Foreword

Welcome to the 2016/17 edition of *Worldwide Tax Summaries* (WWTS), one of the most comprehensive tax guides available. This year's edition provides detailed information on corporate tax rates and rules in 155 countries worldwide.

As governments across the globe are looking for greater transparency and with the increase of cross-border activities, tax professionals often need access to the current tax rates and other major tax law features in a wide range of countries. The country summaries, written by our local PwC tax specialists, include recent changes in tax legislation as well as key information about income taxes, residency, income determination, deductions, group taxation, credits and incentives, withholding taxes, indirect taxes, and tax administration. All information in this book, unless otherwise stated, is up to date as of 1 June 2016.

Our online version of the summaries is available at www.pwc.com/taxsummaries. The WWTS website is fully mobile compatible giving you quick and easy access to regularly updated information anytime on your mobile device. Some of the enhanced features available online include Quick Charts to compare rates across jurisdictions, and reference materials on Organisation for Economic Co-operation and Development (OECD), European Union (EU), and World Trade Organisation (WTO) member countries, amongst other valuable information.

If you have any questions, or need more detailed advice on any aspect of tax, please get in touch with us. The PwC tax network has member firms throughout the world, and our specialist networks can provide both domestic and cross-border perspectives on today's critical tax challenges. A list of some of our key network and industry specialists is located at the back of this book.

I hope *Worldwide Tax Summaries* continues to be a valuable reference tool in helping you manage your organisation's taxes around the world.

Significant developments

Corporate income tax (CIT)

From 1 January 2016, taxpayers with annual turnover up to 5 million Albanian lek (ALL) are exempt from CIT, whereas those with annual turnover between ALL 5 million and ALL 8 million are subject to a reduced CIT rate of 5%.

Tax Certificates

If a taxpayer's financial statements and tax declarations are certified as compliant with the tax legislation by certified auditing companies, the tax administration will include this as a parameter in the taxpayer risk analysis for tax inspection purposes.

Taxes on corporate income

Albanian law applies the principle of worldwide taxation. Resident entities are taxed on all sources of income in and outside the territory of Albania, while non-resident entities are taxed on income generated only in the territory of Albania.

The corporate income tax (CIT) rate in Albania is 15%. CIT is assessed on the taxable profits calculated as taxable income less deductible expenses.

From 1 January 2016, taxpayers with annual turnover up to ALL 5 million are exempt from CIT, whereas those with annual turnover between ALL 5 million and ALL 8 million are subject to a reduced CIT rate of 5%.

Local income taxes

Local taxes on income depend on a number of factors, such as type of activity, municipality where the business is located, and the annual turnover. Consequently, these taxes may vary from ALL 20,000 to ALL 143,000.

Corporate residence

Based on Albanian legislation, a legal entity is deemed to be resident in Albania if it has its head office or its place of effective management in Albania.

Permanent establishment (PE)

PE in Albania means a fixed place of business where an entity carries out, wholly or partly, its business activities, including, but not limited to, an administration office, a branch, a factory, a workshop, a mine, and a construction or installation site.

The determination of a PE, where applicable, is based on the provisions of the double tax treaties (DTTs) that Albania has entered into with a number of countries. When dealing with DTT provisions, the Albanian tax authorities refer to the Organisation for Economic Co-operation and Development (OECD) commentaries.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 20%, and the standard VAT period is the calendar month.

Taxable transactions include goods and services supplied domestically as well as goods imported into Albania by a taxable person. The following transactions are also taxable:

- Transactions performed for no consideration or for a consideration less than market value (the latter applies if the parties included in the transaction are considered as related parties).
- Barter transactions.
- The private use of taxable goods by a taxable person (self-supply).

Determination of VAT payers

'Taxable person' shall mean any person who, despite the legal form of organisation, independently carries out any economic activity, whatever the place and the purpose or results of that activity.

The VAT registration threshold in Albania is annual turnover over ALL 5 million. Any person providing taxable supplies and whose annual turnover does not exceed ALL 5 million is not required to register, although voluntary registration is possible.

VAT obligations for non-resident entities

For a non-taxable person, the place of supply shall be in Albania if the supplier of the non-taxable person has established their business or a PE there.

For a taxable person, the place of supply of services shall be in Albania if the taxable person who receives the service has established their business or PE there.

Zero-rated goods and services

The following goods and services are subject to 0% VAT in Albania:

- Exports.
- The supply of goods transported in the personal luggage of travellers.
- International transport.
- Supply of gold for the Bank of Albania.

VAT-exempt goods and services

The VAT Law provides a list of supplies that are considered as VAT-exempt:

- The supply by the public postal services of services, and the supply of goods incidental thereto.
- Hospital and medical care and closely related activities.
- The provision of medical care in the exercise of the medical and paramedical professions.
- The supply of human organs, blood, and milk.
- The supply of services by dental technicians in their professional capacity.
- The supply of services by independent groups of persons, who are carrying on an activity that is exempt from VAT.
- The supply of services and of goods closely linked to welfare and social security work.
- The supply of services and of goods closely linked to the protection of children and young persons.
- The provision of children's or young people's school or university education.
- Tuition given privately by teachers and covering school or university education.

In addition, the VAT Law removes the limitations of VAT deductibility for marketing purposes.

VAT calculation

The amount of VAT to be paid is calculated as the difference between the VAT applied to purchases (input VAT) and the VAT applied to sales (output VAT). If the input is higher than the output, then the difference is a VAT credit that can be carried forward to subsequent months. Otherwise, if the output VAT is higher than the input VAT, the difference represents VAT payable to the state.

Taxpayers who carry out taxable VAT activities, as well as VAT-exempt activities, can credit only that portion of their input VAT that corresponds to the taxable activities. To determine the amount of input VAT that can be claimed from the state, the taxpayer should estimate a VAT credit coefficient (i.e. the rate of the taxable VAT activities over total activities).

VAT reimbursement

Taxable entities have the right to claim VAT reimbursement if the period in which VAT credits are carried forward exceeds three consecutive months and the total amount of accumulated VAT credit is equal to or above ALL 400,000.

Following the request for VAT reimbursement, taxable entities have the right to obtain the reimbursement of VAT credit within 60 days after the request is submitted. For all taxable persons who are considered as exporters based on the criteria established by the Instruction of Council of Ministers, the deadline for tax authority approval, or not, of VAT reimbursement requests is within 30 days.

VAT returns

The submission of VAT returns and sales and purchase books must be done electronically by all taxpayers, including VAT representatives.

Electronic submission deadlines fall on the dates below:

- For VAT books, the deadline is the tenth day of the following month.
- For VAT returns and for the payment of the related VAT liability, the deadline is the 14th day of the following month.

Customs duties

Albania uses the Harmonized Code System for tariff classification.

The customs duty rates range from 0% to 15%, depending on the type of goods.

Import of machinery and equipment for use in the taxpayer's business activity are generally subject to customs duties at the zero rate.

Import of vehicles are subject to custom duties at a rate of 0%.

Excise duties

Any individual or legal entity (including their fiscal representatives) that either produces or imports into the territory of the Republic of Albania any commercial goods defined to be subject to excise tax is subject to excise tax in Albania.

Albania levies excise tax on the following products:

- Beer: ALL 10/litre to ALL 12/litre, depending on the annual quantity in hectolitre.
- Wine, champagne, fermented and sparkling beverage: ALL 20/litre.
- Other alcoholic drinks: ALL 20/litre to ALL 100/litre.
- Tobacco and its by-products: ALL 2,500/kg.
- Cigarettes containing tobacco: ALL 70/20 pieces.
- Liquid by-products of petroleum: ALL 20/litre to ALL 50/litre.
- Solid by-products of petroleum: ALL 5/kg to ALL 40/kg.

Albania

- Fireworks: ALL 200/kg.
- Pneumatic tyres: ALL 20/kg to ALL 40/kg for new purchased tyres and ALL 100/kg for used tyres.
- Incandescent lamps: ALL 100/unit.
- Plastic, glass, and mixed packages: ALL 100/litre, ALL 10/litre, and ALL 20/litre respectively.

Reimbursement of excise tax can be obtained on:

- The excise tax paid on fuel used by entities engaged in the constitution of energy resources with installed capacities of not less than 5 MW for both its own needs and for sale.
- The excise tax paid on fuel used in green houses as well as in production of industrial and agricultural products.
- 50% of the excise tax paid for plastic, glass, and mixed packaging used as input in the local recycling industries of these materials.

Real estate tax

Entities that own real estate property in Albania are subject to real estate tax.

Real estate tax on buildings

Real estate tax on buildings is calculated based on the type of activity the business entity owning the building carries out.

Type of activity	Tax rate (Area1/Area2/ Area3)(ALL/sq m/year)
I. Residential buildings:	
Built before 1993	15/10/5
Built during and after 1993	30/12/6
II. Other buildings:	
Used for commercial and administrative services	400/300/200
Used for production activities	200/150/100
Other buildings	100/60/40
III. Owned or in use buildings in approved territories, such as touristic villages, etc.	400/400/400

Real estate tax on agricultural land

Real estate tax on agricultural land is levied on each hectare and varies depending on the district where the agricultural land is located and on the land productivity categorisation.

Real estate tax on land (non-agricultural)

Real estate tax on land (non-agricultural) is levied per square metre and varies depending on the district where the land is located.

Stamp duties and notary taxes

There are no stamp duties on the sale contract of land or other properties. There are, however, notary taxes that are, in nature, similar to stamp duties. The notary tax on sales contracts that relate to change in ownership of immovable properties is ALL 1,000. The notary tax on sales contracts that relate to change in ownership of movable properties is ALL 700.

Depending on the agreement reached between the seller and the buyer, the notary tax can be paid either by the seller, or by the buyer, or shared between both of them.

Registration taxes

The fee for the registration of a business entity is ALL 100.

Payroll-related taxes

Entities shall withhold personal income tax (PIT) from the gross salaries of their employees.

Employers shall pay social and health contributions (SHC) to the tax authorities at a rate of 15% and 1.7%, respectively. The social contributions are paid between the minimum and maximum gross salary for SHC purposes, which are ALL 22,000 and ALL 97,030, respectively. The health contributions are calculated on the total gross salary.

Branch income

Branch offices in Albania are subject to the same taxes as all other forms of legal entities.

Income determination**Inventory valuation**

Inventory is valued at the end of each tax period using the methods stipulated in the Accounting Law, which should be applied systematically. The methods stipulated in the National Accounting Standards for the valuation of inventory at year-end are the average cost and first in first out (FIFO) methods.

Capital gains

Capital gains are taxed at the rate of 15%.

Dividend income

Dividends and other profit distributions received by a resident entity from another resident entity or from a non-resident entity are not subject to CIT for the resident beneficiary of such income. This applies despite the participation quote (in amounts or number of shares) of the entity distributing profits in the shareholder capital, voting rights, or its participation in initial capital of the beneficiary.

Interest income

Interest income is taxed at the rate of 15%.

Foreign income

Albanian resident corporations are taxed on their worldwide income. If a DTT is in force, double taxation is avoided either through an exemption or by granting a tax credit up to the amount of the applicable Albanian CIT rate.

Albanian legislation does not contain any provisions under which income earned abroad may be tax deferred.

Deductions**Depreciation and amortisation**

Allowed tax depreciation and amortisation rates and methods for each category of fixed assets are shown below:

Asset category	Method	Rate (%)
Buildings and machinery and other fixed structures installed in the building	Reducing-balance basis	5 (1)
Computers, software products, and information systems	Reducing-balance basis	25
Other assets	Reducing-balance basis	20

Albania

Asset category	Method	Rate (%)
Intangible assets (including goodwill and start-up expenses)	Straight-line basis	15

Notes

1. In case the carrying amount value of the asset (in the beginning of the fiscal period) is less than 3% of the historical costs, the taxpayer may expense it entirely.

Land, fine art, antiques, and jewellerys are non-depreciable assets.

Depreciation and amortisation of fixed assets at amounts higher than those allowed for tax purposes is considered a non-deductible expense.

Interest expenses

Interest paid in excess of the average 12-month credit interest rate applied in the banking system, as determined by the Bank of Albania, is a non-deductible expense. The amount of deductible interest expense may also be limited by thin capitalisation rules (see *Thin capitalisation in the Group taxation section*).

Bad debt

Bad debts are only deductible if the following conditions are met simultaneously:

- An amount corresponding with the bad debt was included earlier in income.
- The bad debt is removed from the taxpayer's accounting books.
- All possible legal action to recover the debt has been taken.

This applies to all entities except those operating in the financial sector.

Charitable contributions

There are no provisions in Albania regarding the tax treatment of charitable contributions. In general, contributions are considered as non-deductible expenses for CIT purposes.

Fines and penalties

Fines and other tax-related sanctions are non-deductible expenses.

Taxes

Income taxes, VAT, and excise duties are non-deductible expenses.

Other significant items

The Albanian legislation also defines the following specific costs as non-deductible:

- Expenses not supported with fiscal invoices.
- Expenses paid in cash of amounts exceeding ALL 150,000.
- Benefits in kind and gifts.
- Wages, bonuses, and any other form of income deriving from an employment relationship and paid to the employees in cash.
- Provisions and reserves (with some exemptions applicable to the financial sector).
- Expenses for technical services, consultancy, and management received from foreign entities that are not registered for tax purposes in Albania and for which no withholding tax (WHT) has been paid by 20 January of the following year, at the latest.
- Losses, damages, and wastage incurred during production, transiting, or warehousing exceeding the norms defined by laws and related instructions.
- Impairment losses on fixed assets.
- Representation and reception expenses exceeding 0.3% of annual turnover.

- Sponsorship expenses exceeding 3% of profit before tax and sponsorships of press and publications exceeding 15% of profit before tax.

The amounts allocated to special reserve accounts in banks and insurance companies are deductible, provided that they do not exceed the limits stated in the Bank of Albania regulations.

Employers' contributions towards the life and health insurance of employees are deductible.

Banks can deduct only loan impairments (provisions) calculated under International Financial Reporting Standards (IFRS) for CIT purposes.

Net operating fiscal losses

Fiscal losses may be carried forward up to three consecutive years. However, losses may not be carried forward if more than 50% of direct or indirect ownership of the share capital or voting rights of the company is transferred during the tax year.

Albanian legislation does not allow losses to be carried back.

Payments to foreign affiliates

Payments to foreign affiliates are subject to WHT unless tax relief is requested in accordance with the local legislation or any DTT in place. These payments are tax deductible if they are properly documented and incurred for business purposes only.

Payments to foreign affiliates made for the purpose of profit transfer might be subject to price revaluation by the tax authorities. Any transactions/payments made to foreign affiliates shall be performed on an arm's-length basis.

Group taxation

There is no group taxation in Albania.

Transfer pricing

The law on transfer pricing in Albania emphasises the following:

- The general rule provides the application of the arm's-length principle.
- The taxpayer is subject to transfer pricing rules if the latter performs controlled transactions with its related parties where:
 - Controlled transactions are considered the cross-border transactions only.
 - Related parties are considered the situations where:
 - one person participates, directly or indirectly, in the management, control, or capital of the other person, and
 - the same person or persons participate(s), directly or indirectly, in the management, control, or capital of both persons.

The taxpayer subject to transfer pricing rules must have in place the following information:

- Documented information and analysis to verify that its controlled transactions are performed in consistency with the arm's-length principle. Transfer pricing documentation shall be provided to the tax administration upon its request within 30 days of receiving the tax administration's request. The content and form of the transfer pricing documentation is specified by instruction of the Minister of Finance.
- Taxpayers engaged in controlled transactions above ALL 50 million are required to submit an annual controlled transactions template by 31 March of the year following the year subject to documentation.

Albania

- The consistency of a controlled transaction(s) with the arm's-length principle shall be determined by applying the most appropriate transfer pricing method from the five methods provided below:
 - Comparable uncontrolled price method.
 - Resale price method.
 - Cost plus method.
 - Transactional net margin method.
 - Transactional profit split method.
 - Other methods.

Taxpayers with a total value of related-party transactions of over 30 million euros (EUR) in a five-year period can enter into an Advance Pricing Agreement (APA) with the tax authority.

Thin capitalisation

The interest paid on outstanding loans and prepayments exceeding four times the amount of net assets is not deductible. This rule does not apply to banks and insurance companies.

Controlled foreign companies (CFCs)

There is no CFC regime in Albania.

Tax credits and incentives

The following entities are exempt from CIT:

- Legal entities that conduct religious, humanitarian, charitable, scientific, or educational activities.
- Trade unions or chambers of commerce, industry, or agriculture.
- International organisations, agencies for technical cooperation, and their representatives, the tax exemptions of which are established by specific agreements.
- Foundations or non-banking financial institutions established to support development policies of the government through credit activities.
- Film studios and cinematographic productions (among other types of entity/activity) that are licensed and funded by the National Cinematographic Centre.
- Voluntary pension funds administrated from the competent companies.

Foreign tax credit

Albania does not apply foreign tax credits except in the case of DTTs (*see Foreign income in the Income determination section*).

Withholding taxes

The gross amount of interest, royalties, dividends, and shares of partnerships' profits paid to non-resident companies is subject to a 15% WHT, unless a DTT provides for a lower rate.

The 15% WHT is levied on the gross amount of payments for technical, management, installation, assembly, or supervisory work, as well as payments to management and board members.

If a non-resident company does not create a PE in Albania, and a DTT exists between Albania and the home country of the non-resident company, the payment of WHT can be avoided.

Double tax treaties (DTTs)

Albania has signed 41 DTTs, of which 37 are in force.

WHT rates envisaged by applicable DTTs are provided in the following table:

Recipient	WHT (%)			Applicable from
	Dividends	Interest	Royalties	
Austria	5/15 (6)	5	5	1/1/2009
Belgium	5/15 (6)	5	5	1/1/2005
Bosnia and Herzegovina	5/10 (5)	10	10	1/1/2009

United Kingdom	5/10/15 (8)	6	N/A	1/1/2014

Notes

1. If the recipient company directly or indirectly owns 50% of the capital of the paying company, a 0% rate of the gross amount of the dividends applies. If the recipient company directly or indirectly owns

Albania

25% of the capital of the paying company, a 5% rate of the gross amount of the dividends applies. A tax rate of 15% of the gross amount of the dividends applies in all other cases.

2. A tax rate of 5% of the gross amount of the interests applies in case of interests in a contracting state, which are paid to a loan granted by a bank or any other financial institution of the other contracting state, including investment banks and savings banks and insurance. A tax rate of 10% of the gross amount of the interests applies in all other cases.
3. If the recipient company or any other governmental body is a resident of the other contracting state, a 0% rate of the gross amount of the dividend applies. If the recipient company (other than a partnership) directly or indirectly owns at least 10% of the capital of the paying company, a 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.
4. If the recipient company (other than a partnership) directly or indirectly owns at least 75% of the capital of the paying company, a 0% rate of the gross amount of the dividends applies. If the recipient company (other than a partnership) directly or indirectly owns at least 10% of the capital of the paying company, a 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.
5. If the recipient company (other than a partnership) directly or indirectly owns at least 25% of the capital of the paying company, a 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.
6. If the recipient company (other than a partnership) directly or indirectly owns at least 25% of the capital of the paying company, a 5% rate of the gross amount of the dividends applies. A tax rate of 15% of the gross amount of the dividends applies in all other cases.
7. If the recipient company (other than a partnership) directly or indirectly owns at least 25% of the capital of the paying company, a 10% rate of the gross amount of the dividends applies. A tax rate of 15% of the gross amount of the dividends applies in all other cases.
8. If the recipient company (other than a partnership) directly or indirectly owns at least 25% of the capital of the paying company or is a pension scheme, a 5% rate of the gross amount of the dividends applies. The tax rate switches to 15% of the gross amount of the dividends where those dividends are paid out of income (including gains) derived directly or indirectly from immovable property by an investment vehicle that distributes most of this income annually and whose income from such immovable property is exempted from tax. A tax rate of 10% of the gross amount of the dividends is applied in all other cases.

Tax administration

Taxable period

The tax year is the calendar year.

Tax returns

The final CIT return is due by 31 March of the year following the tax year.

Payment of tax

Predetermined advance payments of CIT are due either by the 15th day of each month or by the end of each quarter.

According to the tax laws, CIT is paid during the year on a prepayment basis. The amount of monthly CIT prepayments is determined as follows:

- For each of the following months: January, February, and March of the following fiscal period, the income tax amount of the fiscal period for the two previous years divided by 12.
- For each of the next nine months of the following fiscal period, the income tax amount of the previous fiscal period divided by 12.

The final due date for the payment of the final CIT for a fiscal year is 31 March of the following year. Note that this payment is calculated as the total amount of CIT self-assessed from the taxpayer for that particular fiscal year less total CIT instalments paid related to that year.

Companies have the obligation to pay the non-resident WHT on dividends to the tax authorities no later than 20 August of the year the financial results are approved, regardless of the fact of whether the dividend has been distributed or not to the shareholders.

Tax audit process

Generally, the Albanian tax system is based on self-assessment, which is under continuous audit by the tax authorities. Such audits include all types of taxes that the business is subject to. If any discrepancies result from the tax audit, the tax authorities issue an assessment notice, which the taxpayer might appeal within 30 calendar days.

Statute of limitations

With regard to Albania's tax administration practices, the statute of limitations of a tax audit is five years. However, the statute of limitations can be extended by 30 calendar days in cases where:

- a new assessment is made as a result of an appeal against a previous tax assessment
- a tax assessment is made as a result of a tax audit or investigation of the taxpayer by the tax administration, or
- the taxpayer is subject to a penal case related to one's tax liabilities.

The right of the taxpayer to submit a reimbursement request is limited to five years from the moment that the credit position is confirmed.

Topics of focus for tax authorities

During a tax audit, the main focus of the tax authorities is on areas related to transfer pricing, which is becoming an increasing area of focus; WHT; and aspects affecting CIT, such as expense deductibility.

Tax Certificates

If a taxpayer's financial statements and tax declarations are certified as compliant with the tax legislation by certified auditing companies, the tax administration will include this as a parameter in the taxpayer risk analysis for tax inspection purposes.

Significant developments

The supplementary Finance Act for 2015 introduced new provisions in terms of corporate income tax (*Impôt sur le Bénéfice des Sociétés* or IBS). The IBS rate is fixed at:

- 19% for manufacturing activities.
- 23% for building activities, public works, and hydraulics, as well as tourist and thermal activities, excluding travel agencies.
- 26% for all other activities not mentioned above.

For mixed activities, companies should keep management accounts to determine the portion of each activity performed. Failing this, the highest rate (i.e. 26%) will be applicable for the whole taxable profits.

Taxes on corporate income

Corporate entities are taxed on activities performed in Algeria via the following two regimes:

Standard tax regime

The standard tax regime is applicable for all tax resident companies, which are taxed in Algeria on their worldwide income. The standard tax regime includes the following taxes:

- IBS at the rate of:
 - 19% for manufacturing activities.
 - 23% for building activities, public works, and hydraulics, as well as tourist and thermal activities, excluding travel agencies.
 - 26% for all other activities not mentioned above.

For mixed activities, companies should keep management accounts to determine the portion of each activity performed. Failing this, the highest rate (i.e. 26%) will be applicable for the all of the taxable profits.

Nil corporate annual tax returns include the payment of a minimum corporate tax amounting to 10,000 Algerian dinars (DZD).

- Tax on business activity (TAP) at the rate of 1% for manufacturing activities, without any reduction. However, this tax is fixed at 2% for all other activities, with a reduction of 25% for some activities and locations, and computed based on the invoiced turnover.
- Value-added tax (VAT) at the rate of 17% or 7% (except any specific exemption). See *VAT in the Other taxes section for more information*.
- Branch tax set at the rate of 15% calculated on net profits after IBS. See the *Branch income section for more information*.

Withholding tax (WHT) regime

Non-resident entities performing service contracts in Algeria are subject to the WHT regime. The 24% WHT, which encompasses the IBS, the TAP, and the VAT, is required to be levied on services only. The calculation base is the gross amount of the services invoiced.

Local income taxes

There are no local or provincial taxes on income in Algeria. The TAP is being distributed for each district/location where there is a principal or secondary establishment.

Corporate residence

According to the provisions of Article 137 of the Algerian Tax Code, a company is considered as an Algerian tax resident entity in cases where it is incorporated under the Algerian law and is realising (i) commercial, industrial, or agricultural activities (physical presence obligation) or (ii) taxable profits through dependent agents. However, please note the existence of the permanent establishment (PE) concept, which can also refer to permanent place of business.

Permanent establishment (PE)

The Algerian legislation introduces the PE concept in Article 137 of the Algerian Tax Code, relating to territoriality rules of IBS. This Article provides that IBS is due in Algeria on:

- Profits made by companies, which, without owning in Algeria an establishment or designated representatives, directly or indirectly perform an activity in Algeria resulting in a complete cycle of commercial operations.
- Profits made by companies using the assistance of representatives in Algeria that don't have a separate professional personality from these companies.

Based on the above, a PE is created under Algerian law if a professional activity is performed in Algeria by a foreign entity and this activity is generating a complete business cycle, or in the case whereby a foreign company is making profits in Algeria through a dependent agent.

In the absence of a double tax treaty (DTT), the basic principle that governs taxation of non-resident entities is that such entities are taxable in Algeria on their Algerian-source income whatever the way and wherever the location the work is carried out, provided only that the same are rendered or used in Algeria.

As a consequence, an entity will be liable for IBS in Algeria through the execution of a related contract (services contract) to be performed in Algeria. From an Algerian point of view, such a contract is not an investment and is, by nature, temporary. Note that it is possible to execute several contracts under the same PE.

In the presence of a DTT, a foreign company will be taxed in Algeria if it has a PE only.

Other taxes**Value-added tax (VAT)**

VAT is applied on the supply of goods or services in Algeria. It includes all economic activities conducted in Algeria. The zero rate is also applied to all exports and sales to exempted sectors under specific regimes. The standard VAT rate is 17%. The reduced rate is 7%, applying to various basic items listed by law.

Monthly VAT returns and payments are due by the 20th day of the following month.

Algeria

Customs duties

Algerian imports are subject to payment of customs duties in the following increments: duty-free, 5%, 15%, or 30%.

Specific customs exemptions and temporary admission regimes are granted to the oil and gas sector and to investments under the incentives tax regime of the National Agency of Investment (ANDI in French).

Excise taxes

All tobacco products are subject to excise tax.

Property taxes

An annual property tax is levied on real estates in Algeria. Rates depend on the location of real estate.

Wealth tax

The supplementary Finance Act for 2015 introduced a wealth tax, calculated as follows:

Value of the holdings (DZD)	Rate (%)
Less than 100,000,000	0
100,000,001 to 150,000,000	0.50
150,000,001 to 250,000,000	0.75
250,000,001 to 350,000,000	1.00
350,000,001 to 450,000,000	1.25
More than 450,000,000	1.75

Transfer taxes

A transfer tax is applicable to land, buildings, and ongoing business at a rate of 5% for registration fees, plus 1% tax applicable for publication formalities of land and building transfer of ownership. Additionally, registration duties are due on the transfer of shares or movable assets and on the merger, demerger, increase, or decrease of the share capital of existing companies.

Stamp taxes

Stamp duty is levied at varying rates on transactions, including the execution of various documents and deeds.

Bank domiciliation tax

A 3% tax (*Taxe de domiciliation bancaire*) applies on the importation of services. Fixed fees are applicable for the importation of goods (DZD 10,000 per shipment).

Pollution tax

Assets that may cause environmental damage are subject to a pollution tax.

Payroll taxes

Personal income tax (PIT) is withheld on salary and assimilated income (minus employee social security contributions) by applying the progressive scale rates (with a maximum rate of 35%). Additionally, training tax and apprenticeship tax are each levied at the rate of 1% of the payroll cost.

Social security contributions

Social security contributions are levied at the rate of 35% on the gross salary (26% borne by the employer and 9% borne by the employee).

Branch income

Branch tax is levied at the rate of 15%. Note that, since 2010, it is no longer possible to register a legal branch in Algeria. However, under certain conditions, a foreign company could operate in Algeria by registering its contract with the local tax authorities by registering a tax branch/PE. Under this scenario, a 15% tax rate applies on the deemed distribution of profits after tax, which may be reduced or removed by the applicable DTT provisions.

Income determination

Taxable income is determined using the accounting profits and adding back non-deductible expenses and deducting the allowable non-taxable incomes.

Inventory valuation

The inventory valuation method for tax purposes must match the accounting method as defined by the Algerian Financial Standards (SCF).

Capital gains

Capital gains realised on the sale of assets are taxed as ordinary income when realised by a company subject to IBS. For certain assets, 30% relief is given where the assets have been held for up to three years, and 65% relief is given where the movable assets have been held longer. Capital gains on the disposal of assets can be exempted if the company commits to re-invest them within a three-year period.

Dividend income

Dividends to non-resident shareholders are subject to WHT at source of 15%. For resident shareholders, dividends are subject to WHT at source of 10%. If the dividends are received by a parent entity resident in Algeria, they are not included in the taxable profits for IBS purposes.

Interest income

Interests paid are subject to 10% WHT and are included in the income of the beneficiary and subject to IBS if the beneficiary is a legal entity. Interests paid to a non-resident are generally subject to a 10% WHT. The rate may be reduced under an applicable DTT.

Rental income

Rental income is subject to IBS when received by a taxable corporate entity in Algeria. Rental income paid to non-residents is subject to 24% WHT, except for international lease agreements, where a reduction of 60% on the taxable basis is applicable, making the effective tax rate 9.60%.

Royalty income

Subject to DTT provisions, royalties are subject to 24% WHT. A reduction of 80% on the taxable basis is applicable for software, making the effective tax rate 4.80%. This rate could change in presence of a DTT.

Unrealised gains/losses

Realised gains and losses are subject to IBS. However, unrealised gains and losses are not subject to IBS. There are specific provisions relating to the free re-evaluation of assets.

Foreign currency exchange gains/losses

Foreign realised currency exchange gains/losses are subject to IBS.

Algeria

Foreign income

Subject to DTT provisions, income from other countries is liable to IBS in Algeria, except exportation revenues and revenues realised in hard currency by resident legal entities, which are exempted.

Deductions

Depreciation and amortisation

The depreciation rates are determined according to tax administration instructions and common usage, for example:

- The depreciation rate for office items is 10% or 20%.
- The depreciation rate for industrial buildings is 5%.
- The depreciation rate for cars is 20% or 25%. The depreciation base for cars is limited to DZD 1 million.

Accelerated depreciation rates, when justified, can be used, depending on the activity sector and the economic use of the assets.

Goodwill

Under the SCF, goodwill is registered in the local books as a non-current/intangible asset of the balance sheet and cannot be amortised. Consequently, the accounting of goodwill has no fiscal impact for companies.

Start-up expenses

Start-up expenses are deductible when paid and can be capitalised and depreciated.

Interest expenses

Interest expenses are deductible when paid.

Bad debt

A bad debt provision becomes deductible when legal action has been taken to recover the debt or when evidence is provided that the receivable has become irrecoverable.

Charitable contributions

Charitable contributions are deductible, up to a limit of DZD 1 million.

Pension expenses

Pension expenses are deductible when paid.

Payments to directors

Payments to directors are deductible.

Research and development (R&D) expenses

R&D expenses are fully deductible when paid by the entity bearing the expenses and when justified. Revenues derived from R&D activities are exempted from IBS, up to a limit of 10% of the taxable benefit or DZD 100 million. The exempted amount has to be reinvested in R&D activities.

Bribes, kickbacks, and illegal payments

Bribes, kickbacks, and illegal payments are non-deductible from the IBS basis.

Fines and penalties

Fines and penalties are non-deductible from the IBS basis.

Taxes

Taxes duly paid are deductible, except for the IBS itself, which is not deductible.

Net operating losses

Carryforward losses are permitted until the fourth fiscal year following the year of loss. Carryback losses are not permitted.

Payments to foreign affiliates

Payments to foreign affiliates are deductible.

Group taxation

When an Algerian company holds 90% or more of the shares of one or more Algerian companies, the group may choose to be taxed as a single entity. Hence, IBS is payable only by the parent company. Under this system, the profits and losses of all controlled subsidiaries in Algeria are consolidated. The consolidated group may also benefit from other tax advantages, such as exemption from VAT and TAP on the inter-group transactions.

Transfer pricing

An arm's-length approach to transfer pricing applies. All entities registered with the tax department responsible for large-sized companies (*Direction des Grandes Entreprises*), in addition to the other foreign companies established in Algeria, must submit their transfer pricing documentation along with their annual tax returns (before 30 April of each year). Failing this, and should the documentation to support one's transfer pricing practices not be provided within 30 days after a first request is made by the Algerian tax administration, a fine of 25% of the deemed transferred benefits on top of the late payment penalties of 25% are applicable.

Thin capitalisation

There are no thin capitalisation provisions in Algeria.

Controlled foreign companies (CFCs)

There are no CFC rules in Algeria.

Tax credits and incentives**Investment incentives**

Tax incentives can be granted to new investors, subject to the application of a specific request with the ANDI. The tax incentives can be granted for the investment phase and for the exploitation phase. They can be granted for a period of three years or five years, depending on the kind and the size of the business.

Other incentives can be granted for start-up businesses to encourage youth investment.

Many tax regimes and tax holidays/incentives are available to attract foreign direct investors in Algeria. For example, there is a temporary exemption from IBS for investing companies creating 100 jobs or more. VAT and custom duties exemptions are also available during the investment phase.

There is also a temporary exemption from IBS for companies that invest in certain strategic sectors, such as advanced technologies, the food industry, mechanics, and the automotive sector.

There is a five-year reduction of IBS for companies whose securities are introduced on the stock exchange.

Algeria

Foreign tax credit

Algerian tax law does not provide for unilateral tax relief. A DTT, however, may provide for bilateral relief.

Withholding taxes

As explained in the Taxes on corporate income section, The WHT levied on services is 24%, which covers IBS, TAP, and VAT (i.e. three taxes in one). The calculation base is the gross amount of the services invoiced. In principle, it could be reduced or removed by a DTT.

The WHT levied on dividends (10% for residents and 15% for non-residents) and the 10% WHT levied on interest can be reduced in the presence of a DTT.

The WHT levied on royalties is 24%. In the presence of a DTT, the WHT cannot exceed 5%, 10%, or 12%, depending on different cases.

Double tax treaty (DTT) rates

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty	15	10	24 (1)
Treaty:			
Austria	5/15	0/10	10
Bahrain	0	0	(2)
Belgium	15	0/15	5/15
Bulgaria	10	10	10
Canada	15	0/15	15
Egypt	10	5	10
France	5/15 (3)	10/12 (4)	5/10/12 (5)
Germany	5/15	10	10
Italy	15	15	5/15
Lebanon	15	10	10
Portugal	10/15	15	10
Romania	15	15	15
South Africa	10/15	10	10
South Korea	5/15	10	2/10
Spain	5/15	5	7/14
Switzerland	5/15	10	10
Turkey	12	10	10
United Arab Emirates	0	0	10
Arab Maghreb Union	15	10	24

Notes

- Equipment rental may be considered as royalties, or remuneration of services entering in the scope of industrial and commercial benefits, or other remuneration. Royalties paid for the use of industrial equipment in the frame of an international leasing contract is subject to a tax allowance of 60% applied on the basis of such WHT. Thus, the effective tax rate of WHT will be $9.6\% = 24\% \times (1 - 60\%)$. For software, a reduction of 80% is applicable, making the effective tax rate 4.80%.
- Domestic rate applies. There is no reduction under the treaty.
- 5% if the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends. 15% in all other cases.
- 10% if the beneficial owner is resident in Algeria and interests sourced from France and 12% if the beneficial owner is resident in France and interests sourced from Algeria.
- 5% for royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, or films, tapes, and other means of image or sound reproduction. In other cases, 10% if royalties sourced from France and 12% if royalties sourced from Algeria.

Tax administration

Taxable period

The taxable period is the fiscal year, which corresponds generally to the calendar year. For periodic activity, the fiscal year could be different from the calendar year.

Tax returns

Companies are required to file an annual tax return before 30 April of the following year together with a detailed statement of proceeds paid to third parties with respect to subcontracted services, hiring of personnel and equipment, leases, and technical assistance services, as well as transfer pricing documentation. Monthly tax returns, which include VAT, IBS instalments, WHTs, PIT, and payroll taxes, should be filed within 20 days of the following month.

Payment of tax

IBS is paid when the tax return is submitted after offsetting the corporate income instalments already paid before the IBS liquidation. Three IBS instalments are due on 20 March, 20 June, and 20 November, equal each to 30% of the IBS of the previous year.

Tax audit process

As a general rule, the tax administration informs the company when a tax audit has to be performed. The tax audit notification indicates the audited taxes (in all cases: IBS/TAP/VAT) and the concerned period. The company can be assisted by an expert, and it can ask the tax administration about several issues subject to audit. The tax audit is concluded by sending a final tax reassessment notification.

Some discounts or moderations can be granted to a debtor that is usually punctual in meeting its tax obligations and honouring its debts. For this purpose, taxpayers may, if indigent or hinders introduce a release request to the tax administration, seek remission or moderation of direct taxes properly established. A payment schedule may be granted to a company or to an individual in order to honour, progressively, their liabilities.

Taxpayers may also apply for some reconsideration by the tax administration. There are two alternatives:

- Applications for reconsideration by the tax administration (*recours gracieux*). The application may refer to direct and assimilated taxes, related penalties, recovery penalties, and fiscal fines.
- Conditional rebate (*remise conditionnelle*). Conditional rebate could relate to penalties and fiscal fines. It may concern tax penalties applied under direct taxes, turnover taxes, registration fees, stamp duties, indirect taxes, and non-codified taxes. In order to enjoy these arrangements, the taxpayer must make a written application to the competent authority to which the conditional rebate is requested.

Statute of limitations

Subject to some exceptions, the fiscal statute of limitations is four years.

Topics of focus for tax authorities

The tax administration will focus on non-deductible expenses, the declaration of turnover, and, more often, on transfer pricing issues.

Other issues

Exchange controls

A non-resident foreign company can open a non-resident account in local currency (i.e. dinars), called an 'INR account', based on the contract to be performed and on its

Algeria

registration to tax. An INR account can be used only for the object (purpose) for which it is opened.

A non-resident foreign company can also open a CEDAC (*Compte Etranger en Dinars Algériens Convertible*) account, which must be credited only from abroad in foreign currency.

The CEDAC account allows payment in dinars as well as in hard currency. Furthermore, there is no restriction or limitation for transferring any remaining sum in the CEDAC account back abroad in foreign currency or for drawing any foreign payment instrument. The exchange rate that will be used for converting dinar to foreign currency is the official rate at the date of the debit.

Please note that a non-resident foreign company will not be able to transfer any balances from INR accounts to its CEDAC account or abroad without the express authorisation of the central bank, except in case of reimbursing temporary funding from the CEDAC account (such reimbursement must be for the exact same amount).

Please note that trading companies cannot pay any dividends to their foreign shareholders.

Choice of business entity

Foreign companies can run a business in Algeria through various forms of legal entities (e.g. joint stock company [SPA], limited liability company, partnership company), a joint venture or consortium, or PE. As for legal entities, the foreign companies should comply with the local shareholding requirement. Indeed, the foreign company cannot hold more than 49% of joint venture share-capital in Algeria.

Significant developments

Under recent legislation, the following Decrees and agreement were approved:

- Presidential Decree no. 207/15, of 5 November, which sets out the new regime applicable to the depreciation and amortisation of fixed assets of companies and other entities subject to corporate income tax (CIT).
- Presidential Decree no. 204/15, of 28 October, which amends the tax regime for provisions applicable to all commercial companies and entities subject to CIT.
- Presidential Decree no. 195/15, of 7 October, which approves the Patronage Law Regulation, was published in the Official Gazette.
- Legislative Presidential Decree no. 5/15, of 21 September, amended the consumption tax rates and customs duties applicable on imports and exports.
- The Presidential Legislative Decree no. 2/15, of 29 June, approved the Special Contribution Regime for Foreign Technical Assistance and Management Services.
- An agreement under the Foreign Account Tax Compliance Act (FATCA), between the government of Angola and the government of the United State (US), was signed on 9 November 2015. This FATCA regime aims to fight tax evasion of US taxable persons who hold financial assets through financial institutions outside the US territory.

Taxes on corporate income

CIT is levied, currently at a 30% rate, on the profits deriving from business activities carried out in Angola by resident entities or non-resident entities with a tax permanent establishment (PE), as defined by Angolan domestic legislation.

Tax residents are taxed on worldwide profits, while PEs are liable to taxation on the profits attributable to the PE, sales in Angola of goods or merchandise of the same or a similar kind to that sold by the PE, and to any other business activity that is of the same or similar kind to that conducted by the PE.

There are two CIT payer groups:

- Group A: Tax is levied on actual profits as shown in taxpayers' accounting records (e.g. public and private companies, PEs of foreign entities), adjusted accordingly with the provisions of the CIT code.
- Group B: Tax is levied on actual profits as shown in taxpayers' accounting records or on presumable profit (e.g. taxpayer not included in group A).

Special regimes, rules, and tax rates are provided for the oil and gas industry and the mining industry.

Exemptions from CIT are provided for non-resident shipping operators (as long as reciprocity exists).

Angola

Investment income tax (Imposto sobre a Aplicação de Capitais or IAC)

The IAC is due on interest, dividends, royalties, and other income of a similar nature. In Angola, the IAC Code divides such income into two taxable sections, as follows:

Section A

Section A investment income includes the following:

- Interest on credit facilities.
- Interest on loans.
- Income derived from deferred payments.

Tax is due at the moment that the interest or income is earned or at the moment when it is presumed to have been earned.

Note that a minimum annual interest rate of 6% is deemed on loan agreements and credit facilities, except if another rate is proven through a written contract.

Section B

Section B investment income includes the following:

- Dividends.
- Repatriation of profits imputable to PEs of non-residents in Angola (e.g. branches of foreign entities).
- Interest (accrued or paid), premiums on the amortisation or reimbursement, and other forms of remuneration of: (i) bonds and securities or other financial instruments issued by any company, (ii) treasury bills and treasury bonds, and (iii) Central Bank Securities.
- Capital gains.
- Capital remuneration of members of 'cooperatives'.
- Indemnities paid to entities for the suspension of their business activity.
- Bond interest.
- Treasury bond interest.
- Interest on loans, granted by third parties or shareholders.
- Income derived from profits of non-public interest entities not collected until the end of the year.
- Gambling income (premiums on gambling, prize raffles, lotteries, or any other gambling bets).
- Royalties.

For the purposes of this group of income, note that:

- The concept of royalties includes the remuneration of any kind attributed to the use of or consent to use copyrighted literature; arts or science works, including movies and films or recordings for radio or television transmissions; patents; brands; drawings or models of a plan; formulas; or secret processes. The concept of royalties also applies to the use of or the consent to use industrial, commercial, or scientific equipment and information related to an experience acquired on the industrial, commercial, or scientific sector.
- A minimum annual interest rate equal to the rate used by commercial banks on credit operations is deemed interest for shareholders' loans.

Tax is due at the moment the effective attribution of income (dividends or repatriation of profits) is earned (interest) or paid (other income).

Exemptions

The following income is exempt from the IAC:

- Interest on deferred payment of commercial transactions.

- Payment of dividends to Angolan CIT payers that hold a share higher than 25% for more than one year.
- Interest from financial products approved by the Ministry of Finance that intend to encourage savings, capped to capital invested of 500,000 Angola kwanza (AOA) for each person.
- Interest from housing saving accounts intended to encourage savings for main permanent dwelling.

IAC rate

The IAC rate is 15%, except for certain income, for which the rate is 10% or 5%.

The tax rate is 10% for the following income:

- Dividends and repatriation of profits.
- Capital remuneration of members of 'cooperatives'.
- Bond interest.
- Interest from shareholders' loans.
- Royalties.

The tax rate is 5% for the following income:

- Indemnities paid to entities for the suspension of their activity.
- Interest on bonds, securities, or other financial instruments issued by any company, Treasury Bills and Treasury Bonds, and Central Bank Securities, as well as accrued interest on these securities, when the securities have been admitted to trade on a regulated market and have been issued with a maturity equal to or in excess of three years.
- The profits of commercial companies or civil law companies operating under a commercial form, as well as the repatriation of profits imputable to PEs of non-residents in Angola, when the securities to which the profits relate have been admitted to trade on a regulated market. This rate is applicable solely during the five years following the entry into force of the IAC Code.

Assessment and payment

Tax is withheld by the payer on Section B income.

For shareholders loans, the tax on the interest paid is withheld at the same time of payment or when the interest is earned.

Third party loans are deemed to attract interest at a minimum of a 6% rate, unless a written contract provides otherwise.

On Section A income, the IAC is paid and assessed by the receiving entity, through the filing of a tax return in January of the following year the tax relates to. If the interest is paid to foreign entities, then the obligation shifts to the Angolan resident entity paying the interest.

Local income taxes

There are no local taxes on income in Angola.

Corporate residence

Business entities with a head office or effective management in Angola are considered resident entities and are taxed on worldwide income.

Angola

Permanent establishment (PE)

Angola has not signed any double tax treaties (DTTs); consequently, its domestic tax provisions apply with regards to PE.

The Angolan concept of tax PE is inspired in the United Nations (UN) Double Tax Treaty Model. A foreign entity is deemed to create a PE in Angola if it:

- has a branch, an office, or place of management in Angola
- has a construction or installation site, or provides supervision over such site, only when such site or activities exceed a period of 90 days in any given 12-month period, or
- carries out services in Angola, including consulting, acting through employees or other personnel contracted for that end, when such services are provided for a period of at least 90 days in any given period of 12 months.

Other taxes

Consumption tax

Consumption tax is due on imported or locally produced goods at rates varying from 2% up to 30%. The consumption tax is also due on some services, as follows:

Type of service	Consumption tax rate (%)
Hotel management and similar services	10
Telecommunications	5
Water supply	5
Electricity supply	5
Lease of areas designated for collection and parking of motor vehicles	5
Leasing of machinery and other equipment, if not subject to the IAC	5
Leasing of areas used for conferences, colloquiums, seminars, exhibitions, showrooms, advertising, or other events	5
Consultancy services, namely legal, tax, financial, accounting, audit, information technology (IT), engineering, architecture, economic, and real estate	5
Photographic services, film processing and imaging, IT services, and construction of web sites	5
Private security services	5
Tourism and travel services promoted by travel agencies or equivalent tour operators	5
Canteen, cafeteria, dormitory, real estate, and condominium management services	5
Access to cultural, artistic, and sporting events	5

For all the services mentioned above, the tax compliance obligations are the responsibility of the Angolan service providers, who can then add the tax to the amount charged to the acquirers. However, if the service providers are non-resident entities in Angola, the obligation will revert to the resident entities acquiring the services, if they are liable to pay CIT.

Service providers are exonerated from the obligation to pay consumption tax in the provision of services to oil and gas companies, but will only receive from the latter the amount due for the services, although the assessed consumption tax should be included in their invoices. The obligation of paying the tax falls on the oil and gas companies, pursuant to the provisions of the Consumption Tax Regulation.

The consumption tax amount supported by oil and gas companies will be deductible for petroleum income tax purposes.

Customs duties

Duties are levied on imports at *ad valorem* rates varying from 2% to 30%. The range of taxation for both consumption tax and import duties varies according to the type of goods. The rates are set out in the tariff book.

Listed equipment may be imported temporarily, if a bank guarantee is provided.

A 0.1% statistical fee and a 1% stamp duty is also due on importation plus customs fees (from 1% to 3%).

A special exemption regime applies for the oil industry for some listed equipment.

Recently, there has been an increase in custom duties taxation that applies to both imported products/goods and to products produced in Angola. In general, there are now lower tax rates for domestic products compared to imported products/goods.

Among the changes, there is an increase of the maximum rate of consumption tax from 30% to 80% on imports and from 30% to 65% on domestic production.

Further, the production of several petroleum products is now liable to consumption tax at the rates of 2% or 5%.

Stamp tax

Stamp tax is payable on a wide variety of transactions and documents, at specific amounts or at a percentage based on value.

Important examples include:

Type of operations	Stamp tax rates
On receipts	
Stamp tax on receipts (in cash or in kind) is still applicable.	The rate of stamp tax for receipts is 1%.
Financial operations	
Stamp tax is applicable to financial operations, such as credit utilisation (and not only open credit accounts) and bond guarantees, interest and commission charged by financial institution, as well as foreign withdrawals, foreigner public debt bonds, foreign notes, and coins.	Credit facilities are subject to stamp tax on the utilisation of such funds, and, depending on the period, the rates of stamp tax will vary from 0.3% to 0.5%.
As a general rule, stamp tax is due for the entity that provides the credit, and charge for the interest and commissions is then charged to the borrower or the interest/commissions debtor.	For regular credit, bank overdrafts, or credit where the period is not determined, stamp tax applies at a rate of 0.1%.
	Housing credits are subject to stamp tax at a rate 0.1%.
	Financial leasing on real estate and operational leasing of tangible assets (maintenance and technical assistance included) are subject to stamp tax at a rate of 0.3% and 0.4%, respectively.

Angola

Type of operations	Stamp tax rates
Real estate operations	
Stamp tax is due on a paid acquisition of real estate by the acquirer.	Stamp tax applies on the acquisition of real estate at a rate of 0.3%.
Stamp tax is also due on letting and sub-letting, as well as on financial leasing of real estate, except when the leasing is for a permanent dwelling, which is exempt from stamp tax.	Stamp tax applies on the registration of letting and sub-letting contracts at a rate of 0.4% or 0.1% for commercial or residential leases, respectively.
It is now clear in the law that tenants and sub-tenants are liable to stamp tax on letting and sub-letting.	
Corporate operations	
Stamp tax is due on the initial or increase of share capital, whether made in cash or in kind.	On share capital and increase of share capital, stamp tax applies at a rate of 0.1%.
Insurance	
Insurance provided by national companies is subject to stamp tax. The tax is settled by the insurance company and the cost is recharged to the insured person. The commissions generated in the insurance mediation business are also subject to stamp tax.	The stamp tax applies on the amount of premium paid, and rates may vary from 0.1% to 0.3%, depending on the policy's nature.
Premiums and commission related to life insurance products, insurance against accidents at work, health insurance, and agricultural processing and livestock insurance are exempt from stamp tax.	Commissions for mediation are subject to stamp tax at a rate of 0.4%.
Other operations	
In addition to the operations referred to above, stamp tax is also applicable to written agreements, financial and operation leasing in tangible assets, customs operations, cheques, lending, civil deposits, gambling, licences, traders' books, deeds, report, credit bonds, and transfer of business, among other acts.	The following other stamp taxes are applicable: <ul style="list-style-type: none"> • 0.2% on the transfer of industrial or agricultural business. • 1% on the import value.

The following exemptions apply:

- Credit granted for a period of up to a maximum of five days, micro-credit, credit related to young accounts and old age accounts, and others of a similar nature that does not exceed the amount of AOA 17,600 each month.
- Credit derived from credit card utilisation, when the reimbursement is made free of interest, according to the terms of the contract.
- Credits related with exportation, when duly documented with the respective customs clearance.
- Amounts due on the mortgage for the acquisition of a permanent dwelling.
- On interest and commissions charged on financial operations, such as young accounts, old age accounts, and credits related to export under the terms mentioned above.
- Interest from Treasury Bonds and Angolan Central Bank notes.
- Commissions charged for subscriptions, deposit and withdrawal from units of investment funds, as well as the charges from pension funds.
- Commission charged on the opening and utilisation of saving accounts.
- Credit operations (including interest) for periods not exceeding one year, provided these are obtained exclusively to cover treasury needs, when realised between shareholders and entities in which a direct capital shareholding not lower than 10% is held and which has remained in their ownership for a year (consecutively), or since the incorporation of the respective entity.

- Loans bearing the characteristics of shareholder loans, including the respective interest, made by shareholders to the company in respect of which an initial period not shorter than one year is stated and no reimbursement is occurred before the end of that period.
- Treasury management operations carried out between companies within the same group.
- The exemption foreseen for the reporting of securities or equivalent rights includes other financial instruments negotiated on the regulated market.
- Sale of negotiable securities.
- Transitions of real estate (within the scope of merger, demerger, or incorporation operations).
- Employment contracts.
- Export operations, except for the export of products listed in the table.
- Insurance premiums and commissions related to life insurance, work accidents, health, and agriculture and livestock insurance products.

Real estate income tax (IPU)

IPU is levied on rental income earned by individuals or companies owning real estate assets. It is based on actual rental income when the assets are leased and on the assets' registered value when the assets are not leased.

Leased assets

IPU is levied on rental income at a 25% rate.

The rental income is automatically reduced by 40% of its value, as it is presumed to finance all real estate related expenses.

Therefore, in practice, IPU applies at an effective 15% rate on rental income (i.e. 25% multiplied by 60% of rental income), with a minimum amount of 1% of the asset registered value.

A real estate asset is registered at the higher of (i) its valuation (based on criteria and tables to be published, which will take into account the area [square metres] and the characteristics of the property) or (ii) the value of its latest transfer.

Assets that are not leased

IPU is levied as follows for assets that are not leased:

Patrimonial value (AOA)	IPU rate (%)
Up to 5 million	0
Over 5 million (on the excess) (1)	0.5

Notes

1. For example, an asset registered at AOA 35 million will pay IPU only on AOA 30 million, resulting in an IPU payable of AOA 150,000.

Exemptions

The only accepted exemptions of IPU are the following:

- State public institutions and associations that are granted with the public utility statute.
- Property of Embassies or Consulates of foreign countries, provided there is reciprocity.
- Religious temples.

Angola

Payment

Rents paid by Angolan entities (individuals or companies) that carry out commercial activity must withhold the 15% IPU from rents paid. The IPU so withheld must be paid over to the tax authorities by the end of the following month.

For any other cases, owners of real estate assets must pay the IPU in January and July of the following year. At the request (by July each year) of the IPU taxpayer, if approved, the IPU is payable over four instalments in January, April, July, and October of the following year.

Filing requirements

IPU Model 1 must be filed by IPU taxpayers each January, disclosing the rents effectively received in the preceding year, distinguishing the leases agreed and received.

Real estate transfer tax (SISA)

SISA is levied at a 2% rate for all acts that involve onerous permanent or temporary transmission of real estate. The value liable to tax is the higher of (i) the sale value or (ii) the registered value.

Exemptions of SISA are only applicable to the following entities:

- State public institutions and associations that are granted with the public utility statute.
- Property of Embassies or Consulates of foreign countries, provided there is reciprocity.
- Religious temples.
- Real estate transferred for less than AOA 6,864,000 only when (i) at the first sale and (ii) for residential purposes.

Payroll taxes

Employment income tax (IRT)

Resident and non-resident individuals earning income from employment sourced in Angola (if paid for or borne by an Angolan employer) are subject to monthly taxation (IRT) at rates progressing from 0% to 17%. Angola operates a fairly straightforward pay-as-you-earn (PAYE) system, in which the Angolan employer withholds monthly from each employee's gross compensation the Angolan income tax.

Individuals do not file tax returns, as the employment income tax is withheld at source by their employer and any adjustments are also made by the employer.

Social security contributions

Social security contributions are due on the gross income of employees at rates of 3% by the employee and 8% by the employer.

The contributions are intended to cover family, pension, and unemployment protection.

Special contribution

A Special Contribution Regime for Foreign Technical Assistance and Management Services has been approved and published. This regime introduces additional restrictions on the payment for technical assistance and management services to foreign entities, particularly by requiring a special contribution of 10% on the amount of the transfer due by the entity requesting the transfer of funds abroad.

This regime applies to both private and public companies. Petroleum activities are not liable to the special contribution.

Branch income

The repatriation of profits imputable to PEs of non-residents in Angola (e.g. branches of foreign entities) is now taxable under the IAC.

Income determination

Inventory valuation

Inventory is valued at the historic acquisition cost. Any other method of valuation needs to be approved by the tax authorities.

Capital gains

According to the CIT Code, the capital gains arising from the disposal of bonds, securities, or other financial instruments issued by any company, of Treasury Bills and Bonds, as well as of Central Bank Securities, are taxable under the IAC Code. The positive balance calculated in each period, between capital losses realised, provided these do not arise within the scope of a commercial activity subject to CIT, are also taxable under the IAC.

Dividend income

Dividend income is only taxed under the IAC.

Interest income

Interest income is only taxed under the IAC.

Rental income

Rental income, as being liable to real estate income tax, is not liable to CIT. *See the Other taxes section for more information.*

Royalty income

Royalty income is only taxed under the IAC.

Foreign income

An Angolan resident CIT payer is taxed on all its foreign income. Any income tax proved to be paid outside the country for activity carried on outside the country will be credited against the CIT liability.

No tax deferral provisions exist in Angola.

Deductions

Depreciation

Depreciation should be computed using the straight-line method; any other method must be approved by the tax authorities.

The tax depreciation rates should respect the limits imposed by Presidential Decree no. 207/15, of 5 November; as an example, *please refer to the table presented below*. A transition rule is foreseen, establishing that the changes will only apply to assets that come into use following the date of entry into force of that legislation.

Type of asset	Rate (%)
Office buildings	4
Industrial buildings	4
Computers	33.33
Furniture	12.5 to 16.67

Angola

Type of asset	Rate (%)
Software	20
Light passenger vehicles	25
Start-up expenses	20

The depreciation that is not considered a tax cost or loss in a period, for exceeding the maximum depreciation allowed in that period, may be considered as a cost or loss of the subsequent period when acceptable under the CIT Code and provided the appropriate accounting adjustments are made.

An intensive operating regime is now foreseen, permitting that the depreciation calculated in accordance with the method used be increased by 25% in the case of two shifts and by 50% in the case of continuous operations.

In mergers, demergers, and sales of business, the method and depreciation/amortisation periods used post-operation are to continue the same as the pre-operation.

Interest expenses

Interest costs are accepted as deductible for tax purposes, except the interest on shareholder loans or supplementary capital.

Bad debt

Write-off of debts may only be considered as costs or losses for the period to the extent the execution, bankruptcy, or insolvency processes are duly documented through public certificates.

Provisions

A new regime applicable to deductible provisions for CIT purposes has been published. This regime applies to provisions created in fiscal year 2015 and thereafter. Nevertheless, the accumulated limits should apply to provisions constituted in previous fiscal years.

The only provisions accepted as deductible for tax purposes are:

- Doubtful debt provision within an annual limit of 4% of the taxpayer's current total account value and provided that a 10% accumulated provision limit is not exceeded. This provision should be calculated taking into consideration the ageing of the debts.
- Inventory depreciation within limits that vary from 0.5% to 12% (annual and accumulated), depending on the nature of the company's activity.
- Those respecting the limits and rules imposed by the Insurance Supervision Institute for insurance companies, as well as the Central Bank for Financial Institutions.
- Provisions for possible losses resulting from a court process.

In relation to doubtful debts, the new regime:

- Limits the provision's deductibility to credits in which the risk of collection is considered duly justified, namely, when the credits are in arrears for at least six months and there is proof of collection diligences taking place.
- Excludes from tax deductibility the provisions on credits granted to shareholders and subsidiaries (at least 10% share) unless when associated with judicial or enforcement procedures, bankruptcy, or similar activity.

In relation to the losses incurred with inventories, the new regime:

- Foresees increases and reductions on the provisions intended to cover losses incurred with inventory value, depending on the sector of activity.
- Imposes that the determination of provisions takes into account the respective market price.

- Foresees a special regime for taxpayers engaged in editorial activities.

Charitable contributions

Donations are accepted as deductible, under the patronage law, if the donations are granted to Angolan education, science, charity, and cultural institutions.

Fines and penalties

Fines and penalties are not accepted for tax purposes.

Taxes

Indirect taxes are deductible for CIT purposes. Direct taxes are non-deductible, namely the CIT itself, IRT, IAC, IPU, or taxes paid on behalf of others (e.g. social security contribution supported on behalf of the employees).

Net operating losses

Tax losses are deductible from the taxable income of the following three years. Carryback of losses is not allowed.

Payments to foreign affiliates

Payments to foreign affiliates are accepted for tax purposes, although the arm's-length principle should be respected.

Group taxation

There is a special rule for group taxation in Angola that, in general terms, allows for single taxation of the sum of the taxable income of all companies within the group. For this regime to be applied, it is mandatory that the holding company is an Angolan one.

Transfer pricing

Under a special regime for 'so called' major taxpayers, being the ones identified in a list published by the Ministry of Finance, there are additional specific reporting and administrative obligations, namely the obligation of audited accounts and to prepare special transfer pricing documentation (e.g. the same will have to, under certain requisites, organise their transfer pricing documentation and submit it to the tax authorities). This is applicable to those major taxpayers that have registered annual profits higher than 70 million United States dollars (USD).

Thin capitalisation

There are no thin capitalisation rules in Angola.

Controlled foreign companies (CFCs)

There are no CFC rules in Angola.

Tax credits and incentives

Foreign tax credit

Any income tax proved to be paid outside the country for activity carried out outside the country will be credited against the CIT liability.

Investment incentives

Profits retained and then reinvested by the company in new installations or equipment during the following three financial years may be deductible from taxable income during the following three years after the investment is finalised.

Special regulations also provide tax and customs incentives for investment projects in strategic economic development areas and sectors.

Withholding taxes

Withholding tax (WHT) is applicable on payments for services provided to resident and non-resident entities at the rate of 6.5%. For Angolan taxpayers, this is regarded as an advance payment of the CIT due at the year-end; the deduction of these WHTs against tax CIT payable is limited to a period of five years. For non-resident companies, this is a final tax.

Services that are not subject to withholding are now expressly foreseen.

Due to the IAC, Angola does not have a separate WHT for dividends, interest, and royalties (*see the Taxes on corporate income section for more information*).

Tax administration

Taxable period

The tax year follows the calendar year.

Tax returns

The annual CIT return for Group A and B must be submitted by the last business day of May and April, respectively, following the year to which the income relates.

Payment of tax

Provisory payments of CIT could be applicable for companies that are not subject to WHT or when the amounts withheld are not relevant. The provisory payment is based on 2% of the turnover generated in the first six months of the calendar year and it is payable by July (Group B) and August (Group A) of the same year.

The final tax must be settled by the last business day of the month of April (Group B) and May (Group A) of the current year. The provisional and final settlement must be computed at the rate of 30%. The lack of payment of the CIT provisional payment or final tax will be sanctioned by the application of penalties and interest according to the General Tax Code in force.

Tax audit process

The tax authorities carry out audits to the monthly and annual tax returns to identify any possible internal inconsistencies.

Taxpayers may disagree with any tax decision they are notified of and file an appeal to their respective Taxpayers Chief within 15 days upon receiving the tax notification.

Based on an unsatisfactory decision of the Taxpayers Chief, the taxpayer may also file a hierarchic appeal addressed to the National Director of Taxes (DNI) within 15 days upon receiving the tax notification.

The judicial stage, in which appeals against the final decisions of the DNI are handled by the courts, has a very low degree of success as there are still no specialised tax courts and the courts will ask for technical support from the same public entities that carry out the tax audits.

Statute of limitations

The statute of limitations in Angola is five years.

Topics of focus for tax authorities

The main areas of focus of the tax authorities relate to compliance in respect of payment in due time of any WHTs due, as well as the 1% stamp tax on receivables. Further, they usually try to investigate the deductibility of costs according to their nature.

Legal regime on invoices and equivalent documentation

Taxpayers (individuals or corporate entities whose residency, registered office, effective management, or PE is in Angola) should ensure that their software provide for the invoices to be duly dated, sequentially numbered, and include certain mandatory information, amongst which we highlight, for its novelty in regards to the previous regime, the obligation for the invoices and equivalent documents to be written in Portuguese and expressly mention that they were computer processed.

Taxpayers who issue invoices or equivalent documents that do not follow this regime will be subject to payment of fines and penalties (corresponding to 20% of the amount of the non-issued invoice, which may increase up to 40% in the event of a repeated fault), and, in the 'hands' of the acquirer, the respective cost will not be accepted as deductible for tax purposes.

Other issues***Intergovernmental agreements (IGAs)***

An agreement under the Foreign Account Tax Compliance Act (FATCA), between the government of Angola and the government of the United State, was signed on 9 November 2015. This FATCA regime aims to fight tax evasion of US taxable persons who hold financial assets through financial institutions outside the US territory.

Significant developments

The government proposed in the 2016 budget that personal income tax (PIT) and pay-as-you-earn (PAYE) would be eliminated and replaced by an Unincorporated Business Tax. In addition, the Antigua and Barbuda Revenue Recovery Charge (RRC) would be increased from 10% to 13%. The date for the implementation of these changes was initially scheduled for 1 April 2016; however, the relevant legislation and/or amendments have not been finalised, and implementation is now scheduled for 1 July 2016.

Taxes on corporate income

Companies incorporated in Antigua and Barbuda pay corporate income tax (CIT) on their worldwide income, with relief available under existing double taxation agreements (DTAs). Non-resident companies deriving income from Antigua and Barbuda are liable for CIT and should be registered if they have a physical presence in Antigua and Barbuda.

Antigua and Barbuda imposes a flat CIT rate of 25%.

Taxable income or chargeable income is ascertained by deducting from income all expenses that are wholly and exclusively incurred during the year for the production of that income. Chargeable income is normally arrived at by adjusting the net profit per the financial statements for non-taxable income, non-deductible expenses, and prior period losses of up to 50% of chargeable income.

Where a person resident in Antigua and Barbuda makes to another person not resident in Antigua and Barbuda a payment other than interest, that person shall deduct or withhold 25% of that amount.

Reduced CIT rate for certain financial institutions

Financial institutions licensed under the Banking Act that maintain, throughout the tax year, residential mortgage rates at or below 7% are subject to a reduced CIT rate of 22.5%.

Corporate residence

A corporation is deemed to be a resident if it is incorporated in Antigua and Barbuda, if it is registered as an external company doing business in Antigua and Barbuda, or if the central management and control of its business are exercised in Antigua and Barbuda.

Permanent establishment (PE)

The concept of a PE is described within a number of Antigua and Barbuda's DTAs. A PE is, in general, created in line with the Organisation for Economic Co-operation and Development (OECD) Model Convention.

A PE is not defined in the Income Tax Act; however, any company that would meet the general definition of a PE must be registered.

Other taxes

Antigua and Barbuda Sales Tax (ABST)

ABST is an indirect tax and is levied at the rate of 15% on the value of a wide range of goods and services imported or supplied in Antigua and Barbuda by ABST-registered persons. The rate applied in respect of hotel accommodation is 12.5%.

A number of services, including financial services, local transport, the sale of residential land, education, long-term accommodation (greater than 45 days), and medical and veterinary services, are exempt. Intergroup transactions are taxable.

Persons operating under the ABST regime must be registered for ABST. The threshold for ABST registration is 300,000 East Caribbean dollars (XCD) in taxable activity per 12-month period. A period in the ABST Act represents one month.

Certain supplies are zero-rated, including exports, basic food items, water, electricity for residential use, sale of new residential property, construction of new residential premises, and fuel.

Registered persons may deduct input tax from their output tax in calculating the tax payable for that ABST accounting period. Where input tax exceeds output tax, the registrant will be entitled to a refund of ABST.

Customs duties

All imports are subject to customs duties, ABST, RRC, and an environmental levy. In all instances, certain exemptions will apply.

Customs duty is levied on a wide range of imported goods at rates from 0% to 70% as specified in the Custom Duties Act. Customs duty is levied on goods based on the cost, insurance, and freight (CIF) values and rates determined by the Caribbean Community (CARICOM) Common External Tariff.

Antigua and Barbuda Revenue Recovery Charge (RRC)

The Antigua and Barbuda RRC is applied at a flat rate of 10% on the CIF value on all goods imported into or produced in Antigua and Barbuda. Exemptions will include entities with which the government has International Assistance Agreements, certain government entities, and most supplies or imports of fuel.

Excise taxes

There are no excise taxes in Antigua and Barbuda.

Property taxes

Property tax is levied annually at graduated rates on the basis of the market value of real property (as assessed by the Property Valuation Department) and its use (residential or commercial).

Property tax rates are as follows:

- Agricultural land: 0.10%.

Antigua and Barbuda

- Residential land: 0.20%.
- Residential building: 0.30%.
- Buildings classified as other property: 0.50%.
- Land classified as other property: 0.40%.

Allowances and tax rebates are available as follows:

- Dwelling house allowance of XCD 150,000 from the taxable value.
- 5% rebate for payment of tax on or before the due date.
- New dwelling house will be exempt from tax for the first two years of being habitable.
- Between 25% and 100% tax rebate available for special development property and property for public use; 25% for hotels.

Non-citizens undeveloped land tax

Undeveloped land tax is levied on the basis of the value of land owned by non-citizens that has not been developed. The tax takes effect from the date of declaration by the government.

Rates of tax are as follows:

- First year of ownership: 10%.
- Second year of ownership: 15%.
- Third and subsequent years of ownership: 20%.

The charge is cumulative and based on market value as assessed.

Stamp tax

Stamp tax applies to a very wide range of transactions (e.g. bill of sale, lease, mortgage, contract, bill of lading). Stamp tax on transfer of real property and shares are specifically covered below.

Transfer of real property

Stamp tax is imposed on both the buyer and the seller and is levied on the consideration for the sale or the value of property (as assessed by the Chief Valuation Officer), whichever is higher. The stamp tax for vendors is 7.5%, and the stamp tax for purchasers is 2.5%.

Non-citizens vendors are required to pay a land value appreciation tax at the rate of 5%, which is assessed on the difference between the value of property when purchased, plus improvements, and the value of property at the time of sale.

Non-citizens purchasers are also required to pay 5% of the value of property with reference to a non-citizens licence required to hold property in Antigua and Barbuda.

Transfer of shares

Stamp tax is imposed on both the buyer and the seller of shares and is levied on the market value of the shares or book value of the shares, whichever is higher. The stamp tax for vendors is 5%, and the stamp tax for purchasers is 2.5%.

A non-citizen must obtain a licence (at a cost of XCD 400) to hold shares or be a director in a company that owns land or has a lease on land in excess of five acres for a period greater than five years.

Environmental levy

Environmental levy is calculated based on dollar value rates from XCD 0.25 to XCD 2,000 and is used to finance the cost of protecting and preserving the environment.

Life insurance premium tax

A premium tax of 3% is levied on the premium income (net of agent's commission) of all life insurance companies, whether resident or non-resident.

General insurance premium tax

A premium tax of 3% is levied on the premium income, excluding motor business (net of agent's commission), of all general insurance companies, whether resident or non-resident.

Statutory payroll deductions

Social security contributions

The employer portion of social security contributions is 6% of chargeable income of up to XCD 6,500 per month.

Medical benefits

The employer portion of medical benefits payments is 3.5% of salary and wages of an employee who is between 16 and 60 years of age.

Branch income

Branch income is taxed on the same basis and at the same rate as that of corporations. A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Recharges of expenses from head office to the branch are subject to withholding tax (WHT) at a rate of 25%. The recharges have to be justifiable, consistent, and cannot just be based on a percentage allocation.

Income determination

Inventory valuation

Inventories are generally stated at the lower of cost or net realisable value. First in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Commissioner of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. Last in first out (LIFO) is not permitted for tax or book purposes.

Capital gains

Capital gains are not subject to tax in Antigua and Barbuda.

Dividend income

Dividends received by a company resident in Antigua and Barbuda from another company resident in Antigua and Barbuda are taxed at the CIT rate of 25%. Credit is given to the recipient for the tax already paid on the dividend in computing the tax liability.

Stock dividends

An Antigua and Barbuda corporation may distribute a tax-free stock dividend proportionately to all shareholders.

Interest income

Interest income received by a company registered in Antigua and Barbuda is taxed at the CIT rate of 25%. Interest earned on local and other CARICOM government securities are normally exempt from the payment of CIT.

Antigua and Barbuda

Foreign income

An Antigua and Barbuda corporation is taxed on foreign branch income as earned and on foreign dividends as received. Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom [UK] and CARICOM). There is also relief from British Commonwealth taxes. See *Foreign tax credit in the Tax credits and incentives section for more information.*

Deductions

Depreciation

Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates (*see table below*). Initial allowances are granted on industrial buildings and on capital expenditures incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of 2% is granted on all buildings. Conformity between book and tax depreciation is not required.

Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

Assets	Depreciation rate (%)
Building, roads, fencing, and pavements	2.00
Plant and machinery, generators	10.00
Furniture, fixtures, fittings, and equipment	10.00
Air conditioning units	12.50
Motor vehicles	20.00
Computer hardware, accessories, and software	33.33

Goodwill

Goodwill and trademarks are not depreciating assets, and amortisation is not allowed.

Start-up expenses

There are no specific provisions in relation to deductions for start-up expenses. However, certain start-up expenses, such as costs of incorporation and other initial start-up costs, may qualify for a five year straight-line write-off.

Interest expenses

No deduction is allowed for interest on loans owing to shareholders, directors, their spouses, children or relatives, or to any related parties. Only interest paid to banks and financial institutions licensed under the Financial Institutions (Non-Banking) Act on loans borrowed at commercial rates and terms is deductible.

Bad debt

General allowances made for bad debts are not deductible. For a bad debt claim to be deductible, it must be specific and the taxpayer must prove to the Inland Revenue Department (IRD) that the debt arose during the year.

Cultural and social contributions

A deduction of 50% of all substantial contributions made by any person with respect to sport, education, or culture in Antigua and Barbuda is allowed against a person's assessable income from trade, business, or profession. Contributions must be in excess of XCD 10,000 in any assessment year, and deductions during any assessment year will be limited to XCD 250,000.

Restriction on rents paid

Rents paid by a company to shareholders, directors, their spouses, children or relatives, or to any related parties in excess of 5% of the otherwise chargeable profits of the company may not be deducted.

Restriction on compensation

Salaries, wages, directors' fees, and other payments made for services rendered by the shareholders, directors, their spouses, children, or relatives in excess of 25% of otherwise chargeable profits may not be deducted.

Fines and penalties

Fines and penalties imposed under Antigua and Barbuda tax law are not deductible expenses.

Taxes

There are no provisions in the Income Tax Act in relation to the deductibility of taxes paid by a company. However, in general, ABST, ABST input tax credits, and adjustments under the ABST Act are disregarded for income tax purposes. Other taxes, including property tax, transfer taxes, payroll taxes, and insurance premium taxes, except income tax and share transfer tax, are deductible to the extent they are incurred in producing chargeable income.

Net operating losses

Income tax losses may be carried forward for six years following the year in which the loss was incurred. However, the chargeable income of a company in any one income year may not be reduced by more than one half by losses brought forward. No carryback of losses is permitted.

Payments to foreign affiliates

An Antigua and Barbuda corporation may claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm's-length test and WHTs.

Group taxation

Group taxation is not permitted in Antigua and Barbuda.

Transfer pricing

There are no provisions for transfer pricing in the tax laws of Antigua and Barbuda.

Thin capitalisation

There are no provisions for thin capitalisation in the tax laws of Antigua and Barbuda.

Controlled foreign companies (CFCs)

There are no special rules relating to CFCs.

Tax credits and incentives

Tax incentives are currently available under the following legislation.

Fiscal Incentives Ordinance (1975)

The Fiscal Incentive Ordinance provides manufacturers of an 'approved product' with an exemption from taxes for varying periods, up to a maximum of 15 years. After the period of exemption, relief by way of tax credits of up to 50% of CIT paid on profits derived from certain export sales may be obtained. The net losses arising during the

Antigua and Barbuda

tax holiday period (i.e. the excess of accumulated tax losses over total profits) may be carried forward and relieved against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

International Business Corporations (IBC) Act (1982)

An IBC is an entity incorporated under the IBC Act for the purpose of carrying on international trade or business. The IBC structure allows for a comprehensive range of business opportunities, including international banking, trust business, insurance, manufacturing, and other international trade activities, to persons outside of Antigua and Barbuda within a tax-free environment. An IBC is exempt from the payment of CIT, ABST, and WHT.

The Investment Authority Act (2006)

The Investment Authority Act provides the framework for the promotion of investment opportunities in Antigua and Barbuda by introducing a system of registration of businesses, an investment code, and a range of incentives that are available to both resident and non-resident investors. The available incentives and concessions to which an investor may be entitled for consideration are as follows:

- Exemption from the payment of customs duty.
- Reduction of property tax.
- Exemption from CIT.
- Reduction of stamp duty.
- Exemption from WHT.

The amount of the incentives and concessions depend on the amount of the investment and the number of employees in the proposed business.

The investment categories are as follows:

- Capital investment of up to XCD 1 million or employs up to 26 persons: This investor may qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 10%, exemption from the payment of CIT and WHT for up to three years, and a reduction of stamp duty by up to 10% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 1 million, employs over 26 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 20%, exemption from the payment of CIT and WHT for up to five years, and a reduction of stamp duty by up to 20% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 10 million, employs over 51 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 30%, exemption from the payment of CIT and WHT for up to ten years, and a reduction of stamp duty by up to 30% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 25 million, employs over 75 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 40%, exemption from the payment of CIT and WHT for up to 12 years, and a reduction of stamp duty by up to 40% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 75 million, employs over 100 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 50%, exemption from the payment of CIT and

WHT for up to 15 years, and a reduction of stamp duty by up to 50% on the sale of land and buildings used in the business operation.

- Capital investment of over XCD 100 million, employs over 150 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 75%, exemption from the payment of CIT and WHT for up to 20 years, and a reduction of stamp duty by up to 75% on the sale of land and buildings used in the business operation.

The Tourism and Business (Special Incentives) Act 2013

The Tourism and Business (Special Incentives) Act provides special incentives in the areas of tourism industry and other specified business activities for a period of two years unless it is extended by resolution of Parliament.

The available incentives and concessions to which an investor would be entitled for consideration are as follows:

- Exemption from the payment of customs duties, ABST, and RRC.
- Reduction of property tax.
- Exemption from income tax.
- Reduction of stamp duty on land transfers and non-citizen licences.
- Exemption from WHT.

The amount of the incentives and concessions will depend on the amount of the investment in the proposed business.

The investment categories are as follows:

- Capital investment of up to XCD 1 million will receive no special incentives.
- Capital investment of XCD 1 million to XCD 10 million: This investor could qualify for exemption from the payment of customs duties on certain imports, reduction in property tax of up to 25%, exemption from the payment of income tax and WHT for up to six years with the ability to carry forward losses up to three years, and a reduction of stamp duty on land transfers and non-citizen licences of up to 25% on the sale of land and buildings used in the business operation.
- Capital investment of XCD 10 million to XCD 25 million: This investor could qualify for exemption from the payment of customs duties on certain imports, reduction in property tax of up to 35%, exemption from the payment of income tax and WHT for up to 12 years with the ability to carry forward losses up to four years, and a reduction of stamp duty on land transfers and non-citizen licences of up to 35% on the sale of land and buildings used in the business operation.
- Capital investment of XCD 25 million to XCD 75 million: This investor could qualify for exemption from the payment of customs duties on certain imports, waiver of customs duties, ABST, and RRC on all capital items imported, reduction in property tax of up to 50%, exemption from the payment of income tax and WHT for up to 15 years with the ability to carry forward losses up to five years, and a reduction of stamp duty on land transfers and non-citizen licences of up to 50% on the sale of land and buildings used in the business operation.
- Capital investment of XCD 75 million to XCD 100 million: This investor could qualify for exemption from the payment of customs duties on certain imports, waiver of customs duties, ABST, and RRC on all capital items imported, reduction in property tax of up to 75%, exemption from the payment of income tax and WHT for up to 20 years with the ability to carry forward losses up to 7 years, and a reduction of stamp duty on land transfers and non-citizen licences of up to 75% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 100 million: This investor could qualify for exemption from the payment of customs duties on certain imports, waiver of customs duties, ABST, and RRC on all capital items imported, waiver of all property tax, exemption

Antigua and Barbuda

from the payment of income tax and WHT for up to 25 years with the ability to carry forward losses up to 7 years, and waiver of all stamp duty on land transfers and non-citizen licences on the sale of land and buildings used in the business operation.

The Small Business Development Act (2007)

The Small Business Development Act provides the framework for the growth of the small business sector in Antigua and Barbuda by introducing a system of registration of small businesses and a range of concessions that are available to the business. The available concessions to any small business that would be entitled for consideration are as follows:

- Concession on customs duty of up to 100% (includes raw material, building material, equipment, vehicles, furniture, furnishings, appliances, fixtures and fittings, tools, spare parts, and machinery and equipment used in the construction and operation of the business).
- Property tax reduction of up to 75%.
- CIT exemption for a period not exceeding five years.
- CIT exemption after the initial five year period of up to 10%.
- WHT exemption for a period of up to three years.
- Stamp duty exemption on the registration of a mortgage.
- Stamp duty exemption on the transfer of property and any applicable non-citizen land holding licence.

A small business to which this Act applies must meet all of the following criteria:

- No more than 25 employees.
- Not a wholly owned or majority owned business or subsidiary of a larger company.
- Capital investment not exceeding XCD 3 million.
- Annual sales that do not exceed XCD 2 million.
- Majority owned by citizens of Antigua and Barbuda, or majority owned by non-citizens with all of the following restrictions:
 - Over 50% of the products must be exported.
 - Minimum investment of XCD 500,000.
 - At least 50% of the employees must be citizens of Antigua and Barbuda.
 - At least 40% of the goods and services used in production must be acquired from businesses in Antigua and Barbuda.

Foreign tax credit

Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom and CARICOM). A foreign tax credit is also available to persons in Antigua and Barbuda who have paid or are liable to pay British Commonwealth income tax.

Residents

The relief available from tax in Antigua and Barbuda for a person resident in Antigua and Barbuda from tax payable in Antigua and Barbuda is the British Commonwealth income tax rate if that rate does not exceed one half the tax rate in Antigua and Barbuda. If the British Commonwealth income tax rate exceeds the Antigua and Barbuda tax rate, then the relief will be limited to one half the tax rate in Antigua and Barbuda.

Non-residents

The relief available from tax in Antigua and Barbuda for a person not resident in Antigua and Barbuda from tax payable in Antigua and Barbuda is one half the British Commonwealth income tax rate if that rate does not exceed one half the tax rate in Antigua and Barbuda. If the British Commonwealth income tax rate exceeds the Antigua and Barbuda tax rate, then the relief will be limited to the amount by which it exceeded one half the rate of British Commonwealth income tax.

No relief is available unless similar provisions exist in the laws of the relevant British Commonwealth country.

Withholding taxes

Tax is currently withheld from income as follows:

Recipient	WHT (%)				
	Dividends	Dividends (preferred shares)	Interest and rentals	Management fees, royalties, and other payments to a non-resident	Interest on bank deposits
Resident corporations and individuals	0	0	0	0	0
Non-resident corporations	25	25	25	25	25
Non-resident individuals	25	25	20	25	0
Residents of a CARICOM member state:					
Corporations	0	15	15	15	15
Individuals	0	15	15	15	0

Note that interest payments on bank deposits made to non-resident individuals are not subject to WHT. Interest payments on bank deposits made to non-resident corporations are taxed at the rate of 25%.

Where a non-resident lends money at arm's length for the purpose of promoting industrial, commercial, scientific, housing, or other development, the rate of WHT is 10%. Prior approval must be sought from the Commissioner of Inland Revenue, and it is recommended that Cabinet approval also be obtained.

WHT becomes due at the time of payment or accrual and must be paid within seven days thereof.

Tax treaties

There is a tax treaty with the United Kingdom and a DTA between member states of CARICOM.

The UK tax treaty provides that persons in either the United Kingdom or Antigua and Barbuda are entitled to relief from CIT and WHT. The treaty allows for the following relief:

- Where a UK resident is liable to pay income tax in the United Kingdom in respect of the same income that is taxable in Antigua and Barbuda, one will be entitled to relief at a rate that is equal to the amount by which the tax rate in Antigua and Barbuda exceeds one half the UK rate.
- If the tax rate in Antigua and Barbuda exceeds the UK tax rate, then one will be entitled only to relief at a rate equal to one half the UK tax rate.

Tax administration

Taxable period

Taxes are assessed on a fiscal-year basis.

Antigua and Barbuda

Tax returns

The taxpayer must file a CIT return, which includes audited financial statements, within three months of the fiscal-year end. The authorities will subsequently raise an assessment.

If a return is not filed on a timely basis, the authorities have the power to issue estimated assessments. There is a 5% penalty for late filing (minimum of XCD 500). The taxpayer can object to assessments raised within 30 days and ask the Commissioner of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Tax Appeal Board. The Commissioner of Inland Revenue has the power to enforce the collection of tax prior to the determination of any objection or appeal. The Commissioner also has the discretion to order a stay on the collection and payment of all or part of any assessed tax until such time as the objection or appeal is finalised if it would be unjust not to do so. Assessments for the past six years may be reviewed and revised.

Payment of tax

Advance tax is payable in monthly instalments and is ordinarily based on the tax chargeable and assessed in the previous fiscal year. The standard amount of each instalment is determined as one-twelfth of the tax chargeable in the previous fiscal year. If the assessment for the prior year has not been finalised, the Commissioner of Inland Revenue can raise an assessment based on best judgment.

The balance of tax due after deduction of advance tax, as notified in the assessment, is payable at the time of submitting the annual CIT return, which must not be later than three months after the financial year-end or one month after service of the final assessment.

Tax is deemed to be in default if not paid within 30 days of the date on which it becomes due and payable. A penalty of 20% and interest of 1% per month is charged on unpaid taxes in default.

Tax audit process

The Antigua and Barbuda tax system for companies is based on self-assessment; however, the IRD undertakes ongoing compliance activities to ensure that corporations are meeting their tax obligation. There is no specific approach used by the IRD in relation to compliance and audit activities. Compliance activities generally take the form of reviews of specific issues and audits.

Statute of limitations

The IRD can reassess CIT returns within a six-year period. In addition, the IRD can make additional assessments of tax, interest, or penalties.

Topics of focus for tax authorities

The IRD does not have any specific compliance program; however, when an audit is done, the focus is mainly on the detection of basic non-compliance, such as omission of income, inclusion of non-deductible expenses, and classification of items between expenses and capital items.

Other issues

Tax Information Exchange Agreements (TIEAs)

TIEAs provide for the exchange of information on tax matters. TIEAs with Aruba, Australia, Denmark, Finland, France, Germany, Iceland, Ireland, Liechtenstein, the Netherlands, Netherlands Antilles, Norway, Sweden, the United Kingdom, and the United States are in force.

Foreign Account Tax Compliance Act (FATCA)

As of 3 June 2014, the United States and Antigua and Barbuda have reached an agreement in substance, and Antigua and Barbuda has consented to disclose this status. In accordance with this status, the text of such intergovernmental agreement (IGA) has not been released, and financial institutions in Antigua and Barbuda are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

Standard for Automatic Exchange of Financial Account Information

On 29 December 2015, the Argentine Federal Tax Authorities (AFIP) issued General Resolution 3826 implementing the Standard for Automatic Exchange of Financial Account Information in Argentina.

The above-mentioned resolution sets forth a reporting and due diligence regime addressed to local financial institutions that are liable to exchange information on their reportable accounts in accordance with the Common Reporting Standard (CRS) issued by the Organisation for Economic Co-operation and Development (OECD).

Such a resolution establishes the type of information to be reported as well as the penalties that may apply in case of failure to fulfil such reporting obligations. Such penalties, besides the ones that may apply in line with the Tax Procedure Law and with the administrative and judicial procedures that may take place, include, among others, the framing of such financial institution in an increasing category of risk of being inspected (Risk Profile System); the suspension or exclusion from the Special Tax Records; and/or the suspension of the exclusion and/or non-withholding certificate processing that may have been applied by the corresponding liable party.

The regime entered into force on 1 January 2016, and the first reporting (relating to information from calendar year 2016) is expected to be in May 2017.

Value-added tax (VAT) special payment regime for micro, medium, and small taxpayers

On 17 May 2016, the AFIP issued General Resolution 3878 implementing a special VAT payment regime applicable to micro, small, and medium companies.

Under the new payment scheme, qualifying taxpayers may opt to file their VAT returns on a monthly basis, but perform the payment of such tax returns on a quarterly basis.

Additionally, those taxpayers covered by the regime are able to obtain VAT non-withholding certificates under a simplified regime.

Extended term for settlement of foreign currency from exportations

On 10 May 2016, the Department of Foreign Commerce published in the Official Gazette Resolution 91/2016 by means of which there were modified the general terms within which foreign currency arising from the collection of invoices from exportation of goods must be settled in the Exchange Currency Market (MULC for its Spanish acronym).

As from the Official Gazette publication date, the liquidation term for all custom positions not due at that date is 365 days as from the exportation date.

Taxes on corporate income

Profits tax

The rate of profits tax on net taxable business profits is 35%. Legal entities resident in Argentina are subject to tax on Argentine and foreign-source income. Resident legal entities are able to claim any similar taxes actually paid abroad on foreign-source income as a tax credit. The tax rate applies on net income determined on a worldwide basis.

Corporations, limited liability partnerships (LLPs), and branches, as well as other entities, are required to make a flat and final income tax withholding of 35% from dividend payments to resident or non-residents beneficiaries, to the extent that the amount of such dividends exceeds the net taxable income determined at a corporate level in accordance with the general tax rules (so-called 'equalisation tax').

The Argentine government has also established a 10% tax rate on dividend distributions, without prejudice to the application of the so-called 'equalisation tax', if applicable. The corresponding tax has to be withheld and remitted to the tax authorities by the distributing entity.

Argentine-source income (e.g. royalties, interests) received by foreign entities is subject to withholding tax (WHT) in full and final settlement at source (*see the Withholding taxes section*).

Tax on minimum notional income

In addition to the profits tax, there is a tax on minimum notional income. The rate is 1% on the value of fixed and current assets. The presumed tax, imposed annually, is applied only in excess of the profits tax of the same fiscal year. In addition, payment of this presumed tax, not offset by the profits tax, will be treated as payment on account of profits tax chargeable during a maximum period of ten years.

Banking and insurance entities are only subject to this tax on 20% of the corresponding taxable assets.

Local income taxes

For a description of the local (jurisdictional) tax on gross revenues from the sale of goods and services, see Turnover tax in the Other taxes section.

Corporate residence

Corporate residence is determined on the basis of centres of activity, which may be the location of a company's economic activity or management activity.

Permanent establishment (PE)

Centres of activity in Argentina of non-Argentine corporations are treated as PEs.

Other taxes

Value-added tax (VAT)

VAT is assessable on the sales value of products (e.g. raw materials, produce, finished or partly finished merchandise) with few exemptions, most services (e.g. construction, utilities, professional and personal services not derived from employment, rental), and on import of goods and services. The VAT rate is 21%, although certain specific items are subject to a 27% or 10.5% rate. VAT is payable by filing monthly tax returns.

Argentina

The increased rate of 27% applies to ‘utilities services’ (e.g. telecommunications, household gas, running water, sewerage, and energy) not rendered to dwelling-purposes real estate.

A reduced rate of 10.5% applies to certain transactions, including (but not limited to) the following:

- Construction of housing.
- Interest and other costs on personal loans granted to final consumers by financial institutions.
- Sales and imports of living bovine animals, supply of publicity and advertising in some specific cases.
- Any passenger transportation operating inside the country when the distance does not exceed 100 km.
- Medical assistance in some specific cases.
- Certain capital goods, depending on the Customs Duty Code.

VAT paid on purchases, final imports, and rental of automobiles not considered as inventory cannot be computed by the purchaser as a VAT credit. The same tax treatment applies to other services, such as those provided by restaurants, hotels, and garages.

VAT exemptions

Among others, the following transactions are exempt from VAT:

- Sales of books, ordinary natural water, common bread, milk, medicine, postage stamps, aircraft used in commercial activities and for defence or internal safety, and ships or boats acquired by the national government.
- Supply of certain services, such as services rendered by the government (national, provincial, or local) or by public institutions; school or university education provided by private institutions subject to public educational programmes; cultural services supplied by religious institutions; hospital and medical care and related activities; transportation services for sick or injured persons in vehicles specially designed for the purpose; tickets for theatre, cinema, musical shows, and sport events; the production and distribution of motion picture films; local transport of passengers (e.g. taxis, buses) up to 100 km; and international transportation.
- Rental of real estate for housing purposes.

VAT exemption on importation

The following import transactions are also exempted from VAT:

- Final importation of goods qualifying for exemption from customs duties under special regimes for tourists, scientists and technicians, diplomatic agents, etc.
- Final importation of samples and parcels exempted from customs duties.

VAT export reimbursement regime

Exports of goods and services are treated as zero-rated transactions. Nevertheless, input VAT related to these transactions can either be used as a credit against output VAT or refunded pursuant to a special procedure.

Services rendered within the country shall be deemed to be exports if they are effectively applied or economically utilised outside the country.

Exporters must file an export return with the tax authorities, reporting the VAT receivables related to their exports to be reimbursed on VAT paid in relation to the export operations. This return has to be filed within the following tax period in which the export took place. A report certified by a public accountant with respect to the value, registrations, and other characteristics related to the refund must be attached to the export return.

The tax credit related to exports and other taxable activities can only be refunded in proportion to the exports, and can be fully refunded to a cap of 21% of the freight on board (FOB) value of the exported products.

There is no specific method stated in the legislation for allocating the tax credit related to exports, but taxpayers are able to use any methods of calculation that would be suitable to their business model. This calculation has to be approved by the tax authorities.

Finally, it is important to highlight that the tax authorities have to approve the tax credit to be refunded.

Electronic invoicing

As of 1 July 2015, all VAT-registered taxpayers are compelled to use electronic invoices. In order to apply for this regime, an authorisation must be obtained from the tax authorities. As a result, the tax authorities will assign an Electronic Authorization Code (Código de Autorización Electrónico or CAE), which is included in every issued electronic invoice.

Import and export duties

The levels of import duty currently range between 0% and 35%, except in cases where a specific minimum duty is applied or that involve merchandise with a specific treatment. These percentages were established considering the individual competitive conditions prevailing in different production sectors and the relative advantages of contributing to the introduction of equipment and technology for local industry. In general, merchandise originating from Latin America Integration Association (LAIA) countries is entitled to preferential duty.

In the case of export transactions, goods are valued based on the FOB clause and the approach is based on their theoretical value, rather than a positive basis as in the case of imports.

Definitive exports of certain goods are subject to export duties. The rates vary from 5% to 45%, depending on the tariff code of the merchandise. In December 2015, the Executive Branch issued Decree No. 133/2015, by which it eliminated the export duties on most agricultural and industrial products.

Excise taxes

Excise tax is assessable on a wide variety of items sold in Argentina (not on exports), principally on tobacco, wines, soft drinks, spirits, gasoline, lubricants, insurance premiums, automobile tyres, mobile services, perfumes, jewellery, and precious stones. The bases of the assessment and tax rate of some items are as follows:

Products	Rates (%)	
	Nominal	Effective
Tobacco	16 to 20/60	19.05 to 25
Alcoholic drinks	20	25
Beers	8	8.70
Soft drinks	4 to 8	4.17 to 8.70
Jewellery and precious stones	20	25
Automobiles, motor vehicles, motor vessels, motor homes, etc.	30/50	43/100

Stamp tax

Stamp tax is levied by each of the 24 jurisdictions, and applies principally to contracts and agreements, deeds, mortgages, and other obligations, agreements, and discharges of a civil, financial, or commercial nature of which there is written evidence or, in certain

Argentina

instances, that are the subject of entries in books of account. The average tax rate is 1% applicable on the economic value of the contract.

In the city of Buenos Aires, the standard tax rate is 1% of the aggregate amount of the transactions, contracts, and deeds that are subject to the stamp tax. Special rates of 0.5%, 1.2%, 3%, and 3.6% are also established; and, in the case of transactions involving uncertain consideration, a fixed tax of 2,500 Argentine pesos (ARS) is applicable (on the fulfilment of certain conditions).

Turnover tax (gross income tax)

Each of the 24 jurisdictions into which Argentina is divided imposes a tax on gross revenues from the sale of goods and services. Exports of goods are exempt, and certain industries are subject to a reduced tax rate. Rates, rules, and assessment procedures are determined locally.

Information on tax rates of the economically largest jurisdictions is provided as follows:

Jurisdiction	General rate (%)	Commerce (%)	Services (%)	Industry (%)
Province of Buenos Aires	4.5	3 to 5	3.5 to 5.5	1.75 to 4
City of Buenos Aires	3 to 5	3 to 5	3 to 5	1 to 4
Córdoba	4	2 to 7.5	2 to 10.5	0.25 to 1.5
Mendoza	4	4 to 8	4 to 6	2/3 to 7
Santa Cruz	3	3 to 5	3	1.75
Santa Fe	3.5/3.8 to 4.5	3 to 4.5	1 to 4.5	1.75 to 4.5

Real estate tax

Similar to the turnover tax, real estate tax is imposed by each Argentine jurisdiction. It is levied on the ownership of real estate located in the territory of the jurisdiction.

Real estate tax is usually assessed by the local tax authority, considering the property's fiscal value and the tax rates established by the current year tax law.

Tax on financial transactions - on credits and debits on bank accounts

Bank account movements (deposits and withdrawals) are subject to a national tax on financial transactions at the following rates:

- 0.6% of deposits and withdrawals in bank accounts opened in local financial entities.
- 1.2% of any transactions made in a bank without using a bank account.

34% or 17% of the tax on financial transactions effectively paid on bank account deposit transactions (0.6%) and movement of funds (1.2%), respectively, is creditable against profits tax and minimum notional income tax and/or respective tax advances.

Wealth tax

An annual wealth tax is levied on the shares or holding in the capital of local companies owned by individuals or undivided estates domiciled in Argentina or abroad, and/or companies and/or any other type of legal person domiciled abroad. It shall be assessed and paid directly by the local company, as a full and final payment on behalf of the shareholders (the issuing company has the right to recover from the shareholder the tax paid).

The applicable tax rate is 0.5% on the value of the participation, which is generally calculated on the difference between assets and liabilities arising from the financial statements closed at 31 December or during the respective fiscal year.

Note that a Supreme Court decision has ruled on the non-applicability of this tax to Argentine branches of foreign companies.

Payroll taxes

Foreign and local nationals working for a local company must be included on the local payroll and will be considered as local employees for local labour, tax, and social security purposes. Both the local company and the employees will be subject to the corresponding regulations.

All the compensation paid in Argentina or abroad for work performed for the local company will be considered as local compensation and should be reported to the tax and social security authorities, as the case may be, and included in the salary slips and recorded in the local labour books.

The local employer must withhold income tax on an actual and monthly basis and make the corresponding payments to the tax authorities through monthly WHT returns. Individual tax rates range from 9% to 35%, and personal deductions are available.

The local entity must issue salary slips every month for each employee included on its payroll, considering the total compensation mentioned above.

Employer social security contributions add between 23% and 27% to payroll costs. There is a compulsory 13th-month salary. There is no restriction regarding the employment of foreigners, provided they hold working visas.

Workers' (Employees') Compensation: Argentine labour regulations determine different forms of compensation for employees. These include, but are not limited to, the following:

- Vacation compensation.
- Compensation in a case of termination of employment contract with employee (prior notice of dismissal and to a severance payment, both based on seniority).

Main social taxes and contributions assessable on salaries are as follows:

Social taxes and contributions	Percentage of gross monthly earnings (%) (including 13th month salary)	
	Employer (2, 3)	Employee (1)
Pension fund	17/21	11
National unemployment fund	-	-
Family allowances fund	-	-
Social services institute for pensioner	-	3
Social health care plan	6	3
Total	23/27	17

Notes

1. Social security charges borne by employees are applicable up to a monthly salary cap, which currently amounts to ARS 56,057.93 as of March 2016. This cap is updated in March and September of each year.
2. Contributions made by employers are applicable to total compensation without application of any cap.
3. Employers' contributions to the national unemployment fund, family allowances fund, and social services institute for pensioners is paid at a unified rate of 17%. The rate is increased to 21% for companies whose main activity consists of rendering services or commerce, provided the amount of their average total annual sales for the last three years exceeds ARS 48 million.

Argentina

Branch income

The rate of profits tax on net taxable profits from Argentine sources and from activities performed abroad by the branch is 35%. Branches are also subject to minimum notional income tax.

Income determination

Inventory valuation

Inventory valuation is based on the latest purchase. Thus, the last in first out (LIFO) method may not be elected for tax purposes. Conformity between book and tax reporting is not required.

Capital gains/losses

Capital gains and losses attract normal profits tax treatment, except that losses from the sale of shares and other equity interests may be offset only against the same type of income.

Capital gains on equity

Gains derived from the transfer of shares, bonds, and other securities are subject to tax, regardless of the nature and residence of the beneficiary. Resident entities are taxed at the regular 35% rate on any gain derived from the disposal of equity.

The current legislation also repeals the exemption available for foreign beneficiaries on income derived from Argentine share transfers. Thus, foreign beneficiaries are subject to a 13.5% effective income tax withholding rate on gross proceeds or, alternatively, a 15% income tax on the actual capital gain if the seller's tax cost basis can be duly documented for Argentine tax purposes.

Capital gains on debts

Capital gains derived by foreign beneficiaries from the sale of corporate bonds placed by public offer (*obligaciones negociables*), notes issued by financial trusts (*títulos de deuda*), or government securities should be exempt from income tax under the provisions of Law 23,576 (*Obligaciones Negociables Law*) and Law 24,441 (*Trust Law*).

Dividend income

Dividends, including stock dividends, are not included in the tax base by the recipient if distributed by an Argentine company (*see the Withholding taxes section for additional information*). However, tax is levied if the dividends are distributed by a foreign company.

Foreign exchange gains/losses

The general rule is that foreign exchange results (gain or losses) have to be recognised on an accrual basis. However, in some cases, the cash basis is applicable.

Foreign exchange losses can only be offset against foreign-source taxable income.

Foreign income

Foreign income received or held undistributed abroad (in case of investments in non-stock companies) by resident corporations is subject to tax. Argentina does not have a controlled foreign company (CFC) regime. However, passive income obtained through companies located in no-or-low-tax jurisdictions may have to be recognised for tax purposes on an accrual basis. Tax losses from a foreign source can only be offset against income from a foreign source.

Deductions

Expenses necessary to generate, maintain, and preserve taxable income, and related to the company activity, are usually tax deductible, with a few exceptions, to the extent they are fair and reasonable.

Depreciation and depletion

Depreciation is generally computed on a straight-line basis over the technically estimated useful life of the assets or, alternatively, over the standard useful life (e.g. machinery and equipment: ten years; furniture: ten years). Depreciation of buildings and other construction of real estate is 2% *per annum* on cost (on a straight-line basis), unless it can be proved that useful life is less than 50 years.

Depreciation of automobiles whose original cost exceeds ARS 20,000 is not deductible. Related expenses (gasoline vouchers, insurance, rentals, repairs and maintenance, etc.) are deductible up to an amount of ARS 7,200 per automobile per year.

Conformity between book and tax depreciation is not required.

Profit or loss on the sale of depreciated property is determined with reference to cost less depreciation, restated for inflation as at March 1992, and is included in ordinary taxable income.

Percentage depletion is available for natural resources (mines, quarries, woods).

Goodwill

The amortisation of goodwill cannot be deducted for profits tax purposes. At the moment of sale, the taxable gain will be calculated by deducting the cost expenses (purchase price).

With regards to self-developed goodwill, at the moment of sale the cost will be the amount of expenses incurred in obtaining it, provided it was not deducted for profits tax purposes before.

Research and development (R&D)

R&D expenditures (for the development of intangible assets) may be deducted when they are incurred or amortised over not more than five years, at the option of the taxpayer. Expenditures for R&D in connection with the creation of fixed assets form part of the assets' cost and are amortised over their useful lives.

The amortisation of brands and licences acquired can be deducted if they have a limited term of duration.

Start-up expenses

Start-up expenses may be deducted when incurred or amortised over not more than five years, at the option of the taxpayer.

Interest expenses

The tax law establishes a restriction on the deductibility of interest arising from debts of a financial nature, contracted by taxpayers with controlling/related non-resident entities, for profits tax purposes (*see Thin capitalisation in the Group taxation section*).

Bad debt

The deduction of accounting bad debts is not allowed for tax purposes. However, if the debts fulfil certain characteristics (i.e. bankruptcy, prescription, among others), and with the corresponding supporting documentation, they can be deducted.

Argentina

Charitable contributions

When made to societies and associations expressly exempt from assessment of profits tax, donations are admissible deductions at up to a maximum of 5% of the donor's net taxable profits, provided certain requirements are fulfilled.

Representation expenses

If adequately documented, representation expenses are permissible deductions at up to 1.5% of the amount of salaries accrued during the fiscal year. According to the Regulatory Decree, representation expenses are payments made in order to represent the company in the market, to improve and maintain its relationship with suppliers and clients, etc.

Directors' fees

Amounts up to the greater of 25% of after-tax profit or ARS 12,500 per individual are deductible in the financial year to which they apply, provided they are approved and available for the director before the due date of the tax return, or in a later year of payment.

Fines and penalties

In relation to deductibility of penalties to determine net taxable income, taxpayers are not allowed to deduct sums paid on their own account corresponding to penalties, litigation costs, penalty interest, and other costs derived from tax obligations; however, they are allowed to deduct income tax assessable on them and paid on behalf of third parties as long as it relates to the obtaining of taxable income.

Taxes

Except for profits tax and the tax on minimum notional income, all taxes are deductible.

Net operating losses

Net operating losses may be carried forward for five years. Loss carrybacks are not permitted. Furthermore, foreign-source losses must be offset against income from similar sources.

Losses on derivatives transactions with speculative purposes can only be used to offset income from the same transactions.

Payments to foreign affiliates

Transactions between related parties should be at arm's length (*see Transfer pricing in the Group taxation section for more information*). This principle is extended to transactions with companies that are not located in jurisdictions included in a 'white list' of countries, territories, and tax regimes considered to be 'cooperative' for tax transparency purposes published by the tax authority (www.afip.gov.ar/genericos/novedades/jurisdiccionesCooperantes.asp). Payments to foreign affiliates or related parties and companies not located in jurisdictions included in the 'white list' that represent income of Argentine source are tax deductible, provided they are paid before the due date for filing the tax return and the corresponding withholding is paid to the tax authorities. Otherwise, they would be deducted in the fiscal year in which they are paid.

Technical assistance and services that involve transfer of technology should be covered by agreements duly registered with the National Institute of Intellectual Property for information purposes. These transactions are governed by the Transfer of Technology Law.

Group taxation

Group taxation is not permitted in Argentina.

Transfer pricing

The transfer pricing regulations governing inter-company transactions adopt principles similar to those of the OECD, pursuant to which companies must comply with the arm's-length principle in order to determine the value of goods and services in their transactions with foreign-related companies.

The following taxpayers, among others, must generally file, together with their annual profits tax return, a supplementary return (transactions encompassed by regulations governing transfer prices) and transfer pricing study:

- Taxpayers carrying out transactions with related individuals or legal entities set up, domiciled, or located abroad. Two or more persons are considered to be related parties when one of them takes part, either directly or indirectly, in the administration, control, or capital of the other, or when a person or group of persons takes part, either directly or indirectly, in the administration, control, or capital of those persons.
- Taxpayers carrying out transactions with related individuals or legal entities not set up, domiciled, or located in countries considered to be cooperative for tax transparency purposes, whether related or not.
- Argentine residents carrying out transactions with PEs located abroad and owned by them.
- Argentine residents, owners of PEs located abroad, for transactions carried out by the latter with persons or other type of related entities domiciled, set up, or located abroad.

The Regulatory Decree provides specific rules to determine the fairness of the transfer pricing methodology. These rules are similar to those set by the OECD and contemplate six methods, including the following:

- Comparable uncontrolled price (CUP).
- Resale price method (RPM).
- Cost plus.
- Profit split method (PSM).
- Transactional net margin method (TNMM).
- Special method for export of goods with prices quoted in transparent markets.

There is no specific hierarchy, as each particular transaction must be analysed based on the assets, functions, and risks involved and on information available. Regulations establish that the most appropriate method is that which reflects the economic reality of the transactions.

Thin capitalisation

Thin capitalisation rules apply as a restriction on the deductibility of interest arising from debts of a financial nature that are contracted by taxpayers with controlling non-resident entities and can be summarised as follows:

- For interest subject to a 15.05% withholding (i.e. paid on loans granted by certain banking institutions), the portion of interest stemming from financial liabilities exceeding two times the shareholders' equity is not deductible for tax purposes and is treated as dividends.
- Interest subject to a 35% WHT is fully deductible.

According to the Regulatory Decree of the Income Tax Law, the thin capitalisation rules are also applicable to any case where a lower withholding rate of 35% is applicable (for instance, interest payments to a related company resident in certain tax treaty countries).

Argentina

Controlled foreign companies (CFCs)

Argentina does not have a CFC regime.

Tax credits and incentives

Foreign tax credit

National taxpayers are entitled to recognise a tax credit for any taxes actually paid in the countries where they have obtained foreign-source income, in respect of similar national taxes, up to a cap, which is the increase in their Argentine tax liability due to the inclusion of the foreign income. Any excess not offset in a given fiscal year may be carried forward to the next five fiscal years.

Province of Tierra del Fuego Regime

Companies set up in the province of Tierra del Fuego enjoy a general tax exemption and important benefits in customs matters. Tax exemption includes profits tax, tax on minimum notional income, tax on personal wealth, and excise tax. The VAT benefit consists of the release from payment of the technical balance of the tax (VAT debits less VAT credits). Also, a reduction of the prevailing rate for tax on financial transactions and the exemption from taxation on the transfer of fuels is contemplated.

Mining activity

An investment regime for mining activity is applicable to natural and legal persons. Mining ventures included within this regime enjoy fiscal stability (i.e. tax rates will remain basically the same) for a term of 30 years, except for VAT, which will adjust to the general regime. Furthermore, the regime grants incentives for profits tax, tax on assets, import duties, and any other tax for introduction of certain assets. Additionally, this mining investment law established an exploration recovery regime for the mining investors, which allows the reimbursement of the VAT credit balances originated in the mining exploration activity.

This regime allows the reimbursement of such VAT credits after a 12-month period since the expenditure was incurred, and only if it has been paid.

Through specific regulations, the authorities established the requirements (e.g. filing a tax return, filing a report certified by a public accountant with respect to the VAT, a presentation to the Mining Secretary) to be followed by the taxpayers in order to apply for this benefit.

Forestry

There is an investment regime for plantation, protection, and maintenance of forests. It contains rules similar to those for mining activity tax incentives:

- Fiscal stability for a period of 30 years. The period may be extended to 50 years.
- Refund of VAT resulting from the purchase or final importation of goods, leases, or services effectively for forestry investment projects in a period of less than 365 days.

Export incentives

Exports of goods and services are exempt from VAT and excise taxes. The temporary importation of raw materials and intermediate and packaging goods for the manufacture of products for export is free from duties with the obligation of offering sufficient guarantees for the import. A reimbursement regime is in place for VAT credits paid to suppliers in relation to the export activity.

Biotechnology industry

A promotional tax regime for development and production of modern biotechnology has been introduced. Pursuant to this law, the beneficiaries of the projects that qualify for this regime are entitled to the following benefits:

- Profits tax: Accelerated depreciation of capital goods, special equipment, parts, or components of newly acquired goods destined for the promoted project.
- VAT: Early refund of the tax applicable to the assets acquired for the project.
- Social security contributions: The amount representing 50% of social security contributions actually paid on the payroll salaries involved in the project shall be converted into a tax credit bond that may be applied to payment of national taxes.

Software industry

Under a software promotion regime, taxpayers carrying out software-related activities as their main purpose may qualify for the following benefits:

- Fiscal stability for a ten-year period covering national taxes.
- Reduction of social security charges (70% of these charges may be credited against certain national taxes).
- Profits tax relief (up to 60% of the applicable tax).

While most of the software-related activities qualify for the fiscal stability benefit, the remaining incentives only apply to software R&D, quality control procedures, and software exports.

Some changes were introduced in 2011, and the period of application was extended until 31 December 2019. The possibility of using a bond tax credit, given by an amount equal to 70% of contributions to the social security system paid by the employer, as an 'advance payment' of the income tax was provided. There is also an increase in the control mechanisms.

Province incentives on local taxes

Most of the provinces have legislation establishing incentives for the development of industries within their boundaries, especially industries that utilise or develop their natural resources and provide work for their residents. The incentives, in general, consist of exemptions from provincial and municipal taxes.

Various provinces have investment promotion regimes. Even when there are certain differences among these regimes, generally they include the following incentives:

- Exemption from provincial taxes, such as turnover tax, stamp duty, real estate tax.
- Reduced public utility rates.
- Support for infrastructure and equipment projects.
- Facilities for purchase, rental, or lease without charge of public property.

These regimes are not automatically applied, and a special procedure should be followed to be entitled to the respective benefits.

Free trade zones

The free trade zones offer exporters the possibility to import free from customs duties, statistics rate, and VAT all the necessary equipment for construction of a 'turnkey plant' within the zones. Furthermore, exporters manufacturing within the zones enjoy the benefit of buying supplies and raw materials from third countries, without having to pay duties or taxes that lead to increased prices.

Customs authority regulating these goods considers them as stored in a third country; consequently, incoming products are subject to inspection with the sole purpose of classifying quantity and type. In other words, goods enjoy a duty-free status until they enter the Argentine customs territory. Goods may remain in the free zone for a maximum period of five years.

Argentina

Withholding taxes

Equalisation corporate tax

Corporations, LLPs, and certain other entities are required to make a flat and final income tax withholding of 35% from dividend payments or profit distributions to resident or non-resident payees, to the extent that the amount of such dividends or profit distributions exceeds the taxable income of the distributing company, determined by applying the general tax rules (i.e. without considering any exemptions, abatements, and other adjustments arising from special promotional laws) included in their retained earnings at the end of the fiscal year, immediately preceding the date of payment or distribution.

Dividend distributions made by Argentine entities are also subject to tax at a 10% rate, without prejudice to the application of the so-called 'equalisation tax'.

Other payments

Other payments to residents and to non-residents are subject to WHT rates as follows:

Recipient	Interest (%) (1)	Royalties (%) (1, 2)
Resident corporations	6/28 (3)	6 (4)
Resident individuals	6/28 (3)	6 (4)
Non-resident corporations and individuals:		
Non-treaty:	15.05/35	21/28
Treaty:		
Australia	12	10/15
Belgium	0/12 (5)	3/5/10/15
Bolivia	15.05/35	21/28
Brazil	15.05/35	21/28
Canada	12.5	3/5/10/15
Chile (9)	4/12/15	3/10/15
Denmark	12 (5)	3/5/10/15
Finland	15	3/5/10/15
France	15.05/20 (6)	18
Germany	10/15 (7)	15
Italy	15.05/20 (5)	10/18
Mexico (11)	12	10/15
Netherlands	12	3/5/10/15
Norway	12.5 (8)	3/5/10/15
Russia	15	15
Spain	12	3/5/10/15
Sweden	12.5	3/5/10/15
Switzerland	12	3/5/10/15
United Kingdom	12 (5)	3/5/10/15

Notes

- Withholding from payments of interest and royalties to non-residents is based on a flat rate of 35% applied to an assumed percentage gross profit margin. This margin is not contestable, but the resultant rate may be limited by bilateral treaty. Under the 1998 tax reform, the general margin for interest paid for credits obtained abroad is 100%. However, a margin of 43% is applicable (i) if the debtor is a local bank; (ii) if the creditor is a foreign financial institution located in a country not considered as a low or no tax jurisdiction, or in countries that have signed an agreement with Argentina for exchange of information and have no bank secrecy laws, which are under the supervision of the respective central bank; (iii) if the interest is paid on a loan dedicated to the purchase of tangible assets other than cars; (iv) if the interest is paid on debt certificates (private bonds) issued by local companies and registered in certain countries that have signed an agreement with Argentina for the protection of investments; and (v) on interest paid on time deposits with local

banks. 'Royalties' covers a variety of concepts. The rates given in this column relate specifically to services derived from agreements ruled by the Foreign Technology Law, as follows:

- Technical assistance, technology, and engineering not obtainable in Argentina: 21% (35% on assumed profit of 60%).
- Cessation of rights or licences for invention patents exploitation and technical assistance obtainable in Argentina: 28% (35% on assumed profit of 80%). On non-registered agreements, the rate is 31.5% (profit of 90% is assumed) or 35% (profit of 100% is assumed), depending on the case.

Several other concepts of 'royalties' are subject to rates that, in turn, may be limited by treaty. A broad sample of these concepts and the non-treaty effective rates are set forth in Note 2.

2. Payments to non-residents (only) for 'royalties', rentals, fees, commissions, and so on, in respect of the following are subject to withholding at the rates given below on the basis of assumed gross profit margins (Note 1) unless limited by treaty. The treaty concerned should be consulted to determine any limitation in each case.

Payment	WHT (%)
Freight and passenger bookings (other than those covered by special treaties), news and feature services, insurance underwriting	3.50
Containers	7.00
Copyright	12.25
Rental of movable assets	14.00
Motion picture, video, and sound tape rentals and royalties; radio, television, telex and telefax transmissions; any other means for projection, reproduction, transmission, or diffusion of image or sound; sale of assets located in Argentina (10)	17.50
Rental of real estate (10)	21.00
Any other Argentine-source income (unless the non-resident is or was temporarily resident)	31.50

3. The higher tax rate is applicable on non-registered taxpayers. On interest paid to corporations by financial entities or stock exchange/open market brokers, income tax must be withheld at 3% (10% if not registered); individuals are tax exempt.
4. Resident corporations and individuals who are registered for tax purposes are subject to 6% withholding (28% if not registered).
5. Interest is exempt if paid on credit sales of machinery or other equipment, specific bank loans at preferential rate or loans by public entities.
6. The treaty limits taxation of interest to 20% (registered).
7. The 10% rate is applicable to interest on credit sales of capital equipment, any bank loan, or any financing of public works; otherwise, 15%.
8. Interest paid on loans with guarantee of the Norwegian Institute for Credit Guarantees or paid in relation to imports of industrial equipment is tax exempt.
9. On 26 June 2012, the double tax treaty (DTT) with Chile was terminated. A revised DTT was signed in May 2015 but is pending ratification by both countries.
10. Deduction of actual costs and expenses may be optionally exercised.
11. The treaty was signed in November 2015 but is still pending ratification by both countries.

Tax administration

Taxable period

Tax is assessed on a fiscal-year, self-assessment basis, which may or may not match the calendar year.

Tax returns

The due date for filing the profits and the minimum notional income tax return is during the second week of the fifth month after the fiscal year-end. Tax returns are filed electronically.

