance is due to expire on 31 August 2016. It will be replaced by a 5% concessionary tax rate for awards granted between 1 September 2016 and 31 August 2019; and an 8% tax rate will apply for awards granted thereafter. The incentive will also be expanded to cover onshore specialised risk insurance from 1 September 2016.

Tax exemption is available for qualifying income of approved offshore captive insurance companies until 31 March 2018. Awards granted or renewed after that date will enjoy a 10% concessionary tax rate.

Approved insurance and reinsurance brokers are taxed at a rate of 10% on commission income from broking activities if the risks being insured or reinsured are offshore risks and on fee income from advisory services provided to non-Singapore based clients. The concessionary tax rate is further reduced to 5% on qualifying income for approved insurance and reinsurance brokers in respect of the offshore specialty insurance broking business.

Real Estate Investment Trusts (REITs)

Distributions made to foreign non-individual investors by a listed REIT out of rental income from Singapore real estate are subject to a reduced tax rate of 10%, subject to certain conditions being met. Listed REITs investing in foreign properties can apply for tax exemption for certain foreign income received in Singapore. Distributions out of this income similarly are exempt. A GST remission is granted to listed REITs to allow them to claim GST on their business expenses regardless of whether the underlying assets are held directly or indirectly through SPVs or sub-trusts.

Islamic financing arrangements

The income tax, stamp duty, and GST treatment of prescribed Islamic financing arrangements and Islamic debt securities (*Sukuk*) are aligned with that of the conventional financing contracts to which they are economically equivalent, subject to certain conditions.

Infrastructure project finance incentives

Tax exemption is available for interest income earned from qualifying investments in qualifying infrastructure projects/assets. FSI companies that provide project finance advisory services related to qualifying projects/assets pay tax at 5% or 12% on their qualifying income, and companies that provide management services to qualifying business trusts and funds pay tax at 10% on their qualifying income. Stamp duty remission is also available on the transfer of such projects/assets to listed entities.

Sovereign wealth funds

Tax exemption is available for income derived by a sovereign fund entity and an approved foreign government-owned entity from funds managed in Singapore.

Headquarters (HQ) schemes

Approved regional headquarters in Singapore are taxed at a concessionary rate of tax of 15% on qualifying overseas income. Depending on their level of economic commitments to Singapore, international headquarters can apply for various tax incentives, including tax exemption or concessionary tax rates on qualifying income.

Maritime Sector Incentive (MSI) scheme

The MSI scheme is the umbrella incentive for the maritime sector. Incentives offered include tax exemption for shipping companies and a 10% concessionary tax rate for international freight and logistics operators. Approved ship investment managers are also taxed at 10% on qualifying management-related income. The scheme also includes approved ship investment vehicles, which are tax exempt on their qualifying vessel lease income; approved container investment enterprises, which are taxed at 5% or 10% on qualifying income from container-leasing; and approved container investment management companies, which are taxed at 10% on qualifying management fees.

Qualifying ship operators and lessors under the MSI scheme also enjoy automatic tax exemption on gains from the disposal of vessels, vessels under construction, and new building contracts.

Other incentives

Incentives for not-for-profit organisations, international arbitration, oil traders, international traders, trust companies, and the provision of international legal services include tax exemptions or concessionary tax rates of 10% for qualifying income. The concessionary tax rate for liquefied natural gas (LNG) trading, aircraft leasing, qualifying oil traders, and international traders may be further reduced to 5%.

Foreign tax credit

See *Foreign income in the Income determination section for a description of the foreign tax credit regime.*

Withholding taxes

Domestic corporations paying certain types of income to non-residents are required to withhold tax.

Unless a lower treaty rate applies, interest on loans and rentals from movable property are subject to WHT at the rate of 15%. Royalty payments are subject to WHT at the rate of 10%. The tax withheld represents a final tax and applies only to non-residents who are not carrying on any business in Singapore and who have no PE in Singapore. Technical assistance and management fees for services rendered in Singapore are taxed at the prevailing corporate rate. However, this is not a final tax. Royalties, interest, rental of movable property, technical assistance, and management fees can be exempt from WHT in certain situations or subject to a reduction in tax rates, usually under fiscal incentives or DTAs.

Payments made to public entertainers and non-resident professionals who perform services in Singapore are also subject to a final tax of 15% on their gross income. For public entertainers, this appears to be a final tax unless they qualify to be taxed as Singapore tax residents. However, non-resident professionals may elect to be taxed at the prevailing tax rate for non-resident individuals of 22% on net income if this results in a lower tax cost. The WHT rate on payments to non-resident entertainers was reduced to 10% from 22 February 2010 to 31 March 2020.

Singapore

Ship charter fee payments are not subject to WHT.

The WHT rates are shown in the following table.

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%) (2)
Resident individuals	0	0	0
Resident corporations	0	0	0

Notes

1. Singapore has no WHT on dividends over and above the tax on the profits out of which the dividends are declared. However, some treaties provide for a maximum WHT on dividends should Singapore impose such a WHT in the future.
2. The non-treaty rates (a final tax) apply only to non-residents who do not carry on business in Singapore and who do not have a PE in Singapore. This rate may be further reduced by tax incentives.
3. Interest:

Singapore

- a. Lower rate or exemption if received by a financial institution.
- b. Exempt if paid to the government.
- c. Lower rate or exemption if paid by an approved industrial undertaking.
- d. Exempt if paid by a bank and received by a bank.
- e. Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
- f. Exempt if paid in respect of an approved loan or indebtedness.
- g. Exempt if paid to an approved pension fund.
- h. From 1 January 2017, lower rate if paid to a financial institution or insurance company or paid with respect to indebtedness arising from a sale on credit of any equipment, merchandise, or services.
- i. Exempt if paid by a financial institution.
- 4. Royalties:
 - a. Royalties on literary or artistic copyrights, including film royalties, are taxed at the non-treaty rate.
 - b. Lower rate for payments in connection with industrial, commercial, or scientific equipment.
 - c. Royalties on literary, artistic, or scientific work, except computer software, but including film royalties, are exempt.
 - d. Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
 - e. From 1 January 2017, lower rate of 5% for royalties on copyright of literary, artistic, or scientific work, including cinematograph films, or films or tapes used for radio or television broadcasting, and 8% for royalties in connection with patents, trademarks, designs or model, plan, secret formula, or process, or industrial, commercial, or scientific equipment.
- 5. Treaties:
 - a. Treaty with Bermuda covers only the exchange of information.
 - b. Treaty with Chile covers only international ship operations.
 - c. Treaties with Brazil, Hong Kong, and the United States cover only shipping and air transport activities.
 - d. Treaty or lower rate applies from 1 January 2017.

Tax administration

Taxable period

The tax basis period is the calendar year; however, for business profits, the accounting period will generally be adopted.

Tax returns

Tax is computed for each tax year based on the income earned in the preceding year (the tax basis period). The corporation files an estimate of its income within three months of the end of the accounting period followed by a return of income by 30 November of the tax year, and the tax is assessed by the Comptroller of Income Tax. Corporations that file their tax returns electronically enjoy an extended filing deadline of 15 December. Mandatory electronic filing of tax returns will be introduced gradually; certain companies will be required to file electronically from year of assessment 2018 (income year 2017), and by year of assessment 2020 (income year 2019), all companies are expected to have adopted electronic filing. There is no fixed date for the issue of assessments.

Payment of tax

Assessed tax is payable within one month after the service of the notice of assessment, whether or not a notice of objection to the assessment has been lodged with the tax authorities. Application may be made to the Comptroller to pay estimated tax liabilities on a monthly basis. However, the Comptroller is under no obligation to grant such an application.

Late payment of tax will attract penalties, up to a maximum of 17% of the outstanding tax.

Tax audit process

The IRAS adopts a risk-based approach to identifying compliance risk, with a focus on improving the behaviour of taxpayers who pose a higher risk of non-compliance. It also prioritises and tailors specific compliance programmes that aim to identify taxpayers who have made mistakes in their tax returns, create an audit presence in the community to deter non-compliance by other taxpayers, educate taxpayers on their tax obligations

and how to comply with these, and identify areas of tax law, policies, and processes where the tax system can be simplified.

Statute of limitations

The statute of limitations is four years from the year of assessment, but does not apply where there has been fraud or wilful default by the taxpayer.

Topics of focus for tax authorities

In the past, the IRAS has focussed its compliance efforts on:

- the timely filing of corporate tax returns
- PIC claims
- the classification of income and expenses for income taxable at concessionary and prevailing corporate tax rates
- group relief claims
- tax exemption for foreign-sourced dividends, and
- the recognition of income from construction contracts and provisions claimed by construction companies.

The IRAS has announced that, in addition to the above, it will be focussing on:

- wholesale of chemical and chemical products, and
- travel agencies and ticketing agents.

Other issues

Exchange of information (EOI)

The Singapore government introduced several key measures to strengthen Singapore's EOI framework after endorsing the internationally agreed standard for exchange of information for tax purposes (the Standard) in 2009.

Singapore has amended its laws such that it is now able to extend EOI assistance to all existing tax treaty partner jurisdictions without having to update the terms of those treaties.

Singapore is also a signatory to the Convention on Mutual Administrative Assistance in Tax Matters (CMAA). Following its ratification on 21 January 2016 and the issue of domestic implementation legislation, it has become operative from 1 May 2016 and will expand Singapore's network of partners for EOI on request by 34 jurisdictions. It should, however, be noted that Singapore has made various reservations in implementation in accordance with local laws, including not providing assistance in the recovery of foreign taxes.

Legislative changes intended to allow Singapore to implement its international commitment to commence automatic exchange of financial account information (AEOI) in 2018 are in the process of being introduced. It has been announced that AEOI will be carried out on a bilateral basis with jurisdictions with which Singapore has signed Competent Authority Agreements. This will be subject to the following:

- That there is a level playing field among all major financial centres, including Dubai, Hong Kong, Luxembourg, and Switzerland, to minimise regulatory arbitrage.
- That AEOI partners have strong rule of law and the ability to ensure the confidentiality of information exchanged and prevent its unauthorised use.
- That there is full reciprocity with AEOI partners in terms of information exchanged.

In this regard, it has been indicated that Singapore will prioritise the implementation with jurisdictions with strong rule of law, such as the United Kingdom and France.

Singapore

Singapore has also signed a Model 1 Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA) with the United States to help ease the compliance burden of Singapore-based financial institutions. This entered into force on 18 March 2015.

Adoption of International Financial Reporting Standards (IFRS)

Companies incorporated in Singapore and Singapore branches of foreign companies are required by the Companies Act to prepare and present financial statements that comply with the Singapore Financial Reporting Standards (SFRS). In Singapore, the Accounting Standards Council (ASC) has the statutory authority to issue SFRS for adoption.

The SFRS is principally based on and substantially similar to IFRS that are issued by the International Accounting Standards Board (IASB). Full convergence of the SFRS with IFRS for Singapore-listed companies was the strategic direction of the ASC set in 2009, and, on 29 May 2014, the ASC and Singapore Exchange jointly announced that Singapore-listed companies will have to apply a new financial reporting framework identical to the IFRS for annual periods beginning on or after 1 January 2018. Non-listed companies may voluntarily apply the new framework.

Companies are required to submit financial statements as part of their tax return filing. The IRAS generally accepts financial statements prepared for statutory filing, although companies that have been allowed to prepare their financial statements using standards other than SFRS, such as IFRS or the Generally Accepted Accounting Principles (GAAP) adopted by the United States, may be required to explain and/or account for any differences and make the necessary tax adjustments, if any.

In relation to financial instruments, the Income Tax Act was amended to align the tax treatment with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement). As a concession, the IRAS allows taxpayers to elect to align their tax reporting of lease income to the accounting treatment prescribed by SFRS 17 (Leases), which requires operating lease income to be recognised using the 'effective rent method'.

Sample corporate tax calculation

For a sample corporate tax calculation, see the Other issues section of Singapore's Corporate tax summary at www.pwc.com/taxsummaries.

Significant developments

Social security contributions

The age for old age insurance (AOV) has been raised from 60 to 62. This may later be raised further, to 65, depending on the financial results of the AOV fund. Based on a transitional rule, the change will not apply to those who, at that time, already had reached the age of 58 or 59.

Tax court

The Parliament of Sint Maarten (St. Maarten) approved the introduction of appeal in two instances in tax matters in order to improve the legal protection of taxpayers. The amendment is expected to go into effect on 1 May 2016. Once the amendment goes into effect, a person can appeal a decision of the tax inspectorate at the Court of First Instance of St. Maarten. This court will also take over all appeals that are pending before the Board of Appeal in Tax Cases, on the day the amendment goes into effect.

If a party does not agree with the decision of the Court of First Instance in a tax dispute, that party may file an (higher) appeal with the Joint Court of Justice of Aruba, Curaçao, St. Maarten, and of Bonaire, St. Eustatius, and Saba.

It is expected that appeals will be handled in a much shorter period by the Court of First Instance of St. Maarten than in the current situation with the Board of Appeal in Tax Cases.

Foundations and trusts

Also, applicable as of fiscal year 2015, the legislation relevant to associations and foundations has changed. The Profit Tax Ordinance now states that all trusts, associations, and foundations are subject to profit tax, except those that are dedicated to the promotion of the general social interest. The ordinance further states that the term 'foundation' also includes private foundations. The Inspectorate of Taxes has issued a publication in which they state that this means that all associations, trusts, and foundations, including private foundations, are subject to profit tax and have to submit profit tax returns. Only the foundations, associations, and trusts dedicated to the promotion of the general social interest exclusively are still exempted from filing tax returns.

Transitional legislation

While the offshore tax regime was abolished in 2001, qualifying offshore companies incorporated before 1 January 2002 may continue to apply the old regime until 2019, provided that certain conditions are met under transitional legislation.

Taxes on corporate income

Resident corporations are taxed on worldwide income. Non-resident companies are taxed on the following St. Maarten-source income:

- Income attributable to a permanent establishment (PE).

Sint Maarten

- Income from real property situated in St. Maarten.
- Interest on loans secured by a mortgage on property situated in St. Maarten.

Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 34.5%.

Minimum rates

Special minimum rates apply to the taxable income of certain companies:

Type of company	Minimum rate (%)
New industries and hotels	2
Land development companies	2

Shipping business

Shipping companies are subject to the general profit tax rate of 34.5% but may apply for the tonnage regime. If applicable, their profit is calculated based on the rates in the table below. If a shipping company applies the tonnage regime, the actual profits or losses are not taken into account, regardless of whether they are regular profits or capital gains.

The calculated profit based on the table below is subject to the general tax rate of 34.5%.

Over (tons)	Not over (tons)	Profit per net ton (ANG*)
0	10,000	2.00
10,000	25,000	1.35
25,000		0.60

* Antilles guilders

Exempt companies

Please see the Tax credits and incentives section for more information on tax exempt companies.

Companies under transitional offshore rules

Transitional rules distinguish three types of offshore companies.

- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support subject to tax rates of 2.4% to 3% (while capital gains and losses were not taken into account) will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to tax rates of 4.8% to 6% or, under certain circumstances, 2.4% to 3% and that had a valid ruling with the tax inspector (e.g. trading companies, banks, captives commissions, and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. These revenues were, under the old offshore regime, exempt from tax. For profit tax

purposes, these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules, provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.

Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in St. Maarten is considered to be a resident. A company that has been established in St. Maarten will always be considered a resident of St. Maarten.

Offshore entities in St. Maarten must have a local managing director. This function is easily provided by one of the many trust companies established in St. Maarten.

Permanent establishment (PE)

The definition of a PE in St. Maarten is generally in line with the Organisation for Economic Co-operation and Development (OECD) model.

Transfer of legal seat

Legislation has been enacted under which a St. Maarten company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction) and a foreign company is allowed to migrate to St. Maarten.

Other taxes

Turnover tax

A 5% turnover/sales tax is levied on the revenue derived from services and deliveries rendered by an entrepreneur or company in St. Maarten. Note that non-resident service providers are also subject to this tax.

A limited number of services and deliveries are exempt, such as:

- Exports.
- Certain basic food and other products.
- Electricity and water.
- Medical services.
- Services at the airport or in the harbour regarding imported or exported goods or goods in transit.
- Advisory and management services provided to or by offshore companies and offshore banks.

An entrepreneur liable to turnover/sales tax must file a declaration with the Tax Inspectorate, before the 16th day of the month following the month concerned, at the Tax Collector's office.

Import tariffs

In general, there are no customs duties or import tariffs in St. Maarten, except for a special import tariff on gasoline. The rate is ANG 29 per hectolitre.

Sint Maarten

Excise duties

There are no excise duties in St. Maarten.

Property taxes

There is no property tax in St. Maarten.

Transfer tax

The transfer of immovable property located in St. Maarten is subject to a 4% transfer duty.

Stamp taxes

A stamp tax is levied in two ways, in the form of stamps and as stamped paper.

Stamp tax applies to documents such as government licences, leases, agreements, and court documents. The rate depends on the type of document. As an example, the stamp tax for bank checks is ANG 0.25. The general rate for each page of a legal document is ANG 5.

Payroll taxes

Employers must not only withhold wage tax but also the employee part of social security premiums from their employees and pay the amount withheld, together with the amount payable by the employer, to the tax collector.

Social security contributions

Health and accident insurance

Employees with an income of ANG 67,816.32 or less are insured against health care costs and loss of income in case of illness. The premium is 8.3% to be paid by the employer and 4.2% by the employee.

Employees are also insured against loss of income as a result of an accident that occurs at work. The premium varies from 0.5% to 5%, depending on the class of risk, to be paid fully by the employer. Maximum premium income is ANG 67,816.32.

Old age insurance (AOV) and widows and orphans insurance (AWW)

The collective premium for AOV and AWW amounts to 14% up to an income of ANG 100,000, of which 7.5% is to be paid by the employer.

Branch income

Tax rates on the profits of PEs are the same as for resident corporations.

There are specific rules for the PE of an insurance company. In that case, the company may elect to declare profit based on a percentage of premiums received by the PE, as well as premiums the company has received from insured residents and from insured risks in St. Maarten. The insurance company may also elect to declare a profit that is in the same proportion to total profit of the company as the aforementioned premiums to total premiums.

No tax is withheld on transfers of profits to the head office.

Income determination

Inventory valuation

Both the last in first out (LIFO) and first in first out (FIFO) methods of inventory valuation are permitted, provided the chosen method conforms to sound commercial

practice. Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.

Capital gains

Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages (dividends and capital gains) from a qualifying participation (*see Dividend income below*).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired asset. The reserve may be maintained for a maximum of four years. If the reserve has not been fully applied, the remainder will be liable to taxation in the fourth year.

Under the transitional regime for offshore companies (investment, holding, finance, and patent holding companies), capital gains and losses are tax exempt.

Dividend income

In general, a full participation exemption applies to all local, as well as foreign, participations for dividends as well as for capital gains. However, it is required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.

Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax in St. Maarten.

Non-portfolio investment clause

A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest, or royalties received other than from an enterprise of that participation.

Subject-to-tax clause

A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited to 70% of dividends. Consequently, the dividends would be subject to an effective tax rate of 10.35% (30% x 34.5% regular tax rate).

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

Immovable property

The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

Definition of dividend

A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.

Minimum cost-price threshold for participations

The minimum cost-price threshold for shareholdings, profit-sharing notes, or voting rights of less than 5% is ANG 890,000.

Sint Maarten

Interest income

There is no specific regime for interest received. Interest income is therefore taxed at the same rate as other income.

Foreign income

A St. Maarten corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

St. Maarten has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a PE on Aruba, Curaçao, or the Netherlands, including the Caribbean Netherlands, are tax exempt in St. Maarten based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

Foreign real estate is always deemed to be part of a PE and, as such, is fully tax exempt.

Deductions

Depreciation and amortisation

Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs, and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable. In addition, an accelerated deduction of one-third of the assets' depreciable basis may be taken. The assets' remaining cost basis (two-thirds) is depreciated using one of the acceptable methods.

The cost basis of certain intangible assets, such as patents, trademarks, and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.

The tax department has issued the following estimated depreciation table:

Asset	Rate (%)	Residual value (%)
Buildings	2/2.5	10
Renovation	10	0
Inventory	10/20	10
Computer:		
Hardware	33/50	0
Mainframe	10/12.5	0
Machinery and installations	10	10
Transportation:		
Cars	20	10
Rental cars	33	15
Trucks and buses	10	15
Start-up costs	20	0
Goodwill	20	0

Start-up expenses

Start-up expenses should be capitalised and may be depreciated, comparable to goodwill, over five years.

Anti-abuse rules regarding interest and loans

Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction, or in case the interest in the hands of the recipient is taxed at an effective tax rate that is considered adequate by St. Maarten standards, the interest may be deductible.

In case of intra-group financing, the amount of interest paid or received for profit tax purposes should be based on arm's-length principles.

In case of profit participating loans, the interest will be qualified as a dividend and will not be deductible. Interest received on such loans may meet the definitions of the participation exemption if the creditor also holds a qualifying participation in the debtor.

A write-down of an intra-group loan may be denied in case of a profit-participating loan or if, at the time of issuance, it was foreseeable that the loan would never be fully repaid.

Provision for bad debt

It is possible to make a provision for future expenses with a cause existing on the balance sheet of the tax year in question. Therefore, a provision may be made for bad debts.

Charitable donations

Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

Bribes, kickbacks, and illegal payments

Expenses that are connected to a criminal offence for which a taxpayer has been convicted are not deductible. Bribes paid to public servants and politicians are not deductible.

Fines and penalties

Fines and penalties are not deductible in cases where they have been imposed by a criminal court in St. Maarten, or have been paid to avoid prosecution, and in cases of administrative fines imposed by a government agency in St. Maarten.

Taxes

The turnover tax paid by the entrepreneur is deductible for profit tax purposes, up to 90%. Other taxes, other than the profit tax itself, incurred in the course of doing business are deductible.

Other significant items

Deduction of certain expenses (e.g. costs for food, drink, and entertainment) are only allowed in part. These costs are often referred to as mixed costs. The non-deductible portion is 10% of the total of these expenses.

Net operating losses

Losses may be carried forward for a period of ten years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.

Sint Maarten

Payments to foreign affiliates

The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

Group taxation

Fiscal unity

The Corporate Tax Act provides for fiscal unity treatment for corporate profit tax purposes. Resident companies with wholly owned resident subsidiaries can qualify for this regime. The parent company is entitled to submit one consolidated income tax return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of St. Maarten, the Netherlands, Aruba, or Curaçao. The companies that invoke this relief must have their place of management in St. Maarten.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime, provided that they are resident in St. Maarten.

Transfer pricing

There are no specific regulations with regard to transfer pricing. However, based on case law, businesses can be required to show that in case of intra-company transactions, these transactions have been made at arm's length.

Thin capitalisation

In cases where a company receives a loan from an associated exempt private limited liability company (*Besloten Vennootschap* or BV), and the amount of the loan is more than three times the net equity of the company, the interest on the loan is not deductible for the part that is more than three times the net equity.

Controlled foreign companies (CFCs)

There are no CFC provisions.

Tax credits and incentives

Foreign tax credit

A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the St. Maarten profit tax that is attributable to that foreign income.

Inward investment and capital investment

There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.

Investment allowance

For a minimum investment of ANG 5,000, an 8% investment allowance on acquisitions and improvements (12% for new buildings) is permitted as a deduction from taxable profit in the year of investment and in the subsequent year for businesses operating in St. Maarten.

Accelerated depreciation and tax rollover reserve

An accelerated deduction of one-third of the assets' depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.

Tax exempt company

It is possible to elect tax-exempt status for a BV. To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, financials, and the activities (only investment and financing activities) of the company. Recently, the licensing of intellectual and industrial property rights, and other comparable property and usage rights, have been added to the list of allowed activities.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of St. Maarten. A profit tax regime is comparable to that of St. Maarten if the foreign tax regime provides for a profit tax rate of at least 15% (50% of the old Netherlands Antillean rate, excluding island surcharges).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all European Union (EU) and OECD member states and all jurisdictions with which St. Maarten has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

Independent expert

An independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax comparable to that of St. Maarten, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.

Ocean shipping companies

Ocean shipping companies are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control). International aviation companies may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of St. Maarten. As a result, the overall effective tax rate is 9.66%.

New industries and hotels

New industries and hotels are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

Land development companies

Land development companies are granted a tax holiday. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1

Sint Maarten

million is required. Activities should be expected to enhance the economic development of St. Maarten.

Private foundations

Private foundations are exempt from St. Maarten profit tax, and their distributions are exempt from St. Maarten gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor's country may be applicable.

The 'private' foundation is a variant of the long-existing 'common' foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. Acting as a holding company or investment company is not considered running a business. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

Withholding taxes

Although a dividend withholding tax (WHT) was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time in St. Maarten.

Tax treaties

St. Maarten currently has tax treaties in effect with the Netherlands, Aruba, Curaçao, and Norway. A double tax agreement (DTA) has been negotiated with Jamaica, but this has not entered into force yet. *See the Other issues section for a description of tax information exchange agreements (TIEAs).*

Tax arrangement for the Kingdom of the Netherlands (TAK)

As part of the Kingdom of the Netherlands, St. Maarten is party to a federal tax agreement with the Netherlands, Aruba, and Curaçao (TAK). Subject to this treaty, dividends, interest, and royalties paid out to a St. Maarten company may qualify for reduced rates of WHT in the subject countries.

Dutch dividend WHT is 15% if the St. Maarten company owns less than 25% of the Dutch company. If the St. Maarten company's interest is 25% or more, Dutch WHT can be reduced to 8.3%.

The WHT regime in the TAK also applies to the old St. Maarten offshore companies.

A new agreement between the government of St. Maarten and the Netherlands has been signed. The new agreement conforms more to the latest international developments with regard to double tax treaties (DTTs). The agreement entered into force and is applicable for income received from 1 January 2017. The new agreement will replace the existing TAK and arranges the levy rights between the Netherlands and St. Maarten. The TAK will remain in force with regard to the Netherlands in relation to Aruba, and between Aruba, Curaçao, and St. Maarten.

Tax administration

Taxable period

Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar-year basis or on a different book year. On request, this may also apply, for

example, when a resident company is the subsidiary of a foreign parent company (i.e. only a local company must request for a different tax year-end).

Tax returns

A provisional return must be filed within three months after the end of the book year. A final return must be filed within six months after the end of the book year.

For the provisional return, no extensions are granted. For the final return, an extension may be requested. In general, no extensions will be granted for more than 12 months after the book year.

Payment of tax

Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment. This means that if the book year equals the calendar year, the provisional return is due before 1 April of the following year, and the final return before 1 July of the following year.

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2015 was 100, then at the time of filing the provisional return for 2016, which is due before 1 April 2017, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2016 will be lower than for 2015, the estimated lower amount may be paid at the time of filing the provisional return, upon request.

At the time of filing the final return for the year 2016, which is due before 1 July 2017, the balance due must be paid; or if the total amount is less than the amount already paid up, a repayment will follow.

Tax audit process

As the profit tax is levied based on self-assessment, the tax department does not issue a final tax assessment. There is no specific cycle for audits. Depending on a desk review of the tax returns of the last couple of years, an audit may follow.

Statute of limitations

A reassessment can be imposed until five years after the tax year. In cases where the taxpayer is considered to be in bad faith, a reassessment can be imposed until ten years after the tax year.

Topics of focus for tax authorities

There are no specific topics of focus for the tax authorities. In case an audit is started, each aspect may be investigated. Often the audit will not only focus on the profit tax, but also the other tax obligations, such as sales tax, wage tax, and social security premiums.

Other issues

Exchange controls

In general, exchange control regulations are very liberal for offshore companies. Offshore companies established in St. Maarten can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a licence fee of 1%.

Sint Maarten

Business combinations

The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

Tax information exchange agreements (TIEAs)

TIEAs have been signed with several countries, including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand, and the United States. As a result, St. Maarten, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

St. Maarten has not signed an intergovernmental agreement (IGA) with the United States.

Significant developments

A recent amendment to the tax legislation in the Slovak Republic (Slovakia) includes, *inter alia*, the following measures applicable from 1 January 2016:

- Update of anti-avoidance provisions.
- New definition of acquisition cost of financial assets (such as participation shares) for capital gains tax purposes.
- Change in the mechanism for penalties assessment.
- Clarification with respect to transfer pricing documentation.

Note that the legislation is expected to continue to be subject to frequent amendments and new official interpretations; consequently, it is advisable to contact PwC Bratislava for up-to-date information.

Taxes on corporate income

As a member state of the Organisation for Economic Co-operation and Development (OECD), the Slovak Republic's system of corporate taxation generally follows OECD guidelines and principles.

The corporate income tax (CIT) applies to the profits generated by all companies, including branches of foreign companies.

Slovak tax residents are taxed on their worldwide income. Slovak tax residents may utilise a method of elimination of double taxation if their income is taxed abroad. The exemption or credit method can be used to eliminate the double taxation, depending on the relevant double tax treaty (DTT) and the type of income.

Slovak tax non-residents are taxable in Slovakia on their Slovak-source income only. Slovak-source income is defined by local tax law and includes, *inter alia*, the business income of permanent establishments (PEs) and passive types of income, such as royalties, interest, and income from disposal of assets.

Slovakia has a flat CIT rate of 22%. Some income may be subject to a 19% withholding tax (WHT) rate (e.g. interest, royalties). A specific 35% WHT rate applies for payments to taxpayers from non-treaty jurisdictions (i.e. where no DTT or tax information exchange agreement [TIEA] exists).

Tax licence (minimum tax)

A tax licence is applicable to companies and represents a minimum lump sum tax after deduction of tax relief and credit of taxes paid abroad. The respective amounts range from 480 euros (EUR) to EUR 2,880, depending on the entity's turnover and whether the entity is a value-added tax (VAT) payer. The tax licence should be paid regardless of the value of the reported tax base or the tax loss incurred; however, it should be

Slovak Republic

possible to deduct it from future tax liability in the subsequent three years. An entity may not be liable to pay the tax licence only in exceptional cases (e.g. in the first year of its existence, during its liquidation, during bankruptcy, if it operates a subsidised workshop).

Local income taxes

Slovakia does not have local, state, or provincial CIT.

Corporate residence

A company is a tax resident in the Slovak Republic if it has its registered seat or effective place of management in the Slovak Republic.

Permanent establishment (PE)

A foreign company may create a PE if (i) its employees (or persons working for it) are present and providing services in the Slovak Republic on behalf of the foreign company where this activity is carried out through a permanent place of business, (ii) the employees conclude and negotiate agreements on the foreign entity's behalf, or (iii) the foreign entity establishes a building site within the territory of the Slovak Republic.

An activity performed in the Slovak Republic in the form of providing services for more than six months may also be considered a PE, irrespective of the existence of the fixed place.

Other taxes

Value-added tax (VAT)

A basic VAT rate of 20% applies to all taxable supplies, with certain exceptions. Certain medical products and printed materials have a VAT rate of 10%. With effect from 1 January 2016, the VAT Act broadens the list of goods subject to the reduced 10% VAT rate, which now includes 'basic foods' (e.g. milk, butter, meat).

Exempt supplies without credit entitlement include postal services, financial and insurance services, education, public radio and TV broadcasting services, health and social services, the transfer and leasing of real estate (with exceptions), and lottery services. There are also other VAT-exempt transactions without credit entitlement, as well as exempt taxable supplies with credit entitlement.

A special regime for the payment of VAT by a supplier based on the receipt of a payment for supplied goods or services ('cash accounting') is also available. This regime will postpone the obligation to pay VAT until the customer pays the supplier for the supply. This cash accounting scheme can only be used by Slovak-established entities (i.e. with a seat, place of business, or fixed establishment in Slovakia) and if they meet certain conditions.

Reverse-charge mechanism applies for local supplies of any type of goods by foreign persons to a Slovak-established entrepreneur. Foreign companies that only carry out local supplies in Slovakia subject to the local reverse-charge mechanism will not be obligated to register for Slovak VAT. If they are already registered for Slovak VAT, they will not be entitled to deduct input VAT via a Slovak VAT return if this input VAT relates only to the supplies where the reverse-charge mechanism applies. Foreign companies will be able to claim Slovak input VAT using the VAT refund procedure, provided they meet the stipulated conditions.

There is an obligation for the VAT refund's requestors from another European Union (EU) member state and from third-party countries who need to notify the Slovak Tax

Office in the case when they receive a credit note for a decrease in the price from their supplier after the VAT has already been paid to the applicant and they have to repay the relevant amount of VAT to the Tax Office. The foreign companies from non-EU countries are able to apply for a VAT refund on a three-month basis under the same conditions as foreign companies from EU countries.

Local reverse-charge applies for the supplies of construction work, supply of building or parts of buildings under construction, and supply of goods with assembly and installation where assembly and installation can be considered as construction work. For such supplies, the supplier will not charge VAT on the issued invoice and the recipient (VAT payer) must apply a reverse-charge.

VAT grouping is possible if certain conditions are met.

Customs duties

Goods imported from non-EU countries are subject to import customs clearance. Goods exported from the EU customs territory have to be declared for export customs clearance.

To communicate with the customs offices, each person must have an Economic Operator Registration and Identification Number (EORI), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

The European customs rate, customs nomenclature, and customs tariffs are set by EU legislation.

Note that new customs legislation entered into force from 1 May 2016. Whilst the main principles of customs legislation were not altered, areas of key changes include the following:

- Alignment of customs processes and introduction of their uniformity at a higher level across all EU member states.
- Fully electronic customs procedure introduced as an obligation and not as an option (e-Customs).
- Revision and realignment of customs procedures, customs approved treatments, and end-use licence (i.e. customs approved treatments are no longer valid, end-use is considered as customs regime, inward processing relief [IPR] drawback system is being cancelled).
- Creating a platform for the introduction of new concepts ('single windows').
- Abolishment of first sale method in customs valuation and change of the definition of transaction value.
- Introduction of self-assessment (delegation of the executing of certain customs formalities to the operator that are otherwise the responsibility of the customs authorities) and other simplified procedures.
- New concept of Authorized Economic Operator (AEO) with only two types AEO-C and AEO-S.
- Validity of binding tariff information (BTIs), time limits for decision making process, customs guarantee, definition of the debtor, exporter, etc.

Excise taxes

Excise tax is charged on the release to tax-free circulation or import of tobacco products, wine, spirits, beer, mineral oil, electric energy, coal, and natural gas.

Immovable property tax

Immovable property tax, which is divided into land tax, building tax, and tax on apartments, is governed by the Act on Local Taxes. Immovable property tax is calculated based on the area of the real estate, its location, and its type, as well as the tax rate of each self-governing region.

Slovak Republic

The immovable property tax rate may vary significantly. Please find below the spread of the tax charges per square metre.

Property	Immovable property tax per square metre (EUR)
Four floor office building in centre of city of Bratislava	8.30 *
One floor hall rural area	0.57 to 6.40

* For each additional floor, add an additional tax of EUR 0.33.

Transfer taxes

There are no transfer taxes in the Slovak Republic.

Stamp taxes

There are no stamp duties or similar taxes on share or other property transfers in the Slovak Republic, although small administrative fees are payable to register such transactions.

Turnover taxes

There are no turnover taxes in the Slovak Republic.

Special tax on regulated industries

There is a special tax from activities of entities in regulated industries (e.g. energy, insurance and re-insurance, public healthcare insurance, electronic communications, pharmaceuticals, postal services, railway transport, public water distribution and sewerage, air transport), which applies for the period from September 2012 to December 2016. The tax is calculated as a multiple of the tax base (accounting result before tax) that exceeds EUR 3 million a year and the tax rate. The monthly tax rate is 0.00363. The annual rate can be up to 4.35%.

Special tax on banks

A special tax on banks is charged at a rate of up to 0.4% to the extent that the cumulative amount of special tax collected from all banks by the Tax Office does not reach the EUR 750 million threshold. The tax rate of 0.2% applies in 2016.

The special tax on banks is calculated from the bank's liabilities recognised on the balance sheet net of deductions (e.g. the amount of the bank's equity, provided that its value is positive), the amount of the subordinated debt under a special regulation, and the amount of funds provided to the branch of a foreign bank.

Motor vehicle tax

Vehicle tax applies to vehicles that are registered in the Slovak Republic and used for business purposes. The taxpayer is the entity that uses the vehicle for business purposes. The tax rate depends on engine capacity, vehicle size, etc. The motor vehicle tax is administrated by the Tax Office.

Payroll taxes

Taxable remuneration from employment includes all remuneration, whether monetary or non-monetary, including in-kind benefits provided to an employee. Statutory health insurance and social security contributions paid by the employee reduce taxable income. Obligatory employer's health insurance and social security contributions paid by the employer are not part of the employee's taxable income.

Employers must keep Slovak payroll records for employees and members of their statutory bodies.

The tax base up to EUR 35,022.31 is taxed at 19%. The exceeding part of the tax base is taxed at 25%.

Income of constitutional authorities from dependent activity is, in addition to the tax calculated as listed above, subject to a special tax rate of 5%.

Social security contributions

Employer's health insurance and social security contributions total 34.4% of remuneration; however, due to caps on the amounts on which these contributions are levied, the total contribution does not exceed EUR 1,475.76 per month for the period from 1 January 2016 to 31 December 2016. Employers also pay injury insurance contributions of 0.8% of employees' total salary costs per month, which are not capped.

The rate of health insurance contributions for individuals who receive dividends (except for dividends from listed shares) is 14% of the assessment base. In general, the payer of the dividend needs to withhold the health insurance contribution on the payment of the dividend.

The common maximum health insurance assessment base for 2016 is EUR 51,480.

Branch income

A foreign company may trade through a Slovak branch, which must be registered in the Slovak Commercial Register. The taxable income of the branch must not be lower than that which an independent entity (e.g. a Slovak company) would achieve from carrying out similar activities under similar conditions. If the branch's taxable income cannot be assessed based on its income less costs, as adjusted for tax purposes, certain other methods may be used. A taxpayer may ask the tax authorities in writing to approve such a method.

Income determination

The tax base is generally the accounting result as determined under Slovak statutory accounting rules, adjusted for tax purposes.

Inventory valuation

Stock (i.e. inventory) is valued at cost. Slovak legislation specifically provides for the use of the arithmetical average cost and first in first out (FIFO) methods to value stock. Last in first out (LIFO) may not be used. The tax treatment follows the accounting treatment.

Capital gains

Capital gains from the disposal of assets are included in the CIT base. The tax treatment of capital losses depends on the type of asset on which they arose.

Capital gains on the alienation of shares and participation interest in Slovak companies may be taxed in Slovakia, predominately if sold to a buyer who is a Slovak tax resident or has a PE to which the purchase is attributable.

The income from the sale of shares or participation interest of a company where the value of immovable property is more than 50% of the equity has its source in Slovakia.

Dividend income

Dividends paid out of profits earned on or after 1 January 2004, and liquidation surpluses and settlement amounts to which shareholders became entitled on or after 1 January 2004, are not subject to tax.

Slovak Republic

However, based on newly introduced anti-avoidance provisions, any dividends may be taxable in Slovakia if they are received through artificial structures with no genuine business reason and contrary to economic reality.

Interest and royalty income

Slovak-source interest income earned by taxpayers with limited, as well as unlimited, tax liability is subject to withholding at a flat tax rate of 19% (for states without a DTT, *please refer to the Withholding taxes section*), except where the recipient of the deposit interest or the yield is a Slovak investment fund, Slovak supplementary pension fund, Slovak bank or the branch of a foreign bank, or the Slovak Export-Import Bank.

Royalty income is subject to the 19% corporate flat tax rate (for states without a DTT, *please refer to the Withholding taxes section*).

Interest and royalty income is exempt if it is paid by a Slovak payer to a recipient who is a tax resident in the European Union and is a beneficial owner of this income, provided that for 24 months before the payment:

- the payer owns at least a 25% direct shareholding of the recipient of the income
- the recipient owns at least a 25% direct shareholding of the payer of the income, or
- a third entity resident in the European Union owns at least a 25% direct shareholding in both the payer and the recipient of the income.

Unrealised foreign exchange gains/losses

The taxpayer may decide whether to include unrealised foreign exchange differences relating to unsettled payables and receivables in the tax base in the tax period when they are accounted for or in the tax period when they are realised. However, the decision to include/stop including these differences when they are realised must be made on the CIT return.

Foreign income

Companies resident in the Slovak Republic are taxed on their worldwide income, including income of its foreign branches. A Slovak tax resident entity is able to deduct from its tax base a tax loss made by its taxable PE (e.g. branch) outside the Slovak Republic, adjusted for Slovak tax purposes.

Credit relief is available for foreign tax paid under most of Slovakia's DTTs. Alternatively, exemption of foreign income taxed abroad from taxation in Slovakia may apply.

Slovakia does not have provisions related to deferral.

Deductions

Depreciation and amortisation

Tangible fixed assets (acquisition value over EUR 1,700) are classified into six tax depreciation groups to which different depreciation periods apply. The possibility to use accelerated tax depreciation methods is limited to assets belonging to the tax depreciation groups 2 and 3.

Depreciation group	Assets	Depreciation (years)
1	Motor vehicles, office machines and computers, tools and implements	4
2	Combustion engines, outboard engines, most production line equipment, furniture	6
3	Electric motors, turbines, air-conditioning systems	8
4	Buildings made of metal, ships, railway locomotives	12

Depreciation group	Assets	Depreciation (years)
5	Buildings not involved in depreciation group no. 6 and engineer's sites not included in other depreciation groups	20
6	Administrative and residential buildings, hotels and buildings for culture, education, health, and public entertainment	40

Taxpayers do not have to depreciate an asset every year. Tax depreciation may be interrupted in any year and continued in a later year without a loss of the total tax depreciation available.

A lessee can depreciate a tangible fixed asset held under a financial lease. The tax depreciation base equals the acquisition value of the leased asset without VAT and financing costs plus expenses related to acquisition of the leased asset that the lessee incurred before the asset was put into use. The assets acquired under finance lease shall be amortised proportionally or using an accelerated method.

The value to be used as the basis for tax depreciation depends on how the asset is acquired and is usually based on one of the following:

- Acquisition costs (i.e. the price for which the asset was acquired).
- The taxpayer's own costs incurred, if the asset is acquired or produced internally.
- Intangibles (acquisition value of EUR 2,400 or more) and low value assets (acquisition value of EUR 1,700 or less) are amortised for tax purposes in line with their accounting amortisation (i.e. over the useful life of the asset).

Goodwill

Amortisation of purchased goodwill, including the goodwill on purchase of a business as a going concern, if it represents an identifiable intangible asset, is tax deductible over up to seven consecutive tax years.

For goodwill created at the contribution of business as a going concern or goodwill created at a merger, the tax deductibility of the goodwill depends on the method of tax treatment of this reorganisation. If the reorganisation is performed for tax purposes at fair market values, the goodwill created will be tax deductible. On the other hand, if the reorganisation is made at original values (carry-over basis), the goodwill created is not tax deductible.

Start-up expenses

Start-up expenses are tax deductible in the period when incurred.

Interest expenses

In general, interest expenses incurred in order to generate taxable income can be treated as tax deductible, subject to thin capitalisation rules (*see Thin capitalisation in the Group taxation section*).

Bad debt provisions

Provisions for unsecured receivables from loans created by banks, and bad debts of regular commercial companies, are fully tax deductible (subject to certain conditions) once the debt has been overdue for more than 1,080 days (20% of the bad debt is tax deductible when it has been overdue for more than 360 days, and 50% after 720 days), provided certain conditions are met. Provisions for bad debts in other circumstances can also be tax deductible if specific conditions are met (e.g. bad debts registered in bankruptcy proceedings).

Charitable contributions

Charitable contributions are treated as gifts, which are not tax deductible.

Slovak Republic

Pension expenses

Contributions to supplementary pension savings made by the Slovak employer on behalf of the employee, up to 6% of the gross salary of the employee participating in these plans, are tax deductible.

Fines and penalties

Penalties and fines are not tax deductible.

Allowance for students

Subject to specific conditions, taxpayers may deduct from their tax base a special allowance with respect to practical education provided to students of up to EUR 3,200 per student per year.

Taxes

Road tax, real estate tax, and most other such taxes are tax deductible. Social security contributions paid by an employer with respect to employees are also tax deductible. VAT charged to profit and loss is tax deductible only if certain conditions are met.

Other non-deductible expenses

Expenses are generally tax deductible if incurred to generate, secure, and maintain the entity's taxable income. However, certain other costs are specifically not tax deductible. These include entertainment costs, various provisions (e.g. provisions to tangible and intangible assets, certain bad debt provisions), and various expenses in excess of statutory limits (e.g. employee travel expenses and meal allowances).

Net operating losses

A company or branch may currently carry forward and utilise a tax loss equally over a period of four years following the year in which the loss arose.

For issues related to the interim provision regarding tax losses carried forward from years 2010 to 2013, please contact the local PwC Tax office.

Carryback of losses is not available in the Slovak Republic.

Payments to foreign affiliates

Generally, deductions may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length and subject to other limitations by the law (e.g. thin capitalisation rules).

Group taxation

There is no concept of group CIT in the Slovak Republic. Each company in a group is taxed individually.

Transfer pricing

Under the transfer pricing rules, prices in transactions between a Slovak company and its related parties should be at arm's length, which means the prices should be at rates similar to those that would be charged between unrelated parties for the same or similar transactions under comparable conditions. Although the OECD Transfer Pricing Guidelines were not formally implemented, these are usually followed for determination of arm's-length prices.

The transfer pricing documentation requirements also apply to domestic-related parties in addition to the rules for foreign-related parties. This means that the prices used between two Slovak related parties need to be set at an arm's-length basis for tax purposes. All provisions of the law on methods of determining such prices for the

purpose of adjusting the tax base and the obligation to keep associated transfer pricing documentation also apply to domestic-related parties.

If transactions between the related parties are not made at arm's length, and this results in a reduction in the Slovak entity's corporate tax base, then the tax authorities can adjust the corporate tax base to that which it would have been if arm's-length prices had been used.

Transfer pricing documentation

All Slovak taxpayers must keep sufficient transfer pricing documentation to justify prices charged by or to their foreign-related parties. The Slovak Ministry of Finance has issued a guideline setting out detailed requirements for transfer pricing documentation (the Guideline).

The EU code of conduct was not formally implemented. However, the Guideline requires maintaining transfer pricing documentation in a form generally in line with the EU standards.

Slovak tax inspectors may require transfer pricing documentation. The deadline to provide transfer pricing documentation for taxpayers is 15 days, and the tax authority may request transfer pricing documentation without the formal opening of a tax audit. Without such documentation, transfer pricing adjustments (increased tax base) are much more likely to be imposed.

Thin capitalisation

The limit for the maximum amount of tax deductible interest and related fees on credits and loans between related parties is established as 25% of the adjusted earnings before interest, tax, depreciation, and amortisation (EBITDA), i.e. the sum of:

- accounting profit before tax
- depreciation and amortisation, and
- interest expenses included in the accounting profit before tax.

In general, thin capitalisation provisions do not apply to financial institutions, collective investment schemes, and leasing companies. Other exceptions or restrictions may apply.

Controlled foreign companies (CFCs)

There is no CFC regime in place in the Slovak Republic.

Treatment of inter-company items

Dividends are not treated as taxable (subject to anti-avoidance provisions) if they are paid out of the profit after tax earned in 2004 or later.

In general, royalties, commissions, and other payments paid to foreign-related parties are tax deductible, provided they are incurred for genuine business reasons and the charges are in line with transfer pricing rules.

Tax credits and incentives

There are several types of investment incentives potentially available, including corporate tax credits, discounts on the price of publicly owned real estate, and financial support for creating jobs or for the acquisition of long-term assets. All of these are treated as state aid.

Various conditions must be met in order for a company to qualify for state aid. These include a minimum amount of investment in fixed assets, where the amount depends

Slovak Republic

mainly on the type of project and where it is located, or a minimum number of newly created jobs.

Investment incentives

Investment incentives (including tax credits) are potentially available for projects in the following areas:

- Industry.
- Technology centres.
- Shared services centres.
- Tourism.

The granting of a tax relief is subject to approval of the Slovak authorities. If certain conditions are met, a taxpayer may apply tax relief in the ten subsequent years following the tax period in which the relief was granted.

Research and development (R&D) super deduction

Taxpayers involved in R&D are entitled to an R&D super deduction of at least 25% of actual qualifying costs incurred.

Foreign tax credit

Foreign tax credits are available if allotted under an applicable DTT.

Withholding taxes

Mainly, the following payments are subject to WHT when made by Slovak companies to foreign parties. However, a DTT may reduce or eliminate the rate:

Payments	WHT (%)
Fees for services	19/35
Royalties *	19/35
Interest on loans and deposits *	19/35

* Royalties and interest paid to related EU-resident companies are not subject to WHT if certain conditions are met.

A 35% WHT rate applies on payments to taxpayers from non-contracting states (i.e. states that did not conclude either a DTT or TIEA with the Slovak Republic).

Service fees may be subject to tax in Slovakia only if the service is provided in the territory of Slovakia.

Dividends paid out of profits arising in 2004 and later years are not subject to Slovak WHT (subject to anti-avoidance provisions).

WHT should be paid to the Tax Office no later than 15 days from the end of the calendar month following that in which the payment was made. The withholding obligation lies with the Slovak resident taxpayer. The taxpayer must also notify the tax administrator of the tax withheld and transferred. If the tax is not properly withheld, the unpaid tax becomes the Slovak tax resident's tax liability, and a penalty may be assessed.

Double tax treaties (DTTs)

This table highlights countries with which Slovakia has entered into a DTT.

Recipient	Interest (%)	Royalties (%)

Notes

- The lower rate applies to cultural royalties.
 - In the case of Romania, the rate of 10% applies to royalties in respect of the use of trademarks, patents, or know-how. The higher rate applies in any other cases.
 - In the case of Brazil, the rate of 25% applies to royalties for the use of trademarks. The lower applies in other cases.
- The lower rate applies to interest on loans and credits granted by a bank for at least ten years in connection with the sale of industrial equipment; with the study, installation, or furnishing of industrial or scientific units; or with public works.
 - The zero rate applies to interest on certain commercial debt-claims, loans guaranteed by public entities for export promotion, accounts/loans between banks/public institutions of the two states, and interest paid to another state or political subdivision of a local authority.
- The zero rate applies if the interest is received by the government/the central bank/other state institutions (see the respective treaty for exact wording).
- The zero rate applies if the interest is received by the government or the central bank or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions (see treaty for exact wording).
- The rate of 10% applies to royalties for cinematography, TV broadcasting, and radio broadcasting, and to giving up rights related to royalties. The higher rate applies in other cases.
- This rate also applies to payment for services.
- WHT is 0% on bank loans.
- The zero rate applies to copyrights; 1% applies to finance lease of equipment; 5% applies to equipment rental and royalties for software, cinematography, and TV and radio broadcasting; and 10% applies to payments for the use of trademarks and know-how.
- The rate of 2% applies to state bonds, obligations, and loans insured or guaranteed by the National Bank of Slovakia/Israel, Slovak Society for Insurance of Foreign Credits and Loans, or Israel Society for Insurance of Foreign Trade; 5% applies if interest is received by a financial institution; and 10% applies in all other cases.
- Slovakia can apply the rate of 5% to royalties for the use of trademarks, patents, or know-how paid from Switzerland to Slovakia, if Switzerland does not apply the 10% rate.
- The zero-rate applies to interest on loans and credits in connection with the sale of industrial, business, or scientific equipment, or the sale of goods.
- The zero-rate applies if the interest received is related to loans (monetary or non-monetary) provided to the government of the other contracting state corporation or any other institution with state shareholding or to loans provided to a bank institution under a governmental approval.
- The zero-rate applies to copyrights.
- The zero-rate applies to interest received by a resident of one state in respect of indebtedness of the other state government or political subdivision/local authority, or in respect of a loan made/guaranteed by the other state government in respect of imports/exports.
- The zero-rate applies if the interest is received by the government, the central bank, or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions (see treaty for exact wording).
- The rate of 5% applies to royalties for the use or the right to use of patent, draft or model, plan, confidential formula or procedure, for information related to industrial or scientific experience and for the use or the right to use of an industrial, business, or scientific device. The rate of 10% applies to royalties for the use or the right to use of trademark or for information related to business experience. The rate of 15% applies to royalties, other than those stated above.
- Interest is exempt if paid by a government/public law agency and other agencies specified in the DTT between Slovakia and Kuwait.
- Slovakia and Switzerland signed the Protocol to a DTT on 8 February 2011. Based on this Protocol, the interest rate will be a maximum of 5%. Industrial royalties are subject to 10%, but the potential reduction of the rate is in case the royalties are paid within European Union, and entities are

considered to be related companies with direct share exceeding 25% for more than 24 months, which is in accordance with the EU Directive on interest and royalty payments made between associated companies.

Tax administration

Taxable period

The standard fiscal year is a calendar year, but a Slovak entity may opt to change this to a different 12-month period.

Tax returns

A corporate tax return must be filed together with the entity's financial statements within three months following the fiscal year-end. The taxpayer may extend the filing deadline by up to three months. To extend the filing deadline, the taxpayer must notify the Tax Office before the normal filing deadline. After notification, the deadline is automatically extended. Further extension of up to six months is available upon Tax Office approval.

Payment of tax

The balance of tax due for a fiscal year is payable by the filing deadline.

Advance payments of corporate tax must be paid monthly or quarterly during the current tax period. Instalments are usually based on the last known tax liability of the entity. It is not necessary to pay tax advances if the last tax liability did not exceed EUR 2,500.

Penalties

As of 1 January 2016, the mechanism for penalties assessment has changed. The penalties levied by the Tax Office will depend on the time elapsed from the deadline for filing the regular tax return to the date of filing the amended tax return or the start of the tax audit. From 1 January 2016, the penalties are:

- 3% a year for self-assessment via an amended tax return.
- 7% a year for self-assessment within 15 days after notification that a tax audit has been opened ('self-disclosure').
- 10% a year for an assessment made by the Tax Office during a tax audit.

The penalties will be levied at a minimum of 1% of the assessed amount and a maximum of 100% of the assessed amount.

An 'aggregated penalty' applies for cases of more than one administrative offence.

Tax audit process

Generally, the tax authority selects the taxpayers subject to tax audit based on certain criteria that are not communicated to the public.

The taxpayers that utilise state aid in the form of tax relief are subject to specific tax audit in the year of utilisation of the tax relief.

The tax audit has to be finalised within one year.

Statute of limitations

A tax may not normally be assessed or additionally assessed more than five years (ten years when DTT treaty was applied, including transactions with foreign-related parties) after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obligated to pay the tax. If a tax inspection is undertaken within this five-year period, another five-year period commences from the end of the year in which the taxpayer was notified of this action.

Slovak Republic

If a taxpayer utilises a tax loss, a tax or additional tax cannot be assessed more than seven years after the end of the year in which the obligation to file a tax return in which a taxpayer reported the tax loss arose.

However, tax may be assessed, or additionally assessed, no later than ten years after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obligated to pay the tax.

Topics of focus for tax authorities

The tax authorities, within a tax inspection, generally focus on transfer pricing, VAT, limited tax deductibility of special types of costs (e.g. entertainment, promotion costs), and tax incentives.

Other issues

Business combinations

Two alternative tax treatments may be used for business combinations, including in-kind contributions to a company's share capital, mergers, and demergers.

Under the first alternative, the taxpayer should value assets for tax purposes using their current market values, and the revaluation difference must be reflected in the appropriate company's tax returns within seven years of the transaction.

Under the second alternative, the taxpayer should continue to use the original tax book values of the assets (carry-over basis), and revaluation difference is not taxable/tax deductible.

When selling a business, the purchaser must include goodwill or negative goodwill, acquired as part of the purchase, in its tax base within seven tax periods.

Adoption of International Financial Reporting Standards (IFRS)

Slovakia has adopted most of the principles of IFRS in its accounting law. However, there are still some differences between IFRS and Slovak accounting standards.

Obligation to prepare statutory financial statements according to IFRS

Financial institutions (banks, insurance companies, etc.) must prepare their statutory financial statements according to IFRS. In addition, a company that fulfils two or more of the following conditions, in two consecutive accounting periods, must prepare its statutory financial statements according to IFRS:

- The total value of assets is more than EUR 170 million.
- Net turnover exceeds EUR 170 million.
- The average number of employees in the individual accounting period exceeds 2,000.

An entity may decide to prepare its financial statements under IFRS if certain conditions are met.

If the Slovak taxpayer is obligated to prepare its financial statements under IFRS, the tax base is derived from either:

- the profit before tax under IFRS, adjusted for tax purposes using the 'IFRS Tax Bridge' issued by the Slovak Ministry of Finance, or
- the profit before tax under Slovak statutory accounting standards.

Tax information exchange agreements (TIEAs)

This table highlights countries with which Slovakia has entered into a TIEA.

- Albania
- Anguilla
- Argentina
- Aruba
- Azerbaijan
- Belize
- Bermuda
- British Virgin Islands
- Cameroon
- Cayman Islands
- Colombia
- Costa Rica
- Curacao
- Faroe Islands
- Ghana
- Gibraltar
- Greenland
- Guernsey
- Isle of Man
- Jersey
- Mauritius
- Montserrat
- New Zealand
- San Marino
- Seychelles
- St. Maarten
- Turks and Cacaos Island

International agreements

The Slovak/United States (US) Intergovernmental Agreement (IGA) entered into force during 2015. However, financial institutions in the Slovak Republic were allowed to register on the Foreign Account Tax Compliance Act (FATCA) registration website consistent with the treatment of having an IGA in effect even earlier.

FATCA was implemented into Slovak legislation with effect from 1 January 2016.

Significant developments

Corporate income tax (CIT)

The Tax Procedure Act has been amended to introduce the possibility for taxable entities to conclude an Advanced Pricing Agreement (APA) with the competent authority on the transfer prices set between related entities. Additionally, the possibility is foreseen that APA is concluded cross border with the competent tax authority in a foreign state. The amendments will come into force from 1 January 2017.

In that regard, in the beginning of 2016, Slovenia has also signed the Multilateral Competent Authority Agreement together with 31 countries, which implements country-by-country (CbC) reporting on transfer prices for certain multinational companies.

Furthermore, the Slovene CIT Act has been amended to prevent abuse on the taxation of the hybrid financial mechanism ('hybrid loans').

The Slovene government set the CIT rate at 17% for financial year 2016, and future years (most likely).

Value-added tax (VAT)

As of the beginning of 2016, Slovenia has implemented an obligation for taxable persons to report cash turnover only through specific electronic cash registers ('tax cash registers'), providing for traceability of any modifications made and thus enabling a proper audit trail.

Also from the beginning of 2016, the higher VAT rates (changed from 20% to 22% and from 8% to 9.5% in 2013) became permanent in nature, and the change was implemented into the Slovene VAT Act to enhance transparency. Previously, the increase was meant to be temporary in nature as a measure to overcome the financial crisis.

Moreover, the procedure of charging and paying import VAT is simplified. Import VAT will no longer have to be charged based on customs declaration at the time of the import (if certain conditions are met). Instead, taxpayers identified for VAT purposes in Slovenia will be able to reverse charge and pay it through VAT return at the end of the month (as it goes for inter-Community acquisitions). If the conditions for VAT deduction are fulfilled, the taxpayer will be able to claim VAT deduction at the same time. Taxpayers without a permanent establishment (PE) in Slovenia but identified for VAT purposes will have to appoint a tax representative for VAT purposes in order to be able to charge the import VAT according to the amended procedure.

The amendments to the procedure of charging and paying import VAT shall apply (i.e. the provisions will be able to be used) from 1 July 2016 onwards.

Taxes on corporate income

Slovenian tax residents are liable to pay CIT on their worldwide income. Slovenian tax non-residents are taxed only on income from sources in Slovenia, including income earned through PEs in Slovenia.

The CIT rate is a flat rate of 17%.

Non-profit taxpayers and charitable organisations, associations, foundations, etc. are exempt from CIT on their non-profit-making activities.

Investment funds, as well as pension funds, pension insurance companies, and venture capital companies, may be taxed at a rate of 0% if certain conditions are met.

Tonnage tax

A company may request to be subject to tonnage tax instead of CIT if it meets certain conditions (i.e. it operates in maritime transport in international shipping) and notifies the tax authorities in advance.

The tax base for tonnage tax is the sum of the tax bases for each of an entity's ships that are included in the tonnage tax regime. The tax base for a particular ship is calculated by multiplying the number of ship operating days by the daily tax base shown in the following table:

Net tonnage (NT)	EUR*/day for 100 net tonnes
For the first 1,000 tonnes	0.90
For the next 1,001 to 10,000 tonnes	0.67
For the next 10,001 to 25,000 tonnes	0.40
Above 25,001 tonnes	0.20

* euros

Local income taxes

There are no local taxes on income in Slovenia.

Corporate residence

A legal entity is considered to be a Slovenian tax resident if the entity has its statutory (registered) seat or place of effective management located in Slovenia. These conditions, however, do not exclude a society or any association of persons, including an association under civil or foreign law that does not have legal identity, from also being considered to be a Slovene tax resident.

Permanent establishment (PE)

The Slovene definition of a PE is generally in line with the definition set out in the Organisation for Economic Co-operation and Development (OECD) model tax treaty. Thus, it is a place of business in Slovenia in or through which the non-resident's activities are conducted in whole or in part. The following, in particular, are considered to constitute a PE:

- An office, branch, factory, workshop, mine, quarry, or other place where natural resources are obtained or exploited.
- A building site; construction, assembly, or installation site; or the supervision thereof, if the duration of the activities concerned exceeds 12 months.

A place of business is not considered a non-resident's PE if the non-resident:

Slovenia

- only uses the premises in question for storage, display, or delivery of goods belonging to oneself
- only maintains inventories of goods belonging to oneself for the purpose of storage, display, or delivery
- only maintains inventories of goods belonging to oneself for the purpose of processing by third parties
- only maintains the place of business in question for the purpose of purchasing goods or collecting information for oneself
- only maintains the place of business for the purpose of engaging in any other preparatory or auxiliary activity for oneself, or
- only maintains the place of business in question for the purpose of any combination of activities referred to above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)

A basic VAT rate of 22% applies to all taxable supplies.

A lower VAT rate of 9.5% generally applies to foodstuffs, live animals, seeds, plants, water supplies, medicines, medical equipment, transport of passengers, books, admission fees, royalties for writers and performers, certain works of art, certain residential properties, hotel accommodation, use of sport facilities, burial and cremation services, public hygiene services, minor repairs of bicycles, shoes and clothing, domestic care services, and hairdressing services.

Exempt supplies without credit entitlement include financial and insurance/reinsurance services, rent and lease of immovable goods (with exceptions), tax and court stamps, lottery services, trade of land, health and social services, etc. There are also other VAT-exempt transactions without a credit entitlement as well as exempt taxable supplies with a credit entitlement.

VAT grouping is not possible within Slovenia.

The threshold for VAT registration is EUR 50,000.

Customs duties

Goods imported from non-European Union (EU) countries are subject to import customs clearance, and goods being exported from the EU customs territory must be declared for export customs clearance. The person responsible for paying the customs debt is the declarant. The declarant is the person making the customs declaration in its own name or the person in whose name the customs declaration is made. The customs declaration should be made in the prescribed form and manner (in writing or by another action specified by law). Import or export duties are customs duties and other charges payable on the import or export of goods (excise duties, environmental tax, and motor vehicle tax).

For purposes of communication with the customs offices, each person has to be identified by an Economic Operator Registration and Identification (EORI) Number, which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

As of the beginning of 2016, import VAT will no longer have to be charged based on customs declaration at the time of the import, instead taxpayers will be able to pay it through the VAT return at the end of the month (if certain conditions are met). Accordingly, the importers will not be forced to finance their import VAT anymore, as they will be able to account for it and deduct it in the same VAT return.

Excise tax

Excise tax is charged on the release into free tax circulation or import of tobacco products, alcohol and alcoholic drinks, fuel and mineral oils, and electricity. The table below presents the valid rates of excise tax.

Product	Excise tax rate
Cigarettes	From EUR 68.8238 per 1,000 pieces; In case the retail price of a pack of 20 cigarettes amounts to less than EUR 3.51, the excise tax is EUR 106 per 1,000 pieces
Beer	EUR 12.10 per 1 vol. % alcohol in 1 hl
Alcohol drinks (except wine)	EUR 132 per 1 hl
Ethyl alcohol	EUR 1,320 per 100 vol. % alcohol in 1 hl
Unleaded petrol	EUR 503.80 per 1,000 l
Natural gas	EUR 0.0184 per m ³ for heating purposes and EUR 0.092 per m ³ for propelling purposes
Heating oil	EUR 20.8646 per 1,000 kg
Electricity	EUR 3.05 per 1 MWh

Property tax

Currently, there is no specific tax levied on immovable property in Slovenia. However, charge for the use of building land is levied on vacant and constructed building land in possession of legal persons and individuals. Charge is set by local communities for vacant building land based on the area of the building land planned for building, and for constructed building land based on the useful area of the residential house or business premises thereon.

Real estate transfer tax

Real estate transfer tax of 2% is charged on real estate transfers and financial leases of real estate, unless VAT has been charged on the transaction.

Stamp tax

There is no stamp duty in Slovenia.

Financial services tax

Slovenia levies tax on financial services provided by banks and other financial institutions. The tax rate is 8.5% and is applied to the fee of the financial service.

Environmental tax

Environmental tax is charged on carbon dioxide (CO₂) emissions, waste disposal, lubricating oils and fluids, used tyres, and used motor vehicles.

Motor vehicle tax

Motor vehicle tax applies to all vehicles that are registered for the first time in Slovenia. The taxpayer is the entity that imports the vehicle from EU or non-EU countries. The tax rate depends on fuel range, engine power, and emission of CO₂ and ranges from 0.5% to 31%.

In addition to the motor vehicle tax described above, the government imposes an additional tax on motor vehicles with engine displacement above 2,500 ccm that ranges from 0% to 16%, depending on the engine size.

Water vessel tax

The existing water vessel tax is imposed on:

- vessels exceeding five metres in length that are entered in vessel registers, with the exception of vessels under construction

Slovenia

- vessels exceeding five metres in length whose owners are residents of the Republic of Slovenia and that comply with the technical conditions required for entry into the vessel registers referred to in the first bullet but have not yet been entered into these registers, and
- vessels exceeding five metres in length whose owners are residents of the Republic of Slovenia and that comply with the technical conditions required for entry into the vessel registers referred to in the first bullet but have not been entered into these registers because they are registered abroad.

In addition to the water vessel tax described above, the government levies an additional tax on water vessels, depending on the length of the vessel:

Class of vessel length (in metres)		General part of tax liability (in EUR)	The liability per metre of length (in EUR)	The liability per kilowatt propulsion power (in EUR)
Above	To			
5	8	2.00	0.50	0.10
8	12	10.00	2.00	1.00
12		20.00	3.50	2.00

The tax liability decreases by 5% per each year of age of the vessel. The tax cannot, however, be lower than 50% of the tax liability calculated for a new vessel.

Insurance premium tax

Insurance premium tax is levied on insurance premiums at the rate of 8.5% and paid by insurance companies, unless the insurance lasts for at least ten years.

Payroll taxes

There are no payroll taxes other than social security contributions and withholding of personal income tax in Slovenia. *The tax tables applicable to individuals are provided in the Taxes on personal income section of Slovenia's Individual tax summary at www.pwc.com/taxsummaries.*

Social security contributions

Both employer and employee must make social security contributions. Contributions are withheld by the Slovene employer at the payment of income. The basis for calculation of the social security contributions is the gross amount of income. The types of contributions are as follows:

Type of contribution	Employee (%)	Employer (%)
Pension insurance	15.50	8.85
Health insurance	6.36	6.56
Unemployment	0.14	0.06
Injury at work	0	0.53
Maternity leave	0.10	0.10
Totals	22.10	16.10

Branch income

If a branch meets the conditions, as set out in the tax legislation and relevant double tax treaty (DTT), to be treated as a PE, then it will be liable to pay tax in Slovenia on profits that are attributable to the PE.

The profit that is attributed to a PE is determined broadly in line with OECD principles. Generally, the attributable profit is the profit that would be expected to be earned by the

PE if it were an independent taxpayer performing the same or similar activities and/or business.

A branch whose activities do not create a PE is not subject to CIT in Slovenia.

Income determination

Taxable profits are assessed in accordance with Slovenian Accounting Standards 2006 or International Financial Reporting Standards (IFRS) and modified for certain revenues and certain expenses, which are partly or wholly tax non-deductible.

Inventory valuation

Slovenian law allows the application of all the most commonly used inventory valuation methods, including the first in first out (FIFO), weighted average cost, and floating average prices methods.

Capital gains

Under certain circumstances, the gains made by a Slovenian taxpayer on the disposal of an equity shareholding are effectively 47.5% exempt from taxation. Similarly, 50% of a loss arising on the disposal of such a shareholding would not be deductible for CIT. This treatment applies to the disposal of shareholdings of at least 8% that have been held for at least six months and where the taxpayer disposing of the holding employed at least one person during the six-month holding period.

The above treatment is not available for the disposal of a shareholding of a company that is resident in a country that:

- is outside the European Union
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

Dividend income

Dividends and similar income received by a Slovenian taxpayer are generally 95% exempt from taxation as long as the distributor was subject to Slovenian CIT or to a comparable profits tax. The exceptions to this are where dividends represent untaxed reserves of the distributor or where the distributor is tax resident in a country that:

- is outside the European Union
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

Interest income

Interest and similar income received by a Slovenian taxpayer is included in the taxable base and can be reduced in the amount of a tax liability paid abroad. Interest between related parties needs to be calculated in accordance with the arm's-length principle.

Foreign income

Foreign income, except dividends, received by a Slovenian entity from foreign sources is included in taxable income for CIT purposes in the same tax year as it arises unless the applicable DTT provides for an exemption.

Deductions

In general, business expenses that are necessary to generate taxable revenues are fully tax deductible.

Depreciation and amortisation

Depreciation of tangible fixed assets, amortisation of intangible assets, and depreciation of investment property are recognised as expenditures in line with the accounting treatment, up to a maximum of the amount calculated using the straight-line depreciation method and the maximum tax depreciation rates listed below. Any accounting depreciation in excess of these rates is not tax deductible in the period concerned, but may be deductible in subsequent tax periods until the asset is fully depreciated or disposed of.

The maximum annual depreciation rates are as follows:

Depreciation category	Types of assets	Annual depreciation rate (%)
1	Buildings, including investment property	3
2	Parts of buildings, including investment property	6
3	Equipment, vehicles, and machinery	20
4	Parts of equipment, and equipment for research activities	33.3
5	Computer equipment, hardware, and software	50
6	Crops lasting several years	10
7	Breeding animals	20
8	Other fixed assets	10

Goodwill

In general, if goodwill is impaired for accounting purposes, then the impairment cost may be treated as tax deductible. The amount that may be treated as tax deductible in any one tax period is limited to 20% of the initial value of the goodwill.

Start-up expenses

In accordance with Slovene legislation, costs that occur prior to the entry of a legal entity into court register may not be treated as tax deductible. Such a principle arises from a common legal principle whereby an entity may be subject to rights and obligations only after its establishment date. The date of entry into the court register is deemed to be the date of the establishment.

Related-party interest

Companies may deduct interest expense on loans from their owners or other associated parties up to a maximum of the amount calculated by using the prescribed interest rate published by the Ministry of Finance. Taxpayers must increase taxable profits by the amount of any excess interest expense, unless they can prove that they could have received the loan on comparable terms from an unrelated party.

Provisions

Certain provisions are only 50% tax deductible when accrued, with the remaining 50% being treated as tax deductible when the provision is utilised. The provisions that are subject to this treatment are provisions for warranties granted when selling products or providing services, reorganisations/redundancies, anticipated losses from onerous contracts, pensions, long-service bonuses, and severance payments on retirement.

Bad debt

Bad debt provisions are only tax deductible if the amount does not exceed the lower of:

- the arithmetic mean of the bad debts written-off in the past three tax periods, under certain conditions specified in the tax law, and
- the amount corresponding to 1% of taxable revenues of the tax period.

In order to take advantage of this deduction, a company must be able to calculate amounts for both tests and then take the lower of the two amounts so calculated. If the company is

not able to determine the amount for either, the cost of the bad debt provision is not tax deductible until the provision is utilised.

Costs of bad debts are tax deductible when the debt is finally written-off, provided there is a finalised court procedure, the creditor can demonstrate that it would cost more to pursue the debtor than the debt is worth, or the creditor can demonstrate that it has done everything required by good business practice to try to recover the debt.

Charitable contributions

A taxpayer may claim a reduction of its taxable profits for donations made for humanitarian, disabled, charitable, scientific, educational, medical, sports, cultural, ecological, and religious purposes to residents of Slovenia or of EU or European Economic Area (EEA) member states, up to 0.3% of the taxable person's taxable revenues. An additional allowance of 0.2% of the taxpayers' taxable revenues is available for payments made for cultural purposes and to voluntary organisations that work for the public interest to protect the public from natural and other disasters.

A taxpayer may decrease its taxable base for payments made to political parties and representative trade unions, up to an amount equal to three times the average monthly salary per employee of the taxpayer.

Compensation

Salaries and other payments relating to employment (e.g. wage compensation, holiday allowances, employer's social security contributions, long-service awards, severance benefits paid upon retirement, solidarity assistance, and reimbursement of business related expenses) are generally fully tax deductible.

The costs of benefits in kind are also tax deductible if such benefits are taxed for the individual under the Personal Income Tax Act.

Pension allowances

Under certain conditions, a tax-deductible allowance for voluntary supplementary pension insurance may apply, of up to 24% of compulsory contributions for pension and disability insurance for insured employees, but may not exceed EUR 2,390 annually per employee.

Fines and penalties

Costs relating to compulsory collection of taxes and other levies are, in accordance with Slovene legislation, not tax deductible.

Taxes

Taxes paid by a shareholder as a natural person and VAT that was not deducted as an input VAT, even though there was a right to deduct, are not tax deductible. In addition, interests on late payment of taxes are not tax deductible.

Other significant items

The following expenses are considered unnecessary for the generation of taxable revenues and are not deductible for tax purposes:

- Expenses that are not directly necessary for performing business activities or are not incurred as a consequence of a business activity.
- Expenses of a private character.
- Expenses that do not correspond to standard business practice.

Some of the most common non-deductible expenses include:

- Penalties and the cost of bribes.
- Input VAT that could have been reclaimed in accordance with the VAT Act.

Slovenia

- Entertainment costs, which are only 50% tax deductible.
- Costs relating to the supervisory board, which are only 50% tax deductible.
- Legal and other costs of incorporation, which may be deductible for the parent company but not for the entity being incorporated.

Net operating losses

The use of retained tax losses is limited to a maximum of 50% of the actual tax base. Despite this limitation, tax losses may still be carried forward to subsequent years without a limitation, but loss carrybacks are not permitted. Loss relief may not exceed the amount of current taxable income. Generally, losses that are generated in multiple tax years are absorbed chronologically. The right to carry losses forward may be forfeited if the ownership of the capital or voting power of the taxpayer claiming the loss carryforward changes by more than 50% within the tax period and the taxpayer either has not performed business activities for two years prior to the change of ownership or substantially changes its business activity two years prior to or after the change in ownership.

Treatment of tax losses mentioned in the preceding paragraph does not apply for those losses that are generated in the year of the change of ownership or prior tax periods.

Payment to foreign affiliates

Payments to foreign affiliates are normally subject to withholding tax (WHT) if there is no right to apply exemptions in accordance with Slovenian legislation or DTT. Payments similar to dividends, including disguised distribution of profit, are not tax deductible. Any other payments to foreign affiliates are tax deductible if they are made in accordance with the arm's-length principle.

Group taxation

Group tax returns were abolished with the introduction of the CIT Act on 1 January 2007.

Transfer pricing

Prices between a Slovenian entity and its related parties must be set, for tax purposes, at fair market value using the arm's-length principle. Broadly speaking, taxpayers are related by direct, indirect, or common shareholdings of over 25%; through a participation in management; or by control through other means, including through contractual terms.

For transactions between two related Slovenian tax residents, provided neither is in an 'advantaged' position (advantaged usually means having unutilised tax losses), there is no actual requirement for the companies to adjust their tax returns to reflect an arm's-length price.

Taxable persons must prepare transfer pricing documentation. The Slovenian rules regarding such documentation follow the EU Code of Conduct on transfer pricing documentation for associated enterprises in the EU (EU TPD).

Thin capitalisation

Interest payments on loans granted, or guaranteed, by a related party (a party that directly or indirectly owns at least 25% of the shares or voting rights in the taxpayer) are not tax deductible to the extent that the loan amount exceeds the thin capitalisation threshold specified in law. This does not apply to loan recipients who are banks or insurance companies.

Sister entities (i.e. entities with the same owner) also fall under the definition of the above-described rules.

Generally speaking, the thin capitalisation threshold is exceeded if the debt-to-equity ratio exceeds 4:1.

Controlled foreign companies (CFCs)

There are no specific provisions in Slovenia regarding CFCs; however, there are general anti-abuse provisions in place.

Tax credits and incentives

Foreign tax credit

Tax paid abroad can be credited against tax liability in Slovenia. The amount of tax that can be credited is the amount of final and actually paid tax. If there is a DTT made between countries in question, the amount of tax that can be credited is the amount calculated at the rate determined in the DTT. A taxpayer needs to provide proof of the amount of foreign tax, the basis for calculation of the tax, and the amount of the tax paid.

Investment allowances

A tax allowance for investment in equipment and intangible assets is available for investments made after 1 January 2008. The tax allowance is limited to 40% of the value of the assets (also intangibles) invested into.

Research and development (R&D) allowances

A 100% investment allowance is granted for investments in R&D within the tax period, regardless of the location of establishment of the company within Slovenia. Such an investment tax allowance may be obtained for expenditures on:

- internal R&D activities within the company and
- the purchase of R&D equipment from related or unrelated parties or from a private research institution.

Allowances for employing certain individuals

A taxpayer that employs trainees or students to undertake practical work may reduce its taxable profits by an additional 20% of the average monthly payment paid to such persons, for every month the person carries out the work.

A taxpayer that employs disabled persons may decrease its taxable profits by an additional 50% of the salary paid to such persons (in addition to the deduction for their actual salary cost). A taxpayer that employs a severely disabled person or a person with a combination of total hearing loss and speech impairment may reduce its taxable base by an additional 70% of the salary paid to such a person (in addition to the deduction for their actual salary cost).

Tax relief for investments in the Pomurje region

Entities based in the Pomurje region of Slovenia may claim additional employment incentives and additional tax relief for investments. These extra benefits are available from 2010 to 2017. As a result, provided certain conditions are met, entities with their seat in Pomurje are entitled to a 70% tax allowance for investments in equipment and intangible assets as well as to certain employment allowances.

Tax relief for employment of hard-to-place workers

A taxpayer who employs a hard-to-place worker may be able to benefit from a tax allowance for both CIT and tax on activity. A hard-to-place worker is a person younger than 26 or older than 55 who has been registered as unemployed for at least six months and who has not been employed by the taxpayer or a related party in the past 24 months. The tax allowance equates to 45% of the salary paid to the person during the first 24 months of their employment, up to the amount of the tax base.

Slovenia

As of the beginning of 2016 and until the end of 2017, an additional tax relief is available for taxpayers employing a person older than 55 who has been registered as unemployed for at least six months prior to employment. A taxpayer will be exempt from paying all compulsory social security contributions (16.10%) for the first two years after employing such a person in case the employment contract is concluded during the above mentioned period.

Withholding taxes

In Slovenia, tax must be calculated and withheld on the payments made by residents and non-residents on Slovenian-sourced income to recipients outside Slovenia.

Payments to which the WHT rules apply include payments for dividends, interest, copyrights, patents, licences, leases on real estate situated in Slovenia, services of performing artists, and services charged from low-tax jurisdictions.

The WHT rate is 15%.

If a DTT exists, the WHT rate may be reduced in line with the provisions of the treaty. Similarly for payments of interest, royalties, and dividends within Europe, the Interest and Royalties Directive and the Parent Subsidiary Directive, respectively, may also reduce this WHT rate to zero.

Furthermore, WHT is not deducted on dividends paid to a parent company in another EU member state if those dividends are subject to an exemption from tax in the hands of the recipient, provided certain conditions are met.

Subject to certain conditions, tax is not required to be withheld on interest on non-exchangeable debt securities issued outside Slovenia by a Slovenian tax resident corporation through a public placement on an international clearing system (i.e. Euroclear).

WHT is applicable only for explicitly determined types of services (i.e. consulting, marketing, staffing, administration, information, and legal services), provided they were made to countries with an average CIT rate not exceeding 12.5%, where such a country was also stated on a separate list published by the Ministry of Finance.

Treaties not yet in force (4)

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%)
Egypt	8/13	13	15

Notes

- Under certain treaties, the WHT rate depends on whether, and to what extent, the recipient participates in the capital of the distributor. Generally, if the recipient holds a participation of more than 25% in

the distributing company, the dividends are subject to a lower 5% WHT rate. The higher WHT rate is, however, normally due when the participation is less than 25%.

2. Some DTTs include specific provisions whereby interest payments are subject to a 0% WHT rate if certain conditions are met.
3. The rates shown apply from 1 January 2011, when the most recent treaty with Italy came into effect.
4. Ratified international treaties that are not yet in force and are not used in Slovenia.
5. 5% rate if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividend; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which by virtue of the law of the state in which the payer is a resident are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% rate applicable in all other cases.
6. 5% rate applicable to the gross amount of: (i) royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work (but not including cinematograph films) and (ii) royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment, 10% rate applicable in all other cases.
7. 5% rate applicable to royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films or films or tapes used for radio or television broadcasting; 10% rate applicable to royalties for the use of, or the right to use, any patent, trade mark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
8. 10% rate applicable to royalties for the use of, or the right to use, any copyright of literary or artistic work including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment; 15% rate applicable to royalties in all other cases.
9. 5% rate applicable to copyright, as defined by the Copyright and Related Rights Act; 10% rate applicable to other property rights.
10. 10% rate applicable to the gross amount of interest if received by a financial institution (including an insurance company); 15% rate applicable to the gross amount of interest in all other situations.

Tax administration

Taxable period

The tax period should be the calendar year. However, a tax period may differ from the calendar year but may not exceed a period of 12 months. In this case, the tax authorities must be informed about the chosen tax period, and the taxable entity will not be allowed to change its tax period for the following three years.

Tax returns

A tax return must be submitted to the tax authorities by the end of the third month following the end of the tax year.

Payment of tax

CIT is paid in advance in monthly instalments (if the amount of prepayment exceeds EUR 400 per month) or in quarterly instalments (if the amount of prepayment is less than EUR 400 per month) determined on the basis of the previous year's assessment.

The final CIT payment must be made within 30 days of the tax return submission.

Tax audit process

Slovene legislation does not define an audit cycle. However, we understand that the Slovene tax administration has its own criteria for how to determine audit targets, which is in accordance with their annual tax plan.

Statute of limitations

Under Slovene legislation, a tax inspection may be initiated within five years from the date when a tax return was due for submission to the tax authorities. However, the five year period runs following each interrupting act (generally, certain actions by the Tax Office or the taxpayer within the tax period may be considered as interrupting acts), but may not surpass a maximum of ten years counting from the date when the tax return is due. A concluded tax inspection will foreclose any further tax authorities' inspection only for the period and the items that were subject of the concluded tax inspection. Any issue not examined remains open for a future tax inspection. The right of the tax authorities to

assess and collect tax permanently expires after ten years counted from the date when the tax return is due.

Topics of focus for tax authorities

Recently, we have noticed that tax authorities focus on appropriateness of transfer pricing for multinational companies.

Fiscal verification of invoices

The Act on Fiscal Verification of Invoices introduces new certified cash registers for cash transactions as of 2 January 2016. According to this new regulation, all legal and natural persons that perform cash transactions and are obligated to keep books and records must now use certified tax registers. No exceptions are envisaged, so electronic confirmation of invoices applies to anyone that is obligated to use receipts in accordance with the VAT Act. Certified cash registers will be connected to the central information system of the financial authority via the internet, so processed invoices will be verified and saved in real time.

Other issues

State aid

Slovene law does not regulate state aid specifically, but as the EU Treaty, relevant EU Regulations and Directives, and EU Court case law are of direct application in Slovenia, Slovene courts follow the same policy as reflected in the noted documents and case law. Thus, state aid in Slovenia is defined as an advantage in any form whatsoever conferred on a selective basis to undertakings by national public authorities and causing distortion of the competition.

Base erosion and profit shifting (BEPS)

The transfer pricing landscape of Slovenia remains relatively unchanged, but is nonetheless dependent on the updated or added guidance published by the OECD as a result of the BEPS action plan. It can be anticipated that the changes due to the BEPS project will also have an appropriate impact on the transfer pricing environment, legislation, and practices in Slovenia.

United States (US) Foreign Account Tax Compliance Act (FATCA)

On 2 June 2014, the Republic of Slovenia concluded an Agreement to Improve International Tax Compliance and to implement FATCA (the Agreement) with the United States that entered into force on 1 July 2014, which further defines the obligations of Slovenian financial institutions and the Financial Administration of the Republic of Slovenia related to FATCA implementation. The Agreement supplements the existing rules on cooperation between the Republic of Slovenia and the United States in the field of avoidance of double taxation and exchange of information and will contribute to the reduction of administrative burden to Slovenian financial institutions.

The conclusion of the Agreement, which is based on the Model 1 Intergovernmental Agreement (IGA), ensures the implementation of FATCA provisions on the basis of reporting and exchange of information in accordance with the convention for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income and capital. According to the Agreement, Slovenian financial institutions are required to report information as determined in the Agreement to the Financial Administration of the Republic of Slovenia, which reports the information to the US Internal Revenue Service (IRS). Reciprocally, Slovenia is receiving information from the US IRS about the funds of Slovenian taxpayers in the United States.

Significant developments

After the switch from the source-based taxation to the worldwide taxation of South African (SA) residents in 2000, and the introduction of capital gains tax in 2001, the SA tax system has not undergone fundamental changes. Smaller reforms, however, are on-going. The most significant recent changes are:

- Amendments extending prescription periods in certain circumstances.
- Withdrawal of a foreign tax rebate (*s6quin*) in respect of SA-source services income and a slight extension of the deduction rule (*s6quat*) as partial compensation.
- The proposed introduction of a 15% withholding tax (WHT) on cross-border service fees has been withdrawn.
- The inclusion rate for capital gain tax for companies has increased from 66.6% to 80%, raising the effective capital gain tax rate from 18.6% to 22.4%, for years of assessment beginning on or after 1 March 2016.

Taxes on corporate income

An SA-resident company is subject to corporate income tax (CIT) on its worldwide income, irrespective of source. Non-residents are taxable on SA-source income.

In South Africa, the CIT rate applicable for corporate income of both resident and non-resident companies for tax years ending between 1 April 2016 and 31 March 2017 is a flat 28%.

Close corporations, which are essentially a simplified form of company, are taxed at the same rate as companies and are subject to the same taxation rules.

Small business corporations (i.e. companies with only natural persons as members/owners and with gross income of not more than 20 million South African rand [ZAR]) are taxed at 0% on the first ZAR 75,000 of taxable income earned, 7% on the amount above ZAR 75,000 but not exceeding ZAR 365,000, 21% on the amount above ZAR 365,000 but not exceeding ZAR 550,000, and 28% on the amount exceeding ZAR 550,000.

Special CIT rates apply in certain industries, such as mining and long-term insurance (*see below*).

Alternative turnover-based tax for very small companies

To reduce the compliance costs for very small companies, a turnover-based presumptive tax is available. Companies with a turnover of less than ZAR 1 million per year can elect to pay this tax instead of normal CIT, at a rate ranging from 0% to 3%, depending on the turnover.

Dividends tax

Dividends tax is imposed at 15% on dividends declared and paid by resident companies and by non-resident companies in respect of shares listed on the Johannesburg Stock Exchange (JSE) paid to SA residents.

Dividends are tax exempt if the beneficial owner of the dividend is an SA resident company, SA retirement fund, or other prescribed exempt person.

The tax is to be withheld by companies paying the taxable dividends or by regulated intermediaries in the case of dividends paid through a regulated intermediary. In the case of *in specie* dividends, the company declaring the *in specie* dividend is liable for the dividends tax and not the beneficial owner of the dividends.

Exemptions from dividends tax and treaty-imposed reduced rates only apply if the beneficial owner of the dividend has made the required declaration to the paying company or regulated intermediary.

CIT for mining companies

Special rates of normal tax, based on a standard formula, are laid down for companies mining for gold. Companies mining for other minerals are subjected to the same 28% rate of normal tax applying to ordinary companies.

CIT for long-term insurance companies

Life insurance companies are obligated to follow the 'four-funds approach', with policies divided into four funds, depending on the nature of the beneficiary. Each fund is then allocated assets according to the risk carried by the fund. Funds are treated as separate taxpayers and taxed at four separate rates. These rates are 30% for individual policyholder funds, 0% for untaxed policyholder funds, 28% for company policyholder funds, and 28% for corporate funds (the company itself).

With effect from January 2016, a fifth fund was introduced, the Risk Policy Fund, to cater for changes to the taxation of the risk business of long-term insurance companies. The Risk Policy Fund is also taxed at a rate of 28%.

Local income taxes

No local government taxes on income apply to either SA-resident or non-resident companies.

Corporate residence

A company is resident in South Africa if it is incorporated, established, or formed in South Africa or has its place of effective management in South Africa. However, a company that is deemed to be exclusively resident in another country in terms of a double taxation agreement (DTA) is excluded from SA residency.

In terms of a recent Interpretation Note issued by the South African Revenue Service (SARS), the place of effective management is regarded as the place where key management and commercial decisions that are necessary for the conduct of its business as a whole are, in substance, made. This approach is consistent with internationally accepted principles.

Permanent establishment (PE)

South Africa does not, as a general rule, tax non-residents on the basis of having a PE in South Africa. Rather, non-residents are subject to income tax in South Africa on income derived from a South African source. The primary exception to this rule is in relation to capital gains, where non-residents are subject to tax on assets attributable to a PE in

South Africa

South Africa. A PE is defined by reference to the definition thereof in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Other taxes

Value-added tax (VAT)

VAT is an indirect tax that is largely directed at the domestic consumption of goods and services and at goods imported into South Africa. The tax is designed to be paid mainly by the ultimate consumer or purchaser in South Africa. It is levied at two rates, namely a standard 14% rate and a zero rate (0%).

Very few business transactions carried out in South Africa are not subject to VAT. The tax is collected by businesses that are registered as vendors with the SARS on all taxable supplies throughout the production and distribution chain. Sales or supplies by non-vendors are not subject to VAT.

VAT registration and administration

All suppliers of goods and services having an annual turnover exceeding ZAR 1 million are obligated to register as VAT vendors and to charge output VAT. Other vendors may elect to register as VAT vendors, provided their annual turnover exceeds ZAR 50,000. Two exceptions apply. Firstly, non-resident suppliers of electronic services are obligated to register after aggregate supplies of ZAR 50,000 have been made. Secondly, persons likely to make taxable supplies only after a period of time may register if the activities are of a nature set out in regulations. If they do not register, they are prohibited from charging VAT on goods or services they supply and claiming an input tax (rebate of VAT paid) on goods and services that they acquire.

Under the VAT system, vendors normally pay VAT on expenses (input tax) and charge VAT on supplies made (output tax). This mechanism, therefore, ensures that only the so-called 'added-value' is taxed. Due to VAT being a self-assessment system, the output tax collected may be reduced by input tax paid. Thereafter, the net amount is payable to, or refundable by, the SARS. The self-assessment returns are due regularly within prescribed periods (tax periods).

Taxable supplies

Standard rated and zero-rated supplies are known as taxable supplies. Other supplies are known as exempt and non-supplies.

Goods and services

For a liability for VAT to exist, there must be a supply or importation of goods or services. Goods are corporeal movable things, fixed property, and real rights in such things and property. The meaning of 'services' is very broad and includes the granting, assignment, cession, or surrender of any right or the making available of any facility or advantage.

Electronic services

Non-resident suppliers of electronic services are compelled to register for VAT on the payments basis and account for VAT on supplies of electronic services to SA residents.

Imports

Services imported by a vendor and utilised or consumed by the vendor for the making of taxable supplies are not subject to VAT. In addition, the VAT Act has a schedule that lists goods that are exempt from VAT on importation, whether by a vendor or an unregistered person.

Zero-rated supplies

The VAT Act contains a list of the supplies of goods or services that are taxed at the zero rate. Most of the items refer to exports and international transport, but other specified

goods utilised for farming purposes, the sale of an enterprise as a going concern, certain basic foodstuffs, fuel subject to the fuel levy, and deemed supplies by welfare organisations are also zero-rated.

A zero-rated supply made by a vendor is subject to VAT but at a rate of 0%. Under a zero-rated supply, a vendor does not charge VAT on the consideration for the supply and obtains a refund or credit for the VAT paid on taxable supplies utilised in the making of the zero-rated supplies.

Exempt supplies

In addition to zero-rated supplies, the VAT Act contains a list of the supplies of goods or services that are exempt from VAT. While all fee-based financial services are subject to VAT, the charging of interest is exempt. Other exempt supplies include residential rentals, non-international passenger transport by road or rail, and educational services.

Under exempt supplies by vendors, the vendors do not charge VAT on the supply, and they are not entitled to a deduction or credit for the VAT paid by them on goods and services supplied to them for the making of the exempt supply. Accordingly, vendors treat the VAT paid by them, and for which they do not obtain a deduction or credit, as another cost and recover it in the consideration they charge for the making of the exempt supply.

Customs duties

Customs duties are charged on importation of goods into South Africa at rates ranging between 3% and 45%. The import duties may also include anti-dumping and countervailing duties of up to 150%. No customs duties are charged on trade between South Africa and Botswana, Lesotho, Namibia, and Swaziland, as these five countries constitute the Southern African Customs Union.

Excise duties

Excise duty is levied on certain locally manufactured goods as well as their imported equivalents. A specific duty at a pre-determined amount is levied on tobacco and liquor, and an *ad valorem* duty (calculated as a percentage of price) on certain luxury goods and automobiles. Relief from excise duty is available for exported products and for certain products produced in the course of specified farming, forestry, and (limited) manufacturing activities.

Property taxes

Local municipalities levy rates on land. These rates are based on a percentage of the municipal valuation of land and improvements and vary from municipality to municipality. Generally, a higher rate is levied on properties zoned for business use.

Transfer duty

Transfer duty levied on the sale of immovable property is payable by the person acquiring the property within six months from the date of acquisition at the following rates:

Purchase price (ZAR)	Transfer duty rate
Not exceeding 750,000	0%
750,001 to 1,250,000	3% on value above 750,000
1,250,001 to 1,750,000	15,000 plus 6% on value above 1,250,000
1,750,001 to 2,250,000	45,000 plus 8% on value above 1,750,000
2,250,001 to 10,000,000	85,000 plus 11% on value above 2,250,000
Exceeding 10,000,000	937,500 plus 13% on value above 10,000,000

Transfers of immovable property subject to VAT are exempt from transfer duty.

South Africa

Securities transfer tax (STT)

STT is levied at a rate of 0.25% of the taxable amount in respect of the transfer of a security. The taxable amount is usually the consideration for which the security is purchased or the market value of the security if the consideration declared is less than the market value or if no consideration was paid. STT is payable by the company that issued the securities in question. However, the company can recover the tax from the person acquiring the shares. Slightly different rules apply in the case of listed securities.

Payroll taxes

Employers are liable to withhold pay-as-you-earn (PAYE) on behalf of their employees. PAYE is payable to SARS on a monthly basis, calculated on the remuneration paid to an employee. The rates vary depending on the employee's remuneration.

Skills Development Levy (SDL)

SDL is a compulsory levy to fund education and training. It is payable by an employer and cannot be deducted from the remuneration payable to an employee. Small employers with an annual payroll of less than ZAR 500,000 are exempt from the levy. SDL is levied at the rate of 1% of payroll. It is payable monthly, together with income tax that the employer has withheld on its employees' salaries.

Unemployment Insurance Fund (UIF) contributions

Employers are required to contribute on behalf of their employees on a personalised basis to the UIF. The rate of contributions is 1% of gross remuneration payable to an employee; however, the monthly cap of ZAR 148.72 applies. Another 1%, subject to the same cap, is payable by the employee and withheld by the employer.

Compensation for Occupational Injuries and Diseases Act (COIDA) fund

Employers are liable for making annual contributions to the COIDA fund. COIDA contributions are a payroll cost that cannot be deducted from the employee's salary, with a maximum salary cap of ZAR 355,752 *per annum*. The rates vary depending on the employer's industry.

Donations tax

Disposals of assets below an adequate consideration are a deemed donation and subject to donations tax. Donations tax is payable by resident companies at a flat rate of 20% on donations made. An annual exemption of ZAR 10,000 is available.

Public companies, comprised of mostly listed companies, are exempt from donations tax. An exemption is also available for donations made to certain charities and other non-profit organisations.

Vehicle emissions tax

An environmental levy is levied on new passenger motor vehicles based on grams per kilometre of CO₂ emissions of the vehicle over a stated level. From 1 April 2016, the levy is ZAR 100 to ZAR 140 per gram per kilometre over the CO₂ threshold level.

Fuel levy

A fuel levy is included in the price of petroleum fuel sold. The general fuel levy for 2016/17 is 285 cents per litre of petrol and 270 cents per litre of diesel. A refund of the diesel fuel levy may be claimed in certain industries, such as agriculture, fishing, and mining.

Electricity levy

To support energy efficiency, the government has implemented a levy on electricity generated from non-renewable sources at 3.5 cents/kWh. The levy is paid at source by the electricity producer and recovered in the price to the consumer.

Tyre levy

A tyre levy will be implemented at a rate of ZAR 2.30/kg, effective 1 October 2016. The levy will replace the current fee arrangements for tyres, as regulated by the Department of Environmental Affairs.

Sugar tax

A tax on sugar-sweetened beverages is proposed to be introduced from 1 April 2017. The proposed tax rate is yet to be announced.

Air passenger tax

Passengers departing on international flights must pay air passenger tax at the rate of ZAR 100 on flights to Botswana, Lesotho, Namibia, and Swaziland, and ZAR 190 on other flights. The tax is added to the price of the ticket.

Branch income

SA branches of foreign companies are not considered to be separate legal entities for tax purposes, and no tax is withheld on transfers of profits to the head office. Branches of foreign companies are taxed at a rate of 28% and are not liable for dividends tax or any branch profits repatriation tax.

Note that a branch must register as a taxpayer and submit tax returns. Separate financial statements must be drawn up for the SA branch. For all practical purposes, the SARS will treat the branch as a separate entity. For example, inter-branch cost recoveries levied by the head office incurred in the production of SA income normally will be allowed as a deduction by the branch, although this treatment is not extended to interest on inter-branch loans.

In terms of DTAs, the taxation of branches is limited to cases where the branch constitutes a PE.

Income determination**Inventory valuation**

Inventories generally are stated at the lower of cost or net realisable value. Write-downs of inventory for slow-moving and obsolete items must be justified, and a general policy on a percentage basis is not permitted. Last in first out (LIFO) is not accepted for tax purposes.

Capital gains

Although the capital gains tax forms part of income tax, the two taxes are not fully integrated. Gains realised by companies are taxed at the normal CIT rate. Previously, only 66.6% of gains were included in taxable income. Effective for years of assessment beginning on or after 1 March 2016, however, the inclusion rate increases from 66.6% to 80%, raising the effective capital gain tax rate from 18.6% to 22.4%.

Dividend income

Dividends are generally taxed in the hands of the beneficial owner at a rate of 15% (see *Dividends tax in the Taxes on corporate income section*). The amount is withheld by the company declaring the dividend on behalf of the shareholder receiving it. *In specie* dividends are subject to tax in the hands of the company and not the beneficial owner.

Foreign dividends received by or accrued to an SA-resident taxpayer are included in income based on a formula and taxed at the normal CIT rate, which results in an effective tax rate of 15%. Qualifying foreign dividends are also generally not subject to tax where they are received by resident shareholders holding in excess of 10% of

South Africa

the equity shares and voting rights of the company declaring the dividend. Dividends received by residents holding less than 10% of such shares will generally be taxable in South Africa, subject to a tax credit for foreign taxes payable by the recipient shareholder.

Stock dividends

Stock dividends (capitalisation issues of shares) are not subject to CIT or dividends tax.

Interest income

Interest income for resident companies is taxed at the normal CIT rate. Interest received by non-resident companies is only subject to CIT if it is from a source in South Africa and the company carried on business through a PE in South Africa during the tax year.

A 15% WHT on interest applies to interest paid on certain debt instruments to non-resident companies.

Foreign income

Foreign income of an SA-resident company is subject to tax in South Africa on an earliest of receipt or accrual basis. However, income that may not be remitted to South Africa in terms of the laws of the country where the amount arose is deferred until the income can be remitted. Double taxation may be avoided under certain DTAs or by way of unilateral credit or deduction for foreign tax payable on foreign income (*see Foreign tax credit in the Tax credits and incentives section*).

Deductions

Depreciation and depletion

A depreciation (wear and tear) allowance may be deducted on movable assets used for the purpose of trade. There are no statutory provisions relating to rates of wear and tear, but the SARS has published a table of periods over which the assets may be written off. The rates of wear and tear, based on the cash cost, are calculated either according to the straight-line or diminishing-balance method.

New and unused machinery used in a process of manufacture or in a similar process is depreciable at the rate of 40% in the first year of use and 20% in the three following years. If the machinery is not new and unused, an allowance of 20% per year over five years is available.

An accelerated depreciation allowance (50% in the first year of use, 30% in the second, and 20% in the third year) applies to the machinery and articles used in farming, production of biodiesel or bioethanol, and production of energy from certain renewable sources.

Specific allowances are also provided for pipelines, transmission lines, railway lines, rolling stock, airport property, ports, ships, mining operations, and other qualifying industrial assets.

Buildings and other permanent structures may not be depreciated, apart from an annual allowance for each of the following:

- Buildings used in a process of manufacture or a process similar to a process of manufacture: For buildings erected before 1 January 1989, a 2% rate applies per year. For buildings erected after 1 January 1989, a 5% rate applies.
- Hotel buildings: For buildings built prior to 4 June 1988, a 2% rate applies per year. For hotel buildings erected after 4 June 1988, a 5% rate applies. Improvements within the existing building framework that commenced on or after 17 March 1993 are depreciated at the rate of 20%.

- **Agricultural cooperative storage buildings:** For buildings built prior to 1 January 1989, a 2% rate applies per year. For buildings erected on or after 1 January 1989, a 5% rate applies.
- **Housing projects of not less than five units:** Housing projects of not less than five units of residential accommodation, which consist of more than one room and the erection of which commenced on or after 1 April 1982 and before 21 October 2008, are subject to a 2% rate of depreciation. After 21 October 2008, an allowance of 5% is available on this type of property. The 5% depreciation rate is available to the taxpayer provided that the unit is used by the taxpayer solely for trade purposes, the unit is situated in South Africa, and the taxpayer owns at least five units in South Africa used for the purposes of trade. An additional allowance is available for a low-cost residential unit. Additionally, from 21 October 2008, taxpayers are granted relief for the transfer of ownership on a contract for deed basis of employer provided low-cost residential units to employees.
- **Buildings in urban development zones:** Improvements to an existing building in an urban development zone, where the existing structural or exterior framework is preserved and brought into before 31 March 2014, qualify for an accelerated allowance of 20% per year. Buildings that are erected, extended, or added to in an urban development zone on or after 21 October 2008 and which are not covered by the first mentioned allowance qualify for a 20% allowance in the first year and an 8% allowance in the following ten years. As of 21 October 2008, new and unused low-income residential units located in urban development zone demarcations are subject to an additional annual depreciation allowance. The rate is 25% in the first year, 13% in the succeeding five years, and 10% in the year following the last year. Improvements are subject to a depreciation allowance of 25% over a period of four years.
- **Commercial buildings:** The cost to the taxpayer of any new and unused building owned by the taxpayer, or any new and unused improvement to any building owned by the taxpayer, if that building or improvement wholly or mainly is used by the taxpayer for trade purposes, other than the provision of residential accommodation, is subject to a 5% rate of depreciation. This allowance is applicable to any building or improvement contracted for on or after 1 April 2007 and the construction of which commenced on or after 1 April 2007.

An allowance for assets disposed of or scrapped during a year of assessment is determined by reference to the cost less allowances already granted and the proceeds on disposal (if any). Recoupments of allowances granted are taxable where disposal proceeds exceed the tax basis at the time of sale. Such recoupments cannot exceed the cost of the asset. Proceeds above cost will be taxed as a capital gain.

Book depreciation does not need to be consistent with tax depreciation.

No cost or percentage depletion is available for natural resources.

Goodwill

The sale and purchase of goodwill is generally a transaction on capital account, and the person paying for the goodwill will usually be unable to claim a deduction. No capital allowances are available for goodwill.

Start-up expenses

Special relief is provided for start-up (or pre-trade) expenditure to allow for a deduction in the year that trade commences. The expenses are only deductible if they would have been deductible had they been incurred after the commencement of trade. These expenses and any loss they create are ring-fenced and may only be deducted against income from the trade to which the start-up costs relate.

South Africa

Interest expenses

Generally, interest expenditure incurred in the production of non-exempt income and for the purposes of trade is deductible. However, interest that is incurred to produce income that is exempt from tax will not be allowed as a tax deduction. A special dispensation applies to the deduction of interest on debt used to acquire shares in a company, provided certain requirements are met.

Special rules apply to determine the amount of interest and timing of any deductions taking into account all payments and receipts in respect of debt instruments with interest being determined on the basis of an internal rate of return.

Certain debt instruments that are convertible to shares or may be settled in shares or where repayment is subject to solvency or related to connected-party debt with a maturity of 30 years or more are treated as hybrid debt instruments and no interest deduction is allowed in respect thereof. Certain hybrid interest is also treated as a dividend.

In addition, the interest deduction for interest paid between related parties is limited where such interest is not subject to income tax or WHT on interest. In terms of these rules, interest deductions are limited to an amount determined with reference to a percentage of taxable income before interest and depreciation. The percentage is determined with reference to the repo rate with a ceiling of 60% of adjusted taxable income. Any excess interest may be carried forward to the following year for deduction. The transfer pricing and thin capitalisation rules continue to apply to such interest.

Further interest deduction limitations also apply to interest paid on debt used to fund acquisitions of shares or businesses under certain of the corporate rollover relief provisions (*see the Group taxation section*). In terms of these rules, with some amendments thereto only applying for years of assessment commencing on or after 1 January 2015, interest deductions on such transactions are limited to an amount determined with reference to a percentage of taxable income before interest and depreciation. The percentage is determined with reference to the repo rate with a ceiling of 60% of adjusted taxable income.

The deduction of cross-border interest paid to connected persons is subject to limitation under transfer pricing rules (*see Transfer pricing and thin capitalisation in the Group taxation section*).

Bad debt

Bad debts are tax deductible if the debt relates to an amount that has been included in the taxpayer's taxable income in any tax year if it is due at the end of the year of assessment. A tax allowance is also provided for in respect of specifically identified doubtful debts.

Any bad debts arising on loaned money is deductible if it was lent in the course of a money-lending business.

Charitable contributions

Donations to certain charitable organisations approved as public benefit organisations are tax deductible, up to a maximum of 10% of taxable income.

Cost of inventory

The cost of inventory is, in principle, deductible as soon as the inventory is acquired. However, at the end of each year, the cost of the inventory still on hand has to be added to the company's income. Then in the next year, it can be deducted again. This has the effect of timing the deduction of the cost of inventory to match the time of its realisation.

Assets acquired for shares issued

When assets are acquired by a company in return for shares issued to the seller, the purchaser of the assets is deemed to have incurred expenditure equal to the market value of the shares immediately after acquisition. Special rules apply in the case of a mismatch in the value of the shares and assets.

Fines and penalties

Any fine or penalty imposed in respect of an unlawful activity carried out in South Africa, or in any other country where it would be unlawful in South Africa, is not deductible for tax purposes.

Taxes

Most taxes (other than income taxes, donations tax, WHT on interest, and dividends tax) are deductible from taxable income for the corporation, provided they qualify for deduction under general rules.

Net operating losses

Losses may be carried forward indefinitely, provided an active trade or business of a similar nature is carried on without interruption. There is no loss carryback in South Africa.

Payments to foreign affiliates

Deductions may be claimed for royalties, managerial service fees, and interest charges paid to foreign affiliates, provided such amounts approximate those that would be paid to an unrelated party in an arm's-length transaction.

Interest deductions may be limited in certain circumstances (*see Interest expenses above and Transfer pricing and thin capitalisation in the Group taxation section*).

Group taxation

Group taxation is generally not permitted in South Africa. However, relief is given for transactions between group companies to allow for reorganisations, provided certain requirements are met.

In general, the relief will only apply to transactions between companies within the same group. A group of companies is defined as a controlling company and one or more controlled companies in relation to that controlling company. A controlling company means a company holding, directly or indirectly, at least 70% of the equity shares of any other company. Foreign-incorporated companies do not form part of a group of companies for the purposes of this relief unless effectively managed in South Africa, although relief is extended to controlled foreign companies (CFCs) in certain circumstances.

Corporate rollover relief is available for asset-for-share transactions, amalgamation transactions, intra-group transactions, unbundling transactions, and transactions relating to liquidation, winding-up, and deregistration.

The relief may cover the capital gains tax arising from the disposal of capital assets, income tax arising from the disposal of a depreciable asset, income tax arising from the disposal of trading stock, donations tax arising from the disposal of an asset, dividends tax, VAT, securities transfer tax, and transfer duty.

Transfer pricing and thin capitalisation

South Africa has transfer pricing legislation applying to cross-border transactions involving connected persons. The transfer pricing legislation applies the arm's-length standard.

South Africa

The transfer pricing legislation does not separately address transfer pricing and thin capitalisation. Rather, thin capitalisation is treated as simply a breach of the general arm's-length standard.

Where a transfer pricing adjustment is required to be made, that adjustment is subject to a secondary adjustment where it is deemed to be either a dividend or a donation.

Controlled foreign companies (CFCs)

If one or more residents together, directly or indirectly, hold more than 50% of the voting or participation rights in a foreign company, then it is a CFC in relation to those residents. The income of a CFC is imputed to the residents in proportion to their holdings, subject to certain exclusions and tax credits, where applicable. The most notable exclusions are for high-tax CFCs and income attributable to foreign business establishments.

Tax credits and incentives

Foreign tax credit

The South African Income Tax Act makes provision for a rebate against CIT in respect of foreign taxes paid on foreign-sourced income or a deduction against income of foreign taxes paid on SA-sourced income. In both instances, the taxpayer must be an SA resident, the income must be included in taxable income, and that income must have been subject to a foreign tax that is not recoverable. The rebate is limited to the total normal tax payable calculated by applying the ratio of the total taxable income attributable to the foreign tax to the total taxable income. The deduction, however, may not exceed the income on which the foreign tax was levied.

Research and development (R&D)

The current costs related to certain R&D activities carried on in South Africa are 150% deductible, subject to pre-approval by a government-appointed approval committee. The cost of machinery and other capital assets acquired for the purposes of R&D may be depreciated 40% in the first year of use, 20% in the second, 20% in the third year, and 20% in the fourth year. Buildings used in the process of R&D may be written-off over a 20-year period.

Headquarter company regime

A 'headquarter company' regime encourages the use of South Africa as a location for intermediate holding companies.

The main benefits offered to a headquarter company are:

- Exemption from South Africa's CFC rules.
- Exemptions on the headquarter company's dividend distributions.
- Exemption from the WHT on interest in certain circumstances.
- Exemption from South Africa's transfer pricing rules on back-to-back loans, outbound loans, back-to-back intellectual property (IP) licensing arrangements, and outbound IP licensing arrangements.
- Capital gains tax exemption upon the disposal of shares by the headquarter company.

The requirements for a headquarter company are as follows:

- The headquarter company must be SA resident.
- Each shareholder in the headquarter company must hold at least 10% of the headquarter company's equity shares and voting rights. This means that a headquarter company can never have more than ten shareholders.
- At least 80% of the headquarter company's assets (measured on a 'cost' basis and excluding cash and certain bank deposits) must be comprised of certain assets related

to the foreign companies in which the headquarter company holds at least 10% of the equity shares and voting rights. Specifically, these assets must be:

- the equity shares in those companies
- loans to those companies, and
- IP licensed to those companies.
- At least 50% of the headquarter company's gross income must be comprised of dividends, interest, royalties, rentals, service fees, or proceeds from the sale of equity shares or IP from its 10%-plus holdings, where the gross income exceeds ZAR 5 million.

Industrial policy projects

In 2008, a ZAR 20 billion incentive package for investors in energy efficient projects was announced. The incentive is available for industrial projects participating in the manufacturing sector (other than alcohol or alcohol-related products, tobacco or tobacco-related products, arms and ammunition, and biofuels, which have a negative impact on food security). Companies are divided into those with a qualifying status and those with a preferred status. The status is determined in terms of a point system.

The proposed project must either be a 'brownfield project' (expansion or upgrade of an existing industrial project) or a 'greenfield project' (a wholly new industrial project, which uses new and unused manufacturing assets). Approved projects may be granted a tax allowance known as an additional investment allowance equal to 55% (100% if located in an industrial development zone) of the cost of any manufacturing asset used in an industrial policy project with preferred status or 35% (75% if located in an industrial development zone) of the cost of any manufacturing asset used in any other approved industrial policy project.

The additional investment allowance may not exceed ZAR 900 million in the case of any greenfield project with a preferred status, ZAR 550 million in the case of any other greenfield project, ZAR 550 million in the case of any brownfield project with a preferred status, or ZAR 350 million in the case of any other brownfield project.

In addition to the above, a company may also claim a deduction known as an additional training allowance.

Special Economic Zones (SEZs)

An SEZ incentive has been introduced for companies carrying on business in an SEZ comprising of a reduced corporate tax rate of 15% as well as a 10% allowance in respect of the cost of new and unused buildings owned by a qualifying company or any new or unused improvements to any building owned by a qualifying company.

In addition, employment incentives have also been introduced for employers carrying on a trade in an SEZ that will allow for an employees' tax reduction for the employer in respect of qualifying employees, up to a prescribed monthly amount.

Energy efficiency savings

The energy efficiency savings incentive provides an income tax deduction to qualifying taxpayers. The deduction equates to ZAR 0.95 for each kilowatt hour (or equivalent) saved by the taxpayer during the relevant year of assessment against a baseline from the beginning of the year.

International shipping incentive

Income from international shipping of a resident company that holds a share in a South African flagged ship is exempt from income tax. Qualifying shipping companies can also use a currency other than the rand as their functional currency.

South Africa

Venture capital companies

In order to assist small and medium-sized businesses to raise capital to finance businesses, a tax incentive for investors in small and medium-sized enterprises through venture capital companies was introduced.

A deduction is allowed from the income of a taxpayer in respect of expenditures actually incurred by that person in respect of shares issued to that person by a venture capital company.

Withholding taxes

Payments to residents

The only payments to residents that are subject to WHT are in respect of dividends, although resident companies are exempt from the dividend WHT.

Royalties payable to non-residents

Royalties and know-how payments made to non-residents for the use of or right to use IP rights in South Africa are deemed to be from an SA source. The payer of the royalty or know-how payment is obligated to deduct a WHT of 15% of this payment, which is a final tax payable by the recipient of such income.

Dividends payable to non-residents

A dividend WHT of 15% applies to any dividend paid by a resident company or dividend paid to SA residents by a non-resident company in respect of shares listed on an SA exchange. The tax is imposed on the beneficial owner of the dividend and not on the company, with the exception of *in specie* dividends. The payer of the dividend or regulated intermediary is obligated to deduct the 15% WHT from the payment. The treaty rate is the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply.

Interest payable to non-residents

A 15% WHT on interest applies to interest payable from an SA source to non-residents on certain debt instruments. The resident payer of the interest is obligated to deduct the 15% WHT from the payment.

Treaty rates for dividends, interest, and royalties

The WHT may be reduced by the terms of the relevant tax treaty, as follows:

Recipient	WHT (%)		
	Dividends	Interest	Royalties
Non-treaty	15	15	15
Treaty:			
Algeria (1, 11)	10/15	10	10
Australia (1, 2, 12D)	5/15	10	10
Austria (11D)	5/15	0	0
Belarus (1, 2, 6, 11D, 27)	5/15	5/10	5/10
Belgium (1, 11)	5/15	10	0
Botswana (1, 2, 11)	10/15	10	10
Brazil (1, 2, 7, 11)	10/15	15	10/15
Bulgaria (1, 2, 6, 8, 11D)	5/15	5	5/7/10
Canada (1, 4, 12D, 33)	5/15	10	6/10
China, People's Republic of (1, 5, 35, 38, 39, 40)	5	10	7/10
Croatia (11, 26)	5/10	0	5
Cyprus (1, 12, 26)	5/10	0	0
Czech Republic (1, 11D, 26)	5/15	0	10

Recipient	WHT (%)		
	Dividends	Interest	Royalties
Democratic Republic of Congo (1, 11, 35)	5/15	10	10
Denmark (1, 11, 26)	5/15	0	0
Egypt (1)	15	12	15
Ethiopia (1, 2)	10	8	20

Notes

'D' refers to direct capital holding.

1. Recipient is the beneficial owner of the royalty.
2. Royalty is subject to tax in recipient country.
3. 15% is levied on royalties for cinematographic or television films.
4. The maximum rate for copyright royalties, royalties for use of computer software, and patents concerning industrial, commercial, and scientific experience is 6% of the royalties paid; otherwise, 10%.
5. Maximum rate of 10% on royalty of the adjusted amount (being 70% of the gross royalties) for use of industrial, commercial, or scientific equipment.
6. The 5% rate applies to royalties for the use of a copyright. A 7% rate applies to royalties for the use of patents, trademarks, designs, models, etc.
7. In respect of right to use industrial, commercial, or scientific equipment and transport vehicles, a 10% rate applies.
8. The lower rate of 5% applies to any cultural, dramatic, musical, or other artistic work (but not including royalties in respect of motion picture films) as well as industrial, commercial, or scientific works. The rate of 10% applies in all other cases.
9. The 5% lower rate applies to use of literary, artistic, and scientific works. The 7% lower rate applies to right of use of patents, trademarks, designs, and models.
10. No right to tax dividends in payor state if the beneficial owner of the dividend is resident in the payee state.
11. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital, and the higher rate applies in other cases.
12. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of capital, and the higher rate applies in other cases.
13. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of voting shares, and the higher rate applies in other cases.
14. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital and a minimum 12-month holding period prior to the end of the accounting period prior to the dividend payment, and the higher rate applies in other cases.
15. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of voting shares and a minimum six-month holding period prior to the end of the accounting period prior to the dividend payment, and the higher rate applies in other cases.
16. SA resident payor to Maltese resident beneficial owner (Maltese resident payor to SA resident beneficial owner is limited to tax on profits).
17. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital and a minimum two-year uninterrupted holding period prior to the dividend payment, and the higher rate applies in other cases.
18. Lower rate applies to a beneficial owner who has a minimum holding of 30% of capital and a minimum direct investment of 100,000 United States dollars (USD) in the company declaring the dividend, and the higher rate applies in other cases.
19. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of capital, and the higher rate applies in other cases. However, a 'most favoured nations' clause applies, which will limit the above rates to the lowest treaty rate in terms of any other treaty.
20. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 20% of capital, and the higher rate applies in other cases.
21. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 15% of capital, and the higher rate applies in other cases.
22. Lower rate of 5% applies to a beneficial owner that is a company and has a minimum holding of 10% of capital. Lower rate of 10% applies in all other cases. 15% rate applies to all dividends from property investment companies.

23. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of voting power (directly), and the higher rate applies in other cases.
24. The treaty contains no provisions regarding dividends WHT, thus the domestic rate will apply.
25. The Netherlands Protocol has a 'most favoured nations' provision whereby the rate most favourable in any other treaty will apply over the default treaty rate. This, however, only applies to treaties concluded after this treaty.
26. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state.
27. The 5% rate applies to interest derived by a bank or any other financial institution, and the 10% rate applies in other cases.
28. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state and provided interest is taxable in that other state.
29. No specific provision is made for interest in the DTA.
30. The 10% rate applies to interest received by a financial institution (including an insurance company), and the 15% rate applies in other cases.
31. The 5% rate applies to interest on loans made by banks, and the 12% rate applies in other cases.
32. The 5% rate applies if the interest is paid to a bank; the 10% rate applies in other cases.
33. In Canada, a beneficial owner that is a company controls a minimum of 10% of the voting power (directly/indirectly), but excludes non-resident owned investment corporation resident in Canada.
34. In New Zealand, dividends are taxed at a flat rate of 15%.
35. No right to tax interest in payor state if the beneficial owner is the government of the other state or a government entity.
36. No specific provision is made for royalties in the DTA.
37. No right to tax interest on stocks and securities issued by any government other than South Africa, even if business is carried on in South Africa, if taxed in residence state.
38. Lower rates for royalties do not apply if attributable to a PE in the payor state or the right or property on which royalty is paid is attributable to PE in payor state.
39. The 10% rate applies if the beneficial owner is resident in the payee state.
40. Lower rate of 5% applies to the dividend if beneficial owner is resident in payee state.
41. The interest exemption in the source country is only retained for interest paid or received by a government or central bank, or for interest on debt instruments listed on a recognised stock exchange.
42. The interest exemption applies if the beneficial owner of the interest is the Hong Kong Special Administrative Region (HKSAR) Government, the Hong Kong Monetary Authority, the SA Government, the SA Reserve Bank, or institutions wholly or mainly owned by them.

Non-resident entertainers and sportspersons

A WHT at the rate of 15% applies to all payments made to non-resident entertainers and sports persons in respect of their activities exercised in South Africa.

Disposal of immovable property by non-residents

Any person who pays an amount to a non-resident in respect of the sale of immovable property in South Africa must withhold from the amount payable an amount equal to:

- 5% if the non-resident seller is an individual
- 7.5% if the non-resident seller is a company, or
- 10% if the non-resident seller is a trust.

The amount so withheld is not a final tax for the non-resident seller. Instead, this amount is regarded as an advance payment of the non-resident seller's normal tax liability for the year of assessment during which the property is disposed of. The non-resident seller is still obligated to submit an income tax return for that year.