Payment of tax

Instalment payments on account of both profits tax and minimum notional income tax must be made in the course of the tax year. The instalment payments must be made on a monthly basis, beginning in the first month after the due date of filing of the tax returns.

Argentina

Penalties

Penalties derived from tax infractions may be applied by tax authorities, as follows:

- Failing to file the tax return: Fines range between ARS 200 and ARS 400.
- Tax omission or incorrect tax determination: Fines range from 50% to 100% of unpaid taxes or incorrect tax calculation.
- Tax avoidance: Fines range between two and ten times the avoided tax.
- Certain tax infractions may be penalised by closing the business premises for three to ten days. In addition, fines ranging between ARS 300 and ARS 30,000 may be imposed.
- Simple evasion: Entities or individuals evading payment of social security contributions or withholdings, or both, payable to the tax authorities under the social security regime, through deceitful declarations, malicious concealment, or any fraudulent or deceitful procedure, either through action or omission, in excess of ARS 80,000 per fiscal period, shall be punished with two to six years' imprisonment. Such amount will be ARS 400,000 in the case of taxes, it being applied by tax and by fiscal year.
- If the infringement qualifies as aggravated evasion: Imprisonment could be extended from three years and six months to nine years in certain situations.

Interest on late payments

Late payment of taxes is subject to a monthly 3% interest rate. Interest will start accruing on the day after the filing due date.

Tax audit process

The tax authorities are entitled to audit taxpayers within the statute of limitations period. Audits consist of revising the calculation of any national or provincial tax based on formal requirements. Where any assessment is issued by the tax authorities, the taxpayer is entitled to either accept it or file a claim. Assessments can be done under a real or estimated basis, depending on the specific case and the information that the taxpayers have on their transactions. In the case that the taxpayers do not accept the assessment during the administrative period, they can claim against Tax Courts before any judicial process.

There are no specific provisions about e-auditing.

Statute of limitations

The actions and powers of the tax authorities to determine and require payment of federal taxes, and to implement and enforce fines and closures planned, prescribe:

- five years in the case of registered taxpayers, as well as in the case of unregistered taxpayers who are not legally required to register with the AFIP; or that, having that obligation, had not fulfilled them and, spontaneously, regularise their situation, and
- ten years in the case of unregistered taxpayers.

Note that a one-year suspension of the statute of limitations has taken place for tax obligations related to fiscal year 2008 and preceding non-barred years. Another one-year suspension of the statute of limitations was enacted for fiscal year 2013 and preceding years.

The statute of limitations may be extended to ten years in certain provinces with respect to provincial taxes.

Topics of focus for tax authorities

Topics of focus for tax authorities include the following:

- Increasing cooperation: Tax information exchange.
- Tax treaty network still under review.

- Tax treaty benefits: Substance-over-form principle.
- High penalties and tax criminal law.
- Transfer pricing (inter-company charges and export of commodities to international intermediaries).
- Wealth tax: Applicability on branches.
- Corporate income tax: Application of inflationary adjustment.

Other issues

Exchange control regime

As a result of the devaluation of the Argentine peso at the beginning of 2002, several regulations were issued to limit the transfer of money abroad. They have been made more flexible and up-to-date.

In this regard, on 17 December 2015, the Argentine Central Bank (BCRA) issued Communication 'A' 5850 by which important amendments were introduced to the Exchange Currency Market (MULC for its Spanish acronym) regulations related to (i) the payment for imports of goods and services; (ii) the requirements for the formation of foreign assets by Argentine residents; and (iii) the regulations related to financial debts with non-residents.

Payment for imports of goods and services

All transactions involving goods imports (GI) whose shipment is dated as of 17 December 2015 will be completed with no limits as regards their amount.

In addition, the request for BCRA's prior approval will no longer be necessary to make payments under GI transactions recorded in customs before 1 July 2010.

In relation to the requirements applicable to early payments of GI, provided that they do not relate to capital goods, the customs entry registration must be proven within a term of 180 running days (prior term 120 days) counted as from the date of access to MULC.

As to the payment of services imports (SI), as of 17 December 2015 they may be made with no limits to their amounts and in accordance with current regulations.

Requirements for the formation of foreign assets by residents

Resident individuals and corporations (with certain specific exceptions) and local governments may access the MULC to purchase foreign currency without the prior approval of the BCRA for an amount not exceeding 5 million United States dollars (USD) in the calendar month under the following items: (i) real estate investments abroad; (ii) loans granted to non-residents; (iii) direct investment contributions abroad by residents; (iv) investments in foreign portfolios of legal entities, purchased to hold foreign currency in Argentina; and (v) purchase of traveller checks. To carry out these transactions, a series of specific conditions and requirements must be met. The above monthly cap would be decreased in the amount of SI paid.

Moreover, funds deposited by non-residents in Argentine bank accounts (USD denominated) in general can freely be transferred abroad as long as the applicable minimum term of permanence within the country has been observed.

Financial debts with non-residents

Communication 'A' 5850 sets out that all financial debts incurred abroad by the financial sector, the non-financial private sector, and the local governments shall no longer be subject to the obligation to bring into Argentina and settle the related funds through the MULC.

Argentina

Nevertheless, if the resident seeks repayment of principal or interest through the MULC, the funds lent by the non-resident entity shall comply with the MULC settlement requirement.

In addition, through Resolution 3/2015, the minimum timeframe for keeping the funds in Argentina has been reduced from 365 to 120 calendar days as from the settlement date through the MULC applicable to new indebtedness or renewals as of 17 December 2015, and the requirement to place a non-interest bearing deposit equivalent to 30% of the inflow of funds (the so-called '*Encaje*') is repealed.

Legal entities

Foreign companies in Argentina, carrying out their business or activity in Argentina, must have a local legal vehicle, of which the most common legal entity types are the following:

- Branch.
- Corporation (*Sociedad Anónima* or SA).
- Local Limited Liability Company (*Sociedad de Responsabilidad Limitada* or SRL).

Argentine corporations and LLPs, as Argentine residents, are subject to the Argentine tax system. Branches of foreign companies, whatever the nature of their activities, are taxed under the same rules as those applicable to corporations and LLPs.

Several documents are required to register an entity with the relevant authorities. Some of said documentation must be filed in the original language, duly translated and certified with the Apostille issued pursuant to The Hague Convention or legalised by the Argentine Consulate of the company's place of origin.

At present, the minimum capital requirement to incorporate an SA is ARS 100,000. There are no special requirements regarding the minimum amount of capital for SRLs.

A branch does not require capital contributions unless it is engaged in certain specific activities (e.g. banking and financing). The branch must carry its financial statements separately from those of the foreign company.

The three legal types are subject, in general terms, to the same legal, tax, and accounting regulations.

Information regimes

In the last few years, the AFIP has introduced several information regimes aimed principally to monitor transactions with local and foreign related parties.

By means of General Resolution (AFIP) 3572, a database in which local taxpayers must disclose their relationships with domestic and foreign related parties has been created. For purposes of this rule, the definition of 'related party' is broad and goes beyond economic or legal ownership.

Additionally, GR 3572 has introduced an information regime pursuant to which Argentine taxpayers are required to report, on a monthly basis, all their transactions with local related parties.

Intergovernmental agreements (IGAs)

Argentina has been very prolific in relation to the signature of tax information exchange agreements (TIEAs) over the past few years.

The authorities have signed around 24 TIEAs, including those with Andorra, Aruba, Azerbaijan, The Bahamas, Bermuda, Brazil, Cayman Islands, Chile, China, Costa Rica,

Curacao, Ecuador, Guernsey, India, Isle of Man, Italy, Jersey, Macedonia, Monaco, Peru, San Marino, South Africa, Spain, and Uruguay.

Argentina has also taken an active part in the OECD's base erosion and profit shifting (BEPS) initiatives and tax transparency discussions. During Berlin's global forum on transparency and exchange of information for tax purposes, Argentina joined the list of 54 countries that agreed to implement an automatic financial information exchange in accordance to OECD's Common Reporting Standard (CRS) as of 2016.

In this respect, several Argentine regulatory authorities (i.e. Central Bank, Securities Exchange Commission, and Superintendence of Insurance Companies) have already issued a set of regulations compelling local financial institutions to implement the necessary procedures to be in compliance with OECD's CRS. The regulation establishing the CRS was finally issued in December 2015 and is effective as of 1 January 2016.

Notwithstanding the above, a Foreign Account Tax Compliance Act (FATCA) IGA with the United States has not yet been signed, and it is still uncertain when such IGA would be in place.

Significant developments

An amendment to the Corporate Income Tax (CIT) Law provides additional tax incentives to Armenian-resident entities operating in construction field. The taxpayers who are involved in a group implementing special construction projects exclusively outside Armenia and approved by the government enjoy a 5% reduced CIT rate.

The revenue threshold to be eligible for turnover tax is increased from 58.35 million Armenian drams (AMD) to AMD 115 million. The turnover tax generally replaces the CIT and value-added tax (VAT) obligations for small and medium enterprises (SMEs). *See Turnover tax in the Other taxes section for more information.*

The turnover tax on the sale of secondary raw materials is reduced to 1.5% from the general 5% rate (except for the reporting periods from 1 July 2015 to 31 December 2015 for which the rate is reduced to 1%). *See Turnover tax in the Other taxes section for more information.*

Taxes on corporate income

Armenian-resident entities, and non-resident entities doing business in Armenia through a branch or a representative office, are liable for CIT. Armenia taxes residents on their worldwide income; non-residents are subject to CIT only on their Armenian-source income.

The standard CIT rate is 20%.

Taxable income is defined to be the difference between a taxpayer's gross income and deductible expenses:

- Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempted under the law.
- Deductible expenses encompass all necessary and documented expenses that are directly related to conducting business or earning profit, unless a specific provision in the law restricts the deduction.

Taxpayers engaged in agricultural production are exempt from CIT on that income.

Note that resident entities, branches and representative offices of foreign entities, and individual entrepreneurs are required to withhold income tax at source on payments to non-residents not having a permanent establishment (PE) in Armenia (*see the Withholding taxes section*).

Investment funds pay CIT based on 0.01% of net assets.

The turnover tax generally replaces the CIT and VAT obligations for SMEs. The tax rate is differentiated in accordance to the income type (*see Turnover tax in the Other taxes section*).

Presumptive tax system

Taxpayers engaged in certain activities must use the presumptive tax system. Under this system, the taxpayer pays a fixed tax based on the location and area occupied by the business and will not be required to pay CIT or VAT. The rate of tax depends on the activity undertaken, as follows:

Type of business	Base data	Adjustment ratio	Monthly presumptive tax payment (AMD)
Activity related to vehicles	For activities carried out by trucks: the lading in terms of tons	Depends on region: 1.1 to 1.9	2,000 times the product of the base data and the adjustment ratio(s)
	For activities carried out by buses: the number of seats	Depends on region: 0.5 to 1.2	
Lottery games organisers	Total value of lotteries sold during a month		25% of base data
	Number of computers for totalisators		75,000 times the base data in case of totalisators
	Number of websites provisioned for organising internet totalisator		1 million times the base data if connected to the global internet network

Licence payments

Individuals (individual entrepreneurs) and legal entities engaged in certain activities should make licence payments, which replace CIT and/or VAT. Under this system, the taxpayer pays a fixed tax based on the location and the business activity base data. Licence payment rates for some activities are mentioned below.

Type of activities	Base	Monthly rate of licence payment for one unit (thousand AMD)				
		Yerevan	Regional centres	Other cities	Other location	Bordering villages
Transportation of passengers with passenger cars	Number of cars	9.5	5.6	5.6	2.8	1.4
Organisation of billiard game	Game table	40.0	20.0	20.0	10.0	5.0
Organisation of table tennis	Game table	10.0	7.0	6.0	5.0	1.0
Barber's shops	Workplace	15.0	12.0	9.0	4.5	2.25
Technical maintenance and repairs of vehicles	Workplace	15.0	12.0	12.0	6.0	3.0

Local income taxes

Armenia does not have any local government taxes on income.

Corporate residence

Resident entities are legal and business entities whose existence is established under Armenian law. Non-resident entities are those whose existence is established under foreign law (including subdivisions of foreign entities in Armenia).

Armenia

Permanent establishment (PE)

The domestic definition for a PE essentially adopts the definition for PE found in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Other taxes

Value-added tax (VAT)

Armenia's current VAT law is based loosely on the principles of the European Union (EU) VAT Directive. Armenia operates the input-output model of VAT. VAT-registered persons may deduct the VAT paid on their inputs from the VAT charged on their sales and account for the difference to the tax authorities.

The standard rate of VAT on domestic sales of goods and services and the importation of goods is 20%. Exported goods and related services are zero-rated. Advertising, consulting, engineering, legal, accounting, translation, data processing, banking, financial, and insurance services provided to non-residents are zero-rated if the non-resident's place of business is outside Armenia. Various supplies, including most financial and education services, are VAT-exempt.

Services supplied in Armenia by non-residents that are not registered in Armenia are subject to application of a VAT reverse charge.

The liability to account for VAT is based on taxable turnover for transactions implemented in the previous calendar year. The turnover tax (*see below*) generally replaces VAT obligations for SMEs. If revenue exceeds AMD 115 million, the taxpayer may not be considered a turnover taxpayer and should account for VAT on the excess sales. Taxpayers whose revenues are below the AMD 115 million threshold may voluntarily elect to account for VAT.

Businesses producing/importing excisable goods are required to account for VAT on their sales.

Some ownership and inter-relation thresholds are also applicable for entities to be considered as VAT payers.

Generally, VAT payers should file VAT returns on a quarterly basis. However, taxpayers with sales (excluding VAT) in the previous calendar year exceeding AMD 100 million are required to file VAT returns monthly. VAT payments must be made and VAT returns filed within 20 days following the end of the reporting period.

Customs duties

Armenia is a member of the Eurasian Economic Union (EEU) along with Russia, Kazakhstan, Kyrgyzstan, and Belarus. The EEU's aim is to create a common market for the member states to raise the competitiveness of the national economies and to cooperate for sustainable growth. The EEU introduces the free movement of goods, services, capital, and people, creating a platform for common transport and reduced economic isolation.

Customs levies are payable by persons whose goods cross the customs border of Armenia. Customs levies consist of customs duties, taxes, duties, and other mandatory charges. Customs duty is collected on the customs value of the imported goods. Importers must take into account specific EEU rules to determine the customs value on which the import tax will be applied. The general rule is that the customs value will be the price actually paid or payable for the goods when sold for export to Armenia.

Under the EEU regulations, goods imported from member countries are free of custom duties. The unified custom tariffs are applicable for the goods imported from non-member states.

VAT for the goods imported from the EEU member countries is not calculated by the customs authorities. Instead, taxpayers should calculate and pay VAT by the 20th day of the month following the month of the importation. In the meantime, within this timeframe, the taxpayer should submit the tax declaration and the statement on imported goods to tax authorities.

In order to apply the 0% VAT rate for the goods exported from Armenia into the EEU member countries, the exporter should submit the tax declaration and the statement on imported goods (completed by the importer) to the tax authorities within 180 days following the day of exportation.

Excise tax

Excise tax is payable on alcoholic beverages, tobacco products, and petroleum products, whether imported or produced domestically, as follows:

Goods	Unit of measure	Tax rate
Beer	Factory price (if produced locally) (excluding VAT and excise tax) or 1 litre; customs value on importation or 1 litre; or product value or 1 litre (if imported from EEU countries)	30%, but not less than AMD 105 for 1 litre
Grape and other wines, wine ingredients	Factory price (if produced locally) (excluding VAT and excise tax) or 1 litre; customs value on importation or 1 litre; or product value or 1 litre (if imported from EEU countries)	10%, but not less than AMD 100 for 1 litre
Vermouth and other types of wine that contain vegetarian and other aromatic extracts	Factory price (if produced locally) (excluding VAT and excise tax) or 1 litre; customs value on importation or 1 litre; or product value or 1 litre (if imported from EEU countries)	50%, but not less than AMD 750 for 1 litre
Other brewed drinks (apple cider, pear cider, honey-drinks)	Factory price (if produced locally) (excluding VAT and excise tax) or 1 litre; customs value on importation or 1 litre; or product value or 1 litre (if imported from EEU countries)	25%, but not less than AMD 270 for 1 litre
Ethyl spirit	Factory price (if produced locally) (excluding VAT and excise tax) or 1 litre (by recalculation of 100% spirit); customs value on importation or 1 litre (by recalculation of 100% spirit); or product value or 1 litre (by recalculation of 100% spirit) (if imported from EEU countries)	50%, but not less than AMD 900 for 1 litre
Alcoholic drinks	Factory price (if produced locally) (excluding VAT and excise tax) or 1 litre; customs value on importation or 1 litre; or product value or 1 litre (if imported from EEU countries)	55%, but not less than AMD 550 for 1 litre
Spirituos liquors (those made from grape, distillation of grape wine or sugarcane), whisky, and rum	Factory price (if produced locally) (excluding VAT and excise tax) or 1 litre (by recalculation of 100% spirit); customs value on importation or 1 litre (by recalculation of 100% spirit); or product value or 1 litre (by recalculation of 100% spirit) (if imported from EEU countries)	50%, but not less than: <ul style="list-style-type: none"> • AMD 3,000 for 1 litre (1 to 3 years old spirit) • AMD 3,500 for 1 litre (4 to 5 years old spirit) • AMD 6,000 for 1 litre (6 to 10 years old spirit) • AMD 8,500 for 1 litre (11 to 15 years old spirit) • AMD 14,000 for 1 litre (16 to 19 years old spirit) • AMD 22,000 for 1 litre (more than 20 years old spirit)

Armenia

Goods	Unit of measure	Tax rate
Tobacco substitutes	1 kilogram	AMD 1,500
Raw oil and oil materials	1 ton	AMD 27,000
Gases produced from oil and other hydro-carbons (except compressed natural gas)	1 ton	AMD 1,000
Compressed natural gas	1,000 m ³	AMD 8,330
Petrol *	1 ton	AMD 25,000
Diesel fuel	Customs value or 1 ton; or product value or 1 ton (if imported from EEU countries)	10%, but not less than AMD 35,000 for 1 ton
Motor oil	Factory price (if produced locally) (excluding VAT and excise tax) or 1 kilogram; customs value on importation; or product value or 1 kilogram (if imported from EEU countries)	10%, but not less than AMD 400 for 1 kg
Cigars (containing tobacco and other)	1,000 units	AMD 605,000
Cigarillos (containing tobacco and other)	1,000 units	AMD 16,500
Filtered cigarettes containing tobacco, clove	1,000 units	AMD 5,500
Unfiltered cigarettes containing tobacco, clove, and other	1,000 units	AMD 1,540

* If the sum of excise tax and VAT calculated for 1 ton of petrol is less than AMD 120,000, the amount of excise tax should be increased to reach the sum equal to AMD 120,000.

Taxpayers producing excisable goods in Armenia should submit a quarterly excise tax return by the 20th day of the month following the quarter and make excise tax payments by the 20th day of each month.

Land tax

Land tax is assessed and collected at the municipal level and is paid biannually by landowners and the permanent users of state-owned land. Tax on rented land is levied on the lessor. The land cadastre (valuation system) is used to determine the value of the land. Land tax for agricultural land is calculated at 15% of the net income determined by the cadastral evaluation. For non-agricultural land, the rate is 0.5% to 1.0% of the cadastral value of the land.

Property tax

Property tax is assessed and collected at the municipal level on buildings, motor vehicles, and means of water transport. The tax rate on buildings is 0.3%, which is paid on the cadastral value.

Property tax for motor vehicles with up to ten seats is calculated as follows:

Capacity (horsepower)	Tax rate (per horsepower)
Up to 120	AMD 200
121 to 150	AMD 300
151 to 250	AMD 300 + AMD 1,000 per horsepower in excess of 150
251 and over	AMD 500 + AMD 1,000 per horsepower in excess of 150

Property tax for motor vehicles with more than ten seats is calculated as follows:

Capacity (horsepower)	Tax rate (per horsepower)
Up to 200	AMD 100
201 and over	AMD 200

The annual property tax on motorcycles is calculated at the rate of AMD 40 for each horsepower of tax base. The annual rate of property tax on watercraft is calculated at AMD 150 for each horsepower of tax base.

Beginning from the fourth year after the year of production, the tax base for motor vehicles and means of water transport is reduced by 10% per year, up to a maximum reduction of 50%.

Legal entities should calculate property tax and pay this to the municipal budget on a semi-annual basis. The semi-annual property tax calculations should be submitted to the local tax inspectorates not later than the 20th day following the reporting half-year.

Transfer taxes

Armenia does not have any transfer taxes.

Stamp taxes

Armenia does not have any stamp taxes.

Turnover tax

The turnover tax is payable by commercial organisations and individuals (individual entrepreneurs). The turnover tax replaces VAT and (or) CIT obligations for SMEs. Mainly, the taxpayer cannot be charged the turnover tax if the turnover from the transactions of the previous calendar year exceeds AMD 115 million. The taxpayer should file an application to the tax authorities before 20 February of the calendar year to become a turnover taxpayer. Note that there are also some other requirements to which the taxpayer should meet to become a turnover taxpayer. Subdivisions of foreign companies in Armenia (i.e. branches and representative offices) cannot become turnover taxpayers.

The turnover tax is imposed on the reporting period income (revenue) as follows:

Type of income	Tax rate (%)
Trading activities *	5.0
Production activities	3.5
Rental income, interest, royalties, and assets' disposal (including estate property)	10.0
Income on notary activities	20.0
Income on other type of activities	5.0

* The tax rate on the sale of secondary raw materials is 1% for the reporting periods between 1 July 2015 and 31 December 2015, and 1.5% for other periods.

Turnover taxpayers engaged in trade activities may deduct 4% of cost of the goods for sale (including imported goods) purchased during the reporting period from the turnover tax payable for that period, provided such purchases are properly documented.

However, the final tax payable for the trading activities, after the deductions, should not be less than 1% of the taxable turnover for the reporting periods between 1 July and 31 December 2015, and 1.5% for other periods. The purchases not deducted in the reporting period because of the limitations above may be deducted in the future periods.

Armenia

Turnover taxpayers are required to submit tax calculation on a quarterly basis and make tax payment within 20 days following the end of the reporting period.

Taxation of a family business

Entities and/or individual entrepreneurs that qualify as a family business enjoy exemption from all state taxes. Family businesses pay only monthly income tax in the amount of AMD 5,000 per individual engaged in the business and receiving income.

The business activity is considered a family business if the annual turnover (net of VAT) of an entity does not exceed AMD 18 million for the previous year and if at least two family members (parent, spouse, child, sister, brother) are engaged in that business. Note that there are also some other limitations for entities to become qualified as a family business.

Payroll taxes

Payroll income paid by the employer (tax agent) is subject to final withholding on a monthly basis.

Social security contributions

Mandatory contributions to pension funds are applicable for both Armenian and foreign citizens who were born after 1 January 1974 (inclusive). However some employees could have suspended the payment of social contributions until 1 July 2017 by submitting an appropriate application.

Employers should automatically enrol all workers (except those who submitted an application by 25 December 2014 to suspend the social payments) into a pension scheme and withhold contributions in accordance to the following rates:

- If the monthly gross income is up to AMD 500,000, the employer should withhold monthly social payment at a rate of 5%.
- If the monthly gross income is above AMD 500,000, the employer should withhold a contribution in the amount of the difference of 10% of the income and AMD 25,000.

The maximum amount of monthly social payment is capped at AMD 25,000 by 1 July 2020.

The state contributes another 5% per month to the pension fund from its side, capped at AMD 25,000.

Branch income

When a non-resident company conducts business in Armenia through a subdivision (i.e. a branch or a representative office) and maintains separate accounting records for that subdivision, taxable income generally should be determined on the same basis as for resident entities. Note that a subdivision is taxable on dividends received from Armenian companies and may not carry forward losses, which differs from the treatment of resident entities (*see the Deductions section for more information*). However, the subdivision may be able to overcome these restrictions under a relevant tax treaty.

If it is not possible to determine taxable profit based on the direct method (i.e. taxable income less deductible expenses) for the subdivision of the foreign entity in Armenia, income is determined based on a method agreed upon between the taxpayer and the tax authorities. The law explicitly recognises the allocation method (the taxpayer allocates a portion of its worldwide income and expenses to Armenia) as a possible approach.

Armenia has no special tax rules for non-commercial representative offices established to engage in liaison-type activities. Such offices are subject to the normal CIT, but an

exemption from CIT may be available under a relevant tax treaty if the activities of the representative office are not sufficient to constitute a PE for the foreign entity.

See the Withholding taxes section for a list of countries with which Armenia has a tax treaty.

Income determination

Taxable profits are defined as a positive difference between a taxpayer's gross income and deductible expenses. Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempt from inclusion under the law. Deductible expenses encompass all necessary and documented expenses that are directly related to conducting business or earning profit, unless a specific provision in the law restricts the deduction.

Inventory valuation

Inventories are generally stated at the lower of cost and net realisable value. First in first out (FIFO) and average cost methods of valuation are generally used for tax purposes.

Capital gains

Capital gains are included in taxable income. Non-residents are taxable on the realised capital gains from the increase of the value of the assets (including shares) located in Armenia.

Dividend income

Dividends derived by an Armenian entity from another Armenian entity are exempt from tax. Dividends derived by non-residents from Armenian entities are subject to 10% withholding tax (WHT), unless relief is available under a relevant tax treaty (see the *Withholding taxes* section).

Interest income

Interest income attracts normal CIT treatment.

Foreign income

Resident entities are liable to Armenian tax on their worldwide income. Foreign taxes should be available for credit against Armenian tax liabilities, up to the amount of Armenian tax payable on the foreign income.

There are no provisions in Armenian tax law allowing any tax deferral on income earned abroad.

Deductions

Expenses incurred in the furtherance of a taxpayer's business activities generally are deductible, unless a specific provision in the law provides otherwise. Expenses that are not supported by relevant documentation are not deductible.

Depreciation and amortisation

Fixed assets purchased (constructed) after 1 January 2014 should be pooled and depreciated with the following maximum rates:

Asset	Maximum depreciation rate per annum (%)
Other industrial and commercial buildings, constructions, and transmission devices	7.5
Hotels, resorts, rest houses, educational institutions	15
Calculating devices and computers	100

Armenia

Asset	Maximum depreciation rate per annum (%)
Robot equipment and assembly lines	50
Other fixed assets	30

The annual depreciation amount is calculated as the product of (i) the carrying value of the non-current asset group as of the end of the reporting date and (ii) the annual depreciation rates specified for the group (per the above rates).

The cost of non-current assets acquired/constructed/developed during the year is added to the carrying value of the given group of non-current assets, and the cost of the non-current assets alienated during the year (except those non-current assets that had been acquired during the year of alienation) is deducted from the carrying value of the given group of non-current assets.

Intangible assets may be amortised using the annual depreciation rate specified for the group by the taxpayer over the lesser of the asset's useful economic life or 20% *per annum*.

Land may not be depreciated.

Fixed assets purchased (constructed) prior to 1 January 2014 may be depreciated using the straight-line method. The maximum rates *per annum* (to be applied on the initial value) for depreciating fixed assets are:

Asset	Maximum depreciation rate per annum (%)
Other industrial and commercial buildings, constructions, and transmission devices	5
Hotels, resorts, rest houses, educational institutions	10
Robot equipment and assembly lines	33.3
Calculating devices and computers	100
Fixed assets with the value up to AMD 50,000	100
Industrial and commercial buildings, constructions, and transmission devices located in a designated disaster area (currently Gyumri)	100
Other fixed assets	20

Intangible assets created prior to 1 January 2014 may be amortised using the straight-line method over the lesser of the asset's useful economic life or ten years.

Goodwill

Payments with respect to goodwill and amortisation of goodwill are not deductible in Armenia.

Start-up expenses

Start-up expenses are fully deductible, provided they are properly documented.

Interest expenses

As a general rule, interest is deductible if the related debt is used to fund business activities of the taxpayer and the interest rate is not more than double the Central Bank of Armenia rate (currently, the deductible interest rate is capped at 24%).

In addition to the existing cap (twice of the Armenian Central Bank's settlement rate), if borrowings are received neither from banks nor from credit organisations, the deductible interest expense payable within the tax year should not exceed:

- nine times the value of tax net assets of taxpayers who are banks and credit organisations, and
- twice the value of tax net assets of other taxpayers.

The net assets are a positive difference between the taxpayer's assets and liabilities calculated for tax purposes. The value of net assets should be considered based on results of the reporting year.

The restriction does not apply to the funds borrowed from international organisations specified by the government. The restriction also does not apply to the interest payable on funds attracted from publicly placed debt instruments (securities).

Bad debt

A taxpayer is entitled to deduct bad debts if the taxpayer creates a reserve and allocates the amount of bad debt in the following proportions:

- Up to 90 days from the due date: 0%.
- From 91 to 180 days from the due date: 25%.
- From 181 to 270 days from the due date: 50%.
- From 271 to 365 days from the due date: 75%.

Beyond 365 days, bad debts of less than AMD 100,000 may be deducted. For larger debts, the company would need to have pursued the debt through the courts before a deduction may be taken.

Charitable contributions

Charitable donations and contributions to non-profit organisations are deductible in amounts of up to 0.25% of gross income.

Lease payments

Lease payments on operating leases are deductible. The lessor claims a deduction for depreciation of the leased assets. Financial leasing is treated for tax purposes as if a sale had been made. The lessee includes the value of the property in the relevant group of fixed assets and claims depreciation charges. The lessee also deducts the interest and commission elements of the lease payments in the period in which they are payable. Similarly, the lessor recognises taxable income for the total principal amount of the lease at the time when the asset is transferred and recognises the interest and commission element of the payments over the term of the lease.

Fines and penalties

Commercial fines and penalty expenses are deductible for CIT purposes. Fines and penalties paid to the state or municipal budgets are not deductible.

Taxes

Non-refundable (non-credited) taxes (e.g. property tax, land tax, expensed VAT), duties, and other obligatory payments are deductible for CIT purposes.

Other significant items

The deductibility of the following common items is limited for CIT purposes:

- Expenses incurred for advertising outside Armenia are limited to the greater of 3% of gross income or 20% of the value of services or goods exported from Armenia.
- Expenses for training of staff outside Armenia is limited to the lesser of 4% of the gross income of the reporting year or AMD 3 million per employee.
- Expenses for foreign trips are limited to 5% of the gross income of the reporting year.
- Representative expenses are limited to the lesser of 0.5% of the gross income of the reporting year or AMD 5 million.

Armenia

Net operating losses

Companies are entitled to carry forward losses to the five subsequent income years. Armenian law does not allow the carryback of losses.

Payments to foreign affiliates

Payments to foreign affiliates are deductible if they meet the normal tests for deductibility.

Group taxation

There are no group taxation provisions available in Armenia.

Transfer pricing

Armenia does not have formal transfer pricing rules. The tax authorities may apply market prices in limited cases.

Adoption of transfer pricing rules, which will be based on Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations issued by the OECD (OECD Guidelines), is currently in process.

Thin capitalisation

Armenia does not have thin capitalisation rules. However, there are certain limitations on deductibility of interest expenses (*see Interest expenses in the Deductions section*).

Controlled foreign companies (CFCs)

There are no CFC rules in Armenia.

Tax credits and incentives

The CIT Law provides additional tax incentives to Armenian-resident entities meeting several criteria under the government's export promotion-oriented program. The group of entities involved in the program approved by the government enjoy CIT rates reduced up to tenfold from the general 20% CIT rate. Mainly, the group of companies exclusively engaged in exports of goods and services with an annual group turnover of at least AMD 50 billion will enjoy a 2% reduced CIT rate. For the group of companies whose total annual export turnover is at least AMD 40 billion, the CIT rate will be reduced to 5%. Note that there are several other conditions the companies should meet to be eligible for the program.

The CIT for the resident companies implementing special construction projects exclusively outside Armenia and approved by the government is reduced to a 5% rate.

Taxpayers engaged in agricultural production are exempt from tax on that income.

Armenian-resident companies implementing a business plan approved by the government may deduct the amount of the annual salaries for the new jobs created from the CIT liability of that year, but not greater than the 30% of the actual CIT calculated. The incentive is applicable for three fiscal years, including the year of the start of the business.

The government provides incentives to resident start-ups in the information technology (IT) sector with employees not exceeding 30 people. The government is entitled to assist those start-ups to get favourable bank credit and funding. Also, the profit of the companies generated from sales of IT products is exempt from CIT. Personal income tax (PIT) to be withheld from salaries of the companies' employees is reduced to 10%.

Foreign tax credit

Tax residents are allowed to credit foreign taxes paid on income received abroad against their Armenian tax liabilities. The amount of foreign tax credit is limited to the amount of Armenian tax that would arise from the equivalent income in Armenia.

Withholding taxes

Payments to non-residents are subject to the following WHT rates:

- Payments for insurance, reinsurance, and transportation are subject to WHT at the rate of 5%.
- Dividends, interests, royalty, income from the lease of property, and increase in the value of property are subject to WHT at the rate of 10%.
- Other income (from services) received from Armenian sources is subject to WHT at the rate of 20%.

WHT is required to be transferred to the budget not later than the 20th day of the month following the payment of income. A WHT return should be submitted by 20 February following the reporting year.

WHT rates for non-residents may be reduced under a relevant tax treaty.

Notes

- The direct ownership threshold for the 5% rate is 10%. The 15% rate applies in other cases.
- The 0% rate applies to the sale on credit of industrial, commercial, and scientific equipment, and capital goods, and to interest on loans granted by banks. The 10% rate applies in other cases.
- The 5% rate applies if the recipient company directly holds at least 40,000 United States dollars (USD) of the capital of the company paying dividends. The 10% rate applies in other cases.
- The 5% rate applies if the recipient company directly owns at least 25% of the capital of the company paying dividends and the capital invested exceeds USD 100,000. The 15% rate applies in other cases.
- The 5% rate applies if the beneficial owner is a company that directly owns at least 25% of the capital of the company paying dividends. The 10% rate applies in other cases.
- The 0% rate applies if the recipient company directly or indirectly owns at least 25% of the capital of the company (during the latest two calendar years) paying dividends, provided that such dividends are tax exempt in the recipient company country. The 10% rate applies in other cases.
- The 5% rate applies if the beneficial owner is a company that directly owns at least 25% of the capital of the company paying dividends. The 15% rate applies in other cases.
- The 5% rate applies to royalties on copyright on software, trademark, model or project, industrial, commercial, scientific information (know-how) etc. The 10% rate applies to copyright royalties, including films, etc.
- The 5% rate applies if the recipient company directly or indirectly holds at least 10% of the capital of the company paying dividends. The 15% rate applies in other cases.
- The 0% rate applies to government debt and government-assisted debt. The 5% rate applies to interest on loans or credit granted by banks. The 10% rate applies in other cases.
- The 5% rate applies to literary, artistic, or scientific work copyright royalties and to film and broadcasting royalties. The 10% rate applies in other cases.
- The 0% rate applies to the credit sale of industrial, commercial, or scientific equipment, to the credit sale of merchandise or services, and to loans granted by a bank. The 10% rate applies in other cases.
- The 5% rate applies to copyright royalties. The 10% rate applies in other cases.
- The 5% rate applies to interest on loans or credit granted by banks. The 10% rate applies in other cases.
- The 0% rate applies to interest on loans granted by banks. The 10% rate applies in other cases.
- The 0% rate applies if the beneficial owner has invested at least 150,000 euros (EUR) in equity. The 5% rate applies in other cases.
- The 5% rate applies if the recipient company directly holds at least 25% of the capital of the paying company. The 10% rate applies in other cases.
- The 0% rate applies to interest that shall not be taxed by the other contracting country in similar cases. The 5% rate applies in other cases.
- The ownership threshold for the 10% rate is 30%. The 15% rate applies in other cases.
- The 10% rate applies if the beneficial owner is a company that directly owns at least 25% of the capital of the company paying dividends. The 15% rate applies in other cases.
- The ownership threshold for the 0% rate is 25% (during the latest two calendar years), provided that such dividends are tax exempt in the recipient company country. The direct ownership threshold for the 5% rate is 10%. The 15% rate applies in other cases.
- The 5% rate applies if the company receiving dividends has directly owned at least 10% of the capital (representing at least USD 100,000) of the company paying dividends for at least 12 months. The 10% rate applies in other cases.
- The 5% rate applies if the capital invested by the company receiving the dividends exceeds USD 100,000. The 10% rate applies in other cases.
- The ownership threshold for the 5% non-portfolio rate is 10%. The 0% rate applies if the dividends out of which the profits are paid have been effectively taxed at the normal rate for profits tax and the dividends are exempt income to the Dutch recipient. The 15% rate applies in other cases.

25. The ownership threshold for the 0% rate is 25% (during the latest two calendar years), provided that such dividends are tax exempt in the recipient company country. The 10% rate applies in other cases.
26. The 5% rate applies if the recipient company directly holds at least 25% of the capital of the paying company and the capital invested exceeds 200,000 Swiss francs (CHF). The 15% rate applies in other cases.
27. The 5% rate applies if the recipient company directly or indirectly owns at least 25% of the capital of the company paying dividends and the capital invested is at least 1 million pound sterling (GBP). The 15% rate applies to the income derived directly or indirectly from immovable property by an investment that distributes most of this income annually and income from such immovable property is exempted from tax. The 10% rate applies in other cases.

Tax administration

Taxable period

In Armenia, the taxable period is the calendar year.

Tax returns

The annual CIT return for resident entities must be filed by 15 April.

Payment of tax

The tax corresponding to the CIT return for resident entities is payable by 25 April.

Taxpayers are also required to make advance CIT payments by the 15th day of the last month of each quarter. Each advance payment is equal to 18.75% of the CIT paid for the previous year. For payments before the previous year's tax is calculated (e.g. January to March), tax is paid based on the last filed tax return, and an adjustment is made in the first advance tax payment made after the previous year's tax is calculated to correct the amount paid. If advance payments exceed the CIT liability for the year, the excess may be refunded.

Branches of foreign companies pay advance CIT biannually, but only if their CIT for the preceding year exceeded AMD 2 million. Each advance payment is equal to one-fourth of the CIT paid for the previous year. The annual tax return for branches is filed by 15 April. The corresponding tax is payable by 25 April.

Tax audit process

Risk based audits

For the purposes of planning audits, the authorities develop risk criteria that are approved by the Armenian government. Based on the risk criteria, entities are classified into the following three categories:

- High risk entities.
- Medium risk entities.
- Low risk entities.

The authorities should approve the audit plan (list of audit targets) for the following year before 1 December or 1 July of the preceding year. The list of audit targets is published during the three days after the audit plan has been approved.

Tax audits

The tax authorities may carry out scheduled audits a maximum of once each year for high risk taxpayers, once each three years for medium risk taxpayers, and once each five years for low risk taxpayers.

Business entities must be notified of the audit in writing at least three days before the scheduled audit.

Armenia

For normal business entities, the scheduled audit should be carried out within 15 business days, although the period may be extended by up to ten days. For companies whose annual revenue exceeds AMD 3 billion, the period may be extended by up to 75 business days.

The actual period of the inspection for normal business entities should not exceed 30 business days and 90 business days for large companies.

Before starting an audit, the tax inspector must present a written order to the taxpayer outlining the scope and period of the tax audit. The written order specifies the names of the officials who may participate in the audit.

Statute of limitations

The statute of limitations is four years.

Topics of focus for tax authorities

There are no specific topics of focus for the tax authorities. In practice, the tax authorities perform a comprehensive audit of the taxpayer's books, covering all taxes and mandatory payments.

Other issues

Intergovernmental agreements (IGAs)

A Model 2 IGA is treated as 'in effect' by the US Treasury as of 8 May 2014. The United States and Armenia have reached an agreement in substance, and Armenia has consented to disclose this status. In accordance with this status, the text of such IGA has not been released, and financial institutions in Armenia are allowed to register on the Foreign Account Tax Compliance Act (FATCA) registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

Reduction in the corporate income tax (CIT) rate

As of 1 January 2016, the CIT rate has been reduced from 28% to 25%.

Voldoening op Aangifte Systeem (VAS) system for CIT

General

In short, under the VAS system (effective 18 November 2015), the CIT due must be paid at the moment the CIT return is filed with the tax authorities (same as the payroll taxes and *Belasting op Bedrijfsomzetten [BBO]/Bestemmingsheffing Algemene Ziektekosten Verzekering [BAZV]*). Under the previous system, the taxpayer must wait for a CIT assessment to be imposed before the CIT can be paid. This can take up to five years before the assessment is received.

Deadline filing and payment

Under the VAS system, the CIT return of a financial year must be filed and the corresponding CIT due must be paid within five months after the end of the financial year (i.e. 'first deadline'). For financial years that are equal to the calendar year, the first deadline would be 31 May.

If filing a CIT return is not possible as per the first deadline, a one-time filing extension of six months (i.e. 'second deadline') can be obtained if a preliminary CIT return is filed and the corresponding CIT due is paid before the first deadline. Note that the preliminary CIT return must report at least the same taxable profit as the most recently filed CIT return. For financial years that are equal to the calendar year, the (extended) second deadline would be 30 November.

Refund over payment

If the final CIT return results in a lower CIT due than what has been already paid based on the preliminary CIT return, the tax authorities must refund the difference within six months after the final CIT return has been filed.

Transitional provisions

Preliminary CIT assessments already paid for the financial years commencing as of 1 January 2014 and 1 January 2015 can be deducted from the 2014 and 2015 CIT payable based on the VAS.

Financial years commencing on or after 1 January 2014 are eligible to extended deadlines.

Financial years commencing on or after 1 January 2015 are subject to the regular deadlines as discussed above.

Codification of the beneficial policy

On 18 November 2015, certain aspects of the beneficial policy as published by the Minister of Finance on 27 July 2013 are codified. Please find hereinafter the items of the beneficial policy that are codified as per the aforementioned date.

Aruba

Reduction dividend tax rate for free zone companies

Retroactively, as per 28 June 2013, a 0% dividend tax rate is introduced on (in)direct dividend distributions by free zone companies. Distribution of dividends originating from profits from financial years ending prior to the aforementioned date are subject to the dividend tax rate applicable at that time (0%, 5%, or 10%).

Investment allowance

An investment allowance of 6% on qualifying investments will apply for the financial year 2015 and onwards. The aforementioned applies both for the CIT and personal income tax (PIT). Furthermore, reformed imputation payment companies (IPCs) may also claim this allowance.

Maintenance reserve facility for timeshare resorts

The so-called reinvestment reserve facility for timeshare resorts is codified as announced in the beneficial policy. Entities that operate a timeshare resort are allowed to form a maintenance reserve from the profits obtained from maintenance fees paid by the members and owners. The reserve may not be formed from rental income of stores or income of other activities of the timeshare resort.

The reserve must be utilised within a period of ten years for maintenance investments. According to the explanatory notes, maintenance is considered general maintenance to the premises, renovation of the rooms, and replacement of appliances. If the reserve has not been utilised for this purpose within the aforementioned period, the addition to the reserve that was contributed ten years before will be released to the taxable profit and will be subject to CIT. If the entity that operates the timeshare resort ceases its activities, the total reserve will be considered taxable profit.

IPC regime

General

The reformed IPC regime is codified (as announced in the beneficial policy). The old IPC regime (of 2003) has been simplified and the qualifying activities have been broadened.

Old IPC regime

The old IPC regime no longer exists as of 9 December 2015. Transitional provisions apply for companies that have applied for the old IPC regime before the aforementioned date. These companies may apply the old IPC regime up to their financial years that have commenced prior to 1 January 2026. If, during the aforementioned period, a qualifying company chooses to apply the reformed IPC regime (*see below*), the transitional provision will no longer apply.

Reformed IPC regime

The reformed IPC regime will enter into force retroactively as of 28 June 2013. Companies conducting qualifying activities will be subject to a flat CIT rate of 10%. Hotels who meet certain conditions may be subject to a different CIT rate depending on their average revenue per available room in a financial year. The four hotel categories are:

Category	Minimal average revenue per available room (RevPar)/Status	CIT rate (%)
I	AWG* 331	10
II	AWG 313	12
III	AWG 286	15
IV	4-Diamond status	12

* Aruban florins

The current list of qualifying activities will remain unchanged and new activities (e.g. green energy projects) will be added according to the explanatory notes and the beneficial policy.

According to the explanatory notes, a company may conduct both qualifying activities subject to the abovementioned CIT rates and non-qualifying activities subject to the normal CIT rate of 25% (as of 1 January 2016). Also, according to the explanatory notes, if a company transitions from an IPC regime during the financial year 2013, the CIT rate applicable must be determined proportional to time.

A 0% dividend tax rate will apply on dividends distributed (in)directly from profits of a qualifying company that were subject to the abovementioned reduced CIT rates. The explanatory notes state that the so-called 'compartment doctrine' applies for the application of the 0% rate.

Moreover, qualifying companies cannot apply the participation exemption on benefits received from a participation.

Under the reformed IPC, qualifying companies may also claim the investment allowance of 6%, unlike under the old IPC regime.

Finally, companies applying the reformed IPC regime can only carry their losses forward for five years, unlike under the old IPC regime, where losses can be carried forward unlimitedly.

Taxes on corporate income

Resident companies are taxed on their worldwide income. Non-resident companies are taxed on the following Aruba-source income:

- Profits allocated to a permanent establishment (PE) or permanent representative in Aruba.
- Profits from real estate located in Aruba.
- Profits on loans secured by a mortgage on real estate located in Aruba.

Aruba has a flat CIT rate of 25% as of 1 January 2016 (previously 28%). Aruba also has special tax regimes (e.g. the IPC, the Aruba exempt company, the fiscal transparent company, the free zone company, the so-called oil refinery or oil terminal regime), which are ultimately taxed at a lower tax rate. *For a full discussion of these special tax regimes, see the Tax credits and incentives section.*

CIT is levied on the income as reflected in the profit and loss statement less any allowable deductions based on Aruba tax and case law.

Corporate residence

The place of residency of a corporation, association, society, foundation, or body is determined based on the circumstances. If the aforementioned entities are managed and controlled in Aruba, they will, in principle, be deemed to be resident in Aruba. If the legal form of an entity is governed by the Aruban law, then its place of residency will be considered continuously to be in Aruba.

Permanent establishment (PE)

If a foreign entity carries on a business through a PE or a permanent representative in Aruba, it will be subject to CIT in Aruba. While Aruba does not have rules and regulations as to the definition and interpretation of the term 'permanent establishment',

Aruba

a PE is deemed to exist if the place of execution of a building site or construction, excavation, maintenance, cleaning, assembly, or installation activities surpasses a period of 30 days. The memorandum of explanation refers to the commentary on Article 5 of the Organisation for Economic Co-operation and Development (OECD) model convention for the definition and interpretation of the term 'permanent establishment'.

Other taxes

Turnover tax

Aruba does not have a value-added tax (VAT) or sales tax, but it does have a business turnover tax. Turnover tax is levied at the rate of 1.5% on the delivery of goods or services rendered in Aruba. Goods that are imported into Aruba are not subject to turnover tax. A turnover tax exemption is applicable on exports. The exemption is applicable if the entrepreneur has asserted that the turnover is realised in connection with the delivery of goods to customers located outside of Aruba, where the goods in connection with the delivery are sent or transported to a destination outside Aruba.

Goods are all physical objects as well as electricity, gas, heating, cooling, and such. Services are all performances rendered against payment. A payment is defined as all proceeds in connection with the delivery of goods or services rendered. If a payment is not completely made via money, the fair market value of the compensation should be taken into account.

Taxable events

In the case of goods, the place of the taxable event is either where the transportation starts (if sold abroad) or at the physical location of the goods at the moment it is delivered. The place of the taxable event with regard to services is generally the place where the entrepreneur is established or from where one has a PE from which the service is rendered. As an exception to the aforementioned general rule, the place of the taxable event for certain services (e.g. services related to a real property) is the place where the actual services are rendered (e.g. the place where the real property is situated).

Exemptions

Some exemptions apply. For example, no turnover tax is levied on the sale of immovable property if it is also subject to transfer tax. Furthermore, exemptions also apply to interest received or payments for hotel rooms or leasing of apartments (insofar as room tax has been paid on the proceeds) and casino revenues (insofar as gambling duties are due on these revenues).

Formalities

The turnover tax is due within 15 days of the calendar month following the calendar month in which the turnover tax is due. A turnover tax return must be submitted to the tax authorities together with payment of the amount due.

Health levy (*Bestemmingsheffing Algemene Ziektekosten Verzekering or BAZV*)

The health levy shares many similarities with the turnover tax, except that, among others, the health levy is called a levy, it has a different percentage, and the total revenue collected will not be destined for the general funds of the government of Aruba. Instead, its revenue will be deposited on a monthly basis by the tax authorities into the general health insurance fund (*Algemene Ziektekosten Verzekering or AZV*).

The health levy is levied at 2% of turnover. All entrepreneurs in Aruba are subject to the health levy.

Taxable events

The health levy is levied on the supply of goods and/or rendering of services in Aruba. Goods are defined as all physical objects except water, gas, and electricity. Services are defined as all services rendered against payment. The taxable base consists of the entire taxable turnover received by the entrepreneur.

Exemptions

For the health levy, the same exemptions apply as for the turnover tax (e.g. leasing of houses for residential use, leasing of hotel rooms, casino revenue, schools, day cares, banking and insurance activities).

Please contact us for a complete overview of the exemptions.

Fiscal unity

Under the same conditions as for the turnover tax, a fiscal unity can be formed for health levy purposes. Within such fiscal unity, the supply of goods and rendering of services between group entities are consolidated and are therefore not taxable for the health levy. The health levy will then be levied at the level of the parent company.

Formalities

The health levy has the same filing and payment due dates as the turnover tax, which is ultimately the 15th day of the month following the month over which the health levy is due. The filing and payment of the turnover tax and health levy is made through one combined return.

Furthermore, same as the turnover tax, the filing and remittance of the health levy is, in principle, cash based unless a request is filed at the tax authorities to file and remit on an invoice-based system. The tax authorities have indicated that all decrees issued for the application of the invoice-based system will automatically apply for the health levy.

Import duties

Import duties are imposed by a tariff, which is set as a percentage of the cost, insurance, and freight (CIF) value of the product. A classification rule has been published that categorises various imported products into groups. A tariff ranging from 0% to 50% is levied on the various groups of products.

Excise duties

Excise duties are imposed on products such as spirits, cigarettes, mineral oil, and distillery. The taxable base of the excise duties is based on the weight, volume, and/or amount of the aforementioned products.

Ground tax

A person or entity that, as of 1 January of each year, owns real estate in Aruba or uses real estate based on property rights is subject to ground tax. The ground tax is levied on the registered value, which is determined once every five years by the tax authorities, and can only be protested in the first year of the aforementioned period (taking into account the two month objection period as of the date of the assessment). The rate amounts to 0.4% of the registered value of the real estate minus a general exemption of AWG 60,000. If the real estate is not used or is empty for more than six months in a year, a reduction in the ground tax due can be requested from the tax authorities.

Real estate transfer tax

If real estate situated in Aruba is transferred, the buyer of the real estate must pay transfer tax on the sales price of the real estate (unless the value registered at the tax authorities is higher, in which case the registered value is the basis for the levy). The rate for the transfer of the legal ownership of real estate with a value not exceeding AWG 250,000 is 3%. The rate for the transfer of the legal ownership of real estate with a value exceeding AWG 250,000 is 6% (due on the total amount).

Aruba

If shares in a real estate company are sold, no transfer tax is due.

Stamp taxes

Stamp taxes are, in principle, due on all documents as indicated in the Stamp State Ordinance. In practice, it is usually only levied on the documents used in the course of a legal suit.

Registration taxes

Aruba does not impose registration taxes.

Foreign exchange commission (FEC)

FEC is due when residents make a payment abroad in connection with certain legal transactions. The FEC is calculated as 1.3% of the payment abroad. Based on the State Ordinance, a payment abroad is considered:

- a payment with local currency or a payment from a florin account, whether or not by electronic transfer
- a payment with foreign currency or a payment from a foreign currency account, whether or not by electronic transfer, or
- a payment from a foreign currency account held abroad or from an inter-company account held by a person or entity abroad, whether or not by electronic transfer.

FEC is due to the extent the abovementioned payment is a result of one or more of the following legal transactions:

- the purchase of foreign instruments of payments or foreign monetary instruments
- obtaining control over receivables in one or more foreign currencies, or
- the crediting of an account in name of a non-resident of Aruba held at a foreign exchange bank or an institution abroad.

Furthermore, FEC will be levied on the purchase of foreign currencies with Aruban florins.

According to the policy of the Central Bank of Aruba, an exemption for the FEC applies when cash is transferred to a foreign bank account of an Aruban resident. In order to apply for this exemption, certain formalities must be met. First, the foreign bank account of the Aruba resident must be registered at the Central Bank of Aruba. Secondly, the Central Bank of Aruba must grant a so-called exemption for requirements. In addition, certain overviews of transactions regarding the foreign bank account must be filed with the Central Bank of Aruba on a quarterly basis.

Tourist levy

The tourist levy rate is 9.5% of the compensation (including charges) that the tourist pays for the use of lodging or a hotel room.

The taxable base for the tourist levy on timeshare units is set at:

- AWG 179 per day for studio units.
- AWG 193.95 per day for one bedroom units.
- AWG 223.75 per day for other than the abovementioned units.

The abovementioned fixed fees are not applicable in the event the timeshare unit is made available to other guests that are not timeshare guests. In that case, 9.5% tourist levy is due per day on the compensation paid by other guests for the use of the unit.

With regard to all-inclusive packages, the taxable base is set on 50% of the price of the all-inclusive package with a minimum of AWG 162 per day, increased with charges (e.g. service charges and energy charges).

Local citizens registered in the Aruban municipal register are not subject to the tourist levy. The owner of a condominium is also exempted from the tourist levy.

Wage tax

Wage tax is an advance levy to the PIT for employees. Wage tax has to be withheld as soon as an employment exists, and the employer is, in principle, the withholding agent. If employment involves a foreign employer, this employer only has to withhold wage tax if the employer has a PE in Aruba. The tax authority may, however, appoint a foreign employer as a withholding agent even if there is no PE.

Social security premiums

In Aruba, the following social security premiums are levied in connection with the wage tax.

Old Age Pension/Widow and Orphans Pension (Algemene Oudersdomsverzekering/Algemene Weduwen- en Wezen verzekering or AOV/AWW) premium

The AOV/AWW premium is paid by the employer and employee. The maximum premium income for the AOV/AWW is AWG 85,000.

The premium rate for the AOV is 14.5%. The employer's part is 10%, and the employee's part is 4.5%.

The premium rate for the AWW is 1%.

General health insurance (AZV) premium

The AZV premium, which is paid by the employer and the employee, is 10.5%, up to a maximum of AWG 8,925. The premium paid by the employer is 8.9%, up to a maximum of AWG 7,565. The premium paid by the employee is 1.6%, up to a maximum of AWG 1,360. The aforementioned percentages are to be calculated over the premium income, which is maximised at AWG 85,000.

Sickness, accident, and cessantia insurance premium

The sickness, accident, and cessantia insurance premium, which is only paid by the employer, consists of three parts: 2.65% for sickness insurance, a flexible rate of 0.25% up to 2.5% for accident insurance, and an amount of AWG 40 per employee year for the cessantia insurance. The rate of the accident insurance is dependent on the risk of the work performed. As of 1 July 2016, the premium income for the sickness and accident insurance is maximised to a wage of AWG 70,200. The cessantia is, in principle, paid upon dismissal of the employee by the employer, unless the dismissal is due to acts of the employee.

Branch income

Branch income is, in principle, determined according to the separate entity approach. Branches of foreign insurance companies apply a specific profit determination method. Furthermore, the transfer of profits to the head office is not subject to taxation.

Branch profits are subject to the normal CIT rate of 25%.

Income determination

Inventory valuation

Inventories may generally be stated on a last in first out (LIFO) or first in first out (FIFO) basis, provided the method chosen conforms to sound business practices. Conformity of book and tax reporting is not required.

Aruba

Capital gains

Capital gains are taxed as ordinary income. However, capital gains realised on the disposal of a shareholding qualifying for the participation exemption are tax exempt.

The participation exemption applies, in general, if an Aruban company holds shares or participation certificates in companies, associations, or foundations that carry on a business. If shares or participation certificates are held in a foreign entity, the participation exemption only applies if they are not held as an investment and the foreign entity is subject to a tax on profits.

The capital gain realised on the disposal of assets may be carried over to a special tax deferral reinvestment reserve but must be deducted from the acquisition costs of the new asset. In principle, this reinvestment reserve cannot be maintained for more than four consecutive years. If the reserve has not been used after four years, the remainder will be subject to taxation.

Capital losses are tax-deductible unless these losses are incurred on shares to which the participation exemption is applicable.

Dividend income

Provided the conditions of the participation exemption are met (*see Capital gains above*), an Aruban company is exempt from taxation on all benefits from the participation, including inter-company (cash) dividends.

Costs made in connection with the ownership of the participation (i.e. administration costs, interest, management expenses) are not deductible from the taxable result of the Aruba parent company.

Stock dividends

Stock dividends are allowed and treated as regular dividend income. The stocks will be valued at market value for tax purposes.

Interest income

Interest income is taxed as ordinary income.

Foreign income

A resident taxpayer is subject to CIT on its worldwide income. Double taxation of certain foreign-source income is avoided by means of the exemption method. If there is no legal possibility to exempt income and prevent double taxation, the foreign tax paid can be claimed as a deduction.

An Aruba corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

The profits of a PE in Curaçao, St. Maarten, or the Netherlands, including the Caribbean Netherlands, are tax exempt in Aruba based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. other than the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt.

Deductions

Depreciation

Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The tax authority has issued the following estimated depreciation table:

Assets	Depreciation rate (%)	Residual value (%)
Buildings	2/2.5	10
Renovation	10	0
Inventory	10/20	10
Computer:		
Hardware	33/50	0
Mainframe	10/12.5	0
Machinery and installations	10	10
Transportation:		
Cars	20	10
Rental cars	33	15
Trucks and buses	10	15
Start-up costs	20	0
Goodwill	20	0

The basis for depreciation includes all costs incurred with the purchase of an asset less the residual value. The straight-line method is customary; however, the declining-balance method is also acceptable.

As of 1 June 2010, accelerated depreciation has been introduced on assets that are used in the course of an industrial business and whose acquisition or production costs are above AWG 90 million. Aforementioned assets may be depreciated in ten equal annual parts. Note that IPCs can't apply this facility.

Interest expenses

Interest expenses are deductible for CIT purposes but should be based on arm's-length principles. *See Payments to foreign affiliates below for certain interest deduction limitations.*

Deduction of finance interest for the acquisition of local participation

Retroactively, as per 1 January 2013, the so-called temporised deduction of finance interest for the acquisition of a participation in a local company is codified (as announced in the beneficial policy). The total interest expenses are deductible, but not in the first two years after acquisition. In the third year after acquisition, the company can deduct in the following three consecutive years the interest, in equal parts, that was payable in the first two years. The company can also deduct, as of the third year after acquisition, the interest attributable to the concerning year.

The deduction is only possible on acquisitions that took place in the financial year 2013 and onwards.

Bad debt

It is possible to make a provision for future expenses with an existing cause on the balance sheet of the tax year in question; consequently, a provision may be made for bad debts.

Charitable contributions

The allowable gift deduction is AWG 50,000. The institution must be established in Aruba and serve one of the following interests:

- Religious.
- Charity.
- Cultural.
- Sportive.
- Scientific.
- Public interest.

Aruba

Fines and penalties

Fines imposed by an Aruban criminal judge, amounts paid to the state to prevent criminal prosecution, and fines and penalties imposed in accordance to the State Ordinance on General Taxes are not tax deductible.

Taxes

Taxes paid by the company, with the exception of CIT, are tax-deductible. Taxes paid by the company with respect to the purchase of an asset (e.g. real estate transfer tax paid while obtaining real estate) should be capitalised in the cost of the asset.

Net operating losses

A net operating loss may be carried forward to the five years following the tax year in which the loss was incurred. If the net operating loss has not been offset against profits within this period, the remaining net operating losses will expire. Net operating losses incurred by an IPC and companies operating an oil refinery or oil terminal as of 1 January 2010 may be carried forward indefinitely. Carrybacks of net operating losses are not permitted.

Payments to foreign affiliates

If interest or other payments (e.g. remunerations paid for the use of material and/or immaterial goods or services rendered) are made to entities, these payments should be made at arm's length. If the transaction is not at arm's length, only the arm's-length payment may be deducted from the taxable income.

Even if the transaction is at arm's length, the interest or other payments may still not be deductible from the taxable result of the Aruban company unless the Aruban company asserts that one of the following circumstances is applicable:

- The receiving company is not affiliated (*see below*) to the Aruban company.
- The receiving company is subject to an effective tax rate of at least 15%.
- The shares in the receiving company are all directly or indirectly held by a company whose shares (for at least 50% of the outstanding shares and representing at least 50% of the voting rights) are listed at a qualified stock exchange.

An affiliation with the taxpayer is deemed to exist in each of the following cases:

- The taxpayer has an interest of at least one third in another entity.
- An individual or entity has an interest of at least one third in the taxpayer.
- A third party has an interest of at least one third in another entity, while this third party also has an interest of at least one third in the taxpayer.

If an arm's-length payment is made to an affiliated company that is subject to taxation but pays an effective tax rate of less than 15%, only 75% of the payment made is allowed as a deduction.

Group taxation

Fiscal unity

Based on a policy of the Aruban tax authorities, Aruban resident public limited companies (*naamloze vennootschap* or NV) with at least 99% of the shares in other Aruban resident NVs can file a consolidated tax return (i.e. fiscal unity). In order to apply for this facility, a request must be filed with the Aruban tax authorities. Certain conditions must be met for the application of this regime (e.g. the companies in the fiscal unity must be of the same tax regime). Advantages of this facility are that the recognition of inter-company profits may be deferred and losses may be offset with profits of other companies within the fiscal unity.

Transfer pricing

The arm's-length principle (ALP) rule is codified in the Aruban State Ordinance Profit Tax (SOPT). If a corporate entity or individual participates, directly or indirectly, in the management, supervision, or the capital of two or more corporate entities, the conditions related to all transactions between these affiliated parties should be at arm's length. The ALP is applicable on all transfer pricing between affiliated companies with regard to all mutual legal relations (e.g. purchase prices, management fees, remunerations for services provided, royalty payments). The conditions should be business like, whereas the same conditions should apply as would have if the same transaction had taken place with a third party.

A documentation obligation is applicable in the SOPT. The explanatory notes on the bill state that for the meaning and application of the ALP and the documentation obligation, the OECD guidelines for Multinational Enterprises and Tax Administration should be considered. The documentation obligation is applicable at the moment that a transaction takes place.

Non-compliance to the documentation obligation leads to a reversed burden of proof to the taxpayer. From the explanatory notes of the profit tax return forms, it seems that the tax authorities require, as a minimum amount of documentation about the transfer pricing method used, the reason why the method was chosen and a substantiation of the manner of how the price was determined.

In light of the extensive OECD guidelines and considering the small-scale economy of Aruba, it is unclear to what extent the aforementioned requirements and the OECD guidelines should be followed. Up to this moment, the legislature has not provided detailed implementation guidelines on the documentation obligation.

Thin capitalisation

Aruba does not have thin capitalisation rules.

Controlled foreign companies (CFCs)

Aruba does not have CFC legislation.

Tax credits and incentives**Maintenance reserve for timeshare resorts**

Timeshare resorts are allowed to form a maintenance reserve for repairs and maintenance of the resort. The aforementioned reserve will be added back to the taxable income after ten years if the repairs and or maintenance did not take place. Maintenance reserves formed in earlier years will be recognised.

Investment allowance

An investment allowance applies for the financial year 2015 and onwards for both CIT and PIT. Furthermore, reformed IPCs may also claim this allowance. The investment allowance is 6% of qualifying investments and can be applied under the following conditions:

- The investment is higher than AWG 5,000 in one financial year.
- The investment must take place locally (in Aruba). Investments from foreign companies do not qualify for the investment allowance.
- Certain investments do not qualify for the investment allowance (e.g. land, houses for personal use, goodwill, animals). The moment one enters into an obligation is when one can claim the investment allowance.
- Capital disposal charge is due if the investment is sold within six years after purchase. The capital disposal charge is 6% of the sales price.

Aruba

- Can't be applied by oil refineries, free zone companies, and old regime IPC companies.

The imputation payment company (IPC)

The IPC is, in principle, an NV or a limited liability company (*vennootschap met beperkte aansprakelijkheid* or VBA) that pays the regular CIT rate of 25%. However, when certain stringent conditions are met, the shareholder of the IPC can request an imputation payment of 23/75 of the (formal) dividend distributed. Provided that the 0% dividend withholding tax (WHT) is applicable, the effective tax rate can be lowered to 2%.

In order to qualify for the IPC status, the following requirements must be met:

- The IPC must perform qualifying activities (*see below*) in Aruba.
- An Aruba-resident individual must be a member of the board of managing directors of the IPC.
- The articles of association state that the shares of the IPC are registered and that the directors keep a shareholders registry in which all shareholders are registered.
- The articles of association state that the financial statements are drawn up according to internationally accepted principles (like IAS or GAAP) and an audit by a qualified (group of) independent certified public accountant(s) is necessary.
- The board of managing directors must notify the tax authorities within a restricted period, and after the dividend has been distributed, that the shareholder will claim the imputation payment.

An independent certified public accountant must provide a yearly opinion regarding the compliance of the abovementioned first three requirements for the IPC status.

The shareholder must also meet certain requirements before the imputation payment can be granted, including:

- The shareholder must hold the (economic and legal ownership of the) shares for an uninterrupted period of at least 12 months to be eligible for the imputation payment.
- The shareholder must file a request (with several enclosures) with the tax authorities to receive the imputation payment.

The activities of the IPC are limited. The IPC company is not allowed to conduct non-qualified activities, no matter how small. The following activities are regarded as qualified activities:

- Exploitation of quality hotels. A quality hotel exists when the average revenue per available room (RevPar) amounts to at least AWG 354, the hotel has a hotel licence, and it is operated at its own risk and account. Note that the RevPar can be changed annually.
- Exploitation of shipping enterprises.
- Exploitation of aviation enterprises.
- Developing, acquiring, holding, maintaining, and licensing of intellectual and industrial ownership rights.
- Insuring special entrepreneurial risks (captive insurance).
- Holding of shares or other participation certificates. The IPC may not hold more than 5% of low-taxed shares or other participation certificates in foreign companies. The aforementioned are low taxed if they are subject to a 'profit' tax rate of at least 14%.
- Active financing (not being a credit institution) of other enterprises or companies, whether or not intra-group.
- Investing of funds, except in real estate and funds that are put at the disposal of group companies.
- Exploitation of a company aimed at generating sustainable energy.

Reformed IPC

On 1 July 2013, the government of Aruba published a beneficial policy that approves further amendments of certain taxes in anticipation of the amendment of the respective State Ordinances. The beneficial policy is codified as per 18 November 2015.

The following changes are adopted and codified as announced in the beneficial policy:

- The general CIT rate for the IPC will be 10%.
- The reformed IPC has an exemption for dividend WHT. This would imply that the old IPC regime refund system would not apply anymore.
- Hotels are classified in four categories for CIT. The applicable CIT rate will depend on the RevPar. The four categories are:
 - Category I: RevPar AWG 331: the CIT rate is 10%.
 - Category II: RevPar AWG 313: the CIT rate is 12%.
 - Category III: RevPar AWG 286: the CIT rate is 15%.
 - Category IV: 4-Diamond status: the CIT rate is 12%.
- The following additional requirements for the use of the IPC regime by hotels are applicable:
 - The hotel should be in possession of an 'EarthCheck' or similar certificate as of January 2015.
 - An annual investment must be made by the hotel to improve the sustainability of the hotel, depending on the category in which the hotel can be classified.

Below we will discuss the additional requirements for the application of the reformed IPC regime for hotels.

EarthCheck certificate

The hotel should be in possession of an EarthCheck certificate, similar certificate, or should have initiated the process of certification. The hotel should, in any case, be in the possession of the EarthCheck certificate as of 1 January 2015.

We understand that the lowest certification level would meet the requirements for the reformed IPC regime. The EarthCheck six-step process starts with benchmarking and ends with several levels of certification.

Generally, an EarthCheck certification would assess greenhouse gas emissions, energy efficiency, conservation and management, management of freshwater resources, ecosystem conservation and management, management of social and cultural impacts of tourism, land use planning and development, local socio-economic benefits of tourism, air quality protection and noise control, waste water management, drainage and streams, solid waste management, storage and use of environmentally harmful substances, and cultural heritage conservation.

Annual sustainability investment

An annual investment must be made by the hotel to improve the sustainability of the hotel and Aruba. The amount of investment must be equally divided between the following types of investments:

- Green energy projects.
- Education/training of personnel (including internships for local education programs).
- The purchase of locally manufactured products. We understand that both business assets and trading goods could qualify as 'products'. Moreover, we also understand that products that have been assembled locally would qualify.

The annual investment depends on the following category in which the hotel can be classified.

Aruba

Category	Hotels with less than 100 rooms (AWG)	Hotels with more than 100 rooms (AWG)
I	120,000	240,000
II	75,000	165,000
III	45,000	90,000
IV	75,000	165,000

The Aruba exempt company (AVV)

The Aruba exempt company (*Aruba Vrijgestelde Vennootschap* or AVV) is a particular form of an NV and is often used for international tax planning purposes. The AVV is, in principle, subject to CIT against the normal CIT rate and the dividend WHT. However, the profit of the AVV may be exempted completely from CIT and dividend WHT if its activities are limited to one or more of the following qualified activities:

- Holding of shares or other participation certificates. The IPC may not hold more than 5% of low-taxed shares or other participation certificates in foreign companies. The aforementioned are low taxed if they are subject to a 'profit' tax rate of at least 14%.
- Financing (not being a credit institution) of other enterprises or companies, whether or not intra-group.
- Investing of funds, except in real estate.
- Licensing of intellectual and industrial ownership rights.

As mentioned below, the AVV may, if certain conditions are met, also opt for the fiscal transparency regime for which it will not be subject to CIT and dividend WHT. In this case, the AVV is not required to perform the abovementioned qualified activities in order to enjoy the fiscal transparency status.

Fiscal transparent company

An NV, VBA, or AVV may opt, if certain conditions are met, to be treated as a partnership (fiscal transparent company). The fiscal transparent company is not subject to CIT, unless it carries on a business in Aruba. In that case, the shareholder will be subject to CIT with regard to the business it carries through a PE.

Dividends distributed by the fiscal transparent company to its shareholder are not subject to dividend WHT, since due to its transparency, all income and asset and liabilities are deemed to be attributed to its shareholder. The main requirements for this status is that all the company's shares must be registered, and a notification for the application for this status must be filed with the tax authorities within one month after the company has been incorporated.

The free zone company

The free zone is a specially designated area in Aruba where goods can be stored, processed, adapted, assembled, packaged, displayed, spread out, or subject to other treatments or where services can be provided.

Services include activities consisting of maintenance or repairs of goods of a non-Aruba enterprise, maintenance or repairs abroad of goods of a non-Aruba enterprise, or providing advice to or research on behalf of a non-Aruba enterprise/institution/private person. Financial services, however, are not allowed.

Conditions

A free zone company has to be a limited liability company that is incorporated according to the laws of Aruba but does not have to be established in the actual free zone. The free zone company is also only allowed to perform qualifying activities in the free zone (a designated area in Aruba). If activities are performed that are not allowed, the company may be banned from the free zone.

Taxation

- All profits generated from activities abroad are subject to 2% CIT. The free zone company must have a licence to perform activities for residents. All activities performed for residents are subject to the regular CIT rate of 25%. The free zone company is allowed to generate a maximum of 25% of its turnover with local consumers.
- The standard of 25/75% local turnover can be changed to 50/50% in certain cases (e.g. turnover related to sustainable energy, medical tourism, sustainable transport, airline companies, sustainable supply of food, shipping companies, maintenance and repairs). Permission from the Minister of Finance must be acquired.
- No import duties are due if the products are imported, used in the activities in the free zone in Aruba, and exported abroad.
- No turnover tax is due by the free zone company on cross-border supply of goods and/or the rendering of services.
- Companies established in the free zone are exempt from dividend WHT.
- On request, the free zone company can be exempted from 1.3% foreign exchange commission (subject to approval of the Central Bank of Aruba). Normally, this approval is a formality and no foreign exchange commission is due by the free zone company.
- A 0% dividend tax rate applies on (in)direct dividend distributions by free zone companies.

Other characteristics

The free zone company does not have to apply for a business licence or an establishment licence. Furthermore, a free zone company is subject to a so-called free zone facility charge of 0.75% of the sales over its turnover.

Special zone in San Nicolas

To successfully promote the investment climate in Aruba, a special zone has been established in San Nicolas, Aruba. If a legal person qualifies as a special zone company, it will be eligible for the following (tax) facilities:

- 15% CIT for activities that are particularly aimed at the local market.
- 10% CIT for activities that are more than 75% aimed at exports and hotels.
- 2% CIT for reinsurance companies.
- 2% CIT for activities related to sustainable development, green energy, and agriculture, provided that at least 75% of the sales revenue is local.
- Exemption from dividend WHT.
- 50% discount on the property tax payable for a period of five years.
- Exemption from turnover tax for the business turnover of companies with a special zone qualification where the business turnover is realised by services to foreign residents or established entrepreneurs.
- The Minister of Infrastructure may set a lower land value for investors.
- The Central Bank of Aruba may grant an exemption of payment of foreign exchange commission to a company that qualifies as a special zone company, based on a written and reasoned request, provided that the payment is related to other activities than that of supply to domestic customers. The exemption may be subject to conditions, which are subject to change at any time.
- The fringe benefits regulation (including expatriate regulation) will apply.
- An additional investment allowance of 10% is applicable on all investments in assets, regardless if purchased from local or foreign suppliers. For companies that apply the transitional arrangements for companies already established in the district of San Nicolas, the 10% additional investment allowance applies on a minimum investment of AWG 50,000. In total, an investment allowance of 16% is applicable if conditions are met. If the investment is suspended, the additional investment allowance of 10% for the special zone will remain valid.

Aruba

- The additional investment allowance will be reversed if the assets are disposed of or otherwise leave the capital of the company within a period of six years. The normal rules for the disposal charge will apply.

This regime is currently based on the beneficial policy 2013 published on 1 July 2014 and will apply for a period of at least ten years.

Oil refinery or oil terminal regime

In connection with the aim of the Aruba government to improve the investment climate for the exploitation of oil refineries or oil terminals, a so-called oil refinery or oil terminal regime was introduced as of 1 June 2010. The regime regards application, under certain conditions, of a lower CIT rate. Oil refineries or terminals whose shares are all directly or indirectly held by a company listed on a stock exchange recognised by the Minister are subject to a 7% CIT rate, while all other oil refineries or oil terminals are subject to a rate of 12%.

An unlimited carryforward loss compensation applies for companies operating an oil refinery or oil terminal, and a 0% dividend tax rate applies for distributions from profits from the operation of an oil refinery and oil terminal.

Foreign tax credit

A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the Aruba profit tax that is attributable to that foreign income.

Withholding taxes

Dividend WHT

A dividend WHT is levied on all (formal and non-formal) dividend distributions of Aruba-resident entities. The tax rate is:

- 10% of the dividend distribution.
- 5% of the dividend distribution if the shares (at least 50% of the outstanding shares and representing at least 50% of the voting rights) of the distributing company are listed on a qualified stock exchange. The same tax rate applies if all the shares of the distributing entity are directly or indirectly held by a company whose shares are (at least 50% of the outstanding shares and representing at least 50% of the voting rights) listed on a qualified stock exchange.
- 0% if the participation exemption (*see Capital gains in the Income determination section*) is applicable to the receiving company.

Dividends distributed from Aruba to countries within the Dutch Kingdom are subject to the Regulation for the Dutch Kingdom (the Regulation).

In certain situations, the Regulation reduces the rate of the dividend WHT from 10% to 7.5% or even 5%. The dividend WHT can be reduced to:

- 7.5% if the parent company owns at least 25% of the paid-in capital of the distributing company.
- 5% if the parent company owns at least 25% of the paid-in capital of the distributing company and the dividend at the parent company level is subject to a profit tax of at least 5.5%.

If a company is incorporated under Aruba law and transfers its factual place of management to another country, all dividend distributions by this relocated company will remain subject to the Aruba dividend WHT.

Dividend distributions include, among others:

- Formal dividend distributions.
- Liquidation payment.
- Bonus shares.
- Paying back of share capital, unless strict conditions are met.
- Imputation payment.

Formal requirements

Within 15 days after a dividend becomes payable, a dividend WHT return must be filed together with payment of the amount due. A dividend is payable if it is at the disposal of the shareholder (i.e. the board of directors of the distributing company does not have to take any more action in order for the shareholder to claim the dividend). A dividend is also payable if the debt becomes interest bearing because of the distribution.

A statement of approval of the Central Bank of Aruba is required if dividends are distributed to a foreign shareholder. If the dividend exceeds AWG 750,000, a licence from the Central Bank of Aruba is required.

Tax administration

Taxable period

Generally, the tax year is equal to the calendar year. However, corporate taxpayers may deviate from this by adopting a different financial year.

Tax returns

Once a CIT return is issued by the tax authorities, the taxpayer is obligated to file the tax return within two months after date of issuance. If, within six months after the tax year has ended, no tax return has been issued, the taxpayer is obligated to request a return within 15 days after the six months period. It may be argued that this obligation does not exist if a taxpayer is not subject to taxation.

If the final CIT return cannot be filed within the required two-month period, a request for an extension may be filed. The tax inspector may grant an extension for a maximum period of 12 months.

Payment of tax

CIT is due upon receipt of an assessment. The amount of tax due should be paid within two months after the date of the assessment.

The dividend WHT is due within 15 days after the dividend has become payable. A dividend WHT return must be submitted to the tax authorities together with payment of the amount due.

Penalties

The State Ordinance on General Taxes stipulates in which cases a penalty can be imposed. The Aruban penalty system can be divided into the following two categories.

Omissions

The tax authorities can impose penalties in the event the taxpayer does not (timely) file a return and in the event the taxpayer does not or partially pay the amounts due (timely).

The maximum penalty that can be imposed for not filing an assessment tax return (on time) varies between AWG 500 and AWG 10,000, with a maximum of 5% of the tax due. The minimum penalty amounts to AWG 250.

Aruba

The penalty for omissions in the filing of taxes on return, such as the wage tax and dividend WHT, by the due date amounts to AWG 500. The penalty for not paying the amounts due by the due date amounts up to a maximum of AWG 10,000.

If the withholding agent for wage tax purposes does not provide an employee with a wage tax card or fails to have the proper employee documentation on file, a penalty of up to a maximum of AWG 10,000 can be imposed.

Gross negligence or intent

Gross negligence is deemed present if the reprehensible behaviour of a taxpayer results in less taxes being paid or levied than otherwise would have been the case. The penalty amounts to 25% of the additional tax due.

Intent is defined as a wilful and knowing act resulting in less or no taxes being paid or levied (timely). Conditional intent is defined as wilfully and knowingly accepting the fair chance that a course of action or omission results in less or no tax being paid or levied (timely). The penalty amounts to 50% of the additional tax due.

A penalty of 100% of the additional tax due can be levied in case of repetition, fraud, or substantial amounts not being levied or paid.

Tax audit process

There is no specific cycle for audits. Depending on a desk review of the tax returns of the last couple of years, an audit may follow.

Statute of limitations

An additional assessment can be imposed, in general, until five years after the tax year. In cases where the taxpayer is considered to be in bad faith, this period can be extended up to ten years or, in some cases, up to 12 years (e.g. if the tax differences relate to a component that is being held in a foreign country) after the tax year.

Topics of focus for tax authorities

There are no specific topics of focus. In case an audit is started, each aspect may be investigated. Often, the audit will not only focus on the profit tax, but also the other tax obligations, such as turnover tax, wage tax, and social security premiums.

Significant developments

Certain small business taxpayers have a reduced corporate tax rate (28.5% for income years commencing on or after 1 July 2015; however, there is a proposal to further reduce the rate with effect from the 2016/17 income year to 27.5%) (*see the Taxes on corporate income section*) and have access to accelerated depreciation on certain depreciating assets acquired and installed ready for use between 12 May 2015 and 30 June 2017 (*see the Deductions section for more information*).

From 1 July 2017, the Australian goods and services tax (GST) will apply to cross-border supplies of digital products and services imported by Australian consumers.

The Australian government has enacted a range of integrity measures that seek to address multinational tax avoidance by companies with global revenue of 1 billion Australian dollars (AUD) or more, including the following:

- The doubling of the maximum administrative penalties that can be applied to entities that enter into tax avoidance and profit shifting schemes (applicable to income years commencing on or after 1 July 2015).
- Implementation of the Organisation for Economic Co-operation and Development's (OECD's) new transfer pricing documentation standards from 1 January 2016, including country-by-country (CbC) reporting standards.
- A targeted anti-avoidance rule aimed at multinationals that enter into arrangements that artificially avoid having a taxable presence in Australia (applicable from 1 January 2016).

There is a further proposal to apply a Diverted Profits Tax (DPT), effective from 1 July 2017, to large companies (global revenue of at least AUD 1 billion) that engage in related-party arrangements to shift their profits offshore to lower corporate tax jurisdictions.

See Integrity measures for large multinationals in the Group taxation section for more information.

A number of transparency measures are now in effect in Australia, including the adoption of the Common Reporting Standard (CRS), which applies to Australian financial institutions from 1 July 2017. In addition, from a public transparency perspective, the Australian Commissioner of Taxation is required to publish limited information about the annual tax affairs of public and foreign-owned companies with 'total income' of AUD 100 million or more for an income year, Australian-owned private companies with total income of at least AUD 200 million, and those with a liability to pay the Petroleum Resource Rent Tax (PRRT). *See the Other issues section for more information.*

Foreign investors that invest in Australia are now subject to additional criteria as part of Australia's clearance of foreign investment proposals. The new tax conditions that are aimed at ensuring foreign investors are compliant with Australian tax laws are

Australia

to be formally applied in making an assessment of Australia's national interest, a key criterion in the foreign investment clearance process. *See the Other issues section for more information.*

A foreign resident withholding regime applies to foreign residents that dispose of certain taxable Australian property, which will be subject to a non-final withholding tax (WHT) of 10% of the proceeds from the sale of taxable Australian property. The regime will apply to contracts entered into on or after 1 July 2016. *See Capital gains in the Income determination section for more information.*

Please note this information is current as of 1 June 2016. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2016.

Taxes on corporate income

Companies that are residents of Australia are subject to Australian income tax on their worldwide income. Generally, non-resident companies are subject to Australian income tax on Australian-sourced income only. However, where a company is resident in a country with which Australia has concluded a double taxation agreement (DTA), Australia's right to tax business profits is generally limited to profits attributable to a permanent establishment (PE) in Australia.

'Small business' companies are subject to federal tax on their taxable income at a 28.5% tax rate, while all other companies have a 30% rate (previously all companies had a 30% rate). The reduced rate applies only to those companies who carry on business and who, together with certain 'connected' entities, have an aggregated turnover of less than AUD 2 million for the year.

Local income taxes

There are no state or municipal taxes on income in Australia.

Corporate residence

A company is a resident of Australia for income tax purposes if it is incorporated in Australia or, if not incorporated in Australia, it carries on business in Australia and either (i) its central management and control are in Australia or (ii) its voting power is controlled by shareholders who are residents of Australia.

Permanent establishment (PE)

The concept of a PE is established in both domestic law and various DTAs that have been concluded with Australia. Where a company is resident in a country with which Australia has a DTA, it is important to have regard to the definition of PE contained therein as this will generally apply in priority to the domestic law.

Broadly, under Australia's domestic law, a PE is a place at or through which a person carries on any business, and includes:

- A place where the person is carrying on business through an agent (except where the agent does not have, or does not habitually exercise, a general authority to negotiate and conclude contracts on behalf of the person).
- A place where the person has, is using, or is installing substantial equipment or substantial machinery.
- A place where the person is engaged in a construction contract.
- Where the person is engaged in selling goods manufactured, assembled, processed, packed, or distributed by another person for, or at or to the order of, the first-

mentioned person and either of those persons participates in the management, control, or capital of the other person or another person participates in the management, control, or capital of both of those persons, the place where the goods are manufactured, assembled, processed, packed, or distributed.

Most DTAs contain a definition of PE that is similar, though not identical, to the definition under domestic law.

Other taxes

Goods and services tax (GST)

The federal government levies GST at a rate of 10% and distributes the revenue to state governments. The GST is a value-added tax (VAT) applied at each level in the manufacturing and marketing chain and applies to most goods and services, with registered suppliers getting credits for GST on inputs acquired to make taxable supplies.

Food, with some significant exceptions; exports; most health, medical, and educational supplies; and some other supplies are 'GST-free' (the equivalent of 'zero-rated' in other VAT jurisdictions) and so not subject to GST. A registered supplier of a GST-free supply can recover relevant input tax credits, although the supply is not taxable.

Residential rents, the second or later supply of residential premises, most financial supplies, and some other supplies are 'input-taxed' ('exempt' in other VAT jurisdictions) and are not subject to GST. However, the supplier cannot recover relevant input tax credits, except that financial suppliers may obtain a reduced input tax credit of 75% of the GST on the acquisition of certain services.

Health insurance is GST-free. Life insurance is input-taxed. General insurance is taxed. Reverse charges may apply to services or rights supplied from offshore, where the recipient is registered or required to be registered, and uses the supply solely or partly for a non-creditable supply.

GST will apply to cross-border supplies of digital products and services imported by Australian consumers from 1 July 2017. This measure will ensure that digital products and other imported services supplied to Australian consumers by foreign entities are subject to the GST. Non-resident suppliers will be required to register, collect, and remit GST on the digital products and services that they provide to Australian consumers.

Wine equalisation tax (WET)

The federal government levies WET at the wholesale level at a rate of 29%, in addition to 10% GST, which is calculated on the price including the WET, and it applies to wine from grapes, fruit and certain vegetables, mead, and sake. Retailers do not receive an input tax credit for WET. A rebate is available to a wine producer of 29% of the wholesale price (excluding WET or GST) for wholesale sales, and of 29% of the notional wholesale selling price for retail sales and applications for own use (up to a maximum of AUD 500,000).

Luxury car tax

The luxury car tax is levied by the federal government at the rate of 33% of the value of the car that exceeds the luxury car tax threshold (AUD 75,526 for fuel-efficient vehicles and AUD 64,132 for other vehicles in the 2016/17 financial year) and is payable on the GST-exclusive value above the threshold. No input tax credit is available for luxury car tax, regardless of whether the car is used for business or private purposes.

Customs duties

Imports into Australia are subject to duties under the Australian Customs Tariff. The top duty rate is 5%.

Australia

Australia currently has comprehensive free trade agreements with Chile, China, Japan, Korea, Malaysia, New Zealand, Singapore, Thailand, and the United States. In addition, a regional free trade agreement between Australia, New Zealand, and Southeast Asian nations progressively eliminates all barriers to trade in goods, services, and investments. Australia has also concluded negotiations on a Trans-Pacific Partnership Agreement (TPP).

Excise duties

Excise duties are imposed at high levels on beer, spirits, liqueurs, tobacco, cigarettes, and petroleum products. Excise rates for tobacco, alcohol, and fuel are indexed bi-annually based on movements in the consumer price index (CPI). Some examples of current excise rates include:

- Beer not exceeding 3% by volume of alcohol packaged in an individual container not exceeding 48 litres: AUD 41.08 per litre of alcohol calculated on that alcohol content by which the percentage by volume of alcohol of the goods exceeds 1.15.
- Tobacco in stick form not exceeding in weight 0.8 grams per stick of actual tobacco content: AUD 0.53733 per stick.
- Petroleum condensate, crude petroleum oil, and diesel: AUD 0.395 per litre.
- Liquefied petroleum gas (LPG), other than LPG exempted from excise duty: AUD 0.129 per litre.

A fuel tax credit system provides a credit for fuel tax (excise or customs duty) that is included in the price of taxable fuel. Broadly, credits are available to entities using fuel in their business and to households using fuel for domestic electricity generation and heating.

Land tax

All states and territories (except the Northern Territory) impose a tax based on the unimproved capital value of land. In general, the principal place of residence and land used for primary production is exempt from land tax.

Stamp duty

All states and territories impose a stamp duty on a wide variety of transactions at different rates. All jurisdictions impose a stamp duty on real estate conveyances, but most exempt conveyances of goods (not associated with other property) from stamp duty. The imposition of duty on share transfers involving unlisted entities differs from state to state. Corporate reconstruction exemptions are available. Advice from a stamp duty specialist should usually be obtained where substantial stamp duty may be imposed because the amount of duty may depend on the form of the transaction.

Fringe benefits tax (FBT)

The federal government levies FBT on employers at the rate of 49% on the 'grossed-up value' of non-salary and wages fringe benefits provided to employees (and/or the employee's associates) by the employer or associates. The grossing-up of the value ensures tax neutrality between providing benefits and cash remuneration. FBT generally is deductible for income tax purposes. There are some exemptions from FBT, including some minor benefits, remote area housing in certain circumstances, and specified relocation costs. In addition, there are some concessional valuation rules, in particular for motor vehicles and certain living-away-from-home benefits.

Payroll tax

States and territories impose a tax on employers' payroll (broadly defined). The various jurisdictions have harmonised their payroll tax legislation, but some differences remain, particularly tax rates and the thresholds for exempting employers whose annual payroll is below a certain level, after taking into account grouping rules. For example, in New South Wales, the rate for the year ended 30 June 2016 is 5.45% with an annual exemption threshold of AUD 750,000. In Victoria, the rate for the year ended 30 June

2016 is 4.85%, and the annual exemption threshold is AUD 550,000 (from 1 July 2016, the threshold will increase to AUD 650,000). A variety of rates and thresholds apply in other state and territory jurisdictions.

Superannuation guarantee levy

Legislation requires employers to contribute a certain percentage of an employee's earnings base, subject to limited exceptions, to a registered superannuation fund or retirement savings account on behalf of the employee. Failure to make these contributions will result in the employer being liable for a non-deductible superannuation guarantee charge.

The current superannuation guarantee percentage is 9.5% and will remain so until 30 June 2021. From 1 July 2021, the rate will increase to 10% and will progressively increase up to 12% from 1 July 2025.

No level of Australian government imposes a social security levy.

Insurance tax

States impose taxes on insurance premiums, which may be substantial.

Petroleum Resource Rent Tax (PRRT)

PRRT currently applies to all petroleum projects in Australian offshore areas (or Commonwealth adjacent areas) other than production licences derived from the Joint Petroleum Development Area in the Timor Sea. It also applies to all Australian onshore and offshore oil and gas projects, other than the Joint Petroleum Development Area in the Timor Sea.

PRRT is applied to a 'project' or 'production licence area' at a rate of 40% of the taxable profits derived from the recovery of all petroleum in the project, including:

- crude oil
- shale oil
- condensate
- sales gas
- natural gas
- LPG, and
- ethane.

The taxable profit of a project is calculated as follows:

Taxable profit = Assessable receipts - Deductible expenditure

Deductible expenditure broadly includes exploration expenditure, all project development, and operating expenditures.

PRRT is self-assessed by the relevant taxpayer. The taxpayer is, in most cases, required to give the Commissioner of Taxation a PRRT return for each PRRT year. PRRT is generally payable by quarterly instalments.

PRRT applies in addition to normal income tax. PRRT payments (including instalments) are, however, deductible for income tax purposes.

Local municipal taxes

Local taxes, including water, sewerage, and drainage charges, are levied based on the unimproved capital value of land and include a charge for usage (e.g. water usage).

Branch income

Branch profits are subject to ordinary corporate rates of taxation, and there is no withholding on repatriated profits.

Income determination

Inventory valuation

Inventory generally may be valued at cost (full absorption cost), market selling value, or replacement price. Where, because of obsolescence or other special circumstances, inventory should be valued at a lower amount, the lower valuation generally may be chosen, provided it is a reasonable valuation. Special rules apply, however, regarding the valuation of trading stock for certain companies joining a consolidated group. Last in first out (LIFO) is not an acceptable basis of determining cost, nor is direct costing in respect of manufactured goods and work-in-progress.

Conformity is not required between book and tax reporting. For tax purposes, inventory may be valued at cost, market selling value, or replacement price, regardless of how inventory is valued for book purposes. Those who choose to come within the small-business entity measures (broadly defined as taxpayers who carry on business and who, together with certain 'connected' entities, have an aggregated turnover of less than AUD 2 million for the year) may ignore the difference between the opening and closing value of inventory if, on a reasonable estimate, this is not more than AUD 5,000.

Capital gains

A capital gains tax (CGT) applies to assets acquired on or after 20 September 1985. Capital gains realised on the disposal of such assets are included in assessable income and are subject to tax at the corporate tax rate. In order to determine the quantum of any gain for any assets acquired before 21 September 1999, the cost base is indexed according to price movements since acquisition, as measured by the official CPI until 30 September 1999. There is no indexation of the cost base for price movements from 1 October 1999. Disposals of plant and equipment are subject to general rules rather than the CGT rules. Capital losses are allowable as deductions only against capital gains and cannot be offset against other income. In calculating capital losses, there is no indexation of the cost base.

Companies that are residents in Australia generally are liable for the tax on gains on the disposal of assets wherever situated, subject to relief from double taxation if the gain is derived and taxed in another country. However, the capital gain or capital loss incurred by a company from a CGT event in relation to shares in a foreign company is reduced by a percentage reflecting the degree to which the foreign company's assets are used in an active business if the company holds a direct voting percentage of 10% or more in the foreign company for a certain period before the CGT event. Attributable income from CGT events happening to shares owned by a controlled foreign company (CFC) are reduced in the same way. Capital gains and capital losses made by a resident company in respect of CGT events happening in respect of 'non-tainted' assets used to produce foreign income in carrying on business through a PE in a foreign country are disregarded in certain circumstances.

Non-resident companies are subject to Australian CGT only where the assets are taxable Australian property (i.e. Australian real property, or the business assets of Australian branches of a non-resident). Australian CGT also applies to indirect Australian real property interests, being non-portfolio interests in interposed entities (including foreign interposed entities), where the value of such an interest is wholly or principally attributable to Australian real property. 'Real property' for these purposes is consistent with Australian treaty practice, extending to other Australian assets with a physical connection with Australia, such as mining rights and other interests related to Australian

real property. A 'non-portfolio interest' is an interest held alone or with associates of 10% or more in the interposed entity. From 1 July 2016, 10% of the proceeds from the sale of certain taxable Australian property (other than residential property with a value of less than AUD 2 million) by a non-resident is subject to a non-final WHT.

Dividend income

A 'gross-up and credit' mechanism applies to franked dividends (dividends paid out of profits that have been subject to Australian tax) received by Australian companies. The corporate shareholder grosses up the dividend received for tax paid by the paying company (i.e. franking credits attaching to the dividend) and is then entitled to a tax offset (i.e. a reduction of tax) equal to the gross-up amount. A company with an excess tax offset entitlement converts the excess into a carryforward tax loss using a special formula.

Dividends paid to another resident company that are unfranked (because they are paid out of profits not subject to Australian tax) are taxable, unless they are paid within a group that has chosen to be consolidated for tax purposes. Dividends paid between companies within a tax consolidated group are ignored for the purposes of determining the taxable income of the group.

Franked dividends paid to non-residents are exempt from dividend WHT.

An exemption from WHT is also available for dividends received by non-resident shareholders (or unitholders) in an Australian corporate tax entity (CTE) to the extent that they are 'unfranked' and are declared to be conduit foreign income (CFI). These rules may also treat the CFI component of an unfranked dividend received by an Australian CTE from another Australian CTE as not taxable to the recipient, provided it is on-paid within a specified timeframe. Broadly, income will qualify as CFI if it is foreign income, including certain dividends, or foreign gains, which are not assessable for Australian income tax purposes or for which a foreign income tax offset has been claimed in Australia.

Non-portfolio dividends repatriated to an Australian resident company from a company resident in a foreign country will be non-assessable, non-exempt income, but only if it is a distribution paid on an equity interest as determined under Australian tax law.

Income of a non-resident entity in which Australian residents hold interests is not assessable when repatriated to Australia where the income has been previously attributed to those residents and taxed in Australia (*see Controlled foreign companies [CFCs] in the Group taxation section for more information*).

Stock dividends

Stock dividends, or the issue of bonus shares, as they are known under Australian law, are, in general, not taxed as a dividend, and the tax treatment is the spreading of the cost base of the original shares across the original shares and the bonus shares. However, if a company credits its share capital account with profits when issuing bonus shares, this will taint the share capital account (if it is not already a tainted share capital account), causing the bonus share issue to be a dividend. Certain other rules may apply to bonus share issues, depending on the facts.

Financial arrangements

Special rules apply to the taxation of financial arrangements (TOFA). 'Financial arrangement' is widely defined to cover arrangements that involve a cash settleable legal or equitable right to receive, or obligation to provide, something of economic value in the future.

These measures provide six tax-timing methods for determining gains or losses in respect of financial arrangements, along with revenue account treatment of the resulting

Australia

gains or losses to the extent that the gain or loss is made in earning assessable income or carrying on a business for that purpose. The default methods are the accruals method and the realisation method, one or other of which will apply depending on the relevant facts and circumstances of a particular financial arrangement. In broad terms, the accruals method will apply to spread an overall gain or loss over the life of the financial arrangement where there is sufficient certainty that the expected gain or loss will actually occur. A gain or loss that is not sufficiently certain is dealt with under the realisation method.

Alternatively, a taxpayer may irrevocably choose one or more of four elective methods (i.e. fair value, retranslation, financial reports, and hedging) to determine the tax treatment of financial arrangements covered by the election. Qualification criteria must be met before the elective methods may be used. Generally, these criteria require that the taxpayer prepare a financial report in accordance with Australian (or comparable) accounting standards and be audited in accordance with Australian (or comparable) auditing standards.

Exemptions from this regime may be available having regard to the duration of the arrangement or the nature of the relevant taxpayer and the annual turnover or value of assets of that taxpayer. Certain types of financial arrangements are excluded from these rules, including leasing and hire purchase arrangements. Foreign residents are taxable on gains from financial arrangements under these measures to the extent that the gains have an Australian source.

Foreign exchange gains and losses

Foreign currency gains and losses are recognised when realised, regardless of whether there is a conversion into Australian dollars, and are included in or deducted from assessable income, subject to limited exceptions. There are exceptions to the timing and characterisation aspects of the realisation approach where the foreign currency gain or loss is closely linked to a capital asset. To reduce compliance costs with foreign currency denominated bank accounts, some taxpayers may elect to disregard gains or losses on certain low balance transaction accounts that satisfy a *de minimis* exemption or may elect for retranslation by annually restating the balance of the account by reference to deposits, withdrawals, and the exchange rates at the beginning and end of each year (or by reference to amounts reported in accordance with applicable accounting standards).

For foreign exchange gains and losses associated with financial arrangements subject to the TOFA measures (*as discussed above*), the compliance impact of the foreign exchange rules will be reduced for those taxpayers who are eligible to and elect the TOFA retranslation or financial reports tax-timing methods.

Entities or parts of entities, satisfying certain requirements, are able to choose to account for their activities in a currency other than Australian dollars for income tax purposes as an intermediate step to translating the result into Australian dollars (known as the 'functional currency' choice).

Foreign income

The current basis upon which the foreign income of corporations resident in Australia is taxed is set out below.

- Foreign dividends or distributions paid on equity interests as defined for Australian income tax purposes (i.e. the exemption does not apply to dividends paid on legal form shares that are treated as debt interests) are exempt from tax when received by a resident corporate tax entity that holds at least a 10% participation interest in the foreign company. The exemption also applies to distributions received indirectly (e.g. via a trust) by resident companies.
- Active foreign branch profits of a resident company from carrying on business through a PE in a foreign country and capital gains made by a resident company from

the disposal of non-tainted assets used in deriving foreign branch income (except income and capital gains from the operation of ships or aircraft in international traffic) are not assessable for tax.

- Other foreign income of Australian resident corporations is subject to tax; however, in most cases, an offset for foreign income tax paid is allowed to the extent of Australian tax payable on such income.
- Generally, limited partnerships are treated as companies for Australian tax purposes. In certain circumstances, foreign limited partnerships, foreign limited liability partnerships, United States (US) limited liability companies, and United Kingdom (UK) limited liability partnerships will be treated as partnerships (i.e. as a flow-through entity) rather than as a company for the purposes of Australia's income tax laws.
- Australia also has a comprehensive CFC regime. *See Controlled foreign companies (CFCs) in the Group taxation section for more information.*

Deductions

Depreciation and depletion

A capital allowances regime allows a deduction for the decline in value of depreciating assets held by a taxpayer. The holder of the asset is entitled to the deduction and may be the economic, rather than the legal, owner. A 'depreciating asset' is an asset that has a limited effective life and can reasonably be expected to decline in value over the time it is used, but does not include land, trading stock, or, subject to certain exceptions, intangible assets. Deductions are available for certain other capital expenditure.

Intangible assets that are depreciating assets (if they are not trading stock) are:

- Certain mining, quarrying, or prospecting rights and information.
- Items of intellectual property (IP).
- In-house software.
- Indefeasible rights to use an international telecommunications submarine cable system.
- Spectrum licences under radio communications legislation.
- Datacasting transmitter licences.
- Telecommunications site access rights.

Taxpayers that do not qualify as a small business must depreciate the asset over its useful life (known as 'effective life') using either the straight-line (known as the 'prime cost' method) or diminishing-value method (straight-line rate multiplied by 200% for depreciating assets acquired on or after 10 May 2006).

Taxpayers may self-determine the effective life of a unit or plant or may choose the effective life contained in a published determination of the Commissioner of Taxation.

Non-small-business taxpayers are able to choose to write off all items costing less than AUD 1,000 through a low-value pool at a diminishing-value rate of 37.5% *per annum*.

For those who satisfy the small business entity threshold (broadly defined as taxpayers who are carrying on business and who, together with certain connected entities, have an aggregated turnover of less than AUD 2 million for the year), a simplified depreciation system applies by taxpayer choice and with more attractive depreciation rates, including an immediate write off for depreciating assets with a cost of less than AUD 20,000 that are first acquired on or after 7.30pm, by legal time in the Australian Capital Territory, on 12 May 2015, and first used or installed ready for use on or before 30 June 2017.

Australia

'Project pool' rules allow expenditures that do not form part of the cost of a depreciating asset to be deductible over the life of a project that is carried on for a taxable purpose. Amongst other things, items that fall within the rules include the following:

- Amounts paid to create or upgrade community infrastructure for a community associated with the project.
- Site preparation costs for depreciating assets (except horticultural plants in certain circumstances).
- Amounts incurred for feasibility studies for a project.
- Environmental assessment costs applicable to the project.
- Amounts incurred to obtain information associated with the project.
- Amounts incurred in seeking to obtain a right to IP.
- Costs of ornamental trees or shrubs.

The so-called 'blackhole' expenditure provisions allow a five-year straight-line write-off for capital expenditure in relation to a past, present, or prospective business, to the extent that the business is, was, or is proposed to be carried on for a taxable purpose. The expenditure is deductible to the extent that it is not elsewhere taken into account (e.g. by inclusion in the cost base of an asset for CGT purposes) and that it is not denied deductibility for the purposes of the income tax law (e.g. by the rules against deducting entertainment expenditure).

Special rules apply for primary producer assets, such as horticultural plants, water and land care assets, and the treatment of expenditure on research and development (R&D) (*see the Tax credits and incentives section for more information*) and expenditure on certain Australian films.

A luxury car cost limit applies for depreciating the cost of certain passenger motor vehicles (AUD 57,466 cost limit for the 2015/16 income year).

Expenditure on the development of in-house software may be allocated to a 'software development pool'. For expenditure incurred in an income year commencing on or after 1 July 2015, the rate of write off is five years (30% in years two, three, and four, and 10% in year five). Amounts spent on acquiring computer software or the right to use it (except where the acquisition is for developing in-house software) generally are treated as incurred on acquiring a depreciating asset, deductible over five years commencing in the year it is first used or installed ready for use.

A loss arising on the sale of a depreciating asset (depreciated value of the asset less sale consideration) is generally an allowable deduction. A gain on the sale of a depreciating asset, to the extent of depreciation recaptured, generally is taxed as ordinary income. Gains exceeding the amount of depreciation recaptured are also taxed as ordinary income.

Subject to exceptions referred to below, capital expenditure incurred after 15 September 1987 in the construction or improvement of non-residential buildings used for producing assessable income is amortised over 40 years at an annual 2.5% rate. Capital expenditure on the construction of buildings used for short-term traveller accommodation (e.g. hotels, motels) and industrial buildings (typically factories) is amortised over 25 years at an annual 4% rate where construction commenced after 26 February 1992. The cost of eligible building construction that commenced after 21 August 1984 and before 16 September 1987 (or construction contracted before 16 September 1987) is amortised over 25 years at an annual 4% rate. There is no recapture of the amortised amount upon disposal of the building, except where the expenditure is incurred after 13 May 1997, in which case recapture will apply, subject to certain transitional rules.

Similar provisions apply in relation to income-producing residential buildings on which construction commenced after 17 July 1985.

The cost of income-producing structural improvements, the construction of which started after 26 February 1992, is eligible for write-off for tax purposes on the same basis as that of income-producing buildings, that is, at a rate of 2.5% *per annum*.

The cost of consumables may be either written off immediately or as used.

The following expenditure attracts an immediate 100% deduction: environmental protection activities, dealing with pollution and waste; landcare operations; exploring or prospecting for minerals, including the cost of mining rights and information acquired from an Australian government agency or government entity; mine site rehabilitation; and capital expenditure incurred by primary producers on fencing and water facilities, at or after 7.30pm, by legal time in the Australian Capital Territory, on 12 May 2015.

Tax depreciation is not required to conform to book depreciation.

Percentage depletion based on gross income or other non-cost criteria is not available.

Goodwill

Goodwill and trademarks are not depreciating assets, and tax amortisation is not available.

Start-up expenses

Certain start-up expenses, such as costs of company incorporation or costs to raise equity, may qualify for a five-year straight-line write-off to the extent that it is capital expenditure in relation to a current or prospective business that is, or is proposed to be, carried on for a taxable purpose. An immediate deduction is available for a range of professional expenses (e.g. legal and accounting advice) and taxes or charges to an Australian government agency associated with starting a new business.

Interest expenses

Special rules classify financial arrangements as either debt or equity interests. These rules focus on economic substance rather than legal form and take into account related schemes, and extend beyond shares. In this situation, interest expense on non-share equity would be treated as a dividend, which is potentially frankable, and would be non-deductible for the paying company/group.

The law allows companies to claim a deduction for interest expenses incurred in relation to offshore investments that generate non-assessable, non-exempt dividend income.

Thin capitalisation measures apply to the total debt of the Australian operations of multinational groups (including branches of those groups). *See Thin capitalisation in the Group taxation section for more information.*

Bad debts

A deduction may be available for bad debts written off as bad before the end of an income year. Generally, a deduction will only be available where the amount of the debt was previously included in assessable income, or the debt is in respect of money lent in the ordinary course of a money lending business. The ability to claim a deduction for a bad debt is also subject to other integrity measures.

The amount of a commercial debt forgiven (other than an intra-group debt within a tax consolidated group) that is not otherwise assessable or does not otherwise reduce an allowable deduction is applied to reduce the debtor's carryforward tax deductions for revenue tax losses, carryforward capital losses, undeducted capital expenditure, and other capital cost bases in that order. Any amount not so applied generally is not

Australia

assessable to the debtor. Forgiveness includes the release, waiver, or extinguishment of a debt (other than by full payment in cash) and the lapsing of the creditor's recovery right by reason of a statute of limitations.

Charitable contributions

Charitable contributions are generally deductible where they are made to entities that are specifically named in the tax law or endorsed by the Commissioner of Taxation as 'deductible gift recipients'. However, deductions for such gifts cannot generate tax losses. That is, generally the deduction is limited to the amount of assessable income remaining after deducting from the assessable income for the year all other deductions.

Entertainment

Subject to limited exceptions, deductions are denied for expenditure on 'entertainment', which broadly is defined as entertainment by way of food, drink, or recreation, and accommodation or travel to do with providing such entertainment.

Fines and penalties

Fines and penalties imposed under any Australian and foreign law are generally not deductible. This includes fines and penalties imposed in relation to both civil and criminal matters.

The General Interest Charge (GIC) and Shortfall Interest Charge (SIC), which are imposed for failure to pay an outstanding tax debt within the required timeframe or where a tax shortfall arises under an amended assessment, are deductible for Australian tax purposes.

Taxes

In general, GST input tax credits, GST, and adjustments under the GST law are disregarded for income tax purposes. Other taxes, including property, payroll, PRRT, and FBT, as well as other business taxes, excluding income tax, are deductible to the extent they are incurred in producing assessable income or necessarily incurred in carrying on a business for this purpose, and are not of a capital or private nature.

Other significant items

Where expenditure for services is incurred in advance, deductibility of that expenditure generally will be prorated over the period during which the services will be provided, up to a maximum of ten years.

General value shifting rules apply to shifts of value, direct or indirect, in respect of loan and equity interests in companies or trusts. Circumstances in which these rules may apply include where there is a direct value shift under a scheme involving equity or loan interests, or where value is shifted out of an asset by the creation of rights in respect of the asset, or where there is a transfer of assets or the provision of services for a consideration other than at market value. The value shifting rules may apply to the head company of a tax consolidated group or multiple entry consolidated (MEC) group for value shifts also involving entities outside the group, but not to value shifting between group members, which the tax consolidation rules address (*see the Group taxation section for more information*).

Net operating losses

Losses may be carried forward indefinitely, subject to compliance with tests of continuity of more than 50% of ultimate individual stock ownership or compliance with a same business test. For consolidated group companies, the ability to utilise these losses is determined by a modified version of these tests (*see the Group taxation section for more information*).

Losses may not be carried back.

Payments to foreign affiliates

A corporation can deduct royalties, management service fees, and interest charges paid to non-residents, provided the amounts are referable to activities aimed at producing assessable income, and also having regard to Australia's transfer pricing rules. In the case of royalties and interest payable to non-residents, there is also a requirement that any applicable WHTs are remitted to the Commissioner of Taxation before the deduction can be taken.

Group taxation

A tax consolidation regime applies for income tax and CGT purposes for companies, partnerships, and trusts ultimately 100% owned by a single head company (or certain entities taxed like a company) resident in Australia. Australian resident companies that are 100% owned (either directly or indirectly) by the same foreign company and have no common Australian head company between them and the non-resident parent are also allowed to consolidate as a multiple entry consolidated (MEC) group. The group that is consolidated for income tax purposes may differ from the group that is consolidated for accounts or for GST purposes.

Groups that choose to consolidate must include all 100%-owned entities under an all-in rule, and the choice to consolidate is irrevocable. However, eligible tier-1 companies (being Australian resident companies that have a non-resident shareholder) that are members of a potential MEC group are not all required to join an MEC group when it forms, but may form two or more separate MEC or consolidated groups, if they so choose, of which the same foreign top company is the 100% owner. If an eligible tier-1 company joins a particular MEC group, all 100% subsidiaries of the company must also join the group. While the rules for forming and joining MEC groups allow more flexibility than with consolidated groups, the ongoing rules for MEC groups are more complex, particularly for tax losses and on the disposal of interests in eligible tier-1 companies, which are subject to cost pooling rules, although for practical purposes these rules are relevant only if the non-resident is holding or disposing of an indirect Australian real property interest (*see Capital gains in the Income determination section for more information*).

A single entity rule applies to members of a consolidated or MEC group so that for income tax purposes the subsidiary members are taken to be part of the head company, while they continue to be members of the group and intra-group transactions are not recognised. In general, no group relief is available where related companies are not members of the same consolidated or MEC group. Rollover relief from CGT is available on the transfer of unrealised gains on assets, which are taxable Australian property, between companies sharing 100% common ownership where the transfer is between non-resident companies, or between a non-resident company and a member of a consolidated group or MEC group, or between a non-resident company and a resident company that is not able to be a member of a consolidated group.

Consolidated groups file a single tax return and calculate their taxable income or loss ignoring all intra-group transactions.

When a consolidated group acquires 100% of an Australian resident entity, so that it becomes a subsidiary member, the cost base of certain assets (in general, those that are non-monetary) of the joining member are reset for all tax purposes, based on the purchase price plus the entity's liabilities, subject to certain adjustments. In this way, an acquisition of 100% of an Australian resident entity by a consolidated group is broadly the tax equivalent of acquiring its assets. Subject to certain tests being passed, tax losses of the joining member may be transferred to the head company and may be utilised subject to a loss factor, which is broadly the market value of the joining member divided by the market value of the group (including the joining member). The value of the loss

Australia

factor (referred to as ‘the available fraction’) that applies for transferred losses may be reduced by capital injections (or the equivalent) into the member before it joined, or into the group after the loss is transferred.

Franking credits and tax losses remain with the group when a member exits, and the cost base of shares in the exiting member is calculated based on the tax value of its assets at the time of exit, less liabilities subject to certain adjustments.

Generally, members of the group are jointly and severally liable for group income tax debts on the default of the head company, unless the group liability is covered by a tax sharing agreement (TSA) that satisfies certain legislative requirements. A member who enters into a TSA generally can achieve a clean exit from the group where a payment is made to the head company in accordance with the TSA.

Transfer pricing

Australia has a comprehensive transfer pricing regime aimed at protecting the tax base by ensuring that dealings between related, international parties are conducted at arm’s length. The arm’s-length principle, which underpins the transfer pricing regime, uses the behaviour of independent parties as a benchmark for determining the allocation of income and expenses between international related parties. Australia’s transfer pricing regime is in line with international best practice as set out by the OECD.

Transfer pricing adjustments operate on a self-assessment basis and apply in respect of certain cross-border dealings between entities and to the allocation of actual income and expenses of an entity between the entity and its PE, using the internationally accepted arm’s-length principle, which is to be determined consistently with the relevant OECD Guidance material (and applied to both treaty and non-treaty cases). In addition, companies are required to have transfer pricing documentation in place to support their self-assessed positions before the lodgement of the tax return.

Australia implemented the OECD’s new transfer pricing documentation standards from 1 January 2016 for those companies with global revenue of AUD 1 billion or more. Under these new documentation standards, the Australian Taxation Office (ATO) will receive the following information on large companies operating in Australia:

- A country-by-country (CbC) report that shows information on the global activities of a multinational, including the location of its income and taxes paid.
- A master file containing an overview of the multinational’s global business, its organisational structure, and its transfer pricing policies.
- A local file that provides detail about the local taxpayer’s inter-company transactions.

Thin capitalisation

Thin capitalisation measures apply to the total debt of the Australian operations of multinational groups (including branches of those groups). The measures cover investment into Australia of foreign multinationals and outward investment of Australian-based multinationals, and include a safe-harbour debt-to-equity ratio of 1.5:1. Interest deductions are denied to the extent that borrowing exceeds the applicable safe-harbour ratio. Where borrowing exceeds the safe-harbour ratio, multinationals are not affected by the rules if they can satisfy the arm’s-length test (that the borrowing could have been borne by an independent entity). A further alternative test is available for certain inward or outward investing entities based on 100% of their worldwide gearing.

As mentioned above, the thin capitalisation rules apply to inward investment into Australia. In particular, they will apply where a foreign entity carries on business through an Australian PE or to an Australian entity in which five or fewer non-residents have at least a 50% control interest, or a single non-resident has at least a 40% control interest, or the Australian entity is controlled by no more than five foreign entities.

Separate rules apply to financial institutions. To facilitate their inclusion in the rules, branches are required to prepare financial accounts.

International Financial Reporting Standards (IFRS), equivalents of which currently apply in Australia, make it more difficult for some entities to satisfy thin capitalisation rules because of the removal of internally generated intangible assets from the balance sheets. Accordingly, thin capitalisation law allows departure from the Australian equivalents to IFRS in relation to certain intangible assets and excludes deferred tax assets and liabilities and surpluses and deficits in defined benefit superannuation funds from applicable calculations.

Controlled foreign companies (CFCs)

Under Australia's CFC regime, non-active income of foreign companies controlled by Australian residents (determined by reference to voting rights and dividend and capital entitlements) may be attributed to those residents under rules that distinguish between companies resident in 'listed countries' (e.g. Canada, France, Germany, Japan, New Zealand, the United Kingdom, and the United States) and in other 'unlisted' countries. In general, if the CFC is resident in an unlisted country and it fails the active income test (typically because it earns 5% or more of its income from passive or tainted sources), the CFC's tainted income (very broadly, passive income and gains, and sales and services income that has a connection with Australia) is attributable. If a CFC is resident in a listed country, a narrower range of tainted income is attributed even if the CFC fails the active income test.

When income previously taxed on attribution is repatriated, it is not assessable for tax.

Integrity measures for large multinationals

The following integrity measures seek to address multinational tax avoidance by 'significant global entities' (broadly an entity that is part of a group with global revenue of AUD 1 billion or more):

- New transfer pricing documentation standards (*see above for more information*).
- The doubling of the maximum administrative penalties that can be applied to entities that enter into tax avoidance and profit shifting schemes (applicable to income years commencing on or after 1 July 2015).
- A targeted anti-avoidance rule aimed at multinationals that enter into arrangements that artificially avoid having a taxable presence in Australia. Specifically, this measure will ensure that profits from Australian sales are taxed in Australia from 1 January 2016 where the activities of an Australian associated entity support the making of those sales, and the profit from the Australian sales is booked overseas and is not attributable to a PE of the foreign entity in Australia. A principal purpose of entering into the arrangement must be to create a tax benefit.

Tax credits and incentives

Foreign income tax offsets (FITOs)

FITOs are available to avoid double taxation in respect of foreign tax paid on income that is assessable in Australia. Generally, a corporation will be entitled to claim a FITO where it has paid, or is deemed to have paid, an amount of foreign income tax and the income or gain on which the foreign income tax was paid is included in assessable income for Australian tax purposes.

The amount of the FITO available is limited to the greater of AUD 1,000 and the amount of the 'FITO limit'. The FITO limit is broadly calculated as the difference between the corporation's actual tax liability and its tax liability if certain foreign taxed and foreign-sourced income and related deductions were disregarded. Excess FITOs are not able to be carried forward and claimed in later income years.

Australia

Inward investment incentives

Depending on the nature and size of the investment project, state governments may give rebates from payroll, stamp, and land taxes on an *ad hoc* basis and for limited periods.

Capital investment incentives

Incentives for capital investment are as follows:

- Accelerated deductions are available for capital expenditures on the exploration for and extraction of petroleum and minerals (other than mining rights and information acquired from a non-government third party that start to be held after 7.30pm [AEST] 14 May 2013, which are claimed over the shorter of 15 years and the life of the asset), the rehabilitation of former mineral extraction sites, certain environmental protection activities, the establishment of certain 'carbon sink' forests, certain expenditure of primary producers, and for certain low cost depreciating assets held by small business entities.
- There are a number of tax concessions aimed at encouraging investments in the venture capital sector. Non-resident pension funds that are tax-exempt in their home jurisdiction, are residents of Canada, France, Germany, Japan, the United Kingdom, the United States, or another country prescribed by regulation, and satisfy certain Australian registration requirements are exempt from income tax on the disposal of investments in certain Australian venture capital equity held at risk for at least 12 months. A similar exemption is extended to other tax-exempt non-resident investors, including managed funds and venture capital fund-of-funds vehicles and taxable non-residents holding less than 10% of a venture capital limited partnership. These investors are able to invest in eligible venture capital investments through an Australian resident venture capital limited partnership or through a non-resident venture capital limited partnership. Eligible venture capital investments are limited to specified interests in companies and trusts. Detailed rules in the legislation prescribe the nature of such investments and the characteristics, which such companies and trusts, and their investments, must possess.
- From 1 July 2016, investors in an Australian Early Stage Innovation Company (ESIC), broadly a company that is at an early stage of establishment to develop new or significantly improved innovations with the purpose of commercialisation to generate an economic return, are provided with a non-refundable carry forward tax offset equal to 20% of the amount paid for the investment, subject to a cap, and a capital gains tax exemption for shares that have been held for between one and ten years.
- There is a venture capital tax concession applicable to an 'early stage venture capital limited partnership' (ESVCLP). The thresholds for qualification include requirements that, amongst other things, the committed capital of the ESVCLP must be at least AUD 10 million but not exceed AUD 200 million, the investments made must fall within prescribed parameters as to size and proportion of total capital, and the ESVCLP must have an investment plan approved by Innovation Australia. Where the thresholds for their application are met, the ESVCLP provisions provide flow-through tax treatment to domestic and foreign partners, with the income and capital received by the partners exempt from taxation. As the income is tax exempt, the investor is not able to deduct investment losses.
- The taxable income derived from offshore banking transactions by an authorised offshore banking unit in Australia is taxed at the rate of 10%.
- Refundable tax offsets are available to companies for certain expenditure incurred in Australia in producing specified classes of film or undertaking specified post, digital, or special effects production activities in respect of specified classes of films. The concessions are only available to a company that is either an Australian resident or a non-resident carrying on business through an Australian PE and which has been issued with an Australian Business Number (ABN). The availability of the offsets is subject to a number of conditions, including meeting registration and minimum spend requirements. The rate of the offset varies from 15% to 40%, depending upon the nature of the relevant film and activities undertaken.

- An exploration development incentive (EDI) applies for Australian resident investors in small mineral exploration companies undertaking greenfield mineral exploration in Australia. Under the EDI, investors may be entitled to a refundable tax offset (or additional franking credits in the case of a corporate investor) where the company in which they have invested has chosen to convert a tax loss that arose from exploration or prospecting expenditure into an exploration credit up to a capped amount. The EDI applies in respect of eligible expenditure from the 2014/15 to 2016/17 income years.

R&D tax credit

For companies with an annual turnover of less than AUD 20 million, the current law provides a 45% refundable R&D tax credit, equivalent to a 150% tax concession. This equates to a cash savings of 15% on every dollar of R&D spend and will be refundable where the company is in a tax loss position. Companies with a turnover of greater than AUD 20 million have access to a non-refundable 40% tax credit, equivalent to a 133% tax concession. This equates to a cash savings of 10% on every dollar of R&D spend. However, it is currently proposed that the R&D tax credits will be reduced by 1.5 percentage points for income years commencing on or after 1 July 2014.

The amount of the concessional 40% or 45% R&D tax credit is limited to eligible R&D expenditure of AUD 100 million with any excess amount subject to a 30% credit.

Generally, only genuine R&D activities undertaken in Australia qualify for the R&D tax incentive. However, R&D activities conducted overseas also qualify in limited circumstances where the activities cannot be undertaken in Australia. Special grant programmes also may be available to assist corporations in the conduct of certain R&D in Australia. These grants are awarded on a discretionary basis.

Other incentives

Cash grants for export-market development expenditure are available to eligible businesses seeking to export Australian-source goods and services.

Withholding taxes

WHT rates are shown in the following table.

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%) (3)

Notes

- Dividends paid to non-residents are exempt from dividend WHT except when paid out of profits of a company that have not borne Australian tax (i.e. unfranked dividends). Dividends include those stock dividends that are taxable. The rates shown apply to dividends on both portfolio investments and substantial holdings other than dividends paid in connection with an Australian PE of the non-resident. Unfranked dividends paid to non-residents are exempt from dividend WHT to the extent that the dividends are declared by the company to be conduit foreign income. There is also a deduction in certain cases to compensate for the company tax on inter-entity distributions where these are on-paid by holding companies to a 100% parent that is a non-resident (see *Dividend income in the Income determination section*). Dividends paid to a non-resident in connection with an Australian PE are taxable to the non-resident on a net assessment basis (i.e. the dividend and associated deductions will need to be included in the determination of the non-resident's taxable income, the dividend is not subject to dividend WHT), and a franking tax offset is allowable to the non-resident company for franked dividends received.
- Australia's interest WHT rate is limited to 10% of gross interest, although the treaty may allow for a higher maximum limit. An exemption from Australian WHT can be obtained for interest on certain public issues or widely held issues of debentures. Provisions exist to ensure that discounts and other pecuniary benefits derived by non-residents on various forms of financings are subject to interest WHT. Interest paid to non-residents by offshore banking units is exempt from interest WHT where offshore borrowings are used in offshore banking activities (including lending to non-residents). An offshore borrowing is defined as a borrowing from (i) an unrelated non-resident in any currency or (ii) a resident or a related person in a currency other than Australian currency. The interest WHT rates listed above for residents in a treaty country are those that generally apply. It is common for Australia's tax treaties to include a reduced limit for interest derived by certain government entities and/or financial institutions. One should refer to the relevant treaty for these limits.

3. Royalties paid to non-residents (except in respect of a PE in Australia of a resident of a treaty country) are subject to 30% WHT (on the gross amount of the royalty), unless a DTA provides for a lesser rate. Tax is generally limited to the indicated percentage of the gross royalty.
4. For Australian-sourced dividends that are franked under Australia's dividend imputation provisions and paid to a person who directly holds at least 10% of the voting power of the company, the limit is 10% (although note that Australia does not impose WHT on franked dividends). For Argentinean-sourced dividends paid to a person who holds at least 25% of the capital in the company, the limit is 10%. A 15% limit applies to other dividends. Source-country tax is limited to 10% of the gross amount of royalties in relation to copyright of literary, dramatic, musical, or other artistic work; the use of industrial or scientific equipment; the supply of scientific, technical, or industrial knowledge; assistance ancillary to the above; or certain forbearances in respect of the above. Source-country tax is limited to 10% of the net amount of royalties for certain technical assistance. In all other cases, it is limited to 15% of the gross amount of royalties.
5. The government announced on 4 February 2010 that negotiations to update Australia's tax treaty with Austria would take place in March 2010. No further announcements have been made in relation to the progress of treaty negotiations.
6. A 5% dividend WHT rate applies to franked dividends paid by an Australian resident company and, in the case of dividends paid by a Canadian resident company (other than a non-resident owned investment corporation), to a company that directly holds at least 10% of the voting power in the dividend company (although note that Australia does not impose WHT on franked dividends). Otherwise, the maximum WHT rate on dividends is 15%.
7. A 5% dividend WHT rate applies to dividends paid to a company that directly holds at least 10% of the voting power in the company paying the dividends. Otherwise, the maximum WHT rate on dividends is 15%. In respect of interest, a 5% WHT rate applies to interest derived by a financial institution that is unrelated to and dealing wholly independently with the payer. Where the 5% rate does not apply, a 15% WHT rate applies to interest arising in Chile, and a 10% WHT rate applies to interest in all other cases. A 5% royalty WHT rate applies to royalties for the use of, or right to use, any industrial, commercial, or scientific equipment, and a 10% royalty WHT rate applies in all other cases.
8. Except Hong Kong and Macau.
9. The treaty between Australia and the Czech Republic allows Australia to impose a 5% WHT on the franked part of a dividend in certain circumstances (although note that Australia does not impose WHT on franked dividends). In the Czech Republic, a rate of 15% applies to the gross amount of dividends if the dividends are paid to a company that directly holds at least 20% of the capital of the company paying the dividend.
10. East Timor does not have a comprehensive DTA with Australia. However, the Timor Sea Treaty governs the taxation rights between the two countries for petroleum-related activities conducted in the Joint Petroleum Development Area of the Timor Sea by any person or entity, irrespective of the residency status of that person or entity. Where the Timor Sea Treaty applies to third-country resident payees, only 10% of the total gross interest, dividend, or royalty payment is subject to Australian WHT, as follows:
 - Interest: 10% of total gross interest paid is subject to WHT at a rate of 10%.
 - Dividends: 10% of total gross unfranked dividends paid are subject to WHT at a rate of 15%, or at the relevant DTA rate of the recipient.
 - Royalties: 10% of total gross royalties paid is subject to WHT at a rate of 10%, or at the relevant DTA rate of the recipient. However, the other 90% of each such amount is subject to East Timorese WHT at the same rates.
11. A zero WHT rate applies to inter-corporate dividends where the recipient directly holds 80% or more of the voting power of the company paying the dividend. A 5% rate limit applies on all other inter-corporate dividends where the recipient directly holds 10% or more of the voting power of the company paying the dividend. A 15% rate applies to all other dividends. A rate limit of 10% applies to interest, except no tax is chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political or administrative subdivision or local authority or central bank of the other country. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits.
12. The source country exempts inter-corporate non-portfolio (i.e. minimum 10% shareholding) dividends paid out of profits that have borne the normal rate of company tax. There is a 5% rate limit for all other non-portfolio dividends. A rate limit of 15% applies for all other dividends. A rate limit of 10% applies to interest, except no tax is chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political or administrative subdivision or local authority or central bank of the other country. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits.
13. The source-country limit under the Indian agreement is 10% for royalties paid in respect of the use of or rights to use industrial, commercial, or scientific equipment or for the provision of consulting services related to such equipment. In other cases, the limit is 15%.
14. The source-country limit under the Indonesian agreement is 10% for royalties paid in respect of the use of or the right to use any industrial, commercial, or scientific equipment or for the supply of scientific, technical, industrial, or commercial knowledge or information, and it is 15% in other cases.
15. The source country exempts inter-corporate dividends where the recipient directly holds 80% or more of the voting power of the company paying the dividend and certain limitation of benefit thresholds are met. A 5% rate limit applies on all other inter-corporate dividends where the recipient directly holds 10% or more of the voting power of the company paying the dividend. A rate limit of 10% otherwise applies for dividends. However, where the dividends are paid by a company that is a resident of Japan, which is entitled to a deduction for the dividends in Japan, the rate limit is 15% where more than 50% of the assets of the paying company consist, directly or indirectly, of real property situated in Japan and 10% in all other cases. Special rules apply to distributions to

Australia

Japanese residents by real estate investment trusts (REITs). A rate limit of 10% applies to interest, except no tax is chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political subdivision or local authority or central bank or other specified entity of the other country. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits.

16. A zero dividend WHT rate applies to franked dividends paid by an Australian resident company to an entity that directly holds at least 10% of the voting power in the dividend paying company; otherwise, a 15% WHT rate applies. In relation to dividends paid by a company resident of Malaysia, no WHT applies.
17. Source-country tax in Malta is limited to the tax chargeable on the profits out of which the dividends are paid.
18. A zero dividend WHT rate applies to franked dividends paid (in Mexico, those dividends that have been paid from the net profit account) to a company that directly holds at least 10% of the voting power in the dividend paying company. In all other cases, a 15% WHT rate will apply to dividends. Source-country tax is limited to 10% when interest is paid to a bank or an insurance company, derived from bonds and securities that are regularly and substantially traded on a recognised securities market, paid by banks (except where the prior two criteria apply), or paid by the purchaser to the seller of machinery and equipment in connection with a sale on credit. It is 15% in all other cases.
19. A zero WHT rate applies in certain cases to inter-corporate dividends where the recipient directly holds at least 80% of the voting power in the dividend paying company. A rate of 5% applies on all other inter-corporate dividends where the recipient directly holds 10% or more of the voting power of the company paying the dividend. A general limit of 15% applies for all other dividends. Source-country tax on interest is limited to 10%. However, no tax is chargeable in the source country on interest derived by a government or a political subdivision or local authority of the other country (including a government investment fund or a bank performing central banking functions) or on interest derived by a financial institution that is unrelated to and dealing wholly independently of the payer (excluding interest paid as part of a back-to-back loan arrangement and, for New Zealand payers, where that person has not paid approved issuer levy).
20. A zero WHT rate applies in certain cases to inter-corporate dividends where the recipient directly holds at least 80% of the voting power in the dividend paying company for the 12-month period prior to payment. A rate of 5% applies to all other inter-corporate dividends where the recipient directly holds 10% or more of the voting power of the company paying the dividend. A general limit of 15% applies to all other dividends. A general rate limit of 10% applies to interest. However, no tax is chargeable in the source country on interest derived by a government of the other country (including its money institutions or a bank performing central banking functions) from the investment of official reserve assets and on interest derived by a financial institution resident in the other country (excluding interest paid as part of a back-to-back loan arrangement).
21. For Australian-source dividends, the limit is 15%. Where dividends are sourced in Papua New Guinea, the limit is 20%.
22. Source-country tax is limited to 15% where relief by way of rebate or credit is given to the beneficial owner of the dividend. In any other case, source-country tax is limited to 25%. Source-country tax generally is limited to 15% of gross royalties if paid by an approved Philippines enterprise. In all other cases, the rate is limited to 25% of the gross royalties.
23. Source-country tax (Australia) is limited to 5% where a dividend is paid to a Romanian resident company that directly holds at least 10% of the capital of the Australian company paying the dividend to the extent that the dividend is fully franked. Source-country tax (Romania) is limited to 5% where a dividend is paid to an Australian resident company that directly holds at least 10% of the capital of the Romanian company paying the dividend if the dividend is paid out of profits that have been subject to Romanian profits tax. In other cases, it is limited to 15%.
24. Source-country tax generally is limited to 15%. However, a rate of 5% applies where the dividends have been fully taxed at the corporate level, the recipient is a company that has a minimum direct holding in the paying company, and the recipient has invested a minimum of AUD 700,000 or the Russian ruble equivalent in the paying company. Where the dividends are paid by a company that is a resident in Russia, the dividends are exempt from Australian tax.
25. A 5% rate limit applies on all inter-corporate dividends where the recipient directly holds 10% or more of the voting power of the company paying the dividend. A rate limit of 15% otherwise applies for dividends. A general rate limit of 10% applies to interest. However, no tax is chargeable in the source country on interest derived by a government of the other country (including a bank performing central banking functions) and on interest derived by a financial institution resident in the other country (excluding interest paid as part of a back-to-back loan arrangement).
26. The DTA applies a 5% WHT rate to dividends paid to companies that hold directly 10% or more of the voting power of the paying company. Dividends paid to publicly listed companies, or subsidiaries thereof, or to unlisted companies in certain circumstances, that hold 80% or more of the voting power of the paying company will be exempt from dividend WHT. Dividends paid to government or a political subdivision or local authority (including a government investment fund), a central bank, complying Australian superannuation funds, and tax exempt Swiss pension schemes will also be exempt from dividend WHT. In all other cases, a 15% WHT rate will apply. A general rate limit of 10% applies to interest. However, interest paid to bodies exercising governmental functions, banks performing central banking functions, banks that are unrelated to and dealing independently with the payer, complying Australian superannuation funds, and tax exempt Swiss pension schemes are exempt from interest WHT. The DTA applies a 5% WHT on royalties.
27. Source-country tax (Taiwan) is limited to 10% of the gross amount of the dividends paid to a company that holds at least 25% of the capital of the company paying the dividends. A rate of 15% applies in all other cases. To the extent that dividends are franked because they are paid out of profits that have borne Australian tax, they are exempt from dividend WHT (See Note 1 above). The treaty allows Australia to impose a 10% WHT on the franked part of a dividend.

28. The source-country limit on dividends where the recipient has a minimum 25% direct holding in the paying company is 15% if the paying company engages in an industrial undertaking; 20% in other cases. The source-country limit on interest is 10% when interest is paid to a financial institution. It is 25% in all other cases.
29. A 5% WHT rate applies to inter-corporate dividends where the recipient directly owns 10% of the voting power of an Australian resident company or directly owns 25% of the capital of a Turkish resident company where the profits out of which the dividend is paid has been subject to the full rate of corporation tax in Turkey. In all other cases, a 15% WHT rate will apply. The DTA applies a general limit of 10% WHT on interest. However, interest derived from the investment of official reserve assets by the either the Australian or Turkish government, the Australian or Turkish central bank, or a bank performing central banking functions in either Australia or Turkey shall be exempt from interest WHT.
30. On 28 October 2008, it was announced that the Australian and the United Kingdom governments would commence negotiations on a revised tax treaty. No further announcements have been made in relation to the progress of treaty negotiations.
31. Source-country tax on dividends is generally limited to 15%. However, an exemption applies for dividends paid to a listed company that satisfies certain public listing requirements and controls 80% or more of the voting power in the company paying the dividend, and a 5% limit applies to dividends paid to other companies with voting power of 10% or greater in the dividend paying company. Source-country tax on interest is generally limited to 10%. However, generally zero interest WHT is payable where interest is paid to a financial institution or a government body exercising governmental functions.
32. Source-country tax on dividends is generally limited to 15%. No source country tax is chargeable on dividends to a beneficially entitled company that satisfies certain public listing requirements and holds 80% or more of the voting power in the company paying the dividend. A 5% limit applies to dividends paid to other companies with voting power of 10% or greater in the dividend paying company. No limit applies to US tax on dividends paid on certain substantial holdings of Australian residents in US REITs. In practical terms, US tax on these dividends is increased from 15% to the current US domestic law rate of 30%. The 15% rate applies to REIT investments made by certain listed Australian property trusts subject to the underlying ownership requirements not exceeding certain levels. Investments in REITs by listed Australian property trusts acquired before 26 March 2001 are protected from the increased rate. Source-country tax on interest generally is limited to 10%. However, generally zero interest WHT is payable where interest is paid to a financial institution or a government body exercising governmental functions. Rules consistent with US tax treaty policy and practice will allow interest to be taxed at a higher 15% rate (the rate that generally applies to dividends) and for tax to be charged on intra-entity interest payments between a branch and its head office. Amounts derived from equipment leasing (including container leasing) are excluded from the royalty definition.
33. Source-country tax is limited to 15% (Australia) and 10% (Vietnam).
34. Germany and Australia signed a new tax treaty. When the new treaty takes effect, source-country tax on dividends will be generally limited to 15%, subject to an exemption for dividends paid to a beneficially entitled company that satisfies certain public listing requirements and holds 80% or more of the voting power in the company paying the dividend and a 5% limit that will apply to dividends paid to companies with voting power of 10% or greater in the dividend paying company. Source-country tax on interest is generally limited to 10%. However, when the new treaty takes effect, zero interest WHT will be payable where interest is paid to a financial institution or a government body exercising governmental functions. When the new treaty takes effect, a 5% WHT will apply to royalties.
35. Where the recipient does not quote a Tax File Number (or Australian Business Number), the payer is obligated to withhold tax at the rate of 49% under the Pay-As-You-Go (PAYG) withholding regime. No withholding is required in relation to franked dividends.

Other payments

A PAYG withholding regime applies to require the deduction and remittance of taxes on behalf of foreign resident individuals and entities that are in receipt of the following types of payments:

Type of payment	Rate of withholding (%)
Payments for promoting or organising casino gaming junket arrangements	3
Payments for performing artists and sportspersons, including payments to support staff such as art directors, bodyguards, coaches, hairdressers, and personal trainers:	
if recipient is a company	30
if recipient is an individual	the applicable non-resident marginal tax rate
Payments under contracts entered into for the construction, installation, and upgrading of buildings, plant, and fixtures, and for associated activities	5

Australia

Managed investment trust distributions

For managed investment trust fund payments to a non-resident investor, a WHT regime applies, with divergent outcomes, depending upon whether or not the recipient of such fund payments is resident of a country identified as being one with which Australia has an effective exchange of information (EEOI) arrangement and which is regulated as such for purposes of these rules. For a resident of a regulated EEOI country, a final WHT at a 15% rate applies for distributions. For residents of non-EEOI regulated countries, a final WHT at a 30% rate applies.

Distributions from a managed investment trust that holds only certified 'clean buildings' is eligible for a reduced rate of WHT of 10% where the recipient of the fund payment is a resident of a regulated EEOI country.

EEOI countries that have been identified by regulation are Anguilla, Antigua & Barbuda, Aruba, the Bahamas, Belize, Bermuda, the British Virgin Islands, the Cayman Islands, the Cook Islands, Gibraltar, Guernsey, Isle of Man, Jersey, Macau, Mauritius, Monaco, the Netherlands Antilles, San Marino, St. Christopher and Nevis, St. Vincent and the Grenadines, and the Turks and Caicos Islands, as well as countries with which Australia has concluded DTAs, other than Austria, Chile, Greece, the Philippines, Switzerland, and Turkey. Australia has entered into EEOI agreements with Andorra, Bahrain, Brunei (not yet in force), Chile, Costa Rica, Dominica, Grenada, Guatemala (not yet in force), Liberia, Liechtenstein, the Marshall Islands, Montserrat, Saint Lucia, Samoa, Switzerland, Turkey, Uruguay, and Vanuatu; however, these countries have not yet been identified in regulations to be EEOI countries.

Australia has a new attribution tax regime that certain managed investment trusts (known as attribution managed investment trusts or AMITs) can elect to apply from 1 July 2016 (unless a choice has been made to apply the law from 1 July 2015). The allocation of trust components to the members of an AMIT will be based on an 'attribution' rather than based on present entitlement to distributable income. Members of an AMIT will be taxed on the parts of the AMIT's trust components that are attributed to them as if they derived those amounts in their own right and in the same circumstances as the AMIT.

Tax administration

Taxable period

The Australian tax year runs from 1 July to 30 June. However, a corporation may apply to adopt a substitute year of income, for example, 1 January to 31 December.

Tax returns

A corporation (including the head company of a tax consolidated group) lodges/files a tax return under a self-assessment system that allows the ATO to rely on the information stated on the return. Where a corporation is in doubt as to its tax liability regarding a specific item, it can ask the ATO to consider the matter and obtain a binding private ruling.

Generally, the tax return for a corporation is due to be lodged/filed with the ATO by the 15th day of the seventh month following the end of the relevant income year or such later date as the Commissioner of Taxation allows. Additional time may apply where the tax return is lodged/filed by a registered tax agent.

Payment of tax

A PAYG instalment system applies to companies other than those whose annual tax is less than AUD 8,000 that are not registered for GST. Most companies are obligated to pay instalments of tax for their current income year on a monthly or quarterly basis. All

companies with turnover of AUD 20 million or more will pay instalments on a monthly basis.

Instalments are calculated by applying an instalment rate to the amount of the company's actual ordinary income (ignoring deductions) for the previous quarter. The instalment rate is notified to the taxpayer by the ATO and determined by reference to the tax payable for the most recent assessment. The ATO may notify a new rate during the year on which subsequent instalments must be based. Taxpayers can determine their own instalment rate, but there may be penalty tax if the taxpayer's rate is less than 85% of the rate that should have been selected.

Final assessed tax is payable on the first day of the sixth month following the end of that income year or such later date as the Commissioner of Taxation allows by a published notice.

Tax audit process

The Australian tax system for companies is based on self-assessment; however, the ATO undertakes ongoing compliance activity to ensure corporations are meeting their tax obligations. The ATO takes a risk-based approach to compliance and audit activities, with efforts generally focused on taxpayers with a higher likelihood of non-compliance and/or higher consequences (generally in dollar terms) of non-compliance. Compliance activities take various forms, including general risk reviews, questionnaires, reviews of specific issues, and audits.

Statute of limitations

Generally, the Commissioner of Taxation may amend an assessment within four years after the day of which an assessment is given to a company. Under the self-assessment system, an assessment is deemed to have been given to the company on the day on which it lodges its tax return. The four-year time limit does not apply where the Commissioner is of the opinion there has been fraud or evasion, or to give effect to a decision on a review or appeal, or as a result of an objection made by the company, or pending a review or appeal. The unlimited period of review of an assessment to give effect to a transfer pricing adjustment was recently changed to a seven-year period of review in respect of assessments raised for an income year commencing on or after 29 June 2013.

Topics of focus for tax authorities

The ATO periodically releases during the year its compliance focus areas that are attracting its attention. The following are current areas of focus by the ATO for large and multinational businesses:

- A strong focus on shifting of profits to lower tax jurisdictions and the cessation of Australian operations, including a focus on cross-border transactions.
- Structuring and business events, such as mergers and acquisitions, divestment of major assets and demergers, share buy backs, capital raisings and returns of capital, private equity entries and exits, and initial public offerings.
- Capital gains tax, losses (capital and revenue), tax consolidation, infrastructure investments, and financial arrangements.
- Four key industries: banking and finance, energy and resources, superannuation, and insurance.
- Sharing data and intelligence on risks and opportunities, sharing capabilities and strategies, and joint compliance action with other jurisdictions.

Other issues

Intergovernmental agreement (IGA) on the Foreign Account Tax Compliance Act (FATCA)

In April 2014, the Australian government signed an IGA with the United States in relation to the implementation of FATCA. The agreement is intended to establish a framework to assist Australian financial institutions in meeting their obligations under FATCA.

Australia has enacted legislation to give effect to the IGA requiring Australian financial institutions to collect information about their customers that are likely to be taxpayers in the United States, and report that information to the ATO. The Australian Commissioner of Taxation will then pass this information on to the US Internal Revenue Service (IRS). Australia's obligations under the agreement apply to FATCA 'reportable accounts' maintained on or after 1 July 2014.

Transparency

The Commissioner of Taxation is required to publish limited information about the tax affairs of public and foreign-owned companies with 'total income' of AUD 100 million or more for an income year, and Australian-owned private companies with total income of at least AUD 200 million for an income year, as reported in the entity's tax return, and those with a liability to pay the former Minerals Resource Rent Tax (MRRT) or PRRT. The published information discloses the entity's name, Australian Business Number, total income, taxable income, and tax payable.

The Australian government, in delivering its 2016/17 Federal Budget, has encouraged all companies (annual turnover of AUD 100 million or more) to adopt a Voluntary Tax Transparency Code (TTC) for increased public disclosure of their tax information from the 2016 financial year onwards.

Australia has also adopted the OECD's Common Reporting Standard (CRS), which will apply to financial institutions in Australia from 1 July 2017, with a first reporting deadline of 31 July 2018. Financial Institutions, including banks and other deposit-taking institutions, custodial institutions, or entities that hold financial assets for the account of others, are required to report information in the form of a statement to the Commissioner of Taxation about financial accounts held by foreign tax residents. In turn, the Commissioner of Taxation will provide this information to the foreign residents' tax authorities and will receive information on Australian tax residents with financial accounts held overseas.

Foreign investment tax conditions

Foreign investors that invest in Australia are now subject to additional criteria as part of the clearance process for proposed foreign investment in Australia. On 22 February 2016, the Australian government announced that tax conditions are to be formally applied and will be considered in making an assessment of Australia's national interest, a key criterion in the foreign investment clearance process. These new tax conditions include requirements relating to the settlement of outstanding debts, ongoing compliance with tax laws, and annual reporting to the ATO.

Significant developments

On 14 August 2015, the 'Steuerreformgesetz 2015/2016' was published in the Austrian Federal Law Gazette. See *Value-added-tax and Real estate transfer tax in the Other taxes section, Depreciation and amortisation in the Deductions section, Employment incentives and Research and development (R&D) incentives in the Tax credits and incentives section, and Dividend WHT and Repayment of equity in the Withholding taxes section for more information.*

On 28 December 2015, the 'Abgabenänderungsgesetz 2015' was published in the Austrian Federal Law Gazette. See *Capital gains/exit taxation/inbound transfer in the Income determination section and Repayment of equity in the Withholding taxes section for more information.*

On 9 May 2016, the draft of the 'EU-Abgabenänderungsgesetz 2016' was published by the Austrian government. See *Transfer pricing in the Group taxation section and EU state aid investigations and base erosion and profit shifting (BEPS) in the Other issues section for more information.*

Taxes on corporate income

Basis of corporate income tax (Körperschaftsteuer)

Corporations (i.e. limited liability company [GmbH], stock corporation [AG]) are subject to unlimited taxation in Austria of their entire (domestic and foreign) income if they have their legal seat or place of effective management in Austria. A non-Austrian corporate tax resident (with neither a legal seat nor place of effective management in Austria) is subject to limited taxation on certain sources of income in Austria.

Rates of corporate income tax (Körperschaftsteuer)

Due to the qualification of corporations as independent tax subjects, a distinction must always be made between tax ramifications at the level of the company and those at the shareholder level. At the level of the company, profits are taxed at the standard corporate income tax (CIT) rate of 25%, regardless of whether profits are retained or distributed. At the shareholder level, the profit distributions are usually subject to withholding tax (WHT) of 25% for corporations and 27.5% for other recipients.

There is also a minimum CIT, payable by companies in a tax-loss position. The minimum CIT can be carried forward without time limitation and can be credited against future CIT burdens of the company.

The minimum CIT amounts to 875 euros (EUR) for an AG for each full quarter of a year.

The minimum CIT for a GmbH is EUR 437.50 for each full quarter of a year. However, for GmbHs founded after 30 June 2013, the minimum CIT amounts to EUR 125 for each full quarter of the first five years and EUR 250 for the next five years.

Austria

Local income taxes

There is no additional local income tax levied at the company level.

Corporate residence

A corporation is resident in Austria for tax purposes if either it is registered in Austria (legal seat) or its place of effective management is located in Austria. The 'place of effective management' is located where the day-to-day management of the company is actually carried out and not where singular board decisions are formally made. However, the definition of place of effective management under Austrian tax law does not significantly deviate from its definition under the Organisation for Economic Co-operation and Development (OECD) guidelines.

Permanent establishment (PE)

An Austrian PE is defined under Austrian tax law as a fixed establishment where a business is carried out, in particular:

- the place where the management is carried out
- plants, warehouses, purchase and sales establishments, and other establishments where an entrepreneur or one's permanent representative carries out one's business, or
- construction sites, which last for more than six months.

However, the definition of PE is different in some tax treaties. The Austrian tax authorities generally follow the commentary to the OECD model convention regarding the PE concept.

Other taxes

Value-added tax (VAT) (Mehrwertsteuer)

Generally, the Austrian VAT law is based on the 6th European Union (EU) VAT Directive. Under the Austrian VAT law, companies and individuals carrying out an active business on a permanent basis are qualified as entrepreneurs for VAT purposes. As entrepreneurs, they have to charge the supply of goods or services provided to their customers with Austrian VAT at a rate of 20%. A certain limited range of goods and services (such as food, books, passenger transportation, cultural events) is taxed at the reduced rate of 10%. Certain other transactions are exempted from Austrian VAT (e.g. export transactions).

According to the '*Steuerreformgesetz 2015/2016*', the reduced VAT rate has been increased from 10% to 13% for animals, seeds and plants, cultural services, museums, zoos, film screenings, wood, ex-vineyard sales of wines, air travel, public pools, youth care, guest accommodation, and athletic events. The VAT rate for food, restaurants, renting, and medicine remains at 10%. This amendment entered into force as of 1 January 2016 (1 May 2016 for guest accommodation).

Input VAT

Entrepreneurs are entitled to deduct Austrian input VAT insofar as the input VAT does not result from goods/services purchased that are directly linked to certain VAT-exempt sales (e.g. interest income, insurance premium). However, certain transactions are exempt from Austrian VAT (e.g. export transactions) without limiting the ability of the entrepreneur to deduct the related input VAT. To be entitled to deduct input VAT, the entrepreneur must obtain an invoice from one's supplier that fulfils certain formal requirements.

VAT filing and payment

Entrepreneurs have to file monthly or quarterly VAT returns by the 15th day of the second month following the month concerned or by the 15th day of the second month following the quarter concerned. The balance of the VAT due and the input VAT deducted has to be paid to the tax office (if VAT burden) or is refunded by the tax office (if in a net input VAT position) to the electronic tax account of the entrepreneur. A separate report has to be filed by the entrepreneur at the tax office showing the cross-border intra EU-transactions made.

Customs duties

Certain cross-border inbound movements of goods from non-EU countries trigger Austrian customs duty. The duty is levied according to the Austrian customs duty scheme, which is based on the EU-customs duty scheme. It defines the customs duty tariffs, dependent on the nature of the good.

Excise taxes

Excise taxes are imposed on certain products, including petroleum (approximately EUR 40 to EUR 600 per 1,000 litres), tobacco products (13% to 47% of price), and alcoholic beverages (tax rate depends on type of alcohol).

Stability fee for banks

A stability fee for financial institutions is charged at 0.09% based on balance sheet totals of EUR 1 billion to EUR 20 billion and 0.11% on balance sheet totals over EUR 20 billion. In addition to the stability fee, there is a contribution of 45% to 55% imposed on the stability fee, which has to be paid by banks for periods till the end of the year 2017. These contributions are deemed to be used for stability measures regarding the capital market.

Real estate tax

Local authorities annually levy real estate tax on all Austrian real estate property, whether developed or not. The tax is levied on the assessed standard ratable value (*Einheitswert*) of immovable property. The assessed value is usually substantially lower than the market value. The effective tax rate depends on the intended use of the real estate and is calculated using a special multiplier.

Tax rates:

- Agricultural area and forestry
 - 1.6‰ for the first EUR 3,650 of the assessed standard ratable value.
 - 2‰ for the amount of the assessed standard ratable value exceeding EUR 3,650.
- Buildings and property are taxed at 2‰ of the assessed standard ratable value. This multiplier is reduced for:
 - Single family houses
 - to 0.5‰ for the first EUR 3,650 of the assessed standard ratable value and
 - to 1‰ for the next EUR 7,300.
 - Leasehold and shared property
 - to 1‰ for the first EUR 3,650 of the assessed standard ratable value and
 - to 1.5‰ for the next EUR 3,650.
 - All other property
 - to 1‰ for the first EUR 3,650 of the assessed standard ratable value.

After the assessed standard ratable value is multiplied by the relevant multiplier, the real estate tax is calculated by using a special municipal rate fixed by each municipality (maximum 500‰). Finally, the tax amount is reduced by a general reduction of 25% as stated by law and increased by a 35% inflation adjustment.

Real estate transfer tax

Tax is generally levied at 3.5% on transactions that cause a change in the ownership of Austrian real estate or in the person empowered to dispose of such property (e.g. direct

Austria

owner). Real estate transfer tax is generally calculated on the basis of the acquisition price. However, according to the '*Steuerreformgesetz 2015/2016*', the taxable base has to be at least the property value (*Grundstückswert*). This value will be calculated either on the basis of the sum of the projected pro rata three-fold land value (*Bodenwert*) and the pro rata value of the building or derived from a proper real estate price index. Further, in case the taxpayer is able to prove that the fair market value is lower than the property value, the fair market value represents the minimum taxable base. This law amendment entered into force on 1 January 2016.

In the case of real estate transfers within the closer family circle, the three-fold assessed ratable value (capped at 30% of the fair market value) is taken as the tax base, and a tax rate of 2% applies. For transfers in connection with corporate restructuring under the Reorganisation Tax Act, the two-fold assessed standard ratable value is taken as the tax base, and the standard tax rate applies.

According to the law amendment, the taxable base for free of charge transfers (i.e. family and non-family transfers) is the property value. The rate for transfers without compensation is subject to different levels. It is 0.5% for a property value of below EUR 250,000, 2% up to EUR 400,000, and 3.5% over EUR 400,000. In case of business transfers, the tax is capped at 0.5% of the property value. For transfers in connection with corporate restructuring under the Reorganisation Tax Act and the consolidation of shares, the tax rate amounts to 0.5% of the property value.

Real estate transactions with a tax base of EUR 1,100 or below are exempt.

Note that an additional 1.1% registration fee becomes due upon incorporation of the ownership change in the land register. The registration fee is assessed on the basis of the market value. There is a preferential taxation (three-fold ratable value capped at 30% of the fair market value) in case of family transactions or corporate restructuring qualifying for the application of the Reorganisation Tax Act.

Capital transfer tax (*Gesellschaftsteuer*)

Capital transfer tax has been entirely abolished as of 1 January 2016.

Previously, capital transfer tax was imposed at a rate of 1% on the initial contribution of capital, other contractual or voluntary contributions in cash or in kind, and certain hybrid financing instruments to Austrian corporations.

Stamp duty

Stamp duty is imposed in connection with certain legally predefined transactions for which a written contract has been established (e.g. lease contracts, bills of exchange, assignments of receivables). The Austrian administration's understanding of a 'written contract' is very broad and covers not only paper contracts but also contracts concluded by electronic means (e.g. electronically signed emails).

The stamp duty is triggered upon the establishment of a legal relationship if at least one Austrian party is contractually involved or, even if a contract is concluded between non-Austrian parties only, if the subject of the contract relates to Austria (e.g. lease contract on Austrian real estate). However, various possibilities are available for most legal transactions subject to stamp duty to structure them in a way without triggering stamp duties (e.g. setting up of contracts abroad, offer-acceptance procedure, usage of audio-tapes).

Loan and credit agreements are not subject to stamp duty.

The stamp duty rates for the most common legal transactions are as follows:

Legal transactions	Stamp duty (%)
Lease agreements	1.00
Certificates of bonds	1.00
Bill of exchange	0.13
Assignment of receivables	0.80

Payroll taxes

Payroll taxes are income taxes levied on employment income, withheld by the employer. A progressive tax rate is applied to the tax base, being the salary after deduction of allowances and various expenditures (e.g. social security contribution). The employer is legally obligated to withhold the payroll tax and liable to do so *vis-a-vis* the Austrian tax authority.

Social security contributions

Monthly rates of compulsory (pre-tax) social security contributions are shown below for pensions, sickness, unemployment, accident insurance, and certain minor contributions:

Social security categories	Employer (%)	Employee (%)	Total (%)
Sickness	3.78	3.87	7.65
Unemployment	3.00	3.00	6.00
Pension	12.55	10.25	22.80
Accident	1.30	0.00	1.30
Miscellaneous	0.85	1.00	1.85
Total	21.48*	18.12*	39.60*

* On a maximum assessment basis (gross salary) of EUR 4,860 (EUR 4,650 prior to 1 January 2016) per month for current payments. Special payments receive a tax favoured treatment (employer at 20.98%, employee at 17.12%, for a total of 38.10%). The maximum assessment basis (gross) amounts to EUR 9,720 (EUR 9,300 prior to 1 January 2016) per year.

In addition, the employer is liable to the Family Burdens Equalisation Levy at the rate of 4.5%, the municipal tax on payroll at the rate of 3% of monthly gross salaries and wages, and a public transportation levy of EUR 2 per week per employee in the city of Vienna. In addition, a contribution to the Chamber of Commerce is levied at a rate of approximately 0.40% (between 0.36% and 0.44%) of monthly gross salaries paid (depending on the province). Moreover, a contribution to the mandatory employee pension fund at the rate of 1.53% on monthly gross salaries is payable for employments subject to Austrian employment law.

Branch income

Austrian branches of foreign corporations are taxed in the same way as Austrian corporations, except that inter-company dividends received by Austrian branches of non-EU corporations are not tax exempt (*see the Income determination section*) and Austrian tax losses can be carried forward only if they exceed non-Austrian profits. Books and records generally can be kept abroad but must be brought to Austria in case of a tax audit (upon official request).

Income determination

Taxable income is determined based on statutory accounts under Austrian generally accepted accounting principles (GAAP) adjusted for certain deductions and additions prescribed by the tax law.

Austria

Inventory valuation

In general, inventories are valued at the lower of cost or market. If specific identification during stock movements is not possible, other methods, such as last in first out (LIFO) and first in first out (FIFO), are permitted when shown to be appropriate. Conformity between financial book keeping and tax reporting is required.

Capital gains/exit taxation/inbound transfer

Generally, capital gains (short and long-term) are part of the normal annual result of a corporation and are taxed at the ordinary CIT rate (25%).

A special tax treatment applies to capital gains with respect to the exit of taxable assets. In the case of a transfer of assets that formed part of a business from Austria to a foreign country (e.g. allocation of assets to a foreign branch), latent capital gains generally are taxed at the time of the transfer. In case these assets are transferred to an EU member state, capital gains taxation can be postponed upon request until the assets are sold or transferred outside the European Union. According to the '*Abgabenänderungsgesetz 2015*', it is no longer possible to postpone the capital gains taxation for asset transfers to other EU member states till actual realisation. However, it is possible to apply for a payment by instalments (i.e. seven years for non-current assets and two years for current assets). Asset transfers for which the taxation has been postponed in the past (i.e. transfer after 1 January 2006 as the maximum limitation period is ten years) will be subsequently recaptured when the assets are sold or transferred outside the European Union. This law amendment entered into force as of 1 January 2016.

In case of an inbound transfer, generally, the fair market value of the assets is considered for Austrian income tax purposes (step up). Therefore, any hidden reserves accumulated abroad are not taxed in Austria.

Dividend income

Dividends received from an Austrian company at the corporate shareholder level are generally excluded from the tax base (no minimum stake, no minimum holding period). This tax exemption refers to domestic dividends only, not to capital gains or losses.

Additionally, dividends received from companies located within the European Union or from countries within the European Economy Area (EEA) with which Austria has concluded a comprehensive agreement on mutual assistance regarding the exchange of information are also tax exempt if the foreign company is subject to a tax similar to the Austrian CIT and if the foreign CIT rate is not below 15%.

In cases where the dividends from foreign investments are taxable, foreign CIT can be credited against the Austrian CIT.

Portfolio dividends

Portfolio dividends (i.e. dividends from an investment below 10%) received from corporations located in member states of the European Union, as well as dividends from corporations that are located in those EEA and third countries with which Austria has concluded a comprehensive agreement on mutual assistance regarding the exchange of information, are generally exempt from CIT. However, under special circumstances, a switch-over to the credit method, as outlined under *International participation exemption for dividends and capital gains below*, has to be considered. Moreover, the dividend must not be deductible for tax purposes in the source state in order to be tax exempt at the level of the Austrian recipient (valid for substantial investments and portfolio dividends).

Stock dividends

A conversion from revenue reserves (retained earnings) to capital by a company does not lead to taxable income for the shareholder. However, capital reductions are treated

as taxable income if within ten years prior to the capital reduction the above-mentioned increase in capital was repaid to the shareholder. Otherwise, they are tax exempt.

International participation exemption for dividends and capital gains

Dividends received from a foreign company are also tax exempt at the corporate shareholder level if the Austrian company holds at least 10% of the issued share capital for a minimum holding period of one year (international participation exemption). Furthermore, both capital gains and capital losses derived from shares qualifying for the international participation exemption are tax neutral. This means a deduction of capital losses is no longer available. However, the parent company can exercise an (irrevocable) option for each single participation acquired to treat both capital gains and capital losses as taxable (spread of losses and depreciations over a period of seven years). The option refers to capital gains (losses) only and does not affect the tax treatment of ongoing dividend distributions.

Switch-over-clause

In the case of presumed tax abuse, the participation exemption for dividends and capital gains is replaced by a tax credit (switch-over-clause). The credit system is applied if the foreign subsidiary does not meet an active-trade-or-business test (i.e. passive income from royalties, interest, etc. is greater than 50% of total income of subsidiary) and, at the same time, is regularly subject to a foreign income tax burden of 15% or below. The domestic and foreign participation exemptions are available to Austrian resident corporations and to Austrian branches of EU corporations only, but not to Austrian branches of non-EU corporations.

Interest income

Interest income is taxed at the general CIT rate of 25%.

Rental income

Rental income is treated as normal business income.

Foreign income

Austrian resident corporations are taxed on their worldwide income. If a double taxation treaty (DTT) is in force, double taxation is mitigated either through an exemption or by granting a tax credit equal to the foreign WHT at the maximum (capped with the Austrian CIT incurred on the foreign-source income). If foreign WHT cannot be credited at the level of the Austrian corporation (e.g. due to a loss position), Austrian tax law does not allow one to carry forward the foreign WHT to future assessment periods. However, if the source of the income is a non-treaty country, exemption or a tax credit shall be available based on unilateral relief (representing a discretionary decision of the Austrian Ministry of Finance only but no legal entitlement for the applicant). Austrian tax law does not provide for a deferral of taxes on foreign income. Special rules for taxing undistributed income of foreign subsidiaries are applicable only to foreign investment funds.

Please note that Austrian Tax Law does not define special controlled foreign company (CFC) rules. However, under certain circumstances, the Austrian tax administration, under a substance-over-form approach, taxes passive income of foreign subsidiaries of Austrian companies located in low-tax jurisdictions (*see switch-over-clause under International participation exemption for dividends and capital gains above*).

Deductions

Depreciation and amortisation

Only the straight-line method is accepted for tax purposes, whereby the cost is evenly spread over the useful life of an asset. For certain assets, depreciation rates relevant for tax purposes are prescribed by the tax law and shown in the following chart:

Austria

Assets	Depreciation rate (%)
Buildings (industrial use)	2.5 (3% prior to 2016)
Buildings (banking, insurance)	2.5
Other buildings	2.0
Automobiles	12.5

Based on the 'Steuerreformgesetz 2015/2016', buildings used as business assets are depreciated at a rate of 2.5%, irrespective of the use of the building. This amendment is applicable for tax years starting after 31 December 2015.

Tax depreciation is not required to conform to financial depreciation under Austrian GAAP. If depreciated property is sold, the difference between tax value and sale proceeds is taxed as a profit or loss in the year of sale.

Trademarks are usually amortised over 15 years. Other intangibles have to be amortised over their useful lives.

Goodwill

Goodwill arising in the course of an asset deal for tax purposes must be amortised over 15 years. Goodwill that arose in the course of a share deal can be amortised only if the acquired company is included in a tax group and if the share deal was effected until 28 February 2014 (*see the Group taxation section*). Goodwill arising as a result of a corporate merger cannot be amortised.

Organisational and start-up expenses

Generally, organisational and start-up expenses are tax deductible.

Interest expenses

Interest payments (also inter-company) are generally tax deductible if they meet the general arm's-length requirements. *See Thin capitalisation in the Group taxation section and Payments to foreign affiliates below for more information.*

Financing costs

According to current tax law, interest expenses resulting from the debt-financed acquisition of shares are usually tax deductible. This is so even if the Austrian participation exemption regime applies (*see the Income determination section*).

However, interest expenses relating to the debt-financed acquisition of shares from related parties or (directly or indirectly) controlling shareholders are generally non-deductible. This disallowance of interest also applies in circumstances where the shareholder acquiring the shares has been funded by a debt-financed equity contribution (insofar as the equity contribution was made in direct connection with the share acquisition). The deductibility of interest expenses incurred in connection with the debt-financed acquisition of shares from a third party is not covered by this rule.

All financing costs (e.g. fees, foreign exchange expenses, legal advice) that relate to tax-exempted international participations are non-deductible.

Accrued expenses

Certain accruals (such as provisions for liabilities and impending losses) running for more than 12 months as of the closing date of the accounts are accepted for tax purposes at 80% of their value only. Exempted from this reduction are provisions for personnel benefits (severance payments, pensions, vacations, and anniversary awards) for which specific reduction and computation methods have been provided and provisions that were already calculated by discounting a future obligation.

Long-term accruals made from 30 June 2014 onwards (new accruals) are to be discounted, depending on their actual duration. The discount rate to be used is 3.5%. Valuation differences resulting for long-term accruals that already existed before 30 June 2014 (if accruals under the new approach are lower than under the former approach) have to be spread over three years. In case the accrual under the former approach (80%) is lower than under the new approach (with discount of 3.5% *per annum*), the former approach has to be continued. The exemption for personnel benefits (severance payments, pensions, vacations, and anniversary awards) will still apply.

In general, lump-sum accruals and accruals for deferred repairs and maintenance are not allowed for tax purposes.

Bad debt

Valuation allowances for bad debts are, in principle, deductible for tax purposes, unless they are calculated on a lump-sum basis. In case of inter-company receivables, appropriate documentation regarding the compliance with the arm's-length principle is required.

Charitable contributions

Donations to certain charitable institutions are generally tax deductible, up to a limit of 10% of the current year's profit.

Furthermore, donations to certain public Austrian institutions, such as universities, art colleges, or the academy of science, and to non-profit organisations performing research and educational activities mainly for the benefit of the Austrian science or economy may also be deducted as operating expenses, up to the limit of 10% of the current year's profit. The same is valid for donations granted to foreign institutions with residence in the EU/EEA or third countries with which Austria has concluded an agreement on mutual assistance regarding the exchange of information. The requirement for deductibility is that the activities of the organisation are carried out mainly for the benefit of Austrian science or the Austrian economy.

Meals and entertainment

The deductibility of costs for business lunches generally is limited to 50% of actual expenses incurred (provided the business lunch had the purpose of acquiring new business).

The deductibility of entertainment expenses is restricted to advertising expenses.

Salary payments

Payments to a member of the supervisory board (*Aufsichtsrat*) are tax deductible up to a limit of 50%. Salaries (including all payments in cash and in kind, excluding privileged severance payments) exceeding EUR 500,000 per person and per year are not tax deductible. This rule also covers bonus payments and pension schemes. However, for pension schemes there is a EUR 500,000 *per annum* threshold to be considered separately from the other salary payments.

This rule also covers costs on-charged in relation with employees for foreign (group) companies that are involved in the organisational structure of the Austrian company (e.g. foreign group staff acting as managing director for an Austrian group company).

Severance payments granted by companies to employees that go beyond statutory obligations (voluntary severance payments) at the level of the employer represent non-deductible expenses insofar as they are taxed at the reduced income tax rate of 6% at the employee's level.

Fines and penalties

Fines and penalties are generally not tax deductible.

Austria

Taxes

Austrian and foreign taxes on income and other personal taxes, as well as VAT insofar as it relates to non-deductible expenditures, are non-deductible. Other taxes, such as payroll taxes, are deductible.

Net operating losses

Tax losses can be carried forward without any time limit. However, tax loss carryforwards generally can be offset against taxable income only up to a maximum of 75% of the taxable income for any given year. Some exceptions apply (i.e. in connection with tax groups, in the case of liquidations or the recapture taxation of foreign losses), allowing a company to charge tax loss carryforwards available against 100% of annual taxable income.

The Austrian tax law does not provide for a carryback of tax losses.

Loss-trafficking (*Mantelkauf*)

Tax loss carryforwards may be lost in the case of a share deal being classified as loss-trafficking (so called '*Mantelkauf*') or in the course of a legal restructuring leading to similar results.

Under Austrian tax law, a share deal against compensation is classified as a *Mantelkauf* if, from a substance-over-form perspective, the 'economic identity' of a company is changed due to the transaction. The change of economic identity of a company is realised if all of the following structural changes are made to the acquired Austrian company having the tax loss carryforwards available:

- Change of shareholder structure.
- Change of the organisational structure.
- Change of the business structure.

All three conditions cumulatively have to be met. There is no exact time period defined within which they have to be met; however, meeting them within one year after the share transfer usually is regarded as a strong indication for a *Mantelkauf*.

Payments to foreign affiliates

Generally, there are no restrictions on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided they are at arm's length (which should be appropriately documented by agreements, contracts, calculation sheets, etc.). Payments to affiliated companies not meeting arm's-length standards are treated as a hidden distribution of earnings (i.e. they are not tax deductible, and WHT is usually triggered at source). See *Transfer pricing in the Group taxation section* for more information.

In addition, interest and royalty payments made by an Austrian company to affiliated companies (beneficial owner) located in low-tax jurisdictions (effectively taxed below 10%) are non-deductible as well.

Note that the domestic implementation of the EU Interest Royalty Directive, which abolishes WHT on cross-border payments of interest and licence fees (regardless of whether taken out by deduction or by assessment) between affiliated companies in the member states, should be considered.

Group taxation

Two or more companies can form a tax group, provided the parent company directly or indirectly owns more than 50% of the shares in the subsidiaries. The tax group also can include foreign group members. However, the scope of foreign tax group members is limited to corporations being resident in EU member states and in states that have

entered into a comprehensive administrative assistance arrangement with Austria. If a group member withdraws from the group within a minimum commitment-period of three years, all tax effects derived from its group membership must be reversed.

Within a tax group, all of the taxable results (profit and loss) of the domestic group members are attributed to their respective group parent. From foreign tax group members, tax losses in the proportion of the shareholding quota are attributed to the tax group parent. The foreign tax loss has to be calculated in accordance with Austrian tax law. However, it is capped with the amount actually suffered based on foreign tax law. Starting in 2015, ongoing tax losses from foreign group members can only be recognised to the extent of 75% of the profit of all domestic group members (including the group leader). The remaining loss surplus may be carried forward by the group parent. In addition, foreign tax losses utilised by the Austrian tax group parent are subject to recapture taxation at the time they are utilised by the tax group member in the source state, or in the moment the group member withdraws from the Austrian tax group. Under the recapture taxation scheme, the Austrian tax group has to increase its Austrian tax base by the amount of foreign tax losses used in prior periods.

For the purpose of the application of the recapture taxation scheme, a withdrawal from the tax group is also assumed if the foreign group member significantly reduces the size of its business (compared to the size of the business at the time the losses arose). Reduction of size is measured on the basis of business parameters such as turnover, assets, balance sheet totals, and employees, while the importance of the respective criteria depends on the nature of the particular business.

Under the previous tax group regime, goodwill that arose in the course of a share deal (acquisition of an Austrian active business company from a third party contractor) had to be amortised over 15 years, provided that the acquired company was included in a tax group. Goodwill amortisations have now been abolished and are applicable only for share deals effected until 28 February 2014. Existing goodwill amortisations are grandfathered, provided the goodwill amortisation potentially impacted the share purchase price.

Note that the Court of Justice of the European Union (CJEU) in 2015 qualified the limitation of the goodwill amortisation to Austrian target companies as not being in line with EU law (case C-66/14, Finanzamt Linz). The Austrian Administrative Court (VwGH) followed the decision of the CJEU with its finding of 10 February 2016 (case 2015/15/0001).

Consequently, the acquisition of non-Austrian EU target companies basically qualifies for goodwill amortisation. However, the decision of the VwGH has only an impact to share deals that are effected before 1 March 2014.

Write-downs of participations in tax group members are not tax deductible.

Transfer pricing

Under Austrian Tax Law, there are no explicit transfer pricing regulations available defining, in detail, the local requirements with regards to arm's length, the documentation standards required, penalties, etc. In general, Austria applies the OECD transfer pricing guidelines referring to the OECD model tax convention. Furthermore, Austrian transfer pricing guidelines have been issued by Austrian tax authorities. The guidelines represent the Austrian authority's understanding of inter-company business relationships with regards to their arm's-length classification and are based on the OECD transfer pricing guidelines.

According to these guidelines, all business transactions between affiliated companies must be carried out under consideration of the arm's-length principle. Where a legal transaction is deemed not to correspond to arm's-length principles, the transaction

Austria

price is adjusted for CIT purposes. Such an adjustment constitutes either a constructive dividend or a capital contribution. Currently, there is the option of applying for a non-binding ruling of the tax authorities. Additionally, there is an advanced ruling opportunity available. Under this regulation, binding information in the fields of transfer pricing, group taxation, and mergers and acquisitions (M&A) can be requested from the Austrian tax authorities against payment of an administrative fee (the fee rate depends on the size of the applicant's business).

On 9 May 2016, the Austrian government published the draft of the 'Verrechnungspreisdokumentationsgesetz' (VPDG). This bill includes local rules on transfer pricing documentation and is expected to be introduced in late 2016.

Thin capitalisation

There are no explicit tax regulations available under Austrian tax law stipulating the minimum equity required by a company ('thin capitalisation rules'). Basically, group financing has to comply with general arm's-length requirements. Therefore, an Austrian group entity being financed by an affiliated entity must be able to document that it would have been able to obtain funds from third-party creditors under the same conditions as from an affiliated financing entity. Therefore, the appropriate ratio between an Austrian company's equity and debt will mainly depend on the individual situation of the company (profit expectations, market conditions, etc.) and its industry. Nonetheless, the fiscal authorities in administrative practice (i.e. no 'safe-harbour' rule) tend to accept a debt-to-equity ratio of approximately 3:1 to 4:1. However, the debt-to-equity ratio accepted by tax authorities also strongly depends on the average ratio relevant for the respective industry sector. If an inter-company loan is not accepted as debt for tax purposes, it is reclassified into hidden equity and related interest payments into (non-deductible) dividend distributions.

Furthermore, under Austrian commercial law, a minimum equity ratio of 8% is claimed. If the equity ratio of the company falls below 8% and its earning power (virtual period for debt redemption) at the same time does not meet certain requirements, a formal and public reorganisation process will have to be initiated.

Controlled foreign companies (CFCs)

The Austrian Tax Law does not define special CFC rules (*see Foreign income in the Income determination section*).

Tax credits and incentives

Foreign tax credit (matching credit)

Generally, foreign WHT can be credited against Austrian CIT (*see Foreign income in the Income determination section*). In special cases (e.g. Brazil, China, Korea), the DTT provides for a matching credit, which allows the credit of a pre-defined amount that exceeds the actually paid foreign WHT.

Research and development (R&D) incentives

R&D costs are fully deductible at the time they accrue. An R&D premium of 12% (i.e. R&D expenses x 12% = R&D premium) may be claimed for R&D activities performed in Austria for tax years starting after 31 December 2015 (previously 10%).

In order to receive the R&D premium of 12%, an expert report (issued by the Austrian research promotion organisation [FFG]) is required that confirms the nature of the expenses in question as R&D expenses. The definition of privileged R&D expenses is taken from the Frascati Manual.

The R&D premium is also available in case of contract R&D; however, R&D incentives cannot be claimed by both principal and agent (the agent is just able to apply for the

premium if the principal does not). In case of contract R&D, the privileged R&D costs are capped at EUR 1 million per year.

Austria has no 'patent box regime'.

Employment incentives

According to the '*Steuerreformgesetz 2015/2016*', employment incentives have been abolished and are ultimately applicable for tax years starting before 31 December 2015.

Previously, a tax bonus payment of 6% or, alternatively, an allowance of 20% could be claimed for expenditures in connection with the training of employees. These incentives could be claimed for external training expenditures and for in-house training expenditures, provided that there was a dedicated in-house training department (for in-house training expenditures, only the allowance could be applied for).

Investment incentives

For investment in certain regions, government grants and subsidies are available and are generally individually negotiated.

Withholding taxes

Dividend WHT

Under Austrian domestic law, there is generally a 25% WHT for corporations and 27.5% WHT for other recipients on dividends (profit distributions) paid to a foreign parent company. The WHT has to be deducted and forwarded by the Austrian subsidiary to the tax office.

To end up with the reduced WHT rate as defined under the DTT applicable, Austrian tax law provides for the following alternative methods of WHT relief: refund method or exemption at source method.

Refund method

The Austrian subsidiary generally has to withhold 25% WHT (for corporations) or 27.5% WHT (for other recipients) on profit distributions to the foreign parent company, and the parent company has to apply for a refund (of the difference between 25% or 27.5% WHT and the lower DTT rate). In the course of the refund process, the Austrian tax administration analyses whether the foreign shareholder can be qualified as beneficial owner of the dividends paid. If the refund is approved by the Austrian tax authority, dividend distributions within the following three years can be done without deduction of WHT (for distributions of a comparable size and provided the foreign holding structure did not change in the meantime).

Exemption at source method

Relief at the source is available only if the direct parent company issues a written declaration confirming that it is an 'active' company carrying out an active business that goes beyond the level of pure asset management (holding activities, group financing, etc.) and has its own employees and office space at its disposal (substance requirements).

WHT on dividends paid to EU companies

With regard to dividends paid to EU resident corporate shareholders, Austria has implemented the EU Parent/Subsidiary Directive according to which domestic WHT is reduced to zero. The requirements for the reduction are that the EU resident parent company, which also has to meet the substance requirements mentioned above (see *Exemption at source method*) at the moment of the dividend distribution, must directly own at least 10% of the share capital of the Austrian subsidiary for a period of at least one year. In case of foreign EU shareholders being qualified as pure holding companies,

Austria

the Austrian tax administration does not allow an exemption at source but claims the application of the refund method.

Provided the requirements according to the EU Parent/Subsidiary Directive are not met, Austrian WHT has to be deducted. If an EU parent company cannot credit the Austrian WHT deducted against the CIT of its resident state (e.g. because the foreign dividend income is exempted from the CIT or due to a loss position of the shareholder), it is entitled to apply for a refund of the Austrian WHT. This application has to include a confirmation/documentation that the Austrian WHT could (fully or partly) not be credited at the level of the parent company.

Repayment of equity

The tax-wise equity of a company has to be annually reported to the Austrian tax authority as part of the CIT return (equity account, so called '*Evidenzkonto*'). This equity can be repaid to the domestic or foreign shareholders without triggering Austrian WHT. However, the tax-wise classification of a dividend as 'capital repayment' has to be shown in the shareholder resolution about the distribution and in the company's equity account.

The '*Steuerreformgesetz 2015/2016*' restricted the possibility to treat a dividend for tax purposes either as dividend distribution or as repayment of equity. The tax-free repayment of the tax-wise equity to the shareholders is only possible in case no retained earnings are available and if the repayment is covered by the tax-wise equity. This amendment entered into force for tax years starting after 31 July 2015.

According to the '*Abgabenänderungsgesetz 2015*', the taxpayer (again) has the possibility to opt whether a dividend for tax purposes should be treated either as dividend distribution or as repayment of equity. The execution of the option for treating dividends as dividend distribution requires a sufficient level of retained earnings while a classification as equity payment requires a positive level of tax-wise equity (in addition to the formal requirements outlined above). This amendment entered into force for repayments and dividend distributions that are decided after 31 December 2015.

Interest WHT

Interest payments to non-resident companies are currently not subject to WHT (provided no Austrian real estate property is used as security). However, interest on Austrian bank deposits received by individuals resident in the European Union is subject to 35% EU WHT on the basis of the Austrian EU Withholding Tax Act.

Interest on Austrian bank deposits or Austrian bonds, where the paying/depositary agent is located in Austria, is subject to 25% WHT (27.5% WHT for Austrian bonds). This regulation is applicable for non-resident individuals.

Royalties WHT

On royalties paid to a non-resident company, Austrian WHT at a rate of 20% has to be deducted. This tax rate can be reduced under an applicable DTT or under the application of the EU Interest Royalty Directive, which was implemented in Austrian Tax Law.

Tax treaties

The following table lists the countries with which Austria has signed a DTT and provides details of the amount of Austrian WHT.

Recipient	WHT (%)		
	Dividends (1, 2)	Interest (3)	Royalties, licences (4)

Notes

1. Dividend distributions attributable to a prior release of paid-in surplus or other shareholder contributions (classified as capital reserves) are deemed to be a repayment of capital, i.e. no WHT is incurred. At the shareholder's level, dividends received and those classified as contribution refund will reduce the tax basis assessment for investments. To the extent to which the tax basis would become negative, such dividends are treated as taxable income (unless taxation is eliminated by a tax treaty).
2. Under certain treaties, the amount of the WHT is dependent on the extent of the proportion of issued share capital held by the recipient. Where this is the case, all rates are given. Those marked with + refer to an investment of 10%, ++ to 15%, +++ to 20%, * to 25%, ** to 50%, and *** to 70%.
3. Interest on cash deposits in euro or foreign currency in bank accounts, on fixed interest bearing securities in foreign currency (issued after 31 December 1988), and on fixed interest bearing securities denominated in Austrian schillings or euro (issued after 31 December 1983) are subject to a 25%/27.5% WHT. If the recipient is an individual, this WHT is final (no further income taxation and inheritance taxation). Companies receiving interest payments may obtain an exemption from WHT if they provide the bank or other custodial agent with a written confirmation from the recipient that such interest payments constitute a part of the recipient's operating revenues (exemption statement). Interest payments to non-residents without a PE in Austria are generally not subject to WHT (provided the loan is not secured via Austrian land property). At interest payments between affiliated companies, the regulations stipulated by the EU Interest Directive have to be taken into consideration.
4. In case of payments to countries marked with **, the rate is 0% unless more than 50% of the issued share capital of the company paying the royalties is held by the recipient, in which case the rate given applies. At royalty payments between affiliated companies, the regulations stipulated by the EU Interest Directive have to be taken into consideration.
5. If the recipient holds a participation of less than 10% in the distributing company, the dividends are subject to a 25% WHT. Since dividends distributed by an Austrian corporation to another Austrian corporation are generally not subject to taxation, the WHT is credited against CIT upon assessment of the recipient corporation for the respective tax year.
6. WHT on dividends from Austrian companies is final, i.e. no further income tax is collected from the recipient (provided it is an individual).
7. The treaty was recalled by Argentina in 2009. Austrian tax citizens are protected by section (§) 48 BAO (*Bundesabgabenordnung* [Austrian Fiscal Federal Code]) against double taxation.
8. 5% for shares of at least 25% and worth at a minimum of 250,000 United States dollars (USD); 10% for shares of at least 25% and worth at least USD 100,000; 15% in all other cases.
9. 5% for industrial licences and know-how not more than three years old; 10% in all other cases.
10. 10% for copyright licence fees in connection with literature, science, and art; 25% for trademarks licence fees; 15% in all other cases.
11. 6% for industrial, commercial, or scientific equipment; 10% in all other cases.
12. 5% for licence income from copyrights, brands, plans, secret formulas or procedures, computer software, industrial, commercial or scientific use of equipment, and information.
13. 0% for copyright royalties in connection with the production of literary, dramatic, musical, or artistic work; 5% in all other cases.
14. 20% for films.
15. 5% for leasing of mobile goods, and 10% for other licences.
16. 0% for shares of at least 50% and worth at a minimum of EUR 2 million; 5% for shares of at least 10% and worth at least EUR 100,000; 10% for shares in all other cases. The treaty was updated on 4 July 2012, but it has not yet been decided when the amendments will enter into force (0% if a company directly holds at least 10% of the capital of the company paying the dividends, 10% for shares in all other cases).
17. 2% for licence income from industrial, commercial, or scientific use, and 10% for other licences.
18. 5% for the use of commercial or scientific equipment; 10% in all other cases.
19. The treaty was signed on 16 September 2010. It has not yet been decided when it will enter into force.
20. 5% in case of direct (or indirect over a patent-realisation-company) payments of royalties by companies of the other member state (with an industrial establishment in the other member state), and 10% for other licences.
21. 5% in case of licence income from industrial, commercial, or scientific use, and 10% for other licences.
22. 15% for films.
23. 0% for copyright licence fees in connection with literature, art, and scientific use, and 10% for other licences.
24. 10% for the right of use of copyrights to artistic, scientific, or literary as well as cinematographic works, and 5% for other licences.
25. For Portugal, the rate of WHT is 5%, but 10% if more than 50% of the issued share capital is owned by the recipient.
26. 5% if capital share amounts to at least 10% and worth at least USD 100,000; 15% in all other cases.
27. The treaty was signed on 12 March 2015 and entered into force on 1 February 2016. It is applicable as of the beginning of FY 2017.
28. 5% for copyright licence fees; 10% for other licences.
29. Until a new treaty will be established, the treaty with Czechoslovakia remains applicable.
30. For dividend distributions retroactive as of 1 January 2000.
31. The treaty was signed on 3 March 2009. It has not yet been decided when it will enter into force.
32. 15% for films.
33. 10% for films.
34. 7.5% for fees for technical services; 10% for royalties.

Austria

35. 5% for the use of, or the right to use, any industrial, commercial, or scientific equipment; 10% in all other cases.
36. Austria and the United States created a draft for an amendment protocol to the existing DTT, but it has not yet been decided when it will be signed.
37. 0% for a direct participation of at least 10% and a holding period of at least 12 months; 15% in all other cases.
38. The treaty was signed on 16 June 2014 and entered into force on 21 April 2015. It is applicable as of the beginning of FY 2016.
39. 5% if the recipient holds a qualifying participation of at least 5%; 10% in all other cases.
40. 5% for licence fees for the use of any copyright of literary, artistic, or scientific work; 10% for licence fees for the use of patents, trademarks, and information concerning industrial, commercial, or scientific experience.
41. The treaty entered into force on 1 January 2015 and is applicable in respect of taxes withheld at source for amounts paid on or after 1 January 2016 and in the case of other taxes for periods beginning on or after 1 January 2016.
42. Interest on Austrian bank deposits received by individuals resident in the European Union is subject to 35% EU WHT on the basis of the Austrian EU Withholding Tax Act. Interest on Austrian bank deposits or Austrian bonds, where the paying/depositary agent is located in Austria, is subject to 25% WHT (27.5% WHT for Austrian bonds).
43. Interest on Austrian bank deposits (or Austrian bonds), where the paying/depositary agent is located in Austria, is subject to 25% WHT (27.5% WHT on Austrian bonds).
44. 25% WHT for corporations and 27.5% WHT for other recipients.

Tax administration

Taxable period

The standard tax assessment period in Austria is the calendar year. However, a company's financial year may deviate. When the tax and financial years deviate, the tax assessments for a year are based on the profits derived in the financial year(s) ending in the respective calendar year (e.g. if tax year is 1 June 2016 to 31 May 2017, then assessment is financial year 2017).

Tax returns

Generally, the CIT return has to be submitted electronically by 30 June of the calendar year following the year in which the fiscal year of the company ends. However, if the company is represented by an Austrian certified tax advisor, the tax return can be submitted by 31 March of the second following year at the latest (if the company will not be formally requested by the tax office to file it earlier). If the end of a tax year is 31 May 2016 for example, the filing deadline is 30 June 2017 (without tax advisor) or 31 March 2018 (with tax advisor).

Electronic filing of annual CIT returns

The annual CIT return (as well as the annual VAT return) has to be filed by electronic means. In the case of a company that cannot reasonably be expected to file tax returns electronically due to the lack of technical prerequisites, filing of the tax return is allowed to be done via pre-printed forms.

Payment of tax

CIT is prepaid in quarterly instalments during the calendar year, with a final settlement subsequent to the annual assessment (payment falls due one month after assessment). Prepayments of CIT generally are based on the most recently assessed tax year's tax burden (unless the taxpayer can show that its tax charge for the current year will be lower).

The difference between CIT as per the final assessment and the prepayments made is interest bearing from 1 October of the year subsequent to the year when the tax claim arose up to the date when the assessment is released (late payment interest). Interest at a rate of currently 1.38% is applied to underpayments (as well as overpayments) of tax.

Tax audit process

Tax audits usually cover CIT, VAT, and WHT. Separate audits are carried out in connection with payroll taxes and social security contributions.

In general, companies are audited every three to four years. The audit period usually covers three to four fiscal years, so, generally, each fiscal year is audited.

The duration of a tax audit depends on the number of years covered and on the complexity of topics (usually between 0.5 and 1.5 years). These topics usually cover ongoing compliance, such as tax returns. Specific topics vary from company to company and can involve, for instance:

- Business restructurings (applicability of Austrian reorganisation tax act, transfer of intangibles, etc.).
- Tax groups (all group members are audited together).
- WHT on dividends, licences, etc.
- Compliance with arm's-length principle in case of group transactions (tax auditors recently tend to focus on transfer pricing issues).

Statute of limitations

The right to assess CIT is subject to a general limitation period of five years after the end of the calendar year in which the fiscal year ends. Additionally, the limitation period can be extended in cases where certain interruptive events (e.g. tax audit, tax assessment) take place within the general limitation period. The maximum limitation period is generally ten years.

The limitation period in case of tax evasion is also ten years.

In certain cases, the maximum limitation period can be extended to 15 years.

Other issues

Choice of business entity

The most important types of companies in Austria are the limited liability corporation (GmbH) and the joint stock corporation (AG). Foreign investors generally choose the GmbH since it provides a higher degree of corporate law control and allows for lower equity provision.

As a legal entity, the GmbH exists upon registration with the Companies' Register. The application for registration must contain the notarised signatures of all managing directors. The articles of association must be drawn up in the form of a notarial deed (written document executed by a public notary) and must, as minimum requirements, include the name of the company as well as its seat, the business purpose, the amount of registered capital, and the capital contribution of each of the various owners.

The minimum share capital for a GmbH amounts to EUR 35,000. Formation costs and fees are linked with the amount of the minimum share capital.

The minimum share capital for companies founded after 30 June 2013 is EUR 10,000 for the first ten years after foundation. In the case a company intends to claim this foundation privilege, an amendment of the articles of association is required. After the first ten years upon incorporation, the minimum share capital will be automatically increased to EUR 35,000.

Generally, one half of the registered capital must be raised in cash while the remainder may be contributed in the form of assets (contributions in kind). Of the original capital contribution, 25%, or at least EUR 17,500 (EUR 5,000 in case of a start-up), must actually be paid in upon incorporation. Under certain conditions, the capital can be provided exclusively in the form of assets (incorporation in kind, in this case the contribution is subject to an audit verifying the market value of the assets contributed).

Austria

The articles of association may provide for additional capital contributions payable by the owners on the basis of a resolution adopted by the shareholder meeting.

The minimum share capital of an AG is EUR 70,000. For an AG, the same payment regulations apply as for a GmbH, but the owners can agree upon a further capital contribution going beyond the nominal value of the shares (premium). The premium is shown on the company's balance sheet as a capital reserve.

Since 2004, the company type *Societas Europaea* (SE) can be chosen in Austria. The SE is a stock corporation based on community law. The advantages of this legal form are the simplification of organisational structures (in particular for international groups) and the possibility of cross-border transfers of corporation seats without loss of the legal identity. The SE allows the choice of a business location under an economic point of view as well as the choice of the most favourable legislation. The minimum share capital required for the incorporation of a SE is EUR 120,000 while the statutory seat of the corporation must be located in the same country where the place of management is located in.

EU state aid investigations and base erosion and profit shifting (BEPS)

BEPS

Austria is involved in the BEPS-development process at an EU/OECD level. Up to now, the recommendations of the OECD have been implemented to local law only in individual areas (*see the limitation of the deductibility of interest under Payments to foreign affiliates in the Deductions section*). The main changes in local tax law due to the BEPS project will probably be the introduction of local rules on transfer pricing documentation.

On 9 May 2016, the Austrian government published the draft of the 'Verrechnungspreisdokumentationsgesetz' (VPDG). This bill includes local rules on transfer pricing documentation and is expected to be introduced in late 2016.

EU state aid investigations

Currently, there are no investigations on the part of the European Commission with regard to the Austrian tax law. However, some legal proceedings regarding taxation issues are pending with the European Court of Justice (*see BFG Linz RE/5100001/2014 [refund of energy taxes]*).

International exchange of information

The Republic of Austria signed a Model 2 Intergovernmental Agreement (IGA) with the United States (US) on 29 April 2014. The IGA came into force on 30 June 2014. The approval of the Austrian Parliament took place on 23 October 2014. This agreement has been enacted in order to support the implementation of the Foreign Account Tax Compliance Act (FATCA) in Austria. The Model 2 IGA includes the obligation of Austrian financial institutions to forward summarised information (collected data) regarding the accounts of US customers (recalcitrant account holders) to the US Internal Revenue Service (IRS). Due to the conclusion of this agreement, the US tax authorities will not withhold a 30% WHT on capital income in Austria.

Restructuring measures (M&A from a business perspective)

Transfers of assets and undertakings can be realised with retroactive effect and be tax neutral within the framework of the Austrian Reorganisation Tax Act (so called 'UmgrStG').

The legislation administers the following areas (Article I-VI):

- Mergers (within EU also cross border) of corporations.
- Special conversion (from corporations to partnerships).

- Contribution of businesses and exchange of shares.
- Merger of partnerships.
- Demerger of partnerships.
- Demerger of corporations.

If the reorganisation qualifies for the application of the Austrian Reorganisation Tax Act, the reorganisation steps are realised tax neutrally and with a retroactive effect as of the reorganisation due date. Existing tax loss carryforwards can be transferred under certain conditions as well. Furthermore, several other tax privileges are granted under the Reorganisation Tax Act for stamp duties, etc. However, the application of the Austrian Reorganisation Tax Act requires the transaction to be classified as a non-abusive transaction; consequently, it must be based on plausible non-tax reasons.

Significant developments

There have been no significant corporate tax developments in Azerbaijan during the past year.

Taxes on corporate income

In Azerbaijan, resident taxpayers are subject to a profit tax on their worldwide income. A non-resident enterprise operating in Azerbaijan through a permanent establishment (PE) must pay tax on the gross income generated from Azerbaijan sources, less any related deductions attributable to the PE. Gross income of a non-resident enterprise generated from Azerbaijan sources and not connected with a PE will be taxed at the source of payment without any deductions allowed for expenses.

Taxable profits are defined to be the difference between a taxpayer's gross income and deductible expenses.

Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempted under the law.

Deductible expenses encompass all properly documented expenses that are incurred in the furtherance of a taxpayer's business activities.

Domestic enterprises and PEs of non-residents are subject to profit tax at the flat rate of 20%.

Simplified tax system

The Tax Code stipulates payment of taxes based on a simplified system for enterprises not registered as VAT payers and whose cumulative gross revenue during any consecutive 12-month period is less than 200,000 Azerbaijani manats (AZN), except for enterprises producing excisable goods, credit and insurance organisations, and investment funds and professional participants in the securities market. Enterprises rendering trade and catering services with taxable transactions exceeding AZN 200,000 during any consecutive 12-month period may choose to be simplified taxpayers.

The simplified tax is imposed on gross revenue at a rate of 4% in Baku and at a rate of 2% in other regions of Azerbaijan, whereas the simplified tax rate for enterprises rendering trade and catering services with taxable transactions exceeding AZN 200,000 shall be at 6% and 8%, respectively.

A special rate of simplified tax is set:

- for enterprises/individuals involved in construction at a fixed amount of AZN 45 per square metre multiplied by an applied co-efficient, and

- for enterprises/individuals selling residential and non-residential premises (except for premises of individuals where one has been residing for at least five years) at a fixed amount of AZN 15 per square metre multiplied by an applied co-efficient.

The above applied coefficient is determined by regional executive authorities.

A special rate of simplified tax is set for operators of gambling games at a rate of 6% from gross receipts from game participants and for sellers of such games at a rate of 4% from gross commission paid to them by the operator.

Other special corporate tax regimes

There are other tax regimes applicable under special agreements concluded between the Azerbaijan government and foreign oil companies: production sharing agreements (PSAs) and host government agreements (HGAs). The PSA and HGA regimes apply to all enterprises involved in these agreements, including foreign oil companies functioning as contractors and foreign service companies providing services to the contractor or the operating company.

There are 24 signed and ratified PSAs and two HGAs, each with its own separate tax regime. Each PSA and HGA is in force, published on the official website of the Ministry of Taxes (www.taxes.gov.az), and contains a tax article that outlines the tax regime for that particular agreement. While there are several similarities with respect to tax terms in the various PSAs, there are some differences, other than merely differing tax rates (e.g. taxation of foreign subcontractors) or reporting requirements. Additionally, tax protocols for each PSA and HGA, which provide specific guidance regarding the procedures for payment of taxes and filing of reports, are negotiated with the Ministry of Taxes and other executive authorities.

Local income taxes

Local income taxes are paid only by companies and organisations that are in the property of municipalities. Tax rates do not exceed 20% for profit taxpayers and 4% to 8% for simplified taxpayers.

Corporate residence

A resident enterprise is any legal entity established in accordance with the legislation of Azerbaijan and performing entrepreneurial activity or any entity that is managed in Azerbaijan.

Permanent establishment (PE)

A PE of a foreign legal entity is subject to taxation with respect to the income attributable to such PE. A PE is an establishment of a foreign legal entity, through which it fully or partially performs commercial activities (for these purposes, a PE may be considered a management unit, office bureau, agency, construction site, etc.) for 90 cumulative days or more within any 12-month period. Activities of an auxiliary or preparatory nature (e.g. exclusively storing or exhibiting goods or products belonging to a non-resident, purchasing goods, collecting data by a non-resident enterprise for its own purposes) do not create a PE.

Other taxes

Value-added tax (VAT)

VAT is levied on the supply of goods and services, and on the import of goods.

VAT rates

The standard rate of VAT is 18%.

Azerbaijan

Zero rating applies to the following:

- Exportation of goods and services.
- Importation under the PSA and HGA regimes if the taxpayer obtains a VAT exemption certificate.
- Importation of goods, the supply of goods, and the implementation of works and provision of services to grant recipients on the expense of financial aid (grants) received from abroad.
- International and transit cargo and passenger transportation, as well as the supply of works and services directly connected with international and transit flights.
- The supply of gold and other valuables to the National Bank of Azerbaijan.

Taxable persons

Any person who is registered or is liable to register as a VAT payer is regarded as a taxable person.

Companies are required to register for VAT if:

- their cumulative taxable income exceeds AZN 200,000 for a consecutive 12-month period, or
- the value of one taxable transaction exceeds AZN 200,000.

Taxable amount

The taxable base is established by starting with the value of the goods and services without adding the VAT amount, but including any customs duty and excise duty, if applicable.

The value of taxable imports consists of the value of the goods determined in accordance with the customs legislation and taxes and duties (other than VAT) to be paid upon importation to Azerbaijan.

The amount of VAT to be paid is the difference between the amount of VAT received on taxable supplies of goods and services and VAT paid on the purchase of goods and services necessary to generate taxable supplies of goods and services.

The Cabinet of Ministers can grant exemptions for the import of goods and equipment used for production purposes or to provide advanced technology know-how. Such exemptions are granted for a specific period and in a specific area, and can only be granted if it is impossible to satisfy the respective needs from local resources.

Customs duties

The Customs Code sets out the rules governing all aspects of the regime, including:

- The establishment of bonded warehouses and duty-free zones.
- Temporary imports and the processing of foreign goods in Azerbaijan.
- The procedures for the re-import and re-export of goods.

Azerbaijan has adopted the internationally accepted classification system for goods. The valuation procedures for customs purposes are to be determined in line with the general principles of the World Trade Organization (WTO).

The rates of customs duties are contained in the list of customs duties for the goods to be imported to Azerbaijan. These *ad valorem* customs duty rates vary between 0% and 15%, depending on the type of goods.

Full or partial relief from the duty on temporary imports (generally, for a period of up to one year) is also available.

Under the PSA regime, contractors, their agents, and subcontractors are entitled to import and re-export from Azerbaijan, free from any import duties and restrictions, goods used for hydrocarbon activities.

Excise duty

Excise duties are imposed on tobacco products, alcoholic beverages, light vehicles, leisure and sports yachts, petroleum, and lubricants.

Taxable persons

Excise duties are paid by companies and organisations, including companies with foreign investment, as well as branches, divisions, and other independent subdivisions of companies in Azerbaijan that render services and sell self-produced goods.

Taxable operations

The following operations are subject to excise duties:

- Release of excise goods produced in Azerbaijan outside the premises of the building in which they were produced.
- Import of excise goods pursuant to the customs legislation of Azerbaijan.

Tax rates

The relevant executive authority shall determine rates of excise tax for excise goods imported into Azerbaijan (with exception of light vehicles, leisure and sports yachts, and other floating transports stipulated for these purposes).

The following excise rates apply for the following items produced in Azerbaijan:

- Food alcohol (including ethyl alcohol non-denatured with alcohol content of not less than 80%; ethyl alcohol non-denatured with alcohol content of less than 80%): AZN 2 per litre.
- Vodka, strong drinks and strong beverage materials, liqueurs, and liqueur products: AZN 2 per litre.
- Cognac and cognac products: AZN 6 per litre.
- Sparkling wines: AZN 2.5 per litre.
- Wine and vineyard materials: AZN 0.1 per litre.
- Beer (with the exception of non-alcoholic beer) and other beverages containing beer: AZN 0.2 per litre.
- Cigars, cigarillos: AZN 10 per 1,000 items.
- Cigarettes made of tobacco and their substitutes: AZN 4 per 1,000 items.

Excise rates on petroleum materials, light vehicles, leisure and sports yachts, and other floating transports stipulated for these purposes produced in the Azerbaijan Republic are established by the Cabinet of Ministers. Excise rates for petroleum materials vary from 3% to 72% of the ex-factory price, depending on the product.

Excise rates for automobiles, yachts for rest and sport purposes, and other floating means serving the mentioned purposes and imported into the Azerbaijan Republic were increased and constitute AZN 0.20 to AZN 10, depending mostly on the volume of engines.

Property tax

Property tax is levied on both movable and immovable tangible assets owned by individuals and companies.

Property tax rates

Property tax of legal entities is imposed on the average annual book value of the taxable property at the rate of 1%.

Azerbaijan

Property tax of physical persons is calculated based on the area of the building, and property tax rates will vary between AZN 0.1 and AZN 0.4 per square metre, depending on the location of the building (e.g. in Baku, the rate is AZN 0.4 per square metre).

In the residential areas, property tax is applied only to the area of the property exceeding 30 square metres. If the building is located in Baku, tax will be calculated applying coefficients (minimum 0.7 and maximum 1.5).

Taxable persons

Taxable persons are comprised of the following:

- Resident companies, including companies with foreign investment that are treated as residents under Azerbaijani law; international organisations engaged in economic activities; and other enterprises.
- Branches and affiliated companies of such taxpayers.
- Agencies and representative offices of foreign legal entities located in Azerbaijan.
- Non-resident companies performing activities through a PE in the territory of Azerbaijan.

Enterprises can combine their assets and cooperate as joint owners. Joint owners are liable to pay tax according to their interest in the property concerned.

Tax base

The property tax base varies according to the residency status of the taxpayer. Resident companies are subject to property tax on their tangible assets recorded on their balance sheet. Non-resident companies carrying out a business activity through a PE in Azerbaijan are only subject to property tax on their tangible assets connected with the PE.

The following assets are exempt:

- Facilities used for the purposes of the environment, fire protection, and civil defence.
- Product lines, railways and motorways, communication and power lines, melioration and watering facilities, and satellites and other space objects.
- Automobile transport taxed for the road tax.
- Facilities of companies involved in education, health, culture, and sports that are used only for the purposes of such areas of activity.
- Exemption of 25% of the property tax payable for water transportation means in the balance of enterprises, which are used in the carriage of passengers and cargoes.

Administration

Companies are required to report the average annual value of taxable property and pay property tax on a quarterly basis, subject to any necessary recalculations at the end of the year. Tax payments are due within 15 days of the second month of each quarter. The payment should be 20% of the previous year property tax amount.

The tax on water and air transport means is estimated on 1 January each year by the tax offices based on data provided by the organisations responsible for registration of means of transport. The tax is assessed on the person named in the registration document.

When an asset changes ownership during the tax year, the tax liability is defined as the liability of the new owner.

Land tax

Land tax is levied on Azerbaijan's land resources that are in the possession of or used by individuals or companies.

Land tax rates

The rate of land tax for agricultural land is AZN 0.06 per unit. The units are determined by the relevant authority on the basis of the purpose, geographical location, and the quality of agricultural land in the administrative regions.

The rate of land tax for industrial, construction, transport, telecommunications, trade and housing servicing, and other dedicated land varies from AZN 0.1 to AZN 20 per 100 square metres, depending on the city or region.

Taxable base

Land plots that are in ownership or used are subject to land tax. Exemptions apply to various types of land owned or used for public purposes by the state or other public authorities. The government may grant further tax exemptions and reliefs.

Assessment and procedure of payment

Companies must compute the exact amount of the land tax each year on the basis of documents evidencing the title of ownership, possession, and use. The computation must be submitted to the tax authorities by 15 May of each year. The tax must be paid by 15 August and 15 November in equal amounts.

Transfer taxes

No specific transfer taxes are levied upon the transfer of immovable property. However, certain notary fees and other sale duties applicable to transfer of property may apply.

Stamp duties

There are no stamp duties. State notary fees are payable upon notarisation of certain transactions.

Road tax

Instead of payment of road tax by owners of auto-transportation means (excluding road tax on transit), such owners will indirectly pay the road tax within the price of fuel.

Wholesalers: Road tax rate for automobile petrol, diesel fuel, and liquid gas manufactured in Azerbaijan and directed to the national consumption (wholesale) is AZN 0.02 on wholesale price (including VAT and excise) for each litre of these mentioned items.

Importers: For automobile petrol, diesel fuel, and liquid gas imported into Azerbaijan, road tax is calculated at AZN 0.02 on the customs value, but not lower than wholesale market price (including VAT and excise), of each litre of the mentioned items.

Road tax will not be included into the taxable base for VAT and excise tax.

Mining tax

Legal entities and individuals involved in the recovery of minerals in Azerbaijan are obligated to pay the mining tax. The rate depends on the type of mineral extracted and varies from 3% to 26% of its total wholesale price.

Payroll taxes**Social security contributions**

Social security contributions at the rate of 22% are payable by the employer from the gross income of the employees. Also, a 3% social security contribution is withheld from employees.

Azerbaijan

Branch income

In addition to profit tax paid by a PE of a non-resident, the amount transferred from the net profit of such PE to the non-resident is taxed at the source of payment at a rate of 10%.

Income determination

Profit tax is levied on an enterprise's taxable profits. Profits are defined as the difference between the gross income and deductions defined by law.

Inventory valuation

Inventory valuation is determined according to national accounting standards.

No other inventory valuation method is recognised for tax purposes.

Capital gains

There is no separate capital gains taxation in Azerbaijan. Proceeds from the disposal of capital assets are included in ordinary taxable income.

Dividend income

Dividends distributed to residents and non-residents are subject to withholding tax (WHT) (taxable at source upon payment). Therefore, the received dividend amounts of legal entities and physical persons are not taxable for profit (income) tax purposes.

Interest income

If income is received from an Azerbaijani source, interests paid by a resident or a non-resident's PE, or on behalf of such establishment, shall be taxed at the source of payment at a rate of 10%.

Interests paid on credits (loans) and deposits (accounts) of resident-banks, including loan interests paid on financial leasing operations, are not taxable.

Foreign income

If a resident of Azerbaijan directly or indirectly holds more than 20% of shareholders' equity or possesses more than 20% of the voting shares of a foreign legal entity that, in turn, received income from a state with favourable taxation, then such income shall be included in the resident's taxable income.

A state with favourable taxation is considered a country in which the tax rate is two or more times lower than that determined under the Tax Code of Azerbaijan, or a country in which the laws on confidentiality of information about companies exist (which allow secrecy to be maintained concerning financial information, as well as the actual owner of property or receiver of income).

Deductions

All expenses connected with generating income, except for non-deductible expenses and expenses with limited deductibility, specifically defined by the law, are deductible from income.

Depreciation

Depreciation may be calculated at the following rates:

- Buildings and premises: up to 7%.
- Machines, equipment, and calculation appliances: up to 25%.

- Means of transportation: up to 25%.
- Working cattle: up to 20%.
- Expenses incurred for geological and exploration works, as well as for preparatory works for the production of natural resources: 25%.
- Intangible assets with an undetermined period of use: up to 10%. For those with a determined period of use, pro-rata amount as per the useful life, in years.
- Other fixed assets: up to 20%.

Goodwill

Azerbaijani tax legislation does not specify the definition of goodwill.

Start-up expenses

The cost of assets shall include expenses for their acquisition, production, construction, assembly, and installation, as well as other expenses that increase their value, with the exception of expenses for which the taxpayer is entitled to a deduction.

Interest expenses

Interest on loans received from overseas and/or from related parties may be deducted, limited to the interest rate on loans with similar currency and maturity at the interbank credit auction. In absence of such an auction, deductions for interest may not exceed rates of 125% of the interbank auction credit rates published by the Central Bank of Azerbaijan.

Bad debt

A taxpayer shall be entitled to a deduction for doubtful debts connected with goods, work, and services that have been realised where income from them was previously included in the gross income received from entrepreneurial activity. Doubtful debt deduction shall be allowed only if the debt is written off as worthless in the taxpayer's books.

Charitable contributions

Charitable contributions are non-deductible expenses in Azerbaijan.

Fines and penalties

No deduction is allowed for financial sanctions or interest calculated for delayed payment of taxes.

Taxes

Road, property, land, and mining taxes are deductible.

Other expenses deductible within certain limits

- The amount of repair expenses deductible each year is limited to the amount of the tax written down value of each category of fixed assets as of the end of the previous year. For buildings and premises, the limit is 2%; for machinery and equipment, the limit is 5%; and for other fixed assets, the limit is 3%. An amount exceeding these limits shall be taken as an increase of the residual balance value of the fixed assets in the appropriate category.
- Actual business trip expenses are deductible from income within the limits established by the Cabinet of Ministers.
- A legal entity engaged in insurance activities is entitled to deduct allocations to reserve insurance funds within the standards established by the legislation of Azerbaijan.
- Banks and credit entities engaged in certain types of banking activities shall be entitled to deduct from income the amounts assigned for establishment of special reserve funds, depending on the classification of assets in compliance with legislation and in accordance with procedures established by the relevant executive authority.

Azerbaijan

Non-deductible expenses

The following expenses are non-deductible:

- Capital expenses.
- Expenses connected with non-commercial activity.
- Entertainment and meal expenses, accommodation, and other expenses of a social nature incurred for employees.

Net operating losses

Taxable losses incurred by legal entities may be carried forward for five years to offset future taxable profit, without limitations. Carryback of losses is not possible.

Payments to foreign affiliates

Payment to charter capital in order to create an affiliate in a foreign country is not tax deductible and is instead treated as investment to subsidiary on the balance sheet.

Under local transfer pricing rules, payment for goods and services supplied by foreign affiliates is deductible up to the fair market price of such supplies.

Group taxation

Each taxpayer is liable to fulfil one's own tax liabilities. Azerbaijani tax legislation does not have the concept of 'group taxation'.

Transfer pricing

The Tax Code provides that relations between associated (interrelated) entities must be based on the arm's-length principle.

Interrelated persons, for the purposes of taxation, are natural and/or legal persons, relations between which might have direct effect on economic results of their activities or the activities of persons they represent.

Thin capitalisation

There is no concept of thin capitalisation in Azerbaijani tax law. However, the Tax Code provides that interest on loans received from overseas and/or from related parties may be deducted, limited to the interest rate on loans with similar currency and maturity at the interbank credit auction. In absence of such an auction, deductions for interest may not exceed rates of 125% of the interbank auction credit rates published by the Central Bank of Azerbaijan.

Controlled foreign companies (CFCs)

See the description of Foreign income in the Income determination section.

Tax credits and incentives

Foreign tax credit

Azerbaijani legal entities are taxed on worldwide profit; however, any tax paid overseas, up to the tax amount that would be calculated under Azeri law, will be allowed to offset the Azeri profits tax. The tax credit may not exceed the tax that would be imposed on such income in Azerbaijan. This credit applies only to residents of Azerbaijan.

Incentive for agricultural producers

Taxpayers producing agriculture products are exempt from profit tax, VAT, and property tax until the end of 2018.

Incentives for residents of industrial and technology parks

Businesses operating in industrial and technology parks are eligible for certain privileges and exemptions. The privileges include the following:

- Exemption for seven years from the date of registration in these parks from profit/income and property tax for resident legal entities and private entrepreneurs.
- VAT exemption for import of equipment for construction, scientific research works, and other activities in these parks for seven years or an indefinite period, depending on the nature of these activities.

The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities

The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities was adopted in April 2009 and will remain effective for 15 years. This law avails the following tax incentives to contractors and subcontractors (excluding foreign subcontractors without PE in Azerbaijan):

- Local companies are permitted to choose between (i) profit tax at a rate of 20% or (ii) 5% WHT on gross revenues.
- Foreign subcontractors are taxable only by a 5% WHT.
- A 0% VAT rate.
- Exemption from dividend WHT and taxation on branch's net profits.
- Exemption from customs duties and taxes.
- Exemptions from property tax and land tax.

In order to derive these benefits, the relevant taxpayer should obtain a special confirmation certificate from the Ministry of Industry and Energy.

The Law on Special Economic Zones (SEZs)

The companies operating in SEZs shall have the following tax benefits:

- A 0.5% tax levied on overall turnover from supplied goods, performed services, or works.
- A 0% VAT rate.
- Customs exemptions.

In order to operate in an SEZ, a special residency certificate is necessary. However, the following companies may not apply for this certificate:

- Companies producing or processing oil and gas.
- Companies producing alcoholic beverages and tobacco.
- Television or radio broadcasting companies.

As of April 2016, no SEZs have yet been established in Azerbaijan.

Incentive for the employment of disabled persons

The rate of profit tax levied on production enterprises belonging to community organisations for disabled persons, and involving at least 50% of disabled persons, shall be reduced by 50%.

In determining eligibility for these privileges, disabled persons substituting for permanent employees, contractors (i.e. who work under contractor agreements, civil legal contracts), or disabled persons till the age of 18 are not included in the average number of employees.

Azerbaijan

Withholding taxes

Income received from Azerbaijan sources not attributable to a PE of a non-resident in Azerbaijan is subject to WHT at the following rates:

- Dividends paid by resident enterprises: 10%.
- Interest paid by residents, PEs of non-residents, or on behalf of such PEs (except for interest paid to resident banks or to PEs of non-resident banks): 10%.
- Rental fees for movable and immovable property: 14%.
- Royalties: 14%.
- Leasing, risk insurance, or reinsurance payments: 4%.
- Telecommunications or international transport services: 6%.
- Other Azeri-source income: 10%.

If a resident enterprise or a PE of a non-resident receives interest, royalties, or rental fees taxable at the source of payment in Azerbaijan, it is entitled to consider the tax deducted from the source of payment, provided that the documents supporting the tax deduction are in place.

Tax treaties

The following chart contains the WHT rates that are applicable to dividend, interest, and royalty payments by Azerbaijan residents to non-residents under the tax treaties in force as of 1 January 2016. If the treaty rate is higher than the domestic rate, the latter is applicable.

Recipient	WHT (%)			
	Dividends		Interest (2)	Royalties (3)
	Individual companies	Qualifying companies (1)		
Non-treaty	10	10	10	14
Treaty:				
Austria	15	5/10	10	5/10
Belarus	15	15	10	10
Belgium	15	5/10	10	5/10
Bosnia and Herzegovina	10	10	0/10	10
Bulgaria	8	8	0/7	5/10
Canada	15	10	0/10	5/10
China (People's Republic)	10	10	10	10
Czech Republic	8	8	5/10	10
Estonia	10	5	10	10
Finland	10	5	0/10	5/10
France	10	10	10	5/10
Georgia	10	10	10	10
Germany	15	5	10	5/10
Greece	8	8	8	8
Hungary	8	8	0/8	8
Iran	10	10	10	10
Italy	10	10	10	5/10
Japan	15	15	10	10
Kazakhstan	10	10	10	10
Korea	7	7	10	5/10
Latvia	10	5	10	5/10
Lithuania	10	5	10	10
Luxembourg	10	5	10	5/10
Macedonia	8	8	0/8	8

Recipient	WHT (%)			
	Dividends		Interest (2)	Royalties (3)
	Individual companies	Qualifying companies (1)		
Moldova	15	8	10	10
Netherlands	10	5	0/10	5/10
Norway	15	10	10	10
Pakistan	10	10	10	10
Poland	10	10	10	10
Qatar	7	7	7	5
Romania	10	5	8	10
Russia	10	10	10	10
Saudi Arabia	7	5	7	10
Serbia	10	10	10	10
Slovenia	8	8	8	5/10
Switzerland	15	5	5/10	5/10
Tajikistan	10	10	10	10
Turkey	12	12	10	10
Ukraine	10	10	10	10
United Arab Emirates	10	10	7	5/10
United Kingdom	15	10	10	5/10
Uzbekistan	10	10	10	10
Vietnam	10	10	10	10

Notes

1. The lower dividend rate applies if the qualifying company meets certain criteria (e.g. participation and capital holding criteria).
2. The lower interest rate applies, *inter alia*, to interest paid by public bodies or to bank loans.
3. The lower royalty rate applies to royalties for patents, designs or models, plans, secret formulas or processes, computer software, know-how, etc.

More detailed information about applicability of lower rates may be found in respective DTIs.

Tax administration

Taxable period

The tax year in Azerbaijan is the calendar year.

Tax returns

Resident enterprises and PEs of non-residents must file profit tax returns for a calendar year by 31 March of the following year. During liquidation of a legal entity or a PE of a non-resident, the tax return should be submitted within 30 days after the adoption of a decree on liquidation.

A non-resident that has no PE in Azerbaijan and receives income subject to WHT (except for dividends and interest) may file a tax return with respect to such income and expenses, connected with the generation of the income, for purposes of reassessment of profit tax at the rate of 20%.

If a taxpayer applies for an extension of time to file the profit tax return prior to the expiration of the filing deadline and at the same time settles the full tax amount due, the filing deadline may be prolonged for up to three months. The prolongation of the terms for filing the return will not modify the terms of tax payment.

Azerbaijan

Legal entities and entrepreneurs that withhold tax at the source of payment are obligated to file the WHT report with the tax authorities within 20 days following the end of the quarter.

Payment of tax

Taxpayers must make advance quarterly tax payments of profit tax by the 15th day of the month following the end of the calendar quarter. Payments are determined either (i) as 25% of tax for the past fiscal year or (ii) by multiplying the amount of actual income through the quarter by a ratio of tax to gross income for the previous year.

The final payment of profit tax coincides with submission of the declaration of profit tax (i.e. 31 March).

Tax audit process

The ordinary on-site tax audit shall be conducted not more than once in a year. An extraordinary tax audit may be performed at any time under the following conditions:

- If tax return documents that are necessary for tax calculation and payment are not submitted in time or not submitted at all upon the warning of the tax authorities.
- If incorrect information is found in the report made on the results of tax inspection.
- When exceedingly paid amount of VAT, interest, and financial sanction is assigned for the payment of other taxes, interests, and financial sanctions or assigned as payments on future liabilities. In such cases, the out of turn tax audit can be conducted only on taxable VAT operations of the taxpayer.
- When application is submitted by the taxpayer to return exceedingly paid amounts of tax, interests, and financial sanctions.
- When the tax authorities obtain information from a known source on hiding (decreasing) of incomes or object of taxation by the taxpayer.
- When, in accordance with criminal legislation, there is a decision of the court or law-enforcement agency on implementation of a tax audit.
- In case of failure to provide the documents specified in the Tax Code.
- In the event of application for liquidation, reorganisation of the taxpayer legal entity, or seizure of business operations of the natural person operating without formation of a legal entity.

Statute of limitations

Tax authorities are entitled to calculate and recalculate taxes, penalties, and financial sanctions of the taxpayer within three years after termination of the taxable reporting period and to impose calculated (recalculated) sums of taxes, penalties, and financial sanctions within five years after termination of the taxable reporting period.

Topics of focus for tax authorities

The main issues challenged by the tax authorities during a tax audit include, but are not limited to, the following:

- Application of the 20% profit tax on 'deemed profit'.
- Application of benchmarking principle for income of foreign employees subject to tax in Azerbaijan.
- Correctness of claim of input VAT from budget and identification of operations taxable to VAT.
- Taxes withheld on payments to non-resident suppliers in cases where income of non-residents is considered as Azerbaijani-source income.
- Application of VAT on market price of assets that were written off, disposed free of charge, or at a discount rate.
- Challenging the transfer pricing.
- Grossed-up WHT paid at cost of the buyer disallowed for deduction.
- Deductibility of the head office costs.

Tax Partnership Agreements

Taxpayers may conclude a Tax Partnership Agreement with the tax authorities in order to minimise tax risks. Minimisation of tax risks is defined as mitigation and elimination of negative impacts on full or partial execution of duties of taxpayers on tax calculations.

Significant developments

In early 2016, in order to limit the budget deficit triggered by the drop in the oil price, the government significantly increased certain customs duties and levies (on items such as tobacco, alcohol, and hotel costs).

Taxes on corporate income

There are no taxes in Bahrain on income, sales, capital gains, or estates, with the exception, in limited circumstances, to businesses (local and foreign) that operate in the oil and gas sector or derive profits from the extraction or refinement of fossil fuels (defined as hydrocarbons) in Bahrain. For such companies, a tax rate of 46% is levied on net profits for each tax accounting period, irrespective of the residence of the taxpayer.

Corporate residence

Income Tax Law No. 22 of 1979 (which only applies to oil and gas businesses) does not define residence.

Other taxes

Value-added tax (VAT) and excise duty

There is currently no VAT or excise duty in Bahrain. However, a VAT system is under consideration at the Cooperation Council for the Arab states of the Gulf (GCC) level. The standard rate of VAT is expected to be 5%.

Customs duty

The general rate of customs duty is 5% of the value in cost, insurance, and freight (CIF), except for alcoholic beverages, which is 225%, and cigarettes, which is 200%.

Certain categories of goods, such as paper and aluminium products, are subject to 20% duty rate.

Stamp duty

Stamp duty applies to the transfer and/or registration of real estate only and is levied at a rate of 2%. In case of payment of the stamp duty within the two months following the transaction date, the rate of the stamp duty is reduced to 1.7%.

Registration and licence fees

Companies are subject to registration fees of 30 Bahraini dinar (BHD) and licence fees that vary according to the nature of their activity.

Payroll taxes**Social security contribution**

Employer's social security contribution is 12% for Bahraini workers and 3% for non-Bahraini workers, calculated on their monthly salaries.

Municipality taxes

There is a 10% municipality tax levied on the rental of commercial and residential property to expatriates.

Branch income

Profit from branch income is taxable in Bahrain at 46% if it is derived from activities in the oil and gas sector.

Income determination

There are no specific rules in Bahrain with respect to the calculation of specific items of income, such as inventory valuation, capital gains, dividend income, interest income, or foreign income. However, the income tax law requires that taxable profits be calculated using generally accepted accounting principles (GAAP).

Deductions

The law generally allows deductions for all costs associated with taxable activities in Bahrain, such as the cost of production, refinement, remuneration of employees associated with these taxable activities (including social insurance and pensions paid for the benefit of these employees), and other operational losses.

All reasonable and justifiable costs of production and exploration of products sold during the current taxable year are deductible for tax purposes, provided that these expenses have not been deducted elsewhere in calculating net taxable income.

Depreciation and depletion

Tax deductions may be claimed with respect to reasonable amounts for depreciation, obsolescence, exhaustion, and depletion incurred during the taxable year for properties used by the taxpayer in a trade or business from which income, taxable under the income tax law, is derived. Generally, such amounts may be claimed on a straight-line basis over the estimated remaining useful life of the properties, unless otherwise approved by the Minister of Finance.

Taxes

All taxes and duties not imposed by the Bahrain income tax law, including customs duties, may be deducted from taxable income as stipulated in Bahrain's income tax law.

Net operating losses

Unutilised losses may be carried forward and deducted up to an amount equivalent to the net income in future years as defined by the Bahrain income tax law. Carryback of losses is not permitted.

Payments to foreign affiliates

There are no specific restrictions in the income tax law pertaining to payments made to foreign affiliates.

Bahrain

Group taxation

There is no legislation or mechanism for group relief or the taxation of group activities in Bahrain. Additionally, there is currently no specific legislation regarding transfer pricing or thin capitalisation in Bahrain.

Tax credits and incentives

There are no tax incentives in Bahrain. There is also currently no legislation regarding foreign tax relief in Bahrain.

Withholding taxes

There are no withholding taxes (WHTs) on the payment of dividends, interest, or royalties in Bahrain.

Tax treaties

Bahrain has double tax treaties (DTTs) in force with various countries, including Algeria, Austria, Barbados, Belarus, Belgium, Bermuda, Brunei, Bulgaria, China, Cyprus, Czech Republic, Egypt, Estonia, France, Georgia, Hungary, Iran, Ireland, Isle of Man, Jordan, Republic of Korea, Lebanon, Luxembourg, Malaysia, Malta, Mexico, Morocco, the Netherlands, Pakistan, Philippines, Seychelles, Singapore, Sri Lanka, Sudan, Syria, Tajikistan, Thailand, Turkey, Turkmenistan, the United Kingdom, Uzbekistan, and Yemen.

Tax administration

Taxable period

A company's accounting period should normally follow the (Gregorian) calendar year (i.e. 1 January to 31 December).

Tax returns

The law is silent on the due date for the filing of the final income tax statement. However, an estimated income tax statement must be submitted on or before the 15th day of the third month of the taxable year. Where applicable, a taxpayer may also be required to file an amended estimated income tax statement quarterly thereafter, unless a final income tax statement has been provided.

Approved accountants must prepare a certified tax return for the return to be acceptable to the authorities.

Payment of tax

Taxes (based on the initial estimated tax statement filed) are payable in 12 equal monthly instalments. Payments are due starting on the 15th day of the fourth month of the taxable year. Income tax as per the subsequent amended estimated income tax statements or the final income tax statement will form the basis of tax payments for the remainder of the 12 monthly instalments that are yet to be paid. The final payment is due on the 15th day of the third month after the end of the taxable year or the date the final income tax statement is filed, whichever is later.

Any excess income tax paid will be credited and used in the first invoice for income tax following the establishment of the credit by the Minister.

Statute of limitations

The Income Tax Law No. 22 of 1979 does not specify any statute of limitations.

Other issues***Intergovernmental agreements (IGAs)***

The United States and Bahrain reached an agreement in substance in relation to a Foreign Account Tax Compliance Act (FATCA) Model 1 IGA. The text of the IGA has not been released.

Significant developments

There have been a number of recent changes that are effective from income year 2015.

The additional tax deduction of 150% or 120% on expenditure incurred for certain contributions and investments has been removed, including the following:

- Research and development (R&D) allowance.
- Market development allowance for the tourism industry.
- Tourism development allowance.

Group loss relief will no longer be permitted, and losses may only be carried forward for seven years instead of nine years.

Effective 1 September 2015, value-added tax (VAT) will be charged on the supply of a number of food items previously listed as zero-rated in the First Schedule. In addition, all betting and gaming services and supplies previously exempt will be subject to VAT at the standard rate of 17.5%.

Effective 1 January 2016, the VAT registration threshold requirement has increased from 80,000 Barbados dollars (BBD) to BBD 200,000. While the legislation to affect this increase has not yet been enacted, it has been implemented administratively by the revenue authorities from 1 January 2016.

The municipal solid waste tax has been repealed for income year 2015; however, land tax rates have increased effective fiscal year 2015/16.

The Barbados/Italy double taxation agreement (DTA) was signed on 24 August 2015. Barbados is working on its ratification procedures.

The Barbados/Slovakia DTA was signed on 28 October 2015, and both countries are working on the ratification procedures.

Taxes on corporate income

Companies resident in Barbados are taxed on income earned from all sources, whether generated within or outside of Barbados, less expenses incurred for the purpose of producing assessable income in a fiscal period not to exceed 53 weeks. Non-resident companies are generally only taxed on income derived from sources and operations conducted within Barbados.

Corporate income tax (CIT) rates

The following rates apply to taxes on corporate income:

Type of entity	CIT rate (%)
Regular companies	25
Small companies (1)	15
Manufacturing companies (2)	15
Approved developers in special development areas	15
International business companies, international banks, and international societies with restricted liability	0.25 to 2.5
Life insurance companies (computed on gross investment income)	5
Companies engaged in the construction of houses (3)	15
Exempt insurance companies (4)	0
Residential rent	15

Notes

1. This concessionary tax rate is available to any small company as defined in the Small Business Development Act.
2. This concessionary tax rate is available only to companies registered as manufacturers with the Barbados Customs & Excise Department.
3. Selling price of the houses must be less than BBD 400,000, including the house and land.
4. The exemption is available for a period of 15 years.

Corporate residence

A corporation is deemed to be resident in Barbados if its management and control is exercised in Barbados.

Permanent establishment (PE)

The concept of a PE is described within a number of Barbados's DTAs. A PE is, in general, created in line with the Organisation for Economic Co-operation and Development (OECD) Model Convention.

Under domestic legislation, a non-resident person is deemed to have been carrying on business in Barbados, and hence required to file a CIT return, where in an income year such a non-resident person:

- produced, grew, mined, created, manufactured, fabricated, improved, packed, preserved, or constructed, in whole or in part, anything in Barbados, whether or not they exported that thing without settling it prior to exportation, or
- solicited orders or offered anything for sale in Barbados through a factor, agent, or servant, whether the contract or transaction was to be completed inside or outside Barbados or partly in and outside Barbados.

In either of the circumstances mentioned above, the non-resident shall be deemed to have been carrying on business in Barbados in that income year and the income of that business shall be deemed to be income derived from Barbados for that income year.

Other taxes

Value-added tax (VAT)

VAT is levied at the rate of 17.5% on the value of a wide range of goods and services imported or supplied in Barbados by VAT-registered persons.

A number of services, including financial services, real estate, medical services, and education, are exempt. Intergroup transactions are taxable.

Barbados

Persons operating under Barbados' VAT regime must be registered for VAT. Effective 1 January 2016, the threshold for VAT registration is BBD 200,000 (previously BBD 80,000), but voluntary registration is permitted for persons whose annual turnover is less than BBD 200,000 (previously BBD 80,000).

Certain supplies are zero-rated, including exports, basic food items, prescription drugs, crude oil, and the supply of certain items to the international financial services sector (e.g. legal and accounting fees). There is a concessionary rate of 7.5% applicable to the supply of accommodation by guest houses, hotels, inns, or any similar place, including a dwelling house normally let or rented for use as a vacation or holiday home. This rate also applies to supplies of certain goods and services related to tourism, provided that the registrant satisfies certain criteria.

Registered persons may deduct input tax from their output tax in calculating the tax payable for that VAT accounting period. Where input tax exceeds output tax, the registrant will be entitled to a refund of VAT.

Customs duties

Customs duty is levied on a wide range of imported goods at rates specified in Part 1 of the First Schedule of the Customs Act. Barbados' Customs Tariff is based on the Common External Tariff of the Caribbean Common Market (CARICOM), with special derogations for certain items (e.g. spirituous beverages). Customs duty is calculated on either an *ad valorem* basis or at specific quantitative rates. The *ad valorem* rates for most items vary between 0% and 20%, but certain goods regarded as luxury items are subject to higher rates (e.g. jewellery 60%). In addition, a select group of items that are produced within Barbados and CARICOM (including some agricultural products) are subject to a duty rate of 60% when imported from outside the region.

Manufacturers and agriculturists, including persons involved in fishing and horticulture, are exempt from the payment of duty on inputs (including packaging materials, machinery, equipment, and spares) imported for use in their businesses.

The various departments and institutions, international bodies, and organisations listed in Part II-B of the Customs Tariff are exempt from the payment of customs duty. Specific goods (e.g. computers), also mentioned in Part II-B, are exempt from customs duty.

Excise taxes

Four categories of goods (both locally manufactured, as well as imported) are subject to excise taxes. These are motor vehicles, spirituous beverages, tobacco products, and petroleum products. Most excisable goods are subject to the tax at a specific rate, with the exception of motor vehicles, which are subject to *ad valorem* rates. Effective 1 August 2015, a 10% excise tax before VAT is levied on sweetened beverages.

A few persons and goods are exempt from excise taxes. These include motor vehicles imported by the diplomatic corps and other organisations exempt from customs duty under Part II-B of the Customs Tariff, goods imported for temporary use or for a temporary purpose that will be re-exported within three months, and goods (other than spirits) intended to be used as raw materials for the manufacture or production in Barbados of other taxable goods.

Land tax

The following land tax rates are in effect as of tax year 2015/16:

Land	Land tax rate
On the improved value of each parcel of land on which there is a dwelling house that is used exclusively for residential purposes:	
On first BBD 150,000	0

Land	Land tax rate
On amounts between BBD 150,000 and BBD 450,000	0.10% of the improved value
On amounts between BBD 450,000 and BBD 1,000,000	0.45% of the improved value
On amounts exceeding BBD 1,000,000	0.75% of the improved value
On the improved value of each parcel of land on which there is a building other than a residence	0.70% of the improved value
On the site value of each parcel of unimproved land	0.80% of the site value

The following concessions have been granted for land taxes:

- A tax cap of BBD 60,000 has been placed on residential property.
- For villas, as defined by the Tourism Development Act, a rebate of 25% is granted on production of a certificate from the Barbados Tourism Authority.
- For hotels, as defined by the Tourism Development Act, land tax is calculated and payable on only 50% of the tax demanded.
- For pensioners exclusively occupying their own homes, land tax is calculated and payable on only 40% of the tax demanded.
- A 10% discount is granted if the land tax is paid within 30 days from the date of the tax demand notice or 5% if paid within 60 days. Hotels and restaurants are allowed to pay their land tax bills during January to March without losing access to the discount granted.
- Any person certified by the Minister Responsible for Energy to be engaged in the production of solar energy and/or the manufacture of goods to be used in the production of solar energy will be entitled to a rebate of no more than 50% of the tax demanded for that year. Such persons are required to have settled all outstanding liabilities with the Comptroller of Customs and the Commissioner of Inland Revenue to access the rebates.

Property transfer taxes

Property transfer taxes are levied as set out in the following table:

Property	Transfer tax rate
Shares of companies listed on the Barbados Stock Exchange	Exempt
Shares of private companies *	2.5% of value or amount of gross consideration above BBD 50,000
Land with a building	2.5% of value or amount of gross consideration above BBD 150,000
Land with no building	2.5% of value or amount of gross consideration
Leases of 25 years or more or short-term leases that are continuously renewed for a period equal to 25 years or more	2.5% of value or amount of gross consideration

* Any transfer of shares to a person who is resident outside of Barbados, whether or not the transferor is resident in Barbados, where the assets of the company concerned consists of foreign assets and its income is derived solely from sources outside Barbados, will not be subject to transfer taxes in Barbados.

Land development duty

Where a person disposes of property situated in a specially designated development area within 15 years of the date specified by statute, duty may be charged. This may be at rates of up to 50% on the excess of the value of the consideration over the improved value at the specified base date, plus certain other expenses and an amount representing capital appreciation of the property.