S

Tax administration

Taxable period

The corporate tax year is the same as the company's financial year. It may be changed upon application showing reasonable cause.

Tax returns

Annual income tax returns must be submitted within one year from the end of the company's tax year. The annual tax return includes a supplementary reconciling return where requested. Furthermore, schedules apply for CFCs, short-term insurers, mining companies, headquarter companies, and learnership allowances.

'Signed off' financial statements are required to be submitted with the annual tax return.

South Africa

Payment of tax

Payments are made with provisional returns filed at six-month intervals from the tax year-end based on an estimate of taxable income for the year. Interest is charged on any underpayment outstanding for more than six months after the tax year-end, except in the case of February year-ends, in which case it is seven months. Any balance (together with interest) is then paid following assessment.

Tax audit process

There is no prescribed audit process, and an audit can be initiated by any factor as determined by the SARS. The audit or inspection will commence with a request from the SARS for the taxpayer to make available any such records or information as may be required.

Statute of limitations

Tax debts to the state prescribe after a period of 15 years. Tax returns submitted that have been assessed may not be reopened after a period of three years from date of assessment by the SARS or five years if it is a self-assessment by the taxpayer, unless there has been fraud, misrepresentation, or non-disclosure by the taxpayer.

The prescription period may be extended by three years in the case of an assessment by the SARS or by two years in the case of self-assessment in respect of certain complex matters, such as transfer pricing and general anti-avoidance cases.

Topics of focus for tax authorities

The SARS, in their 2015/16 to 2019/20 Strategic Plan, stated that they will focus on the following areas:

- Large business and transfer pricing.
- The construction industry.
- Illicit cigarettes.
- Undervaluation of imports in the clothing and textile industry.
- Small business and cost of compliance.
- Collaboration with other jurisdictions on tax base erosion.

Other issues

Intergovernmental agreements (IGAs)

South Africa entered into an agreement with the United States to improve international tax compliance and to implement the Foreign Account Tax Compliance Act (FATCA). The date of entry into force is 28 October 2014.

South Africa is also a party to the Multilateral Convention on Mutual Administrative Assistance on Tax Matters as well as a number of bilateral tax information exchange agreements.

Significant developments

Over the past year, the following significant amendments have been made to Spanish law on the taxation of companies:

Law 48/2015, of 29 October 2015, which passed the State Budget Bill, was published in the Spanish Official State Gazette on 30 October 2015. The main measures contained in this law that affect taxation of companies are:

- The requirements for the conversion of certain deferred tax assets related to bad debt or contributions to welfare systems into a credit payable by the tax authorities are modified. Previous deferred tax assets that do not meet the new requirements may also be converted into a credit payable by the tax authorities, although, in this case, prior payment of an amount may be required.
- Effective as of 1 July 2016, the rules to calculate the patent box tax incentive are modified to bring this tax incentive in line with the European Union (EU) and the Organisation for Economic Co-operation and Development (OECD) Agreement. With this reform, income generated from assigning the use of certain intangible assets may be eligible for a reduction in the taxable base by the percentage resulting from multiplying by 60% the result of the following coefficient:
 - In the numerator, the expenses incurred to create the asset (including subcontracted expenses with non-related parties), increased by 30%, up to the limit of the denominator amount.
 - In the denominator, the expenses incurred to create the asset, including the subcontract and expenses incurred for the acquisition.

Financial expenses, real estate depreciation expenses, or any other expenses incurred to create the asset are not included in this coefficient.

The requirement that the assigner company has created the asset by bearing at least 25% of its cost is eliminated.

- The legal interest rate for 2016 is 3%, and the late payment interest rate is 3.75%.
- Certain events of exceptional public interest and priority patronage activities for 2016 are established in the law.
- Regarding value-added tax (VAT), certain exemptions are modified to bring Spanish law in line with EU law.

Law 22/2015, of 20 July 2015, on auditing, was published in the Spanish Official State Gazette on 21 July 2015. Under this law, intangible assets are amortised according to their useful life. When the useful life cannot be reliably determined, amortisation is tax deductible up to a maximum annual limit of 5% of its amount.

For goodwill, amortisation is tax deductible up to the maximum annual limit of 5% of its amount.

Spain

Royal Decree-Law 9/2015, of 10 July 2015, was published in the Spanish Official State Gazette on 11 July 2015. The new Royal Decree-Law established a reduction in the withholding tax (WHT) rates starting on 12 July 2015. Thereby, starting on 1 January 2016, the standard WHT rate is set at 19% (19.5% from 12 July 2015 to 1 January 2016, 20% from 1 January 2015 to 11 July 2015).

Taxes on corporate income

The general corporate income tax (CIT) rate in Spain is 25% for tax periods starting on or after 1 January 2016 (28% in 2015). Other tax rates may apply, depending on the type of company that is taxed and the type of business carried out.

Resident companies are taxed on their worldwide income.

For permanent establishments (PEs) in Spain of foreign companies, non-resident income tax (NRIT) is chargeable on income that may be allocated to the PE at a 25% tax rate for periods starting on or after 1 January 2016 (28% in 2015).

NRIT is also chargeable on non-established foreign companies/individuals that obtain income in Spain (*see the Withholding taxes section*).

Small companies

Companies with a turnover under 10 million euros (EUR) in the preceding tax year (considering, in the case of a group of companies, the group companies' total turnover) are considered small companies for CIT purposes and are taxed at a 25% tax rate for tax periods starting in 2016.

Newly created companies

Newly created companies are taxed at a 15% tax rate for tax periods starting on or after 1 January 2015, provided that they have been set up after that date, for both the first tax period in which they obtain a profit and the following tax period. This tax rate is not applicable to companies that, by law, are considered equity companies. Newly created companies that are set up in tax periods starting prior to that date will continue to be taxed at a 15% tax rate on their tax base up to EUR 300,000 and a 20% tax on any excess in these two periods.

Business and professional activities tax

The business and professional activities tax is a local direct tax levied annually on the performance in Spain of business, professional, or artistic activities, regardless of whether or not they are carried out in a particular premises. The tax payable depends on different factors, such as the type of activity carried out and the location and size of the premises where the activity is carried out. As regards limits, it may not exceed 15% of the presumed average profits of the professional/economic activity.

CIT payers and non-resident companies carrying on an activity in Spain through a PE are exempt from this tax if their net turnover for the tax year of the last CIT/NRIT return filed prior to the date of accrual of the local tax (1 January) was less than EUR 1 million.

Corporate residence

A company is resident in Spain and subject to CIT on its worldwide income when:

- it has been incorporated in accordance with Spanish law
- its registered office is in Spain, and/or
- its 'effective' head office is in Spain.

Under Spanish law, a company's 'effective' head office is in Spain when its business activities are managed and controlled from Spain.

Companies established in a country or territory where no tax is levied or that is a tax haven are deemed to be tax resident in Spain in the following cases:

- When the company's main assets consist, directly or indirectly, of property located or rights fulfilled or exercised in Spain.
- When the company's core business activity is carried on in Spain.

This presumption may be refuted by the company if it can prove that it is effectively administered and managed in the country or territory in which it is established and that it was incorporated and operates for valid economic and business reasons and not merely for the purpose of managing securities or other assets.

Permanent establishment (PE)

Taxpayers operating in Spain through a PE are subject to NRIT.

Most Spanish tax treaties for the avoidance of double taxation contain a definition of PE in line with OECD criteria.

In the absence of a tax treaty, internal law states that an individual or company is considered to operate through a PE when, by any legal means, one has continuous or habitual work facilities in Spain or a place to do any kind of work where one performs all or part of one's activity, or when one acts in Spain through an agent with powers to enter into an agreement in the name and on behalf of the non-resident individual or company, provided said powers are exercised on a regular basis.

In particular, management offices, branches, offices, factories, workshops, warehouses, shops or other establishments; mines, oil or gas wells, quarries, farms, forestry facilities, livestock farms, or any other site where natural resources are collected; and construction, installation, or assembly sites whose duration lasts more than six months will be considered PEs.

Other taxes

Value-added tax (VAT)

Spanish VAT is payable on supplies of goods and services carried out in Spanish VAT territory and on imports/intra-EU acquisitions of goods and services. There are three rates for the different types of goods and services, which are as follows:

- Ordinary rate of 21%, applied on regular supplies of goods and services.
- Reduced rate of 10%, applied on basic necessities (e.g. food and agricultural products not included in the 'super reduced' 4% rate, dwellings, other qualifying services).
- Super reduced rate of 4%, applied on basic necessities other than those classified under the reduced rate (e.g. bread, milk, books, medicine).

In the Canary Islands, a specific tax is applied instead of VAT, called the Canary Island General Indirect Tax (IGIC). The ordinary IGIC rate is 7%, and the other IGIC rates are 0%, 3%, 9.5%, and 13.5% (20% for tobacco). IGIC is similar to VAT, but it has some significant differences, such as the exemption established for telecommunications services. Imports of tangible goods into the Canary Islands are subject to this tax.

In Ceuta and Melilla, sales tax is applied instead of VAT.

Spain

Customs duties

Many goods imported into Spain from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

Excise duties

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in Spain. Purely as examples, most road fuels carry a duty of about EUR 0.33 per litre, cigarettes carry a duty of about EUR 24.1 per thousand (plus 51% of the maximum retail sale price), tobacco of about EUR 22 per kg (plus 41.5% of the maximum retail sale price), most wines of EUR 0 per litre, and spirits of about EUR 9.13 per litre of pure alcohol included.

Tax on tax-haven-resident companies owning real estate in Spain

Companies resident in a tax haven for tax purposes that own real estate or hold real property rights in Spain are subject to a special levy accrued on 31 December and declared and paid in January of the following year in the place and manner established by law. The tax is equal to 3% of the assessed value of the real estate.

Transfer tax

A transfer tax, which is usually 5% to 10%, depending upon the region, is generally levied on *inter vivos* transfers, including real estate transfers and real estate leases that are exempt from VAT.

Second and ulterior transfers of buildings are exempt from VAT; consequently, they are, in principle, subject to transfer tax.

Residential leases are exempt from VAT and therefore subject to transfer tax.

Transfers of quoted or unquoted (listed or unlisted) securities are, in principle, exempt from both transfer tax and VAT. This exemption will not apply for transfers of unlisted securities of a company in the secondary market that tries to evade the tax that is payable on a direct transfer of real estate that it owns. For this purpose, Spanish law establishes certain cases where it is understood that there is an intention to evade tax.

This exception will not apply to transfers of securities received as a result of the incorporation by banks of asset management companies and to transfers of securities of banks affected by the integration plans regulated by Royal Decree-Law 9/2009, which will therefore be exempt from transfer tax. In addition, acquisitions of assets in the Canary Islands may be exempt from transfer tax (and from IGIC) when certain requirements are complied with.

Restructuring transactions are also exempt from transfer tax. For these purposes, mergers, spin-offs, exchanges of shares, and certain in-kind contributions are considered to be restructuring transactions.

Stamp duty

A stamp duty is mostly levied on notarial instruments and records documenting transactions that have an economic value and need to be registered in public registries (e.g. company, land, and industrial property registries). Stamp duty is incompatible with transfer tax and capital duty, but compatible with VAT. The general rate is between 0.75% and 1.5%, depending on the region of Spain and the taxable event.

Stamp duty is also levied on certain commercial (e.g. bills of exchange, promissory notes), court, and administrative documents.

Capital duty

1% capital duty is levied on capital reductions and company dissolution, to be paid by the shareholders.

Capital duty is incompatible with transfer tax and stamp duty in certain cases, but it is compatible with VAT.

Payroll taxes

Employers are required to withhold a percentage of their employees' salaries and benefits as a payment on account of their personal income tax (PIT). The rate of withholding is a progressive rate of between 19% and 45% in or after 2016, depending on the employee's personal circumstances and income.

Social security contributions

Employers are required to pay social security contributions. The rate of the contributions under the general social security contribution regime is the fixed rate of 29.9% plus a variable rate for occupational accidents (e.g. 1% for office work).

Employees are also required to pay social security contributions. Under the general social security contribution regime, the rate of social security contributions is 6.35%. Employers should deduct this amount from the amounts that they pay to employees.

The rates of social security contributions stated above should be applied on the employee's total monthly gross employment income, whether in cash or in kind, with a minimum monthly contribution base of between EUR 764.40 and EUR 1,067.40, depending on the employee's professional category, and a maximum monthly contribution base of EUR 3,642.

Both parts of the social security contributions (employer and employee) should be paid by the employer to the Social Security Treasury.

Other local taxes

In addition to the taxes stated above, the following other local taxes may be charged on companies:

- Real estate tax, levied annually by local authorities on the ownership of real estate.
- Local tax levied on the increase in the value of urban land, chargeable when urban real estate is sold.
- Motor vehicle tax, charged on the ownership of vehicles.
- Tax on constructions, installations, and building works, charged on the cost of certain works that require town planning licences.
- Waste collection fees.

S

Branch income

Income obtained by a branch in Spain of a non-resident company is taxed at the standard CIT rate of 25% in or after 2016.

When calculating the tax base for taxpayers resident in other EU member states that do not have a PE, a distinction is made between individuals and companies, and tax deductible expenses are established in accordance with PIT and CIT legislation, respectively.

Payments made by a branch to its head office or a PE of its head office for royalties, interest, commissions, or technical assistance fees are not tax deductible. Management and general administrative expenses incurred by the foreign head office that can be allocated to the branch are tax deductible if the payments for these expenses are made

Spain

following a criteria of continuity and rationality and provided that certain documentary requirements and other formalities are fulfilled.

Under Spanish law, income obtained by a branch that is repatriated to its head office is taxed at source at the general WHT rate of 19% in or after 2016. This tax is not chargeable in the case of a PE of a company resident in the European Union (unless the company is resident in a tax haven). Most tax treaties signed by Spain do not establish any provisions on this matter, and, in such cases, no tax is chargeable on income repatriated by branches. Some tax treaties, such as the treaties with Canada, Indonesia, and the United States (US), expressly establish a tax on income repatriated by branches. For example, US head offices are taxed at a 10% rate on the repatriated profits of a Spanish branch under the US/Spanish tax treaty.

Income determination

The general rule for determining income for CIT purposes is that accounting rules must be followed unless tax law establishes otherwise. In order to maintain this consistency, CIT/PE NRIT returns include pages in which the company's accounting/commercial balance sheet and profit and loss account figures must be entered.

In Spain, the tax authorities are authorised to modify accounting results exclusively for the purpose of determining tax results if they observe that a company's accounting results have not been calculated in accordance with Spanish Generally Accepted Accounting Principles (GAAP).

Inventory valuation

Inventory is valued at acquisition price or production cost under the average and first in first out (FIFO) valuation methods (the replacement and base stock valuation methods may only be used in exceptional cases). Again, since there are no specific tax rules for determining taxable income, accounting rules are also applicable for calculating valuation and obsolescence provisions for inventory.

Capital gains and losses

Capital gains are taxable in the tax year in which they arise. They are treated as normal income and taxed at the standard CIT rate of 25% for tax periods starting in or after 2016.

Please see the Tax credits and incentives section for a description of a tax credit for reinvestment.

For operations where payment is deferred or paid in instalments, the income is obtained proportionally as the corresponding payments are made, unless the taxpayer opts to be taxed in accordance with the accrual criteria.

Special rules apply to capital losses arising from transfers of shares, which may reduce the amount of the loss by the amount of the dividends that have been received from the company whose shares are transferred during the holding period, provided that such dividends or shares have not been deducted from its acquisition value and generated any entitlement to apply an internal double tax deduction of 100% (dividends received between tax periods starting in 2009 and tax periods starting in 2014), a tax exemption for double taxation, or a deduction for international double taxation (dividends received in tax periods starting in or after 2009).

Tax losses generated on transfers of assets to another company in the same corporate group are not tax deductible when the transfer takes place. Their tax deductibility is deferred to the moment when the assets are written off the acquirer's balance sheet transferred out of the group or when the transferor or acquirer cease to form part of the

group. In the case of depreciable/amortisable assets, however, the undeducted amount should be included in line with its depreciation/amortisation by the acquirer.

Dividend income

The deduction previously established for the avoidance of internal double taxation has been eliminated for tax periods starting in or after 2015.

Dividends received from companies resident in Spain in which at least a 5% interest has been held for at least one year, including ownership by other group companies, (or with an acquisition value of over EUR 20 million) are exempt from tax. Dividends received from companies resident in Spain in which an interest of less than 5% is held (or with an acquisition value of less than EUR 20 million) are taxable in their entirety for the recipient.

As a general rule (there are certain exceptions), capital gains arising on the transfer of companies resident in Spain in which at least a 5% interest has been held for at least one year (or with an acquisition value of over EUR 20 million) are exempt from tax. The period during which the interest is held by another group company is also taken into consideration for this rule.

Special rules apply to, amongst others, the following:

- Dividends received from companies that obtain dividends or capital gains generated from transfers of interests in other companies, provided that such dividends and capital gains exceed 70% of the company's gross income.
- Capital gains arising from transfers of interests in companies that receive dividends or capital gains generated from transfers of interests when such dividends and capital gains exceed 70% of the company's gross income.

Please see Foreign income below for a description of the taxation of dividends received from foreign companies.

Stock dividends

CIT is not levied on bonus shares (i.e. shares partially or totally given to shareholders in a capital increase charged against distributable reserves), although they must be taken into account when calculating the average cost of shares held for the levying of tax when the shares are sold.

Interest income

Interest income is treated as normal income and taxed at the standard CIT rate of 25% for tax periods starting in or after 2016.

Other significant items

The following items, amongst others, are excluded or deferred from taxable income:

- Distributed dividends corresponding to profits obtained by companies in tax periods in which the flow-through tax regime (internal and international) has been applied.
- Assets written up in accordance with revaluation laws and tax-protected restructuring transactions involving accounting capital gains.

Foreign income

Tax relief on foreign income

Resident companies are taxed on their worldwide income. For foreign-source income, total or partial tax relief in the form of tax credits or exemptions is given if tax is levied on the income in both Spain and the foreign country where the income has been generated.

Spain

This tax relief may be available for the following:

- Economic double taxation, which is when the same income is taxed in the hands of two different taxpayers. For example, another government taxes a foreign company on the income earned in that country and a Spanish resident shareholder is taxed on the dividends that it receives from the foreign company or the capital gains from transfers of its shares.
- Juridical double taxation, which is when the same income is taxed in two countries in the hands of the same taxpayer. For example, the income is taxed (via a WHT) in the country where the income is generated and again in the other country where the recipient is resident.

The main characteristics of double tax relief are discussed below.

Dividends or profit-sharing income received by a Spanish company from a foreign company are tax exempt, subject to compliance with the following requirements:

- The Spanish company has at least a 5% interest in the foreign company, which has been held for at least one year. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed. The period in which the interest is held by another group company is also taken into consideration for this rule.
- The investee has been taxed by a tax that is identical or similar to Spanish CIT at, at least, a 10% nominal tax rate in the tax year in which the distributed profits were obtained. This requirement is complied with when the investee is resident in a country with which Spain has signed a tax treaty containing an exchange-of-information provision.

Capital gains arising from the sale of shares in foreign companies also qualify for a tax exemption if the requirements stated above are complied with during the holding period.

Both the dividends and capital gains exemptions are not applicable when the investee company is resident in a tax haven, unless it is an EU member state and the company can prove that it has been incorporated and operates for valid business reasons and that it carries on business activities.

Tax exemption is limited in certain cases.

Special rules apply to, amongst others, the following:

- Dividends received from companies that obtain dividends or capital gains generated from transfers of interests in other companies, provided that such dividends and capital gains exceed 70% of the company's gross income.
- Capital gains arising from transfers of interests in companies that receive dividends or capital gains generated from transfers of interests when such dividends and capital gains exceed 70% of the company's gross income.

As an alternative to this 'tax exemption' regime and applicable to dividend distributions only, a tax credit based on imputation is established. This tax credit allows the crediting of the foreign tax paid abroad on the income from which the dividends are paid and the foreign WHT paid on the profit distribution, up to the limit of the tax that would have been paid on the gross amount in Spain. The only requirement for the application of this 'tax imputation' regime is that the Spanish company has at least a 5% interest in the foreign company during the 12 months prior to the date on which the dividend is due and payable. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed. The tax credit can be carried forward for an unlimited number of years.

Spanish legislation provides for CIT relief on 'juridical' double taxation by applying the 'tax imputation' regime. Under this regime, gross foreign income (including foreign WHT paid) is included for Spanish tax calculation purposes, and a tax credit for the foreign WHT paid is applicable up to the amount of the CIT that the company would have paid if such gross income had been obtained in Spain. The part of the tax paid abroad with respect to which the taxpayer is not entitled to this tax credit may be considered tax deductible, provided that it corresponds to the foreign company's business activities carried out abroad. The tax credit can be carried forward for an unlimited number of years.

Under Spanish tax treaties and implemented EU tax directives, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties, which allows for the deduction of not only the tax actually paid but a higher amount of tax.

Deductions

Depreciation, amortisation, and depletion

All assets, except land, are depreciable/amortisable for tax purposes. Guideline tables of tax depreciation/amortisation rates are established that state maximum *per annum* rates and maximum years of useful life for each asset type, classified by business sector. The tables have been modified for tax periods starting on or after 1 January 2015, and a transitory regime has been established for assets that were being depreciated/amortised at a different rate from the rate established in the new tables.

Please see the table below as an example of the maximum *per annum* rates and maximum years of useful life established in the tables for some assets that are typically depreciated/amortised:

Asset	Maximum <i>per annum</i> depreciation/ amortisation rate (%)	Maximum useful life (years)
Industrial buildings	3	68
Warehouses	7	30
Administrative and commercial buildings	2	100
Internal transport elements	10	20
External transport elements	16	14
Furniture	10	20
Computers	25	8
Software	33	6
Tools	25	8

The straight-line depreciation/amortisation method is normally used, calculated over the asset's useful life and applied on the asset's cost or written-up value (if such a write-up is acceptable for tax purposes). Off-book adjustments must be included in tax assessments if accounting depreciation/amortisation exceeds tax depreciation/amortisation.

Qualifying assets with a useful life of more than one year can also be depreciated/amortised using declining-balance methods. Buildings, furniture, and fittings cannot be depreciated using the declining-balance methods.

For tax periods starting in 2013 and 2014, the tax deduction of recorded depreciation of tangible fixed assets and investment property was limited to 70% of the maximum depreciation permitted by the regulations implemented under Spanish CIT law. This

Spain

limitation did not apply to small or medium-sized companies. Recorded depreciation that was not deducted as a result of this limitation could be carried forward and is deductible either on a straight-line basis over ten years or, alternatively, over the asset's useful life, from the first tax period starting in 2015. For tax periods starting in or after 2015, a deduction may be applied on gross tax payable. The deduction is 5% (2% for tax periods starting in 2015) of the amounts included in the tax base resulting from depreciation charges not deducted in tax periods starting in 2013 and 2014. This deduction compensates the reduction of CIT rates and ensures that the 70% tax depreciation limit only has a financial effect.

Mining assets and assets used for research and development (R&D), amongst others, but not including buildings, can be freely depreciated/amortised for tax purposes.

Free depreciation

Unrestricted depreciation of investments in new tangible fixed assets and investment property was regulated for investments made by taxpayers in tax periods starting in 2011, 2012, 2013, 2014, and 2015. This tax relief was also available for tax periods starting in 2009 and 2010, but it could only be availed of if the requirement that the taxpayer's staff levels were maintained or increased was met.

Due to the tax reform carried out by Royal Decree Law (RDL) 12/2012, this tax incentive was repealed effective 31 March 2012.

A transitional regime is provided for investments made prior to that date. Under this transitional regime, unrestricted depreciation tax relief may be applied to these investments, although with certain limits.

Amortisation of intangibles

A 60% reduction may be applied on the net income obtained from licensing certain intangible assets if certain requirements are met (the effective tax on this net income would generally be 10%). Effective as of 1 July 2016, the rules to calculate the patent box tax incentive are modified to bring this tax incentive in line with the EU and OECD Agreement. With this reform, income generated from assigning the use of certain intangible assets may be eligible for a reduction in the taxable base of the percentage resulting from multiplying by 60% a coefficient that may not be greater than one (i.e. the maximum reduction will be 60%). For tax years starting in or after 2016, goodwill is amortised under Spanish GAAP during its useful life, which is estimated to be ten years unless otherwise proven. However, it can be amortised for tax purposes at a maximum annual rate of 5%, irrespective of whether or not the assets in question were acquired from a company of the same corporate group. Goodwill acquired from another group company in tax periods starting prior to 1 January 2015 does not qualify for a deduction.

Intangible assets may be amortised during their useful life. When the useful life may not be reliably estimated, the assets will be amortised over ten years, unless otherwise established by law or the regulations implemented under law. This amortisation is tax deductible irrespective of whether or not the assets in question have been acquired from a group company. When the useful life of intangible assets cannot be reliably estimated, the amortisation is tax deductible up to the limit of 5%.

The amortisation of intangible assets acquired from another group company in tax periods starting prior to 1 January 2015 is not tax deductible.

For tax periods starting in or after 2015, taxpayers to whom the 70% limit for tax deductible amortisation applied in 2013 and 2014 are entitled to a deduction against their gross tax payable of the amounts included in their tax base resulting from amortisation not deducted in tax periods starting in 2013 and 2014. The deduction is 5% for tax periods starting in or after 2016. This deduction compensates the reduction of

CIT rates and, consequently, ensures that the 70% tax deductible amortisation limit only has a financial effect.

Depletion

Depletion is allowed for mining companies and companies involved in exploring/investigating natural oil resources as established in applicable legislation.

Financial goodwill

To promote the internationalisation of Spanish companies, in 2002 a rule was introduced that financial goodwill arising from the acquisition of an interest in a non-resident company (financial goodwill being, in this case, the excess price paid for the acquisition of the business over its net book value at the date of the acquisition that cannot be allocated to the non-resident company's assets in Spain) could be amortised up to a maximum of 5% per year.

To apply this tax relief, the following requirements had to be met:

- A minimum 5% interest had to be held in the non-resident company.
- The non-resident company had to be subject to a similar tax to Spanish CIT.
- The income obtained by the non-resident company had to be generated from business activities carried out abroad in accordance with Spanish CIT law.

Decisions of the European Commission dated 28 October 2009 (regarding interest in non-resident EU companies) and 12 January 2011 (regarding interest in non-resident non-EU companies) considered that this tax relief was unlawful state aid.

According to the Commission's decisions, only acquisitions of interests in non-resident companies carried out before 21 December 2007 (or before 21 May 2011 for majority interests in non-resident companies established in countries with explicit obstacles to cross-border business combination transactions outside the European Union) can continue applying this tax relief until the financial goodwill is wholly amortised.

The provisions related to financial goodwill tax relief laid down in the CIT Act were amended by Law 31/2011, passed on 4 October 2011, and take effect for tax periods ending on or after 21 December 2007. Under the amended regulation, the financial goodwill tax relief is not applicable for acquisitions of interests in non-resident companies carried out on or after 21 December 2007 (or on or after 21 May 2011, when there is evidence which proves that there is an explicit obstacle for cross-border business combination transactions outside the European Union).

In its decision of 17 July 2013, the Commission has asked the Spanish tax authorities to suspend their rule that allowed for the tax deduction of financial goodwill arising from second or bottom-tier non-resident companies.

On 7 November 2014, two resolutions from the EU General Court annulled the aforementioned decisions of the European Commission on the grounds that the Spanish financial goodwill tax relief did not constitute state aid that was incompatible with the internal market, amongst other reasons, because it could not identify a category of undertakings that benefited from the measure or selectivity.

Start-up expenses

According to Spanish GAAP, start-up expenses are considered to be expenses in the financial year in which they are incurred. As no special rule is provided for tax purposes, they are deductible for CIT purposes in the year in which they are incurred.

Financial expenses

General limits on the deduction of financial expenses

The amount of net deductible financial expenses in the tax period is generally reduced to 30% of operating profit (similar to earnings before interest, taxes, depreciations, and amortisation [EBITDA], applying certain adjustments) for the year, financial expenses of less than EUR 1 million (or the proportional part for tax periods of less than one year) being deductible regardless of the 30% limit. For such purposes, net financial expenses will be considered to be the excess of financial expenses (excluding the non-deductible expenses mentioned below) with respect to income deriving from the assignment of capital to third parties accrued in the tax period.

For companies taxed under the tax consolidation regime, the deduction limit will refer to the tax group. Nonetheless, the company's net financial expenses available for deduction at the time of its inclusion in the group will be deducted, up to the limit of 30% of its operating profit. When a company stops forming part of the group or the group is extinguished and there are net financial expenses available for deduction, the rule will be similar to that for assigning tax losses to the companies that formed part of the group.

Limits on the deduction of financial expenses will not be applicable for dissolved companies for the tax period in which they are dissolved, unless the company is dissolved as a result of a restructuring operation.

Finally, limits on the deduction of financial expenses will not apply to (i) insurance companies or to (ii) credit institutions. Financial expenses that have not been deducted due to the application of this limit can be deducted in subsequent tax periods for an unlimited period of time.

Specific limit on the deduction of financial expenses on the acquisition of interests in the capital or equity of any type of company

A specific limit is introduced for financial expenses generated from debts incurred to acquire interests in the capital or equity of any type of company. These expenses are deductible, subject to an additional limit of 30% of the acquirer's operating profits, excluding the operating profits of any company that may merge into the acquirer or that may join its tax group during the four years following the acquisition (besides this specific limit, the general limit on tax deductibility will also apply to these financial expenses).

This specific limit is not applicable when the debt associated with the acquisition of the interest reaches a maximum of 70% and is reduced, as of the time of the acquisition, by at least the proportional part corresponding to each of the following years until a level equal to 30% of the acquisition price is reached.

This specific limit does not apply to restructuring operations carried out before 20 June 2014 or to restructuring operations carried out on or after 20 June 2014 between companies that formed part of a tax consolidation group during tax periods starting before that date.

Financial expenses that have not been deducted due to the application of this limit can be deducted in subsequent tax periods for an unlimited period of time.

Specific limit on the deduction of intra-group financial expenses on acquisitions of interests in other group companies or contributions to capital or equity of other group companies

Over the past few years, a large number of tax inspections have adjusted the tax effects of acquisitions of shares from group companies with intra-group debt. Many of these operations were acquisitions of shares in non-resident companies, so that the dividends and capital gains arising from the acquisition of the shares were covered by the

exemption for the avoidance of double taxation established in Article 21 of the Spanish CIT Act. In addition, the lenders of these operations were usually located in low-tax territories.

In the absence of specific limitation rules on the tax deductibility of financial expenses in previous years, the reaction of the tax authorities to these kinds of operations has been to apply general anti-abuse rules.

With this scenario, RDL 12/2012 introduced a limitation rule for the deduction of intra-group financial expenses that is applicable for tax periods starting on or after 1 January 2012. In accordance with this rule, financial expenses arising from debts with group companies generated from acquisitions of interests in other group companies or contributions to capital or equity of other group companies will not be deductible unless there is evidence that there are valid economic reasons for such expenses.

Participating loans

Interest on participating loans contracted by group companies on or after 20 June 2014 is, by law, a return on equity and is not deductible for tax purposes. In the recipient's tax returns (if the recipient is a Spanish CIT payer), they should be treated as dividends and the recipient may be eligible, when appropriate, for a tax exemption for the avoidance of double taxation of dividends.

Bad debt provisions

Provisions for covering the risk derived from possible bad debts are tax deductible when, at the time the tax accrues, any of the following circumstances exists:

- Six months have elapsed since the obligation became due.
- The debtor is declared bankrupt.
- The debtor is prosecuted for an offence of embezzlement.
- The obligations have been claimed judicially or are the subject of a legal dispute or arbitration proceedings, and collection depends on the solution thereof.

Provisions for the credits listed below are not tax deductible:

- Credits owed by public law entities, unless they are being examined in an arbitration or court proceeding brought to establish their existence or amount.
- Receivables from related persons or companies, unless they are going through bankruptcy proceedings and the court has declared the initiation of the liquidation phase.
- Credits based on overall estimates of the bad debt risk corresponding to trade and other debtors.

Special rules apply to bank entities.

Time apportionment of certain allocations or welfare system provisions

Positive adjustments arising from certain allocations to bad debt or welfare system provisions that are non-deductible under the Spanish CIT Act should be reversed in the corresponding year in accordance with this Act, up to a maximum of 60% of the tax base prior to their inclusion and prior to the capitalisation reserve starting in 2016 (70% in 2015) and the application of prior-year tax losses, with any excess being allocated in subsequent years, subject to the same limits, provided that a deferred tax asset has been recorded.

Equity investments in companies

The tax deductibility of impairment allowances of share capital or equity investments in companies has been eliminated for tax periods starting on or after 1 January 2013.

Spain

The elimination of this tax deductibility will be temporary as potential impairment losses will be tax deductible under normal conditions if the shares are transferred or the subsidiary is dissolved.

A complicated transitory system has been established in the Spanish CIT Act to regulate the effects of reversals of impairment allowances deducted in prior years.

With this regulation, the rules on the avoidance of double taxation for distributions of dividends inside or outside Spain have also changed.

Severance pay

Severance pay is tax deductible for CIT purposes when it does not exceed, for each recipient, EUR 1 million or, if it exceeds this amount, up to the amount that is exempt under Spanish PIT law.

Charitable donations

Donations are considered to be non-deductible expenses for CIT purposes.

This notwithstanding, a tax credit may be availed for donations to non-profit organisations that comply with certain requirements. The tax credit in this case is 35% of the donation. However, if during the two immediately preceding tax periods, deductible donations or contributions have been made to the same company for an amount equal to or exceeding, in each case, those made in the previous tax period, the deduction percentage applicable to the deduction base for the company is 40% in or after 2016.

In addition, the tax credit is not limited to 25% of the donating company's gross tax payable less the deductions for international double taxation and tax relief for income obtained in Ceuta and Melilla, for export activities, and for local public services, which is applicable for other tax credits (*see CIT relief in the Tax credits and incentives section*).

The tax credit base cannot exceed 10% of the taxable income of the financial year. Any excess may be carried forward for a period of ten years.

For donations to listed priority sponsorship activities, the tax credit may be increased by 5% and the 10% tax credit base limit can be increased to 15%.

Fines and penalties

Penalties imposed due to the failure to pay taxes and surcharges for late filing/payment or for other tax infringements are not tax deductible.

The Spanish tax authorities usually consider that late payment interest recorded as an expense is tax deductible; however, some case law in Spain questions whether this interest is a taxable expense.

Taxes

Taxes, other than CIT, that are recorded as an expense due to their nature (e.g. business and professional activities tax, but not withholdings) are tax-deductible expenses. In some cases, indirect taxes, such as non-deductible VAT or transfer tax, can be added to the value of assets for depreciation purposes.

Net operating losses

For tax periods starting on or after 1 January 2015, tax losses may be carried forward for an unlimited amount of time. Tax losses pending offset at the beginning of the first tax period starting on or after 1 January 2015 may be offset in subsequent tax periods for an unlimited number of tax periods. As a general rule, tax losses cannot be carried back. There are no tax loss 'baskets' (operating/capital). Notwithstanding, for tax periods starting in or after 2015, companies whose turnover in the previous tax period was under EUR 10 million may reduce their positive tax base by up to 10% of their amount

by establishing a non-distributable reserve for the amount of the reduction (reserve for the levelling-off of tax losses). The reduction may not exceed EUR 1 million and should be reversed in line with the tax losses obtained by the company, subject to a five-year time limit.

For tax periods starting in or after 2016, the tax losses of any type of company can be offset against positive income generated in the ensuing tax periods, subject to a limit of 60% (70% in 2015) of their tax base prior to the application of the capitalisation reserve and the offsetting of the tax losses, and with the possibility that EUR 1 million can be offset in all cases. This limit does not apply: (i) in the tax period in which the company is extinguished, unless this is due to a restructuring operation carried out under the tax neutrality regime, and (ii) to any income corresponding to debt relief or deferral resulting from an agreement with creditors.

Complex rules may limit the use of tax losses of a company dissolved as a result of a restructuring operation and, in certain circumstances, when it has a change of shareholders.

Payments to foreign affiliates

Supplies of goods or services by a company not established in Spain to a Spanish group company must be valued at arm's length. If recorded expenses for such goods/services exceed the arm's-length price, the tax deductibility of the excess amounts could be challenged in a tax inspection. The tax deductibility of expense charges received from tax havens is fully disallowed unless proper evidence of an actual service valued at arm's length can be provided.

Management services received from outside Spain and recorded as distributions of costs of a group centre do not have to be documented in a written agreement entered into before the commencement of the services to ensure the tax deductibility of the expenses (as previously was the case), although it would be recommendable to have such an agreement. For any other types of services, an agreement recorded before a notary public is not obligatory under Spanish law, but it is advisable.

As regards the taxation in Spain of the foreign company that supplies services, the WHT rate to be applied in or after 2016 on the gross income obtained by the company is 24% (19% for residents in other EU member states or European Economic Area [EEA] countries with which there is an effective exchange of tax information). Dividends, interest, and capital gains generated as a result of a transfer of assets are taxed at a 19% WHT rate from 2016. If management services, technical assistance, or the performance of studies are solely used outside Spain and are linked to business carried on abroad, then no WHT is applicable. In addition, under most tax treaties signed by Spain, 'business profits' obtained in Spain by non-residents are exempt from WHT. However, 'business profits' is a miscellaneous residual category. For instance, if the amount obtained qualifies as a royalty payment, WHT is applicable at the reduced tax treaty rates if the foreign company can obtain a document from the tax authorities of its country of residence certifying its tax residence. If no tax treaty applies, then the above 24% (19% for residents in other EU member states or EEA countries with which there is an effective exchange of tax information) WHT rate is applicable (*see the Withholding taxes section for more information*).

PEs and interests in joint ventures

Losses obtained outside Spain by means of a PE are not tax deductible. Losses generated from interests in joint ventures that carry on a business activity outside Spain are not tax deductible either.

Negative income generated from the transfer of a PE is tax deductible when the transfer takes place, provided that the acquirer does not form part of the same corporate group.

Group taxation

Tax groupings for CIT purposes

Under Spanish tax law, companies can form a group and apply a special tax consolidation regime for CIT purposes. Companies forming a tax group must formally pass a resolution agreeing to do so before the beginning of the first tax year in which the tax consolidation regime will be applied.

To apply the tax consolidation regime, the controlling company of the tax group must hold a 75% or higher interest, either directly or indirectly, and the majority of the voting rights in the companies forming the tax group at the beginning of the first tax year in which the tax consolidation regime is applied, and this interest and voting rights must be maintained during the year unless the dependent company is dissolved. The interest requirement is 70% for companies listed on a stock exchange.

For tax periods starting in or after 2015, a non-resident company can also be the controlling company of a tax consolidation group, provided that it has legal personality, is taxed by Spanish CIT, and is not resident in a tax haven. When the controlling company is a non-resident company, the group is made up of all the resident controlled companies and one of the companies is required to be appointed as the representative of the group and will be responsible for complying with all of the group's obligations and formalities.

For tax periods starting in or after 2015, resident companies that meet the minimum holding and voting rights requirements through non-resident companies should be included in the tax consolidation group.

These rules mean that some changes need to be made to the composition of certain groups. They also allow for the possibility of horizontal consolidation.

The main characteristics of the tax consolidation regime are as follows:

- The taxable income of the tax group is the sum of the taxable incomes of each of the companies forming the group.
- The tax losses of any of the companies forming the group can be offset against the tax profits of any of the other group companies.
- For the calculation of consolidated taxable income, the tax profits (losses) generated from transactions carried out between group companies are eliminated and only included in consolidated taxable income when:
 - they are carried out with third parties
 - a group company participating in the internal operation ceases to form part of the tax group, and
 - the tax consolidation regime is no longer applied by the group for whatever reason.
- Specific limitations apply regarding the offsetting of tax losses or the application of tax credits generated by the group companies before they formed part of the tax group. Such tax losses/credits may be offset (applied) by the tax group up to the limit of the tax profits/tax liability of the company that generated the losses/credits after the relevant eliminations and, in the case of tax losses, up to 60% of the positive individual tax base for tax periods starting in 2016 (70% in 2015).
- No WHT is chargeable on payments made between companies of the tax group (e.g. interest, dividends).

Tax groupings for VAT purposes

Groups of companies may also choose to be taxed under a special tax consolidation regime for VAT purposes. This special regime is optional, but once it has been opted for, it must be applied for a minimum of three years, which is extendible unless it is expressly waived by the companies.

The VAT consolidation regime may only be applied by companies resident in Spanish VAT territory that do not form part of any other VAT grouping.

The controlling company of the group must be a legal entity or PE that is not dependent on any other entity established in Spanish VAT territory, and its interest in the capital or voting rights of the subsidiary companies of the group should be over 50% for the entire calendar year. A new requirement is established that group companies should be associated in three different ways: economic, financial, and organisational.

With the application of the VAT consolidation regime, there are two different options for taxation:

- The aggregation system, where the balances of the VAT returns of the individual companies of the group are totalled. The right to a tax deduction is exercised by the individual companies.
- The consolidation system, where an individual company can opt to reduce VAT taxable income for inter-company operations, which is limited to the 'external' cost.

Transfer pricing

All related-party transactions must be valued at market price, following the arm's-length principle (e.g. the value that in normal market conditions would have been established between unrelated parties).

For this purpose, related persons or entities shall be:

- A company and its shareholders or members.
- A company and its board members or directors, except insofar as concerns the remunerations of the latter.
- A company and the spouses of or persons related to its shareholders or members, board members, or directors, either in a direct line or collaterally, by consanguinity or affinity up to the third degree.
- Two companies of a group.
- A company and the board members or directors of another company, when both companies form part of a group.
- A company and the spouses of or persons related to the shareholders or members of another company, either in a direct line or collaterally, by consanguinity or affinity up to the third degree, when both companies form part of a group.
- A company and another company in which the former company has at least a 25% holding, held indirectly, in its share capital or shareholders' equity.
- Two companies in which the same shareholders or members or their spouses, or persons related to them either in a direct line or collaterally, by consanguinity or affinity up to the third degree, have at least a 25% holding, whether directly or indirectly, in their share capital or shareholders' equity.
- A company resident in Spanish territory and its PEs abroad.
- A company not resident in Spanish territory and its PEs in Spanish territory.
- Two companies forming part of a group taxed under the tax regime for groups of cooperative companies.

For cases where association exists as a result of a shareholder/member-company relationship, the shareholding must be 25% or more. The reference to directors shall include *de facto* and *de jure* directors.

The determination of the market value by taxpayers must be done through the application of one of the following transfer pricing methodologies: comparable uncontrolled price (CUP) method, cost plus (CP) method, resale price method (RPM), profit split method (PSM), or transactional net margin method (TNMM). There is no longer an order of priority in the use of these valuation methods. When it is not possible

Spain

to apply one of the methods established by the law, other generally accepted valuation methods and techniques based on the arm's-length principle can be used.

Documentation is also a requirement, with taxpayers required to produce group-level and taxpayer-specific documentation for each tax year. Related persons or entities must keep such documentation available for the tax authorities as of the end of the voluntary return or assessment period in question. Some exceptions are established for these documentation requirements.

Documentation is always required for transactions with entities, whether related parties or otherwise, that are resident in tax havens.

For tax periods beginning in or after 2016, a new level of documentation is introduced for Spanish resident parent companies of a commercial group that are not controlled by another company and for Spanish resident subsidiaries controlled by a non-resident company that, at the same time, is not controlled by another company or by PEs of non-resident companies. These companies must submit information annually 'country by country' whenever the group's turnover during the 12 months before the beginning of the tax period is at least EUR 750 million.

Please note that specific penalties may be imposed in the event of the absence of documentation or where data are omitted, inaccurate, or false.

Thin capitalisation

Thin capitalisation rules have been repealed.

Controlled foreign companies (CFCs)

Spanish CFC rules seek to avoid the effects produced when Spanish tax resident companies or individuals place their capital in low-taxed foreign companies to avoid including passive income generated by such capital in their taxable bases or the effects produced when a subsidiary located in a low-taxed jurisdiction provides services to its Spanish resident parent company that reduces the latter's taxes.

Under this regime, Spanish tax resident companies pay Spanish CIT on the income obtained by a non-resident subsidiary upon meeting certain requirements, including, specifically, the requirement that the Spanish parent company must own, individually or together with other related companies or individuals, over 50% of the non-resident subsidiary's share capital, equity, profits, or voting rights, and the CIT payable by the non-resident subsidiary must be under 75% of the tax that would be payable in Spain.

CFC rules are not applicable to EU resident companies if they are set up for economic reasons and carry on a business activity or to the Collective Investment Institutions regulated in EU Directive 2009/65/CE other than those established in Section 54 of the Spanish CIT Act and domiciled in an EU member state.

There are two types of CFC:

- A 'global CFC' regulation applies if the non-resident company does not have at its disposal an adequate structure of material and human resources unless it can justify that its operations are performed using material and human resources existing in a non-resident company of its same corporate group or that there are valid economic reasons for its incorporation and operations. With this regulation, all income obtained by the company not resident in Spanish territory should be included in the Spanish company's tax base. However, dividends, stakes in profits, or income arising from the transfer of an interest should not be included when the interest exceeds 5%, the minimum ownership period is one year, and the interest is held for the purpose of directing and managing the investee if the investee has an adequate structure of material and human resources and, by law, it is not an equity company.

- When the conditions for applying the international tax transparency regime are met and the requirements for the application of the 'global CFC' are not met, the following income obtained by non-resident investees should be included in the Spanish company's tax base:
 - Income generated from real estate assets not assigned to a business activity.
 - Income generated from an interest held in the equity of any type of company and from the assignment of own capital to third parties.
 - Capitalisation and insurance operations in which the beneficiary is the company itself.
 - Income generated from industrial and intellectual property, technical assistance, real estate, image rights, and the leasing or sub-leasing of businesses and mines.
 - Income generated from transfers of the aforementioned assets and rights.
 - Income generated from lending, financial, and insurance activities and the provision of services if they generate a taxable expense in the Spanish resident company. The positive income obtained in this case will not be included if over 50% of the gross income obtained by the non-resident company due to these services comes from services provided to non-related companies.
 - Income generated from derivative financial instruments.

The types of income indicated above should not be imputed when the sum of these amounts is less than 15% of the total income obtained by the non-resident company, unless the income is generated from derivative financial instruments, which should be imputed in its entirety.

In addition, the ordinary level of CFC will not apply if the income indicated above corresponds to non-taxable expenses incurred by Spanish tax resident companies.

Tax credits and incentives

Foreign tax credit

See Foreign income in the Income determination section for a description of double tax relief.

CIT relief

No specific tax relief is established in Spanish law for foreign investors. Relief may be availed of by Spanish and foreign-owned companies alike. The tax relief available under CIT law in Spain is as follows.

Most of the tax credits that have been established to promote certain investments have been eliminated. However, the largest tax credits are maintained (tax exemption/deduction credit to prevent internal and international double taxation, tax credit for R&D, and tax credit for technological innovation).

Tax relief for business activity/place of business activity

- 50% tax credit on CIT levied on income obtained in Ceuta and Melilla through companies established and carrying on activities during a full business cycle in these enclaves because of their specific geographic location.
- 99% tax credit on the CIT levied on income obtained from the supply of local public services, except when the state company in question is owned, partially or wholly, by a quoted/non-quoted company or individual.

R&D and technological innovation credits

A 25% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average R&D expenses incurred by the company during the previous two years, the tax credit is 42% for the excess amount.

Spain

An additional tax credit of 17% can be availed of for staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.

An 8% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets that are exclusively assigned to R&D activities.

A 12% tax credit can be availed of for technological innovation activities.

Tax relief for R&D and technological innovation can be excluded from the limits on tax relief applied on tax liabilities (*see below for Limits on the amount of tax credit applied*), which will have a cost of 20% of the tax relief applied, meaning that, if certain requirements are met, 80% of the tax relief for R&D and technological innovation may reduce tax liability after double tax deductions and tax allowances to zero, and any excess tax relief (up to its 80%) may be refunded by the tax authorities.

The requirements for the exclusion of the R&D and technological innovation tax reliefs from the tax relief limits are as follows:

- One tax period has passed since the tax relief was generated and the tax relief has not been applied.
- An amount equal to the tax relief applied or paid has been allocated to R&D and technological innovation expenses or to investments in tangible fixed assets or intangible assets used exclusively for R&D and technological innovation activities, excluding real property, within 24 months of the end of the tax period when the tax relief was applied or paid.
- The taxpayer's average number of staff (staff in general or staff assigned to R&D and technological innovation activities) has not decreased between the end of the tax period when the tax relief was generated and the end of the reinvestment period.
- The taxpayer has a report that certifies that the activities are R&D and technological innovation activities or it has made an advance agreement with the Spanish tax authorities regarding the valuation of the expenses and investments of the project.

The following should also be taken into consideration:

- The tax relief applied or paid for technological innovation in accordance with the foregoing comments may not exceed a total of EUR 1 million per year.
- The sum of the tax relief applied or paid for technological innovation and the tax relief applied or paid for R&D innovation in accordance with the foregoing comments may not exceed a total of EUR 3 million per year.

If R&D expenses for the year exceed 10% of turnover, an additional amount of EUR 2 million per year of tax credit for R&D can be applied or paid without limitation and with a 20% discount.

Tax relief for invested profits

Tax relief for invested profits has been eliminated for tax periods starting on or after 1 January 2015.

This tax relief gave small companies a 10% reduction of their taxable profits, provided that such profits were reinvested in new tangible fixed assets or real property investments used for business activities and certain requirements were met.

Taxpayers may avail of this tax relief for profits generated in tax periods starting between 1 January 2013 and 31 December 2014 even when the investment is made and the other requirements are met in tax periods starting in or after 2015.

Reinvestment of extraordinary income

The tax credit for reinvestment of extraordinary income has been eliminated for tax periods starting on or after 1 January 2015.

Taxpayers may continue to avail of the tax credit for income obtained in tax periods starting prior to 1 January 2015 when the reinvestment is made and the other requirements are met in tax periods starting after that date.

The tax credit can also be applied for sales with instalment payments, although, in this case, the tax credit is 10% if the income is included in the tax base for tax periods starting in or after 2016.

Capitalisation reserve

The tax base can be reduced by 10% of the increase in equity made in the preceding year, provided that the equity is maintained for a period of five years (except when losses are made), subject to a limit of 10% of the positive tax base of the period prior to this reduction. If this tax base is insufficient, pending amounts may be offset in subsequent tax periods. To apply this tax relief, a reserve should be allocated for the amount of the reduction, which should be undistributable for a period of five years.

Tax credits for film productions and live performing arts and musical shows

Investments in Spanish feature-length film productions and the production of audio-visual fiction, animation, or documentary series, where physical copies can be produced prior to serialised industrial production, entitle the producer to a 20% tax credit on the first EUR 1 million of the tax credit base and an 18% tax credit for any excess tax credit base. The tax credit may not exceed EUR 3 million.

A territory requirement is introduced, and this tax relief may only be applied for productions mainly carried out in Spain.

For foreign productions, a tax credit of 15% of expenses incurred in Spain can be applied if certain requirements are met. The tax credit may not exceed EUR 2.5 million. The limit of 25% of gross tax payable does not apply in the case of this tax credit, meaning that gross tax payable may be reduced in its entirety, and if tax payable is not sufficient, the taxpayer may request the difference from the tax authorities in its CIT return.

Taxpayers are eligible for a 20% tax credit for expenses incurred for producing and performing live performing arts and musical shows. This tax credit may not exceed EUR 500,000.

Tax credit for increases in the number of disabled workers

A tax credit can be applied for increases in the number of disabled workers contracted per year on a permanent and full-time basis. The tax credit is EUR 9,000 per worker contracted whose level of disability is 33% or more, but less than 65%, and EUR 12,000 per worker contracted whose level of disability is 65% or more. This increase is calculated by taking the average number of company workers of each of these categories in the tax year in question that meet the established requirements and comparing it with the company's average number of staff in the same category in the previous tax year.

Reserve for levelling-off of tax losses

The possibility of reducing the positive tax base of small companies by up to 10% by establishing a non-distributable reserve for the amount of the reduction is introduced (reserve for the levelling-off of tax losses). The reduction may not exceed EUR 1 million and should be reversed in line with the tax losses obtained by the company, subject to a five-year time limit.

Spain

Limits on the amount of tax credit applied

The combined sum of all investment tax credits may not exceed 25% of the company's gross tax payable less deductions for international double taxation and tax relief for income obtained in Ceuta and Melilla, for export activities, and for local public services. When R&D and technological innovation tax credits for expenses and investments in the year exceed 10% of the company's gross tax payable, less tax credits and relief mentioned above, the limit will be 50%.

Time limits for the application of tax credits

Tax credits that are not applied in the tax period owing to insufficient tax payable may be applied in tax periods ending in the 15 years immediately thereafter. However, R&D and technological innovation tax credits may be applied in tax periods ending in the 18 years immediately thereafter.

Special tax regimes

Special tax regimes are applicable, among others, in the following cases:

Spanish and European Economic Interest Groupings and Temporary Consortia of Entities

- Spanish Economic Interest Groupings (SEIGs) that meet certain requirements will not be subject to Spanish CIT on the part of the taxable income that corresponds to members resident in Spain for tax purposes. Such part of the positive or negative taxable income shall be deemed to be the profits/losses of the SEIG members. The proportional part of tax credits and payments in advance will also be assigned to the Spanish tax resident members of the SEIG where they are subject to CIT or PIT. Dividends distributed to SEIG members that have been subject to imputation will not be taxed under CIT or PIT on distributions. Dividends distributed to Spanish non-resident SEIG members will be taxed in accordance with the Spanish NRIT law and Conventions for the Avoidance of Double Taxation.
- European Economic Interest Groupings (EEIGs) will be taxed under the above-mentioned regime with the following exception: EEIGs will not be subject to Spanish CIT.

If the EEIG is not resident in Spain for tax purposes, Spanish tax resident members will include the corresponding part of the profits or losses determined for the grouping, corrected by applying the rules for determining taxable income for CIT or PIT purposes, as applicable. When the activity carried out by the members through the grouping determines the existence of a PE abroad, the rules provided for in this law or in the respective treaty for the avoidance of double international taxation will be applicable.

Non-Spanish tax resident members will only be subject to Spanish NRIT when the activity they perform through the grouping determines the existence of a PE in Spanish territory.

Dividends distributed to non-Spanish tax resident members that have been subject to imputation will not be taxed in Spain on the distribution.

- Temporary Consortia of Entities (TCEs) are taxed under the SEIG regime. Members of a TCE operating abroad may apply the exemption for double taxation on income obtained by the TCE abroad through a PE or the deduction for the avoidance of international double taxation on income obtained by the TCE abroad. Losses obtained abroad by members of TCEs are not tax deductible.

Restructuring transactions

The special tax regime for restructuring transactions is a tax neutrality regime implemented under EU Directive 2009/133. As a general rule, under this regime, asset transfers carried out through such transactions do not have any tax implications

(either from a direct, indirect, or other Spanish tax perspective) for the parties involved (transferor, beneficiary, and shareholder), until a subsequent transfer takes place that is not protected by this regime.

The transactions that can be taxed under this regime are mergers, global transfers, spin-offs of business units/majority interests, splits, share-to-share transactions, contributions of business units, and contributions of assets (this last transaction is not fully tax-protected). Each of them must comply with a series of requirements for the application of the regime.

Transfers of registered offices of an EU company or cooperative society between EU member states will not generate any tax for the company/cooperative society's shareholders on their income, profits, or capital gains.

The tax credit position of a company dissolved as a result of a tax-protected restructuring transaction is 'acquired' in full by the beneficiary company in the case of universal succession.

The 'acquired' tax credits only include tax credits that are obtained in relation to assets transferred in transactions where the transferor is not dissolved or the succession is not a full succession for Spanish commercial purposes.

Tax losses may be transferred not only when the transferring company is dissolved but also when a line of business is transferred (in the latter case, only tax losses related to this line of business will be transferred), subject in both cases to certain restrictions.

Financial goodwill arising in a merger transaction in which the acquirer owns an interest of at least 5% in the capital of the transferor is amortised for tax purposes at a maximum annual rate of 5% at the level of the Spanish beneficiary company of the merger, provided that such interest was acquired in a tax period that, for the transferor, commenced before 1 January 2015. Amortisation of financial goodwill does not have to be recorded in the income statement for it to be tax deductible.

When the interest has been acquired in a tax period that, for the transferor, commenced on or after 1 January 2015, this tax incentive, which aims to correct double taxation, will not be applicable, as, initially, the whole transferring company's capital gain will benefit from the tax exemption for the avoidance of double taxation, provided that the transferring company is a Spanish CIT payer.

This tax regime cannot be applied if the transaction is carried out for the purpose of tax fraud or evasion (anti-abuse clause). An additional anti-abuse clause in line with the clause established by the EU directive is established in Spanish law to ensure that the tax regime cannot be applied if the transaction is not carried out for valid economic reasons, such as the streamlining of activities or group restructuring to gain efficiency, but to obtain a tax benefit. If the tax authorities decide, as a result of its verification procedures, that the special tax regime is not applicable, either fully or partly, as there are no valid economic reasons for the transaction, the only implication will be that the effects of the tax benefit obtained will be eliminated.

The special tax neutrality regime is applicable by default to restructuring operations. When these operations are carried out, the tax authorities should be notified of the type of operation and, when the case, whether the taxpayer opts not to apply the special tax regime. Failure to notify the tax authorities of this matter is a serious tax offence and carries a fine of EUR 10,000.

For debts incurred to acquire companies, the interest should be deducted for tax purposes taking into consideration the acquirer's operating profits, excluding the operating profits of any company with which the acquirer may merge during the four

Spain

years following the acquisition. These financial expenses should also be taken into account for the purpose of the general financial expenses limit applicable.

Expenses that are not tax deductible owing to the application of this special rule can be deducted, subject to the above limits, in subsequent tax periods for an unlimited period of time. The limit is not applicable when the debt associated with the acquisition of the interest in the company reaches a maximum of 70% and is reduced, as from the time of the acquisition, by at least the proportional part corresponding to each of the following years until a level equal to 30% of the acquisition price is reached.

This limit does not apply to restructuring operations carried out before 20 June 2014 or to restructuring operations carried out on or after 20 June 2014 between companies that formed part of the same tax consolidation group in tax periods starting on or after that date.

Tax transparency

Tax transparency (under international CFC rules) is not applicable for companies resident in the European Union, provided that the taxpayer can prove that the non-resident company has been set up and operates for valid economic reasons and carries out a business activity or that it is a collective investment institution regulated in EC Directive 2009/65/CE and not established in Section 54 of Spanish CIT Act that has been set up and is domiciled in an EU member state.

See CFCs in the Group taxation section for more information.

Venture capital companies and funds

Venture capital companies (VCCs) and funds (VCFs) may benefit from the following tax regime if certain requirements are met:

- Dividends from target companies may benefit from the tax exemption for the avoidance of double taxation, irrespective of the percentage of the interest or the holding period.
- Capital gains arising from the transfer of shares in target companies that do not meet the requirements for the application of the tax exemption for the avoidance of double taxation may be 99% exempted from CIT, provided that such shares have been held for a period between two and 15 years.
- Profit distributions to VCC and VCF shareholders may benefit from the tax exemption for the avoidance of double taxation, irrespective of the percentage of the interest or the holding period, if the shareholders are Spanish tax residents or have a PE in Spain. Income from profit distributions to non-Spanish tax resident shareholders without a PE in Spain is not subject to taxation in Spain unless it is obtained through a tax haven. The same regime applies to the transfer of shares in VCCs and VCFs.

Collective Investment Institutions (CIIs)

CIIs are subject to CIT at a reduced rate of 1%. They are not entitled to apply the tax exemption for the avoidance of double taxation on dividends and capital gains arising from the transfer of shares or a deduction for the avoidance of international double taxation. Dividends distributed by these institutions are subject to the general WHT regime. Shareholders are taxed on dividends received from the CII and on capital gains obtained for the transfer of the CII without being entitled to the application of the tax exemption for the avoidance of double taxation on dividends and capital gains arising from the transfer of shares or a deduction for the avoidance of international double taxation.

Lease transactions

Financial leasing contracts with a purchase option that may be exercised at the end of the lease period may benefit from a special tax regime if they meet certain requirements.

According to this regime, the lessee may deduct the following expenses from its taxable income:

- The part of the lease payments that corresponds to the financial charge (interest) paid to the lessor.
- The part of the lease payments that corresponds to the recovery of the cost of the leased object. Tax deductibility for this amount may not exceed the result of applying twice the straight-line depreciation/amortisation rate applicable on the leased object in accordance with the official depreciation/amortisation tables.

Spanish holding companies of foreign companies (Entidad de Tenencia de Valores Extranjeros or ETVE) regime

Spanish resident companies whose corporate purpose includes the holding and management of foreign companies' shares and that, by law, are not equity companies (i.e. companies that do not carry on a business activity) are granted some tax benefits, subject to compliance with certain requirements.

The tax authorities must be notified of the application of this tax regime.

In addition, the distribution of profits by the holding company to non-resident companies or individual shareholders is not taxable in Spain if such profits come from income generated from non-resident companies and may benefit from the tax exemption for the avoidance of double taxation on dividends and capital gains arising from the transfer of shares or from income obtained abroad through a PE that may benefit from the exemption for the avoidance of international double taxation of income obtained through a PE unless the profits are distributed to a tax haven. Resident company shareholders are entitled to an internal tax credit on dividends under Spanish law.

Small and medium-sized companies

Small and medium-sized companies are eligible for tax relief, such as accelerated depreciation/amortisation or more favourable bad debt provision treatment. To be eligible for this relief, turnover in the previous tax year must not exceed EUR 10 million and, by law, the company must not be considered an equity company (a company that does not carry on a business activity). In the case of a group, the turnover of all the companies must be considered for this purpose. Companies that generate a turnover of EUR 10 million that have met the requirements to be considered small and medium-sized companies in the tax period in which they obtained such turnover and in the two previous tax periods may be eligible for this tax relief during the three periods immediately after the period in which they obtain this turnover.

For tax periods starting in or after 2016, the applicable CIT rate is the general rate (25%).

S

Special tax regime for companies that lease housing

Companies whose main business activity is the lease of housing located in Spain that they have constructed, promoted, or acquired may apply a special tax regime that significantly reduces CIT liability, provided that certain requirements are met.

Real Estate Investment Trust Regime (SOCIMI)

A special tax regime is established in Spain for listed companies that make investments in the real estate market (called SOCIMIs in Spain) and meet certain requirements. SOCIMIs apply a 0% CIT rate and have strict profit distribution obligations.

Special economic and tax regime of the Canary Islands

Due to the remoteness and isolation of the Canary Islands, they have traditionally enjoyed a special economic and tax regime with specific economic and tax measures different to those established for the rest of Spain. *See the Tax credits and incentives*

Spain

section of Spain's Corporate tax summary at www.pwc.com/taxsummaries for more information.

Withholding taxes

Ordinarily, WHT is the mechanism by which the Spanish tax authorities collect the final tax levied on non-residents. In the case of resident beneficiaries, however, it is simply an advance payment of a tax that is then normally self-assessed by the resident taxpayer in the final annual tax return.

The advance payment system of WHT for resident beneficiaries referred to above also applies if non-resident companies/individuals not established in Spain sell their title to Spanish real estate. In this case, the acquirer of the real estate must levy a 3% WHT on the selling price on account of the tax chargeable to the seller on its capital gain (19% from 2016). Other capital gains (for instance, from a sale by a non-resident of a substantial interest in a Spanish company where neither a tax treaty nor internal rules establish a tax exemption) are taxed in the hands of the non-resident transferor, but the mechanics of levying the tax are not those of a WHT. In this case, the non-resident's tax is paid directly, through its representative or by the depositor or manager of the assets in question, if any.

The following table states the general WHT rates on income obtained by resident/non-resident companies. The most significant peculiarities regarding the rates for each type of income are stated in footnotes to the table.

Withholding rates

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations and individuals	19 (1a)	19 (2a)	19 (2b)

Notes

The general rates in the table above are for guidance only and should not be treated as tax advice.

The rates above are for income obtained by non-residents that is not related to any PEs that they may have in Spain.

* Aside from these tax treaties, the following tax treaties are not yet in force, as they are currently being negotiated or are not yet approved or published: Azerbaijan, Bahrain, Belarus, Cabo Verde, Montenegro, Namibia, Peru, Qatar, and Syria.

** These tax treaties are currently being renegotiated.

1.
 - a. If a corporate taxpayer, as a shareholder, is entitled to a tax exemption for the avoidance of double taxation on the dividends received, no WHT is levied. As a general rule, corporate shareholders with at least a 5% interest held for at least one year may apply this tax exemption on the dividends received.
 - b. For residents of other EU member states or EEA countries with which there is an effective exchange of tax information, the rate is 19% in or after 2016.
2.
 - a. The 19% WHT rate does not apply if, amongst other cases, the recipient is a resident bank or savings or other financial institution subject to CIT, provided that this income is not portfolio income. In addition, no WHT is levied on interest arising between companies taxed under the tax consolidation regime.
 - b. A 19% WHT rate is levied on income generated under royalty and technical assistance agreements, from leases or from the granting of rights when ownership is not transferred. A 24% rate is levied on fees received by a company for the transfer of rights to an image or consent or authorisation to its use.
3. Implementation of the EU Parent-Subsidiary Directive in Spanish law gives EU shareholders a WHT exemption on dividends from Spanish companies, subject to compliance with certain requirements. Luxembourg recipients of income that are companies under paragraph 1 of the Protocol to the Tax Treaty with Spain (holding companies) are not allowed this exemption.
4. The EU Interest and Royalties Directive WHT exemption for interest obtained by EU lenders is applicable when appropriate.
5. Taxable income from supplies of services, technical assistance, or assembly/installation work under engineering contracts provided or carried out by non-resident companies with no PE in Spain does not follow the general rule for gross income. In such cases, total income can be reduced by related staff costs, certain supplies (water, electricity, telephone), and materials used for the services/work, provided that, in the case of staff costs, evidence can be furnished that they were actually taxed in Spain. According to the EU Interest and Royalties Directive, royalties paid to other EU member state associate companies are exempt from WHT.
6. A 5% WHT is levied if the recipient is a company that holds at least 10% of the capital of the company paying the dividends; no WHT is levied if the recipient company holds at least 75% of the capital of the company paying the dividends.
7. Levied if the recipient is a company holding at least a 10% interest in the paying company; otherwise, a 15% rate is levied.

8. Interest paid by certain public institutions is tax exempt.
9. Interest paid to certain public institutions is tax exempt.
10. Interest arising from the acquisition of commercial, industrial, or scientific equipment is tax exempt.
11. Interest paid on loans granted by a bank or other financial institution is tax exempt.
12. For royalties for any copyright of artistic, scientific, or literary work (including cinematograph films and films or tapes for radio or television broadcasting), the rate levied is 14%.
13. Levied if the recipient is a company holding at least a 25% interest in the paying company; otherwise, a 15% rate is levied.
14. No WHT is levied on interest when both contracting states agree this and the loan is for no less than five years.
15. No WHT is levied on dividends if the beneficial owner is a company (other than a partnership) that holds at least 25% of the capital of the company paying the dividends.
16. Levied if the recipient is a company holding a direct interest of at least 50% in the paying company for at least one year; otherwise, a 15% rate is levied.
17. No WHT is levied if the recipient is a company holding at least a 25% interest in the paying company.
18. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 50% of whose shares are directly or indirectly held by non-residents. This clause will not apply if the company can prove that it carries out important industrial or commercial activities and does not merely manage or hold shares.
19. A tax exemption can be applied to interest on commercial loans, loans guaranteed by public bodies for the promotion of exports, and on current accounts in banks or nominative advances between banks of both contracting states.
20. Royalties for any copyright of literary, theatrical, musical, or artistic work (with some exceptions, such as films and TV programs) are exempt from WHT.
21. 5% WHT is levied if the recipient (beneficial owner) is the shareholder of the paying company with at least a 20% interest; otherwise, 10% WHT is levied.
22. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state or its political divisions; (iv) the recipient is a financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.
23. Levied if the recipient is a company that directly holds at least 25% of the capital of the paying company; otherwise, a 10% rate is levied. However, if, under the provisions of Spanish CIT legislation and any future amendments, a company resident in Spain is not taxed by Spanish CIT on the dividends that it receives from a company resident in Uzbekistan, the 5% WHT rate shall be reduced to 0%.
24. The maximum WHT is 10% for interest paid to financial institutions for loans and credits granted for a minimum term of ten years for the purchase of capital equipment.
25. Interest arising from securities issued by a contracting state is exempt from WHT.
26. A 10% WHT rate is levied on royalties for copyrights of any literary, scientific, or artistic work (including films and TV programs).
27. Levied if the beneficial owner is a company (excluding partnerships) with at least a 25% interest in the paying company held directly or indirectly; otherwise, a 15% rate is levied.
28. A reduced WHT rate is only levied if the income is taxed in Canada; otherwise, the general rate is levied.
29. Levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly; otherwise, a 10% rate is levied.
30. Interest arising from bank or insurance company loans, bonds, some securities that are regularly negotiated on stock markets, and credit sales of industrial equipment are taxed at a 5% tax rate.
31. A 5% WHT rate is levied on royalties for the use of industrial, commercial, or scientific equipment.
32. WHT is levied on 60% of gross royalties for the use of industrial, commercial, or scientific equipment.
33. A 0% WHT rate is levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly.
34. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a loan granted by a bank or financial institution resident in a contracting state.
35. A 5% WHT is levied if the beneficial owner is a company that directly holds at least 20% of the capital of the company paying the dividends.
36.
 - a. 5% WHT is levied if the interest is paid on a long-term loan (more than five years).
 - b. No WHT is levied: (i) if interest is paid to a Croatian bank, (ii) on interest arising from the acquisition of commercial, industrial, or scientific equipment, (iii) on interest arising from a credit sale.
37. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a long-term loan (five or more years) granted by a bank or financial institution resident in a contracting state.
38. Royalties for copyrights of any literary, theatrical, musical, or artistic work, excluding films and TV programs, are tax exempt if the recipient is resident in the other contracting state and taxed on such income in such state.
39. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial, or scientific equipment, the sale of merchandise from one business to another business, or the financing of construction, installation or assembly works. No WHT is levied if the interest is paid on a long term loan (more than five years) or if the interest is paid to the other contracting state or one of its political subdivisions or a financial institution totally owned by the other contracting state or one of its political subdivisions.

Spain

40. A 5% WHT rate is levied on royalties for copyrights of any literary, theatrical, musical, or artistic work (excluding films and TV programs).
41. A 9% WHT rate is levied on the gross amount of the dividends if the beneficiary owner is a company (other than a partnership) that has at least a 25% direct interest in the company paying the dividends.
42. WHT is not levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its public bodies or local authorities, or if the interest is paid to the Central Bank of the other contracting state.
43. No WHT is levied if the recipient is a company with at least a 50% direct interest in the company paying the dividends, provided that the dividends are distributed from profits taxed in Spain.
44. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions, (iii) the interest arises from a loan or credit granted by a contracting state or its political divisions, (iv) the recipient is a qualifying financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.
45. No WHT is levied if the French company has at least a 10% direct interest in the company distributing the dividend.
46. No WHT is levied if the French company receives interest (i) from the other contracting state or any of its political divisions; (ii) from a resident in the other contracting state from an underlying commercial or industrial activity; (iii) in connection with a credit sale of industrial, commercial, or scientific equipment; or (iv) for a loan granted by a financial institution.
47. No WHT is levied on royalties on copyright of any literary or artistic work (excluding films and TV programs) if the recipient is the beneficiary owner or royalties paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.
48. Dividends and interest may be taxed at source under domestic law when (i) they are generated from any right (including credits) that allows for shares in profits (such as shares, bonds, or participating loans) and (ii) they are tax deductible for the debtor. Notwithstanding, WHT may not exceed 15% when the beneficial owner is tax resident in the other contracting state.
49. Levied if the recipient is a company with at least a 25% direct interest in the paying company; otherwise, a 10% rate is levied.
50. No WHT is levied on interest if: (i) the interest is paid by a contracting state, one of its political subdivisions, or one of its local entities; (ii) the interest is paid to the other contracting state, one of its political subdivisions, or one of its local entities or to a body (including financial institutions) of such contracting state; or (iii) the interest is paid to another body (including financial institutions) in relation to loans granted by virtue of an agreement between both contracting states.
51. No WHT is levied on interest paid to the Central Bank of the other contracting state.
52. No WHT is levied on interest paid to companies in the other contracting state if the operation that generates the debt has been authorised by the government of the state where the company paying the interest is resident.
53. A 10% WHT rate is levied on royalties for the use or cession of use of industrial, commercial, or scientific equipment. The general 20% WHT rate is levied on technical services and other royalties.
54. No WHT is levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its local entities or if the interest is paid to the Central Bank or a financial institution controlled by the other contracting state, its political subdivisions, or its local entities.
55. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment.
56. Levied if the recipient is a company with at least a 20% interest in the paying company; otherwise, a 10% rate is levied.
57. Royalties for copyright on literary, theatrical, musical, or artistic work are taxed at a 5% WHT rate. Royalties on films or other means of audio or video transmission, for the use or right to use industrial, commercial, or scientific equipment, or on scientific works or under agreements between both states are taxed at an 8% rate.
58. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial, or scientific equipment, the sale of merchandise from one business to another business, or loans granted by a financial institution.
59. No WHT is levied on interest if the beneficial owner of the interest is a resident of the other contracting state and: (i) the beneficial owner of the interest is that contracting state, its central bank, a political subdivision, or a local authority; (ii) the interest is paid by the contracting state in which the interest arises or by a political subdivision, a local authority, or non-profit-making statutory body thereof; (iii) the interest is paid in respect of a loan, debt-claim, or credit that is owed to, or made, provided, guaranteed, or insured by that contracting state or a political subdivision, a local authority, or an export facilitating agency thereof; (iv) the beneficial owner of the interest is a financial institution; or (v) the beneficial owner of the interest is a qualifying pension fund and the income of that fund is generally exempt from tax in that other contracting state.
60. A 4% WHT rate is levied on royalties for copyright on literary, theatrical, musical, or artistic work (excluding films and TV programs).
61. Reduced WHT rates are not levied when more than 75% of the shares of the recipient company resident in a contracting state are owned, directly or indirectly, by non-residents and the income generated by the paying company is not taxed in its country of residence.
62. Levied if the recipient is a company with at least a 25% interest in the paying company; otherwise, a 15% rate is levied.
63. No WHT is levied on interest arising from a loan guaranteed by a contracting state.
64. Consideration received for waiving, either totally or partially, the use or right to use goods or rights is considered to be a royalty.
65. No WHT is levied on interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or on interest paid on a long-term loan (five or more years) granted by a bank or credit institution resident in a contracting state.

66. No WHT is levied if the recipient is a company with at least a 5% direct interest in the paying company.
67. A 5% WHT rate is levied on royalties for technical services.
68. No WHT is levied on dividends paid to a shareholder resident in the other contracting state of the company distributing the dividend with at least a 25% interest.
69. A 10% WHT rate is levied on interest received by a bank (beneficial owner).
70. Levied if the recipient is a company with at least a 50% direct interest in the paying company. A 5% WHT rate is levied if the recipient is a shareholder with at least a 25% direct interest; otherwise, a 10% rate is levied. WHT is reduced to 5% if the recipient company is not taxed in the Netherlands for this dividend.
71. WHT is reduced to 10% if the recipient is a Dutch company with at least a 50% direct interest in the paying company or if the recipient holds 25% of its capital and another Dutch company holds at least the other 25%.
72. No WHT is levied on capital gains from sales of assets/rights when they are considered to be a royalty.
73.
 - a. No WHT is levied on fees paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.
 - b. A 5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 50% of voting shares of the company paying the dividends; a 7.5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 25% of voting shares of the company paying the dividends.
74. Levied if the recipient is a shareholder of the paying company holding voting rights with at least a 10% direct interest; otherwise, a 15% rate is levied.
75. A 10% WHT rate is levied on interest paid for bonds or similar securities generally offered to investors and related to transfers of industrial, commercial, or scientific equipment. No WHT is levied on interest from bonds or similar securities issued by the state or a local entity or from loans given or guaranteed by either of the two contracting states, Central Banks, or financial institutions as agreed between the contracting states.
76. A 20% WHT rate is levied on royalties for films or audio or TV tapes.
77. No WHT is levied on interest from loans granted or guaranteed by a contracting state.
78. If the recipient has invested more than EUR 100,000 in the company that pays the dividend or the dividend is tax exempt in its country of residence, the WHT rate levied is 10%. If both of these requirements are fulfilled, the rate applicable is 5%.
79. Interest on loans with a maturity period of over seven years is tax exempt.
80. A 10% WHT rate is levied on any patents, trademarks, designs or models, plans, secret formulae, or processes and computer software, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experiences. A 5% WHT rate is levied on any copyright of literary, artistic, or scientific work, excluding computer software and including cinematographic films or tapes used for radio or television broadcasting.
81. No WHT is levied on interest paid to a contracting state, one of its political subdivisions, or one of its local entities or interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or interest paid on any long-term loan (seven years minimum) granted by a bank resident in a contracting state.
82. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment or merchandise.
83. No WHT is levied on dividends when they are paid to a shareholder with at least a 10% interest held for at least one year, provided that the company distributing the dividends is effectively taxed.
84. No WHT is levied on dividends when they are paid to a shareholder with at least 10% direct interest.
85. No WHT is levied if the royalties are paid between associated companies, affiliated by at least a 25% direct interest held for at least two years or both held by a third company with at least a 25% interest in both companies held for at least two years, and CIT is levied on all of the companies.
86.
 - a. A 10% WHT rate is levied on interest received by financial and insurance entities. No WHT is levied on interest from loans granted by the government, Central Bank, or certain institutions.
 - b. A 5% WHT rate is levied on royalties for any copyright of literary, artistic, theatrical, musical, or scientific work (excluding cinematograph films and films or tapes for radio or television broadcasting); an 8% WHT is levied on financial leasing related with the use or the right to use industrial, commercial, or scientific equipment.
87.
 - a. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 75% of whose shares are directly or indirectly held by non-residents and such income is not subject to taxation in such contracting state.
 - b. Levied if the recipient is a shareholder of the paying company with at least a 50% interest; otherwise, a 15% rate is levied.
88. A 5% WHT rate is levied for long-term loans (more than seven years).
89. The WHT rate is 10% if the interest arises from a loan granted by a bank or is related to a credit acquisition of merchandise or equipment.
90. Levied if the recipient is a shareholder of the paying company with at least a 10% interest; otherwise, a 15% rate is levied.
91.
 - a. No WHT is levied on royalties paid for the use or licensing of containers used in international trade.
 - b. No WHT is levied on dividends when they are paid to a company holding at least a 75% direct interest in the paying company.
92. No WHT is levied if the interest is paid on a long-term loan (more than three years) to finance investment projects if the interest is paid to a pension fund that meets certain requirements or if the interest is paid in relation to a credit acquisition of merchandise, equipment, or services.

93. A 5% WHT is levied on royalties for any copyright of literary, artistic, or scientific work.
94. A 4.95% WHT rate is levied on interest received by financial institutions.
95. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the interest is paid by one contracting state or its political divisions, (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state to promote exports and development, (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income generated from the fund is tax exempt in the contracting state paying the dividend, or (v) the interest is paid in relation to the credit acquisition of industrial, commercial, or scientific equipment.
96. Levied if the recipient is a shareholder of the paying company with at least a 50% interest. A 10% WHT rate is levied if the recipient is a company with at least a 25% direct interest; otherwise, a 15% rate is levied.
97. No WHT is levied on interest arising from loans granted or guaranteed by qualifying public institution or interest paid to public financial institutions.
98. No WHT is levied if the recipient is a company (other than a partnership) with at least a 25% direct interest in the paying company; otherwise, a 5% rate is levied.
99. No WHT is levied if the recipient is a company with at least a 10% direct interest in the paying company; otherwise, a 10% rate is levied.
100. 5% WHT rate is levied if the recipient (excluding partnerships) is a shareholder with at least a 40% direct interest in the paying company; otherwise, a 10% rate is levied. No WHT is levied if the recipient is a shareholder with at least an 80% direct interest in the paying company, and (i) its shares are listed on a stock exchange, (ii) the recipient is at least 50% owned by residents from either of the two countries, (iii) the recipient is owned by shareholders resident for tax purposes in third countries by a proportion of less than 25%, and (iv) the recipient is owned (an interest of more than 25%) by residents in third countries, provided that a tax treaty for the avoidance of double taxation has been signed with the country of the company paying the dividends and that this tax treaty establishes the same or more favourable conditions. No WHT is levied for dividends paid to pension funds.
101. Reduced rates/exemptions are not applicable when a Panama tax-resident company pays dividends, interest, or royalties to a Spanish tax resident and such income has been obtained either in Spain or in a country that has not signed a tax treaty for the avoidance of double taxation with Spain.
102. Levied if the recipient is a company (excluding partnerships) with at least a 10% direct interest in the paying company; otherwise, a 5% rate is levied. In the case of distributions made out of a real estate investment trust, 5% is levied if the beneficial owner holds, directly or indirectly, less than 10% of the value of the capital in such trust.
103. No WHT is levied on interest if: (i) the recipient is a contracting state of the treaty, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the payer is a financial institution of a contracting state and interest is paid to a financial institution of the other contracting state; (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend; (v) the interest is paid in respect of a loan, debt-claim, or credit that is owed to, made, provided, guaranteed, or insured by an export financing agency of a contracting state or political division, or guaranteed or insured by that state or political division; (vi) the recipient is an institution wholly or mainly owned by a contracting state as may be agreed from time to time between the competent authorities; or (vii) the recipient is the government of Singapore Investment Corporation Pte Ltd.
104. No WHT is levied on dividends if the beneficial owner is a company resident in the other contracting state whose capital is wholly or partly divided into shares and it has held at least 25% of the capital of the company paying the dividends for at least two years before the date of such payment and such dividends are not subject to profit tax in the other contracting state.
105. 5% WHT rate is levied on royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films or films and tapes used for radio or television broadcasting.
106. Levied if the recipient is a company with at least a 25% direct interest in the paying company; otherwise, a 15% rate is levied.
107. No WHT is levied on interest if: (i) the interest is paid by a contracting state, one of its political subdivisions, or one of its local collectivities; (ii) the interest is paid to the government of the other contracting state or one of its local collectivities or to a body (including financial institutions) fully owned by such contracting state or its local collectivities; (iii) the interest is paid to another body (including financial institutions) in relation to loans granted under an agreement signed between both contracting states for a term of at least five years; or (iv) the interest is paid in relation to the acquisition of industrial, commercial, or scientific equipment.
108. (i) 3% WHT is levied on royalties paid for the use of, or the right to use, news; (ii) 5% WHT is levied on royalties paid for the use of, or the right to use, copyright on literary, theatrical, musical, or artistic works; and (iii) 10% WHT is levied on royalties paid for the use of, or the right to use, patents, designs, models, plans, secret formulae, processes or computer software, or for the use of, or the right to use, industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experiences or technical assistance services.
109. 15% WHT is levied if the dividends are paid out of income generated, either directly or indirectly, from immovable property through an investment vehicle that distributes most of its income annually and whose income is tax exempt. In addition, no WHT is levied if the recipient is a company that directly or indirectly holds at least a 10% interest in the paying company or if the recipient is a pension plan of the other contracting state.
110. Levied if the recipient is a company with at least a 10% direct interest in the paying company; otherwise, a 5% rate is levied.
111. No WHT is levied on dividends if the beneficial owner is a company (excluding unlimited liability companies) that directly holds at least 75% of the capital of the company paying the dividends.
112. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state, its political divisions, or an export

- credit agency; (iv) the interest is paid in relation to the acquisition of any equipment, goods, or services; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.
113. No WHT is levied on interest if: (i) the interest is paid by a contracting state or one of its political divisions or (ii) the interest is paid to the government of the other contracting state or one of its political divisions or to a body (including financial institutions) fully owned by such contracting state or its political divisions.
 114. 7.5% WHT rate is levied if the recipient is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividend.
 115. No WHT is levied on interest if the recipient is the beneficial owner and it is the government of the other contracting state, one of its political subdivisions, one of its local entities, the Central Bank, or a financial institution controlled by the other contracting state.
 116. 7.5% WHT is levied on royalties if the recipient is a company.
 117. If under any agreement or arrangement between Nigeria and a member state of the OECD Nigeria declared exempt from taxation the dividends, interest, or royalties from a Nigerian source, or limited the tax charged in Nigeria on such dividends, interest, and royalties at rates below those established in the double tax treaty (DTT) with Spain, such exemption or lower rate shall automatically apply to dividends, interest, or royalties from the Nigerian source beneficially owned by a Spanish resident.
 118. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; or (iii) the interest arises from a loan or credit granted by a contracting state or its political divisions.
 119. The provision in this article shall not apply if: (i) a company of a contracting state paying dividends, interest, or royalties to a company resident in the other state has generated its income from a jurisdiction that does not have a double taxation agreement with that other contracting state; and (ii) that income is exempt from or not subject to tax in the first contracting state.
 120. No WHT is levied if the beneficial owner is a company that directly holds at least 20% of the capital in the paying company; otherwise, a 10% rate is levied.
 121. 5% rate is applicable if the beneficial owner is a company that directly holds at least 10% of the capital in the paying company; otherwise, a 15% rate is levied.
 122. Notwithstanding:
 - a. Interest arising in a contracting state and paid to a resident of the other contracting state shall not be taxable in the first-mentioned contracting state if the beneficial owner of the interest is a resident of the other contracting state and is dealing at arm's length with the payer. This shall not apply where all or any portion of the interest is paid or payable on an obligation that is contingent or dependent on the use of or production from property or is computed by reference to revenue, profit, cash flow, commodity price, or any other similar criterion or by reference to dividends paid or payable to shareholders of any class of shares of the capital stock of a company.
 - b. Interest arising in Spain and paid to a resident of Canada shall be taxable only in Canada if it is paid in respect of a loan made, guaranteed, or insured, or a credit extended, guaranteed, or insured by Export Development Canada.
 - c. Interest arising in Canada and paid to a resident of Spain shall be taxable only in Spain if it is paid in respect of a loan, debt-claim, or credit that is owed to or made, provided, guaranteed, or insured by Spain or a political subdivision, local authority, or export financing agency thereof, provided the loan, debt claim, or credit is in respect of exports.

Tax administration

Taxable period

The tax year for CIT purposes is the company's accounting year. The tax year cannot exceed 12 months. Incorporation, change of accounting year, or dissolution of a company can give rise to a period of less than one year.

Tax returns

The tax system in Spain is a self-assessment system, and tax returns may be inspected by the tax authorities.

Annual CIT returns must be filed within 25 calendar days following the six months subsequent to the end of the tax year (i.e. if the tax year coincides with the calendar year, the return must be filed between 1 July and 25 July of the following calendar year).

Payment of tax

For CIT, three advance payments of the annual tax payment must be made during the first 20 calendar days of April, October, and December. The final CIT payment must be made with the annual CIT return.

For companies whose turnover, in accordance with Spanish VAT law, for the 12 months prior to the beginning of a tax period exceeds EUR 6,010,121.04, the advance payments are calculated by applying 17% for tax years starting in or after 2016 to the taxable

Spain

income (reduced by any applicable tax-loss carryforwards) for each advance-payment period, i.e. at 31 March, 30 September, and 30 November (percentage applicable to companies that are taxed at the general CIT rate).

Small and medium-sized companies can opt to calculate their advance payments in the same way as large companies (applying a percentage of 17% for tax periods starting in or after 2016) or to apply a rate (currently 18%) on the tax liability of their last advance CIT return filed on 1 April, 1 October, or 1 December.

Variable capital investment companies, financial investment funds, real estate investment companies, real estate investment funds, mortgage market regulation funds, and pension funds that meet certain requirements and are taxed at a 1%, or even a 0%, tax rate should not make advance payments and are not required to file the corresponding tax return.

EUR 2,500 limit on cash payments

Payments in cash over EUR 2,500 are not allowed for transactions in which at least one of the parties is a person carrying on a business or professional activity, and fines of up to 25% of the amount of the transaction can be imposed on both the payer and the recipient of these cash payments.

Tax inspections

The Spanish tax authorities have a tax inspection department that is responsible, amongst other things, for verifying that taxpayers' obligations are correctly complied with and, if necessary, for making adjustments to their tax affairs by issuing one or more tax assessments.

As part of its responsibilities, the tax inspection department may investigate a taxpayer's tax affairs to ensure that they are correct and verify the accuracy of filed tax returns.

Taxpayers' tax returns to be examined by the tax inspection department are chosen on the basis of different criteria, such as: (i) by random sample, (ii) if debt push down restructuring transactions have been carried out that involve Spanish companies with material debt levels, (iii) if companies have recurring tax-loss carryforwards, or (iv) if companies are related to a family group and lack a production or commercial structure and where their personal and business assets are not clear.

If taxpayers disagree with a tax assessment issued by the tax inspection department as a result of a tax inspection, they may file an appeal firstly with the Spanish economic-administrative tribunal for tax appeals and then, if the appeal is not upheld by the tribunal, with the ordinary courts.

If taxpayers have paid incorrect amounts of tax to the tax authorities, they may claim a refund of any excess tax paid from the authorities within the statute of limitation period (four years) by means of a special procedure that commences with the filing of a request with the tax authorities.

Statute of limitations

The statute of limitations for taxes in Spain is generally (with some exceptions) four years starting from the day following the date of termination of the voluntary tax filing period.

This four-year period may re-start for a tax if the tax authorities carry out any actions or procedures, with the formal acknowledgement of the taxpayer, to acknowledge, adjust, review, inspect, guarantee, or collect all, or any part of, a tax obligation, or due to actions by the taxpayer, such as the filing of a new or late tax return, that alters or rectifies a previous tax return or the filing of an appeal or claim by the taxpayers regarding the tax.

The tax authorities' entitlement to verify or investigate tax-loss carryforwards, tax relief availed of for carrying on certain activities, and deductions for the avoidance of double taxation is time barred after ten years.

At the end of the ten-year period, evidence of the origin and amount of tax losses must be given by presenting the relevant tax assessment or self-assessment and accounting records and, in addition, giving evidence that such assessments and records were filed and deposited with the Companies Registry during this period.

This amendment will apply to verification and investigation proceedings ending after 1 January 2015, provided that no tax assessment has been formally proposed for such proceedings before that date.

Topics of focus for the tax authorities

Every year, the Spanish tax authorities issue general guidelines on the authorities' annual tax and customs control plan. These guidelines identify areas where the tax authorities intend to adopt a greater role of verification, inspection, and monitoring during a certain tax year.

Obligation to disclose assets located overseas

Assets, such as accounts, shares, or real estate, that are located overseas must be disclosed. Severe fines are imposed (a minimum of EUR 10,000) for breaching this obligation.

In addition, assets regarding which the information disclosure obligation is not complied with by the established time limits are treated as unreported income for CIT payers and allocated to the earliest tax period of those that are not statute barred. Breaches of the obligation to declare this income are a very serious infringement, and fines of 150% of the gross tax liability are imposed.

Other issues

Automatic and standardised exchange of tax information agreements

The US Foreign Account Tax Compliance Act (FATCA) was enacted in 2010 to detect and prevent offshore tax evasion. Although, due to its name, it may seem that FATCA is for financial institutions, many global companies outside the financial services industry may be affected by FATCA if companies of their worldwide network fall under the purview of FATCA or have operational areas that make or receive payments subject to FATCA.

Multinational companies that are withholding agents are already required to report, withhold on payments, and record payees, but FATCA requires that changes be made to these activities. FATCA has established that multinational businesses should assess company payees differently, engage in withholding on certain gross proceeds transactions (a change from historic processes), and report other information to the US Internal Revenue Service (IRS).

The withholding provisions of FATCA came into effect on 1 July 2014. Compliance with FATCA may require changes to existing systems and processes across business units and regions, the renewal of policies and day-to-day practices, as well as other new tasks, such as registering with the IRS.

Spain and the United States have signed an intergovernmental agreement (IGA) aimed at improving compliance of international tax laws and enforcing FATCA. Under this agreement, published in the Spanish Official State Gazette on 1 July 2014, financial institutions in Spain and the United States are required to provide their tax authorities with information on taxpayers from the other signatory country. This information will

Spain

then be automatically exchanged between those tax authorities through a standardised procedure.

Special tax regime applicable in the Basque Country

The three provinces that make up the region of the Basque Country (Álava, Guipúzcoa, and Vizcaya) have an 'economic agreement' with Spain's central government (laid down in and regulated by Law 12 of 23 May 2002) in accordance with which these provinces are entitled to establish their own tax regimes.

There are certain provisions in Law 12 of 23 May 2002 regarding CIT that make this region of Spain more attractive for companies, and three CIT Acts have come into effect for each of the three provinces for tax periods beginning on or after 1 January 2014.

See the Other issues section of Spain's Corporate tax summary at www.pwc.com/taxsummaries for more information.

Significant developments

Capital allowance is granted on 100% of the cost of plant, machinery, or equipment acquired and used in any new undertaking commenced on or after 1 April 2015 for manufacture of products for export, with an investment of less than 2 million United States dollars (USD).

Fees for technical services paid to persons overseas directly or indirectly by a person in Sri Lanka are deemed to be profits and income arising in, or derived from, Sri Lanka (Sri Lanka source income), and withholding tax (WHT) at 20% is deductible at source.

Effective from the tax year 2016/17, corporate income tax (CIT) rates are revised to three tax rates of 40%, 28%, and 17.5%.

Taxes on corporate income

Resident companies and public corporations are liable for CIT on their worldwide taxable income. Non-resident companies are liable for CIT of their Sri Lanka-source taxable income.

CIT rates are based on the nature of the income and the institution earning the income, as follows:

Income/Institution	CIT rate (%)	
	2015/16	2016/17
Undertaking for manufacture of any product for export or for supply to an exporter for export, being a product having domestic value addition over 65% and a Sri Lanka brand name with patent rights received in Sri Lanka	10	17.5
Undertaking for operation and maintenance of facilities for storage, local development of software, or supply of labour	10	17.5
Agricultural undertakings referred to in Section 16 of the Act	10	17.5
Educational services	10	17.5
Undertaking (not being a holding company, subsidiary company, or any associate company of a group of companies) with an annual turnover not exceeding 750 million Sri Lankan rupees (LKR), other than buying and selling activities	12	17.5
Unit trusts and mutual funds *	10	17.5
Unit trust management companies	10	17.5
Profits on poultry farming	10	17.5
Shipping agents approved by the Director of Merchant Shipping in respect of profits attributable to agency fees connected to transshipment activity and received in foreign currency	12	17.5

Sri Lanka

Income/Institution	CIT rate (%)	
	2015/16	2016/17
Companies engaged in non-traditional export (other than exempt), including deemed exporters and suppliers of specified services to garment exporters; performance of any service of ship repair, ship breaking, and refurbishment of marine cargo containers; and provision of computer software, programmes, systems, or recording of computer data paid for in foreign currency	12	17.5
Undertakings engaged in agriculture, manufacture of animal feed, promotion of tourism, or construction work carried on by a resident person	12	17.5
Venture capital companies	12	17.5
Petroleum exploration	12	17.5
Local manufacture of handloom products	12	17.5
Healthcare services	12	17.5
Joint venture between a grower cum manufacturer or a manufacturer of tea with a tea exporter for exporting Sri Lanka tea in value added form, on the manufacturing income attributable to the quantum of tea purchased	12	17.5
Profits from operating any mini hydropower project or other alternative energy source	12	17.5
Profits on supply of goods manufactured in Sri Lanka or provision of services to foreign ships for payment in foreign currency	12	17.5
Profits on sale of any product manufactured in Sri Lanka for payment in foreign currency through foreign exchange earning account	12	17.5
Profits on export of organic tea in bulk	12	17.5
Undertaking for the manufacture of sugar	12	17.5
Sale of goods manufactured in Sri Lanka by an export oriented Board of Investment (BOI) enterprise, up to the quantity approved by the BOI, to: <ul style="list-style-type: none"> any BOI enterprise enjoying tax holiday under Section 16C, 16D, or 17A of the Inland Revenue Act or the Strategic Development Projects Act that is permitted to import project related goods or raw materials on a duty-free basis during the project implementation period, or any person eligible to import specific goods on a duty-free basis under any government authority. (Treated as deemed export of the manufacturer.)	12	17.5
Profits and income of any company listing its shares on or after 1 April 2013 and issuing more than 20% of its shares to the general public for the tax year in which such shares are listed and for two years of assessment immediately succeeding that year of assessment	50% of the applicable rate	17.5
Research and development (R&D) activities	20	17.5
Branch of commercial bank dedicated to development banking	24	28
Any company engaged in the manufacture of any article or in the provision of any service; banks, including profits from offshore banking activities; public corporations and government-owned business undertakings; and holding companies, subsidiary companies, or associated companies of a group of companies	28	-
Banking and financial services, insurance industries, trading activities (including any primary preparation for the adapting for sale of any article)	-	28
Manufacture and sale, or import and sale, of liquor or tobacco products	40	40
Business of lottery, betting, or gaming activity	40	40
Profit and income from business, other than stated above	-	17.5
Other sources (e.g. dividends, interest income, royalties)	28	28

* Unit trusts and mutual funds are treated like resident companies for CIT purposes. Units of investment are treated like company shares, and returns to investors are treated like company dividends.

Dividend tax

A dividend tax is payable at 10% on the gross dividends distributed by a resident company, other than such dividends distributed out of any dividend received from another resident company (and few other exceptions).

Deemed dividend tax

A deemed dividend tax of 15% is payable by any resident company in any tax year if the said company has, in the preceding tax year, distributed dividends of less than 10% of the distributable profits (duly defined) for that preceding tax year.

The tax base for the 15% deemed dividend tax is the book profits of the company reduced by the aggregate of the CIT payable by that company for that tax year, the cost incurred by the company in that tax year in the acquisition of any land or any capital asset, and any notional profit computed on the basis of a revaluation of any capital asset included in such book profit and increased by the aggregate of the allowance for depreciation deducted in respect of any capital asset acquired in that tax year and any notional loss computed on the basis of a revaluation of any capital asset included in such book profit.

Special tax on public corporations

In the case of a public corporation, where not less than 75% of the capital is provided by the government (other than via a loan), a tax of 25% of the balance profits, after deducting CIT payable, will be charged. However, where the total gross dividends distributed are not less than 25% of such balance, no special tax will be charged in the relevant years. Where the total gross dividends distributed are less than 25% of such balance, the tax chargeable will be the difference between such balance and the dividends distributed.

Remittance tax

Where profits of a non-resident company are remitted in a tax year, a remittance tax of 10% of the remittances is payable.

Local income taxes

There is no local or provincial income tax in Sri Lanka.

Corporate residence

A company is treated as resident for tax purposes in Sri Lanka if its registered or principal office is in Sri Lanka or if the control and management of its business is exercised in Sri Lanka.

Permanent establishment (PE)

PE is only a treaty concept in Sri Lanka. If a non-resident company creates a PE in Sri Lanka in terms of a double tax treaty (DTT), then such company is liable to Sri Lanka CIT. In the absence of a DTT, the domestic tax laws will apply.

Other taxes**Value-added tax (VAT)**

VAT is payable on imported goods and on the supply of goods (including wholesale and retail trade where the turnover, liable supplies, per quarter is not less than LKR 3 million) and services in Sri Lanka. Provisions are made for filing returns monthly or quarterly, based on specified criteria. Even where returns can be filed quarterly, the tax payments are required to be made on a monthly basis by manufacturers and on a half-monthly basis by others. Certain specified imports and domestically supplied goods and/or services are exempt.

Sri Lanka

VAT is payable on the prescribed valuations of imports and domestic supplies at a standard rate of 15% as of 2 May 2016 (previously 11%). Exports and certain specified international services are zero-rated.

Registration for VAT arises only if the quarterly value of taxable supplies exceeds LKR 3 million as of 2 May 2016 (previously LKR 3.75 million) or the annual value of taxable supplies exceeds LKR 12 million as of 2 May 2016 (previously LKR 15 million).

The input tax paid on the imports and supplies of goods (including capital goods) and services in a month, and used in the business of making taxable supplies in that month, can be deducted from the tax payable (output tax) on such supplies, subject to a limitation of the lesser of 100% of output tax or the actual input tax paid.

Refunds of excess VAT paid are available to zero-rated supplies, to suppliers who are qualified to issue suspended tax invoices, and to new businesses registered under Section 22 (7) of the VAT Act. A simplified VAT scheme has been introduced to relieve zero-rated suppliers and other qualified suppliers from the burden of paying input VAT, thereby obviating the need for the issue of refunds.

Customs duties

Customs duty is levied on the value for customs duty (i.e. transaction value). World Trade Organization (WTO) rules on customs valuations are implemented. Sri Lanka has a simplified three-tier tariff structure. The rates are published in the government gazettes. The current rates are 15%, 30%, and 0% (applies to few goods).

Special Commodity Levy

Special Commodity Levy is imposed on certain commodity items at the rate specified by the Minister by order published in the gazette at the point of importation of such commodities. Special Commodity Levy is covered by the Director General of Customs.

Special Commodity Levy is a composite levy, and no other tax, duty, levy, cess, or other charge is imposed in terms of any other laws specified as applicable in respect of the commodities specified in any such order.

Excise duties

Excise duties and special excise levies are charged on tobacco, cigarettes, liquor, motor vehicles, selected petroleum products, paints, air conditioners, dishwashers, household washing machines, and other products at various rates and at unit rates.

Stamp duty

Stamp duty is payable on specified instruments and documents at rates prescribed in the Gazette.

Economic Service Charge (ESC)

As of 1 April 2016, ESC is payable quarterly by all businesses at 0.5% (previously 0.25%) of the aggregate turnover of the trade, business, profession, or vocation if the total turnover exceeds LKR 50 million for that quarter. ESC so paid is deductible from the CIT payable for that tax year. ESC is not refundable but can be carried forward for two immediately succeeding tax years to be set off against CIT payable.

Nation Building Tax (NBT)

NBT is chargeable at 2% from every person (a person includes a company) who imports any article on the 'liable turnover' from such importation, who carries on the business of manufacture of any article, who provides a service of any description, or on the wholesale or retail sale of any article (other than such sale by the manufacturer of that article) on the liable turnover of the relevant quarter. Certain specified articles or services are exempt from NBT.

The threshold for NBT is LKR 3 million as of 2 May 2016 (previously LKR 3.75 million) per quarter, or LKR 12 million *per annum* as of 2 May 2016 (previously LKR 15 million).

Liable turnover means:

- In the case of importers, the value of any article ascertained under Section 6 of the VAT Act for the purpose of importation.
- In the case of manufacturers, the proceeds receivable, whether received or not, from the manufacture and sale of goods in Sri Lanka.
- In the case of service providers, the proceeds receivable, whether received or not.
- In the case of wholesale or retail traders, the proceeds receivable, whether received or not, other than pharmaceuticals, gems and jewellery sold for payment in foreign currency, and any article subject to the Special Commodity Levy sold by an importer.

In case of wholesale and retail traders, 50% of the liable turnover will be taxed at a zero rate and the remaining 50% will be taxed at 2%. In the case of a distributor as defined in the ESC Act, 75% of the liable turnover will be taxed at a zero rate and the remaining 25% will be taxed at 2%.

Bad debts, VAT, excise duty (other than such excise duty paid on importation) rebate under export development, or services in relation to an international event should not be included in the liable turnover.

Construction Industry Guarantee Fund Levy

As of 1 January 2016, Construction Industry Guarantee Fund Levy has been removed. This levy was payable by each construction contractor or subcontractor on the contract value arising from any contract entered into, calculated at rates varying from 0.25% to 1%, depending on the value of the construction contract.

Tourism development levy

Tourism development levy is payable by tourist hotels and institutions licensed under the Tourist Development Act on the turnover of such institution at the rate of 1%.

Employees Provident Fund (EPF)

Employers and employees are required to contribute specified percentages (employer 12%, employee 8%) of each employee's monthly emoluments/salary to the EPF established by the government. Alternatively, employers and employees can contribute to certain private provident funds approved by the labour authority.

Employees Trust Fund

Employers are also required to contribute a specified percentage (currently 3%) of each employee's monthly emoluments/salary to the Employees Trust Fund established by the government.

Share transaction levy

Share transaction levy at the rate of 0.3% is chargeable from both the buyer and the seller on the sale value of listed shares transacted through the Colombo Stock Exchange.

This levy was temporarily suspended from 1 January 2016 to 15 April 2016.

Local taxes

Taxes (more usually called rates) are currently assessed and collected annually from the owners of land and premises by the local authorities of the areas in which the properties are located. These authorities also charge and collect annual licence fees from certain businesses.

Sri Lanka

Branch income

Foreign companies are permitted to register a place of business as an 'overseas company' in Sri Lanka under local company law, where the business carried on conforms to the stipulations made under the Exchange Control Law.

An overseas company registered under the Companies Act may also carry on in Sri Lanka any non-commercial, non-trading, or non-industrial activities, such as the activities undertaken or carried on by a liaison office, representative office, regional office, or other similar office, provided such activities do not directly or indirectly provide any income to the company.

In addition to paying the standard CIT, a trading branch is also subject to the 10% remittance tax on remittance of its after tax profits to its foreign head office.

The Sri Lanka-source income of foreign companies from a local 'place of business' is taxed at the CIT rate. However, under most DTTs that Sri Lanka has entered into, the income of a project carried out will not be liable for CIT if its duration is less than the period specified in the treaty concerned.

Where branch or project income is liable for CIT but the income is not readily ascertainable, the tax authority may prescribe that the income be computed on a fair percentage (not less than 6%) of the branch or project turnover in Sri Lanka.

Income determination

Business accounting for CIT purposes should, unless otherwise specified by the tax statute, conform to Sri Lanka Accounting Standards.

Inventory valuation

Inventories should be measured at the lower of cost and net realisable value.

Capital gains

There is no capital gains tax. Capital gains from transfer of property are exempt from CIT.

Dividend income

Resident company dividends paid on shares held by resident or non-resident persons are not assessable to the recipients if income tax is withheld on such dividends (*see the Withholding taxes section*), the dividends are exempt from income tax, or the dividends are paid out of dividends received from resident companies.

Stock dividends

Stock dividends (bonus shares) are not taxable in the hands of a shareholder at the time of issue; however, where such shares are capitalised out of company profits and there is a return of this capital to the shareholder within six years from the date of issue, the amount of capital returned to the extent of the paid-up value of the bonus shares is treated, by definition, as a dividend and is taxable in the hands of the shareholder. However, if the shareholder is a company, this dividend may not be assessable, as explained above.

Interest income

Interest income forms part of the total statutory income, provided it is not exempt under the tax statute.

The interest income exempt from taxes includes interest accruing on money lying in a foreign currency account in any commercial bank; interest accruing to any person or

partnership outside Sri Lanka in respect of any loan granted in a foreign currency by that person or partnership to the government of Sri Lanka, any public corporation, any government institution, any commercial bank, or any other undertaking if the loan is granted on or after 1 April 2012; or interest accruing to any person on moneys invested in government bonds denominated in a foreign currency.

Foreign income

Foreign income of a resident person forms part of the total statutory income, provided it is not exempt under the tax statute.

Deductions

In ascertaining the total income liable to CIT from the financial accounts filed by a company, deductions from revenue are permitted for outgoings and matching expenses incurred in producing the income, including special deductions.

Depreciation

An annual allowance for depreciation for wear and tear is calculated at:

- 100% for software developed in Sri Lanka, or any plant, machinery, or equipment for:
 - energy purposes, which provide more than 30% of the total requirement of the power generation out of alternative energy resources, or
 - the establishment of a Broker Back Office System to be compliant with the Colombo Stock Exchange (CSE) requirement in relation to the risk management systems acquired on or after 1 April 2013.
- 50% for plant, machinery, or equipment for:
 - any export industry
 - technology upgrading purposes, or
 - introducing any new technology acquired on or after 1 April 2013.
- 33¹/₃% for other plant, machinery, or equipment for a period of three years.
- 25% of the cost of any information technology for a period of four years.
- 20% of the cost of acquisition of any motor vehicle or furniture for a period of five years.
- 10% of the cost of any qualified building for a period of ten years.
- 100% for plant, machinery, or equipment acquired and used in any new undertaking commenced on or after 1 April 2015 for manufacture of products for export, with investment of not less than USD 2 million.

The cost of renewal of any capital asset, if no allowance is available, is deductible for the purpose of ascertaining profits and income.

Goodwill

Amortisation is not allowed on the acquisition of goodwill.

Formation or liquidation expenses of a company

In the case of a company, expenses incurred in the formation or liquidation of that company are allowed in computing the taxable income.

Interest expenses

Interest paid or payable on borrowings for purposes of business are deductible, subject to the thin capitalisation rules (*see the Group taxation section*).

Bad debts and doubtful debts

A sum equal to the bad debts incurred in any trade, business, profession, or vocation that have become bad debts during the period for which the profits are being ascertained is allowed for tax purposes.

Sri Lanka

In the case of a bank or financial institution, deductibility of a specific bad debt provision is restricted to the lesser of the actual amount of the provision or 1% of the aggregate debts as of the end of the period for which profits are ascertained.

Charitable contributions

Relief is available as a deduction from assessable income for contributions in money to an approved charity, provided the charity is established for the provision of institutionalised care for sick or the needy, and contributions in money or in kind to the government of Sri Lanka. The deduction for the former is subject to a ceiling of one-fifth of the assessable income of the company. In the case of the latter, there is no limit to the deduction, and any un-recouped excess of such contributions over the assessable income can be carried forward and deducted from the following year's assessable income and so on.

Termination gratuities

Termination gratuities paid to employees on cessation of business and annual payments made to an approved fund, held for payment under compulsory legislation of gratuities to employees upon termination of their services, are deductible.

Royalties and ground rents

Any royalty or ground rent paid is deductible.

Fines and penalties

Fines and penalties, paid or payable, are not deductible for tax purposes.

Taxes

Sri Lanka income tax payable or any income tax or other similar tax payable in any country with which Sri Lanka has a DTT is not deductible, other than the excess of the foreign-country tax on doubly taxed income over the maximum amount of the credit allowed in the foreign country for the Sri Lanka income tax on that income.

Taxes paid in a foreign country that does not have a tax treaty with Sri Lanka may be deducted.

NBT paid/payable is fully deductible.

Input VAT is not deductible from CIT if it is creditable against output VAT.

Any other prescribed tax or levy is not deductible.

Non-deductible expenses

Deductions not permitted for certain expenses or allowances, in the determination of total income, are itemised below:

- Business entertainment expenses incurred or entertainment allowances paid to executive officers.
- Any expenditure of a capital nature or any loss of capital, including book depreciation of capital assets.
- Depreciation allowances, rentals, annual payments, or renewals in respect of vehicles used for purposes of business travel, or capital assets provided for the use of employees at their places of residence, other than motorcycles or bicycles used by non-executive staff and motor coaches used to transport employees to and from their places of work.
- The excess of management fee paid over LKR 2 million or 1% of turnover, whichever is lower, or such amount as may be determined by the tax authorities. This restriction does not apply to a venture capital company, unit trust, or mutual fund.

Other significant items

Expenses incurred solely in connection with the promotion of the export trade or the provision of any services for payment in foreign currency or in carrying out an approved programme for the promotion of tourism are fully allowed.

Any foreign travel or foreign training expense incurred in the production of income of any trade, business profession, or vocation is also deductible, subject to a maximum limit of 2% of the previous year's statutory income from the respective trade, business, profession, or vocation.

Deductions from the total income from all sources of a company are allowed for any interest payable on loans used for the construction or purchase of any building or the purchase of any site for construction of a building; for any annuity payable; or for a business loss.

Net operating losses

No deduction from total income is allowed in a tax year for a business loss if, at any time in that year, more than one-third of the issued share capital of the loss-making company is held by persons who did not hold such share capital at any time in the year in which the loss was incurred. In such circumstances, the loss is deferred for deduction only from profits of the particular business in which the loss was incurred.

Any loss incurred in any business of life insurance can be deducted to the extent of any profits from such business included in such total statutory income. Similarly, any loss incurred in any business of finance leasing can be deducted to the extent of any profits from such leasing business included in such total statutory income.

Losses incurred in the conduct of a trade or business, including any such loss brought forward, may be deducted only up to 35% of statutory income of a given tax year. The loss balance may be carried forward indefinitely.

Carryback of losses is not permitted.

Payments to foreign affiliates

Any payment made to an affiliate is allowed for tax purposes, provided such payment is in the nature of revenue and is incurred in the production of income.

Group taxation

There are no special provisions for taxation of companies in a group in Sri Lanka. Each company is taxed independently of others in the group.

Transfer pricing

Any profits and income arising, derived, or accruing from, or any loss incurred in, any transaction entered into between two associated undertakings shall be ascertained with regard to the arm's-length price.

Thin capitalisation

Deductible interest payments made between members of a group of companies, including holding companies, are restricted to the debt-to-equity ratio of 3:1 for manufacturing companies and 4:1 for other companies.

Controlled foreign companies (CFCs)

There are no provisions in the tax statute regarding CFCs.

Tax credits and incentives

Pursuant to the Strategic Development Project Act, projects that are identified and receive strategic development project status qualify for exemption in part or full from the applicability of the following taxes: CIT, VAT, ESC, customs duty, NBT, and PAL. These projects are large-scale projects, mainly infrastructure projects. The tax concessions include exemption from income tax (to be negotiated) for a period not exceeding 25 years.

The other tax incentives are discussed below.

Tax holidays

Exemptions for new enterprises

Qualifying enterprises	Qualifying criteria		Tax holiday (years)
	Specified activities	Investment criteria	
Small scale enterprises	Agriculture and/or agro processing, animal husbandry and/or processing, fisheries and/or fish processing, and creative work including art work	Minimum investment of LKR 25 million, but less than LKR 50 million	4
Medium scale enterprises	Any specified activity	LKR 50 million to LKR 100 million	4
		LKR 100 million to LKR 200 million	5
		More than LKR 200 million	6
Large scale enterprises	Agriculture or forestry, animal husbandry, specified manufacture, specified services, processing and solid waste management, and any other activity approved by the Minister of Finance	LKR 300 million to LKR 500 million	6
		LKR 500 million to LKR 700 million	7
		LKR 700 million to LKR 1,000 million	8
		LKR 1,000 million to LKR 1,500 million	9
		LKR 1,500 million to LKR 2,500 million	10
New enterprises in specified activities	Cement Pharmaceuticals Fabric Milk powder	More than LKR 2,500 million	12
		LKR 6,500 million	5 and a 12% concessorary tax rate thereafter
		LKR 1,300 million	
		LKR 650 million	
		LKR 3,900 million	

Large-scale investors should invest in the acquisition of fixed assets prior to 1 April 2016 and commence commercial operation prior to 1 April 2017 to qualify for the tax exemptions.

- A five-year tax holiday is available to a new venture capital company satisfying specified criteria.
- A five-year tax holiday is granted for the profits from the new undertaking of a company that is engaged solely in R&D in the field of science or technology with the objective of using the results thereof for the production or improvement of products with a minimum investment of LKR 2 million prior to 1 April 2014.
- Tax holidays outside the purview of the tax statute are also available in specified areas of investment to companies that enter into agreements with the BOI and to any strategic development projects identified in accordance with the provisions of the Strategic Development Projects Act No 14 of 2008. The specified areas include

non-traditional export-oriented manufacturing and thrust industries, export-oriented services, large-scale projects of which the project cost exceeds LKR 500 million. Generous waivers of import duties on specified imports and other concessions are also available for these companies.

- Profits and income derived from the sectors of fishing, cultivation, and primary processing of agricultural seeds or planting materials were exempt from CIT for a period of five years reckoned from the tax year commencing from 1 April 2006. From 1 April 2011, but prior to 1 April 2016, a concessionary rate of 10% was applicable. From 1 April 2016, the applicable rate is 17.5%.
- A ten-year tax exemption is granted on profits and income of an undertaking from cultivation of renewable energy crops in agricultural land.
- Profits and income from all transactions connected with manufacturing, distribution, and marketing of organic fertilisers and pesticides are exempt from CIT.

Inbound investment incentives

- Exemption from CIT is granted on the profits and income earned in foreign currency by any resident company in Sri Lanka from any services, excluding commissions, discounts, or similar type of receipt, rendered in or outside Sri Lanka, provided such profits and income (less such amounts expended outside Sri Lanka as are considered by the Commissioner General to be reasonable expenses) are remitted to Sri Lanka through a bank.
- Exemption from CIT is granted in respect of dividends, interest, or royalties received on investments made outside Sri Lanka, provided that dividends, interest, and royalties are remitted to Sri Lanka through a bank.

Other incentives

- New or existing companies that export non-traditional goods were entitled to be taxed on the profits from these exports at a concessionary rate of 12%. However, from the tax year commencing from 1 April 2016, the applicable rate is 17.5%.
- Exemption from CIT is granted on the profits arising from trading in shares, rights to any share, bonus, or share warrants in respect of which the share transaction levy has been charged.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any non-resident person or to any licensed commercial bank in Sri Lanka by the issuer of any sovereign bond denominated in foreign currency, issued on or after 21 October 2008, by or on behalf of the government of Sri Lanka and on the profits and income from the sale of such sovereign bond.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any person on or after 1 April 2009, on any Sri Lanka Development Bond denominated in United States dollars, issued by the Central Bank of Sri Lanka and on the profits and income from the sale of such Sri Lanka Development Bond.
- Exemption from CIT is granted on the profits and income derived by or accruing to any person or partnership from investment in Economic Resurgence Certificates, utilising money lying to credit of any account opened in any commercial bank or in any specialised bank with the approval of the Central Bank of Sri Lanka from and out of monies deposited in such account on or after 1 February 2009.

Foreign tax credit

Where any DTT is entered into between the government of Sri Lanka and the government of any other territory outside Sri Lanka, a credit is to be granted in respect of any tax paid or payable outside Sri Lanka in respect of profits or income arising outside Sri Lanka. Such credit should not exceed the amount of the Sri Lanka tax payable in respect of such profits or income.

Where any non-resident person or any partnership registered outside Sri Lanka providing certain services is liable to pay income tax in Sri Lanka and income tax in any

Sri Lanka

other country, then such person or partnership shall be entitled to relief from income tax payable in Sri Lanka of an amount equal to the excess, if any, of the income tax in respect of such income payable in Sri Lanka over the income tax in respect of such income payable in such other country.

Withholding taxes

Resident companies are entitled to withhold income tax at 10% of gross dividends payable to any shareholder that is chargeable with CIT, excluding any dividend received from another resident company and any dividend that is exempt from CIT.

Fees for technical services paid to persons overseas directly or indirectly by a person in Sri Lanka are deemed to be profit and income arising in or derived from Sri Lanka, and WHT at 20% is deductible at source.

Any person in Sri Lanka who pays or credits to a person or partnership outside Sri Lanka any sum due as interest, rent, ground rent, royalty, or annuity is required to withhold income tax at a rate of 20% of the sum, but the requirement to withhold income tax does not apply to (i) interest not sourced in Sri Lanka, (ii) interest on any loan or advance made by a banker, (iii) interest paid in foreign currency held in an account with a foreign currency banking unit, (iv) interest on any corporate debt security, or (v) any interest that is exempt from income tax under any provisions of the Inland Revenue Act.

In particular instances, the tax authority may prescribe that CIT be withheld at a rate other than 20%, or the rate may be reduced for sums falling due as interest or royalties in respect of persons resident in countries with which Sri Lanka has DTTs in force. Sri Lanka-source income from loan interest or royalties accruing to a non-resident company is taxed at a flat 15% in the absence of a lower rate in the tax treaty with the home country of the non-resident.

However, interest accruing to any overseas lender from a loan granted by that overseas lender to the Sri Lanka government or institution, public corporation, any commercial bank, or to any other undertaking, if such loan is granted on or after 1 April 2012, is exempt from income tax.

Every bank and financial institution is required to withhold income tax at 10% on the amount of any interest paid to a company on any sum of money deposited with it. The depositor is entitled to receive a certificate setting out the gross amount of interest, the amount of tax withheld, and the net amount of interest paid. With respect to Treasury bills and Treasury bonds issued by the Central Bank, the WHT rate of 10% is deducted at the time of the sale of the Treasury bills and Treasury bonds by the Central Bank in the primary market.

Notes

1. 0% for copyright royalties.
2. 0% in certain circumstances.
3. 5% of normal tax, which is 7.5%.
4. These treaties are limited to the avoidance of double taxation of income from international transport by air.
5. 10% applies if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends. In all other cases, the rate is 15%.
6. 10% applies if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends. In all other cases, the rate is 15%.
7. 7.5% applies if the owner is a company.

Tax administration

Taxable period

A tax year is any period of 12 consecutive months reckoned from 1 April in any calendar year to 31 March of the following year.

Tax returns

CIT returns are due on 30 November, immediately following the end of the tax year.

Sri Lanka

Statement of accounts

Where any trade, business, profession, or vocation is being carried on or exercised by any quoted public company, any company that is a member of a group of companies of which at least one company is a quoted public company, or any other company having a turnover of not less than LKR 250 million or net profit of not less than LKR 100 million, such quoted company, member of the group, or such other company should furnish a statement of accounts in support of a return of income. Such statement of accounts is to be prepared by an approved accountant on the basis of an audit carried out by such approved accountant.

Payment of tax

Sri Lanka has a pay-and-file system under which the CIT payable for each tax year is required to be paid in four instalments, on or before 15 August, 15 November, and 15 February of the tax year and 15 May immediately following the end of the tax year. If each instalment is not less than one-quarter of the CIT payable for the tax year immediately preceding, the balance of any CIT payable may be paid on or before 30 September immediately following the end of the tax year without incurring penalties.

Tax audit process

The tax authority may select tax files for an audit on a random basis or if there is any specific information relating to a taxpayer that warrants investigation.