Barbados

Stamp duty

Barbados imposes a stamp duty on various instruments, including written documents. The rates imposed vary depending on the document. Stamp duties applicable to documents for the transfer of shares, real estate, and mortgages are set out below:

Instruments	Stamp duty rate
On sale of shares of companies listed on the Barbados Stock Exchange	Exempt
On sale of real estate, leases, and shares in private companies *	BBD 10 per BBD 1,000 or part thereof
On mortgages	BBD 3 on each BBD 500 or part thereof

* Any transfer of shares to a person who is resident outside of Barbados, whether or not the transferor is resident in Barbados, where the assets of the company concerned consists of foreign assets and its income is derived solely from sources outside Barbados, will not be subject to transfer taxes in Barbados.

Tax on assets

The tax on assets provides for the imposition of taxes on the assets of:

- a deposit taking licensee under Part III of the Financial Institution Act, Cap. 324A
- a credit union, or
- an insurance company.

The tax is charged on the average domestic assets at a rate of 0.20% *per annum*.

Banks tax on assets

The banks tax on assets is charged on the average domestic assets of a bank at a rate payable of 0.20% *per annum* and pro-rated and paid every three months.

Life insurance premium tax

In addition to the CIT computed on the gross investment income of life insurance companies, a life insurance premium tax is levied on gross direct premium income earned by resident and foreign life insurance companies as set out in the following table:

	Resident life insurance companies (%)	Foreign life insurance companies (%)
New business written for the income year	6	6
Renewal business	3	5

General insurance premium tax

In addition to the CIT computed on the taxable profits of general insurance companies, a general insurance premium tax is levied on gross direct premium income at a rate of 4.75% in respect of property insurance business and 4% for other general insurance business.

Payroll taxes

Other than employers' National Insurance contributions (*see below*), there are no other payroll taxes, the burden of which falls on the employer. Employers are, however, responsible for deducting the employees' income tax liability at source, through the pay-as-you-earn (PAYE) system.

National Insurance contributions

Every individual between the ages of 16 and 65, who is gainfully employed in Barbados under a contract of service, must be insured under the National Insurance and Social Security Act.

Contributions are determined as a percentage of insurable earnings, up to a maximum of insurable earnings of BBD 4,360 per month or BBD 1,006 per week. Employers must remit National Insurance contributions by the 15th day of the following month. The employee's share is 10.1%, with the employer paying 11.25%.

Branch income

Branches are taxed on the same basis as corporations. In addition, a 10% withholding tax (WHT) is imposed on the transfer or deemed transfer to the head office of the after-tax profits that are not reinvested in Barbados, unless a DTA overrides this.

Income determination

Inventory valuation

Inventory is generally stated at the lower of cost and net realisable value. First in first out (FIFO) or average values are generally used for book and tax purposes. Last in first out (LIFO) is not acceptable for tax purposes. The Barbados Revenue Authority will normally accept a method of valuation that conforms to standard accounting practice in the trade. Conformity between book and tax values is expected.

Capital gains

Capital gains are not taxed in Barbados.

Dividend income

Dividends between two companies resident in Barbados are not taxed in the hands of the recipient. Dividends received by a resident Barbados company from a non-resident entity where the equity interest owned is at least 10% of the non-resident company and the shareholding is not held solely for the purpose of portfolio investments are not subject to tax.

Dividends paid by a regular business company to a non-resident shareholder are no longer subject to WHT when the amount paid as dividends is derived from income earned from sources outside of Barbados.

Interest income

Amounts received on account of, in lieu of, or in satisfaction of interest are included in the calculation of assessable income. In certain instances (to the extent specified by regulation) certain types of interest may be exempt from inclusion into the calculation of assessable income, including interest on bonds, debentures, or stock of the government of Barbados that is beneficially owned by a non-resident; interest on tax reserve and tax refund certificates; and interest on holdings (within certain limits) of National Development Bonds, National Housing Bonds, Savings Bonds, and Sugar Industry Bonds classified as non-taxable bonds, as well as interest income from some CARICOM countries.

Partnership income

Amounts received from a partnership or syndicate for the income year, regardless of whether or not these amounts were withdrawn during the income year, are included in the calculation of assessable income.

Foreign income

A Barbados corporation is taxed on foreign branch income as earned. Double taxation is avoided by means of foreign tax credits or an exemption where DTAs exist.

Barbados

Deductions

Business expenses that are reasonable and incurred for the purpose of producing assessable income are deductible for tax purposes unless disallowed by a specific provision of the Income Tax Act. Deduction of capital expenditures is specifically prohibited, but special provisions may allow tax depreciation on these expenditures.

Depreciation

Depreciation for tax purposes is computed on a straight-line basis at prescribed rates. The process is accelerated by additional initial allowances in the year of acquisition. Conformity between book and tax depreciation is not required. Gains on sales of depreciable assets are taxable as ordinary income up to the amount of tax depreciation recaptured, and losses on sales below depreciated value are deductible.

Capital allowance

Capital allowance	Rate
Initial allowance:	
Plant and machinery	20%
Industrial buildings	40%
Annual allowance:	
Plant and machinery	Various rates
Industrial buildings	4%
Intellectual property	10% of 50% of the amount expended
Investment allowance * (an incentive allowance limited by statute to entities operating in certain industries, claimed in lieu of initial allowances):	
Basic industry **	20%
Businesses or persons entitled to export allowance for exports outside of CARICOM countries	40%
Businesses engaged in the manufacture and refining of sugar	40%
Businesses engaged in the manufacture of clay and limestone products	40%

* This allowance is not deducted from the cost of the asset in calculating tax written down value.

** As prescribed by the regulations to the Barbados Income Tax Act.

Manufacturing allowance

Companies involved in the manufacturing sector are granted an additional 50% of the annual allowance claimed in an income year. Such companies are also often able to claim investment allowances.

Renewable energy allowance

Companies that have had an energy audit, retrofitted a building, or installed a system to provide electricity from sources other than fossil fuels are granted an additional 50% of the annual allowance claimed in an income year.

Commercial building allowance

A deduction is available in respect of a commercial building. For each income year, the available allowance is calculated at 1% of the land tax improved value, or 10% of the land tax improved value if the building is registered with the National Trust.

Depletion

For oil and gas companies, depending on certain circumstances, a depletion allowance of 20% or 10% is given in addition to annual depreciation on prescribed types of capital expenditure.

Goodwill

Goodwill is not a depreciating asset, and tax amortisation is not available.

Start-up expenses

There are no specific provisions in relation to deductions for start-up expenses. However, some of these are treated as costs incurred on account of capital expenditure. Such costs are therefore not allowable deductions for tax purposes.

Interest expenses

A Barbados corporation can claim a deduction for interest expenses. However, where interest claimed as a deduction has not been paid within two years of being accrued (one year if on a loan from a related party), it should be added back to assessable income.

Bad debts

Amounts representing debts owed that have been established as bad debts during the income year and have been previously included in calculating assessable income for that income year or a previous income year are deductible in calculating assessable income.

Charitable contributions

Charitable contributions are generally deductible where they are made to entities that are specifically registered as charities or not-for-profit organisations with the Corporate Affairs and Intellectual Property Office.

Pension expenses

Contributions made by companies under registered pension schemes are deductible in calculating assessable income.

Fines and penalties

Fines and penalties imposed are generally not deductible.

Taxes

Taxes on income are not deductible.

Net operating losses

From income year 2015, losses can generally be carried forward for seven years (previously nine years) after the income year in which they are incurred and may be applied in full against future taxable profits. Notwithstanding this, a tax loss incurred by a person in respect of residential property can only be deducted against assessable income earned by that person in respect of residential property.

Losses of general insurance companies can only be carried forward for five years, and losses of life insurance companies cannot be carried forward at all.

No carryback is allowed for CIT losses.

Payments to foreign affiliates

A Barbados corporation can claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided that payments are no greater than what it would pay to an unrelated party.

Group taxation

With effect from income year 2015, trading losses incurred during an income year of a surrendering company may not be set off wholly or partially against the profits of a claimant company.

Barbados

Transfer pricing

Although Barbados has no specific transfer pricing legislation or regulations in place, the Income Tax Act contains a section dealing with artificial transactions. This enables the revenue authorities to amend the assessable income of a person where they believe the main purpose of a non-arm's-length transaction is to artificially reduce that person's assessable income.

In such circumstances, the transaction is disregarded or modified to achieve the effect that no longer results in the artificial reduction of that person's assessable income.

Thin capitalisation

Barbados does not have tax provisions relevant to thin capitalisation.

Controlled foreign companies (CFCs)

Barbados does not have tax provisions relevant to CFCs.

Tax credits and incentives

Foreign tax credit

Barbados allows a credit for foreign taxes (taxes paid in jurisdictions outside Barbados). The credit should not exceed the Barbados tax attributable to the income derived outside Barbados.

Agricultural cash rebate

The following rebates may be claimed on agricultural or agro-processing machinery or plants that are new or imported onto the island for the first time:

- Sugar cane harvesters: 10% or 15%.
- Other: 18%.

Export allowance

There is a rebate of tax under the Income Tax Act in respect of income from export sales outside CARICOM. The maximum tax credit on eligible sales is 93%, which is available where eligible sales exceed 81% of total sales.

Exempt Insurance Act

The Exempt Insurance Act is applicable to companies in Barbados that insure risks and earn premiums outside the island and for companies that own or manage the former. Under the Act, all three types of companies are exempt from exchange control regulations.

In lieu of standard CIT rates, exempt insurance companies are subject to tax at the rate of 0% for the first 15 years; thereafter, the rate is 8% on the first BBD 250,000 of taxable income and 0% on taxable income in excess of BBD 250,000. No WHT is levied on remittances of dividends or interest.

Exempt insurance companies are subject to an annual licence fee of BBD 20,000 for the first 15 years.

Fiscal Incentives Act

The Fiscal Incentives Act provides to manufacturers of an 'approved product' a full exemption from taxes and duties for varying periods, up to a maximum of 15 years.

Foreign currency earnings credit

Persons carrying on business in Barbados may claim a tax credit of up to 93% of CIT on net profits from foreign currency earnings derived from construction projects or

professional services undertaken outside of CARICOM, international insurance business, or services provided to the international business sector.

Employment tax credit

Where a person carries on business in an income year and during that income year or any of the following two consecutive income years:

- there is an increase in profits directly attributable to the business
- there is an increase in the number of employees who are employed directly in the operations of the business by an amount of at least 10% of the total workforce employed during the previous year, and
- the increase in the number of employees referred to is maintained for a period of three years,

that person is entitled to a tax credit of 10% of the actual amount of the expenditure incurred in respect of wages for the increase in employees.

The credit is applied in the year in which persons meet the above mentioned criteria. Any unused credit can be carried forward for three years from the end of the income year in which the credit was obtained, and no cash refund shall be allowed.

Productivity and innovation tax credit

Entities incurring expenditure that is innovative in nature and leading to the development of a new manufacturing process, product, service, or organisational procedure will be granted a tax credit of 25% of the amount expended in that income year. The credit will only be granted if the innovation was successfully introduced to the market as evidenced by increases in sales, productivity, or organisational efficiency.

Any unused tax credit shall be carried forward for a maximum of three years from the end of the income year in which the credit was obtained, but no cash refund will be allowed. Certification from the Executive Director of the National Productivity Council is required.

Renewable energy

A number of tax concessions have been enacted with respect to the conservation of energy. These measures include a 150% deduction of actual expenditure, not exceeding BBD 25,000, for each year for five years in respect of the following:

- Energy audits.
- 50% of the cost of retrofitting premises or installing systems to produce electricity from sources other than fossil fuels.

The business must be current in the payment of its CIT, VAT, land tax, and National Insurance contributions, or, where not current, has entered into an agreement with the respective authorities to settle outstanding arrears.

Further tax concessions have been enacted with respect to the generation and sale of electricity from renewable energy sources and installation and sale of renewable energy electricity systems or energy efficient products, including:

- An income tax holiday of ten years granted on the certificate of the Minister Responsible for Energy to a developer, manufacturer, or installer of renewable energy systems and energy efficient products.
- 150% deduction of interest on a loan in respect of the construction of a new or the upgrading of an existing property to generate, supply, or sell electricity from renewable energy or for the installation or supply of renewable energy systems or energy efficient products.

Barbados

- 150% deduction for a period of ten years commencing from income year 2012 of the amount expended on staff training relating to generation and sale of electricity from a renewable energy source or installation and servicing of renewable energy electricity systems or energy efficient products.
- 150% deduction of expenditure on the marketing of products for the generation and sale of electricity from a renewable energy source or products related to the installation and servicing of renewable energy electricity systems or energy efficient products.
- 150% deduction of expenditure on product development and research related to the generation and sale of electricity from a renewable energy source or the installation and servicing of renewable energy electricity systems or energy efficient products.
- Exemption from the payment of CIT by a venture capital fund invested in the renewable energy and energy efficient sectors for a period of ten years commencing from income year 2012.
- Deduction of contributions to a venture capital fund invested in the renewable energy and energy efficient sectors for a period of ten years commencing from income year 2012.
- Exemption from the payment of WHT on dividends earned by shareholders of companies solely engaged in the installation or supply of renewable energy electricity systems or energy efficient products for a period of ten years commencing from income year 2012.
- Exemption from the payment of tax on interest earned by financial institutions for financing the development, manufacturing, and installation of renewable energy systems and energy efficient products for a period of ten years commencing from income year 2012.

Housing Incentives Act

The Housing Incentives Act provides CIT, import duty, WHT, and other concessions to developers who undertake low income housing projects. Approved developers are subject to CIT at a rate of 15%.

International Business Companies (IBCs) Act

IBCs resident in Barbados but deriving income solely from sources outside Barbados are taxed at the following rates:

Taxable income (BBD)	Rate (%)
Up to 10 million	2.50
10 million to 20 million	2.00
20 million to 30 million	1.50
In excess of 30 million	0.25

Freedom from exchange controls is granted to IBCs, as well as duty-free concessions on certain imports. No WHT is levied on remittances of dividends, royalties, interest, management fees, fees, or other income paid by IBCs to persons outside Barbados. IBCs may also claim a credit for taxes paid outside Barbados, provided that this does not reduce the company's rate of CIT in Barbados to less than 0.25%.

IBCs are subject to an annual licence fee of BBD 850.

International Financial Services Act (IFSA)

The IFSA provides for the establishment of international banking, trust administration, and other related or ancillary services by eligible companies incorporated in Barbados or branches of qualified foreign banks. An annual licence fee of BBD 100,000 is payable by IFSA licensees who are in the business of receiving foreign money deposits, while IFSA licensees who are not involved in deposit taking financial services are required to pay BBD 50,000.

International financial service entities are exempt from exchange controls and are granted duty-free concessions on certain imports.

Profits and gains are taxed at the same rates as for IBCs. No WHTs are levied on remittances of dividends, interest, or fees. International financial service entities may also claim a credit for taxes paid outside Barbados, provided that this does not reduce the entity's rate of CIT in Barbados to less than 0.25%.

International Trusts Act

The International Trusts Act is aimed at facilitating the use of Barbados trusts for purposes previously made possible in many tax-free financial centres. An international trust is taxed in Barbados as an individual that is resident but not domiciled in Barbados. This allows the trust to take advantage of a network of tax treaties while not subjecting its foreign earnings to Barbados tax unless they are remitted there. The Act exempts trusts from exchange control and WHT requirements. No registration is required.

Shipping (Incentives) Act

The Shipping (Incentives) Act was enacted to encourage the development of Barbados' shipping activities by granting CIT, import duty, WHT, and other concessions to approved shipping companies for a period of ten years.

Small Business Development Act

Companies incorporated under the Companies Act with at least 75% of their shares owned locally and having share capital of not more than BBD 1 million, annual sales not in excess of BBD 2 million, and not more than 25 employees may obtain approval as a small business. Such companies pay CIT at a reduced rate of 15% and are exempt from the payment of import duties on equipment imported for use in the business and from stamp duty in some instances. In addition, 120% of certain expenditures directly related to the development of the business are deductible for tax purposes. Investors in such businesses are exempt from WHT on interest and dividends earned on their investment.

Societies with Restricted Liability (SRL) Act

An SRL is a hybrid entity that can be recognised as a corporation or partnership in certain jurisdictions, depending on the nature of its organisational documents. The entity has limited liability, and membership units are known as quotas. Societies qualifying under this Act may apply for a licence to operate as international SRLs and, as such, are taxed at the same rates as IBCs. No WHT is levied on any distributions, interest, or other income paid by an international SRL to non-residents. International SRLs are granted duty-free concessions on certain imports, and no exchange control requirements are applicable. Entity mobility is also a prominent feature of this legislation. Qualifying societies organised overseas can be continued into Barbados under the Act.

Special Development Areas Act

The Special Development Areas Act provides relief for approved developers constructing or improving a building or structure in certain defined locations in Barbados and to persons financing such work (other than a commercial bank). Persons financing such work are exempt from income tax on interest received. Approved developers are exempt from import duties and VAT on inputs for the construction or renovation of buildings, WHTs on repatriation of interest (for a period of 15 years), land tax, and property transfer tax payable by vendors on the initial purchase of the company. An approved developer pays CIT at the rate of 15% and is granted initial and annual allowances on industrial buildings of 40% and 6%, respectively, and on commercial buildings of 20% and 4%, respectively.

Qualifying insurance companies

Companies registered under the Insurance Act that derive at least 90% of their premiums from sources outside of CARICOM and at least 90% of whose risks originate outside of CARICOM may obtain a certificate of qualification. Such companies are

Barbados

entitled to the same exemptions from WHTs and exchange controls as exempt insurance companies. They are also entitled to the foreign currency earnings credit, which may reduce their CIT rate from 25% to 1.75% for general insurance business. The rate of tax on gross investment income applicable to life insurers may fall from 5% to 0.35%.

Tourism Development Act

The Tourism Development Act provides that a qualifying owner of a tourism project or of a completed tourism product may offset expenditures on construction or the provision of certain amenities against its profits.

A tourism project includes the following:

- The construction of a new hotel.
- The alteration or renovation of an existing hotel.
- The conversion of an existing building or buildings into a hotel by reconstruction, extension, alteration, renovation, or remodelling.
- The furnishing and equipping of a building to be utilised as a hotel.
- The provision of tourist recreational facilities and tourism related services.
- The construction and equipping of a new restaurant.
- The alteration or renovation of an existing restaurant.
- The construction of a new attraction or the alteration or renovation of an existing attraction.
- The restoration, preservation, and conservation of natural sites.
- The establishment, restoration, preservation, and conservation of monuments, museums, and other historical structures and sites.
- The construction and furnishing of villas.
- The construction and furnishing of timeshare properties.
- The addition to a tourism product of any facilities or services intended to increase or improve the amenities that the tourism product provides.

Concessions extend to the following:

- The importation of building materials and supplies without payment of customs duty and an exemption from the payment of customs duties on specified supplies to be used for equipping the project.
- A refund of customs duty (including VAT) where the holder of a permit can satisfy the Comptroller of Customs that the building materials and supplies purchased for a tourism product have been purchased in Barbados, or in the case of importation that the customs duty was paid by the holder of the permit.
- Income tax concessions with respect to the write-off of interest, accelerated deduction of expenditure, interest rate subsidy, equity financing, training, and marketing.
- The set off of approved capital expenditures against revenues for a period of 15 years by the owner of a qualifying tourism project (except restaurants), which has a project with a value of up to BBD 200 million. Hotels with capital expenditure over BBD 200 million are allowed one additional year to write off expenditure for each additional BBD 20 million expended, up to a maximum of 20 years.

Withholding taxes

WHTs are levied as follows:

Recipient	WHT (%)			Management fees
	Dividends	Interest	Royalties	
Residents	12.5	12.5 (25)	-	-

Notes

1. The rate is 0% if dividends are paid out of income earned from sources outside of Barbados.
2. The rate is 15% for portfolio dividends; 5% for holdings of at least 10%.
3. Taxable only in the state in which the beneficial owner is resident.
4. The rate is 12% for portfolio dividends; 5% for holdings of at least 25%.
5. The rate applies provided that the interest is subject to tax in the other territory.
6. The rate applies provided that the royalties are subject to tax in the other territory.
7. The rate is 10% for portfolio dividends; 5% for holdings of at least 25%.
8. The rate is 15% for portfolio dividends; 5% for holdings of at least 25%.
9. 5% of the gross royalties on any literary, artistic, or scientific work, including films or television broadcasting, and 10% on any patent, trademark, commercial, or scientific equipment, among others.
10. The rate is 7.5% for portfolio dividends; 5% for holdings of at least 10%.

Barbados

11. The rate is 7.5% of the gross amount; 5% if the beneficial owner is a bank.
12. The rate is 15% for portfolio dividends; 0% for holdings of at least 10%, held for at least 12 uninterrupted months prior to dividend distribution.
13. The rate is 15% for portfolio dividends; 5% for holdings of at least 5%.
14. The rate is 10% for portfolio dividends; 5% for holdings of at least 10%.
15. The rate is 15% for portfolio dividends; 0% for holdings of at least 10%.
16. The rate is 75% of the statutory nominal rate at the time of distribution; 5% for companies with holdings of at least 25%.
17. 0% if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months prior to the decision to distribute the dividends.
18. The rate is 5% for portfolio dividends; 0% for holdings of at least 25%.
19. Agreement extended to Barbados by virtue of the agreement between Switzerland and the United Kingdom, on payments to non-residents from Barbados.
20. Dividends are only taxable in the state in which the beneficial owner is resident. The rate of 15% applies to dividends paid out of income from immovable property by an investment vehicle that distributes most of this income annually and whose income is exempt from tax, other than where the beneficial owner is a pension scheme.
21. The rate is 15% for portfolio dividends; 5% for holdings of at least 10%. Dividends paid by a regulated investment company will bear WHT at a rate of 15%, regardless of the percentage of shares held by the recipient. Dividends paid by a real estate investment trust (REIT) will qualify for the 5% WHT rate only if the beneficial owner is an individual holding less than 10% of the shares in the REIT, otherwise, a 30% WHT rate will apply.
22. The rate is 10% for portfolio dividends; 5% for holdings of at least 5%.
23. The rate is 15% generally; 5% if the recipient is a bank.
24. International business companies (IBCs), international societies with restricted liability (ISRLs), exempt insurance companies (EICs), and qualifying insurance companies (QICs) are exempt from WHTs on payments to non-resident persons or international business entities. Specific legislation applies.
25. The rate is 0% for pensioners aged 60 years and over.

Tax administration

Taxable period

CIT returns are prepared on a fiscal-year basis.

Tax returns

Companies with fiscal years ending between 1 January and 30 September (both dates inclusive) are required to file a CIT return on or before 15 March in the year following the end of the fiscal period. Companies with fiscal years ending any time between 1 October and 31 December (both dates inclusive) are required to file a CIT return on or before 15 June in the year following the end of the fiscal period.

The Department of Inland Revenue has instituted an online filing system, which is optional.

Payment of tax

Companies with fiscal years ending between 1 January and 30 September (both dates inclusive) are required to make an instalment of CIT for the income year in which the fiscal period ends on or before 15 September of that year. The instalment is 50% of the net CIT payable for the preceding income year. The remainder of CIT due (if any) must be paid on filing of the CIT return by 15 March of the following year.

Companies with fiscal years ending between 1 October and 31 December (both dates inclusive) are required to make two instalments of CIT for the income year in which the fiscal period ends on or before 15 December of that year and 15 March of the following year. The instalments are each 50% of the net CIT payable for the preceding income year. The remainder of CIT due (if any) must be paid on filing of the CIT return by 15 June of the following year.

It is possible to apply for a reduction or waiver in the instalments if lower profits are anticipated in the current year when compared with those of the preceding year.

Penalties

The penalties and interest for failing to file a return on time and pay the CIT due are as follows:

- Penalty for failing to file a CIT return by the due date is BBD 500 plus 5% of the tax assessed at the due date.
- Penalty for failing to pay CIT by the due date is 5% of the tax assessed and unpaid at the due date.
- Interest charge of 1% per month on the tax and penalties calculated for each month during which any amount of tax and penalties remain unpaid on the largest amount of tax and penalties that were due and unpaid at any time during that month.

The penalty for failing to make an instalment of CIT by the due date is 10% of the CIT instalment due, plus interest at 0.5% per month on the CIT instalment and penalty outstanding.

Tax audit process

A person authorised by the Commissioner may, at any reasonable time, audit the books and records, or other documents that may relate to the information that should be in the books or records, examine property, request reasonable assistance from the owner, or, as necessary, seize or retain any documents that may be relevant.

Statute of limitations

Every person required to deliver a return of assessable income for an income year shall keep adequate records and shall retain every such record or voucher for a period of up to five years after the end of the relevant income year, unless the Commissioner otherwise directs, before the disposal of such records. Every person carrying on a business must obtain written permission from the Commissioner of Inland Revenue before disposing of books or records.

Topics of focus for tax authorities

The Barbados tax authorities have been focussed on the efficient collection of taxes and voluntary compliance. To this end, the Barbados Revenue Authority was established, effective 1 April 2014, as a means of strengthening the overall revenue system. This brought together various government agencies, including the Department of Inland Revenue, the Value Added Tax Division, the Land Tax Department, and the Licensing Authority and was intended to create an environment that will enhance the efficiency and effectiveness of these government agencies.

Other issues***Foreign Account Tax Compliance Act (FATCA)***

On 27 May 2014, the United States (US) Treasury announced that an intergovernmental agreement (IGA) was 'in effect', and, on 17 November 2014, the US Treasury and Barbados signed and released the IGA. The regulations to the Income Tax Act to allow for automatic exchange of information were enacted on 3 September 2015, and the IGA entered into force on 25 September 2015.

Tax information exchange agreements (TIEAs)

TIEAs provide for the exchange of information on tax matters. TIEAs with Denmark, the Faroe Islands, Greenland, South Africa, and the United States are in force. The TIEA with Colombia is awaiting ratification; and TIEAs with France and Germany have been initialled and are awaiting signature.

Barbados

Bilateral investment treaties (BITs)

Barbados has entered into BITs with Canada, China, Cuba, Germany, Italy, Mauritius, Switzerland, the United Kingdom, and Venezuela. BITs with Ghana and the Belgium/Luxembourg Economic Union (BLEU) await ratification.

BITs typically cover the following:

- Investments of every kind.
- National and most favoured nation (MFN) treatment.
- Compensation for losses owing to war, revolution, state of national emergency, revolt, riot, etc. to be no less favourable than that for residents.
- Expropriation, providing for compensation equal to market value.
- Unrestricted transfer of investments and returns.
- Subrogation.
- Settlement of disputes, either between one state and nationals or companies of the other state, or between the two states themselves.

Significant developments

In 2016, the Belarusian tax legislation experienced certain changes. The most significant changes are the following:

- The requirement to submit the duly prepared economic justification of the price applied in the transaction upon the tax authorities' request resulted in toughening of transfer pricing control. At the same time, the tax authorities limited the scope of operations subject to transfer pricing control to the ones performed between interdependent entities only, which is much more permissive in comparison with the rules from prior years.
- The value-added tax (VAT) rate for telecom services providers was increased to 25%.

In addition, on 1 July 2016, due to starting the denomination process in Belarus, all amounts mentioned in the summary in Belarusian roubles should be cut ten thousand times. The international symbol of the Belarusian rouble will be changed from 'BYR' to 'BYN'.

Taxes on corporate income

The standard corporate income tax (CIT), also known in Belarus as profits tax, rate is 18%. The CIT rate for banks and insurance companies is 25%.

All resident companies are obligated to recognise revenue derived from the supply of goods, works, services, and property rights as of the date when it was recorded in accounting in line with the accrual method, notwithstanding the date of settlement for goods, works, services, and property rights supplied.

CIT is charged on taxable income (net profits). Taxable income is generally determined as revenues from sales of goods, works, and services, excluding VAT, less production and business related costs, less other deductible expenses, plus net results of non-operating income and expenses.

Resident companies are taxed on their worldwide income. The amount of tax paid by a Belarusian company to the foreign tax authorities with regard to the income received from its activity abroad is deducted from the amount of CIT reported with regard to the worldwide income.

Non-resident companies are taxed on Belarus-sourced income derived through a permanent establishment (PE) with CIT (at the rate of 18%). Income of non-resident companies sourced in Belarus that is not related to the activities of a PE is subject to withholding tax (WHT) (at rates varying from 6% to 15%).

Local income taxes

There are no local taxes due on net profits.

Belarus

Corporate residence

A company is resident in Belarus if it is incorporated in Belarus.

Permanent establishment (PE)

According to local legislation, a non-resident company is deemed to have a PE in Belarus in cases where:

- it permanently carries out commercial activities in Belarus, in whole or in part
- it carries out its activities through a dependent agent
- it uses a building site or construction, assembly, or equipment objects, or
- it provides services or performs works within a period of 90 days, continuously or in the aggregate, in any 12-month period starting or ending in the respective tax period.

Double taxation treaties (DTTs) may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty shall prevail.

Notwithstanding the activities that create a PE in Belarus, a non-resident company must be registered with the local tax authorities controlling the territory where activities are carried out before starting a business in Belarus.

Other taxes

Value-added tax (VAT)

All taxpayers shall recognise revenue for VAT purposes on an accrual basis. The only exception is set out for taxpayers using the simplified taxation system and keeping simplified tax records without accounting records. Such taxpayers shall recognise revenue on a cash basis.

The standard VAT rate is 20%, whereas the preferential rate is 10%. Starting from 1 April 2016, the VAT rate with regard to telecom services is increased from 20% to 25%.

The 10% preferential rate applies on:

- local supplies of crop products (excluding floriculture, cultivation of ornamental plants), wild-growing, beekeeping, livestock (except for fur production), and fisheries locally produced, and
- import and/or local supplies of certain food products and goods for children.

In general, local supplies of goods, works, and services made by a taxpayer performing its economic activities in Belarus, as well as the importation of goods, are subject to VAT.

Place of supply rules established by the Tax Code of Belarus should be followed to determine whether goods, works, and services are supplied locally, and therefore subject to tax in Belarus.

When a non-resident company, which does not have a PE registered in Belarus, sells goods or provides works and services that are considered local supplies according to the place of supply rules, the VAT due on such supplies is paid by the purchaser registered with the local tax authorities from its own funds. This VAT can be deducted against output VAT, if any, or refunded by the tax authorities in the established order.

Some exceptions apply to provision of construction and other similar works.

Exemptions with credit (zero-rated) include, but are not limited to, the following:

- Supply of goods exported outside of Belarus.
- Provision of works and services involving maintenance, loading, reloading, and any other similar works and services related to supply of exported goods.
- Transportation and any directly linked ancillary services related to the export or import of goods, including transit forwarding, as well as exported works for goods processing.
- Bunker fuel for fuelling aircraft of foreign companies carrying out international flights and/or international carriages by air.
- Works and services related to repair (modernisation, conversion) of aircraft (including engines and railway vehicles) and provided to non-resident companies or individuals.
- Works (services) on repair and technical maintenance of Belarusian non-resident's trucks performed by authorised service centres.

For VAT offset purposes, an electronic VAT invoice is introduced on 1 July 2016. The electronic VAT invoice should be issued by all VAT payers in accordance with the legislative requirements.

In order to apply zero-rated VAT on goods carried out from Belarus, VAT payers must hold supporting documents as evidence that these goods were actually exported from Belarus to another country. Application of zero-rated VAT on respective works and services must be supported by the appropriate documents, which have to be provided to the local tax authorities where the taxpayer is registered for tax purposes.

Exemptions without credit include, but are not limited to, the following:

- Disposal of shares in resident legal entities.
- Supply of material rights for certain industrial property objects (e.g. inventions, utility models, industrial designs, breeding achievements, integrated circuits, know-how).
- Supply of securities, derivatives, and other similar financial instruments; certain limitations apply.
- Provision of all types of insurance and re-insurance (co-insurance) services rendered by insurance and re-insurance agents.
- Supply of medicines, medical equipment, instruments, medical products, as well as drugs, devices, equipment, under certain conditions.
- Personal or public health care services, under certain conditions.
- Social services supplied by institutions for children and young people care, nursing homes for the elderly and/or by care/guardianship institutions for disabled or by other non-profit entities.
- Supply of services in the field of culture and art, under certain conditions.
- Public services (services of barbers, baths, and showers; laundry and dry cleaning services; watch repairing; manufacturing and repair of clothing and footwear; repair and maintenance of household appliances; repair of personal and household goods).
- Services provided by religious organisations, if these services correspond to the purposes set out in their canons, statutes, and other documents.
- Funeral services, maintenance of the graves, tombstones, fences, and other objects associated with burial, as well as works on their production, under certain conditions.
- Supply of postage stamps, postcards, and envelopes marked, excise and control (identification) stamps for marking of goods at their nominal value, stamps which can be used as a confirmation of fees and charges payable in accordance with the legislation.
- Supplies of jewels as well as related services, under certain conditions.
- Retail trade of goods in duty-free shops, under certain conditions.
- Research and development, design, and technological works and services, under certain conditions.
- Education and training services.
- Lotteries and gambling, under certain conditions.

Belarus

- Financial services supplied by the banks, under certain conditions.
- Goods and equipment imported into Belarus, under certain conditions.
- Transactions related to provision of loans.
- Remuneration of lessee and its investments expenditures not compensated in the value object of leasing on transfer of the object of a financial leasing arrangement to individuals (lessees) if the relevant leasing contracts contain a provision on the buyout of the leasing object.

In order to apply exemptions, taxpayers should ensure that the services and goods supplied meet the appropriate VAT exemption requirements.

VAT returns shall be submitted on either a monthly or quarterly basis, by the 20th day of the month following the reporting period. VAT shall be paid on either a monthly or quarterly basis, no later than the 22nd day of the month following the reporting period.

Customs payments

Belarus, Kazakhstan, and Russia have continued their integration process, and, since 1 January 2015, have launched the Eurasian Economic Union (EAEU) on the basis of Agreement on the EAEU, which is considered as a further step of integration after the Customs Union of these countries. Armenia and Kyrgyzstan entered into the EAEU on 2 January 2015 and on 12 August 2015, respectively. The unified trade regulations and Customs Code, applied within the Customs Union between the EAEU member states, has become a part of the EAEU legislation. Within the EAEU, single markets of goods, services, labour, and capital, with certain limitations, are introduced.

Indirect taxation issues within the EAEU shall be administered in compliance with the Agreement on the EAEU and Annex 18 to the Agreement that is the 'Protocol on the procedure of collection of indirect taxes and the mechanism of control over their payment for export and import of goods, works, services'.

The following charges are considered customs payments:

- Import duties.
- Export duties.
- Special anti-dumping and countervailing duties.
- VAT and excise taxes due upon importation of goods.
- Fees for customs processing/services.

Rates of import duties as well as descriptions of goods subject to them are established by the Single Nomenclature of Goods of the EAEU (HS Nomenclature) and Single Customs Tariff of the EAEU.

Export duties are not levied on exported goods, with the following exceptions: certain soft oil; light distillates; fuels and gasoline; wasted petroleum products; propane, butane, ethylene, propylene, and other liquefied gases; petroleum coke; petroleum bitumen, benzol, toluene, xylenes, potash fertilisers; rape or colza seeds; timber; rough skin; and tannage. According to the EAEU regulations, rates of export duties in regards to mentioned goods shall be established by Belarusian government and shall be equal to the rates applied in Russia.

Import and export duties are calculated on the customs value of the goods. The EAEU customs valuation legislation is based on rules and principles of the World Trade Organization (WTO). There are six methods of the customs valuation applied in sequential order:

- The transaction value method (Method 1).
- The method on the transaction value of identical goods (Method 2).
- The method on the transaction value of similar goods (Method 3).

- The deductive value method (Method 4).
- The computed value method (Method 5).
- The fallback method (Method 6).

The main customs valuation method is the transaction value method. Generally, the following components are considered when calculating the customs value of imported goods:

- Contract price of the goods.
- Rebates and discounts provided by a supplier, under certain conditions.
- Transportation related expenses to the border of the Customs Union (i.e. Belarusian border).
- Insurance premiums.
- Cost of containers and other packaging.
- Part of direct or indirect income to be derived by the seller from future resale, transfer, or other use of imported goods.
- Licence and other similar payments.

Special, anti-dumping, and countervailing duties could be imposed as a measure to protect economic interests of Belarus.

The tax base for VAT calculation due on imported goods includes the total amount of customs value, import duty, and excise tax paid, if any.

Generally, the taxpayer is required to pay customs duties before the customs clearance of the appropriate goods; however, under certain conditions, a taxpayer may be provided with an extension of payment deadlines or allowed to pay only part of customs duties. It is also possible to pay customs duties in advance.

Electronic customs declaration is currently available for customs clearance of the goods declared in customs procedures of temporary exports, re-exports (exports) as well as re-imports, free circulation (imports), and free customs zones.

Excise taxes

Rules on determination of moment of actual supply of excisable goods are adjusted as consistent with the obligation of taxpayers to record revenue on an accrual basis. From 1 January 2015 to 31 December 2016, Belarussian companies producing alcoholic drinks and/or beer have the right to determine the date of the actual sale (transfer) of excisable goods either on an accrual or cash basis.

The goods that are subject to excise tax and the tax rates applicable in 2016 are represented in the table below.

Description of tax object	Taxable item	Tax rate per taxable item (BYR*)
Rectified ethyl alcohol and alcoholic drinks, including beer and wine	1 litre of 100% alcohol, or 1 litre of complete product	From 0 to 166,900
Tobacco (excluding raw tobacco), including cigarettes, cigars, cigarillos, and smoking tobacco	1 kg of pipe and smoking tobacco, or 1 cigar or 1,000 cigarettes, cigarillos	From 28,000 to 528,900
Energetic products (petrol, kerosene, diesel and biodiesel, gasoline, fuel, marine fuel, oils for diesel engines and engines with a carburettor and an injector)	1 ton	From 0 to 3,515,800
Liquefied hydro carbonated gas and compressed natural gas used as motor fuel	1,000 litres and 1,000 cbm	From 230,900 to 461,400

Belarus

Description of tax object	Taxable item	Tax rate per taxable item (BYR*)
Diesel and/or carburettor (jet) oil	1 ton	2,816,000 till 30 June and 2,981,700 from 1 July to 31 December

* Belarusian rubles

The tax rate depends on the type of goods. Rates of excise taxes are stipulated by the Appendix to the Tax Code of Belarus. The rates of excise tax are increased over the course of the year by establishing different rates effective during each following half a year proportionally to inflation processes in Belarus.

The excise tax rate for cigarettes with filters is defined on the basis of (i) maximum retail price per pack of cigarettes of certain brands declared by a taxpayer and (ii) reference of certain brands of cigarettes to one of three price groups defined in the Tax Code.

Excise taxes paid on the purchasing/importation of excisable goods to be used in manufacturing of goods or provision of works and services in Belarus are considered as deductible for CIT purposes, with certain exceptions.

Excise taxes are reported and paid on a monthly basis. The tax return should be submitted no later than the 20th day of the month following the reporting period, while the payment should be made no later than the 22nd day of the month following the reporting period.

Real estate tax (immovable property tax)

Real estate tax is levied at the annual rate of 1% on the residual value of buildings, installations, including separated premises, and car-parking spaces owned by legal entities. The increased annual tax rate of 2% applies to late construction in progress (if construction works take longer than the deadline established in technical documentation). The tax rate is increased (decreased) by the coefficient determined by the local state authorities (up to 2.5) depending on the location of the object subject to real estate tax. The tax rate can be increased by ten times (as a maximum) by the local state authorities with regard to late constructions in progress.

The tax base of buildings and other taxable objects located in the territory of Belarus and leased by individuals to legal entities will be the contract value of the leased real estate not less than its value established by the evaluation. Evaluation can be made in the order approved by the President of Belarus as well as by a certified appraiser or local authority responsible for state registration of real estate.

When the real estate subject to taxation is located in Belarus and leased by a foreign company that is not considered as having a PE in Belarus to a resident company, the lessee is considered a real estate taxpayer.

The amount of tax, except the tax due on late construction in progress (if construction works take longer than the deadline established in technical documentation), is deductible for CIT purposes.

The tax reporting obligation must be fulfilled by a taxpayer not later than 20 March of the reporting year. Taxpayers are entitled to choose whether to pay tax on a quarterly basis by equal parts, not later than the 22nd day of the third month of each quarter, or once a year, not later than 22 March of a current tax period (tax year).

Land tax

Belarusian and foreign entities are subject to land tax collected by the local tax authorities with respect to land that they own or use in Belarus. Land plots assigned for temporary use and not transferred back to the state by the due date, land plots occupied without permission, and land plots used contrary to the intended purpose are also a part of the land tax base. Such land plots are taxed at the rate increased by coefficient 10. The determined land tax rates are increased by coefficient 2 in respect of the land plots where the objects of late construction in progress are located.

The tax base depends on plot location and purpose and is normally determined pursuant to cadastral value of a land plot.

The Tax Code provides for a number of land plot categories that are exempt from, or not subject to, land tax in Belarus.

The tax is payable on an annual basis at the rates established by the Appendices to the Tax Code of Belarus. Tax rates for agricultural plots vary from BYR 370 to BYR 102,270 per hectare. Tax rates on the land plots located in towns and rural areas can be determined in absolute amount or as a percentage depending on the cadastral value of a land plot. The range from 0.025% to 3% payable on the cadastral value is applied. Local state authorities are authorised to increase (decrease) the land tax rates by a coefficient that should not exceed 2.5.

Land tax is deductible, with some exceptions, for CIT purposes.

Land tax is reported annually, no later than 20 February of the current reporting year.

Taxpayers are entitled to choose whether to pay tax on a quarterly basis, by equal parts not later than the 22nd day of the second month of each quarter, or once a year, not later than 22 February of a current year on plots other than agricultural and not later than 15 April with regard to agricultural plots.

State dues

State dues are payable by legal entities that apply to the state institutions for the issuance of documents having legal force or other deeds, bring the cases before the courts for consideration, use bills of exchange in their activities, etc.

State dues include the following payments and duties:

- State fees (payable on suits, applications, appeals, and other documents that are submitted to or claimed from the courts or prosecution authorities, payable on applications for state registration of a legal entity, notary public services, real estate registration services, etc.).
- Patent fees (payable for registration and use of intellectual property).
- Stamp fees (payable on activities with bills of exchange).
- Consular fees (payable on the activities of state consular and diplomatic departments performed under the request of any applicant).

State dues for state registration of a business entity are not charged if registration related documents are filed with the registration authorities electronically via the official web-portal. State dues paid are refunded if proceedings in the economic court are terminated due to the parties consent to resort to mediation.

Offshore charge

An offshore charge is levied upon the following activities of domestic entities:

Belarus

- Any transfer of funds to an entity registered in an 'offshore jurisdiction', to a third party who is a creditor of that entity in discharge of an obligation before the latter, or to the bank account of an offshore jurisdiction.
- In kind performance of obligation to an offshore entity, with some exceptions.
- Any transfer of material rights and obligations as a result of changes in commitment (cession or transfer of debt) between a domestic entity and an offshore entity.

The following transactions are excluded from the scope of offshore charge:

- Performance of the obligations in kind to a non-resident as a result of transfer of responsibilities due to substitution of parties in an obligation, the parties of which are a resident of Belarus and a non-resident registered in the offshore zone, under the conditions when transfer of monetary funds is not subject to offshore charge.

According to Belarusian laws, an offshore jurisdiction is a territory that is included in the list of offshore territories established by the President, has a preferential tax treatment, and/or does not disclose the information related to financial transactions made by resident entities.

A list of 52 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any kind of work or services, commodities, interest on loans, insurance premiums, guarantees, etc. are subject to an offshore charge, which is deductible for CIT purposes.

Tax relief is granted to: (i) repayment of loans, including interests on them, borrowed from entities located in offshore territories, (ii) payments due under international marine cargoes and forwarding services, and (iii) payments made by banks due to the fact of performing banking operations, under certain conditions.

An offshore charge is paid at a 15% rate and is deductible for CIT purposes.

The tax is reported and paid on a monthly basis, no later than the 20th day of the month following the reporting period.

Ecological (environmental) tax

Ecological (environmental) tax is imposed on pollutants discharged into the environment, storage and disposal of industrial wastes, and wastewater discharges.

The amount of tax due is decreased by the amount of disbursed capital investments in renewable energy plants and facilities for removing pollutants.

On 1 January 2016, importation of ozone-depleting substances is excluded from the tax due to the tax reform.

Emissions of pollutants into the atmospheric air are subject to ecological tax, provided the total volume of emissions regarding all the groups of substances amounts to three or more tons a year.

Emissions of pollutants of the 1st hazard rating and pollutants having no hazard rating are not subject to ecological tax. The tax base of ecological tax is the actual quantity of respective pollutants used/discharged. Tax rates of ecological tax are stipulated by the Tax Code of Belarus.

Ecological tax paid, with certain exceptions, is treated as deductible for CIT purposes.

The tax is reported on a quarterly basis, by the 20th day of the month following the reporting quarter. Taxpayers who pay tax on the basis of established annual limits are entitled to choose whether to pay tax on a quarterly basis, by the 22nd day of the month

following the reporting quarter, or once a year, not later than 22 April of a current year. Other legal entities pay the tax on a quarterly basis.

Tax on natural resources

A tax on natural resources is payable on the actual value of extracted natural resources. It depends on the kind and quantity of extracted resources.

The amount of tax on natural resources is fully deducted (regardless of being over the limit of natural resources extraction) for CIT purposes.

In general, the tax is reported and paid on a quarterly basis. If taxpayers calculate the tax on the basis of volumes of extraction specified in documents being the ground of extraction, the tax is reported and paid as follows:

- The initial tax return is submitted to the tax authority not later than 20 April of the reporting year based on the planned volumes of resources to be extracted, and the tax is paid on a quarterly basis.
- The final tax return is submitted not later than 20 February of the year following the reporting year based on the volumes actually extracted, and the additional tax, if any, is paid not later than 22 February of the year following the reporting year. The amounts of tax overpaid as a result are to be offset (refunded) in accordance with the legislation.

Payroll taxes

Social insurance contributions (SICs) and other similar payments

All payments to employees are subject to SICs at the total rate of 35%. SICs at a rate of 34% (28% pension insurance and 6% social insurance) are paid by an employer and deducted for CIT purposes. SICs at a rate of 1% are withheld from employee's salary and paid by the employer.

In addition to SICs, an employer is liable for payments under mandatory insurance against accidents at work and professional diseases to the state insurance company 'Belgosstrakh' on behalf of all its individuals employed. These payments are charged at a flat rate of 0.6%. For employees engaged in certain sectors of the economy, special coefficients of up to 1.5 are applied; consequently, the amount of payments under mandatory insurance against accidents at work and professional diseases could increase.

Such payments as dismissal allowances, compensations for moral damages, legally provided compensations (with some exceptions), insurance premiums payable under certain personal mandatory and voluntary insurance, dividends and interests from participation in legal entities, and others, are exempt from SICs and from mandatory insurance against accidents at work and professional diseases.

Local tax on providers (suppliers)

The local tax on providers is levied on legal entities engaged in gathering/purchasing of wild plants (or parts thereof), mushrooms, and technical and medical raw materials of floral origin for their further industrial processing or resale.

The tax base is the cost of gathered items defined on the basis of procurement (purchasing) prices.

The tax rates do not exceed 5%. Tax on providers is treated as deductible for CIT purposes.

The tax is reported and paid on a quarterly basis.

Belarus

Branch income

Non-resident legal entities pay tax on profits attributable to a PE (18%).

Taxation of a PE

If a non-resident company is deemed to have a PE in Belarus, it will have to register with a local tax authority and declare related profit. Profit related to a PE is taxed by CIT at a rate of 18%.

A PE's profits are computed on substantially the same basis as Belarusian legal entities, including the composition of tax deductible expenses. The Tax Code provides for the deductibility of expenses incurred abroad by a head office with respect to its PE in Belarus (including a reasonable allocation of administration costs).

To calculate a PE's taxable income, a non-resident company is required to provide a tax authority with financial documents (i.e. accounting records, income statement, general ledger accounts, invoices, statements of services/works fulfilment, etc.) supporting the amount of revenue earned and expenses incurred. Generally, a PE's taxable income is defined on a revenue less costs basis. Documentary support of each revenue and/or cost item is required.

When it is not possible to calculate a profit attributable to a PE, this profit can be calculated by the tax authority using one of the following methods:

- A profit sharing method (i.e. gross foreign profit is allocated to PE by using one of the following coefficients related to a PE: working time costs, expenses incurred, services/works performed).
- Benchmarking method (tax authority performs benchmarking study by collecting the respective ratios/indexes of other entities engaged in similar activities).

Head office expenses related to a PE are considered for calculation of taxable income in Belarus and require confirmation of an independent foreign auditor. Splitting of expenses is highly recommended in the audited financial statements of the parent company (head office).

Non-resident legal entities operating in Belarus through a PE are required to follow the filing and payment schedules established for Belarusian legal entities.

Representative office

Non-resident legal entities are also allowed to operate in Belarus via a representative office or to set up a resident legal entity.

A representative office of a non-resident company is defined as the structural subunit registered with the Ministry of Foreign Affairs, which is entitled to protect and represent the interests of a non-resident company.

The representative office is not considered a legal person.

Non-resident legal entities are permitted to open representative offices in Belarus only for the purposes of carrying out activity of preparatory and auxiliary character. The scope of such permitted non-commercial activities includes the following:

- Contribution to the implementation of international treaties of Belarus in areas of trade, economy, finances, science, technologies, and transport; improving co-operation in these areas; and encouraging a larger amount of data on economic, commercial, and scientific issues.
- Research for investment opportunities in Belarus.
- Establishment of legal entities, including joint ventures.

- Ticket sale and seats booking of aviation, railway, automobile, and maritime transports.
- Other socially useful and non-commercial activity.

The copy of documents confirming state registration of a non-resident legal entity with competent authorities of its country of incorporation (to be filed along with the set of other documents required to open a representative office in Belarus) shall be issued no later than three months prior to the submission of respective set of documents to the Ministry of Foreign Affairs of Belarus.

The permitted number of foreigners working in a representative office shall not exceed five individuals.

A representative office pays taxes due on its primary and auxiliary activities, such as real estate tax (with some exceptions), customs duties, input VAT, personal income tax (PIT), SICs due on employment of individuals, etc.

Income determination

Inventory valuation

Under domestic accounting legislation, stock used in the production and included in the cost of produced goods may be generally valued by the following methods:

- Cost of each unit.
- Average cost.
- First in first out (FIFO).

The inventory valuation method used for CIT purposes must be the same method established by the taxpayer's accounting policy.

Capital gains

Capital gains from disposal of shares/stocks in a Belarusian entity by another Belarusian entity are taxed as part of the latter's profits and are subject to an 18% tax. No tax exemptions are provided by the Tax Code for the taxation of capital gains.

Dividend income

Dividends distributed by a resident company to another resident company are subject to 12% CIT, which is withheld by a paying company.

Dividends distributed by a foreign entity represent non-operating income of a receiving Belarus entity and are subject to 12% CIT payable by the receiving entity in Belarus, irrespective of the fact that the foreign entity has paid the WHT on dividends distributed.

Dividends received by venture companies are exempt from CIT.

Dividends received by taxpayers from Belarusian companies are exempt from CIT in the hands of such taxpayers since CIT on dividend income is withheld by a respective dividend-distributing entity.

Inter-company dividends

The Tax Code provides no exemptions for taxation of inter-company dividends.

Interest income

Interest on most types of bonds, including state, municipal, bank, and corporate bonds issued during the period from 1 April 2008 till 1 January 2015 as well as from 1 July

Belarus

2015 till 31 December 2017, is exempt from Belarusian CIT under certain conditions provided for in the Tax Code.

CIT at the standard rate of 18% is charged on interest income derived by a Belarus entity from another resident company.

Interest income derived by a Belarus entity from a foreign entity represents non-operating income of a receiving Belarus entity and is subject to 18% CIT payable by the receiving entity in Belarus, irrespective of the fact that the foreign entity has paid the WHT on interest income.

Other significant items

The following types of income are, *inter alia*, exempt from CIT:

- 'Target financing' received from the state or municipal authorities. The taxpayer is required to hold separate accounting records of income and expenses derived and incurred within 'target financing'.
- Goods (works, services), material rights, and monetary means granted:
 - to the successors by a legal entity in case of its restructuring
 - as an inter-company transfer pursuant to corporate decision
 - to taxpayers engaged in crop production, animal husbandry, fish farming, and beekeeping, provided that this income is spent for the appropriate activities, or
 - as a foreign gratuitous help on conditions stipulated by the President.

Foreign income

Foreign income of Belarusian resident legal entities is taxed, except for dividends, as ordinary business income at the standard 18% CIT rate. Dividends are taxed at a 12% CIT rate.

There are no provisions in the tax legislation that allow tax deferral with regard to foreign income.

Deductions

Deductible expenses include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit, unless the Tax Code of Belarus or presidential regulations provide otherwise.

Depreciation

Assets may be depreciated using the directly proportional (straight-line) depreciation method, indirect disproportionate depreciation methods, and productive depreciation methods. Depreciation may not exceed maximum rates established by the law.

Almost all types of fixed assets (buildings, premises, equipment, vehicles) are depreciated for tax purposes in accordance with the established procedures. Land plots are not depreciated. There are many different depreciation rates established for different types of fixed assets. Generally, fixed assets may be divided into five basic groups, as follows:

Group of assets	Description of the assets	Annual depreciation rate (%)
1	Buildings and constructions, premises	1 and 2
2	Vehicles and equipment	10
3	Cars and vehicles	12.5
4	Inventories (furniture, tools, etc.)	10
5	Computers and other related devices	20

Application of an investment deduction under the tax rules is possible in addition to the depreciation deduction provided by the accounting legislation, i.e. taxpayers are entitled to classify/record part of the initial value of fixed assets, as well as investment in reconstruction, as costs of production and supply of goods (works, services) for CIT purposes. The amount of the investment deduction is limited to 10% of the initial value or value of investment in reconstruction with regard to buildings and constructions and to 20% of the initial value with regard to machines, equipment, and vehicles.

An investment deduction is applied in a month starting from which:

- depreciation charges are calculated for accounting purposes and
- the value of investment in reconstruction increased the initial value of fixed assets in accounting records.

An investment deduction cannot be applied with regard to fixed assets received by a taxpayer free of charge.

Annual re-evaluation of fixed assets is required only with regard to buildings, constructions, and transfer units, provided the inflation rate has reached 100%. A particular company is entitled to re-evaluate fixed assets on its own initiative as of 1 January of the year following the reporting one.

Goodwill

Goodwill and personnel experience cannot be recognised as intangible assets for CIT purposes.

Start-up expenses

Deduction of start-up expenses is not possible.

Interest expenses

Interest expenses are generally deducted for CIT purposes unless interest is accrued on past-due loans. Thin capitalisation restrictions must also be considered (*see Thin capitalisation in the Group taxation section*).

Bad debt

Bad debts are deductible only if proved and specific criteria are met.

Charitable contributions

Amounts not exceeding 10% of an entity's gross profit granted to health, education, social welfare, culture, and sports state institutions; religious organisations; social services institutions; and public associations (i.e. 'Belarusian Society of Disabled Persons', 'Belarusian Society of Deaf Persons', 'Belarusian Fellowship of Visually Impaired Persons', 'Belarusian Children's Fund', and 'Belarusian Children's Hospice'), or spent for acquisition of goods, works, or services for the benefit of the named institutions, are exempt from CIT.

Taxes

Generally, the following taxes, dues, and other compulsory charges to the state authorities are deductible for CIT purposes:

- Excise taxes paid at purchasing/importation of excisable goods to be used in manufacturing of goods or provision of works and services in Belarus, with some exceptions.
- Ecological tax.
- Real estate tax, except for the tax due on late construction in progress.
- Land tax, with some exceptions.
- Tax on natural resources.
- State dues.

Belarus

- Offshore charge.
- Tax on providers.
- Payments for social and other mandatory security.

The following taxes shall not be deducted for CIT purposes:

- VAT paid, with certain exceptions (*see below*).
- CIT.

VAT can be treated as deductible for CIT purposes only if acquired goods, works, or services are used for production or sale of goods, works, or services that are VAT exempt.

Other significant items

Limited deductible expenses also include the following:

- Modernisation and reconstruction of fixed assets. The value of modernisation or reconstruction is included in the acquisition costs.
- Business trips.
- Premiums on certain types of voluntary insurance, with restrictions.
- Natural losses, with certain exceptions.
- Cost of fuel and energy resources, with restrictions established for certain entities.
- Membership fees, contributions, and premiums, with restrictions.

Non-deductible expenses also include the following:

- Expenses on provision or acquisition of works and services not related to the taxpayer's business activities.
- Construction, maintenance, and other works, including all types of repair of assets that are not used for the purpose of earning income or receiving economic benefit.
- Default interest (forfeit), fines, and other sanctions paid to the state authorities.
- Dividends paid and similar type of payments.
- Contributions made to the authorised share capital.
- Expenses incurred on purchase and/or creation of depreciable assets.
- Depreciation for tangible and intangible assets not used in business, as well as for tangible assets that are not in operation.
- Cost of assets or material rights transferred as advance or a pledge to a third party.
- Expenses covered by reserves for future expenses created by a taxpayer in the prescribed manner.
- Interest on overdue loans.
- Remunerations to the members of the board of directors (supervisory board). Such expenses were deductible until 1 January 2016.
- Foreign exchange differences arisen as a result of revaluation of most obligations the expenses on which are not deductible for CIT purposes. Such foreign exchange differences were deductible until 1 January 2016.
- Other expenses not related to the deriving of income and not attributed to operating activities of the entity as well as expenses that are not considered as allowable deductions under the Tax Code of Belarus.

Net operating losses

Belarusian companies are given the possibility to recognise in the current tax period the tax losses incurred in the previous tax periods. Taxpayers are entitled to carry forward losses incurred in 2011 and subsequent tax periods. Losses can be carried forward only for ten years after the tax period when the losses have occurred.

However, tax loss carryforward is not applied to losses:

- incurred as a result of activities outside Belarus, if a company is registered as a taxpayer in a foreign state with regard to such activities, or

- incurred in a tax period when a company was entitled to apply CIT relief (tax exemption) established for several tax periods.

Tax losses cannot be carried forward if, following the results of a relevant previous tax period (calendar year), a taxpayer received book income (profits), notwithstanding the fact that losses available to be carried forward in line with the Tax Code were actually suffered or not.

Tax losses cannot be carried back in Belarus.

Payments to foreign affiliates

Payments to foreign affiliates of a Belarusian resident legal entity in amounts of financing aimed to cover ongoing costs thereof are deductible for CIT purposes in Belarus.

Group taxation

Currently, group taxation legislation and regimes are not available in Belarus. Each Belarusian entity is regarded as a separate taxpayer and may not deduct tax losses of any other group entity. The Belarus Tax Code does not allow the deduction of foreign losses from domestic taxable income or domestic losses from foreign taxable income.

Transfer pricing

The Tax Code empowers tax authorities to carry out transfer pricing control. Though Belarusian transfer pricing legislation is not as thorough as it is in the European Union (EU) member states, taxpayers should be aware of the following:

- The tax authorities of Belarus are entitled to apply the market price of the transaction for tax purposes in case of:
 - Selling or acquisition of immovable property/real estate as well as housing bonds to/from a resident of Belarus and/or non-resident of Belarus when the price of the transaction deviates by more than 20% of the market price on the dates of recognition of income from sale and expenses incurred in the acquisition in tax accounting, respectively.
 - Entering into foreign trade transactions with a related party or a party located in an offshore zone, including the transactions performed with the participation of an intermediary under certain conditions, as well as entering into a transaction with an interdependent Belarusian tax resident, including transactions performed with the participation of an intermediary under certain conditions, who is allowed not to calculate and pay CIT (is exempt from CIT) in the tax period, when the transaction is performed, due to the fact that such party relates to special types of taxpayers, and/or applies special tax regimes, and/or performs its activity in the areas specified with the legislation, when the transaction price (price of a number of transactions with one person during the period of a calendar year) exceeds BYR 1 billion on the date of sale/purchase of goods (works, services) or property rights and the price of such transaction (transactions) deviates by more than 20% of the market price for goods (works, services) or property rights.
 - Entering into foreign trade transactions on purchasing/acquisition of (i) goods included into the list of strategic goods determined by the Belarusian government or (ii) other goods (works, services) or property rights by the entity included into the list of largest taxpayers, when the transaction price (price of a number of transactions with one person during the period of a calendar year) exceeds BYR 10 billion on the date of:
 - Sale of goods (works, services) or property rights and the price of such transaction (transactions) deviates by more than 20% of the market price for goods (works, services) or property rights on the date of recognition of income from sale in tax accounting.

Belarus

- Purchase of goods (works, services) or property rights and the price of such transaction (transactions) deviates by more than 20% of the market price for goods (works, services) or property rights on the date of recognition of expenses incurred in the purchase in tax accounting.
- The following transactions do not fall upon transfer pricing rules:
 - Transactions on sale or purchase of goods (works, services) or property rights if the price of the transaction is determined in an international treaty signed by the Republic of Belarus.
 - Banking operations according to the list determined in the Bank Code of the Republic of Belarus.
 - Operations with securities and financial future instruments that are traded on the organised stock market.
- Revenue derived from the sale of goods (works, services), as well as expenses for production and sale of goods (works, services), is to be defined for the purposes of the application of transfer pricing rules.
- Due to the tax reform, starting from 1 January 2016, taxpayers are obligated to:
 - inform the tax authorities, by means of electronic VAT invoices, of the transactions that fall under the transfer pricing control
 - submit the economic justification of the price applied and/or the documentation supporting economic feasibility of the price applied with regard to (i) foreign trade transactions on purchasing/acquisition of goods included into the list of strategic goods determined by the Belarusian government, and (ii) the transactions performed by the entities included into the list of largest taxpayers, when the transaction price (price of a number of transactions with one person during the period of a calendar year) exceeds BYR 10 billion, and
 - upon the request of the tax authorities, submit the electronic justification of the price applied with regard to other operations falling under the transfer pricing control and not listed as (i) and (ii) above.
- To determine the CIT base on the basis of a market price, the tax authorities are entitled to apply the following methods:
 - Comparable uncontrolled price method (CUP).
 - Resale price method.
 - Cost plus method.
 - Transactional net margin method.
 - Profit split method (introduced on 1 January 2016 due to the tax reform).
- Before the tax audit has been carried out, a taxpayer who applied transaction prices not corresponding to market prices is entitled to independently adjust the CIT base according to market prices and pay the remaining CIT.

Moreover, there is a mechanism to control transfer pricing provided by the DTTs applicable for Belarus. When interests under the loan agreement between related parties exceeds the arm's-length rate/basis (the amount which will be agreed upon between independent parties under normal business circumstances), a 5% rate of WHT (provided by the DTT) will be charged on the arm's-length interest charge. Excess amounts, if any, will be taxed by WHT at a 10% rate.

Thin capitalisation

Subject to thin capitalisation rules, deductibility of controlled debt may be, in certain circumstances, restricted for Belarusian CIT purposes if:

- it arises under the contract with a foreign shareholder (who directly or indirectly owns more than 20% of the Belarusian company), its related party, or other entity where the foreign shareholder or the related party is the guarantor with regard to the controlled debt, and
- the amount of the controlled debt exceeds:
 - the difference between the Belarusian taxpayer's assets and liabilities for taxpayers producing excisable goods, or

- the difference between the Belarusian taxpayer's assets and liabilities by three or more times for other taxpayers.

The following expenses are regarded for thin capitalisation rules as controlled debt:

- Borrowing expenses (i.e. interests).
- Expenses for engineering services, marketing services, consulting services, information services, management services, intermediary services, and services involving searching for and employment of staff, as well as the fee for the transfer of property rights to objects of industrial property rights.
- Expenses for penalties (fines) and the amount payable as a result of other sanctions, including as a result of damages for breach of contractual obligations.

The thin capitalisation rules are not applied by (i) banks, (ii) insurance companies, and (iii) companies (lessors and finance lessors) as a result of receiving rent remuneration that does not exceed 50% of total income from sale of goods (works, services) or property rights and income from rent (finance rent) as of 31 December of the reporting tax period.

Controlled foreign companies (CFCs)

There are no provisions in relation to CFCs in Belarus.

Tax credits and incentives

Foreign tax credit

If a Belarusian legal entity derives income subject to taxation abroad, the tax paid abroad may be deducted from the calculated CIT. In accordance with the Tax Code, the amount deducted from CIT may not exceed that part of the tax calculated in Belarus that is attributed to the income received in a foreign jurisdiction. If there is a valid DTT with the country in question, the provisions of the treaty regarding avoidance of double taxation shall apply.

Special tax treatments

The Belarusian Tax Code provides a more favourable tax environment for particular resident legal entities. Special tax treatments are available for certain taxpayers depending on their location, amount of revenue, number of individuals employed, types of business, etc. Special tax treatments include, but are not limited to, the following:

- Simplified taxation.
- Tax on farmers and other producers of agricultural products.
- Tax on gambling business.
- Tax on lotteries.
- Tax on electronic interactive games.
- Single tax on imputed income, with regard to companies conducting maintenance and servicing of cars and other motor vehicles.
- Free economic zones.

In cases where activities fulfil the criteria of a special tax treatment, the taxpayer is not permitted to use the general taxation regime with regard to income deriving from those activities, with certain exceptions. Concerning simplified taxation, tax on farmers, and taxation of a free economic zone resident, the taxpayer is entitled to determine whether to apply such treatment or not.

Incentive for employing disabled persons

Entities employing disabled persons, if their average number equals or exceeds 50% of the average number of employees for the reporting period, are exempt from CIT due on taxable profit derived from production activity.

Belarus

Exemption of CIT on profits derived from various activities

- Profits of entities engaged in baby food production are exempt from CIT.
- Profits derived by insurance companies from investments of insurance reserves under the contracts of voluntary life insurance are exempt from CIT.
- Entities engaged in manufacturing of prosthetic and orthopaedic devices (including dental prostheses), provision of rehabilitation, and disability services are exempt from CIT due on profits derived from sales of these items.

Tax holidays

Profit from the services provided by hotels, sport complexes, ski complexes, touristic complexes, motels, campgrounds, etc. located at tourist sites established by the President of Belarus is exempt from CIT for three years starting from the commencement of its activities, with certain exceptions.

Scientific and Technological Association incentive

Entities that are members of the Scientific and Technological Association established by Belarusian State University, in accordance with legislation, are entitled to apply a 5% CIT rate on their profit derived from sales of information technology and provision of information technology development services.

Incentives for the production of innovative, high-technology goods and laser-optical equipment

Income derived from selling goods of one's own production included in the list of innovative goods approved by the Council of Ministers is exempt from CIT.

Income from selling goods of one's own production that are included in the list of high-technology goods approved by the Council of Ministers is exempt from CIT, provided revenue from selling of such goods comprises at least 50% of total revenue of a taxpayer. If revenue from selling high-technology goods is less than 50% of total revenue, such income is taxable at a reduced CIT rate of 10%.

Free economic zones

Entities that are registered in Belarusian free economic zones are exempt from CIT for five years, starting from the date when the profits were declared, in relation to goods, works, and services of their own production that are either exported or included in the list of import-substituting goods and supplied in Belarus. After expiration of this term, the CIT rate is 9%.

Land plots within the borders of free economic zones, provided to free economic zone residents registered after 1 January 2012 for the purpose of objects construction, are exempt from land tax for the period of such objects' design and construction, but not more than for five years from the registration date. Free economic zone residents registered before 1 January 2012 can take advantage of this land tax exemption only during the period from 1 January 2017 till 1 January 2022, as long as design and/or construction works are performed.

Moreover, residents of free economic zones are granted, under certain conditions, a partial VAT relief and a relief from real estate tax on buildings and constructions located in free economic zones.

High Technologies Park (HTP)

The following tax privileges are granted to residents of the HTP:

- Full exemption from CIT.
- Full exemption from VAT when selling goods, works, services, or property rights in the territory of Belarus.

- Full exemption from VAT and customs duties when importing certain goods for the purpose of using them in activities connected with high technology.
- No land tax is applicable to land plots situated in the HTP on which a construction project is being carried out; however, this exemption will last no longer than three years.
- Full exemption from real estate tax on buildings and installations, including late constructions in progress but excluding the objects rented, that are situated in the territory of the HTP.
- 9% PIT for employees of residents of the HTP.
- No SICs on the part of employees' income exceeding the average salary in Belarus.

Taxation of holding companies

A holding company is a group of companies where one company of the group is considered to be a management company by virtue of influence over decisions passed by other group companies (i.e. the subsidiaries) as a result of holding 25% and more of their ordinary stock (shares).

A management company is entitled to create a centralised fund by means of contributions of subsidiaries from net income thereof. Subject to certain conditions, monetary means received by a management company (Belarusian tax resident) from subsidiaries (Belarusian tax residents) for the purpose of a centralised fund formation as well as monetary means transferred from a centralised fund to subsidiaries are not considered taxable income for CIT purposes.

Free of charge transfer of assets within a qualifying holding group is exempted from CIT in Belarus, conditional on certain terms, in particular:

- Participants of a holding group receiving or transferring assets are not (i) participating in another holding; (ii) registered as residents of free economic zones, the Special Tourist and Recreational Park 'Avgustovski Canal', Park of High Technologies, or China-Belarusian Industrial Park; (iii) professional participants of the securities market and do not manufacture alcoholic and tobacco products; (iv) banks, non-bank financial intermediaries, or insurance companies; and (iv) engaged in realtor activity, lottery activity, activity on organising and conducting electronic interactive games, or activity in the sphere of gambling business.
- Received assets are used to manufacture products, to perform works, and to render services.

Withholding taxes

The following income of a non-resident entity in Belarus that is not derived through a PE is deemed to be Belarusian-source income and is subject to WHT at the rates provided:

Income	WHT (%)
Freight charges, (including demurrage) and freight-forwarding services (excluding freight charges for marine transportation and forwarding services)	6
Interest on any type of debt obligations, including securities	10
Royalties	15
Dividends and other similar income	12
Penalties, fines, and other sanctions received for breach of contractual liabilities	15
Income derived from the sale of goods in Belarus under a commission, mandate, or other similar contract.	15
Income derived from performing and/or participation in cultural events and shows, as well as from operation of attractions and wild beast shows in Belarus.	15
Income derived from sports, entertainment activities, or performers' activities	15

Belarus

Income	WHT (%)
Income derived from innovative, design, research and development activities, design of technological documentation engineering design, and other similar works and services	15
Income from provision of guarantees	15
Income from provision of disk space and/or communication channel for placing information on the server and services for its maintenance	15
Proceeds from the sale, transfer (with title), or lease of immovable property located in Belarus	15
Income derived by a foreign entity from the sale of an enterprise as a complex of assets located in Belarus	15
Capital gains (income from the sale of shares/stocks) in local companies	12
Income from the sale of securities (except shares)	15
Income derived from provision of the range of works and services	15

In calculation of WHT due on certain types of income, a taxpayer is permitted to deduct related expenses following the rules specified by the Tax Code.

Generally, the tax is withheld and paid to the tax authorities by a local entity, an individual entrepreneur, a branch, a PE of a foreign company, or an individual. When certain types of Belarusian-source income is received (e.g. capital gains, sale, transfer of title of ownership or lease of immovable property, provision of licences for software, and other copyright objects), a WHT shall be paid directly by a foreign entity.

Currently, Belarus has 67 DTTs in force with foreign countries. Where a treaty for the avoidance of double taxation with the country in question contradicts the local tax regulations, the treaty provisions prevail.

Reduction of or an exemption from WHT under a DTT may be obtained if a special residence certificate is completed and provided to the tax authorities before the payment is made.

If the payment that is covered by the DTT has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund. The claim for a refund must be filed with additional documents, such as a residence certificate, copies of the contract, and other documents related to the payment.

The following table indicates WHT rates stipulated in DTTs Belarus is a party to:

Recipient	WHT (%)			Construction site duration before creation of a PE (months)	Treaty benefits available from

Notes

1. In general, a 0% tax rate applies to interest payments to the governments of contracting states and to payments guaranteed by the governments of contracting states.
2. The DTT with this country is in force since Belarus is a successor of the former USSR.
3. In the case of multiple rates, the lowest rate is applicable with regard to those companies or physical persons who are the beneficial owners of dividends distributed by a company in which they hold 25% or more shares.
4. In the case of multiple rates, the lowest rate is applicable with regard to all kinds of loans provided by a government or national bank.
5. 3% applies to patents and trademarks; 5% applies to copyrights.
6. 5% applies to equipment; 10% applies to all other royalties.
7. 0% applies to copyrights; 10% applies to all other royalties.
8. 10% applies to patents, trademarks, and equipment; 15% applies to all other royalties.
9. 3% applies to patents and trademarks; 5% applies to equipment; 10% applies to copyrights.

10. 5% applies to copyrights; 10% applies to patents and trademarks.
11. 3% applies to patents; 5% applies to equipment; 10% applies to all other royalties.
12. 5% applies to copyrights; 10% applies to patents and trademarks.
13. 5% applies to copyrights; 10% applies to all other royalties.
14. Zero tax rate is specified in the table based on the current approach of the Belarusian tax authorities to dividends taxation under the US-Belarus DTT. We would like to note that due to the fact that the provisions of the US-Belarus DTT do not specify directly any exemptions with regard to dividends taxation, the approach of the Belarusian tax authorities may change and 12% WHT local rate can be applied to dividends.

Tax administration

Taxable period

The taxable period for CIT is a calendar year. The taxable period for CIT withheld on dividends accrued by Belarusian companies is a month.

Tax returns

A CIT return shall be submitted on a quarterly basis, whether a company has taxable income or not, by the 20th day of the month following the reporting period.

The above CIT reporting rule is also applicable on PEs of foreign companies as well as non-commercial representative offices.

CIT withheld on inter-company dividends must be reported by a tax withholding entity no later than the 20th day of the month following the month in which the dividends were accrued.

A tax-withholding entity must submit a WHT return to the tax authorities no later than the 20th day of the month following the month when the payment was made.

Payment of tax

CIT must be paid on a quarterly basis on actual results of financial and economic activity for a quarter, no later than the 22nd day of the month following the expired reporting period. CIT payment for the fourth quarter of 2016 shall be made no later than 22 December 2016 in the amount of 2/3 of CIT calculated based on the CIT amount for the third quarter of 2016 with subsequent recalculation of the whole CIT for the 2016 year and calculation of CIT to be additionally paid or reduced no later than 22 March 2017.

The above deadline shall also be followed by PEs of foreign entities.

CIT on inter-company dividends shall be paid no later than the 22nd day of the month following the month when dividends were paid.

WHT is to be calculated, withheld, and paid by a Belarusian company or a PE of a non-resident company no later than the 22nd day of the month following the month when the payment was made.

Tax audit process

Subject to certain exceptions, tax authorities are not permitted to carry out scheduled audits within two years after the company's incorporation or representative office's (of a foreign company) registration. Subsequently, scheduled audits can be performed every one, three, or five years, depending on whether a company is referred to as high-risk, middle-risk, or low-risk. The coordination plan of the state authorities audits is provided officially by the State Control Committee of the Republic of Belarus for every year and can be viewed at kgk.gov.by/ru/coordination-plans-ru.

Tax authorities can perform off-schedule audits only on the grounds defined in legislation (e.g. reorganisation or liquidation of a taxpayer, information about tax violations).

Belarus

Statute of limitations

Generally, the statute of limitations for penalty due to failing to fulfil tax liability is either three years after the date when violation was committed or six months after the date when violation was exposed by tax authorities.

Topics of focus for tax authorities

Below are the main areas that the tax authorities usually monitor in Belarus:

- Application of CIT incentives.
- CIT treatment of overdue loans and recognition of accounts payable above the statute of limitations.
- Proper justification of deductible marketing, consulting, and other similar costs for CIT purposes.
- VAT deductions and relevant justification thereof.
- Tax treatment of reorganisations, mergers, and spin-offs.
- Tax treatment of related party transactions.
- Tax treatment of charitable and other similar donations.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

An agreement between the government of the Republic of Belarus and the government of the United States to improve international tax compliance and to implement FATCA was signed on 18 March 2015.

Significant developments

Notional interest deduction (NID)

The Belgian NID rate for tax year 2016 (accounting years ending between 31 December 2015 and 30 December 2016, both dates inclusive) is 1.630% (2.130% for small and medium-sized enterprises [SMEs]).

The Belgian NID rate for tax year 2017 (accounting years ending between 31 December 2016 and 30 December 2017, both dates inclusive) is 1.131%. (1.631% for SMEs).

Reduced withholding tax (WHT) for dividend payments to non-resident minority corporate shareholders

In 2012, the European Court of Justice ruled that the Belgian dividend WHT regime was incompatible with European Union (EU) law (the “Tate & Lyle case”). The regime stated that dividends distributed by Belgian companies to foreign corporate shareholders having a holding interest in the capital of a company of less than 10% but with an acquisition value of at least 1.2 million euros (EUR) (currently EUR 2.5 million) are, in principle, subject to full withholding at 25% (27% as of 1 January 2016).

According to the new Act (of 18 December 2015), dividends distributed by a Belgian company to non-resident minority corporate shareholders are now subject to a reduced WHT rate of 1.6995% (instead of 27%), provided certain conditions are met, among which are the following:

- The reduced rate of 1.6995% is only applicable to the extent that the Belgian WHT cannot be credited or is not refundable in the jurisdiction of the beneficiary.
- The beneficiary must be a non-resident corporate shareholder having a holding interest in the capital of the distributing company of less than 10% but with an acquisition value of at least EUR 2.5 million.
- The holding interest must be held for an uninterrupted period of at least one year (in full ownership).
- The shareholder must be a company located in the European Economic Area (EEA) or in a jurisdiction with which Belgium has concluded a double taxation agreement (‘double tax treaty’ or DTT).
- The shareholder must have a legal form as mentioned in the EU Parent-Subsidiary Directive or a similar form.

This measure is applicable to dividends attributed or made payable as of 28 December 2015.

Patent income deduction (announced, not yet enacted)

In the framework of the Belgian government formation and the budget for 2015, a feasibility study (and possible extension) of the patent income deduction regime with regard to software licences and other technology-related intellectual property (IP) has been announced. Furthermore, it is also the intention to align the recent regime with the so-called modified nexus approach. Changes in law are expected in the summer of 2016.

Belgium

Increase in WHT on investment income (announced, not yet enacted)

As of 1 January 2016, the WHT on investment income, such as interest and dividends, is increased from 25% to 27% (some exceptions apply). This new rate is applicable to investment income paid or attributed on or after 1 January 2016.

Base erosion and profit shifting (BEPS)

On 5 October 2015, the Organisation for Economic Co-operation and Development (OECD) presented its final package of base erosion and profit shifting (BEPS) measures for a comprehensive, coherent, and co-ordinated reform of the international tax rules.

Anti-tax avoidance package (ATAP)

On 28 January 2016, the EU Commission presented its ATAP, which consists of the following seven parts:

- Legislative proposals for an Anti-Tax Avoidance Directive.
- Legislative proposals for an amendment to Directive 2011/16/EU to coordinate implementation of G20/OECD BEPS country-by-country (CbC) reporting requirements.
- A proposed 'EC Recommendation' to member states on the implementation of G20/OECD BEPS recommendations on tax treaty abuse and on permanent establishments (PEs).
- A general policy 'Communication' on the ATAP and the proposed way forward.
- General policy 'Communication' on an EU external strategy for effective taxation.
- A European Commission (EC) Staff Working Document.
- A Study on Aggressive Tax Planning.

The EU-28 governments will have to decide if they are willing to go further than the G20/OECD BEPS outcomes on interest limitation rules, hybrid mismatches, controlled foreign companies (CFCs), tax treaty abuse, and PEs.

Reform of the corporate income tax (CIT) regime in Belgium

On 9 April 2016, the Belgian government has announced that the CIT regime in Belgium will be reformed to (i) strengthen the competitive position of the Belgian market and (ii) become increasingly fair for SMEs. At this time, only the basic principles of the new measures have been agreed whilst the details are not yet clear and are still subject to change. The measures will now have to be translated into legislative texts.

Real estate investments funds

On 9 April 2016, the Belgian government has announced that new measures will be introduced to make the Belgian real estate market more attractive for foreign investors. For example, it has been announced that new real estate investments funds (*fonds d'investissement immobilier spécialisé* / *gespecialiseerd vastgoedbeleggingsfonds*) dedicated to institutional investors will be introduced. These funds will create a non-quoted real estate investment platform dedicated to institutional investors.

Taxes on corporate income

Corporate income tax (CIT)

In general, the tax base for CIT purposes is determined on an accrual basis and consists of worldwide income less allowed deductions. The rules are equally applicable to companies and PEs. It is assumed that all income received by a company is, in principle, business income. The income tax base is based on the Belgian Generally Accepted Accounting Principles (GAAP) financial statements of the company.

General rate

CIT is levied at a rate of 33% plus a 3% crisis tax, which is a surtax, implying an effective rate of 33.99%. This rate applies to both Belgian companies (subject to Belgian CIT) and

Belgian PEs of foreign companies (subject to Belgian non-resident CIT). Capital gains on qualifying shares realised without meeting the one-year holding requirement are taxed at 25.75% (25% plus a 3% crisis tax, which can be offset against available tax losses), provided certain conditions are met (and at 0.412% if this one-year holding period and certain other conditions are met). Non-qualifying shares are subject to the 33.99% rate.

Fairness tax

Large companies (i.e. not SMEs, *see below*) are subject to a fairness tax on all or part of their distributed dividends. The fairness tax is a separate assessment at a rate of 5.15% (5% increased by a 3% crisis surtax) borne by the company distributing the dividends.

The tax is only applicable if, for a given taxable period, dividends have been distributed by the company that stem from taxable profit that has been offset against (current year) NID and/or carried forward tax losses. Liquidation bonuses and share buy-back proceeds are not in scope of the fairness tax.

First step

The taxable basis of the fairness tax is determined by the positive difference between the gross dividends distributed for the taxable period and the taxable result that is effectively subject to the nominal corporate taxes of generally 33.99% (there are some exceptions).

Second step

This positive difference as determined in the first step will be decreased with the part of the dividends stemming from taxed reserves constituted, at the latest, during tax year 2014. To identify the origin of the reserves, a last in first out (LIFO) method is applied.

Third step

The outcome of the above calculation is limited by a percentage, being the result of the following fraction:

- The numerator consists of the amount of carried forward tax losses and NID that has been effectively used in the taxable period at hand.
- The denominator consists of the taxable result of the taxable period at hand, excluding the tax-exempt reductions in the value and provisions.

The fairness tax itself is not tax deductible. The fairness tax due can be offset against prepayments made and tax credits.

Large companies are in scope of the fairness tax, whereas it does not apply to SMEs.

Belgian PEs of foreign companies are also in scope of the fairness tax. For Belgian PEs, 'distributed dividends' are, for the purposes of the fairness tax, defined as the part of the gross dividends distributed by the head office, which proportionally corresponds with the positive part of the accounting result of the Belgian PE in the global accounting result of the head office.

Progressive rates

A progressive scale of reduced rates applies to taxpayers with lower amounts of taxable income. If the taxable income is lower than EUR 322,500, the following rates apply (including the 3% crisis tax):

Taxable income (EUR)	CIT rate (%)
0 to 25,000	24.98
25,001 to 90,000	31.93
90,001 to 322,500	35.54

Belgium

In case the threshold of EUR 322,500 is reached, the total taxable basis of the company is subject to the general CIT rate of 33.99%. Even if their taxable income does not exceed the aforesaid ceilings, certain companies are excluded from the reduced rate and are subject to the normal CIT rate. These companies include, amongst others, companies that are owned 50% or more by one or more companies.

Surcharge

A surcharge is due on the final CIT amount upon assessment (including the crisis surtax). The surcharge can be avoided if sufficient advance tax payments are made (*see Payment of tax in the Tax administration section for more information*). For tax year 2016 and 2017 (i.e. accounting years ending between 31 December 2015 and 30 December 2017, both dates inclusive), the surcharge is 1.125%.

Secret commissions tax

A special assessment of 103% (100% plus 3% crisis tax) is applicable to so called 'secret commissions', which are any expense of which the beneficiary is not identified properly by means of proper forms timely filed with the Belgian tax authorities. These expenses consist of:

- Commission, brokerage, trade, or other rebates, occasional or non-occasional fees, bonuses, or benefits in kind forming professional income for the beneficiaries.
- Remuneration or similar indemnities paid to personnel members or former personnel members of the paying company.
- Lump-sum allowances granted to personnel members in order to cover costs proper to the paying company.

The secret commissions tax can be limited to 51.5% (50% plus 3% crisis tax) if certain conditions are met. In some cases, no secret commissions tax applies.

Taxable income of non-residents

Certain income attributed by a Belgian tax resident to a non-resident is taxable in Belgium. A paragraph in the Belgian Income Tax Code functions as a 'catch all clause' to tax certain payments made to a non-resident of Belgium.

Belgian debtors are required to retain professional WHT on payments made to non-residents located in a jurisdiction with whom Belgium has:

- not concluded a DTT (so-called 'tax havens'), or
- concluded a DTT that contains a specific provision that gives Belgium taxing powers as regards certain services (e.g. technical assistance) (this covers, amongst others, the DTTs with Argentina, Brazil, Ghana, India, Morocco, Romania, Rwanda, and Tunisia).

The rate amounts to 33% on the gross fee paid (resulting in an effective tax rate of 16.5%, as a lump sum deduction of 50% as professional expenses is allowed) unless, however, the non-resident is able to demonstrate that:

- if no DTT applies, this income is effectively taxed (i.e. included in the tax basis) in its own residence state, in which case no professional WHT is due at all in Belgium on the payment, or
- if a DTT applies, the relevant provision provides for a reduced rate, in which case the professional WHT due is limited by rate of the DTT.

Local income taxes

No tax is levied on income at the regional or local level. Note that immovable assets (land, building, and possibly machinery and equipment) situated within the Belgian territory are, in principle, subject to an immovable WHT that is levied locally.

Corporate residence

A company is considered to be a resident of Belgium for tax purposes if it has its registered office, its principal place of business, or its seat of management in Belgium. The seat of management has been defined by Belgian case law as the place from where directing impulsions emanate or the place where the company's effective management and central administration abide, meaning the place where the corporate decision-making process actually takes place.

Permanent establishment (PE)

The definition of a Belgian establishment under Belgian domestic tax law corresponds, but is broader than, the definition of a PE under either the OECD Model Tax Convention or Belgium's DTTs. Since the latter prevail over domestic law, Belgium generally cannot levy tax if a non-resident has a Belgian establishment that does not constitute a PE under the relevant DTT. Although Belgium would not be entitled to tax the profit attributable to the Belgian establishment in such a case, the foreign company should still abide by certain formal tax requirements (e.g. filing a non-resident tax return, responding to requests for information).

Other taxes

Value-added tax (VAT)

Scope of VAT

The following transactions are subject to VAT in Belgium if they are considered to take place in Belgium:

- The supply of goods and services effected for consideration by a taxable person acting as such.
- The acquisition of services for consideration from outside Belgium between taxable persons.
- The importation of goods.
- Intra-Community acquisition of goods for consideration by a taxable person acting as such or by a non-taxable legal person (including the transfer of assets).
- The self-supply by a taxable person.

Intra-Community supply and intra-Community acquisitions

An intra-Community supply of goods is a supply of goods whereby the goods are moving from one EU member state to another EU member state. In the member state of departure of the goods, the goods can be, under certain conditions, VAT exempt. As a result, the intra-Community acquisition of the goods (i.e. the arrival of the goods in the other member state) will be taxable.

Standard and other VAT rates

The standard VAT rate is 21%. This rate applies to all goods and services not qualifying for one of the reduced VAT rates.

The following supplies of goods and services have a 12% VAT rate:

- Restaurant and catering services, excluding beverages.
- Phytopharmaceutical products.
- (Inner) tubes.
- Certain combustible material.
- Margarine.
- Social housing and certain renovation works on immovable property.

The following supplies of goods and services have a 6% VAT rate:

Belgium

- Works on immovable property (limited in time and with strict conditions).
- Basic necessities, such as food and pharmaceuticals.
- Distribution of water through pipelines.
- Some printed materials.
- Transport services of persons.
- Hotels and camping.
- Use of cultural, sporting, and entertainment venues.
- Works of art, antiques, and collector's items.
- Supplies of cars for the disabled, as well as equipment and accessories for such cars.
- Supplies of certain devices for therapeutical use.
- Contract farming.
- Repair of bicycles, shoes and leather goods, clothing, and household linen.
- Some housing for private use, for the disabled, and in the social sector.
- Copyrights.
- Concerts and exhibitions.
- Some medical equipment.
- Goods and services supplied by social organisations.

The following supplies of goods and services are VAT exempt with credit ('zero-rated'):

- Exports and certain related services.
- Intra-Community supplies of goods and certain related services.
- Imports, intra-Community acquisitions, and local trades of goods within VAT warehouses or under special customs regimes.
- Certain transactions on goods placed in a customs or VAT warehouse.
- Cross-border passenger transportation by ship or aircraft.
- Supplies to diplomats and international organisations.
- Certain supplies of goods and services to certain vessels and aircraft mainly involved in international passenger transport.
- Certain newspapers, journals, and magazines.
- Supply of recovered goods or products.

The following supplies of goods and services are, in principle, VAT exempt without credit:

- Healthcare services (in the near future, cosmetic surgery will be subject to Belgian VAT).
- Social services.
- Education services.
- Sport services.
- Cultural services.
- Banking services.
- Interest charges.
- Financial services (option to tax possible for paying and cashing services).
- Insurance services.
- Land and real estate sales.
- Property leasing and letting.

It should be noted that specific conditions may apply to the above two categories.

VAT grouping

Under a VAT group, independent legal persons are treated as one single taxable person for VAT purposes if they are closely linked financially, economically, and organisationally. Hence, for VAT purposes, all supplies of goods and services to or by the group members are deemed to be made to or by the group itself.

The application of a VAT group has, amongst other, the following consequences:

- No issuance of ‘inter-company’ invoices between companies in the VAT group (however, internal documents will be required).
- No charging of VAT between companies in the VAT group (avoiding VAT pre-financing).
- No cascade of limitation of the right to deduct VAT when on charging costs to companies in the VAT group.
- Head office abroad outside the VAT group will be seen as a third party and will trigger VAT on head office/PE services.
- Mutual liability between VAT group members.
- Filing of one VAT return for all companies in the VAT group.

Import duties

Goods coming from outside the European Union and imported into Belgium are subject to import duties. Import duties are calculated based on three main elements:

Classification

All products are classified based on the rules laid down in the Combined Nomenclature (CN). All products traded in the world can be classified according to the tariff nomenclature. An import duty rate is linked to every CN-code.

Origin

Based on international trade agreements (i.e. bilateral), a preferential import duty rate (i.e. a lower import duty rate) may apply to products imported in the European Union in case the goods meet the applicable criteria in the country benefiting from the agreement.

Valuation

The customs value is determined based on one of the six rules laid down in the Union Customs Code (UCC). The most commonly used rule to determine the customs value upon importation in the European Union is the ‘transaction value’ (i.e. Article 70 of the UCC).

These valuation rules are harmonised on a global level through Article 7 of the General Agreement on Tariffs and Trade (GATT) valuation agreement.

Various economic customs regimes (i.e. bonded warehouse, inward processing relief, outward processing relief) are available, allowing optimisation schemes throughout the supply chain.

Excise duties

Excise goods are divided into the following two groups:

- Community excise products: These are defined as excise products at the EU-level, and the same procedures (i.e. excise applications, suspension regimes) should apply in all EU member states. Products in scope are (i) alcoholic beverages, (ii) energy products, and (iii) manufactured tobacco.
- National excise products: These can be defined at the member state level on a voluntary basis. Belgium has identified the following goods as being ‘national excise products’: (i) non-alcoholic beverages (i.e. soda), (ii) coffee, and (iii) water.

The European Union determined the threshold (with minimum and maximum rates) in which the EU member states have to define the applicable excise duty rate per product on a national basis. With respect to the national excise goods, every member state has the liberty to freely decide upon the national excise duty rates applicable.

Property taxes

Immovable property is subject to an immovable WHT (also called ‘real estate tax’) due on a yearly basis. This tax is calculated in function of the so-called ‘cadastral income’ of

Belgium

the property (a kind of 'deemed' rental income). The deemed rental income constitutes the average normal net income of one year (based on rental income of 1976). This means that the deemed rental income can be considered as a presumed income, which generally will not match the actual income.

The tax rate depends on where the property is located (as it is a combination of regional, provincial, and communal tax).

Machinery and equipment can also be considered as immovable property in certain cases.

Registration duties

Purchases and transfers of real estate located in Belgium, including buildings (except new buildings, which are subject to VAT as described above), are subject to registration duty at the rate of 12.5% of the higher of transfer price or fair market value (except in the Flemish Region, where the applicable rate is 10%).

If the purchase or transfer of land is subject to VAT, no registration duties will be charged on the purchase or transfer.

In principle, no registration duty is due upon a capital contribution; only a fixed fee of EUR 50 is due.

Stamp duties

Stamp duties are due on transactions relating to public funds that are concluded or executed in Belgium, irrespective of their (Belgian or foreign) origin, to the extent that a professional intermediary intervenes in these transactions. Exemptions for non-residents and others are available.

Payroll taxes

In Belgium, there are no payroll taxes applicable other than those for social security contributions and income tax withholding.

Social security contributions

The base percentage of the employer contribution for white collar workers is currently 30% (consisting of a basic 22.65% and a percentage for salary moderation of 7.35%) calculated on an uncapped salary.

However, the Act of 26 December 2015 (Tax Shift Act) foresees a gradual decrease of the base percentage of social security contributions for employers to 25% by 1 January 2018.

On top of the basic percentage of the employer's social security contributions, additional contributions may be due of which the percentages may vary depending on the company and the sector whereto the company belongs.

However, all employers that employ employees, subject to all aspects of the social security regulation, might currently benefit from a structural reduction (which will be abolished in the future for the majority of the employees). Therefore, the employer social security contributions are rather around 28% of the total gross compensation.

Social security contributions are deductible in determining taxable income both for the employer (CIT) and for the employee (personal income tax or PIT).

For foreign employees with an international employment (i.e. assignment or simultaneous employment) in Belgium who continue to be subject to the social security schemes of their home country, an exemption from subjection to the Belgian social security scheme may be granted, depending on the place of residence and/or nationality of the claimant.

In the framework of the Belgian government formation, the base percentage of employers' social security contributions will gradually decrease. As of 1 April 2016, the base employers' contribution amounts to 30%. As of 1 January 2018, it is envisaged that the base employers' contribution will amount to 25%.

Branch income

PE profits are subject to the normal tax rate for Belgian corporations of 33.99% (or 25.75% for certain capital gains on shares not meeting the one-year holding period or 0.412% for those capital gains meeting the one-year holding period and the subject to tax test) plus the possible surcharge for absence/insufficiency of advance payments (*see the Taxes on corporate income section*). PEs can benefit from the reduced CIT rates under specific conditions (*see the Taxes on corporate income section*).

Capital gains realised on real estate located in Belgium by non-resident companies are subject to a professional WHT at the normal CIT rate of 33.99%.

In general, the taxable basis is the difference between the profits actually realised and the tax-deductible costs actually incurred in the hands of the Belgian PE as determined from the separate set of accounts of the Belgian PE. No legal requirement exists to keep a separate set of accounts in the hands of the PE, in case no legal PE is deemed to exist in Belgium.

Should no separate set of accounts be kept, the taxable basis in the hands of the Belgian PE, in principle, can be determined on a lump-sum basis. As a result, the yearly taxable basis will be determined on 10% of the gross turnover realised in Belgium with a minimum of EUR 7,000 per employee (the minima vary between EUR 7,000 and EUR 24,000, depending on the kind of business) and an absolute minimum of EUR 19,000. Note that such determination of the taxable basis is often formalised in a written agreement with the local Belgian tax inspector without deviating from the tax law criteria as mentioned.

Income determination

Inventory valuation

Belgian accounting law provides for the following four methods of inventory valuation: the method based on the individualisation of the price of each item, the method based on the weighted average prices, the last in first out (LIFO) method, and the first in first out (FIFO) method. All of these methods are accepted for tax purposes.

Capital gains

Capital gains are subject to the normal CIT rate. For tax purposes, a capital gain is defined as the positive difference between the sale price less the costs related to the disposal of the asset and the original cost of the acquisition or investment less the depreciations and write-offs that have been deducted for tax purposes.

Capital gains realised on tangible fixed assets and intangible assets could be subject to a deferred and spread taxation regime, provided that certain conditions are met.

Capital gains on shares

Net capital gains realised by a large Belgian company (or Belgian PE) on shares are subject to a 0.412% tax, provided the subject to tax condition and the one-year holding period are met. The 0.412% tax is not applicable to SMEs.

If the net capital gain is realised before the minimum holding period of one year was reached and the taxation condition (*see below*) is met, the net capital gain is taxed at

Belgium

a rate of 25.75% (25% plus a 3% crisis tax, which can be offset against available tax losses). There are some exceptions (e.g. for financial institutions).

Dividend income

Dividends received by a Belgian company are first included in its taxable basis on a gross basis when the dividends are received from a Belgian company or on a net basis (i.e. after deduction of the foreign WHT) when they are received from a foreign company.

Provided certain conditions are met, 95% of the dividend income can be offset by a dividends-received deduction (DRD).

Dividends-received deduction (DRD)

A DRD of 95% of dividend income can be applied under certain conditions (*see below*). Any unused portion of the DRD from dividends received from an EEA subsidiary or a subsidiary from a country with which Belgium has concluded a DTT with a nondiscrimination clause on dividends can be carried forward to future tax years. The same also applies for dividends from Belgian subsidiaries.

The DRD is subject to a (i) minimum participation condition and (ii) taxation condition.

Minimum participation condition

According to the minimum participation condition, the recipient company must have, at the moment of attribution, a participation of at least 10% or an acquisition value of at least EUR 2.5 million in the capital of the distributing company. The beneficiary of the dividend must have been holding the full legal ownership of the underlying shares for at least one year prior to the dividend distribution or commit to hold it for a minimum of one year.

Taxation condition

The taxation condition, in summary, means that the dividend income received must have been subject to tax at the level of the distributing company and its subsidiaries if the former redistributes dividends received.

The taxation condition is based on five 'exclusion' rules and certain exceptions to these rules. Basically, the exclusion rules apply to the following:

- Tax haven companies, which are companies that are not subject to Belgian CIT (or to a similar foreign tax) or that are established in a country where the common taxation system is notably more advantageous than in Belgium. Countries in which the minimum level of (nominal or effective) taxation is below 15% qualify as tax havens for the application of the regime (a list of tainted countries has been published). The common tax regimes applicable to companies residing in the European Union are, however, deemed not to be notably more advantageous than in Belgium.
- Finance, treasury, or investment companies that, although are subject in their country of tax residency to a corporate tax similar to that of Belgium as mentioned in the item above, nevertheless benefit from a tax regime that deviates from common law.
- A Belgian real estate investment trust or foreign regulated investment trust that benefits from a substantially more advantageous tax regime than the Belgian tax regime.
- Offshore companies, which are companies receiving income (other than dividend income) that originates outside their country of tax residency and in these countries such income is subject to a separate taxation system that deviates substantially from the common taxation system.
- Companies having PEs that benefit globally from a taxation system notably more advantageous than the Belgian non-resident corporate taxation system. This exclusion is deemed not applicable to EU companies with an EU PE.

- Intermediary holding companies, which are companies (with the exception of investment companies) that redistribute dividend-received income, which on the basis of regulations mentioned under the items above would not qualify for the DRD for at least 90% of its amount in case of direct holding.

While this is a summary of the exclusion rules, numerous exceptions to these exclusion rules exist and need to be analysed on a case-by-case basis.

Bonus shares (stock dividends)

Distribution of bonus shares to shareholders in compensation for an increase of the share capital by incorporation of existing reserves is, in principle, tax free. The situation may be different if the shareholder has the choice between a cash or stock dividend.

Interest, rents, and royalties

Interest that accrued, became receivable by, or was received by a company, and rents and royalties received by a company, are characterised as business profits and taxed at the general CIT rate of 33.99%. The income can be offset against available tax assets.

Foreign income

A Belgian resident company is subject to CIT on its worldwide income and foreign-source profits not exempt from taxation by virtue of a DTT (*see the treaty list in the Withholding taxes section*). This income is taxable at the normal CIT rate in Belgium (i.e. 33.99%).

A foreign tax credit may be available for foreign royalty income and foreign interest income. *See the Tax credits and incentives section for more information.*

Undistributed income of subsidiaries, whether or not they are foreign, is not subject to any Belgian income tax in the hands of the Belgian corporate shareholder (i.e. no CFC rules).

Deductions

As a general rule, expenses are tax deductible in Belgium if they are incurred in order to maintain or to increase taxable income, they are incurred or have accrued during the taxable period concerned, and evidence of the reality and the amount of such expenses is provided by the taxpayer.

Depreciation and amortisation

Depreciation of an asset is tax deductible to the extent that it results from a devaluation of the asset, and the devaluation effectively occurred during the taxable period concerned. The depreciation methods that are accepted by Belgian tax law are the straight-line method (linear method) and the double-declining balance method. In the latter case, the annual depreciation may not exceed 40% of the acquisition value. The double-declining method may not be used for intangible fixed assets, automobiles, minibuses and automobiles used for mixed purposes, and for assets, the use of which has been transferred to a third party (e.g. operational leasing).

Depreciation rates are based on the expected lifetime of the assets concerned, which are normally agreed upon by the taxpayer with the tax authorities. However, for certain assets, rates are set by administrative instructions as follows:

Assets	Depreciation rate (%)
Commercial buildings	3
Industrial buildings	5
Machinery and equipment (depending on the type)	20 or 33
Rolling stock	20

Belgium

Intangible fixed assets have to be amortised over a period of at least five years for tax purposes (except research and development [R&D] expenses, for which the minimum amortisation period is three years).

For the year of acquisition of an asset, only the proportionate share of an annual depreciation calculation can be accepted as depreciation for income tax purposes (in principle to be computed on a daily basis). This provision, however, applies only to companies that cannot be considered as SMEs (*see the Tax credits and incentives section for the definition*). In contrast, SMEs can deduct a full year of depreciation in the year of acquisition.

Goodwill

Belgian accounting and tax laws allow amortisation of goodwill arising at the occasion of an asset deal. For Belgian tax purposes, the amortisation period, which depends on the elements included in the goodwill, is a minimum of five years, and the straight-line method must be applied. According to the Minister of Finance, '*clientele*' (client lists) should be amortised over a period of ten to 12 years. The aforesaid accounting and tax amortisation for goodwill is not available if tax-free mergers or de-mergers occur (i.e. they, among other things, follow the continuity principle from an accounting perspective).

Start-up expenses

Incorporation costs, at the election of the taxpayer, may be deducted fully in the year of incorporation or can be depreciated over a maximum period of five years.

Interest expenses

Interest expenses are, in principle, tax deductible insofar as thin capitalisation limits are respected (*see Thin capitalisation in the Group taxation section*) and the interest is at an arm's-length rate.

Provisions and bad debt reserves

Provisions and bad debt reserves are tax deductible provided that:

- they are set up to cover clearly identified losses and charges (i.e. not to cover 'general' risks) that have been rendered probable by events that took place during the taxable period concerned
- they are booked at the end of the financial year in one or more separate accounts on the balance sheet
- they are reported on a specific form enclosed with the tax return, and
- they relate to losses and charges that are deductible for Belgian tax purposes.

Charitable contributions

Charitable contributions may not be less than EUR 40 and may not exceed 5% of the total net income of the taxable period, with a maximum of EUR 500,000 to be tax deductible. The law includes an exhaustive list of gifts that are deductible, including gifts in cash to certain social, cultural, or scientific organisations.

Automobile costs

The deductibility rate of automobile costs in the hands of Belgian companies (and Belgian PEs) varies in a range between 50% and 120% of the automobile costs, depending on the CO2 emission of the company car and its catalogue value.

Moreover, the deduction for fuel costs is limited to 75%.

Taxes, fines, and penalties

Belgian resident and non-resident CIT, including advance tax payments, any surcharge imposed in case of insufficient advance tax payments, any interest for late payment of the CIT, and any Belgian movable WHT, is not tax deductible in Belgium. Immovable

WHT (i.e. real estate tax), secret commissions tax, and foreign taxes, however, are considered as tax deductible.

Regional taxes and contributions, including penalties, increases, ancillary expenses, and interest for late payment, are not tax deductible in Belgium (certain exceptions apply).

Any administrative and judicial fines or penalties (except for VAT proportionate fines) are not tax deductible in Belgium.

Disallowed expenses

The following expenses are not tax deductible in Belgium (this list is not exhaustive):

- 31% of restaurant expenses.
- 50% of representation expenses and business gifts (there are exceptions).
- Advantages granted to employees for social reasons, with certain exceptions (e.g. hospitalisation insurance premiums, gifts of a small value).
- Capital losses on shares (except upon liquidation, up to the amount of paid-up capital of the liquidated company).
- Brokerage, commissions, commercial discounts, or other payments allocated directly or indirectly to a person in the form of a Belgian public bribery.
- 17% of the benefit in kind of company cars (minimum taxable basis).

Net operating losses

Principle: carried forward without limitation in time

Tax losses can, in principle, be carried forward without any limitation in time.

Change of control

If a change of control of a Belgian company takes place (e.g. if the shares of the company are transferred and along with them the majority of the voting rights), the amount of tax losses, investment deduction, and NID carried forward available in that company (before the change of control) can no longer be offset against future profits unless the change can be justified by legitimate needs of a financial or economic nature in the hands of the loss realising company (i.e. evidence must be brought that the change is not purely tax driven).

A ruling can be requested from the Belgian tax authorities to obtain upfront certainty on the Belgian tax treatment of the contemplated operation, so as to ensure the losses are not forfeited as a result of a change of control.

Tax-free merger or (partial) de-merger

If a tax-free merger or (partial) de-merger takes place, Belgian tax law provides for a partial transfer/maintenance of the rollover tax losses of the absorbed/absorbing company. The carried forward tax losses of the companies involved are then reduced based on the proportionate net fiscal value of the company (before the restructuring) compared to the sum of the net fiscal values of both the merging entities (before the restructuring).

No carryback

There is no tax loss carryback provision under Belgian tax law.

Payments to foreign affiliates

A Belgian company can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length. However, when such payments are made, either directly or indirectly, to a foreign person, entity, or PE that is not subject to tax or is subject to a tax regime that is notably more advantageous than the Belgian tax regime on such income, there is a reversal of the burden of proof. Such charges will be disallowed unless the Belgian company can

Belgium

prove that the payments are reasonable and that they correspond to genuine and real transactions.

Fees, commissions, etc. paid to beneficiaries located in foreign countries and not properly reported, will, in principle, be subject to the secret commissions tax.

Payments to tax havens

Companies subject to Belgian CIT or Belgian non-resident CIT that make direct or indirect payments to recipients established in tax havens are obligated to declare them if they are equal to or exceed EUR 100,000 during the tax year. The reporting has to be made on a special form to be attached to the (non-resident) CIT return.

In the event of non-reporting, the payments will be disallowed expenses for CIT purposes. Where the payments have been reported duly and timely, their tax deductibility will be subject to the ability of the taxpayer to prove that (i) said payments were made as part of genuine, proper transactions and (ii) they were not made to an entity under an artificial construction.

A tax haven is defined as: (i) a jurisdiction where the nominal corporate tax rate is less than 10% or (ii) a jurisdiction regarded by the OECD as not being cooperative concerning transparency and international exchange of information (EoI) (i.e. on the OECD 'black list'). A royal decree containing the list of countries where the nominal corporate tax rate is lower than 10% is published.

Group taxation

Belgium does not apply any tax consolidation mechanism with respect to corporate tax.

Transfer pricing

The arm's-length principle is formally codified in the Belgian Income Tax Code (BITC). In addition, the tax authorities can make use of other, more general, provisions in the BITC to assess the arm's-length nature of transfer prices (e.g. the general rules on the deductibility of business expenses). The BITC contains provisions that tackle artificial inbound or outbound profit shifting. These are the so-called provisions on abnormal or gratuitous benefits.

If a Belgian tax resident company grants an abnormal or benevolent benefit, the benefit should be added back to the taxable income as a disallowed expense unless the benefit was taken into account to determine the taxable basis of the beneficiary. Even if the abnormal or gratuitous benefit was taken into account for determining the taxable basis of the beneficiary, the tax deductibility of the related expenses can still be denied in the hands of the grantor. Notwithstanding the above exception, the abnormal or benevolent benefit should be added back to the taxable income when the benefit is being granted to a non-resident affiliated company. Such granted abnormal or benevolent benefits can be offset against any tax deductible items (e.g. tax losses carried forward, NID).

If a Belgian tax resident company receives an abnormal or benevolent benefit, and to the extent that such benefit is received from a related company, the benefit received cannot be offset by the Belgian company against its current year or carried forward tax losses or other tax deductions. According to the position of the tax authorities (by the Minister of Finance), the taxable basis of a Belgian company equals at least the amount of the benefit received (however, there is case law deviating from this position).

Belgium has a special transfer pricing investigation unit with a mission to (i) build up and share transfer pricing expertise and (ii) carry out in-depth transfer pricing audits of multinationals present in Belgium through a subsidiary or PE. The number of transfer pricing audits being initiated in Belgium has increased significantly.

There are no specific transfer pricing documentation requirements or rules on the selection of transfer pricing methods included in the Belgian tax legislation. Nevertheless, the Belgian tax authorities adhere to the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and the EU Code of Conduct. In the administrative guidelines that were issued, taxpayers are urged to proactively compile a coherent and consistent documentation set, although there is no legal obligation to do so. If information is requested, the taxpayer must provide the data requested within (in principle) one month.

However, following the BEPS project and the OECD's recommendations in relation to transfer pricing documentation and country-by-country reporting (Action Point 13), the Belgian Minister of Finance recently announced the introduction of country-by-country (CbC) reporting legislation and new transfer pricing documentation requirements. The OECD CbC reporting initiative is fully endorsed by Belgium and will be implemented into local legislation. The threshold of EUR 750 million consolidated turnover for completing and filing is expected to be maintained. The exact commencement date of the CbC reporting requirements is yet to be confirmed, but it is expected to be as of financial year 2016. The Minister also confirmed that mandatory local documentation requirements are being considered in view of more transparency, efficient audits, and increased legal certainty. The scope of the documentation requirements, which is being analysed by the tax administration, is expected to closely adhere to the OECD guidance.

Advance pricing agreements (APAs) can be concluded (unilaterally, bilaterally, and multilaterally) via which the taxpayer can obtain upfront certainty.

Thin capitalisation

For the purposes of the thin capitalisation rule, equity is defined as the sum of the taxed reserves at the beginning of the taxable period and the paid-up capital at the end of the taxable period.

For the purposes of the thin capitalisation rule, debt is defined as:

- all loans, whereby the beneficial owner is not subject to income taxes, or, with regard to the interest income, is subject to a tax regime that is substantially more advantageous than the Belgian tax regime, and
- all intra-group loans.

Bonds and other publicly issued securities are excluded, as well as loans granted by financial institutions.

Interest payments or attributions in excess of the 5:1 ratio are not tax deductible. The thin capitalisation rule is not applicable to loans contracted by (movable) leasing companies and companies whose main activity consists of factoring or immovable leasing (within the financial sector).

In case the loans are guaranteed by a third party or in case loans are funded by a third party that partly or wholly bears the risk related to the loans, the third party is deemed to be the beneficial owner of the interest if the guarantee or the funding has tax avoidance as main purpose.

To safeguard companies having a centralised treasury function in Belgium, a netting for thin capitalisation purposes is allowed at the level of the interest payments and interest income related to the centralised financing function/cash pool function.

Controlled foreign companies (CFCs)

There are no CFC rules in Belgium.

Tax credits and incentives

Foreign tax credits (FTCs)

Unilateral relief from double taxation of foreign-source income may be provided in the form of an exemption, credit, or tax reduction, depending on the type of income. Where taxable, foreign income is subject to tax only on its net amount (i.e. after deduction of expenses and foreign taxes).

Dividend income FTC

Generally, no FTC is available for foreign dividends.

Royalty income FTC

Unless a more advantageous provision (e.g. a tax sparing provision) would apply based on a DTT concluded by Belgium (*see the treaty list in the Withholding taxes section*), an FTC is granted under Belgian tax law with respect to foreign royalty income, provided that this income has effectively been subject to taxation in its source country. This FTC is equal to 15/85 of the net frontier amount (i.e. after deduction of foreign WHT) of the royalty. The FTC is, in principle, included in the taxable basis of the recipient company and is only creditable against Belgian income tax to the extent that said foreign income is included in the taxable basis of the Belgian company. Excess FTC, if any, is not refundable and cannot be carried forward.

Interest income FTC

Unless a more advantageous provision (e.g. a tax sparing provision) would apply based on a DTT concluded by Belgium (*see the treaty list in the Withholding taxes section*), the Belgian beneficiary of foreign interest income is entitled to an FTC under Belgian tax law, provided that this income effectively has been subject to taxation in its source country. The computation of the FTC is based on the net frontier interest income (i.e. after deduction of foreign WHT) and adjusted with a ratio taking into account the financial leverage. The FTC is, in principle, included in the taxable base of the Belgian lender to the extent the FTC can be effectively used. It is creditable against the CIT due but is not refundable in case of excess, neither can it be carried forward.

Notional interest deduction (NID)

Belgian corporate income taxpayers can claim NID for tax purposes, reflecting the economic cost of the use of capital, equal to the cost of long-term, riskfree financing.

The NID rate for tax year 2016 (i.e. accounting years ending between 31 December 2015 and 30 December 2016, both dates inclusive) is 1.630% (2.130% for SMEs).

The NID rate for tax year 2017 (i.e. accounting years ending between 31 December 2016 and 30 December 2017, both dates inclusive) is 1.131% (1.631% for SMEs).

As of tax year 2013, new excess NID can no longer be carried forward, whereas, under the old rules, 'excess NID' (i.e. NID that cannot be claimed owing to the taxpayer having insufficient taxable income) could be carried forward for a maximum of seven years.

However, the 'stock' of excess NID (stemming from previous years, i.e. tax years 2012 and before) can still be carried forward for seven years (as was previously the case), though the excess NID that can be applied in a given year is limited to 60% of the taxable profit (i.e. the profit remaining after setting off carried-forward tax losses and other tax deductions). The 60% limit is only applicable to the part of taxable profit exceeding EUR 1 million. The portion of excess NID that cannot be used due to the '60% rule' (i.e. 40% of taxable profit minus EUR 1 million) can be carried forward indefinitely.

As for determining the basis on which this deduction is calculated, the company's share capital plus its retained earnings, as determined for Belgian GAAP purposes and as per the last year-end date, will have to be taken into account with some adjustment.

The accounting equity as per the last year-end date has to be reduced by, amongst others, (i) the fiscal net value of financial fixed assets qualifying as participations and other shares, (ii) the fiscal net value of participations and shares that qualify for the dividends received deduction regime, and (iii) if a company has a foreign PE located in a jurisdiction with which Belgium has concluded a tax treaty, the NID is reduced by:

- the lower amount of (i) the result of the foreign PE or real estate or (ii) the net asset value of the PE or real estate multiplied by the NID rate if it concerns a PE located in the European Economic Area or
- the net asset value of the PE or real estate multiplied by the NID rate if it concerns a PE or real estate located in a treaty country outside of the European Economic Area.

In addition, various other adjustments should be made in order to avoid abuse.

Investment deductions

The investment deduction is a deduction from the tax base in addition to the normal tax depreciation on, amongst others, qualifying patents, environmentally friendly R&D investments, and energy-saving investments.

A company can benefit from a one-shot investment deduction of 13.5% (for tax year 2016, i.e. accounting years ending between 31 December 2015 and 30 December 2016 [both dates inclusive], and tax year 2017, i.e. accounting years ending between 31 December 2016 and 30 December 2017 [both dates inclusive]) of the acquisition value of qualifying investments. With respect to environmentally friendly R&D investments, a company can also opt for a spread investment deduction of 20.5% (for tax year 2016 as well as tax year 2017) of the depreciation on qualifying environmentally friendly R&D investments.

If there are insufficient or no taxable profits, the investment deduction can be carried forward without any limitation in time or in amount. Certain restrictions apply as to the maximum amount of investment deduction carried forward that is tax deductible in a given year.

Under certain conditions, the investment deduction carried forward can be lost after a change of ownership (*see Net operating losses in the Deductions section*).

Note that the investment deduction for patents and R&D cannot be combined with the tax credit for patents and R&D.

As of 2016, note that, in principle, only development costs can be activated and no longer costs of research.

Patents and R&D tax credit

As an alternative for the above investment deduction for patents and R&D, a company may opt for a tax credit for which the advantage corresponds to the advantage of the investment deduction (i.e. 13.5% one-time and 20.5% for a spread investment deduction for tax year 2016 as well as tax year 2017), multiplied by the normal CIT rate of 33.99%. The investment deduction implies a deduction of the taxable basis, while the tax credit is a reduction of the tax due. A key advantage of the tax credit for patents and R&D is that it is refundable if it has not been deducted for five subsequent tax years.

Note that the amount of the tax credit should be deducted from the basis of the NID.

Reduced payroll tax for qualifying researchers

80% of the payroll tax withheld from wages of qualifying researchers by a Belgian company or establishment does not need to be remitted to the Belgian Tax Revenue if the researchers are employed in R&D programmes and have a qualifying degree (e.g. a degree in [applied] sciences, veterinary medicines, biotechnology). For the employee's

Belgium

personal tax liability, the Belgian Tax Revenue considers that the payroll WHT amount was entirely withheld.

Belgian law mentions a definition of 'scientific research' and foresees a reporting obligation with the Public Federal Administration for Scientific Policy (*Belspo*), which can approve or reject the request for application if asked for.

Patent income deduction (PID)

The PID allows a taxpayer to deduct, as an extra tax deduction in the tax return, 80% of qualifying gross patent income. Therefore, only 20% of gross patent income will be taxable at the normal CIT rate (33.99%), resulting in a maximum effective tax rate of 6.8%.

Qualifying taxpayers are corporate taxpayers in Belgium that are involved in the development or further improvement of patents through an in-house R&D centre. They include both Belgian companies and Belgian PEs of foreign companies. The company must be the owner, licensee, or usufruct holder of the patents for which they claim the benefits of the PID.