Statute of limitations

No assessment of the income tax payable by any person:

- a. who has made a return of one's income on or before the 30th day of November of the tax year immediately succeeding that tax year shall be made after the expiry of a period of:
 - two years in respect of any tax year commencing prior to 1 April 2013, and
 - 18 months in respect of any tax year commencing on or after 1 April 2013 from the 30th day of November of the immediately succeeding tax year, or
- b. who has failed to make a return on or before such date as referred to in paragraph (a) shall be made after the expiry of a period of four years from the 30th day of November of the immediately succeeding tax year.

However, such limitation shall not apply where any fraud, evasion, or wilful default has been committed.

Topics of focus for tax authorities

Tax authorities, in their audit, primarily focus on whether disallowable expenses have been added back to taxable profits and on profit margins reported. With the requirement to obtain tax clearance for remittance of fees and other payments abroad, increasing attention is paid to remittance of royalties, fees, and other payments to non-resident persons.

Significant developments

There have been no significant corporate tax developments in Swaziland during the past year.

Taxes on corporate income

Income tax is levied on all income derived from sources generated within or deemed to be generated within the country, irrespective of whether the recipient of the income is actually resident in Swaziland.

All companies generating income within Swaziland are taxed on that income at a flat rate of 27.5%.

Corporate residence

Permanent establishment (PE)

PE in Swaziland is determined according to physical presence.

Other taxes

Value-added tax (VAT)

VAT is charged at the standard rate of 14%.

Customs duties

Swaziland has a provision for customs duties for various goods imported into the country. Details are available in the Harmonized Tariff Schedule (HTS).

Excise duties

Swaziland has an excise duty provision for various goods manufactured in the country.

Goods	Excise duty rate (%)
Cigarettes	6.34
Cigarette tobacco	8.00
Cigars	6.19
Other tobacco products	16.10
Spirits	8.90
Beer	8.20
Alcoholic fruit beverage	8.30
Wine	8.10

Swaziland

Property taxes

There are no property taxes in Swaziland.

Transfer taxes

Transfer taxes are applied on a variable rate basis to property transfers based on the fair market value of the property being transferred.

Stamp taxes

Swaziland has a provision for stamp taxes on various documents. The tax is determined either by way of a set fee or on a sliding scale percentage basis.

Payroll taxes

Pay-as-you-earn (PAYE) is to be deducted from employees on a monthly basis and according to the tax tables applicable to individuals, *which are provided in the Taxes on personal income section of Swaziland's Individual tax summary at www.pwc.com/taxsummaries.*

Social security contributions

There are no social security contributions in Swaziland.

Branch income

Income tax on registered branch profits is calculated as for a resident company, and a branch profits tax of 15% is assessed for deemed repatriated income. In practice, however, branches are rare since most foreign companies incorporate local subsidiary companies.

	SZL*
Net profit before tax	100.00
Tax @ 27.5%	(27.50)
Repatriated income	72.50

* Swaziland lilangeni

Income determination

Inventory valuation

Inventory valuation is not specific but is effectively at the lower of cost (i.e. first in first out [FIFO] or average cost) and net realisable value.

Capital gains

Capital gains are not subject to income tax, provided it can be demonstrated that the gains are of a capital and not an income nature (i.e. not recurring transactions).

Dividend income

Dividend income is taxable via withholding tax (WHT) for non-residents (*see the Withholding taxes section*). No tax is due if received from another local company.

Inter-company dividends

Inter-company dividends are not subject to income tax.

Stock dividends

Stock dividends are paid out of taxed profits. Such dividends are not subject to income tax when received by a local company, but they are subject to taxation in the hands of local individual taxpayers at the rate of 10%.

Interest income

Interest income sourced in Swaziland is taxable.

Foreign income

Foreign income is not subject to income tax unless it is deemed to be from a Swaziland source.

Deductions**Depreciation**

Depreciation (wear-and-tear) allowances calculated by the net-reducing-balance method are available as follows:

Asset	Depreciation rate (%)
Aircraft	25
Casino equipment	15
Construction equipment	25
Computer hardware	33.33
Computer software	33.33
Furniture and fittings	10
Hotel soft furnishings, including carpets	10
Legal and professional libraries	5
Lifts and elevators	25
Motor vehicles:	
Buses	33.33
Cars	20
Light delivery vehicles	25
Lorries	33.33
Office equipment	10
Plant and machinery	10
Sound and projection equipment	20
Television sets	20
Tractors	25
Trailers	20
Video recorders	33.33
Videotapes	25

For the first year after the addition of an asset, the wear-and-tear allowance is calculated on a monthly basis. With respect to leased assets, the lessor's claim for wear-and-tear allowance is usually spread over the lease period.

An initial allowance of 50% is granted for plant and machinery used in a manufacturing process, including hotel equipment. An initial allowance of 50% is granted for industrial buildings used for manufacturing purposes and hotels, together with a 4% annual allowance.

Goodwill

The write-off of any goodwill is not allowed for tax purposes.

Start-up expenses

It is departmental practice to not allow the deduction of any start-up expenses.

Interest expenses

Interest is deductible as long as it is incurred in the production of income.

Swaziland

Bad debt

Swaziland does allow a deduction for bad debts, subject to the Commissioner's approval and provided that the debts were included in the taxpayer's income in the year of assessment or in years past.

Charitable contributions

Subject to the Commissioner's approval in regard to the amount allowable as a deduction in the year of grant and subsequent years, Swaziland allows a deduction for, among other things, grants made to the government for the building of schools and hospitals.

Fines and penalties

Fines and penalties resulting from late payment of any tax or levied as payable under any Act administered by the Commissioner will be a non-deductible expense.

Taxes

Taxes are not deductible.

Net operating losses

Losses may not be carried back but may be carried forward for as long as trading continues (i.e. indefinitely). If any break in trading occurs, however, the losses are forfeited.

Payments to foreign affiliates

Deductions may be claimed for payments of management service fees, interest, and royalties to foreign affiliates, provided the payments are made under a written agreement, are reasonable, and receive exchange control approval for transfers outside the rand monetary area. Note that this approval is routinely given without any significant delay for *bona fide* transactions.

Group taxation

Swaziland does not have group taxation legislation. All companies are assessed on their individual profits and losses.

Transfer pricing

Swaziland does not have transfer pricing legislation; however, under the anti-avoidance provision, the Revenue Authority will look for arm's-length transactions.

Thin capitalisation

Swaziland does not have thin capitalisation rules.

Controlled foreign companies (CFCs)

Swaziland does not have any legislation regarding CFCs.

Tax credits and incentives

Foreign tax credit

Swaziland does not have a foreign tax credit regime.

Development Approval Order

The Minister of Finance, along set guidelines and with prior consent of the Cabinet, may nominate a business as a developmental enterprise (i.e. a business the Minister deems to be beneficial to the development of the economy) for a grant of a Development Approval Order. If approved, the business generally will be granted tax concessions, such as a lower corporate tax rate.

Withholding taxes

Non-resident WHTs are levied as follows.

Dividends

WHT for dividends is payable at the rate of 15% (12.5% for companies registered in Botswana, Lesotho, and the Republic of South Africa). The rate drops to 10% under the double taxation agreement (DTA) with South Africa where the holding company owns more than 25% of the shares. Non-resident shareholders' WHT is payable within 30 days of the date on which the dividend is payable.

Interest

WHT for interest is payable at the rate of 10%. Non-resident WHT on interest is payable within 14 days of the date of the accrual of the interest.

Royalties and management fees

WHT for royalties and management fees is payable at the rate of 15%. Upon application, 5% may be refunded if there is a DTA in place.

Entertainers and sportsmen

WHT is payable at the rate of 15% on income earned in Swaziland by entertainers and sportsmen. This tax relates only to public entertainers and sportsmen not ordinarily resident in Swaziland. The payer is required to deduct the tax and pay it within 15 days.

Contractors or professionals

WHT is payable at the rate of 15% on services provided by contractors or professionals in Swaziland (materials are not taxed to the extent that materials are incidental to the overall charge). The Commissioner of Taxes must be notified of any agreement relating to construction operations or professional services under which payments are made to non-resident persons within 30 days after entering into the agreement. It is required that the tax be paid within 15 days from the date of payment.

Tax administration

Taxable period

The tax year runs from 1 July to 30 June. Companies are required to have a 30 June year-end unless another year-end date is approved by the Commissioner of Taxes; such approval is routinely given.

Tax returns

Income tax returns should be submitted within 120 days of 30 June, unless an extension of time for submission is granted, which also is routinely given if all tax requirements for the prior year are up to date and the provisional tax has been paid in accordance with the law. The extension of time is usually granted for a further 60 days, which effectively gives the taxpayer six months to submit their income tax return.

Payment of tax

Notice of the date of payment is usually given on the tax assessment.

Provisional tax payments

With respect to companies, provisional tax is payable in two instalments: one payment is due within six months of the company's financial year-end, and the other payment is due no later than the last day of the company's financial year.

The estimate of taxable income for provisional tax purposes should not be less than the taxable income assessed for the latest preceding year of assessment for which an assessment has been issued that is not less than 21 days before the date the estimate is

Swaziland

made. This rule does not apply if the taxpayer can convince the Commissioner of Taxes that the taxable income for the current year will be less than the taxable income for the preceding year.

A provisional taxpayer becomes liable to pay a penalty if the estimate for taxable income for the second payment of provisional tax is found to be both less than 90% of the taxable income as finally determined and less than the taxable income as assessed for the immediately preceding tax year.

Tax audit process

All assessments are subject to a tax audit. Current departmental practice is to perform tax audits going back four years.

Statute of limitations

There is no statute of limitations in Swaziland.

Topics of focus for tax authorities

Currently, the tax authorities are conducting full tax audits.

Significant developments

Interest deductibility matters

In June 2014, a governmental committee presented a first proposal on further strengthened interest deductibility restrictions. The new proposal has suffered heavy criticism. New rules limiting interest deductibility can be expected to be introduced by 2017 at the earliest, perhaps with applicability only in 2018. If this timing expectation is true, the international business community would have to continue to rely on the vague applicability status of the current, 2013, interest deductibility regime, which is litigated heavily in the tax courts and, furthermore, is subject to European Union (EU) infringement procedures.

Dividend income

Pursuant to the recent amendment of the Parent-Subsidiary Directive (EU general anti-avoidance rule [GAAR]), member states shall bring into force the laws, regulations, and administrative provisions necessary for complying, and the Swedish government has, as of 1 January 2016, introduced provisions making tax deductible dividends paid by a foreign company (i.e. not only EU/European Economic Area [EEA] companies) under a hybrid arrangement subject to Swedish corporate tax for the recipient Swedish company.

Apart from that, when implementing the Directive, the Swedish government was of the view that the current Swedish Anti-avoidance Tax Act already covers those situations that are intended to be covered by the amended Directive, apart from a minor change in the Withholding Tax (WHT) Act (for outbound dividends), targeting structures put in place to obtain WHT exemption through the use of decoy arrangements. This anti-avoidance provision has long existed under current Swedish law, but an explicit clarification is made as of 1 January 2016 that the provision can also be applicable in cases covered by the Parent-Subsidiary Directive.

Taxes on corporate income

State (national) income tax

Resident legal entities are liable for tax on their worldwide income unless tax treaties or special exemptions apply. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

Taxable income is subject to corporate tax at the rate of 22%. All income of corporate entities is treated as business income.

Local income taxes

No local income taxes apply to Swedish corporations.

Corporate residence

A company is considered to be a tax resident of Sweden if it is incorporated in Sweden.

Sweden

Permanent establishment (PE)

The term 'permanent establishment' is defined in Sweden as a fixed place of business through which the business is carried on from a specific establishment, such as a place of management, branch, office, factory, or workshop. Places where construction work is carried on are also regarded as PEs, as well as if an agent who is dependent upon the foreign company habitually exercises authority in Sweden.

Other taxes

Value-added tax (VAT)

The Swedish VAT system is harmonised with the EU rules. The general VAT rate of 25% is chargeable on most goods and services. Reduced rates apply to a few goods and services, such as hotel accommodation, foodstuffs (excluding alcoholic beverages), restaurant meals, and low or non-alcoholic drinks (12%), as well as newspapers, magazines, books, passenger transport, maps, musical notes, some cultural services, transport in ski lifts, etc. (6%). Certain financial and insurance services are exempt from VAT.

VAT returns are filed and tax is paid monthly or quarterly. VAT returns are filed monthly if the VATable turnover is estimated at more than 40 million Swedish kronor (SEK) (estimated yearly sales excluding any reverse charge or import acquisitions). Companies with a lower VATable turnover than SEK 40 million report VAT quarterly. However, any company may choose to have a monthly reporting period. For companies with a turnover of less than SEK 1 million, VAT may be reported in an annual VAT return.

Customs duties

As a member of the European Union, Sweden is also part of the Customs union enforcing the Community Customs code. Most EU Customs duties are calculated as a percentage of the value of the goods being imported. All imported goods must be classified according to the EU Customs tariff (TARIC), and the duty rates applied depend on the economic sensitivity of the goods. The actual duty rate to be applied also depends on other factors, such as the country of origin of the product and any free trade agreements that may be applicable.

Excise duties

The three main Swedish excise duties are harmonised with EU rules. These are the alcohol tax, the tobacco tax, and the tax on fuels and electricity. There are, however, still differences in local legislation between the member states, and the taxation of fuels is partly EU harmonised, partly national. Fuels are subject to energy tax, carbon dioxide tax, and sulphur tax. Depending on the use of fuels, taxes may be partly or fully reduced. For bio-fuels, certain exemptions may also apply.

Real estate tax

The annual real estate tax rate on business premises is 1% of the tax assessed value. For industrial property, the tax rate is 0.5%. Other rates exist for special property.

Stamp tax

Stamp tax at 4.25% is payable on a transfer of real estate. The tax base consists of the highest of the purchase consideration or the tax assessed value of the real estate. Stamp tax on an intra-group transfer of real estate may be deferred as long as the real estate remains within the group.

Payroll taxes

Social fees

Mandatory social security charges payable by employers on remuneration to employees (or by the self-employed) are levied at approximately 31%. The reduced rate that has

been applied for very young people is waived from 1 June 2016. A reduced rate remains applicable for very old people. Social security charges are deductible for corporate tax purposes.

Pension benefits beyond the mandatory system are customary amongst most Swedish employers. A special salary tax is levied at approximately 24% on these additional pension premiums/commitments and is deductible for corporate tax purposes.

Branch income

Branch income (i.e. PE income) is taxed at the corporate tax rate of 22%, and general corporate tax rules apply for branch offices in Sweden. No WHT is levied on the outbound repatriation of taxed profits.

The receipt of Swedish-source royalties or fees for use of tangible or intangible assets by a foreign resident is also (subject to treaty restrictions) regarded as a special form of PE income.

Income determination

Inventory valuation

Inventories (stock-in-trade) are valued at acquisition cost or market value, whichever is lower. As an alternative, inventories may be valued at 97% of the total acquisition cost, which is determined on a first in first out (FIFO) basis. The last in first out (LIFO) method is not permitted. Generally, inventories should be stated at the same amount for tax and accounting purposes.

Capital gains

There is a capital gains tax exemption for Swedish corporate entities on gains related to the disposal of shares held for business reasons.

Shares in Swedish corporations can qualify as shares held for business reasons. Unquoted/unlisted shares will always be considered as held for business reasons. Quoted/listed shares are considered held for business reasons if the company has a holding corresponding to at least 10% of the voting rights or the shares are held in the course of the business. An additional condition regarding quoted/listed shares is that the shares must be held for a period of at least one year. Under certain conditions, tax exemption also applies to shares in foreign companies.

Note that non-tax-exempt capital gains are included in business income and taxed at the corporate tax rate.

Shares in partnerships (tax transparent entities) and indirect holdings via partnerships are also included in the participation exemption regime.

An exception from the capital gains tax exemption applies for the sale of shares in a 'shell company', which is a company or partnership where the market value of cash, shares and other marketable instruments (other than shares held for business reasons), and similar assets exceeds 50% of the consideration paid for the shares. The sale of a shell company results in harsh taxation of the gross consideration. Provided certain formalities are fulfilled, however, it is possible to avoid such taxation.

A consequence of the participation exemption is that capital losses on shares or participations held for business reasons are not deductible.

Sweden

Capital losses on portfolio holdings of shares, share options, convertible debentures, and similar financial instruments are allowed only as an offset to capital gains on the same group of financial instruments.

Certain special rules apply to computation of capital gains and losses on real estate.

Dividend income

A participation exemption applies for dividends received on shares held for business reasons (*see above*) and on qualifying holdings via partnerships. A tax deductible dividend paid by a foreign company (i.e. not only EU/EEA companies) under a hybrid arrangement is though subject to Swedish corporate tax for the recipient Swedish company.

Interest income

Interest received by a corporation is included in the corporate tax basis.

Foreign income

Companies resident in Sweden are taxed on their worldwide income. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

A Swedish corporation is taxed on foreign branch income. Double taxation normally is avoided by means of either a deduction for foreign tax, or a foreign tax credit.

Dividends and capital gains from foreign subsidiaries are generally exempt from taxation according to the participation exemption provisions applicable to shares held for business reasons (*see above*).

Deductions

Depreciation, amortisation, and depletion

Depreciation on fixed assets

Land improvements may be depreciated at the rate of 5% per year of the acquisition cost. The maximum allowance is 100% of the tax basis of the improvement.

Buildings may be depreciated at rates between 2% and 5% per year of the taxable basis, depending on type and usage of the building. The maximum allowance is 100% of the tax basis of the building.

For machinery and equipment, the depreciation for tax purposes should correspond to the depreciation charged in the books and accounts, as long as the total net value of the assets is not less than the 70% of net value in previous accounts plus additions less proceeds of sales (i.e. 30% declining-balance depreciation) or cost less 20% per year (i.e. 20% straight-line depreciation on remaining assets). An alternative 25% declining-balance method without correspondence to the books also exists.

Immediate deduction of certain assets

The cost of assets having an expected life of no more than three years and the cost of assets not exceeding certain limits, depending on size of operations, may be deducted immediately. Certain costs for repairs, maintenance, and modifications of buildings may also be deducted immediately.

Amortisation of intangibles and goodwill

The amortisation of patents, leaseholds, and acquired goodwill follows the same rules as depreciation for machinery and equipment (*see above*).

Depletion of mines and quarries

The entire cost of mines and quarries may be depleted over their expected exploitation period. These depletion amounts may be deducted annually but are limited to 100% of the acquisition cost of the mine or quarry.

Start-up expenses

General start-up expenses for generating and maintaining business income are, as a rule, deductible for Swedish tax purposes.

Interest expenses

Interest expenses on external loans are fully deductible, whereas interest paid to affiliated companies are deductible only if an exception applies under the Swedish interest stripping restrictions and to the extent that the arm's-length principle is complied with. Under the interest stripping restrictions, and in brief, a deduction is not allowed for interest accruing on an intra-group loan unless the true creditor within the affiliated group (i.e. the person entitled to the interest) is taxed on the interest income at a rate of at least 10% or it is shown that the debt is based on commercial reasons. Regardless, a deduction may be refused if the debt structure has been put in place mainly for the group to achieve a substantial tax benefit.

Bad debt

Business bad debts are deductible if they are proven wholly or partially worthless.

Charitable contributions

Purely charitable contributions are generally non-deductible.

Fines and penalties

Fines and penalties are non-deductible for Swedish tax purposes.

Taxes

Generally, Swedish taxes are not deductible for tax purposes. However, specific taxes, fees, and foreign taxes may be deductible. Recoverable VAT is not treated as an expense or cost.

Net operating losses

Tax losses may be carried forward indefinitely but may become subject to restrictions and/or forfeiture upon ownership changes, mergers and demergers, dispositions with creditors, and certain other reorganisations. No carryback of losses is possible.

Payments to foreign affiliates

Transactions with affiliates not liable to tax in Sweden must be at arm's length. Formal transfer pricing documentation requirements apply.

S

Group taxation

Swedish companies are not taxed on a consolidated basis. However, it is possible for qualifying groups (i.e. a holding greater than 90% of the capital, which must have been upheld during the whole fiscal year) to effectively offset operating losses of one Swedish company against operating profits of another Swedish company by way of group contributions, which are tax deductible for the contributor and taxable for the recipient. EEA companies are regarded as Swedish companies for these purposes if the recipient is taxable in Sweden.

A similar Swedish deduction is, under certain circumstances, also available for cross-border group relief at the Swedish parent's level within the EEA for final foreign subsidiary losses.

Sweden

Transfer pricing

The Swedish transfer pricing regime is generally an Organisation of Economic Co-operation and Development (OECD) type of regime. Sweden has formal transfer pricing documentation requirements in place.

Thin capitalisation

There are no thin capitalisation rules for tax purposes in Sweden; however, interest stripping restrictions exist (*see Interest expenses in the Deductions section*).

Controlled foreign companies (CFCs)

Sweden's CFC provisions aim at taxing a Swedish resident shareholder for shareholdings in low-taxed foreign entities. A Swedish resident shareholder with a holding in a CFC entity will annually be taxed for its ownership portion of the CFC's income, according to provisions applicable to a Swedish corporation. For a corporation, the portion will be taxed at the Swedish corporate tax rate. Only holdings, direct or indirect through other foreign entities, corresponding to at least 25% (capital or voting rights) in the foreign entity could lead to CFC taxation. A foreign company is considered low taxed if the income in the company, calculated in accordance with Swedish provisions, is taxed at a rate below 12.1%. However, if the foreign entity is resident in an 'approved country', CFC taxation should not arise. Approved countries appear in an official 'black/white' list. Active EEA entities are, under certain circumstances, not considered low taxed.

Tax credits and incentives

There are no specific tax incentives in Sweden for corporations. However, some generally applicable regimes exist.

For example, Sweden has an accruals reserve regime. The accruals reserve regime allows for a tax-deductible appropriation for corporations of 25% of the taxable profit before appropriation to a reserve. Each year's appropriation forms a separate reserve that must be reversed to income no later than the sixth year following the appropriation. However, a standardised interest income is imposed on former years' appropriations at 72% of the interest rate on governmental debt notes.

Foreign tax credit

A foreign tax credit is generally available, provided certain conditions are fulfilled, and the tax credit allowed is limited to an amount corresponding to the Swedish tax on the foreign income. Unutilised foreign taxes may be carried forward for five years. Tax treaty implications may exist.

Withholding taxes

There are no Swedish taxes on interest and service fees paid to non-resident corporations or individuals. Such payments to resident corporations and individuals are taxed as ordinary income.

WHT on dividends, royalties, and certain rentals vary according to domestic law and tax treaties, as shown below.

Apart from the highlighted treaties, Sweden has concluded agreements on exchange of information in tax matters and partial tax treaties. The conclusion of a tax information exchange agreement (TIEA) with the United Arab Emirates on 5 November 2015 means that Sweden has information exchange agreements with all the world's tax jurisdictions. It could also be noted that amendments to the EU Directive on administrative cooperation in the field of taxation are proposed to be implemented in Swedish legislation with effect as of 1 January 2017.

Notes

1. According to domestic law, there is no WHT on dividends to a foreign company on shares held for business reasons (*for the definition of shares held for business reasons, see Capital gains in the Income determination section*), provided that the foreign company is similar to a Swedish limited liability company (and some other legal entities) and is subject to income tax at a level similar to that imposed on a Swedish company. Further, there is no tax liability for a legal entity of a member state of the European Union if the entity owns 10% or more of the share capital in the distributing company and fulfils the conditions of the Directive (90/435) regarding a parent company and subsidiaries.
2. The reduced rate shown before a stroke (/) refers to payments to corporations having requisite control. Where appropriate, the particular treaty should be consulted to see whether the reduced rate is applicable.
3. Swedish-source royalties and certain rental fees are treated as a special form of PE, taxable at the corporate tax rate, subject to treaty reduction or waiver. Royalties paid from Sweden to a company within the European Union should not be taxed in Sweden if one of the companies holds at least 25% (capital) of the other or, where there are two companies concerned, at least 25% are held by another company within the European Union. Indirect participation does not benefit from the legislation. Both the payer and the recipient must be legal entities under the EU directive.

4. Payments to resident corporations and individuals are taxed as ordinary income. Only resident banks and similar entities are required to withhold tax on payments of cash dividends to resident individuals.
5. Royalties and certain rentals paid by Swedish licensees are treated as business income taxable in Sweden and do not incur WHT (see Note 3).
6. Note also the domestic provision stating a 0% WHT on dividends distributed to qualifying entities based on EU Directive (90/435) and/or where the shares are held for business purposes (see Note 1).
7. Dividends: 10% of the gross amount if the company receiving the dividends owns at least 25% of the foreign company's capital.

Royalties: of the gross amount paid for the use of, or the right to use:

- News: 3%.
 - Copyright of literary, dramatic, musical, or other artistic work: 5%.
 - Any patent, trademark, design or model, plan, or secret formula or process; industrial or scientific equipment or information concerning industrial, commercial, or scientific experience; payments for the rendering of technical assistance: 10%.
 - All other cases: 15%.
8. Royalties are normally taxable only in the recipient's home country. However, where the royalty is paid by a Swedish legal entity that is more than 50% owned by one Austrian recipient, entity or individual, the tax in Sweden is a maximum of 10%.
 9. Literary, artistic, or scientific royalties: 0%; other royalties: 5%.
 10. Royalties for use of industrial, commercial, or scientific equipment: 5%; with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 3%; other royalties: 10%.
 11. Royalties for use of copyright and literary, dramatic, musical, and artistic royalties: 0%. Other royalties: 10% (treaty should be consulted).
 12. The treaty has effect on income derived on or after 1 January 2006.
 13. The double taxation treaty does not include Hong Kong.
 14. The same treaty is applicable to the Czech Republic and the Slovak Republic.
 15. According to the Nordic multilateral tax treaty.
 16. Dividends are exempt from tax if the recipient of the dividends is a company directly owning at least 10% of the capital of the company paying out the dividends. Certain rentals are subject to tax if there is a PE in a country other than the home country and the claim is connected with the business carried on from the PE. Concerning Iceland, dividends are normally exempt from tax for companies, but the tax rate is 15% if the dividends have been deducted from the income of the distributing company.
 17. Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.
 18. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 5%; other royalties: 12.5%.
 19. Royalties for the use of industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience: 10%; other royalties: 15% (treaty should be consulted).
 20. Literary, artistic, or scientific royalties including films: 15%; other royalties: 10% (treaty should be consulted).
 21. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial or scientific experience: 5%; other royalties: 15%.
 22. Commercial royalties, including films: 20%; copyright, literary, dramatic, musical, or artistic royalties: 0%.
 23. Commercial royalties, including films: 15%; literary, dramatic, musical, or artistic royalties: 5%.
 24. Literary, artistic, scientific, or film royalties: 10%; other royalties: 7%.
 25. Royalties with respect to patents, designs or models, secret formulas or processes, or for information concerning industrial or scientific experience or for the use of industrial, commercial, or scientific equipment involving a transfer of know-how: 5%; other royalties: 15%.
 26. Former Yugoslavia refers to the countries of Bosnia and Herzegovina, Croatia, Macedonia, Montenegro, Serbia, Slovenia, and the autonomous province of Kosovo. The treaty is applicable to all republics and autonomous provinces of the former Yugoslavia with the exception of Macedonia, with which Sweden has concluded a bilateral treaty.
 27. Royalties arising from the use or the right to use trademarks: 25%; other royalties: 15%.
 28. The first tax treaty between Sweden and Armenia was signed on 9 February 2016 but is pending to be adopted by the Swedish Parliament.
 29. The first tax treaty between Sweden and Azerbaijan was signed on 10 February 2016 but is pending to be adopted by the Swedish Parliament.
 30. A new tax treaty between Sweden and United Kingdom was signed on 26 March 2015. The Swedish legislation implementing the treaty entered into force on 31 December 2015.
 31. Dividends are exempt from tax if the beneficial owner is a company that controls at least 10% of the voting power of the paying company. For other cases, dividends are taxable at a maximum rate of 5%. A maximum rate of 15% applies to dividends paid out of income (including gains) from immovable property by an investment vehicle that distributes most of the income annually and whose income from the immovable property is tax exempt.
 32. Royalties for the use of, or the right to use, industrial, commercial, or scientific equipment: 5%; other royalties: 10%.
 33. Royalties for the use of, or the right to use, industrial, commercial, or scientific equipment: 5%; other royalties: 7%.
 34. Royalties for patents relating to industrial know-how of manufacturing methods and royalties attributable to agriculture, pharmaceuticals, computers, computer software and construction, secret formula or processes, or for information concerning industrial, commercial, or scientific nature: 0%. Other royalties: 10%.

Sweden

35. Royalties paid for the use of, or the right to use, patent, trademark, design or model, plan, or secret formula or process, or information concerning experience of industrial, commercial, or scientific nature: 5%. Other royalties: 10%.

Tax administration

Taxable period

If the income is derived from business, the basis for tax assessment is the financial year. The year-end for a company may be fixed at any calendar month ending, provided it comprises 12 calendar months and ends on the last day of a month. Swedish subsidiaries of foreign parents may generally be permitted to adopt the same year-end as the parent company.

Tax returns

Every corporate entity or registered branch must file an annual corporate tax return. The applicable due date for tax return submissions depends on the month in which the financial year ends: tax returns for financial years ending in January through April are due on 1 November in the same year; tax returns for financial years ending in May or June are due on 15 December in the same year; tax returns for financial years ending in July or August are due on 1 March in the following year; and tax returns for financial years ending in September through December are due on 1 July in the following year. The financial year of most Swedish companies follow the calendar year; consequently, most tax returns are subject to the 1 July due date.

The annual assessments are made by the local tax offices during the calendar year following the income year and should be completed about a year after the expiry of the financial year.

Payment of tax

Income taxes are collected during the year in which the income is earned, under a preliminary tax system. A corporate entity's preliminary tax liability is determined by a preliminary tax assessment based either on the latest available final tax assessment or on a preliminary tax return filed by the company. The preliminary taxes are payable in monthly instalments. Interest surcharges on underpayment of preliminary taxes, however, generally apply after two months from the end of the fiscal year (the end of a fiscal year is one of 30 April, 30 June, 31 August, or 31 December).

Once a tax assessment decision has been made by the Swedish Tax Agency, any balance owed by the taxpayer is payable in 90 days. Any balance owed to the taxpayer is automatically refunded within a year from the end of the fiscal year.

Tax penalty

A taxpayer that submits incorrect or insufficient information in a tax return is charged a penalty of up to 40% of the tax that, if the incorrect information had been accepted, would have been imposed or credited. The penalty and the rate may vary depending on the type of the shortcoming. Late filing fees also apply.

Appeals

Taxes are assessed by the Swedish Tax Agency. Depending on the circumstances, reassessments and/or appeals generally can be initiated within two and/or six years after the expiry of the calendar year during which the financial year ended. The extended six-year period can generally be applied by the Swedish Tax Agency to the disadvantage of the taxpayer in cases of erroneous or misleading information having been provided by the taxpayer or the taxpayer's omission of information. Appeals can be made to the Administrative Court, onwards to the Administrative Court of Appeal and, in case granted trial dispensation, onwards to the Supreme Administrative Court.

Topics of focus for tax authorities

The Swedish Tax Agency has, for quite some time, focused on challenging interest deductions on inter-company loans made under the view that the interest rate deviates from the arm's-length rule. This particular focus has resulted in a number of court cases. The Swedish Tax Agency is currently also focusing on interest deduction restrictions under current limitation rules.

Another focus of the Swedish Tax Agency has been to challenge individual owners of private equity companies on the taxation of carried interest.

Other issues***United States (US) Foreign Account Tax Compliance Act (FATCA)***

On 8 August 2014, Sweden signed a Model 1A FATCA agreement with the United States. The intergovernmental agreement (IGA) has been implemented through legislative means that entered into force as of 1 April 2015.

Significant developments

Base erosion and profit shifting (BEPS)

Based on the results of the BEPS project, Switzerland has launched several actions in order to implement BEPS measures into the Swiss tax law, in particular:

- Country-by-country (CbC) reporting: In April 2016, the Federal Council launched the consultation process with respect to the multilateral agreement and the respective Swiss act in order to implement the exchange of CbC reports. It is expected that multinationals, which are required to prepare a CbC report, have to draw up a CbC report in the year 2018 for the first time. The automatic exchange of these reports between the partner states shall start in 2020.
- Spontaneous exchange of information: In April 2016, the Federal Council launched the consultation with respect to the implementation of the legal framework and the procedures required for the spontaneous exchange of information. The new rules shall be based on the Organisation for Economic Co-operation and Development (OECD)/Council of Europe Convention on Mutual Administrative Assistance in Tax Matters and the revised Swiss Tax Administrative Assistance Act. The new law shall enter into force as of 1 January 2017. The spontaneous exchange of information shall start as of 1 January 2018.

Corporate tax reform III

After having implemented two favourable corporate tax reforms, corporate tax reform III is currently on the political agenda. The aim of the reform is to stabilise and strengthen Switzerland's fiscal competitiveness as a business location and to focus on innovation and value creation.

The draft law is currently subject to parliamentary debates and includes the following innovations:

- The implementation of a patent box regime at the cantonal and communal level considering the latest international developments in this regard.
- The possibility for the cantons to apply super deductions for research and development (R&D) expenditure.
- The abolition of the issuance stamp tax on equity contributions.
- Various other innovations, like harmonised regulations with respect to the partial taxation of dividends and the disclosure of hidden reserves.

All of these innovations will replace the current tax privileges, whereas transition regulations will apply (*see Privileged cantonal tax regimes in the Tax credits and incentives section*).

Corporate tax reform III is likely to enter into force no earlier than 2018.

Value-added tax (VAT) law changes

A partial revision of the Swiss VAT act is currently subject to parliamentary debates. The draft law contains, amongst others, the following suggested changes:

- Foreign companies generating a total turnover of at least 100,000 Swiss francs (CHF) per year in Switzerland and abroad shall be subject to Swiss VAT. This will, however, allow them to recover related Swiss input VAT.
- Foreign online retailers generating a turnover of more than CHF 100,000 per year with tax exempt deliveries to Switzerland due to the low value of the goods (i.e. less CHF 200 per shipment) shall be subject to Swiss VAT.

The suggested changes are likely to enter into force no earlier than 2017.

Taxes on corporate income

Resident companies are subject to Swiss corporate income tax (CIT) on their taxable profits generated in Switzerland. CIT is levied at the federal, cantonal, and communal level. Foreign-source income attributable to foreign permanent establishments (PEs) or real estate property located abroad is excluded from the Swiss tax base and only taken into account for rate progression purposes in the cantons that apply progressive tax rates.

Non-resident companies may be subject to Swiss CIT if they are (alternatively) partners of a Swiss business, have a PE in Switzerland, own real estate property in Switzerland, have loan receivables secured by a mortgage on Swiss real estate property, or deal with or act as a broker of Swiss real estate property. Non-resident companies are taxed on their income generated in Switzerland only (*see the Branch income section*).

Federal level

Switzerland levies a direct federal CIT at a flat rate of 8.5% on profit after tax. Accordingly, CIT is deductible for tax purposes and reduces the applicable tax base (i.e. taxable income), resulting in a direct federal CIT rate on profit before tax of approximately 7.83%. At the federal level, no corporate capital tax is levied.

Cantonal/communal level

In addition to the direct federal CIT, each canton has its own tax law and levies cantonal and communal income and capital taxes at different rates. Therefore, the tax burden of income (and capital) varies from canton to canton. Some cantonal and communal taxes are imposed at progressive rates.

Overall tax rates

As a general rule, the overall approximate range of the maximum CIT rate on profit before tax for federal, cantonal, and communal taxes is between 11.5% and 24.2%, depending on the company's location of corporate residence in Switzerland.

Corporate residence

A company is considered resident in Switzerland if its domicile is in Switzerland. Residency is also linked to the place of effective management, which may be the centre from which day-to-day activities are directed or the place from which managerial decisions are taken.

Permanent establishment (PE)

For Swiss tax law purposes, the term 'permanent establishment' means a fixed place of business through which the business activity of an enterprise is wholly or partly carried out. In particular, PEs are branches, factories, workshops, sales agencies, permanent representations, mines and other places of extraction of natural resources, as well as building or construction sites that last at least 12 months. This definition is generally in line with the criteria according to the current Article 5 paragraph 2 of the OECD Model Tax Convention on Income and Capital.

Switzerland

Other taxes

Value-added tax (VAT)

As a matter of principle, proceeds of sales and services conducted in Switzerland are subject to VAT at the standard rate of 8%. Goods for basic needs are subject to VAT at the rate of 2.5%. These rates include a temporary increase that went into effect on 1 January 2011 and will remain applicable until 31 December 2017. On 1 January 2018, if no extension or change is enacted, the rates should decrease from 8% to 7.6%, and from 2.5% to 2.4%. Services in connection with the provision of lodging are subject to VAT at the rate of 3.8% (limited until 31 December 2017).

Any person, regardless of legal form, objects, and intention to make a profit, is liable to VAT if that person carries on a business and is not exempt from the tax liability. A person carries on a business if one independently performs a professional or commercial activity with the aim of sustainably earning income from supplies and acts externally under one's own name. Persons who are taxable must register with the Swiss Federal Tax Administration of their own accord in writing within certain deadlines. Anyone who in Switzerland generates less than CHF 100,000 in turnover within a year from taxable supplies is exempt from the aforementioned liability. A registered taxpayer generally is entitled to offset the amount of VAT charged by suppliers or paid on imports against the VAT payable.

The VAT rates are dependent on the goods sold or the services provided. Some supplies are just exempt from the tax without credit (e.g. hospital treatment, cultural services, insurance and reinsurance turnovers, specific turnovers in the field of money and capital transactions) and some supplies are fully exempt from the tax (e.g. supply of goods that are transported or dispatched directly abroad). The difference relates to the fact that the input VAT related to supplies exempt from the tax without credit cannot be deducted, whereas supplies exempt from the tax are fully eligible for input VAT deduction.

Customs duties

All goods arriving in Switzerland from abroad are generally subject to customs duty and import VAT. The customs duty is calculated on the gross weight of imported goods, where category-specific weight rates apply. Products like alcoholic drinks, tobacco products, food, and textiles are typical categories of higher duty rates. Furthermore, imported goods are subject to import VAT of generally 8%. A reduced rate of 2.5% applies on certain goods (e.g. food, non-alcoholic beverages, books, magazines, pharmaceutical products).

Excise taxes

In Switzerland, various excise taxes are levied. To name a few, the following excise taxes are levied at the federal level:

- VAT (*see above*).
- Petroleum tax.
- Performance-related Heavy Vehicle Fee.
- National road tax (motorway tax sticker).
- Beer excise tax/Tax on alcohol.
- Tobacco excise tax.

Property taxes

With regard to the ownership and the transfer of real estate property in Switzerland, property taxes may apply. Depending on the location of the real estate property, ownership related property taxes are levied at the cantonal and/or communal level or do not exist at all.

In case of the sale of real estate property, real estate transfer tax and taxes on the capital gain may apply.

At the federal level, capital gain realised on the sale of real estate property is subject to ordinary CIT. At the cantonal and communal level, depending on the canton concerned, capital gain realised is either subject to the ordinary CIT (dualistic method) or subject to a special real estate capital gain tax (monistic method).

It is at the discretion of the authority of the cantons to decide how real estate capital gains shall be taxed within their territory.

Securities transfer tax

Swiss securities transfer tax (often known as 'securities turnover tax' or 'transfer stamp tax') is levied on the transfer of Swiss or foreign securities, in which Swiss security dealers participate as contracting parties or as intermediaries. The ordinary tax rate of Swiss securities transfer tax is 0.15% for securities issued by a tax resident of Switzerland and 0.3% for securities issued by a tax resident of a foreign country.

Swiss security dealers are defined as any person professionally engaged in the buying or selling of securities for one's own account or for another person, including Swiss banks and other Swiss bank-like institutions. The definition also includes companies holding taxable securities whose book value exceeds CHF 10 million and remote members of a Swiss stock exchange.

Taxable securities include, but are not limited to, shares and bonds. Options and many other derivative instruments are not subject to Swiss securities transfer tax. However, the exercise of such financial instruments or derivatives may result in a taxable transfer of a security.

Various transactions are exempt from the Swiss securities transfer tax. Generally, no Swiss securities transfer tax is levied in the case of a merger or a reorganisation in which a Swiss security dealer is involved and taxable securities (including participations) are transferred. Furthermore, the like-kind exchange of a participation by a Swiss security dealer is also exempt from the Swiss securities transfer tax. This is particularly important for holding companies, which may qualify as Swiss security dealers.

Issuance stamp tax

Issuance stamp tax (often known as 'capital duty') on the issuance and the increase of the equity of Swiss corporations is levied at the rate of 1% on the fair market value of the assets contributed, with an exemption on the first CHF 1 million of capital paid in, whether it is made in an initial or subsequent contribution.

A multitude of transactions qualify for an issuance stamp tax exemption. In particular, special tax provisions allow for most reorganisations to take place on a tax neutral basis. In addition, an existing non-resident company may generally transfer assets to Switzerland without incurring Swiss issuance stamp tax. However, if the company was formed abroad and re-domiciled to Switzerland exclusively or mainly in order to avoid Swiss stamp taxes, issuance stamp tax may apply.

The issuance of Swiss bonds and money market instruments is not subject to Swiss issuance stamp tax.

In addition, the conversion of certain contingent convertible bonds (CoCos) into equity will also not trigger Swiss issuance stamp tax on the newly created equity. In more detail, this relief applies to CoCos according to the Swiss banking law only; other convertible bonds will still trigger Swiss issuance stamp tax if converted into equity.

Capital tax

Corporate capital tax is only levied at the cantonal and the communal level (not at the federal level). It is based on a corporation's equity (i.e. the taxable equity corresponds to the sum of nominal capital, paid in surplus, retained earnings, other equity reserves,

Switzerland

and, according to Swiss thin capitalisation rules, potential deemed equity). The ordinary capital tax rates vary between 0.001% and 0.525%, depending on the company's location of corporate residence in Switzerland. Reduced capital tax rates usually apply for companies subject to a special cantonal tax regime (e.g. holding companies, domicile companies, mixed trading companies).

The cantons are allowed to foresee in their tax law that CIT is creditable against a corporation's capital tax. As of 1 May 2016, the following cantons have implemented such credit system: Argovie, Appenzell Innerrhoden, Bern, Basel-Land, Geneva, Neuchâtel, St. Gallen, Solothurn, Schwyz, Thurgau, and Vaud.

Payroll taxes

Wage tax withholding (tax at source)

Employees meeting certain criteria (e.g. Swiss tax resident foreign nationals without a permanent residence permit, non-Swiss tax resident individuals) are subject to wage tax withholdings. In such case, it's the employer's obligation to withhold the appropriate wage tax on the employee's gross salary. The wage taxes cover the employee's federal, cantonal, and communal taxes as well as church tax (if applicable) (*see the Taxes on personal income section of Switzerland's Individual tax summary at www.pwc.com/taxsummaries*).

Social security contributions

Employers, in general, are required to account for social security contributions on the salaries of their employees. If the employee is subject to the Swiss social security system, the following compulsory social security contributions are concerned (*see the Other taxes section of Switzerland's Individual tax summary at www.pwc.com/taxsummaries*):

- Old age, survivors', and disability insurance (10.25%; the employee's share is one half).
- Unemployment insurance/supplementary unemployment insurance (approximately 2.2%; the employee's share is one half).
- Family compensation fund (1% to 3%; fully employer financed).
- Occupational accident insurance (approximately 0.17%; fully employer financed).
- Occupational pension scheme (2nd pillar) (contributions depend on pension plan; the employee's share is usually half of the total contribution, where the employer bears the other half).

Branch income

Foreign legal entities having a branch in Switzerland become subject to limited taxation in Switzerland. Such branches generally qualify as PEs in line with the OECD Model Tax Convention on Income and Capital. The branch's income is, in general, subject to the same CIT rules that apply for Swiss corporations. It is worth noting that there is no Swiss withholding tax (WHT) on profit transfers from the Swiss branch to its foreign head office.

Income determination

The statutory accounts of a Swiss company (or in the case of a non-resident company, the branch accounts) serve as the basis for determining taxable income. There are generally very few differences between statutory profit and taxable profit apart from the participation relief for dividend income and capital gains (*see below*), adjustments required by the tax law, and the usage of existing tax loss carryforwards (*see Net operating losses in the Deductions section*).

Inventory valuation

Swiss CIT treatment does, in principle, follow underlying Swiss statutory accounting treatment. Inventory valuation is therefore determined according to the accounting rules of the Swiss code of obligations. As the Swiss code of obligations, hence the Swiss accounting rules, favour the prudence principle, a valuation allowance is allowed to be recorded on the inventory in excess of the actual devaluation of the inventory due to a lower market value (*see Obsolete inventory provision in the Deductions section*). Such valuation allowance is accepted for tax purposes at up to a maximum of one-third of the inventory's acquisition costs or its productions costs, respectively its lower market value.

Accordingly, the maximum inventory value represents the inventory's acquisition costs or its production costs. In case these costs exceed the inventory's market value at the balance sheet date, the latter lower market value must be applied. In order to determine the inventory's acquisition or production cost, various methods exist.

It is at the corporate taxpayer's discretion to determine which method shall apply (e.g. weighted average method, first in first out [FIFO], last in first out [LIFO], highest in first out [HIFO]).

Participation relief

Participation relief is the name generally attributed to the tax relief on qualifying dividend income and capital gains from the disposal of a subsidiary. Participation relief is not an outright tax exemption, but rather a tax abatement mechanism. It is therefore also commonly referred to as 'participation deduction' or 'participation exemption'.

Participation relief is a percentage deduction from CIT that is equal to net participation income divided by taxable income. Net participation income consists of the gross participation income from qualifying dividends and (usually) qualifying capital gains less related administration and financing costs and any depreciation of the participation that is linked to the dividend distribution. In most cases, participation relief results in a full exemption of participation income from CIT, or one close thereto. Note that participation relief may be diluted in certain cases (e.g. if tax loss carryforwards are offset).

The participation relief on dividend income is mandatory at the federal CIT as well as at the cantonal/communal level. The participation relief on capital gains is voluntary for cantonal/communal tax purposes, but nevertheless implemented by all cantonal tax acts. Specific privileged cantonal/communal tax regimes may foresee more favourable rules for dividend income and capital gains than the participation relief (*see Privileged cantonal tax regimes in the Tax credits and incentives section*).

Dividend income

Dividends qualifying for participation relief are those from participations representing at least 10% of the share capital or 10% of profits and reserves of another company or those having a market value of at least CHF 1 million. Note that there is neither a minimum holding period nor a requirement that the dividend paying subsidiary is liable to income tax in its jurisdiction of residence.

Capital gains

Capital gains derived from the disposal of a qualifying participation are generally entitled to participation relief if the following conditions are cumulatively met:

- The participation sold was owned by the company for a period of at least one year.
- The participation sold constitutes at least 10% of the share capital or 10% of profits and reserves of the underlying subsidiary. If a residual participation is less than 10% due to a previously qualifying partial sale, further participation relief on a capital gain is only possible if the residual participation's market value at the beginning of the year amounted to at least CHF 1 million.

Switzerland

It is noteworthy that capital gains are only entitled to participation relief to the extent the sales price exceeds the original investment costs (commonly also referred to as 'acquisition costs') of the participation, whereas the so-called 'recaptured depreciation' (i.e. the amount of former depreciations) is taxable.

Interest income

Interest income earned is taxable income. It is of no relevance whether the payment of the interest was made by a related party (affiliated company or shareholder) or by a third party (*see Interest expense in the Deductions section*).

Foreign exchange gains

Realised foreign exchange gains in relation to a transaction (transaction gains) are included in the tax basis of a corporation as taxable. Realised and, as a result of the prudence principle of the Swiss accounting rules, unrealised transactional foreign exchange losses are tax deductible. Based on a federal court decision in 2009, foreign gains (or losses) resulting from the translation of financial statements in a foreign (functional) currency to Swiss franc (presentation currency) are not taxable (respectively tax deductible).

Foreign income

Swiss tax resident corporations are basically taxed on their worldwide income. However, income attributable to a foreign PE (i.e. a PE outside of Switzerland) is not taxed in Switzerland. It may only be taken into account to determine the applicable tax rate, in case progressive tax rates apply. The same rule applies for income from real estate property situated abroad.

Dividends, interest, and royalties from Swiss or foreign sources are included in taxable income. However, in certain cantons, special methods of assessment may apply for dividend and other income originating outside Switzerland. For dividend income, a relief generally is available at the federal income tax level as well as at the cantonal/communal level (*see Participation relief above*). The irrecoverable portion of foreign WHT of most treaty countries can be credited against the related Swiss income taxes on the same income. Foreign WHT of non-treaty countries generally is not creditable, but is deductible for income tax purposes.

There are no controlled foreign company (CFC) rules in Switzerland. Consequently, undistributed income of foreign subsidiaries is usually not taxed in Switzerland (*see Controlled foreign companies [CFCs] in the Group taxation section*).

Deductions

The statutory accounts of a Swiss company are the basis for determining taxable income. To be tax deductible, an expense has to be booked in the statutory accounts accordingly.

Generally, all business expenses that are booked in the statutory accounts are tax deductible, assuming they are economically/commercially justified from a tax perspective. If an expense is not a justifiable business expense in the sense of the tax law, it will be added back to taxable income. Examples typically include excessive depreciation, non-justified payments to related parties (e.g. hidden profit distributions), etc.

Depreciation and amortisation

Maximum depreciation/amortisation rates allowed for tax purposes are issued by the Swiss Federal Tax Administration. Higher depreciation/amortisation is allowed for tax purposes if the taxpayer can prove that such higher depreciation/amortisation is required (not only allowed) from a statutory accounting perspective. Some cantons

follow the federal guidelines, whereas some cantons apply their own (more liberal) depreciation/amortisation rates.

The following summary of the rates specified by the Swiss Federal Tax Administration provides the general range of tax-accepted depreciation:

Assets	Declining-balance (%)	Straight-line (%)
Commercial buildings:		
Buildings alone	4	2
Buildings and land combined	3	1.5
Equipment:		
Office furniture and equipment	25	12.5
Computer hardware and software	40	20
Other assets:		
Motor vehicles	40	20
Intangible assets	40	20

Some cantons (e.g. Basel-City, Bern, Grisons, Zurich) take a more liberal approach and even permit, for tax purposes, an immediate write-down of certain assets (including fixed assets) to 20% or nil of the purchase price in the first year, provided that such write-downs do not, in the aggregate, result in a drastic decline in taxable income or even a tax loss. For tax purposes, such immediate write-downs must be booked in the statutory accounts and generally disclosed in the tax return. As the cantonal tax authorities are responsible for assessing not only cantonal/communal CIT but also federal CIT, the immediate write-down will typically be accepted for federal CIT purposes as well.

Goodwill

Only acquired goodwill (derivative goodwill) may be capitalised in the statutory accounts and be amortised. Amortisation is generally allowed straight-line over five years. Special limitations apply to acquired shares, where the purchase price for these shares partly represents inherent goodwill.

Start-up expenses

The Swiss code of obligations does not contain any specific Swiss statutory accounting provision with regard to start-up expenses. For Swiss statutory accounting purposes, start-up expenses shall be expensed as incurred. For Swiss CIT purposes, business related start-up expenses as booked in the statutory profit and loss statement are likely fully tax deductible.

Interest expense

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliated company or shareholder) has to reflect the fair market rate and is subject to limitations (*see Thin capitalisation in the Group taxation section*).

With respect to related parties, the Swiss Federal Tax Administration annually issues safe harbour interest rates to be used on loans denominated in Swiss franc on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates used are at arm's length and more appropriate in the present case. The cantons usually follow these federal guidelines.

The safe harbour rules for loans denominated in Swiss franc applicable as of 1 January 2016 are as follows:

For loans to related parties	Minimum interest rate (%)
Financed from equity	0.25

Switzerland

For loans to related parties	Minimum interest rate (%)
Financed from debt (actual costs plus at least):	
On amount up to and including CHF 10 million	0.50
On amounts of more than CHF 10 million	0.25
But in all cases at least	0.25

For loans from related parties	Maximum interest rate (%)	
Type of loan	Home construction/ agriculture	Industry and business
Real estate loans:		
A loan up to the amount generally acceptable for mortgages (i.e. 2/3 of the market value of the real estate)	1.00	1.50
Rest, whereby the following maximum interest rates for debt are applicable:		
Land, villas, residences, vacation houses, business premises up to 70% of the market value	1.75*	2.25*
Other real estate up to 80% of the market value		
Operational loans up to CHF 1 million:		
Made to trading and production companies	-	3.00*
Made to holding and asset administration companies	-	2.50*
Operational loans above CHF 1 million:		
Made to trading and production companies	-	1.00*
Made to holding and asset administration companies	-	0.75*

* In calculating the amount of the maximum interest permissible from a tax perspective, any potentially existing hidden equity (under Swiss thin capitalisation rules) has to be considered.

Bad debt provision

Based on a longstanding practice in Switzerland, it is admissible to set up a statutory accounting provision for specific impaired receivables, which will be accepted for income tax purposes. Unlike most other countries, it is also possible to account for an additional ('lump sum') bad debt provision of 5% on all domestic and 10% on all foreign receivables (i.e. a provision in addition to the provision for specific impaired receivables), except for inter-company receivables and receivables to the public, enabling the taxpayer to defer the related tax liability until this provision has been released. Some cantons, such as Zurich, accept an even higher reserve (i.e. 10% on domestic and 20% on foreign receivables). This additional bad debt provision may have the character of a 'hidden' (i.e. undisclosed) reserve and is appropriate because the Swiss statutory accounting standards favour prudence over true and fair view accounting principles.

Obsolete inventory provision

Similarly to the bad debt provision, it is possible to account for a 'hidden' (i.e. undisclosed) reserve on a company's inventory. This provision, which must also be booked in the statutory accounts, is accepted for tax purposes (similar to the bad debt provision). Specifically, a company may book a provision for specific obsolete inventory as well as a general provision of 33.3% of the inventory value after deduction of the obsolete inventory.

Charitable contributions

At the federal level, charitable contributions of up to 20% of the net profit (after tax) of a company are tax deductible, provided certain criteria are met. In particular, the charitable contribution has to be remitted to (i) Swiss legal entities that are exempt from taxation based on their public welfare or exclusively charitable objective or to (ii) the Swiss Federation, a Swiss canton or municipality, or their agencies ('Anstalten'). The cantons usually apply the same rules and similar thresholds.

Sponsoring contributions are only tax deductible if commercially justified (without specific thresholds).

Royalties

Royalty payments are generally deductible for tax purposes as long as the royalty rate is at arm's length.

Costs of employee share plans and stock option plans

The cost of employee share plans and stock option plans are generally deductible, assuming the employees eligible for the plan are employed by the Swiss company. The same holds true for the recharge of costs for plans covering local employees.

Costs for job-related training and continuing education of employees

As far as they are recognised as an expense in the statutory books, costs incurred for job-related training and continuing education of employees are generally tax deductible.

Fines and penalties

Under Swiss tax law, tax fines are not tax deductible. The potential tax deductibility of other fines or penalties has to be analysed with respect to the specific case.

Tax expenses

Corporate income and capital taxes paid to the federal government, as well as to the cantons and the municipalities, are tax deductible. Indirect taxes (e.g. real estate transfer tax) are tax deductible as well.

Net operating losses

Tax losses can be carried forward for a maximum of seven years and can be offset against the taxable income of the following seven years. There is no carryback of tax losses in Switzerland.

Payments to foreign affiliates

Management and services fees paid by a Swiss company to a related party are generally tax deductible as long as the fees are at arm's length.

Group taxation

Tax is levied on each corporation as a separate entity. A parent company and its Swiss subsidiaries are taxed separately, and only the dividends from the subsidiaries (but not their profits) are taxable in the parent company's hands. However, usually for dividend income, participation relief is applicable (*see Participation relief in the Income determination section*). For income and capital taxes, no rules on group taxation exist.

Transfer pricing

So far, Switzerland has not introduced specific transfer pricing regulations. There is, however, an increasing awareness of the issue and concern on the part of the Swiss tax authorities that taxpayers may transfer profits without economic justification either to countries with strict transfer pricing rules and documentation requirements in order to avoid challenges by the respective local tax authorities or to offshore locations. In this context, Swiss tax authorities take an increasing interest in a company's transfer pricing position in order to defend their own position. Some cantonal, as well as the federal, tax authorities have started to particularly focus on low risk/low profit entities located in Switzerland.

Switzerland follows the OECD Guidelines as closely as possible and recognises the arm's-length principle based on interpretation of actual legislation. To clarify transfer pricing issues, Switzerland offers an informal procedure for agreeing to pricing policies in advance.

Switzerland

Thin capitalisation

Swiss thin capitalisation rules are, in general, only applicable for related parties. In case of a thin capitalisation, the related party debts can be treated as taxable equity. The respective circular letter issued by the Swiss Federal Tax Administration provides for debt-to-equity ratios as safe harbour rules. As an example, the debt-to-equity ratio is generally fixed at 6:1 for finance companies (safe harbour). Interest paid on loans that exceed the relevant ratios are generally not tax deductible; further, these interests may be deemed as a hidden distribution subject to Swiss WHT. There are no limitations on the financing of Swiss corporations by independent third parties (e.g. banks).

Interest rates paid to affiliated companies are also subject to periodically fixed safe harbour interest rates (*see Interest expense in the Deductions section*). The tax deduction of interest in excess of the permitted safe harbour rate may be disallowed and treated as a hidden distribution subject to Swiss WHT.

Controlled foreign companies (CFCs)

In Switzerland, no CFC or 'subject to tax' rules exist. Foreign companies are therefore recognised for Swiss tax purposes if they are managed and controlled offshore and are not set up purely for the reason of avoiding Swiss taxes.

Tax credits and incentives

Generally, cantons offer competitive income tax rates for cantonal and communal tax purposes. Depending on the specific cantonal and communal tax location in Switzerland, the ordinary overall (federal, cantonal, and communal) CIT rates applicable on profit before tax may vary between 11.5% and 24.2% (*see the Taxes on corporate income section*). The cantons continually try to improve their attractiveness as business locations. It is at the sole discretion of the cantons to credit CIT against the capital tax to reduce the overall tax burden (*see Capital tax in the Other taxes section*). As a further example, the canton of Nidwalden introduced a tax relief for certain licence income (so-called 'licence box'), whereupon net licence income from the use of intangible assets is taxed separately at a reduced CIT rate of one-fifth of the regular cantonal/communal rate.

In addition, many cantons offer tax incentives for newly established companies or for expansion investments, such as tax holidays or significant tax relief for cantonal and communal tax purposes for up to ten years. In some less centric cantons and for specific economic development regions, a tax holiday may even be granted for federal CIT purposes if certain conditions are met.

Privileged cantonal tax regimes

Many cantons offer privileged corporate tax regimes. Upon request, it is usually possible to get an up-front confirmation from the relevant cantonal tax authorities that the planned business activities of a taxable entity are meeting the requirements as foreseen by the relevant cantonal tax laws for a specific privileged tax regime.

As part of the corporate tax reform III, which is likely to enter into force no earlier than 2018, the privileged cantonal tax regimes shall be replaced with new measures, and transition regulations will have to be observed (*see Corporate tax reform III in the Significant developments section*).

Holding company tax regime

A qualifying holding company is exempt from all cantonal/communal CIT (with the exception of income from Swiss real estate, which is subject to tax after deduction of typical mortgage expenditures on such real estate).

Consequently, a holding company is, in principle, only subject to an effective income tax rate of 7.83% (i.e. federal CIT rate) prior to participation relief for qualifying dividends and capital gains. Further, usually a reduced capital tax rate at the cantonal/communal level applies.

Companies that meet the following conditions are eligible for the holding company tax status:

- The primary purpose of the company must be to hold and to manage long-term equity investments in subsidiaries, and this purpose must be stated in the by-laws.
- The company must not be engaged in a commercial activity in Switzerland.
- The company must pass an alternative asset or income test, whereby either two-thirds of the company's assets must consist of substantial shareholdings or participations or two-thirds of total income of the company must consist of participation income (dividend income or capital gains) from such shareholdings and participations.

An advance confirmation is obtainable from the cantonal tax authorities clarifying that a specific company will qualify for the criteria of the holding company status as foreseen by the relevant cantonal tax laws prior to forming such holding company.

Domicile company tax regime

Companies that only carry out administrative functions in Switzerland but have no commercial activities are typically eligible for the domicile company tax status.

Insofar as a company fulfils the above-mentioned criteria, it may apply with the cantonal tax authorities for taxation based on the domicile company tax regime, which, if applicable, has the following implications at the cantonal/communal CIT level:

- A modest portion of foreign-source income (i.e. from 0% to 15%) is subject to tax in accordance with the importance of the administrative function in Switzerland.
- Income from qualifying participations (including dividends, capital gains, and re-evaluation gains) is usually tax exempt (whereas losses deriving from qualifying participations usually are not tax deductible).
- All income from Swiss sources is taxed at ordinary rates.
- Expenditures that are justified for business purposes are deductible from the income to which they have a business correlation.
- Reduced capital tax rates usually are applicable.

The conditions to qualify as a domicile company vary from canton to canton. This is particularly the case with regard to determining the percentage of income from foreign sources subject to tax in Switzerland and to the definition of exactly what type of income is considered foreign-source income.

A domicile company can be expected to be subject to an effective tax rate of 7.83% to 11% on foreign-source income.

Mixed trading company tax regime

The mixed trading company tax status, which is very similar to the domicile company tax status, was given different names by the cantons. Internationally, it is most often referred to as the 'mixed trading company' tax status.

Contrary to a company benefiting from the classical domicile company tax status, a company benefiting from the mixed trading company tax status is allowed to undertake limited commercial activities in Switzerland. As a general rule, at least 80% of the income from commercial activities of a mixed trading company must derive from non-Swiss sources (i.e. a maximum of 20% of income may be linked to Swiss sources). Many cantons additionally require that at least 80% of the costs must be related to activities undertaken abroad.

Switzerland

Insofar as a company will fulfil the above mentioned criteria, it may apply with the relevant cantonal tax authorities for an advance confirmation that it will be entitled to the mixed trading company tax status. Depending on the concrete Swiss activity and infrastructure, the portion subject to cantonal and communal income taxes generally varies between 5% and 25% of the foreign-source income and is normally higher than it is for domicile companies. The exact portion, based on the specific business activities of a company, needs to be clarified with the responsible cantonal tax authorities.

Foreign tax credit

Swiss tax resident corporations may suffer foreign non-recoverable WHTs on dividend, interest, and royalty income derived from foreign sources. As such foreign-source income is generally subject to income taxation in Switzerland, a double taxation occurs. In case a double tax treaty (DTT) exists and in order to reduce or to eliminate double taxation, Switzerland usually applies the credit method. Specific conditions and formalities will need to be met to benefit from foreign tax credits.

Withholding taxes

This section shall provide a general overview and an indication of the residual WHT on outbound payments from Switzerland. There might be certain exceptions or further reductions available in the DTT, which, for the sake of clarity, are not reflected in the table below. Accordingly, the table below does not replace a thorough assessment of a specific case based on the applicable DTT in force.

The statutory rate of Swiss WHT is 35%. Relief, if any, is generally granted by refund. With respect to qualifying related companies, a mere notification/reporting procedure may be requested for the fraction of the Swiss WHT exceeding the residual WHT. The table further below shows the residual/remaining tax for the recipient. Credit for the unrelieved portion of Swiss WHT may be available in the country of the recipient.

In Switzerland, there is no WHT on interest deriving from regular loan agreements. Swiss WHT of 35% is only levied on interest paid by banking institutions (or paid by entities tax-wise qualified as 'banking institutions') to non-banks, interest on bonds, and interest on bond-like loans. The residual rates in the table below show the standard treaty rates and do not reflect further reliefs available in certain DTTs (e.g. on traded bonds or other traded securities).

Many of the DTTs concluded between Switzerland and other jurisdictions contain a full relief if dividends or interest is paid to governments (including political subdivisions and other governmental institutions), central banks, or pension funds.

Note that in the DTTs concluded between Switzerland and other jurisdictions, the reduced WHT for substantial holdings usually is only available if the recipient of the dividend is a corporate body (e.g. not taxed as a partnership).

Interest paid on CoCos and on write-off bonds (bonds with claim waiver) of systematically important banks is exempt from Swiss WHT. The WHT exemption is restricted to bonds issued by the respective institutions between 2013 and 2016. These bonds must, furthermore, fulfil specific criteria in order to benefit from the WHT exemption. According to a draft of the WHT act reform, it is the intention of the Swiss Federal Council that, under certain conditions, bail-in bonds, issued by the respective institution between 2017 and 2021, shall be exempt from Swiss WHT as well.

Capital contribution principle

The capital contribution principle allows the repayment of qualifying shareholders' capital contributions without deduction of Swiss WHT at the level of the distributing company and without income tax implications at the level of Swiss individual

shareholders (holding the shares as private assets). In general, the capital contribution principle applies for premiums, additional paid-in capital, and contributions into the reserves of a company without increasing the nominal share capital.

* Bilateral Agreements (in particular Article 15 of the Savings Agreement) between Switzerland and the European Union (EU) apply since 1 July 2005 and provide the following benefits:

Upon request, Swiss WHT on dividends paid by a Swiss subsidiary company to its EU parent company may be reduced to 0% (reduction at source) and is only subject to a notification/reporting procedure, provided the following conditions are cumulatively met:

- Direct minimum holding of 25% of the subsidiary's capital for at least two years.
- Both companies are subject to CIT.

Upon request, WHT on interest and royalty payments made between associated companies or their PE resident, respectively situated in Switzerland and the European Union, may be reduced to 0% (reduction at source) in the source state, provided the following conditions are cumulatively met:

- Direct minimum holding of 25% for at least two years (parent/subsidiary) or direct holding by a third company of minimum 25% in the capital of both companies for at least two years (sister companies).
- Both companies are subject to CIT.

The application of the Bilateral Agreements is subject to foreign and Swiss misuse conditions.

DTTs between Switzerland and EU countries with more favourable tax treatment of dividend, interest, and royalty payments remain unaffected.

Notes

1. There is no Swiss WHT on royalties, licences, and similar fees payable by Swiss individuals or corporations (provided that the dealing at arm's-length principle is met).
2. The statutory Swiss WHT rate of 35% is levied but refunded, provided that the respective earnings are declared as income for tax purposes.
3. Between Swiss group companies, Swiss WHT of 35% is usually fully refundable. Furthermore, in many cases, the tax liability can be met by the notification/reporting procedure. For this purpose, a direct investment of at least 20% in the share capital of the payer of the dividend is required.
4. 20% minimal shareholding plus foreign investment of at least 200,000 United States dollars (USD).
5. Only applicable if holding period is at least 12 months.
6. 15% residual tax for companies with more than 10% shareholding if the company receiving the dividend is directly or indirectly controlled by a shareholder not resident in the European Union or Switzerland and cannot prove that the company is not set up only to benefit from the 0% WHT on dividends.
7. 0% WHT if minimum shareholding is at least 50% for at least six months. 5% WHT if minimum shareholding is at least 10% for at least six months.
8. New DTT between Switzerland and Cyprus, in force since 15 October 2015, applicable as of 1 January 2016.
9. 5% WHT if the shareholding of 10% was held less than two years; 0% WHT if the shareholding of 10% was held longer than two years.
10. Only applicable if holding period is at least 24 months.
11. 5% WHT if dividend recipient is a corporate body; 10% WHT if dividend recipient is an individual.
12. 20% minimal shareholding plus foreign investment of at least CHF 200,000.
13. 10% WHT for shareholdings between 20% and 50%; 7% WHT for shareholdings of more than 50%.
14. Full relief if paid to a related entity in the form of a corporation.
15. New DTT between Switzerland and Estonia, in force since 16 October 2015, applicable as of 1 January 2016.
16. New DTT between Switzerland and Iceland, in force since 6 November 2015, applicable as of 1 January 2016.
17. 0% WHT if certain criteria are met.
18. Switzerland levies a WHT on interest paid on bonds issued in Switzerland and on bank accounts with Swiss banks. Generally, no WHT is levied on interest paid on loans. However, from a Swiss WHT perspective, a loan may be requalified as a bond under certain circumstances.
19. New DTT between Switzerland and Argentina, in force since 27 November 2015, applicable as of 1 January 2015 (retroactive effect).

Switzerland

Tax administration

Taxable period

The tax year is the business year. Thus, the basis for corporate taxation is the applicable accounting period, which may end at any date within a calendar year.

Tax returns

The tax system for corporate income and capital taxes is based on taxpayers' declarations, with subsequent assessments being issued by the tax authorities on the basis of the tax returns filed. The tax return has to be filed annually (an exemption exists in the first business year in case an extended business year shall apply). The filing deadlines vary from canton to canton (usually between six and nine months after the close of the business year). Companies are initially assessed on a provisional basis, with the final assessments being issued after the tax base was either subject of a tax audit or declared final by the authorities.

Payment of tax

Unless instalment payments are specifically requested, federal, cantonal, and communal taxes on income and capital are, in most cantons and for federal tax purposes, payable only upon receipt of a demand based on a provisional or final assessment.

Note that cantonal exceptions apply. As an example, based on the date of maturity of the respective tax year (30 September), the canton of Zurich levies late payment interest to the extent that the full (final) tax amount had not been paid in time (independent from any earlier provisional tax invoices). About one month before the due date, a (provisional) tax bill based on the latest tax return filed or the assessment of the preceding period is sent to the taxpayer. Payment is usually made in two or three instalments. If the entire amount is paid up front, a discount may be granted.

The provisional federal CIT is usually due by 31 March of the year following the tax period at question. The due date of the final federal CIT and the provisional or final cantonal CIT varies.

Tax audit process

Swiss CIT law does not outline specifics of the tax audit process. At first, the tax authorities review the tax return and its enclosures as filed by the taxpayer. Such review is usually desk-related work. The competent tax authorities are obligated and entitled to clarify all relevant information necessary to assess taxpayers on a true and complete base. The tax authorities may request further information/documentation or may inspect the taxpayer's premises.

Statute of limitations

As a general rule, the right to assess a taxpayer in relation to corporate income and capital taxes expires five years after the end of the corresponding tax period (relative statute of limitations). Under certain conditions (e.g. where the relative statute of limitations is interrupted), the absolute statute of limitations of 15 years applies.

In case of tax fraud ('*Steuerbetrug*') or tax evasion ('*Steuerhinterziehung*'; e.g. where specific information was not available to the tax inspector at the time of the assessment), finally assessed tax periods can be reopened. The statute of limitations to reopen finally assessed tax periods is ten years after the end of the corresponding tax period.

Topics of focus for tax authorities

The Swiss tax authorities do not communicate specific topics of focus. The tax authorities do normally start their assessment with reviewing the tax return and its enclosures as filed by the taxpayer (*see Tax audit process above*).

Other issues

Reorganisations

Most corporate reorganisations (e.g. mergers, de-mergers, transfer of business assets within a group of companies, vertical and horizontal spin-off of business or part of business, share-for-share transactions and cross-border reorganisations where the Swiss tax residence is maintained, and like-kind exchange of participations) are typically possible without triggering adverse Swiss tax consequences (tax neutrality). In addition, special rules provide for a legal framework to tax neutrally substitute assets and qualifying shareholdings. For reorganisations, it is best practice to apply for advance tax rulings with the competent tax authorities.

Foreign Account Tax Compliance Act (FATCA)

In 2013, Switzerland and the United States (US) signed a bilateral FATCA agreement. The FATCA agreement will help Swiss financial institutions by means of simplifications in the implementation of the US FATCA legislation. The FATCA agreement and the implementing Swiss act entered into force on 2 June 2014 and 30 June 2014, respectively.

The FATCA agreement shall ensure that accounts held by US persons with Swiss financial institutions are disclosed to the US tax authorities either with the consent of the account holder or through ordinary administrative assistance channels (no automatic information exchange).

Automatic information exchange

In view of the OECD's developments on a new standard for the automatic exchange of information, Switzerland will switch to an automatic exchange of information between the competent authorities on a reciprocal basis.

Switzerland has signed respective agreements with the following partner states on the automatic information exchange (as of 1 May 2016): Australia, Canada, EU (the agreement is applicable for all EU member states), Guernsey, Iceland, Isle of Man, Japan, Jersey, Norway and South Korea. Currently, none of these agreements has been enacted. The first automatic exchange of information between Switzerland and its partner states shall, however, occur in 2018.

WHT agreements

Switzerland has concluded WHT agreements with the United Kingdom and Austria that define a final WHT procedure for the future and a tax-related regularisation of the past related to investment income of foreign bank clients. According to the Swiss government, the long-term effect of these bilateral agreements is equivalent to the automatic exchange of information in the area of investment income.

Significant developments

New real property transfer tax regime

A new real property transfer tax regime in Taiwan has taken effect starting from 1 January 2016. As a result of the implementation of the new real property transfer tax regime, luxury tax will no longer be levied on sales of land or building starting from 1 January 2016. *See Real property transfer tax in the Other taxes section for more information.*

Amendments to the Mergers and Acquisitions (M&A) Act

The Legislative Yuan passed amendments to the M&A Act, which came into effect on 8 January 2016. *See Tax concessions on merger in the Tax credits and incentives section for more information.*

Amendments to the Statute for Industrial Innovation (SII)

The Legislative Yuan passed amendments to the SII, with goals to enhance the competitive advantage of domestic industries. The amendments are effective from 1 January 2016 to 31 December 2019 and include research and development (R&D) incentives.

R&D incentives

To encourage continued investment in innovative R&D activities and to meet the actual needs of different industries and achieve policy results, the amendments to the SII provide another alternative for companies to claim an R&D credit of 10% of qualifying R&D expenses against income tax payable within a period of three years, starting from the current year. In addition, to facilitate the circulation and application of innovative R&D results, and to promote industrialisation of innovative technologies, where individuals/companies derive income from transfer or license of their self-developed intellectual property (IP), the amendments also allow the individuals/companies to either deduct qualifying R&D expenses up to 200% (capped at corresponding income received) within the current year or claim R&D tax credits against income tax payable.

Tax treaties

Within the past year, Taiwan's tax treaty network has increased to include treaties with China, Japan, and Canada, all of which have been signed, but have not yet come into effect.

Taxes on corporate income

The corporate income tax (CIT) rate in Taiwan is 17%.

Resident companies in Taiwan are taxed on their worldwide income as follows:

Taxable income (TWD*)	Tax thereon
Up to 120,000	Exempt

Taxable income (TWD*)	Tax thereon
120,001 and over	17% of total taxable income

* New Taiwan dollar

A non-resident company is taxed on income derived from Taiwan sources. A non-resident company with a fixed place of business (FPOB) or business agent in Taiwan is taxed similarly to a resident company (i.e. subject to filing of an annual CIT return based on the same CIT rate provided above). A non-resident company having no FPOB or business agent in Taiwan is subject to withholding tax (WHT) at source on its Taiwan-sourced income. WHT rates on dividends, interest, and royalties may be reduced if the recipient is a tax resident of a tax treaty country and the relevant treaty provides for a reduced rate. *See the Withholding taxes section for more information.*

Tonnage tax system

A qualifying enterprise having its head office in Taiwan engaged in maritime transportation may elect to be taxed under the tonnage tax system, where a lump sum tax is calculated on the net tonnage of their fleet. Once the application is approved, the enterprise must remain under the tonnage tax system and cannot switch to the regular tax system at its discretion for ten consecutive years. Furthermore, loss carryforwards and tax incentives are not eligible under the tonnage tax system.

Profit retention tax

An additional 10% profit retention tax is imposed on any current earnings of a corporation that remain undistributed by the end of the following year. Taiwan branches of foreign companies are not subject to profit retention tax.

Imputation tax system

Taiwan operates an imputation tax system to eliminate double taxation on earnings of a corporation. The 17% CIT and 10% profit retention tax already paid by the corporation can be distributed to the resident individual shareholders as tax credits to offset against their individual income tax. However, the tax credits distributable to shareholders are subject to certain limitations. Currently, the imputation tax credit is reduced by one-half.

Non-resident shareholders may credit the 10% profit retention tax previously paid by the investee company against the dividend WHT where the dividends are distributed from retained earnings that have already been subject to the 10% profit retention tax. Please note that credit for profit retention tax from dividend WHT is calculated based on a prescribed formula and subject to a ceiling. The ceiling is one-half of the original amount. That is, the ceiling of 10% profit retention tax creditable against dividend WHT is computed as 'dividends distributed from retained earnings where 10% profit retention tax has already been levied' x 10% x 50%.

Income basic tax (IBT)

All Taiwan resident companies, as well as non-resident companies with an FPOB or business agent in Taiwan, should calculate IBT if they earn certain income that is tax-exempt. The basic income of a company is the amount calculated in accordance with a formulae stipulated by the government, with a deduction of TWD 500,000. The IBT rate is 12%. If the IBT amount is greater than the regular CIT amount, taxpayers must pay income tax based on the regular CIT amount plus the difference between the IBT amount and the regular CIT amount. On the other hand, if the regular CIT amount is greater than the IBT amount, no special action is required.

Taiwan

Corporate residence

A company is a resident of Taiwan for CIT purposes if it is incorporated in Taiwan. A non-resident company that has an FPOB or business agent in Taiwan is obligated to file a CIT return in Taiwan on its Taiwan-sourced income.

Permanent establishment (PE)

The term 'permanent establishment' only exists in the underlying double tax agreements (DTAs) signed with Taiwan. Taiwan domestic tax regulations only refer to an FPOB and business agent, which generally follows the definitions of an FPOB and agency PE in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Other taxes

Business tax

All sales of goods and services in Taiwan, as well as the importation of goods into Taiwan, are subject to business tax. There are two types of business tax systems: value-added tax (VAT) and gross business receipts tax (GBRT).

Sellers and service providers are generally obligated to pay business tax for the sales of goods or services within Taiwan unless the law provides otherwise. For importation of goods, the business tax will be paid by the goods receivers or buyers via customs. For importation of services sold by foreign companies to Taiwanese buyers, business tax shall be paid by the service buyers. However, if the foreign service purchased is under TWD 3,000 per transaction, business tax shall not apply. Furthermore, the service buyer (corporate entity) will not be required to pay business tax if it is exclusively engaged in taxable transactions subject to either 5% or 0% VAT.

Value-added tax (VAT)

VAT is applicable to general industries, and the VAT rate is 5%. Under the VAT system, each seller collects output VAT from the buyer at the time of sale, deducts input VAT paid on purchases from output VAT, and remits the balance to the tax authority.

Gross business receipts tax (GBRT)

GBRT is applicable to specified industries (e.g. financial institutions, small businesses). For investment trust companies, securities and futures firms, short-term commercial paper enterprises, and pawnshops, the rate is 2%. The GBRT rate on revenues derived from the core business operations of banks and insurance enterprises is 5%. For re-insurance enterprises, the rate is 1%.

Customs duties

Taiwan uses the Customs Cooperation Council Nomenclature (CCCN) to classify goods and set duty rates. The customs duty is payable by the consignee or the holder of the bill of lading for imported goods, and is based on the dutiable value or the volume of goods imported.

Commodity tax

Commodity tax (excise duty) is levied on certain commodities, as specified in the Commodity Tax Act (including rubber tyres, beverages, cement, plate glass, oil and gas, electrical appliances, and vehicles), at the time when such goods are dispatched from a factory or when imported. Tax rates vary from 8% to 30% and are applicable to different types of commodities based on the value of the goods or its volume in specific circumstances.

Type of commodity	Tax rate
Rubber tyres	10% or 15%

Type of commodity	Tax rate
Beverages	8% or 15%
Cement	TWD 280 to TWD 600 per ton
Plate glass	10%
Oil and gas	TWD 110 to TWD 6,830 per kilolitre or TWD 690 per ton
Electrical appliances	10% to 20%
Vehicles	15% to 30%

Property tax

Land and buildings are annually assessed for tax based on their officially assessed values as determined by the government authorities at the applicable rate. The land value tax rate ranges from 1% to 5.5% of the assessed land value. The building tax rate for commercial properties is 3% to 5% of the assessed value, and the rate for non-commercial properties is 1.2% to 3.6% of the assessed value.

Land value increment tax (LVIT)

The sale of land is currently subject to LVIT and payable by the seller. The tax is levied on the increase in the government-assessed value of the land during the ownership period, adjusted for inflation, at regular progressive rates ranging from 20% to 40%, or a special rate of 10%.

Real property transfer tax

The new real property transfer tax regime is applicable to all properties acquired on or after 1 January 2016, as well as those bought on or after 2 January 2014 if held for less than two years. The taxable base is the market value of the properties reduced by related costs, expenses, and the increase in government-assessed land value for LVIT purposes. A rate of 17% will apply on Taiwanese corporate taxpayers; whereas, a tax rate of 35% or 45% will apply on profit-seeking enterprises with foreign head offices located outside of Taiwan (i.e. Taiwan branch), depending on whether the property is held for more than or less than one year.

LVIT will remain unchanged by the implementation of the new real property transfer tax regime on property transactions. The total amount of land value increment is deducted from real estate transaction income to avoid double taxation. The old property tax regime still applies to properties purchased prior to 2 January 2014, or those bought on or after 2 January 2014 if held for more than two years, where only gain from sale of buildings is subject to CIT assessment, while gain from sale of land is exempt from CIT assessment, and LVIT applies to increment in government-assessed value of land instead.

Deed tax

Currently, transactions of immovable property involving sale, creation of *Dien*, exchange, bestowal, partition, or acquisition of ownership by virtue of possession are subject to deed tax. The deed tax rates range from 2% to 6%, depending on the types of transactions involved.

Stamp tax

Stamp taxes are imposed on each copy of the following documents executed within the territory of Taiwan (with the following respective tax rates):

- Monetary receipts must have a revenue stamp of 0.4% of the amount received per piece. However, a receipt for the money deposited by the bidder requires a revenue stamp of 0.1% of the amount received per piece.
- Contract or deed for the sale or purchase of movable property must have a revenue stamp of TWD 12 per piece.

Taiwan

- Contractual agreement under which one party agrees to complete a specific piece of work for the other party for consideration must have a revenue stamp of 0.1% of the contract price.
- Contract for the sale, transfer, and partition of real estate must have a revenue stamp of 0.1% of the contract price.

Securities transaction tax

Tax is levied on securities transactions at the rate of 0.3% on gross proceeds from the sale of domestic shares. Trading in corporate bonds and financial bonds issued by Taiwan companies is temporarily exempt from securities transaction tax assessment.

Luxury tax

A 10% luxury tax applies to the sale of passenger cars, private jets, and helicopters valued at TWD 3 million or more, as well as to the sale of yachts that are at least 30.48 metres (100 feet) long. Preserved wildlife products (including turtle shells, hawksbill, coral, ivory, furs, and their products), high-end furniture, and non-refundable memberships worth TWD 500,000 or more are also taxed at 10%.

As of 1 January 2016, luxury tax is no longer levied on sales of real estate properties.

Payroll taxes

There are no payroll taxes other than those for social security contributions outlined below.

Social security contributions

There are compulsory social security programs that require contributions from employers and employees based on monthly insured salary, which is capped at various amounts for labour insurance, health insurance, and pensions. Taiwan social security programs include the following:

- **Labour Insurance Program:** Where a company hires five or more employees, it is obligated to insure all employees (including domestic and foreign employees) under the labour insurance program run by the government. Companies with less than five employees may also apply for labour insurance coverage for their employees. The premium rate for ordinary insurance is 9% on the employee's monthly insured salary up to TWD 43,900, with an additional 1% levied for unemployment insurance. The employer is required to contribute 70% of this premium.
- **National Health Insurance (NHI) Program:** The premium rate for each insured person is set at 4.69% of a domestic/foreign employee's monthly insured salary up to TWD 182,000. The employer is required to contribute 60% of this premium. Further, the employer bears the cost of both the employee itself and that of the average dependant, which amounts to 1.61 headcount per employee. Further, when the 'monthly taxable salaries actually paid by the employer' exceeds the 'monthly insured salaries' (e.g. due to bonus paid), a 2% supplementary NHI premium will also be imposed on the excess amount and borne by the employer.
- **Labour Pension Program:** An employer needs to make monthly contributions to a domestic employee's individual pension account set up with the Labour Insurance Bureau. The monthly contribution rate borne by the employer should be at least 6% of the employee's monthly insured salary up to TWD 150,000.

Branch income

A non-resident company whose head office is located outside of Taiwan must keep separate books for its branch in Taiwan. A head office or regional headquarters' general and administrative expenses may be allocated to the branch under certain conditions. CIT is assessed only on the branch's profits. A Taiwan branch should complete an annual CIT return.

A Taiwan branch of a foreign company may remit after-tax profits to its foreign head office without further tax due.

Motion picture leasing

A foreign motion picture's branch in Taiwan can deem 45% of its revenue from leasing of motion pictures as cost. However, if a foreign enterprise with no branch office in Taiwan leases motion pictures through agents, 50% of the revenues can be deemed as taxable income.

Deemed profit method

A non-resident company that is engaged in international transportation, construction contracting, provision of technical services, or machinery and equipment leasing within Taiwan, and where the cost and expenses are proven to be difficult to calculate, may apply for advance approval from the National Tax Administration (NTA) to adopt the deemed profit method to determine the taxable income as 10% or 15% of the gross revenues. This will effectively reduce the WHT rate to 2% or 3% on gross revenues once the approval is obtained from the NTA.

Income determination

A Taiwan resident company is taxed on its net income, which is defined as gross annual income after deduction of costs, expenses, losses, and taxes. Except for certain exempt items, income from all sources, including offshore and onshore, is subject to CIT.

A non-resident company is only taxed on its Taiwan-sourced income. Article 8 of the Income Tax Act and the related Guideline defines the types of income that should be regarded as sourced from Taiwan. For example, fees received by a non-resident company for service performed entirely outside of Taiwan are exempt from income tax assessment, subject to supporting evidentiary documents.

Inventory valuation

Inventory must be valued at cost. If cost exceeds the net realisable value, the latter may be used as the valuation basis. Cost may be determined by the first in first out (FIFO), moving average, weighted average, specific identification, or any other method approved by the tax authorities. Conformity between financial and tax reporting is not required.

Capital gains

Gains on the disposal of fixed assets are taxable as current-year income of the company, with the exception of gains on the sales of land under the old real estate taxation regime. Capital gains on disposal of Taiwanese marketable securities and futures by resident companies and non-resident companies with an FPOB or business agent in Taiwan are exempt from CIT assessment, but are liable for IBT of 12%, with an exemption amount of TWD 500,000. Capital losses may be deducted against capital gains and carried forward for five years. 50% of capital gains can be tax exempt should the securities be held for more than three years. In addition, securities transaction tax is levied on the sales proceeds (*see the Other taxes section*).

Dividend income

Dividends received from resident investee companies by a resident corporate shareholder are not included in taxable income. In addition, the imputation tax credit derived from the dividend income of the investee corporation can be distributed to domestic corporate shareholders, but this tax credit cannot be used to offset the domestic corporation's income tax liability; rather, the tax credits must be recorded in a separate book until they are further distributed to the resident individual shareholders of the domestic corporation.

Taiwan

Dividends received from foreign subsidiaries are taxable, but credits are given for the WHT paid offshore, limited to the incremental tax liability that would result if the dividends were added to the Taiwan corporate shareholder's taxable income and taxed at the Taiwan CIT rate.

Interest income

Interest received on commercial paper and certain other interest-bearing financial instruments is subject to WHT of 10% and 15%/20% for resident and non-resident taxpayers, respectively (*see the Withholding taxes section*). This income should be reported as current-year income, and the WHT paid can be deducted against the income tax payable.

Royalties and technical service fees

Non-resident companies who receive royalties for licensing patents both registered in Taiwan and overseas, trademarks registered in Taiwan, and computer software copyright licensed to Taiwan companies, or who receive technical service fees in relation to construction of factories/plant/power plants to Taiwan companies incorporated as companies limited by shares, can apply for income tax exemption by obtaining advance approval from both the Industrial Development Bureau and the tax authorities. For licensing of patents and technical service fees, the Taiwan licensee company needs to be engaged in designated industries. The amendments to the relevant regulation governing the applicable criteria are effective retroactively for contracts concluded after 1 January 2011.

Foreign income

Taiwan adopts a worldwide tax system to tax its resident companies (including the Taiwan subsidiaries of foreign companies). In theory, taxation on foreign investment income of a Taiwanese company is deferred until cash is repatriated to Taiwan. However, given Taiwan also taxes undistributed profits based on net income shown on the income statement (*see Profit retention tax in the Taxes on corporate income section*), foreign investment income may still be taxed in Taiwan before cash is repatriated back to Taiwan.

Deductions

Depreciation

Depreciation on all fixed assets other than land, including premises, plants (buildings), and equipment, which are used to generate income, is allowed as a deduction. The straight-line, fixed percentage on diminishing book value, sum-of-years-digit, unit-of-production, and working-hour methods are acceptable depreciation methods to the tax office. The useful lives of typical assets are shown below:

Asset category	Useful life
Computer equipment	3
Furniture and fixtures	5
Automobile	5
Building	50

With the approval of the tax authority, a company may revalue its fixed assets each time the government's wholesale price index increases by 25% over the base period. A company's base period is established at the time of purchase of fixed assets or at such time when a company revalues its fixed assets. Any increase in fixed assets may then be depreciated for tax purposes.

Goodwill

Goodwill is commonly realised from merger and acquisition, which should follow the purchase method as defined under Taiwan Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS). Goodwill should be amortised for 15 years if a valuation report is issued by a creditable professional valuation firm and the net identifiable assets are valued separately. However, in practice, the amortisation of goodwill is frequently challenged by the Taiwan tax authority.

Start-up expenses

Start-up expenses during the start-up period can be deducted in the year incurred. The start-up period is from the preparatory stage to the date the business starts to generate significant revenue from its primary business operation.

Interest expenses

Interests on loans that are used for business purposes are deductible in the year incurred. However, for a loan from a non-financial institution, the interest rate shall not exceed 15.6% per annum. As for interest on inter-company loans, the deductible amount is subject to the thin capitalisation rule and transfer pricing regulations (*see the Group taxation section*).

Bad debt

Actual losses on bad debts are allowed for deduction when certain legal proceedings or time requirements have been satisfied. The loss should first be charged against the bad debt provision, which should not exceed either 1% of accounts receivable and notes receivable outstanding, or the actual average bad debt ratio for the past three years.

Charitable contributions

Charitable contributions to support national defence, troop morale, contribution to government of any level, and donation made with special approval of the Ministry of Finance (MOF) are not subject to any tax limit. Donations to other parties are subject to prescribed limits under the relevant regulations.

Fines and penalties

Fines and penalties arising from violation of various tax laws are generally not deductible.

Taxes

All taxes, other than income tax, are generally deductible, unless where such taxes are related to tax-exempt income. The tax associated with the acquisition of real estate should be included in the cost of the land or building.

Net operating losses

A company's net operating losses can be carried forward for ten years. Losses cannot be carried back.

Payments to foreign affiliates

Royalties, interest, and service fees paid to a foreign affiliate are subject to WHT. Royalties or service fees paid to a foreign entity may be tax-exempt if certain requirements are met and prior approval is obtained.

Group taxation

Group enterprises meeting certain criteria under the Financial Holding Company Act and Business Mergers & Acquisitions Act may file consolidated tax returns for the Taiwan parent and its first tier Taiwan subsidiaries. For other enterprises, group taxation is not permitted. The Taiwan parent is eligible to file consolidated tax returns if it continuously holds over 90% of the shares of the subsidiaries for 12 months in a tax year.

Taiwan

Transfer pricing

Transfer pricing regulations were established to constrain multinational corporations from leaving their profits in countries with lower tax rates. For applicable companies, the disclosure of related-party transactions in the CIT return and the preparation of a transfer pricing report is required. Upon request, the transfer pricing report will have to be submitted to the Taiwan tax authority within one-month of notice. The transfer pricing report must demonstrate the company's good faith effort to comply with the assessment rules. Without proper reason, failure to comply with such rules will result in additional tax payable and financial penalties. The types of transactions governed by these regulations include the following: transfer of tangible assets, use of tangible assets, transfer of intangible assets, use of intangible assets, rendering of services, use of funds, business restructuring, and other types of transactions prescribed by the MOF.

If related-party transaction amounts exceed certain thresholds laid out below, an advance pricing agreement (APA) with the tax authority may be obtained to eliminate risk of intercompany prices being challenged. The criteria for applying for an APA are as follows:

- The total amount of the controlled transaction covered under the APA is at least TWD 500 million or the annual amount of such controlled transaction is at least TWD 200 million.
- There has been no significant act of tax evasion in the past three years.
- The required documentation for the APA application has been well prepared, including the transfer pricing report.
- Other criteria specified by the MOF are satisfied.

Thin capitalisation

Deductible interest expense on inter-company loans is capped at a prescribed debt-to-equity ratio of 3:1. The thin capitalisation rule generally applies to profit-seeking enterprises, except banks, credit cooperatives, financial holding companies, bills finance companies, insurance companies, and securities companies.

Controlled foreign companies (CFCs)

Currently, profits of overseas subsidiaries held by Taiwan companies are not subject to 17% CIT in Taiwan until such profits are repatriated to Taiwan as dividend income.

Tax credits and incentives

Certain tax incentives are provided to investors if they are located in prescribed areas, such as science parks, economic processing zones, free-trade-zones, etc. Other tax credits are granted to qualifying companies that invest in specific businesses or industries promoted by the government, such as biotech.

Research and development (R&D) tax incentives

Under the Statute for Industrial Innovation (SII), R&D credits are available for up to 15% of qualified R&D expenses incurred, with the maximum amount of tax credit capped at 30% of the tax payable for the year in which the expenses were incurred, including the 10% profit retention tax.

Effective from 1 January 2016 to 31 December 2019, amendments to the SII provide another alternative for companies to claim an R&D credit of 10% of qualifying R&D expenses against income tax payable within a period of three years, starting from the current year. In addition, to facilitate the circulation and application of innovative R&D results, and to promote industrialisation of innovative technologies, where individuals/companies derive income from transfer or license of their self-developed IP, the amendments also allow the individuals/companies to either deduct qualifying R&D

expenses of up to 200% (capped at corresponding income received) within the current year or claim R&D tax credits against income tax payable.

Moreover, according to the Statute for Development of Small and Medium Enterprises (SMEs), enterprises qualifying as SMEs may elect one of the following methods to calculate R&D credits, subject to the 30% cap mentioned above:

- 15% of qualified R&D expenses for the current year, with credits limited to the same year, or
- 10% of qualified R&D expenses for the current year, which can be carried forward for two ensuing years if the 30% cap mentioned above is exceeded.

According to Regulation Governing R&D Investment Tax Credit (ITC) Available to Profit-seeking Enterprises, a single annual application for R&D ITC should be made with the central competent authorities within four months prior to the CIT return filing due date. Information relating to R&D ITC should be provided with the CIT return.

Tax concessions on merger

A number of tax incentives are available under the M&A Act to encourage M&A activities in Taiwan. Certain taxes, including business tax, deed tax, LVIT, securities transaction tax, and stamp tax, may be exempted or deferred in case of acquisitions, mergers, or corporate divisions (including spin-offs) that meet certain conditions.

After the merger, spin-off, or acquisition, any tax concession previously enjoyed by the merged entities will continue to be applicable to the surviving or newly-created company. However, it is required to manufacture the same products or provide the same services that were originally approved for tax concessions by the merged entities in order to continue the concessions obtained previously.

The unexpired and unutilised net operating losses of the participating entities prior to the merger or spin-off may be carried over to the surviving or newly-created entity according to the percentage of shareholding in the surviving or newly-created company held by all shareholders of the participating entities.

Income tax exemption is available if the shares acquired by a company as a result of transfer of its entire or substantial portion of business or assets to another company, or due to spin-off, is greater than 80% of the consideration of the entire transaction, and all the shares so acquired have been transferred to the shareholders of the transferor.

Free-trade-zones

According to the Statute for the Establishment and Management of Free-trade-zones, foreign companies or their branch offices in Taiwan that apply for establishment in the free-trade-zone or delegate companies already established in the free-trade-zone to store and/or perform simple processing in the free-trade-zone and sell goods to customers within and outside of Taiwan shall be exempted from CIT. However, in the event that the annual domestic sales exceed 10% of the total annual domestic and foreign sales, the portion in excess shall not be exempted from CIT.

Foreign tax credit

Taiwan uses the credit method to avoid double taxation of income. Foreign taxes paid on foreign-sourced income may be credited against a company's total Taiwan income tax liability. However, the credit is limited to the incremental taxes derived from the foreign-sourced income.

Withholding taxes

Resident corporations paying certain types of income are required to withhold tax as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations and individuals	N/A	10	10
Non-treaty	20	15/20 (1)	0/20 (2)
Treaty:			
Australia	10/15 (3)	10	12.5
Austria	10	10	10
Belgium	10	10	10
Denmark	10	10	10
France	10	10	10
Gambia	10	10	10
Germany	10	0/10/15 (10)	10
Hungary	10	10	10
India	12.5	10	10
Indonesia	10	10	10
Israel	10	7/10 (4)	10
Italy	10	10	10
Kiribati	10	10	10
Luxembourg	10/15 (13)	10/15 (13)	10
Macedonia	10	10	10
Malaysia (5)	12.5	10	10
Netherlands	10	10	10
New Zealand	15	10	10
Paraguay	5	10	10
Senegal	10	15	12.5
Singapore	(6)	Not prescribed	15
Slovakia	10	10	5/10 (8)
South Africa	5/15 (7)	10	10
Swaziland	10	10	10
Sweden	10	10	10
Switzerland	10/15 (9)	10	10
Thailand	5/10 (11)	0/10/15 (12)	10
United Kingdom	10	10	10
Vietnam	15	10	15

Notes

- For non-resident enterprises, a 15% WHT applies to interest income derived from short-term bills, securitised certificates, corporate bonds, government bonds, or financial debentures, as well as interest derived from repurchase transactions involving these bonds or certificates. The rate in all other cases is 20%, unless reduced under a tax treaty.
- Royalties received by foreign enterprises that are specially approved in advance by the government are exempt from income tax.
- A rate of 10% applies for shareholders that are companies (other than partnerships) with at least a 25% shareholding.
- 7% of the gross amount of the interest arising in a territory and paid on any loan of whatever kind granted by a bank of the other territory.
- The WHT rate on technical service fees is reduced to 7.5%.
- The total tax burden of CIT and dividends tax is not to exceed 40% of the total profits of the company.
- A rate of 5% applies for shareholders with at least a 10% shareholding.
- A rate of 5% applies for the use of (or the right to use) industrial, commercial, or scientific equipment.
- A rate of 10% applies for shareholders with at least a 20% shareholding.

10. A rate of 10% applies to all types of interests, except a rate of 15% applies for interest derived from real estate investment trusts and real estate asset trusts in Taiwan. Tax exemption applies to interests paid to public institutions of the other territory as mutually agreed between the competent authorities of both territories.
11. A rate of 5% applies for shareholders with at least a 25% shareholding.
12. A rate of 15% applies to all types of interests, except a rate of 10% applies for interest received by any financial institution (including an insurance company). Tax exemption applies to interests paid to the authority of the other territory as mutually agreed between the competent authorities of both territories.
13. A rate of 15% applies for shareholders/creditors that are a collective investment vehicle and treated as a body corporate for tax purposes.

Tax treaties

Tax treaties entered into with Australia, Austria, Belgium, Denmark, France, Gambia, Germany, Hungary, India, Indonesia, Israel, Italy, Kiribati, Luxembourg, Macedonia, Malaysia, Netherlands, New Zealand, Paraguay, Senegal, Singapore, Slovakia, South Africa, Swaziland, Sweden, Switzerland, Thailand, the United Kingdom, and Vietnam relate to corporate and individual income tax.

Treaties with Canada, the European Union, Germany, Israel, Japan, Korea, Luxembourg, Macau, Netherlands, Norway, Sweden, Thailand, and the United States (US) relate to certain earnings from the operation of ships and/or aircraft.

Tax administration

Taxable period

The tax year in Taiwan runs from 1 January to 31 December. Businesses may request approval from the local collection authority to file CIT returns using a fiscal year-end other than 31 December.

Tax returns

Tax returns are filed on a self-assessment basis. CIT returns are due no later than five months after the end of the tax year.

Payment of tax

Tax is paid on a self-assessment basis in two instalments. The first payment is based on 50% of the tax liability of the prior year's tax return and is made in the ninth month of the enterprise's fiscal year. However, if the taxpayer meets certain requirements, it may self-assess the provisional tax based on the taxable income of the first half of the current fiscal year and deduct income taxes paid overseas against the provisional income tax payable if corresponding income is consolidated in the provisional tax return. The second payment is made at the time of filing the annual tax return. The returns are subsequently reviewed by the tax authorities, and a final assessment is issued.

Any overpaid tax as a result of the tax collection authority's mistake shall be refunded to the taxpayer within two years of the tax authority's acknowledgement of such mistake, and shall not be subject to the original five-year period for applying for refund where the taxpayer is responsible for the mistake.

Tax audit process

Taiwan does not have a fixed audit cycle. Tax audit can be carried out any time prior to the expiration of the statute of limitations. Companies may be selected for audit if certain criteria are met.

Statute of limitations

The statute of limitations in Taiwan is five years from the tax return filing date if the return is filed on time. Where a taxpayer fails to file an annual tax return within the statutory deadline or evades tax by fraud or any other unrighteous means, the statute of limitations is extended to seven years.

Taiwan

Tax ruling system

Corporate taxpayers may file an advance tax ruling application with the tax authorities, together with the relevant supporting documents, to clarify their tax position before initiating the specific transaction. The tax authorities are obligated to issue a response within six months after submitting the application.

Recent focus of Taiwan tax authorities

The tax authorities have developed sophisticated and comprehensive tax audit techniques and approaches over the years. The following sets out some of the common items frequently challenged or audited by the tax authorities:

- Management fees allocated from the foreign parent company or affiliates: The tax authorities frequently question the economic substance of the services rendered, the allocation method, and the availability of sufficient documents to support the tax deduction claim.
- Amortisation of goodwill: The tax authorities frequently challenge the valuation report supporting the calculation of goodwill and whether the transaction itself should give rise to goodwill.
- Amortisation of business rights: The tax authorities have taken a more conservative view, which limits 'business rights' to those explicitly authorised by laws (e.g. those regulated under certain public utilities act).
- Eligibility for R&D tax credits.
- WHT compliance.
- Transfer pricing compliance.
- Business tax audit.

Other issues

US Foreign Account Tax Compliance Act (FATCA)

A Model 2 Intergovernmental Agreement (IGA) is treated as 'in effect' by the US Treasury as of 23 June 2014. The United States and Taiwan have reached an agreement in substance, and Taiwan has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in Taiwan are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolution to sign the IGA as soon as possible.

Significant developments

The government of the Republic of Tajikistan introduced some changes in the requirements for tax residency certificates, which become effective from 1 January 2016. The requirements specify that tax residency certificates must be apostilled or legalised.

Also, a new article regulating taxation of professional participants of securities markets was introduced and became effective from 1 January 2016.

Taxes on corporate income

All Tajik legal entities are subject to corporate income tax (CIT) in Tajikistan. Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan-source income. Non-residents operating through a permanent establishment (PE) are generally subject to the same CIT provisions.

From 1 January 2015, CIT is computed by applying the statutory 24% rate to taxable income (14% for enterprises producing goods), which is calculated based on gross income decreased by allowed deductions and losses carried forward from previous periods. CIT liability may not be less than 1% of aggregate income.

The gradual reduction of CIT rates is expected to reach 23% (13% for enterprises producing goods) in 2017.

Simplified tax system

The simplified tax system for small business entities (hereinafter 'tax under the simplified system') is a special tax regime, under which income tax for small business legal entities or income tax for individual entrepreneurs shall be paid under the simplified procedure. The simplified tax regime is applied by the small businesses until aggregate annual income does not exceed 500,000 Tajikistan somoni (TJS).

Taxpayers who pay the tax under the simplified system are not liable for:

- Income tax, except for withholding tax (WHT).
- Road tax.
- Income tax from revenues of the individual entrepreneur, functioning according to the certificate, except for WHT.
- Value-added tax (VAT), except for the import VAT and reverse-charge VAT.

The tax base for applying tax under the simplified system is the aggregate income. For activities related to production of goods, the tax rate is 5%; for other activities, the tax rate is 6%.

Local income taxes

There are no local income taxes in Tajikistan.

Tajikistan

Corporate residence

Legal entities formed under Tajik law, as well as legal entities whose effective control (management) is in Tajikistan, are recognised as residents for CIT purposes.

Permanent establishment (PE)

Under general provisions of the Tax Code, any activity carried out through a fixed place on the territory of Tajikistan, including activity performed through a dependent agent, regardless of duration of such activities, will create a PE of a non-resident.

Further, a non-resident legal entity having business activities in Tajikistan may also create a PE in the following cases:

- 'Services PE': a non-resident enterprise renders services in Tajikistan through employees or other personnel engaged by the non-resident for such purposes, provided that these activities continue for more than 90 calendar days within any consecutive 12-month period.
- 'Construction PE': a construction site, assembly facility, performance of supervisory activities (connected with such objects), or project works/design works.
- 'Agency PE': a non-resident will be considered as having a PE in cases where a resident or non-resident has the contractual authority to represent the non-resident's interests in Tajikistan (i.e. act and/or sign contracts on behalf of the non-resident).

Other taxes

Value-added tax (VAT)

VAT is generally assessed on taxable turnover, which includes goods and services. The current VAT rate is 18%. Individuals and businesses are required to register as VAT payers if the taxpayer's taxable turnover exceeds a threshold of TJS 500,000 for the preceding 12-month period.

Generally, the Tax Code exempts the following from VAT: goods and services that are not provided in Tajikistan under the place of supply rules; sale, transfer, or rent of real property; financial services; certain medical services; and certain other goods and services.

For goods, the place of supply is determined as the initial point of transportation. Services are generally considered to be provided at the place of business of the service provider or the actual place where services are rendered. However, certain types of services are considered to be provided at the location of the buyer. Such services include legal, marketing, consulting, accounting, etc.

A VAT refund is generally available for qualified exporters if input VAT exceeds assessed VAT.

VAT returns, together with issued and received invoices, are filed monthly, not later than the 15th day of the month following the reporting month. Payments are due by the same date.

Customs duties

The tariff rates established by the government, ranging from 0% to 15%, are applied on an *ad valorem* basis, at a specific rate, or via a combination of the two. The tax rate of 0% is granted to certain types of goods (e.g. some types of printed publication, unwrought wool, gaseous hydrocarbons, electricity).

Note that Tajikistan is signatory to several free trade agreements, primarily among the following Commonwealth of Independent States (CIS) countries: Russia, Belarus, Kazakhstan, and Kyrgyzstan.

Customs fees

Customs clearance can't be performed without certification of goods, for which importer should pay a fee based on the time spent by a certification specialist. Fees for customs clearance range from approximately 10 United States dollars (USD) to USD 450, depending on customs value.

Excise taxes

Excise tax is assessed on beverages, tobacco products, fuel, tyres, passenger automobiles, jewellery, and mobile communications. Excise tax rates are established by the government.

Property taxes

Property tax is divided into two taxes, which are paid based on the taxable base.

Land tax

A tax on land plots is paid annually based on the rates established by the Tajikistan government applied to the area of the land plot, which vary depending on the location of the land plot.

Real estate tax

Tax on real estate is paid annually and applies to immovable real property, such as buildings, houses, and flats. The real estate tax rate varies from 3% to 12% and also depends on territory coefficients.

Transfer taxes

There are no transfer taxes in Tajikistan.

Stamp taxes

There are no stamp taxes in Tajikistan.

Payroll taxes

There are no payroll taxes borne by an employer other than social tax (*see below*).

Social tax

An employer is obligated to make social tax payments at the rate of 25% of salary. In addition to an employer's portion, 1% social tax is withheld from employee's income.

Road tax

The formula for calculating road tax is total deductions of the reporting year multiplied by the 1% tax rate (0.25% for trade companies). If actual deductions do not exceed 70% of gross income, the tax base for road tax is 70% of gross income. It is contemplated that the tax will be eliminated in 2017.

Vehicle tax

Vehicle tax is computed as a percentage of the calculation index applied for horsepower of the vehicle engine. The percentage ranges from 2.5% to 15%.

Branch income

In addition to CIT, PEs are subject to branch profit tax at the rate of 15% of net profit after CIT, unless a lower rate is prescribed by an applicable double tax treaty (DTT).

Tajikistan

Income determination

Income tax is assessed on taxable income, which is the difference between gross income and allowed exemptions and deductions.

Inventory valuation

Inventory accounting for tax purposes follows inventory accounting for financial reporting purposes. Public companies are required to apply International Financial Reporting Standards (IFRS). Other legal entities may apply IFRS or National Accounting Standards.

For tax purposes the following inventory methods are permitted: last in first out (LIFO), first in first out (FIFO), and weighted average. For public companies, there can be a mismatch between the tax method and the book method, as LIFO is not permitted under IFRS. For other legal entities, the tax method will match the book method if the tax accounting follows National Accounting Standards.

Capital gains

In general, capital gains on securities are taxed as business profits.

Dividend income

Under the Tax Code, dividends are defined as any distribution of income or property of a legal entity between its shareholders. Dividends should be included in annual aggregate income.

Inter-company dividends

Inter-company dividends received by a resident parent company from a resident subsidiary are exempt from annual aggregate income.

Interest income

The Tax Code defines interest income as income received from any fees associated with a debt obligation, including tax liability, payments for any loans, and contributions on deposit (accounts). Interest income is subject to CIT in Tajikistan and should be included in annual aggregate income.

Foreign income

Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan-source income. There are no provisions in the Tax Code for tax deferral.

For information about Controlled foreign company (CFC) provisions, see the Group taxation section.

Deductions

In general, all business expenses (e.g. materials, payroll) are allowed as a deduction if the expenses are connected with the earning of income, not of a capital nature, and supported by proper documentation.

Depreciation

The deduction for costs related to fixed assets generally is made through depreciation at rates ranging from 7% to 20% using the declining-balance method.

Goodwill

There are no special provisions for goodwill deduction in the Tax Code; however, goodwill is not deductible in accordance with the general rules on intangible assets amortisation.

Start-up expenses

Start-up expenses are not deductible. However, in case of registration of a branch, the head office can deduct expenses related to the creation of such branch.

Interest expenses

Interest deductibility is generally limited to three times the refinancing rate of the National Bank of Tajikistan (currently 8%). For certain entities, additional limitations may apply.

Bad debt

A taxpayer is allowed a bad debt deduction in cases where the income associated with such bad debt is already recognised for CIT purposes. Bad debts are deductible when they are written-off in the accounting books. Special provisions apply for banks and other financial institutions.

Charitable contributions

Charitable contributions are limited to 10% of taxable income.

Fines and penalties

Fines and penalties paid to the budget of Tajikistan and other states are not deductible.

Taxes

Taxes paid to the budget of Tajikistan and other states are deductible, except for CIT and individual income tax.

Other significant items

Among other deductions specifically mentioned in the Tax Code are research and development (R&D), repair expenses, and geological and geophysical expenses.

Non-deductible expenses

Non-deductible expenses specifically mentioned by the Tax Code include meals and entertainment, personal expenses, passenger vehicles, and non-business expenses.

Net operating losses

Net operating losses may be carried forward for three years but may not be carried back.

Payments to foreign affiliates

No special provisions for deduction of payments to foreign affiliates exist in the Tax Code; consequently, general rules for deductibility of expenses should apply.

Group taxation

There are no rules permitting grouping for tax purposes in Tajikistan.

Transfer pricing

Under Tajikistan market pricing (transfer pricing) provisions, tax authorities have the right to adjust prices. The following transactions are subject to control and further feasible (potential) adjustment:

- Transactions between related parties.
- Barter transactions.
- Foreign trade agreements (contracts) where one of the parties is resident of a tax haven.
- Transactions where one of the participants receives tax benefits or tax incentives.
- Where the price of goods (services, works) deviates by more than 30% from the market price for identical (homogeneous) goods (services, works).

Tajikistan

Thin capitalisation

There are no thin capitalisation rules in Tajikistan; however, interest deductibility is limited as described in the *Deductions* section.

Controlled foreign companies (CFCs)

The Tax Code contains CFC provisions, according to which, income received by the resident's subsidiary (more than 10% ownership) registered in countries with privileged taxation should be included in the income of the resident.

Tax credits and incentives

Foreign tax credit

Taxes paid outside Tajikistan may be credited against the same types of taxes in Tajikistan if appropriate supporting documents are provided. The amount of credit may not exceed the amount of tax assessed in respect of such income at the rates applicable in Tajikistan.

Free Economic Zones (FEZs)

Four FEZs were established by the government of Tajikistan to offer reduced taxes and customs fees to both foreign and domestic businesses located in these zones. Tax incentives include FEZs of Sogd, Panj, Ishkoshim, and Dangara. The legislation for the FEZs has been modified several times since the start of the process, but current law requires a minimum investment of USD 500,000 for manufacturing companies, USD 50,000 for trading companies, and USD 10,000 for consulting and service companies, before being eligible for the preferential tax treatment.

CIT exemptions

An exemption from CIT is available for taxpayers that have made a certain amount of investments into chartered capital of a production company, as follows:

- Two-year exemption if volume of investments is up to USD 200,000.
- Three-year exemption if volume of investment is from USD 500,000 up to USD 2 million.
- Four-year exemption if volume of investment is from USD 2 million up to USD 5 million.
- Five-year exemption if volume of investment exceeds USD 5 million.

Tax benefits for poultry farms and combined feed producers

New tax benefits are available for poultry farms and producers of combined feed for birds and animals if such producers will attract foreign investments of not less than USD 16 million. Tax benefits include a 12-year exemption from:

- Income taxes.
- VAT.
- Road tax.
- Property tax.
- Import VAT and customs duties.

The statute of limitation period is extended for the period of use of tax benefits.

Withholding taxes

Tajikistan-source income of non-residents is subject to WHT at its source at the rates shown in the following table:

Types of income at source of payment	Tax rate (%)
Dividends and interest	12
Insurance and reinsurance premiums	6
International transport and telecommunications	5 to 6
Royalties, rent, lease income, management fees, and other income	15

In accordance with the DTTs, the rate of WHT may be reduced as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	12	12	15
Treaty:			
Armenia	10	10	10
Austria	5/10 (1)	8	8
Azerbaijan	10	10	10
China	5/10 (2)	8	8
Czech Republic	5	7	10
Finland	5/15 (9)	10	5
Germany	5/15 (3)	0	5
India	10	10	10
Iran	10	10	8
Kazakhstan	10/15 (4)	10	10
Kyrgyzstan	5/15 (5)	10	10
Latvia	0/5/10 (6)	7	5/10 (7)
Luxembourg	15	12	10
Moldova	5/10 (8)	5	10
Pakistan	5/10 (8)	10	10
Poland	5/15 (9)	10	10
Romania	5/10 (10)	10	10
Russia	5/10 (11)	10	15
Switzerland	5/15 (12)	10	5
Turkey	10	10 (13)	10
Turkmenistan	10	10	10
Ukraine	10	10	10
United Kingdom	5/10 (14)	0/10 (15)	7

Notes

1. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 15% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
2. A rate of 5% of the gross amount of the dividends if the recipient is an enterprise (except a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
3. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
4. A rate of 10% of the gross amount of the dividends if the beneficial owner is a legal entity and directly holds no less than a 30% stake in the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
5. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that holds at least 50% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
6. A rate of 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 75% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

Tajikistan

7. A rate of 5% of the gross amount of the royalties paid for the use of or the right to use software, or industrial, commercial, or scientific equipment; 10% of the gross amount of the royalties in all other cases.
8. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
9. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
10. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
11. A rate of 5% of the gross amount of the dividends if the beneficial owner is a person who directly holds at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
12. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
13. Interest arising in Tajikistan and paid to the government of Turkey or to the Central Bank of Turkey shall be exempt from Tajikistan tax; interest arising in Turkey and paid to the government of Tajikistan or to the National Bank of Tajikistan shall be exempt from Turkish tax.
14. Different rates apply depending on the beneficial owner.
15. Interest can be exempt if the beneficial owner of the interest is a bank or pension scheme, subject to certain conditions.

Tax administration

Taxable period

The Tax Code prescribes a calendar year as the tax year.

Tax returns

Annual CIT declarations are due by 1 April in the year following the tax year-end.

Taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

Payment of tax

With respect to CIT, advance payments are due every 15th day of the month. Payment of any outstanding CIT liabilities is required not later than 10 April following the reporting tax period.

The settlement of minimum income tax should be done by 10 April following the reporting tax period in cases where it exceeds CIT liability.

Fines and interest penalties

The fine for failure to file a tax return ranges from a minimum amount of 1 calculation index (CI), which is currently TJS 40, to a maximum fine of 100 CI, or TJS 4,000. The amount of the fine depends on the taxpayer's category and should be assessed based on each ten days of delay. In the absence of tax returns, the tax authorities are entitled to assess taxes based on any information available.

Fines may be assessed in the amount of 10% to 20% of the understated tax liabilities. In severe cases, a violation may be considered a criminal offence.

A fine for failure to withhold and remit tax may be assessed in the amount of 3 to 200 CI (approximately TJS 120 to TJS 8,000) of the tax not withheld.

Interest penalties may apply to late tax payments in the amount of 0.08% of the underpaid tax amount, for each day of tax underpayment.

Tax audit process

Tajikistan tax authorities have the right to conduct regular tax audits (once per year for planned tax audits). Generally, there are two types of audits:

- **Planned tax audits.** Planned tax audits are conducted according to the list of entities that fall under tax audit, published by the competent authority.
- **Unplanned tax audits.** Reorganisation or liquidation of a legal entity, the expiration of the contract on subsoil use, validation of the VAT amount that is charged for a return, etc., may trigger an unplanned tax audit.

Documentary tax audits may be further subdivided into comprehensive (i.e. covering all taxes), thematic (covering only specific type of taxes), or cross-check (covering only transactions with a particular counterparty). Comprehensive and thematic audits may be conducted once a year.

The first planned documentary tax audit of a small business, implementing the simplified tax system, can be carried out only after 24 full calendar months from the date of its registration.

The tax authority sends or presents a notice of a tax audit to a taxpayer no later than ten working days before the start of the documentary tax audit unless otherwise provided in the Tax Code.

The period of tax audits, specified in issued orders, shall not exceed 30 working days from the date of receipt of the order, unless otherwise provided in the Tax Code.

Statute of limitations

Taxpayers are allowed to make changes to prior period tax returns within the statute of limitations (three years). No fines should apply to corrections in this case.

Topics of focus for tax authorities

The tax authorities are currently paying particular attention to deals involving sale of shares and participation interests.

Other issues

Adoption of IFRS

In accordance with the governmental Resolution of the Republic of Tajikistan concerning International Standards of Financial Statements, the Ministry of Finance of the Republic of Tajikistan shall adopt IFRS through a step-by-step approach. Starting from 2011, juridical legal entities should apply IFRS; however, National Accounting Standards may still be applicable by companies, except for public companies.

Accounting policies and practices are being revised in light of the legal requirement that companies adopt IFRS and International Accounting Standards. Such revised accounting policies should be adopted by companies' boards of directors and disseminated to all the accounting units with clear instructions on how to introduce and follow the new policies and procedures.

Significant developments

As introduced by the Finance Act 2015, the period for the change in control rule has been reduced to two years (from three years); consequently, realisation of assets and liabilities triggers when underlying ownership changes by more than 50% compared to ownership during the previous two years.

A new Value-added Tax (VAT) Act was passed by the Parliament in November 2014 and assented by the President in January 2015. It came into effect from 1 July 2015 and replaced the old VAT Act 1997. *See the description of VAT in the Other taxes section for a summary of changes under the new Act.*

A new Tax Administration Act 2015 (TAA 2015) was assented by the President in May 2015 and came into effect from 1 August 2015. The intention of the TAA 2015 was to consolidate provisions relating to tax administration with a view to ease tax enforcement and administration. Changes brought in by the TAA 2015 have been incorporated into this summary.

Please note that this summary is current as of 1 June 2016. There are changes in the tax legislation (the Finance Act 2016) announced in June 2016 that are effective 1 July 2016. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2016.

Taxes on corporate income

A Tanzanian resident is taxed on worldwide income, irrespective of source. Non-residents are taxable on income with a source in Tanzania.

Income tax is charged at a rate of 30% on income of a resident corporation and of a permanent establishment (PE) of a non-resident corporation or 5% of turnover for technical and management service providers to mining, oil, and gas entities (deducted by way of withholding tax [WHT]). Certain payments to non-residents are subject to tax at the relevant non-resident WHT rates (*see the Withholding taxes section for the relevant rates*).

Gain from the disposal of investments in Tanzania is subject to income tax where such investments fall within the source rules, and, in such a case, the gain will be taxed at a rate of 30%.

Reduced rate for newly listed companies

A reduced corporate tax rate of 25% applies for three consecutive years for companies newly listed on the Dar es Salaam Stock Exchange (DSE). To qualify, at least 30% of the company's shares must be issued to the public.

Alternative minimum tax

Alternative minimum tax applies at a rate of 0.3% to the turnover of companies with perpetual unrelieved tax losses for the current and preceding two income years. Exemption

applies to (i) agricultural companies and (ii) companies engaged in provision of health or education.

Local income taxes

There are no local income taxes levied by local authorities. *Please see Local taxes in the Other taxes section for a description of the local service levy based on turnover.*

Corporate residence

A company is tax resident if it is incorporated or formed under the laws of Tanzania or if the management and control of its affairs is exercised in Tanzania.

Permanent establishment (PE)

A non-resident entity has a PE in Tanzania if it carries on business in Tanzania. This includes a place where a person (i) is carrying on business through a dependent agent; (ii) has used or installed, or is using or installing, substantial equipment or machinery; and (iii) is engaged in a construction, assembly, or installation project for six months or more, including a place where a person is conducting supervisory activities in relation to such a project.

Other taxes

Value-added tax (VAT)

VAT is chargeable on all taxable goods and services supplied in, or imported into, mainland Tanzania. The standard rate of VAT is 18%, but the export of goods and certain services is eligible for zero rating. Businesses with an annual taxable turnover of more than 100 million Tanzanian shillings (TZS) must register for VAT.