To benefit from the PID, the R&D centre should qualify as a 'branch of activity' or 'line of business', which means that it should be a division of an entity that is capable of operating autonomously. The Belgian company or PE should have relevant substance to perform and supervise R&D activities, but may use subcontractors, related or unrelated, in its development of the patents or extended patent certificates. The R&D centre can be located outside Belgium but must belong to a Belgian legal entity. The condition to qualify as a 'branch of activity' does not apply to SMEs.

Qualifying patents

The PID applies where patents or supplementary protection certificates are owned by a Belgian company or establishment as a result of its own patent-development activities (partly or fully) in an R&D centre in Belgium or abroad. SMEs can also benefit from the PID even if the patents are not developed or improved within a research centre that forms a branch of activity.

The PID also applies where patents or supplementary protection certificates are acquired by a Belgian company or establishment from a related or unrelated party, in full ownership, joint ownership, usufruct, or via licence agreement, provided it has further improved the patented products or processes in the company's R&D centre in Belgium or abroad.

For patents licensed by the Belgian company or establishment to any party, whether related or unrelated, the tax deduction amounts to 80% of the relevant (gross) patent income to the extent the income does not exceed an arm's-length price.

In the framework of the Belgian government formation and the budget for 2015, an assessment (and possible extension) of the PID regime with regard to software licences and other technology-related IP has been announced. Furthermore, it is also the intention to align the recent regime with the so-called 'modified nexus approach'. The 'modified nexus approach' should, in principle, be implemented in internal domestic law by 30 June 2016 at the latest.

Withholding taxes

Domestic corporations and PEs of foreign corporations paying dividends, interest, royalties, service fees, and/or certain rentals are required to withhold tax.

A uniform WHT rate of 27% is applicable on dividends, interest, and royalties. There are some exceptions.

Some WHT reductions/exemptions are foreseen under Belgian domestic tax law.

B

- A WHT exemption is foreseen for the distribution of profits made by a Belgian subsidiary to an EU parent company if both the parent and subsidiary have a legal form that is mentioned in the Annex to the EU Parent-Subsidiary Directive, if both are subject to CIT, and if the parent company holds, during an uninterrupted period of at least one year, a shareholding of at least 10% in the capital of the distributing company (implementation of the Parent-Subsidiary Directive). If the one-year holding requirement is not fulfilled at the time of distribution, the distributing company provisionally should withhold the amount of WHT due (but it does not have to pay the tax authorities). Once the one-year holding requirement is met, the provisionally withheld tax amount can be paid out to the parent company. If the one-year holding requirement eventually is not complied with (e.g. because the Belgian participation is disposed of by the parent company before the one-year holding requirement is met), then the Belgian company has to pay the amount provisionally withheld, increased by interest for late payment (at an annual rate of 7%), to the competent services of the Belgian tax authorities.
- The application of the Parent-Subsidiary Directive to dividend payments has been extended towards non-EU-resident companies. Dividends distributed towards a country that has concluded a tax treaty with Belgium containing a qualifying exchange of information clause can be exempt from WHT, subject to the same conditions as laid down in the Parent-Subsidiary Directive.

On top of the above exemptions, there are other dividend/interest exemptions/reductions implemented in Belgian tax law.

With respect to payments made to non-resident corporations or individuals, WHT exemptions and/or reductions can also be found in the DTTs concluded by Belgium.

Notes

1. The treaty concluded with ex-Yugoslavia is still applicable to Bosnia-Herzegovina, Croatia, Macedonia, Montenegro, and Serbia.
2. Not applicable to Hong Kong.
3. The treaty concluded with the former USSR is still applicable to Kyrgyzstan, Moldova, Tajikistan, and Turkmenistan.
4. It concerns an EU country or the treaty contains a qualifying exchange of information clause. Hence, the rate of 0% is applicable subject to the same conditions as invoked by the Parent-Subsidiary Directive (see above). Where multiple rates apply, the difference is generally based on the percentage of participation the recipient holds (directly) in the capital of the company paying the dividends.
5. Under the Bilateral II agreement concluded between Belgium and Switzerland, a rate of 0% is applicable under certain conditions.
6. With respect to EU countries, a WHT exemption is applicable, provided that the conditions laid down in the Interest & Royalty Directive are met (see above). Furthermore, please note that some treaties contain an exemption for trade receivables or loans concluded with a governmental body.
7. The treaty concluded between Belgium and the former Yugoslavia.

The treaties that are currently in force are listed above. Based on the websites of the Belgian government, the following tax treaties are signed, modified, or under renegotiation (including some for the exchange of information clause): Canada, Congo, Greece, Iceland, Ireland, Isle of Man, Macao, Macedonia, Malaysia, Malta, Mexico, Moldova, New Zealand, Norway, Oman, Poland, Qatar, Russia, Rwanda, Seychelles, Spain, Switzerland, Tajikistan, Turkey, Uganda, the United Kingdom, Uruguay, and Uzbekistan.

Tax administration

Taxable period

The assessment is based on the taxable income of a financial year. For the application of the rules on statutory limitations and of new laws, an assessment year is related to each taxable period. If the financial year corresponds with the calendar year, the assessment year is the following calendar year (e.g. financial year closing 31 December 2016 corresponds with assessment year 2017). If the financial year does not correspond with the calendar year, the assessment year, in principle, equals the calendar year during which the financial year ends (e.g. financial year closing 30 June 2016 corresponds with assessment year 2016).

Tax returns

As a general rule, the annual resident or non-resident CIT return cannot be filed less than one month from the date when the annual accounts have been approved and not later than six months after the end of the period to which the tax return refers. For instance, assuming that the accounting year has been closed on 31 December 2016, the corporate tax return needs to be filed, in principle, by 30 June 2017 at the latest (this deadline is often postponed).

Payment of tax

CIT is payable within two months following the issue of the tax assessment. Interest for late payment is charted at the (non-cumulative) rate of 7% per year.

The advance tax payments needed to avoid the CIT surcharge (*see the Taxes on corporate income section*) can be made in quarterly instalments. In the situation where the company's financial year ends on 31 December 2016, the due dates for the advance tax payments are 10 April 2016, 10 July 2016, 10 October 2016, and 20 December 2016. If the due date is a Saturday, Sunday, or a bank holiday, the payment is due on the next working day. Advance tax payments give rise to a tax credit. The tax credit amounts to 1.5%, 1.25%, 1%, or 0.75% of the advance tax payment made, depending on whether such payment has been made respectively in the first, second, third, or fourth quarter (percentages applicable for tax year 2017 [financial years that close as of 31 December 2016 until 30 December 2017]). If the total amount of credits exceeds the surcharge, no surcharge is due, but the excess is not further taken into account for the final tax computation. The taxpayer can choose to either have the excess reimbursed by the tax authorities or used as an advance tax payment for the next year.

Tax audit process

A tax audit normally begins with a written request for information from the tax inspector. The taxpayer must provide the data requested within (in principle) one month. Any documentary evidence considered relevant to the audit can be requested and reviewed by the authorities. Once the tax inspector has completed the analysis, any adjustment is proposed in a notification of amendment outlining the reasons for the proposed amendment. The taxpayer has 30 days to agree or to express disagreement. The tax inspector then makes an assessment for the amount of tax that the tax inspector believes is due (taking into account any relevant comments of the taxpayer with which the inspector agrees). Thereafter, the taxpayer has six months within which to lodge an appeal with the Regional Director of Taxes. The decision of the Regional Director of Taxes may be appealed and litigated. In a number of circumstances, the intervention of the courts can be sought prior to receiving the decision of the Regional Director of Taxes.

Statute of limitations

Based on the Belgian income tax statute of limitations, the period during which the tax authorities are authorised to perform a tax audit and adjust the taxable basis is three years (except in case of fraud, where the statute of limitations is extended to seven years) starting from the first day of the assessment year, unless the company's financial year does not correspond to the calendar year. The same statutes of limitations

are applicable for social security contributions with the difference that the statute of limitations begins to run as from the end of the month following the month for which the social security contributions were due.

Belgian ruling practice

Belgium has a long tradition of providing formal and informal rulings. Currently, a taxpayer may request an advance tax ruling on a wide range of subjects, including, but not limited to, CIT, individual tax, non-resident income tax, legal entity income tax, VAT, customs, and registration duties. The request should cover a 'specific and concrete' operation, which effectively is envisaged to be realised in the foreseeable future. The ruling should be filed before the transaction takes place. In practice, the ruling decision should be granted prior to the filing of the CIT return of the year of the transaction. A ruling is binding upon the Belgian tax authorities for a renewable period of a maximum of five years. Delivery of a requested ruling takes, on average, three months.

The Ruling Office is autonomous from the Belgian tax authorities and has the legal authority to issue decisions, which are binding upon the Belgian tax authorities. The Ruling Office increasingly has adopted a constructive approach towards the taxpayer and is seen in the Belgian tax practice as a powerful insurance instrument in ascertaining the Belgian tax treatment of contemplated operations.

Topics of focus for tax authorities

Topics of interest to Belgian tax authorities include:

- Transactions with entities based in tax havens.
- Structures aimed at tax optimisation for the group.
- Significant increase in transfer pricing audits by the special transfer pricing investigation unit (deviating profit margins compared to prior years, material drop in operating profit or turnover, structurally loss-making entity, thin capitalisation, and others).
- Significant increase in professional WHT audits.
- The deductibility of interest payments (e.g. to tax haven companies).
- Substance.

Other issues

Base erosion and profit shifting (BEPS)

The OECD's Action Plan on BEPS was published in July 2013 with a view to address perceived flaws in international tax rules. The Action Plan identifies actions needed to address BEPS, sets deadlines to implement these actions, and identifies the resources needed and the methodology to implement these actions. The Action Plan contains 15 separate action points with three key themes: coherence, substance, and transparency. The Plan is focused on addressing these issues in a coordinated, comprehensive manner, and was endorsed by G20 Leaders and Finance Ministers at their summit in St. Petersburg in September 2013. Belgium has also been actively involved in this initiative and is likely to endorse and/or implement the outcome of the Action Plan.

On 5 October 2015, the OECD presented its final package of BEPS measures for a comprehensive, coherent, and co-ordinated reform of the international tax rules. The package was endorsed by the G20 Finance Ministers at their meeting on 8 October 2015, in Lima, Peru. It is expected that, following the release of the final package, unilateral measures will be introduced into the Belgian legislation in line with the OECD final package.

Cayman tax

The 'Cayman tax' is a taxation of certain income from certain legal constructions in the hands of Belgian individuals (and Belgian entities subject to legal entities income tax).

Belgium

Income from certain legal constructions becomes subject to PIT in the hands of the private individual, being the founder or beneficiary of the legal construction.

The legal constructions in scope include, among others, foreign trusts, foundations, undertakings for collective investments or pension funds when not publicly offered, low-taxed or non-taxed entities, etc. to which the Belgian individual (or Belgian entity subject to legal entities tax) is, in one way or another, linked as a founder, an effective beneficiary, a potential beneficiary, etc.

By application of this measure, the income of certain legal constructions becomes taxable in the hands of the private individual regardless of whether the income has been distributed by the legal construction to the private individual. The constructions are deemed to be transparent.

Generally, a distinction is made between two categories of legal constructions.

The legal constructions of the first category concern the trusts without legal personality. The income realised by these trusts or paid or attributed by these trusts as of 1 January 2015 is taxable in the hands of the Belgian private individual or entity subject to legal entities tax (being the founder or beneficiary of the legal construction), as if the Belgian individual or entity subject to legal entities tax would have realised the income directly.

The second category concerns legal constructions, being foreign entities (with legal personality), which are subject to an effective tax rate of less than 15%. The income realised by the legal constructions are deemed to be realised directly by the Belgian private individual (being the founder or the beneficiary of the legal construction).

Within both categories, the income concerns profits, such as real estate income, movable income (interest, dividends, and royalties), miscellaneous income, and earned (i.e. professional) income.

United States (US) Foreign Account Tax Compliance Act (FATCA), Common Reporting Standard (CRS), and Directive 2014/107/EU

On 23 April 2014, Belgium signed a Model I Intergovernmental Agreement (IGA) with the United States. This IGA aims at implementing a system of automatic exchange of information relying on FATCA.

The purpose of FATCA is to identify financial accounts held by certain US persons (or, in some cases, by non-US entities with 'US controlling persons') outside the United States. Belgian financial institutions will report information relating to 2014 for the first time.

In 2014, the OECD released its CRS in order to achieve a system of automatic exchange of information similar to FATCA but at a multilateral and global level. Early adopters will exchange information for the first time in 2017 with respect to 2016.

At the EU level, the CRS was incorporated into Directive 2014/107/EU amending Directive 2011/16/EU as regards mandatory exchange of information in the field of taxation. This directive must be implemented by member states into their domestic law by 31 December 2015.

The CRS has been built on the basis of so-called Model I IGAs and relies generally on the same structure and base concepts. However, there remains noticeable differences between FATCA and CRS (amongst others due to the multilateral character of the CRS) that will impact the number and the type of accounts to be reported.

In a nutshell, Belgian entities qualifying as financial institutions (which includes depository and custodial institutions as well as certain investment and insurance entities) are required to perform specific due diligence in order to identify financial

accounts (as defined) held by relevant reportable persons. Information in respect of these accounts will have to be reported to the Belgian Federal Public Service - Finance (FPS - Finance). The latter will then transmit the information received to the US Internal Revenue Service (IRS) (under FATCA) or the relevant competent authorities (under CRS). In addition, accounts held by certain entities qualifying as passive non-financial (foreign) entities are also reportable if those entities have 'controlling persons' who are US persons (FATCA) or reportable persons (CRS).

The FPS - Finance released draft guidance notes on FATCA in May 2015. As a draft, these guidance notes are still subject to amendments and official approval.

On 16 December 2015 the exchange of information regulation and the FATCA requirements were enacted.

The purpose of the Act of 16 December 2015 "on the communication of information relating to financial accounts, by Belgian financial institutions and the Federal Public Authority of Finance, within the framework of an automatic exchange of information at international level for tax purposes" is (amongst other things) to implement Directive 2014/107/EU (amending Directive 2011/16/EU as regards automatic exchange of information in the field of taxation), the US-Belgium Intergovernmental Agreement of 23 April 2014 (on FATCA), and the multilateral agreement signed on 29 October 2014 within the framework of the CRS.

The measures entered into force 10 days after publication of the Act (31 December 2015) with respect to the United States and EU member states. For other states, the entry into force will be determined by Royal Decree.

Significant developments

The Bermuda government has extended the tax exemption granted to Bermuda companies under the Exempt Undertakings Act of 1976 from 28 March 2016 until 31 March 2035. The extended Undertaking provides protection to companies from any newly enacted taxes on income or capital gains until 31 March 2035. Existing companies are required to pay a fee of 179 Bermudian dollars (BMD) with an application for the tax exemption extension in order to benefit from this protection.

Bermuda raised the rate of payroll tax by 1% in 2016; this included a rise in the rate on impacted companies from 14.5% to 15.5%. The rate of tax recoverable from employees is limited to 6%.

The Office of the Tax Commissioner (OTC) has announced an update such that, effective for reporting tax periods beginning on or after 1 July 2014, share options granted to employees will be subject to payroll tax on the difference between fair market value at vest date, less exercise price at vest date. Payroll tax is thus payable at vesting on any positive difference. This change in payroll tax treatment is also applicable to other share-based awards similar to share options, such as performance share plans (PSPs) and restricted share units (RSUs). Companies should ensure that payroll tax payments are made in accordance with the revised policies. There are also other transition provisions for refund claims for payroll taxes already paid at grant date on stock option rights that were subsequently forfeited due to employment termination before the vesting period. We note that the application of these rules is complex; as such, we recommend you consult your tax adviser.

As part of 2016 Bermuda Budget Highlights, a 5% General Services Tax (GST) on services provided to the public was introduced. As this is a change that will require significant adjustments for service providers and the government of Bermuda, this tax will not be implemented until on or after April 2017. Please note that exemptions to the GST include the following sectors: healthcare, banking and insurance, and small service providers.

In April 2016, the Bermuda Minister of Finance announced that Bermuda has agreed to comply with the provision of the Multilateral Competent Authority Agreement on the Exchange of Country-by-Country Reporting. By doing so, the applicable multinational enterprises headquartered in Bermuda will need to report for the 2016 year by 31 December 2017. We note that additional guidance in relation to this reporting regime is expected as the filing deadline approaches.

Taxes on corporate income

Bermuda imposes no taxes on profits, income, dividends, or capital gains, has no limit on the accumulation of profit, and has no requirement to distribute dividends.

The Bermuda government routinely grants Tax Assurance Certificates to exempted undertakings (i.e. exempted companies, permit companies, exempted partnerships, and exempted unit trust schemes) on application to the Minister through the Bermuda Monetary Authority. These Tax Assurances guarantee that any Parliamentary imposition of such taxes will not be applicable to the company and its operations in future years. Currently, the Tax Assurances being granted extend to 31 March 2035. See details on exempted companies in the *Other issues section*.

Corporate residence

As there are no income or profit taxes on Bermuda corporations, corporate residence is not specifically defined in Bermuda.

Other taxes

Value-added tax (VAT)

There is no VAT or sales tax in Bermuda.

Customs duties

Customs import duties are imposed on almost all goods arriving on the island at varying rates. The most common rate of customs import duties is at 25%.

Excise taxes

There are no excise taxes imposed in Bermuda.

Property taxes

A land tax is imposed on all developed land in Bermuda, with exceptions for government land, Bermudian pensioner's primary homesteads, and certain charitable organisations. The tax is based on an assessed annual rental value (ARV) of each valuation unit.

The progressive scale of tax rates ranges between 0.60% and 23.00% based on the ARV of the unit, while commercial properties are taxed at a single rate of tax of 5.50%.

Transfer taxes

There is no transfer tax imposed in Bermuda.

Stamp taxes

Bermuda imposes stamp duty on a wide variety of legal instruments, such as transfers of property, deeds, and rental agreements. However, international businesses and partnerships ordinarily register as exempted companies and, as such, are not subject to stamp duty.

Payroll tax

Bermuda imposes a payroll tax on employers at a rate determined by the employer category or the total annual payroll. International businesses, which normally register as exempted undertakings, are liable by the employer category only at a rate of 15.50% of total employee remuneration of any kind. There is a reduced rate of 6% for two years for new Bermudian hires who meet specific criteria, which includes unemployment for the prior three month period.

Annual payroll	Rate (%)
Less than BMD 200,000	7.25
From BMD 200,000 to BMD 500,000	12.25
From BMD 500,000 to BMD 1 million	14.25
Greater than BMD 1 million and exempted undertakings	15.50

Bermuda

Employees include officers and directors of exempt companies if there is a contract for services and they regularly perform managerial functions on a day-to-day basis. However, a person who ordinarily works outside of Bermuda and whose period of employment in Bermuda does not exceed four consecutive weeks is exempt from payroll tax entirely. We note the application of these rules is complex; as such, we recommend you consult your tax adviser.

Remuneration is interpreted broadly, and includes salaries and the value of employee benefits paid or given to an employee for services to the employer wholly or mainly in Bermuda. Specifically, employee benefits include, but are not limited to, fees, bonuses, leave pay, profit sharing, redundancy settlements, housing allowances, any positive difference between the fair market value of stock options and the option price as of the vesting date, and all other payments or value given from an employer to an employee. In case of dispute, the burden of proof is on the employer to prove that any payment or benefit from the employer to an employee was not compensation. For further guidance on the details of taxable remuneration, we recommend you consult your tax adviser.

The maximum taxable remuneration per employee is set at BMD 750,000, above which there is no liability for payroll tax.

Payroll tax is payable on a quarterly basis, commencing on the first day of April, July, October, and January. Payments are due within 15 days of the end of each tax period. An employer may retain up to 6% from an employee's remuneration in relation to payroll tax remittance, where the remainder of tax would be paid by the employer. In other words, it is permissible for the employer to pay a greater percentage of payroll tax to decrease the amount of payroll tax the employee paid to less than 6%. There is an exemption of BMD 600 for each employee who remains employed at quarter-end and who worked for a minimum of 180 hours in that quarter. Civil and criminal penalties apply for non-compliance.

Social insurance

Bermuda's contributory pension scheme requires employers to make monthly contributions to the Contributory Pensions Fund for every employee above 17 years of age for each week in which the employee works more than four hours. An employer must ensure that each qualifying employee registers with the department and obtains a social insurance number. Civil and criminal penalties may apply to employers for failure to register or pay in for each qualifying employee.

Employees contribute a matching sum via weekly payroll deduction, with several exceptions. Full time students under the age of 26 who are employed during holidays, weekends, and summer breaks, and their employers, are entirely exempt from social insurance contributions. Employees over the age of 65 are exempt from contributing their half, although the employer must still contribute its part.

The current total contribution per employee per week is BMD 64.14. The employer portion is BMD 32.07 and the employee portion is BMD 32.07. This rate has not risen since 2013.

Annual company fee

Bermuda imposes an annual company fee, payable on registration and then every January thereafter. The assessable capital is defined as the total of the company's authorised share capital and its share premium account or the company's reserve account where the company is a mutual company. A mutual company is defined as an insurance or re-insurance company. The current rate schedule, which has not changed since 2008, is:

Assessable capital of the exempted company (BMD)	Annual company fee (BMD)
0 to 12,000	1,995
12,001 to 120,000	4,070
120,001 to 1,200,000	6,275
1,200,001 to 12,000,000	8,360
12,000,001 to 100,000,000	10,455
100,000,001 to 500,000,000	18,670
500,000,001 or more	31,120

B

Annual partnership fee

Exempted partnership fees are due on registration and annually in January thereafter. This fee is set at BMD 2,235 per year. For an initial registration after 31 August, the fee is half the annual fee.

Corporate services tax

Bermuda imposes a 7% corporate services tax on the providers of corporate services on the gross revenue earned from exempted companies and partnerships. Corporate services are defined to include corporate administration, corporate management, corporate secretarial, the provision of a registered office, and accounting and financial services. Directors and resident representation services are subject to the tax where the provider is in the business of providing corporate services.

Foreign Currency Purchase Tax

Foreign Currency Purchase Tax is imposed at the rate of 1% on foreign currency purchased by a resident from a local bank. *See Foreign exchange controls in the Other issues section for exemption information.*

Branch income

Branches are treated as distinct legal entities doing business in Bermuda.

Income determination

Since income taxes are not imposed on corporations in Bermuda, income determination is not relevant in the context of Bermuda taxation.

Deductions

Since income taxes are not imposed on corporations in Bermuda, deductions from income are not relevant in the context of Bermuda taxation.

Group taxation

Since income taxes are not imposed on corporations in Bermuda, group taxation is not relevant in the context of Bermuda taxation.

Note that a consolidated group cannot obtain one Tax Assurance Certificate for the group. A Tax Assurance Certificate must be obtained for each legal entity in Bermuda.

Bermuda

Tax credits and incentives

Bermuda offers no specific tax incentives other than the Tax Assurance Certificate described in the *Taxes on corporate income* section.

Withholding taxes

There are no withholding taxes in Bermuda.

Tax administration

Since income taxes are not imposed on corporations in Bermuda, tax returns are not required to be completed for corporate income tax compliance purposes.

Other issues

Choice of business entity

Corporations registered in Bermuda are either 'local', 'exempted', or 'permit' companies. International businesses are normally exempted companies and partnerships.

Local companies are incorporated by Bermudians to trade primarily in Bermuda. To meet requirements of a local company, the overall shares must be at least 60% Bermudian owned.

Exempted companies are often international businesses incorporated by non-Bermudians to conduct business outside Bermuda. Exempted companies are classified as an exempted undertaking and routinely apply for Tax Assurance Certificates. Exempted companies must meet the requirement to retain a minimum of one director, secretary, or representative who is resident in Bermuda.

Permit companies are overseas companies that have received a permit to carry on business in or from within Bermuda. A permit is obtained through application to the Minister of Finance to be able to engage in and carry on any trade or business in Bermuda. A mutual fund is exempt from obtaining a permit if a person who is resident in Bermuda is engaged to be the fund's administrator to perform duties such as corporate secretarial, accounting, administrative, registrar, and transfer agency, or dealing with shareholders.

Foreign exchange controls

Exempted companies and permit partnerships are considered as non-residents for exchange control purposes, unless 80% or greater of the total issued share capital is beneficially owned by Bermudians, or one half or more of the partners are resident in Bermuda. This allows these entities to make dividend payments, distribute capital, open and maintain foreign bank accounts, maintain bank accounts in any currency, and purchase securities without tax or governmental controls. *See Foreign Currency Purchase Tax in the Other taxes section for a description of the tax.*

Foreign Account Tax Compliance Act (FATCA)

Bermuda has entered into a Model 2 Intergovernmental Agreement (IGA) with the United States (US) to facilitate the implementation of the US's FATCA reporting requirements. This convention provides for both automatic and on-request exchange of information, as well as procedures for tipping off and search and seizure. Further details on the implementation of FATCA was delineated in a separate, highly detailed agreement, which specifies rules and procedures for the reporting of financial accounts held by US persons.

It is important to note that Bermuda also has a similar agreement with the United Kingdom (UK) to facilitate the implementation of the UK's FATCA reporting requirements. UK FATCA requires Bermuda foreign financial institutions to perform due diligence to identify and report on financial accounts of identified specified UK persons. Reporting for UK FATCA purposes will begin in 2016. The reporting will affect specified UK persons and non-UK entities controlled by specified UK persons.

Tax treaties

Bermuda has a tax treaty with the United States, which was signed in 1986 and entered into force in 1988. The agreement limits its applicability to insurance enterprises and specifically exempts insurance business profits of qualified Bermuda insurance companies from US taxation, unless the company has created a permanent establishment (PE) in the United States. Of note, the treaty provides no relief for US federal excise tax (FET) on insurance or reinsurance premiums. In brief, the requirements to maintain this tax benefit include greater than 50% direct or indirect ownership by Bermuda residents or US citizens, and that the income is not substantially used to make distributions to non-Bermuda residents or non-US citizens. For further guidance in this complex area, please consult your tax adviser.

Bermuda also has a Mutual Legal Assistance Treaty with the United States, which came into force in 2012. This agreement provides for cooperation in the area of criminal investigation, including economic crimes and money laundering, and for mutual assistance in document service, search and seizure, evidence production, and potential freezing and forfeiture of assets, which may be the proceeds or instruments of crime.

Tax information exchange agreements (TIEAs)

Bermuda has TIEAs with the following countries: Aruba, Australia, the Bahamas, Canada, China, Czech Republic, Denmark, Faroe Islands, Finland, France, Germany, Greenland, Iceland, India, Ireland, Japan, Mexico, the Netherlands, Netherlands Antilles, New Zealand, Norway, Portugal, Sweden, the United Kingdom, and the United States.

Significant developments

On 1 July 2015, the Bolivian government passed Law N° 713 that extended application of the Financial Transaction Tax (FTT) up to fiscal year (FY) 2018 and increased FTT rates as follows: 0.20% for FY 2016, 0.25% for FY 2017, and 0.30% for FY 2018.

On 29 December 2015, the Bolivian government increased the additional income tax rate for certain financial institutions from 12.5% up to 22% through Law N° 771. In particular, this law establishes that when financial institutions (except for development banks) obtain a return on equity that exceeds 6%, such entities must pay an additional income tax at a rate of 22%, which is levied on the same taxable base for determination of the annual corporate income tax (CIT); consequently, the total income tax rate will be 47% (25% + 22%).

Taxes on corporate income

All companies in Bolivia are subject to CIT at a rate of 25%. The taxable base is the profit arising from financial statements prepared in accordance with Bolivian generally accepted accounting principles (GAAP), adjusted for tax purposes (i.e. by non-deductible and non-taxable items) as per the requirements established in the tax law and regulations.

Bolivia taxes the income generated by corporations following the 'income source' principle (i.e. on a territorial basis). Therefore, income arising from goods and assets located or utilised economically within Bolivian territory and from any activity carried out within the country is considered Bolivian income source. Hence, such income is subject to CIT, regardless of the nationality/residence of the parties involved in generating such income or the place where the contracts were subscribed.

Additional income tax on certain financial institutions

Financial institutions (except for development banks) with a return on equity index higher than 6% must pay an additional income tax of 22%. This additional income tax cannot be offset against the transaction tax (*see below*), nor can it be considered a deductible expense for CIT purposes.

Surtax on extractive activities

There is an additional 25% CIT that affects only extractive activities of non-renewable natural resources (mining and oil/gas). This additional tax is calculated on the same basis as the normal CIT, except that two additional deductions are allowed: (i) up to 33% of the accumulated investment as of 1991, and (ii) 45% of the gross revenue of each extractive operation (e.g. a field or a mining site), with a threshold of 250 million bolivianos (BOB) for each extractive operation.

Special taxes on mining companies

In addition to the general CIT of 25% and the 25% surtax on extractive activities, all mining companies are also subject to an additional tax, calculated on the taxable net profits, at the following rates:

- 12.5% if the mining company carries out exploitation activities.
- 7.5% if the mining company carries out manufacturing activities with raw minerals that add value.

Mining companies are also subject to mining royalties at a rate of between 1% and 7% (depending on the kind of mineral), calculated on the total sales price. Note that there is a 60% discount on the rates of mining royalties if minerals are sold within the Bolivian market. Mining royalties can be offset against CIT if official mineral prices are lower than the prices established by the tax law; however, in this case, mining royalties paid will not be deductible for CIT purposes. On the contrary, if official mineral prices are higher than the prices established by the tax law, then mining royalties will be considered a deductible expense for CIT purposes. Note that mining royalties paid on minerals and metals that are not included in the tax law can always be offset against CIT.

Tax on gross income (transaction tax)

The tax on gross income (also known as transaction tax) generally taxes gross income arising from the performance of any economic or commercial activity (including non-profitable activities) at a rate of 3% on a monthly basis. However, exceptions exist for the sale of investments (as defined by the Stock Exchange Law) and the sale of minerals, oil, and gas within the local market, as long as such sales will ultimately be exported.

Corporations pay either CIT or transaction tax, whichever is higher. From an administrative perspective, CIT is due and paid at the end of each tax year and is considered an advanced payment of transaction tax, while transaction tax is due monthly. If during the year the cumulative monthly transaction tax due exceeds the CIT prepayment, the taxpayer will be subject to transaction tax on a monthly basis until the end of the tax year. For example, a corporation pays CIT for the 2015 fiscal year in April 2016. This payment is considered a prepayment for the transaction tax due between May 2016 and April 2017.

Local income taxes

There are no local taxes on income in Bolivia.

Corporate residence

A corporation is considered resident in Bolivia if it has been incorporated in Bolivia.

Permanent establishment (PE)

Note that Bolivian commercial laws allow foreign corporations to carry out isolated commercial acts in Bolivia without the obligation to constitute a permanent representation in Bolivia; however, such corporations cannot carry out habitual commercial acts without fulfilling the requirements established to constitute a company in Bolivia (e.g. through either a subsidiary or a branch). Unfortunately, Bolivian legislation does not include provisions to regulate situations that could trigger PE nor does it define what should be understood by 'carrying out habitual commercial acts'.

Bolivia

Other taxes

Value-added tax (VAT)

VAT is levied on the sale of movable goods and provision of services carried out within Bolivian territory at a rate of 13%, including definitive importations. Since this tax is included in the final price, the effective tax rate amounts to 14.94% (13%/87%).

Customs duties

Definitive importations are also subject to customs duties at a rate of 10% and 5% for consumption goods and capital assets, respectively. Customs duties are calculated over the 'transaction value' of the merchandise valued as per Bolivian customs legislation, plus transportation and insurance costs.

Taxes on specific goods for consumption (excise tax)

Specific goods are taxed at the following rates:

Product	Tax rate (%)
Cigarettes and tobacco for pipes	50 to 55
Vehicles (except those of high capacity and weight, which will pay a 10% rate of excise tax)	18

Other specific products taxed by specific measure:

Product	Tax rate (BOB)
Soft drinks (except natural water and fruit juices)	0.42/litre
Energising drinks	4.68/litre
Maize liquor	0.82/litre
Alcohol	1.58/litre
Beers with 0.5% or more volumetric degrees	3.50/litre + 1%
Wines	3.22/litre + 5%
Ciders and sparkling wines (except maize liquor)	3.22/litre + 5%
Liquors and creams in general	3.22/litre + 5%
Rum and vodka	3.22/litre + 10%
Other brandies/liquors	3.22/litre + 10%
Whiskey	13.42/litre + 10%

Special tax on hydrocarbons and derived products

A tax is charged on the commercialisation of the following products within the local market, regardless of whether they are produced in Bolivia or imported:

Product	Tax rate (BOB)
Gasoline	3.96/litre
Premium gasoline	4.90/litre
Aviation gasoline	4.57/litre
Kerosene	2.87/litre
National jet fuel	3.05/litre
International jet fuel	5.25/litre
National diesel oil	4.33/litre
Agro fuel	3.04/litre
Fuel oil	3.03/litre

Direct tax on hydrocarbons

A direct tax on hydrocarbons (IDH) is applied on the production of hydrocarbons, measured at the wellhead point, at a rate of 32%. To determine the taxable base for this tax, production of hydrocarbons must be valued taking into account the average sales price and considering the market (internal/external) where such hydrocarbons were sold.

Property tax on real estate and vehicles

Real estate and vehicles are annually subject to a property tax calculated at different rates based on a scale value determined by the municipal government, as follows:

Property value (BOB)		Property tax liability		
From	Up to	BOB	Plus (%)	Over excess of (BOB)
0	200,000	0	0.35	0
200,001	400,000	700	0.50	200,000
400,001	600,000	1,700	1.00	400,000
600,001	Onwards	3,700	1.50	600,000

Vehicle value (BOB)		Vehicle tax liability		
From	Up to	BOB	Plus (%)	Over excess of (BOB)
0	24,606	0	1.50	0
24,607	73,817	492	2.00	24,607
73,818	147,634	1,722	3.00	73,818
147,635	295,268	4,306	4.00	147,635
295,269	Onwards	10,949	5.00	295,269

Transfer taxes

Transfer of property and real estate are subject to a transfer tax at a rate of 3%. This tax must be determined based on the provisions set forth for the transaction tax (tax on gross income) and is collected by the municipal government where the property/real estate is registered.

Stamp taxes

There are no stamp taxes in Bolivia.

Financial Transaction Tax (FTT)

An FTT is levied on bank transactions (deposit or transfer of funds), carried out within the domestic financial system, at a rate of 0.20% for FY 2016, 0.25% for FY 2017, and 0.30% for FY 2018.

Special tax on lottery and gambling games

A specific tax on lottery and gambling games is applied in Bolivia. The tax is also applicable to business promotions that involve a raffle or random activities in providing awards in order to increase sales or attract clients. The tax rate for lottery and gambling games is 30%, whereas the tax rate for business promotions is 10%.

Payroll taxes

Employers are obliged to withhold and pay RC-IVA on gross salaries paid to employees on a monthly basis at a rate of 13% after labour contributions made to the pension fund administrators. Gross salary includes base salary, commission, bonuses, living allowance, and any other compensation in kind/cash granted to the employee.

Social contributions

The Pension Law establishes employer social contribution obligations. Social tax charges for employers are equal to 16.71% of gross salary in general and 18.71% for the mining sector.

Bolivia

Branch income

Branch income is subject to the same tax applicable to other types of Bolivian corporations (i.e. CIT of 25%). However, the net profits of Bolivian branches are deemed to be distributed to the head office at the annual filing due date for CIT (i.e. 120 days after the fiscal year end); consequently, a Bolivian branch must withhold 12.5% on such deemed distributed profits. Note that this can be avoided as long as the head office decides to reinvest the Bolivian branch's net profits.

Income determination

Taxable income is determined based on the financial statements prepared under Bolivian GAAP; then the income is adjusted for tax purposes in accordance with guidelines provided with respect to non-deductible and non-taxable items.

Inventory valuation

Inventories must be valued at replacement cost or market value for tax purposes, whichever is lower. Replacement cost is defined as the necessary costs incurred in acquiring or producing the assets as of the year-end, whereas market value is defined as the net value that the company would have obtained for the sale of assets in normal conditions as of the year-end, less commercialisation direct expenses.

Capital gains

Bolivian legislation does not include specific regulations for capital gains. Capital gains must be included in annual CIT if they are considered Bolivian-source income and will be taxed at a rate of 25%.

Dividend income

Dividend income obtained from domestic corporations subject to CIT must be excluded from the net taxable profits of the investor. Dividend income obtained from foreign corporations is not subject to CIT due to the fact that it is not considered Bolivian-source income.

Interest income

Interest income is subject to annual CIT if loans have been economically utilised within Bolivian territory since associated interest is considered Bolivian-source income.

Rent/royalty income

Rent/royalty income is subject to annual CIT as long as the income comes from an asset situated or economically utilised in Bolivian territory.

Foreign income

Bolivian corporations are taxed only on income generated within Bolivian territory.

Deductions

As a general principle, expenses may be deducted for CIT purposes as long as they are necessary to generate Bolivian-sourced income and are properly documented.

Apart from the above, the Bolivian Tax Code (BTC) has established minimum amounts (BOB 50,000) for which taxpayers must document their economic transactions through documents of payments recognised by the Bolivian financial system and regulated by the *Autoridad de Supervisión del Sistema Financiero* or ASFI (i.e. the bank regulator), including the possibility to document economic transactions through payments made via foreign financial institutions. Non-compliance with these requirements implies the lack

of the possibility to compute input VAT and to deduct the associated expenses for CIT purposes.

Depreciation

Depreciation of fixed assets is permitted for CIT purposes if fixed assets contribute to generate taxable income. Depreciation must be calculated based on a straight-line method and considering useful lives included in the tax law. Fixed assets that are not included in the tax law must be depreciated under a straight-line method in accordance with their useful lives, and this needs to be communicated to the tax authorities within ten working days following the incorporation of the affected fixed assets.

Some of the assets included in the tax law are as follows:

Asset	Useful life (years)	Depreciation rate (%)
Building	40	2.5
Fixture and furniture	10	10.0
Machinery	8	12.5
Equipment and facilities	8	12.5
Vehicles	5	20.0
Computer equipment	4	25.0
Tools	4	25.0
Processing plants for the oil/gas industry	10	10.0
Pipeline	10	10.0
Aircraft	5	20.0
Ships and motorboats	10	10.0

Goodwill

Intangible assets (including goodwill) with a true cost can be deductible for tax purposes within a five-year period as long as taxpayers have paid a price for their acquisition.

Start-up expenses

Taxpayers may choose to deduct start-up expenses within the first fiscal period or distribute proportionally their amortisation within a four-year period, commencing the first year of operation. Note that start-up expenses cannot exceed 10% of paid-in capital.

Interest expense

Interest paid to owners or shareholders is not deductible to the extent the interest rate exceeds the London Interbank Offered Rate (LIBOR) plus 3% in the case of foreign owners/shareholders and to the extent the interest rate exceeds the official interest rate on loans published by the Central Bank of Bolivia for national owners/shareholders. Interest deductible on shareholder loans may not exceed 30% of the total interest paid to third parties.

Bad debt

Allowances for bad debt provisions are permitted if determined as required by law, which establishes an average method based on uncollectable receivables of the last three years. Uncollectable receivables are defined by current legislation as those that come from trade receivables and either: (i) remain unpaid for more than one year and have been sued without obtaining a seizure or (ii) when the receivables do not justify being sued due to the quantity of the receivables, remain unpaid for more than three years.

Charitable contributions

Donations are not deductible unless made to non-profit organisations that are not subject to CIT. These donations are deductible up to a maximum of 10% of the donor's net taxable profit.

Bolivia

Compensation expenses

Salaries, as well as associated compensations, paid to employees without the application of withholding taxes (WHT) (i.e. RC-IVA) are not deductible.

Provisions for employees' severance payments are deductible. Provisions of other bonuses (e.g. holiday, productivity bonuses) accrued on behalf of employees are tax deductible as long as they are paid prior to the annual CIT filing due date and the company demonstrates it has withheld taxes (if applicable).

Fines and penalties

Fines and penalties arising from late tax payments are not tax deductible (except interest and restatement by inflation associated with tax obligations).

Taxes

Taxes effectively paid by the corporation as a direct taxpayer, other than CIT, are deductible for tax purposes. Any transaction tax (tax on gross income) that has been offset against CIT paid is not deductible for CIT purposes.

Taxes paid in the acquisition of fixed assets are not deductible. These taxes must be included in the cost of the asset and depreciated accordingly.

Other significant items

In broad terms, the following additional items are not deductible for tax purposes, according to current legislation:

- Owners' or shareholders' personal withdrawals and living expenses.
- Fees paid to individuals (i.e. acquisition of goods and services) for which no WHTs have been withheld.
- Amortisation of trademarks and other intangible assets, unless a price has been paid to acquire them.
- Provisions that are not specifically authorised by the tax law and regulations.
- Depreciation of fixed assets that include a revaluation reserve.
- Losses arising from illegal acts.

Net operating losses

Tax losses can be utilised over the following three fiscal years. New entrepreneurial productive projects with a minimum capital of BOB 1 million can utilise tax losses over the five fiscal years following the start-up of operations (including hydrocarbons and the mining sector).

Tax losses cannot be restated due to inflation in any case.

Bolivian legislation does not envisage carryback provision for tax losses.

Payments to foreign affiliates

Payments to foreign affiliates are subject to a 12.5% WHT with no restriction if the Bolivian company is remitting Bolivian-sourced income (e.g. interest on loans, provision of any kind of services, royalties).

Group taxation

Bolivia does not include group taxation rules within its legislation.

Transfer pricing

Arm's-length principle

The value of commercial and/or financial transactions carried out between related parties must be the value that would have been agreed between independent parties if they had engaged in the same transaction under the same circumstances. In addition, domestic companies related to foreign companies must prepare their accounting records separately, so that their financial statements determine taxable net profits from Bolivian-source income.

Existence of relationship

There is a relationship when an individual or a corporate entity participates in the direction, control, administration, or has capital in the other company, or when a third party directly or indirectly participates in the direction, control, administration, or has capital in two or more companies.

When individuals or domestic companies directly or indirectly conduct commercial and/or financial transactions with individuals or companies domiciled in countries or regions with low or null taxation (tax havens), these transactions will be considered as if they were carried out between related parties. Note that the Bolivian legislation does not include a 'black list' of countries with low or null taxation.

Requirement to submit a transfer pricing study

Taxpayers must submit a transfer pricing study to the Bolivian Internal Revenue Services (Bolivian IRS) in regards to the transactions carried out between related parties, together with the statutory financial statements and the annual CIT return. The transfer pricing study must include, among others:

- Complete identification of the taxpayer and related parties.
- Description of the activity carried out.
- Description, characteristics, amounts, and volume of transactions carried out between related parties.
- Tax identification number and country of residence of related parties.
- Commercial strategies, including determination of prices and other special circumstances.
- Functions carried out by the taxpayer within the related transaction from a commercial and industrial perspective.

Transfer pricing methods

Each of the following six methods may be used to determine the value of a commercial and/or financial transaction carried out between related parties:

- Comparable uncontrolled price.
- Resale price method.
- Cost plus method.
- Profit split method.
- Transactional net margin method.
- Evident price on transparent markets method.

The application of the abovementioned methods will depend on the nature and the real economic situation of the transactions under analysis and the circumstances of each case (i.e. rule of the best method). Definitions of the methods are in line with international principles defined by the Organisation for Economic Co-operation and Development (OECD), except for the sixth method, which comes from Argentinian legislation with some variations.

Bolivia

When it is not possible to determine the value of a transaction through one of the abovementioned methods, taxpayers can apply other methods that are in accordance with the nature and real economic situation of the transaction.

Thin capitalisation

Bolivian legislation does not include provisions for thin capitalisation apart from establishing restrictions on deductibility of interest when funding is provided by shareholders (*see Interest expense in the Deductions section*).

Controlled foreign companies (CFCs)

There are no CFC provisions in Bolivia.

Tax credits and incentives

Foreign tax credit

Bolivian legislation does not include provisions regarding recognition of foreign tax credits.

Investment incentives

No incentives are granted in Bolivia for domestic or foreign investment; however, further provisions are expected in this regard due to incoming regulation of Law 516 (Promotion Investment Law).

Export incentives

Export activities benefit from reimbursement of VAT and customs duties paid in the process of producing goods to be exported (with some limitations for oil/gas companies).

Other incentives

Foreign exchange transactions are legal in Bolivia, and a system of free-floating exchange rates exists.

Tourist and lodging services by hotels to foreign tourists without a residence or address in the country are exempt from VAT. In addition, importation of books, magazines, and newspapers are exempted from importation taxes (i.e. VAT), and the sale of produced or imported books are taxed at the zero VAT rate.

International transportation by highway is also exempt from VAT (or subject to 0% VAT rate).

Regional manufacturing tax incentives

New investments in manufacturing in the states of Oruro and Potosi are entitled to the following tax exemptions:

Exemption	Conditions of exemption
Import tariffs and VAT on imported machinery	Machinery imported exclusively for the new industry until start-up of operations.
Import tariffs on imported inputs	They do not replace domestic inputs of the same kind and are destined to a transformation process. The exemption is granted for the first ten years of operation.
Transaction tax	For ten years from the start-up of operations.
CIT	For ten years from the start-up of operations if the amount exempt is reinvested in fixed assets in the following fiscal year.

Withholding taxes

Payments made to Bolivian residents

Dividends paid to Bolivian residents, either individuals or corporations, are not taxable.

Payments made by corporations to individuals with respect to the acquisition of goods or provision of services that are not supported with an invoice or fiscal receipt are subject to a WHT of 8% on goods and 15.5% on services.

Payments to non-residents

Dividend payments, distributions of profits to the head office by Bolivian branches, interest payments, royalty payments, and fees paid for any type of services made to non-residents are subject to a WHT of 12.5%.

Activities considered partially performed within Bolivian territory (e.g. telecommunication services, insurance, transportation, production/distribution of cinematographic films, etc.) by non-residents are subject to a reduced WHT of 2.5%.

Tax treaties

Bolivia currently has in force double tax treaties (DTTs) with the Andean Community (i.e. Colombia, Ecuador, and Peru), Argentina, France, Germany, Spain, Sweden, and the United Kingdom.

Beneficial WHT rates on dividend distributions are provided by DTT with Spain and Sweden at 10% and 0%, respectively, provided the Spanish or Swedish holding company demonstrates it is the ultimate beneficial owner and holds more than a 25% interest in the Bolivian company.

Tax administration

Taxable period

The taxable year is the fiscal year. The fiscal year varies according to the activity of the corporation. Banks and commercial and other service activities have a fiscal year end as of 31 December; industrial, oil, and gas companies as of 31 March; agribusiness and forestry companies as of 30 June; and mining companies as of 30 September.

Tax returns

CIT is assessed on a self-assessment basis every fiscal year, and the due date for submission is 120 days after the fiscal year-end. Tax returns must be accompanied by audited financial statements (if applicable) and ancillary tax information as requested by the tax authorities.

Payment of tax

CIT is payable in one annual payment 120 days after the fiscal year-end, except for mining companies, which are obligated to make advance payments on a monthly basis with respect to the additional tax (i.e. 12.5% and 7.5% for exploitation and manufacturing mining companies, respectively).

Tax audit process

The tax audit process starts with a formal notification from the tax authorities where they indicate fiscal periods and taxes to be reviewed, together with a requirement of information. Tax inspection may generally take a 12-month period. Shortly after the provision of the finalisation of the tax inspection, a preliminary report of the tax audit's results is provided to the taxpayer in which the total tax debt is described (i.e. tax due, restatement, interests, and penalties) together with the legal arguments supporting the tax enquires.

Bolivia

Taxpayers do have 30 days after receiving the preliminary report to present all supporting documentation and technical arguments if they consider that the tax enquires do not have grounds to be claimed. Tax authorities do have 60 days to review all documentation/arguments provided by the taxpayer and then issue the final report, which is the formal document that could be subject to tax litigation, either via administrative process or by a judicial court. Note that claimed taxes must be paid in advance if taxpayers decide to litigate directly through the judicial court.

Statute of limitations

According to the current Bolivian Tax Code, tax authorities have up to a ten year period to review and recalculate taxes determined by taxpayers. This period is determined as follows: four years for 2012, five years for 2013, six years for 2014, seven years for 2015, eight years for 2016, nine years for 2017, and ten years for 2018. This period must be computed as of the first day of the following year in which the tax payment due date has occurred (e.g. if the tax payment deadline occurred in August 2013, the period that can be subject to tax review is 1 January 2014 to 31 December 2018).

Topics of focus for tax authorities

There are not specific topics/taxes of focus in which the tax authorities address their review. This will generally depend on the nature of the taxpayer and the industry where they belong (e.g. a mining company could be more likely to be subject to tax inspections than an industrial company). There are no formal statistics to provide information in this regard.

B

Significant developments

New Corporate Income Tax (CIT) Law in the Federation of Bosnia and Herzegovina (FBiH)

As of 5 March 2016, the new CIT Law came into force in the Federation of Bosnia and Herzegovina. The new CIT Law introduces the thin capitalisation rule, the obligation for possession of transfer pricing documentation at the moment of submission of the annual CIT return, and prescribes fines of up to 500,000 euros (EUR) for taxpayers who do not possess the prescribed documentation on transactions with related parties.

The Double Tax Treaty (DTT) concluded between Denmark and the former Yugoslavia that was valid in Bosnia and Herzegovina is no longer applicable

The DTT concluded between Denmark and the former Yugoslavia that was applicable in Bosnia and Herzegovina on the basis of succession is no longer valid in Bosnia and Herzegovina starting from 1 January 2016 due to reciprocity as the Danish Tax Authorities already denied application of this treaty.

Taxes on corporate income

Bosnia and Herzegovina consists of two entities: Federation of Bosnia and Herzegovina (FBiH) and Republika Srpska (RS), with a third region, the Brčko District (BD), being administered by both. Direct taxes are imposed at the entity/district level, while indirect tax regulations are imposed at the state level. CIT systems in Bosnia and Herzegovina have been partially harmonised in the past few years, but significant differences remain.

The Federation of Bosnia and Herzegovina, Republika Srpska, and the Brčko District tax resident corporations on a worldwide basis. Non-residents are taxed on income realised in the FBiH, RS, and BD territories.

FBiH CIT

A CIT payer in the Federation of Bosnia and Herzegovina is a resident company or other legal entity performing independent and permanent business activity through the sale of products and provision of services in the domestic or foreign markets for the purpose of generating profit.

A CIT payer is also a business unit of a legal entity from Republika Srpska and Brčko District that is registered in the territory of the Federation of Bosnia and Herzegovina for the income generated in the territory of the Federation of Bosnia and Herzegovina.

A CIT payer in the Federation of Bosnia and Herzegovina is also a business unit of a non-resident legal entity that performs activities through a permanent establishment (PE) in the territory of Federation of Bosnia and Herzegovina and is a resident of the Federation of Bosnia and Herzegovina.

Bosnia and Herzegovina

A CIT payer is also a non-resident in respect to the income generated from a resident of the Federation of Bosnia and Herzegovina.

The CIT rate in the Federation of Bosnia and Herzegovina is 10%.

RS CIT

A CIT payer in Republika Srpska is:

- A legal entity from Republika Srpska that generates income from any source in Republika Srpska, Federation of Bosnia and Herzegovina, Brčko District, or abroad.
- A business unit of a legal entity with its head office in Federation of Bosnia and Herzegovina or Brčko District that generates income in the territory of Republika Srpska.
- A non-resident legal entity that conducts business activity and has a PE in Republika Srpska, for income that is related to that PE.
- A non-resident legal entity that generates income from immovable property in Republika Srpska, for the income that is related to that immovable property.
- A non-resident legal entity that generates income in Republika Srpska, not mentioned above, and is subject to withholding tax (WHT) in accordance with the CIT law of Republika Srpska.

The CIT rate in Republika Srpska is 10%.

BD CIT

A CIT payer in Brčko District is:

- A legal entity from Brčko District that generates income from any source in Bosnia and Herzegovina or abroad.
- A business unit of a legal entity with headquarters in the Federation of Bosnia and Herzegovina or Republika Srpska, for income generated in Brčko District.
- A non-resident legal entity that conducts business activity and has a PE in Brčko District, for income that is related to that PE.
- A non-resident legal entity that generates income from immovable property in Brčko District, for the income generated in Brčko District.
- A non-resident legal entity that generates income in Brčko District, not mentioned above, and is subject to WHT in accordance with the CIT law of Brčko District.

The CIT rate in Brčko District is 10%.

Corporate residence

FBiH residency

Under FBiH CIT law, a resident is a legal entity that meets one of the following criteria:

- Headquarters (registration) is entered into a court registry of the Federation of Bosnia and Herzegovina.
- Management and supervision over the business activities is located in the Federation of Bosnia and Herzegovina.

FBiH permanent establishment

A PE of a non-resident is a permanent place of business through which the non-resident performs activity in whole or partially throughout the territory of the Federation of Bosnia and Herzegovina.

A PE under FBiH CIT law is considered to be one of the following:

- Management headquarters.

- Branch office.
- Business office.
- Factory.
- Workshop.
- Location of natural resources extraction.
- Construction site (construction or mounting project) when the work is performed during a period exceeding six months.
- Providing consulting or business services lasting for a period exceeding three months consecutively over a 12-month period.
- A representative acting independently on behalf of a non-resident related to the activities of signing a contract or keeping supplies of products delivered on behalf of a non-resident.

The term PE shall be deemed not to include the following:

- The use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise.
- The maintenance of stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display, or delivery.
- The maintenance of stock of goods or merchandise belonging to the enterprise solely for the purpose of processing and finishing by another enterprise.
- Maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information for the enterprise.
- Maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character.
- Maintenance of a fixed place of business solely for any combination of above-mentioned activities, provided that the overall activity of a fixed place of business is of a preparatory or auxiliary character.

A non-resident legal person shall not be deemed to have a PE in the Federation of Bosnia and Herzegovina merely because it carries on business through a broker, general commission agent, or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.

A non-resident legal person shall not be deemed to have a PE in the Federation of Bosnia and Herzegovina merely because it controls or is controlled by a legal person resident of the Federation of Bosnia and Herzegovina.

Provisions of a DTT shall prevail over domestic law when identifying a PE.

RS residency

Under RS CIT law, a resident is a legal entity registered in Republika Srpska for the performance of independent economic activity with the primary purpose of making profit.

RS permanent establishment

A PE is considered to be a place of business in Republika Srpska through which the business of a non-resident is wholly or partially carried on. The term PE includes the following, especially:

- A place of management, a branch, an office, a factory, a store, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources in the territory of Republika Srpska.
- A building site, installation, or assembly works in Republika Srpska, as well as a place of infrastructure used for research or extraction of natural resources or supervisory of the same.
- A place of business where an individual or legal person has the authority to conclude contracts in the name of the non-resident enterprise.

Bosnia and Herzegovina

- A place where a resident individual or legal person, without authority to conclude contracts in the name of the non-resident enterprise, does business in the name of the non-resident enterprise by holding stock of goods or merchandise and carries out deliveries on a regular basis in the name of the non-resident enterprise.

The term PE shall be deemed not to include the following:

- The use of facilities solely for the purpose of storage or display of goods or merchandise belonging to the enterprise.
- The maintenance of stock of goods or merchandise belonging to the enterprise solely for the purpose of storage or display.
- The maintenance of stock of goods or merchandise belonging to the enterprise solely for the purpose of processing and finishing by another enterprise.
- Sale of goods or merchandise belonging to the enterprise provided that it was displayed during fairs or exhibitions under condition that the sale was executed within a month of closing a fair or an exhibition.
- Maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information for the enterprise.
- Maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character.
- Maintenance of a fixed place of business solely for any combination of above mentioned activities, provided that the overall activity of a fixed place of business is of a preparatory or auxiliary character.

A non-resident legal person shall not be deemed to have a PE in Republika Srpska merely because it carries on business through a broker, general commission agent, or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.

A non-resident legal person shall not be deemed to have a PE in Republika Srpska merely because it is controlled by a legal person that is a resident of Republika Srpska or by a person carrying out business in Republika Srpska, whether through a PE or otherwise.

Provisions of a DTT shall prevail over domestic law when identifying a PE.

BD residency

The BD CIT law prescribes that a resident is a legal entity registered in Brčko District.

BD permanent establishment

A PE of a non-resident in Brčko District is considered to be:

- construction works, installation and assembly works, infrastructure used for research or exploitation of natural resources, or supervisory of the same, or
- a place of business where an individual or legal person has the authorisation to conclude contracts for a foreign legal entity.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 17%, and the VAT regime applies equally throughout the country of Bosnia and Herzegovina. There is no reduced VAT rate in Bosnia and Herzegovina.

Taxable persons are all individuals and legal entities registered, or required to be registered, for VAT. Any person making taxable supplies of goods and services that exceeds or is likely to exceed a threshold of 50,000 konvertibilna marka (convertible mark or BAM) (EUR 25,000) is required to register as a VAT payer.

The export of goods is zero-rated.

Taxable transactions include the supply of goods and services in Bosnia and Herzegovina by a taxable person, as well as the importation of goods to Bosnia and Herzegovina by any person. The following transactions are also taxable:

- Transactions for no consideration or for a consideration less than the market value.
- The private use of taxable goods by a taxable person (self-supply).

The following services are exempt from VAT in Bosnia and Herzegovina:

- The leasing and subletting of residential houses, apartments, and residential premises for a period of longer than 60 days.
- The supply of immovable property, except for the first transfer of the ownership rights or the rights to dispose of newly constructed immovable property.
- Financial services.
- Insurance and reinsurance services.
- Educational services provided by private or public educational institutions.
- Postal services.

The VAT period is one calendar month.

Any tax credit that has not been used after a period of six months shall be refunded. Registered exporters are to be refunded within 30 days.

Customs duties

The customs policy law and the rates of customs tariffs to be applied exist and are largely based on European Union (EU) standards. Bosnia and Herzegovina has signed the Stabilisation and Association Agreement (SAA) and the Central European Free Trade Agreement (CEFTA).

Excise duties

There is a single excise regime throughout Bosnia and Herzegovina, which levies excise tax on the following products:

- Petroleum products: BAM 0.3 to BAM 0.4 per litre.
- Tobacco products: 42% on retail price and an additional BAM 0.75 per pack of 20 cigarettes. If the calculated excise duty is lower than the minimally prescribed excise duty, then the minimal excise duty should be paid (the minimal duty is determined every year by the indirect tax authorities by special regulation).
- Non-alcoholic drinks: BAM 0.1 per litre.
- Alcohol and alcoholic drinks: BAM 8 to BAM 15 per litre of absolute alcohol.
- Beer and wine: BAM 0.2 to BAM 0.25 per litre.
- Coffee (unroasted, roasted, and ground coffee and coffee extracts): BAM 1.5 to BAM 3.5 per kilogram.

Property taxes (real estate)

FBiH property taxes

FBiH property taxes are imposed at the cantonal level (ten cantons in total), and the rates as well as the taxpayers are different between the cantons. The taxes are paid in the range of BAM 0.5 to BAM 3 per square metre.

RS property taxes

RS property taxes are imposed at the entity level. The annual tax rate is between 0.05% and 0.5% of the market value of the property. The applicable tax rate is determined every year by the municipalities.

Bosnia and Herzegovina

BD property taxes

BD property taxes are imposed by the BD assembly. The annual tax rate is between 0.05% and 1% of the market value of the property. The rate is adopted by the assembly for every year based on the proposed annual budget.

Tax on transfer of land and real estate

FBiH transfer taxes

The FBiH tax on transfer of land and real estate is imposed at the cantonal level. The rate differs by canton; however, it cannot be higher than 5%.

RS transfer taxes

There is no tax on transfer of land and real estate in Republika Srpska.

BD transfer taxes

There is no tax on transfer of land and real estate in Brčko District.

Social security contributions

FBiH social security contributions

Mandatory social security contributions in the Federation of Bosnia and Herzegovina are due by the following rates:

Type of contribution	Employee's contributions (%)	Employer's contributions (%)
Contribution for pension and invalid insurance	17.0	6.0
Contribution for health insurance	12.5	4.0
Contribution for unemployment insurance	1.5	0.5

The base for calculation of social security contributions is the gross salary.

In the Federation of Bosnia and Herzegovina, the employer also pays 0.5% of contribution for protection from natural and other disasters, as well as 0.5% of the water protection charge, calculated on net salary.

Social security contributions have to be calculated and withheld by an employer with the salary payment.

RS social security contributions

In Republika Srpska, the following rates of mandatory employee's social security contributions have to be applied:

Type of contribution	% of gross salary
Contribution for pension and invalid insurance	18.5
Contribution for health insurance	12.0
Contribution for unemployment insurance	1.0
Contribution for child protection	1.5

In Republika Srpska, mandatory social security contributions are calculated on gross salary and have to be withheld by the employer, as an income payer. There are no employer's social security contributions in Republika Srpska.

There is additional special contribution due in Republika Srpska for solidarity and repair of damages caused by floods in May 2014. This contribution is due in the amount of 3% of an employee's net salary, where 50% of the contribution is borne by the employee and the remaining 50% of the contribution is borne by the employer.

BD social security contributions

Persons who are working in Brčko District can opt to which fund of pension insurance, either the fund of Republika Srpska or fund of the Federation of Bosnia and Herzegovina, they would like to pay pension and invalid insurance contributions.

Health insurance contributions are calculated in the amount of 12% on gross salary.

The table below provides an overview of mandatory social security contributions in Brčko District in a scenario when an employee opts to pay pension and invalid insurance contributions to the Pension Insurance Fund of the Federation of Bosnia and Herzegovina.

Type of contribution	Employee's contributions (%)	Employer's contributions (%)
Contribution for pension and invalid insurance	17.0	6.0
Contribution for health insurance	12.0	-
Contribution for unemployment insurance	1.5	-

The table below provides an overview of mandatory social security contributions in Brčko District in a scenario when an employee opts to pay pension and invalid insurance contributions to the Pension Insurance Fund of Republika Srpska.

Type of contribution	% of gross salary
Contribution for pension and invalid insurance	18.5
Contribution for health insurance	12.0
Contribution for unemployment insurance	1.5

Payroll taxes**FBiH payroll taxes**

Personal income tax (PIT) of 10%, in addition to social security contributions, has to be calculated and withheld by an employer with the salary payment.

There are no additional payroll taxes due in the Federation of Bosnia and Herzegovina.

RS payroll taxes

PIT of 10%, in addition to social security contributions, has to be calculated and withheld by an employer with the salary payment.

There are no additional payroll taxes due in Republika Srpska.

BD payroll taxes

PIT of 10%, in addition to social security contributions, has to be calculated and withheld by an employer with the salary payment.

There are no additional payroll taxes due in Brčko District.

Other taxes

There are several other taxes introduced at the entity, cantonal, and municipality level. The duties differentiate based on company location, business size, and type of business.

FBiH other taxes

FBiH other taxes include the communal tax, fire prevention contribution, tourist community contribution, forestry contribution fee, Foreign Trade Chamber of Bosnia and Herzegovina duty, Chamber of Commerce FBiH duty, and administrative stamp duties.

Bosnia and Herzegovina

RS other taxes

RS other taxes include the special republic tax, communal tax, forestry contribution fee, fire prevention contribution, Foreign Trade Chamber of Bosnia and Herzegovina duty, Chamber of Commerce RS duty, and administrative stamp duties.

BD other taxes

BD other taxes include the communal tax, fire prevention contribution, forestry contribution fee, Foreign Trade Chamber of Bosnia and Herzegovina duty, and administrative stamp duties.

Branch income

Representative offices of foreign companies can be registered in all three administrative units.

A branch of a foreign legal entity can only be registered in Republika Srpska. The tax treatment of the branch of a foreign legal entity is still quite unclear from the local perspective, so we recommend contacting a tax and accounting specialist.

Amendments to the Company Law and to the Law on Registration of Business Entities of the Federation of Bosnia and Herzegovina introduced the possibility for foreign companies to establish one or more branch offices. However, registration of a branch office of a foreign legal entity is still not enabled in practice.

BD regulations do not allow registration of branch of a foreign legal entity.

Income determination

Taxable profit is profit determined by adjusting the accounting profit as stated in the profit and loss statement and determined in accordance with International Financial Reporting Standards/International Accounting Standards (IFRS/IAS) and accounting legislation, in accordance with the provisions of the CIT law.

FBiH income

Taxable income in the Federation of Bosnia and Herzegovina the income determined in the financial statements, increased for tax non-deductible costs and other tax non-deductible items and decreased for non-taxable items in accordance with the CIT Law of the Federation of Bosnia and Herzegovina.

Income on the basis of collected written-off debt, in the event that it was included in income in a previous period and was not subject to tax allowable or recognised expenditure, shall not be included in the tax base.

FBiH inventory valuation

Expenses of production in accordance with accounting regulations and IFRS/IAS shall be recognised in the value of stocks of unfinished production, semi products, and finished products for the calculation of taxable profit.

The inventory is valued by using the average price method.

FBiH capital gains

Capital gains that increase the CIT base are all amounts that directly increase the accumulated or current profit in the balance sheet in accordance with IAS.

Capital gains that increase the CIT base are also considered to be gains from transactions of sales or transfers of assets if such profit is not included in the balance sheet. Such

capital gains are determined as the difference between the value of the transaction and the purchase value, deducted for tax depreciation. If such difference is negative, it is considered as a capital loss.

For the purpose of determining the capital gains, the price of the transaction is the price stipulated in the contract, or the market price of the transaction if the stipulated price is lower than the market price.

FBiH dividend income

Dividends realised based on participation in the capital of other taxpayers shall not be included in the tax base. Shares in the profit of a business association will be considered dividends.

FBiH interest income

Interest income is generally included in the taxable base. The exception, as per FBiH government decision, is for interest income realised from state bonds issued for war claims, which should not be included in the taxable base (the CIT law does not explicitly allow for this, which may lead to discussion with the tax authority).

FBiH foreign income

The Federation of Bosnia and Herzegovina taxes resident corporations on a worldwide basis. There are no deferral or anti-deferral provisions in the Federation of Bosnia and Herzegovina.

RS income

Taxable revenue for the purpose of computing the tax base in Republika Srpska includes total revenue presented in the income statement, with the exemption of revenue that has different tax treatment under the CIT Law.

RS inventory valuation

Inventory includes goods used for resale, final goods produced by the taxpayer, semi-final goods used for further production, as well as main and auxiliary materials for production.

Purchase value of inventories at the beginning and end of a fiscal year has to be expressed using the same method for determination of purchase value of inventories.

The costs of material and purchase value of sold goods can be determined by using the weighted average cost method or the first in first out (FIFO) method.

RS capital gains

Capital gain is realised through the sale or other type of transfer of capital or investment assets and represents a difference between the sales price and adjusted base of an asset. The sales price is the contracted price (i.e. the market price established by the competent tax authority in case it finds the contracted price to be lower than the market price).

Capital gains or losses realised during the fiscal year can be offset, and the realised net gain or loss is added or subtracted from the taxable base, if they are not already included in the income or expense.

RS dividend income

Income from dividends is not included in the taxable base.

RS interest income

Interest income is generally included in the taxable base.

Bosnia and Herzegovina

Income from securities issued by or guaranteed by the state authority, Central Bank BiH, or local authority, as well as interest income from bank deposits, is excluded from the taxable base.

RS foreign income

Republika Srpska taxes resident corporations on a worldwide basis. There are no deferral or anti-deferral provisions in Republika Srpska.

BD income

Taxable income in Brčko District includes all income from any source (domestic or foreign), whether in cash or in kind, independent of the relationship to the business activity of the legal person.

BD inventory valuation

The purchase value of inventories can be determined by using the FIFO method or the average cost method.

BD capital gains

Capital gain is realised by sale or transfer of capital and investment goods and represents positive difference between the sales price and adjusted property base.

Capital gains or losses realised during the fiscal year can be offset, and the realised net gain or loss added or subtracted from the taxable base, if they are not already included in the income or expense.

BD dividend income

Income from dividends is not included in the taxable base.

BD interest income

Income from securities issued by or guaranteed by the state authority, Central Bank BiH, or local authority is excluded from the taxable base.

BD foreign income

Brčko District taxes resident corporations on a worldwide basis. There are no deferral or anti-deferral provisions in Brčko District.

Deductions

FBiH deductions

Tax deductible expenditures are all documented expenditures, decreased for the deductible VAT, that a taxpayer incurred for the purpose of generation of profit, provided they are properly presented in the financial statements.

FBiH depreciation

Depreciation cost is deductible only if it relates to the property subject to depreciation and being used.

Depreciation of fixed assets is deductible up to the amount established by proportionate application of the highest annual depreciation rates using the linear method, prescribed by the FBiH government, as follows:

Assets	Rate (%)
Buildings	5
Roads, communal objects, and upper railway rails machines	10
Equipment, vehicles, and facilities	15
Equipment for water management, water-supply, and canalisation	15

Assets	Rate (%)
Hardware, software, and equipment for environment protection	33.3
Crops	15
Livestock units	40
Intangible non-current assets	20

Property being depreciated with a value of less than BAM 1,000 may be fully deducted in the purchase year, on condition that that the property was put in use.

Depreciated assets, once depreciated, shall not be re-included in the depreciation calculation for the purposes of the tax balance.

Expenditure arisen from devaluation of fixed assets, which are determined as the difference between current net value and the estimated retrievable value, is tax deductible in the tax period when the assets are sold or destroyed by *force majeure*.

FBiH goodwill

Amortisation of goodwill is not tax deductible.

FBiH start-up expenses

Start-up expenses are tax deductible if the expenses occurred, were necessary and related to the registered company, and if original documentation with regard to those expenses are available for inspection.

FBiH interest expenses

Interest expense is generally tax deductible, except for interest from a related-party loan, which can be tax non-deductible if it does not meet the criteria set by the thin capitalisation rule (see *Thin capitalisation in the Group taxation section*).

FBiH bad debt

The expenses occurring based on the write-off of doubtful debts are tax deductible. Debts are considered doubtful under the following conditions:

- The debts have been included in the taxpayer's revenue in the previous tax period and they have not been collected within 12 months from the due date.
- The taxpayer has started court procedures in regard to the receivable, started the enforced collection procedure, or the receivable has been registered in the liquidation or bankruptcy procedure.

FBiH charitable contributions

Costs of humanitarian, cultural, educational, scientific, and sports purposes (except professional sports) are deductible in the amount of up to 3% of total income.

FBiH tax reserves

The following costs related to provisions are tax-deductible costs:

- Provisions for future costs related to environment protection of up to 30% of taxable income before provision was made, provided there is a legal obligation for the taxpayer to undertake the measures for environment protection. The total provision for environment protection cannot exceed the amount of the taxpayer's registered capital.
- Provisions for future costs in guarantee period of up to 4% of taxpayer's annual turnover relating to products subject to guarantee in the tax period.

FBiH fines and penalties

Fines and penalties are not tax deductible.

Bosnia and Herzegovina

FBiH taxes

Taxes are generally tax deductible expenses, except for paid CIT.

FBiH other significant items

Representation costs pertaining to business activity are deductible in the amount of 30% of representation costs.

Expenses of membership fees to the chambers are deductible in the amount not exceeding 0.1% of total income, with the exception of membership fees regulated by the law.

Expenses based on sponsorship are deductible in the amount of 3% of total income.

FBiH net operating losses

Tax losses may be offset against profits in a future tax period, not exceeding five years.

Tax losses are utilised on a FIFO basis.

Tax losses cannot be carried back.

FBiH payments to foreign affiliates

Payments to foreign affiliates are generally allowed if they relate to realised revenue.

RS deductions

Expenditures deductible from revenue in computing the RS tax base are the expenditures presented in the income statement, with the exception of expenditures that have a different tax treatment under the provisions of the CIT Law.

RS depreciation

Depreciation deductions are allowed only with respect to depreciable assets that are owned by a taxpayer or acquired through a financial lease that are being used for performance of registered business activities.

A depreciable asset is any tangible or intangible asset (except goodwill) with useful economic life longer than 12 months. Land or any other asset that does not decrease in value through wear and tear or obsolescence is not considered a depreciable asset.

Assets are depreciated using the linear method of depreciation by applying the annual depreciation rates.

RS goodwill

Amortisation of goodwill is not tax deductible.

RS start-up expenses

Start-up expenses are tax deductible if the expenses occurred, were necessary and related to the registered company, and if original documentation with regard to those expenses are available for inspection.

RS interest expenses

Interest on loans used for generation of taxable revenue are generally tax deductible. The exceptions are interest that is not at arm's length, interest on loans for private use, and interest on overdue tax payments.

RS bad debts and tax reserves

A legal person using the accrual form of accounting is allowed a deduction with respect to bad debts and reserves.

Legal persons, other than banks, authorised credit institutions, or insurance companies, are entitled to a bad debt deduction that arose in connection with a sale of goods or

services but only if the revenue from the sale was previously included in the tax base of the legal person.

A receivable is considered to be a bad debt only if the receivable has not been collected within 12 months from the due date and if the taxpayer undertook at least one of the following activities for collection of the receivable:

- the taxpayer started court litigation for the receivables
- the taxpayer requested execution of the receivable from the competent court
- the taxpayer initiated enforced collection procedures
- the receivables are registered in the bankruptcy procedures of the debtor, or
- an agreement has been reached with the debtor who is in the bankruptcy or liquidation procedures.

In the case of a bank or other authorised credit institution, a deduction is allowed for indirect write-off of placement presented in the income statement of a tax period, maximum to the amount prescribed by the Banking Agency of Republika Srpska for loan categories B, C, D, and E.

Insurance and reinsurance companies are allowed a deduction of costs of mathematical reserves that these companies are obligated to create under the regulations of the Insurance Agency of Republika Srpska, under the condition that the reserve was included in the income statement.

Costs arising from technical reserves of insurance companies are tax deductible at up to 20% of the amount of reserves created under the regulations of the Insurance Agency of Republika Srpska, under the condition that the reserve was included in the income statement.

The tax savings resulting from a reduction or cancellation of any reserve that is collected later on will be included in taxable revenue at the moment of collection in accordance with this law.

RS charitable contributions

Contributions to public institutions and humanitarian, cultural, and educational organisations are deductible in an amount not exceeding 3% of the fiscal year's total revenue. Any excess contribution may be carried forward three years.

RS fines and penalties

Fines and penalties are not tax deductible.

RS taxes

Taxes are generally tax deductible expenses, except for paid CIT.

RS other significant items

Expenditures that are recognised and deductible from revenue also include the following:

- 30% of the cost of entertainment, meals, and amusements related to the legal person's economic activity.
- Sponsorship expenses in an amount not exceeding 2% of the fiscal year's total revenue.
- Costs of reclamation of goods and services in the amount not exceeding 3% of the business revenue in that tax year.

RS net operating losses

Losses may be carried forward and offset against income in the following five years. Tax losses are utilised on a FIFO basis.

Bosnia and Herzegovina

Tax losses cannot be carried back.

RS payments to foreign affiliates

Payments to foreign affiliates are generally allowed if they relate to realised revenue.

BD deductions

Expenditures are deductible from revenue in computing the BD tax base if the expenditures directly relate to the realised revenue.

BD depreciation

Depreciation deductions are allowed only with respect to depreciable assets that are being used.

A depreciable asset is any tangible or intangible asset that is held for use in the production or supply of goods and services, for rental to others, or for administrative purposes. Land or any other asset that does not decrease in value through wear and tear or obsolescence is not considered a depreciable asset.

Assets are depreciated using the linear method of depreciation, except for machines and equipment, which can be depreciated with acceleration (first year at 40%, second year at 30%, and third year at 30%). The CIT Rulebook prescribes a wide range of accepted depreciation rates, depending on type of assets.

The calculation of depreciation for newly purchased property starts the following month from the day when it was put to use. The calculation of depreciation for newly constructed buildings starts from the first day of the following year in which it was put to use.

BD goodwill

Amortisation of goodwill is not tax deductible.

BD start-up expenses

Start-up expenses are tax deductible if the expenses occurred, were necessary and related to the registered company, and if original documentation with regard to those expenses are available for inspection.

BD interest expense

Interest on loans used for business purposes are tax deductible. The exceptions are interest that is not at arm's length, interest on loans for private use, and interest on overdue tax payments.

BD bad debts and tax reserves

Legal persons, other than banks, authorised credit institutions, or insurance companies, shall be entitled to a bad debt deduction that arose in connection with a sale of goods or services but only if the revenue from the sale was previously included in the tax base of the legal person. For this purpose, a credit or trade receivable is considered a bad debt only if one of the following is true:

- It is more than 12 months past the due date for payment of the invoiced receivable and the creditor has sued for the receivables or an enforced collection procedure is initiated due to receivables.
- The receivables are registered in the bankruptcy procedure of the debtor or an agreement has been reached with the debtor who is not a physical or related person in the bankruptcy or liquidation procedure.

In the case of a bank or other authorised credit institution, a deduction is allowed for increases in the reserve account for customary losses due to unpaid loans, and the amount may not exceed 20% of the tax base.

In the case of an insurance or reinsurance company, a deduction is allowed for increases in reserves as registered in accounting documents and as authorised according to applicable law. For insurance contracts pertaining to reinsurance, reserves are to be reduced so that they cover only part of the risk remaining with the insurer, and the amount may not exceed 20% of the tax base.

BD charitable contributions

Contributions to public institutions and humanitarian, cultural, and educational organisations are deductible in an amount not exceeding 3% of the fiscal year's total revenue.

BD fines and penalties

Fines and penalties are not tax deductible.

BD taxes

Taxes are generally tax deductible expenses, except for paid CIT.

BD other significant items

Expenditures that are recognised and deductible from revenue also include the following:

- 30% of the cost of entertainment related to the legal person's economic activity.
- Awards to employees, up to the prescribed amount.
- Costs of business trips, meal allowance, transportation, and holiday allowance, up to the prescribed amount.
- Sponsorship expenses in an amount not exceeding 2% of the fiscal year's total revenue.
- Scholarships to students in an amount up to 75% of average monthly net salary in Brčko District.
- Committee membership fees, up to 0.2% of total revenue in the tax year.
- Expenses for research and development (R&D) in accordance with the Rulebook.

BD net operating losses

Losses may be carried forward and offset against income in the following five years. Tax losses are utilised on a FIFO basis.

Tax losses cannot be carried back.

BD payments to foreign affiliates

Payment to foreign affiliates is generally allowed if it relates to realised revenue.

Group taxation

FBiH group taxation

A business association has the right to request tax consolidation on the condition that all businesses in the group are residents of the Federation of Bosnia and Herzegovina.

A headquarters company and its branches may form a business association when there is direct or indirect control between them with no less than 50% share.

A request for tax consolidation must be filed to the authorised branch office of the tax authorities by a headquarters company.

Each group member is required to file its tax balance, and the headquarters of the business association may file a consolidated tax balance for the group.

Bosnia and Herzegovina

The consolidated tax balance may offset losses of one or more businesses against the profit of other businesses in the association.

Individual group members are liable for the tax calculated on the consolidated balance proportionately to the profit from the individual tax balance, and the headquarters is the payer of the tax calculated on the consolidated balance.

Once approved, tax consolidation shall be applied for the consecutive period of no less than five years.

When one, several, or all the businesses in the association later opt for individual taxation, all group members shall be obligated to pay the difference proportionately on behalf of the tax privilege they have used.

RS group taxation

The new CIT Law of Republika Srpska that came into force on 1 January 2016 does not envisage a possibility of group taxation in Republika Srpska.

BD group taxation

An affiliated group of legal persons located within Brčko District may elect to file a consolidated annual tax declaration.

An affiliated group of legal persons is a group of one or more legal entities from Brčko District that are connected through the ownership of stock with a common parent, provided that the common parent owns at least 80% of the stock in a legal person that is included in the affiliated group.

Transfer pricing

Transfer pricing requirements are imposed at the entity level. The Federation of Bosnia and Herzegovina, Republika Srpska, and Brčko District have different regulations in place, including different rules in regard to applicable methods, related parties, and documentation. The regulations in place do not differ if the transactions are within one entity, cross-border, or international. Basically, this means that all transactions can fall under the transfer pricing scope.

With Bosnia and Herzegovina not being an EU or an Organisation for Economic Co-operation and Development (OECD) member, the local legislation does not have the same requirements with respect to transfer pricing documentation as in EU countries nor does the legislation refer to the OECD guidelines.

FBiH related parties

In the Federation of Bosnia and Herzegovina, a related party is considered to be an individual or legal person who has the possibility of control or significant influence on the business decisions of the taxpayer. Owning more than 25% of stocks or shares in a company is considered to be enabled control.

Significant influence is considered to be mutually high sales turnover, technical dependence, or otherwise gained control over the management.

FBiH prescribed methods

The FBiH CIT law recognises the following methods:

- Comparable uncontrolled price (CUP) method (primary method).
- Cost plus method.
- Resale price method.

Alternatively, in case these methods cannot be applied, the following methods can be used:

- Profit split method.
- Transaction net margin method.

In case that none of the above-mentioned methods can be applied, any other method that can reasonably be applied for determination of the arm's-length principle is allowed.

RS related parties

Under the CIT Law of Republika Srpska, a related party is a person or legal entity that directly or indirectly participates in management, control, or capital of another legal entity. Also, two legal entities are considered to be related if the same person(s) directly or indirectly participates in management, control, or capital of both legal entities.

It is considered that a person directly or indirectly participates in management, control, or capital of a legal entity when it directly or indirectly owns at least 25% of the shares in that legal entity or when it has a factual possibility to control business decisions of that other legal entity.

A person is considered to have a factual possibility of control on business decisions of another legal entity when one:

- has or controls 25% or more of the voting rights in another legal entity
- has a control on assembly of the management board of another legal entity
- has a right to participate in the profit of another legal entity of 25% or more
- is a family member or a related person to a family member, or
- in any other way has a factual control on business decisions of another legal entity.

BD related parties

Under the CIT Law of Brčko District, related parties of a legal person are considered to be physical or legal persons if those persons possess more than 10% of active shares with voting rights.

A legal person can be a related party if it directly or indirectly possesses more than 10% active shares in the other person. Indirect ownership is considered to be:

- If a legal person possesses more than 10% of a dependent company, and that dependent company possesses more than 10% in the other legal person.
- If both legal persons have a common shareholder who possesses more than 10% active shares with voting rights in both legal persons.

RS and BD prescribed methods

The RS and BD regulations prescribe the following five methods that can be used in order to establish whether the prices are in accordance with the arm's-length principle:

- CUP method (primary method).
- Cost plus method.
- Resale price method.
- Profit split method.
- Transactional net margin method.

Thin capitalisation

The new CIT Law of the Federation of Bosnia and Herzegovina introduced the thin capitalisation rule. Under this rule, in order to be entitled to deduct interest expenses on loans received from a related party, a company's ratio between total liabilities from related-party loans and the company's registered equity should not exceed 4:1. Interest expense related to the liabilities from related-party loans exceeding the ratio 4:1 shall be non-deductible for CIT purposes.

Bosnia and Herzegovina

The CIT Law prescribes that this rule does not apply to banks and insurance companies.

Controlled foreign companies (CFCs)

Bosnia and Herzegovina has no rules on CFCs.

Tax credits and incentives

FBiH tax incentives

FBiH foreign tax credit

When a taxpayer generates income or profit through business activities outside of the Federation of Bosnia and Herzegovina (directly or through a business unit) and pays the profit tax on such activities, the tax paid abroad shall be credited, up to the amount of the profit tax that would have been paid for the income or profit generated by the same activities in the Federation of Bosnia and Herzegovina.

FBiH investment incentive

Taxpayers who invested their own resources in production equipment worth more than 50% of realised profit in the tax period shall be relieved from 30% of taxation for the year of the investment.

A taxpayer who invested in production within the territory of the Federation of Bosnia and Herzegovina for five consecutive years for a minimum fee of BAM 20 million will be relieved from 50% of taxation for a period of five years, starting with the first year in which it has invested at least BAM 4 million.

FBiH employment incentive

A taxpayer who employed new employees is entitled to a tax-deductible expense in the double amount of gross salary paid to newly employed employees if the following conditions are met:

- Employment contract has to be concluded on a full-time basis for period of minimum 12 months.
- Newly employed employee has not been employed by the taxpayer or by a related legal entity in the past five years.

RS tax incentives

RS foreign tax credit

If a legal entity from Republika Srpska obtains revenue from a foreign state and the revenue is taxed both in Republika Srpska and in the foreign state, then the tax paid to the foreign state, whether paid directly or withheld and remitted by another person, is to be credited from RS CIT, unless such legal entity from Republika Srpska elects to treat the foreign tax as a deductible expenditure in determining the fiscal year tax base.

RS investment incentive for production companies

For a taxpayer who invests in property, plant, and equipment (PPE) for performing its own registered business activity in the territory of Republika Srpska, a deduction is allowed for the amount of the investment. Only companies registered for production activity in accordance with special Ministry decision can use this tax incentive.

If the taxpayer disposes of the PPE within three years of the year for which the tax incentive was used, the taxpayer will have to pay the additional tax as if they never used the incentive, as well as penalty interest for late payments.

RS employment incentive

For a taxpayer who employs 30 new employees (which were registered in the RS unemployment agency) for an indefinite period of time during the tax period, a deduction is allowed for the paid PIT and social security contributions for those employees.

If the taxpayer lets go of employees within three years for whom the tax incentive was used, the taxpayer will have to pay the additional tax as if they never used the incentive, as well as penalty interest for late payments.

BD tax incentives

BD foreign tax credit

If a legal entity from Brčko District obtains revenue from a foreign state and the revenue is taxed both in Brčko District and in the foreign state, then the tax paid to the foreign state, whether paid directly or withheld and remitted by another person, is to be credited from the BD CIT, unless such legal entity from Brčko District elects to treat the foreign tax as a deductible expenditure in determining the fiscal year tax base.

BD investment incentive

For a taxpayer who invests in machines and equipment for performing its own registered business activity on the territory of Brčko District, a deduction is allowed for the amount of the investment.

BD employment incentive

For a taxpayer who employs new employees for an indefinite period of time during the tax period, a second deduction is allowed for the total amount of paid gross salaries for the new employees.

Withholding taxes

FBiH WHT

WHT in the Federation of Bosnia and Herzegovina is calculated on income generated by a non-resident through performance of occasional business activity in the territory of the Federation of Bosnia and Herzegovina. WHT is due on payment or any other settlement of the following:

- Dividends (i.e. shares in profit).
- Interest or the functional equivalent to interest.
- Royalties and intellectual property (IP) rights.
- Fees for management, technical, and educational services (including fees for market research, tax consulting, audit services, and consulting services).
- Compensations for lease of movable and immovable property.
- Compensation for fun and sport events.
- Insurance or reinsurance premiums from risks in the Federation of Bosnia and Herzegovina.
- Compensation for telecommunication services.
- Other service fees, but only for non-residents from the countries that do not have a signed DTT with Bosnia and Herzegovina.

WHT shall be paid at the rate of 5% on dividend payments and 10% for interest, royalties, and other, if not reduced under a tax treaty.

RS WHT

As per the CIT Law of Republika Srpska, WHT in Republika Srpska is due on the following income payments to a foreign legal entity:

Bosnia and Herzegovina

- Payment of dividends and shares in profit.
- Payment of interest.
- Payment of royalties and other payments for IP rights.
- Payment for performance of entertainment, art, or sports program in Republika Srpska.
- Payments for market research, advertising and promotion, management, consulting, tax and business consulting, and services of auditors, accountants, and lawyers.
- Payments for insurance and reinsurance premiums in Republika Srpska.
- Payments for telecommunication services between Republika Srpska and another country.
- Payments for lease of movable property.

The WHT rate in Republika Srpska is 10%. The exception is the WHT on dividends, which is 5%.

BD WHT

Any legal or physical person from Brčko District, as well as any non-resident legal or physical person with PE in Brčko District, who pays revenue to a non-resident legal person is to withhold tax from the total payment of revenue and is to remit the withheld tax to the Public Revenues Account of Brčko District.

The WHT applies to the following revenue payments, regardless of whether the revenue is received in Brčko District or abroad:

- Payment of interest or its functional equivalent under financial instruments and arrangements from a resident.
- Payment for entertainment or sporting activities carried out in Brčko District, regardless of whether the revenue is received by the entertainer or sportsman or by another person.
- Payment for the performance of management, consulting, financial, technical, or administrative services if the revenue is from a resident or if the revenue is paid by or included in the books and records of a PE in Brčko District or if such payment is deducted for the purpose of determining the tax base.
- Payment in the form of insurance premiums for the insuring or reinsuring of risks in Brčko District.
- Payment for telecommunication services between Brčko District and a foreign state.
- Payment of royalties.
- Payment of lease for movable property.
- Payment for the performance of other services in Brčko District.

WHT is not due on dividend payments.

The WHT rate in Brčko District is 10%.

Notes

1. The lower rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
2. The lower rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends.
3. The lower rates apply if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. The competent authorities of the contracting state shall, by mutual agreement, settle the mode of application of these concessions.

Tax administration

FBiH tax administration

FBiH taxable period

The taxable period is considered to be the calendar month.

FBiH tax returns

An FBiH taxpayer is obligated to file correctly and accurately a completed tax return (declaration) with the tax balance to the authorised branch office of the tax administration by 31 March of the following year.

The deadline for submission of annual calculation of business results is 28 February of the following year.

Bosnia and Herzegovina

FBiH payment of tax

A taxpayer shall pay FBiH CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly (by the last day of the month) for the previous month.

FBiH tax audit process

The tax system is generally based on self-assessment; however, many large and mid-size businesses are under continuous audit by the tax authority and the indirect tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller businesses with lower incomes are generally subject to audit on a random basis.

FBiH statute of limitations

The statute of limitations is five years.

FBiH topics of focus for tax authorities

The tax authorities focus increasingly on transactions with related parties with respect to transfer pricing and deductibility of expenses in general.

RS tax administration

RS taxable period

The taxable period is considered to be the calendar month.

RS tax returns

The RS tax declaration for a tax year shall be filed no later than 90 days upon the end of the tax year, and in case of a calendar year, no later than 31 March of the current year for the previous year.

RS payment of tax

A taxpayer shall pay RS CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly (by the tenth day of the month) for the previous month.

RS tax audit process

The tax system is generally based on self-assessment; however, many large and mid-size businesses are under continuous audit by the tax authority and the indirect tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller businesses with lower incomes are generally subject to audit on a random basis.

RS statute of limitations

The statute of limitations is five years.

RS topics of focus for tax authorities

The tax authorities focus increasingly on transactions with related parties with respect to transfer pricing and deductibility of expenses in general.

BD tax administration

BD taxable period

The taxable period is considered to be the calendar month.

BD tax returns

The BD tax declaration for a tax year shall be filed no later than 90 days upon the end of the tax year, and in case of a calendar year, no later than 31 March of the current year for the previous year.

BD payment of tax

A taxpayer shall pay BD CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly (by the tenth day of the month) for the previous month.

BD tax audit process

The tax system is generally based on self-assessment; however, many large and mid-size businesses are under continuous audit by the tax authority and the indirect tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller businesses with lower incomes are generally subject to audit on a random basis.

BD statute of limitations

The statute of limitations is five years.

BD topics of focus for tax authorities

The tax authorities focus increasingly on transactions with related parties with respect to transfer pricing and deductibility of expenses in general.

Additionally, the BD authority scrutinises allocation of expenses for bank branches operating in the district, often decreasing or not allowing the allocated expenses of the headquarters.

Significant developments

The Botswana Unified Revenue Services (BURS) has expanded e-services to value-added tax (VAT), personal income tax (PIT), and pay-as-you-earn (PAYE), and is also planning to expand to corporate return filing.

The BURS has limited carryforward of farming losses to five years, like for most other businesses.

The BURS has introduced a 4% withholding tax (WHT) on sale of livestock sold for slaughter.

Taxes on corporate income

Botswana has a source-based taxation system.

Corporate income tax (CIT) is charged at a single flat rate of 22%. Manufacturing companies having the approval from the Minister of Finance for a special tax rate will be charged at the rate of 15%.

International Financial Services Centre (IFSC) profits

IFSC companies are currently taxed at a flat rate of 15%. Companies must apply for a certificate to be classified as IFSC companies, which deal only in specified services and only with non-residents.

Mining profits

Mining profits, other than profits from diamond mining, are taxed according to the following formula:

Annual tax rate = 70 minus (1,500/x), where x is taxable income as a percentage of gross income.

The tax rate shall not be less than the flat CIT rate of 22%.

Diamond mining

Diamond mining is usually taxed in terms of an agreement with the government of Botswana.

Local income taxes

There are no local, state, or provincial government taxes on income in Botswana.

Corporate residence

If a company's registered office or place of incorporation is in Botswana or if the company is managed and controlled in Botswana, then the company is considered a resident of Botswana.

Permanent establishment (PE)

PE has been defined in the Income Tax Act only in the limited context of interest, commercial royalty, and management or consultancy fee. However, PE is defined in all the double taxation agreements (DTAs) that Botswana has entered into with other contracting states. The definition of PE in the DTA follows the definition in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and Capital.

Other taxes

Value-added tax (VAT)

VAT is imposed on taxable supplies and the importation of goods into Botswana. The standard VAT rate of 12% applies to all supplies that do not qualify for an exemption or are not zero-rated.

The VAT registration threshold is 1 million Botswana pula (BWP).

Vocational training levy (VTL)

VTL is payable when submitting the VAT return by every taxpayer who is registered for VAT. It is calculated as a percentage of turnover ranging from 0.2% to 0.05%, depending on the turnover of the company.

Customs and excise duties

Customs and excise duties are charged on importation of goods (including currencies) into or exported out of Botswana. The import duties may also include anti-dumping and countervailing duties. No customs duties and excise duties are charged on trade between Botswana and South Africa, Lesotho, Namibia, and Swaziland, as these five countries constitute a Southern African Customs Union. In terms of the Botswana/Zimbabwe Trade Agreement, goods originating from either of the trading partners are exempted from payment of customs duties under the condition that the goods meet a minimum of 25% local content. Excise duty and local taxes, such as VAT, are due and payable where applicable.

Property taxes

There are no property taxes in Botswana.

Capital transfer tax (CTT)

CTT is levied on the donee upon the transfer (by way of inheritance or gratuitous disposal of property) of tangible or intangible, movable or immovable, property, at 12.5%.

Transfer duties on immovable property

Transfer duty is levied at 5% of the value of immovable freehold and leasehold property. The first BWP 200,000 of such value are exempt from transfer duty in case of transfer to a Botswana citizen.

In the case of agricultural property, transfer duty is levied at the rate of 30% for a non-citizen. This duty is 5% in the case of a Botswana citizen.

Stamp duty

There is no stamp duty in Botswana.

Botswana

Payroll taxes

An employer with resident employees earning income above the taxable threshold and non-resident employees must deduct tax by applying the relevant tax rate and remit to the BURS on a monthly basis before the 15th day of the succeeding month. Every employer is required to submit an annual return within 31 days after the end of the tax year.

Social security contributions

There are no social security taxes or contributions in Botswana.

Branch income

CIT payable on branch profits is 30%.

Income determination

Inventory valuation

Inventories are valued at cost less such amounts, if any, that the Commissioner General believes are reasonable as representing the amount by which the value of such stock has been diminished because of damage, deterioration, obsolescence, or other cause. Although not expressly excluded by legislation, last in first out (LIFO) has not been accepted in practice by the tax authorities.

Capital gains

Gains from disposal of specified capital assets (immovable property and marketable securities, including shares in private companies) are included in taxable income in the hands of the corporate taxpayer. Acquisition costs of immovable property are subject to a 10% compound annual addition for inflation for the period from acquisition to 30 June 1982, and thereafter to an inflation addition based on the increase in the consumer price index to the date of sale. For other gains, no inflation allowances are granted, but the taxable gain is set at 75% of the total gain.

Currently, the sale of any shares, units, or debentures of a resident company is exempt from tax under any of the following circumstances:

- The resident company whose shares are being sold is a public company.
- The shares, units, or debentures are traded on the Botswana Stock Exchange.
- The company has released for trading 49% or more of its equity on the Botswana Stock Exchange.

This exemption only applies if the shares, units, or debentures were held by the taxpayer for a period of at least one year prior to the date of disposal.

The aggregate amount of capital losses is offset against the aggregate amount of capital gains in the same tax year. Any excess of loss is deducted from aggregate gains over losses accruing in the succeeding tax year only. Capital losses cannot, in any circumstances, be deducted against other income.

Dividend income

Dividend income from local sources is not subject to tax.

Interest income

In the case of a resident company, interest income is included in gross income and taxed at the CIT rate. In the case of a non-resident company, interest income is subject to WHT, which constitutes a final tax.

Royalty income

Royalty income is included in gross income and taxed at the CIT rate. In the case of a non-resident company, royalty income is subject to WHT, which constitutes a final tax.

Partnership income

Partnership income is taxed in the hands of the partners, in proportion to their share in the partnership.

Foreign income

Resident corporations are not generally taxed on a worldwide income basis. However, interest and dividend income from a foreign source is taxed in the hands of the resident company on an accrual basis. Relief is given for any WHT imposed on such income.

Deductions**Depreciation and depletion**

Annual and capital allowances available are as follows.

Companies other than mining companies

Annual taxation allowances for expenditures incurred on machinery and equipment before 30 June 1982 can be claimed up to 100%. This allowance may be for any proportion of previously unclaimed expenditures. For expenditures incurred on machinery and equipment after 30 June 1982, annual allowances are granted, calculated on cost by the straight-line method on the basis of the expected useful lives of the individual assets. Guidelines are provided for expected useful lives of different categories of assets, which vary from four to ten years. Book depreciation is not required to conform to tax depreciation. The capital allowance claimable on a company motorcar is restricted to a maximum of BWP 175,000.

An initial allowance of 25% of cost is granted on certain industrial buildings. All industrial and commercial buildings (excluding residential properties) are granted a 2.5% annual allowance based on cost or, in the case of an industrial building on which an initial allowance has been claimed, the original cost less the initial allowance.

Balancing allowances and charges are brought to account on the disposal of assets on which allowances have been claimed. Where disposal value of an item of machinery or equipment exceeds the difference between expenditures incurred on the asset and allowances granted, the whole amount is taxable as corporate income or the balancing charge can be offset against further additions of new equipment, thus providing rollover relief. However, there is no rollover relief on motorcars except where the cars are used in a car rental or taxi service business.

Mining companies

In ascertaining the business income for any tax year from a mining business, there shall be deducted from business income an allowance, to be known as a mining capital allowance, computed in accordance with 100% of the mining capital expenditure made in the year in which such expenditure was incurred, with unlimited carryforward of losses.

Goodwill

Amortisation of goodwill is not allowed as a tax deductible expense.

Start-up expenses

Start-up expenses are not specified in the law. However, pre-incorporation expenses might be disallowed since, generally, expenses incurred when there is no income are not allowed.

Botswana

Interest expenses

Interest paid or accrued to a resident is deductible as an expense. Interest paid to a non-resident will be allowed as a deduction in the year where the relevant WHT on interest has been remitted to the BURS.

Bad debt

Bad debts written off and specific provisions for bad debt are allowed as a deduction when computing taxable income. General provisions are not allowed as a deduction.

Charitable contributions

Donations made to (i) any educational institution recommended by the Ministry of Education or (ii) any sports clubs or sports associations recommended by the Ministry responsible for sports, and approved by the Commissioner General, shall be deducted when arriving at taxable income, limited to 20% of the chargeable income.

Fines and penalties

Penalties and associated interest are not allowed as a deduction.

Taxes

Any taxes paid are specifically disallowed in computing a company's taxable income.

Other significant items

An allowance is granted for dwelling houses erected for employees by a business other than a mining business. The amount of the allowance is the lower of cost or BWP 25,000 for each dwelling house constructed.

A deduction of 200% of the cost of an approved training expenditure is allowed.

Companies with shareholders having 5% or more of equity, either directly or indirectly, are classified as close companies, and there are additional tax regulations in respect of these shareholders.

Small companies, that is resident private companies whose gross income does not exceed BWP 300,000, may elect that the company be taxed as a partnership.

Expenses incurred by the company for having its shares listed on the Botswana Stock Exchange are deductible in determining the chargeable income of the company.

Net operating losses

Losses may be carried forward for five years, with the exception of mining and prospecting operations, for which there is no time limit. There is no allowance for carrybacks.

Payments to foreign affiliates

Royalties, interest, and service fees paid to foreign affiliates are generally deductible, provided such amounts are at arm's length and WHT is paid.

In the case of a mining company, head office expenses allowed as a deduction in ascertaining gross revenue from mineral licence shall be limited to 1.5% of gross income for the year of assessment, and any excess of such expense above the limit shall be treated and taxed as a dividend.

Where the interest rate on a loan made by a foreign-based mining company to an affiliate mining company resident in Botswana is considered by the commissioner to be in excess of the market rate, such excess will be disallowed as a deduction and taxed as a dividend.

Group taxation

There are no concessions for group taxation, other than for wholly-owned subsidiary companies of the Botswana Development Corporation Limited (BDC).

BDC was established in 1970 to be the country's main agency for commercial and industrial development. The government of Botswana owns 100% of the issued share capital of the Corporation.

Where in any tax year a wholly owned subsidiary of BDC has incurred any assessed loss, such member may, during the current tax year, by notice in writing to the Commissioner General, elect that the whole or part of such assessed loss shall be deducted in ascertaining the chargeable income of one or more of the other wholly owned subsidiaries.

Transfer pricing

Botswana currently does not have any transfer pricing regulations, so transfer pricing is currently monitored through the anti-avoidance provisions contained in Section 36 of the Income Tax Act.

The arm's-length principle should always be followed in transactions between related parties. If such transactions have created rights or obligations that would not normally be created between independent persons dealing at arm's length, the Commissioner General may determine the liability in such manner as deemed appropriate. However, related party balances arising out of normal trading transactions (e.g. credit purchases with a 30 day credit period) would not be subjected to these provisions.

Interest (at prime rate) should be charged/provided on loans from shareholders/amounts due to related parties. If no interest has been charged/provided, in terms of the close company legislation, the BURS may deem interest at the prime rate prevailing at the beginning of the tax year, as income in the hands of the lender without allowing the corresponding interest as a charge against the profits of the borrower. The borrower is obligated to deduct WHT at the prevailing rate on the deemed interest.

Amounts due from shareholders/directors may be deemed as dividend income and shall form part of the taxable income of the borrower, in which event these will be taxed at the prevailing dividend WHT rate in the hands of the borrower.

Thin capitalisation

Thin capitalisation rules can be found in the Income Tax Act, but only in relation to mining companies and IFSC companies.

Where a foreign controlled resident mining company has a foreign debt-to-equity ratio in excess of 3:1 at any time during the year of assessment, the amount of interest paid by the resident company during that year on that part of the debt that exceeds the ratio shall be disallowed as a deduction, and the amount so disallowed shall be treated and taxed as a dividend.

In case of an IFSC company, where an amount of foreign debt interest is allowable as a deduction in a particular tax year and, at any time during that tax year, the total foreign debt exceeds the foreign equity product for that year, then the amount of foreign debt interest ascertained in accordance with the following formula will be disallowed:

$$I \times (A/B) \times (C/365)$$

A = amount of the excess of the total foreign debt over the foreign equity product.

B = the total foreign debt.

Botswana

C = the number of days in that tax year during which the total foreign debt exceeded the foreign equity product by that amount.

I = the foreign debt interest.

Controlled foreign companies (CFCs)

There are no CFC rules in Botswana.

Tax credits and incentives

To encourage investment in Botswana, extra tax relief on revenue or capital accounts will be granted for specific business development projects if the government is satisfied that such projects are beneficial to Botswana.

Foreign tax credit

A credit for the foreign WHT payable is permitted under domestic law. The credit, which is offset against the tax charged in Botswana, shall be the lesser of (i) the tax payable in the foreign country or (ii) the tax charged under the Botswana Income Tax Act on such amount.

Withholding taxes

WHT, at the following rates, must be deducted from payments to residents and non-residents unless a DTA exists.

Residents	WHT rate (%)
Dividends	7.5
Interest	10
Payments due under certain construction contracts	3
Payments made for livestock purchased for purposes of slaughter or feeding for slaughter	4
Non-residents	WHT rate (%)
Dividends	7.5
Interest	15
Payments due under certain construction contracts	3
Payments made for livestock purchased for purposes of slaughter or feeding for slaughter	4
Payments for royalties, management, or consultancy fees	15
Payments for entertainment fees	10

All rent and commission or brokerage payments to residents or non-residents are subject to WHT at 5% and 10%, respectively, where the total payment is BWP 36,000 *per annum* or more or the monthly payment is BWP 3,000 or more.

Botswana has tax agreements with the following countries, which provide for WHT at the rates shown.

Recipient	Dividends (%)	Interest (%)	Royalties (%)	Management and consultancy fees (%)
Barbados	5/7.5 (1)	10	10	10
France	5/7.5 (1)	10	10	7.5
India	7.5	10	10	10
Mauritius	5/7.5 (1)	12	12.5	15
Namibia	7.5	10	10	15

Recipient	Dividends (%)	Interest (%)	Royalties (%)	Management and consultancy fees (%)
Russia	5/7.5 (1)	10	10	10
Seychelles	5/7.5 (1)	7.5	10	10
South Africa	7.5	10	10	10
Sweden	7.5	15	15	15
United Kingdom	5/7.5 (1)	10	10	7.5
Zambia	5/7 (1)	10	10	10
Zimbabwe	5/7.5 (1)	10	10	10

B

Notes

1. 5% rate of WHT is applicable if the beneficial shareholder is a company resident in the DTA country and holds at least 25% of the share capital in the company paying dividends. Otherwise, the other rate applies.

Tax administration

Taxable period

Botswana has a fiscal year ending on 30 June. However, a business may select its own accounting year, which may end on a date other than 30 June. This accounting year is accepted for the computation of the company's taxable income.

Tax returns

Botswana requires self-assessment, which means that the return submitted constitutes the assessment. The system is one that requires all taxpayers to file tax returns in standard format (providing information relating to taxable income earned) within four months after the financial year-end of the company.

Payment of tax

Under the self-assessment tax procedures, if the tax payable for a tax year exceeds BWP 50,000, then estimated tax is required to be paid in equal quarterly instalments over the period of 12 months ending on the company's financial year-end date. Accordingly, the first quarterly payment should be made within three months of the beginning of the financial year and the balance quarterly payments at three monthly intervals thereafter. The final (balance) payment, if any, is to be made within four months from the end of the financial year, when submitting the return.

Where the tax is less than BWP 50,000, then the tax is payable within four months from the company's financial year-end date.

Tax audit process

There is no prescribed audit process, and an audit can be initiated by any factor as determined by the BURS. The audit or inspection will commence with a request from the BURS for the taxpayer to make available any such records or information as may be required.

Statute of limitations

The assessment should be made any time prior to the expiry of four years after the end of the tax year to which it relates to. Tax returns submitted that have been assessed may not be reopened after a period of four years from date of assessment by the BURS.

Topics of focus for tax authorities

The BURS is focusing in establishing and strengthening the Large Tax Payers Unit, minimising the tax gap, and introducing electronic filing.

Significant developments

Changes to capital tax rates approved

On 16 March 2016, the President approved the conversion into law of Provisional Measure 692 (PM 692/2015) by Law No. 13,259/2016. The key issue contemplated by PM 692/2015 being the change to capital gains rates for individuals and non-residents.

Pursuant to Law No. 13,259/2016, capital gains earned by individuals arising on the alienation of Brazilian assets and rights of any nature are subject to income tax at the rates below. Currently, the Brazilian tax legislation provides that non-residents should be subject to the same rules as Brazilian individuals.

- 15% on the portion of the gain not passing 5 million Brazilian reais (BRL).
- 17.5% on the portion of the gain exceeding BRL 5 million and not passing BRL 10 million.
- 20% on the portion of the gain exceeding BRL 10 million and not passing BRL 30 million.
- 22.5% on the portion of the gain that passes BRL 30 million.

Further, capital gains derived by a company, arising on the alienation of non-current assets or rights, should also be subject to the above rates, except for companies that apply the actual, presumed, or arbitrary profit methods (being the key methods of calculating tax for Brazilian entities).

The Brazilian Federal Revenue Authorities (RFB) have published the Interpretative Declaratory Act 3/2016 (ADI 3/2016) providing their position that these progressive rates are applicable as from 1 January 2017.

Brazilian tax authorities reintroduce the Dutch holding company regime within its list of privileged tax regimes (grey list)

By way of background, on 4 June 2010, the Brazilian tax authorities issued the Normative Instruction (NI) 1,037/2010, listing a number of regimes that are considered as privileged tax regimes. Although the grey list, as amended by NI 1,045/2010 (issued on 24 June 2010), included the regime applicable to Dutch Holding companies with no substantial economic activities, its qualification as a privileged tax regime was suspended by the Declaratory Act 10/2010 (issued on 24 June 2010).

The Declaratory Act 3/2015 (published in the Official Gazette on 18 December 2015) revokes the Declaratory Act 10/2010 and reintroduces the regime applicable to Dutch holding companies with no substantial economic activities under the grey list as of the date of its publication.

This change, together with the application of the Brazilian controlled foreign company (CFC), transfer pricing, and thin capitalisation rules, among others, may have significant

impacts on international structures involving Brazilian entities and Dutch holding companies that fall in the scope of a privileged tax regime.

Application of Contribution to the Social Integration Program (PIS) and Social Contribution on Billing (COFINS) on certain financial revenues

On 1 April 2015, Decree 8,426/2015 reintroduced the PIS/COFINS taxation on financial revenues at rates of 0.65% and 4%, respectively, for companies under the 'non-cumulative regime' for calculation of these social contributions.

On 20 May 2015, Decree 8,451/2015 established that a 0% rate still applies on financial revenues resulting from foreign exchange variation related to: (i) export of goods and services; (ii) obligations contracted by the company (including loans and financing); and (iii) hedge operations conducted on stock exchanges, commodities, and futures markets, or contracted 'over-the-counter' for the purpose of protecting against risks associated with fluctuations related to the operating activities of the entity, and which can be allocated to the protection of such rights or obligations.

Brazil issues new interpretative law on taxes covered under double tax treaties (DTTs)

According to the recently enacted Law 13,202/15, the Social Contribution on Net Income (CSLL) falls under the scope of Brazilian DTTs.

By way of background, the CSLL was introduced in the Brazilian legislation in 1989 as a contribution to finance social security, but calculated based on the companies' net accounting income after certain adjustments. Although it was formally conceived as a contribution, its calculation basis is quite similar to the one used for purposes of the Brazilian corporate income tax (IRPJ).

With regards to tax treaty policy, the CSLL has been intermittently included in the DTTs signed by Brazil, resulting in different interpretations of the taxes covered by the treaties. In this regard, the Brazilian tax authorities and administrative courts have taken different positions to limit the application of the DTTs (excluding CSLL from taxes covered) when the CSLL is not expressly mentioned, including:

- no express inclusion of the CSLL under DTTs signed after 1988, and
- no reference to contributions in the scope of the DTTs, but rather to taxes.

The new Law 13,202/2015 provides that the scope of the DTTs should be interpreted as including CSLL. This change, which will apply retroactively, may have positive impacts for Brazilian companies principally with outbound investments and activities. Such change is also applicable to treaties signed by Brazil in order to avoid double taxation on profits derived from international air and shipping transport.

Relevant Provisional Measures (PMs) under Congress appreciation

A PM is issued by the Executive Branch of the Brazilian government and has the authority of law until acted upon by the Brazilian Congress within a prescribed 60-day period. If the Congress does not act within this initial period, then it expires unless it is extended for an additional 60-day period.

On 9 March 2016, the Brazilian Senate released a notice confirming that Provisional Measure 694/2015 (PM 694) expired as of that date and will not be converted into law. PM 694 would have added a new deductibility limit for interest on net equity (INE) for Brazilian income tax and social contribution tax purposes and increased the income tax withholding rate on INE payments to certain non-resident shareholders.

Brazil

Taxes on corporate income

Brazilian resident companies are taxed on worldwide income. Non-resident companies are generally taxed in Brazil through a registered subsidiary, branch, or permanent establishment (PE), based on income generated locally. Other than that, non-resident companies can be subject to withholding tax (IRRF) on income derived from a Brazilian source.

Corporate income tax (IRPJ) is assessed at the fixed rate of 15% on annual taxable income, using either the 'actual profits' method or the 'presumed profits' method (*see the Income determination section*).

Surcharge

Corporate taxpayers are also subject to a surcharge of 10% on the annual taxable income in excess of BRL 240,000.

Social Contribution on Net Income (CSLL)

All legal entities are generally subject to CSLL at the rate of 9% (except for financial institutions, private insurance, as well as certain other prescribed entities, which are taxed at the rate of 20%), which is not deductible for IRPJ purposes. The tax base is the profit before income tax, after some adjustments.

Local income taxes

Corporate income taxes are levied only at the federal level (i.e. there are no state or municipal income taxes).

Corporate residence

A legal entity is considered resident in Brazil if it has been incorporated in Brazil, and its tax domicile is where its head office is located.

Permanent establishment (PE)

The specific term 'permanent establishment' is not included in the Brazilian legislation.

In general, a non-resident company may be treated as having a taxable presence if it operates in Brazil either through: (i) a fixed place of business or (ii) an agent who has the power to enter into contracts in Brazil in the name of or on behalf of the non-resident.

Other taxes

Value-added tax (VAT)

The Brazilian indirect taxes system is complex and has been subject to multiple changes during the past years. The text below contains general information applicable to each of the taxes herein mentioned. Moreover, it is important to note that the respective legislation includes various exceptions to the general stated rules. In the case of the state VAT (ICMS), although a federal law should be followed, each state issues its own legislation, which brings certain differences when compared to the federal law.

The Brazilian indirect tax system comprises three key indirect taxes:

- VAT on Sales and certain Services (ICMS)
- Excise Tax (IPI), and
- Service Tax (ISS), which are state, federal, and municipal taxes, respectively.

VAT on Sales and Services (ICMS)

ICMS is a state tax on the circulation of merchandise, electric power, rendering of interstate and intermunicipal transportation services, and communications, even when the transaction and the rendering of services start in another country. It is not a cumulative tax, that is, the tax is only assessed on the increase in the price of the product in each part of the circulation process.

The calculation process involves a system where the taxpayer should check the amount of debits and credits related to the state VAT. In case the taxpayer upholds more debits than credits, the taxpayer will be required to pay tax on the difference between them.

In summary, the credits are calculated when the raw materials enter the taxpayer's premises and the debits are computed when the final products exit the establishment. Moreover, taxpayers are not allowed to account for credits on materials purchased that will be used on goods that will not be taxable when they exit the company.

Finally, VAT is collected in the state of São Paulo at a 18% rate. Certain products can attract a higher rate (usually 25%) or a lower rate.

Special rates apply to interstate sales, as shown in the chart below. A 4% rate applies on all interstate sales of imported goods.

From (shipper)	To (addressee)	Rate (%)
South and Southeast	South and Southeast	12
North, Northeast, and Midwest	North, Northeast, and Midwest	12
South and Southeast *	North, Northeast, and Midwest *	7

* Including the state of Espírito Santo.

ICMS is due on a monthly basis and exports are not subject to ICMS.

ICMS-ST regime

In order to avoid illegal tax evasion, enhance the tax control processes, and facilitate tax collection, the legislation may appoint a single taxpayer of a product's chain as the sole liable party, who will collect the ICMS due by all parties until the final consumer. The so-called ICMS-ST regime is imposed for certain prescribed goods as listed by each state tax legislation.

Recent changes regarding ICMS due on interstate sales of goods to non-ICMS taxpayers

As a general rule, ICMS is collected by the state where the supplier of the goods is located. ICMS is collected by most states at internal rates ranging from 17% to 19% (some products attract a lower/higher rate). As noted above, special rates apply to interstate sales, which will be equivalent to 4%, 7%, or 12%, depending on the location of the supplier and client, as well as whether the goods are imported or domestically sourced.

However, in the past, where the acquirer of the goods is a non-ICMS taxpayer (e.g. individuals), the internal rate was applied, no matter if the transaction involves parties located in the same or different states. Recently, pursuant to Constitutional Amendment 87/2015 and ruled by ICMS Covenant 93/2015, the new legislation determines that on interstate transactions involving a non-ICMS taxpayer, the 7% or 12% rates shall be applied (instead of the internal rate), and the difference between the internal and interstate rates (so called 'Difal') shall be shared between the two states involved in the transaction (i.e. supplier's state and consumer's state). The new legislation has been in force since January 2016.

Brazil

Excise Tax (IPI)

This Federal excise tax is paid by manufacturers on behalf of their customers at the time of sale, either to another manufacturer who will continue the manufacturing process or to the retailer who sells to the end user.

The tax paid is stated separately on the sales invoice, as is the nature of the goods involved. Certain exemptions are given to goods considered to be of basic necessity to the country's economy. The rates are defined by the product's tariff code (normally around 10% to 15%, but in certain cases ranging to over 300%), and are in accordance with the essentiality of each product, which generally means that essential products will attract lower tax rates.

As mentioned above, when manufactured products are sold between producers, the IPI is imposed. However, the subsequent manufacturer is allowed a credit against its IPI liability, on the amount of IPI paid to its suppliers (non-cumulative tax, similar to what happens with ICMS).

IPI is also imposed on import transactions and is due on a monthly basis.

Municipal Service Tax (ISS)

The ISS is a municipal tax levied on the provision of services listed by Supplementary Law 116/2003. ISS is imposed on a cumulative basis (it is not creditable), and the rates may vary between 2% and 5%, depending on the type of service (rates to be stipulated on a municipal basis).

Service import is also subject to ISS, to be collected by the Brazilian entity that is contracting the services from a supplier located abroad.

ISS is not levied on export of services. However, if the result of a certain service is verified in Brazil, ISS is imposed, even if the payment for such service is made by a non-resident.

Import tax

The import duty (II) is levied on permanent import of goods into Brazil and is also referred to as import tax or customs duty. The rates vary according to the product's tariff code based on Mercosur Harmonised System (NCM/SH), usually ranging from 10% to 20% (there are some exceptions, but the maximum consolidated rate is 35%). As a general rule, the taxable basis consists of the cost, insurance, and freight (CIF) value of the product (i.e. cost, international insurance, and international freight), calculated pursuant to the World Trade Organization's (WTO's) Customs Valuation Agreement.

Import duty is not recoverable by the importer (i.e. it is considered a cost).

Property taxes

A property tax (IPTU) is levied annually based on the fair market value of property in urban areas at rates that generally vary according to the municipality and location of the property. In the municipality of São Paulo, the basic IPTU rate is 1% for residential properties or 1.5% for commercial properties (both rates may be increased or decreased according to the market value of the property).

Transfer taxes

A property transfer tax (ITBI) is levied on the transfer of immovable property, with rates also varying based on the municipality where the property is located. The ITBI rate in the municipality of São Paulo is currently 3%, applied over the market value of the property.

A state property transfer tax (ITCMD) is normally payable at rates varying from state to state on inheritances and donations of goods and rights. In the State of São Paulo, ITCMD is charged at the rate of 4%.

Tax on financial operations (IOF)

IOF is a tax levied on certain financial operations, such as loans, foreign exchange operations, insurance, and securities, as well as operations with gold (as a financial asset) and foreign exchange instruments. The applicable rate will vary depending on the operation. The IOF rate may be reduced to 0% in some cases, such as: (i) exchange operations relating to the inflow of revenues in Brazil deriving from the export of goods and services; (ii) exchange operations relating to the inflow and outflow of resources in and from Brazil, stemming from foreign loans, with average term exceeding 180 days; and (iii) remittances of interest on net equity and dividends relating to foreign investment.

Social Contribution on Billing (COFINS)

COFINS, a monthly federal social assistance contribution calculated as a percentage of revenue, is levied at the rate of 7.6%. Under the non-cumulative method, a COFINS credit system is meant to ensure that the tax is applied only once on the final value of each transaction. However, some taxpayers (such as financial institutions, telecommunication companies, cooperatives, and companies that opt to calculate IRPJ and CSLL using a 'presumed profits' method) are subject to the cumulative method of COFINS system, which applies a rate of 3% with no credit system.

The general rates of COFINS may be reduced in certain circumstances (e.g. financial revenues may be subject to a rate of 0% or 4% depending on the nature of the transaction). Also, certain transactions are exempt from COFINS (e.g. exportation of services or assets are typically exempt where it results in funds entering Brazil).

Contribution to the Social Integration Program (PIS)

PIS, which is also a federal social contribution calculated as a percentage of revenue, is levied at the rate of 1.65%. Under the non-cumulative method, a PIS credit system is meant to ensure that the tax is applied only once on the final value of each transaction. However, some taxpayers (such as financial institutions, telecommunication companies, cooperatives, and companies that opt to calculate IRPJ and CSLL using a 'presumed profits' method) are still subject to the cumulative method of PIS system, which applies a rate of 0.65% with no credit system.

The general rates of PIS may be reduced in certain circumstances (e.g. financial revenues may be subject to a rate of 0% or 0.65% depending on the nature of the transaction). Also, certain transactions are exempt from PIS (e.g. exportation of services or assets are typically exempt where it results in funds entering Brazil).

PIS and COFINS on imports

Importation of goods and services are also subject to PIS and COFINS (in addition to other taxes imposed on import transactions). PIS and COFINS are generally imposed on the Brazilian entity or individual (the importer of goods or services) and should apply to the import of services at the rates of 1.65% and 7.6%, respectively.

From 1 May 2015, the Brazilian government increased the PIS/COFINS rates on importation of goods from 1.65% to 2.1% (PIS) and 7.6% to 9.65% (COFINS), respectively. Accordingly, the combined general rate increased from 9.25% to 11.75%. There are also increased rates for PIS and COFINS on importations of certain specific products, including pharmaceutical products; perfumes, cosmetics, and toiletries; machinery; and vehicles (under these cases, specific rates were provided).

The contributions paid upon import transactions may, in some instances, be creditable.

Brazil

Payroll taxes

Legal entities incorporated in Brazil are subject to employer social costs, including: Social Security Contribution (INSS), Employees' Severance Indemnity Fund (FGTS), work accident insurance (RAT), and variable contribution destined to 'third parties' engaged in social development activities (e.g. SENAI, SESC, SESI). As a general rule, INSS is due by the companies at a 20% rate over the employees' payroll. However, certain entities may be eligible to calculate INSS at a range of 1% to 4.5%, applied on the company's gross revenue rather than being calculated upon the company's payroll. In relation to FGTS, such contribution is levied on employee's salary at the rate of 8%.

The employer is responsible to withhold income tax and social security contribution on behalf of the employee on a monthly basis.

The Brazilian government is currently introducing a new framework for reporting payroll taxes and contributions referred to as 'eSocial'. At the time of writing, the changes are anticipated to take effect from 2016 or 2017, depending on the corporate income tax regime adopted by the company.

Contribution for Intervention in the Economic Domain (CIDE)

CIDE is a contribution levied at the rate of 10% on remittances made by corporate taxpayers for royalties and for administrative and technical services provided by non-residents. CIDE is payable by the local entity, and, therefore, not creditable to the non-resident. CIDE does not represent a liability to the foreign recipient. CIDE is not applied on the payments relating to the license to use, market, or sub-license software, provided that it does not involve transfer of technology.

Branch income

Profits of branches of foreign corporations are taxable at the normal rates applicable to Brazilian legal entities.

Income determination

Brazilian taxpayers are subject to IRPJ and CSLL using an 'actual profits' method (*'Lucro Real'*), which is based on taxable income (book results before income taxes), adjusted by certain additions and exclusions as determined by the legislation.

Subject to certain restrictions, Brazilian taxpayers have the option to calculate IRPJ and CSLL using a 'presumed profits' method (*'Lucro Presumido'*). Under the 'presumed profits' method, the income is calculated on a quarterly basis on an amount equal to different percentages of gross revenue (based on the entity's activities) and adjusted as determined by the prevailing legislation.

Inventory valuation

Brazilian income tax regulations require that inventory may be valued at the actual average cost or by the cost of the most recently acquired or produced goods. Rulings to the effect that last in first out (LIFO) is not acceptable have been given.

Capital gains

Capital gains derived from the sale of assets and rights, including shares/quotas, are generally taxed as ordinary income.

Carried forward capital losses may be offset only against capital gains. Unused capital losses are treated similarly to income tax losses with regard to limits on use and carryforward period. Capital losses may be used to offset other operating income in the year that they are incurred.

Capital gains derived by non-residents (including transactions carried out abroad between two non-resident investors, involving assets or rights located in Brazil) may be taxed in Brazil. The Brazilian source performing the remittance of capital gains to the non-resident (whether a Brazilian acquirer or the local representative of a foreign acquiring entity) must withhold the applicable income tax on such amounts on behalf of the latter at rates of 15% (or 25% if the beneficiary is located in a tax haven jurisdiction).

Recently, Law 13,259/2016 has established progressive income tax rates, which range from 15% (for capital gain that does not exceed BRL 5 million) to 22.5% (for the portion of the gain that exceeds BRL 30 million). The new rates should apply from 1 January 2017.

Exemptions from capital gains taxation may be available for specific transactions (e.g. certain regulated investments on the Brazilian stock market).

Dividend income

In general terms, no IRRF is due on cash dividends or profits paid or credited to either corporate or individual shareholders. Brazilian resident beneficiaries are not subject to further income tax on receipt of dividends.

It is important to note that there are certain amendments to PMs in 2015 that have been proposed to reintroduce the IRRF on dividend payments.

Financial income

Fixed-rate interest income from short, medium, or long-term financial market transactions, including swap transactions, is subject to IRRF at rates ranging from 15% to 22.5%. Non-fixed financial gains related to stock/commodities exchange and/or futures market transactions are taxed at rates of 20% (day-trade) and 15% (all other cases). For legal entities, the total income or gain is considered taxable income, and the tax withheld may be offset against the total tax due by the corporate taxpayer.

Additionally, PIS/COFINS may be levied at a rate of up to 4.65%, depending on the type of transactions and taxation regime (i.e. non-cumulative method).

Foreign currency exchange gain/loss

With respect to foreign currency exchange gain/loss, which may arise from receivables or liabilities denominated in foreign currency, Brazilian tax legislation allows the local company to elect to consider the related effect, for tax computation purposes, either upon an accrual or cash basis (i.e. actual receipt/payment of funds).

Foreign income

Brazilian resident companies are taxed on worldwide income. *See Controlled foreign companies (CFCs) in the Group taxation section for more information.*

Deductions

Depreciation and depletion

Depreciation is allowable on a straight-line basis over the useful life of the asset. The annual rates provided by the Brazilian tax authorities normally allowable are 10% for machinery, equipment, furniture, and installations; 20% for vehicles; and 4% for buildings. Accelerated depreciation is allowed for companies with a two or three working shift operation by increasing normal rates by 50% and 100%, respectively.

Depletion allowances are allowed for natural resources on a useful-life basis. Special incentive depletion allowances are granted for mining operations.

Brazil

For Brazilian accounting purposes, companies should obtain a useful life study for fixed assets in order to determine the acceptable depreciation rates. For tax purposes, the depreciation considered deductible for the corporate income tax computation is generally determined based on the application of the annual depreciation rate for accounting purposes over the asset's acquisition cost. In cases where the depreciation registered in the books of the company is lower than that calculated based on the depreciation charts issued by the Brazilian Revenue Service, the difference can be excluded from the company's taxable income calculation made under the actual profits method.

Goodwill

Amortisation of goodwill that arises as a result of accounting for investments in subsidiary and associated entities pursuant to the equity pick-up method is deferred for taxation purposes until the related investment has been realised (e.g. sold, disposed). However, under certain requirements, goodwill paid upon the acquisition of the shares or quotas of a permanent investment may be amortised before this realisation occurs (e.g. after a merger or a spin-off). It is important to note that the amortisation of goodwill is not permitted in Brazil for accounting purposes.

Whenever the cost of a share acquisition is higher than the net equity value of the acquired company, the acquisition cost of the investments must be segregated into:

- i the net equity of the acquired company
- ii the fair value of the net assets, and
- iii the goodwill deriving from future profitability, which corresponds to the remaining balance from items (i) and (ii).

Upon a merger between buyer and acquired company (downstream or upstream), the amount of goodwill can be amortised for tax purposes over a period of not less than five years, provided certain conditions are complied with.

These conditions include the preparation of an independent appraisal report supporting the value referred to in (ii) above, which will need to be filed with the RFB or with the Register of Deeds and Documents, and that the transaction has been carried out among unrelated parties.

Taxpayers wishing to continue to apply the previous rules for goodwill amortisation in relation to acquisitions made on or before 31 December 2014 will have until 31 December 2017 to complete the merger of the target and the acquiring entity.

Amortisation of patents, trademarks, and copyrights, based on their legal limited life, is a deductible expense within approved limits.

Start-up expenses

As a general rule, for tax purposes, start-up/pre-operational expenses may be deferred and amortised on the straight-line basis over a period of not less than five years, beginning the month in which the business starts operating.

For purposes of corporate income tax calculation based on the actual profits method, the following expenses shall not be computed within the period in which they are incurred: (i) start-up organisation expenses, including from the initial operation phase, when the company only partially used its equipment or its installations and (ii) expenses for expansion of industrial activities.

The expenses mentioned above shall be excluded for purposes of computation under the actual profits method, based on over a minimum period of five years, as from the beginning of the regular operations.

Research and development (R&D) expenditures

At the option of the company, R&D expenditures may be deducted when incurred or deferred until termination of the project and then amortised over a period of not less than five years.

R&D expenses may be excluded, for purposes of computation based on the actual profits method, when registered as non-current asset intangibles, during the computation period in which they were incurred. To use this benefit, the taxpayer must add to the net income, for purposes of computation based on the actual profits method, any amount previously recognised for the relevant intangible asset, through amortisation, sale, or write-off.

Interest on net equity (INE)

Companies can pay interest (calculated on a *pro rata* basis and up to a given rate, known as the 'long-term interest rate' [TJLP], which is currently set at 7.5%) to partners and/or share/quota holders, based on the company's net equity. Such interest, which may not exceed the highest of 50% of the annual profits or 50% of the accumulated earnings and profits, is deductible for both IRPJ and CSLL purposes and is subject to 15% IRRF at the source (or 25% if the beneficiary is located in a tax haven jurisdiction). Whenever the beneficiary is a legal entity subject to normal income tax in Brazil, the tax withheld at the source may be taken by the recipient as a tax credit. If the beneficiary is a Brazilian resident individual, such interest will not become subject to any further taxation.

Interest and other payments to entities in a tax haven or under a privileged tax regime

Provisions similar to those for thin capitalisation (*see the Group taxation section*) are also applicable to interest paid or credited by a Brazilian entity to an individual or legal entity (whether or not a related party) resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime. In these cases, the interest expense is only deductible for Brazilian income tax purposes if it is viewed as necessary to the company's activities and the total amount of the Brazilian entity's debt with any foreign party resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime does not exceed 30% of the Brazilian entity's net equity.

The Law also provides that amounts paid, credited, delivered, used, or remitted under any title, directly or indirectly, to related or unrelated individuals or legal entities that are resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime will only be viewed as deductible for Brazilian income tax purposes if all of the following conditions are met: (i) the effective beneficiary of the payment is identified; (ii) there is evidence that the payment beneficiary has operational capacity (i.e. substance); and (iii) there is adequate documentation to support the relevant payments and the corresponding supply of goods, rights, or utilisation of services.

Tax havens and privileged tax regime lists

The Brazilian tax authorities have issued a list detailing the jurisdictions that are considered not to tax income or to tax it at a rate lower than 20%, or that deny access to information regarding shareholding and ownership of assets and rights.

The list also contemplates jurisdictions that are considered to have 'privileged tax regimes', as set forth in Brazilian legislation. The following types of entities are included in the list:

- Holding companies incorporated under the law of Denmark, which do not carry out substantial economic activity.
- Holding companies incorporated under the law of the Netherlands, which do not carry out substantial economic activity.
- International trading companies (ITCs) incorporated under the law of Iceland.

Brazil

- Holding company, domiciliary company, auxiliary company, mixed company, and administrative company incorporated in Switzerland and other legal entities subject to a ruling issued by the tax authorities that apply a combined tax rate lower than 20%.
- Limited liability companies (LLCs) incorporated under the state law of the United States, owned by non-residents and not subject to federal income tax.
- Holding companies (ETVEs) incorporated under the law of Spain. Note that inclusion has been temporarily suspended, pending a review requested by the Spanish government.
- ITCs and international holding companies (IHCs) incorporated under the law of Malta.

It is generally understood that the concept of a privileged tax regime is subject to stricter transfer pricing, thin capitalisation, and tax deduction rules. There are also a number of adverse implications from a Brazilian CFC perspective. For the jurisdictions considered as tax havens, in addition to the tax consequences applicable for privileged tax regimes above, the IRRF rate due on capital gains and cross-border payments, such as services fees, royalties, and interest, is 25%.

Jurisdictions that satisfy certain international transparency standards may apply for the rate (to be considered a tax haven/privileged tax regime) to be lowered from 20% to 17%.

Bad debt

Losses on bad debts are tax deductible, depending on the amounts, time overdue, and administrative and/or legal actions taken to recover losses. Losses arising from inter-company transactions are not tax deductible.

Charitable contributions

Donations are deductible, up to certain limits, if recipients are registered as charitable institutions.

Travel expenses

Travel expenses may only be considered deductible if they are incurred in connection with business activities, duly documented and substantiated.

Medical and pension expenses

Expenses of group medical care and health insurance programmes for employees and contributions to private supplementary pension schemes are generally considered deductible if supplied to all employees indiscriminately.

Fines and penalties

Punitive tax/contribution penalties are not deductible for tax purposes.

Taxes/contributions

Taxes, contributions, and related costs, such as late-payment interest, are generally deductible for tax purposes on the accrual basis. This rule does not apply to taxes/contributions being or to be challenged by the taxpayer at any level of litigation, which are deductible for tax purposes only on a cash basis.

Tax losses carried forward

Tax losses (i.e. for IRPJ and CSLL purposes) may be carried forward without any time limitation. However, the tax loss may not reduce taxable income by more than 30% of its amount prior to the compensation of the tax loss itself (and is subject to certain loss recoupment rules).

There is no carryback of tax losses.

Payments to foreign affiliates and related companies

Royalties and technical service fees (with transfer of technology or know-how) payable to foreign companies with a direct or indirect controlling interest in the Brazilian company are deductible for tax purposes (observing applicable deduction limits), provided the contract has been duly registered with the National Institute of Industrial Property (*Instituto Nacional da Propriedade Industrial* or INPI) and approved by the Brazilian Central Bank.

Group taxation

Consolidated tax returns are not permitted in Brazil.

Transfer pricing

The Brazilian transfer pricing rules apply to import and export transactions of goods, services, and rights between related parties (the legislation provides a broad list of the parties considered as 'related' for transfer pricing purposes). Under such rules, the price determined between related parties shall be acceptable, for Brazilian tax purposes, if it is in accordance with one of the transfer pricing methods established by the legislation (no profit methods available). Moreover, all transactions with both tax havens and those subject to privileged tax regimes are subject to transfer pricing rules, whether involving related parties or not.

Interest

As of 1 January 2013, Brazilian transfer pricing rules are applicable to interest derived from/charged to inter-company loans or with low tax jurisdictions, and such interest must be within the rates established below, in addition to a spread determined by the Ministry of Finance, in order to be acceptable for tax deductibility purposes:

- i in case of transaction in US dollars, subject to a fixed interest rate: rate of Brazilian sovereign bonds issued in US dollars in foreign markets
- ii in case of transaction in Brazilian reais, subject to a fixed interest rate: rate of Brazilian sovereign bonds issued in Brazilian reais in foreign markets, and
- iii in all other cases (e.g. euros): LIBOR for the period of six months.

The additional spread is currently set at 3.5% per year, applicable to interest due to foreign related parties or to low tax jurisdictions, and 2.5% per year, in case of interest charged.

For transactions covered in item (iii) above, in currencies for which there is no specific LIBOR, the LIBOR for deposits in US dollars must be the one to be considered.

Royalties

Operations involving royalties shall not be subject to transfer pricing rules should the relevant agreement be registered with the Brazilian Central Bank (BACEN) and INPI.

Services/Goods/Rights

The adequacy of the price performed between related parties in any operations involving goods, services, and rights shall be supported by the application of one of the following transfer pricing methods, as determined in the Brazilian transfer pricing rules (the company may choose the most convenient method).

Methods available for documenting the import transactions:

- Comparable independent price (PIC).
- Resale price less profit (PRL).
- Production cost plus profit (CPL).

Brazil

Methods available for documenting the export transactions:

- Export sales price (PVEx).
- Resale price.
- Acquisition or production cost plus taxes and profit (CAP).

Relief of proof rules for inter-company export transactions is available.

Please note that imports and exports of commodities, quoted in commodities exchange markets, must be tested by the use of specific methods called PCI and PECEX, respectively. Based on these methods, taxpayers shall compare the transaction amounts with the daily average quote for each product.

Thin capitalisation

The Brazilian thin capitalisation rules establish that interest paid or credited by a Brazilian entity to a related party (individual or legal entity), resident or domiciled abroad, not constituted in a tax haven or in a jurisdiction with a privileged tax regime, may only be deducted for income tax purposes if the interest expense is viewed as necessary for the activities of the local entity and the following requirements are met:

- i the amount of debt granted by the foreign-related party (which has participation in the Brazilian entity) does not exceed twice the amount of its participation in the net equity of the Brazilian entity
- ii the amount of debt granted by a foreign-related party (which does not have participation in the Brazilian entity) does not exceed twice the amount of the net equity of the Brazilian entity
- iii the total amount of debt granted by foreign-related parties as per (i) and (ii) does not exceed twice the sum of participation of all related parties in the net equity of the Brazilian entity, and
- iv in case debt is only granted by related parties that do not have a participation in the Brazilian entity, the total amount of debt granted by all of these related parties does not exceed twice the amount of the Brazilian entity's net equity.

Consequently, if one of the mentioned 2:1 ratios is exceeded, the portion of interest related to the excess debt amount will not be deductible for Brazilian income tax purposes.

Similar provisions are also applicable to interest paid or credited by a Brazilian entity to an individual or legal entity (whether or not a related party) resident or domiciled in a tax haven or in a jurisdiction subject to a privileged tax regime. In these cases, the ratio reduces to 30% of the Brazilian entity's net equity (0.3:1 ratio).

Controlled foreign companies (CFCs)

Law No. 12,973/2014 introduced rules for the treatment of controlled and affiliated companies for Brazilian CFC purposes.

For controlled companies, the law expressly applies to both directly and indirectly controlled entities individually ('top down look through approach'). As such, any investment in a controlled foreign entity must be adjusted yearly to reflect the change in the investment value corresponding to the profits or losses of the directly and/or indirectly controlled entity. The change in investment must be recognised in proportion to the Brazilian parent's participation in its equity, and any positive adjustment relating to profits earned, calculated under the local accounting standards of the jurisdiction of the controlled entity, must be subject to IRPJ and CSLL annually.

Taxpayers will be allowed to consolidate positive and negative adjustments until 2022, provided certain conditions are satisfied as defined by the legislation.

One of the requirements introduced by the legislation is related to the concept of the sub-taxation jurisdiction, which is defined as being a jurisdiction that has a nominal income tax rate of less than 20%. In order to be able to consolidate, a company cannot be subject to a sub-taxation regime, in addition to not being subject to a privileged tax regime or resident in a tax haven (or controlled directly or indirectly by such entities).

In case the taxpayer does not choose to consolidate its accounting losses, losses will only be compensated by the foreign controlled entity with its own future profits. Accumulated losses accrued before the above-mentioned law may also be used to offset profits without any time limitation, subject to appropriate disclosure.

Under certain conditions, taxpayers may choose to pay income tax due on the foreign profits proportionally to the profits actually distributed to the Brazilian entity, in subsequent periods to that in which such results were generated. However, in the first year, even where there is no distribution of profits, 12.5% of profits will be deemed to be distributed to the Brazilian parent. If no further profits are distributed, the remaining profits will be deemed to be distributed in the eighth subsequent year. Taxpayers choosing to postpone payment of income tax due should consider the impact of interest as well as foreign exchange rates.

In addition to corporate taxes paid, the law expressly extends foreign tax credits to withholding income tax paid abroad on the profits distributed to the Brazilian parent.

For affiliated companies, the law does not require adjustments to the Brazilian entity's accounts but rather focuses on the profits distributed. Profits will be considered distributed to the parent when credited or paid or in other specific circumstances defined by the legislation. As such, any profits earned by a Brazilian entity through a foreign affiliate will generally only be taxable in Brazil on 31 December of the year in which they were actually distributed to the Brazilian entity, provided that the affiliate satisfies certain conditions defined by the new legislation.

The CFC rules will not apply for directly or indirectly controlled foreign entities and affiliates in case of activities related to the exploration of oil and gas in Brazil.

Until calendar year 2022, Brazilian parent companies may deduct up to 9% as a presumed/deemed credit on the CFC's taxable profit, generated by investments abroad that are engaged in the manufacture of food and beverage products and in the construction of building/infrastructure works.

This list of activities has been extended to include manufacturing, mineral extraction, exploitation, under public concession contracts, of public assets located in the country of residence of the CFC entity, as well as other general industry.

Please note that, on 8 December 2014, the RFB published NI 1,520/2014, providing guidance to taxpayers navigating some of the practical aspects of the new Brazilian CFC rules.

Tax credits and incentives

Foreign tax credit

Brazilian resident companies are taxed on worldwide income, but they may compensate the income tax paid in the country of domicile of the branch, controlled, or associated company, and the tax paid on earnings and capital gains, against the corporate income tax due in Brazil. The amount of tax effectively paid abroad, to be compensated, may not exceed the amount of income tax and surtax due in Brazil on the amount of profits, earnings, and capital gains included in the calculation of taxable income.

Brazil

Please refer to Controlled foreign companies (CFCs) in the Group taxation section for a description of the use of foreign tax credits.

Investment project incentives

Total or partial exemption from duty, excise tax, and social contributions on imported equipment is granted on certain approved investment projects.

Approved investment projects are also granted accelerated depreciation on nationally produced equipment and access to low-cost financing. Sales of some capital equipment are exempt from state sales tax.

Brazilian corporate taxpayers can apply a percentage of their income tax liability on deposit for reinvestment and investment in their own approved investment projects. These approved investment projects are normally granted total or partial income tax exemption.

The Brazilian legislation also provides tax incentives for projects focusing on technological innovation.

Greater Brazil Plan (Plano Brasil Maior)

In August 2011, the Brazilian government announced several measures with the aim to benefit local manufacturers and exporters of goods and services. Referred to as 'Brasil Maior' (Greater Brazil), the government's plan focuses on increasing national competitiveness through incentives for technical innovation, research, added value in production, as well as providing clear advantages for exporters.

Tax incentives related to the realisation of the Olympic and Paralympic games

The Brazilian government has also issued legislation that provides for tax measures applicable to operations involving the organisation or realisation of events directly related to the 2016 Olympic and Paralympic Games to be held in Rio de Janeiro.

The Law provides for the exemption of federal taxes due on import of goods or services used exclusively in activities directly related to the organisation or realisation of both events, such as trophies, medals, plaques, statuettes, pins and badges, flags, and other commemorative objects; promotional material, flyers, and the like; and other similar non-durable material (which useful life is up to one year). Taxes included in this exemption are II, IPI over imports due on customs clearance, and PIS/COFINS-Import, among other charges and duties.

In order to make use of these benefits, the International Olympic Committee (IOC) and associated companies, the Court of Arbitration for Sport (CAS), the World Anti-Doping Agency (WADA), National Olympic Committees, International Sporting Federations, media companies and accredited transmitters, sponsors, and IOC and RIO 2016 service providers must be established in Brazil if they commercialise products or services in Brazil or employ individuals with or without a formal employment relationship, even if only for organising or realising the games.

Some municipalities have already issued legislation granting ISS exemptions in connection with the Olympic and Paralympic Games.

Regional incentives

Income tax exemptions or reductions are also available for companies set up in specified regions within Brazil, primarily the north and northeast regions. These incentives are designed to accelerate the development of certain less-developed regions and industries considered to be of importance to the economy.

Other incentives

In addition, certain excise and sales tax exemptions are granted to exporters of manufactured goods.

Withholding taxes

Profits/dividends distributed to resident or non-resident beneficiaries (individuals and/or legal entities) are generally not subject to IRRF (Brazilian term for withholding income tax) (*please see the Income determination section for more information*). This provision is also applicable to dividends paid to non-resident companies located in a tax haven jurisdiction.

The IRRF rate applicable to payments for services rendered by non-resident companies or individuals is generally 15% but can be increased to 25% in certain cases. Other transactional taxes also need to be considered on such payments.

Payments for services, royalties, and interest to non-resident companies located in a tax haven jurisdiction (black list only) are subject to IRRF at the rate of 25%.

The RFB issued guidance in relation to how they should treat certain service fees, which, in effect, allow certain payments to be exempt from IRRF in Brazil, under certain tax treaties.

Certain types of income paid by Brazilian companies to non-resident recipients are subject to IRRF as follows:

Recipient	IRRF (%) (3)		
	Dividends (1)	Interest	Royalties
Non-resident companies and individuals:			
Non-treaty	0	15	15
Tax haven	0	25	25
Treaty (2):

Ukraine	10/15	15	15
Venezuela	10/15	15	15

Notes

- Note that the remittance of dividends is generally not subject to taxation in Brazil.
- Treaty rates in excess of those in force for non-treaty countries are automatically reduced. The relevant treaty should be consulted on a case-by-case basis to confirm that the tax reduction is applicable in each case.
- For treaties with multiple IRRF rates, the following rules generally apply:
 - Dividends: if there was IRRF on dividends, which is not the case according to Brazilian legislation, the 10% (or 15%) rate would generally apply if the beneficial owner is a company that directly holds a certain minimum participation in the capital of the company paying the dividends; the 15% (or 25%) rate is considered for all other cases.
 - Interest: the 10% rate generally applies to loans with a certain minimum term granted for specific purposes (e.g. acquisition of capital goods); the 15% rate is considered for all other cases.
 - Royalties: the 10% rate generally applies to royalties arising from the use of, or the right to use, cinematographic films, films or tapes for television or radio broadcasting, and any copyright of literary, artistic, or scientific work produced by a resident of a contracting state; the 25% (or 15%) rate generally applies to royalties arising from the use of, or the right to use, trademarks; and the 15% (or 10%) rate is considered for all other cases.

Tax administration

Taxable period

For tax purposes, a company's year-end is 31 December. A different year-end for corporate/accounting purposes is irrelevant.

Tax returns

With few exceptions, corporate entities, including those that are foreign-controlled, must file an annual tax return consolidating the monthly results of the previous calendar year. This tax return must normally be filed by the end of June following the tax year ending on 31 December.

However, NI 1,633/2016 has extended the term, and tax returns should be filed by 31 July in 2016.

Supporting documentation must be retained for at least five years.

Please note that there are a number of other declarations/returns imposed by the Brazilian tax authorities, for different taxes, at federal, municipal, and state levels, which make the tax administration in Brazil notably bureaucratic.

Payment of tax

In the case of income tax, it is calculated monthly, and payments should generally be collected and paid by the last working day of the subsequent month. Any amounts of income tax due for the year (exceeding the payments performed) must be paid by the last working day of March of the subsequent year.

There is an option to pay the tax due at the end of each quarter in three instalments, the first one starting from the subsequent month to the end of the quarter. When income tax is calculated quarterly, the taxpayer must perform the applicable payment by the last working day of the month subsequent to the end of the quarter.

There are many other taxes applied in Brazil with different due dates established by the domestic legislation.

Tax audit process

Tax returns may be selected for audit either manually or by computer, according to various criteria, including type of business, unusually large or small amounts of income or deductions, and random sampling.

No corporate entity, whether a taxpayer or not, is excused from furnishing information or explanations required by the tax authorities.

When audits are conducted on the premises of taxpayers, tax inspectors have broad powers to inspect books and documents and to request information and any data deemed necessary. This is generally disrupting and, in practice, every effort is made to expedite the conclusion of these audits.

Whenever a violation is determined during a tax audit, the inspectors must draw up an infringement notification, which starts the administrative procedure for additional tax assessments.

It should be noted that, in case of doubts regarding the correct tax procedure to be adopted in a specific situation, taxpayers are allowed to consult with the RFB; however, the results of the consultations only bind the respective taxpayers.

Statute of limitations

The tax authorities may generally audit taxpayers up to five years after the close of the tax year. There is some debate about the moment this five-year period begins, depending on the type of tax considered and certain situations.

Topic of focus for tax authorities

It should be noted that, over the years, Brazil has applied a 'form over substance' approach. Nonetheless, as of 10 January 2001, Supplementary Law 104/2001 introduced a substantial modification in the Brazilian tax code (the so-called anti-avoidance rule). This law establishes a substance-over-form approach that, once regulated, may allow the Brazilian tax authorities to disregard tax-driven transactions.

Although Supplementary Law 104/2001 has not yet been regulated, in our local practice we have seen that tax authorities are keen on ensuring taxpayers have economic substance in their operations (e.g. the use of special purpose entities to enable the amortisation of goodwill for tax purposes in Brazil).

Public digital bookkeeping system (SPED)

Brazil has implemented a public system of digital bookkeeping known as SPED, which aims at gradually replacing paper copies of invoices and tax records for electronic files. SPED can be defined as an instrument that unifies the activities of reception, validation, storage, and legalisation of records and documents that are part of the commercial and tax bookkeeping of companies, through a single, computerised flow of data.

Comprised of three pillars (electronic invoice, digital fiscal bookkeeping, and digital accounting bookkeeping), the implementation of SPED requires adjustments to the relationship with tax authorities, clients, suppliers and, mainly, on the internal operational processes, which will demand an integrated action from different areas (tax, labour [eSocial], indirect tax [bloco K], accounting, information technology, supplies,

Brazil

production, commercial, and others). On the other hand, occasional inconsistencies from databases, as well as operational errors related to tax and accounting information to be generated, usually unknown to the companies' administration, are subject to increased visibility and monitoring by the Brazilian tax authorities.

It is important to bear in mind that there are many more Brazilian ancillary obligations to fulfil, based on electronic frameworks established by the relevant federal, state, and municipal authorities, which may not be comprised within the SPED environment.

The Brazilian tax authorities provide for so-called 'accounting tax bookkeeping' (ECF), in which Brazilian taxpayers need to inform all transactions that impact the computation bases for IRPJ and CSLL purposes. The ECF shall be transmitted on an annual basis to the SPED system up to the last working day of June of the subsequent year to the calendar year it refers. Therefore, Brazilian taxpayers will no longer file the Corporate Income Tax Return (referred to as DIPJ).

Ancillary obligations imposed on import and export of services

The RFB issued regulations that imposed an ancillary obligation, called 'SISCOSERV', regarding transactions carried out between Brazilian residents and non-residents involving services, intangible assets, and other operations. Whenever one of the previous situations takes place, tax authorities must be informed. The type of information to be disclosed is detailed in complementary rules issued by the RFB.

Other issues

Intergovernmental agreements (IGAs)

In force as of September 2014, an IGA was signed between Brazil and the United States, aiming to exchange information related to Brazilian foreign financial institutions (FFIs), in an effort to mitigate tax evasion.

Such IGA is based on the tax information exchange agreement (TIEA) signed by Brazil and the United States in 2007 (although it only came into force in 2013). Both the TIEA and the IGA aim to improve compliance in relation to tax law.

Significant developments

New tax holiday rule for regional development state aid

As of 1 January 2016, new rules on a company's eligibility for the regional development state aid are introduced. The changes include that the applicant has an approval from the Bulgarian Investment Agency and has proved its incentive effect on the targeted region.

Limitation on the aid amount of up to 50% of the present value of the qualifying expense (25% for investments in municipalities from the Southwest region) has also been imposed. The relief is limited for large enterprises with personnel exceeding 250 and turnover above 50 million euros (EUR) or total assets above EUR 43 million.

Starting from 2016, the list of eligible municipalities have to be published by the beginning of February of the following year at the latest.

Exchange of financial information

As of 1 January 2016, Bulgaria has implemented the rules on automatic exchange of financial information in compliance with the European Union (EU) law, Organisation for Economic Co-operation and Development (OECD) recommendations, and the Foreign Account Tax Compliance Act (FATCA). The tax authorities will exchange financial information with foreign tax offices on an annual basis.

More detailed rules on the value-added tax (VAT) treatment of goods and services used for both private and business purposes

As of the beginning of 2016, more detailed VAT rules are introduced in relation to cases where goods and services are used both for business and private purposes. In such cases, the registered persons will be obligated to charge VAT on the goods/services proportional to their use for personal needs.

Taxes on corporate income

Bulgarian tax residents are taxed on their worldwide income. Non-residents are taxed on their income from Bulgarian sources only, through a permanent establishment (PE) and/or via withholding tax (WHT), depending on the case (*see the Branch income section*).

In general, corporate income is subject to corporate income tax (CIT) at a flat rate of 10%.

Alternative tax

Income earned by organisers of gambling games for which the bet is included in the price of a phone or other telecommunication service is subject to 15% alternative tax, applied on the increase in the price of the phone or other telecommunication service (i.e. the difference between the regular price of the service and the new higher price due to the gambling game). A fixed-sum tax is applied to the operation of gaming machines.

Bulgaria

Online gambling games are exempt from the alternative tax, as are a significant part of the other land-based gambling games (i.e. totto; lotto sports betting, including horse and dog racing; and betting on random events or related to the knowledge of facts).

Tonnage tax regime

A special alternative tax regime applies to the operation of commercial maritime vessels, as per their net tonnage, at a rate of 10%.

Local income taxes

There are no local government corporate income taxes in Bulgaria.

Corporate residence

A corporation is resident in Bulgaria for tax purposes if it is incorporated in Bulgaria.

Permanent establishment (PE)

PEs of foreign tax residents (e.g. branches) are treated as separate entities similar to Bulgarian residents for tax and accounting purposes.

The definition of a PE in the Bulgarian legislation follows, in general, the OECD model; however, it covers a broader scope of activities leading to a tax presence in Bulgaria. A PE is generally defined as a fixed place (own, rented, or otherwise used) through which a foreign entity partly or wholly carries out business activities in the country.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 20%. A reduced VAT rate of 9% applies to certain tourist services. Some activities are zero-rated, including intra-Community supplies, exports of goods to countries outside the European Union, and international transport of goods (i.e. transport to or from countries outside of the European Union).

Some supplies are VAT exempt without the right to a VAT credit, including (but not limited to) certain land transactions; leasing of residential property to individuals; and financial, insurance, gambling, educational, and health services. Options to charge VAT exist for certain land transactions, leasing of residential property to individuals, and finance lease contracts.

The following statutory periods for VAT refunds apply:

- 30 days for persons that have performed supplies subject to zero-rate (e.g. exports) within the last 12 months exceeding 30% of the total value of all taxable supplies performed by them in the same period, as well as by large investors meeting certain specific conditions.
- Two months and 30 days in all other cases.

The following mechanism for VAT recovery applies to VAT-registered companies: the positive or negative difference between the output VAT charged by the company and the input VAT for the respective month for which recovery is claimed results, respectively, in VAT payable or refundable. The VAT payable should be remitted to the state budget not later than the 14th day of the month following the respective month. VAT refundable is offset against any VAT payable in the following two months, and any remainder is effectively recovered within 30 days thereafter.

It is possible to claim a refund for VAT paid with respect to assets acquired not earlier than five years prior to the VAT registration, under certain conditions. In the case of real estate, the term is 20 years.

The cash accounting regime may be applied by persons with a taxable turnover below EUR 500,000 for a period of 12 months and a number of other requirements. Taxpayers authorised to apply this regime remit VAT upon receiving a payment from their counterparts and are entitled to VAT credit when they make a payment to their suppliers. Under this regime, a person who has received an invoice from a supplier that is using the cash accounting regime will be entitled to VAT credit upon payment of the invoiced amount.

The telecommunications, broadcasting, and electronically supplied services rendered to EU non-taxable persons (e.g. private individuals, public bodies) are subject to VAT in the country where the customer is established, has its permanent address, or usually resides. This rule has a significant impact on the pricing strategies and the profit margins of the suppliers. In order to apply the correct VAT rate, the suppliers need to collect information to identify the location of their customers. In addition, under this rule, the suppliers are required to register for VAT purposes and pay VAT in different EU countries where they have customers. In order to avoid such administrative difficulties, a possibility for registration under the Mini One Stop Shop (MOSS) is available. Examples of services that are impacted by this VAT rule include the following:

- Fixed and mobile telephone services.
- Access to internet, website supply, and webhosting.
- Radio and television programmes transmitted over a network or distributed via the internet.
- Supply of software and associated updates.
- Supply of music, films, games, images, texts, and information.
- Distance maintenance of programmes and equipment.
- Supply of distance teaching.

Customs duties

Customs duties are calculated in accordance with the EU customs tariff and regulations.

Excise duties

Excise duties are charged as a percentage of the sales price or customs value or as a flat amount in Bulgarian lev (BGN) per unit (or per other quantity measures, depending on the type of the excisable good), unless a suspension regime applies. Excisable products include petrol and diesel fuel, liquefied petroleum gas (LPG), heavy oil, kerosene, beer and spirits, tobacco and tobacco products, and electricity.

The applicable rates are as follows:

- Unleaded petrol: BGN 710 per 1,000 litres.
- Diesel: BGN 646 per 1,000 litres if used as motor fuel and BGN 646 per 1,000 litres if used for heating purposes.
- LPG: BGN 340 per 1,000 kg if used as motor fuel and BGN 0 per 1,000 kg if used for heating purposes.
- Kerosene: BGN 646 per 1,000 litres if used as motor fuel and BGN 646 per 1,000 litres if used for heating purposes.
- Natural gas: BGN 0.85 per gigajoule if used as motor fuel (may be increased to BGN 5.10 if the European Commission rules that the rate is incompatible with the state aid rules); BGN 0.60 per gigajoule if used for production purposes; and BGN 0 per gigajoule if used by households.
- Biogas: Zero rate.
- Heavy oil: BGN 646 per 1,000 kg.
- Electricity: BGN 2 per MWh (zero rate if used by households).

Bulgaria

- Beer: BGN 1.50/hl/°Plato.
- Wine: Zero rate.
- Ethyl alcohol: BGN 1,100 per hectolitre.
- Cigarettes: 38% *ad valorem* plus BGN 70/1,000 pieces (minimum total of BGN 161 per 1,000 pieces).

Lower rates may apply in certain cases (e.g. beer produced by independent small breweries).

The Excise Duties and Tax Warehouse Act provides for the tax warehousing regime and regulates the production, storage, and movement of excisable products under duty suspension.

Property tax

The annual property tax rate is determined by each municipality and ranges from 0.01% to 0.45% of the tax value of property. Individuals and legal entities that are owners of immovable property (i.e. land and buildings) are liable for property tax. For individuals and residential properties of enterprises, the taxable base is the tax value as determined by the municipal authorities based on certain statutory criteria. The taxable base for properties of enterprises is the higher of the property's gross book value and its tax value determined by the respective municipal authorities.

A garbage collection fee is payable for immovable property at a rate determined by the local municipal council annually.

Transfer tax

A transfer tax is due on the value of transferred real estate or motor vehicles, subject to certain exemptions (e.g. contributions in-kind, acquisitions under the Law on Privatisation and Post-privatisation Control). The rate of the transfer tax ranges from 0.1% to 3% and is determined by each municipality.

Stamp duties

There are no stamp duties in Bulgaria.

Insurance premium tax

A tax of 2% is levied on all insurance premiums paid under insurance agreements covering risks insured in Bulgaria. Life insurance, reinsurance, aircraft, vessels, and international transport insurance agreements are exempt from this tax. The taxable base is the insurance premium received by an insurance company under an insurance agreement.

Insurance companies and their tax representatives are liable to collect the tax and remit it to the budget quarterly by the end of the month following the quarter when the insurance premium was collected.

Tourist tax

The tourist tax is levied with respect to the number of nights spent in hotels and other places for accommodation. The municipalities may determine the tax within a range of BGN 0.20 to BGN 3 per night, depending on the type of accommodation facility.

The tax is payable on a monthly basis by the 15th day of the following month.

One-off taxes

The following corporate expenses are subject to a one-off tax:

- Representative expenses related to a company's business.
- Social expenses provided to employees in kind (monetary social expenses are subject to personal income tax [PIT]).

- Expenses related to the exploitation and maintenance of cars where they are used for management activities (as distinguished from administrative activities).

The rate of the one-off tax with respect to the above expenses is 10%. Both the expenses and the related one-off taxes are deductible for CIT purposes.

Payroll taxes

Upon payment of salaries, the employer should withhold PIT at a flat rate of 10% due on employment remuneration, bonuses, and certain fringe benefits and should remit it to the tax authorities by the 25th day of the following month.

National insurance contributions

National insurance contributions include social security and health insurance contributions.

The aggregate rate of social security contributions is 22.7% to 23.4%*, of which 13% to 13.7%* is payable by the employer and 9.7% is payable by the employee.

The aggregate rate of health insurance contributions is 8%, out of which 4.8% is payable by the employer and 3.2% is payable by the employee.

The total national insurance contribution rate (social security and health insurance) is 30.7% to 31.4%*, out of which 17.8 to 18.5%* is payable by the employer and 12.9% is payable by the employee.

* The range is due to the rate of contributions payable to the 'Accident at Work and Occupational Illness Fund', which is due only by the employer and can vary from 0.4% to 1.1%, depending on the employer's economic activity. The rate for the administration and services sector is 0.5%.

Branch income

Although branches are not deemed to be separate legal persons, branches of non-resident companies have separate balance sheets and profit and loss accounts and are subject to CIT at the standard rate of 10% as well as other general taxes (e.g. VAT, property tax).

Representative offices of foreign entities are not allowed to carry out business activities and are not subject to CIT. A representative office registered under the Encouragement of Investments Act may perform only those activities that are not regarded as 'economic activities' (e.g. marketing activities normally carried out by a representative office and auxiliary to the activities of its head office). Representative offices do not constitute PEs of the non-resident entities unless they engage in business activities in breach of the law.

Profits repatriated by a branch to its head office abroad are not subject to WHT. However, certain income payable by a Bulgarian branch or a PE to other parts of the enterprise abroad may trigger WHT (e.g. income from technical services, interest, royalties) unless the respective expenses are not deductible to the branch or the PE, or are recharged at cost.

Income determination

The taxable result is based on the statutory accounting principles relating to profit/loss and adjusted for tax purposes. Statutory accounting is maintained on an accrual basis in line with the applicable accounting standards.

Bulgaria

Small and medium-sized companies may apply specific national standards for the financial statements of small and medium-sized companies or, optionally, International Financial Reporting Standards (IFRS). The principles provided by the standards for the financial statements of small and medium-sized companies are similar to those provided by IFRS. Certain types of companies, including banks and insurance companies, are obligated to apply IFRS.

Inventory valuation

The tax legislation follows the accounting rules for inventory valuation methods. The accounting rules may restrict the application of certain methods (e.g. last in first out [LIFO] is not allowed under IFRS).

Inventory valuation and revaluation methods applicable under accounting standards may be used for tax purposes. Companies may choose the method of inventory valuation but must apply the chosen method consistently throughout the accounting period. An inventory of assets and liabilities is carried out in each accounting period. Accounting gains and losses realised upon revaluation of inventory will not be recognised for tax purposes and will form a temporary tax difference. These gains and losses will be recognised for tax purposes in the period in which the inventory is disposed of.

Capital gains

Realised capital gains are included in corporate income and are taxed at the full CIT rate.

Note that capital gains from securities will not be subject to taxation if resulting from shares in listed companies and tradable rights in such shares on a regulated securities market in the EU/European Economic Area (EEA). Assets distributed as dividends are deemed realised at market value, and any capital gains arising from this will be subject to tax.

Dividend income

Dividends distributed by Bulgarian companies to foreign shareholders and resident individuals are subject to 5% WHT under the domestic legislation (*see the Withholding taxes section for exceptions for payments to EU/EEA tax residents and under double tax treaties [DTTs]*).

Inter-company dividends

Inter-company dividend payments between Bulgarian companies and dividends distributed by EU/EEA residents to Bulgarian companies (except for dividends from special purpose investment companies or in case of 'hidden distribution of profits') are not included in the tax base of the recipient company.

As of 1 January 2016, dividends distributed to a Bulgarian company by its EU or EEA subsidiary are exempt from CIT only if the distribution is not treated as a tax-deductible expense by the distributing company.

Stock dividends

No explicit regulation with respect to stock dividends exists in the Bulgarian CIT Act. Rather, the tax treatment of stock dividends follows the accounting treatment.

Interest income

Interest income is included in the financial results of the company and is subject to 10% CIT.

Exchange rate gains/losses

Exchange rate gains and losses are reported in the profit and loss account and reflected in the assessment of taxable profit.

Foreign income

Income derived outside Bulgaria by resident legal entities and income derived in Bulgaria by Bulgarian branches of non-residents is included in the taxable base for the purpose of CIT, regardless of whether such income is subject to taxation abroad.

In instances where the provisions of a DTT are applicable, a tax credit or exemption for the foreign tax paid may be allowed. There is also a unilateral tax credit that may not exceed the amount of the tax that would be payable in Bulgaria for the same type of income.

Undistributed income of foreign subsidiaries of a Bulgarian resident company is not taxed.

Deductions

Depreciation and depletion

For accounting purposes, depreciation is calculated in accordance with the straight-line, progressive, or declining-balance methods of depreciation. Accounting regulations permit Bulgarian companies to establish a depreciation schedule for each tangible and intangible fixed asset on the basis of the method chosen by the company.

For tax purposes, only the straight-line method is permitted. For machines and equipment that are part of the initial investment, accelerated depreciation may also apply, subject to certain conditions.

For tax purposes, fixed assets are divided into the following seven categories:

Category	Assets	Maximum rates (%)
I	Massive buildings, industrial constructions/equipment, transmission facilities/lines (including electricity)	4
II	Machinery, production facilities, apparatuses	30/50
III	Vehicles (except cars), coverage of roads and runways	10
IV	Computers, peripherals to computers, software and rights to use software, mobile phones	50
V	Cars	25
VI	Long-term intangibles with legal or contractual limitations on the period of use	33 $\frac{1}{3}$
VII	Other assets	15

Under certain conditions, assets classified in Category II that are new may be depreciated at a maximum rate of 50% for tax purposes.

The depreciation rate for Category VI is determined by the period of limitations, but not more than 33 $\frac{1}{3}$ %.

Depletion is not specifically regulated for tax purposes.

Goodwill

Goodwill is not amortisable under Bulgarian tax law.

Start-up expenses

Start-up expenses may be recognised as deductible in the year of establishment of the company.

Bulgaria

Interest expenses

Interest expenses are recognised as deductible expenses, subject to the thin capitalisation rules applicable in Bulgaria (*see Thin capitalisation in the Group taxation section*).

Bad debt

Bad debt impairment costs can be deducted upon expiration of the statute of limitation period. Also, the impairment costs can be recognised for tax purposes upon transferring the receivables. Such impairment costs are tax deductible for financial institutions in the year of recognition.

Charitable contributions

Generally, charitable contributions to certain organisations or persons, specified by law, can be deductible at up to 10% of a company's accounting profit.

Fines and penalties

Expenses for fines and penalties for violation of the legislation are not deductible.

Taxes

CIT is not deductible for tax purposes. However, other taxes, such as one-off taxes on certain expenses (e.g. representative expenses, certain types of fringe benefits) or local taxes and fees may be recognised as deductible for CIT purposes.

Net operating losses

The taxpayer has the right to carry forward tax losses incurred in a given year over the following five years. The loss subject to carryforward is the negative amount of the financial result adjusted for tax purposes, with certain add-backs and deductions specified in the tax legislation.

Tax losses may be reversed up to the amount of the positive financial result after tax adjustments (without the effect of the loss subject to be carried forward itself).

Carryforwards of foreign-source losses may only offset income from the same source. However, EU/EEA-source losses may offset income from other sources, including Bulgarian sources.

Loss carryback is permitted in very specific cases.

Payments to foreign affiliates

Payments to foreign affiliates may be subject to recalculation by the tax authorities if such payments are not made at arm's length.

Group taxation

No group consolidation is permitted for tax purposes in Bulgaria. All companies must pay tax on the basis of individually assessable profits and losses.

Transfer pricing

Bulgarian law requires that taxpayers determine their taxable profits and incomes applying the arm's-length principle to prices at which they exchange goods, services, and intangibles with related parties (transfer prices). Bulgarian transfer pricing rules generally follow OECD Transfer Pricing Guidelines.

Transfer prices are not set in compliance with the arm's-length principle where:

- prices of the supply of goods or services differ from the market prices or

- loans are received or granted against an interest rate that differs from the market interest rate effective at the time the loan agreement is concluded.

The market interest rate is defined as the interest payable under the same conditions for a loan provided or received, notwithstanding the form of the loan, between non-related parties. The market interest is determined according to the market conditions.

The taxable person should be able to evidence that its relations with related parties are in line with the arm's-length principle.

For the purposes of transfer pricing rules, market prices are determined by the following methods:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Transactional net margin method.
- Profit split method.

Preparation of transfer pricing documentation is not mandatory but is recommendable for material related party transactions. Recently, the revenue authorities have tended to focus more on the transfer pricing area.

Currently, there is no possibility to obtain an Advance Pricing Agreement (APA). However, it is possible to obtain an opinion from the revenue authorities on a case-by-case basis. Such opinions are not binding, but they may provide protection from assessment of interest for late payment and penalties.

Thin capitalisation

Interest payable by local companies to local or foreign persons may be restricted by the thin capitalisation rules (which also apply to interest due to non-affiliated companies).

The tax deductibility for interest expenses that exceed interest income is restricted to 75% of the accounting result of the company, exclusive of interest income and expense. If the accounting result of the company before including the effect of the interest income and expenses is a loss, none of the net interest expense will be deductible for tax purposes. Interest on bank loans and interest under financial lease agreements are subject to thin capitalisation regulations only when the agreements are between related parties or guaranteed by or extended at the order of a related party.

The thin capitalisation rules do not apply if the debt-to-equity ratio does not exceed 3:1 for the respective tax period.

Interest expenses restricted in a given year under the thin capitalisation rules may be deducted from the financial result for tax purposes during the following five consecutive years. This reversal may be made up to the tax allowed interest expenses, as per the above formula.

Controlled foreign companies (CFCs)

The Bulgarian tax legislation does not provide for any CFC rules.

Tax credits and incentives

Tax incentives may apply in certain circumstances, including:

- Partial granting of the CIT due for performance of agricultural activities.

Bulgaria

- Additional tax deductions for hiring of long-term unemployed, handicapped, or elderly persons.
- Granting back of up to 50% of the CIT due for investment in regions with high unemployment.

Foreign tax credit

See *Foreign income in the Income determination section* for a description of the foreign tax credit regime.

Withholding taxes

Bulgarian companies are required to withhold tax on payments of dividends and liquidation proceeds; interest (including that incurred under finance lease agreements and on bank deposits); royalties; fees for technical services; payments for the use of properties; payments made under operating leasing, franchising, and factoring agreements; and management fees payable to non-residents.

Capital gains from the transfer of shares in a Bulgarian company or immovable property located in Bulgaria realised by a non-resident are also subject to domestic WHT; however, the tax is payable by the non-resident. Capital gains from securities are not subject to WHT if they result from shares in listed companies and tradable rights in such shares on a regulated securities market in the EU/EEA. As of 1 January 2016, capital gains from disposal of governmental bonds are also exempt from WHT realised on a regulated market in the EU/EEA.

Dividends and liquidation proceeds are also taxed where payments are made to resident individuals and non-profit organisations (*for details on dividend payments between domestic companies, see Dividend income in the Income determination section*). Dividends capitalised into shares (stock dividends) are not subject to WHT.

Interest and royalties payable to EU-based associated companies are subject to full WHT exemption in Bulgaria. Associated company criteria are identical to those in the EU Interest and Royalty Directive and require a holding of at least 25% of the capital for at least two years. The WHT exemption on income from interests and royalties can be applied before the expiration of the two-year participation period, provided that the participation in the capital does not fall below the required minimum before the end of this period (i.e. the direct participation is kept for at least two years).

Any fees for services and use of rights (in addition to technical services fees and royalties) accrued to entities in low-tax jurisdictions will attract 10% Bulgarian WHT unless there is proof of the effective provision of the supply. Subject to 10% WHT would also be any accruals for penalties or damages payments to entities in low-tax jurisdictions, except for insurance compensations. The tax legislation introduces a list of low-tax jurisdictions. These are certain off-shore territories that are explicitly listed, as well as countries with which Bulgaria has not signed a DTT and in which the applicable corporate tax rates are more than 60% lower than the applicable rate in Bulgaria.

Certain types of income (other than dividends) accrued by a PE of a foreign person to other parts of its enterprise located outside the country are subject to WHT (*except for that mentioned in the Branch income section*).

Dividends

When a dividend is accrued to a non-resident company or an individual (both resident and foreign), it is subject to WHT at a rate of 5%, unless the rate is reduced by an applicable DTT. No differentiation is made between portfolio and substantial holdings for purposes of this WHT on dividends.

Dividends distributed by a Bulgarian resident company to an entity that is a tax resident in an EU/EEA member state are not subject to Bulgarian WHT.

Interest

A 10% rate applies to interest (including interest from bank deposits) payable to a non-resident, unless the rate is reduced by an applicable DTT.

Interest on borrowings by the government or the Bulgarian National Bank from international financial institutions is not taxable if the respective loan agreements contain relevant exemption arrangements (international treaties override domestic legislation).

Interest paid to an associated EU-based related company is subject to WHT exemption (requiring at least 25% holding for at least two years, *see above for a description of relief from the two-year participation period*), unless reduced by a DTT.

An exemption from WHT is provided for income from interests on bonds and other debt securities emitted by a local tax resident and admitted to a regulated stock exchange in an EU/EEA member state.

An exemption from WHT is also provided for income from interests on loans extended by a tax resident of an EU/EEA member state, issuer of bonds or other debt securities, provided that the bonds/debt securities are issued for the purposes of extending a loan to a local legal entity and are admitted to a regulated stock exchange in an EU/EEA member state.

Royalties

Royalties payable to foreign persons are taxed at a rate of 10% at source, unless the rate is reduced by an applicable DTT.

Royalty payments to an associated EU-based related company are exempt from WHT (requiring at least 25% holding for at least two years, *see above for a description of relief from the two-year participation period*), unless reduced by a DTT.

Capital gains and technical services

Capital gains and technical service fees payable to foreign residents are subject to 10% WHT, unless the rate is reduced by an applicable DTT. As per the domestic legislation, technical services include installation and assembly of tangible assets as well as consultancy services and marketing research.

Application of DTT relief

Applying DTT relief is generally possible only after completing an advance clearance procedure with the Bulgarian tax authorities. Companies have to evidence that they satisfy the requirements for applying the DTT (e.g. tax residence, beneficial ownership, existence of contractual relationship, actual accrual/payment of the income). The procedure usually takes 60 days to complete.

The above procedure has to be followed only if the annual income payable by a Bulgarian resident exceeds BGN 500,000. In all other cases, DTT relief can be applied directly, through submitting a tax residence certificate and a beneficial ownership declaration with the payer of the income.

Beneficial ownership is explicitly defined in Bulgarian legislation. A company is considered a beneficial owner of the income if it has the right to dispose of the income, has discretion over its use, bears the whole or a significant part of the risk of the activity from which the income is realised, and does not qualify as a conduit company.

Bulgaria

A conduit company is a company that is controlled by persons who would not benefit from the same type and amount exemption if the income was realised directly by them, does not carry out any economic activity except for owning and/or administering the rights or the assets from which the income was realised, and does not own assets, capital, or personnel relevant to its economic activity or does not control the use of the rights or assets from which the income was realised.

The conduit company restriction does not apply to companies that have more than a half of their voting shares traded on a registered stock exchange.

The following is a summary of the main parameters of the Bulgarian DTTs as of 1 January 2016:

Recipient	WHT (%)			
	Dividends*	Interest**	Royalties**	Capital gains
Albania (3, 6, 9, 28)	5/15	0/10	10	0/10
Algeria (24)	10	0/10	10	0
Armenia (1, 2, 6, 28, 36)	5/10	0/5/10	5/10	0/10
Austria (6, 10, 35)	0/5	0/5	5	0/10
Azerbaijan (6, 28, 34)	8	7	5/10	0
Bahrain (6)	5	0/5	5	0
Belarus (6)	10	0/10	10	0
Belgium (6, 10, 27)	10	0/10	5	0
Canada (9, 16, 28)	10/15	10	10	0/10
China (2, 6, 9, 28)	10	0/10	7/10	0/10
Croatia	5	5	0	0
Cyprus (3, 26, 27)	5/10	7	10	0/10
Czech Republic (11, 27)	10	0/10	10	0
Denmark (3, 27)	5/15	0	0	0
Egypt (6)	10	0/12.5	12.5	10
Estonia (9, 16)	0/5	5	5	0/10
Finland (4, 9, 12, 27)	10	0	0/5	0/10
France (5, 27)	5/15	0	5	0
Georgia (6)	10	0/10	10	0
Germany (11, 16, 26, 27, 36, 39)	5/15	0/5	5	0/10
Greece (27)	10	10	10	0
Hungary (6, 27)	10	0/10	10	0
India (6)	15	0/15	15/20	10
Indonesia (6)	15	0/10	10	0
Iran (6, 9, 28)	7.5	0/5	5	0/10
Ireland (3, 6, 9, 27, 28)	5/10	0/5	10	0/10
Israel (18, 19, 20, 21)	10/7.5 to 12.5	0/5/10	7.5 to 12.5	7.5 to 12.5
Italy (27)	10	0	5	0
Japan (3, 6)	10/15	0/10	10	10

Vietnam (6, 9)	15	0/10	15	0/15
Zimbabwe (3, 6, 9, 28)	10/20	0/10	10	0/10

Notes

*Under Bulgarian domestic legislation, dividends distributed to non-residents are subject to 5% WHT, unless the recipient is a resident of an EU/EEA member state (in which case the recipient is not subject to WHT).

** Under Bulgarian domestic legislation, interest and royalty payments accrued to EU-resident companies, satisfying the Interest and Royalty Directive requirements, are exempt from WHT.

1. The lower rate applies to dividends paid out to a non-resident that is the direct owner of at least the equivalent of 100,000 United States dollars (USD) forming part of the capital of the company making the payment.
2. The reduced rate for royalties is available for the use of (or right to use) industrial, commercial, or scientific equipment.
3. The lower rate applies to dividends paid out to a foreign company that directly controls at least 25% of the share capital of the payer of the dividends. In the specific cases of the different countries, more requirements may be in place.
4. There is no WHT on royalties for the use of (or the right to use) scientific or cultural works.
5. The lower rate applies to dividends paid out to a foreign company that directly controls at least 15% of the share capital of the payer of the dividends.
6. There is no WHT on interest when paid to public bodies (government, the central bank, and, in several cases, certain governmental bodies).
7. 5% royalties are applicable if the Netherlands applies WHT under its domestic law.
8. Up to 10% branch tax may be imposed on PE profits.
9. The 10% rate on capital gains from securities applies in specific cases that are described in the respective treaty.
10. The zero rate on interest applies if the loan is extended by a bank and also for industrial, trade, and scientific equipment on credit.

Bulgaria

11. The zero rate on interest applies if the interest is paid to public bodies (government, municipality, the central bank, or any financial institution owned entirely by the government), to residents of the other country when the loan or the credit is guaranteed by its government, or if the loan is extended by a company for any equipment or goods.
12. The Council of Ministers has stated its intention to renegotiate the DTTs with Malta and Finland.
13. A 5% rate on royalties applies if the Swiss Confederation introduces in its domestic law WHT on royalties paid to non-residents.
14. The 10% rate on interest applies if the interest is received from a financial institution, including an insurance company.
15. The 5% rate on royalties applies if the royalties are paid for the use of copyright for literary, art, or scientific work.
16. The lower rate applies to dividends paid out to a foreign company that directly controls at least 10% of the share capital of the payer of the dividends.
17. The zero rate applies to dividends payable by a Bulgarian resident entity to an entity resident in Malta. The 30% rate applies to dividends payable by a Maltese entity to a Bulgarian entity.
18. The 10% rate applies to dividends distributed by companies that enjoy a reduced or zero CIT by virtue of a tax incentive for investments. In all other cases, the rate is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%.
19. The 5% rate applies to interest payable to banks or other financial institutions. The zero rate applies to interest payable to certain public bodies (governments, municipalities, central banks) or to residents of the other country when the loan or credit is guaranteed, insured, or financed by a public body of that country or by the Israeli International Trade Insurance Company.
20. The rate on royalties is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%.
21. The rate on capital gains from securities is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%. However, capital gains from transfers of shares in entities whose real estate properties exceed 50% of their assets are taxed in the country in which the real estate is located.
22. The zero rate applies to dividends and interest paid to certain public governmental and local bodies as well as entities fully owned by the state.
23. The 5% rate on royalties applies if the royalties are paid for the use of copyright for literary, art, or scientific work as well as for the use of industrial, commercial, or scientific equipment.
24. There is no WHT on interest when paid to and beneficially owned by public bodies (government, local public authorities, the central bank, or any financial institution wholly owned by the government), as well as on interest derived on loans guaranteed by the foreign government or based on an agreement between the governments of the states.
25. The 7% rate on royalties applies if the royalties are paid for the use of, or the right to use, cinematograph films and films or tapes for radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process.
26. The zero rate applies for capital gains from shares in a Bulgarian resident company that are traded on the Bulgarian Stock Exchange.
27. In accordance with the EU Parent-Subsidiary Directive implemented in the Bulgarian legislation, dividends distributed by a Bulgarian resident company to an entity that is a tax resident in an EU member state may not be subject to Bulgarian WHT.
28. Full WHT at source may be levied on capital gains from the sale of shares in companies, the main assets of which are direct or indirect holdings in real estate situated in Bulgaria, and in some other cases (subject to the specifics stipulated in the respective treaty).
29. There is no WHT on interest when paid to public bodies (government, the central bank, governmental institutions) or any financial institution wholly owned by the government.
30. Pension funds and charities are considered resident persons.
31. The zero rate does not apply to dividends distributed to real estate investment trusts (REITs).
32. The zero rate does not apply to interest paid under a back-to-back loan.
33. The benefits of the treaty are limited to entities that satisfy certain criteria (Limitation of Benefits clause).
34. The 5% rate on royalties applies if the royalties are paid for the use of, or the right to use, any patent, design, model, plan, secret formula, process, or know-how.
35. The treaty provides for 10% WHT on capital gains unless shares were sold on a recognised stock exchange or seller owned at least 20% of the issuing company's capital.
36. The reduced rate for interest is available for bank loans (subject to specifics in the treaty).
37. The zero rate applies to dividends paid to a pension fund, central bank, or a foreign company (other than a partnership) if the company directly controls at least 10% of the share capital of the payer for at least one year.
38. The zero rate applies to interest paid to a pension fund, a public body (i.e. the government, a political subdivision, a local authority, or a central bank), in relation to a liability for the sale on credit of goods, equipment or services, as well as to a company with a minimum direct participation of at least 10% in the payer of the interest for at least one year or where a third company holds a 10% minimum direct participation in both the payer and the recipient of the interest.
39. The use or right of use of industrial, economic, and scientific equipment has been excluded from the definition of royalty and is subject to full WHT exemption.
40. The zero rate on dividends applies on interest distributed to and beneficially owned by a company resident of a contracting state or a pension fund. The 5% rate would apply in all other cases, unless the dividends are paid out of income that is derived from immovable property by an investment vehicle that distributes most of this income annually and whose income from such property is exempted from tax (i.e. real estate investment trust). 15% WHT would apply to a dividend paid out by a real estate investment trust.
41. The zero rate applies to interest paid to certain public bodies (i.e. the government, a political subdivision, a local authority, or a central bank) under a loan extended by a bank or in relation to a

sale of industrial, commercial, or scientific equipment on credit or a loan of any kind extended or guaranteed by a governmental institution for the encouragement of exports.

Under some DTTs, technical service payments fall within the definition of royalty payments and are taxed accordingly.

B

Tax administration

Taxable period

The financial and tax years coincide with the calendar year.

Tax returns

Annual profit must be declared no later than 31 March of the year following the financial (tax) year. Along with their annual CIT returns, companies are required to file financial information for their business activities during the year in a standard statistical form not subject to a financial audit. The self-assessment principle is applied.

Payment of tax

If a company realised net revenue from sales of more than BGN 3 million in the preceding year, it is liable for monthly CIT payments for each month in the current year. If the net revenue from sales for the preceding year is below BGN 3 million but above BGN 300,000, the company is liable for quarterly advance CIT payments for each quarter of the year except the fourth quarter. The amount of the monthly or quarterly CIT instalments is calculated based on the forecasted taxable profit for the current year.

Companies established during the current year and companies with net revenue from sales below BGN 300,000 for the preceding year are not required to pay advance CIT instalments.

The overpaid amount of CIT cannot be offset against advance and annual payments due for the next period. The overpaid amount may only be effectively claimed for refund by the taxpayer. The difference between the annual tax declared in the CIT return and the advance tax paid for the corresponding year must be paid by the deadline for submitting the tax return on 31 March of the following year.

Priority order for settlement of tax and social security liabilities

Payment of tax liabilities and social security contributions should be made to four separate accounts: for tax liabilities, for general mandatory social security contributions, for supplementary mandatory retirement provisions, and for health insurance contributions.

If a taxpayer has several public liabilities (e.g. tax and/or social security liabilities) to one of the four accounts of the National Revenue Agency (NRA), the one with the earlier payment date will be settled first.

Tax audit process

Tax audits are usually performed every four to five years, corresponding to the period of the statute of limitations.

Statute of limitations

The statute of limitations (i.e. the period within which the state authorities are entitled to collect the tax liabilities and other related mandatory payments) is five years from the beginning of the year following the year in which the tax liabilities became payable. The above periods can be extended in certain cases. However, the maximum period of the statute of limitations is ten years.

Topics of focus for tax authorities

Transfer pricing is likely to become an area of focus for the tax authorities.

Other issues

Intergovernmental agreements (IGAs)

In December 2014, Bulgaria and the United States signed and disclosed a non-reciprocal Model 1B IGA to implement the tax reporting and withholding procedures associated with FATCA.

As of 1 January 2016, Bulgaria has implemented the rules on automatic exchange of financial information in compliance with the EU law, OECD recommendations, and FATCA. The tax authorities will exchange financial information with foreign tax offices on an annual basis.

The information concerns individual and company accounts (including trusts, foundations, and pass-through foreign control entities), account balances, and fund movements related to dividends, interest, sales proceeds, assets, etc.

**C**

Significant developments

Depreciation and amortisation regime

Decree No. 42/2015, of 24 August, was published, establishing the asset depreciation and amortisation regime and approving the annual rates of depreciation and amortisation of tangible fixed assets, intangible assets, and investment properties.

Devaluation coefficients

Decree No. 76/2015, of December 31, was published, approving the table of currency devaluation coefficients. It applies on the determination of capital gains or capital losses resulting from the disposal of shares, investment properties, tangible fixed assets, intangible assets, non-current assets held for sale, and assets derived from accidents or resulting from the permanent allocation of assets to non-business purposes.

The Decree establishes currency devaluation coefficients that vary between 2.4 (assets acquired until 1990) and 1.0 (assets acquired in 2015).

Transfer pricing

The Ministry of Finance and Planning published the Decree No. 75/2015, which regulates the application of the transfer pricing regime and its requirements, as set forth in the Corporate Income Tax (CIT) Code.

The Decree clarifies, amongst others, how the transfer pricing methods should be determined, which comparability factors should be taken into consideration, and what is the relevant supporting information and documentation that must be obtained and maintained by the taxpayer.

Additionally, the Decree states that the taxpayer must keep on-hand information and documentation regarding its transfer pricing policy.

Tax Benefits Code (TBC) amended and republished

Law No. 102/VIII/2016, of 6 January, amends and republishes the TBC.

Unemployment allowance

Decree No. 15/2016, of March 5, was published and entered into force on 4 April 2016, establishing the legal regime for the allocation of unemployment allowance under the compulsory social protection scheme for employees in a state of involuntary unemployment.

Under this scheme, the rate of contribution increased to 24.5%, 8.5%, and 16% to employee and employer, respectively.

Taxes on corporate income

Cabo Verde's CIT, called *Imposto sobre o Rendimento das Pessoas Colectivas*, is levied both on profits obtained within the Cabo Verdean territory and those obtained outside by resident companies (worldwide principle). Non-resident companies with a permanent establishment (PE) in Cabo Verde are also subject to CIT on Cabo Verdean-source income attributable to the PE.

Taxable profit is computed according to the local accounting rules and adjusted for tax purposes.

For the purposes of determining taxable income, CIT payers can be taxed under two methods/regimes as follows:

- Special regime for micro and small-sized companies:
 - Micro-sized company: An entity that employs up to five persons with an annual turnover (gross amount of sales and services) that does not exceed 5 million Cabo Verdean escudos (CVE).
 - Small-sized company: An entity that employs between six and ten persons with an annual turnover (gross amount of sales and services) of between CVE 5 million and CVE 10 million.
- Standard organised accounting regime (standard/normal regime under which the computation of profits follows the local accounting rules).

Income tax rates

Resident companies are subject to a tax rate of 25%, where taxable income corresponds to the profit less any tax benefits and any losses carried forward, as stated in the tax return. The tax rate of 25% is also applicable for PEs of non-resident companies.

Micro and small-sized companies are subject to a single special tax (SST) of 4% levied on the gross amount of sales obtained in each taxable year, to be paid quarterly. The SST replaces the CIT, fire brigade surtax, and value-added tax (VAT), as well as the contribution to social security attributable to the company.

Non-resident companies without a PE are subject to withholding tax (WHT) rates applicable for each income category foreseen in the Tax Code, which range between 1% and 20%.

Surcharge

The CIT rate is increased by a fire brigade surcharge, called *Taxa de Incêndio*, of 2% on the tax due, leading to a final tax rate of 25.5%. This surcharge is levied in the municipalities of Praia (Island of Santiago) and Mindelo (Island of São Vicente).

Corporate residence

A company or entity is deemed to be resident in Cabo Verde if its registered head office or its place of effective management is in the Cabo Verde territory.

Permanent establishment (PE)

Non-resident companies deemed to have a PE in Cabo Verde are also subject to tax in Cabo Verde. Under Cabo Verdean tax law, a non-resident company is deemed to have a PE if the non-resident company:

- has any fixed installation or permanent representation located in Cabo Verde through which, among others, activities of a commercial, industrial, or agricultural nature, or fishing and rendering of services are carried out (including agricultural, fishing, and

cattle raising explorations, or other quarries or any other places of natural resources extraction) or

- carries out its activity in Cabo Verde through:
 - employees, or any other personnel hired for that purpose, for a period (continuous or not) of not less than 183 days within a 12-month period
 - a person (a dependent agent), which is not an independent agent, acting, in the Cabo Verde territory on behalf of a company, with powers to intermediate and conclude binding contracts for that company, within the scope of its business activity, or
 - a building site or a construction installation if it lasts for more than 183 days, as well activities of coordination, supervision, and inspection related with the building site or its construction installation.

A PE of a non-resident is taxed as a resident company.

Other taxes

Value-added tax (VAT)

The VAT system in Cabo Verde closely follows the European Union (EU) VAT system and is assessed at the standard rate of 15%.

The standard VAT rate of 15% is a general tax on consumption, applicable to the import and sale of goods and services in Cabo Verde territory.

The VAT rate will be applied on the following amount on the following supplies of goods and services:

- Diesel: 120%.
- Fuel: 300%.
- Petroleum: 30%.
- Butane gas: 16.65%.
- Fuel-oil: 30%.
- Electricity: 30%.
- Tap water from the public supply: 20%.
- Telecommunication services: 60%.
- Road passenger transport and transport of goods by sea: 15%.

The following transactions are considered to fall outside the scope of VAT:

- The transfer, for consideration or not, of a totality of assets or a part thereof that constitute an undertaking or a part of an undertaking capable of carrying on an independent economic activity.
- Indemnities for damages.
- Repayment of expenditure incurred in the name and on behalf of a third party.

Exempt transactions

The VAT regulations establish two types of exempt transactions: exempt transactions without credit and exempt transactions with credit (i.e. zero-rated transactions). VAT incurred is recoverable in as far as the goods and services are used for the purposes of the taxed transactions of a taxable person or for zero-rated transactions.

Exempt transactions without credit include the following:

- Hospital and medical care and closely related activities undertaken by bodies governed by public law, or comparable activities undertaken by other hospitals and centres for medical treatment.

Cabo Verde

- The provision of medical care through the exercise of the medical and paramedical professions, as well as the supply of transport services for sick or injured persons, and the supply of human organs, blood, and milk.
- The supply of services and goods closely linked to welfare and social security work.
- The supply of services and goods closely linked to the protection of children and young people by bodies governed by public law.
- The provision of children's or young people's education, school or university education, including the supply of services and goods closely related thereto.
- The supply of services, and goods closely linked thereto, by non-profit-making organisations.
- The supply of copyright and art objects by the original creators or their heirs.
- The supply by the public postal services of stamps and stamped paper.
- The supply of certain cultural, educational, technical, and recreational services.
- Garbage removal.
- Burial and cremation supplies.
- Banking, financial, insurance, and reinsurance transactions, including related services performed by insurance brokers and insurance agents.
- Immovable property transactions (excluding the provision of accommodation in the hotel sector or in sectors with a similar function, the granting of facilities for collective parking of vehicles, the leasing of permanently installed machinery and equipment, and the granting of facilities for exhibitions and advertising).
- Specified basic foodstuffs and pharmaceutical products.
- Goods used in agriculture, stockbreeding, forestry, and fisheries.

Exempt transactions with credit (i.e. zero-rated transaction) on imports include the following:

- Import of goods whose supply qualifies for exemption.
- Re-import of goods by the person who exported them, in the state in which they were exported, where they qualify for exemption from customs duties.
- Services in connection with the import of goods where the value of such services is included in the taxable amount.
- Import of gold by the central bank.
- Import into ports by sea fishing undertakings of their catches, unprocessed or after undergoing preservation for marketing but before being supplied.
- Import of goods under diplomatic and consular arrangements that qualify for exemption from customs duties.
- Import of goods for the fuelling and provisioning of sea-going vessels and aircraft.

The most important exemptions with credit (i.e. zero-rated) for exports and connected transactions include the following:

- Supply, modification, repair, maintenance, chartering, and hiring of aircraft used by airlines operating both on domestic and international routes, and the supply, hiring, repair, and maintenance of equipment incorporated or used therein.
- The supply of goods for the fuelling and provisioning of such aircraft.
- Services meeting the direct needs of such aircraft or their cargoes.

Customs duties

Customs duties are levied at rates ranging from 0% to 50% on the customs value of most imported goods. Since Cabo Verde imports the majority of the goods it consumes, a 50% tariff protection applies for certain domestically produced goods.

Raw materials or capital goods can be imported with an exemption from customs duties or at a low rate.

Special consumption tax

A special consumption tax is imposed at rates ranging from 10% to 150% on goods that are deemed superfluous, luxurious, or undesirable for economic, social, or environmental policy reasons.

The excise duty rate is 40% in the case of beers, wines, vermouths, and other alcoholic drinks, and 20% in the case of tobacco.

Vehicles used for transportation, up to 5 tons, are subject to rates of up to 150%, according to their age:

- Up to four years: not applicable.
- More than four and up to six years: 40%.
- More than six and up to ten years: 80%.
- More than ten years: 150%.

Property taxes

A property tax, called *Imposto Único sobre o Património* (IUP), is levied at the rate of 1.5% in Cabo Verde.

IUP is due on the ownership of immovable property on an annual basis by the owner of the real estate, registered as such on 31 December of the relevant year. The taxable basis corresponds to 25% of the value attributed by the Evaluation Commission.

IUP is also due on the transfer (gratuitously or for a consideration) of real estate, based on the value of the contract declared by the transferee.

Exemption of IUP due on the acquisition is granted to:

- Cabo Verdean emigrants who own saving bank accounts.
- Projects with Touristic Utility Status (*see the Tax credits and incentives section for more information*).

In taxable transfers (not exempt), IUP is payable by the transferee.

IUP is also due on the capital gains arising from the sale of:

- plots of land for construction if the sales price is more than double the purchase price, and
- buildings or other real estate if the sale price exceeds the purchase price by more than 30%.

IUP on capital gains is normally paid by the transferor, on the highest of the declared price and the official value of the property concerned.

Capital gains obtained by companies that are in the business of buying real estate for resale are not subject to IUP.

Stamp duty

Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis.

Stamp duty rates:

Item	Stamp duty rate
Loans	0.5%
Bank interest and fees/commissions	3.5%

Cabo Verde

Item	Stamp duty rate
Guarantees	0.5%
Insurance	3.5%
Promissory notes, securities	0.5%
Emoluments, registrations acts	15.0%
Contracts	CVE 1,000 *

* Fixed exchange rate 1 euro (EUR) = CVE 100.265 under an exchange agreement between Cabo Verde and Portugal.

Ecologic charge

Cabo Verde's ecologic charge is applied to packing material, whether empty or full, imported or produced internally, non-biodegradable or made out of metal, glass, or plastic.

The ecologic charge varies from CVE 2 to CVE 100 per item, depending on the quantity or weight of the goods.

This fee is due by the local producer or the importer.

Exemptions are available in the case of packing material used in medicine, essential food (e.g. corn, rice, sugar, flour, and milk), and construction (e.g. cement). Packing material that is exported, reutilised, or recycled is also exempt.

Tourism tax

A tourism tax is applied to accommodation in the hotel sector. The tax amounts to CVE 220 per person per night for people over 16 years of age and cannot exceed ten consecutive nights.

Payroll taxes

Social security contributions

Social security contributions are payable by the employee on their gross income at a rate of 8% and by the employer at 15%.

Branch income

A branch is not considered a separate legal entity distinct from the foreign head office. It is governed by the domestic law of Cabo Verde.

From a tax perspective, branches are subject to CIT if considered a PE under Cabo Verde law.

Income determination

Taxable income is computed on the basis of the accounting income, adjusted by deducting from taxable profits the prior years' losses and any deductions under the tax (incentive) legislation.

Inventory valuation

The tax law does not foresee any mandatory inventory valuation method that should be adopted by Cabo Verdean taxpayers. For tax purposes, accepted inventory methods should be consistent with the accounting rules in force and with generally accepted local business practice. Such methods should be applied in a consistent manner over

the financial years and based on the prices effectively paid or established by official documents (for regulated prices).

Capital gains

Capital gains are not subject to a separate capital gains tax and are treated and taxed as ordinary business income.

Capital gains and capital losses determined for tax purposes are usually different from capital gains and capital losses determined for accounting purposes and are quantified as follows:

Capital gains/losses = sales - (acquisition value - deductible accumulated depreciation - deductible impairment losses) x coefficient

The exemption on capital gains derived from disposal of shares when owned for more than one year was revoked.

Capital gains can be considered only in 50% of the respective amount if the sales proceeds are reinvested in the acquisition, production, or construction of tangible fixed assets, intangible assets, or non-consumable biological assets. For this purpose, the reinvestment must take place in the previous tax year, in the tax year in which the transfer occurs, or in the two tax years following the transfer.

In case of partial reinvestment, a partial relief (proportional to the investment made) will apply. In case the reinvestment is not fully accomplished during the reinvestment period, the difference (or the proportional difference) will be considered as taxable income of the second year following the disposal, increased by 15%.

Dividend income

Dividend income is taxed in Cabo Verde (the prior exemption was revoked with the introduction of the CIT Code).

Double economic taxation can be avoided if the following conditions are cumulatively fulfilled:

- Direct or indirect participation in share capital of at least 10%.
- The participation is held consecutively for one year prior to the date at which the profits are made available.
- None of the entities benefit from a favourable tax regime (under the General Tax Code, it is considered a favourable tax regime if the national or foreign jurisdiction grants exemption, tax relief, or where the CIT rate applicable is lower than 10%).

Regarding individual shareholders, double economic taxation can be relieved on 50% of the amount of dividend paid or made available.

Interest income

There is no special tax provision regarding interest income. Interest income is treated and taxed as ordinary business income (excluding interest from bonds or similar products listed in the securities market).

Foreign income

Resident companies are subject to taxation on foreign income. Cabo Verdean tax law allows a foreign tax credit to mitigate the double taxation on foreign income taxed in another jurisdiction (*see Foreign tax credit in the Tax credits and incentives section*).

PEs of non-resident companies are taxable on a territorial base principle, meaning that income obtained outside Cabo Verde is not subject to taxation therein.

Deductions

Depreciation

Depreciation is considered a deductible cost with respect to all fixed assets (except land), up to the limits determined by the applicable tax law.

As a general rule, depreciation must be computed by using the straight-line method. Tax authorities may allow other depreciation methods on the basis that the actual depreciation is higher than the one calculated at regular rates or according to the taxpayer's accounting practice.

Under the straight-line method, the maximum depreciation that is deductible is calculated by applying the general depreciation rates set out by the Decree No. 42/2015, of 24 August, to the adjusted purchase cost or production cost.

Land is not depreciable.

Main depreciation rates for tangible assets

Group	Asset	Depreciation rate (%)
1	Property:	
	Minor/small buildings	10
	Buildings	3 to 10
	Water reservoirs	4 to 5
	Seals and urban arrangements	5 to 8.33
2	Facilities	6.66 to 10
3	Machinery, equipment, and tools:	
	Apparatus and electronic machines	20
	Air condition	12.5
	Laboratory and precision equipment	14.28
	Ventilation equipment	12.5
	Scales	12.5 to 33.33
	Workshop equipment	12.5 to 20
	Machine tools	12.5 to 25
4	Transport materials	
	Aircraft	20
	Boats	8.33 to 25
	Motor vehicles	12.5 to 20
	Tanks	16.66
5	Other tangible fixed assets:	
	Movies, records, and audio cassettes	25
	Drawing and typography materials	12.5
	Furniture	12.5
	Molds, dies, shapes, and controls	25
	Computer programs	33.33

Main depreciation rates for intangible assets

Asset	Depreciation rate (%)
Installation and expansion costs	33.33
Research and development (R&D) costs	33.33

Goodwill

Goodwill is an asset subject to impairment tests. The goodwill's impairment is not a deductible cost for tax purposes.

Start-up expenses

Start-up expenses include, among others, cost incurred with set-up and organisation of companies, projects, and increase of capital. Start-up expenses are considered a deductible cost up to the limits derived from the applicable tax law, 33.33% per year being deductible over a period of three years.

Interest expenses

Interest expenses are deductible if considered indispensable for the realisation of taxable profits/gains (*see Thin capitalisation in the Group taxation section*).

Bad debt

Bad debts are those where the related recovery risk is considered to be justified. According to the CIT Code, the recovery risk is justified whenever there is a:

- Company insolvency and recovery proceeding and enforcement procedure.
- Law court or arbitration court claimed debt.
- Overdue debt.

The deduction for tax purposes of impairment losses on overdue debt is subject to the following limits, computed on the amount of the debt:

Impairment losses	Delay on payment	Limit (%)
Debt overdue	More than 6 and up to 12 months	25
	More than 12 and up to 18 months	50
	More than 18 and up to 24 months	75
	More than 24 months	100

Charitable contributions

Charitable contributions granted to certain entities whose main activity consists of the execution of initiatives in the social, cultural, environmental, scientific or technologic, sports, and educational areas are considered as cost for tax purposes (within certain limits, and in certain circumstances, with an additional deduction).

Fines and penalties

Tax fines and penalties are not deductible for tax purposes. Contractual fines and penalties are deductible for tax purposes.

Taxes

Taxes paid in connection with the activity of the company are tax deductible, excluding CIT and autonomous taxation. The annual IUP cannot be deducted as a cost for CIT purposes.

Net operating losses

Income tax losses can be offset against taxable profit and can be carried forward for seven years, capped at 50% of the taxable profit. Carryback of tax losses is not allowed in Cabo Verde.

According to the transitional regime, tax losses generated before 2015 can be carried forward for three years without limit.

The tax losses incurred by a company are not transferable to another company unless previously accepted by the tax authorities.

Cabo Verde

Payments to foreign affiliates

Currently, there are no special restrictions on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided that the payments are regarded as indispensable to generate taxable profits and gains and to maintain the business of the company.

Payments made to foreign affiliates located in a favourable tax regime are not accepted as deductible tax costs unless it can be demonstrated that the payment is a necessary cost and is not an exaggerated amount (i.e. it should be demonstrated that it is an acceptable/normal amount).

Group taxation

There is no special tax regime for groups of companies in Cabo Verde.

Transfer pricing

Commercial transactions between associated enterprises should be subject to identical terms and conditions to those that would be accepted and agreed between independent entities (arm's-length principle).

Taxpayers must keep information and documentation regarding their transfer pricing policies on hand. The following taxpayers must prepare a transfer pricing documentation file:

- Entities classified as 'Large Taxpayers'.
- Entities considered taxed under a privileged tax regime, as defined in the General Tax Code.
- PEs of non-resident entities.
- Other entities designated as such by the tax authorities.

Thin capitalisation

Net financing expenses are only deductible up to the higher of the following limits:

- CVE 330 million.
- 30% of earnings before depreciation, net financing expenses, and taxes.

Controlled foreign companies (CFCs)

The CIT Code contains specific CFC rules. Profits or income obtained by non-resident entities that are clearly subject to a more favourable tax regime are imputed to the resident taxpayers subject to CIT that hold, either direct or indirectly, even if through a representative, fiduciary, or intermediary, at least 25% of their share capital, voting rights, or attribution rights over the income or the assets of those non-resident entities.

Tax credits and incentives

Foreign Investor Status (Estatuto do Investidor Externo)

The Foreign Investor Status, which has granted some tax benefits at the level of the investor (e.g. exemption from WHT on distribution of profits and on interest related to the financing of the investment) was revoked by the New Investment Code with effect from 1 January 2013. The tax benefits already granted or for which recognition has been requested prior to the entry into force of the Tax Benefits Code and the Investment Code are maintained. Investment projects submitted for analysis and approval to the competent authorities prior to the entry into force of the Tax Benefits Code continue to be regulated under the legislation in force at the date of the respective submission.

Industrial activity

The following tax and customs benefits are provided for industrial activity:

CIT benefits

A CIT credit is available for up to 50% of the eligible investments made in an industrial activity. Any unused tax credit may be carried forward for ten years, subject to certain limitations.

Eligible investments include the acquisition of new fixed assets, patents, and licences regarding technologies.

IUP benefits

Industrial activities may benefit from an exemption from IUP on the acquisition of immovable property used exclusively for industrial purposes; however, the recognition of such tax exemption should be approved by the municipality.

Customs duty benefits

Industrial activities benefit from an exemption from customs duties on the import of construction material, machines, utensils, semi and finished materials, products, and raw materials used in the production of goods.

Stamp duty benefits

Financing transactions of industrial projects are exempt from stamp duty.

International Business Centre (IBC) of Cabo Verde

The Cabo Verdean Agency for Foreign Investment is the entity responsible for granting the licences to operate within the IBC, upon previous proposal of the Zona Franca Comercial S.A.. The following tax benefits are applicable to entities licensed to operate in the IBC on income from industrial or business activities and services in respect of operations carried out with other IBC licensed entities or with non-residents entities (without a PE in Cabo Verde).

Note that these tax benefits are not applicable to entities engaged in tourism, banking and insurance, real estate, or construction.

CIT benefits

Reduced CIT rates of 5%, 3.5%, or 2.5% are applicable to entities that create respectively 5, 20, or 50 jobs.

The CIT rate is 2.5% in case of the creation of two jobs for entities licensed to operate within the International Service Centre.

Entities licensed to operate within the IBC are granted to benefit from reduced CIT rates until 2030.

Shareholders benefits

Shareholders of the entities licensed to operate within the IBC are exempt from taxation on dividends and interest received.

VAT and customs duty benefits

All the exemptions foreseen in the VAT regulation and customs law apply.

An exemption from customs duties applies with respect to certain goods, equipment, and materials used within the scope of the activity developed and licensed under the IBC.

Cabo Verde

Tax and financial incentives for internationalisation of Cabo Verdean companies

A regime that provides for tax and financial incentives for investment projects in order to promote the internationalisation of Cabo Verdean companies is in force.

The following incentives, to be granted under a contract of not more than three years, apply to internationalisation projects of companies with head office and place of effective management in Cabo Verde that are undertaken before 31 December 2020.

CIT benefits

Investments that are eligible for the regime of tax benefits for internationalisation may benefit from:

- Reduced CIT rate of up to 50%, applicable until the term of the investment contract.
- Exemption from CIT on income obtained by qualified expatriate employees.

Additionally, a deduction for creation of employment ranging between CVE 26,000 and CVE 35,000 for each new job created may apply.

IUP benefits

An exemption from IUP may be available on the acquisition of immovable property for the establishment or expansion of the activity of the investor.

VAT and customs duty benefits

Exemptions provided for in the VAT Code apply, as well as customs duties incentives as provided for in the general applicable legislation.

Stamp duty and other benefits

An exemption from stamp duty is available on the incorporation of companies on an increase of share capital of existing companies, and on financing transactions.

An exemption from notary and registration fees is available on the incorporation and registration of companies.

Tax benefits for social housing

Entities responsible for the construction of social housing, duly authorised by the competent regulatory authority (*Comissão de Coordenação e Credenciação do Sistema Nacional de Habitação de Interesse Social* or CCC-SNHIS), may benefit from the following:

- Only 30% of the income derived from the activity carried out within the scope of the social housing project is subject to CIT, under certain conditions.
- A refund of 80% of the VAT incurred in the Cabo Verdean market is available in cases where those entities carry exclusively exempt operations without the right to deduct input VAT.
- A reduction of 75% of customs duties levied on construction material listed in an annex to the diploma is available.

Development promotion entities, provided they are also authorised by CCC-SNHIS, are also eligible for VAT benefits.

Touristic Utility Status (Estatuto de Utilidade Turística)

Cabo Verde may grant Touristic Utility Status to certain touristic projects. Touristic Utility Status is granted to the following types of touristic projects:

- Installation: Granted to new touristic projects.
- Functioning: Granted to touristic projects starting to operate.
- Refurbishment: Granted to touristic projects in case of refurbishment projects with a value of at least 25% of the initial investment.

Touristic Utility Status generally allows for the following tax incentives and benefits:

- CIT credit of up to 50% of the eligible investments made in tourism, touristic promotion activities, and real estate tourism project investment.
- Exemption from IUP on the acquisition of real estate used for construction and installation of touristic projects if granted by the municipality.
- Exemption from customs duties on the importation of materials and equipment used in touristic projects.
- Exemptions from stamp duty on the financing of tourism investments.

Tax incentives for renewable energies

There is a regime for promotion, encouragement, and access, licensing, and exploitation inherent to the exercise of independent production and self-production of electricity based on renewable energy sources.

Water, wind, solar, biomass, biogas or industrial, agricultural or urban waste, oceans and tides, and geothermal are to be considered sources of renewable energy. Under the regime, renewable energy producers may benefit from the following.

CIT benefits

A CIT credit is available for up to 50% of the eligible investments made in renewable energies projects.

Customs duty benefits

An exemption from customs duties and other customs charges applies on the importation of capital goods, raw materials and supplies, finished and semi-finished products, and other materials that are incorporated or used in the production of goods or services involved in the production of electrical energy from renewable sources.

IUP and stamp duty

Exemptions from IUP and stamp duty are granted on the acquisition of immovable property and other assets related to the investment project or its financing.

Shipping transport industry incentive

CIT benefits

A CIT credit is available for up to 50% of the eligible investments made in shipping, air, and sea transportation projects.

Customs duty benefits

An exemption from customs duties applies on the importation of shipping material for the maintenance, production, and repair of shipping and respective equipment.

IUP and stamp duty

Exemptions from IUP and stamp duty are granted on the acquisition of immovable property and other assets related to the investment project or its financing.

Job creation incentives

Entities taxed under the verification method are entitled to deduct the following amounts for each created permanent job:

- CVE 26,000 for each job created in the municipalities of Boa Vista, Praia, and Sal.
- CVE 30,000 for each job created in the remaining municipalities.
- CVE 35,000 in case of a disabled person.

Media, telecommunications, and internet

Importation of good, materials, equipment, vehicles, and other equipment exclusively for the purpose of telecommunications and media are exempt from customs duties.

Cabo Verde

Tax benefits to the financial sector

The Tax Benefit Code has several measures in the financial sector, as follows.

Financial investments

Income derived from certificates of deposit and long-term bank deposits benefit from a CIT exemption of up to 75% (depending on the maturity date of the deposits).

Securities market (bonds)

Income derived from bonds or similar products (except public debt securities) listed in the securities market obtained until 31 December 2017 benefit from a 5% CIT flat rate.

Additionally, dividends from shares listed in the stock exchange, placed at the disposal of its holders until 31 December 2017, are exempt from CIT.

Investment funds (securities and real estate funds)

Income derived from securities funds, when established and operating under the Cabo Verdean legislation, is taxed as follows:

- Income obtained in the Cabo Verdean territory is exempt from CIT (except capital gains).
- Foreign income is subject to a 10% CIT flat rate (except capital gains).
- Capital gains are subject to a 10% CIT rate.

Income derived from real estate funds, established under the Cabo Verdean legislation, is taxed as follows:

- Real estate income benefits from a 10% CIT rate (after deduction of the respective expenses).
- Capital gains benefit from a 15% CIT rate over 50% of the income, resulting in an effective rate of 7.5%.

Income received by unit holders in securities funds and real estate investment funds, established under Cabo Verdean legislation, is exempt from CIT.

Venture capital funds

Income derived from venture capital funds, established under Cabo Verdean legislation, as well as income received by the unit holders in venture capital funds, is exempt from CIT.

International financial institutions

International financial institutions within the scope of Law 43/III/88 and revoked by Law 61/VIII/2014, of 27 December, benefit from:

- Customs duties exemption on the importation of materials and equipment that are exclusively for the setting-up of the financial institution.
- CIT exemption until 31 December 2017 and a 2.5% CIT rate from 1 January 2018 onwards.
- Stamp duty exemption in transactions with non-residents entities.

Individuals and entities considered as clients of such international financial institutions, benefit from:

- CIT exemption, regardless of the type of income.
- Stamp duty exemption.

Holding companies (Sociedades Gestoras de Participações Sociais)

Capital gains or losses realised by holding companies, as well as financing expenses incurred with the acquisition of shares, held for at least 12 months, are not taken into account for the purposes of computation of the taxable profit of such holding companies.

This rule does not apply in case of shares acquired from associated enterprises or from entities located in territories with a more favourable tax regime.

Exemption of WHT is granted on the payment of income made by affiliate entities held for at least 12 months with a share capital of at least 10%.

Tax benefits with social nature and customs duties benefits**Training, internships, and grants**

Companies taxed under the verification method may deduct 150% of the following costs:

- Costs related to the training of employees.
- Costs associated with the hiring of young people for internship positions.
- Costs associated with scholarships granted to students.

Donations

Companies may deduct 130% of the amounts donated to the following entities and activities, up to 1% of the turnover, under certain conditions:

- Entities that develop, among others, social, cultural, sportive, educational, environmental, scientific, technological work, and health services.
- State, municipalities, and any other public services.
- Municipal associations.
- Foundations.

Customs duties benefits

Under certain conditions, the following business sectors, among others, may benefit from customs duties exemption on the importation of products, materials, and equipment related to the activity/project:

- Agriculture, livestock, and fishing activity.
- Civil aeronautics.
- Diplomatic and consular missions.
- Aid to economic development.
- Foreign citizen retired.
- Sports and musicals.
- Fire corporation.

Tax benefits to other sectors of investment

Eligible investments made in activities such as information technology and scientific research may benefit from:

- CIT credit of up to 50%.
- Exemptions from IUP, stamp duty, and customs duties on the acquisition of immovable property and other assets related to the investment project or its financing.

Tax benefits regarding the Recovery of Business and Insolvency Code

It is expected that new CIT, personal income tax (PIT), stamp duty, and property tax benefits will be implemented for companies under recovery of business and insolvency procedures. These will apply once the Recovery of Business and Insolvency Code enters into force.

Exceptional regime of tax debt regularisation for tax debt

There is an exceptional regime of tax debt regularisation for debt whose legal payment period ends until 31 December 2015, applicable to all tax debts declared by the taxpayer and tax debts required in tax enforcement proceedings for the purpose of enforcing payment, established until 31 December 2015.

The Regime provides the remission of compensatory interest and default interest and reduction of the costs of the tax enforcement process and penalties in cases of debt payment in cash, in whole or in part, over up to 12 monthly instalments.

Foreign tax credit

Cabo Verdean tax law allows a foreign tax credit to mitigate the double taxation on foreign income taxed in another jurisdiction. The tax credit is equal to the lesser of: (i) the income tax paid abroad or (ii) the CIT fraction calculated before the deduction is given corresponding to incomes that may be taxed in the country concerned, net from any cost or losses, directly or indirectly incurred, for the purposes of its realisation. Foreign tax credit cannot exceed the tax foreseen in the tax treaty, if applicable.

Withholding taxes

Dividends are subject to WHT at a rate of 10%. The WHT may be waived if the following conditions are cumulatively fulfilled:

- Direct or indirect participation in share capital of at least 10%.
- The participation is held consecutively for one year prior to the date at which the profits are made available.
- None of the entities benefit from a favourable tax regime as defined in the General Tax Code.

Interest payments, in general, are subject to WHT at a rate of 20%.

Bond interest is subject to WHT at the rate of 10%, except bonds and similar financial products (except public debts) duly listed on the stock exchange, which are subject to CIT at the reduced rate of 5%.

Royalty payments are subject to WHT at the rate of 20%.

Payments of services between resident companies are generally not subject to WHT.

Rental payments are subject to WHT of 20% when paid or made available by companies. However, rental payments between resident companies are, generally, not subject to WHT.

For a Cabo Verde-based recipient, tax withheld is a payment on account against the final income tax due regarding income derived from (i) business, commercial, and services activities, (ii) real estate income, and (iii) employment income when the beneficiary of such income opts to file a tax return.

Any non-Cabo Verdean resident entity carrying out an economic activity in Cabo Verde is subject to a final WHT at the same rates applicable to each income category foreseen but the Tax Code.

Regarding income paid to micro and small-sized companies, the WHT applicable is 4%.

Tax treaties

Under the Cabo Verde/Portugal tax treaty, WHT is limited as follows:

- Dividends: 10%.
- Interest: 10% (0% applies to interest paid by public bodies).
- Royalties: 10%.

The tax treaty signed between Cabo Verde and Macau has entered into force. WHT is limited as follows:

- Dividends: 10%.
- Interest: 10%.
- Royalties: 10%.

The tax treaty signed between Cabo Verde and Guinea Bissau has entered into force. WHT is limited as follows:

- Dividends: 5%. However, there is a WHT exemption (WHT at the rate of 0%) if a direct or indirect participation in share capital or voting rights of at least 5% is held, consecutively, for 24 months prior to the date at which the profits are made available.
- Interest: 10%.
- Royalties: 10%.

Tax administration

Taxable period

As a general rule, the tax year is the calendar year. A different tax year may be applied, subject to authorisation from the Ministry of Finance, in the case of non-resident companies with a PE in Cabo Verde and in other situations duly justified by economical reasons.

Tax returns

Taxpayers are required to file a tax return by 31 May of the year following the end of the tax year.

Payment of tax

Corporate taxpayers taxed under the standard regime must make three pre-payments on account of their income tax liability for the current tax year. The pre-payments are due by the end of March, July, and November and amount to 30%, 30%, and 20%, respectively, of the preceding tax year's income tax liability or the most recent year with a positive result.

Taxpayers are required to self-assess the tax due by 31 May of the year following the end of the tax year.

Micro and small-size companies are also subject to pre-payments, at a 4% tax rate levied on the annual turnover (sales and services), due by the last day of April, July, October, and January of the following year.

Tax audit process

There are no specific rules regarding the tax audit cycle in Cabo Verde.

Statute of limitations

The statute of limitations period in Cabo Verde is for five years.

Topics of focus for tax authorities

The main topics of focus for the Cabo Verde tax authorities include cost incurred on vehicles, communications, representation expenses, personnel costs, management fees, and payments to non-residents.

Cabo Verde

Large Taxpayers

Taxpayers that meet at least one of the following criteria qualify as a 'Large Taxpayer' and shall be monitored by the Special Tax Office for Large Taxpayers:

- Turnover exceeding CVE 200 million, based on the annual income tax return.
- High level of inherent risk, based on a matrix developed by specific software.
- Taxes paid exceeding CVE 15 million, correspond to the sum of payments of CIT, WHT, VAT, and stamp duty.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

Cabo Verde and the United States have reached an 'agreement in substance' on a Model 1 Intergovernmental Agreement (IGA), in which Cabo Verde consented to disclose this status as of 30 June 2014.

C

Significant developments

Prakas on tax mechanism for finance lease transactions

The Ministry of Economy and Finance (MEF) has issued a Prakas outlining a mechanism to tax finance lease transactions. We've highlighted the key points below:

- Registration requirements: The lessor must be a real-regime registered taxpayer and have a finance lease licence from the National Bank of Cambodia.
- Lease period: Must be more than one year.
- Conditions: There are various conditions that finance lease transactions must comply with.
- Taxes on finance lease transactions:
 - Value-added tax (VAT): Output VAT applies to the principal and other charges, except for interest. Input VAT is allowed as a credit to both the lessor and lessee.
 - Prepayment of tax on profit (ToP) and minimum tax: The lessor is subject to prepayment of ToP and minimum tax on all charges and interest, excluding the principal.
 - ToP: The lessor must recognise income at the earlier of when the payment to be received is due or paid.
 - Tax depreciation: The lessee is entitled to tax depreciation on the leased asset.
 - Withholding tax (WHT): WHT doesn't apply to finance lease transactions.

Prakas on the suspension of prepayment of ToP for garment and footwear manufacturing enterprises

Garment and footwear manufacturing enterprises aren't required to pay monthly prepayment of ToP for another two years, until the end of 2017. However, the payment suspension requires those enterprises to submit their statutory financial audited report to the tax administration; otherwise, they will be subject to penalties stipulated in the taxation law.

Enterprises that support the export activities of garment, textile, footwear, bag, handbag, and headwear enterprises aren't entitled to this suspension.

Prakas on taxpayer classification under the self-declaration regime

Under the self-declaration regime (real regime), taxpayers will be reclassified into three categories based on their turnover (total value of supplies of goods and services), legal form, and other criteria, as summarised below:

Type of taxpayer	Criteria (turnover approximated United States dollars [USD] amount)
Small	Sole proprietorship or general partnership:
	• Annual turnover of USD 62,500 to USD 175,000.
	• Total turnover for any three consecutive calendar months exceeds USD 15,000.
	• Total expected turnover for the next three consecutive months exceeds USD 15,000.
	• Participating in bidding, fee consultation, or fee surveys for the supply of goods or services.

Type of taxpayer	Criteria (turnover approximated United States dollars [USD] amount)
Medium	<ul style="list-style-type: none"> Annual turnover of USD 175,000 to USD 500,000. Registered as a legal person. Government institutions below national level, associations, and non-government organisations (NGO).
Large	<ul style="list-style-type: none"> Annual turnover of over USD 500,000. Branch of a foreign company. Qualified Investment Projects (QIPs). Government institutions, diplomatic and consular missions, international organisations, and technical cooperation agents of other governments.

Prakas on the rules and procedures for implementing simplified accounting records for small taxpayers

The Prakas sets out the rules and procedures for implementing simplified accounting records as well as monthly and annual tax obligations (ToP/minimum tax, VAT, prepayment of ToP, tax on salary (ToS)/tax on fringe benefits (ToFB), and WHT) for small taxpayers. Small taxpayers are required to maintain the following three accounting records: a daily purchases book, a daily sales book, and an inventory book.

Please refer to the Prakas for details.

Prakas on the rules and procedures for managing patent tax collection

The Prakas sets out the rules and procedures for collecting patent tax. The tax payable varies depending on the taxpayer's category and turnover. *See Patent tax in the Other taxes section for more information.*

Instruction on invoicing of self-declaration taxpayers

The General Department of Taxation (GDT) has issued an instruction on invoicing requirements, including invoice criteria, for self-declaration (i.e. real regime) taxpayers. In addition to the existing criteria of a tax invoice as stated in the VAT regulations, taxpayers are now required to use good quality ink and paper for printing invoices to ensure that they can be maintained in good condition for ten years. Based on the sample of invoices also attached with the GDT's instruction, the buyers also have to sign on the invoices.

More importantly, the invoice must be issued either in the Khmer language or two languages (i.e. Khmer with English language underneath).

Any tax invoices not issued in accordance with the existing and new criteria above won't be accepted as valid invoices to claim input VAT credit, nor to support the deductibility of expenses.

Based on the written minutes of the meeting between the GDT and Private Sector Tax Working Group (TWG) dated 24 March 2016, it's confirmed that the above instruction doesn't apply retrospectively and the GDT allows a grace period of six months from the meeting date (i.e. 24 March 2016) to implement the above criteria required for the tax invoice. It's also clarified that only the customer (i.e. company) needing to claim input VAT is required to sign on the tax invoices, but isn't required to return the signed invoices to the supplier.

Taxes on corporate income

Cambodia's taxation rules vary according to the taxpayer's regime, the classification of taxpayers under different tax collection and control procedures of the GDT. The real regime is the only tax regime in Cambodia. Under the real regime (i.e. self-declaration regime), taxpayers are classified into three categories (e.g. large, medium, and small

taxpayers) based on their turnover, legal form, and other criteria. Unless otherwise stated, the focus of this summary is on real-regime taxpayers.

Resident taxpayers are subject to tax on worldwide income while non-residents are taxed on Cambodian-sourced income only. A permanent establishment (PE) is taxable on its Cambodian-source income only.

Corporate tax rate

The standard rate of corporate income tax, known as tax on profit (ToP), for companies and PEs who are classified as medium and large taxpayers is 20%.

For companies and PEs who are classified as small taxpayers, the ToP rates are progressive rates from 0% to 20%.

Industry-specific tax rates

Oil and gas and certain mineral exploitation activities are subject to ToP at the rate of 30%.

Insurance companies are taxable at a rate of 5% on the gross premium income and at the rate of 20% on other income derived from non-insurance/reinsurance activities. Net interest income of insurance companies received after 4% or 6% WHT is not taxable income.

The small taxpayer is subject to ToP at the progressive rates as stated in Article 20 of the Law on Taxation.

Minimum tax

Real-regime taxpayers are subject to a separate minimum tax. The minimum tax is an annual tax with a liability equal to 1% of annual turnover inclusive of all taxes except VAT. However, an exemption has been provided for Qualified Investment Projects (QIPs) (*see the Tax credits and incentives section for more information*).

As a separate tax to the ToP, the minimum tax is due irrespective of the taxpayer's profit or loss position (i.e. the minimum tax will be liable if the 1% of total annual turnover exceeds the 20% ToP liability).

Additional ToP on dividend distribution

A dividend-paying taxpayer is required to pay an additional ToP at the time of dividend distribution if the profit was previously subject to a 9% or 0% ToP. The rates of additional ToP vary depending on the profits to be distributed. For profit that has been subject to ToP at the rate of 20%, 9%, or 0%, that profit will be subject to additional ToP at the following rates, respectively:

ToP	Additional ToP
20% (standard rate)	0%
9% (preferential rate, which was no longer applicable after 31 December 2010)	11/91 (approximately 12.09%)
0% (during tax holiday)	20%

A shareholder is entitled to establish a special dividend account from which the relevant dividend that was already subject to 20% ToP may be on-paid without further additional ToP obligations.

A dividend will be exempt from tax in the hands of the shareholder if additional ToP and WHT for non-resident shareholders has been paid.

Cambodia

Local income taxes

Local income taxes are not applicable in Cambodia.

Corporate residence

Resident taxpayers include companies organised, managed, or having their principal place of business in Cambodia.

Permanent establishment (PE)

A PE may be determined, but not limited to, if (i) there is a permanent place or entity through which the non-resident persons carry on their business, (ii) there is an exercise of the authority to conclude a contract on behalf of a foreign entity, or (iii) business activities exceed certain time periods in Cambodia.

Factors to be considered in determining a PE include a place of management, an agent or office, a warehouse or factory, a workshop, any place of extraction of natural resources, a plantation, etc. Carrying out projects (e.g. supervisory activities of a construction project, provision of services) exceeding a time period of six months in any 12-month period may also be considered as having a PE.

Other taxes

Value-added tax (VAT)

VAT is applicable to real-regime entities and is charged at 10% on the value of the supply of most goods and services.

Exported goods and services rendered outside Cambodia are zero-rated. In addition, 0% VAT applies to the supporting industries or contractors who directly supply goods (including milled rice) or services (including milled rice production services) to export-oriented garment, textile, footwear, bag, handbag, and headwear manufacturers, milled rice exporters, and domestic supplies of paddy rice.

Some supplies are VAT exempt, the main categories being public postal services, medical and dental services, electricity, water, transportation of passengers by wholly state-owned public transport systems, insurance services, primary financial services, and land.

VAT returns and payments are due within 20 days of the following month. Note that strict record-keeping requirements do exist.

Import and export duties

Import duties are levied on a wide range of products. Rates vary from 0% to 35%. Following Cambodia's entry into the Association of South-East Asia Nations (ASEAN) during 1999, the government is required to reduce import duties in accordance with the Common Effective Preferential Tariffs programme.

Export duties are levied on a limited number of items, such as timber and certain animal products (including most seafood).

Specific tax on certain merchandise and services (SPT)

SPT is a form of excise tax that applies to the importation or domestic production and supply of certain goods and services. SPT on domestically produced goods is generally applied to the SPT base, which is 90% of the invoice price before VAT and SPT itself. For imported goods, SPT is due on the cost, insurance, and freight (CIF) value inclusive of customs duty. For hotel and telecommunication services, SPT is payable based on the invoice prices.

For local and international air transportation of passengers, SPT is 10%, payable based on the air ticket value issued in Cambodia for travel within and outside Cambodia. The SPT base is inclusive of all taxes other than SPT and VAT. For example, for return air tickets from Phnom Penh to Singapore costing 2 million Cambodian riel (KHR), exclusive of airport tax, the SPT payable is KHR 181,818 (KHR 2 million/1.1 x 10%).

Accommodation tax

Accommodation tax is calculated at 2% of the accommodation fee, inclusive of all taxes and other services except accommodation tax and VAT.

Tax for public lighting (TPL)

TPL is imposed on the distribution in Cambodia of both foreign made and locally produced alcoholic and tobacco products. TPL is levied at 3% of the value of such products at the time of each in-country sale. Value for these purposes includes all taxes other than TPL and VAT.

Tax on immovable property (ToIP)

ToIP is levied at 0.1% *per annum* of the ToIP base. The tax base is 80% of the market value of the immovable properties stated in Appendix 1 of Prakas No. 371 less the threshold of KHR 100 million. The immovable property valued below the threshold is not subject to ToIP. The Prakas also determines that ToIP is effectively collected on immovable properties located in Phnom Penh and other cities of the provinces.

Immovable property is defined to include land, buildings, and other constructions on land (e.g. infrastructures built on land, regardless of having a wall or roof). Certain exemptions exist for government-owned property, agricultural land, property owned and used for cultural and religious purposes, property of foreign embassies and NGOs, and property in the special economic zones.

The owners, possessors, and final beneficiaries of immovable property are required to register and obtain a Tax Identification Number for each immovable property valued above the threshold from the tax administration where the immovable property is located. Any changes in relation to the registered immovable property (e.g. a change of title) are also required to be reported.

The owners, possessors, and final beneficiaries hold responsibility for calculating ToIP, preparing and filing a ToIP return, as well as remitting the ToIP liability to the tax administration once per year by 30 September. A ToIP return is required for every single immovable property and must be completed and filed separately. Since this is a self-assessment tax, the tax administration will perform a tax audit on ToIP in the subsequent years.

Tax on unused land

Land in towns and other specified areas without any construction, or with construction that is not in use, and even certain built-upon land, is subject to the tax on unused land. The tax is calculated at 2% of the market value of the land per square metre as determined by the Commission for Valuation of Unused Land on 30 June each year. The owner of the land is required to pay the tax on 30 September each year. The tax is paid by the owner on land that doesn't fall under the scope of ToIP.

Stamp tax

Property

The transfer of title in certain assets (e.g. land, building, vehicles) and transfer of company shares (whether partial or full) are subject to stamp tax. The tax is imposed on the transfer values at the following rates:

- Transfer of assets: 4%.

Cambodia

- Transfer of shares: 0.1%.

The tax base for stamp tax on the soft and hard title transfer of immovable property (i.e. land) is the higher of:

- the property's value set by the appendix of the MEF's Prakas No. 962, or
- the property's value stated in a title transfer contract or other related legal documents if the transferred value is equal to or higher than the value set by the appendix of the Prakas.

Government contract

Stamp tax is imposed at the rate of 0.1% on the contract value of the public procurement contract for goods or services.

Document/signage

Stamp tax is to be paid on certain documents relating to the establishment, dissolution, or merger of a business, other official documents (perhaps more importantly for foreign investors), and certain advertising postings and signage. Amounts vary according to such factors as the type of documents, the location of the signage, illumination, and nationality of any scripted words. For certain documents, the tax amount is fixed up to KHR 1 million.

Cigarettes

Domestic producers or importers of cigarettes have the obligation to buy and affix tax stamps on packets of cigarettes. No person is allowed to sell or display packaged cigarettes for sale without a tax stamp.

Patent tax

Registered businesses must pay a (relatively nominal) patent tax on initial business registration and annually thereafter. Patent tax is levied with reference to turnover or estimated turnover.

Type of taxpayers	Patent tax (approximate USD amount)
Small	USD 100 per year
Medium	USD 300 per year
Large	<ul style="list-style-type: none">• USD 750 for turnover from USD 500,000 to USD 2,500,000.• USD 1,250 for turnover of over USD 2,500,000.
	Additional tax of USD 750 if the taxpayer has a branch, warehouse, factory, or workshop for a business activity in a different city or province.

The annual patent tax return and payment are to be filed annually, within three months of calendar year-end.

Tax on means of transportation

The tax on means of transportation imposes a number of statutory fees on the registration of certain vehicles, including trucks, buses, and ships.

Tax on salary (ToS)/fringe benefits (ToFB)

Cambodia's ToS rules follow internationally familiar residency and source principles. A Cambodian resident taxpayer's worldwide salary will be subject to Cambodian ToS. For non-residents, only the Cambodian sourced salary will be subject to ToS. The place of salary payment is not considered relevant in determining source.

A distinction is made between cash and fringe benefit salary components. Different tax scales also apply.

ToS or ToFB is a tax on employees' income, but employers are held liable to these taxes if the employers fail to withhold.

Social security contributions

Based on the Law on Social Security (LoSS), the employer is required to make social security contributions equivalent to 0.8% of the monthly average wage of an employee. The monthly average wage is capped at KHR 1 million per month.

The average wage level is defined under the Labour Law to include actual wage or remuneration, overtime payments, commissions, bonuses and indemnities, profit sharing, gratuities, the value of benefits in kind, family allowance in excess of the legally prescribed amount, holiday pay or compensatory holiday pay, and amount of money paid by the employer to the workers during disability and maternity leave.

Branch income

Income of a branch is taxable in the same way as those for corporate profits.

Income determination

Inventory valuation

Inventory can be valued at weighted-average cost, first in first out (FIFO), or current value at the close of the period, where this value is lower than the purchase price or production cost. Work-in-progress should be valued at production costs.

Capital gain

Capital gains form part of taxable profit.

Dividend income

Dividend means any distribution of money or property that a legal person distributes to a shareholder with respect to the shareholder's equity interest in such legal person, with the exception of stock dividends and distributions in complete liquidation of the company. Whether or not a distribution is a dividend shall be determined under the preceding condition without regard to whether or not the legal person has current or accumulated income or profit or earnings.

Inter-company dividends

Inter-company dividends between residents are exempt from ToP (*see the Withholding taxes section for more information*).

Gross dividend income received by a resident company from a non-resident enterprise is subject to ToP. A foreign tax credit for taxes paid on these dividends is allowed for deduction from the ToP. The maximum amount of the foreign tax credit is the ToP liability with respect to that dividend income.

Passive income

Designated passive income (such as interest, royalties, and rent) forms part of taxable profit.

Foreign income

Resident entities are taxed on their worldwide income, and tax credits are available for foreign taxes incurred. Foreign income is taxable in the period it is earned; there is no provision allowing tax to be deferred on the income earned overseas.