There is also mandatory registration for professional services providers (e.g. lawyers and accountants) and government entities/institutions carrying on economic activity. A non-resident who carries on economic activity in mainland Tanzania without a fixed place and makes taxable supplies in excess of the VAT registration threshold is required to appoint a VAT representative.

For imported goods, VAT is payable at the time of importation together with any customs and excise duties. VAT payable with respect to capital goods (as defined), which are imported or purchased in Tanzania, may be deferred, subject to certain procedures being followed. The Commissioner for VAT has the discretion to register (as intending traders) investors whose projects have not commenced production but who wish to be VAT-registered in order to reclaim the tax they incur on start-up costs.

For imported services, VAT is accounted for by registered businesses through a 'reverse-charge' mechanism, such accounting is only relevant where a taxpayer has exempt supplies of 10% or more of total supplies.

Depending on the industry, there are a number of exempt supplies. These include (this list is not exhaustive):

- Agricultural implements, agricultural inputs, livestock, basic agricultural products and foods for human consumption; implements for fisheries and bee-keeping; dairy equipment, maize flour, and wheat flour.
- Food, clothing, and shoes donated to non-profit organisations for free distribution to orphanages or schools for children with special needs in mainland Tanzania.
- Goods imported by non-profit organisations for the provision of emergency and disaster relief (conditional).
- Goods imported by religious organisations for the provision of health, education, water, and religious services (conditional).

Tanzania

- Educational services provided by a relevant approved educational institution; education materials.
- Laboratory equipment and reagents imported by a registered educational institution and to be used solely for educational purposes.
- Goods eligible for relief under the East African Customs Management Act (where imported by a registered and licensed explorer or prospector for exclusive use in oil, gas, or mineral exploration or prospecting activities).
- Various goods imported by a natural gas distributor (including compressed natural gas [CNG] plants equipment, natural gas pipes, transportation and distribution pipes, CNG storage cascades, CNG special transportation vehicles, natural gas metering equipment, CNG refuelling of filling, gas receiving units, flare gas system, condensate tanks and leading facility, system piping and pipe rack, and condensate stabiliser).
- Healthcare, medicine, or pharmaceuticals products, not including food supplements or vitamins; articles designed for people with special needs; funeral services.
- Firefighting vehicles imported by the government and firefighting equipment.
- Sale of vacant land.
- Lease, license, hire, or other form of supply, to the extent that it is a supply of the right to occupy and reside in residential premises.
- Water (except bottled or canned water or similarly presented water).
- Solar equipment (in particular, solar panels, modules, solar charger controllers, solar inverters, solar lights, vacuum tube solar collectors, and solar batteries). Wind generators and liquid elevators are no longer included in the list of exemptions (unlike the 1997 Act).

A business that only makes exempt supplies is unable to register for VAT and, consequently, unable to recover the VAT incurred on inputs.

Export of goods and certain services is zero-rated (i.e. taxable at a rate of 0%).

Registered businesses must submit VAT returns, and pay any tax due, on a monthly basis.

The new VAT Act has broadened restrictions on claiming input tax. For example, one cannot claim VAT paid on entertainment, sporting, social, or recreational clubs or associations, nor on spare parts and repair or maintenance costs in respect of passenger vehicles.

The input tax claim time limit is six months. However, this time limit starts to run not only by reference to the date of the tax invoice/fiscal receipt but also by reference to the date of the time of supply.

Input tax incurred in the six months prior to VAT registration can be claimed no later than in the third VAT return submitted following registration.

A company with taxable supplies of more than 90% of total supplies is entitled to full input tax credit.

A company with taxable supplies less than 10% of total supplies is not entitled to claim any input tax incurred.

A company with taxable supplies between 10% and 90% of total supplies is entitled to partial input tax recovery. Only one apportionment method, namely the average method can be used. Imported services are not taken into account as supplies when determining the allowance of input tax for partial exemption purposes.

Businesses entitled to VAT refunds can claim any remaining credit six months after a refund first became due, subject to all intervening returns being rendered. Any claim for a VAT refund must be supported by an auditor's certificate. Businesses in a consistent refund position (e.g. exporters) can apply for approval to lodge their refund claims on a monthly basis.

Zanzibar has its own VAT Act, but it is similar to the Mainland Tanzania Act.

Customs duties

Tanzania is a member of the East African Community, which became a Customs Union on 1 January 2005 on the implementation of the East African Customs Union Protocol. This protocol provides for a common external tariff (CET), elimination of internal tariffs, rules of origin, anti-dumping measures, a common customs law, and common export promotion schemes.

The import duty rates applicable under the CET are as follows:

Category	Rate (%)
Raw materials, capital goods, agricultural inputs, pure-bred animals, medicines	0
Semi-finished goods	10
Finished final consumer goods	25
Machinery and spare parts imported by licensed mining companies and used in mining activities	0
Machinery, spares, and inputs imported by licensed company for direct use in oil, gas, and geothermal exploration	0

Tanzania is also a member of the Southern African Development Community (SADC). Where goods are subject to a lower rate of duty from another trade bloc, such as the SADC, the lower duty rate applies until such a time as the trading arrangements between the trading blocs are harmonised.

Excise duties

Excise duty rates apply as follows:

Item	Rate for FY 2015/16 (TZS)
Sugared mineral water, sugared carbonated drinks, and sugared aerated water	55 per litre
Other not containing sugar, including club soda	55 per litre
Malt beer	694 per litre
Clear beer (with 100% local unmalted barley)	409 per litre
Wine with more than 25% imported grapes	2,130 per litre
Wine with domestic grapes content exceeding 75%	192 per litre
Spirits, vodka, and whiskies	3,157 per litre
Cigarettes without filter containing more than 75% domestic tobacco	11,289 per mil
Cigarettes with filter containing more than 75% domestic tobacco	26,689 per mil
Other cigarettes not mentioned above	48,285 per mil
Cut rag/filler	24,388 per kg
Motor spirit (gasoline) premium	339 per litre
Motor spirit (gasoline) regular	339 per litre
Gas oil (diesel)	215 per litre
Jet fuel	0 per litre
Illuminated kerosene	425 per litre
Other medium oil and preparation	9.32 per litre
Industrial diesel oil	392 per litre
Heavy furnace oil	0 per litre
Lubrication oil	500 per m ³
Lubrication greases	0.75 per kg
Music and film products	44 per unit

Tanzania

Item	Rate for FY 2015/16 (%)
Satellite and cable television broadcasting	5
Electronic communication services	17
Charges or fees by a telecommunication service provider for money transfer service	10
Charges or fees by a financial institution for services provided by such institution	10
Disposable plastic bags	50
Liquefied petroleum gas (LPG)	0
Motor car with cylinder capacity exceeding 1,500cc but not exceeding 2,000cc	5
Motor vehicle with engine size greater than 2,000cc but not exceeding 3,000cc	5
Old passenger motor vehicles (more than five years)	10
Old motor vehicles (eight years but not more than ten years)	15
Old motor vehicles (more than ten years)	30
Imported used spare parts (for vehicles, motorcycles, domestic and electrical appliances)	25
Imported furniture (per unit)	15
Aircraft (including helicopters, aeroplanes) but excluding commercial aircraft, yachts, and other vessels for pleasure or sport	20

Fuel levy

Fuel levy is charged on petroleum and diesel at a rate of TZS 313 per litre.

Petroleum levy

Petroleum levy is charged on petrol and diesel at TZS 100 per litre and on kerosene at TZS 150 per litre.

Stamp duty

Examples of instruments giving rise to stamp duty obligations include conveyances, leases, share transfers, and issue and transfer of debentures. For most of these instruments, the applicable stamp duty rate is 1% of the consideration.

Infrastructure levy

A new tax called the 'infrastructure levy' was introduced with effect from 1 July 2015 (referred to as the 'Railway Development Levy' in Tanzania). The levy applies at the rate of 1.5% of the value of imported goods (cost, insurance, and freight [CIF]). The levy is not applicable to imported goods that have relief or exemption under the East African Community Customs Management Act 2004 (EACCMA 2004) and goods in transit.

Payroll taxes and social security contribution

Apart from individual income tax (deducted at source by the employer), payroll taxes include:

- Skills and development levy at 5% of payroll cash costs.
- 20% social security contribution, which is normally split equally between employer and employee (i.e. 10% each).
- Workers compensation fund tariff charged at 1% or 0.5% of cash sums paid to employees. The tariff is effective 1 July 2015 and payable on a monthly basis (1% for private sector and 0.5% for public sector).

Gaming tax

Under the recently introduced gaming tax, gaming prize winners are taxed at 18% of the prize offered.

Local taxes

Property taxes

The local government levies a property tax based on the value of a premises. The rates vary depending on the value and location of the property.

Service levy

The local government is entitled to charge a 0.3% service levy based on turnover generated in the relevant district.

Cess levy

For agricultural produce and livestock, there is a cess levy, currently capped at 5% of the producer price.

Branch income

The income tax liability of a person with a PE in Tanzania is calculated as if the person and the PE are independent but as if the PE is resident in Tanzania. The income of the PE is taxed at the normal income tax rate for entities, namely 30% on net income or 5% of turnover for technical and management service providers to mining, oil, and gas entities.

The PE is also subject to a tax on 'repatriated income', which applies at a rate of 10% (the same rate as a company would withhold on dividends).

In certain circumstances, business activities of the head office may be attributed to the branch. Arrangements between a PE and head office generally are not recognised, other than the transfer of an asset or liability between the two. Amounts derived (or payments received) and expenditures incurred (or payments made) that relate to assets held by, or liabilities owed by, the business of the PE are attributed to the PE.

Income determination

Subject to any provision to the contrary in the Income Tax Act, income is to be calculated in accordance with generally accepted accounting principles (GAAP). Local GAAP is in accordance with International Financial Reporting Standards (IFRS). Corporations must apply an accrual basis of accounting.

Inventory valuation

Trading stock is valued at the end of the year at the lower of cost and market value. No explicit method is stated for determining inventory cost, and, so far, for tax purposes, such cost will match the cost determined in accordance with GAAP. Special rules apply for the valuation of long-term work in progress.

Capital gains

There is no separate capital gains tax in Tanzania. Instead, income tax is charged on the taxable profit arising on a gain arising from the realisation of an 'investment asset' (a term that [subject to certain exceptions] includes shares, interests in land and buildings, and a beneficial interest in a non-resident trust). The gain is determined as the difference between costs incurred and sale proceeds.

Dividend income

Dividend payments are taxed by way of WHT, and this is a final tax. The normal rate of WHT on dividends is 10%.

Tanzania

Where a dividend is paid by a resident corporation to another resident corporation holding 25% or more of shares and voting rights in the corporation paying the dividend, the WHT rate is 5%.

Dividends paid by a company listed on the DSE are subject to 5% WHT (regardless of whether they are paid to a resident or non-resident).

In a case where the recipient itself then pays a dividend to a non-resident shareholder, the corporation paying the dividend is entitled to a proportionate deduction of WHT credit withheld on the dividends it had received.

Interest income

Interest income is treated as income from investment. The term 'interest' is defined as payment for the use of money and includes payment made or accrued under a debt obligation that is not a repayment of capital, as well as any gain realised by way of a discount, premium, swap payment, or similar payment.

Interest income is taxed by way of WHT at 10%.

Foreign income

A resident person's foreign-source income or loss (from employment, business, and investment) is calculated as that person's worldwide income or loss less any income sourced in Tanzania and plus any loss sourced in Tanzania.

A resident person may claim a foreign tax credit on any foreign tax paid by the person on foreign income. However, such credit should not exceed the Tanzanian tax rate applicable to that income. Any unrelieved amount of foreign tax credit may be carried forward (subject to 'change in control' provisions *as detailed in the Group taxation section*). An election may be made to relinquish foreign tax credit and claim a deduction for the amount of foreign income tax.

There are no provisions for the deferral of the taxation of foreign income.

Deductions

In calculating taxable profit, deductions are allowed for revenue expenditures incurred wholly and exclusively in the production of income, with some statutory exceptions. For capital expenditures, there are specific tax depreciation allowances.

There are special rules with regard to the valuation of trading stock and long-term contracts and in relation to the treatment of instalment sales and finance leases.

There is ring-fencing of mining or petroleum operations by reference to the relevant mining or petroleum licence area.

Depreciation

The categories of depreciable assets and their tax depreciation rates are set out in the table below.

Expenditures on plant and machinery are generally written off on a reducing-balance basis at rates of 37.5%, 25%, or 12.5%, depending on the category of the asset. Certain plant and machinery for manufacturing, fish farming, and tourist hotels benefit from a 50% allowance in the first year, with the normal rates applying to the remaining balance in subsequent years. There is an immediate write-off of expenditures on plant and machinery used in agriculture.

Expenditures on buildings qualify for a depreciation allowance of 5% per year on a straight-line basis. For intangible assets, the write-off is over the useful life of the asset.

Apart from the immediate write-off of plant and machinery, agricultural businesses also benefit from the immediate write-off of agricultural improvement expenditures (including the costs of clearing land, excavating irrigation channels, and planting perennial crops or tree bearing crops). Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock, or fish farming are written off on a straight-line basis over five years.

A 100% capital deduction applies to capital expenditure (i) by mining companies on prospecting, exploration, and development and (ii) on petroleum prospecting and exploration.

Depreciation allowances rates

Class	Depreciable assets	Rate (%)
1	Computers and data handling equipment, together with peripheral devices; automobiles, buses, and minibuses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than seven tonnes; construction and earth-moving equipment.	37.5
2	Buses with a seating capacity of 30 or more passengers, heavy general purpose or specialised trucks, trailers, and trailer-mounted containers; railroad cars, locomotives, and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft, other self-propelling vehicles; plant and machinery (including windmills, electric generators, and distribution equipment) used in manufacturing or mining operations; specialised public utility plant and equipment; and machinery or other irrigation installations and equipment.	25
3	Office furniture, fixtures, and equipment; any asset not included in another class.	12.5
4	Natural resource exploration and production rights and assets in respect of natural resource prospecting, exploration, and development expenditure. (However, note that the Income Tax Act 2004 does provide for predecessor capital deduction provisions in the Income Tax Act 1973 to continue for the holders of mining rights.)	20
5	Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock farming, or fishing farming.	20
6	Buildings, structures, and similar works of permanent nature other than those mentioned in Class 5.	5
7	Intangible assets other than those in Class 4.	1 divided by the useful life of the asset in the pool and rounded down to the nearest half year
8	Plant and machinery (including windmills, electric generators, and distribution equipment) used in agriculture; electronic field devices purchased by a non-VAT-registered trader; equipment for prospecting and exploration of minerals or petroleum.	100

Interest in land

Interest in land does not qualify for depreciation allowance as it is excluded from the definition of 'depreciable asset'.

Goodwill

Goodwill does not qualify for depreciation allowance as it is excluded from the definition of 'depreciable asset'.

Tanzania

Start-up expenses

Start-up expenses are deductible to the extent that they meet the general deduction criteria (i.e. they are revenue in nature and were incurred wholly and exclusively in the production of income). The definition of 'business' includes a prospective business.

Interest expenses

Interest expenses are deductible on an accrual basis, subject to thin capitalisation rules as detailed in the *Group taxation* section.

Bad debt

In order to claim relief for a bad debt, it is necessary to demonstrate that all reasonable steps have been taken to pursue payment and that there is a reasonable belief that the debt claim will not be satisfied.

Charitable contributions

The Income Tax Act allows deduction for contributions made:

- i. to charitable institutions (approved by the Commissioner to operate as such) and social development projects
- ii. under Section 12 of the Education Fund Act 2001, or
- iii. to local government authorities under statutory obligations to support community developments projects.

The deduction available under item (i) above is restricted to 2% of the company's taxable income before such deduction.

Fines and penalties

Fines and similar penalties payable to a government or a political subdivision of any country for the breach of any law or subsidiary legislation are not deductible.

Taxes

Taxes payable under the Income Tax Act 2004 are not deductible.

Net operating losses

There is no limit on the carryforward period for tax losses. However, there is ring-fencing of tax losses as follows:

- Losses from agricultural business can only be offset against profits derived from agricultural business.
- Losses from one mining licence area can only be offset against profits from the same mining licence area.
- Losses from one petroleum licence area can only be offset against profits from the same petroleum licence area.
- Foreign-source losses can only be offset against foreign-source profits.
- Losses on investments can only be offset against investment income.
- Foreign-source losses on investments can only be offset against foreign-source investment income.

In certain circumstances, tax losses may be forfeited on a change in the underlying control of an entity.

Tax losses can be carried back only in long-term contracts in a case where a contract is completed and a person has unrelieved losses for that period or a previous period that is attributable to the long-term contract. These losses can then be carried back to a previous year of income and treated as unrelieved loss for that year.

Payments to foreign affiliates

Payments to foreign affiliates are deductible to the extent they are wholly and exclusively incurred in the production of the company's income. The deduction is subject to transfer pricing provisions as detailed in the *Group taxation* section.

Group taxation

There are no provisions for tax consolidation or group relief in Tanzania.

Transfer pricing

With respect to transactions between related parties, there is an obligation to 'quantify, apportion, and allocate amounts' for income tax purposes on an arm's-length basis. The Transfer Pricing Regulations and Guidelines require a taxpayer with related-party transactions to have transfer pricing documentation in place at the time of filing the tax return and provide this within 30 days from the date of request by the Tanzania Revenue Authority (TRA).

Thin capitalisation

There is a thin capitalisation restriction on the amount of deductible interest for what are termed 'exempt-controlled resident entities', where the debt-to-equity ratio exceeds 7:3. There are specific definitions of 'debt' and 'equity' for the purposes of thin capitalisation.

Controlled foreign trusts and corporations

There are provisions that relate to the treatment of unallocated income of controlled foreign trusts and corporations.

Change in control provisions

The change in control provisions are triggered at the moment the underlying ownership of an entity changes by more than 50% as compared to any time during the previous two years. Where there is such a change, the consequences are that:

- the accounting period of the entity is split at the point of such a change, so that the parts of the year of income before and after the change are treated as separate years of income, and
- there is deemed realisation of assets and liabilities at market values.

In certain cases, such a change can also result in the forfeiture of unutilised tax losses and tax credits.

The Commissioner has to be notified immediately before and after the change in control has occurred.

Other anti-avoidance provisions

Other anti-avoidance provisions exist to address the following:

- Income or dividend stripping arrangements.
- Income splitting.

Tax credits and incentives**Foreign tax credit**

See *Foreign income in the Income determination* section for a description of the foreign tax credit regime.

Tanzania

Agriculture, manufacturing, mining, and tourism incentives

Tax incentives by way of generous capital deduction provisions are given for specific sectors, namely agriculture, manufacturing, mining, petroleum, and tourism. *See the Deductions section for more information.*

Export processing zones (EPZs) and special economic zones (SEZs)

There are special benefits for EPZs and SEZs. Included in the benefits available to a person licensed to carry on business in an EPZ, as well as to SEZ investors selling in export markets, are a ten-year income tax holiday and WHT holiday, subject to a requirement to export at least 80% of production.

Withholding taxes

WHT rates

Payment	Resident (%)	Non-resident (%)
Dividend:		
To a company controlling 25% or more of the voting power and holding 25% or more of the shares	5	10
From a DSE listed company	5	5
Otherwise	10	10
Interest	10	10
Rent:		
Land and buildings	10	10
Aircraft lease	10	10
Other assets	0	10
Royalty	15	15
Natural resource payment	15	15
Service fees	5	15
Director fees (other than full time service)	15	15
Insurance premium	0	5
Money transfer commission paid to money transfer agent	10	N/A
Payments for goods by government institutions	2	N/A

Double tax treaty (DTT) rates

Recipient	WHT (%)			
	Dividend	Interest	Royalties	Management / technical fees
Domestic rate (1)	10	10	15	15
Treaty:				
Canada	20/25 (2)	15	20	20
Denmark	15	12.5	20	20
Finland	20	15	20	20
India	5/10 (3)	10	10	0
Italy	10	15	15	15 (6)
Norway	20	15	20	20
South Africa	10/20 (2)	10	10	0
Sweden	15/25 (4)	15	20	20
Zambia	0 (5)	10 (6)	0 (5)	0

Notes

1. The domestic WHT rate applies unless the DTT rate is lower, in which case the lower DTT rate applies.

2. The lower rate applies if the beneficial owner is a company that controls, directly or indirectly, at least 15% of the voting power in the company paying the dividends; otherwise, the higher rate applies.
3. The lower rate applies if the recipient is a company that owns at least 25% of the shares of the company paying the dividends; otherwise, the higher rate applies.
4. The lower rate applies if the recipient is a company that owns at least 25% of the shares of the company paying the dividends during the six month period immediately preceding the date of payment of the dividends; otherwise, the higher rate applies.
5. The domestic rate applies if income is exempt from tax in Zambia.
6. The domestic rate applies in the absence of a rate specified in the DTT.

Tax administration

Taxable period

While the year of income for tax purposes is the calendar year, an entity may apply to use its own accounting period rather than the calendar year.

Tax returns

A statement of estimated tax payable, which contains an estimate of the chargeable income and the tax payable thereon, is due for submission within three months from the beginning of the accounting period. A final tax return must be furnished within six months from the end of the accounting period.

WHT returns must be submitted every half year. The due date for filing the WHT return is 30 days after each six-month calendar period (e.g. the January to June return is due by 30 July).

A late filing penalty applies monthly at an amount equal to the higher of (i) TZS 225,000 or (ii) 2.5% applied to unpaid tax. If estimated tax is significantly underestimated, a penalty may also apply.

Payment of tax

Instalment tax is payable in four equal instalments not later than three months, six months, nine months, and 12 months from the beginning of the accounting period. Final tax is payable on the date on which the final return is due for submission, namely six months after the end of the accounting period.

WHT is due seven days after the month of deduction.

Interest on late payment is charged at the Bank of Tanzania discount rate.

Tax audit process

The normal practice is for the TRA to carry out a review every two or three years.

Statute of limitations

There is a five-year time limit for the TRA to adjust an income tax return filed by a taxpayer. The five years runs from the due date of filing the final tax return.

Topics of focus for tax authorities

Currently, the topics of particular focus for the TRA include transfer pricing, VAT compliance, WHT on payments to both residents and non-residents, and compliance on payroll taxes.

Functional currency

Taxable income and deductible expenditure is quantified in Tanzanian shillings. Upon request by the taxpayer, the Commissioner has the power, by notice in writing, to permit quantification in a foreign currency convertible to Tanzanian shillings.

Significant developments

The corporate income tax (CIT) rate of 20%, which was previously reduced to this rate on a temporary basis, has now been made official under the Revenue Code for accounting periods beginning on or after 1 January 2016.

Furthermore, the rates for companies with low paid-in capital and income have been changed.

Taxes on corporate income

Thailand incorporated companies are taxed on worldwide income. A foreign incorporated company is taxed on its profits arising from or in consequence of the business carried on in Thailand.

The CIT rate is 20%.

A foreign company not carrying on business in Thailand is subject to a withholding tax (WHT) on certain types of assessable income (e.g. interest, dividends, royalties, rentals, and service fees) paid from or in Thailand. The rate of tax is generally 15%, except for dividends, which is 10%, while other rates may apply under the provisions of double tax treaties (DTTs).

Rates for companies with low paid-in capital and income

Companies and juristic partnerships with a paid-in capital not exceeding 5 million Thai baht (THB) at the end of any accounting period and income from the sale of goods and/or the provision of services not exceeding THB 30 million in any accounting period will be subject to tax at the following rates:

For accounting periods beginning on or after 1 January 2015 but no later than 31 December 2016:

Net profit (THB)	Tax rate (%)
0 to 300,000	0
Over 300,000	10

For accounting periods beginning on or after 1 January 2017:

Net profit (THB)	Tax rate (%)
0 to 300,000	0
300,001 to 3 million	15
Over 3 million	20

Reduced rates for certain banking transactions

Banks are subject to tax at the rate of 10% on their profits derived from lending to non-Thai residents from foreign currency funds obtained from non-Thai sources (so-called 'out-out' business).

Petroleum income tax

Taxation on income from petroleum operations is imposed on petroleum concessionaire companies by the Petroleum Income Tax Acts (PITA). Companies taxed under the PITA are exempt from taxes and duties on income imposed under the Revenue Code and under any other laws. The exemption applies so long as the company pays taxes and duties on income subject to the PITA or on dividends paid out of income subject to the PITA.

Petroleum companies are taxed at the rate of 50% of their annual net profit from petroleum operations, including profit from the transfer of their concession interests and other activities incidental to petroleum operations. Deductions are allowed for 'ordinary and necessary' business expenses, as well as depreciation of capital expenditure, petroleum royalties, and other charges. Certain types of expenses are specifically disallowed for deduction, including interest.

Local income taxes

There are no local government taxes on income in Thailand.

Corporate residence

Corporate residence is determined by the place of incorporation. A company incorporated under the laws of Thailand is a resident company.

A company incorporated abroad is subject to CIT in Thailand if it is considered to be carrying on business in Thailand. The term 'carrying on business in Thailand' is broad and, subject to the provisions of DTIs, includes the presence of an employee, representative, or go-between that results in a foreign corporation deriving income or gains in Thailand.

Other taxes**Value-added tax (VAT)**

The standard rate of VAT is 10%, but the rate is currently reduced to 7% until 30 September 2016. VAT is levied on the sale of goods and the provision of services. Exports are zero-rated, while a number of goods and services are exempt (e.g. basic groceries, education, healthcare, interest, leasing of immovable property, sale of real estate).

Customs duties**Basis of taxation**

Customs duties are imposed under the Customs Act and the Customs Tariff Decree. Customs duties are collected on both imports and a limited number of exports. Classification of imports is based on the Harmonized Commodity Description and Coding System (the so-called 'Harmonized System'). Thailand has adopted the Association of Southeast Asian Nations (ASEAN) Harmonized Tariff Nomenclature ('AHTN') 2012, which is based on the Harmonized System 2012, as its import tariff nomenclature.

Duties are levied on a specific or an *ad valorem* basis, whichever is higher, and the applied *ad valorem* duties range between 0% and 80%. Exemptions from import duties are available on particular items of goods as prescribed in the Customs Tariff Decree.

Thailand

Preferential duty rates are available on imported goods from countries that have a preferential free trade agreement (FTA) with Thailand.

Currently, Thailand has FTAs with the following countries:

- ASEAN member states (Singapore, Vietnam, Malaysia, Indonesia, Philippines, Cambodia, Laos, Myanmar, and Brunei)
- Australia
- Chile
- India
- Japan
- New Zealand
- Peru

Also, as a member of ASEAN, Thailand has preferential trade agreements with the following countries:

- Australia and New Zealand
- China
- India
- Japan
- Korea

Generally, the value of imports is based on their cost, insurance, and freight (CIF), whereas exported goods are based on their free on board (FOB) amount.

Thailand has implemented the World Trade Organization (WTO) Valuation Agreement. The primary basis for the customs value is the transaction value, which is the price actually paid or payable for the goods when sold for export, subject to adjustments for certain elements that are considered to form a part of the value for customs purposes or that can be deducted from the value of the imported goods (e.g. the cost of transportation after the importation, duties and taxes associated with the import).

Elements that may need to be added include royalties and licence fees that are related to the goods and paid as a condition of sale, proceeds from subsequent resale in the importing country, and the value of goods or services supplied by the buyer, such as design or development fees related to the imported goods. If the declared price is evidently low or is unlikely to be the true value of such goods, Thai Customs will likely dispute the declared price.

Customs controls and procedures

Customs procedures for goods arriving in Thailand in any manner are similar to those existing in most other countries. An importer is required to file an entry form together with other requisite documents, including a bill of lading, invoice, and packing list via the e-Customs system.

Customs duties are due upon the arrival of the vessel carrying the imported goods, and goods may be stored in a bonded warehouse for a period not exceeding 60 days. Landing and storage charges must be paid before the goods are released.

Customs incentives schemes

Various customs incentives schemes, each with its own specific conditions and duty privileges, are available in Thailand, including the following:

- Duty and tax compensation ('tax coupons').
- Duty drawback under Section 19 bis for imported raw materials used in export production.
- Duty drawback for re-export in the same state under Section 19.

- Free zones (Customs or Industrial Estate Authority of Thailand Free Zones).
- Manufacturing bonded warehouses.
- General bonded warehouses.
- Board of Investment (BOI) promotion.

Offences and penalties

Although, technically, an offence against the customs law is a criminal offence, in practice, legal procedures are usually concerned with the recovery of tax arrears and fines. Offences include non-compliance with customs procedures, false declarations, and the most serious offence of smuggling and evasion of customs duties. Statutory penalties are as prescribed by the relevant provisions of the Customs Act. Where Customs and the offender agree to settle the case at the Customs level (i.e. waiver of prosecution), the penalties would be in accordance with the settlement criteria as prescribed by the Director-General of the Customs Department. This is typically two times the duty and one times the VAT shortfall. For import licensing errors and offences related to smuggling, the penalties are based on a multiple of the value of the goods.

Excise tax

Basis of taxation

Excise tax is a form of consumption tax that is imposed on the sale of a selected range of services and goods (whether manufactured locally or imported) that are considered 'luxuries'. The tax liability arises on locally manufactured goods when leaving the factory and at the time of importation for imported goods.

Below is an outline of the formula for the *ad valorem* rate on commodities subject to excise tax in Thailand. However, specific rates apply on some commodities. Tax rates are based on *ad valorem* or a specific rate, whichever is higher.

$$\text{Excise tax payable} = (\text{CIF} + \text{ID}) \times ((\text{ETR}) / (1 - (1.1 \times \text{ETR})))$$

Where:

- CIF: Landed CIF price.
- ID: Amount of import duty.
- ETR: Excise tax rate % (in schedule).

Note that the above formula does not apply to alcoholic beverages, for which a different specific calculation will apply.

The excise tax computation method may be changed due to a possible revision of the excise tax base to suggested retail price for all excise products. However, the draft regulation is still under consideration by the Council of State and there is no exact timeline to conclude this draft.

Taxable goods and services

Commodities *	Excise tax rate (% , except where stated)
Petroleum and petroleum products	0 to 36
Certain non-alcoholic beverages	0 to 25
Certain electrical appliances	0 to 15
Crystal glassware	0 to 15
Motor vehicles	0 to 50
Boats	0
Perfume products and cosmetics	0 to 15

Thailand

Commodities *	Excise tax rate (% , except where stated)
Entertaining services, turf courses, race courses, and golf courses	0 to 20
Telecommunication business	0
Alcoholic beverages	0 to 48 <i>ad valorem</i> rate and specific rate at THB 0 to THB 1,000 per litre per 100 degree or THB 0 to THB 225 per litre (whichever is higher) and THB 3 per each excess degree
Cigarettes containing tobacco	10 to 87
Woollen carpets	0 to 20
Motorcycles	0 to 20
Batteries	5 to 10
Playing cards	THB 2/100 cards or THB 30/100 cards
Ozone depleting substances, chlorofluorocarbons	0 to 30

* Source: The Excise Department website

In addition to the excise tax, an interior tax is also levied by the Excise Department at a rate of 10% of excise tax payable. Other taxes, such as Health Tax and Thai Public Broadcasting Service (TPBS tax or TV tax), may apply to certain specified products in the categories of cigarettes and alcoholic beverages.

The manufacturer of the products must file a return and remit the tax due prior to taking the goods from the factory or bonded warehouse. If a VAT liability arises before the goods are taken out of such locations, the manufacturer must file a return and remit the excise tax to the Excise Department within 15 days from the end of the month.

Stamp duty

Stamp duty is levied on 28 different types of documents and instruments, including contracts for hire of work, loans, share transfers, leases of land or buildings, and insurance policies. The rate of stamp duty varies depending on the type of agreement, but ranges from THB 1 per THB 1,000 of value on most contracts and agreements to a fixed amount per instrument on most commercial and other documents. Unstamped documents are not admissible as evidence in a civil lawsuit, and the surcharge can be as high as 600% of the duty for failure to pay the stamp duty on a timely basis.

Specific business tax

Specific business tax is collected at fixed rates on the gross revenue of certain businesses not subject to VAT. Commercial banking, similar financial businesses, and the sale of immovable property are taxed at 3% and life insurance at 2.5%.

The rate of specific business tax has been reduced to 0.01% for certain revenue derived by commercial banks and finance, securities, and credit foncier businesses, as well as businesses that have regular transactions similar to commercial banking.

An additional 10% of the tax is levied as municipality tax.

Capital taxes

There are no capital taxes in Thailand.

Payroll taxes

An employer is responsible for withholding personal income tax (PIT) from all salaries and benefits paid to or on behalf of an employee and remitting such tax to the Revenue

Department within seven days from the end of the month in which the salaries and benefits were paid.

Social security contribution

Contributions are levied at the rate of 5% of the monthly salary of each employee, subject to a maximum levy per employee of THB 750 per month. These contributions are payable by both the employer and employee.

Local taxes

There are currently three major local taxes. However, it should be noted that the house and land tax and the local development tax below are planned to be revoked and replaced by a new land and building tax. The taxes currently in effect are as follows:

House and land tax

House and land tax is levied annually at the rate of 12.5% of the assessed economic rental income.

Local development tax

Local development tax is levied annually at rates ranging between 0.25% and 0.95% of the value of land assessed by local authorities. This tax does not apply if the property is subject to the house and land tax.

Signboard tax

Signboard tax is levied annually on certain commercial signs or billboards at varying rates according to size and language used. The rates per 500 square centimetres are THB 3 if all words are in Thai, THB 20 if both Thai and foreign words are used, and THB 40 if only foreign words are used or if the Thai words are below the foreign words.

Branch income

Branches of foreign corporations are subject to CIT on locally earned profits only. Branch profits remitted to the foreign head office are subject to an additional tax at the rate of 10%. However, this is a tax on the disposition of profits abroad and is not limited to remittances. For example, a credit of profit to the head office account in the books is held to be a disposition of profit abroad even though no remittance of funds takes place.

Income determination

Inventory valuation

Inventory is valued at the lower of cost or market price. Any recognised method of ascertaining the cost price may be used, but a change in the method may only be made with the prior approval of the Director-General of the Revenue Department.

Capital gains

There is no specific legislation governing capital gains. All capital gains earned by a Thai company are treated as ordinary revenue for tax purposes. Capital gains on the sale of investments derived from or in Thailand by a foreign company not carrying on business in Thailand are subject to a tax of 15%, withheld at source by the purchaser, unless otherwise exempt under a DTT.

The following income earned by a foreign company not carrying on business in Thailand is subject to 15% WHT:

- Interest on bonds/debentures issued by state enterprises.
- Difference between the redemption price and the initial sale price of bonds issued by the government, state enterprises, and specified institutions.

Thailand

- Gains on the transfer of bonds issued by the government, state enterprises, and specified institutions.

Dividend income

Dividends received from a Thai company by a company listed on the Stock Exchange of Thailand are exempt from tax. Dividends received by a non-listed company from other Thai companies are also exempt from tax, provided that the company receiving the dividends holds at least 25% of the total voting shares without any cross-shareholding in the company paying the dividend and that the shares have been held for at least three months before and three months after the dividends were received.

In other cases, where one Thai company receives dividends from another Thai company, one-half thereof is exempt from tax also on the condition that the shares have been held for at least three months before and three months after the dividends were received.

Dividends received from a company incorporated abroad are exempt from tax if the Thai company receiving the dividends holds at least 25% of the shares with voting rights of the company paying the dividends for a period of not less than six months before the date on which the dividends are received and the dividends are derived from the net profit in the foreign country taxed at a rate of not less than 15%. In the event that a 'special law' in a particular foreign country provides a reduced tax rate or exemption for the net profit, the limited company that receives the dividends is still eligible for the tax exemption.

The share of profits received by a Thai company or a foreign company carrying on business in Thailand from an unincorporated joint venture carrying on business in Thailand is exempt from tax.

Stock dividends

Stock dividends are taxable to the recipient as ordinary income.

Interest income

Interest is taxable as income on the accrual basis.

Foreign income

Thailand incorporated companies are taxed on worldwide income. The Revenue Code does not describe how foreign income received by a Thailand incorporated company is taxed, but the Revenue Department regards foreign branch income as taxable when earned and foreign dividend income as taxable when received. Double taxation is relieved by way of a credit against the tax chargeable in Thailand (*see Foreign tax credit in the Tax credits and incentives section*).

Deductions

Depreciation, amortisation, and depletion

Deductions for depreciation are allowed as a percentage of cost. If the rate of deduction adopted by a company under its own accounting method is lower than the maximum percentage of cost permitted, a deduction will be allowed only at the rate adopted by the company. The straight-line basis is the method most commonly used by companies, but any generally accepted basis, such as sum-of-the-years-digits or double-declining method, is permitted. The maximum permitted rates are shown below:

Asset	Maximum permitted rate (%)
Buildings:	
Durable buildings	5
Temporary buildings	100

Asset	Maximum permitted rate (%)
Cost of acquisition of depletable natural resources	5
Cost of acquisition of lease rights:	
If there is no written lease agreement or if there is a written lease agreement containing a renewal clause whereby continual renewals are permitted	10
If there is a written lease agreement containing no renewal clause or containing a renewal clause but restricting renewable periods to a definitely limited duration	Percentage rate equals 100 divided by the sum of years of the original and renewable lease periods
Cost of acquisition of the right in a process, formula, goodwill, trademark, business licence, patent, copyright, or any other right:	
If the period of use is unlimited	10
If the period of use is limited	Percentage rate equals 100 divided by the number of years of use
Other assets not mentioned above, excluding land and inventory	20

Special depreciation methods for certain assets

- Machinery and equipment for research and development (R&D) may initially be depreciated at 40% of cost, with the remaining balance being depreciated at the above maximum rate of 20% *per annum*.
- Computer hardware and software may be depreciated within three accounting periods.

Special depreciation method for small companies

Companies and juristic partnerships with fixed assets, excluding land, with a value of no more than THB 200 million and with no more than 200 employees are entitled to use the following special depreciation methods:

- Machinery and equipment may initially be depreciated at 40% of cost, and the remaining balance will then be depreciated at the maximum rate of 20%.
- Computer hardware and software may initially be depreciated at 40% of cost, and the remaining balance can then be depreciated within three accounting periods.
- Factory buildings may initially be depreciated at 25% of cost, and the remaining balance will then be depreciated at the maximum rate of 5%.

Start-up expenses

Start-up expenses, such as incorporation expenses and registration fees, are deductible when the expenses are incurred.

Interest expenses

Interest on money borrowed for the purpose of acquiring profit or for the purpose of the business is deductible. Interest incurred in respect of the construction or installation of fixed assets that require a period of time before they are ready for their intended use is considered to be capital expenditure.

Bad debts

Bad debts written off are deductible, provided that they are consistent with the rules, procedures, and conditions prescribed by the Ministerial Regulations.

Charitable contributions

Donations to specified charities or for public benefit are deductible in the amount actually paid but not exceeding 2% of net profit. Donations for education or sport are also deductible in the amount actually paid but not exceeding 2% of net profit.

Thailand

Donations to support certain educational or recreational programmes are allowed a double deduction for tax. Donations made to sports entities from 1 January 2016 to 31 December 2018 are also allowed a double deduction for tax.

Fines and penalties

Fines, penalties, and surcharges paid under the Revenue Code are not deductible.

Taxes

In general, all taxes are deductible except CIT and VAT (in certain cases) and any related penalties and surcharges thereon.

Other significant items

Non-deductible expenses include, but are not limited to, the following:

- Expenses in the nature of provisions.
- Contributions to any fund (except for an approved provident fund).

Net operating losses

Losses may be carried forward for the following five accounting periods. The carryback of losses is not permitted. A change in control of a loss-making company does not impact its loss carried forward status.

Payments to foreign affiliates

A Thailand incorporated company may claim a deduction for royalties, management service fees, and interest charges, provided they are expended exclusively for the purpose of generating profit or for the purpose of the business in Thailand and are determined on an arm's-length basis.

Group taxation

Group taxation is not permitted in Thailand.

Transfer pricing

Thailand will soon introduce specific transfer pricing provisions into the income tax law. One of the expected provisions is to make transfer pricing disclosure at the time of tax filing mandatory.

At present, related-party transactions are governed under the general provisions of the tax law, which require companies to transact on an arm's-length basis, as well as the transfer pricing guidelines.

The transfer pricing guidelines are in the form of a Departmental Instruction (no. Paw 113/2545) and do not have the status of legislation. This instruction provides internal directives to Revenue officials to adhere to when conducting transfer pricing audits, reviews, or investigations. It also provides guidelines to taxpayers on setting arm's-length prices for their transactions with related parties.

The instruction authorises the use of both traditional transaction methods (i.e. comparable uncontrolled price, resale price, and cost plus methods), as well as transactional profit methods, in order to determine the market price of a transaction. Although taxpayers are technically expected to consider using traditional transaction methods before resorting to using a transactional profit method, no one method is preferred in practice.

The instruction also defines the term 'market price', describes the transfer pricing documentation requirements, and allows taxpayers to apply for advance pricing agreements (APAs) in respect of any related-party transaction.

To address the APA process, the Revenue Department has issued separate APA guidelines. At present, Thailand accepts only bilateral APAs and limits the period covered to three to five accounting periods. Only a company or partnership incorporated in Thailand, which enters into intra-group transactions with affiliates who are residents of Thailand's treaty partners, may apply for an APA.

Once the specific transfer pricing provisions are enacted, it is expected that there will be additional subordinate regulations to provide further details of the transfer pricing requirements in Thailand.

Thin capitalisation

There are no thin capitalisation rules. However, for certain businesses or as part of the conditions for granting tax incentives, a certain debt-to-equity ratio may be required.

Controlled foreign companies (CFCs)

There are no tax provisions in respect of CFCs.

Tax credits and incentives

Board of Investment (BOI) tax incentives

The BOI, by virtue of the Investment Promotion Act, provides tax incentives to certain activities within the following categories:

- Agriculture and agricultural products.
- Mining, ceramics, and basic metals.
- Light industry.
- Metal products, machinery, and transportation equipment.
- Electronic industry and electrical appliances.
- Chemicals, paper, and plastics.
- Services and public utilities.

The tax incentives available include the following:

- Exemption from import duties on imported machinery.
- Exemption from import duties on raw and essential materials imported for manufacturing for export.
- Exemption from CIT equal to or more than the amount of the investment, excluding the cost of land and working capital, for up to eight years, depending on the promoted activity.
- Exclusion of dividends derived from promoted enterprises from taxable income during the period of exemption from CIT.

Incentives by category

Under the 2015 BOI promotion scheme, focus is placed on the activities and the importance of the activities. Tax incentives are categorised under four categories (A1 to A4) and non-tax incentives under two categories (B1 and B2), as below:

Group	CIT exemption	Import duty exemption on machinery	Import duty exemption on raw materials for export	Non-tax incentives
A1	8 years (without cap) + merit	Yes	Yes	Yes
A2	8 years + merit	Yes	Yes	Yes
A3	5 years + merit	Yes	Yes	Yes
A4	3 years + merit	Yes	Yes	Yes

Thailand

Group	CIT exemption	Import duty exemption on machinery	Import duty exemption on raw materials for export	Non-tax incentives
B1	Merit (some activities)	Yes	Yes	Yes
B2	Merit (some activities)	No	Yes	Yes

Additional incentives based on the value of a project (merit-based incentives) have been launched in order to motivate the investor to invest or spend on activities that will benefit the country or the industry as a whole.

Merit on research and development (R&D)

R&D merit-based incentives will depend on the investment made or expenses incurred by investors in R&D for their business, the provision of advance training to employees, or the development of local suppliers. The investment or expenses are as follows:

Investment on	Additional investment cap (% of investment or expenses incurred)
R&D, whether in-house, outsourced in the country, or in cooperation with educational or research institutions abroad	200
Donations to the Technology and Human Resources Development Fund as approved by the BOI	100
Licence fees paid for technology developed in the country	100
Training in advance technology	100
Development of local suppliers with not less than 51 % Thai shareholding in advance technology training or technical assistance	100
Product or packaging design, whether in-house or outsourced in the country as approved by the BOI	100

Additional years of tax exemption will be added to the standard tax incentives received as follows:

Investment/expenditure based on the sales revenue in the first 3 years	Additional period of tax exemption with cap based on amount of investment (in total, maximum period is 8 years)
1% or ≥ THB 200 million	1 year
2% or ≥ THB 400 million	2 years
3% or ≥ THB 600 million	3 years

Merit on decentralisation

As the zoning scheme has been abolished, investment promotion zones have been included as a decentralisation merit to businesses that include any of the following 20 provinces with low average income:

Kalasin, Chaiyaphum, Nakhon Phanom, Nan, Bung Karn, Buri Ram, Phrae, Maha Sarakham, Mukdahan, Mae Hong Son, Yasothon, Roi Et, Si Sa Ket, Sakon Nakhon, Sa Kaew, Sukhothai, Surin, Nong Bua Lamphu, Ubon Ratchatani, and Amnatcharoen.

Additional incentives for enterprises located in these 20 provinces include the following:

- Three additional years of CIT exemption. However, reduction of 50% of CIT for five years after the end of the tax holiday will be granted to projects with activities in Group A1 and A2.

- Double deduction from taxable income of the cost of transportation, electricity, and water supply for ten years from the date on which revenue was first derived from the promoted activity.
- Deduction from net profit of 25% of the project's infrastructure installation or construction costs in addition to normal depreciation; such deduction can be made from the net profit of one or several years within ten years from the date on which revenue was first derived from the promoted activity.

Merit on industrial area development

One additional year of CIT exemption will be granted to projects located within an industrial estate or promoted industrial zone. However, the total period of CIT exemption will not exceed eight years.

Research and development (R&D) incentives

Tax incentives given to R&D contractors

R&D is a promoted activity under the Investment Promotion Act, which prescribes the criteria and conditions to be followed by an R&D contractor.

Tax incentives given are as follows:

- CIT exemption on income derived from the provision of R&D services as stated in the investment promotion certificate (qualified R&D services) for eight years with no cap.
- Exemption from import duty on imported machinery and raw materials for manufacturing for export.
- Exclusion of dividends derived from promoted enterprises from taxable income during the period of CIT exemption.

The R&D services must be of a description that is:

- Basic research: Activities that are conducted to explore new knowledge from basic natural phenomena and factual observation.
- Applied research: The application of basic knowledge to solve or develop a concept for commercial purposes.
- Pilot development: Activities performed to magnify a production scale from basic research and applied research.
- Demonstration development: To verify a technology and production process and to demonstrate the level of integrity of such process and viability on a commercial scale production in both quality control and cost estimation.

Tax benefits under the Revenue Code

According to the Revenue Code, an additional 100% deduction for tax is allowed in respect of expenditure on R&D for technology and innovation (including product and process innovation) when hiring government agencies or the private sector, as approved by the Director-General of the Revenue Department, provided the R&D is incurred in Thailand.

In addition to the above, a further 100% tax deduction is granted for R&D expenses paid from 1 January 2015 to 31 December 2019 with threshold amounts depending on the revenue of the company.

Regional operating headquarters (ROH)

ROH means a company organised under the Thai law providing administrative, technical assistance, or supporting services to its domestic or overseas affiliated enterprises or branches in at least three countries other than Thailand with a paid-in capital of at least THB 10 million on the last day of any accounting period.

Thailand

Tax incentives available to ROH are currently under two packages. However, since 14 November 2015, the privileges under the second package are no longer available to new applicants.

The criteria for ROH are:

- Company formed under Thai law with a minimum paid-up capital of THB 10 million.
- Provision of qualified services to qualified affiliates (companies with at least 25% common group ownership) in at least three countries other than Thailand.
- Income from services provided to, or royalties received from, overseas affiliates must be at least 50% of the total income of the ROH company (reduced to one-third for the first three years).

The following corporate tax incentives are still available to existing and new applicants under the first package, provided all of the criteria are met:

- 10% income tax on net profit from ROH services provided to foreign and domestic affiliates.
- 10% income tax on net profit from qualified royalties and interest income from lending borrowed funds to domestic and foreign affiliates.
- Corporate and domestic WHT exemptions on dividends received from affiliates.
- Exemption from WHT on dividends paid to foreign corporate shareholders on net profit arising from ROH qualified income.

International headquarters (IHQ)

An IHQ is defined as a company incorporated under the law of Thailand for the purpose of providing managerial, technical, or supporting services or financial management to its associated enterprises or branches situated in Thailand or abroad. This includes carrying on a business as an international trade centre (*see International trade centre below*), which has been approved as an IHQ.

The criteria for an IHQ are:

- A company formed under Thai law with minimum paid-up capital of THB 10 million.
- Managerial, technical, or supporting services (and financial management in the case of treasury centres, *as stated below*) must be provided to foreign affiliates (companies with at least 25% common group ownership, directly or indirectly).
- Operating expenses related to IHQ activities of at least THB 15 million per year.

The tax concessions are:

- 10% CIT on net profit from qualified services provided to domestic affiliates and royalties derived from domestic affiliates.
- Full CIT exemption on net profit from qualified services provided to foreign affiliates, royalties and dividends derived from foreign affiliates, and capital gains from the transfer of shares in foreign affiliates (under conditions).
- WHT exemption on dividends paid to foreign corporate shareholders from the net profit derived from the income exempt from tax.
- Expatriates employed by the IHQ can choose to be taxed at a flat rate of 15% from the date on which the IHQ becomes qualified until the date on which the IHQ is no longer qualified or the employment is terminated.

Please note the following:

- A qualified IHQ will be granted tax privileges for 15 accounting periods.
- The total income subject to tax at the 10% rate must not exceed the total income from qualified services and royalties that are both exempt from tax.

- If an IHQ lacks any of the qualifications in any accounting period, the right to the tax privileges will be suspended only for that accounting period.

Treasury centre (TC)

An IHQ that has obtained a TC licence from the Bank of Thailand can request approval from the Revenue Department for the tax concessions available when carrying on the business of financial management for its associated enterprises or branches situated in Thailand or abroad.

Financial management includes:

1. Financial management of a TC permitted under the law governing exchange control.
2. Borrowing and lending of Thai currency ('Baht') in the following cases:
 - a. Funds borrowed from Thai financial institutions or affiliates in Thailand.
 - b. Lending of funds obtained from operations under 1 or 2 (a) in Thai currency to affiliates in Thailand.

The tax concessions are:

- WHT exemption on interest paid to foreign companies not carrying on business in Thailand on loans borrowed for re-lending to affiliates.
- Exemption from specific business tax on remuneration received from financial management provided to affiliates.
- Other tax concessions available for the TC activities are the same as for IHQ noted above.

A qualified IHQ will be granted tax privileges for 15 accounting periods.

The criteria are the same as noted above for an IHQ.

If a TC lacks any of the qualifications in any accounting period, the right to the tax privileges will be suspended only for that accounting period.

International trade centre (ITC)

An ITC is defined as a company established under the law of Thailand and engaged in the business of buying and selling goods, raw materials, and parts, including providing services relating to international trade to foreign juristic entities. Services relating to international trade include procuring goods, maintaining goods awaiting delivery, packaging, transporting goods, providing insurance for goods, providing advice, including technical services and training relating to goods, and providing other services as prescribed by the Director-General of the Revenue Department.

An IHQ is entitled to obtain approval to carry on a business as an ITC and enjoy the same tax concessions.

The criteria for ITC are:

- Company formed under Thai law with a minimum paid-up capital of THB 10 million.
- Operating expenses related to ITC activities of at least THB 15 million per year.

The tax concessions are:

- Exemption from CIT on income from buying and selling goods abroad without importing such goods into Thailand (out-out), including income from services relating to international trade provided to foreign juristic entities and received in or from a foreign country.
- WHT exemption on dividends paid to foreign corporate shareholders from the net profit derived from the income exempt from tax.

Thailand

- Expatriates employed by the ITC can choose to be taxed at a flat rate of 15% from the date on which the ITC becomes qualified until the date on which the ITC is no longer qualified or the employment is terminated.

A qualified ITC will be granted tax privileges for 15 accounting periods.

If an ITC lacks any of the qualifications in any accounting period, the right to the tax privileges will be suspended only for that accounting period.

Foreign tax credit

A Thai company can use foreign tax paid on business income or dividends as a credit against its CIT liability. However, the credit cannot exceed the amount of Thai tax on the income.

Notes

1. The zero rate applies to a recipient company listed on the Stock Exchange of Thailand and any other limited company that holds at least 25% of the total shares with voting rights in the company paying the dividend without any cross shareholding.
2. The 1% rate applies to interest paid to all resident corporations other than banks or finance companies, except where interest arises from bonds or debentures.
3. The progressive rate is in accordance with the PIT schedule.
4. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
5. The 10% rate applies to interest paid (i) to a recipient that is a bank or financial institution (including an insurance company) or (ii) with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services.
6. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work.
7. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematograph films and films, tapes, or discs for radio or television broadcasting.
8. The 5% rate applies to copyright royalties and other like payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work, excluding royalties with respect to motion picture films and works on film or videotape for use in connection with television.

Thailand

9. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
10. The 10% rate applies to interest paid (i) to a recipient that is a bank or financial institution (including an insurance company); (ii) in connection with the sale on credit of any industrial, commercial, or scientific equipment; or (iii) in connection with the sale on credit of any merchandise by one enterprise to another enterprise.
11. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, dramatic, musical, artistic, or scientific work, including software, cinematograph films or films, or tapes used for radio or television broadcasting; and the 10% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience.
12. The 5% rate applies to royalties paid for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting, and the 10% rate for the alienation of any patent, trademark, design, or model, plan, secret formula, or process.
13. The 8% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment. The 10% rate applies to royalties paid in all other cases.
14. The 3% rate applies to interest paid on loans or credits granted for four years or more with the participation of a financing public institution to a statutory body or to an enterprise in relation to the sale of any equipment or to the survey, the installation, or the supply of industrial, commercial, or scientific premises and of public works. The 10% rate applies to interest paid to any financial institution.
15. The zero rate applies to royalties paid to a contracting state or state-owned company with respect to films or tapes, and the 5% rate to royalties for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work.
16. The zero rate applies to interest paid to any financial institution wholly owned by the other contracting state, a 'land', a political subdivision, a local authority, or a local administration thereof, and in particular, in the case of the Federal Republic, by the Deutsche Bundesbank or the Kreditanstalt für Wiederaufbau, and in the case of Thailand, by the Bank of Thailand. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
17. The 10% rate applies to (i) interest paid to a bank or financial institution (including an insurance company) and (ii) interest paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm's length.
18. The 5% rate applies to royalties paid for the use or the right to use any copyright of literary, artistic, or scientific work and the 10% rate for the use or the right to use any patent, trademark, design, or model, plan, secret formula, or process.
19. A new DTT between Thailand and India entered into force on 5 January 2016 and will be effective from the tax year commencing on 1 January 2017.
20. The 10% rate applies to (i) interest paid to any financial institution (including an insurance company) and (ii) interest paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm's length.
21. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, and the 10% rate for the use of or the right to use industrial, commercial, or scientific equipment or any patent.
22. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting.
23. The zero rate applies to interest paid to any financial institution wholly owned by the other contracting state, an administrative subdivision, or a local authority thereof. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
24. The zero rate applies to interest paid to any financial institution wholly owned by the government. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
25. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, including software and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, and the 10% rate for the use of or the right to use any patent, trademark, design, or model, plan, secret formula, or process.
26. The 5% rate applies to royalties paid for the use of, or the right to use, any copyrights of literary, artistic, or scientific work, while the 10% rate applies to royalties for the consideration for any services of a managerial or consultancy nature, or for information concerning industrial, commercial, or scientific experience.
27. The 10% rate applies to royalties paid for the use of or the right to use any copyright; or the use of, or the right to use, any industrial, scientific, or commercial equipment; or the use of, or the right to use, any motion picture film, or film or videotape or any other recording for use in connection with television, or tape or any other recording for use in connection with radio broadcasting; or the reception of, or the right to receive, visual images or sounds, or both, transmitted to the public by satellite or cable, optic fibre, or similar technology; or the use in connection with television or radio broadcasting, or the right to use in connection with television or radio broadcasting, visual images or sounds, or both, transmitted by satellite or cable, optic fibre, or similar technology.
28. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, and the 10% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment.
29. The 10% rate applies to (i) interest paid to a bank or financial institution (including an insurance company) and (ii) interest from a loan or debt claim that is guaranteed by the government.

30. The zero rate applies to royalties paid to a contracting state or a state-owned company with respect to films or tapes, and the 10% rate applies to royalties paid for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work.
31. In case of interest arising in Thailand, the 10% rate applies to interest paid to a Philippines financial institution (including an insurance company). In the case of interest arising in the Philippines, the 10% rate applies in respect of public issues of bonds, debentures, or similar obligations.
32. The zero rate applies to royalties paid to a contracting state or a state owned company with respect to films or tapes. The 5% rate applies to royalties paid for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work, excluding cinematograph films or tapes used for television or broadcasting.
33. The 10% rate applies to interest paid to the following recipients (i) in the case of a resident of Russia, any institution having a licence to carry on banking operations; and (ii) in the case of a resident of Thailand, any financial institution (including an insurance company).
34. A new DTT between Thailand and Singapore entered into force on 15 February 2016 and will be effective from the tax year commencing on 1 January 2017.
35. The 10% rate applies to interest if (i) the interest is paid to a beneficial owner that is a financial institution or an insurance company; or (ii) the interest is paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm's length.
36. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films, or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties paid for the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
37. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary or artistic work, including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment.
38. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, dramatic, musical, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties in consideration of financial leasing for the use of, or the right to use, industrial, commercial, or scientific equipment.
39. The 5% rate applies to royalties paid for the alienation or the use of, or the right to use, any copyright, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting, and the 10% rate for the alienation of any patent, trademark, design or model, plan, secret formula, or process.
40. The 5% rate applies if the recipient holds at least 25% of the capital of the company paying the dividend.
41. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work.
42. The zero rate applies to interest paid to any other financial institution established and owned by the government to promote trade and investment. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
43. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including software, motion pictures, and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. The 8% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment.

Tax administration

Taxable period

The tax year for a company is its accounting period, which must be of 12 months' duration. However, it may be less than 12 months in the case of the first accounting period after incorporation, the accounting period of dissolution, or after approval for a change in the accounting period has been received from the Revenue Department and the Business Development Department.

Tax returns

The tax system is one of self-assessment. A company prepares and files its tax returns by the due dates and at the same time pays the taxes calculated to be due. The annual CIT return is due 150 days from the closing date of the accounting period.

Payment of tax

CIT is paid twice in each year. A half-year return must be filed within two months after the end of the first six months of an accounting period. The tax to be paid is computed on one-half of the estimated profit for the full accounting period, except for listed companies, banks, certain other financial institutions, and other companies under prescribed conditions where the tax is based on the actual net profit for the first six

Thailand

months. The balance of the tax due is payable within 150 days from the closing date of the accounting period, together with the annual tax return. Credit is given for the amount of tax paid at the half-year.

Tax audit process

If, within a period of two years from the date of filing a tax return, the assessment officer has reason to believe that false or inadequate information has been declared in a return, the assessment officer has the power to issue a summons requesting the presence of the person responsible, or a witness, for examination, and to order either of them to produce accounts or other relevant evidence, provided that advance notice of seven days is given. The subsequent examination of the books and records is normally carried out at the company's offices if it is inconvenient to transfer all the documents to the tax office. After completion of the examination, the assessment officer has the power to adjust the amounts previously assessed or included in a return on the basis of the evidence, and issue a further assessment for tax together with penalties and surcharges, or adjust the amount of losses available for carryforward.

Tax audits may cover the previous five accounting periods from the date of filing a tax return with the approval of the Director-General if the assessment officer has evidence of an intention to evade tax or in the case of a claim for a refund of tax. However, under the Civil and Commercial Code, the Revenue Department can assess tax for up to ten years.

Statute of limitations

The statute of limitations for tax is ten years.

Topics of focus for tax authorities

Topics of focus for tax authorities currently include the following:

- Deductibility of management service fees or expenses allocated to Thailand by foreign affiliates.
- International inter-company transactions and transfer pricing.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

The intergovernmental agreement (IGA) between the United States and Thailand regarding the US FATCA was signed on 4 March 2016. The agreement will enter into force on the date of Thailand's written notification to the United States that Thailand has completed its necessary internal procedures for entry into force.

The US Treasury has previously treated the IGA to be 'in effect' since 30 June 2014 when the United States and Thailand reached an agreement in substance and Thailand consented to disclose this status. In accordance with this status, financial institutions in Thailand were allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect.

Significant developments

There have been no significant corporate tax developments in Timor-Leste during the past year.

Taxes on corporate income

Timor-Leste residents are subject to income tax on worldwide taxable income, where taxable income is essentially the difference between gross income and allowable deductions. Non-residents are generally subject to income tax on Timor-Leste-source income attributed to a permanent establishment (PE) (*see the Branch income section for more information*). Non-residents without a PE may be subject to a 10% withholding tax (WHT) (*see the Withholding taxes section for more information*).

The income of companies is generally subject to corporate income tax (CIT) at a flat rate of 10%.

Industry-specific CIT rates

The rate of CIT for oil and gas contractors is 30%, while sub-contractors are subject to CIT at the flat rate of (generally) 6%.

Supplemental Petroleum Tax (SPT) also applies for oil and gas contractors and is imposed on 'accumulated net receipts' using a specific formula. SPT is deductible for CIT calculation purposes.

Separate tax arrangements apply for petroleum activities in the Joint Petroleum Development Area (JPDA) (*see the Other issues section*).

Local income taxes

There are no local taxes on income in Timor-Leste.

Corporate residence

The definition of a corporate resident (resident legal person) covers a wide range of entities, such as companies, partnerships, trusts, governmental institutions, and unincorporated associations incorporated, formed, organised, or established in Timor-Leste.

Permanent establishment (PE)

A PE is defined as a fixed place of business through which the business of a person is wholly or partly carried on, including:

- A place of management.
- A branch.
- A representative office.
- An office.

Timor-Leste

- A factory.
- A workshop.
- A mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, including any place of drilling for mineral exploration.
- A fishery, place where animal husbandry is conducted, farm, plantation, or forest.
- A construction, installation, or assembly project.
- The furnishing of a service through employees or other personnel, if conducted for more than 60 days in any 12-month period.
- A natural or legal person acting as a dependent agent.
- An agent or employee of a non-resident insurance company, if the agent or employee collects premiums or insures risks in Timor-Leste.

Other taxes

Sales tax

Sales tax is imposed on the sales tax value of:

- taxable goods imported into Timor-Leste and
- taxable goods sold or taxable services provided in Timor-Leste on or after the date specified by Parliament.

Taxpayers liable for sales tax include the following:

- A taxpayer who imports taxable goods into Timor-Leste.
- A taxpayer who sells taxable goods in Timor-Leste.
- A taxpayer who provides taxable services in Timor-Leste.

The rates of sales tax are 2.5% for taxable goods imported into Timor-Leste and 0% for the sale of taxable goods and provision of taxable services in Timor-Leste.

Services tax

Services tax is imposed at 5% on any gross consideration of more than 500 United States dollars (USD) received by a taxpayer for the provision of hotel, restaurant and bar, or telecommunication services.

Import duties

Import duty applies to imported goods (except for specifically exempted goods) at 2.5% of the 'customs value' of the goods. Customs value is the fair market value, including cost, insurance, and freight (CIF), as stated in the General Agreement on Tariffs and Trade (GATT) rules.

The following goods are exempted from import duty:

- Goods accompany a person arriving in Timor-Leste from another territory (limitations apply).
- Imports of the type exempted under specific international conventions.
- Goods re-imported in the same condition as when they were exported.
- Goods, other than alcohol or tobacco, imported by registered charitable organisations, registered under any law of Timor-Leste, provided the goods are to be used for charitable purposes of humanitarian assistance and relief, education, or health care.
- Other goods for temporary admission, if the importer has provided security for the import duty in the prescribed manner.
- Goods for consumption by international staff of the United Nations Integrated Mission in East Timor or members of peace keeping forces from contingent countries, provided the goods are sold in conformity with prescribed rules of sale.
- Certain infant and female hygiene products.

- Other goods imported into Timor-Leste as personal goods accompanying a traveller and where the import duty that would be imposed on the import would be USD 10 or less.

Excise tax

Excise tax is imposed on excisable goods where removed from a warehouse by a registered manufacturer for consumption in Timor-Leste or imported into Timor-Leste.

Below is the list of excisable goods and the respective rates of excise tax:

Goods	Excise tax rate
Beer	USD 1.90/litre
Wine, vermouth, fermented beverages (such as cider)	USD 2.50/litre
Ethyl alcohol (other than denatured) and other alcoholic beverages	USD 8.90/litre
Gasoline, diesel fuel products, and other petroleum products	USD 0.06/litre
Tobacco and tobacco products	USD 19.00/kg
Cigarette lighters	12% of the excise value
Smoking pipes	12% of the excise value
Arms and ammunition	200% of the excise value
Motor cars and small passenger vehicles (with an excise value exceeding USD 70,000)	35% of the excise value
Private boats and aircraft	20% of the excise value

Note that the excise value of excisable goods imported into Timor-Leste is the total of the customs value and any import duty imposed. The excise value of excisable goods manufactured in Timor-Leste is their fair market value at the time of removal from the manufacturer's warehouse.

Goods on the above list are excisable goods, other than:

- goods imported into Timor-Leste that are exempt from import duty, or
- goods exported from Timor-Leste within 28 days after their production or import, as long as the taxpayer liable to excise tax submits to the Banking and Payments Authority documentary proof of the export of goods.

Property taxes

To date, there are no taxes on property in Timor-Leste.

Transfer taxes

There are no transfer taxes in Timor-Leste.

Stamp duties

There is no stamp duty in Timor-Leste.

Payroll taxes

An employer paying taxable wages shall withhold Wage Income Tax (WIT) at a rate of 10% from those wages and remit the WIT on monthly basis.

An annual WIT return is due by the last day of the March following the end of the relevant tax year. Information on WIT withheld must also be provided to each employee on an annual basis or on termination of employment.

Social security contributions

There are no social security or similar contribution requirements in Timor-Leste.

Timor-Leste

Branch income

The taxable income of a non-resident carrying out business activities through a PE is calculated by reference to:

- the income attributable to the PE
- any sales of goods or merchandise of the same or similar kind as those sold through the PE, and
- any other business activities carried on in Timor-Leste of the same or similar kind as those effected through the PE.

Other principles for determining the taxable income of a PE in Timor-Leste include the following:

- Profit is calculated as if the PE was a Timor-Leste entity engaged in the same or similar activities under the same or similar conditions and dealt with wholly independently from the non-resident person of which it is a PE.
- Subject to this, deductions may be claimed for expenses incurred for the purposes of the business activities of the PE, including head office expenditures, whether incurred in Timor-Leste or elsewhere.
- No deductions may be claimed for amounts paid or payable by the PE to its head office or to another PE of the non-resident person, other than towards the reimbursement of actual expenses incurred by the non-resident person to third parties, by way of:
 - royalties, fees, or other similar payments
 - compensation for any services (including management services) provided to the PE, and
 - interest on money lent to the PE (except for banking businesses).

Income determination

Taxable business profits are determined on the basis of net profit for financial accounting purposes in accordance with International Financial Reporting Standards (IFRS), subject to certain modifications in the Tax and Duties Act (TDA). In general, income is assessable when 'receivable', while expenses are deductible when 'payable'. A taxpayer with turnover of less than USD 100,000 may, however, elect to pay tax on a cash basis.

Gross income is defined widely to mean "any realised increase in economic capacity in whatever name or form which can be used for consumption or to increase the wealth of the taxpayer other than wages that are subject to Wages Income Tax (WIT)".

The gross income for a tax year is the total amount earned by the taxpayer, including, but not limited to, business income, property income, lottery prizes or awards, and refunds of tax payments previously deducted as an expense.

Inventory valuation

There are no specific provisions dealing with inventory valuation in Timor-Leste. This is because a deduction is allowed for the cost of inventory incurred during the tax year even if the inventory is on hand at the end of the year.

Capital gains

Gains and losses arising from the alienation of assets are generally assessable and deductible as ordinary income and subject to tax at the standard CIT rate.

Dividend income

Dividends are tax exempt in the hands of Timor-Leste residents.

Interest income

Interest income is generally assessable as ordinary income and subject to tax at the standard CIT rate.

Exempted income

The following income is tax exempt:

- Any aid or donations, provided that the donor and recipient do not have any business or control relationship.
- Gifts received by a religious, educational, or charitable organisation, provided that the donor and recipient do not have any business or control relationship.
- Assets (including cash) received by a resident in exchange for shares or a capital contribution.
- Any amount paid by an insurance company to a resident in connection with accident or life.

Foreign income

Under the worldwide income principle, a resident taxpayer is required to calculate income that is not only Timor-Leste sourced but also foreign sourced. In the case that the foreign-sourced income is taxed at source, Timor-Leste allows a foreign tax credit for the particular tax year (*see Foreign tax credit in the Tax credits and incentives section*).

With regard to profits retained in controlled foreign companies (CFCs), Timor-Leste does not currently have any arrangements to otherwise deem the repatriation of the profit.

Deductions

The taxable income of residents and non-residents who have a PE in Timor-Leste shall be determined on the basis of gross income reduced by:

- expenditure and losses incurred from the alienation of assets or the discharge of debt in the conduct of a taxable business activity
- expenditure incurred in deriving any other amounts included in gross income
- any loss on disposal of an asset other than assets held on personal account
- contributions to an approved pension fund, and
- bad and doubtful debts (subject to various tests - *see Bad debt below*).

Depreciation and amortisation

'Depreciable assets' include any tangible movable property with a useful life exceeding one year that is wholly or partly used for taxable business activities. 'Intangible assets' include property, other than tangible movable property or immovable property, with a useful life exceeding one year that is used for taxable business activities.

There are provisions for election of either straight-line or double-declining methods, the pooling of assets, and *de minimis* exceptions. However, the rate of tax depreciation/amortisation (for non-petroleum operations) is set at 100%, meaning that taxpayers are, in effect, entitled to a full and up-front deduction. In circumstances where the asset is only partly used for the conduct of taxable business activities, the deduction is reduced by the proportion of its non-taxable business use.

Goodwill

There are no specific provisions dealing with the treatment of goodwill. We expect that the treatment should follow that under IFRS.

Timor-Leste

Start-up expenses

There are no specific provisions dealing with the treatment of start-up expenses. However, assuming that the start-up expense is incurred to derive income, we expect that start-up expense should be deductible.

Interest expenses

Interest expenditure is not deductible unless incurred by a financial institution.

Bad debt

Bad debts are not deductible without passing all of the following tests:

- The debt was previously included in taxable income.
- The debt was written off in the accounts during the relevant tax year.
- There are reasonable grounds for believing that the debt will not be recovered.

The above tests do not apply to banks, which are entitled to deduct provisions for doubtful debt where determined in accordance with the prudential requirements prescribed by instruction of the Banking and Payments Authority.

Charitable contributions

Donations are not deductible if the donations are exempt from income tax in the hands of the recipient.

Fines and penalties

Penalties for violation of law and regulation are not deductible.

Taxes

Timor-Leste or foreign income tax is not deductible.

Deductions not allowed or conditional deductions

The following expenses are also not deductible to a resident or non-resident with a PE in Timor-Leste:

- The distribution of profits in whatever name or form.
- Expenses incurred for the personal benefit of a taxpayer, a taxpayer's dependents, shareholders, partners, or members.
- Reserves, other than as provided for under the TDA.
- Excessive compensation paid by a legal person to a member of the legal person, or paid between associates.
- Salaries paid to a partner in a partnership.
- A bribe, or any similar payment.
- Expenditure or losses incurred to the extent recoverable under an insurance policy or a contract of indemnities.

Net operating losses

Losses from previous years may be carried forward indefinitely. However, the carried forward loss from the disposal of assets may only be utilised against gains arising from the disposal of assets. Foreign-sourced losses may only be offset against foreign-sourced income of that particular country.

The carryback of losses is not allowed.

Payments to foreign affiliates

Excessive payments or compensation to 'members of a legal person' or payments between associates for work performed should not be deductible. The TDA, however, does not elaborate on the meaning of 'excessive'.

Group taxation

Companies, etc. are taxable on a stand-alone basis (i.e. there is no grouping or ability to transfer tax losses).

Transfer pricing

Excessive payments or compensation to ‘members of a legal person’ or payments between associates for work performed should not be deductible. The TDA, however, does not provide specific guidance on how to determine arm’s-length pricing on related-party transactions or any other general transfer pricing principles.

Thin capitalisation

Currently, there are no ‘thin capitalisation’ or similar rules in Timor-Leste (noting that interest is not deductible, except for financial institutions).

Controlled foreign companies (CFCs)

Timor-Leste does not have any CFC regulations.

Tax credits and incentives

Foreign tax credit

A resident taxpayer is entitled to a credit for any foreign income tax paid in respect of foreign-source income. The foreign tax credit is calculated separately for each foreign country from which income is derived by a taxpayer. The value of such tax credits is limited to the value of the Timor-Leste income tax payable on that income. There is no deduction or carryforward of any excess foreign tax credit.

Withholding taxes

WHT is imposed on the following payments by residents to a resident:

Type of payment	WHT rate (%)	Final/non-final tax
Dividends	0	Final
Interest	0	Not final
Royalties	10	Not final, except where paid to an individual
Rent (land and building)	10	Not final, except where paid to an individual
Prize and winnings	10	Final
Construction/building activities	2	Final *
Construction consulting services	4	Final *
Air and sea transportation	2.64	Final *
Mining and mining support services	4.5	Final *

* The default position is that such amounts will be a final tax. The income recipient can elect to have these payments for services not subjected to final tax by submitting a notification letter to the Timor-Leste Revenue Service.

Payments of Timor-Leste-source income made by a resident to a non-resident are subject to WHT at 10%. Timor-Leste has not entered into any double taxation treaties (DTTs).

Where WHT is applied as a final tax, the taxed income is not included in the recipients’ taxable income for income tax purposes. Accordingly, expenses incurred in deriving income that is subject to final tax are not deductible for income tax purposes.

Tax administration

Taxable period

The standard tax year is the calendar year, although different accounting year-ends can be granted upon application.

Tax returns

CIT returns are to be filed annually by the 15th day of the third month following the year end.

Service tax, excise tax, sales tax, and WHT are to be filed monthly by the 15th day of the following month.

Payment of tax

CIT due shall be settled to the Banking and Payments Authority or another entity nominated by the Timor-Leste Revenue Service by the date of filing (*see above*).

Service tax, excise tax, sales tax, and WHT should be settled to the Banking and Payments Authority or another entity nominated by the Timor-Leste Revenue Service by the 15th day after the end of the following month.

Penalties

If a taxpayer fails to deliver the tax form on time, it shall be liable to an additional tax of USD 100. If a taxpayer fails to deliver all or part of any tax due by the due date, that taxpayer shall be liable to an additional tax of 5% of the amount due plus an additional 1% of the tax due on the 15th day of each month following the due date and:

- if the failure was due to gross carelessness on the part of the person, further additional tax of 25% of the tax that remains unpaid, or
- if the failure was due to a deliberate attempt to avoid payment of tax, further additional tax of 100% of the tax that remains unpaid.

If a taxpayer has understated the tax due in the tax form, that taxpayer shall be liable to an additional tax of 15% and:

- if the understatement was due to gross carelessness on the part of the taxpayer, further additional tax of 25% of the tax understated, or
- if the understatement was due to a deliberate attempt to avoid payment of tax, further additional tax of 100% of the tax understated.

Tax audit process

Assessments may occur upon the following:

- The delivery of a tax return form and payment.
- After receipt of a return where the Commissioner believes a return is incorrect.
- Where a taxpayer fails to file a return.

Assessments may be amended according to the following events:

- By the taxpayer upon delivery to the Commissioner of an amended assessment.
- Via a taxpayer request to the Commissioner.
- Via specific amendment by the Commissioner.

Statute of limitations

The Timor-Leste Revenue Service may issue an assessment notice or amend an assessment notice only within five years from the date of filing of the return. In the event of a deliberate tax evasion or fraud, there is no time limit for the issuance of an assessment notice.

Topics of focus for tax authorities

Based on our experience, the Timor-Leste tax authorities are focussing on the timely remittance of the tax obligations. From an industry perspective, the oil and gas sector continues to be a focus. Finally, there have been numerous challenges of tax concessions granted on a contractual basis, including by government agencies.

Other issues

Taxation of petroleum operations

The taxation of petroleum operations in Timor-Leste is partly covered by the TDA. However, the TDA operates only to modify the taxation of petroleum activities pursuant to a number of legacy tax regimes. These modifications apply to contractors, sub-contractors, and any other parties receiving income from the supply of goods or services to a contractor or sub-contractor.

A contractor is defined as a person with whom the responsible Ministry or Designated Authority, as the case may be, has made a petroleum agreement. A sub-contractor includes any person supplying goods or services directly or indirectly to a contractor in respect of petroleum operations.

Specific provisions for the taxation of petroleum operations include:

- A CIT rate for contractors of 30% on taxable income, while sub-contractors will generally be taxed on a final WHT basis at a rate of 6% (*although see JPDA below*).
- No tax on branch profit remittances (*although see JPDA below*).
- Where 'net receipts' exceed specified levels, an SPT can apply.
- The 'ring fencing' of income and expenditure within the contract area.
- Modified deductibility rules, including around the deductibility of interest for contractors and a modified depreciation regime.
- A specific WHT regime.
- A specific transfer pricing and associated anti-avoidance provision.

Special tax regime for the Joint Petroleum Development Area (JPDA)

The JPDA is a geographical area in the Timor Sea known to be rich in hydrocarbon deposits. The JPDA covers the 'Annex F' Production Sharing Contracts (PSCs) (*see below*) known as *Bayu-Undan* (including the Elang Kakatua and Kakatua North fields) PSCs, and Greater Sunrise. The JPDA also covers a number of non-Annex F PSCs.

Pursuant to the Timor Sea Treaty (TST), the JPDA is technically within the taxation jurisdiction of both Timor-Leste and Australia and therefore falls under the joint control and management of Timor-Leste and Australia. 'Annex F' of the TST refers to the PSCs with commercial discoveries at the time of the TST signing and so imbeds a number of historical tax principles.

Control of the JPDA is exercised by a 'Joint Authority' containing representation from Australia and Timor-Leste. The petroleum activities covering the exploration, development, processing, transportation, and marketing of hydrocarbons are carried out pursuant to PSCs entered into between the designated authority and the oil company in question.

Under the TST, revenue from the JPDA PSCs is split 90% for Timor-Leste and 10% for Australia. Accordingly, for tax calculation purposes, business profits or losses of an entity carrying on business in the JPDA are reduced by the 'reduction percentage' of 90% for Timor-Leste and 10% for Australia. This effectively means that the tax rates applied by Timor-Leste and Australia are at 90% and 10% of their respective national level.

Timor-Leste

For Timor-Leste, these tax rates are generally 30% for all participants with PEs and an 8% or 20% final WHT for non-residents (according to the PSC). A 10% value-added tax (VAT) also applies.

The tax regime as outlined under *'Taxation of petroleum operations'* above also applies in the JPDA (except for 'Annex F' PSCs). This is, however, with a number of important modifications, including the exclusion of the service tax, excise tax, sales tax, import duty, and WIT.

Significant developments

Finance Act No. 2 of 2015 and Finance Act, 2016 contained the following amendments to the tax regime:

- Increase in business levy from 0.3% to 0.6% and green fund levy from 0.1% to 0.3% of gross sales and receipts (effective 21 January 2016).
- Decrease in value-added tax (VAT) to 12.5% and a reduction in the list of zero-rated items (effective 1 February 2016), as well as an increase in the VAT registration threshold to 500,000 Trinidad and Tobago dollars (TTD) (effective 1 January 2016).
- VAT zero-rating of new and used (not older than four years) electric vehicles not exceeding 179 kilowatts and hybrid vehicles not exceeding 1799 cc, imported for private and commercial use between 1 January 2015 to 1 January 2020.
- Tax credit of 25% on the face value of bonds not exceeding TTD 5,000 issued in accordance with the National Tax Free Saving Bonds Regulations, where the maturity date is five, seven, or ten years (effective 1 January 2015).

Taxes on corporate income

A Trinidad and Tobago resident corporation is taxed on worldwide income. A non-resident company engaged in business in Trinidad and Tobago is taxed only on income directly or indirectly accruing in or derived from Trinidad and Tobago.

The standard corporation tax rate is 25%, but this varies in the case of certain classes of companies. The current corporation tax rates are as follows:

Type of company	Corporation tax rate (%)
Ordinary companies	25
Petrochemical companies	35
Life insurance companies	15
Petroleum production companies (petroleum profits tax)	50
Petroleum production companies (deep sea)	35

T

Business levy

Corporations are subject to a business levy at the rate of 0.6% of gross revenue or receipts where the levy exceeds the corporation tax liability. Exemption is available for certain companies, including petroleum companies and companies whose annual turnover is less than TTD 360,000. The levy is a non-deductible expense for corporation tax purposes.

Green fund levy

A green fund levy of 0.3% on gross income is applicable to companies and partnerships doing business in Trinidad and Tobago. This levy is payable quarterly and is neither a deduction in computing chargeable income nor a credit against corporation tax due.

Trinidad and Tobago

Unemployment levy

Only petroleum companies remain liable to the unemployment levy, at the rate of 5% of taxable profits. No set-off for prior-year losses is permitted in computing the liability.

Supplementary petroleum tax (SPT)

SPT is chargeable on the gross income (derived from the sale of crude oil) less royalties and overriding royalties paid on the crude oil sold. The tax is computed separately in respect of land and marine operations and is a quarterly tax based on the actual gross income for each quarter.

The SPT is deductible in arriving at profits subject to petroleum profits tax.

Corporate residence

Corporate residence is determined by reference to the location of the central management and control of the business of a company.

Permanent establishment (PE)

A non-resident company is subject to corporation tax on its income derived from trading within Trinidad and Tobago. A company is deemed to be engaged in or carrying on trade or business in Trinidad and Tobago if it has an office or place of business or has a branch or agency within Trinidad and Tobago. The local legislation does not make any reference to the term 'permanent establishment'; however, this term is used generally in the treaty context. Subject to the terms of specific double taxation treaties (DTTs), a non-resident company will have a PE in Trinidad and Tobago where:

- it has a fixed place of business in Trinidad and Tobago through which the business of the company is wholly or partly carried on, or
- it has an agent acting on behalf of the company and that agent has the authority to bind the company.

The term 'fixed place of business' has been generally defined to include a place of management, a branch, office, factory, a workshop, an installation or structure for the exploration of natural resources, or a building, construction, or installation project.

Most treaties outline circumstances under which a company will not be deemed to have a PE, and these include where the activities of the company are merely of a preparatory or auxiliary nature.

Other taxes

Value-added tax (VAT)

VAT is applicable to a wide range of goods and services. The standard rate applicable to commercial supplies effective 1 February 2016 is 12.5% (previously 15%).

Basic food items and agricultural supplies are zero-rated, as are crude oil, natural gas, and exported goods and services. Hotel accommodation and yachting services to non-residents are zero-rated.

A number of services, including financial services, real estate brokerage, residential rentals, and educational services, are exempt. However, certain financial services are subject to a transaction tax at a rate of 15%. Imported inputs of highly capital-intensive manufacturers are exempt from VAT.

The VAT registration threshold for companies making commercial supplies is TTD 500,000 for a 12-month period.

Customs duties

Customs duties are imposed at varying rates on imports and manufactured goods according to classification in Schedules to the Customs Act. The basis is the cost, insurance, and freight (CIF) value of the goods at the time of import. However, there is a provision for exemptions in relation to specific goods.

Excise taxes

Excise taxes are imposed at varying rates on certain manufactured goods, including tobacco, alcohol, and petroleum products.

Property taxes

The Property Taxes Act, which was amended by Finance Act 2 of 2015 to place a moratorium on the payment of the tax from 1 January 2010 to 31 December 2015, became fully operational on 1 January 2016. The Minister of Finance has indicated that the current land and property valuation assessment rolls are incomplete. The government is currently in the process of updating the assessment rolls, which should be completed by 2017; consequently, the Property Taxes Act will be fully implemented in that year.

In the interim, the Minister has advised that Property Taxes payable for income year 2016 will be at the old rates and values under the Land & Building Taxes Act (prior to 2010). Therefore, all 2016 property tax liabilities will be the same as in 2009.

Stamp duty

Stamp duty is levied on instruments of all types (e.g. deeds of conveyance, mortgages, debentures, trust deeds, leases, insurance policies, annuity policies, agreements, share transfers). The rate of stamp duty varies from TTD 25 on a trust deed to up to 10% on property conveyances.

Hotel accommodation tax

Hotels are subject to a hotel accommodation tax at a rate of 10% of the value of the accommodation.

Insurance premium tax

A tax at the rate of 6% has been imposed on insurance premiums in respect of general insurance contracts. Life insurance and reinsurance premiums are exempt.

Payroll taxes

Under the pay-as-you-earn (PAYE) system, an employer is required to deduct income tax on emoluments paid to employees. 'Emoluments' is widely defined to include all salary, wages, overtime, bonus, remuneration, perquisites, lodging, stipend, commission or other amounts for services, directors' fees, retiring allowance, and pensions.

Social security contributions

There is a social security tax, referred to as National Insurance, that is deducted at source at varying rates. The maximum rate is TTD 332.40 per week for monthly income over TTD 12,000, which is payable TTD 221.60 by the employer and TTD 110.80 by the employee.

There is also a health surcharge that is deducted at source. The maximum liability is TTD 8.25 for every week worked.

Branch income

A branch is subject to Trinidad and Tobago taxation on all income directly or indirectly accruing in or derived from Trinidad and Tobago. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction

Trinidad and Tobago

of corporation tax and reinvestments, are subject to withholding tax (WHT) at the rate of 5%. This may be varied by the provisions of any applicable DTTs.

Income determination

Inventory valuation

Inventories are generally stated at the lower of cost or market value. Cost may be determined by the first in first out (FIFO) or the average cost method. The last in first out (LIFO) and base stock methods are not generally accepted for tax purposes.

Capital gains

Gains on the disposal of chargeable assets within 12 months of acquisition are subject to tax at standard corporation tax rates. Capital gains are not otherwise taxable, except for the application of the balancing allowance on depreciable assets. *See Depreciation in the Deductions section for capital gains information on the sale of tax-depreciable assets.*

Dividend income

Dividends received by a Trinidad and Tobago company from both domestic subsidiaries and other domestic corporations are exempt from corporation tax and business levy but are subject to green fund levy.

Stock dividends

A Trinidad and Tobago corporation can distribute a dividend of common stock (bonus issue) proportionately to all resident common stockholders on a tax-free basis.

Interest income

Interest income received by a Trinidad and Tobago company is generally taxable.

Foreign income

A company resident in Trinidad and Tobago is subject to tax on its worldwide income. There is no deferral regime in Trinidad and Tobago.

Deductions

Depreciation

Tax depreciation rates (wear-and-tear allowances) have been standardised by statute. Fixed assets are to be classified into one of four classes:

Asset class	Depreciation rate (%)
Class A: Buildings and improvements	10
Class B: Motor vehicles, furniture and fittings, plant and machinery	25
Class C: Heavy equipment, motor lorries, trucks, and computer equipment	33.3
Class D: Extra heavy equipment, airplanes	40

The allowance is calculated at the rate applying to aggregate expenditure incurred on assets within the class on a declining-balance basis.

Accelerated tax depreciation is allowed to manufacturers in the form of an initial allowance at the rate of 90% on capital expenditure on plant and machinery. The allowance is to be claimed in the year that the asset is first brought into use. For those companies engaged in the production of sugar, petroleum, or petrochemicals, or enjoying concessions under the Fiscal Incentives Act, the rate is 20%.

Gains on the sale of tax-depreciable assets are taxable as ordinary income (i.e. a balancing charge) but only when the written-down value of the assets of a class goes into credit. Prior to this, the proceeds of sale are credited to the particular class, thereby reducing the written down value of the class. Tax depreciation is not required to conform to book depreciation.

Petroleum operations

A company engaged in the petroleum production business is entitled to capital allowances on tangible costs and intangible drilling and development costs as follows:

- Tangible and intangible capital exploration expenditure incurred during 1 January 2014 to 31 December 2017 may be deducted in full (100%) in the year incurred.
- Tangible and intangible exploration and development expenditure: An initial allowance at 50%, a year-two allowance at 30%, and a year-three allowance at 20% computed on the expenditure incurred.
- A company engaged in exploration activities in a deepwater block is granted an uplift of 140% of capital expenditure incurred on drilling of exploration wells, on which capital allowances can be computed.

There is no timing in respect of claiming of allowances (e.g. on achievement of commercial production). A claim for capital allowances cannot be deferred.

Goodwill

Goodwill expense is generally not allowable in arriving at chargeable income.

Start-up expenses

No specific rules exist in respect of start-up expenses, but, generally, these expenses are not deductible.

Interest expenses

Interest expenses incurred by a company in the production of its income are generally allowed as deductions. However, in the case of interest payable or paid by the company, there are certain restrictions that exist in the taxing Acts, as well as in practice by the tax authority, that could restrict a company's ability to deduct interest paid or payable in its computation of tax for a particular year of income. The criteria laid down by the legislation for the deductibility of interest are:

- The sums borrowed are wholly and exclusively incurred in the production of income.
- The interest is revenue in nature.
- The interest income earned is either chargeable to tax or exempt under the Trinidad and Tobago legislation.
- Where the interest payment is being made to a non-resident, the payer has accounted for and paid over WHT to the Board of Inland Revenue (BIR).

Bad debt

A specific provision for bad debt will be deductible for tax purposes where:

- it is in respect of a revenue expenditure
- it is made in accordance with acceptable accounting principles
- it is specific, and
- it becomes bad in the year in which the claim is made.

Charitable contributions

Charitable contributions under deeds of covenant to approved charities are deductible, up to a maximum of 15% of total income.

Fines and penalties

Fines and penalties are not generally deductible.

Trinidad and Tobago

Taxes

Other than SPT, taxes or levies are not generally deductible in arriving at taxable profit.

Other significant items

Contributions by local insurance companies to 'catastrophe reserve funds' are deductible for tax purposes, up to the value of 20% of net premium income from property insurance business.

Net operating losses

A trading loss may be carried forward indefinitely to be set-off against future profits. Loss carrybacks are not permitted.

A limited form of group loss relief exists, whereby current year losses may be surrendered to a claimant company within a group, except that the claimant's tax liability cannot be reduced by more than 25%. Such companies must be resident in Trinidad and Tobago.

Payments to foreign affiliates

A corporation engaged in business in Trinidad and Tobago may claim a deduction for royalties, interest, and service charges paid to foreign affiliates, provided the appropriate WHT is deducted and properly accounted for. For interest to be deductible for tax purposes, the funds borrowed must have been utilised in the production of income and the recipient must be subject to tax in Trinidad and Tobago or otherwise specifically exempt from local tax.

Deduction for management charges (as this term is defined) paid to a non-resident is restricted to the lower of the management charges or 2% of deductible outgoings and expenses, exclusive of the charges. Tax depreciation allowances may not be treated as an expense for this purpose. WHT may also be applicable to management charges paid to non-resident persons.

Group taxation

There is no provision for group taxation in Trinidad and Tobago; however, a limited form of group loss relief is available (*see Net operating losses in the Deductions section*).

Transfer pricing

There are no specific transfer pricing rules in Trinidad and Tobago. However, the legislation empowers the tax authority to disregard any transactions that it views as artificial or fictitious. This general power has been utilised by the tax authority in dealing with related parties and large multinational companies to evaluate whether transactions are at arm's length.

Thin capitalisation

There are no thin capitalisation rules in Trinidad and Tobago.

Controlled foreign companies (CFCs)

There is no CFC rules in Trinidad and Tobago.

Tax credits and incentives

Foreign tax credit

Double taxation is avoided or mitigated by means of foreign tax credits.

Tax holidays

Fiscal Incentives Act, 1979

An approved enterprise, which must be a locally incorporated resident corporation, may be granted an exemption from corporation tax for a period of up to ten years, depending on the category under which it is approved. Exemption may be total or partial. Subject to approval, profits may be distributed tax free to shareholders, except in the case of certain non-resident shareholders, where the relief is restricted to the amount of tax that exceeds their liability in their country of residence. Net losses during the tax holiday period (i.e. the excess of total losses over total profits) may be carried forward for set-off without limitation for five years from the end of the tax holiday period, after which the normal set-off provisions for losses apply. As of 1 January 2007, the tax holiday in respect of corporation tax is no longer granted.

Approved tourism projects

Under the Tourism Development Act 2000, approved tourism development projects, including hotels, are granted a tax holiday for periods of up to seven years. In addition, a carryover from a tax exemption period is permitted of any loss arising out of the operation or renting of an approved tourism project to be written off against profits in accordance with normal income tax loss provisions, subsequent to the tax holiday period. An approved tourism project means a project declared to be so by the government.

Approved mortgage and other companies

The profits of an approved company are exempt from corporation tax. The exempt profits, when distributed to shareholders, are exempt from corporation tax and income tax. Expenses incurred in the course of the approved mortgage business remain fully deductible.

Free Zone

The profits of an approved company operating in a designated Free Zone are free from corporation tax. In addition, payments to non-residents are free of WHT. Approved activities include manufacturing.

Other allowances/incentives

Promotional expenses

Promotional expenses incurred by local firms to promote the expansion of existing markets and/or the creation of new ones for the export of specified services or locally produced goods are tax deductible as an expense at 150% of the actual outlay. Tax-deductible promotional expenses are defined as those expenses incurred in respect of specified services or goods produced in Trinidad and Tobago. This includes such items as advertising in foreign markets and participation in trade fairs and missions.

Scholarship allowance

Companies can deduct the actual expenses incurred in granting scholarships to nationals who are not employees, directors, or associates of directors of the company for tertiary education.

Production company allowance

An allowance equal to 150% of actual expenses incurred in respect of the company's own audio, visual, or video productions for educational or local entertainment, or local culture, is available.

Allowances are granted in respect of each of the following activities, based on the actual expenditure incurred but not exceeding TTD 2 million in aggregate:

- Art and culture allowance.

Trinidad and Tobago

- Sportsman/sporting activity allowance.
- Audio, visual, or video production allowance.
- Promoting the fashion industry.

Child care/Home work facility

A deduction is allowed for the actual cost incurred in setting up a facility for dependents of employees who are minors, up to a maximum of TTD 500,000 for each facility, subject to an aggregate sum of TTD 3 million in any year.

Wear and tear allowances

A 130% wear and tear allowance is available for expenditure incurred in compressed natural gas (CNG) related initiatives.

A 150% wear and tear allowance is available on the expense incurred in relation to solar heaters, wind turbines, and photovoltaic systems.

Training allowance

A company is allowed to claim as a deduction 150% of expenses incurred in the training and retraining of the employees of the company.

Allowance for engagement of energy service companies

Where a company incurs expenditure in engaging another company certified as an energy service company for the purpose of carrying out an energy audit for the design of energy saving systems and the installation of the energy saving systems, the company shall be entitled to an allowance equal to 150% of the expenditure actually incurred.

Where the certified energy service company has acquired plant and machinery for the purpose of conducting energy audits, they shall be allowed an allowance of 75% of the cost incurred in the year of acquisition.

Withholding taxes

WHT is imposed at varying rates up to 15%, depending on the nature of the payment, the status of the payee, and the applicability of DTIs. The tax treaty rate in some instances is now higher than the statutory rate. In such cases, the lower statutory rate applies. The rates below have been adjusted to reflect these reductions:

Recipient	Dividends (%)		Interest (%)
	Portfolio	Substantial holdings

Notes

1. Individuals.
2. Corporations. The lesser rate applies to parent companies.
3. The lesser rate applies to companies, other than investment companies, that control at least 10% of the voting power.
4. The rate is 10% of the gross amount if interest is paid to a resident of France; it is 0% if the interest is paid to the French government or to any agency or instrumentality of the French government.
5. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Germany, 0% where interest is paid to certain stated governmental institutions, and 15% of the gross amount in all other cases.
6. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Sweden, 0% where interest is paid to certain specified governmental institutions, and 15% of the gross amount in all other cases.
7. The rate is 15% of the gross amount if the interest is paid to a bank or financial institution in the United States (US) that does not have a PE in Trinidad and Tobago, 0% where the interest is paid to the US government or to any agency or instrumentality wholly owned by the US government, and 20% of the gross amount in all other cases.
8. The rate applies to patent royalties.
9. The rate applies to copyright royalties and similar payments.
10. The rate applies to royalties paid in respect of the operations of mines or quarries or of the extraction or removal of natural resources.

Tax administration

Taxable period

The tax year is the calendar year. Companies are assessed by reference to their accounting period, which for tax purposes cannot exceed 12 months other than in the year of cessation of the business.

Tax returns

The taxpayer is required to file a tax return with the BIR by 30 April following the end of the fiscal period. An automatic six-month grace period is allowed, following which a penalty is imposed of TTD 1,000 for every six months or part thereof that the return remains unfiled.

Payment of tax

Corporation tax, business levy, and green fund levy are payable quarterly in advance on 31 March, 30 June, 30 September, and 31 December. Any balance of tax due is payable on or before 30 April of the following year. Instalments of corporation tax are based on an estimate of the current year's liability or on the actual chargeable profits for the previous year, whichever is greater. If the current year's estimate is lower, the company may apply to the BIR to reduce its quarterly instalment. The levy liabilities are based on the actual receipts for the quarter.

Tax audit process

Tax audits are conducted by the BIR. There is no specific timeframe to conduct an audit, but, generally, companies are selected for varying reasons, including where large refunds are claimed. The BIR usually notifies the company of the intended audit and requests that the books and records be made available for inspection. An assessment is generally raised after the audit.

Statute of limitations

A company carrying on business in Trinidad and Tobago is required to keep proper accounts and records and is required to retain these accounts for a period of at least six years after the completion of the transactions, acts, or operations to which they relate or three years after the filing of its return (whichever is later).

Topics of focus for tax authorities

The following issues are currently the focus of the tax authorities:

- Transfer pricing.
- CARICOM tax planning structures.
- Management and other fees paid to non-resident persons.

Other issues

US Foreign Account Tax Compliance Act (FATCA)

Trinidad and Tobago is a signatory to FATCA and is due to commence compliance in 2016.

Significant developments

The significant changes indicated in Tunisia's 2016 finance law are as follows:

- Companies incorporated during fiscal year (FY) 2016 that realise a turnover of less than the following amounts are exempt from corporate tax for three years:
 - 600,000 Tunisian dinars (TND) for primary activities.
 - TND 300,000 for services.
- Non-resident companies considered as having a permanent establishment (PE) that does not register with the tax administration are subject to a discharge withholding tax (WHT) at the rate of 15%.

Taxes on corporate income

Tunisian-resident companies are subject to corporate tax in Tunisia on the basis of profits generated from PEs located in Tunisia and those attributable to Tunisia by virtue of a double tax treaty (DTT). Non-Tunisian-resident companies are subject to corporate tax on the basis of their Tunisian-sourced income.

PEs of non-Tunisian-resident companies are subject to corporate tax in the same way and under the same conditions as Tunisian-resident companies. However, certain particularities, related mainly to deductions, exist (*see the Branch income section*).

Corporate tax is also due by non-resident, non-PE companies on Tunisian-sourced income through WHTs.

Corporate tax is broadly levied on the total net income resulting from the statutory financial statements of the company, duly adjusted according to the specific tax rules.

Positive/negative items of income are taxed/deducted based on the accrual basis. Income items accruing in a tax period where the above principle is not met are not allowed for tax deduction nor taxed in that tax period. Tax deduction/taxation is correspondingly deferred to the future tax periods where the principle will be met.

Income items have to be certain in their occurrence and objectively determined or determinable in their amount.

Corporate tax rates

The general corporate tax rate is 25%. However, specific rates are foreseen for specific sectors of activity. Indeed, corporate tax is due at the rate of:

- 10% for:
 - companies carrying out craft activities, agricultural and fishing activities, and fitting out fishing boats

- trading groups of retail businesses organised as service cooperatives, governed by the general cooperation legislation
- service cooperatives formed between producers for the wholesale of their production
- consumer cooperatives governed by the general cooperation legislation, and
- wholly exporting companies created as of 1 January 2013 that entered into production no later than December 2014.
- 35% for:
 - certain domestic financial institutions
 - offshore financial institutions governed by the code related to financial services destined to non-residents, and this only for the benefits derived from services provided to non-resident persons
 - investment companies
 - insurance and reinsurance companies
 - debt collection companies
 - telecommunication companies
 - companies rendering services to companies operating in the oil and gas field
 - companies operating in the production and the transport of hydrocarbons and governed by particular conventions, as well as companies operating in the transfer of hydrocarbons via pipeline, and
 - companies operating in the oil refining sector and the wholesale of hydrocarbon products.

Minimum corporate tax

A minimum corporate tax is due at the rate of 0.2% of the local turnover, including value-added tax (VAT), in case:

- the company realises losses or
- the corporate tax due at the rate of 25% or 35% is less than the minimum corporate tax of 0.2% of the local turnover, including VAT.

However, the minimum corporate tax is reduced to 0.1% of the turnover of companies subject to corporate tax at the rate of 10% (e.g. exporting companies after expiry of the ten-year tax holiday period) and companies selling products subject to the government homologation of prices with a gross margin not exceeding 6%.

The minimum corporate tax is not due by companies benefiting from the whole exemption of profits deriving from exploitation (e.g. companies established in the regional development zones, companies operating in the agricultural sector) during the period of tax holidays. These latter are fixed by decree.

The minimum corporate tax is deductible against the corporate tax due during the following year, up to the fifth year, without resulting in a corporate tax less than the minimum mentioned above.

Example

A company realises the following:

	(TND)	
	Fiscal year (N)	Fiscal year (N+1)
Total revenues	1,000,000	1,500,000
Losses	100,000	0
Profits	0	16,000
Corporate tax	$1,000,000 \times 0.2\% = 2,000$	$16,000 \times 25\% = 4,000$
Minimum corporate tax	2,000	$1,500,000 \times 0.2\% = 3,000$

Tunisia

	(TND)	
	Fiscal year (N)	Fiscal year (N+1)
Deduction of the precedent minimum corporate tax	-	1,000 (the precedent minimum corporate tax is deductible in the limit of 1,000 = 4,000 - 3,000)
Corporate tax due	2,000	3,000 (corresponding to the minimum corporate tax)

Local income taxes

For a description of local taxes, see Vocational training tax, Local authority tax (LAT), and Hotels tax in the Other taxes section.

Corporate residence

A company is tax resident in Tunisia if it is registered or has its effective place of management therein.

Permanent establishment (PE)

No definition of PE is given by the Tunisian domestic law. In practice, the Tunisian tax authorities refer to the definitions given by DTTs.

Other taxes

Value-added tax (VAT)

VAT scope and rates

VAT is levied under the Tunisian VAT Code and is due on all transactions taking place in Tunisia. The sale of goods is considered as taking place in Tunisia, and subject to VAT, if the goods sold are delivered in Tunisia. The sale of services is considered as taking place in Tunisia, and subject to VAT, if the services sold are exploited or used in Tunisia.

The standard rate of VAT is 18%. Lower rates of 6% and 12% apply to specifically designated operations.

Some operations, products, or services are out of the scope of VAT in Tunisia, and some others are expressly exempt from VAT.

Some goods and services may be acquired VAT free, based on a certificate delivered for the purpose by the relevant tax authorities. This exemption is granted mainly to wholly exporting companies, oil and gas companies, their contracts, and their subcontractors.

Registration for VAT purposes may be either obligatory or optional.

Voluntary registration is allowed where persons:

- carry out activities that are outside the scope of the Tunisian VAT, in which case the option has to be a full option, which means that all the activities carried out by these persons will be subject to VAT, or
- carry out operations that are exempt from VAT and that are destined for export, or supply products and services that are exempt from VAT to persons liable to VAT, in which case the option may be a partial or a full option.

Output VAT

Output VAT is calculated on the basis of the amount of the invoice excluding VAT.

Input VAT

Individuals and companies that are subject to VAT may deduct the input VAT incurred on the purchase of goods and services necessary to carry out activities subject to VAT.

VAT declaration

VAT is declared and paid on a monthly basis.

Refunds

If the input VAT exceeds the output VAT, the VAT credit resulting from the difference between the input VAT and the output VAT may be reimbursed on the basis of a written request made to the tax authorities.

The VAT credit is refundable if it arises from:

- exportation operations of goods and services, sales made to clients allowed to acquire goods and services VAT-free, and WHT made on the remunerations paid to companies that are neither resident nor established in Tunisia (such VAT credit is refundable if it is shown at least on one monthly tax return)
- investments destined for the carrying out of new projects as provided for in the Tunisian Incentives Investment Code (such VAT credit is refundable if it is shown on at least three successive monthly tax returns)
- suspension of activity (such VAT credit is refundable after a tax audit), or
- other operations (such VAT credit is refundable if it is shown on at least six successive monthly tax returns).

In order to benefit from the refund of VAT credits, the taxpayer has to file supporting documents, such as declarations relating to exportation of goods, documents proving that the service rendered by the Tunisian taxpayer was used or consumed outside Tunisia, authorisations to sell VAT-free, and WHT certificates.

To benefit from the refund of VAT credits, the taxpayer must already have submitted all tax returns and paid all taxes due at the time of submission of the request for the refund.

An advance payment of 15% of the VAT credit is to be paid to the taxpayer as soon as the taxpayer presents the request for refund if the VAT credit arises from operations other than export, suspension of activity, and operations of companies that are neither resident nor established in Tunisia. This rate is to be increased to 50% if the taxpayer is a company of which the financial statements are subject to legal audit, and to 100% if the VAT credit is originated from exports.

Time limits

The taxpayer may claim the VAT credit within three years starting from the date from which the VAT credit becomes refundable.

Customs duties/Import tariffs**Import VAT**

Importation of goods and services are subject to import VAT unless:

- the imported good is expressly exempt, such as for:
 - fresh milk, uncondensed and unsweetened, whether skimmed or full-fat
 - milk flour
 - devices intended for use by physically disabled persons
 - pure-bred breeding animals
 - equipment with nothing similar manufactured locally, expressly designated, or
 - boats destined to maritime navigation and fishing, and other pleasure boats, or
- the importer benefits from the acquisition of goods necessary to its activity VAT-free (e.g. oil and gas companies).

Tunisia

Customs duties

Customs duties are due on importations other than those made from the European Union (EU).

Some equipment expressly designated by the Tunisian domestic law is exempt from customs duties, whether imported from EU countries or not.

Customs duties are not due in cases where the importer is expressly exempt, even if the goods are imported from outside the European Union.

For temporary importation of equipment, the customs duties due are to be calculated in proportion to the period spent in Tunisia. 1/60 of the total customs duties are due per month spent in Tunisia.

Excise taxes

There are no provisions for excise taxes in Tunisia.

Property taxes

A real estate tax (RET) is calculated by the relevant municipalities and is notified annually to the taxpayers at the beginning of the civil year.

For companies subject to the payment of the local authority tax (LAT) (*see below*) and in case the LAT paid over the year is less than the RET notified by the municipalities, then the differential is due and is payable as complementary LAT. In other words, the RET constitutes a minimum of due LAT per year.

Transfer taxes

The registration of some operations is compulsory. In these cases, the registration fees are expressly determined by the Registration and Stamp Fees Code.

Registration remains optional for certain operations. In case of optional registration, the registration fees due to be paid are equal to TND 20 per page and per copy.

In case of compulsory registration, the fees due depend on the nature of the transaction and the goods involved.

Some transactions are subject to proportional registration fees, for example:

- 5% on the transfer of immovable properties. However, this rate is reduced to 3% for the acquisition of social housing from real estate developers for the portion exceeding TND 150,000.
- 2.5% for the transfer of goodwill (*fonds de commerce*).

Transactions that are not subject to proportional registration fees, as well as transactions for which registration is optional, are subject to insignificant fixed registration fees (TND 20 per page).

Stamp duties

Stamp duties are due, in general, on certain contracts expressly designated, as well as invoices, unless the customer is expressly exempt.

In general, stamp duties range from TND 0.5 for invoices, to TND 2 per page for contracts, to TND 60 for passports.

Certain documents are expressly exempt from stamp duties, mainly judgments, checks, etc.

Payroll taxes

There are no payroll taxes applicable in Tunisia other than those mentioned *below*.

Social security contributions

The Tunisian social security system is financed by contributions from both employers (16.57%, reduced to 0.5% for wholly exporting companies) and employees (9.18%) based on salaries. Employers collect and pay the social security contributions from each wage-earner.

Contributions for Accident and Professional Insurance are collected in the same manner.

Social logging tax

Employers established in Tunisia, regardless of being liable or not to income tax, are subject to a social logging tax, calculated at 1% of the gross amount of salaries paid to its employees, including benefits in kind.

The social logging tax is filed on the monthly tax return through which VAT and other direct taxes, except corporate tax, are filed.

This tax is payable monthly before the 28th day of the following month.

Vocational training tax

Entities subject to corporate tax are subject to vocational training tax, calculated at 2% of the gross amount of salaries paid to its employees, including benefits in kind. The rate of this tax is 1% for industrial companies.

This tax is payable monthly before the 28th day of the following month.

Local authority tax (LAT)

LAT is payable by entities subject to corporate tax, except entities operating in the tourism sector. The tourism sector is defined as accommodation, entertainment, tourist transportation, thermals, congressional tourism, companies managing hotels and entertainment centres, and travel agencies.

If a company is engaged in several activities, some of which are subject to LAT and the remaining are not subject to LAT, the taxable base to be considered is constituted only by the turnover of the activities that are subject to LAT.

The LAT is paid to the local authority at the rate of:

- 0.2% of the total turnover of the entity, with a minimum calculated on the basis of the number of square metres of construction used by the entity.
- 0.1% of the turnover deriving from exportation as defined by the legislation in force.

LAT is payable monthly before the 28th day of each month.

Hotels tax

The hotels tax is due by entities that work with tourists; provide accommodation, food, and beverages; or organise leisure activities for clients. The tax is calculated at 2% of the gross turnover generated from the tourism and relating activities.

This tax is payable monthly before the 28th day of the following month.

Tourism Sector Development Fund (FDCST) tax

The FDCST tax is a tax that is paid by entities operating in the tourism sector. The tax is calculated at 1% of the turnover, excluding VAT, generated from tourism and relating activities.

Tunisia

Branch income

The income attributable to a PE corresponds to:

- the revenues generated directly by the PE further to the exercise of its activity
- the revenues corresponding to works carried out by it, even if invoiced by the head office, and
- the revenues that would have been realised by an independent company carrying out the same business, in case the activity of the PE is provided for free.

The following charges are deductible for the purpose of the determination of the taxable results of a PE:

- All the charges incurred directly by this PE and necessary for its proper functioning. These charges have to be supported by proper documentation.
- Direct charges incurred by the head office exclusively for the PE and supported by proper documentation.
- A proportion of the indirect charges (real central administration costs) incurred by the head office. The proportion admitted for deduction is most often calculated on the basis of the turnover of the Tunisian branch against the global turnover of the head office. The deduction is limited to 10% of the Tunisian turnover in case the head office is resident of a state that did not conclude a DTT with Tunisia.

Income determination

Inventory valuation

Inventory is valued at cost.

Capital gains

According to the provisions of article 11 of the Income and Corporate Tax Code, “the net income of a company is determined as the result of all the operations undertaken by the company, including mainly the transfer of assets...” Consequently, capital gains, if any, arising from the transfer of assets will be considered as taxable income and will be subject to corporate tax.

Capital gains are calculated as the difference between the sale price, which is supposed to be equal to the fair market value, and the net book value.

In the particular case of goodwill (*fonds de commerce*) generated internally, capital gains will be equal to the total sale price, as goodwill, other than derived from acquisitions, has no value on the books of the company.

All tangible and intangible transaction assets have to be valued at their fair market value.

The goodwill (*fonds de commerce*) generated internally, even if not booked as an asset of the company, also has to be valued at fair market value.

Particular case of capital gains resulting from mergers

Capital gains arising from the transfer of assets, other than inventories, on the occasion of a merger operation are deductible from the taxable income of the merged company and are to be added back to the taxable income of the absorbing company at up to 50% of their amount, spread out over five years.

Dividend income

Dividends distributed by Tunisian-resident companies to non-resident, non-establishment companies, to non-resident individuals, and to resident individuals are

subject to corporate tax paid through a discharging WHT at the rate of 5% of its total amount.

Dividends distributed by non-resident companies are subject to tax in Tunisia, unless otherwise provided for by the DTTs concluded by Tunisia.

Interest income

Interest income arising from Tunisia or outside is part of the taxable results of the company, unless expressly exempt by the law (e.g. interests on deposits in foreign currencies).

Royalty income

Royalty income, except that derived from exports, is part of the taxable results of the company.

Foreign income

Foreign income derived from services that are realised outside Tunisia are part of the taxable income (*see the Tax credits and incentives section*).

Deductions

Depreciation

Depreciation expenses of fixed assets that are owned by the company and within the limit of the depreciation expense calculated according to the straight-line method are deductible for the purpose of determination of taxable income at a maximum depreciation rate fixed by decree.

Buildings may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 5%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

Equipment and machinery may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

The equipment and machinery depreciation rate may be increased by 50% if the equipment is used at least 16 hours a day, or doubled if used 24 hours a day, but the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method, multiplied by 1.5 or by 2, depending on whether the equipment will be used 16 or 24 hours a day.

Depreciation expenses of assets exploited under leasing contracts are also deductible for the purpose of determination of taxable income. In fact, even if assets exploited under leasing contracts are not owned by the company, they are booked as assets in the balance sheet and depreciated accordingly over a minimum period fixed by decree, as follows:

Asset exploited under leasing contracts	Minimum period (years)
Constructions	7
Machinery and equipment	4
Transportation equipment	3

Tunisia

Goodwill

Goodwill (*fonds de commerce*) amortisation expenses are not tax deductible for the purpose of the determination of taxable income.

Start-up expenses

The maximum amortisation expense allowed for deduction is equal to 100% of the start-up expenses.

Interest expenses

Interest expenses (commissions, bank charges, interest loans, etc.) relating to loans contracted by the company and necessary for its proper functioning are tax deductible.

Interest expenses on shareholders current account are tax deductible within the limit of the maximum rate of 8%, provided that the capital is fully paid and the amount to be remunerated shall not exceed 50% of the capital; the rate of 8% is not applied to banks.

Bad debt

Provisions for bad debts are tax deductible within the limit of 50% of the taxable result (after deduction of non-taxable revenues and add-back of non-deductible charges).

The deduction of bad debts is subject to the presentation of a detailed statement of the concerned creditors while filing the annual corporate tax return, as well as court cases against the creditors in order to claim payment.

Provisions for bad debts that are initially constituted tax-free and become groundless during an exercise (e.g. by the covering of the debt totally or partially) are taxable.

Charitable contributions

Charitable contributions are either deductible:

- totally, in cases where they are granted to proprietary organisms, the list of which is fixed by decree, or
- within 0.2% of the revenue, in other cases.

The deduction of charitable contributions is subject to the presentation of a detailed statement of the beneficiaries while filing the annual corporate tax return of the year during which these charitable contributions were granted.

Fines and penalties

Transactions, fines, and any other penalties for violating legal provisions are not tax deductible. However, contractual penalties (for late payment for example) remain tax deductible.

Taxes

All taxes due by the company are considered as tax-deductible charges, except corporate tax.

Note that when the tax due by non-resident, non-PEs on royalties is borne by a Tunisian-established company (the debtor), then the correspondent charge is not tax deductible.

Net operating losses

Under the Tunisian tax legislation, tax losses are divided into two categories: operating losses and deferred depreciation.

Operating losses are to be carried forward for five years, starting from the year following the one during which they were booked.

Deferred depreciation is to be carried forward indefinitely, starting from the year following the one during which they were booked.

With regard to the Tunisian tax legislation, operating losses cannot be carried back.

Payments to foreign affiliates

See Transfer pricing in the Group taxation section.

Group taxation

Companies belonging to the same group have the possibility, if certain requirements are met, to opt for the tax consolidation regime.

The tax consolidation regime allows the determination of one taxable basis given by the algebraic sum of the taxable profits/losses determined by each of the companies participating in the scheme, with apportionment in relation to the corporate tax rate applicable to each company in comparison with the corporate tax rate applicable to the consolidating entity.

The tax consolidation regime is applicable for a minimum period of five years, renewable by tacit agreement for a five-year period each time.

The election to the tax consolidation scheme is subject to the prior authorisation of the Ministry of Finance if certain conditions are met:

- The mother company has to be listed on the Tunisian Stock Exchange. In case the mother company is not listed on the Tunisian Stock Exchange, it has to undertake to be listed by no later than the end of the year following the first year during which the tax consolidation regime comes into effect; this deadline may be extended by one additional year.
- Participations held by the mother company in the capital of the other group-companies electing to the tax consolidation regime, whether directly or indirectly, have to be equal to at least 75% of the capital of each company during the whole period of the tax consolidation scheme.
- Companies electing to the tax consolidation regime have to be resident in Tunisia.
- Companies electing to the tax consolidation regime have to be subject to corporate tax. According to the tax law in force, companies benefitting from tax holidays during a certain period of time may elect to the tax consolidation scheme even if no minimum tax is due.
- Companies electing to the tax consolidation scheme have to consider the same opening and closing dates for the fiscal years covered by the scheme.

The taxable result of each group-company participating in the tax consolidation scheme is determined according to the common law. However, and unlike the general rules applicable to the determination of the taxable result, interests generated by sums of money deposited in inter-company current accounts are not taken into consideration for the purpose of determination of the taxable base subject to corporate tax.

Deferred depreciation and operating losses generated by a group-company prior to the tax consolidation scheme entering into effect are to be carried forward at the level of the same company.

Taxable results of companies subject to the same corporate tax rate as the mother company are to be considered for their whole amount, whereas taxable results of companies subject to corporate tax rates different from the one applicable to the mother company are to be reprocessed. In fact, in this latter case, only a portion of the taxable

Tunisia

result is to be considered for the sake of computation of the consolidated tax. This portion is determined according to the following formula:

Taxable base * (corporate tax rate applicable to the company / corporate tax rate applicable to the mother company)

Once the taxable results of the group-companies are added together, they are to be reprocessed by the mother company as follows:

- Add back provisions for bad debts booked and deducted by a group-company, before the tax consolidation scheme enters into effect, for doubtful receivables from the other group-companies.
- Add back benefits reinvested by a group-company in the capital of another group-company after tax consolidation scheme enters into effect, unless they are reinvested lately within the receiving entity itself.
- Deduct remission of debts by a group-company to the benefit of another group-company, both of them participating in the tax consolidation scheme.

Corporate tax is calculated at the rate applicable to the consolidating entity on the basis of the consolidated taxable result calculated (*as outlined previously*). However, a minimum corporate tax equal to 0.2% of the total gross turnover (*see the Taxes on corporate income section*) of the group-companies participating in the tax consolidation scheme remains due in case the taxable results show a deficit or in case the minimum corporate tax is greater than the one calculated by applying the corporate tax rate applicable to the consolidating company to the consolidated taxable profit.

All pre-payments, WHTs, instalments, and tax surpluses generated by a group-company before the election to the tax consolidation scheme are creditable against the corporate tax to be paid by the consolidation entity. The surplus, if any, remains deductible from corporate tax due in the subsequent years.

Transfer pricing

According to the Tunisian tax legislation, where there is evidence for the tax authorities of the existence of commercial or financial business transactions between a company and other dependent companies, which, for the determination of their value, are based on rules that differ from those governing relations between independent companies and which result in the reduction of taxable benefits, the tax department is allowed to add back to the taxable result of the invoicing company the differential between the benefits that would have been realised if the practiced prices were in line with the arm's-length principle and those actually accounted for by the company.

The burden of proof is on the tax department.

Thin capitalisation

Projects may be financed by shareholders' equity, shareholders' loans, or external debts.

Interest due on shareholders' loans is tax deductible within the limit of an interest rate of 8%, provided that the following conditions are met:

- The capital is fully paid-up.
- The amount of the sums put at the disposal of the company must not exceed 50% of the capital.

In case shareholders' loans exceed 50% of the share capital, then interests due in the part exceeding 50% are not tax deductible.

Controlled foreign companies (CFCs)

There is no provision in Tunisia for CFCs.

Tax credits and incentives

In order to harmonise investment legislation with general economic objectives, the Incentives Investment Code (IIC) has been promulgated.

The IIC provides a number of incentives applicable to all projects covered by the code and approved by the competent government institutions and specifically developed in the following sectors:

- Agriculture and fisheries.
- Manufacturing industries.
- Public works.
- Tourism.
- Handicrafts.
- Transport.
- Education and learning.
- Professional training.
- Cultural production and industries.
- Promotion of young people and children's education.
- Healthcare.
- Environmental protection.
- Property promotion.
- Other non-financial activities and services.

The IIC foresees common and specific incentives.

The considered common incentives are detailed as follows:

- Deduction by an entity from the taxable base of profits reinvested by subscribing to initial capital or to capital increases in companies operating under the IIC, within the limit of 35% of its net taxable profits, and within the limit of the minimum corporate tax rate, which means that the corporate tax cannot be less than 20% of what it would have been without deducting the considered profits.

The main conditions for benefiting from the aforementioned incentives are that the:

- subscribing company keeps its accounts in accordance with Tunisian accounting standards
- new shares must be issued for the subscribed amount
- registered subscribed capital may not be reduced during the five years following 1 January of the year following the reinvestment, except for the purpose of absorbing losses
- subscribing company must join to its corporate tax return a certificate proving that the capital in which they subscribed is entirely paid
- subscribed shares must not be sold before the end of the two years following the payment of the capital, and
- reinvested profits have to be posted in a 'special investment reserve account' under the liabilities in the balance sheet before the final date for filing the corporate tax return relating to the year during which the benefits were reinvested and deducted.
- Deduction from the taxable base of profits reinvested in the company itself (activities extension), provided the respect of the minimum tax rate condition of 20% and the following other conditions:
 - The reinvested profits have to be posted in a 'special investment reserve account' under the liabilities in the balance sheet before the final date for filing the corporate tax return relating to the year during which the benefits were reinvested and deducted.

Tunisia

- The benefits posted in the 'special investment reserve account' have to be incorporated/included in the capital of the company before the end of the year during which the reserve was posted/booked.
- An investment plan is to be joined to the income tax return.
- The investment must be realised before the end of the year during which the reserve was posted/booked.
- The assets acquired must not be transferred during at least two years after the date of the start of production.
- The registered capital must not be reduced during the five years following the date of the incorporation of the reinvested benefits in the capital, except for the purpose of absorbing losses.

The IIC foresees specific advantages that apply to:

- Exportation activities.
- Investments in regional development zones.
- Agricultural development.
- Environmental protection.
- Research and development (R&D) and technological development.
- Small enterprise and trade development.
- Investments of support (learning, training, etc.).

Wholly exporting activities

The following are considered as wholly exporting companies:

- Companies with products totally destined to be sold outside Tunisia.
- Companies providing services totally utilised/exploited outside Tunisia.
- Companies working exclusively with wholly exporting companies as defined above.
- Companies working exclusively with financial and banking institutions working mainly with non-Tunisian resident persons.
- Companies set up in the Economical Free Zones in Tunisia.

Note that wholly exporting companies may commercialise locally, during a given year, up to 30% of the turnover of the previous year without losing the status of a wholly exporting company.

Profits derived from exportation by companies that have already obtained an investment certificate from the relevant authorities (the Agency of Promotion of the Investment in the particular case of industrial companies) before 1 January 2014 and that entered into production during 2014 may benefit from the deduction of the benefits derived from exportation operations during the first decade of activity, and this starting from the first exportation operation.

In addition to the above mentioned deduction, the company may also benefit from the deduction of other profits in connection with exportation during the first decade of activity.

The concerned profits are detailed as follows:

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted within the frame of support to the export operations.
- Capital gains derived from the sale outside Tunisia or to other wholly exporting companies of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (*fonds de commerce*).
- Realised exchange profits in connection with the exportation activity.
- Remission of debt for the benefit of the wholly exporting companies.

However, all the other profits (financial interests, rentals, etc.) remain subject to corporate tax at the rate of 25%.

After the expiry of this period, profits derived from the main activity are to be subject to corporate tax at the rate of 10% and all other revenues will be subject to corporate tax at the rate of 25%.

Wholly exporting companies that obtained the investment certificate as of 1 January 2013 and that entered into production no later than December 2014 are subject to corporate tax at the rate of:

- 10% of the basis of the benefits derived from exportation, and
- 25% on the basis of the benefits derived from local sales as well as the other profits (*see the Taxes on corporate income section concerning the minimum corporate tax*).

Wholly exporting companies also benefit from:

- Exemption from VAT on purchases based on a certificate delivered for the purpose by the relevant tax authorities, to be presented by the Tunisian entity to its suppliers, and the exemption from VAT on sales based on a certificate delivered for the purpose by the relevant tax authorities, to be presented by the client to the Tunisian entity.
- Exemption from other indirect taxes, including customs duties.
- Exemption from professional training tax, registration fees, stamp duties, and social logging tax.

However, they remain subject to the payment of the following insignificant taxes and duties only:

- Taxes and duties to passenger cars.
- The single compensation tax on road transport.
- Taxes on real estate: calculated on the number of square metres of construction used by the entity.
- Taxes and duties by virtue of services rendered directly in compliance with the current legislation.
- LAT (*see the Other taxes section*).

Regional development zones activities

The IIC provides that investments in certain activities (industry, tourism, handicraft, and certain other services) carried out by entities established in regional development zones benefit from a number of tax advantages, detailed as follows:

- Deduction from the taxable profits of the entity of the profits derived from the investments in the regional development zones during a period of:
 - Five years, in case the investments are realised in the development zones enumerated in category one.
 - Ten years, in case the investments are realised in the development zones enumerated in category two.
 - Ten years, in case the investments are realised in the development zones of priority. During the second decade of activity, the deduction is reduced to 50% of the profits generated on the investments.

In addition to the above mentioned deduction, companies carrying out investment in regional development zones may also benefit from the deduction of other profits in connection with the main activity during the first decade of activity.

The concerned profits are detailed as follows:

Tunisia

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted within the frame of support to the export operations.
- Capital gains derived from the sale of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (*fonds de commerce*).
- Realised exchange profits in connection with the exportation activity.
- Remission of debt for the benefit of the wholly exporting companies.

Other benefits include:

- Deduction from the taxable profits of the revenues reinvested in the subscription to initial capital or to capital increases in these companies, up to 100% of the taxable result and without any minimum tax. However, the deduction is subject to the remaining conditions listed under the common incentives section.
- Exemption from social logging tax and vocational training tax.

Support activities

The supporting investments activities are defined as being the following:

- Training of children.
- Education.
- Teaching.
- Scientific research.
- Professional training.
- Cultural production and co-ordination of young people.
- Healthcare services.

The investments made by institutions for these considered activities give entitlement to the following tax incentives:

- Exemption from customs duties and taxes with a similar effect.
- Suspension of VAT and consumption duty for imported equipment with no locally manufactured equivalent that is necessary for the realisation of the investments, as well as suspension of VAT on equipment manufactured locally.

Foreign tax credit

In the absence of DTTs, corporate tax (or any WHT in connection with) paid outside Tunisia is not deductible from the tax due in Tunisia.

However, in the presence of DTTs, in cases where profits derived from outside Tunisia were subject to corporate tax in Tunisia, the foreign tax, if any, is deductible, but only up to the corresponding Tunisian tax on these profits.

Withholding taxes

The payments of certain remunerations are subject to corporate WHT in Tunisia.

The WHT is an advance payment of corporate tax and is thus deductible from the corporate tax due by the invoicing entity. To this end, the paying entity shall withhold the tax at the appropriate rate. It shall then issue a WHT certificate to the invoicing company to enable the latter to use the certificate as proof of the payment at the moment of filing its corporate tax return. The paying entity subsequently pays the withheld amount to the tax authorities.

The withheld tax is to be declared and repaid by the paying entity each month before the 28th day of the following month.

The rates of the WHT differ according to the nature of the goods/services and the rates applicable within the framework of the DTTs.

Applicable WHT rates in Tunisia are as follows:

- 15% of the gross amount of the invoices related to fees, commissions, brokerage fees, rentals, payment of non-commercial activities (non-commercial activities include especially independent scientific, literary, artistic, educational, or teaching activities, such as independent activities of physicians, dentists, lawyers, consultants, architects, engineers, accountants, etc.).

This rate is reduced to 5% for fees (including those paid for non-commercial activities) and hotel rentals when these amounts are paid to entities subject to corporate tax and individuals who keep proper accounts in accordance with the Tunisian accounting principles.

This rate is reduced to 2.5% for fees, commissions, rentals, and non-commercial remunerations deriving from exportation, in accordance with the legislation in force.

- 15% on performance bonus paid to distributors of goods.
- 20% on interest and director's attendance allowance. This does not include interest on deposits and bonds in foreign currency or convertible dinars.
- 5% on bank loans extended by non-Tunisian resident banks.
- 2.5% on the sales price indicated in a real estate sale, in case the seller is an individual.
- 1.5% on payments exceeding TND 1,000 (including VAT) made for the acquisition of goods and services necessary to the activity and that are not subject to a specific WHT rate.

This rate is reduced to 0.5% in case the remunerations are derived from exportation, in accordance with the legislation in force, or payment is made to companies subject to corporate tax at the rate of 10%.

- 15% on other payments made to non-Tunisian tax resident persons.
- Dividends distributed by Tunisian-resident companies to non-resident, non-establishment companies, to non-resident individuals, and to resident individuals are subject to corporate tax paid through a discharging WHT at the rate of 5% of its total amount.
- 25% on payments made to persons resident in tax havens.
- 25% on lottery and gambling gain.

DTT rates

Note that the following interest WHT rates are applicable to interest payable to non-resident, non-PE companies and financial institutions according to DTTs concluded by Tunisia.

The DTT rate is applicable in case it is lower than the domestic law, provided that the beneficiary of the payment provides the corresponding tax residency certificate. In case of failure, the domestic law will be applied.

Notes

- 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 15% of the gross amount of the royalties for cinematographic films and TV films, patents, trademarks, designs or models, plans, secret formulae, or processes; technical and economical studies; information concerning industrial, agricultural, commercial, or scientific experience; and the use of or the right to use industrial, commercial, or scientific equipment.
- 11% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work, including cinematographic films and films for TV broadcasting, patents,

- trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities; and economical and technical studies, and technical assistance realised in the state of source.
3. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical assistance and studies in all fields.
 4. 20% of the gross amount of the royalties for the use of, or the right to use, licences, trademarks, cinematographic films, and films and discs for radio or television broadcasting and the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied. 15% of the gross amount of the royalties for all the other cases, mainly technical and economical studies; the use of, or the right to use copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; and information concerning industrial, commercial, or scientific experience. However, royalties paid for the use of, or the right to use, copyrights of literary, dramatic, musical, or artistic work, except royalties in respect of cinematographic films and films and discs for TV broadcasting, are taxable in the state of residency and thus cannot be subject to tax nor to any WHT in connection with the state in which they arise.
 5. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and information in respect of industrial, commercial, or scientific experience. 5% of the gross amount of the royalties for technical and economical studies and technical assistance.
 6. 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic and films for TV and radio broadcasting. 15% of the amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use industrial, commercial, or scientific equipment; and technical and economical studies and technical assistance rendered in the state in which they arise.
 7. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use industrial, commercial, or scientific equipment; and technical and economical studies.
 8. 15% of the gross amount of royalties for the right to publish any literary, artistic or scientific work, patents, trademarks, designs or models, plans, secret formulae or processes; information in respect of industrial, commercial or scientific experience; the use of or the right to use industrial, commercial or scientific equipment; and cartoons, films, and videos for TV broadcasting.
 9. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.
 10. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 15% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 20% of the gross amount of the royalties for the use of, or the right to use, agricultural, industrial, commercial, scientific equipment, or port facilities and licences, trademarks, cinematographic films, and films for TV broadcasting. However, payments made to public entities for the use of cinematographic films or the broadcasting on radio and TV are exempt from WHT; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied.
 11. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work; information concerning agricultural, industrial, commercial, or scientific experience; and technical and economical studies. 15% of the gross amount of the royalties for patents, trademarks, designs or models, plans, secret formulae, or processes, and cinematographic films or films for television.
 12. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities, except remunerations for chartering of vessels and aircraft; and technical and economical studies.
 13. Royalties may be subject to tax in the contracting state in which they arise in cases where the legislation of that state allows such taxation, at a maximum rate of 12%.
 14. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical services, such as technical and economical studies and technical assistance.
 15. 8% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to

use, agricultural, industrial, commercial, scientific equipment, or port facilities, except remunerations for the chartering of vessels and aircraft used for international transport.

16. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 12% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 16% of the gross amount of the royalties for the use of, or the right to use industrial, commercial, or scientific equipment, and licences, trademarks, cinematographic films, and films for TV broadcasting; however, since the 16% treaty rate is higher than the 15% common law rate, the latter will be applied.
17. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation and according to the legislation of that state for the use of, or the right to use, any copyright of literary, artistic, or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.
18. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and information in respect of industrial, commercial, or scientific experience.
19. 5% of the gross amount of royalties for the use of, or the right to publish, any literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, a transmission by satellite or optical fibre transmission or similar means of transmission, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.
20. 12% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience, except remuneration for vessels and aircraft chartering in respect of international transport; the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; and technical services, such as technical and economical studies and technical assistance, carried out in the state of source.
21. Royalties may be subject to tax in the contracting state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films recording for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.
22. 12% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; and technical and economical studies and technical assistance.
23. 2.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment, except remunerations for the chartering of vessels and aircraft used for international transport.
24. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation; but if the recipient is the beneficial owner of the royalties, the tax so charged shall not exceed 11% of their amount. However, this rate is reduced to 7.5% in case royalties received by a resident of Tunisia are not subject to WHT in the Netherlands and as long as the Netherlands does not proceed to the modification of its tax legislation. Remunerations paid for the following are considered royalties: the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment, except remunerations paid for the exploitation of vessels and aircraft in respect of international transport; and technical and economical studies and technical assistance rendered in the state from which royalties are paid.
25. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, except cinematographic films and films for TV broadcasting. 15% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 20% of the gross amount of the royalties for the use of, or the right to use, agricultural, industrial, commercial, scientific equipment, or port facilities, and the use of, or the right to use, trademarks and cinematographic films and films for TV broadcasting; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied.
26. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities, except remuneration for vessels and aircraft chartering in respect of international transport; and technical and economical studies and technical assistance.
27. 12% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models,

- plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities; and technical and economical studies and technical assistance.
28. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical and economical studies and technical assistance in respect of the use of, or the right to use, the equipments, rights, and information mentioned above.
 29. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of or the right to use industrial, commercial, or scientific equipment.
 30. Royalties are subject to tax in the state of residency of the beneficiary. However, the non-exclusive taxation right attributable to the state of residency does not prohibit the taxation of such royalties in the state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation. Remunerations paid for the following are considered royalties and thus are subject to tax in the state in which they arise: the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment that is not considered as an asset in the meaning of Article 6 of the present treaty.
 31. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and information in respect of industrial, commercial, or scientific experience. 12% of the gross amount of the royalties for technical services, such as technical and economical studies and technical assistance.
 32. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; and economical and technical studies and technical assistance.
 33. 10% of the gross amount of royalties for copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; studies and information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and cinematographic films and video tapes for TV broadcasting.
 34. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of or the right to use industrial, agricultural, commercial, or scientific equipment, except chartering of ships and aircraft used for the international transport.
 35. 5% of the gross amount of royalties for remunerations paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, software, designs or models, plans, secret formulae, or processes.
 36. 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic and films for TV and radio broadcasting. 15% of the amount of the royalties for the use of, or the right to use, cinematographic films, films for TV and radio broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment, and technical and economical studies.
 37. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience, and technical and economical studies and technical assistance related to these information; and the use of, or the right to use, industrial, commercial, or scientific equipment.
 38. 18% of the gross amount of royalties for the use of, or the right to use patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment; however, since the 18% treaty rate is higher than the 15% common law rate, the latter will be applied.
 39. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.
 40. 7.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use, of or the right to use, industrial, commercial, or scientific equipment.
 41. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of,

or the right to use, industrial, agricultural, commercial, or scientific equipment; and technical and economical studies.

42. Royalties are only taxable in the contracting state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films for TV broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, scientific equipment or port facilities; and economical and technical studies and economical assistance.
43. 15% of the gross amount of the royalties for copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and profits from any ownership, depending from the productivity, the use, or the alienation of that ownership. 10% of the gross amount of the royalties for the use of, or the right to use, industrial, commercial, or scientific equipment other than vessels and aircraft used for international transport, and technical studies paid from public funds or political subdivisions or local authorities or technical assistance for the use of the ownership of the rights above mentioned, in case the technical assistance is realised in the state of source.
44. 7.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and the use of, or the right to use, industrial, commercial, or scientific equipment and port facilities, except remunerations paid for vessels and aircraft used in international transport.
45. These rates are applicable, in certain cases, to the loans extended by the Central Bank.
46. 5% for loans extended by banks and not represented by bonds or other debt securities.
47. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the Chinese state.
48. 0% for loans granted by financial institutions, the capital of which is held at least up to 50% by the Ethiopian state, its political subdivisions, or local authorities.
49. 0% for loans granted by the Deutsche Bundesbank, Kreditanstalt für Wiederaufbau, and the Deutsche Gesellschaft für wirtschaftliche zusammenarbeit GmbH. (*Entwicklungsgesells*).
50. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Iran.
51. 0% for loans granted by financial institutions, the capital of which is totally held by the Italian state or its local authorities.
52. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Kuwait.
53. 0% for loans granted by financial institutions, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.
54. 0% for loans granted by companies, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.
55. 7.5% for loans guaranteed or granted by financial institutions and the reimbursement period of which exceeds five years.
56. 7.5% as long as the tax legislation of the Netherlands provides that interest paid by a company resident in the Netherlands to a company resident in Tunisia is exempt from any WHT.
57. 0% for loans, the reimbursement period of which exceeds seven years.
58. 5% for loans, the reimbursement period of which exceeds seven years, and 10% in the other cases.
59. 2.5% for bank loans, as long as the Tunisian domestic tax legislation provides that interest on bank loans extended by non-established banks is subject to a 2.5% WHT rate, and 5% for the above mentioned bank loans in cases where an increase of the WHT rate is applicable to interest paid to non-established banks.
60. 0% for loans granted by financial institutions, provided that the reimbursement period exceeds seven years.
61. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematography and films for TV and radio broadcasting; the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use industrial, commercial, or scientific equipment.
62. According to the DTTs concluded by Tunisia, dividends are subject to the listed WHT tax rates, knowing that the rate provide by the domestic law is fixed at 5%.
63. The lower rate applies in cases where the beneficiary has equity participation of 25%.
64. The lower rate applies in cases where the beneficiary has equity participation of 10%.
65. The lower rate applies in cases where the beneficiary has equity participation of 50%.
66. The lower rate applies in cases where the beneficiary has equity participation of 25%, except for investment companies and real estate investment companies.
67. Certain DTTs foresee that in case companies resident of a contracting state have a PE in the other contracting state (state of source), the latter may levy WHT on profits made by the PE as a taxation on dividend.

Tax administration

Taxable period

Under Tunisian law, both the accounting year and tax year follow the calendar year. However, derogation is possible if prior authorisation is obtained from the Ministry of Finance.

Tax returns

Tunisian-established companies have the obligation to file monthly tax returns, an annual corporate tax return, and an annual Employer's Declaration.

Monthly tax returns include WHTs, VAT, LAT, social logging tax, and professional training tax, and must be filed each month before the 28th day of the following month. Filing and payment take place simultaneously.

The annual tax return is the corporate tax return, which must be filed before 25 March of the following year. The deadline for filing the corporate tax return is moved to 25 June for public liability companies and private liability companies subject to statutory audit. Filing and payment take place simultaneously.

The Employer's Declaration has to be filed each year before 28/29 February of the following year. This declaration must list all fees and salaries paid or incurred, even if not yet paid, to service suppliers and employees during the concerned year. No payment is due in connection with this filing, but fees not listed on this declaration are not recognised as deductible costs.

Payment of tax

Corporate tax is paid through:

- WHTs applied on certain payments and operated by the debtor on behalf of the taxpaying entity.
- Beginning from the second year of activity, three provisional instalments, each calculated at 30% of the total corporate tax due for the previous year. The instalments fall due on 28 June, 28 September, and 28 December.
- An annual tax return.

Both WHTs and provisional payments of income tax are creditable against the annual/final tax due.

Filing and payment take place simultaneously.

The most common process is the filing in person at the tax office. In this case, payment is made in cash or by check.

However, companies with turnover exceeding TND 1 million are constrained to file their tax returns electronically. Electronic filing remains optional for other companies. In this case, payment is made through bank transfer.

Tax audit process

Tax controllers may proceed either with a preliminary tax audit or an in-depth tax audit.

Preliminary tax audit

In case of a preliminary tax audit, the taxpayer under control is not notified prior to starting the audit. However, the tax authority has the obligation to send an information request concerning the tax findings. The taxpayer has to reply within 20 days.

Tunisia

The tax audit is conducted in the offices of the tax administration and deals with the documents made available to them (tax returns, registered contracts, etc.). However, preliminary tax audits can never deal with the taxpayer's accounts.

The results of the tax control are notified in writing to the taxpayer within a tax audit report, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated. The tax report is to be notified to the taxpayer within 90 days from the expiry date to reply to the information request (*see above*).

Indeed, the taxpayer has the possibility to answer to the tax audit report within 45 days starting from the day following the date of receipt of the report. Failing that, the taxpayer will receive a tax assessment notice that brings forth requests for payment of taxes and penalties to the taxpayer. In cases where the taxpayer answers to the notification of the results of the tax audit and brings additional explanations, clarifications, and documents to the tax auditors, they will be constrained to examine the evidence provided by the taxpayer and answer to the taxpayer's opposition within six months from the day following the notification date.

Once the taxpayer receives the answer of the tax authorities to the taxpayer's opposition, the taxpayer will have the possibility to file a second opposition within 15 days from the day after the notification day in cases where the taxpayer still disagrees with some or all the points raised by the tax controllers.

Once the second answer is filed by the taxpayer, there will be no other written correspondences with the tax auditors.

In cases where the tax administration agrees to the clarifications, explanations, arguments, and documents provided by the taxpayer, then the tax audit will be closed. However, in cases where the tax administration still disagrees with some or all the evidence provided by the taxpayer, then the taxpayer will receive a tax assessment notice and will have to pay the notified taxes. The tax assessment notice has to take into consideration the taxpayer's observations enclosed in the first and the second opposition filed by the taxpayer.

Further to the receipt of the tax assessment notice, the taxpayer may make an appeal to the relevant court.

A preliminary tax audit does not prevent an in-depth tax audit of the same period and the same taxes.

In-depth tax audit

In case of an in-depth tax audit, the taxpayer under control is notified 15 days prior to starting the audit. This period may be extended to a maximum period of 60 days.

In-depth tax audits deal with the accounts of the taxpayer under control (in cases where the taxpayer has the obligation to maintain accounts according to the accounting legislation into force) as well as any other evidence (presumptions, registered contracts, etc.).

In-depth tax audits take place, as a general rule, on the business premises of the taxpayer. However, and upon the request of the taxpayer or the tax controllers, the tax audit can be conducted in the tax authorities' office. In this case, books, records, and any other documentation deemed necessary to the tax auditors to complete the audit have to be moved to the tax auditors' office.

In-depth tax audits last for:

- six months, in case the taxpayer under control is constrained by the law to maintain accounts, and
- one year, in the other cases.

At the end of this period, the tax audit must come to an end and the tax auditors must draw up a tax audit report to be sent to the taxpayer, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated.

Once the tax audit report is sent to the taxpayer, the procedure of response and deadlines are the same as for preliminary tax audits.

Statute of limitations

The period open for tax audit, unless it was subject to a previous in-depth tax audit, is:

- Four years in case of partial omission; an omission is considered as partial in cases where the tax return is filed but the taxable base is not determined properly or in cases where the WHT rates applied to payments made to third parties are lower than the rates provided by the law.
- Ten years in case of total omission; an omission is considered as total in cases where the tax return is not filed at the date when the company becomes under tax control.

The four-year period and the ten-year period begin to run from 1 January (in cases where the fiscal year coincides with the calendar year) of the year following the completion of sales, earnings, receipt, or disbursement of any sum to be taxed.

Topics of focus for tax authorities

The tax authorities primarily focus on extraordinary transactions (e.g. mergers, restructuring, suspension of business). After introducing a transfer pricing provision as a part of the 2009 law, the tax authorities are increasing their attention towards transactions concluded between affiliated companies.

Significant developments

New Action Plan

Action Plan of 2016 was published by the Turkish government. According to the new Action Plan, the following changes were expected to be made by the end of 2016:

- The New Income Tax Law, which combines the Corporate Income Tax Law and the Income Tax Law, will become effective.
- The Tax Procedure Law will be revised.
- New tax incentives related to energy efficiency will be implemented.
- Banking and insurance transactions tax (BITT) exemption will apply to loans granted for the purpose of funding machinery and equipment investments of Turkish companies engaged in the manufacturing industry.

The below developments have been made within the scope of this Action Plan since the beginning of 2016.

- The New Income Tax Law was proposed by the government to the Parliament on 5 January 2016. The Draft Law is expected to be finalised and published by the end of 2016.
- The new regulation that has been published in the Official Gazette dated 1 January 2016 introduced that the BITT exemption applies to loans granted for the purpose of funding machinery and equipment investments of Turkish companies engaged in the manufacturing industry.

Research and development (R&D) Reform Package benefits

On 1 March 2016, a new R&D Law No. 6676 was enacted to broaden current incentive mechanisms for R&D and innovation activities. The following supports and incentives are introduced by the new law:

- Design activities (and 'design centre' definition) are included in the scope of incentives and supports.
- Incentives for R&D and design centres will be enhanced.
- The minimum number of full-time R&D personnel required to establish an R&D centre will be reduced (to be determined by the Council of Ministers) with respect to certain sectors.
- Additional incentives for R&D personnel, who graduated from basic sciences and work in R&D centres, will be provided.
- Incentives to strengthen industry-industry and university-industry cooperation will be extended.
- To shorten the project duration and minimise the project costs, additional customs duty exemption is made available for the products purchased from abroad.
- Thematic technology development zones for strategic sectors will be established.
- The time spent out of technology development zones and R&D and design centres will also be included in the scope of incentives and supports.

Deemed-interest deduction on cash injection as capital

On 7 April 2015, a new tax incentive has been introduced to the Corporate Tax Law (CTL) where a deemed-interest deduction up to the rate of 50% on cash injection as capital is allowed for tax purposes. Subsequently, by virtue of Council of Ministers Decree no: 2015/7910 (Decree) dated 30 June 2015, such rate has been re-determined between 0% and 75% for various situations.

Taxes on corporate income

Corporations are liable for corporate income tax (CIT) at a rate of 20% on net profits generated, as adjusted for exemptions and deductions and including prior-year losses carried forward, to a limited extent.

According to Turkish tax legislation, income taxation differs significantly based on the taxpayer's place of residence. Resident entities are subject to tax on their worldwide income, whereas non-resident entities are taxed solely on the income derived from activities in Turkey.

Local income taxes

There are no provincial or municipal taxes on corporate income in Turkey.

Corporate residence

If both the legal and the business headquarters of a company are located outside Turkey, the company is regarded as a non-resident entity for Turkish tax purposes. If one of these headquarters is located within Turkey, the company is regarded as a resident entity for Turkish tax purposes.

Note that there is no distinction between CIT and value-added tax (VAT) registration in Turkey. Therefore, corporations or permanent establishments (PEs) are liable for all taxes (e.g. CIT, VAT, withholding tax [WHT], stamp tax) once they are registered for tax purposes in Turkey.

Permanent establishment (PE)

Unlike the provisions of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital, there is no minimum period of presence in Turkey before a presence is regarded under the Turkish tax legislation as a PE. In this regard, we believe that the PE evaluation should be made for each case depending on the merit of the cases, both from a local legislation perspective and from a treaty (if applicable) perspective.

Other taxes

Value-added tax (VAT)

Deliveries of goods and services are subject to VAT at rates varying from 1% to 18%. The general rate is 18%.

VAT payable on local purchases and on imports is regarded as 'input VAT', and VAT calculated and collected on sales is considered 'output VAT'. Input VAT is offset against output VAT in the VAT return filed at the related tax office. If output VAT is in excess of input VAT, the excess amount is paid to the related tax office. Conversely, if input VAT exceeds output VAT, the balance is carried forward to the following months to be offset against future output VAT. With the exception of a few situations, such as exportation and sales to an investment incentive holder, there is no cash refund to recover excess input VAT.

Turkey

Turkish VAT principles contain a 'reverse-charge VAT mechanism', which requires the calculation of VAT by resident entities on payments to persons in foreign countries. Under this mechanism, VAT is calculated and paid to the related tax office by the resident entity. The resident entity treats this VAT as input VAT and offsets it in the same month. This VAT does not create a tax burden for the resident or non-resident entity, except for its cash flow effect on the former if there is insufficient output VAT to offset the input VAT.

VAT is also collected at the point of import. The VAT rate is the same rate as the one that is applied for transactions in the country of origin. The base for VAT is the value of the goods for customs tax purposes plus any kind of tax payable at the point of import and all the expenses incurred until the single administrative document is registered.

Reduced rates

For the deliveries and services mentioned in List No. I (e.g. agricultural products such as raw cotton, dried hazelnuts, supply and leasing of goods within the scope of the Finance Leasing Law), the reduced rate is 1%.

For the deliveries and services mentioned in List No. II (e.g. basic food stuffs, textiles, books and similar publications), the reduced rate is 8%.

Foreign trade: imports and exports

Importation of goods and services is a taxable transaction, whether or not the importation is made for business purposes. Export transactions are exempt from VAT, and credit and refund is available for input VAT for the export goods.

Importation of goods and services

For VAT purposes, any importation of goods or services into Turkey is a taxable transaction, regardless of the status of the importer or the nature of the transaction. To equalise the tax burden on importation and domestic supply of goods and services, VAT is levied only on the importation of goods and services that are liable to tax within Turkey. Accordingly, any transaction exempt in Turkey may also be exempt on import. The VAT on importation is imposed at the same rates applicable to the domestic supply of goods and services. In the case of importation, the taxable event occurs at the time of actual importation. Importation of machinery and equipment under an investment incentive certificate (IIC) is exempt from VAT.

Banking and insurance transactions tax (BITT)

The transactions being performed by licensed banks and insurance companies are generally exempt from VAT but are subject to BITT at a rate of 5% in general (although some transactions are subject to 1% or 0% BITT), which is due on the gains of such corporations from their transactions.

The purchase of goods and services by banks and insurance companies are subject to VAT, but this is considered an expense or cost item. Therefore, it is not recoverable (i.e. for VAT purposes by offsetting against the output VAT) in the hands of these corporations.

Special consumption tax

There are four main product groups that are subject to special consumption tax at different tax rates, depending on the GTIP numbers (tariff numbers):

- Petroleum products, natural gas, lubricating oil, solvents, and derivatives of solvents.
- Automobiles and other vehicles, motorcycles, planes, helicopters, yachts.
- Tobacco and tobacco products, alcoholic beverages.
- Luxury products.

Unlike VAT, which is applied on each delivery, special consumption tax is charged only once (except for some activities, such as production).

Customs and foreign trade

Following the changes in Turkish economic policy in the 1980s, there has been rapid growth in the foreign trade volume of Turkey.

Turkey is a member of the World Trade Organization (WTO) and World Customs Organization (WCO). Turkey signed a 'Customs Union Agreement' with the European Union (EU) on 1 January 1996 and has amended its customs code and legislation in line with those of the EU customs code.

According to the Customs Union Agreement, with the exception of certain goods (e.g. agricultural products), no customs tax is incurred on trade between Turkey and the European Union as long as the goods are imported to Turkey with an A.TR movement certificate proving that the goods are in free circulation in the European Union.

In order to harmonise its foreign trade, Turkey has also signed several Free Trade Agreements (FTAs) with the trade partners of the European Union.

The Turkish Customs Code is very similar to that of the EU, and its aim is to harmonise the customs practices of Turkey with EU customs practices.

The Turkish Customs Code defines the 'Turkish Customs Territory' as the territory of the Republic of Turkey including the territorial waters, the inland maritime zone, and the airspace of Turkey.

The Turkish Customs Code has also brought into force the customs regimes with economic impact that have been in use in the EU countries for a long time. The import taxes, VAT, other taxes, and funds are collected at the time of importation. The main tax collected at customs is the import tax. The import tax differs according to the classification of the commodity and to the country of origin.

VAT is also collected at the point of import. The VAT rate is the same rate as the one that is applied for the transactions in the country of origin. The base for VAT is the value of the goods for customs tax purposes plus any kind of tax payable at the point of import and all the expenses incurred until the single administrative document is registered.

The VAT rates are 1%, 8%, and 18%, varying according to the type of goods imported.

In addition, if the import transaction is not conducted in cash, there is a special Resource Utilisation Support Fund (RUSF), which should be also paid during importation. RUSF is a special kind of fund applied to importations on a credit basis. According to the RUSF legislation, any importation conducted on credit (if the payment related to the importation is not paid before the actual importation) is subject to a special payment of 6% of the value of the goods to be imported. The important criteria are payment term and whether it is a cash payment or payment on credit.

Dumping and anti-dumping duties are collected at the point of import.

In certain cases, such as temporary importation or inward processing, the customs administration shall require a kind of guarantee letter to secure the taxes. The amount of this guarantee shall cover all the taxes payable in the case of an importation.

There is no customs tax on trade between the EU and Turkey except for certain products (e.g. agricultural products). However, it is crucial that the imported goods are imported together with an A.TR Movement Certificate proving that the goods are in free circulation.

Turkey

In the case of FTAs, the goods must be imported with a EUR.1 certificate, giving proof of their country of origin in order to benefit from the FTA.

Turkey applies the Common Customs Tariff of the EU to third countries, except for agricultural products.

Property taxes

Buildings and land owned in Turkey are subject to an annual real estate tax at different rates.

Stamp tax

Stamp tax applies to a wide range of documents, including, but not limited to, agreements, financial statements, and payrolls. Stamp tax is levied as a percentage of the value stated on the agreements at rates varying between 0.189% and 0.948%.

Salary payments are subject to stamp tax at a rate of 0.759% over the gross amounts, whereas a lump-sum stamp tax is calculated for certain types of documents, such as the printed copies of the financial statements.

Resource Utilisation Support Fund (RUSF)

According to the RUSF legislation, any importation conducted on credit (if the payment related to the importation is not made before the actual importation) is subject to a special payment of 6% of the value of the goods to be imported.

Additionally, foreign loans obtained by Turkish resident individuals or legal entities (except for banks or financial institutions) are subject to RUSF, depending on the currency denomination and the maturity. RUSF is applicable at the following rates:

- 3% over the interest amount for the Turkish lira (TRY) denominated loan, regardless of the maturity of the loan.
- Varies between 0% and 3% over the principal amount of the foreign currency denominated loan and gold-based loans, depending on the maturity.
- 0% in the case of locally obtained loans.

Note that special exemptions may apply in cases where one is investing in certain industries.

Payroll taxes

In accordance with the Turkish tax regulations, all employees working under a resident employer are included into the local payroll. The employer withholds taxes and other duties on income at source, and the employees receive the net amount after the deductions. The income tax and the stamp tax should be declared by the employers filing the withholding tax return. *The tax tables applicable to individuals are provided in the Taxes on personal income section of Turkey's Individual tax summary at www.pwc.com/taxsummaries.*

The social security premium and the unemployment premiums should be declared by the employers filing the social security premium declaration on a monthly basis.

Income tax, stamp tax, social security contribution, and unemployment premiums are the legal deductions from the salary.

Social security contributions

Social security contributions for both the employer and the employee total 34.5% of an employee's salary; 14% for the employee and 20.5% for the employer. In addition to social security payments, unemployment contribution is 3% of the salary, 1% for the employee and 2% for the employer.

The social security ceiling is determined as TRY 10,705.50 for the period 1 January 2016 through 31 December 2016.

Branch income

Branches are taxed solely on the income derived from activities in Turkey since they are regarded as non-resident entities for Turkish tax purposes. Branch profits are subject to Turkish CIT at the rate of 20%.

The branch profit transferred to headquarters (i.e. upstream income repatriation) is subject to dividend WHT at a rate of 15%, which might be reduced if there is a bilateral tax treaty between Turkey and the country of which the principal is a resident for income tax purposes. *See the Withholding taxes section for a list of countries with which Turkey has an applicable tax treaty.*

Income determination

Inventory valuation

The weighted average and first in first out (FIFO) methods are allowed for calculating the value of year-end stock or goods sold. Last in first out (LIFO) is not permitted. Stock-count deficits are recorded as disallowable expenses, whereas stock-count surpluses are treated as income at year-end for CIT purposes. Necessary VAT adjustments should also be made accordingly.

Capital gains

No separate rules exist with respect to capital gains taxation in Turkey. Capital gains and losses are included in the determination of taxable corporate income.

See Capital gains exemption in the Tax credits and incentives section for information about an incentive that can reduce the effective CIT rate on capital gains in certain instances.

Dividend income

In dividend distribution's between Turkish resident companies, the dividend payer is exempt from WHT and the recipient is exempt from CIT.

Interest income

In principle, all interest income is subject to tax. Interest income on bank deposits denominated in both Turkish lira and foreign currency is subject to WHT. Interest income is recorded at gross, and any WHT incurred on this income is offset against CIT calculated.

Foreign income

In principle, foreign-sourced income is taxable in Turkey. However, foreign-sourced dividend income may also be subject to a participation exemption if certain conditions are fulfilled. A participation exemption for capital gains generated from a foreign subsidiary may also be available in Turkey, under certain conditions.

Other foreign-sourced income, such as royalties and interest, is fully taxable in Turkey. Partial relief from taxation is granted insofar as the foreign tax paid does not exceed the rate of tax payable for the same income in Turkey.

Although undistributed income of foreign subsidiaries should not be taxable in Turkey, controlled foreign company (CFC) rules should also be taken into consideration in this respect. *See Controlled foreign companies (CFCs) in the Group taxation section for more information.*

Deductions

Turkish CIT legislation allows a deduction for all the “ordinary and necessary expenses paid or incurred for the generation and sustenance of income during the taxable year in carrying on any trade or business”.

The general principle for tax deductibility is that the payment should be a necessary business expense and it should be properly documented in accordance with the relevant provisions of the Turkish transfer pricing regulations and those in the local tax procedural law.

Depreciation and amortisation

Fixed assets are subject to depreciation at rates determined by the Turkish Ministry of Finance (MoF), based on their useful life.

Intangible assets (i.e. licence, franchise, copyright, etc.) and goodwill are depreciated over 15 years and five years, respectively. Additionally, leasehold improvement is depreciated based on lease period.

Depreciation can be calculated by applying either the straight-line or declining-balance method (limited to 50%), at the taxpayer's discretion. The taxpayer may also change the option from declining-balance to straight-line (but not vice versa) at any time during the life of the asset. The applicable rate for the declining-balance method is twice the rate of the straight-line method, subject to certain limitations. Furthermore, in special cases, the tax authorities may determine higher depreciation rates.

Intangible assets are amortised by the straight-line method over their estimated useful lives, if objectively determinable.

Profits or losses on disposal of fixed assets (i.e. the difference between the proceeds and the written-down values) are included in taxable income in the year of disposal. If the renewal of disposed-of assets is considered necessary by the owners of the business concern, the profit accrued may be retained for a certain amount of time. After the purchase of new fixed assets, the profits may be offset against the depreciation of the new assets.

Start-up expenses

Start-up expenses are considered as deductible expenses as incurred. Also, the taxpayer has the option to capitalise such expenses and to depreciate them over five years at equal amounts.

Interest expenses

According to the amendments to the CTL, it is envisaged to make some changes regarding the deductibility of the finance expenses of companies.

A portion, yet to be determined by the Council of Ministers, of interest and similar expenses incurred on foreign resources will not qualify for deduction for CIT purposes. According to the arrangement:

- credit institutions, financial institutions, financial leasing, factoring, and financing companies shall not be subject to finance cost restrictions
- cost restrictions shall apply exclusively to the portion of liabilities that exceed a company's shareholder's equity
- restrictions shall not exceed 10% and the rate may be amended per industry by the Council of Ministers, and
- restrictions shall not apply to interest rates and similar payments added to investment costs.

Deemed-interest deduction on cash injection as capital

The Law No: 6637, which has been published in the Official Gazette dated 7 April 2015, introduced a new concept of tax incentives where Turkish resident companies are allowed a deemed-interest deduction on cash injection as capital from the corporate tax base of the relevant year.

Turkish resident companies, except for those that operate in banking, finance, and insurance sectors, will be able to benefit from such incentive.

According to the new incentive, the deductible interest amount will be calculated as follows:

- The latest 'annual weighted average interest rate applied to loans provided by banks' that is announced by the Central Bank of Turkey (14.65% for 2015) will be applied to the capital increases paid in cash and cash part of initial capital for new established entities.
- Only 50% of the calculated amount can be deducted from the CIT base.

In order to benefit from this deduction, the company should have taxable profit (i.e. the companies that have carryforward tax losses or current year tax losses are not able to benefit from this deduction).

The following capital increase alternatives are not included on the calculation or determination of the deduction amount:

- Capital increase made from capital in kind items (e.g. via real estate).
- Capital increase made during mergers, acquisitions, or spin-offs.
- Capital increase made from internal sources (e.g. legal reserves) that are booked under shareholders' equity.
- Capital increase made via borrowing from shareholders.

By the Decree of Council of Ministers (no: 2015/7910), the Council of Ministers has re-determined the deemed interest deduction rate for the following cases:

- Publicly traded companies (listed in Borsa Istanbul [BIST]): For the companies that are publicly traded in BIST at the last day of the year in which the 50% interest deduction is benefited, the rate would be increased by:
 - 25 points if the publicly traded rate of nominal/value or the amount of registered shares of the company is 50% or less (totally 75%).
 - 50 points if more than 50% of the nominal/registered shares of the company is traded in BIST (totally 100%).
- Capital increase for investments with investment incentives: In case the capital increase made in cash has been used for investments on manufacturing or industrial plants, purchase of machines or equipments required for such plants, or lands or states for building of such plants, the 50% rate has been increased by 25 points.
- Other companies: Any company that is not subject to 0% or falls under category (a) and (b) will benefit from a 50 points deduction.

The Decree reduced the rate to 0% for the capital increases made for the following cases:

- The income of company consists at least 25% of passive income (e.g. interest, dividends, rental income, license fees, capital gains obtained from sales of marketable securities).
- At least 50% of the total assets of the company consists of affiliate marketable securities, shares, and subsidiary companies.
- Invest capital or provide a loan to another company, which are limited only with the corresponding capital increase made in cash amount.

Turkey

- Investment in real estate companies (limited only with the corresponding investment amount).

Bad debt

Bad and doubtful accounts receivable are deductible under certain conditions. Amounts of the receivables collected afterwards are added to the profits of the year in which they are collected.

Charitable contributions

Donations to listed charities and for construction of schools, hospitals, and scientific research organisations are deductible at up to 5% of the company's gross profit.

Pensions and employee termination benefits

Payments for pensions and employee termination benefits are deductible for CIT purposes under certain conditions.

Fines and penalties

In principle, fines and penalties incurred due to the wrong-doings of the taxpayer or its employees are not tax deductible.

Taxes

Essentially, the CIT itself and VAT are, subject to certain exceptions, not deductible for CIT purposes.

Fees and duties paid in relation to assets of the company are, in principle, deductible in determining taxable corporate income.

Net operating losses

Corporate losses may be carried forward for five years. Losses cannot be carried back.

Payments to foreign affiliates

Charges for royalties and interest by foreign affiliates may be deductible for CIT purposes, provided that transfer pricing and thin capitalisation rules are followed (*see the Group taxation section for more information*).

Group taxation

Consolidation of the accounts of group companies for tax purposes is not allowed in Turkey since each company is regarded as a separate taxpayer.

Transfer pricing

The CTL includes transfer pricing regulations, using the OECD's guidelines as a basis. If a taxpayer enters into transactions regarding the sale or purchase of goods and services with related parties in which prices are not set in accordance with the arm's-length principle, the related profits are considered to have been distributed in a disguised manner through transfer pricing. Such disguised profit distribution through transfer pricing is not accepted as deductible for CIT purposes. The methods prescribed in the law are the traditional transaction methods described in the OECD's transfer pricing guidelines.

Thin capitalisation

According to local thin capitalisation regulation, if the ratio of the borrowings from shareholders or from persons related to the shareholders exceeds triple the shareholders' equity of the borrower company at any time within the relevant year, the exceeding portion of the borrowing will be considered thin capital and the corresponding interest will not be deductible. Accordingly, the ratio of loans received from related parties

to shareholders' equity must be no more than 3:1 in order to eliminate Turkish thin capitalisation issues.

Controlled foreign companies (CFCs)

A CFC is a company established abroad with at least 50% of the organisation controlled directly or indirectly by tax-resident companies and real persons by means of separate or joint participation in the capital, dividends, or voting rights. A CFC also must meet certain conditions (e.g. 25% or more of its gross revenue must be comprised of passive income, it must be subject to an effective income tax rate lower than 10% for its commercial profit in its home country, gross revenue of the subsidiary established abroad must be more than the foreign currency equivalent of TRY 100,000 for the related fiscal year).

The CFC's profit is included in the CIT base of the controlling resident corporation at the rate of the shares controlled, irrespective of whether it is distributed.

Tax credits and incentives

Foreign tax credit

A partial relief from income taxation is granted for the foreign tax paid that does not exceed the rate of tax payable for the same income in Turkey.

Participation exemption for dividends

There is an unconditional CIT and dividend WHT exemption for dividend income between Turkish companies. If a Turkish company has a shareholding in a foreign company, this dividend income is exempt from CIT, under certain conditions.

Exemption for income from foreign construction and repair activities

The profit from construction and repair activities carried out by Turkish corporations in foreign countries may be exempt from CIT in Turkey under the Turkish CTL. It should be noted that if loss occurs from these activities, it is not possible to deduct this loss amount from the income generated through domestic activities since deduction of a loss relating to foreign activities that are exempt from CIT in Turkey is not allowed for deduction.

Capital gains exemption

For capital gains generated from the sale of shares in a company, a 75% CIT exemption is applicable under certain conditions. This partial exemption may also be applicable for the capital gains derived from the alienation of real estate investments under certain conditions.

In the event a foreign subsidiary is sold by a Turkish company, a CIT exemption at the rate of 100% is applicable under certain conditions.

Investment incentives

The investment incentive system comprises the following elements.

Priority Investment Projects

Based on the investment incentive system, certain investment projects (e.g. testing centres; R&D projects; pharmaceutical, tourism, cultural, education, and railway investments) are deemed as 'Priority Investment Projects'.

General incentive practices

Excluding the subjects of investments that do not meet the requirements, all investments above the minimum fixed investment amount will benefit from incentive elements, regardless of regional location.

Turkey

Regional incentive practices

The industries categorised by region in the relevant Decree will benefit from incentive elements under the conditions determined for each relevant region.

Large-scale investments

Incentives are granted to all large-scale investments, although incentive size will vary depending on the investment's regional location.

Strategic investments

The related legislation defines strategic investments as well as different incentive ratios and periods for strategic investments. A new committee to be established will decide which investments are strategic within the scope of the defined criteria.

Based on the related legislation, investments in production of products that are highly dependent on imports and meet all the following criteria will be regarded as strategic investments:

- Minimum fixed investment amount should be more than TRY 50 million.
- Total domestic production capacity for a given product that is the matter of investment should be below the import amount.
- Added value to be generated with the investment should be at least 40%.
- The total import amount realised related to the invested product within the last year should be more than 50 million United States dollars (USD).

There are six main components of the investment regulation:

- Reduced CIT rate.
- VAT exemption.
- Exemption for social security premium (employer's portion).
- Customs duty exemption.
- Interest support.
- Allocation of land for investments.

Free trade zones

Free trade zones are special sites that lie geographically within the country but are deemed to be outside the customs territory. In these regions, the normal regulations related to foreign trade and other financial and economic areas are either inapplicable, partly applicable, or superseded by new regulations.

In general, activities such as manufacturing, storage, packing, general trading, banking, insurance, and trade may be performed in Turkish free trade zones. Goods moving between Turkey and the zones are treated, for all purposes, as exports or imports. However, operations within the zones are subject to the supervision of the zone management (and customs authorities), to whom regular activity reports must be submitted. Consequently, there is a requirement for zone users to maintain full accounting records (in Turkish) with respect to their activities. These accounting requirements extend to inventory records. Customs duty is levied on any unexplained inventory losses as though the goods had been imported into the country.

The right to operate in a free trade zone is conferred by an operating licence obtained from the Undersecretariat for Foreign Trade, which reviews the application for conformity with the objectives and types of activity specified by the Economic Affairs Coordination Council.

Portfolio investment income

Under the WHT regime introduced on 1 January 2006, certain portfolio investment income (e.g. capital gains derived from listed equities acquired after 1 January 2006 or capital gains or interest from Turkish local government bonds issued after 1 January

2006) derived by eligible entities are subject to 0% WHT. However, the WHT rate is 10% for other resident and non-resident entities. In the case of repo income, 15% WHT should be applied for all non-resident investors (the provisions of double tax treaties [DTTs] are reserved).

Furthermore, 0% WHT is applicable for all type of investors with respect to capital gains derived from listed equities on the Istanbul Stock Exchange (ISE) purchased after 1 January 2006 (excluding securities investment trust shares), income derived from transactions on equity index futures carried out under Turkdex, warrants with underlying of equities traded on ISE, and participation shares of investment funds that intensively invest in listed shares (equity intensive funds).

Under the *Communiqué* No: 277 of Income Tax Law, the following qualify for the eligibility criteria for 0% WHT:

- Turkish resident capital corporations (limited liability companies, joint stock companies, and commandite companies whose capital is divided into shares).
- Non-resident corporations that have the same characteristics as Turkish capital corporations.
- Turkish investment funds (regulated in accordance with the Capital Markets Board).
- Non-resident investment funds similar to Turkish investment funds.
- Those non-residents similar to Turkish investment funds and trusts that engage in investment in securities and other capital markets instruments as their only business in Turkey to derive income and capital gains from these instruments and to exert the rights attached to these instruments.

Under the aforementioned *Communiqué*, the investor should be an institutional portfolio investor. However, what is meant by 'institutional' is not crystal clear. It seems to us that the intention of the MoF is to treat all non-resident portfolio investors (other than the individuals) as institutional portfolio investors. The *Communiqué* does not have a principle based approach; rather, it enlists a number of 'institutional investor' examples, such as limited liability partnerships (LLPs), sovereign funds, investment funds, investment institutions, and investment companies.

In terms of interest income from deposits, the WHT rates on interest income from bank deposits (excluding interbank deposits and money market operations of intermediaries) differ depending on the currency (Turkish lira or the foreign exchange) and maturity, which are as follows:

- Interest income derived from foreign exchange deposit:
 - In current call accounts and deposit accounts with maturity of less than six months (including six months): 18%.
 - In deposit accounts with maturity of less than one year (including one year): 15%.
 - In accounts with maturity of more than one year: 13%.
- Interest income derived from a Turkish lira deposit:
 - In current call accounts and deposit accounts with maturity of less than six months (including six months): 15%.
 - In deposit accounts with maturity of less than one year (including one year): 12%.
 - In accounts with maturity of more than one year: 10%.

The withholding will be applied by local intermediary banks, brokerage houses, or local custodian banks, instead of the conventional self-declaration mechanism, and this withholding will be the final taxation in Turkey for both non-residents and Turkish individuals.

On the other hand, certain portfolio investment income (e.g. capital gains from unlisted shares) is taxed under permanent tax rules. In some cases, a non-resident fund may need to file a tax return within 15 days following the sale of securities and subject to a

Turkey

32% effective tax rate. However, DTTs may provide relief except in special cases. Certain income, such as interest and dividends, are usually taxed via the WHT regime, so no filing is required for a non-resident investor.

Moreover, Turkish corporate bonds that are issued after 1 January 2006 and sold outside of Turkey are not taxed under the WHT regime, and rather taxed as per permanent tax rules. The WHT rates on interest income from such corporate bonds issued by all type of resident corporations (including Turkish banks and corporations) vary depending on the maturities of the bonds and are regressive. The WHT rates are as follows (please note that DTT provisions are reserved):

- 10%, if maturity is under one year.
- 7%, if the maturity is between one and three years (including one year).
- 3%, if the maturity is between three and five years (including three years).
- 0%, if the maturity is five or more than five years (including five years).

The interest income derived from bonds that are issued by the Turkish Treasury outside of Turkey (i.e. Eurobonds) is subject to a 0% WHT. Capital gains derived by non-residents from Turkish Eurobonds issued by the Treasury are exempt from capital gains taxation.

The responsibility to apply this WHT belongs only to the issuer of the corporate bond, regardless of the fact that a payment agent exists or not, and the WHT liability of the issuer is not disregarded even if the payment agents make any withholding.

Research and development (R&D) activities

In the last decade, the Turkish Parliament has enacted several regulations to provide incentives for R&D activities in Turkey. Tax incentives and support mechanisms that are provided to companies carrying out R&D and innovation activities in Turkey are as follows:

- R&D legislation:
 - Law No. 5520 on Corporate Income Tax.
 - Law No. 5746 on Support of R&D Activities.
 - Law No. 4691 on Technology Development Zones.
- Institutions providing cash supports on project basis:
 - Scientific and Technological Research Council of Turkey (TÜBİTAK).
 - Turkish Technology Development Foundation (TTGV).
 - Ministry of Science, Industry and Technology.
 - Small and Medium Industry Development Organization (KOSGEB).
 - Development Agency.
 - European Commission.

Law No. 5520 on Corporate Income Tax (Article 10/1-a)

R&D deduction (100%)

All eligible innovation and R&D expenditures made in R&D and innovation projects approved by the MoF can be deducted from the CIT base at a rate of 100% as an R&D deduction.

Law No. 5746 on Support of R&D Activities

R&D deduction (100%)

All eligible innovation and R&D expenditures made in technology centres, R&D centres (which must employ at least 30 full-time equivalent R&D personnel), R&D and innovation projects supported by governmental institutions, foundations established by law, or international funds can be deducted from the CIT base at a rate of 100%.

Income tax exemption (80%-90%-95%)

The salaries of R&D and support personnel, at a rate of 95% for the personnel with a PhD degree or master's degree on basic sciences, 90% for the personnel with a master's degree or undergraduate degree on basic sciences, and 80% for others, is exempt from income tax.

Social security premium support (50%)

Half of the employer portion of social security premiums for R&D and support personnel (maximum of 10% of number of full-time R&D personnel) will be funded by the MoF for each R&D and support personnel.

Stamp tax exemption

The documents prepared for the R&D activities, including the payrolls of R&D and support personnel, are exempt from stamp tax.

Law No. 4691 on Technology Development Zones*CIT exemption*

The profits derived from the software activities or products developed as a result of the R&D activities in technoparks are exempt from CIT.

Income tax exemption (100%)

The salaries of R&D and support personnel carrying out R&D and software development activities in technoparks are exempt from income tax until 31 December 2023. The salary for the activities other than software development and R&D activities cannot benefit from income tax exemption.

Social security premium support (50%)

Half of the employer portion of social security premiums for R&D and support personnel (maximum of 10% of number of full-time R&D personnel) will be funded by the MoF for each R&D and support personnel.

Stamp tax exemption (only on payrolls)

The payrolls prepared for the R&D activities are exempt from stamp duty.

VAT exemption

Deliveries of software and services (system management, data management, business applications, internet, mobile and sector applications, military command control applications) arising from software development activities by the companies operating in technoparks are exempt from VAT until 31 December 2023.

Withholding taxes

There is no WHT on payments to resident corporations by other resident corporations, except for a 3% WHT on progress payments to contractors, both domestic and foreign, within the scope of construction work spanning more than one calendar year.

The local WHT rates are as follows:

Income derived by non-resident individuals or corporations not constituting a PE in Turkey	WHT (%)
Rental from immovable assets	20
Leasing of goods (within the scope of the conditions regulated under Turkish Financial Leasing Law No. 3226)	1
Royalties (e.g. on patents, copyrights, licence)	20
Professional services	20

Turkey

Income derived by non-resident individuals or corporations not constituting a PE in Turkey	WHT (%)
Petroleum services	5
Wages & salaries (progressive rates are applied for employees' income taxes)	15 to 35
Interest on loan arrangements:	
Interest payments made to foreign banks and corporations that are authorised in their own jurisdictions and customarily lend not only to related parties but also to third parties	0
Interest payments made in relation to securitisation loans and subordinated loans	1
Other loans	10
Interest on time deposits ***	10 to 18
Reverse-repo income derived from bonds	15
Income derived by resident eligible entities *	WHT (%)
Capital gains on Treasury bills and domestic government bonds issued after 1 January 2006	0
Interest income on Treasury bills and domestic government bonds issued after 1 January 2006	0
Capital gains from listed equities purchased after 1 January 2006	0
Income derived by other entities and individuals	WHT (%)
Capital gains on Treasury bills and domestic government bonds issued after 1 January 2006	10
Interest income on Treasury bills and domestic government bonds issued after 1 January 2006	10
Capital gains from listed equities purchased after 1 January 2006 (excluding capital gains from securities investment trust shares)	0
Capital gains from equities of securities investment trusts purchased after 1 January 2006	10
Participation shares of Turkish investment funds	WHT (%)
Eligible entities * (both residents and non-residents)	0
Other entities and individuals ** (both residents and non-residents)	10

* See *Portfolio investment income in the Tax credits and incentives section*.

** Income derived from the redemption of participation certificates that continuously invest at least 51% of their assets in equities that are registered on the ISE are not subject to WHT if they are held for at least one year.

Income derived from participation shares of investment funds that intensively invest in listed shares (equity intensive funds) are subject to 0% WHT.

*** WHT on interest income derived from time deposits depends on the currency (i.e. Turkish lira or foreign currency deposits) and the maturity (see *Portfolio investment income in the Tax credits and incentives section*).

Please refer to the following tables for local WHT on dividends, interest, and royalties, respectively.

Turkish WHT on dividends

Dividend distributions to individuals and to non-resident persons who are shareholders are subject to WHT at a local rate of 15%. This rate might be reduced for non-resident shareholders in the presence of a tax treaty. Please note that dividend distributions to resident entities and branches of non-resident entities are not subject to WHT.

Notes

- The local rate is 15% for dividends. Unless a lower rate is stated in the Agreement, the local rate is applied.
- As per the provisions of the protocol amending the agreement, the rate may be (partially or wholly) reduced:
 - For the Netherlands: to 10%, as long as, under the provisions of the Netherlands Company Tax Act and to the future amendments thereto, a company that is a resident of the Netherlands is not charged tax with respect to dividends the company receives from a company that is a resident of Turkey.
 - For Belgium: to 10%, as long as, under the provisions of the Belgian laws and of the future amendments thereto, a company that is a resident of Belgium is not charged tax with respect to dividends the company receives from a company that is a resident of Turkey.
 - For Austria: to 5%, if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends, provided that such dividends are exempt from tax in Austria.
 - For Ireland: to 5%, where the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the voting power of the company paying the dividends. 15% in all other cases.
- Subject to 5% of the gross amount of the dividends if the recipient is the government, or a public institution that is wholly owned by the government or its political subdivisions, or local authorities of the United Arab Emirates.

Turkey

4. The tax rate shall be 15% where the amount of the Turkish tax imposed on the income of the company paying dividends is less than 40% of such income derived in the accounting period ending immediately before the date when such dividends become payable.
5. The income should be subject to full corporate taxation in the hands of the Turkish tax-resident subsidiary.
6. The provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
7. If the beneficial owner of the dividends is a resident of Saudi Arabia, the tax so charged shall not exceed 5% of the gross amount of the dividends provided: (i) the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the Turkish company paying the dividends or (ii) the beneficial owner is a central bank or an entity that is wholly owned by the government.
8. In case of Turkey, the tax rate shall not exceed 5%, to the extent that they are paid out of profits that have been subject to full rate of CIT in Turkey (i.e. without benefiting from tax exemption).
9. The rate of the income tax shall not exceed 5% if it is derived by the Government Pension Fund (*Statens Pensjonsfond*) or by the Government Social Security Fund (*Sosyal Guvenlik Fonu*), provided that such dividends are exempt from tax in the contracting state where the beneficial owner is a resident.
10. The treaty-reduced rate of 5% shall apply if such dividends are exempt from tax in the contracting state of which the beneficial owner is a resident.
11. As per the provisions of the agreement, the rate may be reduced to 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends, provided that a relief from Swiss tax is granted for such dividends by way of an abatement of the profits tax in proportion corresponding to the ratio between the earnings from participations and the total profits or by way of an equivalent relief.
12. As per the provisions of the agreement, the rate may be reduced to (i) 5% of the gross amount of the dividends if the Turkish company (other than a partnership) that directly holds at least 10% of the capital of the Australian company receives the dividends or (ii) 5% of the gross amount of dividends that are subject to Turkish Corporate Income Tax at the full rate if the Australian company (other than a partnership) that directly holds at least 25% of the capital of the Turkish company receives the dividends. Regardless of these, if the dividends are taxed in Australia, Turkey could tax the dividends at a rate not exceeding 15%.
13. As per the provisions of the agreement, the dividends paid by a company that is a resident of Malta to the Turkish resident beneficial owner shall be exempt from any tax in Malta that is chargeable on dividends in addition to the tax chargeable in respect of the profits of the company. Furthermore, Malta tax chargeable with respect to distributed profits of the company shall not exceed 15% of the gross amount if the distributed profits consist of gains or profits earned in any year in respect of which that company is in receipt of any benefit under the provisions regulating aids to industries in Malta, provided that the receiving company submits returns and accounts to the taxation authorities of Malta in respect of its income liable to Malta tax for the relative year of assessment.

Notes

- The local rate of 10% will be applied in the event a higher rate is stipulated in the agreement.
- Provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
- A rate of 10% if the loan or other debt claim is for a period exceeding two years; 15% in all other cases.
- A rate of 10% if the loan is taken for a period exceeding two years; 15% in all other cases.
- A rate of 10% if the loan/credit is taken from a financial institution; 15% in all other cases.
- A rate of 10% if the loan is taken from a bank or a financial institution; 15% in all other cases.
- A rate of 10% if the credit/loan is taken from a bank, financial or savings institution, insurance company; 15% in all other cases.
- A rate of 7.5% if the loan is taken from a financial institution; 10% in all other cases.
- A rate of 10% if the interest is the result of a loan provided/given by a bank or if the interest is paid in return for an article of merchandise, or equipment given to the contracting state on credit; 15% in all other cases.
- A rate of 10% if the loan is taken from a financial institution, including insurance companies; 15% in all other cases.
- A rate of 10% for the use of, the right to use, or the sale (contingent on the productivity, use, or disposition) of any copyright of literary, artistic, or scientific work, including royalties in respect of motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process, or for information concerning, industrial, commercial, or scientific experience; 5% for the use of or the right to use industrial, commercial, or scientific equipment.
- A rate of 5% for the use of industrial, commercial, or scientific equipment; 10% in all other cases.
- A rate of 15% for patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 10% for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.
- A rate of 5% in respect of a loan or credit made, guaranteed, or insured for the purposes of promoting export by the *Oesterreichische Kontrollbank AG* or a similar Turkish public entity the objective of which is to promote the export; 10% if the interest is derived by a bank; 15% in all other cases.
- If the beneficial owner of the 'income from debt claims' is a resident of Saudi Arabia, the tax so charged shall not exceed 10% of the gross amount of income.
- A rate of 10% in respect of a loan or other debt claim for a period exceeding two years or if the interest is received by a financial institution; 15% in all other cases.
- Interest arising in one of the contracting states and paid to the government of Turkey or the Central Bank of Turkey shall be exempt from income taxes in the contracting state. Similarly, interest arising in the Republic of Turkey and paid to the government or the Central Bank of the other contracting state shall be exempt from income taxes in Turkey.
- Interest arising in Turkey and paid to the government of Canada or to the Bank of Canada shall be exempt from Turkish tax. Similarly, interest arising in Canada and paid to the government of Turkey or to the Central Bank of Turkey (*Türkiye Cumhuriyet Merkez Bankası*) shall be exempt from Canadian Tax.
- The rate of the income tax shall not exceed (i) 10% if the interest is paid to a bank (also note that in the case of Turkey, a lower rate of 0% may apply for eligible financial institutions' and banks' loans under the domestic regulation) or (ii) 5% if the interest is paid to the Norwegian Government Pension Fund (*Statens Pensjonsfond*), the Norwegian Guarantee Institute for Export Credits (*Garantiinstituttet for Eksportkredit*), the Turkish Social Security Fund (*Sosyal Güvenlik Fonu*) and the Eximbank of Turkey (*Türkiye İhracat Kredi Bankası*); 15% in all other cases.
- The rate of the income tax shall not exceed 10% if the interest is paid to a bank (also note that in the case of Turkey, under the domestic regulation, a lower rate of 0% may apply for the loans provided by eligible financial institutions and banks); 15% in all other cases. The interest shall be exempt from income taxes in the contracting state where it arises, if the payment is made to the government of Turkey, to the Central Bank of Turkey (*Türkiye Cumhuriyeti Merkez Bankası*), to the government of New Zealand, or to the Reserve Bank of New Zealand.

21. A rate of 5% of the gross amount of the interest paid in respect of a loan or credit made, guaranteed, or insured for the purposes of promoting export by an Eximbank or similar institution, the objective of which is to promote the export; 10% if the interest is derived by a bank; 10% in all other cases.
22. A rate of 15% from the use of, or the right to use, trademarks; 10% in all other cases.
23. A rate of 5% in respect of loans or credits that are guaranteed, insured, and provided for the purposes of promoting export by the Finnish Export Credit or FINNVERA and the Turkish public institutions the objective of which is to promote exports; 10% if the interest is derived by a bank; 15% in all other cases.
24. A rate of 10% if the payment is made to a bank; no taxation arises if the payment is made to the Central Bank of Mexico; no taxation arises if the payment is made to Banco Nacional de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C., or Banco Nacional de Obras y Servicios Públicos S.N.C. where the maturity of loan is more than three years; 15% in all other cases.
25. For the interest income derived by governments or central banks of the contracting states, no WHT applies.

Anti-tax haven provisions

According to the law, all sorts of payments made to corporations (including branches of resident corporations) that are established or operational in countries that are regarded by the Turkish Council of Ministers to undermine fair tax competition (through taxation or other practices) may be subject to taxation in Turkey through withholding at a rate of 30%.

In the meantime, the Turkish Council of Ministers has not yet determined which countries receiving payments are considered 'tax havens'.

Tax administration

All Turkish taxes are imposed under laws drafted by or with the involvement of the Turkish MoF and are promulgated by the Turkish Parliament. The central government, acting through the MoF, imposes most of them, although local authorities have certain rights over some minor transaction charges. Tax procedures are governed by the Turkish tax procedural law.

Taxable period

The taxable period is the calendar year. Note that a different fiscal year is also allowed.

Tax returns

A self-assessment system is used in Turkey.

In principle, residents and non-resident entities having a PE in Turkey are obligated to be registered for all taxes in Turkey (e.g. CIT, VAT, WHT, stamp tax) and file annual CIT returns.

The last date of submission of the CIT return is the 25th day of the fourth month following the fiscal year-end. This date will be 25 April if CIT returns are filed on a calendar-year basis.

Payment of tax

Taxable income is declared on a quarterly-basis as advance tax on the 14th day of the second month following each quarter, and corresponding tax is payable on the 17th day of the same period. Advance CIT paid is offset against the final (i.e. fiscal year-end) CIT calculated in the annual CIT return.

The last date of payment of CIT is the 30th day of the fourth month following the fiscal year-end.

Tax audit process

The tax authorities in Turkey do not have a regular audit cycle for every taxpayer. Tax audits are usually performed based on selection through risk assessment software, where they can conduct either sector-specific or issue-specific audits.

Turkey

Statute of limitations

The Turkish tax system is based on self-assessment, and there is no procedure to agree the filed tax returns with the tax authorities that can prevent further inspections. Tax returns filed by companies remain open to tax inspection until the end of the five-year statute of limitations according to the provisions of Turkish Tax Procedural Law.

Topics of focus for tax authority

The tax authority has recently inspected companies for the following topics:

- Transfer pricing.
- Capital decrease.
- Loss compensation fund.
- Partial spin-off.
- Thin capitalisation.

Corporate income tax certification

In Turkey, a special kind of tax control mechanism is established called ‘corporate income tax certification’. Under this mechanism, the tax authority accepts accounts and tax returns of taxpayers whose accounts are audited and certified by Sworn Fiscal Advisors (SFAs) to be true and correct unless proved to be incorrect. On the other hand, the MoF has announced that those companies that do not have their tax returns certified as such will be on the priority list for tax inspection. The Ministry sets standards of work to be done for any taxpayer wanting to use an SFA. At the end of each year, SFAs have to prepare a comprehensive report to be submitted to the MoF and to certify the accuracy of the CIT return.

The work is carried out over the statutory financials that are subject to tax calculations. Note that this service is not of a ‘statutory audit’ nature, technically it is ‘non-audit assurance’ work.

The tax certification process helps to identify and take corrective measures against erroneous applications that may otherwise be detected only upon a tax investigation by the Turkish MoF.

Other issues

Intergovernmental agreements (IGAs)

Following the negotiations between Turkey and the United States, Turkey has been included on the list of jurisdictions that have reached agreement in substance as of 3 June 2014, and Turkey was regarded among the countries that will sign the Model 1 IGA. On and after 3 June 2014, Turkey and the United States had further negotiations and infrastructure tests, which were finalised by the beginning of July 2015, and the agreement was signed on 29 June 2015.

The agreement is almost in-line with the latest version of the Model 1 IGA and Annexes (version: 6 July 2014). By the agreement, if Turkey could not finalise the internal legal procedures before 30 September 2015, the Internal Revenue Service (IRS) agreed to continue to treat each Turkish financial institution as complying with the Foreign Account Tax Compliance Act (FATCA) and not subject to FATCA withholding to the extent that Turkey: (i) notifies the IRS that the internal procedures could not be finalised by 30 September 2015, along with the related information about the reasoning of such delay, and (ii) provides guarantee that the internal procedures issues will be resolved within a reasonable period, not after 30 September 2016. Accordingly, it is now possible that Turkish financial institutions will be able to make the fiscal year 2014 reporting by 30 September 2016 (along with fiscal year 2015) if the above mentioned clause is applied.

Turkey, as a member of G-20 and OECD has officially stated that it will be in compliance with OECD's Common Reporting Standards (CRS). Accordingly, the model agreement has been translated into Turkish, and Turkish tax authorities are working to determine the regulatory steps to be taken along with implementation requirements. However, there is no agreement signed with other countries yet. Also, there is no local law or secondary legislation currently in force.

For up-to-date information

For up-to-date information on the most recent and significant developments in Turkish tax regulations, please refer to the tax bulletins added to our tax portal, *Vergi Portalı*, which can be accessed at *Vergiportalı.com*.

Significant developments

As per recent amendments to the tax legislation of Turkmenistan, entities that submit simplified financial statements are permitted to pay the corporate income tax (CIT) biannually in the form of advance payments. The advance payments are calculated based on the tax result of the prior period. Calculation of the advance amounts for the first month of the biannual period should reflect the taxes of the last month of the prior biannual tax period and the advance payments for the remaining five months shall be calculated based on the 1/6 ratio of the tax amount of the prior biannual period for each remaining month.

Starting from 1 May 2016, new customs tariffs for automobiles (under nomenclature codes of 8702, 8703, 8704, and 8705) are introduced. New tariff rates vary depending on the age of automobiles, and rates are applied on a progressive scale. For instance, customs duties for brand new cars and cars less than one-year old are established as 2% from customs value as well as an additional 0.1 United States dollars (USD) per cubic centimetre of engine volume. However, for cars with an age of more than three years but less than four years, the tariff rate is established as 50% and USD 1.5 per cubic centimetre of engine volume.

Taxes on corporate income

Residents of Turkmenistan are subject to CIT on worldwide income; non-residents are subject to CIT only in respect of their Turkmenistan-sourced income. The CIT base is determined as gross income less allowable deductions.

Branches of foreign legal entities are subject to a 20% CIT, whereas Turkmen legal entities are subject to an 8% CIT (or 2% CIT in cases where the company qualifies as a small or medium enterprise).

Companies involved in oil and gas operations are subject to a 20% CIT, irrespective of the legal status/ownership structure.

Entities where the government holds more than 50% of shares are subject to CIT at the rate of 20%.

Special purpose duty for improvement of urban and rural territories

A special duty aimed at improving urban and rural territories is imposed on registered entities (e.g. legal entities and branches). The duty applies at 1% of the taxable base for CIT purposes. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this duty.

Contributions to Agriculture Development and Ashgabat City Development Funds

The contributions to the Agriculture Development Fund and Ashgabat City Development Fund are outside of the general tax legislation (Tax Code) and are provided for by

specific decrees. Permanent establishments (PEs)/branches of foreign legal entities are subject to these contributions on the same terms as local legal entities.

Contribution to the Ashgabat City Development Fund only applies to entities located in Ashgabat City.

The base for the contributions is comprised of the accounting income. The contribution rate for the Agriculture Development Fund is 3%, and the contribution rate for the Ashgabat City Development Fund is 0.5%.

Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from these contributions.

Corporate residence

Legal entities are treated as residents for CIT purposes if they are established in accordance with Turkmenistan law or their place of effective management is located in Turkmenistan.

Permanent establishment (PE)

The general definition of a PE under domestic legislation is similar to the one per the Organisation for Economic Co-operation and Development (OECD) model convention. A PE is a permanent place of the foreign legal entity in Turkmenistan through which it, fully or partially, conducts entrepreneurial (commercial) activity, including that through an authorised person.

Other taxes

Value-added tax (VAT)

VAT is generally payable at the rate of 15%. A zero-rate applies to exports of goods (except for oil and gas) and international transport services. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this tax.

The tax base is sales turnover including excise tax. If a sale is made by state-fixed prices, then the tax base is the respective sales turnover including VAT and excise tax. The amount of input VAT incurred may be offset against the amount of output VAT. The amount of input VAT related to capital expenditures should be capitalised.

Customs duties

The import of goods into Turkmenistan is generally subject to 2% customs duty. The taxable base is determined as the customs value of imported goods. There is a list of certain items that are subject to specific customs duty (i.e. around 50 items), and the rates of specific customs duties may vary from 5% (e.g. products from cement) to 100% (e.g. carbonic acid) depending on the type of imported goods. In most cases, the customs duty is set on an *ad valorem* basis. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

Excise taxes

Excise tax is paid on goods or products that are considered in the list of excised goods or products. Normally, excised goods consist of alcoholic beverages, tobacco products, and automobiles. Excise rates vary based on the type of goods as well as by domestic production or import.

Property tax

Property tax in Turkmenistan generally applies at the rate of 1% on the average annual net book value of fixed assets and average annual value of tangible assets

Turkmenistan

used for business purposes and located in Turkmenistan. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this tax.

Transfer taxes

There are no transfer taxes in Turkmenistan.

Stamp taxes

Although state duties of various amounts set forth by the government may apply to certain actions (e.g. branch registration), there is no unified stamp tax/duty mechanism as normally practiced in other countries.

Subsurface-use tax

Subsurface-use taxpayers are legal entities and individual entrepreneurs extracting natural resources and using land or subsoil waters for the extraction of chemical products. This tax does not normally apply to contractors and subcontractors operating under the umbrella of the petroleum law.

Taxable operations include the sale of natural resources extracted by taxpayers and utilisation of natural resources for consumption. Tax rates vary depending on the goods being extracted. Natural or associated gas extraction is taxed at 22%, and crude oil extraction is taxed at 10%. Tax rates for other mineral resources vary depending on profitability (internal rate of return) from 0% to 50%.

Payroll taxes

Employers are obligated to withhold 10% personal income tax (PIT) as well as 2 manats (TMT) special purpose duty for improvement of urban and rural territories from employees' salaries and compensations and pay it to the State Budget on monthly basis.

Pension insurance payments

Pension insurance is payable by employers at 20% of the total remuneration provided to local employees. Additional 3.5% obligatory professional pension insurance is levied on employers with respect to employees who work under hazardous conditions. Employees may participate in a voluntary pension insurance, the minimum rate for which is established at 2% of total remuneration. Income paid to expatriate employees should not be subject to the pension insurance payments.

Advertising levy

An advertising levy is imposed on the amount of expenses on commercial advertising and is to be paid quarterly at the rate of 3% to 5%, depending on the location of the payer within Turkmenistan. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this levy.

Branch income

Branches pay CIT at the rate of 20%.

Branches are taxed on profits received from activities in Turkmenistan. The gross income is reduced for expenses incurred (both inside and outside of Turkmenistan) in relation to the activities in Turkmenistan. The procedure for determining the taxable base for branches is generally similar to the one for Turkmen legal entities.

Branches subject to the standard tax regime also pay and file returns with respect to the other taxes described in this summary.

Income determination

Inventory valuation

Inventory is valued at cost, including costs relating to its acquisition. The law permits the use of the weighted average or first in first out (FIFO) methods for tax purposes.

Capital gains

Capital gains are taxable as normal business income in Turkmenistan.

Dividend income

Generally, dividend income received by residents and non-residents from Turkmen taxpayers is subject to taxation at the source of payment at the rate of 15%.

Dividend income received by residents from non-Turkmen taxpayers is subject to CIT.

Inter-company dividends

The Tax Code provides for relief from economic double taxation of inter-company dividends.

The withholding tax (WHT) rate on dividends payable by Turkmen legal entities to their foreign shareholders may be reduced under applicable double tax treaties (DTTs).

Technically, Turkmen branches of foreign legal entities may also be subject to 15% WHT on repatriation of income to their head offices. However, if the head office collects the income from its clients directly to its bank account abroad, the mechanism of collecting the dividend tax is unclear.

Interest income

Turkmenistan-sourced interest income received by non-residents that do not have PEs in Turkmenistan is subject to WHT of 15%. The above rate may be reduced under the applicable DTTs.

Interest income received by residents is subject to CIT.

Foreign income

A resident company is subject to tax on its worldwide income (including capital gains). There are no provisions for tax deferrals in Turkmenistan tax legislation.

Deductions

In general, taxpayers may deduct expenses paid or accrued during the year in connection with their business and aimed at income generation. All expenses must be substantiated by documentary proof.

The deduction of certain expenses is subject to specific ceilings. Such expenses include representation expenses, which are deductible at up to 1% of gross income. Furthermore, deductible norms for business travel expenses are established periodically by the government.

Depreciation

Tax depreciation is based on accounting depreciation. Depreciation is accrued based on the straight-line method. Accelerated depreciation is also allowed based on specific consent of the Ministry of Finance. A Presidential Decree establishes the maximum depreciation rates, ranging from 5% to 25%, for five different groups of assets.

Generally, for the purposes of CIT, depreciation accrued is deductible. Fixed assets acquired free of charge as well as assets of non-commercial legal entities, budget

Turkmenistan

organisations, and public associations should be excluded from depreciable assets for CIT purposes, even if they are used for generating income.

Fixed assets provided under operational lease shall be depreciated by the lessor. Fixed assets provided under financial lease shall be depreciated by the lessee.

Goodwill

There are no provisions for goodwill in Turkmenistan tax legislation.

Start-up expenses

Pre-incorporation costs are generally non-deductible.

Interest expenses

Interest expense occurring from debt instruments of any kind should be deductible for CIT purposes, provided that the purpose of the underlying debt relates to the entrepreneurial activity of the taxpayer.

Interest expense incurred by a foreign legal entity abroad and recharged to its branch in Turkmenistan is generally not deductible unless specifically addressed by applicable DTTs.

Bad debts

The Tax Code permits a taxpayer to include provisions for uncollectable debts as well as losses incurred as a result of expiration of the collection period for accounts receivable.

Charitable contributions

There are no specific restrictions on deductibility of charitable contributions. However, they may be disallowed under the general restriction of non-business related deductions.

Repair and maintenance expenses

Deductible expenditures for the repair of fixed assets shall be comprised of the cost of spare parts and consumable materials used for repair, remuneration of employees carrying out the repairs, and other expenditures associated with such repairs, including payments to third parties for the purpose of such repairs.

Research and development (R&D) expenses

R&D costs (including those that produced no positive result) shall be subject to deduction from gross revenue, except for costs associated with the purchase of fixed assets, their installation, and other costs of a capital nature.

Fines and penalties

Fines, penalties, and other financial sanctions (except for tax-related ones) are deductible for CIT purposes.

Taxes

For CIT purposes, the following taxes are deductible: property tax; subsurface-use tax; levies established by the Tax Code (except the special-purpose duty for the improvement of urban and rural territories); accrued amounts of VAT in selling goods, performing work, and rendering of services; and amounts of excise tax included in the price of sold excisable goods by manufacturers of such goods.

Net operating losses

Loss is defined as excess of allowable deductions over gross revenue. Losses shall be carried forward and deducted in subsequent tax (reporting) periods, but not for more than three years. Losses cannot be carried back.

Payments to foreign affiliates

Administrative and management expenses incurred by the head office of a branch in Turkmenistan are not deductible at the branch level.

Group taxation

There is no group taxation in Turkmenistan.

Transfer pricing

The Turkmenistan Tax Code contains provisions concerning state supervision of transfer pricing. According to these rules, the tax authorities monitor and control transfer pricing of certain types of transactions, including transactions between related parties, foreign trade operations, and transactions where the tax authorities during tax audits perceive considerable deviation from the market price (i.e. more than 20%).

Thin capitalisation

There are no provisions for thin capitalisation in Turkmenistan tax legislation.

Controlled foreign companies (CFCs)

Turkmenistan tax legislation does not have provisions covering CFC rules.

Tax credits and incentives

Tax and investment incentives may be negotiated on a case-by-case basis. The President has often issued special decrees granting taxation exemptions and other privileges to specific investors. However, since adopting a new edition of the Tax Code in 2004, such practice has been significantly reduced.

Foreign tax credit

Foreign tax credits are available to tax residents of Turkmenistan based on the provisions of the respective tax treaties. The tax credited shall not exceed the tax liability computed in accordance with Turkmenistan regulations.

Withholding taxes

Turkmenistan-source income generated by a foreign legal entity that has no PE in Turkmenistan generally is subject to WHT at the source of payment at 15% (6% for income from the lease of sea vessels and aircraft).

Relief may be available for WHT if a foreign entity is a resident of a country that has a valid DTT with Turkmenistan and if the foreign entity complies with certain administrative procedures.

Currently, Turkmenistan has only a few DTTs in force. Turkmenistan is a successor to a number of DTTs concluded by the USSR, while some treaties were concluded and ratified by the government of Turkmenistan. The countries listed below are considered to have valid tax treaties with Turkmenistan:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Armenia	5/15 (1)	10	10
Austria *	0	0	0
Bahrain	10	0/10 (6)	10

Notes

- 5% where beneficial owner holds at least 25% of the authorised capital of the company paying the dividends.
- 0% where one of the following conditions is met: (i) interest paid to the government of the other contracting state or interest paid in respect of a loan guaranteed by that other state or by an institution authorised by that state; (ii) interest from commercial debt-claims relating to instalment payments for supplying merchandise, goods, or services; (iii) interest on loans, not represented by bearer instruments, from banks; or (iv) interest on cash deposits, not represented by bearer instruments, with banks, including public credit institutions.
- 5% where beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
- Interest arising in a contracting state and paid to, or on loans guaranteed or insured by, the government or a local authority thereof, the Central Bank, or any financial institution wholly owned by the government of the other contracting state, shall be exempt from tax in the first-mentioned state.
- Interest on bank credits and loans and interest on commercial credits arising from sources located in one of the states and received by a resident of the other state shall not be taxable in the first state.
- 0% where interest is paid by the governments, Central Bank, or National Bank of the contracting states.
- 0% where the loan has been guaranteed by the state or by an organisation authorised by it for that purpose.
- 0% where interest is paid by government, a political sub-division, or a local authority of the other contracting state.
- Interest paid by government, ministries, other governmental institutions, municipalities, Central Bank, and other banks wholly owned by the government of the other contracting state shall be exempt from tax.
- 0% where the recipients of the interest are governments of contracting states or any governmental body, as well as the Central Banks ('the bank of banks' of a contracting state), a state export or import credit underwriting organisation, or another similar organisation to which, in accordance with the law of a contracting state, the relevant rights were delegated.

Tax administration

Taxable period

The taxable period comprises a calendar year (i.e. 1 January to 31 December).

Tax returns

Reports are generally filed quarterly within the month following the reporting quarter. Annual income tax declaration and financial statements of branches of foreign legal entities are due by 20 March of the year following the reporting one.

Tax agents must file WHT reports not later than the 20th day of the month following the one when the respective tax liability occurred.

Payment of tax

Advance CIT payments under the standard tax regime are made before the 13th and 28th days of each month (unless agreed otherwise with tax authorities). Final payments upon results of the first quarter, first half-year, nine months, and tax year are made within five days from the reporting deadlines.

Under the Petroleum Law tax regime, CIT is reported and paid once annually based on dates indicated in the respective Product Share Agreement (PSA).

Tax audit process

Tax audits may be of two types: ‘cameral’ (preliminary) and ‘documentary’.

Cameral tax audits are performed at the location of tax authorities within 30 days after submission of tax returns and financial statements with the aim of monitoring their accuracy and completeness. The tax authorities may request the taxpayer to amend the tax return(s) if they have revealed mistakes or inconsistencies therein.

Documentary tax audits are conducted based on tax authorities order aimed at verification of the tax returns submitted by the taxpayer. During such audits, the tax authorities review the accounting records, copies of tax returns, and source documents as required. Tax authorities are to notify the taxpayer about the upcoming tax audits at least five days prior to the start of the audit. However, in cases when there is sufficient evidence of tax evasion, the tax authorities may initiate the tax audit without prior notice.

Scheduled documentary tax audits are usually carried out once in three years. There can also be un-scheduled tax audits (e.g. in case of liquidation of the enterprise) and counter tax audits (to review transactions with the enterprise’s supplier/customer, which is under the scheduled tax audit).

In cases when tax violations are revealed during tax audits, taxpayers should make necessary corrections to address those and pay respective taxes/obligatory payments and late payment interest within five days after the tax authority’s decision is released. If accomplished within the deadline, the tax authority’s decision on applying penalty may be cancelled. If not accomplished, the unpaid taxes/obligatory payments and late payment interest are to be withdrawn from the (i) taxpayer’s bank accounts (by issuing a tax liability claim without acceptance), (ii) taxpayer’s debtors (by issuing a tax liability claim on the debts payable to taxpayer), or (iii) taxpayer’s property (by issuing a tax liability claim upon decision of the court).

Statute of limitations

Statute of limitations for tax purposes is five years.

Turkmenistan

Topics of focus for tax authorities

The tax administration environment in Turkmenistan is form-driven. Therefore, the quality of documentation supporting the deductions should be of particular importance.

Cross-border transactions are normally scrutinised by tax authorities during statutory tax audits in view of WHT and reverse charge VAT implications.

Another area of focus for tax authorities is the deductions taken by Turkmenistan branches of foreign legal entities in respect of expenses incurred by their head offices abroad.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

An intergovernmental agreement (IGA) with the United States is treated as 'in effect' by the US Treasury as of 3 June 2014. The United States and Turkmenistan have reached an agreement in substance and Turkmenistan has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in Turkmenistan are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that Turkmenistan continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

Effective 1 July 2015, the following amendments were made to the Income Tax Act (ITA) and the Value-added Tax (VAT) Act.

Income tax

It is now mandatory for every local authority, government institution, or regulatory body to require a taxpayer identification number (TIN) from any person applying for a licence of any form of authorisation necessary for conducting business in Uganda.

The threshold for presumptive tax payable by small business taxpayers has increased from 50 million Ugandan shillings (UGX) to UGX 150 million while at the same time having the base tax rate decrease from 3% to 1.5%.

Taxpayers are now denied a deduction for any expenditure above UGX 5 million in one transaction on goods and services where the supplier does not have a TIN.

The definition of a branch now includes, from the perspective of petroleum and mining operations,; “the furnishing of services, including consultancy services, through employees or personnel engaged by the person for such purpose, but only if activities of that nature continue for the same or a connected project for a period or periods aggregating more than 90 days in any 12-month period”.

A definition of immovable property has been included. Immovable property is now defined to include a mining right, petroleum right, mining information, or petroleum information.

Payments made to non-resident suppliers for the provision of services rendered, be it onshore or offshore, are subject to withholding tax (WHT) at a rate of 15%.

The debt-to-equity ratio for thin capitalisation purposes has been revised from 1:1 to 1.5:1. The thin capitalisation rules have been extended to apply to all interest-bearing debt of a foreign-controlled resident company. Further, the thin capitalisation restrictions now apply to branches of non-resident companies. These provisions do not apply if, at all times during the year, the amount of the debt does not exceed the arm's-length debt amount. Arm's-length debt amount is defined as the amount of debt that a financial institution that is not related to the company would be prepared to lend to the company having regard to all the circumstances of the company.

The exemption from the 6% WHT on the supply or importation of petroleum products, plant and machinery, human or animal drugs, scholastic materials, and raw materials was removed. These items are now subject to WHT at a rate of 6% unless the buyer is exempt from WHT.

Uganda

The WHT rate on the payment of re-insurance premiums to non-resident persons has decreased from 15% to 10%. Similarly, the WHT rate applicable to non-resident contractors for provision of services to licence in respect of mining or petroleum operations has decreased from 15% to 10%.

Taxpayers providing passenger transport services or freight transport services using vehicles with a load capacity of more than two tonnes are required to pay an advance tax before renewal of their operational licence.

The type of reorganisations that are entitled to roll-over relief for capital gains purposes are now defined in the ITA.

The provisions for taxation of petroleum operations in Uganda were amended, and special provisions for taxation of mining operations were introduced in the ITA.

Further, the income of Global Fund for AIDS, Malaria, and Tuberculosis is now exempt from income tax.

Value-added tax (VAT)

The annual turnover threshold for VAT registration has increased from UGX 50 million to UGX 150 million.

The threshold for cash basis accounting has increased from UGX 200 million to UGX 500 million.

The following organisations are now listed under the schedule of Public International Organisations who qualify for diplomatic benefits under the VAT Act:

- Global Fund for AIDS, Malaria, and Tuberculosis.
- Uganda Red Cross Society.

Compact bulbs with a power connecting cap at the end are now subject to VAT at a tax rate of 18%.

The supply of cereals grown and milled in Uganda are now zero-rated.

There are a number of significant VAT amendments for the mining and petroleum sector. These include the following:

- Definition of a licensee, contractor, mining operations, petroleum operations, and petroleum agreement.
- A licensee undertaking mining or petroleum operations or any other person undertaking the construction of a petroleum pipeline is now allowed to apply for voluntary VAT registration regardless of whether they are making any taxable supplies.
- A contractor or licensee is now allowed to claim input tax credit for the VAT on imported services.
- A licensee can now seek a refund when its input credit exceeds its output liability for a period.
- All VAT on supplies of goods or services to a licensee is deemed paid such that the licensee does not incur any VAT on its supplies.

The Tax Procedures Code Act

The Tax Procedures Code Act was published on 19 October 2014. The Act provides a Code to regulate the procedures for the administration of specified tax laws in Uganda. The main purpose of the Act is to:

- harmonise and consolidate the tax procedures under existing tax laws, and

- to provide for related matters.

As to date, the Act has not yet been gazetted and is therefore not yet under operation.

Proposed 2016 amendments

There are various proposed amendments to income tax, VAT, excise duty, and other levies as continued in the respective amendments bills. The amendments, if adopted as law, will generally come into effect 1 July 2016. These include the following.

Income tax

The Bill proposes the following amendments:

- An amendment to make it clear that the ability to carry forward tax losses is subject to the change in control provisions.
- Introduction of WHT as the mode for collection of tax from a non-resident person who derives rent from sources in Uganda.
- An amendment to the limitation of benefit clause to introduce, among others, the concept of beneficial ownership in order for a non-resident person to benefit from a tax exemption or reduced tax rate under a double taxation agreement (DTA).
- A specific WHT requirement in relation to payments to non-residents who derive income from sources in Uganda from international carriage and telecommunications services.
- The inclusion of the International Centre for Research in Agroforestry (ICRAF) and the International Potato Centre as listed institutions in the First Schedule to the ITA. This means that the income of these entities will be exempt from income tax.
- The removal of clinics as a separate category of business subject to specific rates of presumptive tax on turnover below UGX 50 million.
- Various amendments affecting petroleum operation include an updated definition of the term 'licensee' to cover persons undertaking upstream and midstream petroleum activities by reference to the correct respective piece of legislation, repeal of the definition of 'petroleum exploration information', and limitation of deductions of expenditure for exploration licenses issued after 31 December 2015, among others.

VAT

In respect to VAT, persons undertaking midstream operations in the petroleum sector (such as refining, conversion, transmission, and storage) will be entitled to apply for voluntary VAT registration regardless of whether they are currently making taxable supplies.

LED lamps and bulbs, which are exempt from import duty in accordance with the Fifth Schedule of the EAC Customs Management Act, will be specifically excluded from the normal parallel exemption for import VAT. This means that the import of such items will be subject to the standard VAT at 18%.

The Bill introduces a special treatment for VAT on taxable supplies made by a supplier to a contractor executing an aid-funded project, whereby:

- the VAT on the supply is deemed to have been paid by the contractor to the supplier, and
- the supplier does not account for the deemed VAT payment as output tax.

A person providing business process outsourcing (BPO) services will be entitled to claim an input tax credit for VAT incurred on imported services.

The Bill proposes to remove the supply of solar power from the list of exempt supplies in the Second Schedule to the VAT Act.

Uganda

The Bill extends the current exemption for supplies to the contractors and subcontractors of hydro power projects to now also encompass solar power and geothermal power projects.

The Bill proposes to add the following to the list of agricultural machinery, tools, and implements that are exempt from VAT: hullers, oil presses, grain dryers, manure spreaders, fertiliser distributions, transplanters, juice presses and crushers, among others.

Excise duty

The Bill proposes a number of excise duty amendments, including the following:

- Manufacturers will be able to claim a refund of excise duty that was previously paid on excisable goods that are converted into approved healthcare or medical products.
- Specialised hospital furniture will be exempted from the 10% excise duty on furniture as introduced in 2015. In addition, the existing .09 United States dollars (USD) per minute duty on incoming international calls will be removed.

The table below shows goods where excise duty will be amended:

Goods	Excise duty
Soft cap	UGX 50,000 per 1,000 sticks
Cigars, cheroots, and cigarillos containing tobacco	200%
Smoking tobacco, whether or not containing tobacco constituents in any portion	200%
Homogenised or reconstituted tobacco	200%
Cement	UGX 1,000 per 50kgs
Motor spirit (gasoline)	UGX 1,000 per litre
Gas oil	UGX 780 per litre
Specialised hospital furniture	Nil
Other furniture	10%
Ready to drink spirits	80%

Stamp duty

The Bill proposes to increase stamp duty on the following items:

Item	Stamp duty
Exchange of property	1% to 2%
Transfer of property	1% to 2%
Fixed base rate	UGX 5,000 base rate to UGX 10,000

Finance Act

The amendment proposes to impose import duty on lubricants, un-denatured alcohol, steel, steel products, electronics, paper, and paper products diapers. Further, the amendment proposes to increase the environmental levy on used clothes, shoes, and other articles from 15% to 20%.

In addition, the Bill proposes to waive all tax arrears owed by Savings and Credit Co-operative Organisations (SACCOs) as at 31 December 2015 and also repeal the fees under the Mining Act 2003 to the extent prescribed under the Finance Acts of 2013 and 2014. Presumably, this means that the fees that applied immediately prior to 1 July 2013 are still in effect.

Taxes on corporate income

A resident company is taxed on its income from all geographical sources. A non-resident company is only subject to Uganda income tax on income derived from sources in Uganda.

The income tax rate applicable to the chargeable income of companies is 30%, with the exception of:

- Mining companies.
- Non-resident air transport, shipping, and some telecommunication services.
- Resident companies whose turnover does not exceed UGX 150 million.

Chargeable income is gross income for the year less the total deductions allowed under the ITA.

Mining companies

The income tax rate applicable to mining companies is calculated according to the following specified formula:

Annual tax rate = 70 minus (1500/x), where x is the ratio of the company's chargeable income to the gross revenue for the year.

Note that the derived tax rate is subject to a minimum tax rate of 25% and a maximum tax rate of 45%.

Non-resident air transport, shipping, and some telecommunications services

Non-resident ship operators, charterers, and air transport operators who derive income from carriage of passengers who embark, or cargo or mail that is embarked, in Uganda, as well as road transport operators who derive income from carriage of cargo or mail that is embarked in Uganda, are taxed at the rate of 2%.

A non-resident person who carries on the business of transmitting messages by cable, radio, optical fibre, or satellite communication and derives income through transmission of such messages by apparatus established in Uganda, whether or not such messages originated from Uganda, is taxed on one's gross income at a rate of 5%. Similarly, a non-resident person who derives income from providing direct-to-home pay television services to subscribers in Uganda is taxed on one's gross income at a rate of 5%.

Resident companies with turnover of less than UGX 150 million

A rate of 1.5% of turnover is used to determine income tax payable by a resident company whose turnover is between UGX 50 million and UGX 150 million, subject to certain thresholds.

However, on application to the Commissioner, a resident company with a turnover of less than UGX 150 million may be taxed at 30%.

This category excludes professionals, public entertainment services, public utility services, or construction services.

Local income taxes

There are no other income taxes in Uganda.

Uganda

Corporate residence

A company is resident in Uganda for a year of income if it meets one of the following criteria:

- Is incorporated or formed under the laws of Uganda.
- Has its management and control exercised in Uganda at any time during the year of income.
- Undertakes the majority of its operations in Uganda during a year of income.

Permanent establishment (PE)

A PE (branch) means a place where a person carries on business, and includes:

- A place where a person is carrying on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such.
- A place where a person has, is using, or is installing substantial equipment or substantial machinery.
- A place where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such a project.
- The furnishing of services, including consultancy services, by an enterprise of a contracting state through employees or other personnel engaged in the other contracting state, provided that such activities continue for the same or a connected project for a period or periods aggregating more than four months within any 12-month period.

Other taxes

Value-added tax (VAT)

VAT is governed by the VAT Act and administered by the Uganda Revenue Authority (URA). VAT is charged at the rate of 18% on the supply of most goods and services in the course of business in Uganda. Specified goods and services, as well as exports outside of Uganda, attract a zero rate of tax.

Some supplies are exempt from VAT, the main categories being government subsidies, some unprocessed foodstuffs, financial services, health and life insurance, re-insurance services, unimproved land, leases and sale of certain residential properties, betting and gaming, education, medical and health services, social welfare services, pesticides, petroleum products subject to excise duty, and power generated by solar.

Zero rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while those incurred in making an exempt supply cannot be recovered.

The zero-rated supplies include the supply of goods and services exported from Uganda; the supply of drugs and medicines; the supply of seeds, fertilisers, pesticides and hoes; the supply of leased aircraft, aircraft engines, spare engines, spare parts for aircraft, and aircraft maintenance equipment.

The annual threshold for VAT registration is UGX 150 million. Persons who make supplies that are VATable and whose turnover exceeds UGX 150 million are required to register for VAT with the URA. VAT-registered persons are required to:

- Charge VAT whenever they make supplies that are VATable.
- File monthly returns before the 15th day of the month following the reporting month.

Credit for input tax

A person making exempt, zero-rated, and standard supplies can recover all the input VAT if the exempt supplies are less than 5% of the total supplies. However, if the exempt supplies are more than 5% but less than 95%, the person is required to recover only a portion of the VAT input tax corresponding to the percentage of the taxable supplies. If the exempt supplies exceed 95%, the person cannot recover any input VAT.

Imported services

The VAT Act defines a supply of service to mean any supply that is not a supply of goods or money, including the performance of services for another person.

There is no definition of imported services in the local legislation. However, the tax authorities generally consider an imported service to be one provided by a person normally resident outside Uganda who is not required to register for VAT in Uganda. According to Regulation 14 of the VAT Regulations 1996, any person who imports a service into the country must account for VAT on such a service. The Regulations require the person importing the service to account for the VAT at the time when performance of the service is completed, when payment for the service is made, or when the invoice is received from the foreign supplier, whichever is earliest.

The tax on such imported services is computed at the rate of 18% of the cost of the service. VAT-registered companies are no longer required to prepare self-billed tax invoices, thus they are unable to claim the VAT paid as input tax; however, a contractor or licensee in the petroleum and mining industry is able to claim an input tax credit for the reverse charge VAT paid on imported services. Further, if the importer of the services is not registered for VAT, the importer is required to calculate and pay the VAT to the URA.

Failure to pay VAT on non-exempt imported services is tantamount to lack of compliance with the law, and a penalty of 2% per month, compounded, may apply.

VAT representative for non-resident persons

The VAT Act provides for the appointment of a VAT representative by a non-resident person who may be required by the Commissioner to register for VAT in Uganda but has no fixed place of business. If the non-resident person does not appoint the VAT representative within 30 days after being required to register for VAT, the Commissioner may appoint the representative for the non-resident person. The VAT representative of the non-resident person shall be a person who is ordinarily residing in Uganda, may be an agent for more than one non-resident person, and will have the responsibility for doing all things required of the non-resident person under the VAT Act.

Customs duties

Many goods imported into Uganda are subject to customs duties. However, exemptions are available to various classes of plant and machinery imported into Uganda. The rates of duty are provided by the East African Community common external tariff code. Certain products imported from the East African Community and the Common Market for Eastern and Southern Africa (COMESA) region enjoy special custom duty rates. Imported items are classified according to the nomenclature established under the international convention on the harmonised commodity description and coding system. Duties range from 0% to 60%, depending on the item imported.

Excise duties

Excise duties are imposed on goods considered luxuriant. Examples include locally manufactured soft drinks, cigarettes, alcoholic drinks, and spirits. A schedule of some of the rates is provided below:

Uganda

Goods	Excise duty
Cigarettes	Between UGX 45,000 and UGX 75,000 per 1,000 sticks, subject to the type of cigarette
Cigars and other smoking tobacco	160%
Beer made from malt	60%
Beer made from local raw material	30%
Beer produced from barley grown and malted in Uganda	30%
Spirits produced from local raw materials	60%
Other spirits, except undenatured spirits, which are subject to duty up to 100%	70%
Wine produced from local raw materials	20%
Other wine	80%
Air time applicable to mobile cellular devices	12%
Air time applicable to landlines and public pay phones	5%
Fuel and oils	Between UGX 200 and UGX 1,000 per litre, depending on the type of fuel/oil. Nil for gas oil and thermal power generation to the national grid.
Motor vehicle lubricants	5%
Chewing gum, sweets, and chocolates	10%
Furniture	10%

Other goods and services	Excise duty
Banking fees	10% of the fees charged
Money transfers (other than transfers by banks)	10% of the fees charged
Cosmetics and perfumes	10%
Incoming international calls (other than calls from the Republic of Kenya, the Republic of Rwanda, and the Republic of South Sudan)	USD 0.09 per minute
Cement	UGX 500 per 50 kgs

Property taxes

Property taxes are administered by the local authorities annually. They are based on the value of the property as assessed by the local authorities.

Stamp duties

Stamp duty is charged on a number of transactions at varying rates. Stamp duty is charged at 1% of the total value for a number of instruments, including hire purchase agreements, composition deeds, leases, exchange of property, conveyance, transfers, share warrants, gifts, and agreements relating to deposit of title deeds.

Stamp duty of 0.5% is incurred on formation of a company, capital-raising activities (e.g. increase of share capital), debentures, equitable mortgages, and mortgage deeds.

Stamp duty of 1% applies on transfer of shares.

No stamp duty is charged on the increase of share capital where it is in fulfilment of a condition precedent for acquiring loan funds for a development project or where it is made on becoming public through the stock exchange.

Stamp duty of UGX 5,000 is also charged in a number of various other instruments.

Turnover taxes

Every promoter of gaming and pools promoted within Uganda and every principal agent of a promoter of gaming and pools promoted outside Uganda is liable to tax at 15% of the total amount of money received or the total amount of bets.

Environmental levies

Environmental levies are charged on every person who imports motor vehicles that are eight years old or older. Levies are also imposed on the importation of used household appliances. The levy on motor vehicles is 20% of the value of the vehicle as determined for customs duty purposes. Levies on electrical appliances range from UGX 20,000 to UGX 50,000 per item, depending on the nature of the item.

Payroll taxes

The employer is required to withhold tax on employment income from their employees and pay it to the tax authorities. The tax is normally borne by the employee. Where the employer fails to withhold tax as required, the employer becomes liable for the taxes but may recover the same from the employees.

Social security contributions

An employer is obligated to make contributions to the national social security fund for each employee, amounting to 10% of their gross pay.

Branch income

Tax is imposed on the income of a non-resident company derived from running a branch in Uganda. The chargeable income of a branch in Uganda is taxed at the corporation tax rate of 30% after deduction of allowable expenses.

In addition to corporation tax, branches are subject to extra tax at a rate of 15% on any repatriated income for a year of income. The repatriated income is calculated using the $A + (B - C) - D$ approach. Where A is the net assets at the beginning of the year, B is the net profit for the year, C is the tax charge for the year, and D is the net assets at the end of the year.

Income determination

In arriving at chargeable income (taxable income), one has to go through the process of adjusting profits by taking into account deductions allowed and deductions not allowed.

Inventory valuation

A taxpayer is allowed a deduction for the cost of trading stock disposed of during the year, which is determined by adding to the opening value of the trading stock the cost of trading stock acquired during the year and subtracting the closing value of stock. The opening value of the stock is the closing value for the previous year or, where the taxpayer commenced business during the year, the market value at the time of commencement of the business of the trading stock acquired prior to commencement. The closing stock valuation method is the lower of cost or market value. Trading stock is allowed to be valued using either the absorption costing or prime cost method. The stock valuation method chosen may not be changed, except with written permission of the Commissioner.

Capital gains

Capital gains are included in and taxed together with the business income at a rate of 30%. There is no separate capital gains tax. Capital gains arise on disposal of non-depreciable business assets as well as sale of shares.

Uganda

Dividend income

The general rule is that dividend income is taxable as part of business income at a rate of 30%. Dividend income is also subject to WHT at the rate of 15%. The WHT paid in respect of the dividend income is creditable where the income is subject to the corporation tax rate of 30%. The WHT rate for dividend payments to resident persons is 15%. For dividends paid out by companies listed on the stock exchange to individuals, the rate is 10%.

Dividend income is exempt from tax if the recipient company directly or indirectly controls the paying company through ownership of 25% or more of the voting power of the paying company.

Interest income

The general rule is that interest income is taxable as part of business income at a rate of 30%. Interest income is also subject to WHT at the rate of 15%. The WHT paid in respect of the interest income is creditable where the income is subject to the corporation tax rate of 30%. Also, interest income earned with respect to government securities is subject to tax at 20% as a final tax.

Rental income

Companies are required to disclose their rental income separately from other business income. Taxable rental income is the net income after allowing for any expenditures and losses in respect of the rental income derived. The rate of tax applicable is 30%.

Foreign income

Foreign income is taxable on resident recipients, and tax suffered in the country where it is sourced (if any) is creditable, subject to the provisions of any DTAs. This credit is limited to the amount of Ugandan tax payable on that income.

There are no provisions for deferring tax on income earned abroad by tax residents.

Deductions

The ITA sets out the following conditions for deductibility of an expense:

- There must be an expenditure or loss.
- The expenditure or loss must be incurred by a person during the year of income.
- The expenditure must be incurred in the production of income included in gross income.

A taxpayer who is accounting for tax purposes on an accrual basis derives income when it is receivable by the taxpayer and incurs expenditure when it is payable by the taxpayer.

An amount is treated as payable by the taxpayer when all the events that determine liability have occurred and the amount of the liability can be determined with reasonable accuracy, but not before economic performance with respect to the amount occurs. Economic performance occurs:

- with respect to the acquisition of services or property, at the time the services or property are provided
- with respect to the use of property, at the time the property is used, or
- in any other case, at the time the taxpayer makes payment in full satisfaction of the liability.

Contingent liabilities are not tax-deductible in Uganda.

Depreciation

A deduction is allowed for the depreciation of the person's depreciable assets, other than minor assets, in accordance with the appropriate applicable rates. The ITA allows a taxpayer a deduction for the depreciation of their depreciable assets on a reducing-balance basis. Depreciable assets are classified in four classes as follows:

Class	Assets included	Rate of tax depreciation (%)
1	Computers and data handling equipment.	40
2	Automobiles, buses, and mini-buses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than 7 tonnes; construction and earth moving equipment (cost of motor vehicle sealed at approximately UGX 60 million for non-commercial vehicles).	35
3	Buses with a seating capacity of 30 or more passengers; goods vehicles designed to carry or pull loads of 7 tonnes or more; specialised trucks, tractors; trailer-mounted containers; plant and machinery used in farming, manufacturing, or mining operations.	30
4	Rail cars, locomotives, and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft; specialised public utility plant, equipment, and machinery; office furniture, fixtures, and equipment; and any depreciable asset not included in another class.	20

Industrial building allowance

A company is eligible for an industrial building allowance on its industrial and commercial buildings at a tax rate of 5% *per annum* on a straight-line basis. The industrial building allowance will be granted on the actual cost incurred in constructing the buildings.

An industrial building is defined to mean any building that is wholly or partly used, or held ready for use, by a person in manufacturing operations, research and development into improved or new methods of manufacture, mining operations, an approved hotel business, an approved hospital, or approved commercial buildings.

Goodwill

An intangible asset is amortisable over its useful life. To the extent that the useful life of the underlying asset that gives rise to goodwill can be determined, then the goodwill maybe deductible over the useful life of the asset.

Start-up expenses

A company setting up business for the first time or engaged in the initial public offer at the stock market will be entitled to a tax deduction for all its start-up costs that are of capital nature that would otherwise not be tax-deductible under the ordinary tax rules. The start-up costs will be allowed as tax-deductible costs over a period of four years on a straight-line basis at the rate of 25% *per annum*.

Interest expenses

Interest is deductible if the interest is incurred in respect of a debt obligation by the company in the production of income included in the company's gross income. Interest arising from non-trade-related debt obligation is not deductible. Deferred interest is deductible when paid.

Interest charged before capital investment is put to use has to be capitalised. Interest incurred after capital investment is put to use is allowed as a deduction.

If the company is foreign controlled, then the interest arising from the loan in excess of one and a half times the company's equity will not be allowed (*see Thin capitalisation in the Group taxation section for more information*).

Uganda

Bad debt

A deduction is allowed for bad debt only if:

- the amount was included in the person's income in the year of income
- it is in respect of money that was lent in the ordinary course of business by a financial institution in the production of income, or
- the amount of the debt claim was in respect of a loan granted to any person by a financial institution for the purpose of farming, forestry, fish farming, beekeeping, animal and poultry husbandry, or similar operations.

For the bad debt to be deductible, the taxpayer must demonstrate to the URA that reasonable steps to collect the debt were taken and that the taxpayer failed to recover the debt. In relation to a financial institution, it should be a debt in respect of which a loss reserve held against presently identified losses or potential losses, and which is therefore not available to meet losses that subsequently materialise, has been made.

Charitable contributions

Charitable donations are deductible if made to amateur sporting associations; religious, charitable, or educational institutions of public character; trade unions; and other similar associations that have been issued with a written ruling by the Commissioner currently in force stating that it is an exempt organisation. The donations should not exceed 5% of the person's chargeable income.

Meals, refreshments, and entertainment

Expenses for meals, refreshments, and entertainment are deductible only where the value is included in the employment income of the employees or is excluded from employment income owing to the fact that it is provided on equal terms to all workers.

Pension expenses

Employers are allowed a deduction for the contributions made to pension schemes on behalf of their employees. Employees, on the other hand, do not get a deduction for the contributions they make to pension funds.

Payment for directors

Directors are treated as employees, so expenses incurred in respect of directors are deductible expenses.

Bribes, kickbacks, illegal payments

Non-business expenses are not tax-deductible, including those of a private nature.

Fines and penalties

No deduction is allowed for any fine or similar penalty paid to a government or its subdivision for breach of any law.

Taxes

No deduction is allowed for income tax payable in Uganda or in a foreign country.

Other significant items

No deduction is allowed for the following other expenditures:

- Any expenditure or loss of a domestic or private nature.
- Any expenditure or loss of a capital nature.
- Any expenditure or loss recoverable under insurance contract or indemnity.
- Any contribution or similar payment made to a retirement fund by the employee or for the benefit of any other person (e.g. National Social Security Fund [NSSF] contributions).
- Any premium or similar payment made in respect of a life insurance policy for the life of the person paying the premium or on the life of some other person.

- Any income appropriated to a reserve fund or capitalised in any way.
- The amount of pension paid to any person.

Net operating losses

A deduction is allowed for any assessed tax losses carried forward from previous years of income. Such tax losses are carried forward and deducted against future taxable profit of the business in the subsequent years of income. The losses can be carried forward indefinitely. There is no ring-fencing of losses except in the following circumstances:

- Where, during a year of income, there has been a change of 50% or more in the underlying ownership of a company, as compared with its ownership one year previously, the company is not permitted to deduct an assessed loss in the year of income or in subsequent years, unless the company, for a period of two years after the change or until the assessed loss has been exhausted if that occurs within two years after the change,:
 - continues to carry on the same business after the change as it carried on before the change and
 - does not engage in any new business or investment after the change where the primary purpose of the company or the beneficial owners of the company is to utilise the assessed loss so as to reduce the tax payable on the income arising from the new business or investment.
- In cases where losses relate to farming, the assessed farming loss can only be deducted from farming income of the taxpayer in the following year and not from any other income.

There is no provision for carryback of losses in Uganda.

Payments to foreign affiliates

Payments to foreign affiliates are deductible as long as they are charged at an arm's length and incurred in the production of income.

Group taxation

There are no specific provisions in the law covering groups, so companies in a group do not get any special treatment for tax purposes in Uganda.

Transfer pricing

The transfer pricing regulations apply to controlled transactions if a person who is a party to the transactions is located in and is subject to tax in Uganda and the other person who is a party to the transaction is located in or outside Uganda.

The URA Practice Note issued on 14 May 2012 gives details on the transfer pricing documentation to be maintained by the taxpayer. These include company details and transaction details, including agreements and the pricing methodology used in determining the arm's-length price.

In addition, the anti-avoidance provisions contained in Sections 90 and 91 of the ITA require transactions between associates to be at an arm's-length. These are the provisions that are often applied by the URA in instances where they are of the view that a non-resident person may be transferring profits from Uganda.

Thin capitalisation

Where a company intends to finance some of its Uganda operations by use of foreign debt, the ITA provides for thin capitalisation rules in Uganda, and the safe harbour debt-to-equity ratio is 1.5:1.

Uganda

The thin capitalisation rules are provided for in Section 89(1) of the ITA. According to this Section, where a foreign-controlled resident company, other than a financial institution, has a debt-to-equity ratio in excess of 1.5:1 at any time during the year of income, a deduction is disallowed for the interest paid by the company during that year on that part of the debt that exceeds the 1.5:1 ratio for the period the ratio was exceeded.

These provisions do not apply if, at all times during the year, the amount of the debt does not exceed the arm's-length debt amount. Arm's-length debt amount is defined as the amount of debt that a financial institution that is not related to the company would be prepared to lend to the company having regard to all the circumstances of the company.

Controlled foreign companies (CFCs)

Uganda does not have a CFC regime.

Tax credits and incentives

Foreign tax credit

A resident taxpayer is entitled to a foreign tax credit for any foreign income tax paid by the taxpayer in respect of foreign-source income included in the gross income of the taxpayer. The foreign tax credit allowed is subject to the income tax rate (i.e. 30%) in Uganda.

Tax holidays for exporters

A tax holiday of ten years is available to exporters who export at least 80% of their produce of finished goods, subject to certain conditions.

Scientific research expenditure, training expenditure, and mineral exploration expenditure

A 100% allowance is available for scientific research expenditure, training expenditure, and mineral exploration expenditure in the year of expenditure.

Incentives for the importation of plant and machinery

Plant and machinery is exempt from customs duty on importation. Additionally, a VAT deferral facility is available where VAT is deferred on importation of plant and machinery and subsequently waived upon approval by the relevant authorities.

Employment incentives

A deduction of 2% of income tax payable is granted to any employer who can prove to the URA that at least 5% of their employees on a full-time basis are people with disabilities.

Other incentives

Income derived from agro processing is exempt from income tax, subject to certain conditions.

Withholding taxes

Payments to non-resident persons

According to Section 83(1) of the ITA, a tax is imposed on every non-resident person who derives any dividend, interest, royalty, rent, natural resource payment, or management charge from sources in Uganda. WHT at a rate 15% therefore applies on gross dividend payments, interest, management fees, and royalty payments in respect of non-treaty countries.

However, Section 83(5) exempts interest paid by a resident company in respect of debentures that:

- were issued by the company outside Uganda for the purpose of raising a loan outside Uganda
- were widely issued for the purpose of raising funds for use by the company in a business carried on in Uganda or the interest is paid to a bank or a financial institution of a public character, and
- the interest is paid outside Uganda.

A 'debenture' is defined in the ITA as any form of debt, including debenture stock, mortgage stock, loan, loan stock, or any similar instrument acknowledging indebtedness, whether secured or unsecured. The term 'widely issued' is also specifically defined.

Also, the rate of WHT on interest derived by a non-resident person from government securities is 20%.

Payment of re-insurance premiums to non-resident persons is subject to WHT at a rate of 10%. The requirement to withhold tax does not apply to the African Reinsurance Corporation and PTA Reinsurance Company.

Payments to resident persons

The rate of 15% also generally applies to payments of dividends and interest to resident persons, except in the following circumstances, where different rates apply:

- Dividends paid to a company controlling 25% or more of the voting powers: 0%.
- Dividends paid by companies listed on the Ugandan Securities Exchange to individuals: 10%.
- Interest on government securities: 20%.
- Interest paid by a natural person, paid to a financial institution (other than from government securities), paid by a company to an associated company, and interest that is exempt in the hands of the recipient: 0%.

There is no WHT on royalty payments to resident persons unless the payments are made by a government institution, local authority, company controlled by the government, or a 'designated payer'.

Double taxation agreements (DTAs)

A taxpayer may benefit from the provisions of a DTA that Uganda has with another country. Please find below a table showing the countries with which Uganda has DTAs and the applicable WHT rates on various categories of income.

According to Section 88(2) of the ITA, the terms of the international agreement to which Uganda is a party prevails over the provisions of ITA in case the terms of the international agreement are inconsistent with the provisions of the Act.

Recipient	WHT (%)					
	Dividends	Interest	Royalties	Management fees	Taxation of branch profits	Repatriation of branch profits
Denmark	10/15	10	10	10	30	15
India	10	10	10	10	30	15
Italy	15	15	10	10	30	30
Mauritius	10	10	10	10	30	15
Netherlands	0/5/15 (1)	10	10	NA	30	15
Norway	10/15	10	10	10	30	15
South Africa	10/15	10	10	10	30	15
United Kingdom	15	15	15	15	30	15

Uganda

Note

1. With respect to the Uganda/Netherlands DTA, the rate applicable on dividends is 15%, except where the investment is new or is an expansion of the current investment made after the DTA entered into (10 September 2006).

For new investments and expansions of current investment, the rates are:

- 0% if the beneficiary holds at least 50% of the shares in the company paying the dividends.
- 5% if the beneficiary holds less than 50% of the shares in the company making the payment.

Tax administration

Taxable period

A normal period of 12 months is known as a year of income. This spans from 1 July to 30 June. On application, a taxpayer may be allowed to use a substituted year of income, which is a 12-month period other than the normal year of income.

Tax returns

The ITA provides for two provisional returns within a 12-month period (financial year). The first provisional return is due within the first six months of the accounting year while the second is due by the end of the 12th month of the accounting year.

The Self-Assessment Return (SAR) is due by the end of the sixth month after the end of the accounting year.

Electronic filing has been introduced for all tax returns.

Payment of tax

For all companies, a system of provisional payments on account, based on estimated profits, is in place. The first payment of 50% is due by the end of the sixth month of the accounting period and the second payment is due by the end of the 12th month. The balance is expected to be paid together with the SAR.

Tax audit process

In most cases, audits are initiated by the URA, which notifies the taxpayer of the records they need to prepare before commencement of the audit. The URA then reviews the records. This is normally done at the premises of the taxpayer, where the URA can obtain the necessary clarifications from the bookkeepers.

The audit findings are then communicated to the taxpayer subsequent to whom an assessment is raised. If the taxpayer does not agree with the objection decision, they may appeal to the Tax Appeals Tribunal or to the high court.

Statute of limitations

The ITA requires a taxpayer to maintain records for at least five years after the end of the year to which the records relate.

The VAT Act provides for records to be maintained for six years after the end of the tax period to which they relate.

Topics of focus for tax authorities

The focus of the URA keeps shifting but is generally based on the risk analysis of the information available to them. Currently, the focus is on transfer pricing and the application of reduced tax rates in respect to DTAs.

Significant developments

New tax rules

In December 2015, the Parliament of Ukraine passed laws on improvement of tax legislation. As a result, a number of changes to the corporate income tax (CIT), value-added tax (VAT), and other taxes became effective from 1 January 2016.

Starting from 1 January 2016, taxpayers report and pay CIT quarterly. The adopted amendments cancel advance CIT monthly payments (which applied in 2015); however, advance payments on dividends (ATD) still exist.

Professional advice is recommended before deciding on the actual impact of any of the tax provisions.

Taxes on corporate income

CIT applies to taxable profits earned by resident entities in Ukraine and abroad and non-residents with a permanent establishment (PE) in Ukraine. Resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Ukrainian-source income.

Ukraine's standard CIT rate is 18%.

Withholding tax (WHT), at a rate of 15%, applies to the majority of income payments for non-residents, unless an exemption is given under a double taxation treaty (DTT). Ukraine has 70 effective DTTs in place. *See the Withholding taxes section for more information.*

Special CIT rates for insurance and gambling activities

Insurance activities

Insurance companies pay special CIT of 0% and 3% on their income. Long-term life insurance premiums, pension insurance premiums, and voluntary medical insurance premiums are subject to the 0% rate; the 3% rate applies to all other insurance premiums received by the company. Such amounts of CIT of 0% or 3% paid from insurance premiums reduce taxable profit of an insurance company, which is subject to the standard 18% rate.

Gambling activities

Organisation of lotteries and operating of gambling machines are subject to the 10% rate; the 18% rate applies to bookmaker and other gambling activities (including casinos). Contrary to CIT for insurance companies, amounts of CIT of 10% or 18% paid from gambling income does not reduce taxable profit of a company engaged in gambling activities (standard 18% rate is applied to the full amount of the taxable profit).

Ukraine

Local income taxes

No CIT is levied at the regional or local level, except simplified (unified) tax (*see the Tax credits and incentives section for a description of simplified [unified] tax*).

Corporate residence

Corporate residence is determined by the place of incorporation.

Permanent establishment (PE)

The Ukrainian definition of a PE generally follows the PE definition from the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, but with stronger agency tests.

In particular, a non-resident's PE is defined as a fixed place of business through which the business activity of a non-resident entity is wholly or partly carried out in Ukraine. A PE includes, among other things, a place of management, affiliate, office, server, etc.

The Tax Code contains the concept of a service PE whereby the provision of services (apart from the provision of personnel), including consultancy services, by a non-resident through its employees or other personnel in Ukraine, shall constitute a Ukrainian PE of this non-resident, provided such activities (within the framework of one project) last more than six months in any 12-month period.

A construction site in Ukraine may also give rise to a taxable presence of a non-resident in Ukraine in the form of a PE if the length of the construction activities exceeds six months.

The Tax Code also provides for the concept of a non-dependent agent, which means, specifically, a Ukrainian agent acting on behalf of more than one non-resident in the ordinary course of its business should not constitute a PE in Ukraine.