Deductions

Depreciation and amortisation

Property should be depreciated at rates according to four classes of assets as specified in the tax legislation. Land is not considered a depreciable asset. The straight-line or the declining-balance method is specifically required to be used for each class of assets.

Assets	Method	Rate (%)
Building and structures	Straight line	5
Computers, electronic information systems, software, and data handling equipment	Declining balance	50
Automobiles, trucks, office furniture, and equipment	Declining balance	25
All other tangible property	Declining balance	20

Expenditures on intangible property are amortisable over the life of the property or at 10% *per annum*.

Special depreciation

A QIP will be entitled to a 40% special depreciation in the first year of purchase or, if later, the first year the assets are used. However, the special depreciation will only apply to assets used in 'manufacturing and processing' (still to be defined) and only if the taxpayer has elected not to use a tax holiday. A clawback provision exists for assets held for less than four years.

Goodwill

Purchased goodwill is a depreciable intangible fixed asset for ToP purposes. If the useful life of the intangible fixed assets can be determined, the annual depreciation charges shall be calculated on the useful life by using the straight-line method. If the useful life cannot be determined, the annual depreciation rate of 10% shall be used.

Start-up expenses

Preliminary and formation expenses are allowed to be fully deducted in the period in which the expenses arise, or they can be amortised over two years.

Interest expenses

Interest deductibility in any year is limited to the amount of interest income plus 50% of the net profits excluding interest income and interest expense. The excess non-deductible interest expense can be carried forward to the following tax years indefinitely.

Based on the GDT's internal instruction, the tax authorities set maximum interest rates for loans from third parties (i.e. 120% of the market interest rate at the time of obtaining the loan) and loans from related persons (i.e. the market interest rate at the time of obtaining the loan). If the interest rate is higher than the maximum interest rate, the surplus interest expense is not deductible.

Bad debt

A loss on a claim (i.e. bad debt) is deductible where the impossibility to recover the loss can be clearly shown and that claim has been written off from the accounting books, except where the giving up of the claim is an abnormal act of management (still to be defined).

Charitable contributions

The charitable contribution expense is deductible to the extent the amount does not exceed 5% of taxable profit. The taxpayer must have proper evidence supporting the payments.

Fines and penalties

Additional tax, late tax payment interest, and fines of all types incurred for the violation of various legal provisions are not deductible.

Taxes

Taxes that are not a charge to the enterprise (e.g. WHT, ToS, ToFB, ToP, and additional ToP on dividend distribution) are not deductible.

Loss between related parties

No deduction is available for certain losses incurred on dealings between 51% commonly owned parties.

Net operating losses

Taxpayers may carry forward their losses for five years. The carryback of losses is not permitted. There is no provision for any form of consolidated filing or group loss relief.

To be eligible to carry forward tax losses, a taxpayer must not change its activities or ownership.

If a taxpayer received a unilateral tax reassessment from the GDT, a taxpayer will not be able to utilise the tax losses brought forward in the year of reassessment.

Payments to foreign affiliates

An expense payable to a related party that is not paid within 180 days of the year-end will not be deductible. A deduction can be claimed in the year in which the payments are made. This rule is not applicable for an outlay or expense for inventory, capital property, and depreciable property.

Group taxation

There is no specific provision for group taxation in Cambodia.

Transfer pricing

The GDT has wide powers to redistribute income and deductions between parties under common ownership in order to prevent the avoidance or evasion of taxes. Common ownership exists at a relatively low level of 20%.

Thin capitalisation

There is no provision for thin capitalisation in Cambodia.

Controlled foreign companies (CFCs)

There is no provision for CFCs in Cambodia.

Tax credits and incentives**Foreign tax credit**

Residents earning foreign-sourced income can receive credits for foreign taxes paid.

Inbound investment

The Council for the Development of Cambodia (CDC) may be approached for a one-stop service to register a project and obtain approval for a QIP status. CDC licensing is, however, not mandatory (except for certain large, politically sensitive projects) and is applicable to those projects that do not fall within the 'negative list'. Some of the projects in the 'negative list' include the following:

Cambodia

- All kinds of commercial activities, import and export activities, and transportation services (except the railway sector).
- Currency and financial services.
- Activities that relate to newspapers and media.
- Production of tobacco products.
- Provision of value-added services of all kinds of telecommunication services.
- Real estate development.

The current investment incentives that are applicable to the QIP registered with the CDC include a ToP exemption period of up to six years or special depreciation (*see Special depreciation in the Deductions section*), import duty exemptions, and exemption from minimum tax. Not all QIPs will be entitled to all incentives.

Annually, a QIP is required to obtain a Certificate of Compliance (CoC) from the CDC to guarantee its investment incentives. The CoC is intended to provide confirmation that the QIP has acted in compliance with the relevant tax regulations.

Tax incentives in securities sector

The Royal Government of Cambodia has issued Sub-Decree No. 01 to provide tax incentives to companies listed on the Cambodian Stock Exchange (CSX) and public investors who hold and/or trade government, equity, and debt securities on the securities market.

The listed companies are entitled to a 50% reduction on the annual ToP payable for three years, starting from the beginning of the current tax year if the securities are issued within the first half of the tax year or the following tax year if the securities are issued within the second half of the tax year. The incentive is effective for three years from the signing of the Sub-Decree (i.e. 8 January 2015). Also, the listed companies are entitled to suspend payment of monthly prepayment of ToP for the period that they are entitled to tax incentives under the Sub-Decree. A QIP is not entitled to the tax reduction during the tax holiday period. Public investors are entitled to a 50% reduction on the WHT payable on interest and/or dividends received from the above securities for three years, starting from the signing of the Sub-Decree. However, there are various conditions under which the MEF can forfeit the tax incentives granted to the listed companies.

Additional tax incentives for rice farming, paddy rice purchase, and export of milled rice

The MEF has issued Prakas to provide additional tax incentives to any enterprises in the business of rice farming, paddy rice purchase, and export of milled rice, as follows:

VAT:

- Domestic supplies of paddy rice: 0%.
- Domestic supplies of milled rice: 10%.
- Export of milled rice: 0%.
- Supplies of milled rice or milled rice production services to rice exporters (subject to specific conditions): 0%.
- Supplies of milled rice or milled rice production services to the local market: 10%.
- Input VAT related to rice farming, paddy rice purchase, and export of milled rice is creditable or refundable.
- Input VAT related to import of production inputs and equipment to produce milled rice for export is borne by the government (subject to specific conditions).
- Local purchases of production inputs, except for paddy rice: 10%.

ToP and minimum tax:

- Exempt from 1% minimum tax.

- Entitled to tax holiday period (i.e. trigger period plus three years plus three year priority period).
- Exempt from 1% prepayment of ToP during the tax holiday period.

Withholding taxes

WHT needs to be withheld on payments made by residents (and it seems only to those who fall under the real regime). The withheld tax constitutes a final tax when withheld in respect of resident and non-residents.

The types of payments caught are as follows.

WHT on payment to residents

- Interest: 15% (except payment to a Cambodian bank).
- Royalties: 15%.
- Rental: 10%.
- Services: 15% (except payments to a registered taxpayer and supported by a valid VAT invoice).

WHT on payment to non-residents

- Dividends: 14%.
- Interest: 14%.
- Rent or right for use of property: 14%.
- Management or technical fees (not defined): 14%.

Public investors invested on the CSX are entitled to a 50% reduction on the WHT payable on dividends and/or interest received from the government, equity, and debt securities for three years, starting from the signing of the Sub-Decree no. 01 dated 8 January 2015.

WHT is due when the amount is paid. An expense is considered 'paid' when it is recorded in the accounting records.

Except WHT on the rental of movable and immovable properties as stated in Article 25 and 26 of the Law on Taxation, small taxpayers are exempted from being the WHT agents for other WHT implications.

Cambodia has not signed any treaties for the reduction of WHTs.

Tax administration

Taxable period

The standard tax year is the calendar year, although different accounting year-ends may be granted upon application.

Tax returns

The return for annual tax (i.e. ToP/minimum tax) is to be filed annually, within three months of tax year-end.

Returns for monthly taxes (e.g. 1% prepayments of ToP, WHT, ToS or ToFB, SPT, and accommodation tax) are to be filed monthly, within 15 days of the following month. The deadline will be extended to the next working day if the 15th day falls on a Saturday, Sunday, or public holiday.

Cambodia

Payment of tax

ToP or minimum tax is due for payment three months after tax year-end. The ToP or minimum tax liability can be reduced by prepayment of ToP payments.

Monthly taxes are due for payment by the 15th day of the succeeding month. The deadline will be extended to the next working day if the 15th day falls on a Saturday, Sunday, or public holiday.

Prepayment of ToP

A prepayment of ToP equal to 1% of monthly turnover inclusive of all taxes, except VAT, is required to be paid on a monthly basis. The prepayment can be offset against the annual ToP liability and the minimum tax.

Where a taxpayer is in the period of ToP holiday, the taxpayer is also exempted from the prepayment obligations. However, a nil monthly return will need to be lodged.

Where a taxpayer is not subject to minimum tax, a monthly prepayment of ToP must still be made. However, unutilised prepayments from a prior year can be used to offset the current amount due, and no physical payment may be required.

Tax audit process

There are two types of tax audit in Cambodia (i.e. limited and comprehensive tax audits). Initially, the tax authorities will send a notification letter to the taxpayer informing them of a tax audit. During the tax audit process, tax auditors visit the taxpayers' office to review the documents and discuss any potential tax issues with the taxpayers and may request supporting evidence. After the visit to the taxpayer's office, the tax auditors issue a notice of tax reassessment (NoTR), which indicates the reassessed tax liabilities and the basis of their tax reassessment. If the taxpayers agree with the reassessed tax liabilities, they can proceed with the payment. If not, the taxpayers have to submit an objection letter to the tax authorities within 30 days of the receipt of the NoTR.

Statute of limitations

The tax audit period (i.e. the limitation of the period within which the tax authorities can perform tax audits) is as follows:

- Within three years of the date of submission of the tax returns.
- Within ten years of the date of submission of the tax returns if there is any evidence of 'obstruction of the implementation of laws'.
- Any time with the written consent of the taxpayers.

In practice, the GDT regularly extends the time limit for tax audit up to ten years.

Topics of focus for tax authorities

In practice, the tax authorities focus the tax reassessment on various matters, including payment to third parties overseas, fringe benefits provided to employees, and related party transactions (e.g. payment of management fee to head office, loans from shareholder).

Other issues

Statutory financial audit requirement

All enterprises (whether physical or legal persons) that meet two of the following criteria are required to have their financial statements audited by an independent external auditor registered with the Kampuchea Institute of Certified Public Accountants and Auditors (KICPAA):

- Annual turnover above KHR 3 billion.
- Total assets above KHR 2 billion.
- More than 100 employees.

QIPs registered with the CDC are required to have their financial statements audited by independent external auditors registered with the KICPAA.

The law does not state the deadline for the enterprises to submit their audited financial statements. However, the deadline for audited financial statements to be completed is six months after the accounting year-end (i.e. for the financial year ended 31 December 2015, the deadline is 30 June 2016).

Significant developments

As of 1 January 2016, the following significant corporate tax developments were introduced in Cameroon by the 2016 Finance Law:

- Sums paid for the use of valid patents, brands, designs, and models are henceforth capped at the overall limit of 2.5% of the taxable income before the deduction of expenses claimed only when such sums are paid to firms participating directly or indirectly in the management or capital of a Cameroonian firm.
- Losses due to damage in inventories shall be deductible from the taxable basis when they are duly established and validated by a Commissioner of damage in the presence of a taxation officer.
- The deadline for the reduced corporate income tax (CIT) rates granted to companies whose ordinary shares are listed on the Cameroon Stock Exchange has been extended for three years, with effect from 1 January 2016 (*see Incentives applicable to listed companies in the Tax credits and incentives section for more information*).
- Mobile telephone communications and internet services are henceforth subject to excise duties at an extra-reduced rate of 2%.
- Public orders for fuels and lubricants, regardless of the purchase or payment method, shall be exempted from registration duty and stamp duty.

Taxes on corporate income

Resident corporations in Cameroon are taxed on their worldwide income; non-resident corporations are taxed only on Cameroon-source income.

The following shall be deemed to be operating in Cameroon and subject to CIT:

- Undertakings headquartered in Cameroon or with an effective management office in Cameroon.
- Undertakings that have a PE in Cameroon or with an effective management office in Cameroon.
- Undertakings that have a dependent representative in Cameroon.
- Undertakings that carry out activities that form a full commercial cycle in Cameroon.

The profits subject to CIT are determined with sole regard to profits earned by entities located in Cameroon (for residents) or transactions effected in Cameroon (for non-residents having a permanent establishment [PE] in Cameroon).

The net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Cameroon.

The total Cameroon CIT rate is 33%.

Minimum tax

There is a 2.2% or 5.5% minimum tax in Cameroon based on turnover and depending on the tax regime of the taxpayer. The advance payment shall be 10% for any taxpayer that is not on the register of a tax office. The 10% rate also applies to remunerations paid to non-salaried sales agents or representatives and agents of direct network sales. The 15% rate applies to taxpayers not registered with a taxation centre and engaged in import activities. The 15% rate shall be increased to 20% where the taxpayer carries out the sale of in-bond goods. This minimum tax is an instalment of CIT. As such, it shall be offset against CIT. The minimum tax is the sole tax payable if it is greater than CIT.

Local income taxes

A local tax of 10%, called Additional Council Tax, generally applies to the following taxes:

- CIT.
- Personal income tax (PIT).
- Withholding tax (WHT) on income from stock and shares.
- Value-added tax (VAT).

The rate provided in this summary for each tax above is therefore inclusive of a basic rate plus 10% surcharge.

Corporate residence

An entity is deemed resident if its registered office, centre of activity, or management is located in Cameroon; if it has resident employees in Cameroon that provide services to customers; or if it has a PE in Cameroon.

Permanent establishment (PE)

Undertakings that have a PE in Cameroon or with an effective management office in Cameroon shall be deemed to be operating in Cameroon and subject to CIT.

PE shall mean a physical installation with certain fixity and with a certain degree of autonomy through which the foreign company carries out wholly or part of its business.

Other taxes**Value-added tax (VAT)**

VAT shall be levied on natural persons or corporate bodies that automatically, habitually, or occasionally carry out taxable transactions consisting of provisions of services or sales of goods.

The total VAT in Cameroon is 19.25%. Exports are zero rated. The VAT paid upstream is recoverable, except where otherwise stated.

Note that VAT is invoiced only by natural and legal persons whose turnover (taxes excluded) is equal to or above 50 million *Communauté Financière Africaine* francs (XAF) and who are under the tax regime of actual earnings.

Customs duties

Customs duties of between 5% and 30%, depending on the nature of the goods imported, are levied based on the customs value.

The 2016 Finance Law has re-established the rate of the Common External Tariff (CET) on some products, such as rice and cement. As such, the import of rice, which previously

Cameroon, Republic of

benefitted from the suspension of duties and taxes, is henceforth subject to the CET at the rate of 5%, and the CET rate has been revised upwards for some types of cement.

Excise taxes

An excise duty of 25% is applicable to cigarettes, drinks, cosmetics, luxury items (e.g. jewels, precious stones), slot machines, and other devices used for games of chance. A reduced rate of excise duty (12.5%) shall apply to soft drinks and private vehicles with engine capacities of 2,000 cm³.

The 2016 Finance Law has instituted an extra-reduced rate of excise duties at 2% applicable to mobile telephone communications and internet services.

Deductions initially made as excise duties shall be subject to regularisations by tax officials in case of reselling throughout the national territory.

There are minimum excise duties applicable to alcoholic beverages and tobacco. For tobacco, the minimum tax shall not be less than XAF 3,500 for 1,000 cigarette rods. For alcoholic beverages, the minimum tax depends on the nature of the alcohol and the alcohol level per litre.

Real property tax

Cameroon property tax is payable annually on real estate with or without an ownership certificate or an administrative or judicial order issued. Tax is charged at 0.1% of the assessed property value.

According to the 2016 Finance Law, taxpayers who voluntarily regularise their property tax in the 2016 financial year shall be exempted from the payment of tax arrears for the non-prescribed period as well as from related penalties. At the end of the 2016 financial year, no tax or penalty remission will be granted on the land tax for the non-prescribed period.

Properties belonging to clubs, associations, or sporting bodies' accredited properties intended for sports and sports facilities are exempt from real property tax.

Transfer tax

The sale of a business in Cameroon is subject to a transfer tax rate of 15%.

Registration duty

The registration duty applies to certain deeds listed by the General Tax Code (GTC). The assessment basis depends on the nature of transactions, and the rate varies from 1% to 15%.

The formation of a company and subsequent capital increases in Cameroon are not subject to registration duty.

Public contracts or orders paid from the budget of the state, regional, and local authorities; public institutions, public corporations, and semi-public companies; or through external financing shall be subject to registration duty at the rate of 2% for amounts below XAF 5 million and 5% for amounts at or above XAF 5 million.

As of 1 January 2016, public orders for fuels and lubricants, regardless of the purchase or payment method, shall be exempted from registration duty and stamp duty.

The following transactions are subject to registration duty at the rate of 2%:

- The transfer of shares and bonds of commercial or civil companies with registered offices outside of the Economic and Monetary Community of Central Africa (CEMAC)

zone when said instruments are utilised or when the transfer produces consequences in a CEMAC country.

- The transfer (even indirect) in Cameroon or abroad of shares and bonds of companies with registered offices in Cameroon.

Stamp duty

Stamp duty in CEMAC countries is established, independent of registration fees, on all papers to be used for civil and legal instruments and documents that may be brought before law courts as proof. It shall be collected on the basis and in accordance with the rules laid down in the GTC.

Stamp duty shall be fixed according to the nature of the instruments subject thereto. There shall be no exemptions except those expressly indicated in the GTC.

The maximum and minimum stamp duty based on paper size are fixed at XAF 1,500 and XAF 1,000, respectively, in Cameroon.

Business licence tax

Any natural person or corporate body carrying on a trade, industry, or profession in Cameroon shall be liable to a business licence tax. The business licence tax is paid annually according to a graduated scale and is assessed on turnover.

New enterprises shall be exempt from the payment of the business licence tax during the first year of operation.

Payroll tax

Employers in Cameroon are required to make monthly contributions of 2.5% of the total amount of salaries and fringe benefits of their employees to the Housing Loan and Employment Fund of Cameroon.

Social security contributions

Employer and employee must contribute on a monthly basis to Cameroon's National Social Insurance Fund at 11.2% and 4.2%, respectively. The basis of contribution is capped at XAF 750,000 per month (i.e. XAF 9 million per year). Employers in Cameroon must also contribute 1.75%, 2.5%, or 5% of total salaries to the National Social Insurance Fund for Industrial Accidents when they are respectively classified in groups A, B, or C according to the classification per type of activity. The calculation basis in this category is the gross salary, including the benefits in kind assessed for their actual amount.

Branch income

The local branch of any foreign company is taxed at the same rate as a company. The net profits (after CIT) of entities having their residence or head office outside Cameroon (such as the branch of a foreign company) are assumed to be distributed each fiscal year to companies not located in Cameroon. Their net profits (after CIT) shall therefore be subject to the WHT on distributions at 16.5%.

Income determination

Inventory valuation

For valuation purpose, the GTC only provides that stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory. No reference is made to the accounting method that shall be used (e.g. first in first out [FIFO], last in first out [LIFO]). Only FIFO and weighted average methods are allowed under the Organisation for the Harmonisation

Cameroon, Republic of

of Business Law in Africa (OHADA) Accounting Principles. Where there is any difference between the valuation method permitted by the GTC and the book valuation, the accounting result shall be modified accordingly.

As of 2016, firms shall, by 15 March, submit a summary of all the stock movements of the financial year concerned, together with the software used in managing the said stock. The summary of inventory movements should be produced in dematerialised form.

The 2016 Finance Law has instituted the right of ascertainment of stocks by the tax administration. As such, tax officers shall conduct unannounced on-site operations to physically audit the stocks of one or several products of the non-prescribed period. A notice of passage shall be remitted to the taxpayer or representative during the first intervention within the framework of such audit.

Capital gains

Capital gains are normally taxed at full CIT rates.

The net overall capital gains arising from the transfer of shares and stocks; income from bonds; income from debts, deposits, surety-bonds, and current accounts; profits realised from the transfer of shares; reimbursement of sums put at the disposal of the company by a manager or a partner as an advance or a loan; and capital gains on the transfer of rights relating to natural resources shall be subject to 16.5% WHT.

For transfers realised abroad, the Cameroonian law enterprise and the transferor shall be jointly and severally liable to payment of the sums due under such transfer.

Dividend income

Dividends are subject to the WHT of 16.5%. However, dividends shall be treated as proceeds for the purpose of CIT, and the tax withheld at source is used as instalment for the payment of CIT.

Interest income

Interests are subject to the WHT of 16.5%. However, interests shall be treated as proceeds for the purpose of CIT, and the tax withheld at source shall be used as instalment for the payment of CIT.

Interests on external loans of a maturity period of at least seven years, signed as of 1 January 2014, are exempted from the WHT.

Foreign income

As a matter of both fact and law, revenue from abroad earned by corporate bodies situated in Cameroon shall be subject to CIT in Cameroon. There is no provision on tax deferral in Cameroon.

Deductions

Depreciation

Depreciation is generally computed on a straight-line basis over the useful life according to the rates provided for by the GTC, including those that might have already been deferred in times of deficit.

The following depreciation rates are generally accepted for tax purposes:

Assets	Depreciation rates (%)
Construction	5 to 20
Stationary equipment and tools	5 to 20

Assets	Depreciation rates (%)
Portable equipment	10 to 100
Transport equipment	10 to 33.33
Railway lines	1 to 10
Engines	5
Rehabilitation	5 to 25
Furniture fittings and other equipment	10 to 33.33
Fishing equipment and fishing vessels	15

The deduction of depreciation can be carried forward indefinitely.

Goodwill

With regard to rules governing the deduction of provisions and depreciation, impairment of goodwill shall be allowable for CIT purposes.

Start-up expenses

There is no specific provision in the GTC relating to start-up expenses.

However, the OHADA Accounting Principles effectively state that start-up expenses shall be capitalised and must be completely depreciated as early as possible: over two to five years, except bond premiums, which are depreciated throughout the life of the loan.

No distribution of profit should be carried out before the complete depreciation of start-up expenses.

Intellectual property (IP)

Sums paid to related entities for the use of valid patents, brands, designs, and models are capped at the overall limit of 2.5% of the taxable income before the deduction of expenses claimed. When they are paid to entities located outside the CEMAC that directly or indirectly hold shares or are members of the Cameroonian entity's board of directors, they shall be considered as sums accruing from the distribution of profits. As such, they are not allowable.

Interest expenses

Interest expenses are fully deductible.

However, interest paid to partners/shareholders in respect of the sums they leave with or place at the disposal of the company over and above their capital, irrespective of the type of company, shall be acceptable within the limits of those calculated at the rate of the central bank discount rate, raised by two points.

Bad debt

The deductibility of provisions for bad debts is subject to the following conditions:

- The debt must be specified (i.e. clarification is needed on the nature, amount, and the debtor).
- The company must show that it has unsuccessfully carried out actions for debt recovery (e.g. reminder letters, notice to pay, complaints).

For losses related to bad debts to be deductible, they should have been subjected to all amicable or forced collection methods and means provided for by the OHADA Uniform Act on the Organization of Simplified Procedures for Collection and Enforcement Procedures. Otherwise, they shall not be deductible.

In this regard, the impossibility of recovering the debt must be evidenced by:

- a deficiency report prepared by a bailiff

Cameroon, Republic of

- a bankruptcy decision duly passed by the judge, if necessary, or
- a decision passed by a judge, bearing out the debtor who disputed the debt.

Charitable contributions

Acts of liberality, gifts, and subsidies shall not represent the charges deductible from profits.

However, payments made to research and development (R&D) bodies and to collective philanthropic, educational, sports, scientific, social, and family institutions and bodies, on condition that the latter are situated in Cameroon, shall be deductible as soon as there is proof of payment and as long as they do not exceed 0.5% of the turnover for the fiscal year. Similarly, gifts made on the occasion of a disaster shall be deducted in the form and conditions determined by order of the Minister of Economy and Finance.

Liberalities, gifts, and subsidies awarded to clubs participating in the elite national competitions or to recognised organisations responsible for the organisation of official sport competitions are deductible, provided they are justified, within the limit of 5% of the annual turnover.

Fines and penalties

Compounding fees, fines, confiscations, and any penalty concerning persons who violate legal, economic, and fiscal provisions shall not be deducted from the profits subject to taxation.

Taxes

Only the professional taxes issued for collection during the fiscal year and which are to be borne by the firm in relation to the operations carried out in Cameroon shall be subject to deduction.

CIT, WHT, and PIT shall not be considered as deductible expenses for the levying of taxes.

Net operating losses

Any loss sustained in a given year can be carried forward up to the fourth year following the recording of the loss. The carryback of losses is not permitted in Cameroon.

As of 1 January 2016, losses due to damage in inventories shall be deductible from the taxable basis when they are duly established and validated by a Commissioner of damage in the presence of a taxation officer with the rank of at least an inspector, under the conditions specified in the Manual of Tax Procedures.

Payments to foreign entities

Head office overhead expenses for operations carried out in Cameroon and the remuneration of certain effective services (studies, technical, financial, or accounting assistance) provided to Cameroonian firms by foreign natural persons or corporate bodies are not totally deductible.

Fees paid are deductible up to a maximum of:

- 5% of intermediary earnings as a general rule
- 2.5% of the turnover for firms specialised in public works, and
- 7.5% for design firms operating in accordance with regulations relating to design firms and consulting engineers.

The notion of technical assistance shall include services provided by entities located either overseas or in Cameroon.

Expenses linked to transactions with natural persons or legal entities resident or established in a territory or state considered to be a tax haven shall not be deductible. This rule shall not apply to imports of goods made in those countries. A tax haven is any state where the tax on the income of a natural person (PIT) or legal entity (CIT) is less than a third of that paid in Cameroon, or any state or territory considered not to be co-operative in matters of transparency or of exchange of information required for fiscal purpose by international or financial organisations. The rate to be considered in Cameroon for that purpose is 35% for PIT and 30% for CIT.

Group taxation

There is specific taxation of groups within the CEMAC area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent establishment represent at least 25% of the capital of the subsidiary firm.
- The parent and subsidiary firms have their registered office in a CEMAC state (Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company that undertakes to retain them for at least two consecutive years in registered form.

Transfer pricing

There are provisions in the GTC that relate to transfer pricing.

Within the framework of a tax audit, the documents required for the justification of transfer pricing shall be presented to the tax inspectors at the start of the procedure. Items such as business transactions, payments in consideration for intangible rights, allocations of costs and expenses (head office costs, agreements to share costs, disbursements, etc.), financial transactions, etc. are particularly targeted for close scrutiny.

Companies in the Large Taxpayers Unit (LTU) shall declare participation in companies that are equal to or more than 25% of the share capital of the latter, as well as the supporting documents for intra-group transactions, at the same time as their annual tax return.

Thin capitalisation

The deduction of interests on sums of money left or placed at the disposal of local entities by partners or related companies who directly or indirectly own at least 25% of the share capital or corporate voting rights is capped at:

- one and a half times the amount of equity or
- 25% of profit before corporate tax and before deduction of the said interests and amortisations taken into account in determining such profit.

Otherwise, interests on the excess amount shall not be deductible.

Cameroon, Republic of

Controlled foreign companies (CFCs)

We are not aware of any special provisions for CFCs. Indeed, subject to the provisions of international conventions and the provisions relating to group taxation mentioned above, revenue from stocks and shares held in a company based abroad shall be subject to income tax in Cameroon.

Tax credits and incentives

Foreign tax credit

Taxes paid abroad are not considered as tax credits unless provided as such by international tax treaties.

The system of reinvestment relief

This system of reinvestment relief previously provided by the GTC has been cancelled by the 2015 Finance Law.

The private investment tax incentive regime

The private investment tax incentive regime applies to investment operations relating to the creation, extension, renewal, refurbishing of assets, and/or the transformation of activities carried out in Cameroon.

The major tax advantages related to the private investment regime in Cameroon are the following:

- During the installation phase: Tax incentives for a maximum period of five years.
- During the exploitation phase: Tax incentives for a maximum period of ten years.
- For the development of existing companies: Tax incentives for a maximum of five years.
- Possibility of specific advantage for prioritised sectors.

Tax and customs incentives granted to investors consist of exemptions from or reductions of payment of several taxes, duties, and other fees listed.

Incentives applicable to listed companies

Companies whose ordinary shares are listed on the Cameroon Stock Exchange shall be entitled to the following CIT reduced rates:

- 22% for a period of three years for capital increases that represent at least 20% of the share capital.
- 27.5% for a period of three years for transfers of shares that represent at least 20% of the share capital.
- 30.8% for a period of three years from the date of listing for capital increases or transfers of shares that represent less than 20% of the share capital.

According to the 2016 Finance Law, such reduction shall be granted to companies listed on the stock market within three years, with effect from 1 January 2016.

Companies whose ordinary shares are listed on the bond market in Cameroon shall be entitled to pay basic CIT at a reduced rate of 33% for three years, effective from the date of listing.

Withholding taxes

Special income tax

A special tax is levied at an overall discharging rate of 15% on income paid to natural persons and corporate bodies domiciled outside of Cameroon by enterprises or

establishments based in Cameroon for various services provided or used in Cameroon. The tax is withheld at source by the Cameroonian entity that pays the remuneration.

The special income tax at an overall rate of 15% is also levied on income paid to natural persons and corporate bodies domiciled out of Cameroon as remuneration for deliveries of all sorts of public contracts or orders paid from the budget of the state, regional, and local authorities; public institutions, public corporations, and semi-public companies; or through external financing.

It has been clearly highlighted that software acquired overseas shall be subject to the 15% WHT.

Non-commercial profits WHT

The 2015 Finance Law has set up a 16.5% WHT to be deducted at source by entities that pay remunerations granted to the board members of public institutions, public corporations, and semi-public companies in any capacity.

The 2016 Finance Law has reduced the tax rate applicable to non-commercial revenue from 16.5% to 11% to be deducted at source by entities that pay the following:

- Allocations of any nature, such as allowances, gratuities, compensations, and daily subsistence allowances granted, in addition to salaries, by public and semi-public entities, excluding statutory compensations falling under the category of wages and of salaries, and reimbursement of costs, the list of which shall be established by decision of the Minister in charge of finance.
- Amounts, allowances, allocations, or remunerations of any nature paid to sportsmen and artists, irrespective of their tax domicile.

Dividends WHT

A total WHT of 16.5% applies to dividends paid to both Cameroon residents and non-residents. The WHT rate may be reduced under an applicable tax treaty.

Interest WHT

The interest from foreign loans is subject to 16.5% WHT. The WHT rate may be reduced under an applicable tax treaty.

Interests on external loans of a maturity period of at least seven years, signed as of 1 January 2014, are exempted from the WHT.

Royalties WHT

Royalties paid to non-residents are subject to a 15% WHT (the 10% surcharge is not applicable). The tax rate may be reduced under an applicable tax treaty.

Tax treaties

Cameroon has tax treaties with Canada, France, Tunisia, and members of CEMAC (Cameroon, Gabon, Equatorial Guinea, Congo, Chad, and Central African Republic).

Recipient	Dividends (%)	Interest (%)	Royalties (%)	Head office expenses and technical assistance (%)
CEMAC	16.5	16.5	N/A	N/A
Canada	16.5	16.5	16.5	15
France	15	15	N/A	7.5
Tunisia	12	15	15	15

Cameroon, Republic of

Tax administration

Taxable period

The tax year in Cameroon is the calendar year.

Tax returns

On or before 15 March, taxpayers are expected to submit to the tax administration the annual return of revenue derived from their business venture during the period serving as the tax base.

This return must be presented in conformity with the OHADA accounting system.

No one may invoke a claim on the state to shirk their return and payment obligations.

Despite the declarative tax system applicable in Cameroon, the tax administration may send a pre-completed return of collected revenue or any other taxable item, with the tax amount owed, to any natural or legal person paying taxes or duties as per laws and regulations in force.

The taxpayer that feels overtaxed or wrongfully taxed under a pre-filled tax return procedure shall submit a request for correction to the competent taxation centre within one month of receipt of such return. In such case, the tax authorities and the taxpayer shall have 30 days within which to decide the final taxes established by a collection notice (CN).

Failure to pay within 15 days of receiving the CN or respond to a pre-filled tax return in time shall be tantamount to accepting the terms thereof.

Other tax filings

As of 2016, firms falling under a dispensational or special tax regime shall file, by 15 March, a summary declaration of transactions of the previous year for which they obtained tax benefits, including theoretical taxes and levies corresponding to the said transactions.

Payment of tax

An instalment representing the 2.2% or 5.5% minimum tax of turnover realised during each month shall be paid to the tax authorities not later than the 15th day of the following month.

Advance payment of 0.5%, 2%, 5%, 10%, 15%, or 20% is withheld at source by the buyer or the customs administration on purchases and imports destined to be resold, depending on the tax regime applicable to the buyer or importer. *See Minimum tax in the Taxes on corporate income section for more information.*

The balance of CIT is paid, at the latest, on 15 March following the fiscal year-end, when submitting the CIT return.

Surplus tax payments

A surplus tax payment can be offset against future taxes of the same nature to be paid. For the specific case of VAT, a reimbursement process is provided for by the GTC under certain conditions.

Tax audit process

There is no audit cycle in Cameroon.

Statute of limitations

The statute of limitations is four years.

Topics of focus for tax authorities

The topics of focus for tax authorities include the following:

- Remunerations paid for services provided to local entities by providers located overseas.
- Transfer pricing.
- Deduction and reimbursement of VAT.
- WHT.
- Stocks (inventory valuation and management).

Significant developments

Canada's corporate summary reflects all 2016 federal, provincial, and territorial budgets. The 2016 federal budget continues to tighten perceived loopholes or inequities in various aspects of the tax system and proposes to spend 444 million Canadian dollars (CAD) to support the Canada Revenue Agency (CRA) to:

- enhance its efforts to crack down on tax evasion and combat tax avoidance by hiring additional auditors and specialists, developing robust business intelligence, increasing verification activities, and improving the quality of investigative work that targets criminal tax evaders (*see Tax evasion and aggressive tax avoidance in the Tax administration section for more information*)
- improve its ability to collect outstanding tax debts, and
- ramp up its outreach efforts to ensure that taxpayers understand and meet their tax obligations.

In the coming year, the government will undertake a review of the tax system to determine whether it works well for Canadians, with a view to eliminating poorly targeted and inefficient tax measures.

The summary is based on enacted and proposed legislation and assumes that the proposed legislation will become law. Generally, budget proposals and draft legislation are enacted into law, especially if there is a majority federal government, which is currently the case.

Eligible capital property (ECP)

The 2016 federal budget repeals the ECP regime and replaces it with a new capital cost allowance (CCA) pool, Class 14.1, starting 1 January 2017. The CCA (i.e. depreciation for tax purposes) rate will be 5% declining balance. Transitional rules will apply. *See Eligible capital property (ECP) in the Deductions section for more information.*

Debt parking to avoid foreign exchange gains

To avoid realising a foreign exchange gain on the repayment of a foreign currency debt, some taxpayers have entered into debt-parking transactions. As a result, the 2016 federal budget introduces rules that require any accrued foreign exchange gain on foreign currency debt to be realised when the debt becomes a parked obligation, generally for debt that becomes a parked obligation after 21 March 2016. *See Debt parking to avoid foreign exchange gains in the Income determination section for more information.*

Valuation of derivatives

A recent Tax Court of Canada decision held that a derivative that provides rights to a taxpayer and is held on income account would be considered inventory. Accordingly, certain derivatives could qualify for the lower of cost and market method under the inventory valuation rules, which can lead to significant tax base concerns, because derivatives are potentially more volatile and are held longer than conventional inventory. As a result, the 2016 federal budget addresses the valuation of derivatives. *See Valuation of derivatives in the Income determination section for more information.*

Cross-border surplus stripping

The 'anti-surplus-stripping' rule applies when a non-resident person disposes of its shares in a corporation resident in Canada (the subject corporation) to another corporation resident in Canada with which the non-resident person does not deal at arm's length. The rule is intended to prevent the tax-free receipt by the non-resident person of distributions in excess of the paid-up capital (PUC) of its shares in the subject corporation and an artificial increase of the PUC of such shares. Some non-resident corporations with Canadian subsidiaries have used an exception to the anti-surplus-stripping rule by reorganising the corporate group in a manner that increases the Canadian subsidiaries' PUC. The 2016 federal budget amends this exception, for dispositions occurring after 21 March 2016, to ensure that it does not apply in those situations. *See Cross-border surplus stripping in the Income determination section for more information.*

Back-to-back loan arrangements

The 'back-to-back loan' rules prevent taxpayers from interposing a third party between a Canadian borrower and a foreign lender to avoid rules that would otherwise apply if a loan were made directly between the two taxpayers. The 2016 federal budget expands these rules. *See Back-to-back loan arrangements in the Group taxation section for more information.*

Avoidance of corporate capital gains

Section 55 of the Income Tax Act contains an anti-avoidance rule that generally taxes as capital gains certain otherwise tax-deductible, inter-corporate dividends in certain situations. For dividends received after 20 April 2015, draft legislation amends section 55 to ensure that it applies when one of the purposes of a dividend is to effect a significant reduction in the fair market value (FMV) of any share or a significant increase in the total cost of properties of the dividend recipient. *See Avoidance of corporate capital gains in the Income determination section for more information.*

Synthetic equity arrangements

For dividends that are paid or become payable after April 2017 (in some cases, after October 2015), draft legislation modifies the dividend rental arrangement rules to deny the inter-corporate dividend deduction on dividends received by a taxpayer on a Canadian share in respect of which there is a synthetic equity arrangement. *See Synthetic equity arrangements in the Income determination section for more information.*

Country-by-country (CbC) reporting

The 2016 federal budget proposes to implement annual CbC reporting for taxation years beginning after 2015, for multinational enterprises (MNEs) with total annual consolidated group revenue of 750 million euros (EUR) or more (approximately CAD 1 billion). *See Country-by-country (CbC) reporting in the Group taxation section for more information.*

Spontaneous exchange of tax rulings

Effective 1 April 2016, the CRA began sharing select Canadian tax rulings with certain countries in accordance with the final Organisation for Economic Co-operation and Development (OECD) and the Group of 20 (G20) base erosion and profit shifting (BEPS) report (Action 5). *See Spontaneous exchange of tax rulings in the Tax administration section for more information.*

Treaty shopping

The 2016 federal budget states that the government is committed to addressing treaty abuse in accordance with the minimum standard contained in the final OECD and the G20 BEPS report on treaty shopping (Action 6). The government will consider either the limitation-on-benefits approach or the limited principal purpose test to meet the minimum standard, depending on the circumstances and on discussions with Canada's

Canada

tax treaty partners. *See Treaty shopping in the Tax administration section for more information.*

Common Reporting Standard (CRS)

Draft legislative proposals implement the OECD's CRS for automatic information exchange, effective 1 July 2017. Canadian financial institutions will be required to obtain and report to the CRA certain information related to financial accounts of non-residents. *See Common Reporting Standard (CRS) in the Other issues section for more information.*

Withholding tax for non-resident employees

Draft legislation relieves certain non-resident employers that have non-resident employees working temporarily in Canada from payroll withholding requirements, effective 1 January 2016. *See Withholding tax for non-resident employees in the Other taxes section for more information.*

Emissions trading regimes

Under emissions trading regimes, regulated emitters must deliver emissions allowances to the government. Currently, no specific tax rules exist to deal with emissions trading regimes. The 2016 federal budget introduces specific rules to clarify the tax treatment of emissions allowances and to eliminate the double taxation of certain free allowances. *See Emissions trading regimes in the Income determination section for more information.*

Taxes on corporate income

As a general rule, corporations resident in Canada are subject to Canadian corporate income tax (CIT) on worldwide income. Non-resident corporations are subject to CIT on income derived from carrying on a business in Canada and on capital gains arising upon the disposition of taxable Canadian property (*See Capital gains in the Income determination section for more information*). The purchaser of the taxable Canadian property is generally required to withhold tax from the amount paid unless the non-resident vendor has obtained a clearance certificate.

Canadian CIT and withholding tax (WHT) can be reduced or eliminated if Canada has a treaty with the non-resident's country of residence. *A list of treaties that Canada has negotiated is provided in the Withholding taxes section along with applicable WHT rates.*

Federal income tax

The following rates apply for 31 December 2016 year-ends. For non-resident corporations, the rates apply to business income attributable to a permanent establishment (PE) in Canada. Different rates may apply to non-resident corporations in other circumstances. Non-resident corporations may also be subject to branch tax (*see the Branch income section*).

	Federal rate (%)
Basic rate	38.0
Less: Provincial abatement (1)	(10.0)
Federal rate	28.0
Less: General rate reduction or manufacturing and processing deduction (2)	(13.0)
Net federal tax rate (3, 4)	15.0

Notes

1. The basic rate of federal tax is reduced by a 10% abatement to give the provinces and territories room to impose CITs. The abatement is available in respect of taxable income allocated to Canadian provinces and territories. Taxable income allocable to a foreign jurisdiction is not eligible for the abatement and normally is not subject to provincial or territorial taxes.

2. The general rate reduction and manufacturing and processing deduction do not apply to the first CAD 500,000 of active business income earned in Canada by Canadian-controlled private corporations (CCPCs), investment income of CCPCs, and income from certain other corporations (e.g. mutual fund corporations, mortgage investment corporations, and investment corporations) that may benefit from preferential tax treatment.
3. Provincial or territorial taxes apply in addition to federal taxes. Provincial and territorial tax rates are noted below.
4. For small CCPCs, the net federal tax rate is levied on active business income above CAD 500,000; a federal rate of 10.5% (11% before 2016) applies to the first CAD 500,000 of active business income. Investment income (other than most dividends) of CCPCs is subject to the federal rate of 28%, in addition to a refundable federal tax of 10²/₃% (6²/₃% before 2016), for a total federal rate of 38²/₃% (34²/₃% before 2016).

Provincial/territorial income tax

All provinces and territories impose income tax on income allocable to a PE in the province or territory. Generally, income is allocated to a province or territory by using a two-factor formula based on gross revenue and on salaries and wages. Provincial and territorial income taxes are not deductible for federal income tax purposes. The rates given apply to 31 December 2016 year-ends and do not take into account provincial tax holidays, which reduce or eliminate tax in limited cases.

Province/territory	Income tax rate (%) (1, 2)
Alberta (3)	12.0
British Columbia	11.0
Manitoba	12.0
New Brunswick (4)	13.5
Newfoundland and Labrador (5)	15.0
Northwest Territories	11.5
Nova Scotia	16.0
Nunavut	12.0
Ontario (6)	11.5 or 10.0
Prince Edward Island	16.0
Quebec (7)	11.9
Saskatchewan (8)	12.0 or 10.0
Yukon territory	15.0 or 2.5

Notes

1. When two rates are indicated, the lower rate applies to manufacturing and processing income.
2. In all provinces and territories, the first CAD 500,000 (CAD 450,000 in Manitoba and CAD 350,000 in Nova Scotia) of active business income of a small CCPC is subject to reduced rates that range from 0% to 8%, depending on the jurisdiction.
3. Alberta's rate increased from 10% to 12% on 1 July 2015.
4. New Brunswick's rate increased from 12% to 14% on 1 April 2016.
5. On 1 January 2016, Newfoundland and Labrador's general rate increased from 14% to 15%, and its manufacturing and processing rate increased from 5% to 15%.
6. The lower Ontario rate applies to profits from manufacturing and processing, and from farming, mining, logging, and fishing operations, carried on in Canada and allocated to Ontario. Corporations subject to Ontario income tax may also be liable for corporate minimum tax (CMT) based on adjusted book income. The CMT is payable only to the extent that it exceeds the regular Ontario income tax liability. The CMT rate is 2.7% and applies when total assets are at least CAD 50 million and annual gross revenue is at least CAD 100 million on an associated basis.
7. Quebec's rate will decrease gradually from 11.9% in 2016 to 11.5% by 2020.
8. Saskatchewan's manufacturing and processing rate is as low as 10% (reduced from the 12% non-manufacturing and processing rate), depending on the extent to which the corporation's income is allocated to the province.

British Columbia Liquefied Natural Gas Income Tax Act

Enacted in November 2014, provincial legislation (referred to as the Liquefied Natural Gas Income Tax Act) introduces a new income tax, effective for taxation years beginning after 31 December 2016. The tax will apply to income from liquefaction activities at or in respect of a liquefied natural gas (LNG) facility located in British Columbia. This LNG income tax is in addition to federal and provincial income taxes.

Canada

The LNG income tax is a two-tier income tax, calculated as follows:

- Tier 1 tax rate of 1.5% applies on the net operating income (NOI), which is the taxpayer's profit or loss (with specific adjustments) less up to 100% of the net operating loss account, and less an investment allowance (the Tier 1 tax paid is added to a tax credit pool that can be used to reduce Tier 2 tax), and
- Tier 2 tax rate of 3.5% applies on the net income (NI), which is the NOI less up to 100% of the capital investment account (CIA) (the Tier 2 tax will not apply until the CIA is fully depleted and is reduced by the tax credit pool balance).

The Tier 2 tax rate of 3.5% applies for taxation years starting after 31 December 2016, and will increase to 5% for taxation years starting after 31 December 2036.

The provincial government also introduced a non-refundable Natural Gas Tax Credit under the British Columbia Income Tax Act. This credit is available to LNG taxpayers that have an establishment in British Columbia and may potentially reduce the effective provincial CIT rate to a minimum of 8% (from 11%). Any unused credit can be carried forward indefinitely.

Legislative amendments enacted in May 2015 further refine the LNG taxation regime by clarifying key defined terms and transfer pricing rules as well as amending administration and enforcement provisions, tax compliance requirements and assessments, penalties, offences, appeals, and anti-avoidance rules.

Corporate residence

Under the Income Tax Act, a corporation incorporated in Canada (federally or provincially/territorially) will be deemed to be resident in Canada. A corporation not incorporated in Canada will be considered to be resident in Canada under Canadian common law if its central management and control is exercised in Canada. Where a corporation's central management and control is exercised is a question of fact but typically is where the Board of Directors meets and makes decisions, provided the Board takes action.

A corporation incorporated in Canada or a corporation incorporated outside of Canada but with its central management and control situated in Canada will be deemed to be a non-resident of Canada if it qualifies as a non-resident of Canada under treaty tie-breaker rules.

A corporation incorporated in Canada will cease to be a Canadian resident if it is granted Articles of Continuance in a foreign jurisdiction or if it is a predecessor corporation in a cross-border amalgamation and the amalgamated corporation is a non-resident of Canada. Similarly, a foreign corporation will become resident in Canada if it is continued in Canada or is a predecessor corporation of an amalgamated corporation that is resident in Canada.

Permanent establishment (PE)

Canada's tax treaties generally provide that the business profits of a non-resident corporation are not subject to Canadian tax unless the non-resident corporation carries on business in Canada through a PE situated in Canada and the business profits are attributed to that PE. Canada's tax treaties may also restrict the imposition of branch tax to situations where the non-resident corporation carries on business in Canada through a PE situated in Canada and/or limit the applicable branch tax rate. While the wording of tax treaties varies, a PE generally is defined as:

- a fixed place of business through which the business of the non-resident corporation is wholly or partly carried on

- a place of management, a branch, an office, a factory, and a workshop; a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources; a building site, construction, or assembly project that exists for a specified period, and
- a dependent agent or employee who has and habitually exercises an authority to conclude contracts in the name of the non-resident corporation.

In some circumstances, a Canadian PE may also arise where services are rendered in Canada and certain requirements (e.g. relating to the duration of the services) are met.

The Canadian domestic definition of PE (federal and provincial/territorial) generally mirrors the above.

The interpretation of what constitutes a PE is expected to be re-evaluated in light of the final report issued in 2015 by the OECD and G20 on Action 7, which is focused on preventing the artificial avoidance of PE status.

Other taxes

Consumption taxes

Federal goods and services tax (GST)

The federal GST is levied at a rate of 5%. It is a value-added tax (VAT) applied at each level in the manufacturing and marketing chain and applies to most goods and services. However, the tax does not apply to zero-rated goods, such as exports and basic groceries, or to tax-exempt supplies, such as health care, educational services, and certain services provided by financial institutions.

Generally, businesses pay GST on their purchases and charge GST on their sales, and remit the net amount (i.e. the difference between the GST collected and the input tax credit for the tax paid on purchases). Suppliers are entitled to claim input tax credits for the GST paid on expenses incurred relating to their supplies of standard-rated and zero-rated goods and services, but not on expenses relating to the making of tax-exempt supplies.

Harmonised sales tax (HST)

Five provinces have fully harmonised their sales tax systems with the GST and impose a single HST. The HST includes the 5% GST and a provincial sales tax (PST) component. It is imposed on essentially the same base as the GST. HST rates follow.

Province	HST rate (%)
New Brunswick (1)	13
Newfoundland and Labrador (1)	13
Nova Scotia	15
Ontario	13
Prince Edward Island (1)	14

Notes

1. The HST rate will increase to 15%:
 - in New Brunswick and Newfoundland and Labrador on 1 July 2016, and
 - in Prince Edward Island on 1 October 2016.

Retail sales tax

British Columbia, Manitoba, and Saskatchewan each levy a retail sales tax at 7%, 8% (7% after 30 June 2023), and 5%, respectively, on most purchases of tangible personal property for consumption or use in the province and on the purchase of specific services.

Canada

Quebec's sales tax is structured in the same manner as the GST and applies to most goods and services that are subject to the GST. The Quebec sales tax (QST) rate is 9.975%, resulting in an effective combined QST and GST rate of 14.975% (i.e. 9.975% provincial component plus the 5% GST). Quebec administers the GST in that province.

Neither Alberta nor the three territories (the Northwest Territories, Nunavut, and the Yukon) impose a retail sales tax. However, the GST applies in those jurisdictions.

Customs and import duties

Customs tariffs (also known as duties) are tariffs or taxes levied on goods imported into Canada. The amount of customs duties that applies to imported goods depends on a number of factors, including the nature of the duties (i.e. *ad valorem* or specific), tariff classification, country of origin, and value for duty declared. The Tariff Schedule to the Customs Tariff, which is based on the World Customs Organization's Harmonized Commodity Description and Coding System, sets out the customs duty rates for goods imported into Canada. Goods that originate from most countries with which Canada does not have a free trade agreement (FTA) or other preferential tariff arrangement will generally attract the 'Most Favoured Nation' (MFN) duty rate or tariff treatment.

Canada has 11 FTAs currently in force. Canada's major FTA is the North American Free Trade Agreement (NAFTA), which applies to goods imported from both the United States (US) and Mexico. Most goods that originate in the NAFTA territory and qualify as originating for NAFTA are eligible for duty-free treatment (exceptions apply) when imported into Canada from the other NAFTA partner. Canada's other FTAs are with Chile, Colombia, Costa Rica, the European Free Trade Association (which includes Iceland, Liechtenstein, Norway, and Switzerland), Honduras, Israel, Jordan, the Republic of Korea, Panama, and Peru. Under these FTAs, the countries may be eligible for reduced tariff benefits at rates more favourable than the MFN rate. Most imports are tariff-free or scheduled for reduction to tariff-free status after a tariff phase-out period under the specific FTA (certain exceptions apply).

Canada has concluded, but has not yet implemented, three additional FTAs as follows:

- The Trans-Pacific Partnership (TPP) Agreement.
- Canada and the European Union (EU) Comprehensive Economic and Trade Agreement (CETA).
- The Canada-Ukraine FTA (CUFTA).

The TPP Agreement was signed in February 2016 by all 12 TPP members (Australia, Brunei, Canada, Chile, Japan, Malaysia, Mexico, New Zealand, Peru, Singapore, Vietnam and the United States). The TPP will require ratification by all TPP members before it enters into force. The CETA also requires ratification by both Canada and the EU members before it enters into force, as does the CUFTA.

Canada is currently in negotiations with several other countries (e.g. Japan and India). Like the NAFTA, these FTAs set out rules of origin for determining whether goods are eligible for preferential tariff treatment, among other things.

Canada also extends preferential tariff rates to many (but not all) products imported from certain countries via the General Preferential Tariff (GPT), the Least Developed Countries Tariff (LDCT), the Commonwealth Caribbean Countries Tariff (CCCT), the Australia Tariff (AUT), and the New Zealand Tariff (NZT). On 1 January 2015, beneficial GPT tariff treatment was withdrawn from 72 countries, including China, Hong Kong, and Thailand. To qualify for preferential tariff rates, goods must meet various requirements with respect to the rules of origin and transshipment, among other things.

Other import duties and levies

Importations into Canada may also be subject, in certain cases, to anti-dumping duties and/or countervailing duties, excise duties, and excise taxes. In limited circumstances, Canada may also impose a surtax on certain imports. A surtax is a duty imposed by an Order in Council (a decision by the federal government) to address certain issues (e.g. to enforce Canada's rights under a trade agreement or to respond to acts by the government of a country that adversely affect trade in Canadian goods or services). If the goods to which the surtax applies are already dutiable, it is an extra duty. The Order in Council will set out the amount of the surtax, the goods to which it applies, and typically its duration.

Excise taxes and duties

Excise duties are levied at various rates on spirits, wine, beer, malt liquor, and tobacco products manufactured in Canada.

Excise tax is imposed on petroleum products and automobiles. In addition, a 10% federal excise tax is imposed on insurance against a risk in Canada if it is placed by insurers through brokers or agents outside Canada or with an insurer that is not authorised under Canadian or provincial/territorial law to transact the business of insurance. Certain premiums are exempt, including those for life, personal accident, marine, and sickness insurance.

Property taxes

Property taxes are levied by municipalities in Canada on the estimated market value of real property within their boundaries and by provinces and territories on land not in a municipality. In most provinces and territories, a general property tax is levied on the owner of the property. Some municipalities levy a separate business tax, which is payable by the occupant if the premises are used for business purposes. These taxes are based on the rental value of the property at tax rates that are set each year by the various municipalities. School taxes, also generally based on the value of real property, are levied by local and regional school boards or the province or territory.

Land transfer tax

All provinces and territories levy a land transfer tax or registration fee on the purchaser of real property within their boundaries. These levies are expressed as a percentage, in most cases on a sliding scale, of the sale price or the assessed value of the property sold and are generally payable at the time title to the property is registered. Rates generally range from 0.02% to 3%, depending on the province or territory, but may be higher if the purchaser is a non-resident. Some exemptions (or refunds) are available. Additional land transfer taxes apply for properties purchased in the municipalities of Montreal or Toronto. Other municipalities may also impose these taxes and fees.

Federal capital taxes

The federal government does not levy a general capital tax. It imposes the Financial Institutions Capital Tax (Part VI Tax) on banks, trust and loan corporations, and life insurance companies at a rate of 1.25% when taxable capital employed in Canada exceeds CAD 1 billion. The threshold is shared among related financial institutions. The tax is not deductible in computing income for tax purposes. It is reduced by the corporation's federal income tax liability. Any unused federal income tax liability can be applied to reduce Part VI Tax for the previous three and the next seven years. In effect, the tax constitutes a minimum tax on financial institutions.

Provincial capital taxes

The provinces do not levy a general capital tax, but most do impose a capital tax on financial institutions. Capital taxes are deductible for federal income tax purposes. The federal government had proposed to limit the deductibility of capital taxes, but has delayed implementing this proposal indefinitely. The territories do not impose capital taxes.

Canada

Provincial capital taxes on financial institutions are imposed at the following rates for 31 December 2016 year-ends. Certain exemptions and reduced rates apply.

Province	Banks, trust and loan corporations (%)
Alberta	-
British Columbia	-
Manitoba (1)	6
New Brunswick (2)	4 or 4.75
Newfoundland and Labrador (3)	6
Nova Scotia (4)	4
Ontario	-
Prince Edward Island	5
Quebec (5)	-
Saskatchewan (6)	3.25

Notes

1. Financial institutions in Manitoba with taxable paid up capital under CAD 4 billion are not subject to capital tax.
2. New Brunswick's capital tax rate for banks increased from 4% to 5% on 1 April 2016, resulting in a 4.75% rate for banks with 31 December 2016 year-ends. The rate remains 4% for other financial institutions.
3. Newfoundland and Labrador's capital tax rate increased from 4% to 5% on 1 April 2015, and to 6% on 1 January 2016.
4. The maximum capital tax payable by financial institutions in Nova Scotia is CAD 12 million annually.
5. Quebec applies a compensation tax of 4.48% (2.8% after 31 March 2017; nil after 31 March 2019) on payroll.
6. Saskatchewan's rate for financial institutions that have taxable PUC of CAD 1.5 billion or less is 0.7%. Financial institutions that qualified for the 0.7% capital tax rate in taxation years ending after 31 October 2008 and before 1 November 2009 are subject to a 0.7% capital tax rate on their first CAD 1.5 billion of taxable capital and a 3.25% capital tax rate on taxable capital exceeding CAD 1.5 billion.

Additional taxes on insurers

All provinces and territories impose a premium tax ranging from 2% to 4.4% (5% after 30 June 2016) on insurance companies (both life and non-life). In addition, Ontario and Quebec impose a capital tax on life insurance companies. Quebec also levies a compensation tax on insurance premiums at a rate of 0.48% (0.3% after 31 March 2017; nil after 31 March 2019).

Part III.1 tax on excess designations

Federal Part III.1 tax applies at a 20% or 30% rate if, during the year, a CCPC designated as eligible dividends an amount that exceeds its general rate income pool (GRIP), or a non-CCPC pays an eligible dividend when it has a positive balance in its low rate income pool (LRIP). A corporation subject to Part III.1 tax at the 20% rate (i.e. the excess designation was inadvertent) can elect, with shareholder concurrence, to treat all or part of the excess designation as a separate non-eligible dividend, in which case Part III.1 tax will not apply to the amount that is the subject of the election.

Eligible dividends are designated as such by the payor and include dividends paid by:

- public corporations, or other corporations that are not CCPCs, that are resident in Canada and are subject to the federal general CIT rate (i.e. 15% in 2016), or
- CCPCs, to the extent that the CCPC's income is:
 - not investment income (other than eligible dividends from public corporations), and
 - subject to the general federal CIT rate (i.e. the income is active business income not subject to the federal small business rate).

Non-eligible dividends include dividends paid out of either income eligible for the federal small business rate or a CCPC's investment income (other than eligible dividends received from public companies).

Payroll taxes

Social security taxes

For 2016, employers are required to pay, for each employee, government pension plan contributions up to CAD 2,544.30 and employment insurance premiums up to CAD 1,337.06. However, Quebec employers instead contribute, per employee, a maximum of CAD 2,737.05 in Quebec government pension plan contributions, CAD 1,081.02 in employment insurance premiums, and CAD 548.41 to a Quebec parental insurance plan.

Ontario retirement pension plan (ORPP)

Under the provincial ORPP, employers and employees that do not already participate in a 'comparable pension plan' will each be required to contribute up to 1.9% on a maximum annual earnings of CAD 90,000 (reduced by a CAD 3,500 basic earnings exemption, for maximum annual contributions of about CAD 1,644 each). Contributions would be phased in, starting 2018, reaching 1.9% by 2021 (or earlier). Benefits would be paid starting in 2022 and would aim to provide an annual pension of 15% of an individual's earnings, up to CAD 90,000 (maximum annual pension of CAD 12,815). Amounts are in 2017 dollars and will be indexed.

Provincial/territorial payroll taxes

Employers in Manitoba, Newfoundland and Labrador, Ontario, and Quebec are subject to payroll tax. Maximum rates range from 1.95% to 4.3%. In addition, Quebec employers with payroll of at least CAD 2 million must allot 1% of payroll to training or to a provincial fund. Employers in the Northwest Territories and Nunavut must deduct from employees' salaries a payroll tax equal to 2% of employment earnings.

Withholding tax for non-resident employees

Under Regulation 102 of the Income Tax Act, employers (whether a resident of Canada or not) that pay salaries or wages or other remuneration to a non-resident of Canada in respect of employment services rendered in Canada are required to withhold tax unless a waiver has been received prior to payment. There are no '*de minimis*' exceptions, and this requirement applies regardless of whether the employee in question will actually be liable for Canadian income tax on that salary. Complying is time-consuming and administratively burdensome.

However, effective 1 January 2016, draft legislation provides an exemption from the Regulation 102 withholding requirement on an amount paid by a 'qualifying non-resident employer' to a 'qualifying non-resident employee'.

Generally, a 'qualifying non-resident employer' must meet the following two conditions:

- Is resident in a country with which Canada has a tax treaty (treaty country).
- Is at that time certified by the Minister.

A 'qualifying non-resident employee' must meet the following three conditions:

- Is resident in a treaty country.
- Is exempt from Canadian income tax under a tax treaty.
- Either:
 - is present in Canada for less than 90 days in any 12-month period that includes the time of payment, or
 - works in Canada for less than 45 days in the calendar year that includes the time of payment.

Canada

To become certified, a non-resident employer must file Form RC473 (Application for Non-Resident Employer Certification) with the CRA. Certification is valid for two calendar years (at which time employers must submit a new Form RC473), subject to revocation if the employer fails to meet the conditions or to comply with its Canadian tax obligations.

The conditions to maintain non-resident employer certification include:

- Track and record, on a proactive basis, the number of days each qualifying non-resident employee is either working in Canada or present in Canada, and the income attributable to these days.
- Evaluate and determine whether its employees meet the conditions of a 'qualifying non-resident employee'.
- Obtain a Canadian Business Number.
- Complete and file the annual T4 Summary and slips, if required.
- File the applicable Canadian CIT returns if the corporation is 'carrying on business in Canada'.
- Upon request, make its books and records available to the CRA for inspection.

Branch income

A non-resident corporation will be subject to income tax at normal corporate rates on profits derived from carrying on a business in Canada. However, Canada's tax treaties generally restrict taxation of a non-resident's business income to the portion allocable to a PE situated in Canada.

In addition, a special 25% 'branch tax' applies to a non-resident's after-tax profits that are not invested in qualifying property in Canada. The branch tax essentially is equivalent to a non-resident WHT on funds repatriated to the foreign head office. In the case of a corporation resident in a treaty country, the rate at which the branch tax is levied may be reduced to the WHT rate on dividends prescribed in the relevant tax treaty (generally 5%, 10%, or 15%). Some of Canada's treaties prohibit the imposition of branch tax or provide that branch tax is payable only on earnings in excess of a threshold amount. The branch tax does not apply to transportation, communications, and iron-ore mining companies. Nor does it apply to non-resident insurers, except in special circumstances.

Whether or not a treaty applies, a non-resident corporation that has a PE in Canada may be subject to federal and provincial capital taxes (i.e. financial institutions only). See *the Other taxes section*.

Income determination

Inventory valuation

In most cases, all property included in inventory can be valued at FMV, or each item can be valued at its cost or FMV, whichever is lower. Most well-established and reasonable approaches to inventory costing can be used for tax purposes, except for the last in first out (LIFO) method. Conformity between methods used for book and tax reporting is not mandatory, but the method chosen should be used consistently for tax purposes. Inventory must be valued at the commencement of the year at the same amount as at the end of the immediately preceding year.

Valuation of derivatives

A recent Tax Court of Canada decision held that a derivative that provides rights to a taxpayer and is held on income account would be considered inventory. Accordingly, derivatives held on income account that are neither mark-to-market property (not

considered inventory) nor property of a business that is an adventure or concern in the nature of trade (must be valued at cost) could qualify for the lower of cost and market method under the inventory valuation rules. Using this method can lead to significant tax base concerns because derivatives potentially are more volatile and are held longer than conventional inventory. As a result, the 2016 federal budget provides that derivatives entered into after 21 March 2016:

- will be excluded from the inventory valuation rules, but will maintain their status as inventory, and
- cannot be valued at the lower of cost and FMV when computing income for tax purposes.

Capital gains

Half of a capital gain constitutes a taxable capital gain, which is included in the corporation's income and taxed at ordinary rates. Capital losses are deductible, but generally only against capital gains. Any excess of allowable capital losses over taxable capital gains in the current year can be carried back three years and carried forward indefinitely, to be applied against net taxable capital gains from those years, except in the case of an acquisition of control. No holding period is required. Intent is a major factor in determining whether the gain or loss is income or capital in nature.

Non-resident corporations are subject to CIT on taxable capital gains (50% of capital gains less 50% of capital losses) arising on the disposition of taxable Canadian property. Taxable Canadian property of a taxpayer includes, among other things:

- Real estate situated in Canada.
- Both capital and non-capital property used in carrying on a business in Canada.
- In general, shares in a corporation that are listed on a stock exchange if, at any time in the preceding 60 months:
 - 25% or more of the shares of the corporation are owned by the taxpayer or persons related to the taxpayer, and
 - more than 50% of the FMV of the shares is derived from real property situated in Canada, Canadian resource properties, and timber resource properties.
- In general, shares in a corporation that are not listed on a stock exchange if, at any time in the preceding 60 months, more than 50% of the FMV of the shares is derived, directly or indirectly, from property similar to that described above for shares of a public corporation.

However, in specific situations, the disposition by a non-resident of a share or other interest that is not described above may be subject to Canadian tax (e.g. when a share is deemed to be taxable Canadian property).

The general requirement is that a non-resident vendor of taxable Canadian property must report the disposition to the CRA and obtain a clearance certificate in respect of the disposition. If no certificate is obtained, the purchaser is required to withhold and remit to the CRA 25% of the sales proceeds.

Relief from the reporting and 25% withholding requirements may be available if specified conditions are met (e.g. if the gain from the disposition is not taxable in Canada by virtue of a tax treaty Canada has with another country). However, if the parties to the transaction are related, relief is available only if the CRA is notified.

Dividend income

Dividends received by one Canadian corporation from another Canadian corporation generally can be deducted in full when determining taxable income. However, dividends received by a 'specified financial institution' on certain preferred shares are an important exception and are taxed at full corporate rates.

Canada

Dividends on most preferred shares are subject to a 10% tax in the hands of a corporate recipient, unless the payer elects to pay a 40% tax (instead of a 25% tax) on the dividends paid. The payer can offset the tax against its income tax liability. The tax is not imposed on the first CAD 500,000 of taxable preferred-share dividends paid in a taxation year. Nor does it apply to dividends paid to a shareholder with a 'substantial interest' in the payer (i.e. at least 25% of the votes and value).

Dividends received by private corporations (or public corporations controlled by one or more individuals) from Canadian corporations are subject to a special refundable tax of 38 $\frac{1}{3}$ % (33 $\frac{1}{3}$ % for dividends received before 2016). The tax is not imposed if the recipient is connected to the payer (i.e. the recipient owns more than a 10% interest in the payer) unless the payer was entitled to a refund of tax in respect of the dividend. When the recipient pays dividends to its shareholders, the tax is refundable at a rate of 38 $\frac{1}{3}$ % of taxable dividends paid (33 $\frac{1}{3}$ % of taxable dividends paid for taxation years ending before 1 January 2016 [pro-rated for taxation years straddling this date]).

Stock dividends

If the payer is resident in Canada, stock dividends are treated for tax purposes in the same manner as cash dividends. The taxable amount of a stock dividend is the increase in the PUC of the payer corporation because of the payment of the dividend. Stock dividends received from a non-resident are exempt from this treatment. Instead, the shares received have a cost base of zero.

Avoidance of corporate capital gains

Section 55 of the Income Tax Act contains an anti-avoidance rule that generally taxes as capital gains certain otherwise tax-deductible, inter-corporate dividends in certain situations. Stemming from a Tax Court of Canada decision that involved the creation of an unrealised capital loss that was used to avoid capital gains tax on the sale of another property, draft legislation amends section 55 to ensure that it applies when one of the purposes for a dividend is to effect a significant reduction in the FMV of any share or significant increase in the total cost of properties of the dividend recipient. Other related rules are also proposed to ensure this amendment is not circumvented. The proposals apply to dividends received after 20 April 2015.

Synthetic equity arrangements

For dividends that are paid or become payable after April 2017 (after October 2015 for agreements or arrangements generally entered into, acquired, extended, renewed, or modified after 21 April 2015), draft legislation modifies the dividend rental arrangement rules to deny the inter-corporate dividend deduction on dividends received by a taxpayer on a Canadian share in respect of which there is a synthetic equity arrangement.

A synthetic equity arrangement, in respect of a share owned by a taxpayer, will be considered to exist when the taxpayer (or a person that does not deal at arm's length with the taxpayer) enters into one or more agreements that have the effect of providing to a counterparty all or substantially all of the risk of loss and opportunity for gain or profit in respect of the share.

When a person that does not deal at arm's length with the taxpayer enters into such an agreement, a synthetic equity arrangement will be considered to exist if it is reasonable to conclude that the non-arm's length person knew, or ought to have known, that the effect described above would result. An exception to the revised rule will apply, in general terms, when the taxpayer can establish that no 'tax-indifferent investor' (including tax-exempt Canadian entities and certain trusts, partnerships, and non-resident entities) is a counterparty. Certain other exceptions are provided.

Interest income

Interest that accrued, became receivable by, or was received by a corporation is taxable as income from a business or property.

Rental income

Rents received by a corporation are taxable as income from a business or property.

Royalty income

Royalties received by a corporation are taxable as income from a business or property.

Foreign exchange gains and losses

The foreign exchange gains and losses of a Canadian taxpayer that arise from business transactions (i.e. on income account), including the activities of a branch operation, are generally fully includable in income or fully deductible. Any method that is in accordance with generally accepted accounting principles (GAAP) may be used to determine foreign exchange gains or losses on income transactions, provided that the treatment is consistent with previous years and conforms to the accrual method of accounting.

A foreign exchange gain or loss that is on capital account is treated the same as any other capital gain or loss. The accrual method of accounting cannot be used for purposes of reporting gains or losses on capital account. This follows from the CRA's view that a taxpayer has not made a capital gain or sustained a capital loss in a foreign currency until a transaction has taken place. Therefore, paper gains and losses are disregarded.

Debt parking to avoid foreign exchange gains

To avoid realising a foreign exchange gain on the repayment of a foreign currency debt, some taxpayers have entered into debt-parking transactions. As a result, the 2016 federal budget introduces rules that require any accrued foreign exchange gain on foreign currency debt to be realised when the debt becomes a parked obligation, generally for debt that becomes a parked obligation after 21 March 2016. The debtor will be deemed to have a gain, if any, that it otherwise would have if it had paid an amount (expressed in the currency in which the debt is denominated) to satisfy the principal amount of the debt equal to:

- when the debt becomes a parked obligation as a result of it being acquired by the current holder, the amount for which the debt was acquired, and
- in other cases, the FMV of the debt.

A foreign currency debt will become a parked obligation if:

- at that time, the current holder of the debt does not deal at arm's length with the debtor or, when the debtor is a corporation, has a significant interest (i.e. together with non-arm's length persons, 25% or more of the votes or value) in the corporation, and
- at any previous time, a person who held the debt dealt at arm's length with the debtor and, when the debtor is a corporation, did not have a significant interest in the corporation.

Exceptions will apply to certain *bona fide* commercial transactions, and related rules will provide relief to financially distressed debtors.

Partnership income

For Canadian tax purposes, a partnership is treated as a conduit, and the partners are taxed on their share of the partnership income, whether or not distributed.

A corporation is not restricted from being a member of a partnership. Income is determined at the partnership level and then allocated among the partners according to the terms of the partnership agreement. However, certain deductions, such as depletion allowances, exploration and development expenses, and donations, will flow through to be deducted by the various partners directly, as will any foreign tax credits, dividend tax credits, or investment tax credits (ITCs). Partners generally may deduct expenses

Canada

incurred directly, such as interest on borrowings to acquire partnership interests, in computing income from the partnership.

Corporate partners are generally prevented from deferring taxation on partnership income in respect of partnerships in which they (together with related parties) hold an interest greater than 10% (share of income or entitlement to assets); income from these partnerships must be accrued up to the end of the corporation's taxation year. The accrual is based on the partnership income for the fiscal period ending in the corporation's taxation year (the 'formulaic amount'), unless a lower amount is designated by the partner. Penalties can apply if the designated amount reported is less than both the formulaic amount and the actual prorated income of the subsequent partnership fiscal period. Upon request, permission to change the partnership's fiscal period may be granted. Partnerships in multi-tier structures must adopt the same fiscal period (generally, 31 December).

Joint venture income

An unincorporated joint venture is not recognised as a separate legal entity, and no specific statutory rules govern the taxation of a joint venture in Canada. However, many business arrangements that are set up as joint ventures may be considered partnerships, and treated as such for Canadian tax purposes. Whether a partnership exists in a particular situation is a legal question based on the specific facts and circumstances.

Consistent with the partnership anti-deferral rules (*discussed in Partnership income above*), corporate participants must report their actual share of joint venture income or loss up to the end of their own year-end.

Non-resident trusts (NRTs) and offshore investment funds

An NRT will generally be deemed to be resident for Canadian tax purposes if (i) it has Canadian resident contributors or (ii) certain former Canadian residents have contributed to an NRT that has Canadian resident beneficiaries. However, an election can be filed to deem the creation of a separate notional trust for tax purposes, referred to as a 'non-resident portion trust'. Canadian tax will apply only to the income or gains from the properties held by the trust that are not included in the non-resident portion trust. Properties included in the non-resident portion trust are those properties that have not been directly or indirectly contributed by a Canadian resident or certain former Canadian residents (or property substituted for those properties or income derived from those properties). Many direct or indirect transfers or loans of property or services can be deemed to be contributions to an NRT.

An NRT is deemed to be resident in Canada if a Canadian-resident taxpayer transfers or lends property to the trust (regardless of the consideration received) and the property held by the trust may revert to the taxpayer, pass to persons to be determined by the taxpayer, or be disposed of only with the taxpayer's consent.

The offshore investment fund rules affect Canadian residents that have an interest as a beneficiary in these funds. If these rules apply, the taxpayer will be required to include in its income an amount generally determined as the taxpayer's cost of the investment multiplied by a prescribed income percentage (i.e. the prescribed rate of interest plus 2%) less any income received from the investment. Also, for certain non-discretionary trust funds in which a Canadian-resident person, and persons that do not deal at arm's length with the person, have interests in aggregate of 10% or more of the total FMV of the total interests in the trusts, the trust is deemed to be a controlled foreign affiliate of the Canadian beneficiary and is thereby subject to the Canadian foreign accrual property income (FAPI) rules (*discussed below*).

Earnings of specified investment flow-throughs (SIFTs)

Certain earnings of SIFTs (i.e. publicly traded income trusts and partnerships) are subject to a SIFT tax and are deemed to be a dividend when distributed. The rules are

intended to discourage corporations from converting to income trusts. The rules do not apply to Real Estate Investment Trusts (REITs) that meet certain conditions.

Foreign income

Canadian resident corporations are subject to Canadian federal income taxes on worldwide income, including income derived directly from carrying on business in a foreign country, as earned. In addition, Canadian resident corporations may be taxable currently on certain passive and active income earned by foreign subsidiaries and other foreign entities. Relief from double taxation is provided through Canada's international tax treaties, as well as foreign tax credits and deductions for foreign income or profits taxes paid on income derived from non-Canadian sources.

Foreign investment income earned directly by Canadian resident corporations, other than dividends, is taxed as earned, with a non-business foreign tax credit and a deduction for foreign income or profits taxes available, subject to certain limitations. Dividends received by Canadian resident private corporations (or public corporations controlled by one or more individuals) from non-connected foreign corporations are subject to the special refundable tax of $38\frac{1}{3}\%$ ($33\frac{1}{3}\%$ for dividends received before 2016) (*see above*), to the extent that the dividends are deductible in determining taxable income.

The tax treatment of foreign dividends received by a Canadian resident corporation will depend on whether the payer corporation is a foreign affiliate of the recipient. Dividends received by a Canadian resident corporation from foreign corporations that are not foreign affiliates are taxed when received, with a non-business foreign tax credit and a deduction for foreign income or profits taxes available, subject to certain conditions. Dividends received by a Canadian resident corporation from foreign affiliates may be permitted to flow tax-free, subject to certain limitations pertaining to the nature of the earnings from which the dividends were paid, the foreign income or profits taxes paid, and WHTs paid in respect thereof.

22 Tax Information Exchange Agreements (TIEAs) have entered into force (one on behalf of five jurisdictions), one has been signed (but not yet in force), and Canada is currently negotiating seven other TIEAs. To encourage non-treaty countries to enter into TIEAs:

- an exemption is available for dividends received by a Canadian resident corporation from the active business earnings of its foreign affiliates resident and carrying on their active business operations in non-treaty countries that have entered into a TIEA with Canada, and
- active business income earned by foreign affiliates in non-TIEA, non-treaty countries that have not signed the Convention on Mutual Administrative Assistance in Tax Matters will be treated as FAPI, which is taxable to the relevant Canadian resident corporation on an accrual basis, if a TIEA with Canada is not concluded within a specified period from a written request to commence negotiations or from the commencement of negotiations.

See Controlled foreign affiliates and foreign accrual property income (FAPI) in the Group taxation section for a discussion on foreign affiliates, controlled foreign affiliates, and FAPI.

Shareholder loan rules

Non-resident controlled Canadian corporations are permitted to make certain loans to foreign parent companies or related non-resident companies without being subject to the deemed dividend WHT if appropriate elections are filed. The election may be filed on a loan-by-loan basis, and the Canadian corporation must then include in income interest at a prescribed rate (currently, approximately 5%). The legislation also applies to loans made by, or to, certain partnerships.

Canada

The 2016 federal budget amends the shareholder loan rules to include rules that are similar to the existing back-to-back loan rules, except that the proposed rules will apply to debts owing to Canadian-resident corporations rather than debts owing by Canadian-resident taxpayers, for back-to-back shareholder loan arrangements as of 22 March 2016, and that are in place on that date. A back-to-back shareholder loan arrangement will be considered to exist when an ‘intermediary’ that is not connected with the shareholder:

- is owed an amount by the shareholder (the shareholder debt), and
- owes an amount to the Canadian corporation or has a specified right (as defined) relating to a particular property, and

this obligation or property is linked to the shareholder debt (certain conditions must be met).

If the rules apply to the debt owing by a shareholder of a Canadian-resident corporation, the shareholder will be deemed to be indebted directly to the corporation.

Cross-border surplus stripping

Section 212.1 of the Income Tax Act contains an ‘anti-surplus-stripping’ rule that applies when a non-resident person (or designated partnership) disposes of its shares in a corporation resident in Canada (the subject corporation) to another corporation resident in Canada (the purchaser corporation) with which the non-resident person does not deal at arm’s length. The rule is intended to prevent the tax-free receipt by the non-resident person of distributions in excess of the PUC of its shares in the subject corporation and an artificial increase in the PUC of such shares. This rule results in a deemed dividend to the non-resident person or a suppression of the PUC of the shares that would otherwise have been increased as a result of the transaction.

An exception to the anti-surplus-stripping rule ensures the rule does not apply when a non-resident corporation is ‘sandwiched’ between two Canadian corporations and the non-resident corporation disposes of the shares of the lower-tier Canadian corporation to the Canadian parent corporation to unwind the structure.

Some non-resident corporations with Canadian subsidiaries have used this exception by reorganising the group into a sandwich structure to qualify for this exception in a manner that increases the PUC of the shares of those Canadian subsidiaries. As a result, the 2016 federal budget amends this exception, for dispositions occurring after 21 March 2016, to ensure that this exception does not apply when a non-resident corporation:

- owns, directly or indirectly, shares of the Canadian purchaser corporation, and
- does not deal at arm’s length with the Canadian purchaser corporation.

The government will also continue to challenge, under other provisions (including the general anti-avoidance rule), certain transactions undertaken before 22 March 2016 if in its view the taxpayer has inappropriately relied on the exception to the anti-surplus stripping rule.

‘Foreign affiliate dumping’ rules

Transactions described as ‘foreign affiliate dumping’ involve an investment in a foreign affiliate by a corporation resident in Canada (CRIC) that is controlled by a non-resident of Canada. When these rules apply, a dividend will be deemed to have been paid by the CRIC to its foreign parent to the extent of any non-share consideration given by the CRIC for the ‘investment’ in the foreign affiliate, and any increase in the PUC pertaining to the investment will be denied. The rules define ‘investment’ broadly to include:

- an acquisition of shares in or a contribution of capital to the foreign affiliate

- an indirect acquisition by the CRIC of shares of the foreign affiliate that results from a direct acquisition by the CRIC of the shares of another corporation resident in Canada if the total FMV of all of the shares that are held, directly or indirectly, by the other corporation and are shares of foreign affiliates held by the other corporation exceeds 75% of the total FMV of all properties owned by the other corporation
- transactions where the foreign affiliate becomes indebted to the CRIC (or a related Canadian company), and
- an acquisition of certain options in shares or debt of the foreign affiliate.

Any deemed dividend is automatically reduced to the extent of available PUC following the PUC offset rules (subject to compliance requirements), and any remainder will be subject to Canadian WHT (as reduced by the applicable treaty).

Captive insurance

For taxation years beginning after 10 February 2014, an anti-avoidance rule in the FAPI regime intended to prevent Canadian taxpayers from shifting income from the insurance of Canadian risks offshore is clarified to ensure it applies to certain tax planning arrangements sometimes referred to as ‘insurance swaps’ (the 2014 enacted legislation). If the anti-avoidance rule applies, the foreign affiliate’s income from the insurance of the foreign risks and any income from a connected agreement or arrangement will be included in computing its FAPI.

Draft legislation further amends this anti-avoidance rule to curtail alternative arrangements that are intended to achieve tax benefits similar to those that the 2014 enacted legislation was intended to prevent. For taxation years that begin after 20 April 2015:

- a foreign affiliate’s income in respect of the ceding of Canadian risks is included in computing the affiliate’s FAPI, and
- if a foreign affiliate cedes Canadian risks and receives as consideration a portfolio of insured foreign risks, the affiliate is considered to have earned FAPI in respect of the ceding of the Canadian risks in an amount equal to the difference between the FMV of the Canadian risks ceded and the affiliate’s costs in respect of having acquired those Canadian risks.

Emissions trading regimes

Under emissions trading regimes, regulated emitters must deliver emissions allowances to the government. These allowances may be purchased by emitters, earned in emissions reduction activities, or provided by the government at a reduced price or no cost. Currently, no specific tax rules deal with emissions trading regimes. The 2016 federal budget introduces specific rules to clarify the tax treatment of emissions allowances and to eliminate the double taxation of certain free allowances, for emissions allowances acquired generally in taxation years beginning after 2016. Specifically, emissions allowances will be treated as inventory for all taxpayers; however, the ‘lower of cost and market’ method cannot be used to value the inventory.

If a free allowance is received, there will be no income inclusion on receipt of the allowance. In addition, the deduction for an accrued emissions obligation will be limited to the extent that the obligation exceeds the cost of any emissions allowances that the taxpayer has acquired and that can be used to settle the obligation. If a deduction is claimed in respect of an emissions obligation that accrues in one year (e.g. 2017) and that will be satisfied in a future year (e.g. 2018), the amount of this deduction will be brought back into income in the subsequent year (2018) and the taxpayer will be required to evaluate the deductible obligation again each year, until it is ultimately satisfied.

Canada

If a taxpayer disposes of an emissions allowance otherwise than under the emissions allowance regime, any proceeds received in excess of the taxpayer's cost, if any, for the allowance will be included in computing income.

Deductions

Business expenses that are reasonable and paid out to earn income are deductible for income tax purposes unless disallowed by a specific provision in the Income Tax Act. Some expenses are deductible subject to limitation (e.g. charitable donations, entertainment expenses, and the cost of providing an automobile to employees). Deduction of capital expenditures is specifically prohibited, but special provisions may allow depreciation or amortisation of these expenditures.

Because Canadian corporations are taxable on worldwide income, there are no territorial limits on the deductibility of related expenses. Payments to affiliates are deductible if they reflect arm's-length charges. Transfers of losses and other deductions between unrelated corporate taxpayers are severely limited after an acquisition of control.

Depreciation and amortisation

Depreciation for tax purposes (capital cost allowance) is generally computed on a pool basis, with only a few separate classes (pools) of property. Annual allowances are generally determined by applying a prescribed rate to each class on the declining-balance basis. For example, the prescribed annual rate is 20% on most furniture and fixtures, 30% on automotive equipment, and 4% to 10% on most buildings. In the year of acquisition, only half of the amount otherwise allowable may be claimed on most classes of property.

Generally, capital cost allowance (CCA) may not be claimed until the taxation year the property is available for use. The taxpayer can claim any amount of CCA up to the maximum. CCA previously claimed may be recaptured if assets are sold for proceeds that exceed the undepreciated cost of the class. Temporary incentives to accelerate depreciation for eligible manufacturing and processing machinery and equipment acquired after 2015 and before 2026 revise the rate and/or method to 50% declining-balance (from 50% straight-line before 2016 and after 18 March 2007, and 30% declining-balance before 19 March 2007).

Eligible capital property (ECP)

Three-quarters of capital expenditures for goodwill and certain other intangible properties are included in a cumulative eligible capital (CEC) pool and can be amortised at a maximum annual rate of 7%, on a declining-balance basis. A portion of proceeds may be taxable as recapture or as a gain on disposition.

Starting 1 January 2017, the 2016 federal budget repeals the ECP regime and replaces it with a new CCA pool, Class 14.1. Transitional rules will apply. 100% of eligible capital expenditures will be included in Class 14.1 and subject to a 5% declining-balance CCA rate. The rules that apply to depreciable property, such as the 'half-year rule', recapture, and capital gains, will apply to the properties included in Class 14.1.

Special rules will apply to expenditures that do not relate to a specific property of a business. Every business will be considered to have goodwill associated to it (even if no expenditures on goodwill have been made). Expenditures that do not relate to a particular property will increase the capital cost of the goodwill of the business and, consequently, the balance of the Class 14.1 pool.

A receipt that does not relate to a specific property will reduce the capital cost of the goodwill of the business, and therefore the balance of the Class 14.1 pool, by the lesser

of the cost of the goodwill (which may be nil) and the amount of the receipt. Any excess will be treated as a capital gain. Any previously deducted CCA will be recaptured to the extent that the receipt exceeds the balance of the Class 14.1 pool.

CEC balances at 31 December 2016, will be transferred to the new Class 14.1 pool as of 1 January 2017. The CCA depreciation rate for the transferred property in the Class 14.1 pool will be 7% until 2027. Proceeds received after 31 December 2016, relating to property acquired, expenditures made, or goodwill generated before 1 January 2017, will reduce the Class 14.1 pool at a 75% rate.

Mining and oil and gas activity

Generally, mining and oil and gas companies are allowed a 100% deduction for grassroots exploration costs. Other development costs are deductible at the rate of 30% on a declining-balance basis. Generally, for expenses incurred after 20 March 2013, subject to a phase-in over three calendar years, from 2015 to 2017, pre-production mine development expenses will be treated as 'Canadian development expenses' (30% declining balance) instead of as 'Canadian exploration expenses' (100% deduction). If certain grandfathering criteria are met, taxpayers can continue to treat pre-production mine development expenses as Canadian exploration expenses. In addition, draft legislation treats mining expenses incurred after 18 February 2015, that relate to environmental studies, and community consultations that are required to obtain an exploration permit, as 'Canadian exploration expenses', which may provide an immediate 100% deduction.

Capital property costs are subject to the depreciation rules *noted above under Depreciation*. In addition, in certain cases, significant asset acquisitions and assets acquired for a new mine or major expansion benefit from accelerated depreciation of up to 100% of the income from the mine. For certain oil sands assets acquired after 18 March 2007, accelerated depreciation was reduced gradually, and eliminated in 2015. For other mining assets, the accelerated depreciation is being phased out over the 2017 to 2020 calendar years, generally for expenses incurred after 20 March 2013, unless certain grandfathering criteria are met.

For assets acquired after 19 February 2015, and before 2025, CCA rates increased from:

- 8% to 30% for equipment used in natural gas liquefaction, and
- 6% to 10% for buildings at a facility that liquefies natural gas.

Provinces levy mining taxes on mineral extraction and royalties on oil and gas production. Most are deductible for income tax purposes. On 21 October 2014, British Columbia introduced an LNG income tax. See *British Columbia Liquefied Natural Gas Income Tax Act in the Taxes on corporate income section*.

ITCs are available federally (and in some provinces if certain criteria are met) to individuals who invest in shares to fund prescribed mineral exploration expenditures. The federal credit in 2016 for qualified 'flow-through' share investments is 15% of qualifying mining grassroots exploration expenditures. Certain mining exploration and pre-production expenditures that are incurred by a Canadian corporation and not used for flow-through were previously eligible for an ITC, but not after 2015 (although transitional relief may be available). The individual and corporate credits can be used to offset current taxes payable or carried over to certain previous or subsequent taxation years.

Extractive Sector Transparency Measures Act

The Extractive Sector Transparency Measures Act requires public disclosure of government payments made by mining and oil and gas entities engaged in the commercial development of oil, gas, or minerals in Canada or elsewhere. It also applies

Canada

to entities that control another entity that engages in these activities. However, an entity will be required to report only if it:

- is listed on a stock exchange in Canada, or
- has a place of business in Canada, does business in Canada, or has assets in Canada, and, based on its consolidated financial statements, meets minimum asset, revenue, and/or employee thresholds.

This mandatory reporting standard for extractive companies applies to payments of CAD 100,000 or more in a year that have been made to foreign and domestic governments at all levels, including Aboriginal groups. Both monetary payments and payments 'in kind' must be reported. Reporting is generally required for taxation years beginning after 1 June 2015.

Scientific research and experimental development (SR&ED)

Canada provides a generous combination of deductions and tax credits for SR&ED. Current expenditures on SR&ED can be deducted in the year incurred or carried forward indefinitely to be used at the taxpayer's discretion to minimise tax payable. *See Scientific research and experimental development (SR&ED) credit in the Tax credits and incentives section for information on the tax credits currently available.*

Start-up expenses

Expenses related to the incorporation, reorganisation, or amalgamation of a corporation (e.g. cost of affidavits, legal and accounting fees, costs of preparing articles of incorporation) are not deductible for income tax purposes. They are considered to be eligible capital expenditures, for which 75% of the capital cost of the expenditure is amortised at a maximum rate of 7% per year on a declining-balance basis (*see Eligible capital property [ECP] above for proposed changes to the ECP regime on 1 January 2017*). Expenses incurred after the date of incorporation generally are deductible for income tax purposes if reasonable in amount and incurred to earn income from the business.

Interest expenses

Interest on borrowed money used for earning business or property income, or interest in respect of an amount payable for property acquired to earn income, is deductible, provided the interest is paid pursuant to a legal obligation and is reasonable under the circumstances.

Doubtful accounts and bad debts

A reasonable reserve for doubtful accounts may be deducted for tax purposes. The reserve calculation should be based on the taxpayer's past history of bad debts, industry experience, general and local economic conditions, etc. Special rules apply for determining reserves for financial institutions. A taxpayer can deduct the amount of debts owing that are established to have become bad debts during the year, provided the amount has previously been included in the taxpayer's income or relates to loans made in the ordinary course of business. Recoveries of bad debts previously written off must be included in income in the year of recovery.

Business meals and entertainment

Deductions for business meals and entertainment expenses are limited to 50% of their cost. This includes meals while travelling or attending a seminar, conference, or convention, overtime meal allowances, and room rentals and service charges, etc. incurred for entertainment purposes. If the business meal and entertainment costs are billed to a client or customer and itemised as such, the disallowance (i.e. the 50% not deductible) is shifted to the client or customer.

Insurance premiums

Insurance premiums relating to property of a business are generally deductible, but life insurance premiums are generally not deductible if the company is the named

beneficiary. However, if a financial institution lender requires collateral security in the form of life insurance, a deduction is allowed for the associated net cost of any pure insurance for the period.

Charitable contributions

Charitable donations made to registered Canadian charitable organisations are deductible in computing taxable income, generally to the extent of 75% of net income. A five-year carryforward is provided.

Fines and penalties

Most government-imposed fines and penalties are not deductible. Fines and penalties that are not government-imposed are generally deductible if made or incurred by the taxpayer for the purpose of gaining or producing income from the business or property.

Taxes

Federal, provincial, and territorial income taxes are not deductible in determining income subject to tax. The tax treatment of federal capital taxes and provincial payroll and capital taxes is discussed in the *Other taxes section*.

Net operating losses

Net operating losses generally may be carried back three tax years and forward 20. Special rules may prohibit the use of losses from other years when there has been an acquisition of control of the corporation.

Corporate loss trading

An anti-avoidance measure to support the restrictions on the deductibility of losses, and the use of certain other tax benefits, where there has been an acquisition of control of a corporation applies:

- when a person or group of persons acquires shares of a corporation to hold more than 75% of the FMV of all of the shares of the corporation without otherwise acquiring control of the corporation, and
- if it is reasonable to conclude that one of the main reasons that control was not acquired was to avoid the loss restriction rules.

Payments to foreign affiliates

Interest, rents, royalties, management fees, and other payments made to related non-residents are deductible expenses to the extent that they are incurred to earn income of the Canadian corporation and do not exceed a reasonable amount. In certain cases, the receipt of these payments by a foreign affiliate of the Canadian corporation or of a related person can give rise to FAPI, which is taxable on an accrual basis in Canada.

Group taxation

Group taxation is not permitted.

Transfer pricing

Canadian transfer pricing legislation and administrative guidelines are generally consistent with OECD Guidelines. Statutory rules require that transactions between related parties be carried out under arm's-length terms and conditions. The CRA will apply the revised OECD guidance on transfer pricing by MNEs arising from the BEPS project (*see Base erosion and profit shifting (BEPS) in the Tax administration section for more information*). The government's view is that the revised guidance is generally consistent with the CRA's current interpretation and application of the arm's-length principle and that, consequently, current practices are not expected to change significantly.

Canada

Penalties may be imposed when contemporaneous documentation requirements are not met. A taxpayer will be deemed not to have made reasonable efforts if the taxpayer does not maintain complete and accurate documentation to evidence that it has determined and used arm's-length prices for its related-party transactions. The documentation must be prepared on or before the taxpayer's documentation due date, which is six months after the end of the taxation year for corporations.

The transfer pricing penalty is 10% of the transfer pricing adjustment if the adjustment exceeds the lesser of CAD 5 million and 10% of the taxpayer's gross revenue for the year. The penalty is not deductible in computing income, applies regardless of whether the taxpayer is taxable in the year, and is in addition to any additional tax and related interest penalties.

Canada has an Advance Pricing Arrangement (APA) program that is intended to help taxpayers determine transfer prices acceptable to the local tax authorities and, when negotiated as bilateral or multilateral APAs, with tax authorities in other jurisdictions. Under this program, 342 APAs have been completed or are in progress.

Many of Canada's international tax agreements contain provisions concerning income allocation in accordance with the arm's-length principle. These include a Mutual Agreement Procedure, which is a treaty-based mechanism through which taxpayers can petition competent authorities for relief from double taxation resulting from transfer pricing adjustments.

Transfer pricing adjustments

When the Canadian transfer pricing rules have applied to adjust, for tax purposes, amounts related to transactions between a Canadian corporation and one or more non-arm's length non-residents (a 'primary adjustment'), the related benefit to the non-residents is treated by the CRA as a deemed dividend (a 'secondary adjustment'), subject to WHT, which can be eliminated, at the discretion of the Minister of Revenue, if the amount of the primary transfer pricing adjustment is repatriated to the Canadian corporation.

Country-by-country (CbC) reporting

The 2016 federal budget proposes to implement annual CbC reporting for taxation years beginning after 2015 for MNEs with total annual consolidated group revenue of EUR 750 million or more (approximately CAD 1 billion). To facilitate the sharing of this information with its international treaty partners, Canada (and 38 other jurisdictions) have signed the OECD's Multilateral Competent Authority Agreement on CbC reporting. The reporting would include key metrics for each country the MNE operates in, such as: revenue, profit, tax paid, stated capital, accumulated earnings, number of employees, and tangible assets, as well as a description of the main activities of each of its subsidiaries. The reporting would be due within one year of the end of the fiscal year to which the report relates, with a view that the first exchanges between jurisdictions of CbC reports would occur by June 2018. Before any such exchanges, the CRA will formalise an exchange arrangement with the other jurisdiction and ensure that appropriate safeguards are in place to protect the confidentiality of the reports. Draft legislative proposals to implement these rules will be released for comment.

Thin capitalisation

Thin capitalisation rules can limit interest deductions when interest-bearing debt owing to certain non-residents (or persons not dealing at arm's length with certain non-residents) exceeds one and a half times the corporation's equity. The rules also apply to debts of:

- a partnership in which a Canadian-resident corporation is a member, and
- Canadian-resident trusts and non-resident corporations and trusts that operate in Canada.

Disallowed interest is treated as a dividend for WHT purposes.

Back-to-back loan arrangements

The Canadian Income Tax Act contains 'back-to-back loan' rules that prevent taxpayers from interposing a third party between a Canadian borrower and a foreign lender to avoid applying rules that would otherwise apply if a loan were made directly between the two taxpayers. The back-to-back loan rules currently ensure that the amount of WHT on a cross-border interest payment cannot be reduced through the use of back-to-back loan arrangements. Legislation enacted in 2014 targeted certain back-to-back loan arrangements undertaken by taxpayers using an interposed third party by:

- amending an anti-avoidance provision in the thin capitalisation rules for taxation years that begin after 2014, and
- introducing a specific anti-avoidance rule relating to WHT on interest payments for amounts paid or credited after 2014.

The 2016 federal budget expands these back-to-back loan rules by:

- extending these rules to cross-border payments of rents, royalties, or similar payments made after 2016
- adding character substitution rules to these rules so they cannot be avoided through the substitution of economically similar arrangements between the intermediary and another non-resident person, for interest and royalty payments made after 2016
- amending the shareholder loan rules to include rules that are similar to the back-to-back loan rules; this will apply to back-to-back shareholder loan arrangements as of 22 March 2016, and that are in place on that date (*see Shareholder loan rules in the Income determination section for more information*), and
- clarifying the application of these rules to back-to-back arrangements involving multiple intermediaries, for interest and royalty payments made after 2016, and for shareholder debts as of 1 January 2017.

Controlled foreign affiliates and foreign accrual property income (FAPI)

Under Canada's FAPI rules, Canadian corporations are taxed on certain income of controlled foreign affiliates (typically, certain income from property, income from a business other than active, income from a non-qualifying business, and certain taxable capital gains) as earned, whether or not distributed. A grossed-up deduction is available for foreign income or profits taxes and WHTs paid in respect thereof. In general, a foreign corporation is a foreign affiliate of a Canadian corporation if:

- the Canadian corporation owns, directly or indirectly, at least 1% of any class of the outstanding shares of the foreign corporation, and
- the Canadian corporation, alone or together with related persons, owns, directly or indirectly, at least 10% of any class of the outstanding shares of that foreign corporation.

The foreign affiliate will be a controlled foreign affiliate of the Canadian corporation if certain conditions are met (e.g. more than 50% of the voting shares are owned, directly or indirectly, by a combination of the Canadian corporation, persons at non-arm's length with the Canadian corporation, a limited number of Canadian-resident shareholders, and persons at non-arm's length with those Canadian-resident shareholders).

Tax credits and incentives

Foreign tax credits

Taxpayers that have foreign-source income and are resident in Canada at any time in the year are eligible for foreign tax credit relief. Separate foreign tax credit calculations

Canada

are prescribed for business and non-business income on a country-by-country basis. All provinces and territories also allow a foreign tax credit, but only in respect of foreign non-business income taxes.

Income or profits taxes paid to foreign governments generally are eligible for credit against a taxpayer's Canadian income taxes payable. The credit in respect of taxes paid on foreign income is restricted to the amount of Canadian taxes otherwise payable on this income. Generally, foreign tax credits are available only to reduce Canadian tax on foreign-source income that is subject to tax in the foreign country.

Foreign business income or loss is computed for each foreign country in which a branch is located. Excess foreign business income tax credits may be carried back three years or forward ten. The foreign non-business income tax credit applies to all foreign taxes other than those classified as business income tax. No carryover is allowed with respect to the non-business income foreign tax credit. Unused foreign non-business income tax may be deducted in computing income.

Regional incentives

In specified regions of Canada (i.e. Atlantic provinces, the Gaspé region, and Atlantic offshore region), a 10% federal ITC is available for various forms of capital investment (generally, new buildings, machinery and equipment, and/or clean energy generation equipment to be used primarily in manufacturing or processing, logging, farming, or fishing). The ITC is fully claimed against a taxpayer's federal tax liability in a given year. Unused ITCs reduce federal taxes payable for the previous three years and the next 20, or may be 40% refundable to CCPCs.

The provinces and territories may also offer incentives to encourage corporations to locate in a specific region. Income tax holidays are available in Newfoundland and Labrador, Nova Scotia, Ontario, Prince Edward Island, and Quebec for certain corporations operating in specific industries (e.g. in Ontario and Quebec, commercialisation of intellectual property [IP]; in Prince Edward Island, bioscience or aviation) or meeting certain conditions (e.g. job creation for Newfoundland and Labrador).

Industry incentives

Canada offers many tax incentives at the federal, provincial, and territorial levels, for various industries and activities, including those related to:

- Research and development (*see below*).
- Film, media, computer animation and special effects, and multi-media productions.
- Manufacturing and processing.
- Environmental sustainability.

Scientific research and experimental development (SR&ED) credit

In addition to the SR&ED deduction, a taxpayer can benefit from an ITC, which is generally a 15% non-refundable credit on SR&ED expenditures that can be applied against taxes payable. Alternatively, this tax credit can be carried back three years or forward 20, to be applied against taxes owing.

A qualifying CCPC can qualify for a 35% refundable tax credit annually on its first CAD 3 million in expenditures. This enhanced credit is subject to certain income and capital limitations.

SR&ED ITCs have been extended to certain salary and wages (limited to 10% of salary and wages directly attributable to SR&ED carried on in Canada) incurred in respect of SR&ED carried on outside Canada.

In addition to the federal SR&ED incentives, all provinces (except Prince Edward Island), as well as the Yukon, provide tax incentives to taxpayers that carry on research and development (R&D) activities.

Withholding taxes

WHT at a rate of 25% is imposed on interest (other than most interest paid to arm's-length non-residents), dividends, rents, royalties, certain management and technical service fees, and similar payments made by a Canadian resident to a non-resident of Canada.

Canada is continually renegotiating and extending its network of treaties, some with retroactive effect. This table summarises WHT rates on payments arising in Canada. The applicable treaty should be consulted to determine the WHT rate that applies in a particular circumstance.

Notes

1. Interest: Canada does not impose WHT on interest (except for 'participating debt interest') paid or credited to arm's-length non-residents. Most treaties have an explicit provision for higher WHT on interest in excess of FMV in non-arm's-length circumstances.
2. Royalties: A zero royalty rate generally applies to:
 - copyright royalties and payments for a literary, dramatic, musical, or other artistic work (but not royalties for motion picture films, work on film or videotape, or other means of reproduction for use in television), and/or
 - royalties for computer software, a patent, for information concerning industrial, commercial, or scientific experience (but not royalties for a rental or franchise agreement), or for broadcasting.

Most treaties explicitly provide for higher WHT on royalties in excess of FMV in non-arm's-length circumstances. A zero rate of tax may apply in certain cases.

3. The treaty (or, in the case of Taiwan, a tax arrangement) has been signed, but is not yet in force. In the absence of a treaty (or tax arrangement), Canada imposes a maximum WHT rate of 25% on dividends, interest, and royalties.
4. The lower (lowest two for Vietnam) rate applies if the beneficial owner of the dividend is a company that owns/controls a specified interest in the paying company. The nature of the ownership requirement, the necessary percentage (10%, 20%, 25%, or higher), and the relevant interest (e.g. capital, shares, voting power, equity percentage) vary by treaty.
5. If the other state (Canada for the treaty with Oman) concludes a treaty with another country providing for a lower WHT rate (higher rate for Kenya), the lower rate (higher rate for Kenya) will apply in respect of specific payments within limits, in some cases.
6. Canada's treaty with China does not apply to Hong Kong.
7. The treaty status of the republics that comprise the former USSR is as follows:
 - Azerbaijan, Estonia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Russia, Ukraine, and Uzbekistan: New treaties entered into force (see *table for rates*).
 - Other republics: No negotiations are underway.

Belarus, Tajikistan, and Turkmenistan will not honour the treaty with the former USSR. As a result, Canada will impose a maximum WHT rate of 25% on dividends, interest, and royalties until a new treaty enters into force. For other republics that comprise the former USSR, the status of the former treaty with the USSR is uncertain. Because the situation is subject to change, Canadian taxpayers are advised to consult with the CRA as transactions are carried out.

8. The rates are provided in a 'tax arrangement' between Canada and Taiwan that was signed on 15 January 2016.
9. For the United States, the reduced treaty rates apply, subject to the Limitation on Benefits article.

Tax administration

Taxable period

The tax year of a corporation, which is normally the fiscal period it has adopted for accounting purposes, cannot exceed 53 weeks. The tax year need not be the calendar year. Once selected, the tax year cannot be changed without approval from the tax authorities.

Canada

Tax returns

Both the federal and the provincial/territorial corporation tax systems operate on an essentially self-assessing basis. All corporations must file federal income tax returns. Alberta and Quebec tax returns must also be filed by corporations that have PEs in those provinces, regardless of whether any tax is payable. Corporations with PEs in other provinces that levy capital tax must also file capital tax returns. Tax returns must be filed within six months of the corporation's tax year-end. No extensions are available.

Certain corporations with annual gross revenues exceeding CAD 1 million are required to electronically file (e-file) their federal CIT returns via the Internet. Also, information return filers that submit more than 50 information returns annually must e-file via the Internet. Penalties are assessed for failure to e-file.

Payment of tax

Corporate tax instalments are generally due on the last day of each month (although some CCPCs can remit quarterly instalments if certain conditions are met). Any balance payable is generally due on the last day of the second month following the end of the tax year.

Functional currency

The amount of income, taxable income, and taxes payable by a taxpayer is determined in Canadian dollars. However, certain corporations resident in Canada can elect to determine their Canadian tax amounts in the corporation's 'functional currency'.

Tax audit process

The tax authorities are required to issue an assessment notice within a reasonable time following the filing of a tax return. These original assessments usually are based on a limited review, if any, of the corporation's income tax return. However, the notice of assessment will identify any changes made (e.g. correcting discrepancies on any balances carried forward).

Traditionally, all corporations with gross income over CAD 250 million, and their affiliates, are assigned a large case file team and undergo an annual risk assessment. Corporations rated as high risk are generally audited annually. As a result of the 2016 federal budget providing increased funding to the CRA, the CRA will hire an additional 100 auditors to increase the number of audits of high-risk multinational corporations. Medium-sized corporations (gross income between CAD 20 million and CAD 250 million) generally are selected based on a screening process and identified risks. Smaller corporations, which are usually CCPCs with gross income under CAD 20 million, have been subject to compliance or restricted audits, selected based on statistical data and a screening process. Audits of CCPCs are generally restricted to covering the current and one previous taxation year.

In general, the CRA targets its resources on high-risk taxpayers, with minimal resources spent on lower-risk taxpayers.

Statute of limitations

A reassessment of the tax payable by a corporation that is not a CCPC may be made within four years from the date of mailing of the original notice of assessment, usually following a detailed field audit of the return and supporting information. The limitation period is three years for CCPCs. The three-year and four-year limits are extended a further three years in some cases (e.g. transactions with non-arm's-length non-residents). Reassessments generally are not permitted beyond these limits unless there has been misrepresentation or fraud. Different time limits may apply for provincial reassessments.

Appeals

A taxpayer that disagrees with a tax assessment or reassessment may appeal. The first step is to file a formal notice of objection within 90 days from the date of mailing of the notice of assessment or reassessment, setting out the reasons for the objection and other relevant information. Different time limits may apply for provincial reassessments. Corporations that qualify as 'large corporations' must file more detailed notices of objection. The CRA will review the notice of objection and vacate (cancel), amend, or confirm it. A taxpayer that still disagrees has 90 days to appeal the CRA's decision to the Tax Court of Canada, and, if necessary, to the Federal Court of Appeal and the Supreme Court of Canada. However, the Supreme Court hears very few income tax appeals.

Topics of focus for tax authorities

Topics of interest to Canadian tax authorities include:

- Transfer pricing (inbound and outbound), including the quantum and deductibility of:
 - royalty payments made by Canadian corporations to non-arm's-length non-residents
 - goods and services
 - business restructuring expenses incurred by a group of corporations located in more than one country
 - interest rates and interest paid on loans if the funds derived from the loans are used offshore
 - guarantee fees paid by Canadian corporations to related non-resident corporations, and
 - management fees and general and administrative expenses.
- Offshoring of Canadian-source income by factoring the accounts receivable of Canadian corporations.
- Treaty shopping to reduce Canadian WHT and capital gains tax.
- Manipulation of tax attributes, including:
 - surplus stripping to reduce Canadian WHT by increasing a Canadian corporation's PUC and subsequently distributing the surplus as a return of capital
 - arrangements that manipulate the adjusted cost base of capital assets, and
 - the acquisition of tax losses realised by arm's-length entities.
- The requirement to withhold tax on certain payments made to a non-resident that relate to fees, commissions, or other amounts in respect of services rendered in Canada.
- Transaction costs, including professional fees, related to business restructuring.
- Strategies that adhere to Canada's tax laws but contravene its intention.

General Anti-Avoidance Rule (GAAR)

The GAAR was first introduced in 1988 and was designed to challenge transactions or series of transactions that would directly or indirectly result in a tax benefit when:

- a taxpayer relies on specific provisions of the Income Tax Act to achieve an outcome that those provisions seek to prevent
- a transaction defeats the underlying rationale of the provisions that are relied upon, or
- an arrangement circumvents the application of certain provisions, such as specific anti-avoidance rules, in a manner that frustrates or defeats the object, spirit, or purpose of those provisions.

If GAAR applies, the CRA may deny any deduction, exemption, or exclusion in computing taxable income or the nature of any payment or other amount may be recharacterised to deny the tax benefit that would result from an avoidance transaction.

Canada

Foreign reporting

Reporting requirements apply to taxpayers with offshore investments. The rules impose a significant compliance burden for taxpayers with foreign affiliates. Failure to comply can result in substantial penalties.

Tax compliance reporting

The federal government continues to implement its Red Tape Reduction Action Plan. The plan puts into practice common-sense solutions to barriers identified by Canadian businesses, such as Canadian tax compliance reporting. The action plan has three major themes:

- Reducing the burden on business.
- Making it easier to do business with regulators.
- Improving service and predictability.

Tax avoidance

An 'avoidance transaction' that meets certain conditions is a 'reportable transaction' and must be reported to the CRA. Ontario and Quebec also each have a provincial reporting regime for certain aggressive tax planning transactions. Other provinces are considering implementing similar disclosure rules for these transactions.

Tax evasion and aggressive tax avoidance

The 2016 federal budget announced that Canada will invest CAD 444 million "to crack down on tax evasion and combat tax avoidance" and details how these funds will be allocated. The new initiatives include:

- hiring 100 additional auditors to investigate high-risk multinational corporations
- increasing the number of CRA annual examinations of high-risk wealthy taxpayers from 600 to 3,000
- increasing by twelve-fold the number of transactions examined by the CRA
- creating a special CRA program to stop "the organizations that create and promote tax schemes for the wealthy"
- using the latest investigative tools and technology, paired with larger CRA investigative teams, and
- creating an independent advisory committee to focus on offshore tax evasion and aggressive tax planning.

The following measures have already been implemented to help the CRA combat international tax evasion and aggressive tax avoidance:

- Certain financial intermediaries are required to report to the CRA international electronic funds transfers of CAD 10,000 or more.
- The 'Stop International Tax Evasion Program' compensates certain persons who provide information that leads to the assessment or reassessment of over CAD 100,000 in federal tax.
- If a taxpayer fails to report income from a specified foreign property on Form T1135 (Foreign Income Verification Statement), and the form was not filed on time or a specified foreign property was not, or not properly, identified on the form, the normal assessment period for this form is extended by three years.

Base erosion and profit shifting (BEPS)

Canada has been an active participant in the BEPS Action Plan, a project of the OECD and the G20. BEPS refers to tax planning strategies that exploit gaps and mismatches in national tax laws to shift profits to low- or no-tax locations. The government will act on the recommendations from the BEPS Action Plan relating to:

- country-by-country reporting (*see Country-by-country (CbC) reporting in the Group taxation section for more information*)

- transfer pricing guidance (*see Transfer pricing in the Group taxation section for more information*)
- treaty abuse (*see Treaty shopping below*), and
- the spontaneous exchange of tax rulings.

Spontaneous exchange of tax rulings

Effective 1 April 2016, the CRA began sharing select Canadian tax rulings with certain countries in accordance with BEPS Action 5. The types of tax rulings shared include cross-border rulings related to ‘preferential regimes’, transfer pricing legislation, and those providing a downward adjustment not directly reflected in the taxpayer’s accounts, as well as PE rulings and related-party conduit rulings. Canada will share a summary of the applicable ruling with the countries of residence of the immediate parent company, the ultimate parent company, and certain other parties.

Treaty shopping

The 2016 federal budget states that the government is committed to addressing treaty abuse in accordance with the minimum standard contained in the final OECD and the G20 BEPS report on treaty shopping (Action 6). The minimum standard requires countries to include in their tax treaties an express statement that their common intention is to eliminate double taxation without creating opportunities for non-taxation or reduced taxation through tax evasion or avoidance, including through treaty shopping arrangements. The minimum standard also requires the adoption of one of two approaches in addressing treaty abuse, either the limitation-on-benefits approach or the limited principal purpose test. The federal government will evaluate both of these approaches, depending on the circumstances and discussions with Canada’s tax treaty partners.

Other issues

Forms of business enterprise

Canadian law is based on the British common-law system, except in Quebec where a civil-law system prevails. The principal forms of business enterprise available in Canada are the following.

- **Corporation:** A legal entity distinct from its shareholders, whether public or private, incorporated federally, provincially, or territorially.
- **Partnership:** A business relationship between two or more ‘persons’ (i.e. individuals, corporations, trusts, or other partnerships) formed for the purpose of carrying on business in common. Not treated as a legal entity distinct from its partners.
- **Sole proprietorship:** An unincorporated business operated by an individual that is carried on under the individual’s own name or a trade name.
- **Trust:** A relationship whereby property (including real, tangible, and intangible) is managed by one person (or persons, or organisations) for the benefit of another. May hold commercial enterprises.
- **Joint venture:** Generally, the pursuit of a specific business objective by two or more parties whose association will end once the objective is achieved or abandoned. Not treated as a legal entity distinct from the participants.

Foreign investors usually conduct business in Canada through one or more separate Canadian corporations, although operation as a branch of a profitable foreign corporation may be preferable during the start-up period. In addition, foreign investors may participate as partners in partnerships carrying on business in Canada or as joint venturers.

Canada

Cross-border tax compliance

Convention on Mutual Administrative Assistance in Tax Matters

Canada has ratified the Convention on Mutual Administrative Assistance in Tax Matters, which entered into force, in respect of Canada, on 1 March 2014 and into effect for taxable periods beginning after 2014. The member states of the Council of Europe and the member countries of the OECD are signatories of the convention. Under the convention, Canada will exchange tax information based on OECD standards, but is not required to collect taxes on behalf of another country, or provide assistance in the service of related documents. Canada will continue to negotiate a provision on helping to collect tax on a bilateral basis, and has agreed to include such a provision in some of its bilateral tax treaties.

Common Reporting Standard (CRS)

In November 2014, the G20 countries endorsed a new CRS for automatic information exchange developed by the OECD. Under the CRS, foreign tax authorities will provide information to the CRA relating to financial accounts in their jurisdictions held by Canadian residents. The CRA will, on a reciprocal basis, provide corresponding information to the foreign tax authorities on accounts held by residents of their jurisdictions in Canada.

Draft legislative proposals implement the CRS in Canada effective 1 July 2017, with a first exchange of information in 2018. As of 1 July 2017, Canadian financial institutions must have procedures to identify accounts held by residents of any country other than Canada and to report the required information to the CRA. Having satisfied itself that each jurisdiction has appropriate capacity and safeguards in place, the CRA will formalise exchange arrangements with other jurisdictions leading to the exchange of information on a multilateral basis.

US Foreign Account Tax Compliance Act (FATCA)

An intergovernmental agreement (IGA) between Canada and the United States to improve international tax compliance and to implement the US FATCA entered into force on 27 June 2014. The IGA is a Model I Reciprocal Agreement, meaning that financial institutions in each country will report specific information to their own governments, which will then automatically exchange that information annually on a reciprocal basis. The new reporting regime became effective July 2014, with Canada and the United States beginning to exchange enhanced tax information in 2015.

Significant developments

Tax court

As of 1 January 2016, it is now possible to appeal the verdict of the tax court. This improves the protection of taxpayers and the quality of the tax system.

United States Foreign Account Tax Compliance Act (US FATCA)

Based on the intergovernmental agreement (IGA) that was signed by the Netherlands with the United States, financial institutions can file the data they must provide to the US Internal Revenue Service (IRS) under the FATCA through a portal that has been set up by the Netherlands tax authority.

Taxes on corporate income

Real estate tax

Income from immovable property is subject to real estate tax. The real estate tax is levied based on the value of real estate. As is the case at present, the value is established for five years each time. The income is deemed to be 4% of the value of the real estate, and the tax rate is 10% for hotels and 17.5% for other real estate. Therefore, the tax effectively amounts to 0.4% and 0.7% of the value, respectively.

In cases where the value of the real estate has increased as a result of construction, improvement, expansion, or renovation, the increase in value will be tax exempt for the first ten years. The exemption will only apply if the taxpayer files a request with the tax inspector to determine the amount of increase in value no later than the following year.

Exemptions apply for the dwelling that serves as the principal residence and land that is being commercially operated for agricultural or forestry purposes. A ten-year exemption applies for the increase in value of real estate as a result of new construction, renovation, and expansion.

Revenue tax

A revenue tax is levied on the revenues from shares and profit-sharing certificates, as well as on distributions from foundations, special purpose funds, or a closed-end common fund. The rate of the revenue tax is 5%.

There are no other taxes on income or capital gains.