Still, there is a list of exclusions from the PE definition. In particular, according to the Tax Code, auxiliary and preparatory services of a non-resident should not result in the creation of a PE; however, in practice, the Ukrainian tax authorities usually interpret the term 'business activity' in a very broad sense, and, without DTT protection, may consider any type of activity as giving rise to a taxable presence (i.e. a PE) of a foreign entity in Ukraine.

Other taxes

Value-added tax (VAT)

There are three VAT rates: 20%, 7%, and 0%.

The rate of 20% applies to almost all transactions subject to VAT except specific transactions subject to 7% and 0% VAT.

The reduced rate of 7% applies to supply and import of registered medicines and specific medical goods, as well as medicines, medical goods, and medical equipment allowed to be used in clinical trials.

The 0% VAT rate applies to the export of goods. The 0% rate also applies to the supply of international transport services (confirmed by a single international shipping document), toll manufacturing services (if the finished goods are then exported from Ukraine), and certain other services.

Provision of services to a non-resident is not considered to be zero-rated. Such services are subject to 20% VAT or considered to be outside the scope of VAT (effectively exempt with no right to claim input VAT), depending on the place of supply as determined by the legislation.

Transactions that are subject to VAT include the following:

- The supply of goods and services when the place of supply is in Ukraine, including when the supply is made free of charge without consideration.
- Transfer of the object of a financial lease to the lessee.
- The importation of goods into Ukraine.
- Exportation of goods.
- International transportation services.

Transactions that are not subject to VAT include the following (among others):

- The issue, sale, and exchange of securities.
- The transfer of property from a lessor to a lessee under an operating lease and the return of property upon expiration of the operating lease (other than in the course of import operations).
- Interest/commission element of lease payments under financial lease agreements.
- Provision of financial loans and bank guarantees.
- Insurance and reinsurance services supplied by licensed insurers and services of insurance/reinsurance agents and brokers.
- Payment of royalties.
- Reorganisation of a legal entity (merge, spin-off, accession, division, and change of legal form).
- Transit of cargo and passengers through the Ukrainian territory and services related to such transit.
- Supply and import of goods and services within international technical assistance projects or import of humanitarian aid.

VAT registration

Tax registration as a VAT payer is compulsory if the volume of an entity's taxable transactions exceeds the compulsory registration threshold. The current registration threshold is 1 million Ukrainian hryvnias (UAH) for the past 12 consecutive months. An entity qualifying as a taxable entity should register with the tax authorities at the place of its location and obtain a VAT registration number.

Voluntary VAT registration is available prior to achievement of the mentioned threshold. The application for VAT registration may be submitted simultaneously with the application for the state registration of the business entity.

There is no mechanism for a non-resident to register for VAT purposes without a PE in Ukraine. Accordingly, any Ukrainian VAT incurred by a non-resident is non-recoverable.

Electronic VAT administration

A special electronic administration system, which includes VAT accounts for all VAT payers in the State Treasury, is used for settlement of VAT to the budget. Both VAT output and VAT input should be reflected in this system. For these purposes, VAT accounting documents (VAT invoices) are issued electronically and are subject to mandatory registration by tax authorities.

The aim of this system is to make VAT input of the customers (i.e. VAT payers) guaranteed by payment of VAT liabilities by the suppliers. VAT input on domestic purchases can be recognised by the taxpayer only if the supplier issued a duly registered VAT invoice. In order to register a VAT invoice, the supplier should have sufficient balance in the electronic VAT administration system (e.g. sufficient amount of input

Ukraine

VAT). Otherwise, it may be required to transfer cash to the VAT account (i.e. to prepay its VAT liabilities).

VAT recovery and refunds

Generally, VAT incurred by a registered entity on the purchase and/or importation of goods and services used for the purpose of its own business (except for VAT incurred in relation to exempt supply) may be recovered by way of a credit against output VAT. If the VAT credit exceeds VAT output, a VAT refund is available in the form of a cash payment.

VAT refunds should be performed in a chronological order based on sequence of claims reflected in two registers maintained by the tax authorities and published on their official website. One register is prescribed for eligible exporters, while claims made by other taxpayers are reflected in the second register.

A VAT refund should be provided within 40 calendar days following the deadline for submission of the VAT return.

VAT returns

VAT returns must be filed by the taxpayer on a monthly basis in electronic form. Monthly tax returns are due within 20 calendar days following the end of the reporting month. The amount of tax payable is assessed on the basis of tax returns and is due within ten calendar days following the deadline for filing the relevant tax returns.

VAT liabilities are paid to the budget through a special VAT account based on the registers submitted to the State Treasury by the tax authorities.

Customs duty

Customs duty is payable by the importer upon import of the goods into Ukraine. Customs duty rates are established by the Customs Tariff. Currently, there are two duty rates: relieved and full rates. Relieved rates of duty apply to goods originating from World Trade Organization (WTO) countries and countries that have granted Ukraine 'most favoured nation' trade status. Full rates of duty apply to the goods originating from all other countries or where the country of origin cannot be determined (is unknown).

Starting 1 January 2016, Ukraine cancelled the additional import fee that was temporarily introduced in February 2015 (10% for agricultural products and 5% for other products).

Ukraine has concluded free-trade agreements (FTAs) with all countries/members of the European Union (EU), Commonwealth of Independent States (CIS), European Free Trade Association (EFTA) countries, and such countries as Georgia, Macedonia, and Montenegro. These agreements allow many goods to be imported into Ukraine duty-free (or with reduced rates of duty), subject to compliance with preferential rules of origin.

Due to political issues, Russia and Ukraine currently suspended the FTA between each other and introduced an embargo on import of selected goods (mostly on agrarian products and foods).

Russia also introduced some transit restrictions on goods coming from Ukraine.

Ukraine has no export duties except on natural gas, scrap metal, livestock, rawhide, barley, and certain oil seeds.

Excise taxes

Excise tax applies to certain goods imported to or produced in Ukraine. Excisable goods include ethyl alcohol, alcoholic beverages, beer, tobacco and tobacco products, cars, car bodies, motorbikes, electricity, liquefied gas, petrol, diesel fuel, other fuel material, and electric power.

The rates of excise tax can be *ad valorem* (a percentage of the value of the goods), specific (in monetary units per unit of goods), or combined.

A special local 5% excise tax applies to retail sales of alcoholic drinks, beer, and tobacco products, and of EUR 0.042 per 1 litre of fuel (i.e. petrol, diesel fuel, or gas).

Starting March 2016, Ukraine introduced a special electronic administration system for excise tax on fuel (one month testing period following full implementation). This system is aimed to control income and outcome flows of fuel in the market. The system requires entities to issue and register excise accounting documents (excise invoices) electronically on each sale operation of the fuel.

Tax on real estate other than land plots (real estate tax)

Owners of residential and non-residential property in Ukraine (both individuals and legal entities, including non-residents) are subject to local real estate tax (RET). The tax base is determined based on the size of the living space of a real estate asset.

Some types of property are exempt from RET, for example:

- Industrial buildings (i.e. production buildings, workshops, storehouses of industrial entities).
- Buildings and facilities of agricultural producers, which are intended for use for agricultural activity.
- Non-residential premises that are used by small and medium business entities, conducting their activities at 'small architectural structures' (e.g. kiosks, stalls, pavilions) and markets.
- Property owned by state authorities and the non-profit organisations established by them, etc.

The RET rate is set by the local government but generally cannot exceed 3% of the minimal salary per square metre (for 2016, the maximum is UAH 41.34 per square metre).

RET paid by legal entities is available as a credit against CIT liabilities.

Land tax

Land tax is a local tax and assessed annually for the following year and is paid monthly in equal instalments by the owners or users of the land. The rate of land tax depends on the category, location, and the existence of a state valuation for each particular land plot.

Transport tax

Starting from 1 January 2016, a local transport tax shall be charged on owners of passenger cars with an average market value exceeding 750 minimal salaries (i.e. UAH 1.03 million) and not older than five years.

A tax of UAH 25,000 for each car per year shall be paid by the car owner.

Stamp duty

Stamp duty is imposed on certain actions, including the notarisation of contracts and the filing of documents with the courts. In most cases, the amounts involved are nominal.

Operations carried out at commodity exchanges and the sales of real estate incur a stamp duty of 1%.

Special Pension Fund charges

The following special charges are payable to the State Pension Fund:

Ukraine

- 3%, 4%, or 5% charge on the value of a new car, which is first subject to registration with the state authority (state traffic inspectorate), depending on the said value (for the year 2016, the following criteria is applicable: up to UAH 219,450, 3%; above UAH 219,450, but not more than UAH 385,700, 4%; above UAH 385,700, 5%).
- 1% charge on the acquisition of real estate payable by individuals and legal entities that purchase real estate.
- 7.5% charge on mobile communication services.
- 10% charge based on the value of precious metal contained in jewellery during its marking on the public enterprises of assay control.
- 2% charge on the amount of foreign currency purchased in cash by individuals.

Charges on environmental pollution

Environmental pollution charges (ecological taxes) are imposed on any legal entity that discharges contaminants into the environment (air or water) or disposes of waste. The actual rate depends on the type and toxicity of each contaminant.

Charges on environmental pollution are deductible for CIT purposes.

Charge for subsoil usage (rent)

Companies engaged in extracting mineral resources in Ukraine, regardless of the form of their ownership, are liable for a charge for use of subsoil.

Rent payment for subsoil use is calculated as follows:

= Value of extracted mineral resource * Cost of respective unit of extracted mineral resource * Tax rate (%) * Adjustment coefficient

The value of extracted mineral resources is determined as the greater of the following two calculation methods:

- The actual taxpayer's selling prices.
- The taxpayer's costs increased by the established profitability coefficient.

Specific rules apply in determining the selling prices for extraction of oil, condensate, natural gas, and iron ore.

Adjustment coefficients may apply to the rent payment for subsoil use rates depending on the type of minerals and conditions of extraction. For example, coefficient 0.25 will be applied to the tax rate for iron ore extracted by underground mining methods with a depth of over 300 metres for the enrichment of magnetite iron content of less than 35%.

In 2016, tax rates for oil and condensate are 45% (if explored from a depth of less than 5,000 metres) and 21% (if explored from a depth of more than 5,000 metres), for natural gas are 29% (if explored from a depth of less than 5,000 metres) and 14% (if explored from a depth of more than 5,000 metres), and for iron ore are 8%.

Charges for the use of subsoil are deductible for CIT purposes.

Payroll taxes

Employers and other business entities that pay income to individuals are defined as tax agents and are responsible for withholding personal income tax (PIT), military tax, and mandatory unified social contribution (USC) and remitting them to the state.

Unified social contributions (USCs)

Employers (including representative offices of foreign companies in Ukraine) are required to pay USC in respect of their employees. USC applies to all salaries paid through the payroll of a Ukrainian entity or a Ukrainian representative office of a foreign entity, as well as remuneration paid to individuals under civil agreements.

Starting from 2016, the general USC rate (payable by the employer) is 22% (except for special decreased rates for contributions regarding disabled people, etc.), which applies to gross remuneration. The USC accrued by the employer is deductible for CIT purposes.

The taxable base for contributions (both employee and employer) is capped. For 2016, the cap is set at 25 times the subsistence minimum set for able-bodied individuals (based on the subsistence minimum valid as of 1 January 2016, the cap is UAH 34,450 per month).

Employees are relieved from paying of USC starting from 1 January 2016.

Other local taxes

According to the Tax Code, there are other local taxes that may be levied at the discretion of the local authorities (i.e. vehicle parking place duties, tourism duty).

Branch income

Domestic branches or other separate units are not treated as separate taxpayers for CIT purposes.

In Ukraine, it is not currently possible to register a branch of a foreign legal entity. A foreign company may set up a representative office in Ukraine, which is similar to an unincorporated branch. A non-resident company conducting business activities via a representative office is deemed to carry out business in Ukraine through a PE and may be subject to CIT at the standard rate unless protected by a DTT. When a foreign company conducts business in Ukraine through a PE, the taxable income should be determined on the same basis as for domestic entities. If the PE has no separate accounts, the taxable income may be determined as 30% of the sales proceeds attributed to the PE (the income derived in respect of activities in Ukraine).

Distributions made by a PE (from after-tax income) to its head office should not trigger any further taxation in Ukraine, provided that the head office is in a jurisdiction that has an effective DTT with Ukraine.

Income determination

The Tax Code determines taxable profits as net profits before tax (NPBT) as per accounting records, either Ukrainian statutory or International Financial Reporting Standards (IFRS), and adjusted for 'tax differences'.

Taxpayers with prior year annual income equal to or less than UAH 20 million (net of indirect taxes) may opt out of making the adjustments. Note that they do remain eligible for loss carryforward allowances (*see the Deductions section*).

Inventory valuation

A taxpayer is entitled to adopt any of the methods of inventory valuation prescribed by financial accounting rules, namely: the first in first out (FIFO) method, weighted average methods, identified cost of unit of goods, normative cost, or sale price. The last in first out (LIFO) method does not apply in Ukraine.

Capital gains on the sale of property

Income from the sale of property (including buildings and land plots) should be recognised according to financial accounting rules.

Ukraine

Income from securities

Profit from trading in securities is taxable at the standard CIT rate. Incurred losses are non-deductible, but may be carried forward to offset future profits from trading in securities without any limitations.

The same rules apply for both listed and non-listed securities.

Dividend income

Dividends received by a Ukrainian entity from another Ukrainian entity (CIT payer or person operating within group 4 of the simplified [unified] tax regime) are exempt from CIT. Dividends received by Ukrainian companies from foreign companies are not exempt from CIT.

Companies paying dividends are required to pay advance CIT on payment of dividends (ATD) at the standard rate, unless the dividends are paid to individuals or out of received dividends (with some other exceptions). ATD applies only to the portion of dividends that exceeds profits of the respective dividend year for which CIT is already paid.

ATD can be used to meet subsequent CIT liabilities. If ATD is not used in the year the dividend is paid, it is carried over to future years, but cannot be refunded.

Interest income

Interest received by taxpayers is included in their taxable income on a general basis according to financial accounting rules.

Rent/royalties income

Income from rent/royalties received by taxpayers is included in their taxable income on a general basis according to financial accounting rules.

Foreign exchange gains/losses

Realised and non-realised foreign exchange gains/losses are generally treated as taxable income/deductible expenses according to financial accounting rules.

Other significant items

Ukrainian tax legislation does not provide special tax treatment for bribes, kickbacks, or illegal payments.

There are no special tax accounting rules for interest-free loans or financial aid from non-residents.

Foreign income

Foreign income is taxed under the general rules, and there are no special rules regarding anti-deferral or unremitted earnings.

Deductions

Depreciation and amortisation

Assets whose values are more than UAH 6,000 that have a useful life exceeding one year are required to be depreciated for tax purposes. Depreciation is determined on a monthly basis and is computed using the following methods:

- Straight-line.
- Reducing balance.
- Method of accelerated reduction of a residual value.
- Cumulative.

The production-based method of amortisation is not allowed for tax purposes.

Fixed assets are divided into 16 groups according to their statutory minimal useful life. The useful life of fixed assets may be extended by a taxpayer.

There are no special rules prescribed for tax accounting of repair costs. Ukrainian statutory or IFRS rules should apply.

The following intangible assets may be amortised using one of the above mentioned methods over the period of an asset's lifetime as defined in the documents certifying the rights to the intangibles and considering the minimum period set by the law:

- Rights to use natural resources.
- Rights to use property.
- Rights on intangible assets.
- Technology, know how (not less than five years).
- Copyrights (not less than two years).
- Other intangible assets.

Taxpayers are entitled to set the amortisation period of the intangible assets on their own, but it must not be less than two years and not more than ten years of continuous operation (this only applies when the documents establishing the right to use do not specify a term for the use).

Goodwill

Amortisation of goodwill is not permitted (i.e. not deductible) for tax purposes.

Organisational and start-up expenses

There is no limitation for deduction of organisational and start-up expenses incurred prior to the entity's registration (accounting rules should apply).

Research and development (R&D) expenses

R&D expenses are deductible according to financial accounting rules.

Interest expenses

Interest paid is generally deductible for CIT purposes, but the deduction of interest expense in favour of non-resident related parties is limited according to the thin capitalisation rules (*see Thin capitalisation in the Group taxation section*).

Bad debt

Based on the current wording of the Tax Code of Ukraine, bad debts could be treated as non-deductible.

Loan loss provisions (LLPs)

Banks and other financial institutions create LLPs according to IFRS.

The deductibility of the LLPs is restricted to the lower of the following limits:

- 20% (25% for 2016) of the total value of assets subject to provisioning, and
- the credit risk limit set by the National Bank of Ukraine (other authority for financial institutions).

Only debts that qualify as bad debts under the Tax Code can be written-off at the expense of the LLPs for tax purposes. The amount of the LLPs used for the write-off of non-qualifying debts should be added back to increase the taxable profits (decrease the loss).

Ukraine

Because of the new rules effective from 1 January 2015, the Tax Code also prescribes the transitional provisions for the LLPs. The positive (negative) difference between the LLPs calculated according to the previous edition of the Tax Code as of the end of 2014 and under the new rules as of 1 January 2015 can be carried forward over the next three years in equal parts.

Other reserves (provisions)

Provisions for vacation and salary payments are allowed. Other provisions for future costs (i.e. warranty, contingent liabilities, etc.) are disallowed. Respective expenses covered by these provisions (except vacation and salary payments) are deductible when incurred.

Charitable contributions

Only 70% of payments for goods or services to non-profit organisations (except budgetary ones) is tax deductible.

The deductibility of the costs of goods or services supplied for free to non-profit organisations is limited by 4% of the previous year's net profit.

Pension expenses

The obligatory Ukrainian social security insurance contributions, including state pension contributions charged on payroll expenses, are deductible for employers.

There are no limitations prescribed for the deduction of the employer's payment to non-state pension organisations (financial accounting rules should apply).

Payment for directors

Payments (including bonuses) relating to business are normally deductible payments.

Fines and penalties

There are no limitations prescribed for deduction of fines and penalties (financial accounting rules should apply).

Taxes

CIT, PIT, WHT/remittance taxes, and VAT incurred on purchases are not deductible. VAT is deductible if it cannot be offset against output VAT. Other taxes are generally deductible in full.

Other significant items

There is no requirement to prove the connection of costs to the company's 'business activities'. The exception is the need to differentiate between business and non-business fixed assets.

General requirements for the documentation of the transactions for accounting needs (i.e. contracts, acts of acceptance, etc.) will apply for the substantiation of expenses for tax purposes.

Net operating losses

Losses can be carried forward without limitations.

Ukrainian tax legislation does not provide for refunds for losses carried back.

Payments to foreign affiliates

The following rules need to be followed with regard to payments to foreign affiliates:

- Only 70% of payments for goods or services to residents of low tax jurisdictions is tax deductible.

- Deduction of royalties paid to a non-resident is limited to royalty income plus 4% of net income of the previous year.
- Royalties paid to (i) non-beneficial owners, (ii) low tax jurisdictions, (iii) non-residents that are exempt from tax on royalties in the country of their residence, and (iv) non-residents for trademarks originated from Ukraine are not tax deductible.

The above limitations can be waived if a taxpayer confirms the market level of payments in accordance with the transfer pricing rules (even if the transactions are not controlled for transfer pricing purposes).

Group taxation

In Ukraine, each legal entity is taxed individually.

Transfer pricing

The transfer pricing rules apply for CIT purposes only. The list of controlled transactions for transfer pricing purposes is as follows:

- Business transactions that have an impact on taxable profits, with related party non-residents of Ukraine.
- Cross-border business transactions on sale of goods through non-resident commissionaires.
- Business transactions that have an impact on taxable profits, with residents of jurisdictions determined by the Cabinet of Ministers of Ukraine (CMU) on the following criteria:
 - States (territories) where the CIT rate is less than the Ukrainian rate by 5%.
 - States that do not have international agreements with Ukraine containing provisions on exchange of information.
- If within a chain of business transactions between related parties (tax resident of Ukraine and a non-resident), the ownership before transferring from one counterparty to another transfers to a non-related intermediary, these cross-border transactions between related parties are considered to be controlled if such intermediary does not perform significant functions, does not use significant assets, and does not bear significant risks in respect of such transactions.

Transactions with the same counterparty are considered as controlled if the total annual amount of the transactions with one counterparty (calculated according to accounting rules) exceeds UAH 5 million (net of indirect taxes), provided the total annual income (calculated according to accounting rules) of the taxpayer from any types of activity exceeds UAH 50 million (net of indirect taxes).

Some transactions are considered at arm's length (i.e. transactions in which prices are subject to state regulation, transactions subject to mandatory valuation, transactions in which prices are determined by auction, transactions on forced sale of collateral, etc.) if the conditions of transactions meet respective legislation requirements.

There are five methods for determining the market price:

- Comparable uncontrolled price (CUP).
- Resale price method.
- Cost plus method.
- Net profit (margin) method.
- Profit split method.

The CUP method is the primary transfer pricing method to be used over all other methods. If this method is not relevant and there is an equal reliability of the 'resale

Ukraine

price' method or the 'cost plus' method as well as the net profit (margin) method or profit split method, the first two methods are given a priority.

The CUP method should be applied for cross-border transactions (with the residents of the jurisdictions established by the CMU) with commodities quoted on the commodity exchange; otherwise, the profitability of all counterparties involved in the chain of business transactions has to be disclosed.

For transfer pricing control purposes, the following sources of information can be used:

- Information regarding comparable transactions of the taxpayer, as well as one's counterparty, with non-related parties.
- Any publicly available sources of information that provide information on comparable transactions.

All taxpayers with controlled transactions with one counterparty exceeding UAH 5 million (net of indirect taxes) should file a report on controlled transactions by the first of May (each year) of the year following the reporting year.

All taxpayers performing controlled transactions should have transfer pricing documentation. Transfer pricing documentation, substantiating the arm's-length nature of prices, should be submitted only upon the request of the tax authorities within one month after receiving the request. Transfer pricing documentation should be prepared in Ukrainian in any format (either one document or a set of documents); however, the precise rules regarding the content of the documentation have to be followed.

The tax authorities will monitor the transfer pricing documentation provided without the involvement of the taxpayer.

The Tax Code of Ukraine also provides for a specialised transfer pricing audit (the tax authorities are not allowed to examine pricing in controlled transactions during normal full-scope tax audits). Its duration cannot exceed 18 months, but prolongation is possible for another 12 months. Every six months of the transfer pricing audit, the tax authorities should update the taxpayer with the status of the transfer pricing audit.

The tax authorities cannot conduct more than one transfer pricing audit of one controlled transaction within one calendar year (for each transaction), although other (non-transfer pricing) tax audits can be conducted during this period. The statutory limitation period for transfer pricing assessments is seven years.

The Tax Code of Ukraine defines the following penalties for non-compliance with transfer pricing rules:

- 3% of the controlled transaction value for the failure to file transfer pricing documentation (limited to 200 minimum salaries [UAH 275,600] for all controlled transactions).
- 1% of the controlled transaction value for the failure to declare the controlled transaction in the report on controlled transactions (limited to 300 minimum salaries [UAH 413,400] for all unreported controlled transactions).
- 300 minimum monthly salaries (UAH 431,400) for failure to file (or late filing) the report on controlled transactions.

Payment of such penalties does not exempt the taxpayer from the obligation to file a transfer pricing report and/or transfer pricing documentation.

Large taxpayers have the right to enter into Advance Pricing Agreements (APAs) with the State Fiscal Service of Ukraine in order to agree on certain terms of controlled transactions in advance.

Thin capitalisation

The following rules apply to legal entities whose debts to non-resident related parties exceed equity by 3.5 times (10 times for financial institutions/leasing companies):

- The deduction of interest expense for these taxpayers is limited by the amount of 50% of earnings before interest, taxes, depreciation, and amortisation (EBITDA).
- The non-deductible portion of interest can be carried forward indefinitely. However, each following year the residual amount of such interest should be reduced by 5%.
- For the purposes of thin capitalisation rules, debt includes any loan, deposit, repo transactions, financial leasing, and any other indebtedness, regardless of its legal form.

Controlled foreign companies (CFCs)

There are no specific CFC rules in Ukraine, but significant development of local legislation in this area is expected in 2016 (i.e. implementation of some initiatives from the base erosion and profit shifting [BEPS] action plan).

Treatment of inter-company items

Ukrainian tax legislation provides the following treatment for inter-company items:

- Dividends received by a Ukrainian entity from another Ukrainian entity (CIT payer or person operating within group 4 of the simplified [unified] tax regime) are exempt from CIT. Dividends received by Ukrainian companies from foreign companies are not exempt from CIT.
- There is no limitation for the deduction of expenses in relation to the financing of management bodies, including holding companies.
- The deduction of cost-sharing and similar intra-group payments, other than remuneration for services actually rendered, is not specifically limited for CIT purposes (accounting rules should apply).

In addition to the above:

- The deduction of royalties paid to non-residents is limited to royalty income plus 4% of net income of the previous year.
- Royalties paid to (i) non-beneficial owners, (ii) low tax jurisdictions, (iii) non-residents that are exempt from tax on royalties in the country of their residence, and (iv) non-residents for trademarks originated from Ukraine are not tax deductible.
- The above limitations for royalties can be waived if a taxpayer confirms the market level of payments in accordance with the transfer pricing rules (even if the transactions are not subject to these rules).
- Transactions for the receipt (provision) of financial aid between a taxpayer and its branches and other separate units without legal entity status located in Ukraine shall not affect their taxable income or deductible expenses.
- Interest on loans is limited (*see Thin capitalisation above*).

Tax credits and incentives

Currently, the Tax Code does not provide for any significant incentives for CIT payers in certain industries/activities.

Simplified (unified) tax regime

Entities and individuals (i.e. private entrepreneurs) are entitled to use a simplified (unified) tax regime (with exemption from CIT) if certain requirements are met.

Groups 1 and 2 of the simplified (unified) tax regime are available for private entrepreneurs only, and group 3 for both private entrepreneurs and legal entities

Ukraine

(depending on the types of activities, the level of income [only up to UAH 5 million, except agricultural producers], and the number of employees' criteria).

This regime foresees a low effective tax rate (up to 10% of the minimal salary per month for a private entrepreneur or up to 5% of turnover for a private entrepreneur/an entity of the third group) and easier reporting for small businesses. However, specific types of business activities are prohibited under this tax regime (*inter alia*, transactions with certain excisable products, exploration/production/sale of precious metals and stones, company management and communication services).

Taxpayers of group 1 may not use cash recorders in their activity. Taxpayers of group 2 and 3 are obligated to start using cash recorders from the quarter following the one when their turnover exceeds UAH 1 million.

The group 4 classification of the simplified (unified) tax regime is available for qualified agricultural producers.

Agricultural producers are entitled to use a very favourable tax regime (with exemption from CIT), provided certain requirements are met. The main criterion requires that income from the sale of their own agricultural products constitutes not less than 75% of their total gross revenue of the previous tax (reporting) year.

Under this regime, the amount of tax due depends on the size of the agricultural land plot owned or rented by the agricultural producers. Starting from 1 January 2016, the tax rates vary from 0.16% to 5.4%, apply to the normative monetary value of one hectare of agricultural land, and depend on the type of such land.

Foreign tax credit

Tax residents are allowed a credit for foreign taxes paid on income received abroad, provided there is a DTT between Ukraine and the relevant foreign state. The amount of foreign tax credit is limited to the amount of Ukrainian tax that would arise from the equivalent income in Ukraine. To claim a tax credit, the taxpayer requires an official confirmation of payment issued by the relevant foreign tax authority.

Withholding taxes

WHT must be remitted to the authorities no later than the date when the payment is made to the income recipient.

Passive income (dividends, interest, royalties) from Ukrainian sources that is paid to non-resident entities is generally subject to 15% WHT. Other payments, including payments for engineering services, lease payments, and agency and brokerage fees, are also subject to 15% WHT, but payments for most other services are not subject to withholding.

A 15% WHT rate applies to income on the sale of real estate and on profits from the sale of securities.

Payments for freight services (including sea freight) are subject to 6% WHT.

WHT rates may be reduced under a relevant tax treaty.

The non-resident recipient of income sourced in Ukraine must also be considered the beneficial owner of such income in order to benefit from the reduced tax rates under relevant tax treaties. According to the Tax Code, agents, nominee holders, and other intermediaries in respect of received income cannot be beneficial owners of income sourced in Ukraine, and, therefore, are not entitled to favourable treaty provisions.

Payments to non-resident persons for advertising services are not subject to withholding. However, the resident payer is required to pay, from its own funds, a 20% remittance tax based on the value of such services.

A resident payer is similarly required to pay, from its own funds, a 12% remittance tax if a payment is made to a foreign insurer or reinsurer whose rating of financial reliability does not meet the requirements set by the authorised state agency. Otherwise, 0% or 4% rates apply.

As taxes on advertising and insurance are levied on a resident party, they cannot be relieved using a tax treaty.

Notes

1. The ownership threshold for the non-portfolio rate is 10%, 20%, 25%, or 50%, depending on the specific provisions in the treaty.
2. Several treaties contain a rate of 0% on interest paid to or guaranteed by a government or one of its agencies.
3. If more than one rate is shown, this means that the rate will depend on the type of royalties paid.
4. The 18% rate applies to dividends from privileged shares or other fixed payments on shares, as well as to disguised employment income. Dividends received from a Ukrainian legal entity CIT payer (other than collective investment arrangement) are subject to the 5% rate.
5. The lower rate applies to interest paid on certain credit sales and on loans granted by a financial institution.
6. The treaties with Japan, Malaysia, and Spain were entered into by the USSR before it dissolved. Ukraine will continue to honour these treaties, unless they are superseded.
7. The lower rate applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, unless the indebtedness is between associated enterprises.

8. The 0% rate applies if the investor holds at least 50% of the capital of the company paying the dividends and the capital invested is at least 1 million United States dollars (USD); the payer of dividends should not operate in the field of gambling, show business or an intermediation business, or in auctions.
9. The 0% rate will apply if a French company or companies hold, directly or indirectly, at least 50% of the capital of the Ukrainian company, and the aggregate investments exceed 5 million French francs.
10. The lower rate applies to interest paid on any loan granted by a bank.
11. The 0% rate applies if the investor directly holds at least 50% of the capital of the company paying the dividends, and the capital invested is at least USD 300,000.
12. The 10% rate applies if the company receiving the dividend has, for an uninterrupted period of two years before the dividend is paid, owned at least 25% of the capital stock of the company paying the dividends.
13. The 5% rate applies if the capital invested is at least USD 50,000.
14. The 0% rate applies if the Swedish company directly holds at least 25% of the voting power of the company paying the dividends and at least 50% of the Swedish company is held by Swedish residents.
15. The 0% rate applies only if the royalties are taxable in the United Kingdom.
16. The 10% rate applies if the company receiving the dividend directly owns at least 25% of the capital stock of the company paying the dividends.
17. The 5% rate applies if the investor (other than partnership) being a beneficial owner holds at least 25% of the capital of the company paying the dividends.
18. The 5% rate applies if the investor, being a beneficial owner, holds at least 20% of the capital of the company paying the dividends.
19. The 5% rate on dividends applies if the investor holds at least 20% of the capital of the company paying the dividends or the capital invested is at least 100,000 euros (EUR). The 5% rate on royalties applies in relation to royalties on trademarks, patents, or know-how.
20. The 5% rate applies in the case of interest paid in connection with the sale on credit of industrial, commercial, or scientific equipment or on any loan granted by a bank.

Tax administration

Taxable period

The reporting year for companies generally follows the calendar year. The exception is for qualified agricultural manufacturers (other than on simplified [unified] tax), whose reporting period starts from 1 July of the current reporting year and ends on 30 June of the next reporting year.

Tax returns

Tax returns for CIT should generally be submitted on a quarterly basis, but some taxpayers will have to submit them annually (newly established, agricultural producers, and taxpayers with prior year annual income equal to or less than UAH 20 million [net of indirect taxes]).

Monthly returns (e.g. VAT) must be filed within 20 calendar days following the end of the respective reporting month.

Quarterly returns are due within 40 calendar days following the last day of the reporting quarter.

Annual returns (CIT) are due within 60 calendar days following the last day of the reporting year.

Taxpayers also have to submit financial statements to the tax authorities.

Resident companies and non-resident entities with a PE in Ukraine must keep records that comply with the tax rules.

Payment of tax

Taxes payable assessed on the basis of tax returns are due within ten calendar days following the deadline for filing the relevant tax returns.

Monthly advance CIT payments (MATP) introduced in 2013 are eliminated starting from 1 January 2016. As an exception, taxpayers will be required to pay an advance

Ukraine

CIT payment in the amount of 2/9 of the tax liability for three quarters of 2016 by 31 December 2016.

Penalties

The tax authorities will charge significant penalties for late filing, late payment, or understating tax liabilities.

Late payment of tax may result in a penalty in the amount of 10% of the underpaid amount for delays of up to 30 calendar days (20% if the delay exceeds this).

If the tax liabilities are understated, the amount of penalty depends on the frequency of violations (i.e. understatement of CIT and VAT liabilities, overstatement of VAT refunds) during a period of 1,095 consecutive calendar days. In particular: 25% for the first violation, 50% for the second violation and each subsequent violation related to the same taxes.

In addition to these penalties, late payment interest (LPI) is calculated by the application of a rate of 120% *per annum* of the prime rate of the National Bank of Ukraine, effective from the actual date of underpayment on the amount of additionally assessed tax liabilities for the whole period of underpayment.

If a taxpayer fails to withhold tax when required, a penalty of up to 75% of the deficient tax is imposed.

Potential criminal responsibility could be claimed against the taxpayer's management if the total amount of additional tax liabilities assessed by the tax authorities during the tax audit exceeds 500 times the minimal salary (UAH 725,000 starting from May for 2016). There are several options to close such criminal proceedings (the procedure should be properly managed from the legal perspective).

Tax audit process

The tax authorities may carry out scheduled audits once a year. Taxpayers must be notified of the audit in writing at least ten days in advance. In addition, the tax authorities may perform out-of-schedule audits in certain circumstances (e.g. if a taxpayer does not file tax returns on a timely basis or is reorganised or liquidated).

The tax authorities have the right to audit a taxpayer's accounting, correctness, and completeness of the calculation of NPBT according to the Ukrainian statutory or IFRS rules.

Transfer pricing audits are conducted on a separate basis.

Statute of limitations

Under Ukrainian tax legislation, a three year statute of limitations applies (1,095 days) on any outstanding Ukrainian tax liability, starting from the date a tax return is due to be filed and/or the date the tax is due to be paid, if assessed by the tax authorities. There is no limit on the statute of limitations in which an assessment may be made if a taxpayer has deliberately evaded taxation (if proven in court) or when a taxpayer fails to file a return.

The statute of limitations for transfer pricing controlled operations is seven years (2,555 days).

Tax advice

Tax advice may be sought from the tax authorities, who are required to issue such clarifications. Tax advice is not legally binding and may be challenged in court. A taxpayer may use the tax advice as guidance on the methodology to be applied by the

taxpayer. In practice, the tax advice often does not provide solid protection against future assessment of tax, but does protect from penalties.

Topics of focus for tax authorities

The tax authorities are focusing on the following major areas with regard to corporate taxpayer compliance with the tax rules effective before 1 January 2015:

- The business nature of any taxpayer's deductible expenses and their proper documenting for tax purposes.
- The deductibility of marketing, advertising, and promotional expenses.
- The deductibility of expenses that could be treated as financing of personal needs of individuals (e.g. housing, travel allowance, cost of education).
- Losses carried forward.
- Proper payment of advance CIT (either general or connected to payments of dividends).
- The deductibility of the fees paid for services from non-residents.
- Compliance with transfer pricing regulations.
- VAT refund issues.

Currently, a limited number of tax audits were conducted for the period after 2015. It is expected that the tax authorities will further focus their attention to the proper calculation of the tax base for CIT in accordance with the accounting rules (including timely documenting of expenses and their proper allocation between the periods) and proper application of tax differences, described above.

Other issues

Exchange controls

The key issues regarding Ukraine's current exchange control regulations are as follows:

- Trade-related settlements between residents and non-residents can be made in foreign currency and Ukrainian hryvnia.
- Payments in foreign currencies in the territory of Ukraine are subject to a National Bank of Ukraine (NBU) licence, except for payments for goods, works, services, and payment of salaries in the temporarily occupied territory of Ukraine.
- Salaries to Ukrainian staff must be paid in Ukrainian currency (but expatriate employees can be paid in hard currency). Expatriates are unable to receive hard currency (local) salaries in Ukrainian bank accounts.
- Foreign loans must be registered with the NBU before funds are remitted to Ukraine.
- The maximum allowable interest rates for foreign fixed rate loans in hard currency (inclusive of any fees and charges due under the loan agreement) are 9.8% *per annum* for loans up to one year; 10% *per annum* for loans for one to three years; and 11% *per annum* for loans over three years. For loans with floating interest rates, the maximum allowable interest rate is three months of the USD London Interbank Offered Rate (LIBOR) plus 7.5%.
- Proceeds from exports must be credited to the exporter's Ukrainian bank account in general within 180 days (within 90 days until 8 June 2016, we expect this to be prolonged) from the date of customs clearance (for goods) or the date of signing the act of acceptance (for services). Similarly, prepaid goods must be imported and cleared through customs in general within 180 days (within 90 days until 8 June 2016, we expect this to be prolonged) of payment. Failure to do so will result in a fine of 0.3% of the amount due or paid for each day of delay, but not more than the debt itself.
- Until 8 June 2016 (with possible prolongation), Ukrainian companies are generally obligated to exchange at the local market 75% of their foreign currency proceeds received from abroad (this restriction does not apply to making foreign investments into Ukraine starting from 11 May 2016). In order to enforce this limitation, the NBU

Ukraine

introduced a ban on offsetting receivables/payables in (i) hard currencies (e.g. US dollars, euros, Russian rubles [RUB]) regardless of the amount and (ii) other foreign currencies in the amount exceeding USD 500,000 under one agreement.

- Payments by Ukrainian business entities for services rendered by non-residents for amounts exceeding EUR 50,000 (annually) require confirmation from the Foreign Markets Monitoring Centre (FMMC) that the fee for the services does not exceed market prices. Provided the relevant documentation is in place, this should not delay payment. However, the process cannot be taken lightly, because no payment will be permitted if the FMMC rejects an application.
- Banks are required to report all requests for advance payments exceeding USD 50,000 to the NBU and cannot perform them for at least three operational days after informing the NBU. The NBU may reject such applications, in which case no payment can be made. The restriction does not apply to advance payments via a letter of credit, confirmed by a first-grade bank. Advance payments under import contracts exceeding USD 500,000 generally may be performed only via a letter of credit.
- Ban on purchase of hard currency at the expense of UAH loan funds (except purchase by individuals in order to repay a debt under retail hard currency loans).

A number of foreign currency transactions may be undertaken only if an individual licence has been obtained from the NBU. At the same time, the NBU introduced a ban on the transfer of foreign currency under most of the NBU's individual licences until 8 June 2016 (this may be further prolonged). As an exception, legal entities are still allowed to transfer funds under an NBU individual licence in the amount not exceeding USD 50,000 per month per licence.

Additionally, the following key limitations continue to apply until 8 June 2016 (with possible prolongation) within the 'stabilisation package', enforced by the NBU:

- The NBU introduced a ban on remittance of funds to foreign investors due to:
 - proceeds from the sale of corporate rights, decrease of the charter capital, or withdrawal from legal entities
 - the sale of Ukrainian securities (except state bonds and other bonds via a stock exchange), and
 - the payment of dividends (recently, the National Bank of Ukraine has issued a letter, according to which it plans to lift the current ban on payment of dividends (26 April 2016); however, this ban is still effective).
- The NBU prohibited remittance of foreign currency by resident guarantors (except based on an NBU individual licence).
- Residents may not undertake early repayment of loans/financial aid in foreign currency under agreements with non-residents.
- Ukrainian residents (except for individuals) cannot purchase foreign currency if they have more than USD 25,000 on their current and/or deposit accounts as well as on special balance accounts as a security under warranties/letters of credit in all banks (with certain exceptions).
- The purchase of cash foreign currency is allowed in an amount not exceeding the equivalent to UAH 6,000 per day in one bank (with certain exceptions).
- The transfer of foreign currency abroad by individuals is allowed in the amount not exceeding (with certain exceptions):
 - UAH 15,000 per day without opening a bank account.
 - UAH 150,000 per month from a bank account.
- Withdrawal of cash from bank accounts is limited to:
 - UAH 500,000 per day in Ukrainian hryvnia.
 - The equivalent of UAH 50,000 in foreign currency.
- Transfers from abroad may be paid in foreign currency in the amount not exceeding the equivalent to UAH 150,000 per day. If the amount of transfer exceeds this threshold, it should be credited to the bank account in foreign currency.

Choice of business entity

Generally, a limited liability company is the most widely used corporate vehicle in Ukraine for both residents and non-residents. A limited liability company has a simple registration procedure, is inexpensive, and is easy to maintain. It also provides more flexibility in terms of repatriating dividends from Ukraine.

There is no statutory fee for the state registration of newly established legal entities and individual entrepreneurs.

Business and tax treatment of intellectual property (IP)

Ukrainian laws concerning IP rights provide for a rather developed background for IP usage. Economic rights of authors and neighbouring rights owners may be assigned or licensed. Moral rights are not transferable. Tax treatment for IP transactions is subject to separate analysis on a case-by-case basis since the Ukrainian tax legislation provides different approaches depending on the nature of the concluded agreement. For instance, the transfer of IP may be treated as a sale of non-tangible assets, the provision of services, or a royalty agreement.

For tax purposes, the term 'royalty' does not include payments for the use of computer programs by the end user or for purchasing electronic copies of IP for final consumption.

Mergers and acquisitions (M&A) from a business and tax perspective

There are no specific laws regulating public takeovers or mergers in Ukraine.

The Ukrainian Tax Code provides some guidance on the tax regime for corporate mergers and acquisitions. CIT consequences of such transactions will depend on their accounting in accordance with the financial accounting rules. No VAT refund for the newly established company will be available in cash for 12 months after the transaction.

Legal regime of the Occupied Territory

Temporarily (for ten years), there is an established free customs zone on the territory of Crimea, which means that all goods delivered to/from Crimea will be subject to customs clearance by the Ukrainian customs authorities.

The general rules are as follows:

- Goods delivered from the mainland of Ukraine to Crimea are subject to customs clearance with payment of export duty (if any) and 0% VAT. For tax purposes, such supplies will be considered as an export.
- Goods delivered from Crimea to the mainland of Ukraine are subject to general import procedures with payment of import duty and VAT.
- Delivery of goods in both directions is subject to veterinary, phytosanitary, ecological, and other state control measures.

Legal regime of the anti-terrorism operation

Temporarily, for the period of the anti-terrorism operation, there are certain specific regulations in respect of legal entities and individuals residing and/or doing business in the territory of the anti-terrorism operation (certain areas of Donetsk and Luhansk regions). These rules include, in particular:

- Moratorium on penalties under loan obligations.
- Moratorium on audits by the state authorities.
- Release from payments for state and/or municipal property.
- Release from penalties for non-obtainment of foreign currency under export transactions within 180 (90) days (*see Exchange controls above*).

Ukraine

United States (US) Foreign Account Tax Compliance Act (FATCA) rules compliance

The United States and Ukraine have reached an agreement in substance with regard to implementing the US FATCA under Model 1 Intergovernmental Agreement (IGA), and Ukraine has consented to disclose this status. On 26 June 2014, Ukraine was included into the US Internal Revenue Services (IRS) list of the countries with the IGA being treated 'as effective' until it is officially signed by the parties. In accordance with this status, the text of such IGA has not been released and financial institutions in Ukraine are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

These developments further follow the Resolution of the Cabinet Ministers dated 22 April 2015 approving the text of the IGA and authorising the Ministry of Finance to sign it.

Under the IGA between Ukraine and the United States, Ukrainian financial institutions are obligated to annually report to the local competent authorities information about financial accounts held in Ukraine by US taxpayers or foreign entities in which US taxpayers hold a substantial ownership interest. This information will be further transferred to the US IRS.

Significant developments

There is a growing trend of tax reforms in the Middle East region, and this may result in changes to the tax laws in the United Arab Emirates (UAE).

Value-added tax (VAT)

The Gulf Cooperation Council (GCC) (of which the United Arab Emirates is a member state) is in the process of approving a common legal framework for the introduction of a VAT system. *See Value-added tax in the Other taxes section for more information.*

Municipality fee

In addition to a charge of 15 dirham (AED) per room per night, the Emirate of Abu Dhabi has introduced a municipality fee to be levied on hotel stays at a rate of 4% on the total value of the invoice starting 1 June 2016. *See Municipal or property tax in the Other taxes section for more information.*

Taxes on corporate income

The United Arab Emirates is a federation of seven Emirates: Abu Dhabi, Dubai, Sharjah, Ajman, Umm Al-Qaiwain, Ras Al-Khaimah, and Fujairah.

Currently, the United Arab Emirates does not have a federal corporate income tax (CIT) regime; however, most of the Emirates introduced income tax decrees in the late 1960s, and taxation is therefore determined on an Emirate-by-Emirate basis.

Under the Emirate-based tax decrees, CIT may be imposed on all companies (including branches and permanent establishments [PEs]) at rates of up to 55%. However, in practice, CIT is currently only enforced in respect of corporate entities engaged in the production of oil and gas or extraction of other natural resources in the United Arab Emirates.

In addition, some of the Emirates have their own specific banking tax decrees, which impose CIT on branches of foreign banks at the rate of 20%.

U

Corporate residence

Tax residence under the tax decrees of the various Emirates is based upon the French concept of territoriality. Basically, the French territoriality concept taxes profits based on territorial nexus and does not tax profits earned outside the country.

Permanent establishment (PE)

For non-resident companies, the CIT liability will depend on the existence of any kind of PE. Most of the Emirate tax decrees include a definition of a PE that generally includes

United Arab Emirates

a branch, management or other fixed place of business, and presence through an agent that has and habitually exercises authority to conclude contracts on behalf of such corporation. The definitions need to be considered on a case-by-case basis under the relevant and applicable tax decree.

Other taxes

Value-added tax (VAT)

There is currently no VAT or similar tax system in the United Arab Emirates. The Gulf Cooperation Council (of which the United Arab Emirates is a member state) is in the process of approving a common legal framework for the introduction of a VAT system. This common VAT framework will form the basis for a national VAT system that will be implemented in each of the GCC states. Each member state would still be required to issue its own national VAT legislation, and will have the authority to determine specific VAT rules in certain areas.

The objective of the common VAT framework is to introduce a standard fully fledged VAT system in each member state. Accordingly, VAT would be charged on importation and on supply of goods and services at each stage of the supply chain.

The UAE Minister of State for Financial Affairs announced in February 2016 that VAT is expected to be introduced at a rate of 5% with some limited exemptions on items such as basic food items, healthcare, and education. The planned implementation date for the United Arab Emirates is 1 January 2018, but the law and details of the VAT system have yet to be published.

Customs duties

Generally, a customs duty of 5% is imposed on the cost, insurance, freight (CIF) value of imports. Other rates may apply to certain goods, such as alcohol and tobacco, and certain exemptions may also be available.

Excise taxes

Currently, there are no separate excise taxes levied in the United Arab Emirates. The GCC member states have been discussing the possible introduction of excise taxes applicable to certain commodities, but there is no official announcement on implementation date.

Municipal or property tax

Most Emirates impose a municipality tax on properties, mostly by reference to the annual rental value. It is generally the tenants' obligation to pay the tax. In some cases, separate fees are payable by both tenants and property owners. For example, in the Emirate of Dubai, the municipality tax on property is currently imposed at 5% of the annual rental value for tenants or at 5% of the specified rental index for property owners.

Further, a registration fee may also be levied on transfer of ownership of land or property. For example, a land registration fee is levied in the Emirate of Dubai at a rate of 4% of the sale value of the property (a cost generally shared between the buyer and seller), payable to the Dubai Land Department. In Dubai, the registration fee may also apply on the transfer of shares in real property holding companies.

These levies are imposed and administered differently by each Emirate.

In addition to a charge of AED 15 per room per night, the Emirate of Abu Dhabi has introduced a municipality fee to be levied on hotel stays at a rate of 4% on the total value of the invoice starting 1 June 2016. Hotels and similar establishments are responsible for collecting and remitting such fee to the Abu Dhabi Tourism and Culture Authority.

Stamp taxes

Currently, there are no separate stamp taxes levied in the United Arab Emirates.

Hotel tax and tourism levies

Most Emirates impose a hotel tax of 5% to 10% on the value of hotel services and entertainment. In addition, there may be tourist fees/charges of up to 10% levied for undertaking certain tourist/entertainment activities (e.g. events and shows).

These levies are imposed and administered differently by each Emirate.

A Tourism Dirham fee is levied in the Emirate of Dubai. This is a charge on hotel guests and tenants of hotel apartments ranging from AED 7 to AED 20 per room per night. In the Emirate of Abu Dhabi, a tourism fee of 6% is levied on the cost of the total stay.

Payroll taxes

Since there is currently no personal income tax (PIT) or payroll tax regime in the United Arab Emirates, there is no withholding obligation of PIT on the employers.

Social security contributions

There is a social security regime in the United Arab Emirates that applies to UAE and GCC national employees only. In most Emirates, and for a UAE national employee, social security contributions are calculated at a rate of 17.5% of the employee's gross remuneration as stated in the employment contract, regardless of free trade zone (FTZ) tax holidays. Out of the 17.5%, 5% is payable by the employee and the remaining 12.5% is payable by the employer. For other GCC nationals working in the United Arab Emirates, employee contributions are determined in accordance with social security regulations of their home country.

The liability to withhold is on the employer.

These levies and rates may be administered differently by each Emirate, and the Emirate government may also make additional contributions.

Branch income

As each Emirate has a different CIT decree, the decree of each Emirate must be consulted to determine the treatment of branches of foreign corporations.

In certain Emirates, branches of foreign banks are governed by special banking tax decrees, where they are taxed at 20% of their adjusted taxable income.

Income determination

The tax decrees of the various Emirates levy taxation on financial accounting profits. The tax decrees may provide for additional adjustments in specific situations. Currently, these adjustments may not be too relevant given that CIT is not imposed for most companies (except for upstream oil and gas companies and branches of foreign banks having operations in the Emirate) in the United Arab Emirates.

Deductions

Deductions are determined based on accounting principles and the tax decrees of the various Emirates. Currently, these deductions may not be too relevant given that CIT is not imposed for most companies (except for upstream oil and gas companies

United Arab Emirates

and branches of foreign banks having operations in the Emirate) in the United Arab Emirates.

Group taxation

The United Arab Emirates does not currently permit group taxation.

Tax credits and incentives

The United Arab Emirates has many free trade zones that offer numerous incentives in the form of tax holidays/exemptions from CIT, PIT, and customs duties.

Free trade zones (FTZs)

Currently, there are over 30 FTZs (and business parks) in the United Arab Emirates, each having its own regulations. Businesses (and their employees) established in FTZs are generally eligible for guaranteed tax holidays for 15 to 50-year (generally renewable) periods. The FTZs also offer exemption from customs duties. The laws granting these holidays and exemptions are not consistent across the various FTZs. Each FTZ therefore needs to be considered separately.

Withholding taxes

There are currently no withholding taxes (WHTs) applicable in the United Arab Emirates.

Tax treaty network

UAE national individuals and UAE resident corporate taxpayers have access to an extensive and growing tax treaty network. These treaties may not be immediately relevant for obtaining relief from UAE taxation (as the UAE does not levy WHT or other forms of non-resident taxation); however, they may continue to allow for relief from tax in foreign countries. *For completeness, the treaties currently in force are listed in the Withholding taxes section of the United Arab Emirates' Corporate tax summary at www.pwc.com/taxsummaries.*

Tax administration

Most companies operating in the United Arab Emirates (except upstream oil and gas companies and branches of foreign banks) are currently not required to file tax returns in the United Arab Emirates.

Significant developments

Extensive and far reaching reforms to the United Kingdom's (UK's) corporate tax system have been made in recent years. The reforms have a stated aim of "creating a tax system that is easy to understand, simple to engage with, and hard to evade, [and] successfully supports investment in business, as well as those who work hard and save" (Financial Secretary to the Treasury, December 2015). The main areas of reform have included:

- Reductions in the rate of corporation tax.
- Redefining the corporate tax base, including aspects of the Organisation for Economic Co-operation and Development (OECD) base erosion and profit shifting (BEPS) project.
- Policy and practice concerning tax evasion and unacceptable tax avoidance.
- Administration and collection, including plans for increased use of digital systems.

Because the UK legislative process can lag behind the announcement of proposals, certain changes are already law, others are very likely, or practically certain, to become law, whilst others are issues announced for wider consultation and future enactment into law.

Most of the reforms to tax rules are announced in November/December and March each year before becoming law in the Finance Act, usually in the following July. In November 2015 and March 2016, the government announced further reforms to be included in the 2016 legislative process, together with proposals and consultations for reform. These changes are anticipated to become law in September or October 2016. Any reforms of significance, and proposals for important reforms, included in those processes, are discussed below.

The information included below assumes the continuance of the UK's membership in the European Union (EU).

Changes that have taken effect in the past year

Reforms that took effect in the past year include:

- Annual Investment Allowance is 200,000 pound sterling (GBP) from 1 January 2016.
- For acquisitions of goodwill and customer-related intangible assets on or after 8 July 2015, tax deductions for amortisation, and certain other charges, have been abolished.
- Bank levy is reduced from January 2016. An 8% supplementary tax is charged on bank profits above GBP 25 million from 1 January 2016.
- A range of specific and narrow anti-avoidance rules were introduced.
- Her Majesty's Revenue and Customs (HMRC) were granted additional powers aimed at accelerating tax payments where payments are disputed or delayed.
- Legislation came into force on 18 March 2016 introducing a new country-by-country (CbC) reporting requirement for certain large groups for accounting periods commencing on or after 1 January 2016.

United Kingdom

Changes enacted but not yet in force

The rate of corporation tax will reduce to 19% from April 2017, and it is proposed to reduce to 17% from April 2020.

From no earlier than 1 April 2017, a reduced rate of corporation tax for businesses based in Northern Ireland may be introduced.

Consultations and proposals - ongoing

The most significant proposals, which include announced proposals and those in draft legislation, and those subject to consultations include:

- Introduction of earlier dates for quarterly instalment payments of corporation tax for the largest of companies (broadly, over GBP 20 million in taxable profits). Payments will be required in the third, sixth, ninth, and 12th months for accounting periods starting on or after 1 April 2019.
- Introduction from April 2017 of an apprenticeship levy of 0.5% of total payroll costs of employers in excess of GBP 3 million *per annum*.
- Continued reform of the collection of unpaid or disputed tax liabilities.
- Proposed reform effective from April 2016 of the treatment of company distributions received by individuals, focused on discouraging transactions that result in advantageous capital extraction of profits, rather than income.
- Apart from Diverted Profits Tax (DPT), regarded by many as a BEPS-related measure, and the commitment to introduce reporting to HMRC of specified 'country-by-country template' information (BEPS Action 13) for accounting periods beginning on or after 1 January 2016, the United Kingdom is currently implementing a number of recommendations arising from the G20/OECD BEPS Action Plan. Legislation to address hybrid mismatch arrangements (BEPS Action 2) will be introduced in 2016 to take effect from 1 January 2017. There is also to be reform to the patent box, including closure of the existing arrangement to new entrants from 30 June 2016 (BEPS Action 5). *See the Tax credits and incentives section for more information.*
- Proposed introduction from 1 April 2017 of new interest deductibility rules (BEPS Action 4), including a fixed expense ratio of 30% of UK earnings before interest, taxes, depreciation, and amortisation (UK EBITDA) and a group ratio rule for highly geared groups.
- Introduction of UK withholding tax (WHT) on a wider range of royalty payments with effect from Royal Assent of the Finance Bill (estimated September/October 2016).
- Revised loss utilisation rules from April 2017 to allow more flexible use of losses carried forward, but with a restriction on the utilisation of losses to 50% of the relevant profits. The restriction will apply only to profits in excess of GBP 5 million. For banks, the maximum loss offset will be limited to 25%.
- Introduction of anti-avoidance provisions in respect of hybrid mismatches from 1 January 2017.
- The European Union has adopted amendments to the Directive on the mandatory automatic exchange of information (AEOI) in the field of taxation to require the mandatory exchange of cross-border tax rulings and advance pricing arrangements (APAs). EU member states, including the United Kingdom, must implement legislation to comply with the Directive by 31 December 2016 to be effective from 1 January 2017.
- The European Union has published an anti-tax-avoidance package, including a draft anti-tax-avoidance Directive, and a further proposed amendment to the Directive on mandatory AEOI in the field of taxation to enable coordinated implementation within the European Union of BEPS Action 13 CbC reporting requirements. The draft anti-tax-avoidance Directive sets out minimum standards for rules to address six key international tax and BEPS-related issues: (i) deductibility of interest; (ii) exit taxation; (iii) a 'switch over' clause to ensure taxation of dividends and capital gains from companies in low-tax, non-EU countries; (iv) a general anti-abuse rule (GAAR); (v) controlled foreign company (CFC) rules; and (vi) a framework to tackle hybrid

mismatches. At this stage, it is unclear whether and to what extent the proposals will be adopted and what the impact will be in the United Kingdom.

- The Finance Bill 2016, once finalised, will include changes applicable for accounting periods starting on or after 1 April 2016 to the definition of 'transfer pricing guidelines' within the UK legislation so as to formally incorporate the revisions to the OECD transfer pricing guidelines as recommended in Actions 8-10.
- The European Union has re-launched a consultation about working towards a common consolidated corporate tax base (CCCTB) to harmonise the corporate tax base (but generally not corporate tax rates) across the European Union. It is not clear whether the United Kingdom will adopt any final proposal, nor when it will take effect.
- Additional tax incentives for the creative sectors.
- A range of specific and narrow anti-avoidance rules.
- Further reforms regarding collection of taxes, application of penalties, and related issues focused on tax evasion. This includes the introduction of a corporate criminal offence of facilitating tax evasion, and the introduction of a 60% automatic penalty for transactions subject to the GAAR.
- Plans to move all tax reporting, compliance, and payments onto a digital platform by 2020.

Taxes on corporate income

Resident companies are taxable in the United Kingdom on their worldwide profits (subject to an opt-out for non-UK branches), while non-resident companies are subject to UK corporate tax only on the trading profits attributable to a UK permanent establishment (PE) plus UK income tax. In practice, for many companies, the application of a wide range of tax treaties, together with the dividend exemption, makes the UK corporate tax system more like a territorial system.

General corporation tax rates

The normal rate of corporation tax is 20% for the year beginning 1 April 2016. This rate will fall to 19% for the year beginning 1 April 2017, and to 17% for the year beginning 1 April 2020.

Where the taxable profits can be attributed to the exploitation of patents, a lower effective rate of tax applies. For 2016/17, the rate is 11%, reducing to 10% from 1 April 2017. Profits can include a significant part of the trading profit from the sales of a product that includes a patent, not just income from patent royalties. This scheme will change from June 2016 (*see Patent box in the Tax credits and incentives section for more information*).

Special corporation tax regimes

Apart from the four specific exceptions noted below, there are no special regimes for particular types or sizes of business activity; in general, all companies in all sectors are subject to the same corporate tax rates and rules. However, certain treatments and reliefs do vary according to size, including transfer pricing, research and development (R&D) credits, and some targeted anti-avoidance rules.

For large companies, there are some additional compliance and reporting requirements. Some elements of HMRC's organisational structure and approach to avoidance and compliance are arranged by size of business (e.g. Large Business Strategy).

Oil and gas company regime

Profits that arise from oil or gas extraction, or oil or gas rights, in the United Kingdom and the UK Continental Shelf ('ring-fence profits') are subject to tax in the United Kingdom in accordance with rates applicable in 2006, i.e. a full rate of 30% and a small profits rate of 19%. Such activities also attract 100% capital allowances on most capital

United Kingdom

expenditure. A supplementary tax charge of 10% (20% before 1 January 2016) applies to 'adjusted' ring fence profits in addition to normal corporation tax.

Life insurance company regime

Life insurance businesses are also taxed under a special regime, which effectively includes different corporate tax rates as well as special rules for quantifying profits.

Tonnage Tax regime

Companies that are liable to corporation tax and operate qualifying ships that are strategically and commercially managed in the United Kingdom can choose to apply Tonnage Tax in the place of corporation tax. Tonnage Tax is an alternative method of calculating corporation tax profits by reference to the net tonnage of operated ships. The Tonnage Tax profit replaces the tax-adjusted profit/loss on a shipping business and certain related activities, as well as the chargeable gains/losses made on Tonnage Tax assets. Any other profits are taxable under the normal corporate tax regime.

Banking sector

A supplementary tax was introduced from 1 January 2016 at 8% on profits in excess of GBP 25 million. Also, loss utilisation is restricted for banks; trading losses can be set against only 50% of profits in a period (reducing to 25% from 2017).

Petroleum revenue tax (PRT)

In effect, PRT is abolished for periods ending after 31 December 2015; it is proposed that, from that date, PRT is reduced to 0%. For earlier periods, a tax of 35% was levied on profits accruing from oil and gas extracted in the United Kingdom and in the UK territorial sea and continental shelf in respect of fields given development consent before 16 March 1993. Older fields were, in practice, outside the scope of PRT. PRT, if paid, is deductible in computing corporation tax on the company's total profits.

Income tax for non-resident companies

A non-resident company is subject to UK corporation tax only on the trading profits of a UK PE. Any other UK-source income received by a non-resident company is subject to UK income tax at the basic rate, currently 20%, without any allowances (subject to any relief offered by a double tax treaty [DTT], if applicable). This charge most commonly arises in relation to UK rental income earned by a non-resident landlord (NRL). The United Kingdom therefore operates an NRL scheme that requires the NRL's letting agent or tenants to withhold the appropriate tax at source unless they have been notified that the NRL has applied for and been given permission to receive gross rents.

Diverted Profits Tax (DPT)

DPT is separate from other corporate taxes. It is levied at 25% (or 55% in the case of UK ring fence operations, i.e. broadly oil extraction operations) on diverted profits (as defined) and may apply in two circumstances:

- where groups create a tax benefit by using transactions or entities that lack economic substance (as defined), and/or
- where foreign companies have structured their UK activities to avoid a UK PE.

Companies are required to notify HMRC if they are potentially within the scope of DPT within three months of the end of the accounting period to which it relates (extended to six months for the first year). The legislation is complex and subjective in places, and has the potential to apply more widely than might be expected.

Local income taxes

There are no local or provincial taxes on income, although powers are in place to introduce a reduced rate of corporation tax in Northern Ireland.

Corporate residence

UK incorporated companies are generally treated as UK resident. However, companies resident in the United Kingdom under domestic law, but treated as solely resident in a different country under that country's DTT with the United Kingdom, are not treated as UK resident for the purposes of UK domestic tax law.

Additionally, subject to the above exception, companies incorporated overseas are also treated as UK resident if their central management and control is situated in the United Kingdom. This means if the place of the highest form of control and direction over a company's affairs, as opposed to decisions on the day-to-day running of the business, is in the United Kingdom.

Permanent establishment (PE)

For non-resident companies, the liability to corporation tax depends on the existence of any kind of PE through which a trade is carried on. The meaning of PE for UK tax purposes is set out in statute; it is largely based on the OECD Model Tax Convention definition, but is not identical in all respects. Subject to the terms of the relevant DTT, a non-resident company will have a PE in the United Kingdom if it either:

- has a fixed place of business in the United Kingdom through which the business of the company is wholly or partly carried on, or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in the United Kingdom.

A fixed place of business includes (but is not limited to) a place of management; a branch; an office; a factory; a workshop; an installation or structure for the exploration of natural resources; a mine, oil or gas well, quarry, or other place of extraction of natural resources; or a building, construction, or installation project. However, a company is not regarded as having a UK PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

The OECD, under Action 7 of its BEPS Action Plan, has recommended a widening of the scope of the PE definition in Article 5 of the OECD Model Tax Convention. It is intended that the amended definition will be incorporated into bilateral double taxation conventions via a multilateral instrument, which is to be concluded by 31 December 2016. Furthermore, the EU anti-tax-avoidance package includes a recommendation that encourages member states to amend treaty definitions of PE to reflect the OECD recommendations. The United Kingdom has not yet, however, announced any changes to the domestic statutory definition of PE to reflect the OECD recommendations.

Special rules exist to explain how the PE's profits should be evaluated for UK tax purposes (*see the Branch income section for more information*).

Other taxes

Value-added tax (VAT)

The standard VAT rate of 20% applies to most goods and services, apart from domestic fuel and power and certain other reduced-rate supplies, which are subject to VAT at 5%.

Most exports, most food, most public transport, books and publications, and certain other essential goods and services are zero-rated. Some supplies are exempt, the main categories being the grant of certain interests in land, insurance, financial services, betting and gaming, education, certain sports services, cultural services, and health and welfare. Zero-rating is preferable to exemption because the VAT on costs incurred in

United Kingdom

making a zero-rated supply can be recovered while that incurred in making an exempt supply cannot.

VAT is chargeable on the supply of most goods and services made in the United Kingdom by 'taxable persons' in the course of business, when their taxable turnover exceeds the registration thresholds. Taxable persons include individuals, companies, partnerships, clubs, associations, or charities.

Taxable persons who are not normally resident in the United Kingdom, do not have a business establishment in the United Kingdom, and, in the case of companies, are not incorporated in the United Kingdom, but who make taxable supplies, sales to unregistered persons in the United Kingdom, or acquisitions of goods in the United Kingdom above the relevant limits, may be required to register and account for VAT in the United Kingdom.

If the value of taxable supplies is over a specified limit, registration for VAT is compulsory unless the taxable supplies made are wholly or mainly zero-rated, in which case it is possible to apply for exemption from registration. A zero VAT registration threshold applies for businesses not established in the United Kingdom.

The rules applying to VAT and territoriality are different to those applying to direct tax in that they derive from the principles of the place of supply in EU law, as enshrined in European Commission (EC) VAT Directives. Having determined that a supply of goods or services has taken place, the second condition to be determined, if the transaction is to fall within the scope of UK VAT, is whether the supply takes place within the United Kingdom. The place of supply rules are different for goods and for services. A person or business belonging outside the United Kingdom, with no place of business in the United Kingdom, may, nevertheless, be liable to UK VAT registration where the place of supply of those goods or services is in the United Kingdom.

For goods, the basic rule is that a supply of goods is taxable in the territory where those goods are physically located at the time of supply. Hence, if goods are supplied in the United Kingdom by a non-established taxable person, there will still be a liability for VAT purposes, and the person must register for VAT in the United Kingdom if the taxable supplies exceed the current UK VAT registration thresholds. A zero VAT registration threshold applies for businesses not established in the United Kingdom.

For services, the basic rule is that services are treated as made where the customer 'belongs' or is established for VAT purposes, and the customer is responsible for accounting for the VAT due via the reverse-charge procedure. However, this is subject to a number of special rules and exceptions. Determining where a business is established for VAT purposes is based on EU law criteria.

For business-to-consumer (B2C) supplies, the basic rule is that services are treated as made where the supplier 'belongs' or is established for VAT purposes. B2C supplies of telecommunications, broadcasting, and electronic services are taxed where the customer is located or is normally resident.

VAT returns and payments

VAT returns must be completed at preset intervals (usually every three months). Larger companies may be required to file monthly returns or make monthly payments on account. All businesses are required to file VAT returns online and make electronic payments. Smaller enterprises can apply for annual returns. VAT returns are usually required to be filed 30 days after the end of the period.

Annual accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

Cash accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

In addition, a flat rate scheme operates for small businesses and is intended to simplify VAT accounting procedures.

Customs and excise duties

Many goods imported into the United Kingdom from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in the United Kingdom. Examples include the following:

Products	Excise duty (GBP)
Road fuels	0.5795 per litre
Cigarettes	196.42 per thousand (plus 16.5% of the retail price)
Tobacco (hand rolling)	198.10 per kg
Wines (5.5% to 15%)	2.78 per litre
Spirits	27.66 per litre of pure alcohol included

As announced at Budget 2016, the government will introduce legislation in Finance Bill 2017 to encourage the reformulation of drinks that are high in added sugar by levying a unit charge on UK producers and importers of such drinks. There will be an exemption for smaller producers. HMRC will consult on the detail in summer 2016, and the levy will come into effect in 2018.

Stamp taxes

Stamp duty is charged at 0.5% on instruments effecting sales of shares. Agreements to sell shares usually attract stamp duty reserve tax (SDRT) at 0.5%. The liability to SDRT may be cancelled by paying the stamp duty due on a stock transfer form (or other transfer instrument) executed in pursuance of the agreement. Stamp duty is not usually charged on an issue of shares, but is charged at a higher rate of 1.5% on an issue of shares in bearer form. Issues or transfers of shares to clearance services or depositary receipt systems may attract SDRT at 1.5% (stamp duty at 1.5% may be payable on instruments effecting transfers of shares to such services or systems).

Acquisitions of non-residential or mixed land and buildings in England, Wales, and Northern Ireland are charged stamp duty land tax (SDLT) at rates of up to 5%. Acquisitions of residential property by companies and similar non-natural persons and by individuals acquiring second homes are charged at rates of up to 15% (whereas acquisitions by individuals who do not own any other properties or who are replacing their main residence are capped at 12%). Grants of new commercial leases are charged SDLT at 1% of the net present value of the rents payable in excess of GBP 150,000 up to GBP 5 million and 2% of the net present value in excess of GBP 5 million. SDLT is also payable at up to 5% on any premium paid. Grants of residential leases are charged at 1% of the net present value of the rents payable in excess of GBP 125,000 plus up to 15% on any premium paid.

Land and buildings in Scotland are subject to Scottish land and building transactions tax (LBTT) in place of SDLT. Rates are graduated up to 12%, which applies to a transaction value for residential properties in excess of GBP 1 million.

United Kingdom

Annual tax on enveloped dwellings (ATED) and related capital gains tax charge

An annual tax on enveloped dwellings is charged on the acquisition and holding of high-value residential properties (property over GBP 500,000) through a company or other 'non-natural' person. Broadly, this will be based on the 1 April 2012 value, in bands starting at GBP 500,000 and increasing to GBP 20 million. The charge on a property worth GBP 20 million or more cannot exceed GBP 218,200 *per annum*. The minimum charge is GBP 3,500 for a property valued at GBP 500,000.

In addition, a disposal of such a property or an interest in such a property by a company or other non-natural person will be subject to capital gains tax at 28% on any gains accruing after 5 April 2013. Relief will be available from ATED and the capital gains tax extension for most property used for commercial, charitable, or public use.

Bank levy

A bank levy takes the form of an annual tax on certain liabilities of most UK-based banks and building societies. The tax is levied at the following annualised rates:

- From 1 January 2016: 0.18% of a bank's short-term relevant liabilities and 0.09% of long-term equity and liabilities.

Staged reductions down to 0.105% and 0.05% by 2021 are proposed.

The levy is not charged on the first GBP 20 billion of chargeable liabilities and is not deductible for corporation tax purposes.

Insurance premium tax (IPT)

IPT at the standard rate of 9.5% (increased to 10% from 1 November 2016) applies to premiums for most general insurance, such as for buildings and contents and motor insurance, where the insured risk is in the United Kingdom. Life assurance and other long-term insurance remain exempt, though there are anti-avoidance rules surrounding long-term medical care policies. As an anti-avoidance measure, a higher rate of 20% applies to insurance sold by suppliers of specified goods or services, e.g. mechanical breakdown insurance, travel insurance (irrespective of supplier), insurance sold with TV and car hire, and 'non-financial' guaranteed asset protection (GAP) insurance sold through suppliers of motor vehicles or persons connected with them. Further anti-avoidance rules affect administration or similar fees connected with contracts of insurance, charged under separate contracts by brokers and other intermediaries.

Airport passenger duty

Individuals leaving the United Kingdom by air are obligated to pay a duty, which, in practice, is invariably included in the cost of the air ticket. Typically, such taxes are borne by employers in respect of employee's business travel. Further, significantly higher rates apply for travel in certain 'executive jets'.

Environmental taxes

There are several environmental taxes, including the following.

Landfill tax

The landfill tax is a tax on waste disposal in landfill sites. The standard rate increased to GBP 84.40 per tonne from 1 April 2016. The reduced rate for inert waste is GBP 2.65 per tonne.

Climate change levy

The climate change levy is a tax on energy used in the United Kingdom, such as electricity, gas, coal, etc., and is charged at rates that depend on the nature of the fuel used. There are reduced rates and exclusions from the charge, e.g. supplies to domestic

or charitable users, renewable source energy, and energy-intensive sectors committing to specific emissions/energy-saving measures.

Aggregates levy

The aggregates levy is a tax on the extraction or importation of sand, gravel, and crushed rock for commercial exploitation in the United Kingdom. The rate of tax is GBP 2.00 per tonne.

Carbon Reduction Commitment

The Carbon Reduction Commitment is a mandatory scheme for large businesses with financial, reputational, and behavioural drivers aimed at improving energy efficiency.

Employers' national insurance contributions (NICs)

Employers are obligated to pay NICs based on a percentage of each employee's earnings. For the year ending 5 April 2017, the rate is 13.8% on all earnings above GBP 156 per week. Businesses are exempt from the first GBP 3,000 *per annum* (maximum) of this liability.

Payroll taxes

Other than employers' NICs, there are no other payroll taxes, the burden of which falls on the employer. Employers are, however, responsible for deducting the employees' income tax liability at source, through the pay-as-you-earn (PAYE) system. The employer may also be required to deduct other amounts from pay (e.g. court orders).

Apprenticeship levy

It is proposed that, from 1 April 2017, employers will pay 0.5% of their total payroll in excess of GBP 3 million to create a fund to support apprenticeships. Full details are not yet available.

Pension protection fund levy

All defined benefit pension schemes pay a levy, based on pension fund liabilities and the financial risk of the employing company. This levy funds a compensation fund for pensioners and employees of failed schemes.

Local municipal taxes

Local taxes are not based on income, but rather are levied on the occupiers of business property by reference to a deemed annual rental (or 'rateable') value for the property concerned. These taxes (known as 'rates') are administered by regional local government authorities rather than central government. The amounts paid are deductible for corporation tax purposes, provided they meet all the usual requirements for deductibility.

Branch income

Tax rates on the profits of UK PEs of non-resident corporations are the same as for domestic corporations.

There are specific rules setting out how the PE's profits should be evaluated for UK tax purposes, which broadly seek to treat the business as if it were a standalone company. Financing arrangements between the branch and head office must be disregarded, and there are special rules for banks to stop under-performing loans being allocated to the UK branch in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

Tax is not generally withheld on transfers of profits from a UK PE to the head office. However, there are proposals in Finance Bill 2016 to amend the rules for deduction of UK income tax at tax at source on royalty payments made after Finance Bill 2016

United Kingdom

receives Royal Assent (expected October 2016), which could result in tax being withheld on royalty payments made by a foreign company in connection with activities carried on through a UK PE.

Taxable income determination

A UK resident company is taxed on its worldwide total profits.

Total profits are the aggregate of (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets.

The main sources of income are (i) profits of a trade, (ii) profits of a property business, (iii) non-trading profits (or losses) from loan relationships, mainly interest receivable or payable, (iv) non-trading gains (or losses) on most intangible fixed assets, and (v) non-exempt dividends or other company distributions. The amount of income for sources (i) to (iv) is measured based on the company's accounts, with specific adjustments. Taxable income from non-exempt dividends and calculating chargeable gains or income from other sources is based on actual amounts.

The rules for measuring the gross income are different for each category, and there are subtle differences in the rules about tax deductions and how gains are calculated. Because of this continuing reliance on taxing companies on a 'source-by-source' basis, it is difficult to explain the rules about income determination and deductions as two wholly separate topics.

Basic rules for accounts-based sources

The main source of profits is often from trading. A company's trading profits are based on its worldwide profit before tax in its accounts. Adjustments are made for non-trading receipts (such as dividends from other companies and income from property) and non-deductible expenditure (such as capital expenditure). Depreciation for tax purposes (known as capital allowances) is calculated and substituted for the depreciation charged in the accounts. A number of other statutory adjustments are made; three important ones are that pension contributions, deferred pay, and benefits in kind are broadly deductible only when paid, that a deduction is available for the notional cost of certain share awards to employees, and that, where certain acquired intangibles (but, in particular, not goodwill and customer-related intangible assets acquired on or after 8 July 2015) are not depreciated in the accounts, a 4% flat-rate deduction can usually be claimed. There are many other adjustments.

Similar principles apply in relation to the calculation of profits of a property business.

Financial profits from a company's trading and non-trading loan relationships and related matters are usually based on the accounts, and the distinction between 'capital' and 'revenue' receipts and deductions is not relevant. Instead, all credits and debits in the accounts are aggregated in order to find the net profit or deficit. Certain statutory adjustments have to be made, which include an interest capping limitation ('debt cap').

For traders, any profit or loss on loan relationships, and/or on intangibles, is generally included within the trading profits. If the company doesn't have a trade, then loan relationships and intangibles are treated as a separate source of income or loss.

Income losses

Where a loss arises in respect of a particular source of income, there are detailed rules regarding the possible offset of the loss. Carryback and sideways reliefs are often allowed within limits; carryforward is generally allowed and carried forward losses do not time expire. Losses can also be utilised by other group companies (*see the Group taxation section*).

More specifically, dealing with the main sorts of income losses,

- trading losses may be set off against any other source of profit or gains in the same year, may be carried back one year (three years on the cessation of the trade) against any other source of profit or gain, or may be carried forward without time limit against profits of the same trade only
- property losses may also be set off against any other source of profit or gains in the same year, or may be carried forward without time limit against profits of any sort; they cannot, however, be carried back, and
- non-trading deficits (i.e. interest and financing losses) can again be set off against any other source of profit or gains in the same year, may be carried back one year against non-trading credits (i.e. interest and financing profits), or may be carried forward without time limit against non-trading profits.

Non-trading companies may deduct non-capital management expenses incurred in managing their investments from their total profits. Any excess management expenses can be carried forward without limit to set against profits in future years.

While income losses can generally be offset against capital gains of the same accounting period, capital losses are never available for offset against any type of income.

There are complex anti-avoidance rules that restrict the utilisation of all types of losses where there is a change in ownership of the company. Specific rules can also deny or limit loss relief or deductions arising from brought forward losses or potential losses where certain conditions are met.

Proposals were made in March 2016 for significant reform to the treatment of losses from April 2017. These include:

- allowing losses to be more flexibly set off against other income, including against taxable income of other UK group companies, and
- for companies with profits over GBP 5 million, restricting the utilisation of losses brought forward to 50% of the current year profits in excess of that amount.

Inventory valuation

In general, the book and tax methods of inventory valuation will conform. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last in first out (LIFO) method.

Capital gains

Gains on capital assets are taxed at the normal corporation tax rates. The chargeable gain (or allowable loss) arising on the disposal of a capital asset is calculated by deducting from gross proceeds the costs of acquisition and subsequent improvements, plus the incidental costs of sale and indexation allowance. Indexation allowance compensates for the increase in costs based on the percentage rise (if any) in the UK retail prices index to the date of disposal. Indexation allowance is, however, limited; it cannot create or increase a capital loss, it can only reduce or eliminate a chargeable gain. Generally, these calculations must be done in sterling, so any foreign exchange gains and losses will be taxed (or relieved) on disposal.

Special rules apply to assets held at 31 March 1982.

Most acquisitions and disposals between UK group companies are treated as made on a no gain no loss basis (i.e. at base cost plus indexation). Otherwise, acquisitions from, or disposals to, affiliates are treated as made at fair market value, as are other acquisitions or disposals not at arm's length.

United Kingdom

Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a company's accounting period may be carried forward without limitation but may not be carried back. There is no ability to surrender capital losses to fellow group members, but gains or losses arising on a particular asset can be allocated to another group member. So, the capital losses of one company can sometimes be set against the gains of a fellow group member in the same or subsequent period.

There is a good deal of anti-avoidance legislation concerning the computation of chargeable gains, notably to stop losses being created or gains avoided where assets are depreciated by intra-group transactions, or where losses are 'bought in' from third parties.

Gains realised on certain types of assets can be deferred where all or most of the proceeds are reinvested in other assets of those types within a specified period (generally three years). The 'rolled-over' gain then crystallises as and when the latter assets are sold. At present, the main asset categories qualifying for roll-over are land and buildings used for a trade.

Most disposals by trading groups of shareholdings of 10% or more are exempt from tax. The main exceptions will be those of non-trading subsidiaries or subgroups, or of companies acquired within the previous year. Note that gains on goodwill and other intangibles acquired after March 2002 are taxed as income, not as capital gains.

Dividend income

Most foreign and UK dividends received by UK companies are exempt from corporation tax; however, one of several criteria has to be met, but these are widely drawn (one test, for example, is that the recipient controls the payer). For non-exempt, foreign-source dividends, double tax relief (DTR) will be available on a dividend-by-dividend basis. It is unusual for companies to be taxed on UK dividends because of the breadth of the exemption; however, where they are taxed, there is no concept of DTR for UK dividends.

Realised and unrealised exchange gains/losses

Unrealised exchange gains and losses tend to arise on debts and derivatives; they are then taxed or allowed, together with realised amounts, on an accounts basis in the same way as other debits and credits arising out of loan relationships. Where gains or losses arise on other payables or receivables, to a trader or property investor, they will again generally be taxed or allowed on an accounts basis. For a trader, the taxable or allowable amount will become simply part of the trading profit or loss; for other companies, it will become a separate source of taxable profit (a 'non-trading credit') or loss (a 'non-trading deficit').

Where unrealised differences arise on other capital assets, they will not generally be taxable or allowable at that stage; instead, the exchange difference becomes part of the computation and is effectively taxed or allowed when the asset is disposed of and any difference is realised.

Partnership income

In broad terms, if companies participate in UK partnerships (whether general partnerships, limited partnerships, or limited liability partnerships [LLPs]), they will be taxed on a flow through basis. This will, in very broad terms, mean that UK corporate partners will be taxed on trading, property, or financing income as it arises in the partnership accounts, and on non-exempt dividends on a receipts basis. There are specific anti-avoidance provisions in respect of LLPs with both corporate and individual partners.

When considering overseas entities, the UK authorities will not be bound by how the entity is classified in its country of origin. Case law has determined a number of matters that should be considered when establishing whether a non-UK entity should be taxed

in the United Kingdom as if it were a company or a partnership. HMRC also maintains a public list of non-UK entities and the decisions it has previously made regarding their classification. However, if the parties have flexibility regarding the constitution of such entities, then their classification may be viewed differently, either by HMRC or the courts. This area is complex; consequently, specialist advice should be sought.

Foreign income

In principle, the United Kingdom taxes on a worldwide basis, although non-UK branch profits can be exempted from UK taxation by election. The election applies to all accounting periods starting after the election is made and to all the branches of the company (so it cannot be made on a PE-by-PE basis). The election is irrevocable and has the effect of exempting all profits of the branch, including gains (other than for close companies). Equally, relief for branch losses will be denied. Profits will be measured by reference to DTTs, or, in absence, OECD principles. Certain businesses may not elect to exempt profits (e.g. life insurance, shipping and aircraft operations, and most investment activity).

Where no election is made, profits from non-UK branches are computed and taxed in the normal way for UK tax resident companies. However, UK tax will generally be reduced by credit for local direct taxes paid, either under a treaty or via the UK's unilateral relief rules (*see Foreign tax credit in the Tax credits and incentives section for more information*).

General rules for deductions

As noted above, the UK tax system requires taxable profits to be calculated by aggregating (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets. This approach gives rise to a particularly complicated regime so far as deductions are concerned. Expenses are usually allocated to the source of income (or occasionally by reference to income generally) or to the particular gain to which they relate. The rules governing their deductibility differ according to whether the expense relates to a capital gain or to income, and, indeed, according to the particular source of income concerned. For example, there is a considerable difference in the manner in which tax relief is given for expenses incurred by companies trading in property as compared to those that invest in property. The regime also has a large number of specific rules dealing with particular types of deductions that take priority over the more general rules for each type of income.

We have therefore set out the general rule for trading expenses, being the most common category, and, following that analysis, considered some specific common exceptions.

General rules for trading expenses

A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for the purposes of the company's trade, provided those costs are not capital in nature and are charged to the profit and loss account. There is a significant amount of case law surrounding whether expenses have been incurred wholly and exclusively for the purposes of a company's trade and whether they are capital or not.

Relief is generally given in the period the expenses are accrued in the accounts, subject to some specific exceptions. In particular, contributions to a registered pension scheme are only allowed on a 'paid' basis, with some further provisions under which some contributions may be spread over a number of years; and if bonuses and other staff costs are paid out more than nine months after the end of the accounting period in which they are accrued, they are only allowed on a paid basis.

The general rule is made subject to a range of specific statutory provisions, some of which allow deductions and others of which limit them; some of the more important of these are discussed below, but there are many others. One example is that the costs of business entertainment cannot generally be deducted.

United Kingdom

Depreciation and amortisation

Depreciation of fixed assets (other than of goodwill and other assets within the intangible fixed asset regime, *see below*) is not allowable as a deduction from any source of income. However, traders, and most non-traders, are instead allowed specified rates of annual deduction in respect of specified classes of assets, together referred to as 'capital allowances', that are deducted in calculating trading income for traders and (broadly) against income derived from the use of the fixed assets for non-traders.

Capital allowances for machinery and equipment can be disclaimed in whole or in part, thereby deferring allowances.

In the period of expenditure, capital allowances are available, generally at 18% of the cost of machinery and equipment acquired for use in a trade or property rental business; thereafter, capital allowances are taken generally at 18% *per annum* on the reducing-balance basis. With some exceptions, the rate of capital allowances for machinery and equipment with an expected useful life when new of at least 25 years is 8%. This 8% rate also applies to certain integral features in buildings and thermal insulation.

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 200,000 per year of most qualifying expenditure from 1 January 2016 (previously GBP 500,000). This is restricted to a single allowance for groups of companies or associated businesses.

Capital allowances are given on cars at rates dependent on emission levels.

Enhanced allowances, typically at a rate of 100%, are available for expenditure on certain energy saving plant and other specific categories. The products and technologies supported by this regime are reviewed and updated regularly.

No capital allowance is normally allowed on buildings, apart from certain machinery and equipment embodied in the fabric of the buildings. In some buildings (e.g. hotels, retail, offices), such deductions may be significant.

Capital allowances may also be available in respect of the cost of the acquisition of mineral assets and extraction, generally at the rates of 10% and 25%.

Excess capital allowances are generally recaptured on disposal. The recapture is calculated on a 'pool' basis for most machinery and equipment, in which case there is no recapture unless the sale proceeds exceeds the total tax written down value of the pooled assets.

Where assets are leased, capital allowances are generally available to the lessor rather than the lessee. The rate of capital allowance of most plant or machinery leased to non-residents is generally restricted to 8%, but in some cases to nil.

Intangible fixed assets

A special regime applies to intangible assets, such as patent rights, know-how, and trademarks, and (prior to 8 July 2015) goodwill. Royalties are generally deductible on an accounts basis, and, except in relation to 'grandfathered' assets owned by the group on 31 March 2002, the accounts' amortisation of intangible assets is also deductible (with an option to take a flat 4% deduction even if not amortised in the accounts). Traders will take the deductions in computing trading income; non-traders will create a 'non-trading loss on intangible fixed assets' that can be relieved as a loss against any profits of the year, carried back one year, or carried forward indefinitely.

With effect for acquisition of goodwill and customer-related intangibles on or after 8 July 2015, amortisation, impairment, and certain other charges will not be deductible

for tax. Subsequent profits and losses on disposals of such goodwill remain taxable/deductible.

Income costs relating to R&D are normally deductible in any event, but there is a special incentive connected with R&D that generally allows additional tax relief (*see the Tax credits and incentives section for more information*).

Management expenses

Holding companies and companies with investment business can deduct expenses if they are expenses of managing the company's investment business and are not capital in nature. Such costs would typically include audit fees, directors' costs, rent, local rates, and office costs. These costs can be set against any sources of profit the company may have, including gains and financing income.

If the company has inadequate income, excess expenses can be surrendered as group relief or carried forward to set against future income, with no time limit.

Many of the specific rules on the deduction of trading expenses also apply to management expenses. Many rules giving traders specific deductions for certain costs also apply, but this is not always the case.

Employee share schemes

The actual and deemed costs of an employing company for the deemed cost of providing shares or options to employees is usually deductible, depending on the nature of the share plan and the accounting. This will generally allow a deduction to a subsidiary company whose employees receive shares or options in the parent company.

Funding costs

Funding costs (primarily fees and interest) are broadly deductible on an accounts basis, even if capital in nature, but subject to thin capitalisation constraints (with no explicit safe harbours) and a worldwide interest cap based on the group's external debt levels (*but see the proposal to replace this from April 2017 below*). This extends to foreign exchange deductions relating to debts owed and receivable.

Traders will generally take the deductions in computing trading income (which is also accounts based). Deductions relating to loans not used for trading purposes will give rise to 'non-trading deficits' that, if not group relieved, can be offset against profits of that year generally, carried back one year (against that year's funding profits), or carried forward indefinitely against non-trading profits.

There are complex and specific rules dealing with financial instruments, derivatives, cross-border transactions, etc.

There is a proposal to introduce, from 1 April 2017, a fixed ratio limiting corporate tax deductions for net interest expense to 30% of UK EBITDA, and a group ratio rule for highly geared groups. This is subject to consultation, but will replace the worldwide interest cap and will often operate to reduce the amount of tax deduction achieved by UK taxpayers.

Bad debts, provisions, and reserves

Provisions for future costs can be deducted for tax purposes if they:

- are in respect of allowable revenue expenditure
- are made in accordance with acceptable accounting practice
- do not conflict with any statutory rule governing the timing of relief (e.g. in relation to payment of staff costs), and
- are estimated with sufficient accuracy.

United Kingdom

This rule extends to bad debts on trading account. Generally, however, bad debts are dealt with under the 'loan relationships' rules for financing costs and financing income. The rules there, however, are broadly the same; if the bad debt can be identified specifically enough to allow a bad debt provision that satisfies UK accounting standards, it should be deductible.

Charitable donations

Most donations to charities by companies are deductible.

Fines, penalties, and bribes

Any payments that constitute a criminal offence (e.g. a bribe) are not deductible for tax. Fines and penalties imposed for breaking the law are also not deductible, although a deduction is usually available for legal costs incurred in defending such an action. Usually, there is no deduction for civil penalties, interest, and similar surcharges (e.g. relating to VAT). Fines for regulatory breaches are not allowed for tax, but the costs of compensating customers, etc. are usually deductible.

Damages that are compensatory rather than punitive (e.g. damages for defamation payable by a newspaper company) are often deductible, as are payments for breach of contract. Payments to employees for wrongful dismissal, etc. are usually deductible.

Taxes

Local municipal taxes (business rates) may be deducted from taxable income.

Net operating and capital losses

See Income losses above for a description of the treatment of income losses and capital losses.

Payments to foreign affiliates

There are no special rules for payments to foreign affiliates, so their tax treatment follows the basic rules for deductions set out above. The transfer pricing rules will impose an arm's-length price.

Group taxation

Each individual corporate group member is required to submit their own tax return on a stand-alone basis, with the exception of the election available with respect to VAT (*discussed below*). However, there are a variety of ways in which one's relationship with fellow group members is recognised in the UK tax system for the purposes of corporation tax, VAT, SDLT, and stamp duty.

Corporation tax

The corporation tax system includes a number of measures that advantage UK members of qualifying groups, all of which are subject to anti-avoidance measures.

Operating taxable profits and losses arising in the same period can usually be offset between UK resident 75% affiliates within a worldwide group. This extends to offsetting the UK profits attributed to a UK PE of a non-UK resident group member. There are some restrictions, primarily where one of the two companies is not an economic 75% subsidiary of the group or is subject to arrangements under which it might leave the group.

Intra-group transfers of capital assets between UK companies, including UK PEs, are normally tax-free, though the definition of group for these purposes is slightly different than the definition of group relief for losses. This treatment is also extended to intra-group transfers of loan relationships, derivatives, and intangibles. There is generally a 'degrouching' charge if the transferee company leaves the group within six years.

There is no automatic offset of capital gains and losses where these arise in different group companies, but it is normally possible for offset to be arranged either by actual transfer of the asset prior to disposal or by election.

A UK resident group company is potentially able to claim group relief for income losses of a non-UK subsidiary that is resident in the European Economic Area (EEA) or has incurred the relevant losses in a PE within the EEA, provided that all possibilities of non-UK relief for the losses have been exhausted and future relief is unavailable.

In addition, the corporation tax system also has a number of measures that seek to prohibit groups unfairly manipulating the tax system by shifting profits between group members (either internationally or within the United Kingdom) in a way that is considered unacceptable.

A debt cap limits the aggregated UK tax deductions group members may claim for finance costs to the level of a group's external finance expense, although proposals have been made to replace this with a fixed ratio interest expense limit.

VAT

Group companies can, subject to certain requirements, elect to account for VAT as if they were one taxable person; where this is done, no VAT is charged on intra-group supplies of goods or services. The registration is made in the name of the representative member, who is responsible for completing and rendering the single return on behalf of the group. All the companies are jointly and severally liable for any VAT debts. VAT grouping is subject to detailed anti-avoidance provisions.

Stamp duty and SDLT

Transfers of shares or real estate within worldwide 75% groups are generally exempt from stamp duty or SDLT, respectively. For SDLT, the relief can be retrospectively withdrawn in certain circumstances, primarily where the transferee leaves the group within three years of the transfer.

Transfer pricing and thin capitalisation

The United Kingdom has widely drafted transfer pricing rules that are intended to apply to almost any kind of transaction made or imposed between related parties that gives rise to:

- a provision that differs from one that would have been made between third parties and
- a UK tax advantage (potential or actual) to one or more of the parties.

These rules apply to UK-to-UK transactions as well as cross-border transactions.

The regime therefore applies not only to the provision of products and services but also to finance arrangements, including both the rate of return charged and the amount of loan principal (or equivalent) made available. It is therefore the mechanism by which the UK's revenue authorities address the issue of thin capitalisation. Currently, unlike many other territories, the United Kingdom does not currently operate any 'safe harbours' of any kind in relation to the amount of debt or interest (or equivalents) it considers demonstrates that a UK company or group is not thinly capitalised. However, HMRC have announced the introduction of a new UK interest deductibility rule in line with the OECD BEPS Action 4 recommendations as part of the business tax roadmap. This was followed on 12 May 2016 by a consultation document setting out proposals for the detailed operation of the regime.

Note that the United Kingdom also has a debt cap regime that limits the amount of finance expense for which a UK tax deduction will be available by reference to the worldwide group's external finance expense. In addition, the United Kingdom is

United Kingdom

currently consulting on implementation of OECD recommendations to limit the tax deductibility of interest, and the European Commission has presented a proposal for EU rules to restrict the tax deductibility of interest as part of its anti-tax-avoidance package.

Parties are considered related for the purpose of transfer pricing rules where either one controls the other or both are under common control. Control here is not confined to situations in which one party is the majority shareholder in the other. Effectively, control exists where one party has the power to ensure that the affairs of another party are conducted in accordance with the first party's wishes. The concept is also subject to two important extensions:

- The rules apply to many joint venture companies where two parties each have an interest of at least 40%.
- There are attribution rules to trace control relationships through a number of levels in determining whether parties are controlled for the purposes of the transfer pricing rules.

In addition, the regime restricts interest deductions to an arm's-length basis where a financier and persons who collectively control a company or a partnership have 'acted together' in relation to the financing arrangements of that company or partnership. The financier (usually a bank) can then be taken as controlling the company or partnership, and the loan becomes subject to transfer pricing limitations.

There are a number of exemptions that essentially exclude small or medium-sized enterprises (SMEs) and dormant companies from the regime.

The effect of the rules is to require an arm's-length provision to be substituted for the actual one, thereby increasing the party's UK tax liability and cancelling out the UK tax advantage that would otherwise have arisen.

Where both parties to the transaction are UK taxpayers, the disadvantaged party will generally be entitled to claim a compensating adjustment (except where the transaction falls within the transfer pricing regime because of the 'acting together' provisions), but only after the UK adjustment has been made. The legislation also provides that parties may make balancing payments to each other in such circumstances, of any amount up to the transfer pricing adjustment, which will neither be taxable for the recipient nor tax deductible for the payer.

Where the disadvantaged party is outside the UK tax net, they can pursue a claim for relief under the relevant DTT if it provides a mechanism for such relief; where the adjustment in the United Kingdom is to reduce a deduction for an amount paid under deduction of UK tax, the compensating adjustment rules should allow the overseas party to reclaim any WHT paid on the disallowed amount, subject to time limits and other criteria.

UK taxpayers are required to self-assess their compliance with this arm's-length principle. Companies and partnerships must therefore identify and make transfer pricing adjustments when submitting their tax returns. This is the case even where the disadvantaged party would be entitled to claim a compensating adjustment equal to the transfer pricing adjustment. An important implication of this approach is the potential for interest and penalties if the adjustment made is subsequently held to be wrong.

Controlled foreign companies (CFCs)

Under the CFC regime, a UK resident company may be taxed on a proportion of the profits of certain UK-controlled, non-resident companies in which the resident company has an interest. The overall intention is to tax profits that have been artificially diverted from the United Kingdom.

Broadly, profits of a non-UK resident CFC will be taxed, using normal corporation tax rates and rules, on the persons controlling the CFC if (i) the profits pass through the CFC 'gateway' and (ii) are not exempt.

The 'gateway' is a series of tests that identify profits that are, broadly, artificially diverted from the United Kingdom. One of the most important tests is 'main purpose'. For example, where profits arise in the CFC under any arrangements a main purpose of which is to achieve a UK tax or duty advantage, those profits will be taxed in the United Kingdom. A range of other tests may capture other profits.

Various exemptions exist for companies coming into the regime for the first time, CFCs with low profits or low margins, and CFCs in excluded territories, usually those territories with corporation tax rates similar or above UK rates.

There is a special exemption for intra-group financing profits that can result in an exemption of between 75% and 100% of the financing profits on qualifying loans.

Tax credits and incentives

Foreign tax credit

The United Kingdom has an extensive network of DTTs. Unilateral relief is generally available, in any event, to credit overseas tax paid on non-UK source profits against the UK tax on the same profits; while the relevant treaty might sometimes extend that relief, their main function for UK companies is to limit overseas WHTs that would otherwise be payable on passive income.

The United Kingdom has a complex regime allowing 'underlying' tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved (at least in part) where dividends flow to the United Kingdom via a chain of companies. This exemption is of limited application because most foreign dividends are exempt from tax.

Enhanced capital allowances

A variety of tax incentives are given in the form of enhanced tax depreciation allowances (known as capital allowances, *see Depreciation and amortisation in the Taxable income determination section*). Some of these incentives are given by reference to the expenditure concerned and others by reference to the size of the company incurring that expenditure.

For example, a full write-off can be claimed in the year of expenditure on a range of 'green' products and technologies. The list of items supported in this way is reviewed annually. It includes designated energy saving equipment, designated environmentally beneficial plant and machinery, and cars with low emissions.

Annual investment allowance

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 200,000 tranche *per annum* of capital expenditure incurred on most qualifying expenditure from 1 January 2016 (previously GBP 500,000). This is restricted to a single allowance for groups of companies or associated businesses.

Research and development (R&D) incentives

SMEs, as defined, are entitled to a deduction equal to 230% of the qualifying expenditure on R&D in the year in which it is incurred, which can be surrendered for a cash payment (at a rate of GBP 33.35 for each GBP 100 of qualifying R&D spend) by companies that are trading at a loss or have not yet started to trade.

United Kingdom

Large companies are granted an 'above the line' tax credit of 10% of their qualifying expenditure. This is mandatory from 1 April 2016, replacing the previous 130% additional deduction.

Patent box

Where the taxable profits can be attributed to the exploitation of patents, a lower effective rate of corporation tax applies. For 2016/17, the rate is 11%, reducing to 10% from 1 April 2017. Profits can include a significant part of the trading profit from the sales of a product that includes a patent, not just income from patent royalties. This scheme will close to new entrants from June 2016 (but will continue until 2021 for existing taxpayers), when a new arrangement will be introduced. The new scheme will focus more on UK-based activities and meet revised OECD principles.

Other incentives

A deduction equal to 150% of the qualifying expenditure on the remediation of contaminated or derelict land is given in the year incurred, which can be surrendered for a cash payment (at a rate of GBP 24 for each GBP 100 of qualifying land remediation spend) by companies that are trading at a loss.

There are special tax reliefs available for certain expenditure on UK film production, high-end television, animation, video games, and proposals for additional deductions and tax credits for certain theatre sector activities.

There are no tax holidays and no foreign investment incentives in the United Kingdom.

Withholding taxes

Under UK domestic law, a company may have a duty to withhold tax in relation to the payment of either interest or royalties (or other sums paid for the use of a patent). The circumstances in which such a liability arises are discussed below.

There is no requirement to deduct WHT from dividends. Therefore, dividends may always be paid gross, regardless of the terms of the applicable DTT.

Please note, however, that this is not an exhaustive list of all the deductions that might be required to be made in respect of UK tax from payments made to or by companies. In particular, non-resident companies that are subject to UK income tax on UK-source rental profits (*see the Taxes on corporate income section for more information*) will find their letting agent or tenants are obligated to withhold the appropriate tax at source (currently 20% without any allowances) from their rental payments unless the recipient has first applied and been given permission to receive gross rents under the NRL scheme. Two other important examples are the UK's deduction at source regime for entertainers and sportsmen, and the scheme under which payments to unregistered subcontractors working on big building projects may need to have tax deducted at source.

Interest WHT

As a general rule, UK domestic law requires companies making payments of interest to withhold tax at 20%. However, there are a number of exceptions to this general rule. The key exclusions are:

- Payments of interest by UK resident companies if the beneficial owner of the interest is also a UK resident company, or a UK PE, provided the interest concerned will be taxed in the United Kingdom as part of the PE's trading profits.
- Payments of interest on a quoted Eurobond.
- Payments of interest that qualify for exemption under the EU Interest and Royalties Directive.
- Payments of interest paid to or by a UK bank (or a UK branch of a foreign bank).

- Payments of 'short' interest. This is, broadly speaking, interest on loans that will not be in place for more than a year. However, the definition can be contentious, and detailed advice should be taken on this if intending to utilise this exemption.
- Payments of interest that do not 'arise' in the United Kingdom. Whether a payment constitutes UK-source interest is a complex issue, and specialist advice needs to be taken if seeking to use this exception.
- With effect from 1 January 2016, payments of interest on private placement debts (widely defined) of UK companies.

If none of these exceptions apply, a payment of interest must be made after the deduction of WHT unless (or until) HMRC has given authorisation that the payment may be made gross (or with a reduced rate of WHT) because of the applicability of treaty relief for the recipient.

Royalties WHT

UK domestic law requires companies making payments of patent, copyright, and design royalties that arise in the United Kingdom to deduct WHT at 20%. In addition, there is also the possibility that other royalties that arise in the United Kingdom may also be subject to the same rate of WHT if they constitute 'qualifying annual payments', so specialist advice will be needed to clarify this. However, certain types of royalties, such as film royalties and equipment royalties, will generally not be subject to UK WHT.

Unlike the rule regarding interest, a company may make a royalty payment gross of WHT (or subject to a reduced rate of WHT under a treaty) without prior clearance having been given by HMRC if they reasonably believe at the time the payment is made that the payee is entitled to relief under the treaty. However, if that belief is later found to be incorrect, HMRC may direct that the payment must be made net of WHT, with the WHT paid to HMRC, and the payer may be subject to interest and penalties in respect of the WHT that should have been withheld (even if their belief was reasonable).

It is proposed that, with effect from Royal Assent of the Finance Act 2016 (anticipated October 2016) (and earlier for cases involving avoidance), a wider class of royalties, including trademarks and brand names, will be subject to deduction of income tax at source.

Double taxation treaties (DTTs)

The tables below set out the rates of WHT applicable to the most common payments of dividends, interest, and royalties under UK domestic law where such a liability arises and the reduced rates that may be available under an applicable DTT. Please refer to specific treaties to ensure the values are up to date.

Dividends

There is no requirement to deduct WHT from dividends. Therefore, dividends may always be paid gross, regardless of the terms of the applicable DTT.

Until 5 April 2016, a tax credit was available to UK resident individual shareholders on dividends received. Some DTTs (i.e. Belgium, Italy, Luxembourg, and Sweden) allowed a partial tax credit to certain non-resident shareholders, which resulted in a repayable credit of 1/360th of the dividend.

Interest

WHT applies only to 'annual interest' (i.e. excluding interest on certain short-term loans). Banks and similar financial institutions are also normally able to pay annual interest to non-UK residents free of WHT. In addition, most of the UK treaties provide for a zero-rate of withholding on interest paid to governmental and quasi-governmental lenders. Such exemptions are not separately indicated in the tables below.

United Kingdom

Resident recipients

Resident recipient	Interest (%)	Royalties (%)
Corporations	0/20 (1)	0/20 (1)
Individuals	20	20

Note

1. Payments to any UK resident company can be made free of WHT if the recipient is chargeable to tax on the interest or royalty.

Notes

UK domestic law generally charges WHT on patent, copyright, and design royalties, although there can be definitional uncertainties. Many treaties allow reduced rates for a wider range of royalties. These are mentioned in this table, even though there may be no UK WHT applied under domestic law.

1. 3% for news; 5% for copyright; 10% industrial; 15% other royalties.
2. Lower rate for loans from banks and financial institutions.
3. Higher rate applies if recipient controls more than 50% of payer.
4. Lower rate applies to copyright royalties.
5. 0% on loans between businesses.
6. Lower rate applies to industrial, commercial royalties.
7. Specific additional conditions apply for lower rate.

8. Lower rate applies for equipment royalties.
9. Lower rate applies to films, TV, and radio.

Tax administration

Taxable period

Companies are assessed by reference to accounting periods. Normally, the accounting period is the period for which the company makes up its accounts. However, an accounting period for corporation tax purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one corporation tax return.

Tax returns

Companies must file their statutory accounts and tax return within one year from the end of the accounting period; the return must include a self-assessment of the tax payable, eliminating the need for assessment by HMRC (though HMRC retains assessing powers for certain cases where it is not satisfied with the return, or where the company fails to make a return).

Electronic filing requirements

Returns must be filed online, and such returns must be filed in a specified format that is machine readable by the tax authorities. The accompanying accounts must also be in iXBRL format.

Payment of tax

For smaller companies, corporation tax is payable nine months and one day after the end of the accounting period to which it relates (i.e. before the return must be filed). For larger companies and groups, a system of quarterly payments on account (based on estimated profits) is in place, with the first payment being due in the seventh month of the accounting period concerned. A company will generally be considered large for this purpose in any accounting period in which it has taxable profits in excess of GBP 1.5 million (that limit being reduced by reference to the number of companies under common control, where relevant).

From 2017, the largest companies with profits over GBP 20 million will have earlier quarterly payments dates, with tax due in the third, sixth, ninth, and 12th months of the period concerned.

Penalties

The UK tax system can impose numerous penalties for failing to adhere to the self-assessment system. These include penalties for late filing of returns, failing to maintain appropriate records, submitting an incorrect return, making errors in certain documents sent to HMRC, unreasonably failing to report errors in assessments by HMRC, and failing to respond to a notice of enquiry from the tax authorities within the specified time limit.

Other filing requirements

Large companies (those with turnover greater than GBP 200 million or balance sheet assets over GBP 2 billion) are required to notify HMRC of the identity of their senior accounting officer, who must certify annually that the accounting systems are adequate for the purposes of accurate tax reporting. Penalties are chargeable on the officer and the company for careless or deliberate failure to meet these obligations.

Certain tax planning and structuring transactions and arrangements must be disclosed to HMRC either before or on implementation of the transaction under the Disclosure of Tax Avoidance Schemes (DOTAS) regime. This scheme covers most taxes and is a reporting system only, with responsibility placed on taxpayers and advisors to report. HMRC are not required to respond to the reporting, and this is not an advance clearance

United Kingdom

or approval process. It is a reporting mechanism only, and, on occasions, new legislation has been introduced to block specific arrangements reported.

Tax audit process

The UK corporate tax process is one of self-assessment. Following filing of the tax return, HMRC has a period of (usually) 12 months in which to raise formal enquiries. These can range from simple information requests to detailed technical challenges over treatments adopted in the tax return.

These enquiries are often settled between the taxpayer company and HMRC by exchange of information and correspondence. Where agreement cannot be reached, arbitration or litigation may be necessary.

HMRC has certain powers to demand information and, in some circumstances, to enter premises to obtain documents, etc. These powers are rarely used, and there are no routine visits by HMRC officials to taxpayer premises.

General anti-abuse rule (GAAR)

The GAAR applies to income tax, corporation tax, capital gains tax, petroleum revenue tax, inheritance tax (IHT), SDLT, and ATED, but not VAT. It is targeted at changing behaviour of taxpayers who enter what might be considered to be abusive tax avoidance arrangements. The process includes a quasi-judicial review of the arrangements, the outcome of which must be used as evidence in any related tax litigation.

The government has stressed that the GAAR is only intended to apply to abusive tax avoidance arrangements, which are measured by reference to various indicators, some of which are subjective.

Statute of limitations

For companies that are members of medium or large groups, there is generally a period of one year after the statutory filing dates for the tax authorities to start an enquiry into any aspect of the return. For other companies, enquiries can be started up to 12 months after the date of actual filing. These periods are extended for returns submitted after the filing deadline, that are amended by the taxpayer, or where an issue is subsequently discovered that was not sufficiently disclosed within the standard period. Longer periods apply in the event of inadequate disclosure or deliberate misfiling.

Other issues

Adoption of International Financial Reporting Standards (IFRS)

IFRS is mandatory for the consolidated financial statements of listed UK companies.

All companies have the choice of adopting IFRS or adopting the new UK Generally Accepted Accounting Principles (GAAP) - FRS 102 - for their non-consolidated (solus) accounts. Many groups therefore continue to apply UK GAAP in their solus accounts.

The previous form of UK GAAP has been abolished for all periods beginning on or after 1 January 2015. From that time, UK companies will have a choice of either using full IFRS or the FRS 102 for their accounts. UK companies that are subsidiaries will also have an option to prepare accounts under either IFRS or FRS 102 methodologies with reduced disclosures. There are also additional accounting options available for small companies and micro entities. However, the options available to a company are subject to the requirements of the UK Company Law framework for consistency of GAAP within a group.

Intergovernmental agreements (IGAs) and cooperation

The United Kingdom has a wide range of international agreements, alongside DTTs, for the exchange of information about taxpayers. In addition, the United Kingdom seeks to take a participative role in the European Union and within the OECD with regard to the development of international tax principles.

The United Kingdom has implemented the United States (US) Foreign Account Tax Compliance Act (FATCA) arrangements with effect from June 2014. The FATCA legislation is being introduced by the US authorities to prevent tax evasion by US citizens who use offshore accounts, and UK-based financial institutions must comply with its requirements or face suffering WHTs on interest or dividends from US corporations.

UK tax legislation

Announcements of proposed new legislation generally occur at least once a year. The main announcement is made on Budget Day (generally in March), when tax rates are set for the coming year. Other announcements can be made at other times and, subject to becoming approved and adopted law, can apply from a specified date. The new legislation is then included in an annual Finance Act, which is normally finalised in July. Much of the legislation introduced in recent years has been due to challenges under the EC treaty, or as a result of the tax planning being notified under the UK's tax avoidance disclosure regulations. In the year of a general election, there may be additional Budget Days and Finance Acts.

Significant developments

The Consolidated Appropriations Act, 2016, signed into law by President Barack Obama on 18 December 2015, permanently extended numerous temporary tax provisions that had expired on 31 December 2014, extended others for five years, through 31 December 2019, and extended others for two years, through 31 December 2016, all retroactive to 1 January 2015.

The general business incentives that were permanently extended include the following provisions:

- Increased Section 179 expensing limit of 500,000 United States dollars (USD) with USD 2 million phaseout threshold and expanded definition of Section 179 property (*see the Deductions section for a description of the Section 179 deduction*).
- Research credit.
- Subpart F exception for active financing income (*see the Income determination section for a description of Subpart F income*).
- 15-year straight-line cost recovery for qualified leasehold improvements, restaurant buildings and improvements, and retail improvements.
- Wage credit for employers of active-duty military members.
- Enhanced charitable deduction for contributions of food property.
- Treatment of some dividends of regulated investment companies (RICs).
- RICs considered qualified investment entities under the 1980 Foreign Investment in Real Property Tax Act.
- Special rules for qualified small business stock.
- Reduction in S corporation recognition period for built-in gains tax (*see the Taxes on corporate income section for a description of S corporations*).

The general business incentives that were extended for five years include the following:

- 50% bonus depreciation.
- Look-through treatment of payments between related controlled foreign companies (CFCs) under the foreign personal holding company rules.
- New markets tax credit.
- Work opportunity tax credit.

The general business incentives that were extended for two years include the following:

- Seven-year recovery period for motor sports entertainment complexes.
- Special expensing provision for qualified film and television productions.

Making permanent a substantial number of expired tax provisions in the extenders package will provide increased tax certainty for many businesses. At the same time, other provisions that were not made permanent in this legislation will face a more challenging environment to secure further extensions. Congress is expected to review both permanent and temporary tax provisions in the future as part of comprehensive tax reform. The permanent extension of the research credit and 21

other temporary provisions is now part of the federal budget baseline, which could favourably affect future tax reform legislation required to be revenue neutral, since such provisions no longer will have to be paid for.

Also, the Surface Transportation and Veterans Health Care Choice Improvement Act of 2015, P.L. 114-41, signed into law by President Obama on 31 July 2015, changed the due date for Form 1065, US Return of Partnership Income, from 15 April to 15 March, and the due date for Form 1120, US Corporation Income Tax Return, from 15 March to 15 April. Note that the due date for Form 1120S, which is filed by subchapter S corporations, remains 15 March. These changes are effective for the 2016 tax years of partnerships and subchapter C corporations (i.e. for the 2017 filing season).

Taxes on corporate income

In the United States, resident corporations are taxed based on worldwide income. Generally, a foreign corporation engaged in a US trade or business is taxed at regular US corporate tax rates on income from US sources that is effectively connected with that business and at 30% on US-source income not effectively connected with that business.

The US corporate income tax (CIT) rate is based on a progressive rate schedule; however, an alternative minimum tax (AMT) provides for a flat rate with fewer deductions.

2016 taxable income		CIT		
Over (USD)	But not over (USD)	Pay (USD) +	% on excess	of the amount over (USD)
0	50,000	0	15	0
50,000	75,000	7,500	25	50,000
75,000	100,000	13,750	34	75,000
100,000	335,000	22,250	39	100,000
335,000	10,000,000	113,900	34	335,000
10,000,000	15,000,000	3,400,000	35	10,000,000
15,000,000	18,333,333	5,150,000	38	15,000,000
18,333,333			35	0

The 39% tax rate applies to taxable income between USD 100,000 and USD 335,000 to eliminate the benefit of the 15% and 25% rates, and the 38% tax rate applies to taxable income between USD 15,000,000 and USD 18,333,333 to eliminate the benefit of the 34% rate. Special rules apply to personal service corporations and personal holding companies.

Alternative minimum tax (AMT)

An AMT is imposed on corporations other than S corporations (*see below*) and small C corporations (generally those with no three year average annual gross receipts exceeding USD 7.5 million). The tax is 20% of alternative minimum taxable income (AMTI) in excess of a USD 40,000 exemption amount (subject to a phase out). AMTI is computed by adjusting the corporation's regular taxable income by specified adjustments and 'tax preference' items. Tax preference or adjustment items could arise, for example, if a corporation has substantial accelerated depreciation, percentage depletion, intangible drilling costs, or non-taxable income.

S corporations

Corporations with 100 or fewer shareholders, none of whom may be corporations, that meet certain other requirements may elect to be taxed under Subchapter S of the Internal Revenue Code (IRC or 'the Code') and are thus known as S corporations. S

United States

corporations are taxed in a manner similar, but not identical, to partnerships (i.e. all tax items [e.g. income, deductions] flow through to the owners of the entity). Thus, S corporations generally are not subject to US federal income tax.

Gross transportation income taxes

Foreign corporations and non-resident alien individuals are subject to a yearly 4% tax on their US-source gross transportation income (USSGTI) that is not effectively connected with a US trade or business. Transportation income is any income derived from, or in connection with, (i) the use (or hiring or leasing) of any vessel or aircraft, or (ii) the performance of services directly related to the use of any vessel or aircraft.

Local income taxes

CIT rates vary from state to state and generally range from 1% to 12% (although some states impose no income tax). The most common taxable base is federal taxable income, which is modified by state provisions and generally is allocated to a state on the basis of a three-factor formula: tangible assets and rental expense, sales and other receipts, and payroll. State and municipal taxes are deductible expenses for federal income tax purposes.

Corporate residence

A corporation organised or created in the United States under the law of the United States or of any state is a domestic corporation. A domestic corporation is a resident corporation even though it does no business or owns no property in the United States.

Permanent establishment (PE)

A PE generally is defined as a fixed place of business.

Other taxes

Sales taxes

No provisions exist for a sales tax or value-added tax (VAT) at the federal level. However, sales and use taxes constitute a major revenue source for the 45 states that impose such taxes and the District of Columbia. Sales and use tax rates vary from state to state and generally range from 2.9% to 7.25% at the state level. Most states also allow a 'local option' that permits local jurisdictions, such as cities and counties, to impose an additional percentage on top of the state-level tax and to keep the related revenues.

In general, a sales tax is a tax applied to the retail sale of tangible personal property and certain services. Although the form of the tax may vary, it is usually imposed either directly upon the retail sale of the taxable item, on the gross receipts from the sales of taxable items, or on the person engaged in the business of making retail sales of taxable items. The use tax complements the sales tax and is usually assessed on purchases made out of state and brought into the jurisdiction for use, storage, or consumption. Typically, either a sales tax or a use tax can be assessed on a transaction, but not both.

Customs duties and import tariffs

All goods imported into the United States are subject to entry and are dutiable or duty-free in accordance with their classification under the applicable items in the Harmonized Tariff Schedule of the United States. The classification also identifies eligibility for special programs and free trade agreement preferential duty rates.

When goods are dutiable, *ad valorem*, specific, or compound duty rates may be assessed. An *ad valorem* rate, which is the type of rate most often applied, is a percentage of the value of the merchandise, such as 7% *ad valorem*. A specific rate is a specified amount per unit of weight or other quantity, such as 6.8 cents per dozen. A compound rate is

a combination of both an *ad valorem* rate and a specific rate, such as 0.8 cents per kilo plus 8% *ad valorem*. Customs requires that the value of the goods be properly declared regardless of the dutiable status of the merchandise.

Liability for the payment of duty becomes fixed at the time an entry is filed with US Customs and Border Protection (CBP). The obligation for payment is upon the person or firm in whose name the entry is filed, the importer of record.

Excise taxes

Excise taxes are generally imposed by the federal and state governments on a wide range of goods and activities, including gasoline and diesel fuel used for transportation, air travel, manufacturing of specified goods, and indoor tanning services.

The excise tax rates are as varied as the goods and activities upon which they are levied. For example, the excise imposed on indoor tanning services is 10% of the amount paid for the services while the excise imposed on the sale of coal mined in the United States is the lower of USD 1.10 per ton or 4.4% of the sale price.

Property taxes

Most states, and some cities, impose a variety of property taxes on both real and personal property.

Stamp taxes

No provisions exist for a stamp tax at the federal level. However, state and local governments frequently impose stamp taxes at the time of officially recording a transaction based upon the value of real estate. The sales tax on real estate may be a stamp tax on the documents recording the transfer of the real estate.

Capital gain taxes

On current transactions, the long-term capital gains tax rate is the same as the tax rates applicable to ordinary income. Thus, the maximum rate is 35%, excluding the additional phase out rates. However, differences may arise where AMT is imposed.

Accumulated earnings tax

Corporations (other than S corporations, domestic and foreign personal holding companies, corporations exempt from tax under Subchapter F of the Code, and passive foreign investment companies) accumulating earnings and profits for the purpose of avoiding shareholder personal income tax (PIT) are subject to a penalty tax in addition to any other tax that may be applicable. The accumulated earnings tax is equal to 15% of 'accumulated taxable income'. Generally, accumulated taxable income is the excess of taxable income with certain adjustments, including a deduction for regular income taxes, over the dividends paid deduction and the accumulated earnings credit. Note that a corporation can justify the accumulation of income, and avoid tax, based on its reasonable business needs.

Personal holding company tax

US corporations and certain foreign corporations that receive substantial 'passive income' and are 'closely held' may be subject to personal holding company tax. The personal holding company tax is 15% of undistributed personal holding company income and is levied in addition to the regular tax.

Payroll taxes

Employers are subject to federal unemployment insurance tax (FUTA) of 6.2% on the first USD 7,000 of wages paid to employees meeting certain criteria. In addition, states impose workers' compensation insurance tax at varying rates depending on state law and the nature of employees' activities. For 2016, employers also are subject to social security contributions tax of 7.65% (including 1.45% Medicare tax) on the first

United States

USD 118,500 (no change from 2015) of wages paid to employees and 1.45% of Medicare tax on any wages in excess of USD 118,500 (no change from 2015).

Environmental tax

Importers, manufacturers, and sellers of petroleum or other ozone-depleting chemicals (ODC) are subject to an environmental tax calculated per weight of the ODC used in the manufacture of the product. The tax is determined under an exact or table method provided in the instructions to Form 6667. If the weight cannot be determined, the tax is 1% of the entry value of the product.

Other state and municipal taxes

Other taxes that states may impose, in lieu of or in addition to taxes based on income, include franchise taxes and taxes on the capital of a corporation. State and municipal taxes are deductible expenses for federal income tax purposes.

Branch income

Tax rates on branch profits are the same as on corporate profits. The law also imposes a 30% branch profits tax in addition to US corporate level income taxes on a foreign corporation's US branch earnings and profits for the year that are effectively connected with a US business. The taxable base for the branch profits tax is increased (decreased) by any decrease (increase) in the US net equity of the branch. The branch profits tax on profits may be reduced or eliminated entirely if a relevant treaty so provides (subject to strict 'treaty shopping' rules). The purpose of the branch profits tax is to treat US operations of foreign corporations in much the same manner as US corporations owned by foreign persons.

With certain exceptions, a 30% (or lower treaty rate) branch profits tax also will be imposed on interest payments by the US branch to foreign lenders. In addition, the tax will apply if the amount of interest deducted by the branch on its US tax return exceeds the amount of interest actually paid during the year.

Income determination

Inventory valuation

Inventories generally are stated at the lower of cost or market on a first in first out (FIFO) basis. Last in first out (LIFO) may be elected for tax purposes on a cost basis only and generally requires book and tax conformity.

The tax law requires capitalisation for tax purposes of several costs allocable to the manufacturing process that frequently are expensed as current operating costs for financial reporting (e.g. the excess of tax depreciation over financial statement depreciation).

Capital gains

Gains or losses on the sale or exchange of capital assets held for more than 12 months are treated as long-term capital gains or losses. Gains or losses on the sale or exchange of capital assets held for 12 months or less are treated as short-term capital gains or losses. The excess of net long-term capital gain over net short-term capital loss is considered net capital gain. Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a tax year may be carried back three years and carried forward five years to be used against (offset) capital gains.

For dispositions of personal property and certain non-residential real property used in a trade or business, net gains are first taxable as ordinary income to the extent of the depreciation/cost recovery, with any remainder generally treated as capital gain. For

other trade or business real property, net gains generally are taxed as ordinary income to the extent that the depreciation or cost recovery claimed exceeds the straight-line amount, with any remainder treated as capital gain.

An exception to capital gain treatment exists to the extent that losses on business assets were recognised in prior years. A net loss from the sale of business assets is treated as an ordinary loss. Future gains, however, will be treated as ordinary income to the extent of such losses recognised in the five immediately preceding years.

Dividend income

A US corporation generally may deduct 70% of dividends received from other US corporations in determining taxable income. The dividends received deduction is increased from 70% to 80% if the recipient of the dividend distribution owns at least 20% but less than 80% of the distributing corporation. Generally, dividend payments between US corporations that are members of the same affiliated group (*see the Group taxation section*) are deferred or eliminated until a transaction with a third party occurs. With minor exceptions, a US corporation may not deduct dividends it receives from a foreign corporation.

Stock dividends

A US corporation can distribute a tax-free dividend of common stock proportionately to all common stock shareholders. If the right to elect cash is given, all distributions to all shareholders are taxable as dividend income whether cash or stock is taken. There are exceptions to these rules, and extreme caution must be observed before making such distributions.

Interest income

Interest income is generally includible in the determination of taxable income.

Rental income

Rental income is generally includible in the determination of taxable income.

Royalty income

Royalty income is generally includible in the determination of taxable income.

Partnership income

The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership's taxable income.

Foreign income (Subpart F income) of US taxpayers

Generally, a US corporation is taxed on its worldwide income, including foreign branch income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credits. Alternatively, a deduction may be claimed for actual foreign taxes that are paid. In the case of foreign subsidiaries that are more than 50% owned (by vote or value) by US shareholders (commonly known as controlled foreign companies or CFCs), certain types of undistributed income will be taxed currently to the US shareholders (Subpart F income). Generally, Subpart F income includes income that is easily transferred to a low-tax jurisdiction.

Income from certain passive foreign investment companies (where 75% or more of the income is passive or at least 50% of the assets held produce passive income) also is subject to current taxation. Current taxation occurs if the corporation elects to be a qualified electing fund (QEF) or there are actual distributions. If a QEF election is not made and the corporation makes an actual distribution, the distribution will be treated as an excess distribution to the extent it exceeds 125% of the average of the distributions made with respect to the stock over the three immediately preceding years. The excess distribution is spread over the taxpayer's holding period, and the amount allocated to

United States

each year in the holding period is subject to tax at the highest marginal tax rate in effect for that year. This deferred tax amount also is subject to an interest charge. The interest charge is designed to pay the benefit of the tax deferral that arises out of having an overseas investment that pays no US income taxes.

Deductions

Depreciation and amortisation

Depreciation deductions are allowances that may be taken for capital outlays for tangible property. For property placed in service after 1986, capital costs must be recovered by using the modified accelerated cost recovery system (MACRS) method. Depending on the type of tangible property, the general cost recovery periods are three, five, seven, ten, 15, 20, 27.5, and 39 years (31.5 years for property placed in service before 13 May 1993). The cost recovery methods and periods are the same for both new and used property. Most tangible personal property is in the three, five, or seven year class. Property placed in the three, five, seven, or ten year class is depreciated by first applying the 200% declining-balance method and then switching to the straight-line method at such a time as when use of the straight-line method maximises the depreciation deduction. Property in the 15 or 20 year class is depreciated by using the 150% declining-balance method and later switching to the straight-line method. An election may be made to use the alternative depreciation system (basically, the straight-line method over prescribed lives). Residential rental property generally is depreciated by the straight-line method over 27.5 years. Non-residential real property is depreciated by the straight-line method over 39 years (31.5 years for property placed in service before 13 May 1993).

An election to use the straight-line method over the regular recovery period or a longer recovery period also is available. Alternatively, taxpayers may elect to use the 150% declining-balance method over the regular recovery period for all property other than real property. This method is required for AMT purposes.

For most tangible personal and real property placed in service in the United States after 1980 but before 1 January 1987, capital costs were recovered using the accelerated cost recovery system (ACRS), which applied accelerated methods of cost recovery over periods specified by statute. The general ACRS recovery periods were three, five, ten, 15, 18, and 19 years.

Special rules apply to automobiles and certain other 'listed' property. Accelerated depreciation deductions can be claimed only if the automobile is used 50% or more for qualified business use as defined in related regulations. Further, for automobiles placed in service after 1986, the allowable yearly depreciation deduction cannot exceed specific dollar limitations.

Separate methods and periods of cost recovery are specified by statute for certain tangible personal and real property used outside the United States.

Rapid amortisation may be allowable for certain pollution control facilities.

Tax depreciation is not required to conform to book depreciation. Tax depreciation generally is subject to recapture on the sale or disposition of certain property, to the extent of gain, which is subject to tax as ordinary income.

The cost of most intangible assets is generally capitalised and amortisable rateably over 15 years.

Section 179 deduction

Corporations can elect to expense, up to a statutory amount per year, the cost of certain eligible property used in the active conduct of a trade or business. This is commonly referred to as the Section 179 deduction.

The 2003 tax cuts temporarily increased the maximum dollar amount that may be deducted under Section 179 from USD 25,000 to USD 100,000. The 2003 tax cuts also increased the phase-out amount from USD 200,000 to USD 400,000. These amounts have been further modified and extended several times on a temporary basis, increasing up to a high of USD 500,000 and USD 2 million, respectively, for tax years beginning in 2010 and 2011, and then to USD 125,000 and USD 500,000, respectively, for tax years beginning in 2012, before reverting to the permanent amounts of USD 25,000 and USD 200,000, respectively, for tax years beginning in 2013 and thereafter. The American Taxpayer Relief Act of 2012, signed into law on 2 January 2013, increases the maximum amount and phase-out threshold in 2012 and 2013 to the levels in effect in 2010 and 2011 (USD 500,000 and USD 2 million, respectively). The Tax Increase Prevention Act of 2014, signed into law on 19 December 2014, extended the USD 500,000 and USD 2 million amounts to tax years beginning in 2014. The Consolidated Appropriations Act, 2016, signed into law on 18 December 2015, extended the USD 500,000 and USD 2 million amounts permanently, retroactive to 1 January 2015; beginning in 2016, the limitation amount will be indexed for inflation.

In addition, the deduction under this election is limited to the taxable income of the business.

Bonus depreciation

A 50% special first year depreciation allowance (i.e. bonus depreciation) applies (unless an election out is made) for new MACRS property with a recovery period of 20 years or less, certain computer software, water utility property, and certain leasehold improvements acquired after 31 December 2007. The special allowance applies for regular income tax and AMT purposes. No AMT adjustment is made if the special allowance is used. The special allowance does not apply to property that must be depreciated using the alternative depreciation system or to 'listed property' not used predominantly for business. The special allowance reduces basis before regular depreciation is figured. Additionally, claiming bonus depreciation on automobiles may affect the first year depreciation limits on such automobiles.

The Tax Increase Prevention Act of 2014, signed into law on 19 December 2014, extended 50% bonus depreciation through 31 December 2014 (31 December 2015 for long-production-period property [LPPP] and certain aircraft).

The Act extended for one year, to property placed in service before 1 January 2015 (1 January 2016 in the case of certain longer-lived property and transportation property), the provision allowing a corporation to elect to accelerate AMT credits in lieu of bonus depreciation.

The Consolidated Appropriations Act, 2016, signed into law on 18 December 2015, extended bonus depreciation as follows:

- 30% for property acquired and placed in service during 2015, 2016, and 2017.
- 40% for property acquired and placed in service during 2018.
- 30% for property acquired and placed in service during 2019.

The Act also modified the AMT rules beginning in 2016 by increasing the amount of unused AMT credits that may be claimed in lieu of bonus depreciation.

United States

Depletion

For natural resource properties other than timber and certain oil and gas properties, depletion may be computed on a cost or a percentage basis.

Cost depletion is a method of depletion applied to exhaustible natural resources, including timber, which is based on the adjusted basis of the property. Each year, the adjusted basis of the property is reduced, but not below zero, by the amount of depletion calculated for that year. The current year cost depletion deduction is based on an estimate of the number of units that make up the deposit and the number of units extracted and sold during the year.

Percentage depletion is a method of depletion applied to most minerals and geothermal deposits, and, to a more limited extent, oil and gas. Percentage depletion is deductible at rates varying from 5% to 25% of gross income, depending on the mineral and certain other conditions. Percentage depletion may be deducted even after the total depletion deductions have exceeded the cost basis. However, percentage depletion is limited to 50% (100% for oil and gas properties) of taxable income from the property (computed without allowance for depletion). Generally, percentage depletion is not available for oil or gas wells. However, exceptions exist for natural gas from geopressurised brine and for independent producers of oil and gas.

Goodwill

The cost of goodwill generally is capitalised and amortisable rateably over 15 years.

Start-up expenses

Generally, start-up expenditures must be amortised over a 15-year period; however, certain taxpayers may elect to deduct some expenses in the tax year in which the trade or business begins.

US manufacturing deduction

Over the last several decades, various tax incentive systems have been enacted in the United States to encourage exports and were later repealed, including the extraterritorial income (ETI) regime, which was repealed as a result of a World Trade Organization (WTO) ruling that the ETI regime favoured US goods and violated the national treatment provisions of the General Agreement on Tariffs and Trade. In response, the United States enacted the American Jobs Creation Act of 2004, which introduced a phase-out repeal of ETI and introduced the domestic production activities deduction under Section 199, seeking to compensate US manufacturers for the loss of ETI benefits.

Under Section 199, taxpayers are allowed a 9% deduction for qualified production activities (QPA) income (subject to a taxable income limitation). The deduction is available to all taxpayers actively engaged in QPA. For corporate taxpayers, the deduction generally will mean a federal income tax rate of 31.85% on QPA income. Importantly, the deduction also applies in calculating the AMT. There is a limit on the amount of the deduction equal to 50% of W-2 wages allocable to QPA (subject to a specific effective date), and the deduction is not allowed for taxpayers that incur a loss from their production activities or have an overall loss (including a carryover loss) from all activities.

A taxpayer's QPA income is calculated using the following formula: domestic production gross receipts less the sum of cost of goods sold allocable to such receipts and other expenses, losses, or deduction that are properly allocable to such receipts.

Interest expenses

Interest expenses generally are deductible but may be limited by thin capitalisation rules (see *Thin capitalisation in the Group taxation section*).

Bad debt

Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless. Determining the date the debt becomes worthless may present difficulty.

Charitable contributions

Deductions for allowable charitable contributions may not exceed 10% of taxable income computed without regard to certain deductions, including charitable contributions themselves. Deductions for contributions so limited may be carried over to the five succeeding years, subject to the 10% limitation annually.

Employee benefit plans (pension plans and expenses)

Through the Code, the government provides incentives for employers to provide retirement benefits to workers, including employee benefit, qualifying profit-sharing, or stock bonus plans. Usually, the employer will be allowed a current deduction for any contributions made to the fund, and the employee's tax liability will be deferred until the benefit is paid. For-profit, non-government employers generally have two types of available plans, which generally are subject to the reporting and disclosure requirements set forth under the Employee Retirement Income Security Act of 1974 (ERISA).

The first category of employee benefit plans is the defined benefit plan, or more commonly known as a pension plan, to which an employer contributes money, on an ongoing basis, to cover the amount of retirement income owed to retired employees under the plan (which will vary based on years of service, average salary, and/or other factors). Any investment gains or losses will not affect the amount of benefits paid to participants but will affect the amount an employer needs to contribute in order to cover its obligation.

The second category of employee benefit plans is the defined contribution plan, or more commonly known in the United States as a '401(k) plan', to which an employer's contributions (if any) are allocated amongst the separate accounts of participating employees, who also may contribute to their respective accounts. Investment gains or losses and the history of contributions will affect the value of a participant's account at retirement but will not affect an employer's contributions since the employer is not obligated to ensure any specified level of benefit in the plan.

Non-profits, including churches and government entities, have similar employee benefit plans, except different requirements apply. Small employers and self-employed individuals also have similar options available but are subject to different requirements.

Fines and penalties

No deduction generally is allowed for fines or penalties paid to the government for violation of any law.

Bribes, kickbacks, and illegal payments

An amount paid, directly or indirectly, to any person that is a bribe, kickback, or other illegal payment is not deductible.

Taxes

State and municipal taxes are deductible expenses for federal income tax purposes.

Other significant items

- No deduction generally is allowed for a contingent liability until such liability is fixed and determinable.
- Costs incurred for entertainment must meet strict tests in order to be deductible. The deduction for business meal and entertainment expenses is 50% of the expenses

United States

incurred. There are also limitations on the deductibility of international and domestic business travel expenses.

- Royalty payments, circulation costs, mine exploration and development costs, and other miscellaneous costs of carrying on a business are deductible, subject to certain conditions and limits.
- Depending on the taxpayer's tax accounting method, research and experimental (R&E) expenditures may be deducted as incurred or treated as deferred expenses and amortised over a period of not less than 60 months; however, in general, the method used must be consistently applied.

Net operating losses (NOLs)

An NOL is generated when business deductions exceed gross income in a particular tax year. Depending on current tax law, an NOL may be carried back to offset past income and possibly obtain a refund or carried forward to offset future income. Generally, a loss may be carried back two years and, if not fully used, carried forward 20 years. For state tax purposes, carryback and carryforward provisions are often similar to the federal provisions, except that several states do not permit any carrybacks or carryforwards.

Special rules surrounding NOLs may apply if a taxpayer is located in a qualified disaster area.

Special rules also apply relating to specified liability losses.

Complex rules may limit the use of NOLs after a reorganisation or other change in corporate ownership. Generally, if the ownership of more than 50% in value of the stock of a loss corporation changes, a limit is placed on the amount of future income that may be offset by losses carried forward.

Payments to foreign affiliates

A US corporation generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates to the extent the amounts are actually paid and are not in excess of what it would pay an unrelated entity (i.e. are at arm's length). In addition, US withholding on these payments may be required.

Group taxation

An affiliated group of US 'includible' corporations, consisting of a parent and subsidiaries directly or indirectly 80% owned, generally may offset the profits of one affiliate against the losses of another affiliate within the group by electing to file a consolidated federal income tax return. A foreign incorporated subsidiary may not be consolidated into the US group, except for certain Mexican and Canadian incorporated entities. A partnership may not be included in a consolidated return, even if it is 100% owned by members of an affiliated group, since a partnership is not a corporation. However, a member's earnings that flow through from a partnership are included as part of the consolidated group's taxable income or loss. Filing on a consolidated (combined) basis is also allowed (or may be required or prohibited) in certain states.

Sales, dividends, and other transactions between corporations that are members of the same group generally are deferred or eliminated until such time as a transaction occurs with a non-member of the group. Losses incurred on the sale of members of the group are disallowed under certain circumstances.

Transfer pricing

Transfer pricing regulations govern how related entities set internal prices for the transfers of goods, intangible assets, services, and loans in both domestic and international contexts. The regulations are designed to prevent tax avoidance among related entities and place a controlled party on par with an uncontrolled taxpayer by

requiring an arm's-length standard. The arm's-length standard generally is met if the results of a controlled transaction are consistent with results that would have been realised if uncontrolled taxpayers had engaged in a similar transaction under similar circumstances. If a company is not in compliance with the arm's-length standard, the Internal Revenue Service (IRS) may raise taxable income and tax payable in the United States. After a transfer pricing adjustment, a multinational company may face double tax, paying tax twice on the same income in two countries. Multinational companies may request competent authority relief from double taxation through a tax treaty.

In order to avoid potential transfer pricing penalties, one avenue available to companies may be to obtain an advance pricing agreement (APA) with the IRS, unilaterally, or with the IRS and another tax authority, bilaterally, covering inter-company pricing.

Thin capitalisation

Thin capitalisation rules may apply to disallow interest payments related to excess debt and to re-characterise such payments as dividends. The interest expense deduction can be limited and suspended if more than 50% of the adjusted taxable income of a thinly-capitalised corporation (with similar rules for a corporate partner in a partnership) is sheltered by interest paid to a related party (or paid to a third-party but guaranteed by the related party) who is not subject to US tax on the income.

Controlled foreign companies (CFCs)

Under the Subpart F regime, a CFC is any foreign corporation with respect to which more than 50% of either the voting power of all classes of stock entitled to vote or the total value of all classes of the corporation's stock is owned by US shareholders on any day during the foreign corporation's tax year.

Tax credits and incentives

Foreign tax credit (FTC)

Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction foreign income, war profits, and excess profit taxes paid or accrued during the tax year to any foreign country or US possession. An FTC reduces US income tax liability dollar for dollar, while a deduction reduces the US income tax liability at the marginal rate of the taxpayer. For taxpayers with NOLs, the FTC is of no value in such year. However, a benefit might be received either in an earlier year (through a refund of previously paid taxes) or a later year (through a reduction of future taxes). It also should be noted that a taxpayer has an ability to switch from credit to deduction (or from deduction to credit) at any time in a ten-year period commencing when the foreign taxes were paid or accrued. Generally, an FTC may be carried back one year and, if not fully used, carried forward ten years.

In addition, the FTC goes beyond direct taxes to include foreign taxes paid 'in lieu of' a tax upon income, war profits, or excess profits, which would otherwise generally be imposed. It also includes deemed-paid (indirect) taxes paid for certain US corporate shareholders of non-portfolio foreign corporations when actual or deemed dividends are received. Furthermore, the FTC system has numerous limitations to mitigate the potential abuses of the credit by the taxpayer.

General business credit

Various business credits are available to provide special incentives for the achievement of certain economic objectives. In general, these credits are combined into one 'general business credit' for purposes of determining each credit's allowance limitation for the tax year. The general business credit that may be used for a tax year is limited to a tax-based amount. In general, the current year's credit that cannot be used in a given year because of the credit's allowance limitation may be carried back to the tax year preceding the current year and carried forward to each of the 20 years following the current year.

United States

In general, the current year business credit is a combination of the following credits, some of which were extended, retroactively to 1 January 2015, for two years, five years, or permanently as part of the Consolidated Appropriations Act, 2016, and others of which expired at the end of 2014, but still may be renewed retroactively by Congress:

- Investment credit.
- Work opportunity credit.
- Alcohol fuels credit.
- Research credit.
- Low-income housing credit.
- Enhanced oil recovery credit.
- Disabled access credit for certain eligible small businesses.
- Renewable electricity production credit.
- Empowerment zone employment credit.
- Indian employment credit.
- Employer social security credit.
- Orphan drug credit.
- New markets tax credit.
- Small employer pension plan start-up cost credit for eligible employers.
- Employer-provided child care credit.
- Railroad track maintenance credit.
- Biodiesel fuels credit.
- Low sulphur diesel fuel production credit.
- Marginal oil and gas well production credit.
- Distilled spirits credit.
- Advanced nuclear power facility production credit.
- Non-conventional source production credit.
- New energy efficient home credit.
- Energy efficient appliance credit.
- A portion of the alternative motor vehicle credit.
- A portion of the alternative fuel vehicle refuelling property credit.
- Hurricane Katrina housing credit.
- Hurricane Katrina employee retention credit.
- Hurricane Rita employee retention credit.
- Hurricane Wilma employee retention credit.
- Mine rescue team training credit.
- Agricultural chemicals security credit for eligible businesses.
- Differential wage payment credit.
- Carbon dioxide sequestration credit.
- A portion of the new qualified plug-in electric drive motor vehicle credit for vehicles that will vary based on the date of purchase.

Employment credits

A 'work opportunity tax credit' is available through 2019 for employment of certain types of workers. 'Creditable' wages generally are the first USD 6,000 of wages paid to each qualified employee for the year. The credit is 40% of creditable wages, for a maximum credit of USD 2,400.

Research credit

The research credit under Section 41 is available for companies that make qualified research expenditures (QREs) to develop new or improved products, manufacturing processes, or software in the United States. The credit was enacted in 1981 on a temporary basis to help increase R&E spending in the United States. Since then, the research credit has been extended on a temporary basis about 16 times, but was extended, retroactively to 1 January 2015, on a permanent basis as part of the Consolidated Appropriations Act, 2016.

The research credit generally is computed by calculating current-year QRE over a base. The base is calculated using either the regular research credit (RRC) method or the alternative simplified credit (ASC) method. Under the RRC method, the credit equals 20% of QREs for the tax year over a base amount established by the taxpayer in 1984 to 1988 or by another method for companies that began operations after that period.

The ASC equals 14% (for the 2009 tax year and thereafter) of QREs over 50% of the average annual QREs in the three immediately preceding tax years. If the taxpayer has no QREs in any of the three preceding tax years, the ASC may be 6% of the tax year's QREs. The taxpayer must make a timely ASC election on Form 6765 attached to an originally filed return filed by the due date for that return (including extensions), or, pursuant to final regulations published in February 2015, an amended return (subject to certain limitations).

Taxpayers using the RRC also may take a 20% credit for incremental payments made to qualified organisations for basic research. For tax years ending after 8 August 2005, taxpayers also may take the Energy Research Consortium Credit, which provides a 20% credit for expenditures on qualified energy research undertaken by an energy research consortium.

The deduction for R&E expenditures under Section 174 must be reduced by the entire amount of the credit unless an election is made to reduce the amount of the credit.

Inbound investment incentives

There generally are no specific incentives related to inbound investment at the federal level, other than certain portfolio debt and bank deposit exceptions. The portfolio debt exception enables non-residents and foreign corporations to invest in certain obligations (which must meet certain statutory requirements to qualify as 'portfolio debt') in the United States without being subject to US income (or withholding) tax on the interest income. Certain state and local benefits may also be available.

Qualified private activity bonds

Interest income received on certain qualified private activity bonds generally is exempt from federal income tax. This enables a business enterprise to issue the bonds at a lower interest rate.

Other tax incentives

State and local governments provide numerous incentives to encourage business and, thus, employment in their jurisdictions.

Withholding taxes

Under US domestic tax laws, a foreign person generally is subject to 30% US tax on its US-source income. US persons making payments ('withholding agents') to foreign persons generally must withhold 30% of the payment amount as tax withheld at source on payments, such as dividends and royalties, made to foreign persons. In other situations, withholding agents may apply reduced rates or be exempted from withholding tax (WHT) at source when there is a tax treaty between the foreign person's country of residence and the United States.

The United States has entered into various income tax treaties with countries in order to avoid double taxation of the same income and to prevent tax evasion. The table below, from IRS Publication 901 (Rev. April 2013), summarises the benefits resulting from these treaties.

United States

Recipient	Dividends paid by US corporations in general (%) (1)	Dividends qualifying for direct dividend rate (%) (1, 2)	Interest paid by US obligors in general (%)	Royalties* (%)

Notes

* Please note the tax rates and associated footnotes appearing in the 'Royalties' column in the table address three types of royalties, as denoted in the most recent IRS publication. These three are industrial royalties, motion picture and television copyright royalties, and 'other' copyright royalties. The slashes '/' between each figure and associated footnote(s) are meant to demarcate these three types of royalties, respectively.

- No US tax is imposed on a dividend paid by a US corporation that received at least 80% of its gross income from an active foreign business for the three-year period before the dividend is declared.
- The reduced rate applies to dividends paid by a subsidiary to a foreign parent corporation that has the required percentage of stock ownership. In some cases, the income of the subsidiary must meet certain requirements (e.g. a certain percentage of its total income must consist of income other than dividends and interest). For Italy, the reduced rate is 10% if the foreign corporation owns 10% to 50% of the voting stock (for a 12-month period) of the company paying the dividends. For Japan, dividends received from a more than 50% owned corporate subsidiary are exempt if certain conditions are met.
- The exemption or reduction in rate does not apply if the recipient has a PE in the United States and the property giving rise to the income is effectively connected with this PE. Under certain treaties, the exemption or reduction in rate also does not apply if the property producing the income is effectively connected with a fixed base in the United States from which the recipient performs independent personal services. Even with the treaty, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States under IRC Section 894(b).
- The exemption or reduction in rate does not apply if the recipient is engaged in a trade or business in the United States through a PE that is in the United States. However, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States to apply the reduced treaty rate to that item of income.
- Interest determined with reference to the profits of the issuer or one of its associated enterprises is taxed at 15%.
- Contingent interest that does not qualify as portfolio interest is treated as a dividend and is subject to the rates under those columns, as appropriate.
- The exemption applies only to interest on credits, loans, and other indebtedness connected with the financing of trade between the United States and the CIS member. It does not include interest from the conduct of a general banking business.
- The tax rates in the US treaty with the former USSR still apply to the following countries: Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan, and Uzbekistan.
- The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or a real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is an individual holding less than a 10% interest (25% in the case of Portugal, Spain, and Tunisia) in the REIT.
- The rate is 8% for copyrights of scientific work.
- The rate is 5% for interest (i) beneficially owned by a bank or other financial institution (including an insurance company) or (ii) paid due to a sale on credit of any industrial, commercial, or scientific equipment, or of any merchandise to an enterprise.
- The rate is 10% if the interest is paid on a loan granted by a bank or similar financial institution. For Thailand, the 10% rate also applies to interest from an arm's-length sale on credit of equipment, merchandise, or services.

United States

13. This is the rate for royalties for the use of, or the right to use, industrial, commercial, and scientific equipment. The rate for royalties for information concerning industrial, commercial, and scientific know-how is subject to the rate in column 5 ('other royalties').
14. The rate is 15% for copyrights of scientific work.
15. Amounts paid to a pension fund or employee benefit organisation that are not derived from the carrying on of a business, directly or indirectly, by the fund or organisation are exempt.
16. The rate in column 2 applies to dividends paid by a RIC. Dividends paid by a REIT are subject to a 30% rate.
17. An election can be made to treat this interest income as if it were industrial and commercial profits taxable under article 8 of this treaty.
18. The rate is 4.9% for interest derived from (i) loans granted by banks and insurance companies and (ii) bonds or securities that are regularly and substantially traded on a recognised securities market. The rate is 10% for interest not described in the preceding sentence and paid (i) by banks or (ii) by the buyer of machinery and equipment to the seller due to a sale on credit.
19. The rate is 15% (10% for Bulgaria; 30% for Germany and Switzerland) for contingent interest that does not qualify as portfolio interest.
20. The rate is 15% for interest determined with reference to (i) receipts, sales, income, profits, or other cash flow of the debtor or a related person, (ii) any change in the value of any property of the debtor or a related person, or (iii) any dividend, partnership distribution, or similar payment made by the debtor to a related person.
21. Interest received by a financial institution is tax exempt. For Venezuela, the rate is 4.95% if the interest is beneficially owned by a financial institution (including an insurance company).
22. The rate in column 2 applies to dividends paid by a RIC or REIT. However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual (or pension fund, in the case of France or New Zealand) holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.
23. Interest paid or accrued on the sale of goods, merchandise, or services between enterprises is exempt. Interest paid or accrued on the sale on credit of industrial, commercial, or scientific equipment is exempt.
24. Dividends received from an 80%-owned corporate subsidiary are exempt if certain conditions are met.
25. Exemption does not apply to amount paid under, or as part of, a conduit arrangement.
26. Interest is exempt if (i) paid to certain financial institutions, or (ii) paid on indebtedness from the sale on credit of equipment or merchandise.
27. Amounts paid to a pension fund that are not derived from the carrying on of a business, directly or indirectly, by the fund are exempt. This includes amounts paid by a REIT only if the conditions in footnote 31 are met. For Sweden, to be entitled to the exemption, the pension fund must not sell or make a contract to sell the holding from which the dividend is derived within two months of the date the pension fund acquired the holding.
28. The rate in column 2 applies to dividends paid by a RIC or REIT. However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual or a pension fund holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified. Dividends paid to a pension fund from a RIC, or a REIT that meets the above conditions, are exempt. For Sweden, the pension fund must also satisfy the requirements in footnote 30.
29. The exemption does not apply if the recipient of the gain is an individual who is present in the United States for more than 119 days during the year.
30. The rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual holding less than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.

Tax administration

Taxable period

US corporate taxpayers are taxed on an annual basis. Corporate taxpayers may choose a tax year that is different from the calendar year. New corporations may use a short tax year for their first tax period, and corporations may also use a short tax year when changing tax years.

Tax returns

The US tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual tax return (generally Form 1120) by the 15th day of the fourth month following the close of its tax year. A taxpayer can obtain an additional six month extension of time to file its tax return. Failure to timely file may result in penalties.

Important tax return due dates

Form No.	Title	Purpose	Due date
W-2	Wage and Tax Statement	Employers must provide employees with statements regarding total compensation and amounts withheld during year.	Must be sent to employees on or before 31 January.
1099 series	Various	Information returns to be provided to recipients of dividends and distributions, interest income, miscellaneous income, etc.	Must be sent on or before 31 January.
1120 series, including 1120S (for S Corps)	US Corporation Income Tax Return	Income tax returns for domestic corporations or foreign corporations with US offices.	15 April for C corporations, 15 March for S corporations (Form 7004 may be filed to obtain an automatic six-month extension)
Schedule K-1	Partner's Share of Income (Loss) from an Electing Large Partnership	Information returns to be provided to partners by large partnerships.	15 March
1065	US Return of Partnership Income	Information returns to be filed by large partnerships.	15 March (Form 7004 may be filed to obtain an automatic six-month extension)
State tax returns	Various	Income tax returns for states where corporation carries on trade/business.	Varies, often 15 April

Payment of tax

A taxpayer's tax liability generally is required to be prepaid throughout the year in four equal estimated payments and fully paid by the date the tax return is initially due for that year. However, because a corporation that expects its tax liability for the tax year to exceed the small sum of USD 500 (based on its tax liability for the preceding year), almost all corporations are required to pay their full estimated tax liability for the year in their four estimated tax payments. For calendar year corporations, the four estimated payments are due by the 15th day of April, June, September, and December. For fiscal year corporations, the four estimated payments are due by the 15th day of the fourth, sixth, ninth, and 12th month of the tax year. Generally, no extensions to pay are allowed. Failure to pay the tax by the due dates as indicated above can result in estimated tax and late payment penalties and interest charges.

The instalment payments must include estimates of regular CIT, AMT, environmental tax, and, for foreign corporations, the tax on gross transportation income. To avoid a penalty, corporations must calculate the instalment payments based on at least 25% of the lesser of (i) the tax shown on the current tax return or (ii) the prior year's tax liability, provided that the tax liability was a positive amount in the prior year and that such year consisted of 12 months. However, corporations with taxable income of at least USD 1 million (before use of NOLs or capital loss carryforwards) in any of the three preceding years are not permitted to calculate the instalment based payment on the prior year's tax liability, except in determining the first instalment payment. Instead, such corporations must calculate the instalment payments based on the tax shown on the current tax return.

Penalties

Civil and criminal penalties may be imposed for failing to follow the Code when paying US taxes. The civil penalty provisions may be divided into four categories: delinquency penalties; accuracy-related penalties; information reporting penalties; and preparer,

United States

promoter, and protester penalties. Many, but not all, have exception provisions to cover reasonable cause. In addition, many have provisions directing how the penalties interact with the other penalties.

These four main civil penalty categories may further be divided. First, the delinquency penalties may be divided into failure to file, failure to pay, and failure to make timely deposits of tax. Failure to make timely deposits of tax applies to taxpayers required to make instalment payments and WHT payments.

Second, the penalties relating to the accuracy of tax returns are divided into the negligence penalty, the substantial understatement penalty, substantial overstatement of pension liabilities, substantial estate or gift tax valuation underestimate, and the valuation penalties. These penalties are also coordinated with the fraud penalty to eliminate any stacking of the penalties. Again, like other provisions, the fraud penalty is not intended to be imposed as a stacked penalty.

The third category of penalties is the information reporting penalties. These penalties may be imposed upon those who only have a duty to report information to the IRS.

The fourth and final major categories of civil penalties are the preparer, promoter, and protester penalties. Currently, the most notable of these is the return preparer penalty for which there is a penalty for a position on a return for which the preparer did not have substantial authority. Also included in this provision is a penalty for wilful or reckless attempt to understate the tax liability of another person. Additionally, return preparer penalties may be imposed for failure to furnish a copy of a return or claim for refund to the taxpayer, sign the return or claim for refund, furnish his or her identifying number, or file a correct information return.

Other promoter and protestor penalties include a penalty for promoting abusive tax shelters, aiding and abetting the understatement of tax liability, and filing frivolous income tax returns. Additionally, a court may award sanctions and costs if a person institutes or maintains a proceeding primarily for delay, takes a position that is frivolous, or unreasonably fails to pursue available administrative remedies.

In addition to these major civil penalties, international tax-related penalties for failures other than timely and accurate filing (e.g. wilful failure to report international boycott activity, failure of an agent to furnish a notice of a false affidavit relating to the WHT on dispositions of US real property interests, failure of a US person to furnish information relating to CFCs and controlled foreign partnerships, failure of a US person to report foreign bank accounts) exist. Pension and employee benefit related tax penalties exist that protect the policy reasons for the tax incentives, including, most notably, early withdrawal of pension funds. Another group of specialised penalties apply to exempt organisations.

Criminal penalties exist for situations when the failures to stay within the tax system are more egregious. Although applicable to corporate taxpayers, they are applied more frequently to individuals.

In addition to the penalty provisions, interest at statutory rates generally applies to underpayments of tax.

Tax audit process

Generally, the US tax system is based on self-assessment; however, many large and mid-size businesses are under continuous audit by the IRS and state tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller business and persons with lower incomes are generally subject to audit on a random basis.

Statute of limitations

The IRS generally has three years after an original return is filed to assess income taxes. A return will be deemed to have been filed on its due date, even if the return is actually filed on an earlier date.

Topics of focus for tax authorities

Currently, the IRS is focused on abusive payments related to contribution to capital of a corporation, domestic manufacturing deduction, foreign earnings repatriation, FTC generators, repairs vs. capitalisation change in accounting method, research credit claims, transfer of intangibles/offshore cost sharing, WHTs, and employee classification.

Tax shelter

Treasury regulations require taxpayers to disclose transactions determined to be abusive or possibly abusive. Current information on these transactions, known as listed and reportable transactions, is available from the IRS website (www.irs.gov).

Accounting for income taxes

For US federal tax purposes, the two most important characteristics of a tax method of accounting are (i) timing and (ii) consistency. If the method does not affect the timing for including items of income or claiming deductions, it is not an accounting method and generally IRS approval is not needed to change it. In order to affect timing, the accounting method must determine the year in which an income or expense item is to be reported.

In general, in order to establish an accounting method, the method must be consistently applied. Once an accounting method has been adopted for federal tax purposes, any change must be requested by the taxpayer and approved by the IRS. Changes in accounting methods cannot be made through amending returns. The two most common methods of accounting are the accrual basis and cash basis methods.

Other issues

Tax accounting and internal controls

Accounting Standards Codification (ASC) 740, Income Taxes (formerly known as Financial Accounting Standards Board [FASB] Statement No. 109, Accounting for Income Taxes) addresses how companies should account for and report the effects of taxes based on income. ASC 740's principles and requirements apply to domestic and foreign entities in preparing financial statements in accordance with US generally accepted accounting principles (GAAP), including not-for-profit entities with activities that are subject to income taxes. This scope includes: (i) domestic federal (national) income taxes (US federal income taxes for US enterprises) and foreign, state, and local (including franchise) taxes based on income; and (ii) an enterprise's domestic and foreign operations that are consolidated, combined, or accounted for by the equity method.

In recent years, controls around the accounting for income taxes have been a critical source of material weaknesses in companies' internal controls over financial reporting. Accounting for income taxes also has been a primary reason for restating financial statements. Management should ensure that its judgments and estimates are reasonable (e.g. assessing the need for a valuation allowance on deferred taxes) and that the underlying internal control processes are reliable.

The adoption of International Financial Reporting Standards (IFRS) in the United States is set by the Securities and Exchange Commission (SEC). The timeline included in the SEC's roadmap provides for adoption of IFRS in the United States between 2014 and 2016.

United States

Corporate reorganisations

In general, a corporate reorganisation involving a merger, acquisition, or consolidation is a taxable event under the general recognition provisions of the Code. However, a corporate reorganisation that meets certain statutory and judicial requirements may qualify as a tax-free transaction, with gain or loss generally not recognised or deferred to a later date.

Foreign Account Tax Compliance Act (FATCA)

FATCA was enacted in 2010 to prevent and detect offshore tax evasion. While the name may imply that FATCA is directed at financial institutions, many global companies outside the financial services industry may be affected if they have entities in their worldwide network falling under the purview of FATCA, or have operational areas that make or receive payments subject to FATCA.

Multinational enterprises that are withholding agents were already obligated to report, withhold on payments, and document payees, but FATCA requires changes to these activities. FATCA mandates that multinational businesses evaluate entity payees differently, engage in withholding on certain gross proceeds transactions (a change from historic processes), as well as report different information to the IRS.

The withholding provisions of FATCA began 1 July 2014. Compliance with FATCA may require changes to existing systems and processes across business units and regions, the renewal of policies and day-to-day practices, and new tasks, such as registering with the IRS.

To mitigate certain foreign legal impediments to FATCA compliance, intergovernmental agreements (IGAs) also have been negotiated (with more to come) between the US Treasury and foreign governments. Under certain IGAs, including most of the IGAs signed thus far, information will be exchanged directly between the IRS and local governments. This obligates entities in IGA jurisdictions to report information to their government that may not have been required or permitted in the past.

Assessing FATCA's impact will require identifying whether an IGA may apply to the entity or payment stream at issue. Provisions in the final FATCA regulations or, if applicable, an IGA that provides more favourable results may be utilised. This likely will increase the complexity of the process, due in part to the multiple paths to compliance (e.g. regulations or an IGA). The regulators have focused on having consistent requirements in each IGA, but there are noticeable differences in the agreements signed to date.

US possessions

Puerto Rico, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the US Virgin Islands have their own independent tax departments. Accordingly, they have their own rules. *See the Puerto Rico summary for more information about Puerto Rico taxation.*

Significant developments

National Budget for years 2015 to 2019 - Law N° 19,355

The law approving the 2015 to 2019 Budget includes tax amendments and became effective as of 1 January 2016. The most significant provisions include the following:

- Extension of the consideration of Uruguayan source (thus subject to corporate, personal, and non-residents income tax) of the following:
 - Advertising services rendered from outside Uruguay by independent service suppliers to corporate income tax (CIT) payers.
 - Mediation, leasing, use, transfer of use, or transfer of federative rights, image rights, and similar of athletes registered in resident sports entities, regardless of the registration period or permanence in Uruguay.
- Restriction on the increased deduction of salary expenses in the calculation of CIT when the taxpayer has enjoyed investment promotion benefits (granted according to the employment indicator).
- For the purposes of deducting CIT expenses, only those that comply with the formalities set for value-added tax (VAT) or those that are expressly excepted of these formalities by the Tax Office, in view of the company's line of business, would be considered properly documented. It is worth mentioning that the Administrative Court had recently interpreted that the fact that certain expenses do not comply with such formalities do not restrict their deductibility (as far as they could be proved).
- For purposes of the deduction from gross income, tax losses from previous years will be updated based on the Consumption Inflation Index for fiscal years beginning on or after 1 January 2016. The same criterion applies to the determination of the inflation adjustment and for updating values of fixed assets.
- Extension to substitutes and those responsible for tax obligations of third parties of the fine for late payment of 100%, the presumption of intent to defraud, and the crime of misappropriation, currently foreseen for withholding and collection agents (in the case of taxes withheld and not paid).
- Establishes that the income limit set for investment exemptions provided by CIT law will not apply to companies of collective passenger transport that accomplish regular services under concession or permission.
- Consideration that absorption of liabilities in net wealth tax (NWT) will include all assets located outside Uruguay, exempt assets, excluded goods and non-taxable goods of any origin and nature, ending longstanding discussions on the matter.
- Empowers the Executive Branch to exempt from NWT the assets of credit management companies focused exclusively in productive microfinance operations.
- Exclusion from property transfer tax of the transmissions of taxable assets that take place as a result of the replacement or removal of trustees.
- Suspension of status bar limitation for taxes that are the subject of tax benefits under the Investment Promotion Law until the end of the deadlines to comply with the conditions that correspond or the deadline for use (whichever is greater). It also provides that in the event of non-compliance of the above, the course of the prescription would be interrupted by notification of the decision to revoke all or part of the benefits granted or the *Comisión de Aplicación* (COMAP) resolution declaring

Uruguay

the default of commitments assumed by the beneficiary for the purposes of the recalculation of taxes.

Tax treaties

During 2015, a tax information exchange agreement (TIEA) with Faeroe Islands entered into force (as of 19 February 2015), as well as one subscribed with Sweden (as of 17 April 2015).

Furthermore, a TIEA with Brazil and a double tax treaty (DTT) with Luxembourg have been ratified by the Uruguayan government. A TIEA with South Africa and a DTT with Singapore have been signed and are under Uruguayan Parliament discussion. In April 2016, a DTT with Chile was signed.

These agreements will enter into force once the contracting states exchange the corresponding ratification notes.

Taxes on corporate income

Net income derived from business activities conducted in Uruguay, obtained by legal entities resident in Uruguay and non-residents operating through a permanent establishment (PE) in Uruguay, is taxed at a CIT rate of 25% under the source principle (i.e. the territorial system of taxation). Accordingly, Uruguay taxes only income that is derived from activities conducted within its borders, income generated from property located in Uruguayan territory, or income derived from the economic use of rights within its territory (*see Foreign income in the Income determination section for an exception to this principle*).

In order to determine the net taxable income, all accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, taxpayers are able to deduct expenses from their gross income if such expenses are subject to taxation (either foreign or local taxation) in the hands of their counterpart. A compulsory proportional deduction must be calculated when the taxation in the hands of their counterpart is lower than 25% (CIT rate).

A 12% withholding tax (WHT) is imposed on Uruguayan-sourced income obtained by non-residents, except in cases where the income is obtained through the operations of a PE in Uruguay (*see the Withholding taxes section for more information*).

Trading companies

Uruguayan corporations that sell and buy foreign goods and/or services from Uruguay (which are not physically introduced to the country, in the case of goods; or which are not economically used in Uruguay, in the case of services) may determine the net Uruguayan-source income on a notional basis of 3% of the gross margin (difference between the selling price and the purchase price). This gross margin has to be compliant with transfer pricing rules (in line with Organisation for Economic Co-operation and Development [OECD] guidelines). The applicable effective CIT rate is 0.75% (25% x 3%).

Local income taxes

No taxes on corporate income may be levied by municipal authorities or other local governments.

Corporate residence

Legal entities are deemed to be resident in Uruguay when they are incorporated according to the local legislation.

Permanent establishment (PE)

The concept of PE in the Uruguayan tax legislation follows, in general terms, the definition provided in the OECD Model Tax Convention, although it has some special clauses that may be found in the United Nations (UN) Model Tax Convention. From a Uruguayan law perspective, the term PE means a fixed place of business through which the business of an enterprise is wholly or partly carried on in Uruguay. The term PE especially includes: (i) places of management; (ii) branches; (iii) offices; (iv) factories; (v) workshops; (vi) mines, oil or gas wells, quarries, or any other place of extraction of natural resources; (vii) buildings, constructions, installation projects, or the management activities associated to them, when they last more than three months; and (viii) services, including consultancy services, rendered by a non-resident through employees or other hired personnel by the company for that purpose, to the extent that such activities are developed (in relation with the same or a connected project) during a period or periods exceeding, in total, six months within any 12-month period. Please note that item (viii) constitutes an exception to the OECD model and is based on the provisions of the UN model.

Other taxes**Value-added tax (VAT)**

Uruguayan VAT is levied at a general rate of 22% on the provision of services and on the circulation of goods within the limits of the Uruguayan territory. The import of goods and value-added in regard to the construction of immovable assets are also within the scope of this tax.

The following items are either subject to a reduced 10% VAT rate or exempt from VAT entirely.

Items subject to the 10% VAT rate:

- Food and medicines.
- Hotel services.
- Health services.
- The first sale of immovable assets.

Items exempt from VAT:

- Milk.
- Books.
- Magazines.
- Agricultural machinery.
- Certain bank services.
- Accessories.

Exports are zero rated for VAT purposes. VAT on purchases of the exporters can be recovered in the form of credit certificates that can be (i) used to pay other taxes, (ii) used to pay social security contributions, or (iii) endorsed to suppliers who can pay their own national taxes or their own social security contributions.

This tax requires monthly payments and may require monthly or annual tax returns, depending on the qualification of the taxpayer.

Customs duties

- Consular duty: 2% (applied to the cost, insurance, and freight [CIF] import value). Capital goods with a destination in the industrial, agricultural, and fisheries sectors are exempt.

Uruguay

- Customs services duty: a scale flat duty, with a limit of 50 United States dollars (USD).
- Customs extraordinary duty: a scale flat duty, with a limit of USD 600.
- Global customs duty (TGA): depends on the origin of goods. If they come from Mercosur, the TGA is generally zero (some goods still apply the payment of the TGA). If not, it varies depending on the type of product, with a maximum rate of 20%, with exceptional levels that range from 23% to 35% (corresponding mainly to certain types of shoes, sugar, and automobiles). For goods classified as capital goods or information and telecommunication goods, there is a special regime.

All imports and exports duties are applied on the 'customs value' (in general, in imports it is considered as CIF and in exports as free on board [FOB]).

On imports, VAT is also applicable according to the following detail:

- Goods subject to the general VAT rate (22%):
 - 'Import VAT' at the rate of 22%.
 - 'Advanced payment import VAT' at a rate of 10%.
- Goods subject to the reduced VAT rate (10%):
 - 'Import VAT' at the rate of 10%.
 - 'Advanced payment import VAT' at a rate of 3%.

The tax base of VAT on imports is the customs value plus the customs duties.

Additionally, some goods are also subject to an 'advanced payment import on account of CIT' at a rate of 4% or 15%, depending on the type of good, which can be deducted from the amount of CIT for the fiscal year.

Export duties

Exports are not subject to any taxes, and there are almost no prohibitions regarding the type of goods to be exported. On the contrary, several instruments are offered to promote exports, such as the reimbursement of taxes. *For VAT on exports, please see VAT above.*

The exporter may also recover internal taxes that are added to the cost of the products exported. The amount to be reimbursed is a percentage of the FOB value set by the Executive Power for each product.

Additionally, temporary admission consists of the import of raw materials, pieces, motors, package material, and other industrial input without import duties or taxes. To be subject to this customs duties exemption, the company has to export the finished goods within 18 months from the introduction of the exempt goods or materials. The subsequent local sale of such finished goods is not entitled to this benefit.

Excise tax (IMESI)

In general, excise tax applies on the first transaction effected in the domestic market by manufacturers or importers of goods. Exports are not taxable.

Excise tax rates vary for each item, and they are generally fixed by the government within maximum parameters established by law.

Goods subject to the highest rates are alcoholic beverages (from 20.20% to 80%, depending on the alcohol degree), tobacco (from 28% to 70%), lubricants (from 5% to 39%) gasoline, fuel, and other petroleum products (from 5% to 133%).

This tax requires monthly payments and/or tax returns.

Net wealth tax (NWT)

All types of legal entities and business enterprise owners are subject to an annual NWT at a rate of 1.5% on the value of net assets. This tax also follows the source principle, whereby only assets located or economically used in Uruguay are taxable. Taxpayers may deduct from the NWT the CIT of the same fiscal year; however, the deduction is currently capped at 1% of the NWT.

The deduction of liabilities from the amount of taxable assets to determine the NWT basis is limited to: (i) the average of debts with local financial institutions, (ii) debts with suppliers of goods (except imports) and services, (iii) taxes not yet due, (iv) debts with governments, international credit offices of which Uruguay is a member and with foreign state financial institutions that lend funds for long-term productive projects, and (v) debts documented in debentures and obligations, if their emission is done in a public offering and such papers are quoted in a stock exchange.

Property taxes

Regarding taxes of relevance for those doing business in Uruguay, *please see Net wealth tax (NWT) above*. There are additional property taxes of less significance, levied by Municipal authorities (e.g. *Contribución Inmobiliaria*) and by National authorities (e.g. Primary School Tax [*Impuesto de Primaria*]).

Note that the Primary School Tax levied on rural assets has been re-established.

Tax on real estate transfer (ITP)

A tax on real estate transfer applies to the transfer of immovable assets. Transfer is defined in an ample sense, as a sale, a cession of the right to use, a transfer of inheritance rights, etc.

Both parties to the transfer contract are subject to this tax at a rate of 2% on the property's tax value (according to a National Register, a value generally lower than market value). When the property is transferred without payment, the beneficiary pays tax at a rate of 4% on the property tax valuation, except in instances where the property is transferred to direct heirs or legatees, who pay this tax at a rate of 3%.

Stamp taxes

Stamp taxes are not applicable in Uruguay.

Tax of control of corporations (ICOSA)

Upon the set-up of a corporation, a tax is payable at a 1.5% rate on a notional basis amount, which is determined annually by the authorities. For fiscal year 2016, the amount of this tax (lump sum) is 28,134 Uruguayan pesos (UYU).

This tax is also due annually for corporations at the end of each fiscal year, at a rate of 0.75% on said notional amount. Even though this tax can be deducted from the NWT, the excess cannot be refunded, acting as a minimum NWT payment. For fiscal year 2016, the amount of this tax (lump sum) is UYU 14,067.

Payroll taxes

Individual income taxes applicable on employees' remunerations must be withheld by the employer.

Social security contributions

The Uruguayan Social Security regime states that hiring personnel under a dependency relationship implicates the obligation (both for employer and employee) of making contributions over the compensations that constitute the taxable basis.

Taxable basis consists of all earning that in a regular and permanent basis, in cash or kind, susceptible to pecuniary appreciation, is perceived by the dependant personnel, in

Uruguay

concept of remuneration and product of its personal activity in the frame of the working relationship. As a general rule, any compensation originated in activities carried out in Uruguay is subject to social security contributions.

The social security contribution rates are applicable on gross remunerations, according to the following percentages:

Contribution	Employer contributions (%)	Employee contributions (%)
Retirement contributions *	7.5	15
Health insurance	5	3/4.5/5/6/6.5/8 **
Labour restructuring fund	0.125	0.125
Total social security contributions	12.625	18.125 to 23.125

* Both employer and employee retirement contributions rates are applicable, up to the monthly amount of UYU 131,430 (until 31 December 2016); the exceeding amount will be exempt.

** May vary depending on whether the employee is married and whether they have children.

Branch income

CIT is imposed at a rate of 25% on net income derived from business activities carried out in Uruguay. A 7% WHT is imposed on profits remitted or credited to a home office. Profits paid or credited to a non-resident home office will not be subject to WHT when they are paid out of non-taxable income for CIT purposes.

Furthermore, those profits and/or losses derived from financial operations between the branch and its home office will be disregarded for Uruguayan tax purposes (i.e. not taxed in case of income or not deductible in case of costs and/or expenses).

Income determination

Inventory valuation

Replacement cost is permitted for tax purposes, as well as the first in first out (FIFO), last in first out (LIFO), or average cost methods, irrespective of the inventory valuation method used for accounting purposes.

Capital gains

Capital gains are treated as ordinary income for CIT purposes.

As a general rule, capital gains are calculated as the selling price minus the fiscal cost (usually acquisition cost updated by certain inflationary indexes) of goods being sold. In certain cases, not all the fiscal cost may be deductible, depending on the application or not of the compulsory proportional deduction *mentioned previously in the Taxes on corporate income section*.

Furthermore, for certain capital gains, there are special ways of determining the taxable income (e.g. based on notional income).

Bearer title transfer capital gains are subject to a 12% tax rate, applicable to a notional 20% of the transfer price (or 20% of market value of the titles transferred if there is no price). The same tax treatment applies to capital gains derived from the transfer of nominative titles.

Dividend income

Dividends received from local subsidiaries are exempt. Dividends received from foreign subsidiaries are out of the scope of this tax since they are considered foreign-sourced, thus non-taxable, income.

Interest income

Uruguayan-sourced interest income, derived by companies resident in the country, is subject to CIT under the general regime (i.e. taxed at 25%).

Foreign income

Uruguayan legal entities (CIT payers) and non-residents operating through a PE in Uruguay are only subject to tax on income from Uruguayan sources under the territorial system of taxation. Hence, foreign-source income is not subject to tax.

However, there is an exception to this principle, as follows. When a CIT payer obtains income as a consequence of rendering technical services outside the limits of Uruguayan territory to another CIT payer and such technical services are used by the recipient to obtain its income subject to CIT, the income obtained by the company rendering the services will be subject to CIT, even when foreign sourced. Technical services are those rendered in the fields of management, technical administration, or advice of any kind.

Income derived from activities performed, assets located, or rights utilised outside Uruguay, regardless of the nationality, domicile, or residence of the parties participating in the transactions and the place where the transaction agreements are subscribed, is not subject to CIT.

Income adjustment for inflation

An income adjustment for inflation has been in force since 1 January 1981 and is calculated by multiplying the variation in the wholesalers' price index for the financial year by the difference between:

1. total assets at the beginning of the year (excluding fixed assets) and
2. total liabilities at the beginning of the year.

Under an inflation scenario, if (1) is higher than (2), then an inflation loss adjustment is deducted from gross income. However, if (2) is higher than (1), then an inflation gain adjustment is added.

New tax regulations, effective for fiscal years ended as of 31 December 2015, disallow Uruguayan taxpayers to calculate tax inflation adjustment in their CIT return if inflation is below 10%.

Deductions

As a general rule, accrued and duly documented expenses that are necessary to obtain and preserve gross taxable income are tax deductible. On the contrary, those expenses associated with deriving or preserving income not subject to CIT are not deductible from the taxable basis. Furthermore, for CIT purposes, all costs and expenses will be subject to the compulsory proportional deduction mentioned in the *Taxes on corporate income section* (with some exceptions).

Depreciation and depletion

Straight-line depreciation over useful life is mandatory. Specific rates exist for the following cases: (i) 2% per year for urban buildings, (ii) 3% per year for rural buildings, and (iii) not less than 10% per year for new vehicles. Other rates are accepted if economically justified. No conformity between book and tax depreciation is required.

Percentages for depletion computed on the cost of natural resource properties are allowed in accordance with generally accepted criteria.

Uruguay

Depreciation and depletion percentages are computed on the historical cost of fixed assets revaluated at year-end, based on the variation of the wholesalers' price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

Goodwill

When transferring a business or a business unit, the difference between selling price and fiscal costs of the assets being transferred constitutes 'goodwill'. This goodwill constitutes an asset for the buyer and must not be depreciated, neither for CIT nor NWT purposes.

Start-up expenses

Start-up expenses should be depreciated within a period of three to five years. The taxpayer may elect the number of years to depreciate those expenses within those period limits.

Interests expenses

Interests expenses, as well as other costs and expenses, are subject to the compulsory proportional deduction *mentioned in the Taxes on corporate income section*.

When companies derive both income subject to CIT and either income exempt or not included in CIT (e.g. from a foreign source), interest expenses associated to the former (i.e. deductible interest) will be determined by applying a proportion based on assets.

Bad debt

As a general rule, only those debts that are at least 18 months old will be deductible as 'bad debts'. However, national rules allow deductions under some other special situations.

Charitable contributions

Deductibility of charitable contributions will depend on the organisations receiving them.

Furthermore, there is a special regime to certain charitable contributions under which the contributor may deduct 25% of the contribution and the other 75% will be recovered through credit certificates that may be used to pay taxes (with certain limitations).

Fines and penalties

Fines and penalties generated from unduly paid taxes are not deductible for CIT purposes.

Taxes

CIT and NWT are not deductible.

Net operating losses

Losses may be carried forward and deducted from the net taxable income of the following five years, once adjusted for inflation. There are no loss carrybacks.

Payments to foreign affiliates

All accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer may deduct expenses from its gross income if such expenses are subject to taxation (either via foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated when the taxation in the hands of the counterpart is lower than 25% (CIT rate).

Group taxation

Group taxation is not permitted in Uruguay.

Specific dispositions regarding the existence of an 'administrative economic unit' are included in NWT law, but only for agricultural and/or farming investments for determining the application of NWT exemption and corresponding NWT rates (i.e. group taxation is still not permitted).

Transfer pricing

As a general principle, transfer pricing rules are applicable to international transactions between related parties. However, Uruguayan legislation has extended the scope of these regulations to transactions carried out with low-tax or no-tax jurisdictions or regimes (either international or domestic) and to certain operations through third-party intermediaries. Domestic transactions with Uruguayan free zone (FZ) users fall under this category.

The definition adopted by the law for related parties is quite broad. Such a relationship is configured when both parties are subject (directly or indirectly) to the management or control of the same individuals or legal entities, or when they have power of decision to direct or define the taxpayer's activities due either to their participation in capital interest, the level of their credit rights, or their functional or any other type of influence (whether contractual or not).

Regarding transfer pricing administration rules, the Executive Power can enter into advance pricing agreements (APAs) with taxpayers, which cannot cover more than three fiscal years. Furthermore, strong penalties are provided for failure of compliance with transfer pricing formal duties and with other formal documentation requirements.

Thin capitalisation

There are no thin capitalisation rules in Uruguay.

Controlled foreign companies (CFCs)

There are no CFC rules in Uruguay other than those applicable to individuals.

Tax credits and incentives

Foreign tax credit

There is no foreign tax credit regime in Uruguay for CIT purposes, except for that provided in the DTTs currently in force.

CIT reduction for income reinvested in fixed assets

40% of income reinvested in the purchase of (i) industrial and agricultural machinery, (ii) vehicles and installations, (iii) computers, (iv) telecommunications equipment, and (v) some assets for the tourism industry is exempt from CIT.

20% of income reinvested in the construction and expansion of industrial, agricultural, and tourism buildings is exempt from CIT (limited to 40% of net taxable income in the year of expenditure).

The joint amount of said investments can be deducted from the taxable basis, with a limit of 40% of the annual net profit, once the amount of other exemptions has been deducted. The excess can be deducted (with the same limitations) in the following two tax periods. It is important to mention that income exempt by these provisions cannot be distributed and must be retained as a reserve account, which ultimately can only be capitalised.

Uruguay

For fiscal year-ends initiated on 26 September 2014 onwards, the abovementioned CIT benefit will be exclusively applicable to taxpayers whose income in the immediately preceding fiscal year to which the investment is executed does not exceed approximately UYU 30 million. This limitation is not applicable to professional cargo transport companies.

NWT exemption

Movable fixed assets directly connected to the industrial cycle and equipment for data processing are exempt from NWT.

All assets directly associated to the development of agricultural and/or farming activities will be exempt from NWT as long as the owners are individuals or companies with nominative shares also owned by individuals. As a consequence of the elimination of the Rural Real Estate Concentration Tax (ICIR), this NWT exemption has been modified. According to Law N° 19,088, this exemption will apply only in cases where the referred assets do not exceed 12 million 'index units' (approximately UYU 38,733,600 as of 30 November 2015).

Investment Law (IL) - Law N° 16,906

Uruguay has modified the IL, achieving a better framework for local and foreign investments carried out in the country. To obtain tax benefits, the IL requires that enterprises obtain a government statement in this regard. The Bureau of Investor Assistance is in charge of monitoring the correct compliance of these projects.

The IL grants two types of benefits:

Automatic benefits

This kind of benefit is only for manufacturing, extractive, or farming/ranching activities, and includes:

- Exemption from NWT for chattel property directly engaged in the production cycle and data-processing equipment.
- Exemption from VAT and CIT paid on the importation of such goods, and reimbursement of VAT in the case of locally purchased items.

Discretionary benefits

Benefits that may be obtained at the discretion of the Executive Power for any type of business activity (not cumulative with automatic benefits) include:

- VAT and CIT exemptions (among other taxes) on importation of fixed assets items.
- NWT exemptions: permanent for chattel property items, for a period of eight years for construction work in Montevideo (capital city), and for a period of ten years in the rest of the country.
- VAT reimbursement on local purchase of goods and services for civil construction work.
- Increased deductions for CIT in respect of fees and remunerations related to technological developments.
- Exemption from CIT, depending on the nature and size of the project to be carried out. The Executive Power takes into account the following criteria to grant this benefit:
 - Addition of technology to improve competitiveness.
 - Contribution to export growth and diversification.
 - Contribution to geographic decentralisation.
 - Improvement of technological investigation, innovation, and development.
 - Generation of employment.

Transitory increase of tax benefits

Based on the IL and its regulations (by way of decree), the government decided to temporarily increase the benefits granted under such regime. This provides an excellent opportunity for tax savings for companies making investments in fixed assets.

In particular, it increased by 10% the exemption of CIT, based on the matrix of indicators for investment projects submitted between 1 December 2015 and 31 December 2016, provided that 75% of the project's committed investment is executed before 31 December 2017. In addition, 120% of the investment amount made between 1 December 2015 and 31 December 2016 may be used for the purpose of computing the exempt CIT amount.

Auto-saving 'direction' benefit

The auto-saving 'direction' benefit allows a company to deduct from the CIT basis the amount of the capital increase that occurred as a consequence of the reserves capitalisation or of the in-kind distribution of shares, for an amount equivalent to the investment carried out with the investor's own funds. The amount of the CIT deduction and the period(s) to which said exemption will apply is granted by the government through a statement issued by the Executive Power.

Free zones (FZs)

Following the approval of the FZ law in 1987, this system has become an important tool for attracting investments to Uruguay.

It has been utilised for carrying out traditional activities in the FZs (warehousing, logistics, and distribution), for the provision of services (software, finance, call centres, etc.), and for manufacturing activities such as cellulose pulp and leather production. In a clear sign of stability, none of the administrations in office over the last three decades has modified the basics of the FZ system.

The law defines FZs as privately or publicly owned isolated and fenced off areas of Uruguayan territory determined by the Executive Branch with the purpose of carrying out all types of manufacturing, commercial, and service activities within the zone, while enjoying tax exemptions and other benefits envisaged in the law.

Companies in these areas cannot carry out industrial, trading, or service activities in the non-FZ Uruguayan territory, except for services expressly authorised by the government (listed below) but are allowed to render all types of services within the FZs or to third countries.

FZ users are allowed to render the following services to the non-FZ Uruguayan territory:

- International call centres, except for those whose main destination is the non-FZ Uruguayan territory.
- E-mail, distance learning, electronic signature certificate issuance.
- Software production, technology consulting, and related training services. (*)
- Accounting, administration, and management services rendered to related companies who carry out port and shipping logistics activities, if said services are lower than 20% of the total income obtained during the fiscal year. (*)
- Processing of film material and data. (*)

(*) The provision of these services is subject to the general tax system, not to the tax holidays.

In order to operate in/from the FZ, certain requirements must be fulfilled from an 'economic substance' perspective (i.e. there must be an actual economic activity developed in the FZ). In this sense, some modifications were introduced to the FZ Law to determine which substantial activities can be developed outside the FZ.

Uruguay

FZ users are exempt from all current and future national taxes, including those taxes for which a specific legal exemption is required, in connection with the activities performed within the FZs. The Uruguayan government guarantees all the exemptions and benefits granted by the law for the term of their contracts. FZs can be located outside or inside the cities; it depends on the kind of FZ.

Social security taxes, as well as certain WHTs, are excluded from the exemption. WHT on payments of dividends made by these companies to their non-resident shareholders are exempt.

CIT exemption widened for trading activities with transit of goods through Uruguay

The CIT Act establishes a tax exemption for non-residents on income derived from activities performed in Uruguayan customs areas, port customs areas, customs deposits, and FZs, with goods of foreign origin declared in transit or stored in the referred areas. This exemption applies to the extent that such goods are in transit (not having as origin or as destination the Uruguayan customs territory). This exemption also applies on a percentage of the sales that have as final destination the Uruguayan internal market. This tax benefit has been widened and, while originally applicable only to non-residents, is now available for tax residents in Uruguay. In addition, these activities with goods deposited in the country can be performed from outside Uruguay.

Industrial park incentives

Individuals or legal entities that establish industrial parks within Uruguayan territory, as well as companies located within such industrial parks, are entitled to CIT exemption for their industrial equipment, excise tax and VAT exemption on the acquisitions of such goods, and other benefits.

Holding companies

Uruguayan legal entities holding shares in non-resident entities or investing in assets not located in Uruguay are not subject to tax (due to the application of the source principle).

Tax benefits for Shared Service Centre (SSC) activities

Activities carried out by SSCs are granted relevant tax benefits under certain conditions.

For these purposes, an SSC is defined as a subsidiary of a multinational group that provides to its related parties, on an exclusive basis, advisory and data processing services, used exclusively outside Uruguay.

Tax benefits granted include the exemption of CIT of 90% of the income derived from the promoted activities and exemption of NWT on the assets involved for five or ten fiscal year-ends, depending on specific compulsory requirements that must be fulfilled. To have access to the five year-end tax benefits, an SSC must comply simultaneously with the following conditions:

- Generate at least 150 new direct qualified jobs at the end of the first three year-ends, jobs that must be preserved until the end of the fifth year-end.
- Implement a training plan with a minimum budget of 10 million 'index units' (approximately UYU 29,566,000) for the Uruguayan citizen employees during the whole first three year-ends, which must be for new projects.

The tax exemption period will be extended to ten years when (i) the minimum number of jobs exceeds 300 at the end of the first five year-ends and remains until the end of the exemption period and (ii) the referred training expense exceeds twice the aforementioned amount in the course of the first six year-ends.

Industry-specific incentives

Printing industry incentives

Companies that print books and educational material are exempt from the NWT and VAT.

Long distance services and call centres

Companies developing long distance services and call centre activities have special benefits regarding CIT (from 70% to 100% exemption).

Condo Hotels

Companies running a Condo Hotel have special benefits regarding CIT (from 70% to 100% exemption), among other taxes. There are also exemptions and other tax benefits granted on behalf of the promoting company.

Electric power industry incentives

Companies that generate electric power from non-traditional energy sources have special benefits regarding CIT (from 40% to 90% exemption).

Machinery industry incentives

Companies that build and/or assemble (under certain conditions) machinery with agricultural purposes have special benefits regarding CIT (from 50% to 90% exemption).

Shipping industry incentives

Imports of material, supplies, and equipment required for the construction, maintenance, and repair of shipyards or vessels are exempt from VAT. The shipbuilding industry has special benefits regarding CIT (from 50% to 100% exemption).

Water and air transportation incentives

The income of water and air transportation companies is tax exempt. In the case of foreign companies, the exemption is subject to reciprocal treatment. The government may exempt from CIT companies engaged in transportation by land, subject also to the conditions of reciprocal treatment.

Forestry plantation incentives

Income derived from forestry plantations up to July 2007 is tax exempt. Income derived from new forestry plantations is also tax exempt, but under strict conditions, such as wood quality.

Software industry incentives

Software production and related services are exempt from CIT as long as either the final product or the related services are entirely used in a foreign country.

Electronic industry incentives

The production of electronic devices has special benefits regarding CIT (from 50% to 100% exemption).

Tourism industry incentives

Investments in the tourism industry have tax benefits related to CIT, VAT, and NWT, as follows:

- Deduction of up to 40% of CIT in investments made in the fiscal year in hotel equipment and equipment for improving entertainment and information services to tourists and deduction of up to 20% of CIT in investments made in construction and expansion of hotel buildings, with the limits mentioned in previous sections (40% of the annual net profit, once the amount of other exemptions has been deducted).
- VAT refund included in local acquisitions of goods and services for construction, improvement, or expansion of tourist complexes.

Uruguay

- VAT exemption on import of goods for construction, improvement, or expansion of tourist complexes.
- The list of operations included in the concept of exports of services for VAT purposes (thus zero-rated) was broadened to include, among others, services related to accommodation that hotels, apartments, and rural tourism establishments provide to tourists.
- NWT exemption for ten years on investments in infrastructure and civil work for construction, improvement, or expansion of tourist complexes.
- NWT exemption for four years on fixed assets investment for tourist complexes.
- 50% exemption of import duties on materials and goods for construction, improvement, or expansion as well as fixed assets of tourist complexes.

Withholding taxes

All Uruguayan-sourced income obtained by non-residents (other than those obtained through a PE in Uruguay) is taxed at flat rates of up to 12% on gross income, with some exceptions. This tax is basically collected by way of WHT.

The exceptions are as follows:

- Interest on deposits in local currency for terms exceeding one year is taxed at 3%.
- Interest on public bonds is not taxed.
- Dividends paid or credited by CIT payers are taxed at 7%, provided they are derived from taxable income.

Although the Uruguayan tax law follows the source principle, technical services (defined as services rendered in the fields of management, technical administration, or advice of any kind) rendered in another country by non-residents but associated with taxable income obtained by the local user in Uruguay are considered to be Uruguayan sourced for tax purposes and subject to WHT. However, when the taxable income obtained by the local user of the service does not exceed 10% of its total income, then only 5% of the service fee paid or credited abroad will be subject to non-resident WHT. Therefore, in these cases, the effective WHT rate is only 0.6% (5% x 12%). In those cases where the local taxpayer receiving the service does not obtain any taxable income, the service received will be entirely associated to foreign-source income and thus not subject to WHT.

This WHT should be declared and paid to the Tax Office on the month following the one in which the tax is withheld.

For those countries with which Uruguay has entered DTTs, the maximum WHT rates are the following (in those cases where the maximum WHT provided by the DTT is higher than the internal law WHT, the latter will be applicable):

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Under internal law	0/7	0/12	0/12
Treaty:			
Ecuador	10/15 (7)	15	10/15 (2)
Finland	5/15 (3)	0/10	5/10 (2)
Germany	5/15 (4)	0/10	10
Hungary	15	15	15
India	5	0/10	10
Korea	5/15 (8)	0/10	10
Liechtenstein	5/10 (5)	0/10	10
Malta	5/15 (3)	10	5/10 (2)
Mexico	5	0/10	10

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Portugal	5/10 (6)	10	10
Romania	5/10 (9)	0/10	10
Spain	0/5 (1)	0/10	5/10 (2)
Switzerland	5/15 (3)	0/10	10

Notes

1. Source country may tax at a rate not higher than 5%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 75% of the capital of the company distributing dividends, then the WHT will be 0%.
2. Will depend on the kind of royalty paid.
3. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.
4. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 10% of the capital of the company distributing dividends, then the WHT will be 5%.
5. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is an entity, other than an individual, resident in the other contracting state and holds at least 10% of the capital of the company distributing dividends, then the WHT will be 5%.
6. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.
7. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and directly holds at least 25% of the capital of the company distributing dividends, then the WHT will be 10%.
8. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 20% of the capital of the company distributing dividends, then the WHT will be 5%.
9. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is an entity, other than partnerships, resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.

Tax administration

Taxable period

The taxable period may be chosen by the company. However, certain sectors or industries have mandatory fiscal year closing dates.

Tax returns

CIT and NWT are self-assessed and their tax returns are filed by the end of the fourth month following the date of the year-end.

Payment of tax

Income and capital taxes are paid monthly by way of advanced payments, which are calculated on the basis of the previous year's tax. The difference between the advanced tax payments and the total annual tax calculated at fiscal year-end is paid by the end of the fourth month after the fiscal year-end.

Tax audit process

The taxpayer has the right to appeal an Administrative Act to the Tax Bureau and, simultaneously, to the Executive Branch in an administrative process. Both appeals must be filed jointly within ten days from the notification of the administrative act. If both appeals are tacitly (not expressly resolved within a period of 150 days) or expressly rejected, the taxpayer has the right to appeal to a special court through a judicial proceeding.

Statute of limitations

The statute of limitations in Uruguay is five years, which can be extended to ten years in the case of: (i) tax fraud, (ii) not complying with Tax Office registration, (iii) lack

Uruguay

of communication of a taxable event, or (iv) not submitting a tax return (among other cases).

Topics of focus for tax authorities

There are several topics the tax authorities are currently focusing on.

One of the newest topics of interest for the tax authorities concerns 'transfer pricing' rules and their impact on multinational companies operating in Uruguay.

During the last few years, important investments have been made by the government to automate processes and improve assistance to taxpayers.

Other issues

Bank secrecy and identification of title holders

In 2011/12, Uruguay introduced relevant modifications to internal law that may impact corporate taxpayers.

The inclusion of the request of information by a treaty partner has been approved as one of the hypotheses under which banking secrecy can be lifted.

The identification of holders of bearer titles representing the capital of entities domiciled or doing business in Uruguay is mandatory. In this regard, Law N° 18,930 includes the compliance of certain obligations for identification purposes. This obligation relies on the holders, who must identify themselves with the Central Bank of Uruguay, providing not only their identity but also the percentage of their participations in the entity.

Information shall be kept by the Central Bank of Uruguay and subject to secrecy, although the National Tax Office, anti-money laundering authorities, penal and family courts, and related entities may access them in certain cases.

The duty of identification applies to all entities domiciled in Uruguay and to companies incorporated abroad, provided that they act in Uruguay through a PE or if their management is carried out in Uruguay.

Significant developments

There have been a number of amendments introduced in the tax legislation of Uzbekistan during the past year. Below we describe the most notable changes effective as of 1 January 2016.

- The unified tax payment (UTP) rate for micro-firms and small enterprises engaged in services is decreased from 6% to 5%.
- The property tax rate for legal entities is increased from 4% to 5%.
- Mobile operators became taxable on excess profits through differentiated corporate income tax (CIT) rates. Thus, CIT rates were set as follows:
 - Profitability lower than 20%: Standard CIT rate of 7.5%.
 - Profitability higher than 20%: 50% CIT rate charged on profits exceeding the 20% level of profitability.

Taxes on corporate income

Resident corporations pay CIT on their worldwide income, whereas non-residents (i.e. foreign legal entities that have a permanent establishment [PE] in Uzbekistan or have income from sources in Uzbekistan not associated with a PE) pay CIT on income resulting from activities/sources in Uzbekistan.

Non-resident corporations are taxed directly at the level of their Uzbek PE, if there is one, or via withholding tax (WHT) at the source of payment of the Uzbek-source income.

CIT is charged on taxable profit calculated as a difference between gross income and deductible expenses reduced by applicable incentives granted by the Tax Code, other laws, or presidential decrees.

The CIT rate is set annually by presidential decree. In 2016, enterprises (i.e. legal entities) are generally subject to CIT at the rate of 7.5%. Commercial banks are subject to CIT at the rate of 15%.

As of 1 January 2016, companies providing mobile services became taxable on excess profits through differentiated CIT rates. Thus, CIT rates were set as follows:

- If profitability is lower than 20%, the CIT rate is 7.5%.
- If profitability is higher than 20%, 50% of the CIT rate is charged on profits exceeding the 20% level of profitability.

See the Withholding taxes section for WHT rates applicable in Uzbekistan.

Uzbekistan, Republic of

Unified tax payment (UTP)

An optional UTP regime is available for micro-firms and small businesses. For these taxpayers, the UTP replaces the CIT, value-added tax (VAT), water-use tax, IDT (*see Local income taxes below*), mineral tax, and other local taxes and duties.

Excise and customs duties remain applicable for this group of taxpayers (unless a specific exemption applies). However, micro-firms and small businesses producing excise-liable goods or engaged in subsurface extraction may not opt for the UTP regime.

UTP is obligatory for companies engaged in catering, retail, and wholesale. Agriculture companies may opt to pay a unified land tax instead of all other taxes.

As of 1 January 2016, the general UTP rate is 5%.

Local income taxes

There is a local tax on accounting profit (less CIT), an infrastructure development tax (IDT), which is charged at a maximum rate of 8%.

IDT is reported jointly with CIT on a quarterly basis.

Corporate residence

For Uzbek tax purposes, corporations are classified as resident or non-resident. A resident corporation is a legal entity that passed state registration in Uzbekistan (i.e. Uzbek legal entity). Other legal entities are regarded as non-resident corporations for tax purposes.

Permanent establishment (PE)

PE is defined by the Tax Code as “any place through which a non-resident carries out entrepreneurial activity in the Republic of Uzbekistan, including activity carried out through an authorised person. PE is also existent where a non-resident carries on entrepreneurial activity for 183 days (or more) in any consequent 12-month period ending in the current tax period”.

Other taxes

Value-added tax (VAT)

Legal entities are subject to VAT, which is applied to taxable turnover and taxable imports. The rate for taxable turnover is 20%. This rate also applies to taxable imports, for which the tax base is determined as the customs value plus import duties and excise tax (on excise-liable goods). Export of goods for hard currency is generally zero-rated. Insurance and most types of financial services are exempt from VAT.

VAT is reported quarterly by micro-firms and small enterprises and monthly by other categories of taxpayers.

Customs duties

Import of certain goods to Uzbekistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Rates of customs duties vary from 5% to 70%, depending on the type of imported goods. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

Excise taxes

Legal entities producing or importing excise-able goods (e.g. cigarettes, jewellery, petrol, alcohol drinks) are subject to excise tax. Rates vary from 2% to 200%, depending on

the type of goods produced/imported. The taxable base is determined as the value of produced/imported goods, excluding VAT. Excise tax is reported quarterly.

Property taxes

The property tax rate is 5% for legal entities. The tax is computed annually, based on the net book value of the fixed assets, adjusted for the effect of revaluation, which should be performed annually on 1 January, and the value of overdue construction-in-progress. The rate is doubled for equipment not installed in due time.

A charge of 0.25% of the historic value of outdated equipment is collected from legal entities (except for micro-firms and small enterprises) for exploitation of fully depreciated equipment.

Newly opened enterprises are exempt from property tax for a period of two years from their date of registration, unless such enterprises have been created on the basis of production facilities or assets of existing enterprises. There is also a rate reduction benefit available to companies engaged in production and export of goods (work, services).

Property tax is reported annually.

Obligatory revaluation of fixed assets is to be performed by micro-firms and small enterprises once every three years (other categories of enterprises that are subject to this requirement should perform revaluation every year).

The Tax Code provides for the list of certain non-taxable property, mostly including public service facilities (e.g. waterwork facilities), gas and heat distribution lines, railways and highways, and machinery and equipment in use for more than ten years.

Land tax

Enterprises, including foreign legal entities operating in Uzbekistan via a PE, owning land plots or rights of their use are subject to land tax or land lease payment annually. Land tax is charged at fixed fees that vary depending on the quality, location, and level of water supply of each land plot. Land lease payment is charged at negotiable rates; however, the minimum amount cannot be less than the land tax rate for the respective land plot. Land tax and land lease payment are computed based on the area of the land in use.

Transfer taxes

There are no transfer taxes in Uzbekistan.

Stamp duties

According to Uzbek legislation, stamp duty is an obligatory payment charged for performance of legal actions and/or issuance of legal documents. The following actions, among others, are subject to stamp duties: filing claims, performing notary actions, civil registration, state registration of a legal entity, obtaining licences/permits to carry out certain activities, etc.

The rates of stamp duties generally vary from 0.5 to 20 times minimum monthly wage (MMW), depending on the type of action executed. For instance, duty for filing a claim depends on the amount of claim. If the amount is less than 20 MMW, the duty comprises 5% of this amount; if the amount exceeds 80 MMW, the duty is 20% of this amount. Duty for notarisation of copies of documents for legal entities is 2% of the MMW per each page of the document. Duty for registration of legal entities with foreign investment comprises five times the MMW plus 500 United States dollars (USD).

Uzbekistan, Republic of

Turnover taxes

There are three mandatory contributions that are charged on the enterprise's gross annual turnover (less VAT and excise tax):

- Road fund to be imposed at a rate of 1.4%.
- Pension fund at a rate of 1.6%.
- Educational and medical institutions fund (for reconstruction, capital repair, and equipment) at a rate of 0.5%.

The taxable base (and tax rate in exceptional cases) for these mandatory contributions may differ depending on the type of activity of a company. Turnover taxes are reported quarterly.

Micro-firms and small enterprises paying taxes under the standard tax regime (except enterprises producing excisable goods and extracting mineral products subject to subsurface use tax) are no longer subject to obligatory contributions to the above-designated funds.

Water-use tax

Enterprises (including PEs) using water in their production are subject to water-use tax. The tax rate is set by the Cabinet of Ministers and depends on the source of water consumption (i.e. surface or underground). Water-use tax is calculated based on the volume of the water consumed. Water-use tax is reported annually.

Unified social payment (USP)

Employers are subject to USP assessed on total payroll cost related to local and expatriate staff. This payment is collected by the tax authorities. The rate of USP is 25% (15% for micro-firms, small enterprises, and farms).

Income of foreign personnel paid to non-resident legal entities as part of secondment fees under personnel provision agreements is subject to USP. The taxable base for calculation of USP on such income shall be the income of foreign personnel provided, but not less than 90% of the secondment fee payable under the personnel provision agreement. As of 1 January 2016, USP is reported monthly.

Payroll taxes

In addition to USP, employers are responsible for withholding personal income tax (PIT) and pension fund contributions from salaries and remitting them to the state budget.

Taxes of subsurface users

In addition to standard taxes, subsurface users (i.e. legal entities and individuals exploring and extracting natural resource) are subject to subsurface users' specific taxes, as listed below:

Subsurface use tax (royalty)

Subsurface use tax is charged on volume of produced (extracted) natural resources that are ready for sale or transfer (including free of charge) and consumption for internal purposes. The taxable base is determined as the average weighted sales price.

Business activity	Tax rate examples
Extraction of natural resources	natural gas 30%, precious stones 24%, oil 20%, gold 5%, silver 8%
Utilisation of by-products received during the extraction of natural resources	30% of tax rate applicable to main natural resources extracted

Subsurface use tax is reported quarterly.

Excess profits tax

Excess profits tax is assessed on the difference between the selling price of the extracted natural resources (as per the list) and the statutory price set by the legislation. Excess profits tax is not payable by entities operating under production sharing agreements.

The list of natural resources and goods subject to excess profits tax includes copper, cement, natural gas, polyethylene granules, and clinker. Excess profits tax is paid at 50% of the taxable base.

Signing and commercial discovery bonuses

Signing and commercial discovery bonuses are one-off payments to the state budget. The signing bonus is payable for the right to engage in exploration and extraction of natural resources and range from 100 to 10,000 times the MMW, depending on the type of minerals. The commercial discovery bonus is paid for each field where a subsurface user discovers the natural resources and comprises 0.1% from the cost of the proved reserve volume.

Branch income

There is no concept of a 'branch' of a foreign legal entity in the Uzbek legislation. Instead, such entities use a PE registration to perform business activities without establishing an Uzbek company.

In addition to CIT, non-residents operating in Uzbekistan via PE pay so-called 'net profits tax' assessed at 10% on accounting profit less CIT.

Income determination

Inventory valuation

Uzbek legislation permits the application of the weighted average cost method (AVECO) and the first in first out (FIFO) method for the valuation of inventory for tax purposes.

Capital gains

Capital gains arising from the disposal of tangible and intangible assets are calculated as the difference between the selling price and the net book value of an asset. The capital gain is included in taxable profits (unless specifically exempt), and the capital losses are deductible (only if the disposed asset had been used for business purposes for three or more years). This is applicable to Uzbek legal entities and PEs of foreign legal entities.

Capital gains of non-resident companies are subject to WHT at 20% as 'other' income. The obligation to withhold and pay the tax on income of a non-resident of the Republic of Uzbekistan is levied on the buyer of the property, a tax agent.

In the absence of the documents supporting the acquisition price, WHT on capital gains from the sale of property shall be assessed based on the sales price.

Dividend income

Dividends paid by a domestic subsidiary are subject to 10% WHT at the source. The net dividends received by its domestic parent company are then excluded from its CIT base. Such net dividends received by a foreign parent company are taxed in accordance with the respective country's internal legislation or double tax treaty (DTT) provisions (if Uzbekistan has a DTT with this country).

Income of non-residents subject to WHT (including income in the form of dividends, interest, and royalties) is to be paid without withholding of WHT at source or with application of a reduced WHT rate as provided by a tax treaty, provided that there is a

Uzbekistan, Republic of

tax certificate confirming that non-residents are registered for tax purposes in the state with which Uzbekistan has the effective tax treaty (with certain exemptions). Such WHT exemption/rate reduction used to be granted through a preliminary approval by the Uzbek tax authorities.

See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.

Interest income

Interest income is subject to 10% WHT at the source. The net interest income received by companies is then excluded from its CIT base. Such net interest income received by foreign companies is taxed in accordance with the respective country's internal legislation or DTT provisions (if Uzbekistan has a DTT with this country). Similar to other types of income of non-residents subject to WHT (including income in the form of dividends and royalties), interest income is to be paid without withholding of WHT at source or with application of a reduced WHT rate by automatic application of a DTT, provided that there is a relevant residence certificate.

See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.

Foreign income

Gross foreign income of a resident corporation (e.g. income from its foreign branch) should be included in its aggregate income on an accrual basis, regardless of remittance date. Expenses incurred abroad in relation to such foreign income can be deducted, subject to provisions of the Uzbek Tax Code. Foreign income tax paid on such income should be credited against the Uzbek CIT only if this branch is registered in a country with which Uzbekistan has a DTT. There are no deferrals for foreign income to be recognised for Uzbek tax purposes.

Deductions

The tax base for CIT purposes varies significantly from the computation of taxable profits in most Western jurisdictions. Expenditures such as entertaining, benefits in-kind, and business trip allowances exceeding the statutory norms (that are generally low) are non-deductible.

There are additional costs that cannot be deducted by PEs of foreign legal entities, such as interest on head office loans; commission fees charged by the head office; and royalty, administrative, and management expenses of the head office incurred outside Uzbekistan. However, PEs are eligible to deduct expenses incurred outside of Uzbekistan if they directly relate to their business in Uzbekistan.

Depreciation and amortisation

For tax purposes, depreciation/amortisation is calculated with application of rates defined by the Tax Code. If depreciation for accounting purposes is charged at higher rates (compared with the Tax Code rates), the difference is treated as a temporary difference for CIT purposes (i.e. deducted in future periods).

Depreciation is calculated from a month following the month when the asset was put into use until it is fully depreciated, disposed, or written off. The maximum annual depreciation rates applicable to different types of fixed assets are outlined in the table below.

Depreciable item	Rate (%)
Buildings and other structures	5

Depreciable item	Rate (%)
Cars, tractors, special equipment, computers and related hardware	20
Lorries, buses, special cars and trucks, industrial machinery and equipment, agricultural machinery and equipment, oil extraction and mining equipment, office furniture	15
Railway, river and air transport vehicles, thermo-technical equipment, turbines, electric and diesel drives, power supply and communication lines, pipelines	8
Depreciable assets not mentioned above	15

For statutory accounting purposes, fixed assets can be depreciated using one of the following methods:

- Straight-line method.
- Production method.
- Double-declining-balance method.
- Sum-of-the-years' (cumulative) method.

Intangible assets, including leases and other property rights, are amortised over the shorter of an asset's useful life or the period of activity of the enterprise. Where an asset's useful life cannot be determined, the asset can be amortised over five years.

Expenses related to geological exploration and developmental works necessary for the extraction of natural resources are deductible for CIT purposes through depreciation at the rate of 15% *per annum*.

Goodwill

For tax purposes, expenses incurred for acquisition of goodwill should be deductible through monthly amortisation charges at norms calculated by the taxpayers based on historical cost of goodwill and its useful life.

Start-up expenses

Current legislation does not provide specific guidance on tax treatment of start-up expenses. However, as per Uzbek accounting legislation, certain types of start-up expenses (e.g. expenses for acquisition of right for production, right for rendering services and carrying out works, right to use economic or other privileges) can be considered as expenses for procurement of intangible assets and, respectively, can be deducted through monthly depreciation charges.

Interest on short-term loans

Interest is deductible, except for interest on overdue/delayed loans (i.e. 'penalty interest') and interest capitalised in the value of fixed assets (i.e. in cases where a loan was obtained to purchase fixed assets).

Bad debt

Bad debts are deductible for tax purposes in cases where they are recognised in accordance with Uzbek accounting legislation. Otherwise, such expenses should be considered as non-deductible. According to the current Uzbek legislation, arrears are recognised as bad debts upon expiration of three-years from their due date.

Charitable contributions

Charitable contributions are generally treated as non-deductible expenses and added-back to the taxable base.

However, taxable income can be reduced for the amount of charitable contributions to ecological and charitable foundations and cultural, medical, educational, and municipal institutions, not exceeding 2% of the taxable income.

Uzbekistan, Republic of

Fines and penalties

Fines and penalties are considered as non-deductible expenses.

Taxes

Generally, taxes are deductible for CIT purposes. The exceptions are the infrastructure development tax based on after-tax profits and the 'net profits tax' for PEs.

Other tax losses

In cases where goods or services are sold below cost (or given for free), the revenue should be adjusted for tax purposes to the cost or purchase price of the goods or services.

Production wastes and defects within statutory norms, and losses resulting in *force-majeure* circumstances, are generally deductible.

Losses from the disposal of fixed assets also may be deducted if the fixed asset has been used for three or more years.

Net operating losses

Tax losses may be carried forward for a period of five years, allowing a reduction of taxable income of the respective year by up to 50%. Loss carrybacks are not permitted.

Payments to foreign affiliates

There are no special tax provisions regarding deductibility of payments to foreign affiliates for services provided. They may be deducted in full if the general deductibility criteria are met (*see Transfer pricing in the Group taxation section*).

Group taxation

There is no provision for consolidation of income or losses by related companies for tax purposes in Uzbekistan. A foreign legal entity that has several PEs in Uzbekistan may not consolidate those for tax purposes.

Transfer pricing

The transfer pricing concept in the Uzbek Tax Code is limited to a couple of paragraphs stating that tax authorities may adjust prices used by interrelated parties if these prices differ from the prices that would have been used in transactions with independent parties. There is no further guidance for application of this rule, which gives rise to different interpretation by tax authorities and taxpayers.

Thin capitalisation

Effective legislation does not provide for thin capitalisation rules, except for debt-to-equity ratios set up by the Central Bank of Uzbekistan (CBU) for commercial banks.

Controlled foreign companies (CFCs)

Uzbek tax legislation currently does not provide for any CFC rules or regulations. In January 2015, a draft law was introduced proposing amendments/additions to the Tax Code in respect of taxation of CFCs to serve as an anti-avoidance measure; however, as of 1 April 2016, the law was not yet adopted.

Tax credits and incentives

The current tax legislation offers tax incentives for enterprises in oil and gas exploration/development projects, enterprises engaged in the production and export of goods for foreign currency (when export share exceeds 15%), and companies rendering certain services.

In 2013, a Special Industrial Zone (*Djizzak*) was created in Djizzak region for a preliminary term of 30 years with potential prolongation. During that period, special customs and tax regimes and benefits will be in force within its territory.

There are also two other economic zones established earlier: the Free Industrial Economic Zone in the Navoi region and the Special Industrial Zone in Angren (established in 2012) that grant certain customs and tax exemptions and other benefits to legal entities registered in their territories.

Incentives for oil and gas exploration and extraction companies

Foreign companies carrying out oil and gas exploration works, as well as their foreign contractors/subcontracts engaged in such works, are exempt from payment of all forms of taxes and contributions to non-budget funds during the exploration period. Additionally, import by these companies of equipment, material, and technical resources and services necessary for the exploration and related works is exempt from customs duties.

Resident corporations supplying materials and rendering services to foreign companies carrying out oil and gas exploration are exempt from VAT.

Furthermore, if foreign companies carrying out oil and gas exploration form joint venture companies for extraction of oil and gas at respective fields, such companies are granted a seven-year CIT holiday starting from the date of commencement of extraction.

Incentives for carrying out export activities

Enterprises exporting goods (works, services) of their own production for freely convertible currency may apply reduced rates of CIT as follows:

- If export share of total sales ranges from 15% to 30%, the effective rate shall be reduced by 30%.
- If export share of total sales is 30% or more, the effective tax rate shall be reduced by 50%.

This incentive is applied likewise in regards to property tax as follows:

- If export share ranges from 15% to 30%, the property tax rate is reduced by 30%.
- If export share is 30% or more, the property tax rate is reduced by 50%.

The incentive in both cases is subject to a restriction that it does not apply to wholesale/retail sale or intermediary companies, nor to revenues from the export of specific items such as cotton fibre, oil, gas, precious metals, etc.

Producers can also defer payment of their import VAT in respect of material and technical resources used for production of goods to be exported. The deferral is granted for up to 90 days without application of any interest.

Incentives for service companies

Micro-firms and small enterprises engaged in certain types of activity are exempt from CIT and UTP until 1 January 2017. These types include, without limitation, leasing, insurance, auditing/bookkeeping services, and repair of footwear and leather goods.

Exemptions from customs payments

There are certain customs exemptions offered by the legislation for the following:

- Technological equipment imported by foreign investors as their charter fund contribution.

Uzbekistan, Republic of

- Technological equipment imported under projects for creation of new or the modernisation of existing production facilities (with appropriate certificates issued by an authorised bank).
- Property imported for production needs by foreign investors and enterprises with foreign investment with foreign participation in the equity of not less than 33%.

Foreign tax credit

In accordance with international tax treaties of the Republic of Uzbekistan, legal entities/residents of Uzbekistan can obtain tax relief in respect of CIT paid outside of Uzbekistan. Depending on the provisions of a particular DTT, a credit or exemption may be claimed. In order to claim tax relief, legal entities should provide a copy of the tax payment order, confirmation from a competent tax authority, or any other document confirming payment of the tax outside of Uzbekistan.

Withholding taxes

WHT is to be withheld and remitted to the state budget by entities paying income to non-residents if these entities qualify under a tax agent definition (i.e. by [i] Uzbek legal entities and [ii] non-residents operating in Uzbekistan via PE).

Income of non-residents subject to WHT (including income in the form of dividends, interest, and royalties) is to be paid without withholding of WHT at source or with application of a reduced WHT rate as provided by the tax treaty (with certain exemptions), provided that there is a tax certificate confirming that non-residents are registered for tax purposes in the state with which Uzbekistan has the effective tax treaty. Such WHT exemption/rate reduction used to be granted through a preliminary approval by the Uzbek tax authorities.

The domestic WHT rates are as follows:

Payment	WHT (%)
Dividends and interest	10
Insurance and reinsurance payments	10
Freight	6
Royalties, services (including management, consulting services), rents, other income	20

Double taxation treaty (DTT) relief

Foreign legal entities that do not carry on activities in Uzbekistan through a PE are subject to WHT on income from sources in Uzbekistan, subject to the terms of a relevant DTT. Uzbekistan has enforced DTTs with 52 countries.

DTTs in force establish WHT rates as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Austria	5 (2)/15	10	5
Azerbaijan	10	10	10
Bahrain	8	8	8
Belarus	15	10	15

Notes

- Where the beneficial shareholder owns not less than 10% of the voting shares.
- Where the beneficial owner holds at least 10% of the capital of the paying entity.
- Where royalties are paid for patents, trademarks, know-how, etc.
- Where royalties are paid for copyrights on literature, cinema, musical works, etc.
- Where royalties are paid for secret formulas, processes, or know-how.
- Where royalties are paid for computer software, patents, designs, models, or plans.
- Where one of the following conditions is met:
 - recipient is a local authority or corporate body constituted under public law, including the central bank of the state, or interest is paid by the local authorities or corporate bodies

Uzbekistan, Republic of

- b. interest is paid in respect to debt claims or loans, guaranteed, insured, or aided by the state or on behalf of the state
- c. interest is paid in respect to credit sales of industrial, commercial, or scientific equipment, goods and merchandise, or provision of services by an enterprise to another enterprise, or
- d. interest is paid in respect to a loan of any kind granted by a bank.
- 8. Where the beneficial shareholder owns no less than 25% of the capital of the paying entity.
- 9. Where the recipients of the interest are governments of contracting states or any governmental body (such interest is exempt from WHT).
- 10. Where royalties are paid in respect to use or the right to use industrial, commercial, or scientific equipment.
- 11. Where the beneficial shareholder owns no less than 20% of the voting shares.
- 12. Where the interest is received by any financial institution (including insurance companies).
- 13. Under the provisions of the Netherlands' Company Tax Act and the future amendments thereto, a company that is a resident of the Netherlands is not charged to Netherlands company tax with respect to dividends the company receives from a company that is a resident of Uzbekistan.
- 14. If and as long as the Netherlands, under its national legislation, levies no WHT on interest or royalties paid to a resident of Uzbekistan, the WHT rate for interest and royalty income paid at source in Uzbekistan shall be reduced to 0%.

Tax administration

Taxable period

The taxable period for CIT is a calendar year.

Tax returns

CIT is reported quarterly before the 25th day of the month following the reporting quarter, with an annual return due by 25 March following the reporting year for enterprises with foreign investment and 15 February following the reporting year for other categories of CIT payers. PEs report on CIT once a year prior to 25 March following the reporting year.

Payment of tax

Uzbek enterprises, including enterprises with foreign investment, are required to make advance instalments of CIT in each quarter based on estimated profits in the quarter. The instalments are payable by the tenth day of each month. Final quarterly payments based on actual profit figures are payable no later than the filing deadline for the quarterly tax returns (which is the 25th day of the month following the period of assessment). In case the final quarterly payment is more than 10% higher than advance instalments made in this quarter, tax authorities have the right to recalculate the advance instalments based on the actual quarterly profit figures and charge late payment interest accordingly.

Final CIT payment should be made no later than the date set as the deadline for annual return submission.

Payment of CIT by a PE is made annually within a month after the filing deadline.

Tax audit process

Scheduled statutory tax audits are to be carried out once in three years (once in four years for micro-firms, small enterprises) by the tax authority of the district where the enterprise is registered (i.e. district tax inspectorates). However, in certain cases, the tax audit is undertaken by the State Tax Committee, which is the highest tax authority.

The tax audits are aimed at verification of the tax returns submitted by the taxpayer. Normally, the tax authorities will review the accounting records, copies of tax returns, and source documents as required.

There can also be un-scheduled tax audits (e.g. in case of liquidation of the enterprise) and counter tax audits (e.g. to review transactions with the enterprise's supplier/customer who is under the scheduled tax audit).

In case of tax breaches revealed during tax audits, taxpayers should remove tax violations and pay respective taxes/obligatory payments and late payment interest

within 30 days after the tax authority's decision is released. If accomplished within the deadline, the tax authority's decision on applying penalty may be cancelled. If not accomplished, the unpaid taxes/obligatory payments and late payment interest are to be withdrawn from (i) the taxpayer's bank accounts (by issuing tax liability claim without acceptance), (ii) the taxpayer's debtors (by issuing tax liability claim on the debts payable to taxpayer), or (iii) the taxpayer's property (by issuing tax liability claim upon decision of the court).

Another form of monitoring accuracy and completeness of fulfilment of tax liabilities imposed by the tax authorities is 'cameral control', which is performed at the time of tax returns submission. The tax authorities may require the taxpayer to amend the tax return(s) if they have revealed mistakes or inconsistencies therein. The amended tax returns should be filed within ten days.

Statute of limitations

The statute of limitations for tax purposes in Uzbekistan is set to five years.

Topics of focus for tax authorities

There are no officially announced areas of focus during tax audits. In practice, the tax authorities usually focus on currency control, cash discipline, deductibility of expenses for CIT purposes, and taxes on resources (e.g. excess profits tax, subsurface use tax).

Other issues

Intergovernmental agreement (IGA) on the Foreign Account Tax Compliance Act (FATCA)

On 3 April 2015, an IGA between the Government of the United States of America and the Government of the Republic of Uzbekistan to Improve International Tax Compliance and to Implement FATCA was signed. More than 60 countries around the world have concluded IGAs on FATCA with the United States, while, as per a statement by the US Embassy in Uzbekistan, Uzbekistan is the first country in Central Asia to sign an IGA on FATCA with the United States.

The IGA will ensure compliance with US tax laws for US citizens working in Uzbekistan. According to the FATCA regulations, foreign financial institutions (FFIs) (i.e. all financial institutions outside of the United States) are faced with disclosure requirements regarding their account holders who are US persons. This means that FFIs in Uzbekistan are obligated to periodically transmit information on financial accounts held by US persons to the US Internal Revenue Service (IRS) or face a 30% WHT on payments made from the United States. In order to fulfil this obligation, FFIs should implement procedures to ensure information collecting systems are in place and required information in respect to US investors is duly reported to the US IRS.

Significant developments

Amendment of the Venezuelan Income Tax Law (VITL)

The VITL was amended by Decree published in the Extraordinary Official Gazette N° 6,210 dated 30 December 2015. The amendment entered into force on 31 December 2015 and will be applicable to fiscal years started after that date. The primary changes introduced in the amendment comprise the following:

- Modification of the criterion to determine income availability in certain transactions, where some categories of income previously considered available on a cash basis are now to be taxed on an accrual basis.
- Elimination of the deduction recapture rule for deductions taken in a given tax year and not paid in the following taxable year.
- A 40% tax rate on net income from banking, financial, insurance, or re-insurance activities carried out by entities domiciled in Venezuela.
- Elimination of the tax rebates for new investments.
- Elimination of the inflation adjustment mechanism for taxable income determination for major or 'special taxpayers'.

Enactment of Tax on Large Financial Transactions Law

Decree N° 2,169 was published in the Extraordinary Official Gazette N° 6,210 dated 30 December 2015 and entered into force on 1 February 2016. The Decree created a tax imposed on certain financial transactions performed by the denominated 'special taxpayers' or the entities related to such 'special taxpayers'. The rate applicable to the taxable transactions is 0.75%. None of this tax will be deductible for a taxpayer's income tax purposes. *See the Other taxes section for additional information.*

Taxes on corporate income

Corporations resident in Venezuela are subject to corporate income tax (CIT) on their Venezuelan and foreign-source income, whereas corporations resident abroad with a permanent establishment (PE) in Venezuela are levied CIT on only their Venezuelan and foreign-source income attributable to said PE. Corporations are able to claim any similar taxes paid abroad on foreign-source income as a tax credit. Non-resident corporations without a PE are subject to CIT only on Venezuela-source income.

Corporate income is taxed at the following progressive rates based on tax units (TU) (*see below*) (i.e. Tariff 2):

Taxable income (TU)		Rate (%)	Subtract (TU)
Over	Not over		
0	2,000	15	0
2,000	3,000	22	140
3,000	-	34	500

Tax units (TU)

The 1994 Income Tax Law reform established the concept of a taxable unit as an element that reduces the negative effects created by inflation on the determination of the tax rates. The tax code established the initial TU at 1 *bolívar fuerte* (VEF), with annual basis adjustments according to the variation on the consumer price index (CPI) from the previous year. For 2015, TU was VEF 150. For 2016, TU is VEF 177.

Additional rates and considerations

Income for oil exploitation and certain related activities is taxed at a flat rate of 50%. Related activities are comprised of those such as refinery, transportation, and purchases for the exports of hydrocarbons and by-products for exploitation. Joint venture corporations are also subject to a 50% CIT rate.

The above indicated regime does not apply to corporations engaged in the exploration and exploitation of non-associated gas (and the processing, refining, transportation, distribution, commercialisation, and exportation of the gas and its components) or companies exclusively engaged in the refining of hydrocarbons or improvement of extra heavy oil, which are subject to Tariff 2.

As a consequence of the amendment of the Law enacted on 31 December 2015, net income from banking, financial, insurance, and re-insurance activities carried out by entities domiciled in Venezuela is subject to a 40% flat rate.

Local income taxes

See *Municipal business licence tax in the Other taxes section for a description of local taxes on income.*

Corporate residence

According to the Venezuelan tax code, the following companies are regarded as resident:

- Companies incorporated in Venezuela and registered with the Mercantile Registry as established by commercial law.
- Foreign companies registered to be domiciled in Venezuela as branches duly registered with the Mercantile Registry.

The following companies are non-residents but subject to Venezuelan taxes:

- Foreign companies that provide technical assistance, technological services, royalty items, and professional services from abroad.
- Foreign banks granting loans to local companies.
- Foreign companies leasing goods to local companies.
- Foreign companies deriving income from economic activities carried out in Venezuela or from assets in Venezuela.

Permanent establishment (PE)

According to the VTTL, generally, a passive party is deemed to be carrying out operations in Venezuela through a PE when:

- The passive party owns, directly or through an agent, employee, or representative in the Venezuelan territory,:
 - an office, fixed place of business, or an activity centre where its activities are totally or partially carried on
 - management headquarters, branches, offices, factories, shops, facilities, warehouses, stores, construction, installations, or assembling works, when the duration thereof exceeds six months, or

Venezuela

- agencies or representatives authorised (according to the VITL) to contract in the name of or on behalf of the passive party.
- The passive party performs, directly or through an agent, employee, or representative in the Venezuelan territory, professional, artistic activities.
- The passive party possesses, directly or through an agent, employee, representative, or other contracted personnel in the Venezuelan territory, other work places where the operations are wholly or partially performed.

Any agent acting independently shall be excluded from this definition, except if such representative has the power to conclude contracts in the name of the principal.

Other taxes

Value-added tax (VAT)

Federal VAT (*Impuesto al Valor Agregado* or IVA) is a one-time tax payable by the ultimate consumer of all types of products and services. However, each business entity involved in the process, from the sale of raw materials to the production and distribution of finished products to the ultimate consumer, is required to include the tax on its products to customers (output tax) and to pay the tax on its purchases or imports of goods and services (input tax), crediting the amounts paid against the amounts due on its own activities. The net amount payable by each entity is considered to represent a tax on the value added.

In general, VAT does not represent an additional cost to business enterprises because even though all types of business enterprises, including government departments and agencies (with some exceptions), are required to accept charges of the tax by suppliers on their purchases of goods and services, such amounts are normally deductible from the liability of the business enterprises for the tax on their bills to customers.

There are exceptions, principally when the sales of an enterprise are exempt from VAT, in which case the enterprise is treated as the final consumer and must absorb any VAT charges on its purchases except insofar as its activities are subject to the zero rate (*see below*). However, input tax paid on goods or services used to produce items that are exempt from VAT may be deducted for CIT purposes.

Taxable transactions

In general, VAT is payable on all sales, rental, and importation of goods, and rendering of services executed or used in the country, although a number of significant exceptions are provided by law.

Sales of goods

The law defines a sale as any transmission of tangible goods, including those made on a conditional basis or through an irrevocable trust. The taxable amount of a sale includes the sale price as well as other amounts charged to the purchaser for other taxes, duties, interest, or surcharges of whatever nature. VAT becomes payable when the goods are invoiced or shipped to the customers or when the price is paid in full or in part.

Exempt sales include the following:

- Certain foods and other products for human consumption.
- Fertilisers as well as any natural gas used in the manufacturing thereof.
- Some products for animal consumption.
- Medicine.
- Products derived from hydrocarbons and some raw materials intended to improve the quality of gasoline.
- Wheelchairs.
- Books, magazines, newspapers, and the paper used in producing these products.

- Vehicles, aircraft, and trains for passenger transport.
- Machinery and equipment for agribusiness.
- Scientific equipment purchased by the government.

Services

Taxable services are those rendered within Venezuela by one person to another on an independent basis, transportation of passengers or goods, agency activities, technical assistance, and transfer of technology. VAT is payable to service providers at the time the invoice is issued, the service is rendered, or the fee becomes demandable, whichever comes first. The taxable amount includes not only the price of services, but also charges to the customers for other taxes, interest, etc.

Exempt services include the following:

- Domestic land and maritime transportation of passengers.
- Educational services.
- Accommodations for students and persons with disabilities.
- Healthcare and dental services, surgery, and hospitalisation.
- Theatres, sports, and cultural events.
- Food services for employees and students.
- Certain utilities (e.g. electricity, water).
- Housecleaning.
- Transport services for hydrocarbon-derived fuels.
- Services involving livestock, poultry, and other minor species, including breeding and production.

Exports

Exports are zero-rated. Consequently, VAT is not payable on exports, including exports of in-bond processing companies, technical fees to foreign residents, and sales to in-bond processing companies and companies that export their entire production. Sale of natural hydrocarbon by joint ventures regulated by the Hydrocarbon Law to the National Oil Company (PDVSA) and affiliated companies are also taxable at 0%. Though exporters do not collect VAT on export sales, they may recover VAT charges on their purchases of goods and services by means of a refund certificate. This certificate may be used to pay other tax obligations. If such exporters carry out sales in the country, they will be entitled to recover only input VAT related to foreign sales.

Additionally, a zero rate applies to independent personal services provided by residents in Venezuela that are used solely by and for the benefit of persons abroad without a PE or fixed base in Venezuela.

Tax rates

The rate may change every year, within the range of 8% to 16.5%. Currently, the general VAT rate is 12%.

A 15% VAT applies to the sale and imports of luxury products (e.g. vehicles valued at 40,000 United States dollars [USD] or more, motorcycles valued at USD 20,000 or more, nickel or token game machines, aircraft used for recreational or sport purposes, jewellery valued at TU 2,500 or more).

An 8% VAT applies to the following transactions:

- Goats, sheep, and minor species for slaughter or breeding.
- Meats in their natural state, or refrigerated, frozen, or salted meats, or meats in brine of goats, sheep, and poultry.
- Shortening.

Venezuela

- Rendering of professional services to any government entity, in any level or branch of government, provided such services do not involve any commercial transactions but rather predominantly intellectual work or efforts.
- Domestic air passenger transportation.

Payment and collection

Excess VAT charged or chargeable to customers over VAT paid to vendors or customs authorities (*Servicio Nacional Integrado de Administración, Aduanera y Tributaria* or SENIAT), including the correspondent payment, must be remitted to SENIAT within the first 15 days of the following month.

Customs duties

As a general rule, the importation of goods into Venezuela is subject to customs duties. These duties are generally levied on the cost, insurance, and freight (CIF) value of the product being imported, excluding VAT.

Customs duty rates generally range from 5% to 35%. The duty rates vary depending on the product involved. In general, import tariffs are 5% for capital goods, 10% to 15% for raw materials and intermediate goods, and 15% to 35% for finished products. In addition, all imports are subject to customs handling charge, a duty import, and VAT.

With regard to procedural aspects, the Master Customs Law establishes two modes of customs declaration: (i) the anticipated informative declaration, only applicable to imports, and (ii) the definitive declaration for customs regime, also known as the single customs declaration. In this regard, it establishes that entities with competence for the issuance of permits and licences are to issue the corresponding documents, at least 25 business days in advance to the arrival of the merchandise, in order for importers to register the advanced informative customs declaration.

Additionally, an element has been created, named Authorised Economic Operator, who will be the company domiciled in the country, involved in the international logistic chain, which will serve as the substitute of simplified control procedures and customs clearance. With regard to the sanctioning system, pecuniary penalties applicable to transporters, porters, consolidating companies, and customs agents, as well as those applicable to infringements committed in the customs declaration of merchandise, have been increased.

Excise taxes

Tax on alcohol and alcoholic beverages

In general terms, the manufacture, commercialisation, and importation of alcohol and alcoholic beverages are subject to excise taxes. The Law of Tax on Alcohol and Alcoholic Beverages provides for three main types of excise taxes:

- Tax on the national production and importation of alcohol and alcoholic beverages, which is established on the basis of TU per litre and varies depending on the type of product.
- Additional excise tax per litre for national and imported beer and for other alcoholic beverages is levied on the sale of those products to the public, which is also provided on the basis of TU per litre, depending on the type of product.
- In addition to the above, another excise tax is imposed on the importation or local sale of national and imported alcoholic beverages to the public, which is levied on the sales price and provided on the basis of a percentage on the price of sale to the public depending on the type of product, as follows: 15% for beer, 35% for natural wines, and 50% for other beverages up to 50 grade on the Gay-Lussac scale.

The Alcohol and Alcoholic Species Tax Law specifies the time of payment of the tax as follows: (i) for importers, at the moment the merchandise is nationalised and (ii) for producers, upon withdrawal of the products from the establishment.

Tax on cigarettes and manufacturing of tobacco

The importation and national production of cigarettes and tobacco, fine cuts, and other tobacco derivatives to be consumed in Venezuela is subject to an excise tax. This proportional tax is levied at a rate of 70% on the retail price of cigarettes, tobacco, and its derivatives. As per the Cigarette and Tobacco Manufacturing Tax Law, produced and imported taxable products for zones under the Territorial Customs Regime, duty free shops, and special development regions shall also be subject to tax.

The time of payment of tax on cigarettes and manufacturing of tobacco is as follows: (i) for national production, before the products are removed from the manufacturing establishments and (ii) for imports, at the time of customs declaration.

Urban Property Tax

The Urban Property Tax is a local or municipal tax payable by any person who owns property rights or any other real rights on urban real estates. The taxable basis is the value of the urban real estate. For these purposes, the fair market value of the real estate is provided as a point of reference. The applicable rate varies according to each municipality.

Public registry tax

Commercial companies are registered with the Mercantile Registry Office and are subject to a tax levied upon incorporation of a company and registration of capital increases. The tax is 1% of the amounts of subscribed or increased capital.

The sale of a going concern is also registered in the Mercantile Registry Office and is subject to a tax levied upon the total amount of the sell. The tax is 2% of the amount.

Stamp duties

The Stamp Duties Law establishes a number of stamp duties on the issuance of official documents (e.g. certificates, permits, authorisations, registrations). Stamp duties may be levied at fixed amounts (ranging from TU 0.01 to TU 10,000) or at a rate based on the value of the transaction or work in question and vary depending on the jurisdiction.

District Capital stamp tax

The District Capital stamp tax on subscribed or increased capital of companies is 2%.

Tax on Large Financial Transactions

Taxpayers for the purposes of the Tax on Large Financial Transactions comprise:

- Entities qualified as 'special taxpayers' by the tax authorities, for payments made from their accounts in banks or financial institutions and payments that do not involve financial institutions (debt offsetting, debtor or creditor substitution, and debt forgiveness).
- Entities related to those qualified as 'special taxpayers' for the above-indicated transactions.
- Individuals and entities acting on behalf of 'special taxpayers' for the above-indicated transactions.

The tax applies, among others, to the following transactions:

- Debits made in bank accounts, or any other deposit instrument, held in financial entities.
- Transfer of securities as of the second endorsement.
- Acquisition of cashier's check.

Venezuela

- Cross-border payments
- Payments of debts obligations (even if not executed through the formal financial system).

The applicable rate is 0.75% on the total bank debit or taxable transaction.

Certain transactions involving state-issued securities, payments of taxes, and transfer of funds among same-holder accounts are exempted from this tax.

The tax is not deductible for Venezuelan income tax purposes.

The tax due shall be determined on a daily basis.

Gift tax

Overall, the Inheritance and Donations Tax Law, published on 1999, stipulates the taxes attributable to inheritances left by individuals. Nonetheless, this Law provides regulation about donations, which are significant to corporations. Subject to payment of the gift tax are the beneficiaries of gifts in the form of movable or real property, rights, or shares located in the country.

For tax calculation purposes, the progressive tax rate (up to 55%) set forth in the Law will be applied to the donated good. Both donors and donees are jointly liable for the tax generated from the gift.

The gift tax is applicable from the time in which the donors manifest before the National Treasury their will to donate and must be paid before the registration of any document formalising or evidencing the authenticity of the gift. Should the donation not be perfected due to express will of the donor or rejection on the part of the donee, the obligation to pay the tax will be eliminated and reimbursement may be requested of the amounts paid in this connection.

Under the transfer pricing rules contained in the VITL, the tax authorities are empowered to impute income in inter-company transactions at a price reflecting the fair market value of the property being transferred.

Before the introduction of transfer pricing rules, under the Inheritance and Donations Tax Law, the tax authorities could and still can presume in transactions involving a sale, assignment, barter, or transfer, the existence of a donation if, for instance, the price stipulated in such transaction does not reflect the real value of the property being transacted. In such a case, a gift tax may be imposed on the difference between the fair market value of the property being transacted and the consideration received in return.

Also, a cancellation of a debt gives rise to gift tax issues. In this regard, the Inheritance and Donations Tax Law provides that the total or partial forgiveness or cancellation of a loan must be viewed as a gift and, as such, is subject to gift tax.

Windfall tax on oil production

The windfall tax on oil companies is provided in the following terms:

- The contribution on extraordinary oil prices is a 20% tax on the difference in price when the internationally quoted price per barrel exceeds the budgeted price per barrel (for purposes of the Venezuelan Annual Budget Law), provided that the quoted price per barrel is equivalent or lower than USD 80 per barrel (i.e. the maximum basis is the difference between USD 80 per barrel and the current budgeted price of USD 55).
- The contribution on exorbitant oil prices is comprised of the following:

- 80% tax on income generated by quoted oil prices between USD 80 and USD 100 per barrel (i.e. 80% on the range from USD 80 to USD 100 quoted price per barrel).
- 90% tax on the difference in the quoted oil prices between USD 100 and USD 110 per barrel.
- 95% tax on the difference over the threshold of USD 110 per barrel.

The tax is payable by oil companies exporting with sale purposes. Also, the mixed companies (*empresas mixtas*) created in accordance with the Master Hydrocarbons Law that sell oil and by-products to PDVSA, or any of its affiliates, are also obligated to pay the above described tax.

On the other hand, tax exemption is provided for the following cases:

- For mixed companies when their activities are the result of the performance of projects for new developments of reservoirs, enhanced production, or projects to remediate production, declared as such by the Ministry of the Popular Power for Petroleum and Mining, until they have recovered their total investment. Parameters to determine the volumes exempted are to be separately established by the aforesaid Ministry by Resolution.
- Exports executed in connection with cooperation or financing international agreements.

The tax is payable on a monthly basis in foreign currency. Other terms of payments are to be regulated by Resolution.

Additionally, USD 80 per barrel is the maximum price to be used as the calculation basis for the payment of royalties, extraction tax, and export registration tax provided for in the Master Hydrocarbons Law.

Hydrocarbons Organic Law

The state is entitled to 30% of the volume of hydrocarbons extracted from any deposit, by way of royalties. The National Executive can reduce this within certain limits, when it is shown that certain types of deposits are not economically exploitable.

Persons conducting activities related to hydrocarbons must pay the following taxes:

Surface tax

For the portion of the surface area granted that is not under development, the equivalent of TU 100 for each square kilometre or portion of a square kilometre for every elapsed year is due as a surface tax. This tax will increase annually by 2% during the first five years and 5% during the following years.

Tax on own consumption

10% of the value of each cubic metre of hydrocarbon by-products produced and consumed as fuel in wholly-owned operations, based on the price of the end consumer, is due as a tax. In the case that said product fails to be sold in a domestic market, the Ministry of Energy and Mines shall provide the price.

General consumption tax

For every litre of hydrocarbon by-products sold in the domestic market, a tax is due at the rate of between 30% and 50% of the price paid by the end consumer, whose aliquot should be implemented annually between the two extremes under the Budget Law. This levy to be paid by the end consumer should be withheld at the supply source, to be handed over to the National Treasury on a monthly basis.

The National Executive may waive, in whole or in part, by the time specified, the general consumption tax, in order to encourage certain activities of public or general interest.

Venezuela

The National Executive can also reinstate this levy to its original level when the causes for the waiver cease to exist.

Gaseous Hydrocarbons Organic Law

The Gaseous Hydrocarbons Organic Law establishes a system of royalties, determinable by the volumes of gaseous hydrocarbons extracted from any deposit and not re-injected. The state is also entitled to a 20% share for this item.

The Law also provides that additional legislation may obligate these entities to pay taxes on hydrocarbons consumed, such as fuel. However, no additional regulations have been enacted for enforcement of this obligation.

Additional taxes are provided for in the licence agreements, which vary for each particular case.

Science, technology, and innovation contribution

The Law on Science, Technology, and Innovation (LOCTI), establishes a mandatory contribution to be paid by companies that obtained, in the previous fiscal year, over TU 100,000 in gross income.

The kind of companies that are required to pay this contribution are stock companies, limited liability companies, partnerships, communities, irregular associations, associations, foundations, and PEs or fixed bases located inside or outside the national territory with current activities in Venezuela.

Contributions established in the LOCTI are as follows:

- Contributions made from companies related to bingos and casinos activities, alcoholic drinks, or tobacco: the companies engaged in activities related to bingos and casinos, alcoholic drinks, or tobacco must contribute annually the equivalent of 2% of gross income.
- Contributions made by private companies engaged in hydrocarbon or mining activities: the companies that are engaged in hydrocarbon activities, including gaseous hydrocarbons, or mining activities, must contribute the equivalent amount of 1% of gross income.
- Contributions made by companies engaged in other economic activities: these companies must contribute annually the equivalent of 0.5% of gross income.
- The company that performs activities with two different percentages will apply the highest one.

The National Fund for Science, Technology, and Innovation (FONACIT) is the entity responsible for the administration, collection, control, verification, and qualitative and quantitative determination of the contributions.

The contribution must be paid to FONACIT during the second quarter after the end of the corresponding fiscal year.

Contribution to support Organic Law on Sports, Physical Activity, and Physical Education

The purpose of the Organic Law on Sports, Physical Activity, and Physical Education (Sports Law) is to establish the public service nature of physical education and the promotion, organisation, and administration of sports and physical activity, as well as their organisation as an economic activity with social aims.

The provision of the Sports Law are of a public nature and are applicable to the public national, state, and municipal administration and organisations, and also to individuals and legal entities that conduct any activity related to the practice, promotion,

organisation, sponsorship, administration, or any economic activity associated with sports or physical activities and education.

The Sports Law creates the National Fund for the Development of Sports, Physical Activity, and Physical Education, which will be constituted with the contributions made by companies or other public or private organisations that perform economic activities for profit in the country; by donations, gifts, or any other special contribution made by the Republic, the states, the municipalities, or any other public or private entity; and by the revenue produced by such funds.

The contribution is 1% of the annual net of accounting profit and is payable by all companies or other public or private organisations that perform economic activities within the country and obtain an annual net or accounting profit of more than TU 20,000. Up to 50% of the contribution can be for the implementation of the taxpayer's own projects, provided the respective project follows the guidelines to be issued by the National Sports Institute, which will be updated every two years.

Anti-drugs contribution

The Organic Drug Law stipulates that any company employing 50 or more employees must make an annual contribution from their operating profit equivalent to 1%. On the other hand, corporations with the specifications mentioned before but that are dedicated to the manufacture or import of alcohol beverages, tobacco, or their mixtures are required to make a contribution equivalent of 2% from their operating profit. Under the definitions established by this Law, operating profit can be understood as the result from subtracting the operating expenses from the income profit in accordance with the accepted Venezuelan general accounting principles.

This contribution will be collected by the National Anti-Drug Fund (FONA) within 60 continuous days counted from the end of the fiscal year.

Note that this contribution can be retrieved if the company performs:

- prevention programs and projects intended for the company employees and their family environment
- prevention programs for children and adolescents, or
- programs to fight drug trafficking.

Payroll taxes and other contributions

Contributions applicable to resident companies in Venezuela:

Contributions	Basis	Contribution basis (cap)	Employer contributions (%)	Employee contributions (%)	Notes
Mandatory social security regime contribution	Wages (normal or regular wages)	Up to five minimum salaries for urban workers	9/10/11	4	(1, 2, 5)
Employment benefit regime contribution	Wages (normal or regular wages)	Up to ten minimum salaries for urban workers	2	0.5	(1)
Housing regime contribution	Total monthly (or integral) salary	No cap (5, 6)	2	1	(5, 6)

Venezuela

Contributions	Basis	Contribution basis (cap)	Employer contributions (%)	Employee contributions (%)	Notes
Employee training contribution (INCES)	Total salaries paid by the employer for purposes of the employer's contribution.	No cap	2	0.5 (4)	(3, 4)
Workplace prevention, conditions, and environment contribution (LOPCYMAT)	Total salaries paid to employees	No cap is established	From 0.75 to 10	N/A	(7, 8)

Notes

- As of 1 March 2016, the minimum monthly salary amount is VEF 11,577.81.
- The employer's contribution to social security depends on the company's risk qualification (minimum risk, middle risk, or maximum risk).
- Regarding *Instituto Nacional de Capacitación y Educación Socialista* (INCES) contribution, the employer must contribute 2% of the total wages and salaries paid to employees.
- Employers are also required to withhold 0.5% of the annual profit-sharing bonus paid to employees.
- According to the *Ley Orgánica del Sistema de Seguridad Social* (LOSSS), the general rule for contribution basis for the new systems may not exceed ten minimum salaries. The transition rules establish a contribution basis of five metropolitan minimum salaries for urban workers for social security purposes. No cap is expressly established in the transition rules for the housing system and work, security, and health regime.
- The basis of calculation of the housing contributions is the 'Integral Salary'. The Integral Salary is a concept established in the Organic Labour Law, and it comprises the following payments: commissions, gratifications, profit sharing bonuses, vacation bonus as well as surcharges for holidays, overtime, night shifts, among others, all of which are made to the employee and correspond to the services rendered by the individual.
- Contributions to be made to this regime are exclusively for the employer and vary depending on the risk associated to the company. A company's risk is to be determined by the *Instituto Nacional de Prevención, Salud y Seguridad Laborales* (INPSASEL).
- Ley Orgánica de Prevención, Condiciones y Medio Ambiente de Trabajo* (LOPCYMAT) regulations do not establish a cap for the contribution. However, as mentioned, the LOSSS establishes a maximum of the minimum urban salaries. For this reason, there are several contrary interpretations on whether a cap should be applied in this case.

Other contributions (see above)	Basis	Contribution basis (cap)	Employer contributions (%)	Employee contributions (%)
Science, technology, and innovation contribution (LOCTI) (1)	Total annual income	N/A	0.50/1/2	N/A
Anti-drug contribution (LOD) (2)	Operating profit	N/A	1/2 (3)	N/A

Notes

- Ley Orgánica de Ciencia, Tecnología e Innovación* (LOCTI).
- Ley Orgánica de Drogas* (LOD).
- 2% in the case of companies that manufacture or import alcohol beverages or tobacco. 1% for companies that employ 50 or more employees.

Municipal business licence tax

Companies and business entities, as well as individuals and unincorporated companies, are subject to municipal tax on gross income from industrial or trade activities carried on in the municipality during the fiscal year. The rates range from 0.1% to 10.0%, depending on the activity and the municipality.

Other municipal taxes

Municipalities also tax vehicles, public entertainment, legal bets, and commercial advertisements. There are also various municipal tariffs and fees.

Branch income

Branches of foreign corporations are subject to the same tax rules as Venezuelan corporations. Inter-branch income and deductions must be eliminated. The positive difference between a branch's annual book and taxable income is deemed to be remitted to the branch's head office (branch profits tax). Such remittances are subject to the 34% flat dividend tax (*see Dividend tax in the Income determination section for more information*) regardless of whether there is an actual payment unless the branch can provide proof of reinvestment of its profits for a five-year period. If such proof is established, no deemed remittance is assumed.

A Venezuelan taxpayer has to recognise, annually on an accrual basis, income generated in a company or other legal entity it controls that is located in a jurisdiction with low fiscal taxation (JLFT). Further, investments in a JLFT must be declared to the SENIAT.

Income determination**Inventory valuation**

Inventories may be valued at cost or the lower of cost or market value. Any method generally accepted for accounting purposes can be accepted for tax purposes.

Capital gains

Capital gains are taxable as ordinary income, and capital losses are deductible from ordinary income. Note that capital losses resulting from the sale of stock, capital reduction, or liquidation of a company are only deductible if they meet one of the following conditions:

- The cost of the capital stock was not in excess of the price quoted on a stock exchange or an amount with a reasonable relationship to the book value of the capital stock.
- The holding period of the investment was for at least two years immediately preceding the date of the sale.
- The stockholder proves that the company selling the shares carried on economic activities for at least two years preceding the date of sale.

At present, the tax law contains two different rulings relevant to the deductibility of losses incurred through operations on the Venezuelan Stock Market, one of which has been described above. The second ruling pertains to income obtained from operations on the local market. This income is subject to a final 1% tax that is withheld at the source. Losses in this kind of operation are not deductible against other income. Corporate shareholders not domiciled in Venezuela may not deduct such losses from other taxable income other than dividends arising from Venezuelan sources.

Gains upon liquidation or reduction of capital are taxable to the liquidating entity.

Dividend income

A dividend tax is levied at a flat rate of 34% on the positive difference between book income and tax income generated after 2000. Book income is understood to be that approved at a shareholders' meeting and based on the financial statements prepared pursuant to generally accepted accounting principles (GAAP). To determine the applicable difference, a last in first out (LIFO) method applies. The tax is triggered when a dividend is paid and shall be remitted via withholding. Withholding is to be made at

Venezuela

the moment a dividend is declared or credited to the account of a recipient. The 34% (domestic) rate can be mitigated under tax treaties.

Dividends obtained from companies incorporated or resident abroad or incorporated abroad and resident in Venezuela are taxed at a flat 34% rate.

Stock dividends

Dividends of stock are subject to payment of the aforementioned dividend tax. Moreover, stock dividends are subject to an advanced payment of dividend tax equivalent to 1% of the dividend distributed. Stock dividends have no cost for tax purposes.

Interest income

Unless the debtor can prove otherwise, any sum paid by a debtor in excess of the principal is deemed to be interest. As a general rule, interest is sourced in Venezuela if it is derived from activities carried out in Venezuela or from property located in Venezuela. Specifically, interest is deemed to be derived from activities carried out in Venezuela if the loan principal is used or enjoyed in the country. Interest received by non-resident corporations is therefore subject to Venezuelan income tax if the loan is granted or invested in Venezuela.

Interest paid on loans granted by non-resident financial institutions is subject to a final withholding tax (WHT) at source at a rate of 4.95% on gross income. Interest paid to other non-resident legal entities is subject to tax at a rate of 34% applied to 95% of the gross income.

Foreign income

Extraterritorial income is subject to Venezuelan CIT based on the concept of worldwide income taxation, according to which:

- Resident companies must pay a tax on total income whether from national or foreign source.
- Non-resident companies with PE in Venezuela will pay tax on their income, whether of national or foreign source, attributable to the Venezuelan PE.
- Non-resident companies will pay taxes on their income originated or caused in Venezuela.
- Resident companies as well as non-resident companies with PE in Venezuela may credit the tax paid abroad for earnings of an extraterritorial source against the income tax payable in Venezuela, subject to limitations.
- In general terms, taxation of foreign-source income is ruled by domestic provisions on taxation of territorial-source income. Foreign-source dividends are taxable when dividends are received. However, in case of investments located in a JLFT, anti-deferral rules in the international fiscal transparency regime apply (*see below*).

Foreign technical assistance and services

Taxable income of foreign taxpayers providing technical assistance or technological services from abroad to individuals or entities that use them in Venezuela or assign them to third parties is presumed to be 30% of gross income for technical assistance fees and 50% of gross income for technological service fees. If the contract does not specify the proportion in which the services are rendered, the law provides that 60% of the technical assistance and technological service fees are deemed to be rendered abroad (i.e. foreign-source), with the other 40% deemed to be rendered in Venezuela. The law also provides that 75% of the entire income related to technological services and 25% of that related to technological assistance is rendered abroad if not otherwise specified in the contract. *See the Withholding taxes section for more information.*

International fiscal transparency regime

A regime of international fiscal transparency is created for the purpose of establishing special standards of fiscal control, governing capital investments in countries classified

as a JLFT, or tax havens. Under certain conditions, a Venezuelan taxpayer may be required to recognise income generated in its JLFT subsidiary on an accrual basis in its tax return.

Inflation adjustment

A system for the adjustment of non-monetary assets, non-monetary liabilities, and shareholder’s equity has been established. ‘Non-monetary assets’ include land, construction, machinery, vehicles, installations, inventories, and investments other than in securities (e.g. bonds and stocks).

There are two phases to the adjustments: (i) initial adjustments and (ii) annual adjustments. Both phases are mandatory adjustments for taxpayers engaged in commercial and industrial operations, and in the exploitation of mines and hydrocarbons. The annual adjustment is optional for taxpayers performing non-business activities.

The following taxpayers are excluded from the inflation adjustment: (i) taxpayers engaged in banking, financial, insurance, and reinsurance activities and (ii) taxpayers designated by the tax authorities as ‘special taxpayers’.

For those taxpayers subject to inflation accounting for tax purposes, the inflation adjustment is based on the National Consumer Price Index (NCPI).

Initial adjustment

The initial adjustment on depreciable fixed assets requires a registration tax of 3% on the amount of the adjustment.

The initial adjustment must be filed at the closing date of any fiscal year ending after 1 January 1993. This adjustment is applicable to all non-monetary assets and non-monetary liabilities.

The initial adjustment is calculated by applying the variations between the NCPI prevailing in the month in which the non-monetary assets were acquired and the month corresponding to the initial adjustment. Assets acquired before 1950 are deemed to have been acquired in January 1950.

A registry tax of 3% is applied exclusively to the initial revaluation adjustment of depreciable fixed assets. For payment, taxpayers must be registered with the Asset Revaluation Registry, maintained by the tax administration. The resulting tax may be paid in three consecutive annual instalments, beginning on the date of registration.

Companies in the pre-operating stage, deemed to end with the first invoice, must determine and pay a 3% tax once the pre-operating period has ended.

Depreciation or amortisation on the revaluation adjustment is allowed, based on the original estimated life of the asset.

Annual adjustment

The annual adjustment is applied each year in determining taxable income. The adjustment factor must be applied to the following balance sheet items at the closing date of the fiscal year. The resulting adjustment will increase or decrease taxable income.

Balance sheet items	Adjustment factor	Tax effect
Non-monetary assets:		
Inventories (including inventories in transit) (2)	Annual variation of the NCPI	Increase taxable income

Venezuela

Balance sheet items	Adjustment factor	Tax effect
Fixed assets (3)	Annual variation of the NCPI	Increase taxable income
Other assets, trademarks, patents, production licences, other rights, and investments in stock not registered in the <i>Superintendencia Nacional de Valores</i> (SNV) and deferred charges (except interest).	Annual variation of the NCPI	Increase taxable income
Investments in shares registered in the SNV	Adjusted to the share market value at the end of the year	Increase taxable income
Non-monetary liabilities:		
Deferred credits (except interest)	Annual variation of the NCPI	Decrease taxable income
Equity:		
Tax initial equity (1)	Annual variation of the NCPI	Decrease taxable income

Notes

1. Tax initial equity is defined as the difference between assets and liabilities at the beginning of the tax year, less accounts receivable from administrators, affiliated companies, and related companies. In order to determine the initial tax equity, assets not located in the country, as well as goods, debts, and liabilities entirely applied to the production of deemed, exempt, or exonerated income, are excluded.
2. Inventories are to be valued at historical cost for purposes of applying the NCPI. The provisions of the VITL detail the procedures for applying the NCPI. The revaluation of inventories in the tax year is included as part of the initial inventories of the following year.
3. The annual revaluation adjustment of fixed assets is considered part of the cost when the assets are sold.

Net losses arising from the annual adjustment that have not been offset cannot be carried forward.

Gains or losses originating from the adjustment of accounts receivable or investments, as well as debts and liabilities in foreign currency or with a re-adjustability clause, are deemed to be carried out during the fiscal year in which they become demandable, collected, or paid, whichever comes first.

Deductions

Depreciation and amortisation

Companies may deduct depreciation of tangible fixed assets and amortisation of intangible fixed assets that are used in the production of income. Depreciation is generally computed on a straight-line basis although any other generally accepted method for accounting purposes is also accepted. Depreciation is not allowed on real estate used as rental property. Depreciation on the stepped-up portion of assets revalued by any method other than the inflation adjustments (*see the Income determination section*) is not permitted. In principle, useful lives of assets shall be consistent with the parameters used in accordance with accounting principles. Although domestic standards provide that tables with depreciation and amortisation rates to be applied by taxpayers may be provided via the Income Tax Rules, such a table has not been provided to date.

Goodwill

Deduction of the amortisation of goodwill is allowed for income tax purposes. Deduction of the cost basis for purposes of calculating the capital gain on the sale is also allowed for income tax purposes.

Organisational and pre-operating expenses

Domestic income tax regulations do not provide for specific guidance as to the treatment of organisational and pre-operating expenses. The accepted practice is to follow GAAP.

Interest expenses

Interest paid on a loan, the principal of which is invested to generate income, is deductible.

Bad debt

Losses arising from bad debts are deductible, provided:

- the loan concerned was granted as part of the taxpayer's business
- the amount of the debt was previously included in the taxpayer's gross revenue (except in the case of loans granted by financial institutions or by employers to their employees), and
- either the debtor and the debtor's guarantors are insolvent or the amount of the loan does not justify collection expenses.

Charitable contributions

Deductions for allowable charitable contributions are limited to 10% of taxable income (before deducting contributions) when taxable income does not exceed TU 10,000. When taxable income exceeds TU 10,000, charitable contributions are limited to 8% of taxable income. For oil extraction companies, the deduction is limited to 1% of the pre-contribution tax amount.

Fines and penalties

Income tax regulations do not expressly provide for the treatment of fines and penalties; however, such expenses are not deductible as they do not meet the normality and necessity requirements.

Taxes

Municipal, state, and local taxes are deductible in determining taxable income. Corporate taxes are not deductible.

Other significant items

Payments required by the labour law, such as profit sharing (generally between 15 days and four months' salary) and severance indemnity accruals, are also deductible. In cases of unjustified dismissals, double severance indemnities must be paid. However, accruals for such additional indemnities are generally not deductible until paid.

Corporate tax deduction of employees' compensation and professional fees is subject to compliance with the taxpayer's obligations as employer as provided for in the Law, which entail, among others, withholding obligations.

Net operating losses

Losses may be carried forward for three years. During the three-year term, the amount of losses available to carry forward cannot exceed 25% of the tax period's taxable income. Carryforward losses derived from the inflation adjustment have been eliminated. Losses may not be carried back. Foreign losses may be offset only against foreign profits.

Payments to foreign affiliates

A Venezuelan corporation may claim a deduction for royalties and technical assistance and for technical service fees paid to foreign affiliates, subject to the following conditions:

- Income tax payable by the recipient is withheld at the source.
- Transfer pricing requirements are met.

Venezuela

- In the case of technical assistance and technological services fees, the expenses may be deducted if such services cannot be otherwise provided in Venezuela.

Foreign companies domiciled in Venezuela are allowed to deduct royalties paid to parent companies or foreign affiliates (*see the Withholding taxes section for more information*). Branches of foreign companies, however, may not deduct such payments to head offices or related parties.

Group taxation

Group taxation is not possible in Venezuela.

Transfer pricing

Taxpayers that carry out operations with related parties abroad must calculate their income, costs, and deductions by applying a defined methodology of transfer pricing. This regime is applicable to imports, exports, and interest paid to recipients abroad as well as technical assistance, technological services, and royalty fees.

Thin capitalisation

Thin capitalisation rules limit the deduction of interest from debt with related parties in excess of a 1:1 debt-to-equity ratio. Under these rules, if the average of a taxpayer's debt (with related and unrelated parties) exceeds the average amount of its equity for the respective fiscal year, the excess debt is treated as equity for income tax purposes. Consequently, the ability to deduct interest on related-party loans may be affected.

Controlled foreign companies (CFCs)

Venezuelan tax legislation does not provide for CFC rules but does provide for international fiscal transparency rules where income from investments in a JLFT must be recognised on an accrual basis (*see Foreign income in the Income determination section*).

Tax credits and incentives

Foreign tax credit

Foreign income tax paid on taxable foreign income may be offset by the payable Venezuelan tax, up to the proportion of Venezuelan payable tax related to foreign-source income. Taxpayers must keep documentation of foreign tax. No carryforward rules are provided for in domestic regulations.

Other incentives

Customs duty incentives are also available, such as drawbacks on the import of materials used for exporting products. This may take the form of a tax refund certificate issued by the Ministry of Finance. The certificate is a negotiable bond and will be accepted by the Treasury Funds Office for payment of national taxes. Determination of the amount of the refund will take into account the import duties effectively paid at the time the materials used in the manufacture of the exported product were received in Venezuela.

Withholding taxes

Resident corporations making certain types of payments must withhold taxes. T2 refers to Tariff 2. These include the following:

Type of payment	Resident (%) (1)		Non-resident (%)	
	Corporation	Individual	Corporation	Individual
Commissions (2)	5	3	5	34

Type of payment	Resident (%) (1)		Non-resident (%)	
	Corporation	Individual	Corporation	Individual
Dividends (5)	34	34	34	34
Royalties (3)	5	3	T2 on 90	34 on 90
Interest to foreign financial institutions	N/A	N/A	4.95	N/A
Other interest	5	3	T2 on 95	34 on 95
Professional fees	5	3	T2 on 90	34 on 90
Technical assistance fees (3)	5	3	T2 on 30	34 on 30
Technological service fees (3)	5	3	T2 on 50	34 on 50
Real estate rentals	5	3	5	34
Tangible personal property rentals	5	3	5	34
Contractor and subcontractor services	2	1	T2	34
Film and television exhibition rights	5	3	T2 on 25	34 on 25
Insurance and reinsurance premiums	N/A	N/A	10 on 30	N/A
Payments to international media organisations	5	3	T2 on 15	N/A
Acquisition of Venezuela commercial funds	5	3	5	34
Payments to non-domiciled international transportation companies (4)	N/A	N/A	T2 on 5	N/A

Notes

1. WHTs constitute prepayments against final tax liabilities as determined by the income tax return when filed.
2. Includes commissions earned in instances other than through a dependent relationship (e.g. employer/employee). Commissions are subject to withholdings in the same manner as salaries and wages.
3. The rates for non-residents are similar to those rates applicable for payments to a non-domiciled corporation not resident in a treaty country and rendering services from abroad with no PE in Venezuela.
4. Excludes payments exempted under international shipping agreements.
5. Withholding applicable only on the excess on profits taxed at the corporate level (see *Dividend income in the Income determination section*).

Tax treaties

There are currently comprehensive treaties for the avoidance of double taxation with the following countries:

Recipient	WHT (%)		
	Dividends	Interest	Royalties
Non-treaty (1)	34	4.95/T2 on 95 (2)	T2 on 90
Austria	5/15 (3)	4.95/10 (4)	5
Barbados	5/10 (5)	5/15 (6)	10
Belarus	5/15 (7)	5	5/10 (8)
Belgium	5/15 (7)	10	5
Brazil	10/15 (9)	15	15
Canada	10/15 (10)	10	5/10 (11)
China	5/10 (12)	5/10 (13)	10
Cuba	10/15 (10)	10	5
Czech Republic	5/10 (14)	10	12
Denmark	5/15 (7)	5	5/10 (15)
France	0/5/15 (16)	5	5
Germany	5/15 (3)	5	5

Venezuela

Recipient	WHT (%)		
	Dividends	Interest	Royalties
Indonesia	10/15 (17)	10	10/20 (18)

Vietnam	5/10 (40)	10	10

Notes

- Domestic rate applicable to payments to non-resident corporations.
- The 4.95% rate applies to non-resident financial institutions, and the Tariff 2 on 90% on the gross income in all other cases of non-resident entities.
- The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
- The 4.95% rate applies to interest paid to banks, and the 10% rate applies in other cases.
- The 5% rate applies when the beneficial owner is a company that holds at least 5% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
- The 5% rate applies to interest paid to banks, and the 15% rate applies in other cases.
- The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
- The 5% rate applies to payments for the use or the right to use copyrights on scientific work, software, trademarks or for the use or the right to use any type of equipment or transportation vehicles. The 10% rate applies in all other cases.
- The 10% rate applies when the beneficial owner is a company that holds at least 20% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
- The 10% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
- The 5% rate applies to artistic copyright, computer software, patent, and industrial, commercial, and scientific royalties. The 10% rate applies in all other cases.
- The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
- The 5% rate applies to interest paid to banks, and the 10% rate applies in other cases.
- The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
- The 10% rate applies to royalties, and the 5% rate applies to technical assistance.
- No withholding applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends. The 5% rate applies in all other cases. The 15% rate applies to a resident of Venezuela who receives from a company that is a resident of France dividends that would give the right to a tax credit (*avoir fiscal*) if they were received by a resident of France and shall have the right to a payment from the French Treasury of an amount equal to this tax credit (*avoir fiscal*), subject to deduction of the tax.
- The 10% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
- The 20% rate applies to royalties, and the 10% rate applies to technical assistance.
- The 7% rate applies to literary, artistic, and scientific work copyright royalties, and the 10% rate applies in other cases.
- The 5% rate applies to interest in the case of banks, and the 10% rate in other cases.
- The 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment. The 10% rate applies in other cases.

22. The 4.95% rate applies to interest in the case of banks and insurance companies. The 10% rate applies to the aforesaid entities when the payment is carried out by banks. The 15% applies in other cases.
23. No withholding applies when the beneficial owner is a company whose capital is totally or partially divided into shares and controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
24. The 5% rate applies to patent royalties and to industrial, commercial, and scientific equipment royalties, the 7% rate applies to trademark royalties, and the 10% rate applies to literary, artistic, and scientific work copyright royalties.
25. The 5% rate applies if the beneficial owner is a company that directly controls at least 10% of the company paying the dividends.
26. The 12% rate applies in the case of royalties, and the 9% rate applies to technical assistance.
27. The 12% rate applies in the case of royalties, and the 10% rate applies to technical assistance.
28. The 10% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends and has invested in this company not less than the equivalent to USD 100,000. The 15% rate applies in all other cases.
29. The 15% rate applies to royalties, and the 10% rate applies to technical assistance.
30. No withholding applies when the beneficial owner is a company whose capital is totally or partially divided into shares and controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
31. The 4.95% rate applies to interest in the case of banks. The 10% rate applies in other cases.
32. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
33. The 10% rate applies to literary, artistic, and scientific work copyright royalties, and the 7% rate applies in other cases.
34. No withholding applies when the beneficial owner is a company that controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
35. No withholding applies when the beneficial owner is a company that controls at least 10% of the capital of the company paying the dividends. The 10% rate applies in other cases.
36. The 5% rate applies to patent and trademark literary, artistic, or scientific work copyrights, including films, and the 7% rate applies in other cases.
37. The 5% rate applies if the beneficial owner is a company that owns at least 10% of the voting stock of the company paying the dividends. The 15% rate applies in other cases.
38. The 4.95% rate applies to interest to financial institutions (including insurance companies), and the 10% applies in other cases.
39. The 5% rate applies to industrial, commercial, and scientific equipment royalties, and the 10% rate applies in other cases.
40. The 5% rate applies if the beneficial owner is a company that controls at least 10% of the capital of the company paying the dividends. The 10% rate applies in other cases.
41. The Article also includes technical assistance.

The treaty with Brazil has been published in the Official Gazette and signed by the contracting parties but has not entered into force since diplomatic notes have not been exchanged.

Treaties with additional countries are being negotiated.

Tax administration

Taxable period

Taxable years may not exceed 12 months, but the first year may be less than 12 months. Taxpayers engaged in commercial, industrial, or service activities may choose a taxable year that does not coincide with the calendar year. A taxpayer that makes such an election may only change it after obtaining prior authorisation from the tax authorities. All other taxpayers are required to conform their taxable year to the calendar year.

Tax returns

Final tax returns must be filed within three months following the end of the tax year or at the date indicated on the corresponding calendar for those designated as a 'special taxpayer' by the tax authorities. The system is one of self-assessment.

Payment of tax

The total amount of tax due must be paid at the time of filing the annual return. Estimated tax payments must be paid consecutively in six monthly instalments. Companies engaged in mining, hydrocarbon exploitation, and related activities must make 12 equal monthly estimated tax payments.

Venezuela

Penalties

Fines for omitted taxes when assessed as a result of tax audits range from 100% to 300% of the omitted tax. The tax authorities generally assess the average fine (200%) unless aggravating or mitigating circumstances apply.

Fines are reduced to 30% if assessment is accepted within a specific timeframe.

Fines are adjusted according to the value of the Tax Unit.

Late payment interest is 1.2 times the average banking lending rate considering the six major banks.

Tax audit process

According to the Master Tax Code, the tax administration is entitled to review the existence of a taxpayer's liability, whether it has been reported or not. In exercising this power, the tax administration is entitled to obtain and verify information in connection with a determined tax liability. Verifications may be carried out on the basis of available information or on a presumptive basis if concrete information is not available.

Statute of limitations

According to the Master Tax Code, the statute of limitations for tax liabilities is six years starting to run on 1 January of the year following the tax period involved. Regarding taxes that are assessed by periods (e.g. income tax and VAT), it is understood that the taxable event occurs at the end of such period. Exceptionally, the statute of limitations is extended to ten years in any of the following circumstances: (i) the taxpayer fails to declare the taxable event or submit the relevant returns; (ii) the taxpayer does not comply with its obligation to register with the tax administration; (iii) the tax administration was not able to become aware of the taxable event; (iv) the taxpayer has extracted from the country property that is subject to the payment of the tax liability or if the tax liability is related to taxable events occurring abroad; or (v) the taxpayer does not keep its accounting in accordance with the relevant standards.

Topics of focus for tax authorities

Tax audits are generally focused on 'special taxpayers'. The main subjects of focus of tax audits on corporate taxpayers are related to compliance of formal obligations for direct and indirect taxes and transfer pricing.

Other issues

Sample corporate tax calculation

Taxable income (manufacturing company)	VEF	560,000.00
Divided by the value of the TU (VEF 177/1 TU)	VEF	177
Taxable income in TU	TU	3,163.84
Tax thereon:

Net Income tax payable in VEF *	VEF	66,500.00

* Multiplied by the TU value, (i.e. VEF 177/1 TU)

Exchange control

In January 2003, the Venezuelan government and the Venezuelan Central Bank (VCB) restricted the free trade of foreign currency and established an Exchange Control Regime, which is currently administered by the VCB and the National Center of Foreign Commerce (CENCOEX). On 10 March 2016, a new dual foreign exchange system was enacted by Exchange Agreement N° 35, which provides the following:

- DIPRO, a protected exchange rate that is set at VEF 10 to USD 1 for, among other transactions, imports of food, medicines, basic goods for the country, and for payments of the foreign public debt.
- DICOM (also called the complementary dollar system), a floating complementary exchange rate that will fluctuate with the market. This system will apply to most other areas, such as sale foreign currency by basic industries and non-oil public entities, international institutions with which international agreements have been entered into, where the DICOM exchange rate will be reduced by 0.25%. It also applies to Venezuelan tourists and, in general, to transactions not specified in Exchange Agreement N° 35.
- A reduction of 0.25% will apply to any of the exchange rates applicable to sales of foreign currency derived from hydrocarbon exports and/or sales by the PDVSA derived from financing, financial instruments, cash capital contributions, asset sales, hydrocarbon exports and/or sales, dividends received, debt collection, service provision, and any other sources.
- The Marginal Currency System (SIMADI) provided in Exchange Agreement N° 33 dated 10 February 2015, is to continue to operate temporarily until its replacement in a maximum term of 30 days after the enactment of Exchange Agreement N° 35.
- Exchange Agreement N° 26, which provides for the Supplementary System for the Administration of Foreign Currency (SICAD) auction process at the awarded exchange rate carried out on a call-to-tender basis, limited to entities and sectors specified in the invitations to tender, was not abrogated.

The Law on the Currency Exchange Regime and Currency Exchange Violations is in effect, thereby establishing the actions that constitute exchange crimes and their respective penalties. Said penalties may be both criminal and pecuniary.

Significant developments

As of 1 January 2016, the standard corporate income tax (CIT) rate has been reduced from 22% to 20%.

Some of the other recent changes to the tax system have focused on easing the administrative burden placed on companies (e.g. the requirements for quarterly corporate tax filing and the submission of excessive supporting documents with value-added tax [VAT] returns have been relaxed).

CIT reductions and other favourable legislative changes in recent years are impacting the state budget and leading to strong audit and enforcement activities. A focus point of tax audits has been tax incentives.

Vietnam's transfer pricing environment continues to develop, with a steady increase in tax audit activity in this area. In late 2015, specialist transfer pricing teams were established in the tax authorities in four key provinces (Ho Chi Minh City, Hanoi, Binh Duong, Dong Nai), which will be tasked, *inter alia*, with conducting transfer pricing focused investigations of companies, as well as dealing with Mutual Agreement Procedure cases and Advance Pricing Agreements (APAs). Vietnam's APA regime continues to emerge, with three official submissions made to date (all bilateral) and these now being under review.

An amended law on VAT, special sales tax (SST), and tax administration was approved in April 2016 and becomes effective from 1 July 2016. A welcome change is the interest on late tax payment reduces from 0.05%/day to 0.03%/day (approximately from 18% to 11% *per annum*). Less favourable changes include a tougher anti-avoidance rules for SST purposes, which will result in a higher taxable price in many instances, and the removal of the ability to obtain VAT refunds where taxpayers have accumulated input VAT outstanding for 12 months or more (except for exporters and taxpayers that have new investment projects). Detailed guidance on changes is in process.

Please note that Vietnam and the United States (US) have signed a tax treaty. While the treaty is still to be ratified in each country, it will likely be an incentive to direct investment from the United States.

Taxes on corporate income

Standard rates

All taxes are imposed at the national level. The standard CIT rate is 20% as of 1 January 2016 (previously 22%). Enterprises operating in the oil and gas industry are subject to CIT rates ranging from 32% to 50%, depending on the location and specific project conditions. Enterprises engaging in prospecting, exploration, and exploitation of

mineral resources (e.g. silver, gold, gemstones) are subject to CIT rates of 40% or 50%, depending on the project's location.

There is no concept of tax residency for CIT. Business organisations established under the laws of Vietnam are subject to CIT and taxed on worldwide income. 20% CIT shall be applicable to foreign income. There are no provisions for tax incentives for such income.

Foreign organisations carrying out business in Vietnam without setting up a legal entity in Vietnam and/or having Vietnam-sourced income are considered foreign contractors, irrespective of whether the services are performed inside or outside Vietnam. Payments to foreign contractors are subject to Foreign Contractor Tax (FCT), which consists of VAT and CIT elements. *See the Withholding taxes section for more information.*

Preferential rates

Preferential CIT rates of 10%, 15%, and 17% are available where certain criteria are met. *See the Tax credits and incentives section for more information.*

Calculation of taxable profits

Taxable profit is the difference between total revenue, whether domestic or foreign sourced, and deductible expenses (*see the Deductions section*), plus other assessable income.

Taxpayers are required to prepare an annual CIT return that includes a section for making adjustments between accounting profits and taxable profits.

Local income taxes

There are no local, state, or provincial income taxes in Vietnam.

Corporate residence

There is no concept of tax residency for CIT. Enterprises established under the law of Vietnam are subject to CIT in Vietnam. In addition, Vietnam has a broadly worded 'permanent establishment' definition.

Permanent establishment (PE)

In Vietnam, a PE is defined as "a fixed place of business through which a foreign enterprise carries out part or the whole of its business or production activities in Vietnam. The PE of a foreign enterprise shall include:

- A branch, an operating office, a factory, a workshop, means of transportation, a mine, an oil and gas field, or any place relating to the exploitation of natural resources in Vietnam.
- A building site; a construction, installation, or assembly project.
- An establishment providing services, including consultancy services, through its employees or other persons.
- An agent for a foreign enterprise.
- A representative in Vietnam where [one] has authority to sign contracts under the name of the foreign enterprise, or where [one] does not have authority to sign contracts under the name of the foreign enterprise but regularly delivers goods or provides services in Vietnam."

Foreign enterprises with their PEs in Vietnam shall pay tax on the taxable income earned in Vietnam (irrespective of whether it relates to the PE) and on the taxable income generated out of Vietnam and related to operations of the PEs.

Vietnam

Where a treaty on avoidance of double taxation to which Vietnam is a signatory contains different provisions relating to PE, such treaty shall apply (*see the Withholding taxes section for a list of countries with which such treaties exist*).

Other taxes

Value-added tax (VAT)

VAT applies to goods and services used for production, trading, and consumption in Vietnam (including goods and services purchased from non-residents), with certain exemptions. Depending on the category of goods or services, the VAT rates are as follows:

- A 0% rate applies to exported goods/services, including goods sold to overseas/non-tariff areas and consumed outside Vietnam/in the non-tariff areas, goods processed for export or in-country export (subject to conditions), goods sold to duty free shops, certain exported services, construction and installation carried out for export processing enterprises, and aviation, marine, and international transportation services.
- A 5% rate applies generally to areas of the economy concerned with the provision of essential goods and services. This includes clean water, teaching aids, books, unprocessed foodstuffs, medicine and medical equipment, husbandry feed, various agricultural products and services, technical/scientific services, rubber latex, sugar and its by-products, social housing, and certain cultural, artistic, and sport services/products.
- The 10% 'standard' rate applies to activities not specified as exempt or subject to the 0% or 5% rate.

Activities not subject to output VAT

A separate category includes supplies not subject to output VAT, but related input VAT can, nevertheless, be claimed. This category includes the following:

- Compensation, bonus, subsidies (except those provided in exchange for certain services).
- Transfers of emission rights and various financial revenues.
- Certain services rendered by a foreign organisation that does not have a PE in Vietnam where the services are rendered outside of Vietnam, including repairs to means of transport, machinery, or equipment, advertising, marketing, promotion of overseas investment and trade, brokerage activities for the sale of overseas goods and services, training, and certain international telecommunication services.
- Sales of assets by non-business organisations or individuals not registered for VAT.
- Transfer of investment projects.
- Sale of agricultural products that have not been processed into other products or have only been through preliminary processing.
- Capital contributions in kind.
- Certain asset transfers between a parent company and its subsidiaries or between subsidiaries of the same parent company.
- Collections of compensation/indemnities by insurance companies from third parties.
- Collections on behalf of other parties that are not related to the provision of goods/services (e.g. if company A purchases goods/services from company B but pays to company C, and, subsequently, company C pays to company B, then the payment from company C to company B is not subject to VAT).
- Commissions earned by (i) agents selling services, including postal, telecommunications, lottery, airlines/bus/ship/train tickets, at prices determined by principals; and (ii) agents for international transportation, airlines, and shipping services entitled to 0% VAT; or (iii) insurance agents.
- Commissions from the selling of exempt goods/services.
- Lending or return of machinery, equipment, goods.

- Goods exported and then re-imported back to Vietnam due to sales returns by overseas customers.

Exempt goods and services

There are stipulated categories of VAT exemptions, including goods/services provided by individuals having annual revenue of 100 million Vietnamese dong (VND) or below, transfer of land use rights, various financial services, capital assignments, certain types of insurance, medical services, education, printing/publishing, public transportation, export of unprocessed natural resources, etc.

When a supply cannot be readily classified based on the tax tariff, VAT must be calculated based on the highest rate applicable for the particular range of goods that the business supplies.

Taxpayers must file VAT returns on a monthly basis by the 20th day of the subsequent month or on a quarterly basis by the 30th day of the subsequent quarter (for companies with prior year annual revenue of VND 50 billion or less).

Customs duties

Import duty rates are classified into three categories: ordinary rates, preferential rates, and special preferential rates.

Preferential rates are applicable to imported goods from countries that have most-favoured-nation (MFN, also known as normal trade relations) status with Vietnam. The MFN rates are in accordance with Vietnam's World Trade Organization (WTO) commitments and are applicable to goods imported from other member countries of the WTO.

Special preferential rates are applicable to imported goods from countries that have a special preferential trade agreement with Vietnam. Vietnam has such free trade agreements with various countries, including the ASEAN member states, Japan, China, India, Korea, Chile, Australia, and New Zealand, and has finished conclusion of negotiations with the Customs Union of Russia, Belarus, Kazakhstan.

Import duty exemptions are provided for encouraged projects and goods imported in certain circumstances.

Export duties are charged only on a few items, basically certain natural resources. Rates range from 0% to 40%.

Special sales tax (SST)

SST is a form of excise tax that applies to selected goods and services (see below). For goods, SST is charged at the production or importation stage. Imported goods (except for various types of petrol) are subject to SST at both import and selling stages. The SST paid at importation will be creditable against SST paid at the selling stage.

The SST rates are as follows:

Products/services	SST rate (%)
Cigar/cigarette:	
From 1 January 2016 to 31 December 2018	70
From 1 January 2019	75
Spirit/wine:	
With ABV \geq 20°	
From 1 January 2016 to 31 December 2016	55
From 1 January 2017 to 31 December 2017	60
From 1 January 2018	65

Vietnam

Products/services	SST rate (%)
With ABV < 20°	
From 1 January 2016 to 31 December 2017	30
From 1 January 2018	35
Beer:	
From 1 January 2016 to 31 December 2016	55
From 1 January 2017 to 31 December 2017	60
From 1 January 2018	65
Automobiles having less than 24 seats	10 to 60
Motorcycle of cylinder capacity above 125cm ³	20
Airplanes	30
Boats	30
Petrol	7 to 10
Air-conditioners (not more than 90,000 BTU)	10
Playing cards	40
Votive paper	70
Discotheques	40
Massage, karaoke	30
Casinos, jackpot games	35
Entertainment with betting	30
Golf	20
Lottery	15

Property taxes

Foreign investors generally pay rental fees for land use rights. The range of rates is wide depending upon the location, infrastructure, and the industrial sector in which the business is operating.

In addition, owners of houses and apartments have to pay land tax under the law on non-agricultural land use. The tax is charged on the specific land area used based on the prescribed price per square metre at progressive tax rates ranging from 0.03% to 0.15%.

Stamp taxes

Certain assets, including houses, land, automobiles and motorcycles, etc., that are subject to registration of ownership are subject to stamp duty. The stamp duty rates vary depending on the asset transferred.

Natural resources tax (NRT)

NRT is payable by industries exploiting Vietnam's natural resources, such as petroleum, minerals, forest products, seafood, and natural water. Natural water used for agriculture, forestry, fisheries, salt industries, and sea water for cooling purposes may be exempt from NRT, provided that certain conditions are satisfied. The tax rates vary depending on the natural resource being exploited, ranging from 1% to 40%, and are applied to the production output at a specified taxable value per unit. Various methods are available for the calculation of the taxable value of the resources, including cases where the commercial value of the resources cannot be determined. Crude oil, natural gas, and coal gas are taxed at progressive tax rates depending on the daily average production output.

Environment protection tax (EPT)

EPT is an indirect tax that is applicable to the production and importation of certain goods deemed detrimental to the environment, the most significant of which are petroleum and coal. The tax is calculated as an absolute amount on the quantity of the goods.

The tax rates are as follows:

Goods	Unit	Tax range (VND)
Petrol, diesel, grease, etc.	litre/kg	900 to 3,000
Coal	ton	10,000 to 20,000
HCFC	kg	4,000
Plastic bags *	kg	40,000
Limited usage chemicals	kg	500 to 1,000

* Excludes plastic bags used for packaging or that are 'environmentally friendly'.

Payroll taxes

Social insurance (SI) contributions

The level of compulsory SI contribution is 26% of total salary, of which 18% is the employers' obligation and the remaining 8% is the employees' obligation. The salary subject to SI contribution is the salary stated in the labour contract, but is capped at 20 times the minimum regional salary (the minimum salary is currently VND 1,150,000 and the minimum regional salary varies from VND 2,150,000 to VND 3,100,000, depending on each region; these minimum salaries are subject to change).

Health insurance (HI) contributions

HI contribution rates are 4.5% of total salary, with two-thirds contributed by the employer and one-third by the employee.

Unemployment insurance (UI) contributions

The employer and employee UI contributions are 1% on gross salary each. The employee contribution is capped at 20 times the minimum salary.

Branch income

Branches of foreign entities are subject to the same CIT regime as entities incorporated in Vietnam.

Income determination

Inventory valuation

At present, there are no provisions for valuing inventories or determining inventory flows. The tax treatment follows the accounting treatment.

Asset revaluation

Gains from the revaluation of assets for the purposes of capital contribution or transfer upon division, demerger, consolidation, merger, or conversion of business are subject to the standard CIT rate.

Capital gains

Gains made by a foreign investor on the transfer of an interest (as opposed to shares) in a limited liability company are subject to the standard CIT rate. The assignee is required to withhold the tax due from the payment to the assignor and account for this to the tax authorities.

Gains earned by a foreign investor from selling securities (i.e. bonds, shares of public joint-stock companies, irrespective of whether they are listed or non-listed) are subject to CIT at a deemed rate of 0.1% of the sales proceeds. The standard CIT rate will apply

Vietnam

to any gains earned by a foreign company (not incorporated in Vietnam) upon a sale of shares in a non-public joint-stock company.

Dividend income

Dividends received from investments in other companies in Vietnam are from after tax profits and are not subject to CIT.

Interest income

Interest income is subject to the standard CIT rate and is not entitled to tax incentives (including preferential tax rate and exemption/reduction).

Other significant items

The following other income items are subject to the standard CIT rate and are not entitled to tax incentives (including preferential tax rate and exemption/reduction):

- Income from transfer of real estate.
- Income from royalty, leasing of assets.
- Income from transfer of assets.
- Income from trading of foreign currency.
- Reversal of provisions, except for reversal of provisions for inventory devaluation, financial investment loss, bad debts, warranties, and salary.
- Collected written-off debts.
- Unidentified payables.
- Difference between penalties and compensation for breaching economic contracts.
- Gain from the revaluation of assets.
- Income from the transfer of projects and the rights to exploit, explore, and process minerals.
- Income from selling scrap, which is not directly related to tax incentivised activities.
- Exchange gains on revaluation of payables denominated in foreign currencies at the end of the fiscal year.

Foreign income

Foreign income, under the domestic tax law, is subject to the standard CIT rate with tax credits available (*see Foreign tax credit in the Tax credits and incentives section*).

Foreign income shall be taxed when earned. There are no provisions for tax deferral or preferential tax rates for foreign income.

Deductions

Depreciation and amortisation

Tax depreciation may differ from accounting depreciation. Depreciation in excess of the rates specified in the regulations on tax depreciation is not deductible. These regulations specify maximum and minimum permissible effective lives for various classes of assets, including intangibles. Current straight-line tax depreciation rates are as follows:

Assets	Rate (%)
Buildings	2 to 16.67
Office equipment	10 to 20
Automobiles	3.33 to 16.66
Machinery and equipment	5 to 33.33
Intangible assets	Not more than 5
Goodwill	33.33

Start-up expenses

Pre-establishment expenses (i.e. expenses for setting up a company) and certain expenses (i.e. training, advertising before establishment, costs for the research stage, relocation cost) can be amortised over a period of up to three years from the commencement of operations. In order for pre-establishment and pre-operating expenses to be deductible for CIT purposes, supporting documents to substantiate the fact that these pre-operating expenses were necessarily and legitimately incurred for the establishment of the company should be available.

Interest expenses

Interest on loans corresponding to the portion of charter capital not yet contributed as scheduled is not deductible.

Interest on loans from non-economic and non-credit organisations exceeding 1.5 times the interest rate set by the State Bank of Vietnam is not deductible.

Bad debt

Provisions for bad debts are deductible if the provision is made in accordance with the guidance by the Ministry of Finance. Certain conditions must be satisfied in order to set up a provision for bad debts (e.g. the debts must be supported by original documentation, there must be confirmation from clients of the overdue amounts, the debts must be overdue under the terms of an economic contract). In the absence of satisfying the necessary conditions, the provision for bad debts will generally not be deductible until incurred and supported by invoices.

Charitable contributions

Donations are generally non-deductible, except certain donations for education, health care, natural disasters, building charitable homes for the poor, or scientific research.

Fines and penalties

Administrative penalties and fines are specifically considered non-deductible.

Taxes

Creditable input VAT, CIT, and other fees/charges are not deductible for CIT purposes.

Other significant items

The following other expenditures are specifically stated to be non-deductible:

- Employee remuneration expenses that are not actually paid or are not stated in a labour contract, collective labour agreement, or the financial regulations of the company.
- Staff welfare (including certain benefits provided to family member of staff) exceeding a cap of one month's average salary.
- Provisions for severance allowance (except for companies not subject to mandatory unemployment insurance contributions) and payments of severance allowance in excess of the prescribed amount per the Labour Code.
- Contributions to voluntary pension funds and the purchase of voluntary pension for employees exceeding VND 1 million per month per person.
- The portion of costs of raw materials, materials, fuel, or goods that are used in excess of reasonable consumption levels.
- Reserves for research and development (R&D) that is not in accordance with the prevailing regulations.
- Provisions for stock devaluation, bad debts, financial investment losses, product warranties, or construction work that are not in accordance with the prevailing regulations.
- Unrealised foreign exchange gain/losses due to the revaluation of foreign currency items other than account payables at the end of a financial year.

Vietnam

- Management expenses allocated to PEs in Vietnam by the foreign company's head office that are not in accordance with the regulations.
- Certain expenses directly related to the issuance, purchase, or sale of shares.

From 2015, the cap on the tax deductibility of advertising and promotion (A&P) expenses has been abolished.

For certain businesses (e.g. insurance companies, securities trading, lotteries), the Ministry of Finance provides specific guidance on deductible expenses for CIT purposes.

Net operating losses

Losses may be carried forward fully and consecutively for a maximum of five years. Carryback of losses is not permitted.

Payments to foreign affiliates

There are no special restrictions on the deductibility of royalties, loan interest, and service fees paid to foreign affiliates (except for those paid by branches). However, the payment must be defensible on an arm's-length basis as required by transfer pricing regulations (*see Transfer pricing in the Group taxation section*). Certain contracts for the transfer of technology and foreign loans must be registered with the competent authorities.

Group taxation

There is no provision for any form of consolidated filing or group loss relief in Vietnam.

Transfer pricing

Vietnam has transfer pricing regulations that outline various situations where transactions will be considered as being between related parties and the mechanisms for determining the market 'arm's length' transaction value (e.g. comparable uncontrolled price, cost plus, resale price, comparable profits, profit split).

Under the wide ranging definition of associated parties, the control threshold is lower than in many other countries (20%), and the definition also extends to certain significant supplier, customer, and funding relationships between otherwise unrelated parties. Vietnam's transfer pricing rules also extend to domestic related-party transactions.

Compliance requirements include an annual declaration of related-party transactions and transfer pricing methodologies used, which is required to be filed together with the annual CIT return.

Companies that have related-party transactions must prepare and maintain contemporaneous transfer pricing documentation, which is required to be submitted to the tax authorities within 30 working days of a request, in Vietnamese. There are no *de minimis* rules for documentation.

All Vietnamese taxpayers with related-party transactions (including domestic transactions) can apply for an Advance Pricing Agreement (APA) to cover either one or more of their transactions with related parties.

Thin capitalisation

There are no thin capitalisation requirements in the tax legislation. However, the level of permitted debt funding will be limited by virtue of licensing requirements. The maximum amount of debt funding is the difference between the licensed investment capital and charter capital.

Controlled foreign companies (CFCs)

Vietnam does not have any CFC legislation.

Tax credits and incentives**Foreign tax credit**

In respect of Vietnamese enterprises earning income from overseas investment, CIT (or a kind of tax with a nature similar to CIT) paid in a foreign country or paid on behalf by its partner in the country receiving the investment (including tax levied on the dividend) is allowed to be creditable. The credit shall not exceed the CIT amount payable in Vietnam.

The foreign income tax that is entitled to exemption or reduction in accordance with the foreign law shall also be credited.

Inbound investment incentives

Tax incentives are granted based on regulated encouraged sectors, encouraged locations, and size of the projects. The sectors that are encouraged by the Vietnamese government include education, health care, sport/culture, high technology, environmental protection, scientific research, infrastructural development, and computer software manufacturing. The encouraged locations include qualifying economic and high-tech zones, certain industrial zones, and difficult socio-economic areas. Large manufacturing projects with investment capital of more than VND 6 trillion disbursed within three years of being licensed can also qualify for CIT incentives if:

- the minimum revenue is VND 10 trillion *per annum* by the fourth year of operations at the latest, and
- the minimum headcount is 3,000 by the fourth year of operations at the latest.

The preferential incentive rate applied for large manufacturing projects can be extended for a maximum additional 15 years if the project manufactures goods having 'international competitiveness' whose revenue exceeds VND 20,000 billion *per annum* within five years from the first year of revenue generation, or whose average head count is over 6,000.

Large manufacturing projects include projects with investment capital of VND 12 trillion or more, disbursed within five years of being licensed (excluding those related to the manufacture of products subject to special sales tax or those exploiting mineral resources) and using technologies appraised in accordance with relevant laws.

Further, new investment projects engaging in manufacturing industrial products prioritised for development will be entitled to CIT incentives if the products support:

- the high technology sector, or
- the garment, textile, and footwear; information technology (IT); automobiles assembly; or mechanics sector and were not produced domestically as of 1 January 2015, or, if produced domestically, they meet the quality standards of the European Union (EU) or equivalent.

The two preferential rates of 10% and 17% for 15 years and 10 years, respectively, are available starting from the commencement of operating activities. From 1 January 2016, enterprises entitled to the pre-2016 preferential CIT rate of 20% will enjoy the rate of 17% instead. When the preferential rate expires, the CIT rate reverts to the standard rate. Certain socialised sectors (e.g. education, health) enjoy the 10% rate for the life of the project.

Business expansion projects are now entitled to CIT incentives if any of the following criteria are met:

Vietnam

- Additional fixed assets costing at least VND 20 billion (or VND 10 billion if the projects are in certain specified regions with difficult socio-economic conditions) are invested.
- There is at least a 20% increase in the value of fixed assets compared with the period before expansion.
- There is at least a 20% increase in the designed capacity compared with the period before expansion.

Investment projects are allowed to access more favourable tax incentives available under an amended or new law on CIT for the remaining project period, from tax year 2015. This entitlement is specifically applicable to the following cases:

- Expansion projects licensed or implemented during the period from 2009 to 2013 that were not previously entitled to any CIT incentives.
- Investment projects commencing operations in industrial zones during the period from 2009 to 2013 that were not previously entitled to any CIT incentives.
- Investment projects located in areas that were not previously designated as encouraged.

Tax holidays

Investors may be considered for tax holidays and reductions. The holidays take the form of a complete exemption from CIT for a certain period beginning immediately after the enterprise first makes profits, followed by a further period where tax is charged at 50% of the applicable rate. However, where the enterprise has not derived profits within three years of the commencement of operations, the tax holidays/tax reduction will start from the fourth year of operation. Criteria for eligibility to these holidays and reductions are set out in the CIT regulations as follows:

- Four years of tax exemption and nine subsequent years of 50% reduction shall be applied to:
 - Income earned by enterprises carrying out new investment projects entitled to 10% CIT.
 - Income earned by enterprises carrying out new investment projects in the socialised sectors and difficult socio-economic areas.
- Four years of tax exemption and 50% tax reduction for five subsequent years shall be given to income earned by enterprises carrying out new investment projects in the socialised sectors and in regions not included in the list of difficult socio-economic areas.
- Two years of tax exemption and four subsequent years of 50% reduction shall be applied to:
 - Income earned by enterprises from carrying out new investment projects in regions with difficult socio-economic conditions.
 - Income earned by enterprises from carrying out new investment projects, including production of high-grade steel, production of energy saving products, production of machinery or equipment used to serve agricultural, forestry, fishery, or salt production, production of irrigational equipment, production and refinement of foodstuff for cattle, poultry, or aquatic products, and development of traditional trades.
 - Income earned by enterprises that carry out new investment projects in industrial zones (except for industrial zones located in regions with favourable socio-economic conditions).

Employment incentives

Additional tax reductions may be available for engaging in manufacturing, construction, and transportation activities that employ several female staff and/or ethnic minorities. CIT reduction must correspond with the actual payment for those employees.

Research and Development (R&D) Fund

Business entities in Vietnam are allowed to set up a tax deductible R&D Fund. Enterprises can appropriate up to 10% of annual profits before tax to the fund. Various conditions apply.

Withholding taxes

Foreign Contractor Tax (FCT) is withheld on payments to foreign contractors.

Payments to foreign contractors

FCT on payments to foreign contractors applies where a Vietnamese contracting party (including a foreign-invested enterprise incorporated in Vietnam) contracts with a foreign party that does not have a licensed presence in Vietnam, irrespective of whether the services are provided in Vietnam or overseas.

This FCT generally applies to payments derived from Vietnam, except for the pure supply of goods (i.e. where the responsibility, cost, and risk relating to the goods passes at or before the border gate of Vietnam and there are no associated services performed in Vietnam), services performed and consumed outside Vietnam, and various other services performed wholly outside Vietnam (e.g. certain repairs, training, advertising, promotion).

In addition, certain distribution arrangements where foreign entities are directly or indirectly involved in the distribution of goods or provision of services in Vietnam are subject to FCT (e.g. where the foreign entity retains ownership of the goods; bears distribution, advertising, or marketing costs; is responsible for the quality of goods or services; makes pricing decisions; or authorises/hires other Vietnamese entities to carry out part of the distribution of goods/provision of services in Vietnam).

Foreign contractors can apply to be deduction-method VAT payers if they adopt the Vietnamese accounting system. If accounting records are adequate, the foreign contractor will pay CIT on actual profits, but otherwise on a deemed-profit basis.

For direct (non-deduction-method) foreign contractors, VAT and CIT will be withheld by the contracting party at deemed rates. Various rates are specified according to the nature of the contract performed. For CIT, the FCT rate varies from 0.1% to 10%. For VAT, the FCT rate can also range from 3% to 5%. The VAT withheld by the contracting party is an allowable input credit in its VAT return.

A summary of VAT and CIT FCT rates follow:

Types of payment	Deemed VAT rate (%) (3)	Deemed CIT rate (%)
Supply of goods in Vietnam or associated with services rendered in Vietnam (including in-country import-export and imports, distribution of goods in Vietnam or delivery of goods under Incoterms where the seller bears risk relating to goods in Vietnam)	Exempt (1)	1
Services	5	5
Services together with supply of machinery and equipment (2)	3	2
Restaurant, hotel, and casino management services	5	10
Construction, installation without supply of materials, machinery, or equipment	5	2
Construction, installation with supply of materials, machinery, or equipment	3	2
Leasing of machinery, equipment, and drilling rigs	5	5
Leasing of aircraft and vessels	Exempt (4)	2

Vietnam

Types of payment	Deemed VAT rate (%) (3)	Deemed CIT rate (%)
Transportation	3 (5)	2
Interest	Exempt	5
Royalties	Exempt (6)	10
Insurance	Exempt/5 (7)	5
Re-insurance, commission for re-insurance	Exempt	0.1
Transfer of securities	Exempt	0.1
Financial derivatives	Exempt	2
Other activities	2	N/A

Notes

- VAT will not be payable where goods are exempt from VAT or where import VAT is paid.
- Where the contract does not separate the value of goods and services.
- The supply of goods and/or services to the oil and gas industry is subject to the standard 10% VAT rate. Certain goods or services may be VAT exempt or subject to 5% VAT.
- Where aircraft and vessels cannot be manufactured in Vietnam.
- International transportation is subject to 0% VAT.
- Software licences, transfer of technology, and transfer of intellectual property (IP) rights are VAT exempt.
- Certain types of insurance are exempt from VAT (see *Exempt goods and services under VAT in the Other taxes section*).

Interest

The FCT applied to interest payments to an overseas lender is 5%. Interest on pre-1999 loans may be exempt from FCT. Offshore loans provided by certain government or semi-governmental institutions may obtain an exemption from the interest FCT where a relevant double tax agreement (DTA) or inter-government agreement (IGA) applies.

Interest earned from bonds (except for tax-exempt bonds) and certificates of deposit are subject to 5% FCT. The sale of bonds and certificates of deposits are subject to deemed tax of 0.1% of the gross sales proceeds.

Royalties, licence fees, etc.

A 10% royalty FCT applies in the case of payments made to a foreign party for transfers of technology or software licence, unless the transfers are contributed as part of legal capital (akin to equity). Transfers of technology are defined very broadly. Certain contracts for the transfer of technology must be registered with the competent authorities.

Management fees and head office charges

FCT applies on management fees and head office charges at the rates applicable to services (*see above*).

Cross-border leases

A Vietnam-based lessee is required to withhold tax from payments to an offshore lessor. 5% VAT and 5% CIT is applicable to the rental charge if it is an operating lease. If it is a finance lease, the interest portion will be exempt from VAT and subject to 10% CIT.

Tax treaties

The above FCT rates may be affected by a relevant DTA.

Recipient	Interest (%)	Royalties (%)

Notes

1. The treaty is not yet in force.
2. In most cases, the limits set by the DTA are higher than the present FCT rates under domestic law; consequently, the domestic rates will apply.
3. Interest derived by certain government bodies is exempt from FCT.
4. Royalty FCT rates vary for certain types of royalties.

Tax administration

Taxable period

The standard tax year is the calendar year. However, different accounting year-ends can be used if approval is obtained from the authorities.

Tax returns

The annual final CIT return and the audited financial statements must be filed within 90 days from the end of the financial year.

Payment of tax

Enterprises are required to make quarterly provisional CIT payments (no later than the 30th day of the next quarter) based on estimates. If the provisional quarterly CIT payments account for less than 80% of the final CIT liability, the shortfall in excess of 20% is subject to late payment interest (currently as high as 18% *per annum*), counting from the deadline for payment of the fourth quarter CIT liability.

Final payment of CIT is due with the final CIT return (i.e. the 90th day of the following financial year).

Penalties

There are detailed regulations setting out penalties for various tax offences. These range from relatively minor administrative penalties to tax penalties amounting to various multiples of the additional tax assessed.

In practice, imposition of penalties has been arbitrary and inconsistent. However, in recent periods there has been a much tougher stance adopted by the tax authorities. Hence, where tax is paid late (e.g. as a result of a tax audit investigation), there is a significant likelihood of penalties being imposed.

Tax audit process

Tax audits are carried out regularly and often cover a number of tax years. Prior to an audit, the tax authorities send the taxpayer a written notice of time and scope of the audit inspection.

Statute of limitations

The general statute of limitations for imposing tax is ten years (effective 1 July 2013) and for penalties is five years. Where the taxpayer does not register for tax or commits evasion liable to criminal prosecution, the tax authorities can collect unpaid tax and penalties at any time.

Topics of focus for tax authorities**Transfer pricing**

Transfer pricing is commonly discussed in the press, and the enterprises that are attracting the attention of the tax authority are generally multinational companies that have many inter-company transactions, have reported losses for many years, and/or are expanding businesses.

Documentation of expenses

The tax authorities are strictly reviewing the documentation of expenses, including contracts, invoices, evidence of work done/benefit received, etc. Insufficient documentation is resulting in disallowance of input VAT credit/refund and CIT deductibility.

FCT on supply of goods

The customs authority has been requested to provide the tax authority with information of companies engaged in in-country import/export transactions in an effort to collect under-declared FCT arising from these transactions. In addition, there are some tax rulings issued by the tax authority stating that existence of a warranty clause in a contract for the supply of goods by foreign suppliers, irrespective of whether the warranty services have been actually provided, creates an FCT exposure.

Secondment arrangements

We have seen the tax authority seek to impose FCT on reimbursements of expatriate remuneration costs by Vietnamese entities. Companies need to ensure that supporting documents are available to show amounts have been reimbursed at cost.

Other issues**Foreign investment restrictions**

In several fields, foreign investment will not be licensed or will only be licensed under special conditions. The List of Conditional Investment Sectors include television, production and publishing cultural products, telecommunication, transportation by all means, cigarette production, exploring and processing natural resources, real-estate business, education, and medical services and distribution.

Exchange controls

All buying, selling, lending, and transfer of foreign currency needs to be made through credit institutions and other financial institutions authorised by the State Bank of Vietnam (SBV).

Outflow of foreign currency by transfer is authorised for certain transactions, such as payments for imports and services abroad, refund of loans contracted abroad and payment of interest accrued thereon, transfer of profits and dividends, and revenues from transfer of technology.

Vietnam

All monetary transactions in Vietnam must be undertaken in Vietnamese dong. Exceptions are applicable to payments for exports made between principals and their agents, and payments for goods and services purchased from institutions authorised to receive foreign currency payments such as for air tickets, shipping and air freight, insurance, and international communications.

Forms of doing business

According to the Law on Enterprises, a foreign-invested enterprise may be established as either a single member limited liability or a limited liability with more than one member, a joint-stock company, or a partnership.

Intellectual property (IP)

IP rights are protected by the Civil Code (1995 and 2005), the Law on Intellectual Property (2005), and a host of subordinate legislation.

Vietnam is signatory to the Paris Convention, the Madrid Agreement on International Trademark Registration, and the Patent Cooperation Treaty, and is a member of the World Intellectual Property Organisation. Vietnam has entered into an agreement on copyrights with the United States. According to the Vietnam-US Bilateral Trade Agreement, Vietnam is further under the obligation to adhere to the Berne Convention.

Significant developments

Since the 2016 Budget, the following measures have been put in place:

- Capital allowances for implements, plant, and machinery used in the generation of electricity have been increased from 25% to 50% with effect from 1 January 2016.
- The carryover period of losses for entities involved in the generation of electricity using wind and solar power, excluding wood, has been extended from five years to ten years.
- A holder of a mining licence shall pay a mineral royalty at the rate of 9% for open cast mining operations and 6% for underground mining operations. *For more information, see Mineral Royalty Tax in the Taxes on corporate income section.*
- With effect from 1 July 2015, the corporate income tax (CIT) rate for mining operations has increased from 0% to 30%, with a variable profit tax of up to 15%. This effectively re-instates the CIT position applying before 1 January 2015.
- CIT applicable on mineral processing companies was revised from 30% to 35%, and variable profit tax on mineral processing was abolished.
- From 1 January 2016, Property Transfer Tax (PTT) will apply at the rate of 5% of the realised value in respect of land and shares. This was previously 10%.
- From 1 January 2016, withholding tax (WHT) will apply at 15% on management and consultancy services provided by resident consultants. This was previously 0%.

Taxes on corporate income

Under the Income Tax Act, Zambia has a source-based system for the taxation of income. Income deemed to be from a Zambian source is generally subject to Zambian income tax. Zambian residents are also subject to income tax on interest and dividends from a source outside Zambia.

A non-Zambian resident enterprise with a Zambian permanent establishment (PE) will be subject to CIT on its Zambian-source income. If there is no PE, Zambian-source income of the non-Zambian resident may still be subject to WHT (*see the Withholding taxes section*).

The standard CIT rate applicable to the income of companies (and other persons other than individuals) is 35%.

The following sources of income are subject to different CIT rates:

Source of income	CIT rate (%)
Electronic communications networks or service licensees (income in excess of 250,000 Zambian kwacha [ZMW])	40
Farming	10
Export of non-traditional products	15
Production of organic fertiliser and chemical manufacture of fertiliser	15

Zambia

The rates applicable for mining operations (excluding industrial minerals) are as follows:

Tax on mining operations* (excluding industrial minerals**)	1 January 2015 to 30 June 2015	From 1 July 2015
CIT rate	0%	30%
Additional variable profits rate	0%	a - (ab/c)***

The rates applicable for mining operations for industrial minerals are as follows:

Tax on mining operations* for industrial minerals	1 January 2015 to 30 June 2015	From 1 July 2015
CIT rate	30%	30%
Additional variable profits rate	a - (ab/c)***	a - (ab/c)***

The CIT rate of 35% is applicable on income from mineral processing****.

Notes

* Mining operations means an operation carried out under a mining right, excluding an operation carried out under a mineral processing licence only or an exploration licence.

** Industrial minerals include rocks or minerals other than gemstones, base metals, energy minerals, or precious metals used in their natural state or after physical or chemical transformation, including barites, dolomite, feldspar, fluor spar, graphite, gypsum, ironstone when used as a fluxing agent, kyanite, limestone, phyllite, magnesite, mica, nitrate, phosphate, pyrophyllite, salt, sand, clay, talc, laterite, gravel, potash, potassium minerals, granite, marble, clay, silica, diatomite, kaolin, bentonite, or quartz.

*** a = 15%; b = 8%; and c = the percentage ratio of the assessable income to gross sales.

**** Mineral processing means the practice of beneficiating or liberating valuable minerals from their ores, which may combine a number of unit operations, such as crushing, grinding, sizing, screening, classification, washing, froth floatation, gravity concentration, electrostatic separation, magnetic separation, leaching, smelting, refining, calcining, and gasification or any other processes incidental thereto.

Reductions in CIT rates apply to a company operating under a priority sector declared under the Zambian Development Agency Act (ZDA Act), 2006.

Reduced CIT rates apply in some other cases, including certain companies listed on the Lusaka Stock Exchange.

Mineral Royalty Tax

From 1 January 2016, Mineral Royalty Tax applies to holders of mining licences as follows:

Description	Rate (%)
On norm value of minerals/precious metals under licence:	
Underground mining operations	6
Open cast mining operations	9
On gross value of gemstones/energy minerals under licence:	
Underground mining operations	6
Open cast mining operations	9
On gross value of industrial minerals	6
On norm value of minerals/precious metals without licence:	
Underground mining operations	9
Open cast mining operations	9
On norm value of gemstones/energy minerals without licence:	
Underground mining operations	9

Description	Rate (%)
Open cast mining operations	9

Local income taxes

There are no income taxes imposed by the local authorities on businesses.

Corporate residence

A person other than an individual will be resident in Zambia if it is incorporated or formed under the laws of Zambia or if the central management and control is exercised in Zambia.

Permanent establishment (PE)

Broadly, a non-Zambian resident may have a Zambian PE if it has a fixed place of business in Zambia or if it has a dependent agent that has and habitually exercises the authority to conclude contracts in Zambia.

The Zambian definition of a PE is generally similar to the Organisation for Economic Co-operation and Development (OECD) definition and contains a similar list of activities that are included and excluded from the definition of a fixed place of business.

The definition of a PE includes the furnishing of services, including consultancy services, by an enterprise through employees or other personnel present in Zambia for a period or periods exceeding, in aggregate, 90 days in any 12-month period commencing or ending in the fiscal year concerned.

Where a relevant double tax treaty (DTT) is in force, the definition of a PE in the treaty should take precedence over the Zambian domestic legislation in a case where the non-Zambian resident enterprise does not have a PE under the treaty definition.

Other taxes

Value-added tax (VAT)

The VAT rate is 16% and is applicable to supplies of standard-rated goods and services.

The export of goods from Zambia is zero rated. However, the supply of standard-rated services from a Zambian place of business is subject to VAT at 16% whether the customer is a Zambian resident or a non-Zambian resident.

Standard-rated goods imported to Zambia are subject to import VAT at 16%.

The supply of standard-rated services to customers in Zambia by a non-Zambian supplier is subject to VAT. The non-Zambian supplier can appoint a local tax agent to account for this as output VAT; this procedure enables the Zambian customer to reclaim the corresponding input VAT. Otherwise, the Zambian VAT-registered customer would be required to account for the output VAT referred to as 'reverse charge VAT'; in this instance, however, there is no mechanism for the Zambian customer to recover reverse charge VAT.

Customs duties

Goods imported into Zambia are generally subject to customs duties.

Excise taxes

Certain goods and services, such as alcoholic drinks, tobacco, and mobile communications talk time, are subject to excise duty at the following rates.

Zambia

Item	Rate (%)
Alcoholic drinks:	
Less than 80% by volume	60
80% or higher by volume	125
Tobacco	145
Telephone airtime	15

Property taxes

Zambia does not have a property tax other than Property Transfer Tax (*see below*).

Property Transfer Tax (PTT)

PTT applies to the value of the transfer of land and buildings in Zambia and transfer of shares issued by a company incorporated in Zambia.

The rate of PTT is 5% with effect from 1 January 2016 (previously 10%) and is payable on the open market value (or normal value of shares if greater). The PTT liability is payable by the vendor.

PTT also applies on the transfer of a mining right at the rate of 10%.

Stamp taxes

Zambia does not have a stamp tax.

Turnover taxes

Turnover tax applies to certain businesses where the turnover is less than ZMW 800,000 *per annum*. The applicable rate is 3% of turnover. Income that is subject to turnover tax will not be subject to income tax or VAT.

The definition of 'turnover' for turnover tax purposes has been amended to clearly exclude interest, rental income, dividends, and royalties.

Registration taxes

The Patents and Companies Registration Agency (PACRA) applies a registration fee of 2.5% to increases and reductions in the authorised share capital of companies incorporated in Zambia.

Payroll taxes

Employers are required to deduct income tax arising on any emoluments under the 'Pay As You Earn' (PAYE) regulations.

Social security contributions

Both employers and employees are required to make contributions to the National Pension Scheme Authority (NAPSA). The contribution rate for 2016 is 5% of the employee's total earnings (a total 10% contribution from both the employer and employee). This contribution is applicable to a maximum of ZMW 843.97 per employee per month (i.e. a total of ZMW 1,687.94 from both the employer and employee per month).

Provincial/local taxes other than income taxes

Businesses are required to make contributions to local councils (e.g. Lusaka City Council).

Branch income

There is no specific legislation concerning the calculation of branch income.

In general, both Zambian resident companies and Zambian branches are required to prepare financial statements under International Financial Reporting Standards (IFRS). The accounting profit is adjusted to determine taxable profits for each source of income according to the same rules used for determining taxable income of Zambian resident companies. The normal CIT rate applies as described in the *Taxes on corporate income section*.

WHT applies on profits distributed by branches of foreign companies at the rate of 15%.

Income determination

As noted below, Zambian CIT rules set out a number of sources of income that are subject to CIT. Income from each source is calculated separately, and a CIT liability arises on each source with no ability to offset a loss from one source against income from another source.

Business income

Business gains or profits from a Zambian source are taxable by reference to a charge year. This charge year runs from 1 January to 31 December; however, entities can apply to the Zambia Revenue Authority (ZRA) to have their accounts prepared for a different year end.

Inventory valuation

In calculating business income, IFRS should be followed for CIT purposes, including the determination of stock valuation.

Capital gains

Zambia does not have a capital gains tax, and, except where provided otherwise in the Income Tax Act, capital gains are not subject to tax.

Dividend income

All dividend income (from both Zambian and non-Zambian sources) of a Zambian resident company is subject to CIT as a separate source.

In the case of dividend income received from another Zambian resident company, the WHT deducted on the payment of the dividend should represent the 'final tax', and the Zambian resident company receiving the dividend is not subject to an additional CIT liability.

Interest income

All interest income (from both Zambian and non-Zambian sources) of a Zambian resident company is subject to CIT as a separate source.

In the case of interest income from a Zambian source, the taxable amount for the recipient company is inclusive of the WHT deducted on the payment of the interest. The WHT is available as a credit for offset against the final CIT liability of the recipient Zambian resident company.

Rental income

Zambian-source rental income of a Zambian resident company is subject to CIT as a separate source.

WHT arises at 10% on rental payments. This is the final tax for a landlord, which will not be subject to a further CIT liability.

Zambia

Royalty income

Zambian-source royalty income (which is very widely defined for these tax purposes) of a Zambian resident company is subject to CIT as a separate source, together with premiums or any like consideration for the use of any Zambian property.

The taxable amount for the recipient company is inclusive of the WHT deducted on the payment of the royalty. The WHT is available as a credit for offset against the CIT liability of the Zambian resident recipient company.

Partnership income

Where a business is carried on in partnership, the income to which each partner is entitled in a period is ascertained under the Zambian income tax rules, and each partner is assessed and charged separately. Accordingly, a partnership is broadly transparent for Zambian income tax purposes.

Unrealised gains/losses

Unrealised gains are not taxable, and, similarly, unrealised losses are not tax deductible.

Foreign currency exchange gains/losses

Foreign exchange gains are only taxable to the extent that they are revenue rather than capital in nature, in which case they are not taxed until they are realised. Foreign exchange losses are only deductible to the extent that they are revenue in nature and realised. By exception, foreign exchange losses of a capital nature incurred on borrowings used for the building and construction of an industrial or commercial building are deductible.

Other significant items

Other sources of income that are taxed under separate source include annuities and hedging income.

Foreign income

As noted above, Zambia operates a source system of income tax. Zambian residents are only subject to income tax on non-Zambian source dividends and interest income.

There are no specific anti-avoidance rules preventing deferral of non-Zambian source income, although it should be noted that Zambia has a general anti-avoidance rule.

Deductions

Expenses are generally deductible against taxable income from the same source, provided that they are not of a capital nature and are incurred wholly and exclusively for the purposes of a business.

Provisions can only be deducted to the extent that they are specific. Even if a provision complies with IFRS, it will be disallowed (and any reversal of the provision will not be taxed) to the extent it is considered to be general in nature.

Depreciation and amortisation

Depreciation and amortisation are not deductible as they relate to capital expenditure.

Zambia has a system of capital allowances that provides for deductions in ascertaining business income. These are calculated at annual rates on qualifying capital expenditure, which currently apply as follows:

Category of qualifying expenditure	Rate of allowance (calculated on a straight-line basis)
Industrial buildings	Investment allowance of 10% *
	Initial allowance of 10% *
	Annual wear and tear allowance of 5% *
Other commercial buildings	Annual wear and tear allowance of 2%
Implements, machinery, and plant - farming, manufacturing, tourism, generation of electricity, and leasing	Annual wear and tear allowance of 50%
Implements, machinery and plant - other	Annual wear and tear allowance of 25%
Commercial vehicles	Annual wear and tear allowance of 25%
Non-commercial vehicles	Annual wear and tear allowance of 20%
Patents, designs, trademarks, and copyrights	Premium allowance on straight-line basis over the life of period for which the right is granted
Mining expenditure	Mining deductions of 25%
Farm improvements	Farm improvement allowance of 100%
Construction and improvement of commercial and industrial buildings by person approved under the ZDA Act (see the <i>Tax credits and incentives</i> section)	Improvement allowance of 100%

* For industrial buildings, the investment allowance and the initial allowance can both be claimed in the year in which the building is put into use, together with the wear and tear allowance for that year.

Goodwill

Goodwill is not deductible as it is a capital expense.

Start-up expenses

A deduction is allowed for preliminary business expenses in the charge year in which that business commences, provided that the expenditure was incurred within 18 months before the commencement and provided that the expense would have been deductible if it had been incurred after the commencement.

There are special rules for prospecting expenditure in an area in Zambia over which a mining right has been granted. These enable the shareholders of the company undertaking the prospecting to claim a deduction for the prospecting expenditure, provided certain conditions are met.

Interest expenses

Interest expenses are deductible, provided that the loan or advance was obtained for capital employed wholly and exclusively for business purposes (or in the production of another source of income).

Note, however, that incidental costs of obtaining finance, such as commitment and guarantee fees and any other incidental costs of a similar nature, are not deductible.

Bad debt

A specific bad debt is deductible if it can be proved that it is bad or likely to become bad.

No deduction is allowed for impairment provisions/bad debt incurred by banks and financial institutions for debts that are secured against collateral.

Charitable contributions

A payment to a public benefit organisation that is approved by the Zambian government or owned by the Zambian government is deductible.

Zambia

Pension expenses

Payments made by an employer by way of a contribution to an approved fund established for the benefit of employees are deductible. Note that special rules apply for the deductibility of lump sum payments and payments in arrears. Payments to non-approved pension funds are not deductible.

Payments to directors

Payments to directors are deductible, provided they are incurred wholly and exclusively for the purposes of a business (or other source of income). A payment could, however, be disallowed if it is deemed to be merely a domestic or personal expense.

Research and development (R&D) expenses

All revenue expenditure on experiments or research relating to a business is deductible. A deduction against business income is also allowed for a contribution to a scientific or educational society or institution, which is required to be used solely for industrial research or scientific experimental work connected with the business. However, capital expenditure on research is disallowed unless it qualifies for capital allowances.

Bribes, kickbacks, and illegal payments

Bribes, kickbacks, and illegal payments would normally be disallowed on the basis that they are not wholly and exclusively for the purposes of a business.

Fines and penalties

A penalty arising under the Income Tax Act is specifically disallowed. Other fines and penalties may be disallowed on the basis that they are not wholly and exclusively for the purposes of a business.

Taxes

Zambian CIT is not deductible. Other tax liabilities suffered should be deductible, provided they are revenue expenses and wholly and exclusively incurred for the purposes of the business (or other source of income). *See the Tax credits and incentives section regarding credits for non-Zambian tax suffered on non-Zambian source income.*

Other significant items

Other specific rules concerning expenses considered to be allowable include the following:

- Deductions for costs of an employer to establish and administer an approved share option scheme.
- Deductions for technical education.
- Deductions for Mineral Royalty Tax payments.
- A fixed deduction of ZMW 100,000 for employing a person with a disability.

Other items specifically disallowed include the following:

- A loss or expense that is recoverable under an insurance contract or indemnity.
- Expenditure on the provision of entertainment, hospitality, or gifts.

Benefits provided that are incapable of being turned into money or money's worth (e.g. the use of cars and accommodation provided by the employer) give rise to taxable business income of the employer.

Note that special rules apply for determining the gains or profits of an insurance business.

Net operating losses

Losses can be carried forward to set against profits of the same source. Normally, losses are available to carry forward for a period of five years after the charge year in which the

loss was incurred. In the case of a person carrying on a mining operation or hydro, wind, solar, and thermo power generation, the loss carryforward period is ten years.

A loss incurred by a person in a charge year from mining operations shall be deducted from 50% of the income of the person from the mining operation. This was previously allowed to be deducted against 100% of the income until 1 July 2015.

There is no ability to carry back losses.

Losses arising from one source cannot be set against income arising from another source.

Payments to foreign affiliates

Certain 'loans to effective shareholders' may give rise to CIT liabilities. Note that transfer pricing rules may also apply (*see Transfer pricing in the Group taxation section*).

Group taxation

There are no special CIT rules for groups of companies. Accordingly, CIT returns cannot be prepared on a consolidated basis for group purposes. Losses arising in one group company cannot be set against profits of another group company.

Transfer pricing

Transfer pricing rules apply to transactions between associated persons and require that transactions are undertaken on an arm's-length basis. Otherwise, the associated person benefiting from a reduction in income as a consequence of any non-arm's-length terms will have its CIT computation adjusted as if the transactions had been undertaken on an arm's-length basis.

OECD transfer pricing guidelines are generally accepted as the appropriate basis to determine arm's-length terms.

Thin capitalisation

There are specific thin capitalisation rules. These relate to the issue of securities to an associated person, which require that the transaction is undertaken at an arm's-length rate by reference to:

- the appropriate level or extent of the issuing company's overall indebtedness
- whether the amount issued would have been provided as a loan on an arm's-length basis, and
- the rate of interest and other terms that would apply to such an arm's-length loan.

The debt-to-equity ratio of the borrowing party is an important test to determine whether there should be a thin capitalisation restriction. However, there is no defined debt-to-equity ratio in legislation or published guidance. This should be determined by reference to normal practice that would be adopted by two independent parties on the open market with respect to the particular situation.

An exception applies to a company carrying on mining operations. In this case, the mining company's interest expense is restricted to the extent that its loans, in aggregate, exceed a 3:1 debt-to-equity ratio. For mining companies only, this thin capitalisation restriction applies to interest payable to both connected and unconnected parties.

Controlled foreign companies (CFCs)

Zambia does not have a CFC regime.

Zambia

Tax credits and incentives

The ZDA Act 2006 offers a range of tax incentives in the form of allowances, exemptions, and concessions for companies making investment in Zambia that meet certain criteria.

The fiscal benefits arising from qualifying investment licenses are as follows:

- 0% CIT for five years from the date of commencement of operations.
- 0% tax on dividends for a period of five years starting from the date of commencement of operations.

Foreign tax credit

Domestic legislation provides that, where a DTT is in force and the other territory has taxing rights to a source of foreign income, a tax credit will be available to reduce the Zambian tax liability by the amount of non-Zambian tax suffered.

Where income is received from a source where there is no applicable DTT, unilateral relief should be available to offset foreign tax against Zambian tax arising on the foreign income.

In the case of both treaty relief and unilateral relief, the tax credit cannot exceed the amount of Zambian tax arising on the foreign income before the reduction.

Withholding taxes

Payments of the following items of Zambian-source income may be subject to WHT. The relevant rates under domestic legislation are as follows:

Category of payment	Rate on payment to Zambian resident (%)	Rate on payment to non- Zambian resident (%)
Dividends	15 (1)	15 (1)
Interest	15	15
Interest from a Lusaka Stock Exchange listed Property Loan Stock Company	0 (3)	15
Management or consultancy fee	15	20 (2)
Royalties	15	20
Rent from a Zambian source	10	10
Commissions	15	20
Construction and haulage contractors	0	20
Public entertainment fees to entertainers/sports persons	0	20

Notes

1. 0% if paid by a mining company.
2. 15% if paid by a mining company to its shareholders.
3. 0% rate only applies on dividends paid by companies listed on the Lusaka Stock Exchange to individual shareholders; otherwise, the normal 15% rate applies.

The WHT liability arises by reference to the date of payment or, if earlier, the date of accrual (i.e. the date the recipient has a legal right to claim the payment). WHT is due to be paid within 14 days of the month of this date.

Zambia has DTTs in force with the following territories, which generally provide reduced rates of WHT as follows:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty territory	15	15	20
Treaty:			
Canada	15	15	15
China	5	10	5
Denmark	15	10	15
France	The 1950 France - Zambia DTT is accepted to apply (3)		
Finland	5 (1)/15	15	5 (1)/15
Germany	5 (1)/15	10	10
India	5 (1)/15	10	10
Ireland	7.5	10	8 (5)/10
Italy	5 (1)/15	10	10
Japan	0	10	10
Kenya	0	0	0
Mauritius	5 (1)/15	10	5
Netherlands	5 (2)/15	10	7.5 (6)/10
Norway	5 (1)/15	10	10 (7)/15
Romania	10	10	15
Seychelles	5 (1)/10	5	10
South Africa	The 1953 Rhodesia & Nyasaland - South Africa DTT is accepted to apply (3)		
Sweden	5 (1)/15	10	10
Switzerland	The 1954 Switzerland - United Kingdom DTT is accepted to apply (3)		
Tanzania	0	0	0
Uganda	0	0	0
United Kingdom	5/15 (8)	10	5 (4)

Notes

1. The non-resident recipient must own at least 25% of the share capital of the capital of the Zambian company.
2. The revised Zambia-Netherlands treaty was signed on 15 July 2015 but is not yet in force. This lower rate applies if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends, or if the beneficial owner is a pension fund.
3. These old treaties do not follow the OECD model, and, accordingly, their application to particular circumstances must be confirmed.
4. This lower rate applies to the treaty that was signed between the two states, which entered into force effective 1 January 2016.
5. The rate of 8% shall apply in the case of payment of royalties in respect of any copyright of scientific work, patent, trade mark, design or model, plan, secret formula or process, or information concerning industrial, commercial, or scientific experience.
6. The lower rate applies to the treaty that was signed between the two states in July 2015; the status of which is still pending.
7. The lower rate applies to the treaty that was signed between the two states in December 2015; the status of which is still pending.
8. This rate applies where the dividends are paid out of income (including gains) derived directly or indirectly from immovable property within the meaning of Article 6 of the treaty.

In all cases, advance clearance must be obtained to obtain the treaty benefit and take advantage of any reduced rate of WHT or tax exemption.

It may be possible to obtain confirmation that management and consultancy fees can be paid without deduction of WHT by reference to the provisions of the relevant treaty. For treaties following the OECD model, the article concerning 'Income Not Expressly Mentioned' is generally taken to be relevant.

Tax administration

Taxable period

CIT is determined by reference to a charge year, being the period of 12 months ending on 31 December.

Tax returns and payment of tax

The CIT rules require the submission of a quarterly provisional tax return and the quarterly payments of tax for each tax charge year. The provisional returns and provisional tax payments must be based on an estimate of taxable income for the current charge year.

The quarterly returns and tax payments for the 2016 tax charge year are due as follows:

- 1st quarter return due 31 March 2016 (or 5 March 2016 if submitted manually).
- 2nd quarter return due on 30 June 2016.
- 3rd quarter return due on 30 September 2016.
- 4th quarter return due on 31 December 2016.

By concession, the ZRA allows a 14 day grace period for the payment of taxes. Accordingly, each quarterly payment can be made on the 14th of the month following the end of each quarter.

The final tax return needs to be submitted by 30 June following the end of the tax year in the case of an electronic return. This must be accompanied by any balance of tax that remains unpaid. For example, the final tax return for the 2015 tax charge year must be submitted by 30 June 2016.

In the case of a manually filed tax return, the tax return needs to be submitted by 5 June following the end of the tax year. For example, the final tax return for the 2015 charge year, if submitted manually, must be submitted by 5 June 2016.

Tax audit process

The Commissioner General of the ZRA has wide powers to require any person to attend to be examined at a time and place specified by notice, where it is determined that person is able to impart information necessary for the purposes of the Income Tax Act.

Furthermore, the Income Tax Act empowers the Commissioner General of the ZRA to access any type of information required for tax purposes held by legal practitioners, accountants, and financial institutions.

Statute of limitations

Save for cases of fraud or wilful deceit, no assessment can be made for any charge year after six years from the end of the charge year.

Topics of focus for tax authorities

The ZRA is devoting a significant amount of time to transfer pricing, and this is expected to be an increasing focus of scrutiny.

Other issues

Advanced income tax

Advanced income tax may apply at 6% on the value of commercial imports. This can be credited against the importer's CIT liabilities on submission of the annual tax return.

Exchange controls

The exchange monitoring regulations and local currency regulations in Zambia were abolished in March 2014.

Previously, there had been regulations that were imposed by the Bank of Zambia requiring that transactions in foreign currency had to be monitored under an electronic reporting system.

Choice of business entity

A non-Zambian resident company can establish a Zambian business as either a branch or a foreign company subsidiary (i.e. a Zambian registered limited liability company).

Adoption of IFRS

Zambia has adopted IFRS and this forms the basis of CIT computations (subject to adjustment for tax rules as noted throughout this summary).

Significant developments

Nothing has as yet been published, but the government is seriously considering the introduction of Special Economic Zones in the near future (likely to be effective 1 January 2017).

The laws covering transfer pricing have been expanded to cater for the inclusion of Organisation for Economic Co-operation and Development (OECD), as well as United Nations (UN), guidelines.

Taxes on corporate income

The corporate income tax (CIT) rate for companies (other than mining companies with special mining leases, but including branches) continues unchanged at 25.75%. This rate includes a base rate of 25% plus a 3% AIDS levy.

Zimbabwe presently operates on a source-based tax system. This means that income from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe unless a specific exemption is available. The specific circumstances of a transaction should always be considered to determine whether the transaction gives rise to taxation in Zimbabwe.

Income earned by foreign companies from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe. In such a case, one should determine whether the foreign entity is obligated to register a local entity. A company is required to register a branch if it has established a place of business or is otherwise considered to be trading in Zimbabwe. A local subsidiary company may be registered as an alternative to a branch operation.

Non-residents who do not have a place of business in Zimbabwe may, however, be subject to withholding tax (WHT). *See the Withholding taxes section for additional details.*

Local income taxes

There are no local income taxes payable in Zimbabwe.

Corporate residence

Currently, the Zimbabwean tax system is based on source and not on residency. Zimbabwe is moving towards a residence-based taxation system, but the details are still to be announced. Income derived, or deemed to be derived, from sources within Zimbabwe is subject to tax. Under the proposed new legislation, the place of effective management concept may be used for a residence-based tax. Note that this new Income Tax Act is still being drafted, and there is no certainty as to when it will become law.

Source is the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Zimbabwe, the source of income is deemed to arise in Zimbabwe, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Zimbabwe may, in the hands of a domestic company, be deemed to arise in Zimbabwe and be taxed as such. Examples include interest and certain copyright royalties arising outside Zimbabwe. Where the income is deemed to be from Zimbabwe, relief of the foreign tax suffered, up to a maximum of the Zimbabwe tax, may be allowed as a tax credit.

Permanent establishment (PE)

In the event that Zimbabwe has entered into a double taxation agreement (DTA) with the country where the foreign company resides, the entity will only be taxable in Zimbabwe if it operates through a PE, which, in most cases, includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered. If a PE exists, only the portion of the income attributable to the PE will be subject to tax in Zimbabwe.

Otherwise, and except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance (i.e. there is no legislation in the Zimbabwe Income Tax Act [Act] that deals with the term 'permanent establishment').

Other taxes

Value-added tax (VAT)

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions. Advice on VAT implications of specific transactions related to corporate operations should be obtained prior to execution of transactions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Zimbabwe that involves the supply of goods or services for consideration.

VAT is payable on all imports for local consumption into Zimbabwe, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated). Import VAT is payable on the import value plus the applicable customs duty.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard-rated and zero-rated supplies) exceed 60,000 United States dollars (USD) in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may only be deducted as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due by the 25th day following the month to which the VAT relates.

It is mandatory for all registered taxpayers (i.e. everyone that has a tax Business Partner Number) to use electronic fiscal registers (EFRs) that can be linked to the Zimbabwe

Zimbabwe

Revenue Authority (ZIMRA). Penalties of up to USD 25 per day per point of sale may be imposed.

Customs duties

Zimbabwe is a member of the Southern African Development Community (SADC) as well as the Common Market for Eastern and Southern Africa (COMESA). Customs duties are payable according to the general customs tariffs that are legislated for in Zimbabwe. Preferential duty rates apply on imports from SADC or COMESA countries, while goods may be imported free of customs duties from Namibia in terms of the Zimbabwe-Namibia Free Trade Agreement.

25% surtaxes have been imposed on a number of imported goods (including footwear, clothing, and certain foodstuffs) in order to protect the local manufacturing sector.

A security deposit is required by Customs on all temporary importations of equipment to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs' bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

Excise duties

Excise duties are levied on local production of excisable products and are included on most excisable products imported from other countries. Examples of the excise products and applicable rates include the following:

- Cigarettes: 40% + USD 7 per 1,000 sticks.
- Spirits: USD 2 per litre.
- Wine: USD 0.50 per litre.

Excise and fuel levies are also levied on petrol, diesel, and illuminating kerosene.

Property taxes

Property taxes are levied by cities, towns, and rural councils. Each of these bodies conducts periodic valuations of the properties in their area and annually set out a 'rates schedule' based on a percentage of the valuations. These may alter each year depending upon the entities budgetary requirements for funds. Valuations of the properties are usually based on estimates as there are very few qualified property valuers operating in Zimbabwe at present.

Transfer duty

Transfer duty is payable on the acquisition value of property purchased at the following rates:

Value of the property (USD)	Rate of transfer duty
0 to 5,000	USD 400
5,001 to 20,000	2% of the value above USD 5,000
20,001 to 50,000	3% of the value above USD 20,000
50,001 and above	4% of the value above USD 50,000

Transfer duty is normally payable by the buyer, but the agreement for the sale of the property will determine the person liable to pay these costs. In addition, conveyance costs of up to 4% (plus 15% VAT) must be added on.

Stamp duty

Certain transactions may attract stamp duty. The amount of stamp duty payable will differ and will be based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

Transaction	Stamp duty
Bonds	0.4% (USD 0.40 for every USD 100 or part thereof)
Brokers notes - purchase of securities	0.25% (USD 0.25 per every USD 100 or part thereof)
Brokers notes - purchase/sale of any movable property other than a security	0.10% (USD 0.10 per every USD 100 or part thereof)
Brokers notes - purchase/sale of any immovable property	1% (USD 1.00 per every USD 100 or part thereof)
Off market share transfer instruments	2% or USD 2
Cheques	0.05% (USD 0.05)

Tax advice should be obtained for major transactions in respect of the transactions mentioned above in order to ensure that the correct stamp duty implications are considered.

Capital gains tax

It should be noted that capital gains tax is payable in Zimbabwe on the disposal of immovable property or shares that are held in listed (on the Zimbabwean Stock Exchange) or unlisted companies at the following rates:

Acquired pre-February 2009

- Listed securities: 1% of proceeds.
- Property: 5% of proceeds.
- Unlisted securities: 5% of proceeds.

Acquired post-February 2009

- Listed securities: 1% of proceeds.
- Property: 20% of capital gain.
- Unlisted securities: 20% of capital gain.

Payroll taxes

Zimbabwe operates a pay-as-you-earn (PAYE) system that is called the 'Final Deduction System' (FDS). This is based on the presumption that all employers must register for PAYE (both local and foreign-based employers), and that they are responsible for calculating, collecting, and paying the correct amount of PAYE every month to ZIMRA. Tax audits are carried out periodically (every year or two) to test the payroll systems.

The full burden of collecting the correct tax is placed on the employer, and, because of this, there is no requirement for employees to file annual tax returns in respect of employment income.

Social security contributions

Zimbabwe has a limited social security system. The National Social Security Scheme (NSSS) contributions are payable at the same rate of 3.5% of basic salary by the employer and employee, with a salary cap set at USD 700 per month.

Manpower training levy

Subject to some exceptions, employers are required to pay a 1% monthly training levy (on the gross wage bill) to the Zimbabwe Manpower Development Authority.

Zimbabwe

Workmen's compensation

Under the Workmen's Compensation Act, employers are required to contribute to a fund that provides cash benefits for industrial injury, disability, and death. Contribution rates are supposed to vary according to inherent occupational risk, from less than 2% in most low-risk commercial/administrative occupations to 11% for high-risk sectors.

Standards Development Fund

With a few exceptions, employers are required to pay 0.5% of their quarterly gross wage bill to the Standards Development Fund. The amount is payable on all payments made by the employer on behalf of the employee, including medical aid and pension contributions.

Branch income

Branch income that is received or has accrued from a source within, or deemed to be within, Zimbabwe is taxable in Zimbabwe in terms of the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may therefore not deduct fees paid to its foreign head office (unless a tax treaty makes provision for such deduction) as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

A 15% WHT is imposed on any payments made in respect of head office charges.

The amount of fees charged by the head office to the Zimbabwe branch is also subject to a limitation, usually based on a maximum of 1% of total expenditure (excluding the charge itself and any capital allowances). Exchange control regulations also limit the remittability of administration and management fees to 2% of turnover.

Note that the move from a source-based system to a residence-based system may affect the level of profits that are attributed to Zimbabwe. These laws are still pending, and no date of implementation has been given.

Income determination

The Act tax base for CIT is taxable income rather than profits. The source and nature of the income determines whether the amount is taxable or not. In addition to amounts received or accrued from actual Zimbabwean sources, there are deeming provisions that bring income from foreign sources into Zimbabwean taxable income.

In general, all receipts from a Zimbabwe source are taxed, excluding amounts that are proven by the taxpayer as being capital receipts. Most expenditure items and some specified exemptions are deductible against income. Capital expenditure is generally not deductible, with amounts on specific items being deductible by way of annual allowances spread over a period.

Inventory valuation

The legislation permits three methods of inventory valuation: historic cost, cost of replacement, or net realisable value. Standard cost based on first in first out (FIFO) is normally used for accounts valuations and is an accepted basis for tax purposes. Last in first out (LIFO) is not permitted for tax or for accounting purposes. The tax valuation may differ from the accounting valuation; this is a rare occurrence in Zimbabwe but is acceptable.

Capital gains

See *Capital gains tax in the Other taxes section*.

Dividend income

Dividends received from Zimbabwe incorporated companies are tax exempt. When received from non-Zimbabwe companies, they are taxed at a flat rate of 20%; however, relief is granted by allowing any foreign tax suffered as a tax credit (up to a maximum of the 20% local rate of tax).

Interest income

Interest accruing to Zimbabwe resident companies from 'financial institutions' is subject to a 15% WHT and thereafter is exempt from CIT (the WHT becomes a final tax). Interest from other local or foreign sources is included in gross income and is taxed at the normal CIT rate. Relief will be granted for any foreign tax paid, up to the maximum Zimbabwe tax rate.

Partnership income

The partnership itself is not taxed directly; however, the taxable income of the partnership is calculated in the same way as corporate income and is then allocated amongst the partners in accordance to their agreed profit sharing ratios. This income is taxed in their hands at the basic CIT rate.

Rent/royalties income

Rents and royalties are generally treated as normal taxable income and are taxed at the basic CIT rate. Rent arising in respect of land and buildings situated outside of Zimbabwe, however, is exempt from local tax.

Foreign income

Where income (including business profits) is deemed to be from a Zimbabwe source, it will form a part of the local company's taxable income and will be subject to tax at the basic CIT rate. Relief in respect of foreign taxes suffered will be granted unless it is clear that the true source of the income is, in fact, Zimbabwe.

Deductions

The Act makes provisions for specific deductions. Some of the deductions (e.g. the deduction of foreign exchange losses, development and exploration costs, hire purchase allowances, and manufacturing allowances) can be more complex.

Capital allowances

The cost (including finance charges) of machinery, implements, and other articles used by the taxpayer in the production of income is deductible in four equal annual allowances. No apportionment is required where the asset was held for less than 12 months.

Industrial buildings (including hotels) constructed and used by the taxpayer in the production of income qualify for an initial allowance of 25% of construction cost in the year they enter service. Thereafter, an annual allowance of 25% is deductible for each year following the year of construction. Additions to existing buildings (not alterations or repairs) qualify for the same deductions. It is important to note that the allowance is calculated on the cost of construction and not the cost of acquisition. In the latter case, the allowances are set at 5% of the cost.

A mining exploration expenditure incurred before commencement of production is deductible in full in the first year of production against income derived from the mine. Subsequent development expenditure is presently written off in the year expended.

Capital allowances may also be deducted with respect to leasehold improvements.

A recovery or recoupment of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recouped by way of disposal. The recoupment is calculated on the capital allowances previously granted.

Zimbabwe

Goodwill

Goodwill is currently not deductible for tax purposes in Zimbabwe.

Start-up expenses

Start-up expenses may be deducted if incurred within 18 months of commencement of business and not considered to be capital in nature.

Interest expenses

Zimbabwe has thin capitalisation rules based on a 3:1 debt-to-equity ratio. A portion of the overall interest may be disallowed if this ratio is exceeded.

Bad debt

Bad debts written off may be claimed, but not a provision for bad debts.

Charitable contributions

Donations (with varying maximum limits) made to specified charities and educational bodies may be claimed.

Entertainment expenses

Entertainment expenses are not deductible for tax purposes.

Fines and penalties

Fines and penalties are not deductible for tax purposes.

Taxes

Taxes are generally not allowed as a deduction against income unless they form a part of a cost of an allowable expense (e.g. VAT incurred on an expense line that may not be claimed as input tax).

Net operating losses

Assessed tax losses may be carried forward (but not backwards) for up to six years, provided the company continues to trade. This restriction does not apply to mining companies. Tax laws do not allow for losses to be transferred to other group companies, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

Assessed losses are reduced in the event of a compromise agreement with creditors.

Payments to foreign affiliates

The law prohibits the deduction of amounts incurred in excess of specified limits in respect of management and general administration expenses, as well as interest. This applies to branches or subsidiaries of both local and foreign companies.

The limit on management and general administration expenses is based on such expenses exceeding 1% and 0.75%, respectively, for a company already in production and prior to production of total tax-deductible expenses.

Group taxation

No taxation of combined operations is allowed in Zimbabwe, including where operations are conducted by more than one company.

Transfer pricing

Effective 1 January 2014, transfer pricing legislation was introduced under a provision titled 'tax avoidance'. This legislation does not detail any parameters or requirements that corporations should follow, nor has ZIMRA issued any practice notes.

This legislation was enhanced with effect from 1 January 2016 to enable the use of the OECD and UN guidelines in respect of cross-border transactions.

It is important to note that, in addition to cross-border transactions between connected persons being examined, the law also covers internal (domestic) transactions between connected persons.

Thin capitalisation

The limit on the deductibility of interest is based on a company incurring interest charged by a subsidiary, a fellow subsidiary, or a holding company when the debt-to-equity ratio exceeds 3:1.

Controlled foreign companies (CFCs)

Zimbabwe currently has no CFC rules.

Tax credits and incentives

It has been announced by the Minister of Finance that Zimbabwe is moving away from taxation incentives; however, the following are still available.

Note that this is a high-level summary, and certain conditions should be met in order to utilise these incentives.

Person for whom incentive is available and duration of incentive	Tax incentive	Tax treatment for normal taxpayers
Taxpayers operating at designated growth point areas.	The capital allowance is calculated as 25% of the cost of construction of a commercial or industrial building in growth point areas in the year when the building enters service and 25% during the three years that follow the year of construction.	Capital allowances are calculated as 25% of the cost of construction of industrial building in the year when the building enters service and 25% during the three years that follow the year of construction.
Taxpayers operating at designated growth point areas.	Deduction of an investment allowance at 15% on cost of specified assets.	No investment allowance granted.
For all taxpayers in build, own, operate, and transfer (BOOT) or build, operate, and transfer (BOT) arrangements.	First five years: Taxed at 0%. Second five years: Taxed at 15%. Thereafter: Taxed at normal rate.	Taxed at 25%.
Exporting taxpayers.	An additional allowance of 100% of cost incurred in an export country in order to export Zimbabwean goods to such country may be deducted.	Export expenditure incurred is deductible for tax purposes.
For all manufacturing taxpayers exporting 50% or more of output (by volume).	Taxed at a reduced rate of 20%.	Taxed at 25%.
Mining company holding a special mining lease.	Taxed at a reduced rate of 15%.	Taxed at 25%.
Operator of a tourist facility in a tourist development zone.	First five years: Taxed at 0%. Thereafter: Taxed at normal rate.	Taxed at 25%.
Industrial park developer.	First five years: Taxed at 0%. Thereafter: Taxed at normal rate.	Taxed at 25%.

Foreign tax credit

Where foreign income is taxed in Zimbabwe, a tax credit (limited to the amount of local tax suffered) will be set off against the local tax liability.

Zimbabwe

Withholding taxes

WHTs are applicable where dividends and royalties or similar payments are declared or distributed to non-Zimbabwean residents (and Zimbabwean residents in some instances).

Dividends

Dividends declared by a Zimbabwean company to a non-resident holding company will be subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 15% unless treaty relief is available. Dividends from companies listed on the Zimbabwe Stock Exchange have a rate of 10%. NRST is payable within ten days after declaration of the dividend.

Interest

WHT of 15%, calculated on the gross amount of interest, is payable on interest accruing to any person resident in Zimbabwe. This applies to interest arising from a registered banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Non-resident investors, however, are currently exempt from any WHT on interest.

Royalties or similar payments

WHT on royalties are payable once a Zimbabwean company pays a royalty to a non-Zimbabwean resident. WHT is levied at a rate of 15% and is payable within ten days of the date of payment. The WHT falls due upon accrual (i.e. when payable), and actual payment is not a factor.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula or process, or any other property or right of a similar nature. It also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Zimbabwe. The nature of the amount payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

Fees

Fees are defined to include amounts that are technical, managerial, administrative, or consultative in nature; costs are paid externally. There are some exceptions, but the definition is broad and brings in most costs that may be charged to a Zimbabwean person.

WHT is levied at a rate of 15% and is payable within ten days of the date of payment.

Summary of WHT payable

The non-residents WHT rates and treaty relief for Zimbabwean DTAs can be summarised as follows. It should be noted that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, interest, and royalties in the various treaties should also be considered.

Recipient	Dividends (%)	Interest (%)	Royalties (%)	Fees (%)
Non-resident	15*	0	15	15
Treaty:				
Bulgaria	10	N/A	10	10
Canada	10	N/A	10	10
France	10	N/A	10	10
Germany	10	N/A	7.5	7.5
Malaysia	10	N/A	10	10
Mauritius	10	N/A	15	15

Recipient	Dividends (%)	Interest (%)	Royalties (%)	Fees (%)
Netherlands	10	N/A	10	10
Norway	15	N/A	10	10
Poland	10	N/A	10	15
South Africa	15	N/A	15	15
Sweden	15	N/A	10	10
United Kingdom	5	N/A	10	10

* Applies to unlisted companies. The rate for companies listed on the Zimbabwe Stock Exchange is reduced to 10%.

'N/A' means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Zimbabwean rate. It should be noted that a treaty can only provide tax relief and cannot impose a higher tax rate.

These are payable within ten days of the date of distribution or accrual.

Zimbabwe has either negotiated, or is currently negotiating, tax treaties with the following countries:

- Botswana
- Democratic Republic of the Congo
- Indonesia
- Iran
- Jamaica
- Namibia
- Serbia and Montenegro
- Seychelles
- South Africa
- Tanzania
- Tunisia
- Zambia

Tax administration

Taxable period

The tax year-end is 31 December each year. Applications may be made for a different year-end if good reasons are given (e.g. to comply with the international group year-end). In the first year of trade, a longer or shorter period than 12 months may be accepted to tie in with a future year-end.

Tax returns

The CIT return is due by 30 April in the following tax year.

Payment of tax

Zimbabwe regulates the payment of CIT on four dates during the course of the current tax year; these are referred to as Quarterly Payment Dates (QPDs). The first payment of 10% is due by 25 March of the respective tax year. The second payment of 25% is due by 25 June of the respective tax year. The third payment of 30% is due by 25 September of the respective tax year. The fourth payment of 35% is due by 20 December of the respective tax year.

All taxes are expected to have been paid by the 25th day of December. If there is an adjustment after the year-end accounts have been finalised, a top-up payment must be made. There is no set date for this. However, in practice, this payment should not be more than 10% of the annual tax liability. ZIMRA often imposes a 10% per annum interest charge on any underpayments of QPDs.

WHT payments are due within ten days from the date of distribution or accrual.

Tax audit process

Tax audits do not, at present, have a set cycle; however, the aim is to establish a three-year cycle in the future.

Zimbabwe

Statute of limitations

The statute of limitations is generally three years unless ZIMRA considers that there is fraud or misrepresentation involved. In those circumstances, there is no set limit on how far back ZIMRA can go, but they usually do not go beyond six years in practice.

Topics of focus for tax authorities

ZIMRA is focused on ensuring that all compliance issues are in order and that VAT and payroll taxes have been correctly calculated.

Anti-avoidance

Current Zimbabwe legislation contains basic anti-avoidance sections that empower the Commissioner General to disregard the implications of a transaction or scheme if it can be proven that:

- such a transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
- it was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or
- it has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question.

The Commissioner General may, at the Commissioner General's sole discretion, impose this legislation on any transaction or scheme, which will place the burden of proof on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

Note that the anti-avoidance sections have been amended to include transfer pricing legislation effective from 1 January 2014 (*see Transfer pricing in the Group taxation section*).

Other issues

Exchange control

Zimbabwe has been operating a multi-currency system since February 2009. The Zimbabwe dollar (ZWD) was demonetised effective April 2009. This has had a significant impact on the country's exchange control regulations.

The Exchange Control Handbook in Zimbabwe is not available to the public; only banking institutions have access to these regulations.

Transactions that involve the transfer of funds to countries outside Zimbabwe are generally subject to bank approval.

The issue of shares in a Zimbabwe company to persons residing outside of Zimbabwe requires specific exchange control approvals. A limit of 49% is available for non-residents. A 51% local shareholding by indigenous persons is a requirement. Applications may be made for increased levels; each case will be decided on its own merits.

With offices in 157 countries and more than 41,000 people, we are the first choice tax provider globally¹. The strength of the PwC network, combined with the depth and breadth of our services, gives us a leading position in the professional services marketplace.

As tax codes become increasingly complex and the related risks become more challenging to manage, we help our clients to:

- understand and comply with their legal and regulatory obligations for taxation
- plan their affairs so as to be tax efficient in the business or other financial decisions they make
- understand the tax risks they face and the effectiveness of their organisation's internal controls relating to tax, and
- resolve tax disputes through domestic law and/or treaty-based dispute resolution mechanisms.

¹ Senior tax buyers name PwC as their first choice tax provider globally. These results are based on an independent survey of 4,335 primary buyers of tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

PwC is the first choice tax provider globally.

The advice we provide to clients is based on our Global Tax Code of Conduct (www.pwc.com/taxcodeofconduct). In particular, we apply the following principles:

1. Tax advice that results in positions taken in a client's tax return must be supported by a credible basis in tax law.
2. No tax advice relies for its effectiveness on any tax authority having less than the relevant facts. Advice that a PwC firm gives includes consideration of, and is based on the assumption that the client will make, relevant disclosures that both comply with the law and enable tax authorities to make further enquiries should they wish to do so.
3. Tax advice is given in the context of the specific facts and circumstances as provided by the client concerned and is appropriate to those facts and circumstances.
4. Tax advice involves discussion of the wider considerations involved, as appropriate in the circumstances, including economic, commercial, and reputational risks and consequences arising from the way stakeholders might view a particular course of action.
5. PwC firms advise clients of appropriate options available to them under the law having regard to all of the principles contained in this code.

We expect all of our people to apply these principles to the way they work, and we encourage them to consult whenever they are in doubt.

We take pride in our role as an essential and productive part of global tax administration and compliance. Our policy specialists advise regulators, governments, corporations, and supra-national bodies worldwide on the technical and practical aspects of developing and implementing tax policy initiatives.

Indirect Taxes

International Tax Services

*A world of coverage,
a wealth of experience*

Global Leader, International Tax Services

Shi-Chieh 'Suchi' Lee

PwC US

+1 646 471 5315

suchi.lee@us.pwc.com

If you're operating across borders or competing in multiple jurisdictions, complying with local tax laws, reporting requirements and statutory filings – not to mention staying on top of new legislative developments – is more than a full-time job for your tax department.

But compliance is only half of the equation. In a world of intensified global competition, the key to business success is keeping your tax strategy agile and aligned with your corporate strategy – while keeping an eye on your worldwide effective tax rate.

PwC's leading international tax professionals² have the resources, experience and local competencies to help companies like yours address your cross-border needs. With our legal, transfer pricing, tax controversy, and indirect tax teams, we are superbly qualified to assist you with all aspects of your international taxation needs. In addition, our geographic networks, such as our EU Direct Tax Group, Latin American Tax Group, and International Tax Desks, can provide you with the up-to-date analytical tax insight you need to achieve your business goals, both locally and globally.

² Senior tax buyers name PwC as their first choice provider for international corporate tax structuring services globally. These results are based on an independent survey of 1,753 primary buyers of international corporate tax structuring tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

Legal Services

*With 2,600 corporate
lawyers in more than
85 countries*

Global Leader, Legal Services

Leon Flavell

PwC Singapore

+44 20 7212 1945

leon.flavell@sg.pwc.com

We understand that one size doesn't fit all when it comes to legal services. With over 2,600 corporate lawyers in 85 countries, we're able to tackle problems in a way that is genuinely specific to your business. As well as specialist legal advice, we also offer day-to-day general counsel support. We support businesses with teams drawn from the range of skills within the PwC global network. Depending on your legal issues, we might include tax advisers, human capital consultants, corporate finance specialists, actuaries, management consultants, or accountants. We'll put together whatever it takes to give you a creative solution in the least possible time.

Mergers and Acquisitions

*An international network
of almost 1,200 specialists,
experienced in every type of
transaction*

Global Leader, Mergers and Acquisitions

Mark Boyer

PwC US

+1 202 414 1629

mark.boyer@us.pwc.com

Whether you're buying, selling, or merging, it is important to manage risk with tax due diligence and to increase tax efficiencies with deal structuring, thereby maximising value associated with a transaction. With a leading international network³ of 1,200 Mergers and Acquisitions (M&A) specialists, experienced in every type of transaction, we know how to help you evaluate, structure, and finance the transaction to your best advantage. Our M&A Tax specialists support you through every stage of the deal continuum. They work closely with our transactions services, corporate finance, and legal teams, so that all aspects of the transaction are considered by experienced specialists.

³ Senior tax buyers name PwC as their first choice provider for mergers and acquisitions services globally. These results are based on an independent survey of 1,565 primary buyers of mergers and acquisitions tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

PwC's Global People and Organisation practice brings together an unmatched combination of 10,000 people with industry, business, talent, strategy, HR, analytics, and technology expertise in one team across 138 countries. Together we build tailored people and organisation solutions to help our clients achieve their strategic ambitions - with a deep understanding of their uniqueness, and grounded in rigorous analysis and data-driven insight - to create lasting, differentiated value.

We help clients to implement organisational transformation, improve the effectiveness of their workforce, develop and move talent around their business, and manage their human capital risks. We work from people strategy through to organisational execution.

Tax Controversy and Dispute Resolution

*We think being effective
is about more than just
knowledge; it's about
having an insight into what
could happen next*

Global Leader, Tax Controversy and Dispute Resolution

David Swenson

PwC US

+1 202 414 4650

david.swenson@us.pwc.com

By giving you insight into your company's risks and exposures across different territories and disciplines, we can be the effective option to help you deal with tax disputes, audits, and examinations, from prevention through to management and resolution. Our specialists also use their experience to help businesses put in place consistent and defensible practices and policies, so they know what to expect in the future. PwC's leading Tax Controversy and Dispute Resolution network⁴ brings together former revenue authorities and government officials, accountants, economists, international tax litigators, and industry sector specialists, in all areas of direct and indirect tax, as well as customs duties, employment taxes, and tax fraud. We think being effective is about more than just knowledge; it's about having an insight into what could happen next, so we build strong relationships with governments and policy makers worldwide. That way, we're close to the people who are setting the dispute agenda, and know how to work with them to get the right results.

⁴ Senior tax buyers name PwC as their first choice provider for tax controversy and dispute resolution services globally. These results are based on an independent survey of 2,113 primary buyers of tax controversy and dispute resolution services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

Our leading Tax Policy and Administration network⁵ provides insight into today's policy trends and issues worldwide. There are a number of elements to this, which include:

- helping our clients to understand and comply with their fiscal and regulatory obligations in relation to tax,
- helping our clients maximise value for all stakeholders over time on the basis of full disclosure and in compliance with our Global Tax Code of Conduct (www.pwc.com/taxcodeofconduct), being transparent about our role when dealing with stakeholders,
- using our knowledge and experience, without being paid by or representing clients, constructively to assist policy makers in both developed and developing countries improve the efficiency and effectiveness of their tax systems, and
- being seen as acting fairly, openly, and consistently with all stakeholders such that we are trusted by all parties.

For this purpose, 'stakeholders' include, as well as our clients, revenue authorities, governments, legislators, governmental departments and their officials, non-governmental organisations, supra-national bodies, regulators, the media, professional bodies, and trade associations.

Our specialist knowledge and expertise in these areas sits mainly with the members of our network and tax country leaders. For assistance in tax policy and administration matters, please do not hesitate to contact us.

⁵ Senior tax buyers name PwC as their first choice provider for tax strategy/policy advice globally.

These results are based on an independent survey of 2,371 primary buyers of tax strategy/policy advice globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

Tax Reporting and Strategy

Insight and credentials that help teams navigate today's business changes

Global Leader, Tax Reporting and Strategy

Mark Schofield

PwC UK

+44 207 212 2527

mark.schofield@uk.pwc.com

In a fast changing world, we're helping clients build a tax function for the future. Our complete approach to tax management brings together tax function design, technology, and compliance delivery. By aligning your tax and tax technology strategies with your commercial goals, the tax function will become a strategic business asset, adding value across the organisation.

Understanding your organisation's challenges, goals, and needs is just the start. Successful change will require re-engineering 'end-to-end' processes, not just the final outputs.

We can work with you to:

- Meet the challenges of complex multi-tax reporting and compliance obligations.
- Design and execute the right tax and tax technology strategies to manage tax risks in a rapidly changing and increasingly transparent global environment.
- Take full advantage of the opportunities presented by a technology and data-enabled world.

Global Leader, Transfer Pricing

Isabel Verlinden

PwC Belgium

+32 2 710 4422

isabel.verlinden@be.pwc.com

With over 3,100 transfer pricing professionals, including more than 300 partners, across 111 countries, we are the world's leading transfer pricing adviser⁶. Our professionals come from diverse backgrounds – including law, economics, business, accounting, engineering, and government – to provide balanced, interdisciplinary perspectives.

We adopt globally coordinated approaches with in-depth local knowledge to provide tailored transfer pricing solutions. From strategy to execution, we help you build up seamlessly compliant and sustainable transfer pricing infrastructure. Our technology solutions are proven to help you decrease the time spent on manual processes across the entire finance organization, mitigate enterprise risk, and enhance operational tax productivity.

With the international tax evolution around various global tax initiatives, we closely monitor tax developments around the world to provide practical insight to you.

⁶ Senior tax buyers name PwC as their first choice provider for transfer pricing services globally.

These results are based on an independent survey of 2,561 primary buyers of transfer pricing tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

Value Chain Transformation

*Creating sustainable
business change*

Global Leader, Value Chain Transformation

Dennis Muntslag

PwC Netherlands

+31 0 887 927 282

dennis.muntslag@nl.pwc.com

Companies need to transform how they operate, while creating the capacity to grow. PwC's Value Chain Transformation (VCT) integrates our capabilities to evaluate company operating models to unlock levers that drive sustained performance. Effective and globally aligned operating, financial, legal, and tax platforms can result in sustainable benefits.

VCT helps you to align and optimise key elements to improve profitability, efficiency, controls, and visibility throughout the value chain. Our deep industry experience in key sectors and our international network of 500 cross-disciplinary VCT specialists allows us to manage the complexity involved in cross-border business transformation and help clients build the foundation for sustainable growth.

Worldwide Tax Summaries – Corporate Taxes 2016/17 represents the combined efforts of more than 500 local PwC tax specialists in over 150 countries and territories. While too numerous to name individually, we thank them for their efforts in preparing this guide.

To obtain regularly updated information on the corporate and individual tax rules in operation in over 150 countries, please visit Worldwide Tax Summaries Online at www.pwc.com/taxsummaries.

To download an eBook version of *Worldwide Tax Summaries - Corporate Taxes 2016/17*, please visit www.pwc.com/taxsummaries/ebook.

Prior-year editions of *Worldwide Tax Summaries – Corporate Taxes* (dating back to 2010/11) are available in the Archives section on Worldwide Tax Summaries Online.

To contact the editorial team, please email us at worldwide.tax.summaries@us.pwc.com.

Essential tax tools, on desktop and mobile

WWTS online

The fully mobile online version of WWTS offers quick access to information about corporate and individual tax systems in over 150 countries, updated regularly by local PwC tax specialists.

- Fully responsive design that reshapes to fit any screen/device.
- Easy printing of an entire summary or printing of select topics across multiple countries.

- Real-time updates to the quick charts.
- Comparison of key data between two countries using the quick compare feature.

WWTS eBook

This guide is also available for download in ePub or PDF format for most digital devices (e.g. desktops, laptops, tablets, smartphones).

For free and easy access to WWTS online, as well as the ePub or PDF version of this guide or prior guides, visit www.pwc.com/taxsummaries.

WWTS is also available in the iBooks store for iOS device users.

To add WWTS online to your Android or iOS mobile device home screen, open www.taxsummaries.pwc.com on your device's browser, tap the share icon, select 'Add to Home screen', and tap 'Add'.

The world's taxes at your fingertips

If you are responsible for managing taxes in a business that trades or operates across a number of different countries, you will recognise how much of a challenge it can be trying to keep on top of the corporate tax rates and rules in each of them, notwithstanding the fact that these frequently change.

Worldwide Tax Summaries – Corporate Taxes 2016/17 is a useful reference tool, to help you manage taxes around the world. It offers quick access to information about corporate tax systems in 155 countries worldwide, in an easily digestible format.

Written by local PwC¹ tax specialists in each country, this guide covers recent changes in tax legislation as well as key information about income taxes, residency, income determination, deductions, group taxation, credits and incentives, withholding taxes, indirect taxes, and tax administration, up to date (unless otherwise stated) as of 1 June 2016. Also included is a global directory of PwC contacts organised by their tax speciality area.

Visit our mobile friendly online version, which is updated regularly throughout the year, at www.pwc.com/taxsummaries.

9 780957 546356

¹ "PwC" is the brand under which member firms of PricewaterhouseCoopers International Limited (PwCIL) operate and provide services. Together, these firms form the PwC network. Each firm in the network is a separate legal entity and does not act as agent of PwCIL or any other member firm. PwCIL does not provide any services to clients. PwCIL is not responsible or liable for the acts or omissions of any of its member firms nor can it control the exercise of their professional judgment or bind them in any way.