The revenue tax and the real estate tax only apply if certain requirements of residency have been met. A corporation that is established in the Caribbean Netherlands that does not meet certain criteria will, for the purpose of the revenue tax and the real estate tax, be deemed to be established in the Netherlands and will be taxed accordingly. That means that instead of revenue tax and real estate tax, the Netherlands corporate income tax (CIT) of 20% to 25% will apply, as well as the Netherlands dividend withholding tax (WHT) of 15% (see the *Corporate residence section for more information*).

Caribbean Netherlands

Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in the Caribbean Netherlands is considered to be a resident.

For purposes of the revenue tax and the real estate tax, however, a resident corporation is deemed to be established in the Netherlands unless specific criteria have been met, the purpose of which is to guarantee commercial ties with the Caribbean Netherlands.

An entity is deemed to be established in the Caribbean Netherlands, not the Netherlands, based on the following criteria:

- It has been admitted to a bonded warehouse for commerce and services, or
- It obtained a declaration from the Inspector of Taxes that one of the following conditions applies:
 - It is not active in financial services or insurance, turnover is not more than 80,000 United States dollars (USD), and assets are not more than USD 200,000.
 - The assets usually consist of less than 50% of investments, participations, liquidities, and assets that are made available for use to persons outside the Caribbean Netherlands, as well as assets directly or indirectly used for financing persons outside the Caribbean Netherlands.
 - It usually provides permanent work to at least three persons living in the Caribbean Netherlands who engage independently in activities relating to the assets mentioned above and whose responsibility is in line with their job position, and it has, at its disposal, real estate situated in the Caribbean Netherlands for a period of at least 24 months with a value of at least USD 50,000 for the activities, and this real estate is used as an office with facilities that are customary in the financial sector.
- It holds, at a minimum, 95% of the shares of an entity as mentioned above.

Resident corporations that do not meet these criteria are deemed to be established in the Netherlands, which causes them to be subject to the Netherlands CIT and dividend WHT. This does not apply to foundations, special purpose funds, or a closed-end common fund.

Other taxes

Sales tax

A general expenditure tax (*Algemene Bestedings Belasting* or ABB) has replaced the levy of import duties, as well as the former sales tax (*Omzetbelasting* or OB and *Belasting op Bedrijfsomzetten* or BBO), of the former Netherlands Antilles. The rate is 8% in Bonaire and 6% in Saba and St. Eustatius.

The rate for insurances is 9% and 7%, respectively.

The rate for services, including restaurants and bars, is 6% and 4%, respectively.

The rate for cars is 25% in Bonaire.

The following rate applies to cars in Saba and St. Eustatius:

- 18% on the price up to USD 20,000.
- 22% on the price from USD 20,000 to USD 30,000.
- 30% on the price over USD 30,000.

However, if it concerns a very low energy car, the rate is 0% on each island.

ABB is levied in respect of:

- Sale of goods by manufacturers.
- Delivery of services within the levy area.
- Import of goods.

Therefore, the sale of goods will only be subject to tax once, at the manufacturer or at the time of import. The sale of bread has been exempt. In addition, the supply of grain, potatoes, and rice will also be exempt. Other exemptions that apply, similar to the former OB and BBO legislation, are:

- Public transportation.
- Medical services and hospitals.
- Water and electricity.
- Fuels and other products, including supplies, for international transportation.
- Renting of houses.

Excise taxes

Excise tax is due on gasoline. On Bonaire, excise tax is also due on alcohol, with different tariffs for liquor, wine, and beer, as well as for tobacco. This does not apply to Saba and St. Eustatius.

The excise rates are:

- USD 31.86 per hectolitre of gasoline or approximately USD 1.20 per gallon on Bonaire (USD 0.90 on Saba and St. Eustatius).

Only on Bonaire:

- USD 67.04 per hectolitre of beer.
- USD 128.50 per hectolitre of wine.
- USD 12.85 per volume percent of alcohol per hectolitre of distilled products.
- USD 8.69 per 100 cigarettes (import).
- USD 9.78 per 100 cigars.
- USD 4.89 per 100 cigarillos.
- USD 30 per kilogram of smoking tobacco.

Property taxes

There is an annual property tax of 0.3% on the value of real estate.

Transfer taxes

The transfer of immovable property on the islands of the Caribbean Netherlands is subject to a 5% transfer duty.

Stamp tax

No stamp tax is levied in the Caribbean Netherlands.

Payroll taxes

Employers must withhold wage tax from the wages of their employees and pay the wage tax to the Tax Department within 15 days after the end of the month.

Social security contributions

Employers must pay an employee insurance premium of 18.1% on all salary, without a maximum, for accident insurance and health insurance for employees.

Caribbean Netherlands

Branch income

Entities not established in the Caribbean Netherlands are only taxed on the fixed income of local real estate, at a rate of 17.5% on an income of 4% of the value of the property the corporation owns in the Caribbean Netherlands or, in case of hotel property, 10% on an income of 4%.

The revenue tax does not apply to the remittance of profits from the permanent establishment (PE) to the head office of the corporation. No other taxes are levied.

The criteria for deemed residency in the Caribbean Netherlands do not apply to PEs, except for a PE of a corporation that is a resident of Aruba, Curaçao, or St. Maarten. In cases where the activities of such a PE would not qualify for deemed residency in the Caribbean Netherlands if it had been a corporation, this PE is liable to taxation in the Netherlands.

Income determination

In the Caribbean Netherlands, there is a tax on the fixed income of local real estate (real estate tax) and on profits distributed to shareholders (revenue tax). As long as income is not distributed, profits other than from real estate are not subjected to tax. Therefore, there are no regulations with regard to income determination.

Deductions

No deductions are allowed on the fixed income with regard to real estate tax or the distributions of profit for revenue tax purposes.

Group taxation

Distribution of profits to another corporation on one of the islands of the Caribbean Netherlands is exempt from revenue tax if the other corporation holds, at minimum, a 5% interest in the corporation that is making the distribution.

Tax credits and incentives

A corporation that has been designated as a bonded warehouse for commerce and services is exempt from ABB and excise tax. As a result, goods in transshipment remain tax free. However, if goods that have been admitted to a bonded warehouse are sold within the Caribbean Netherlands, this will be considered importing these goods and ABB and excise tax will be due.

Withholding taxes

A revenue tax of 5% is levied on distributions from corporations as well as distributions from foundations, special purpose funds, or a closed-end common fund.

Tax treaties

The Caribbean Netherlands currently has a tax treaty in effect with Norway. A double tax agreement (DTA) has been negotiated with Jamaica, but this has not entered into force yet. *See the Other issues section for a description of tax information exchange agreements (TIEAs).*

Tax arrangement for the Kingdom of the Netherlands (TAK)

As part of the Kingdom of the Netherlands, the Caribbean Netherlands is party to a federal tax agreement with Aruba, Curaçao, and St. Maarten (TAK) as well as a tax agreement for the Netherlands (TAN) with regard to the attribution of tax between the Netherlands and the Caribbean Netherlands. Subject to the TAK and the TAN, dividends, interest, and royalties paid to a company resident in the Caribbean Netherlands may qualify for reduced rates of WHTs in the subject countries or in the Netherlands.

The Netherlands dividend WHT is 15% if the Caribbean Netherlands company owns less than 10% of the Dutch company. If the Caribbean Netherlands company's interest is 10% or more, the Netherlands WHT can be reduced to 0%. Aruban dividend tax will be reduced from the statutory rate of 10% to 5%. In the Caribbean Netherlands, the dividends will not be taxed when they are received. However, at the time the dividends are distributed to the shareholder, they will be subject to the 5% revenue tax.

The TAN came into force on 1 January 2011. As of 1 January 2016, the TAK no longer applies to Curaçao. The new tax agreement between the Netherlands and Curaçao (the TANC) entered into force on 1 January 2016.

Tax administration

Tax returns

Revenue tax returns must be filed and the amount due must be paid at the end of the quarter of the year in which the distribution has been made.

The real estate tax is levied by way of a tax assessment.

Payment of tax

Revenue tax must be paid at the time of filing and in a lump sum on the basis of the self-assessment.

The real estate tax must be paid within two months of the date of the tax assessment.

Statute of limitations

A reassessment can be imposed until five years after the tax year.

Other issues

Tax information exchange agreements (TIEAs)

TIEAs have been signed with several countries, including Australia, Canada, Denmark, Mexico, New Zealand, Spain, Sweden, and the United States. As a result, the Caribbean Netherlands, as part of the former Netherlands Antilles, has been moved to the white list of the Organisation for Economic Co-operation and Development (OECD) Global Forum.

Significant developments

There have been no significant corporate tax developments in the Cayman Islands during the past year.

Taxes on corporate income

Corporate income, capital gains, payroll, or other direct taxes are not imposed on corporations in the Cayman Islands.

Corporate residence

Since no corporate income, capital gains, payroll, or other direct taxes are currently imposed on corporations in the Cayman Islands, corporate residency is not relevant in the context of Cayman Islands taxation.

Entities engaged in 'scheduled' trade and business in the Cayman Islands (as defined in the Trade & Business Licensing Law) are required to have a trade and business licence. Effecting and concluding contracts in the Cayman Islands and exercising, in the Cayman Islands, powers necessary for the carrying on of a business outside the Cayman Islands is generally not considered to be engaging in trade and business in the Cayman Islands.

Other taxes

Value-added tax (VAT)

There is no VAT imposed in the Cayman Islands.

Import duties

Import duty is paid, generally at a rate of 22% to 27%, on importation of most goods. Please refer to the Cayman Islands Customs' website (www.customs.gov.ky) for the latest list of tariff rates.

Excise taxes

There are no excise taxes in the Cayman Islands.

Property taxes

There are no property taxes in the Cayman Islands.

Stamp duties

Stamp duty is paid, generally at a rate of 7.5%, on transfers of Cayman Islands immovable property. Stamp duty, in the form of a transfer tax equal to the applicable stamp duty, also applies to transfers of shares in land holding companies.

Cayman Islands stamp duty may also be payable if any documents are executed in, after execution brought to, or produced before a court of the Cayman Islands. Such stamp duty will be nominal in most instances and is capped at 500 Cayman Islands dollars (KYD).

Stamp duties also apply on legal or equitable mortgages or charges of immovable property or debentures. The stamp duty ranges from 1% to 1.5%, depending on the sum secured.

Branch income

Branches are treated the same as other corporations doing business in the Cayman Islands.

Income determination

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, income determination is not relevant in the context of Cayman Islands taxation.

Deductions

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, deductions from income are not relevant in the context of Cayman Islands taxation.

Group taxation

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, group taxation is not relevant in the context of Cayman Islands taxation.

Tax credits and incentives

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, tax incentives are not relevant in the context of Cayman Islands taxation. However, Cayman entities carrying on business outside the Cayman Islands can register as 'exempted companies' (i.e. a company formed primarily to do business outside of the Cayman Islands and subject to certain requirements) and can apply under the Tax Concessions Law for an undertaking to be issued by the Governor-in-Council (i.e. the Cayman Islands government) exempting such company from any tax on profits, income, gains, or appreciation that might be introduced in the period of 20 years following the grant of such concessions. The concession is extendable for a further ten years after expiry. 'Exempted limited liability partnerships' (i.e. certain partnerships formed primarily to do business outside of the Cayman Islands) can apply under the Exempted Limited Partnership Law for a similar concession that is for 50 years (rather than 20 years).

Cayman Islands

Withholding taxes

Currently, no withholding taxes (WHTs) are imposed on dividends or payments of principal or interest.

Tax administration

No tax returns, forms, or procedures are required to be completed for tax compliance purposes in the Cayman Islands.

The Tax Information Authority serves as the competent authority in the Cayman Islands.

Other issues

Tax information reporting

The Cayman Islands currently has 36 signed Bilateral Agreements, of which 29 are in force. Please refer to the Tax Information Authority's website (http://tia.gov.ky/pdf/International_Exchange_of_Information_Instruments.pdf) for the latest list of Bilateral Agreements.

The Cayman Islands agreed with the United Kingdom (UK) government to implement the Savings Directive, and so the Reporting of Savings Income Information (European Union or EU) Law (2007 Revision) came into force, setting out a reporting regime whereby Cayman paying agents making interest payments to individuals who are tax resident in an EU member state may have to report interest paid. The Cayman Tax Information Authority receives or facilitates submission of such information reporting.

The Cayman Islands will comply with the regulations set forth under the Common Reporting Standard (CRS). The country recognises that the regulations are a key component of Cayman's implementation of automatic exchange of financial account information in accordance with the internationally agreed standard. The Cayman Islands Tax Information Authority issued guidance on CRS in Q4 of 2015, including updated Cayman Islands entity and individual self-certification forms and other information, which took effect as of 1 January 2016. The Cayman Islands took a similar approach to CRS as with the UK and United States (US) Foreign Account Tax Compliance Act (FATCA) (see below), including certain due diligence and reporting obligations.

Intergovernmental agreements (IGAs)

The Cayman Islands and the United States signed their Agreement to Improve International Tax Compliance and to Implement the Foreign Account Tax Compliance Act based on the Model 1 IGA in 2013. To accommodate the non-direct tax system of the Cayman Islands, the IGA is a model 1B (non-reciprocal) IGA. The Cayman Islands and the United Kingdom also signed their Agreement to Improve International Tax Compliance, which is based on the US Model 1 IGA in 2013. Under these Agreements, Cayman Islands financial institutions must provide the Cayman Islands competent authority with the required information. The Cayman Islands competent authority forwards that information to the competent authority in the relevant jurisdiction. Please refer to the Tax Information Authority's website for access to the Agreements and related Guidance Notes (www.tia.gov.ky/pdf/FATCA_Legislation.pdf).

Significant developments

There have been no significant corporate tax developments in Chad during the past year.

Taxes on corporate income

The profits subject to the corporate tax are determined with sole regard to profits earned by businesses carried out or transactions conducted in Chad.

Net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Chad. As income from other countries is not liable to tax, foreign charges and losses are not deductible either.

The corporate tax rate is 35% (prior to fiscal year 2015, the rate was 40%).

Minimum tax

There is a minimum tax of 1.5% based on turnover and an additional 1 million Central African CFA francs (XAF) as the minimum/floor amount.

Local income taxes

There are no local income taxes in Chad.

Corporate residence

Registered entities (i.e. companies, branches, and subsidiaries) conducting economic activities in Chad are liable to pay corporate tax. Specifically:

- Limited companies.
- Limited partnerships with shares.
- Limited liability companies.
- Cooperative societies and their unions.
- Public institutions.
- Agencies of the state with financial autonomy.
- Municipal bodies and any other legal entity engaged in an operation for gain.
- Real estate companies, regardless of their form.
- Civil companies, other than real estate companies, involved in industrial, commercial, or agricultural activities.
- Limited partnerships, on the share of profits relating to the rights of sponsors.
- Associations in participation, including financial syndicates, on the share of profits relating to the rights of sponsors.
- Co-owners of shipping companies, on the share of profits relating to the rights of sponsors of associated co-owners, other than those with unlimited liability or whose names and addresses are not listed with the tax administration.

Chad

Permanent establishment (PE)

According to the Economic and Monetary Community of Central Africa (CEMAC) Fiscal Convention, a legal person is domiciled in one's 'permanent home'; this expression denotes the centre of vital interests, i.e. the place with which personal relations are closer.

Consequently, the domicile (permanent home) of legal persons is the place of the registered office or the statutory social place. It constitutes PEs such as:

- The head office of management.
- A branch.
- An office.
- A factory.
- A workshop.
- A mine, quarry, or other place of extraction of natural resources.
- A building or construction site or assembly.
- A facility used for storage, display, or delivery of goods belonging to the business.
- A warehouse belonging to the business, stored for storage purposes, and of display of delivery.
- A fixed installation of business used for the purpose of purchasing goods.

Other taxes

Value-added tax (VAT)

The VAT rate applicable in Chad is:

- 18% on all taxable operations.
- 0% on exports and their related international transportations.

An operation performed in Chad that constitutes an economic activity and for which payment is made, unless included in the list of exemptions in the law governing VAT, is liable for VAT, even if the residence of the natural person or the registered office of the legal entity is located outside Chad.

The VAT law provides a list of transactions exempted from VAT that includes, among many others, the following:

- Sales of products that are directly made by farmers, cattle farmers, or fishermen to consumers, farming, and fishing operations.
- Import operations and sales of newspapers and periodicals, other than the advertising revenues.

There are no specific rules relating to refunds to non-residents.

There are no refunds of the excess in practice. If the amount paid exceeds the VAT payable, the credit can be offset against the VAT payable as long as 12 months have not passed since the birth of this credit. After that, it becomes a loss, which is deductible under corporate tax. The deductibility of a VAT credit under corporate tax is subject to a certificate of VAT credit delivered by the General Tax Director after a VAT audit.

Customs duties

The tax basis of customs duties corresponds with the customs valuation, namely the selling price of the goods plus cost of delivery to Chad (costs of insurance, transportation, etc.).

The rates of customs duties depend on the nature of the goods and range from 5% to 30%. These rates can be summarised as follows:

- Goods of first need (basic necessities): 5%.
- Raw materials and goods of equipment: 10%.
- Intermediate and miscellaneous goods: 20%.
- Consumer goods: 30%.

Excise duty

Excise duty applies to goods of great consumption: cigarettes, drinks (water, beer, and wine), cosmetics, and luxury products. Excise duty rates depend on the nature of the goods and range from 5% to 25% of the value of the good.

Some of the rates are as follows:

- Water: 5%.
- Beer and wine: 25%.
- Perfume, jewellery, electronic devices (except computers, telephones etc.), private vehicles with an engine capacity above 1600 cm³, and weapons: 20%.
- Compound alcoholic preparations: 25%.
- Tobacco (all types): 25%.

This value differs depending on the origin of the good. If the good has been manufactured in the CEMAC zone, the value corresponds with the selling price charged by the manufacturer. If the good is imported into the CEMAC zone, the value is the sum of the freight value plus insurance costs and customs duties.

This value constitutes the basis of the calculations of the excise duty.

From fiscal year 2016, the basis of calculations mentioned above shall be increased by the amount of VAT paid.

Real property tax

The annual real property tax differs according to whether it is a built or an unbuilt property and whether it is located in N'Djamena or elsewhere. The tax is imposed in the municipality where the property is situated.

The tax rate on built property is 10% in N'Djamena and 8% elsewhere.

The tax rate on unbuilt property is 21% in N'Djamena and 20% elsewhere.

The calculation basis is the potential revenue of that property. The potential revenues correspond to four-fifths of the rental value, the rental value being 10% of the market value. For rural unbuilt property, the market value is fixed to XAF 50,000 per hectare.

Some temporary exemptions are granted to new buildings or additions to constructed buildings after 1 January 1968 from this tax in some conditions. In case of construction or reconstruction, owners can benefit from temporary exemptions as follows:

- If the villa is owned by a corporation: 2 years.
- If the villa belongs to an individual and put on rental: 2 years.
- If the villa is built or rebuilt for commercial and industrial use: 2 years.
- New construction or reconstruction and additions to buildings for a holiday resort, for approval (accreditation), or for furnished rent are excluded.

Accommodation tax

The person occupying a building (owner or tenant) has to pay the following amount as accommodation tax annually:

Type of construction	N'Djamena (XAF)	Elsewhere (XAF)
For constructions in local material	3,000	1,500

Chad

Type of construction	N'Djamena (XAF)	Elsewhere (XAF)
For hard or semi-hard constructions	10,000	5,000
For R+ hard constructions	10,000 and a supplement of 10,000 per level	5,000 and a supplement of 5,000 per level

Transfer tax

Fixed or proportional transfer duties must be paid on the transfer of ownership of estates, personal property, and real property. Transfer duties are also due on contributions to companies and divisions of property. The proportional fees for the following transfers are:

- Transfers of ownership interests in companies whose capital is not divided into shares: 3%.
- Transfers of shares, founders' shares, or profit shares: 3%.
- Transfers of bonds of companies and legal entities: 3%.
- Transfers of the right to lease or of the benefit of a promise to lease real estates: 10%.
- Transfers of goodwill (business) against payment: 10%.
- Transfer of leases of real estate: 10%.
- Transfers of pension against payment: 10%.
- The undivided shares and portions of real property acquired by bidding are subject to land transfer tax against payment at 10%.
- Transfers and delegations of term debts: 3%.
- The perfect transfer of notarised promissory notes containing the creation of a mortgage and other mortgage bonds: 5%.
- Real estate returns are subject to land transfer (against payment) tax of 10%.
- Transferring ownership for consideration of movable property: 6%.
- Judicial transfer (against payment) of ownership or usufruct of both developed and undeveloped land is 10%.

These transfers are generally registered within three months of their entry into possession.

Stamp duties

Stamp duties must be paid on each civil or judicial document intended to be used as evidence. Stamp duty is generally XAF 1,000 per page.

All claims for reimbursement submitted to the Board are subject to a stamp duty of XAF 2,000.

Requests to the administration for professional competitions are subject to a stamp duty of XAF 1,000.

Applications for allocation of land are subject to a stamp duty of XAF 1,000.

Invoices for supplies to the administration of less than XAF 1 million are subject to a stamp duty of XAF 5,000. The same applies to certificate of sales of reshaped vehicles and materials of vehicles of the state and public bodies.

All invoices that accompany an order of the administration in lieu of a service contract or a public market are subject to a stamp duty of XAF 5,000.

Any application, other than those mentioned above, addressed to the tax authorities is subject to a stamp duty of XAF 2,000.

The subscription contracts to mobile and landline phones are subject to a stamp duty of XAF 1,000. Telephone companies are responsible for the collection of those duties and pay them on the 15th day of every month to the Stamp Tax Treasury (Stamp and

Registration Directorate). A penalty of 25% of the amount due, plus a fine of XAF 25, is awarded for late payment.

The post-paid invoices of mobile and fixed telephone companies are subject to a stamp duty of 10%.

Registration duty

The registration duty applies to certain deeds listed by the General Tax Code (GTC). The assessment basis depends on the nature of transactions, and the rate varies from 0.25% to 15%.

Business licence tax

Any natural person or corporate body carrying on a trade, industry, or profession in Chad shall be liable to a business licence tax. The business licence tax is paid annually and is assessed as follows:

- A determined duty based on 0.1% of the first XAF 2 billion of turnover of the fiscal year N-2; above that, only 1/10 of the turnover is taxed at the rate of 0.1%.
- 10% of the rental value of the premises.
- 10% of the determined duty for the National Social Security Funds.
- 7% of the determined duty for the Consular Commercial Chamber.
- XAF 480 per year for the Rural Intervention Funds.
- 10% of the annual rental value of business premises.

For a new company, the determined duty is calculated based on the projected turnover estimated by the taxpayer as compared to similar activities or those achieved during the first 12 months of activity.

The business licence tax is due 31 December of the tax year.

Payroll tax

Employers in Chad are required to make monthly contributions of 7.5% of the total amount of salaries and fringe benefits paid to permanent employees.

Social security contributions

The monthly contribution to Chad's Social Security Funds is 16.5% of total salaries for the employer (upper limit: XAF 82,500 per month) and 3.5% for the employee (upper limit: XAF 17,500 per month), withheld by the employer.

Apprenticeship tax

Employers in Chad are required to make monthly contributions of 1.2% of the total amount of salaries and fringe benefits of their employees (permanent and temporary) to the National Professional Training Funds (FONAP).

Branch income

Subject to international conventions, the profits realised by companies that do not have their tax residence in Chad (i.e. branches) are deemed distributed in respect of each fiscal year to the persons who do not have their tax residence in Chad and, to this effect, are subject to WHT at the rate of 20%.

Income determination

Inventory valuation

Stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.

Chad

Capital gains

Capital gains are taxed at 20% via WHT.

Dividend income

Dividends are taxed at 20% via WHT.

Interest income

The interest paid to associates or shareholders in respect of sums paid by them in the social fund in addition to their share of capital is taxable within the limit of that calculated at the advance rate of the bank of emission and increased by two points.

Foreign income

Income from other countries is not liable to tax in Chad.

Deductions

Expenses are deductible under the following conditions:

- They must lead to a reduction of the assets.
- They must be incurred in the interest of the enterprise.
- They must be regularly included in the accounts of the entity and justified by receipts.
- They must be related to the fiscal year within which they are incurred.
- They must not be considered as non-deductible by the law.

Depreciation

According to accountancy principles, depreciation is calculated based on the probable length of use of the asset. The straight-line system of depreciation is applicable, and rates vary according to the nature of the business activity concerned and the normal useful life of the assets involved.

From an accountancy point of view, it is possible to depreciate whatever amount corresponds to the above mentioned principles. However, from a tax point of view, depreciation (i.e. enabling a deduction of the depreciated amount from the taxable income) is only possible under the condition that the depreciation has been entered into the statement of accounts. Therefore, only a legal entity in Chad owning the assets is able to depreciate its assets. In addition, if depreciation in the statement of accounts is higher than the depreciation authorised, the difference is not deductible and has to be reinstated in the taxable income.

The starting point for depreciation is the day of first use. If this date is not the first day of the financial year, the first year's depreciation is reduced pro-rata.

It should be noted that, despite the above, goods that are leased are depreciated at the rate that they are paid for.

Depreciation of goods that are made available for free to managers and supervisors of the business are deductible if the corresponding benefit in kind is declared.

The sum of depreciation applied to the acquisition or creation of an asset cannot, at the end of each financial year, be less than the amount of depreciation calculated on the linear system and spread out over the normal usage period.

Depreciation in loss-making years may be carried forward to the first profitable financial year, and to subsequent years if necessary.

Major repairs

The major repairs carried out by a company on the assets listed in the balance sheet are only deductible by way of depreciation.

Goodwill

There are no provisions for goodwill as regards deduction of expenses.

Start-up expenses

There are no provisions for start-up expenses.

Interest expenses

Interest paid for the depositing of funds by a shareholder is deductible within the base rate of the central bank plus two points, calculated on the basis of the share capital.

Bad debt

Provisions for credit customers are deductible if judicial actions have been taken for the recovery of the said debt.

Charitable contributions

Donations and liberalities are deductible within a 0.5% limit of the annual turnover, net of tax, when they are duly justified. However, a decision from the Minister of Finances is required.

Fines and penalties

Tax and customs penalties are not deductible.

Taxes

Income taxes are not deductible.

Structural VAT credits

Structural VAT credits are deductible if the following conditions are met:

- The company justifies the origin of the VAT credits by producing the statement of the deductible VAT accompanied by the original invoices and the receipts of the customs.
- An attestation of VAT credit, signed by the General Tax Director, is produced.

Other significant items

The following expenses are not deductible:

- Provisions for laying off employees.
- Provisions for self-insurance.
- Insurance premiums paid for a third-party.

The following expenses are not fully deductible:

- Foreign social security contributions are deductible only within 15% of the base salary of the expatriates when related to a compulsory retirement plan. Nonetheless, Chad's social security contributions are fully deductible.
- Restaurants, hotels, receptions, and related costs are deductible within a 0.5% limit of the turnover, net of tax.
- Travel expenses for expatriates and their families for vacation are deductible, limited to one trip per year.

Net operating losses

Losses arising from normal business activities of the company are deductible and may be carried forward for up to three years. Carryback of losses is not permitted.

Chad

Payments to foreign affiliates

There is a specific regulation relating to general administrative and foreign technical assistance costs that are subject to a 10% limitation of deductibility. The scope of the 10% limitation covers study expenses, technical assistance, and other expenses, including commercial and industrial royalties, paid to the head office of an enterprise established outside Chad and outside the CEMAC zone.

These costs are only deductible within 10% of the intermediary fiscal profit (accounting profits plus non-allowable charges/costs) prior to their deduction if the following conditions are met:

- The details of these general administrative and technical assistance costs shall be annexed to Table 22 of the annual tax returns (*Déclaration Statistique et Fiscale* or DSF).
- The details shall present the amounts paid according to the activities' sectors and countries where the company carries out its activities.

Group taxation

There is a specific taxation of groups within the CEMAC area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent establishment represent at least 50% of the capital of the subsidiary firm.
- The parent and subsidiary firms have their registered office in a CEMAC state (i.e. Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company that undertakes to retain them for at least two consecutive years in registered form.

Transfer pricing

The Tax Code acknowledges that dependent or controlled companies may transfer benefits indirectly to their company abroad if it is dependent on or to the company abroad it is controlled by.

In order to calculate the real benefit, the indirectly transferred benefits (by means of increase of purchase price or decrease of sales price to the controlling company or by any other means) are incorporated into the result established by the accounts.

If the tax administration does not have enough precise elements to determine the benefit, it will establish the taxable benefit by way of comparison to companies normally operated in Chad.

The Tax Code provides further, in accordance with CEMAC regulation, that interest paid to shareholders on sums that they lend over and above their share capital is deductible at the rate for loans allowed by the central bank increased by two percentage points. This deduction is only possible if the amounts lent do not exceed 50% of the share capital.

Thin capitalisation

Chad applies Organisation for the Harmonization of Business Law in Africa (OHADA) regulations with regards to thin capitalisation rules.

In cases where the equity capital gets, due to the recorded losses in the summarising financial statement, below 50% of the share capital, a shareholder consultation has to be organised within four months to decide upon a potential anticipated dissolution of the company.

If the dissolution is excluded, the company has to reconstitute its equity capital up until it equals 50% of the share capital within the two years following the date of the end of the loss-making financial year. Otherwise, provided it stays above the legally required share capital minimum, the company has to reduce its share capital of an amount at least equal to the losses that it has not been able to charge against reserves.

In cases where no decision has been taken regarding dissolution, any interested person may claim dissolution of the company in front of a court. Any interested person is allowed to bring a legal action if the reconstitution of the equity capital has not taken place within the legal timeline.

This action ceases to exist the day the cause for dissolution ceases to exist or if the court has ruled on such grounds.

Controlled foreign companies (CFCs)

There are no provisions relating to CFCs in Chad.

Tax credits and incentives

Chad does not offer any tax incentives.

Foreign tax credit

There are no provisions for foreign tax credit in Chad.

Withholding taxes**WHT on commerce of retail goods**

A 4% WHT rate applies to natural persons and legal entities that purchase or sell wholesale or retail goods. This WHT also applies to imports.

Companies with more than one shareholder that regularly pay their taxes may apply for a suspension of payment of WHT (renewable every three months).

WHT on capital gains and dividends

WHT on capital gains and dividends is 20% and applies to residents and non-residents.

WHT on income of non-residents

WHT on income of non-residents is 25%. It applies to income of any legal or natural person who is not resident in the CEMAC area (i.e. Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, Republic of Congo).

The income of legal persons (companies) whose tax residence is in the CEMAC area is exempted from the WHT. However, the income of natural persons whose tax residence is in the CEMAC area is subject to WHT at the rate of 20%.

WHT on personal income

The employer withholds tax on personal income every month.

Chad

WHT on income from public procurement contracts financed from outside of the country and income from petroleum projects

Chad's lowest WHT rate on income is 12.5%. It applies in either of the following two cases:

- On income of agents, consultancy firms, and corporations executing a contract within the framework of public procurement contracts financed from outside of the country.
- On income of companies working within the petroleum projects.

The WHT at the rate of 12.5% does not apply to dividends and interests, but only to royalties paid to non-residents within the petroleum projects.

The dividends paid to residents and to non-residents is subject to WHT at the rate of 20%.

The interests paid to non-residents whose tax residence is outside the CEMAC area are subject to WHT at the rate of 25%, but they are exempted from WHT if they are paid to the CEMAC area's residents.

WHT on interests of bonds, certificates, and notes

Bonds and notes are subject to a WHT of 20% of the interests for registered bonds and of the interests for bearer participation certificates.

WHT on rent

WHT on rent is 15% for residents and 20% for non-residents when the monthly rent paid is up to XAF 1,000,000.

WHT on rent is 20% for residents and 25% for non-residents when the monthly rent paid is between XAF 1,000,001 and XAF 4,000,000.

WHT on rent is 25% for residents and 30% for non-residents when the monthly rent paid is higher than XAF 4,000,001.

WHT on interconnection expenses of mobile companies

WHT on interconnection expenses of mobile companies paid to non-resident companies is 25%.

WHT on rental of equipment

The rate of WHT on rental of equipment held by natural persons is 20% applied on the total amount paid, including the major repairs, which, by nature, should be normally supported by the owner, when these repairs are supported by the tenant without deduction from the price of the rental.

Tax treaties

Chad has one tax treaty with the member states of CEMAC.

WHT benefits on payments made to CEMAC residents

To avoid double taxation of incomes of CEMAC origin, the provisions of the Convention provide a principle of exclusive taxation in one country.

Regarding revenues of services, they will be taxed only in the country of location of the beneficiary of incomes (i.e. no WHT in the country of payment of incomes).

Regarding incomes from securities (dividends, interest on deposits, interest on bonds, etc.), they will be taxed only in the country of distribution (i.e. no WHT in the country of payment of incomes).

Tax administration

Taxable period

Companies must, in principle, close off their yearly financial accounts on 31 December each year. Where a company begins operations later in the year (say June 2016), it has the option of operating for a minimum of 12 months or a maximum of 18 months to close off its accounts.

Tax returns

Corporate tax returns are due on 30 April, at the latest, with the possibility to apply for an exceptional extension to 15 May.

Payment of tax

Certain taxes are considered instalment payments of corporate tax. Once the amount of corporate tax is known, these payments are deductible from the amount and only the balance has to be paid on 15 May. These taxes include the minimum corporate tax, the quarterly instalment payments, and the 4% discharge for retail goods, if applicable.

Minimum corporate tax (monthly)

The minimum corporate tax shall be filed, at the latest, on the 15th day of the month following the month of achievement of the turnover, and the related payment shall be made before the end of this month.

However, for the payment of the floor rate, payment may be made in four instalments of XAF 250,000 each, 15 days after the end of the quarter.

If this instalment payment exceeds the annual corporate tax, the remainder is lost.

One third instalment payments (paid three times quarterly)

Corporations that fulfil the following conditions are subject to quarterly instalment payments:

- Liable to corporate tax.
- Made a profit during the prior fiscal year.
- The amount of the corporate tax of the prior fiscal year is superior to at least XAF 100,000.

The quarterly instalment payments are equal to one-third of the difference between the corporate tax due during the prior fiscal year and the minimum income tax paid during the same period.

The payment must take place before the 15th day of May, August, and November.

Tax audit process

In brief, the tax audit exercised by the *Direction Générale des Impôts* (Directorate General of Taxes) in Chad consists of three different types of control:

- Audit of monthly, quarterly, and annual tax returns, which requires no prior notice by the tax administration to the taxpayer.
- Spot checks, which are done on one or more taxes on a group of operations over a period of less than one fiscal year. Prior notice is obligatorily given by the tax administration to the taxpayer.
- General verification, which is the most important audit and needs prior notice by the tax administration to the taxpayer. This type also involves the other two audits aforementioned, so that the taxpayer can perform the necessary adjustments on previous declarations.

Chad

In all the audits, there are contradictory and contentious proceedings. The contradictory proceeding is engaged when the tax administration finds deficiency, inaccuracy, or omission in the information on the tax returns and notifies the taxpayer thereof. The contentious proceeding, on the other hand, is engaged when the taxpayer, in turn, disagrees with the observations of the tax administration and challenges its position directly with the tax administration and/or with the courts.

Contentious claim

Taxpayers who disputes the justification or the amount of tax levied on them may, if they had formally filed the claim under certain conditions, obtain stay of payment of the disputed portion of the said taxes, on condition that they:

- expressly request respite of payment in the complaint
- state the amount or the basis of the tax relief requested
- provide supporting documents showing payment of the undisputed portion of the tax and 15% of the disputed one (10% prior to fiscal year 2016), and
- provide the bank guarantee obtained from a bank located in Chad.

Statute of limitations

According to Article R. 33 of the GTC of Chad:

“The total or partial omissions found in the tax base, the inadequacies and inaccuracies, or the taxation errors, can be repaired by the tax administration until the end of the third year following that in which the tax or fee is payable.

Furthermore, any omission or insufficiency of tax revealed by a proceeding before the criminal courts or by a contentious claim may, without prejudice to the general period of repetitions established above, be repaired until the end of the third year following the revelation of the facts.”

Significant developments

Tax Reform

On 29 September 2014, Law N° 20,780, containing a major Tax Reform, was published in the Official Gazette. In general terms, this Tax Reform replaces the current income taxation system and introduces significant amendments to the Income Tax Law and the Tax Code, among other tax laws.

The main amendments introduced by the Tax Reform include:

- Elimination of the Taxable Profits Fund (FUT for its Spanish acronym) ledger as of 1 January 2017.
- Introduction of two new income taxation systems, which will replace the current fully integrated income taxation system as of 1 January 2017.
- More control prerogatives for the Chilean Internal Revenue Service (IRS).
- Stronger anti-avoidance rules, in force as of October 2015.
- Introduction of controlled foreign corporation (CFC) rules as of 1 January 2016.
- Broader definition of 'tax havens'.
- Changes to the thin capitalisation rules are in force as of 1 January 2015.
- Taxes on capital gains arising from real estate disposals as of 1 January 2017.
- Increase of the stamp tax rate as of 1 January 2016.
- The abolition of Law Decree N° 600 (Foreign Investment Statute) as of 1 January 2016, regarding new investment projects.
- Introduction of 'green taxes'.

Simplification and clarification of the Tax Reform

Due to the complexity of the 2014 Tax Reform, on 8 February 2016, Law N° 20,899 was published in the Official Gazette. This law simplifies, clarifies, and perfects the Tax Reform by introducing a series of technical adjustments and accuracies that should allow the simplification of the Tax Reform's enforcement. Additionally, Law N° 20,899 introduces certain new tax rules.

The main amendments that this law introduces to the Tax Reform are the following:

- Modifications to the attributed income system (AIS): (i) taxpayers that may opt for this system; (ii) applicability of this system as the default system; (iii) moment at which taxation is determined; (iv) elimination of the FUT ledger and application of an average rate; and (v) ledger simplification and modification of the allocation order.
- Modifications to the partially integrated system (PIS): (i) taxpayers that may opt for this system; (ii) elimination of the FUT ledger and application of an average rate; and (iii) ledger simplification and modification of the allocation order.
- Changes the rules for recognising foreign-source income.
- Expansion of the possibility of allocating 100% of the tax credit for the First Category Tax (FCT) paid against the Additional Withholding Tax (WHT) to those taxpayers resident or domiciled in countries with which Chile has signed a double taxation treaty (DTT) that is not yet in force before 1 January 2017.

Chile

- Modifies the rules for determining the excess of indebtedness taxable basis.
- Clarifies the scope of application of the new General Anti-Avoidance Rules (GAARs).

New Foreign Investment Statute

On 25 June 2015, Law N° 20,848 was published in the Official Gazette. This law establishes a new statute for direct foreign investment in Chile as current Law Decree N° 600 is abolished by the Tax Reform as of 1 January 2016. However, on its interim rules, Law N° 20,848 extends the enforceability of Law Decree N° 600 for four more years counted as of January 2016. During this period, foreign investors will be able to choose between these two laws or the normal regime for investing in Chile.

New General Anti-Avoidance Rules

On 30 September 2015, a new set of GAARs entered into force.

The GAAR provisions aim to prevent taxpayers from using simulated or abusive tax planning in order to obtain tax benefits that they would have not obtained in other circumstances. In this context, the Chilean IRS now has the power to request to the corresponding tax court the disallowance of such benefits, having the taxpayer pay the corresponding taxes, interest, and penalties.

Productivity bill

On 6 May 2016, the Chilean government sent a bill to the Congress that aims to enhance the productivity of the country by means of deepening the financial system and promoting the exportation of services.

The key items contained in the bill are as follows:

Value-added tax (VAT)

Currently, in order to benefit from a VAT exemption, the exportation of services need to be rendered in Chile and fully used abroad. However, the bill broadens the term 'exportation' such that services that are partially rendered in Chile and partially abroad also benefit from the exemption.

Withholding tax (WHT)

Payments made from Chile to abroad, for services rendered abroad, that relate to the export of Chilean services, such as marketing, currently benefit from a WHT exemption. The bill intends to broaden the services that qualify for the exemption to include technical or engineering works or services.

Tax credit

Currently, services rendered by a Chilean exporter of services do not benefit from the local tax credit system for the taxes paid abroad in connection to such services if the payment for such services was made in a country with which Chile does not have a DTT in force. The bill aims to broaden the possibility of using the tax credit for taxes paid abroad to taxes paid in respect to payments for services made in countries with which Chile does not have a DTT in force.

Debt instruments

The bill modifies the tax treatment applicable to certain publicly offered debt instruments, with the purpose of promoting the investment in these instruments by foreign investors.

Taxes on corporate income

First Category Tax (FCT)

The basic tax on income of a legal entity domiciled or resident in Chile and engaged in commerce, mining, fishing, or industrial activities is the First Category Tax, which is assessed at a 24% rate on the entity's worldwide income in commercial year 2016 (previously 22.5%).

Note that due to the Tax Reform, the FCT rate will gradually increase to:

- 25% for entities subject to the AIS and 25.5% for entities subject to the PIS in commercial year 2017.
- 27% for entities subject to the PIS in commercial year 2018.

Final taxation (i.e. at the Chilean final owner's level or at the foreign owner's level) will depend on the income tax regime to which the Chilean entity is subject to.

Introduction of two new income tax systems

The Tax Reform replaces the current income tax system, which taxes profits with final taxes upon disbursement to final Chilean owners or to foreign owners and is completely integrated with respect to these final taxes, as the income tax paid at the entity level (FCT) is 100% creditable against final income taxes (i.e. against the Global Complementary Tax [surtax] applicable to Chilean final owners or the Additional WHT levied to foreign owners).

However, as of commercial year 2017, the following two income taxation systems, elective for taxpayers, will coexist:

Attributed income system (AIS)

In general terms, under the AIS, companies will have to attribute all the 'attributable income' (mainly the taxable basis for corporate purposes) up-stream to the final owners, subject to the Global Complementary Tax or the Additional WHT.

In this scenario, final owners will be subject to the Global Complementary Tax (a progressive tax ranging from 0% to 35%) or Additional WHT (at 35%) regardless of whether a dividend was effectively distributed or not, with a 100% tax credit for the FCT paid at the attributing entity's level. The final owner is responsible for paying the difference between the FCT and the corresponding final tax.

Hence, a foreign entity or individual subject to this regime will be subject to a total Chilean tax burden of 35% (the Additional WHT rate), being able to credit the 25% FCT paid by the company.

For example:

Taxable income	100.00
FCT (25%)	25.00
Gross up amount	100.00
Additional WHT on attributed income (35%)	35.00
Tax credit (100% of FCT paid)	(25.00)
Difference to be paid	10.00
Total taxes paid in Chile (FCT plus difference to be paid)	35.00
Total tax burden	35%

Law N° 20,899, published in the Official Gazette on 8 February 2016, modified the AIS as follows:

Chile

- Taxpayers that will be able to opt for this system are companies whose owners are exclusively final taxpayers. In certain cases, companies by shares will be able to opt for this system, provided certain requirements are met.
- Application of the AIS as the default system to those taxpayers who do not expressly choose to be subject to the PIS and who have partners, owners, or co-owners who are exclusively individuals domiciled or resident in Chile.
- Elimination of the FUT ledger, which is replaced by a ledger that records the profits with an average tax credit rate for the FCT paid, creditable against final taxes.
- Ledger simplification and modification of the allocation order; the taxpayers will need to keep the following ledgers and allocate accordingly: (i) own attributed income (including historic FUT); (ii) differences between normal and accelerated depreciation; and (iii) income not subject to final taxes and profits that are not considered income (this ledger includes the Non Taxable Profits Fund [FUNT for its Spanish acronym] determined on 31 December 2016). Any amount exceeding this allocation order will be subject to final taxes, unless it corresponds to paid-in capital.

Partially integrated system (PIS)

Under the PIS, final income taxation is applied upon effective dividend disbursements or profit withdrawals. Therefore, Chilean final owners subject to the Global Complementary Tax or foreign owners subject to the 35% Additional WHT will be levied with these final taxes upon effective distribution of profits, with a tax credit of 65% of the FCT paid at the entity level.

However, the tax credit for the FCT paid at the entity level is 100% if the final owner is domiciled or resident in a country with which Chile has a DTT in force.

Therefore, final owners subject to the Additional WHT, residents, or those domiciled in a DTT country will continue having a total Chilean tax burden of 35% (the Additional WHT rate), whilst other foreign investors' total Chilean tax burden will be 44.45% once the 27% FCT rate becomes applicable in commercial year 2018. This total tax burden of 44.45% is calculated as follows:

Taxable income	100.00
FCT (27%)	27.00
Distribution abroad	73.00
Gross up amount	100.00
Additional WHT on attributed income (35%)	35.00
Tax credit (65% of FCT paid)	(17.55)
Difference to be paid	17.45
Total taxes paid in Chile (FCT plus difference to be paid)	44.45
Total tax burden	44.45%

Law N° 20,899, published in the Official Gazette on 8 February 2016, introduced certain modifications to the PIS:

- Stock corporations, limited joint-stock entities, and companies that at least have one shareholder who is not a final taxpayer will be mandatorily subject to this income taxation regime.
- Ledger simplification and modification of the allocation order: (i) income subject to taxation, determined according to the entity's tax equity (including historic FUT); (ii) differences between normal and accelerated depreciation; (iii) income not subject to final taxes and profits that are not considered income (this ledger includes the FUNT determined on 31 December 2016); and (iv) accumulated tax credits balance.
- Elimination of the FUT ledger and application of an average rate; assigned credits from the historic FUT will be allocated according to an average tax credit rate,

annually determined, according to the result from the division of the total accumulated tax credits for the FCT paid by the tax profits registered in the FUT.

Common rules for both new taxation systems

- A voluntary payment of the FCT is established in case the entity attributing or distributing income has no corporate tax credits available for the use of the final owners. These voluntary FCT payments under the AIS will be deductible from net taxable income, whilst under the PIS, they will be considered as a tax credit against the FCT due.
- Taxpayer will have to be subject to one of the aforementioned systems for at least five years. After such period, they may change from one system to another. However, in order to change from one system to another, all FCTs due will need to be paid as if the entity had ceased in its activities.
- Additionally, Law N° 20,899 provides that entities subject to the AIS will change to PIS as of 1 January of the year in which one of its owners is an entity who is not a final taxpayer.
- Taxpayers will need to keep a registry regarding the 'accumulated tax credit balance' in order to control the available FCT credit.

Option to pay the accumulated FUT and excess withdrawals

During 2016, taxpayers who started their business before 1 December 2015 and keep a positive FUT balance may distribute such profits paying a replacement tax at a 32% rate, with entitlement to the corresponding FCT credit. This substitute tax will levy accumulated taxable profits that the company keeps up to fiscal years 2015 or 2016 pending of final taxes.

Additionally, taxpayers that register withdrawals in excess of taxable profits performed before 31 December 2013 may opt to levy part or the total amount of such withdrawals with the replacement tax at a 32% rate.

Local income taxes

Chilean legislation does not establish any local income taxes.

Corporate residence

Companies incorporated in Chile are considered to be domiciled in the country.

Permanent establishment (PE)

An entity may be considered as a PE under DTT terms but not under domestic law. In this case, in principle, the corresponding WHT should apply over the gross basis of the remittance.

However, Chilean IRS rulings have interpreted the relation between the two different PE concepts, in the sense that, even though domestic requirements are not met, the taxpayer may choose to be treated as a local PE in order to be allowed to deduct the expenses incurred in the PE's business.

Other taxes

Value-added tax (VAT)

VAT is payable on the transfer of goods and the provision of services at a 19% rate. In general terms, this tax is levied over the price of the following goods and services:

- Sales and other agreements used to transfer the ownership of tangible goods, or real estate owned by a construction company, provided that said operations are

Chile

customary. The law assumes that all sales made within the ordinary course of business are customary.

- Services that are commercial, industrial, or financial, or that are connected to mining, construction, insurance, advertising, data processing, and other commercial operations.
- Imports, customary or not.

Normally, the sale of fixed assets is not subject to VAT, unless the assets are sold before the end of their useful lives or within four years from the date of acquisition. The sale of immovable property as fixed assets is subject to VAT only when the sale takes place within 12 months from the date of acquisition.

VAT works on a credit-debit system. The tax borne by a company or business in the acquisition of goods or services is called the 'VAT credit'. The VAT charged on the goods and services sold to customers is called the 'VAT debit'. As a general rule, the seller or service provider is obligated to withhold and pay the VAT. The tax amount is added to the invoice; consequently, the final consumer economically bears the VAT.

Exceptionally, when a seller or service provider is not domiciled in Chile or when, for other reasons, the IRS has difficulties assessing the correct payment of VAT, the responsibility to withhold and pay the tax is transferred to the buyer or beneficiary of the service.

The tax is paid every month by deducting the VAT credit from the VAT debit. The balance due (when the debit is greater than the credit) must be paid within the first 12 days of the month following the month in which the transaction took place.

If, in a given month, the VAT credit is greater than the VAT debit, the balance may be kept and carried forward to the following months.

Law N° 20,727 gradually establishes the compulsory use of electronic invoices and other tax documents, such as credit and debit notes, purchase invoices, etc. The implementation of this system is scheduled as follows:

- Large companies by 1 November 2014.
- Medium and small urban companies by 1 August 2015.
- Medium and small rural companies by 1 February 2016.
- Urban micro companies by 1 August 2016.
- Rural micro companies by 1 February 2017.

There are qualified exceptions to this electronic regime, such as zones where there is no public electricity, zones declared as a disaster area, and other exceptions authorised by the IRS.

Law N° 20,727 also establishes the express acknowledgement of the invoice receipt as an enabling requirement in order to use the fiscal credit.

The Tax Reform also introduces certain changes to the VAT Law. As of 1 January 2016, a sale commitment is not a taxable event and the habitual sale of new or used real estate property (excluding the land's cost) is a taxable event. However, certain exemptions are available, according to Law N° 20,899, published on 8 February 2016 in the Official Gazette, for buildings that received their building authorisation prior to 1 January 2016 and provided that the sale was performed before 1 January 2017, or for new buildings that received their building authorisation prior to 1 January 2016 and provided that request for definitive building reception was submitted before 1 January 2017.

Additionally, as of 1 January 2016, leasing agreements by a habitual seller are a taxable event. Notwithstanding that the above are exempted when the acquisition of

the real estate property subject of the relevant leasing was not taxed with VAT and the aforementioned acquisition was performed to enter into the leasing agreement.

Customs duties

As a general rule, the customs duty rate is 6%. However, as Chile has an extended network of free trade agreements (FTAs), reduced or zero customs duties rates are available.

Duties on goods are imposed on the cost, insurance, and freight (CIF) price, without deducting special discounts.

In general, Chile has a very open economy, and there are no significant barriers to foreign trade.

Excise taxes

Alcoholic beverages, certain non-alcoholic beverages (e.g. beverages high in sugar levels, hypertonic beverages), tobacco, and certain luxury items (e.g. jewels) are subject to an additional sales tax ranging from 13% to 50%.

A variable gasoline tax is also levied on the difference between a fixed amount and the sales price of gasoline and diesel oil.

The Tax Reform increased the taxes applicable to alcoholic and certain non-alcoholic beverages, as well as the specific tax applicable to tobacco (whilst reducing the excise tax, with an overall result of a tax increase).

Additionally, the Tax Reform gradually introduces 'green taxes', which are taxes that are levied on the issuance of certain pollutants by some non-eco-friendly assets, such as boilers or turbines that individually or jointly add a thermal power of 50MWt. It also establishes a corrective tax on the issuance of certain local pollutants connected to vehicles' performance.

Real Estate Tax

Real Estate Tax is levied over an official valuation of real estate at an annual rate of 1.4% in case of non-farming real estate and 1% for farming real estate. Some real estate is exempt from this tax.

Transfer taxes

Currently, Chilean law has not established any transfer taxes.

Stamp tax

Stamp tax is levied mainly on documents that evidence money lending operations, and its rate varies depending on the executed document.

For documents subject to a specific date, stamp tax applies at 0.066% per month or fraction of a month. The maximum stamp tax rate is 0.8%. For documents payable on demand or without an expiration date, the tax rate is 0.332%.

Payroll taxes

The income that the employer pays to the employee that provides personal services in a subordinate and dependent relationship under an employment contract is subject to payroll tax.

Payroll tax is characterised as a single tax that is based on a progressive scale of rates, ranging from 0% to 40%, applicable to income branches. Only the income or remuneration received is subject to this tax. Whoever pays the taxable income must deduct and withhold the tax on a monthly basis.

Chile

As of 2017, the maximum rate will be reduced from 40% to 35%.

Social security contributions

Pursuant to Chilean legislation, affiliation to the Chilean social security system is mandatory from the moment that any individual starts rendering services due to an employment contract.

In order to contribute to the Chilean social security scheme, the assignee needs to be incorporated into the Chilean pension fund (AFP), the Chilean health insurance (private health insurance [ISAPRE] or public health insurance [FONASA]), death and disability insurance, work related accidents and professional illness insurance, and unemployment insurance.

An employer's obligation for social security is low, as it only assumes part of the unemployment insurance (2.4% calculated over the worker's gross salary). Whilst the employee assumes most of the social security contribution (approximately 20% of gross salary).

Branch income

Branches of foreign corporations operating in Chile are taxed on their worldwide income, subject to the FCT at the corresponding tax rate (24% in 2016).

Currently, branches are subject to a 35% WHT on amounts remitted abroad or withdrawn during the calendar year, which is payable in April of the year following the distribution. The FCT is creditable against the WHT; consequently, the total tax burden of a branch is 35%.

However, due to the Tax Reform, as of 1 January 2017, the taxation of these amounts at the branch's level will depend on the applicable taxation system (i.e. WHT will levy amounts attributed [AIS] or effectively remitted or withdrawn [PIS]) during the calendar year, and the corresponding tax will need to be filed and paid in April of the following year.

Income determination

As a general rule, for purposes of the FCT, corporate income is determined on an accrual basis.

Inventory valuation

Inventories must be valued in accordance with monetary correction provisions, basically by adjusting raw material content and direct labour to replacement cost (which is generally the most recent cost), but excluding indirect costs. No conformity is required between book and tax reporting for income determination. Last in first out (LIFO) is not allowed for tax purposes.

Capital gains

Capital gains are subject to normal taxation unless special provisions, such as those pertaining to gains on the sale of shares/quotas or monetary correction on capital repayments, establish exemptions.

Under domestic laws, in certain circumstances, the capital gains derived from the following securities will be subject to a preferential tax treatment:

- Stock of listed local companies.
- Investment funds' quotas listed on an authorised stock exchange market.

- Mutual funds' quotas if the fund invests in stock trade values.
- Investment funds' quotas not participating in a stock exchange market or mutual funds, where at least 90% of the investment portfolio is in a stock exchange market.

Note that, due to indirect sales provisions, capital gains arising from the sale of foreign companies holding Chilean assets may be subject to Chilean taxation if certain requirements are met.

Please note that the Tax Reform eliminates or reduces certain preferential taxation regimes applicable to the capital gain obtained in the alienation of certain assets (e.g. property, shares, quotas).

Amendments to capital gains taxation

Shares or quotas capital gains

The Tax Reform eliminates, as of 1 January 2017, the sole tax regime applicable to the capital gains derived from the alienation of shares or quotas of Chilean entities.

Under the new regime, capital gains derived from the alienation of shares or quotas from Chilean entities will be subject to either general tax regime.

In case of shares or quotas of entities subject to the AIS regime, the accumulated attributed income that has not been distributed will be considered as part of the shares' or quotas' cost basis for capital gains purposes.

Real estate (property) alienation

The exemption applicable to capital gains obtained upon the alienation of real estate is partially limited.

Real estate (property) acquired before 1 January 2004 and sold after 1 January 2017

In the case of real estate (property) acquired before 1 January 2004 and sold after 1 January 2017, the capital gain exemption upon the alienation of real estate will apply without the limitations included in the tax reform.

Real estate (property) sold before 1 January 2017

For real estate (property) sold before 1 January 2017, capital gain is subject to current rules applicable to the capital gain derived from its alienation (in force until 31 December 2016).

Real estate (property) acquired after 1 January 2004 and sold after 1 January 2017

For real estate (property) acquired as of 1 January 2004 and sold after 1 January 2017, capital gains obtained upon the alienation will be considered as non-taxable income as long as the following joint requirements are met: (i) the seller should be an individual domiciled in Chile; (ii) the acquirer must not be a related entity; (iii) more than one year must have elapsed between the acquisition date and the alienation date or four years in case of alienation of buildings per floors or apartments or in case of land subdivision; and (iv) the total capital gains obtained by the taxpayer upon the alienation of real estates, during its whole life, should not exceed 8,000 *unidades de fomento* (UF, which is a determined amount of Chilean pesos duly adjusted for inflation on a daily basis), regardless of the number of real estates owned by the taxpayer and the transfers performed.

If the requirements mentioned in (i), (ii), and (iii) above are not met, the total capital gain will be subject to the general taxation regime. If the above requirements are met, but the capital gain exceeds UF 8,000, the excess will be subject to: (i) surtax as a sole tax, on an accrued or cash basis, with the option of reassessment within ten years, or (ii) 10% sole and replacement tax, applied on a cash basis.

Chile

Dividend income

As a general rule, dividends received by Chilean entities from other Chilean entities that have already been subject to FCT are not subject to the FCT again at an entity level. However, when these dividends are distributed up-stream, and the ownership chain reaches the final Chilean owners or the foreign owners, they will be taxed with the Global Complementary Tax or the Additional WHT, respectively.

Interest income

No specific provision exists in Chile for interest income; consequently, interest income is subject to FCT.

Foreign income

Resident corporations are subject to taxes on their worldwide income. In general terms, foreign income and dividends received by a domestic corporation are subject to Chilean taxation in the commercial year when it was received (i.e. on a cash basis). A tax credit for taxes paid abroad is granted, subject to the regulations of the Income Tax Law.

Law N° 20,899 modified foreign income recognition rules.

Currently, as a general rule, the tax credit for taxes paid abroad is allocated only to foreign-source income. However, Law N° 20,899 modified the aforementioned rule, providing that the tax credit for taxes paid abroad may be allocated to Chilean-source income, as it considers that foreign-source income becomes Chilean-source income once it is included in the taxpayer's net taxable income and levied with Chilean taxes. This new rule will enter into force on 1 January 2017.

From commercial year 2016 onwards, CFC rules may apply, provided certain requirements are met.

Branches of foreign corporations are taxed on their income without regard to the results of the head office.

Deductions

An FCT payer's net taxable income is calculated by deducting from gross income those expenses incurred to generate it that have not already been deducted as costs.

As a general rule, expenses are not deductible for income tax purpose if they are not incurred to generate taxable income.

Depreciation and depletion

Depreciation rates are calculated based on the asset's estimated useful life. The normal depreciation terms for new assets are as follows: heavy machinery, 15 years; trucks, 7 years; factory buildings, in general, 20 years to 40 years. At the request of the Foreign Investment Committee or the taxpayer, the IRS may reduce the normal useful life.

Annual depreciation is calculated based on the straight-line method. However, taxpayers may recover capitalised costs by using the accelerated depreciation method for up to one-third of the normal useful life regarding new or imported fixed assets, provided that the normal period of depreciation is at least three years.

Accelerated depreciation may be used only to reduce the taxable basis of the FCT. For the purpose of the tax applicable to distributions of dividends, accelerated depreciation is not considered.

No conformity is required between book and tax depreciation.

For tax purposes, depletion for natural mineral resources is allowed on a unit-of-production basis.

The Tax Reform, in order to benefit micro and small entities, establishes a faster depreciation method they can use, provided certain requirements are met.

Goodwill

Under the Tax Reform, goodwill is no longer amortisable.

Until 31 December 2014, under the goodwill and negative goodwill provisions, that is to say when the amount paid was higher/lower than the absorbed entity's tax equity in a statutory merger process or by the reunion of 100% of interests, the law established that the difference must be either added or deducted proportionately into the non-monetary assets of the target with a cap of its fair market value. The difference (if any) was considered as deferred loss/income that was to be recognised for tax purposes over a period of ten years on a straight-line basis.

Provided there were no non-monetary assets in the absorbed entity, goodwill was considered as an intangible asset that could be amortised as a necessary expense over a period of up to ten years.

However, due to the Tax Reform, as of 1 January 2015, after adjusting the non-monetary assets' value up to fair market value, the remaining goodwill amount will be considered as a non-amortisable intangible asset.

Start-up expenses

Start-up expenses must be capitalised and considered as an asset for tax purposes. However, they can be amortised over a six-year period counted from the year in which they were incurred or the start-up of commercial activities.

Furthermore, they are usually deducted when the income is generated.

Interest expenses

As long as the interest paid meets the general requirements set forth by the Income Tax Law, interest expenses can be deducted.

Bad debt

In general, bad debts are deductible only if (i) they are a consequence of operations related to the business purpose, (ii) they have been timely written off into the accounting records, and (iii) the company has prudentially exhausted all reasonable means to collect them.

Determination of whether the company has prudentially exhausted all reasonable means to collect the bad debts varies according to the total amount of the debts. Therefore, a simple estimation or general provision for bad debts is not allowable.

Charitable contributions

Charitable contributions may be deducted from gross income, provided they are made to the institutions established by certain laws (i.e. primary and secondary educational institutions, universities, professional or technical education institutions, National Fire Brigade, National Solidarity Fund, etc.).

In case of charitable contributions, the total annual tax deduction for this purpose is limited, as the deductible amount for this purpose may not exceed 5% of the company's net taxable income.

Chile

Fines and penalties

Fines and penalties imposed for breaching the law or a contract are not deductible, although a deduction is usually available for the legal costs incurred in defending such an action.

Taxes

Taxes imposed by Chilean laws are deductible, provided they are related to the company's normal activities. However, income taxes and special contributions for promotion or improvement are not deductible.

Net operating losses

An indefinite carryforward of losses is allowed. Consistent with monetary correction, losses carried forward are adjusted by a cost-of-living increase. Carrybacks are allowed when the taxpayer has retained tax profits and has a subsequent tax loss.

As of 1 January 2017, carryback losses will no longer be allowed, whilst the treatment of loss carryforwards will remain the same.

Payments to foreign affiliates

The deductibility of payments made abroad for the use of trademarks, patents, formulas, and consulting and other similar services is limited to a maximum of 4% of the income derived from sales and services in the corresponding year, unless the royalty is subject to an income tax with a rate of greater than 30% in the country of the beneficiary.

The Tax Reform allows the deduction of payments made to foreign-related parties, as under current rules. However, as of 1 January 2015, these expenses are deductible in the year in which they are effectively paid by the Chilean entity to the foreign-related party and only if the corresponding Additional WHT (if any) was paid.

Transfer pricing regulations in Chile are in line with general Organisation for Economic Co-operation and Development (OECD) principles (*see the Group taxation section*).

Group taxation

Consolidated returns are not allowed in Chile.

Transfer pricing

The transfer pricing legislation generally adheres to the OECD in its Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations (OECD Guidelines). The law establishes contemporaneous documentation requirements, filing of an informative return, and specific penalties for non-compliance.

Although the law does not explicitly mention the adoption of the methods established in the OECD Guidelines, the methods described therein are in line with them. The rules also adopt the best method rule and allow the use of other unspecified methods when the methods described in the Chilean Income Tax Law are deemed not appropriate to determine the arm's-length nature of the inter-company transactions.

Finally, the Income Tax Law includes the ability to enter into advance pricing agreements (APAs), unilateral or multilateral. The Chilean tax authority can reject, totally or partially, the request, and such decision is not subject to an administrative appeals procedure. APAs should be valid for four years and are subject to renewal or extension.

Thin capitalisation

The Tax Reform amended thin capitalisation rules as of 1 January 2015. In this regard, thin capitalisation rules apply to related-party loans at a 3:1 debt-to-equity ratio, and a

35% sole penalty tax is levied on interest, commissions, services, or any other financial disbursements associated to loans subject to the 4% Additional WHT rate established in certain cases contemplated in Article 59 N° 1 of the Chilean Income Tax Law or any rate lower than 35% due to a DTT, when the taxpayer is in an excess of indebtedness position.

The excess of indebtedness is calculated on an annual basis, and, in order to determine if the taxpayer is in an excess of indebtedness position, its total annual indebtedness takes into consideration all loans, domestic or foreign, with related parties or not.

Additionally, according to Law N° 20,899, published in the Official Gazette on 8 February 2016, the determination of the excess of indebtedness' taxable basis includes not only interest subject to the 4% rate but also all amounts that have been taxed at a rate lower than 35% or that have not been taxed due to the application of a local law or due to the application of a reduced rate due to a DTT.

In case the company is in an excess of indebtedness position, the tax will apply only to cross-border loans granted by related parties and subject to the 4% Additional WHT.

Controlled foreign companies (CFCs)

As of 1 January 2016, a new set of CFC rules entered into force. This new CFC statute provides that taxpayers or affectation equities (*'patrimonios de afectación'*) incorporated, resident, or domiciled in Chile will have to recognise passive income (dividend, interest, royalties, etc.) directly or indirectly derived from controlled foreign entities, as long as this passive income exceeds 10% of the controlled entity's total revenues, in the corresponding calendar year. A tax credit will be granted for taxes paid or due abroad no matter how many levels down the chain separate the controlled entity from the Chilean entity, as long as there is a DTT in force between Chile and the source country of the income.

Tax credits and incentives

Foreign tax credit

In order to avoid double taxation, the Chilean Income Tax Law recognises a tax credit mechanism in which the tax effectively paid abroad may be deducted from the taxes to be paid in Chile.

In order to regulate this matter, the Chilean Income Tax Law distinguishes between those countries with which there is a DTT in force with Chile and those that do not have a DTT in force with Chile.

A foreign tax credit may be used even if the foreign tax was paid by an indirect subsidiary of the company remitting the funds to Chile, provided that all the entities are domiciled in the same country and that the remitting entity directly or indirectly participates in 10% or more of the equity of the company paying the foreign tax. This rule, due to Law N° 20,899, is extended, and, as of 1 January 2017, it will be possible to use a tax credit in Chile for taxes paid by a subsidiary domiciled in a third country if such subsidiary is domiciled in a country with which Chile has a DTT in force.

The foreign tax credit may be carried over for FCT purposes even if the company is in a tax loss situation or if the FCT is lower than the credit.

The total available foreign tax credit has a 35% cap in respect to income taxes paid in countries with which Chile has a DTT in force. In respect to those countries with which Chile has no DTT, the tax credit cap is 32%.

Chile

Currently, as a general rule, the tax credit for taxes paid abroad is allocated only to foreign-source income. However, as of 1 January 2017, the tax credit for taxes paid abroad will be allocable against Chilean-source income, as foreign-source income will be considered Chilean-source income once it is included in the taxpayer's net taxable income and levied with Chilean taxes.

The possibility to carry this tax credit forward remains if there is a remnant. On the contrary, if a tax loss is determined, the tax credit for taxes paid abroad is extinguished.

Investment incentives

The principal investment incentives are the following:

- Tax benefits and other incentives for companies operating in the northernmost and southernmost parts of the country.
- Tax benefits to forestry companies, contracts for oil operation, and nuclear material operations.
- The Tax Reform introduces a series of tax benefits for micro and small entrepreneurs and companies, which are reinforced by Law N° 20,899.

Inbound investment incentives under Law Decree N° 600 (Foreign Investment Statute)

The principal incentives to encourage foreign capital contributions are statutory guarantees covering the repatriation of capital, remittance of profits, non-discrimination toward foreign investment, and access to the foreign exchange market for remittance purposes. In general, foreign investors are subject to the same legislation as national investors. A guaranteed income tax rate of 42% may be granted for ten years or, provided the capital investment project exceeds 50 million United States dollars (USD), 20 years for the development of industrial or extractive projects, under Law Decree N° 600, which contemplates the execution of a Foreign Investment Agreement between the foreign investor and the Chilean government.

Under Law Decree N° 600 and the corresponding Foreign Investment Agreement, the overall rate is comprised of the corporate tax on profits and WHT on dividend or branch profit distributions. The tax rate on dividend or profit distributions is the difference between 42% and the underlying tax paid at the corporate level. The option to be subject to an overall effective tax rate of 42% without change for ten or 20 years is usually not exercised by foreign investors because the current combined effective tax rate on profits and dividend distribution is 35% under the general tax regime.

Under the Foreign Investment Agreement, a foreign investor may request for tax stability with respect to VAT and customs duty regimes. With respect to customs duties, however, stability is granted only for the importation of certain machinery and equipment not available in Chile.

The Tax Reform established the elimination of Law Decree N° 600 as of 1 January 2016 with respect to new investment projects; however, Law N° 20,848, published in the Official Gazette on 25 June 2015, extended the enforceability of Law Decree N° 600 for four years more, counted as of 1 January 2016.

Foreign investors who have already entered into an investment agreement under Law Decree N° 600 with the Foreign Investment Committee will continue being subject to the laws applicable to such agreements according to current rules. On the contrary, new investments, as of 1 January 2016, will be able to opt between the foreign investment statute under Law Decree N° 600 and the new foreign investment statute established by Law N° 20,848.

Law N° 20,848 establishes the frame for ‘direct foreign investment’ in Chile and creates a Committee of Ministers for the promotion of foreign investment, as well as an Agency for the promotion of foreign investment.

Please note that it is not mandatory for foreign investors to opt among one of these two foreign investment regimes, as they can freely invest in Chile as long as they do it through the formal exchange market.

Export incentives

The principal incentives for exports can be summarised as follows:

- Taxes paid in the importation or acquisitions of goods required in the export activity are reimbursed.
- VAT on exports is zero-rated.

Chile has signed FTAs with Australia, Bolivia, Canada, Central America (i.e. Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua), China, Colombia, the European Union, Hong Kong, Japan, Malaysia, Mexico, Panama, Peru, Republic of South Korea, Thailand, Turkey, the United States, and Vietnam. All these agreements provide for reduced or zero rate customs duties.

Withholding taxes

Dividends paid to a non-resident recipient are subject to a 35% withholding of ‘additional’ tax, with the FCT paid at the corporate level being creditable against this WHT. This credit is added to the amount that is distributed to form the taxable base for Additional WHT. Consequently, the tax burden for a non-resident recipient of dividends, including taxes at the company level, is 35%.

Branches are subject to a 35% WHT rate on amounts remitted or withdrawn, less the FCT credit. *See the Branch income section for more information.*

In the case of a foreign investor that has applied for the 42% tax invariability under Law Decree N° 600, the effective tax burden is 42%. *As provided in the Tax credits and incentives section*, Law Decree N° 600 will be abolished four years after 1 January 2016 for all new investments, but will remain in force for those foreign investors who entered into Foreign Investment Agreements with the Chilean government before that date.

Between 1 January 2016 and the date on which Law Decree N° 600 is abolished, new foreign investors will be able to choose between the new foreign investment statute established by Law N° 20,848, Law Decree N° 600, or just using the formal exchange market.

As of 1 January 2017, the Tax Reform amends the total integration between the FCT and the Additional WHT, the FCT not being completely creditable against the Additional WHT in certain cases, depending on the income taxation system to which the entity distributing the dividends is subject to.

If the entity is subject to the AIS, the foreign recipient of the dividends will be able to credit 100% of the FCT paid at the entity level. If the entity is subject to the PIS and the foreign recipient of the dividends is resident in a country with which Chile has a DTT in force, the foreign taxpayer will be able to credit 100% of the FCT paid at the entity level, against its Additional WHT. Therefore, their total Chilean tax burden will be 35%.

On the contrary, if the entity distributing the dividend is subject to the PIS, but the foreign recipient of such dividends is not domiciled in a country with which Chile has a DTT in force, the taxpayer will be able to credit against its Additional WHT only 65%

Chile

of the FCT paid at the entity level. Thus, foreign taxpayers in this situation will have a total Chilean tax burden of 44.45%, considering that the FCT rate will correspond to 27% from commercial year 2018 onwards, *as it was explained in the Taxes on corporate income section*.

Interest paid to non-residents is subject to WHT at a general 35% rate. Interest on loans granted by foreign banks or financial institutions is subject to a sole 4% WHT. Thin capitalisation rules requesting a 3:1 debt-to-equity ratio become applicable when the debt generating interest subject to the lower than 35% rate is secured by related entities.

Royalties paid to non-residents are subject to the WHT at a 30% rate. Royalty payments in connection to software are subject to Additional WHT at a 15% rate. Such rate is increased in case the beneficiary of the payment is resident in a tax haven or in case the payment is made to a related entity.

Tax treaties

The following table shows the higher and lower rates on WHT applicable by Chile and the countries with which DTTs exist. The application of one or the other rate will depend on the specific provisions of each treaty.

Please note that Chile has signed DTTs with Argentina, China, the Czech Republic, Italy, Japan, South Africa, and the United States that are not yet in force.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Australia	5/15 (18)	5/10/15 (19)	5/10 (2)
Austria	5/15 (20)	5/10/15 (19)	5/10 (2)
Belgium	15	5/15 (1)	5/10 (2)
Brazil	10/15 (3)	15	15
Canada	5/15 (4)	10/15 (5)	10
Colombia	0/7 (6)	5/15 (7)	10
Croatia	5/15 (8)	5/15 (7)	5/10 (2)
Denmark	5/15 (4)	5/15 (9)	5/10 (10)
Ecuador	5/15 (4)	5/15 (10)	10
France	15	5/15 (1)	5/10 (2)

Notes

- 15% as a general rule. Interest arising from bank or insurance company loans, bonds, some securities that are regularly negotiated on stock markets, and credit sales of industrial equipment is taxed at a 5% tax rate.

2. 10% as a general rule. 5% is applicable for the use or the right to use some equipment.
3. 10% if the beneficiary owns at least 25% of the company's shares. 15% in all other cases.
4. 5% if the beneficiary owns at least 25% of the company's shares. 15% in all other cases.
5. 15% as a general rule. 10% if the most favoured nation clause applies.
6. 0% if the beneficiary owns at least 25% of the company's shares. 7% in all other cases.
7. 5% if the beneficiary is a bank or an insurance company. 15% in all other cases.
8. 5% if the beneficiary owns at least 20% of the company's shares. 15% in all other cases.
9. 15% as a general rule. It could be 5% by the application of the most favoured nation clause.
10. 5% for the use of, or the right to use, some equipment. 10% by the application of the most favoured nation clause.
11. 5% if the beneficiary owns at least 20% of the company's shares. 10% in all other cases.
12. 15% as a general rule. If the most favoured nation clause applies, 10% as a general rule, 5% if interest is paid to a bank.
13. 15% as a general rule. 10% if interest is paid to banks or insurance companies, or if the most favoured nation clause applies.
14. 10% if the beneficiary is a bank or an insurance company. 15% in all other cases.
15. 15% as a general rule. 10% or 15%, depending on the interest source.
16. 5% if the beneficiary owns at least 25% of the company's shares. 10% in all other cases.
17. 15% as general rule. 10% for the use of, or the right to use, any copyright of literary, artistic, or scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
18. 5% if the beneficiary owns at least 10% of the company's shares. 15% in all other cases.
19. 5% if the interest is paid to a financial institution. 10% in all other cases. However, Chile may tax interest arising in the country at a 15% rate.
20. 5% if the beneficiary holds at least 10% of the company's voting power. 15% in all other cases.

Please note that notwithstanding most DTTs provide that interest paid to bank or financial institution will be subject to a 5% or 10% WHT, as Chile applies a 4% Additional WHT rate to interest paid to foreign banks or financial institutions, the local tax rate is applied instead of the treaty rate, as local law is more favourable.

Tax administration

Taxable period

The tax year coincides with the calendar year.

Tax returns

The tax system is one of self-assessment by the taxpayer, with occasional auditing by the tax authorities. Annual tax returns must be filed with the IRS before 30 April of each year with respect to the operations of the previous calendar year.

Note that there are many other sworn statements with different deadlines, from March until June of each year.

Payment of tax

Taxes are payable when the annual tax return is submitted in April of each year.

Taxpayers, in general, are subject to monthly advance payments on account of their annual income taxes. The difference between the advance payments and the final tax bill is payable in cash at the time the tax return is filed. If prepayments exceed the final tax bill, the excess is reimbursed by the Treasury.

Tax audit process

Generally, the Chilean tax system is based on self-assessment; however, many large businesses are under continuous audit by the Chilean IRS. Businesses and individuals are also generally subject to audit on a random basis.

Statute of limitations

As a general rule, the statute of limitations is three years. However, it can be extended to six years if no tax return was filed or if the tax return was maliciously false.

Topics of focus for tax authorities

The tax authority is currently focused on transfer pricing issues, the implementation of the 2014 Tax Reform, and the issuance of materially false invoices for politic financing purposes.

Chile

General Anti-Avoidance Rule (GAAR) provisions

On 30 September 2015, the GAAR provisions targeting tax-motivated transactions introduced by the Tax Reform entered into force, applying to transactions executed or concluded after the aforementioned date.

The new GAAR provisions grant the Chilean IRS the power to request to the corresponding Tax Court the disallowance of the tax benefits obtained from abusive tax planning. If the tax judge considers that the taxpayer has acted in an abusive way or is simulating a conduct in order to obtain certain tax benefits, the taxpayer will have the obligation to pay the corresponding taxes, interest, and penalties, as if the abusive or simulated conduct never existed (substance-over-form principle).

A new consultation procedure is introduced pursuant to which taxpayers may ask the Chilean IRS to determine whether or not a transaction may fall under the GAAR provisions.

Law N° 20,899 clarifies that GAARs will not apply to those transactions whose main elements have been set before the entry into force of these rules, whilst they will apply to transactions executed or concluded before the entry into force of the GAAR provisions but that are amended after such date.

Other issues

Reporting on investments in Chile and abroad

As of 1 January 2017, FCT payers, regardless of the tax system they choose, will have the duty to report their local and foreign investment to the Chilean IRS.

Chilean foreign investment

The taxpayer will have to file an annual affidavit, informing all the investments performed during the previous year, pointing out the amount, kind of investment, country, purpose, and any other additional information the Chilean IRS may require.

If the affidavit is not filed, the Chilean IRS will presume (except where the taxpayer proves otherwise) that such amounts constitute withdrawals of assets or amounts subject to the penalty tax established in Article 21, not being entitled to deduct the disbursement as expense for FCT purposes.

Investment in Chile

Companies or entities incorporated, resident, or domiciled in Chile obtaining passive income will not be entitled to use such investments in an abusive manner in order to reduce or differ final taxation of its owners, partners, or shareholders.

If the Chilean IRS determines the existence of abusive conduct, such investments will be subject to the penalty tax established in Article 21 of the Chilean Income Tax Law.

Low-tax jurisdictions

In order to qualify as a low-tax jurisdiction or preferential tax regime, the relevant territory must comply with two or more of the requirements set forth in new Article 41 H of the amended Income Tax Law.

Please note that OECD member countries will never be considered as low-tax jurisdictions or preferential fiscal regimes.

Foreign Account Tax Compliance Act (FATCA) agreement

On 5 March 2014, Chile entered into a bilateral intergovernmental agreement (IGA) with the United States (US) in order to comply with FATCA.

Chile signed a Model 2 IGA, which is a non-reciprocal exchange of information agreement. The execution of this agreement will imply that Chilean Financial Institutions with US account holders, in order to avoid paying the 30% rate WHT that FATCA establishes, will have to register with the US Treasury and US IRS and sign a Foreign Financial Institutions Agreement with them in order to be FATCA compliant.

In this context, each Chilean financial institution that enters into these agreements with the US tax authorities will be required to report to the US IRS directly the individual US account holder's information.

In accordance with the Chilean Bank Secrecy Law, Chilean financial institutions, in respect to those account holders that do not authorise them to disclose their account information to the US IRS, will only be able to disclose their information in aggregate. This will mean that the US IRS, in order to obtain the specific information of those US account holders, will need to request it directly from the Chilean IRS, under the terms of the DTT between both countries, once it is in force.

Taxation applicable to funds

The Funds Law (Law N° 20,712) recently enacted is modified by amending the tax treatment applicable to mutual funds, public and private investment funds, and to their quota holders.

Investment funds and mutual funds continue to not be considered as FCT payers, but it is established that the managing entities will need to keep a number of registries in order to determine the taxation applicable to their quota holders, regarding the amounts attributed or distributed by the fund.

These amendments gradually enter into force until 1 January 2017. The quota alienation has a differentiated treatment depending on their acquisition date.

Significant developments

In September 2015, the State Administration of Taxation (SAT) released a rule to introduce a new mechanism of self-assessment on the eligibility for tax treaty benefits by non-residents. The pre-approval process or record-filing acknowledgement from the Chinese tax authorities is no longer necessary starting from 1 November 2015. Instead, non-residents and their withholding agents will be required to file certain prescribed forms and other supporting documents when performing tax filing to justify their claims for the tax treaty benefits. The tax position taken by the non-residents or withholding agents will be subject to examination by the Chinese tax authorities after the tax filing.

In March 2016, the Ministry of Finance (MoF) and SAT jointly released a circular to expand the pilot programme for the transformation of business tax (BT) to value-added tax (VAT) to cover the construction sector, real estate sector, financial services, and consumer services. Starting from 1 May 2016, all goods and service are subject to VAT; consequently, BT is obsolete.

See Recent focus of Chinese tax authorities in the Tax administration section for more information.

Taxes on corporate income

Tax resident enterprises (TREs) are subject to corporate income tax (CIT) on their worldwide income. A non-TRE that has no establishment or place in China is taxed only on its China-source income. A non-TRE with an establishment or place in China shall pay CIT on income derived by such establishment or place from sources in China as well as income derived from outside China that effectively is connected with such establishment or place.

Under the CIT law, the standard tax rate is 25%.

A lower CIT rate is available for the following sectors/industries:

- Qualified new/high tech enterprises are eligible for a reduced CIT rate of 15%. An enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a new/high tech enterprise.
- Integrated circuit (IC) production enterprises with a total investment exceeding 8 billion renminbi (CNY), or that produce integrated circuits with a line-width of less than 0.25 micrometre, are eligible for a reduced CIT rate of 15%.
- Key software production enterprises and IC design enterprises are eligible for a reduced CIT rate of 10%. An enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a key software production enterprise or key IC design enterprise.

- From 1 January 2009 to 31 December 2018, qualified technology-advanced service enterprises in 21 cities (e.g. Beijing, Shanghai, Tianjin, Guangzhou, and Shenzhen) are eligible for a reduced CIT rate of 15%. This incentive is only available to certain technology-advanced service sector members, and an enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a technology-advanced service enterprise.
- Enterprises established in the Qianhai Shenzhen-Hong Kong Modern Services Industry Cooperation Zone are eligible for a reduced CIT rate of 15%, provided that the enterprise is engaged in projects that fall within the Catalogue for CIT Preferential Treatments of the zone.
- Enterprises established in Zhuhai's Hengqin New Area are eligible for a reduced CIT rate of 15%, provided that the enterprise is engaged in projects that fall within the Catalogue for CIT Preferential Treatments of the area.
- Enterprises established in the Pingtan Comprehensive Experimental Zone are eligible for a reduced CIT rate of 15%, provided that the enterprise is engaged in projects that fall within the Catalogue for CIT Preferential Treatments of the zone.
- Qualified small and thin-profit enterprises are eligible for a reduced CIT rate of 20%. If the annual taxable income is less than CNY 200,000, the CIT rate is further reduced to 10% from 1 January 2015 to 31 December 2017. If the annual taxable income is over CNY 200,000 but less than CNY 300,000, the CIT rate of 20% is applicable from 1 January 2015 to 30 September 2015 and a further reduced rate of 10% is applicable from 1 October 2015 to 31 December 2017.
- From 1 January 2011 to 31 December 2020, encouraged enterprises in the Western Regions are eligible for a reduced preferential CIT rate of 15%.

Local income taxes

There is no local or provincial income tax in China.

Corporate residence

Enterprises established in China are always TREs. A foreign enterprise with a place of effective management in China is also regarded as a TRE.

Permanent establishment (PE)

An 'establishment or place' is defined in the CIT regulations as an establishment or place in China engaging in production and business operations, including the following:

- Management organisations, business organisations, and representative offices.
- Factories, farms, and places where natural resources are exploited.
- Places where labour services are provided.
- Places where contractor projects, such as construction, installation, assembly, repair, and exploration are undertaken.
- Other establishments or places where production and business activities are undertaken.
- Business agents who regularly sign contracts, store and deliver goods, etc. on behalf of the non-TRE.

Other taxes

China has a turnover tax system consisting of the following three taxes: value-added tax (VAT), business tax (BT), and consumption tax.

Value-added tax (VAT)

The sales or importation of goods and the provision of repairs, replacement, and processing services are subject to VAT. VAT is charged at a standard rate of 17%, and the

China, People's Republic of

rate for small-scale taxpayer is 3%. The sales of certain necessity goods may be subject to VAT at a reduced rate of 13%, as specified in the VAT regulations.

The VAT system is a consumption-based VAT system, which means that input VAT on fixed assets is fully recoverable, except for situations specified in the VAT regulations.

Export of goods from China may be entitled to a refund of VAT incurred on materials purchased domestically. The refund rates range from 0% to 17%. There is a prescribed formula for determining the amount of refund, under which many products do not obtain the full refund of input VAT credit and suffer different degrees of export VAT costs.

In order to mitigate the multiple taxation issue associated with goods and services and to support the development of 'modern service industries' in China, the State Council resolved to introduce a Pilot Program from 1 January 2012 to expand the scope of VAT to cover transportation and certain specified modern service industries that were originally subject to BT.

As of 30 April 2016, the industries that have been selected for the Pilot Program and the applicable VAT rates (for general VAT payers) are set out in the following table.

Pilot industries	Applicable VAT rate (%)
Tangible movable property leasing service	17
Transportation service	11
Postal service	11
Basic telecommunications service	11
Value-added telecommunications service	6
Certain modern service industries, including:	
• Research, development, and technical service.	
• Information technology service.	
• Cultural creative service.	
• Logistic auxiliary service.	6
• Certification and consulting service.	
• Broadcasting, cinematic, and television service.	
• Business auxiliary services.	
• Other modern services.	

Starting from 1 May 2016, the remaining industries that were still subject to BT (i.e. construction, real estate, financial services, and consumer services) will be subject to VAT. This earmarks the completion of the BT to VAT transformation and the official removal of BT from China's indirect tax system. The applicable VAT rates (for general VAT payers) for the above four industries are as follows:

Industries	Applicable VAT rate (%)
Construction and real estate	11
Financial services and consumer services	6

Small-scale VAT payers are subject to the VAT rate of 3%.

Business tax (BT)

As indicated above, before 2012, the provision of services and the transfer of immovable properties and intangible assets were subject to BT instead of VAT. BT was levied on gross turnover at rates between 3% and 20%.

The Pilot Programme, which started from 2012, gradually expanded the scope of VAT to cover certain industries that were originally subject to BT. Starting from 1 May 2016, BT is obsolete, and all goods and services are subject to VAT in China.

Customs duties

In general, a customs duty is charged in either specific or *ad valorem* terms. For specific duty, a lump sum amount is charged based on a quantitative amount of the goods (e.g. CNY 100 per unit or per kg). For *ad valorem* duty, the customs value of the goods is multiplied by an *ad valorem* duty rate to arrive at the amount of duty payable. The applicable duty rate generally is determined based on the origin of the goods.

An exemption from customs duty applies to machinery and equipment imported by a foreign investment enterprise within the amount of its total investment, for its own use, if the project falls within the encouraged category of the 'Catalogue for the Guidance of Foreign Investment Industries' and the imported machinery or equipment is not within the list of commodities that are not exempted from customs duty.

A customs duty and VAT exemption may be allowed on importation of raw materials for contract processing or import manufacturing. Goods may be imported into, and exported out of, designated Free Trade Zones and Bonded Logistics Zones without liability to customs duty or VAT.

Consumption tax

A consumption tax is imposed on specified categories of luxury and environmental unfriendly goods, including cigarettes, alcoholic beverages, jewellery, gasoline, automobiles, battery and coating, etc. The tax liability is computed based on the sales amount and/or the sales volume, depending on the goods concerned. Consumption tax is not recoverable but is deductible as an expense for CIT purposes.

Real estate tax

A real estate tax, which is based on the value of the property or rental received, is assessed annually on land and buildings used for business purpose or leased. The tax rate is 1.2% of the original value of buildings. A tax reduction of 10% to 30% is commonly offered by local governments. Alternatively, tax may be assessed at 12% of the rental value. Real estate tax is deductible for CIT purposes.

Urban and township land-use tax

An urban and township land-use tax is levied on taxpayers who utilise land within the area of city, country, township, and mining districts. It is computed annually based on the space of area actually occupied by a taxpayer multiplied by a fixed amount per square metre that is determined by the local governments.

Arable land occupation tax

Arable land occupation tax is levied on companies and individuals who build houses or carry out non-agricultural construction on arable lands. It is computed based on the space of area actually occupied by a taxpayer multiplied by a fixed amount per square metre that is determined by the local governments and is settled in a lump sum.

Land appreciation tax

A land appreciation tax is levied on the gain from the disposal of properties at progressive rates from 30% to 60%. Land appreciation tax is deductible for CIT purposes.

Stamp tax

All enterprises and individuals who execute or receive 'specified documentation', including 11 types of contracts and a few specified documents, are subject to stamp tax. The stamp duty rates vary between 0.005% on loan contracts to 0.1% for property

China, People's Republic of

leasing and property insurance contracts. A flat amount of CNY 5 applies to certification evidencing business licences and patents, trademarks, or similar rights.

Deed tax

A deed tax, generally at rates from 3% to 5%, may be levied on the purchase, sale, gift, or exchange of ownership of land use rights or real properties. The transferee/assignee is the taxpayer.

Urban construction and maintenance tax

Urban construction and maintenance tax is imposed at a certain rate on the amount of China's indirect taxes (i.e. VAT, BT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of urban construction and maintenance tax. It is charged at three different rates depending on the taxpayer's location: 7% for urban areas, 5% for county areas, and 1% for other areas.

Educational surtax

Educational surtax is imposed at 3% on the amount of China's indirect taxes (i.e. VAT, BT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of educational surtax.

Local educational surtax

Local educational surtax is levied at 2% on the amount of China's indirect taxes (i.e. VAT, BT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of local educational surtax.

Motor vehicle acquisition tax

A motor vehicle acquisition tax at a rate of 10% of the taxable consideration will be levied on any purchase and importation of cars, motorcycles, trams, trailers, carts, and certain types of trucks.

Vehicle and vessel tax

A vehicle and vessel tax is a tax that is levied on all vehicles and vessels within China. A fixed amount is levied on a yearly basis. Transport vehicles generally are taxed on a fixed amount according to their own weight, with passenger cars, buses, and motorcycles being taxed on a fixed unit amount. Vessels are taxed on a fixed amount, according to the deadweight tonnage.

Vessel tonnage tax

Vessel tonnage tax is levied on any vessel entering into a port inside the territory of China from overseas and is collected by the General Customs. The tax payable is computed based on the net tonnage multiplied by the applicable tax rate that is determined based on the net tonnage and the term of the tonnage tax licence.

Resource tax

The exploitation of natural resources, including crude oil, natural gas, coal, salt, raw metallic metals, and non-metallic metals, etc., is subject to resource tax on a sales turnover or tonnage/volume basis. The range of tax rates are specified by the State Council.

Tobacco tax

Tobacco tax is levied on taxpayers who purchase tobacco leaves within the territory of China. The tax is assessed at the rate of 20% on the purchasing value and shall be settled with the local tax bureau at the place of the purchase.

Cultural business development levy

Companies and individuals engaged in entertainment and advertising businesses shall pay cultural business development levy at 3% on the relevant income.

Payroll taxes

For employment income, an employer is obligated to withhold individual income tax from an employee's salary and settle the payment with the tax authorities on a monthly basis.

Social security contributions

Social security contributions to pension funds, medical funds, etc. are mandatory for both employers and employees in China. Employers are normally required to make social security contributions in relation to pension, medical, unemployment, maternity, and work-related injury for their employees. The percentage of social security benefits borne by employers and employees, as well as the contribution base, vary from city to city.

Branch income

Under the CIT law, a branch of a non-TRE in China is taxed at the branch level. If there is more than one branch, they may elect to file their tax at the main office in China on a consolidated basis. There is no further tax upon remittance of branch profits.

Income determination

Taxable income is defined as "gross income in a tax year after deduction of non-taxable income, tax exempt income, various deductions, and allowable losses brought forward from previous years". The accrual method of accounting should be used.

Gross income refers to monetary and non-monetary income derived by an enterprise from various sources, including, but not limited to, the sales of goods, provision of services, transfer of property, dividends, interest, rentals, royalties, and donations.

Non-taxable income refers to fiscal appropriation, governmental administration charges, governmental funds, and other income specified by the central government.

Inventory valuation

Inventory must be valued according to costs. In computing the cost of inventories, the enterprise may choose one of the following methods: first in first out (FIFO), weighted average, or specific identification.

Unrealised gain or loss due to changes in fair value

An unrealised gain or loss due to changes in the fair value of financial assets, financial liabilities, and investment properties held by an enterprise is not taxable/deductible for CIT purpose. The gain/loss is taxable/deductible only when the asset/liability actually is disposed of or realised.

Capital gains

Capital gains are treated in the same way as ordinary income of a revenue-nature for a TRE.

Dividend income

An exemption exists for CIT on dividend derived by a TRE from the direct investment into another TRE except for where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

Interest income

Interest income is treated as ordinary income.

Rental income

Rental income is treated as ordinary income.

China, People's Republic of

Royalty income

Royalty income is treated as ordinary income.

Partnership income

Partnerships registered in China are not subject to CIT. The income of a partnership is taxable at the partners' level.

Unrealised exchange gains

Unrealised exchange gain (loss) from the year-end translation of assets (liabilities) denominated in foreign currency generally is taxable (deductible).

Foreign income

The worldwide income of a TRE and its branches both within and outside China is taxable. There are no provisions in the CIT law that allow foreign income directly earned by the TRE to be deferred for tax purposes. The CIT law contains a controlled foreign company (CFC) rule under which the unremitted earnings of a foreign company controlled by Chinese enterprises may be taxable in China (*see the Group taxation section for more information*). A foreign tax credit is allowed for foreign income taxes paid on foreign-source income.

Deductions

Generally, an enterprise is allowed to deduct reasonable expenditures that actually have been incurred and are related to the generation of income.

Depreciation of fixed assets

Fixed assets with useful lives of more than 12 months must be capitalised and depreciated in accordance with the CIT regulations. Generally, depreciation is calculated by the straight-line method. Shorter tax depreciation life or accelerated depreciation may be allowed due to advancement of technology or suffering from constant vibration or severe corrosion. Production-nature biological assets, such as livestock held for breeding and commercial timber, also have to be capitalised and depreciated using the straight-line method.

Under the straight-line method, the cost of an item, less its residual value, is depreciated over the useful life of the asset. Residual value should be reasonably determined based on the nature and usage of the asset. The CIT law provides minimum useful lives for the following assets:

Assets	Years
Buildings and structures	20
Aircraft, trains, vessels, machinery, mechanisms, and other production equipment	10
Appliances, tools, and furniture etc. related to production and business operations	5
Means of transport other than aircraft, trains, and vessels	4
Electronic equipment	3
Production-nature biological assets in the nature of forestry	10
Production-nature biological assets in the nature of livestock	3

Accelerated depreciation

Shorter tax depreciation life or accelerated depreciation is allowed for particular types of fixed assets (e.g. fixed assets that need to be replaced more frequently due to advancement of technology, fixed assets that suffer from constant vibration or severe corrosion). Certain fixed assets acquired on or after 1 January 2014 by companies in certain specific industries may be expensed-off in one lump sum in the year of acquisition or be depreciated over a shorter appreciation life or under an accelerated depreciation method.

Where a shorter depreciation period method is applied, the minimum depreciation period cannot be less than 60% of the minimum depreciation period as prescribed in the CIT Law; where an accelerated depreciation method is applied, the double-declining-balance method or sum-of-years-digits method can be used.

Amortisation of intangibles and goodwill

A deduction is allowed for amortisation of intangible assets, such as, but not limited to, patents, trademarks, copyrights, and land use rights. Generally, intangible assets have to be amortised over a period of not less than ten years. For an intangible asset obtained through capital contribution or assignment, it can be amortised according to the useful life prescribed in the laws or agreed in the contracts, if any. However, acquired goodwill is not deductible until the invested enterprise is entirely transferred or liquidated.

Organisational and start-up expenses

Organisational and start-up expenses are tax deductible fully in the first year of operation.

Research and development (R&D) expense

For R&D expenses incurred for new technology, new products, or new craftsmanship, an extra 50% of the actual expenses incurred are also tax-deductible as an incentive.

Asset loss

Asset loss (including bad debt loss) may be deductible in the tax year during which such loss is incurred, provided that supporting documents are submitted to and accepted by the in-charge tax bureau before annual income tax reconciliation filing.

Interest expenses

Interest on loans generally is tax-deductible. For interest expenses on borrowings from non-financial institutions by a non-financial institution, the portion that does not exceed the commercial rate is deductible. The tax deduction of interest paid to related parties is subject to the thin capitalisation rule under the CIT law (*see the Group taxation section for more information*).

Reserves and provisions

Provisions for asset impairment reserves (e.g. bad debt provisions) and risk reserves generally are not tax-deductible unless otherwise prescribed in the tax rules. Financial institutions and insurance companies may deduct certain provisions and reserves subject to the caps specified in the relevant tax circulars.

Contingent liabilities

The CIT law does not specifically address the deductibility of contingent liabilities. According to the general principle of the CIT law, contingent liabilities are liabilities that an enterprise has not actually incurred and thus shall not be tax-deductible.

Charitable donations

Charitable donations are tax-deductible at up to 12% of the annual accounting profit. Non-charitable donations, as well as sponsorship expenditures that are non-advertising and non-charitable in nature, are not deductible.

Wages and staff welfare expenses

Reasonable wages and salaries of employees incurred by an enterprise are tax-deductible. Directors' fees are also tax-deductible. As an incentive to encourage the hiring of handicapped people, 200% of the actual salary expenses paid to handicapped staff are deductible.

Basic social security contributions, including basic pension insurance, basic medical insurance, unemployment insurance, injury insurance, maternity insurance, and

China, People's Republic of

housing funds, that are made by an enterprise in accordance with the scope and criteria as prescribed by the state or provincial governments are deductible.

Commercial insurance premiums paid for investors or employees shall not be tax-deductible unless it is paid for safety insurance for workers conducting special types of work.

Staff welfare expenses, labour union fees, and staff education expenses are tax-deductible at up to 14%, 2%, and 2.5% of the total salary expenses, respectively. For qualified enterprises, the cap for tax-deductible staff education expenses is increased to 8% of the total salary expenses.

Entertainment expenses

Entertainment expenses are tax-deductible up to the lesser of 60% of the costs actually incurred and 0.5% of the sales or business income of that year. The excess amount must not be carried forward to and deducted in the following tax years.

Advertising expenses and business promotion expenses

Advertising expenses and business promotion expenses are deductible at up to 15% (30% for certain enterprises in the cosmetics, medicine, and beverage industries) of the sales (business) income of that year unless otherwise prescribed in the tax regulations. Any excess amount is allowed to be carried forward and deductible in the following tax years. Advertising expenses and business promotion expenses incurred by the tobacco industry are entirely not tax-deductible.

Fines and penalties

Fines, penalties, and losses arising from confiscation of property are not deductible for CIT purposes.

Taxes

CIT payments and surcharges that are imposed on overdue taxes are not deductible for CIT purposes.

Net operating losses

Tax losses can be carried forward for no longer than five years starting from the year subsequent to the year in which the loss was incurred. Carryback of losses is not permitted.

Payments to affiliates

Management fees for stewardship are not deductible, but services fees paid for genuine services provided by affiliates in China or overseas and charged at arm's length should be deductible. Other payments to affiliates, such as royalties, are also tax-deductible, provided that the charges are at arm's length.

Group taxation

Group taxation is not permitted under the CIT law unless otherwise prescribed by the State Council.

Transfer pricing

All enterprises are required to conduct transactions with related parties on an arm's-length basis. The Chinese tax authorities are empowered to make adjustments to transactions between related parties that are not conducted at arm's length and result in the reduction of taxable income of the enterprise or its related parties using the following appropriate methods: comparable uncontrolled price method, resale price method, cost plus method, transactional net margin method, profit split method, and other methods that are consistent with the arm's-length principle. China also adopts

stringent requirements on the disclosure of related-party transactions in the filing of the annual tax return. In addition, there is also a requirement to prepare contemporaneous transfer pricing documentation if the amount of related parties' transactions with an enterprise exceeds a certain prescribed threshold.

The CIT law also contains transfer pricing provisions relating to cost sharing arrangements and advance pricing arrangements (APAs). In addition, it also contains a few tax avoidance rules, such as a CFC rule, a thin capitalisation rule, and general anti-avoidance rules (GAAR).

Thin capitalisation

The CIT law has a thin capitalisation rule disallowing interest expense arising from excessive related-party loans. The safe harbour debt/equity ratio for enterprises in the financial industry is 5:1 and for enterprises in other industries is 2:1. However, if there is sufficient evidence to show that the financing arrangement is at arm's length, these interests may still be fully deductible even if the ratios are exceeded.

Controlled foreign companies (CFCs)

Under the CFC rule, the undistributed profits of CFCs located in low-tax jurisdictions with an effective income tax rate of less than 12.5% may be taxed as a deemed distribution to the TRE shareholders. The Chinese tax authorities have published a list of countries (i.e. a 'white list') that they do not regard to be low-tax jurisdictions.

Tax credits and incentives

The CIT law adopts the 'Predominantly Industry-oriented, Limited Geography-based' tax incentive policy. Key emphasis is placed on 'industry-oriented' incentives aiming at directing investments into those industry sectors and projects encouraged and supported by the state. The tax incentive policies mainly include the following and are applicable to both domestic and foreign investments.

Tax reduction and exemption

CIT may be reduced or exempted on income derived from the following projects:

Projects/industries	CIT incentive	Valid period
Agriculture, forestry, animal-husbandry, and fishery projects	Exemption or 50% reduction	All years, as long as it is engaged in these projects
Specified basic infrastructure projects	3 + 3 years tax holiday (2)	Starting from the first income-generating year
Environment protection projects and energy/water conservative projects	3 + 3 years tax holiday (2)	Starting from the first income-generating year
Qualified new/high tech enterprises established in Shenzhen, Zhuhai, Shantou, Xiamen, Hainan, and Pudong New Area of Shanghai after 1 January 2008	2 + 3 years tax holiday (1)	Starting from the first income-generating year
Software enterprises	2 + 3 years tax holiday (1)	Starting from the first profit-making year or 2017, whichever is earlier
Integrated circuits design enterprises	2 + 3 years tax holiday (1)	Starting from the first profit-making year or 2017, whichever is earlier
Integrated circuits production enterprises with a total investment exceeding CNY 8 billion or that produce integrated circuits with a line-width of less than 0.25um, provided that its operation period exceeds 15 years	5 + 5 years tax holiday (3)	Starting from the first profit-making year or 2017, whichever is earlier

China, People's Republic of

Projects/industries	CIT incentive	Valid period
Integrated circuits production enterprises that produce integrated circuits with a line-width of less than 0.8um	2 + 3 years tax holiday (1)	Starting from the first profit-making year or 2017, whichever is earlier
Qualified integrated circuits packaging/testing enterprises	2 + 3 years tax holiday (1)	Starting from the first profit-making year or 2017, whichever is earlier
Qualified enterprises that manufacture key parts or equipment used for the production of integrated circuits	2 + 3 years tax holiday (1)	Starting from the first profit-making year or 2017, whichever is earlier
Qualified energy-saving service enterprises	3 + 3 years tax holiday (2)	Starting from the first income-generating year
Encouraged enterprises in underprivileged areas of Xinjiang	2 + 3 years tax holiday (1)	Starting from the first income-generating year
Projects involving a clean development mechanism (CDM)	3 + 3 years tax holiday	Starting from the first year during which the first disposal of certified emission reduction units takes place
Certified animation enterprises that produce self-developed animation products	2 + 3 years tax holiday (1)	Starting from the first profit-making year or 2017, whichever is earlier

Notes

1. '2 + 3 years tax holiday' refers to two years of exemption from CIT followed by three years of 50% reduction of CIT.
2. '3 + 3 years tax holiday' refers to three years of exemption plus three years of 50% reduction of CIT.
3. '5 + 5 years tax holiday' refers to five years of exemption plus five years of 50% reduction of CIT.

For income derived from the transfer of technology in a tax year, the portion that does not exceed CNY 5 million shall be exempted from CIT and the portion that exceeds CNY 5 million shall be allowed a 50% reduction of CIT.

A CIT exemption applies to the dividend derived by a TRE from the direct investment into another TRE, except where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

A CIT exemption also applies to the income derived by recognised non-profit-making organisations engaging in non-profit-making activities.

Reduced tax rate

The CIT rate may be reduced under certain conditions for different industries (see *the Taxes on corporate income section for more information*).

Reduction of revenue

Where an enterprise uses resources specified by the state as its major raw materials to produce non-restricted and non-prohibited products, only 90% of the income derived is taxable.

Offset of certain venture capital investment

For a venture capital enterprise that makes an equity investment in a non-listed small to medium-sized new/high tech enterprise for more than two years, 70% of its investment amount may be used to offset against the taxable income of the venture capital enterprise in the year after the holding period has reached two years. Any portion that is not utilised in that year can be carried forward and deducted in the following years.

Investment tax credit

Enterprises purchasing and using equipment specified by the state for environmental protection, energy and water conservation, or production safety purposes are eligible for a tax credit of 10% of the investment in such equipment. Any unutilised amount can be carried forward and creditable in the following five years.

Other incentives

There are also tax incentives in relation to the deduction of expenses and cost (e.g. 50% additional R&D deduction, shorter tax depreciation period, and accelerated depreciation). See the *Deductions* section for more information.

Foreign tax credit

A TRE is allowed to claim foreign tax credit in relation to foreign income tax already paid overseas in respect of income derived from sources outside China based on a country-basket principle. The creditable foreign tax also includes foreign income tax paid by qualified CFCs. However, the creditable amount may not exceed the amount of income tax otherwise payable in China in respect of the foreign-sourced income. In addition, there is a five-year carryforward period for any unutilised foreign tax.

Withholding taxes

Foreign enterprises without establishments or places of business in China shall be subject to a unilateral concessionary rate of withholding tax (WHT) at 10% on gross income from dividends, interest, lease of property, royalties, and other China-source passive income unless reduced under a tax treaty. Nevertheless, dividends distributed by a foreign investment enterprise out of its pre-2008 profit are still exempted from WHT.

WHT rates under China's tax treaties with other countries/nations are as follows (as of 1 June 2016):

Recipient	Dividends (%)	Interest (%) (1)	Royalties (%) (2)
Albania	10	10	10
Algeria	5/10 (3a)	7	10

Notes

This table is a summary only and does not reproduce all the provisions relevant in determining the application of WHT in each tax treaty/arrangement.

- 0% is due on interest paid to government bodies, except for Australia, Bosnia and Herzegovina, Brunei, Chile, Cyprus, Israel, Slovenia, and Spain. Reference should be made to the individual tax treaties.
- The lower rate on royalties applies for the use of or right to use any industrial, commercial, or scientific equipment.
- The following notes apply to dividend WHT:
 - The lower rate applies where the beneficial owner of the dividend is a company (not a partnership) that directly owns at least 25% of the capital of the paying company.
 - The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 25% of the voting shares of the paying company.
 - The lowest rate (i.e. 0%) applies where the beneficial owner is a company that directly or indirectly owns at least 50% of the capital of the paying company and the investment exceeding 2 million euros (EUR). The lower rate (i.e. 5%) applies where the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the paying company and the investment exceeding EUR 100,000.
 - The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 25% of the capital of the paying company.
 - The lower rate applies where the beneficial owner of the dividend is a company that directly or indirectly owns at least 25% of the capital of the paying company.

China, People's Republic of

- f. The lower rate applies where the beneficial owner of the dividend is a company that owns at least 10% of the voting stock of the paying company.
- g. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 10% of the capital of the paying company.
- h. The lower rate applies where the beneficial owner is a company (other than a partnership) that directly owns at least 10% of the capital of the paying company.
- i. The lower rate applies where the beneficial owner of the dividend is a company (not a partnership) that directly owns at least 25% of the capital of the paying company within at least 12 consecutive months before the payment takes place.
- j. The lowest rate (i.e. 0%) applies if the beneficial owner of the dividends is the governmental bodies specified in the treaty, any of its institutions, or other entity the capital of which is wholly owned, directly or indirectly, by that contracting state. The lower rate (i.e. 5%) applies if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- k. The 0% rate applies if the beneficial owner of the dividends is the government of the other contracting state. The 5% rate applies if the beneficial owner of the dividends is a company that directly holds at least 25% of the capital of the company paying the dividends. The 15% rate applies where those dividends are paid out of income or gains derived directly or indirectly from immovable property within the meaning of Article 6 by an investment vehicle that distributes most of this income or gains annually and whose income or gains from such immovable property is exempted from tax. The 10% rate applies in all other cases.
- l. The lowest rate (i.e. 0%) applies where the beneficial owner of the dividend is (i) the government of the other contracting state or any of its institutions or other entity wholly owned, directly or indirectly, by the government of the other contracting state or (ii) a company that is a resident of the other contracting state whose shares are at least 20% owned, directly or indirectly, by the government of the other contracting state.
- m. The lowest rate (i.e. 0%) applies where the beneficial owner of the dividend is the government of the other contracting state or any of its institutions or other entity wholly owned, directly or indirectly, by the government of the other contracting state.
- n. In the case of Papua New Guinea, the WHT shall be limited to 10% of the dividend while the Chinese tax law existing on the date of the signing of the tax treaty regarding dividends still applies; otherwise, the tax rate shall be 15%.
- o. The lowest rate (i.e. 0%) applies if the dividends are derived by a sovereign wealth fund specified in the treaty. The lower rate (i.e. 5%) applies if the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases. However, the dividends may be taxed at the rate under the domestic law if the dividends are paid out of income or gains derived from immovable property within the meaning of Article 6 by an investment vehicle that distributes most of this income or gains annually, whose income or gains from such immovable property is exempted from tax, and where the beneficial owner of those dividends holds, directly or indirectly, 10% or more of the capital of the vehicle paying the dividends.
4. The following notes apply to interest WHT:
 - a. The lower rate applies to interest payable to banks or financial institutions.
 - b. The lower rate applies to interest payable to banks or financial institutions. In all other cases, the 10% rate will be applied for two years starting from the year the tax treaty enters into force, and the 15% rate will be applied afterwards. In the event that Chile agrees to a lower rate of tax with another country (in particular with reference to financial institutions wholly owned by the government), such new rate shall automatically apply under the China/Chile tax treaty under the same conditions.
5. The following notes apply to royalties WHT:
 - a. The higher rate applies to trademarks.
 - b. The higher rate applies to copyright of literary, artistic, or scientific work, including cinematograph films or tapes for television or broadcasting.
 - c. The lower rate applies to royalties paid for technical or economic studies or for technical assistance.
 - d. The lower rate applies to royalties paid to an aircraft and ship leasing business.
6. The lower rates apply in cases where the dividend, interest, or royalty paid from Ecuador to China is applicable to the Foreign Exchange Control Tax in Ecuador.
7. The tax treaty with the former Socialist Federal Republic of Yugoslavia is now applicable to Bosnia and Herzegovina.
8. The tax treaty with the former Federal Republic of Yugoslavia is now applicable to the nations of Serbia and Montenegro.
9. These tax treaties have not yet entered into force as of 1 June 2016.

In addition to the above tax treaties, China has also entered into tax information exchange agreements (TIEAs) with a few countries. For example:

- | | | |
|---------------------------------|-------------------|---------------|
| • Argentina. | • Cayman Islands. | • San Marino. |
| • Bahamas. | • Guernsey. | |

| | • Liechtenstein. | |

Tax administration

Taxable period

The tax year commences on 1 January and ends on 31 December.

Tax returns

Enterprises are required to file their annual income tax return within five months after the end of the tax year, together with an audit certificate of a registered public accountant in China. Information on related-party transactions must be filed with the annual income tax return.

Payment of tax

Enterprises are required to file and pay provisional income taxes on a monthly or quarterly basis within 15 days following the end of each month/quarter. Three options are available to the taxpayer in computing the provisional tax: (i) actual profits of the month/quarter, (ii) average monthly or quarterly taxable income of the preceding year, or (iii) other formulas approved by the local tax authorities.

Settlement of tax payment is due, in conjunction with the annual income tax return, within five months after the end of the tax year.

Tax audit process

There is no fixed audit cycle in China. Tax audit targets are selected pursuant to certain criteria.

Statute of limitations

For unintentional errors (e.g. calculation errors) committed by the taxpayer in its tax filing, the statute of limitation is three years and extended to five years if the amount of tax underpaid is CNY 100,000 or more. For transfer pricing adjustments, the statute of limitation is ten years. There is no statute of limitation for tax evasion, refusal to pay tax, or defrauding of tax payment.

Recent focus of Chinese tax authorities

Since 2009, the Chinese tax authorities have strengthened their tax administration on transfer pricing and income derived by non-TREs. The State Administration of Taxation (SAT) has released a number of tax circulars addressing the tax administration of transfer pricing, foreign contractors and service providers, WHT on passive income, etc.

Under the CIT Law, non-TREs are subject to CIT on the capital gain derived from the disposal of equity investment in Chinese companies. In addition, the transfer has to be effected at fair value so that any gain shall be recognised for tax purpose at the time when the transaction takes places (unless the transaction qualifies for deferral tax treatment provided under the tax regulations). The Chinese tax authorities have, in recent years, challenged and clawed back CIT on several equity transfer cases whereby non-TREs disposed of their equity investment in China to related parties at cost or below 'fair value'. In addition, they have become more knowledgeable on valuation theories and methodologies and are applying them in reviewing valuation reports in order to ascertain the fair value of equity transfer transactions for tax purposes.

In addition, the Chinese tax authorities have geared up their efforts in recent years to scrutinise investment structures involving intermediate holding companies incorporated in low-tax jurisdictions. One of their focuses is on the indirect equity transfer of Chinese companies by non-TREs. The income derived by a non-TRE from the disposal of a non-Chinese company is not taxable under China's domestic income tax law. However, if the Chinese tax authorities are of the view that the non-TRE transferor has used an abusive arrangement to indirectly transfer the equity of the Chinese company (i.e. interposing and disposing of the special purpose vehicle for no reasonable commercial purpose, but just for avoidance of China withholding income tax), it may re-characterise the equity

China, People's Republic of

transfer based on the 'substance over form' principle and disregard the existence of the special purpose vehicle. Once the special purpose vehicle is disregarded, the transfer would be effectively a transfer of the underlying Chinese company's equity, and the transfer gain would be China source and subject to China withholding income tax. In early 2015, the SAT issued a circular that sets out new guidance on the assessment of indirect transfer of China taxable properties by non-TREs. The new guidance extends the scope to capture all 'China taxable properties', including not only equity investment in Chinese companies but also immovable properties located in China and assets of an establishment or place of a foreign company in China. It also provides clearer criteria on how to assess 'reasonable commercial purpose' and introduces 'safe harbour' scenarios.

The SAT has also released circulars relating to the claiming of treaty benefits by non-TREs and interpretation of certain articles and terms in the tax treaties, such as dividends, royalties, beneficial ownership, etc. Aggressive tax planning (including, but not limited to, tax-avoidance and treaty-abusive arrangements) not supported by reasonable commercial purposes and substance will be subject to scrutiny by the Chinese tax authorities. In September 2015, the SAT released a rule to introduce a new mechanism of self-assessment on the eligibility for tax treaty benefits by non-residents. The pre-approval process or record-filing acknowledgement from the Chinese tax authorities is no longer necessary starting from 1 November 2015. Instead, non-residents and their withholding agents will be required to file certain prescribed forms and other supporting documents when performing tax filing to justify their claims for the tax treaty benefits. The tax position taken by the non-residents or withholding agents will be subject to examination by the Chinese tax authorities after the tax filing.

The SAT issued a Departmental Interpretation Note (DIN) in 2010 for the tax treaty concluded between China and Singapore. It is the first time the SAT has introduced a set of technical views, interpretation, and practice guidelines for the implementation of a tax treaty in such a comprehensive manner. More importantly, this set of interpretation is also applicable to other tax treaties concluded by China if the provisions of the relevant articles in those tax treaties are the same as those in the China/Singapore tax treaty. Thus, it is likely to have a wide impact to tax residents of other countries/regions that have entered into tax treaties with China.

The SAT released a circular in March 2015 regarding the deductibility of outbound payments to overseas related parties. It sets out the SAT's position from a transfer pricing perspective in relation to all types of outbound payments to overseas related parties, including service payments and royalty payments. It reiterates that outbound payments to overseas related parties should follow the arm's-length principle. The circular lists out four types of payments that should not be deductible for CIT purpose.

General anti-avoidance rules (GAAR)

There is a GAAR provision in the CIT law allowing the Chinese tax authorities to make adjustments to taxable revenue or taxable income where business arrangements, structures, or transactions are entered into without reasonable commercial purpose and result in a reduction, exemption, or deferral of tax payment. The Chinese tax authorities may initiate a GAAR investigation if they suspect that an enterprise undertakes any of the following arrangements: abuse of preferential tax treatments, abuse of tax treaties, abuse of corporate structure, use of tax havens for tax avoidance purposes, or other arrangements that do not have a reasonable commercial purpose.

The SAT released the Administrative Measures on GAAR in late 2014. The Administrative Measures provides comprehensive guidance on the implementation of GAAR, including elaboration on certain principles, adjustment methods, procedures throughout the GAAR life cycle, and relevant documentation requirements.

Other issues

Choice of business entity

Foreign companies, enterprises, or individuals may establish equity joint ventures, contractual joint ventures, wholly foreign-owned enterprises, or representative offices in China. Certain foreign financial institutions, including banks and insurance companies, may, subject to approval, set up branches in China. Foreign investors are allowed to establish foreign invested partnerships in China. For certain foreign invested industries and projects, approval is needed from the relevant Chinese government authorities.

Development of the Foreign Account Tax Compliance Act (FATCA) in China

In late June 2014, the Chinese government reached an agreement in substance with the United States (US) on the terms of a Model 1 Intergovernmental Agreement (IGA). However, as of 31 May 2016, the China-US IGA has not been signed, and the financial institutions in China have not started implementing FATCA.

Exchange controls

Foreign exchange transactions are administered by the State Administration of Foreign Exchange (SAFE) and its branches. The regulatory administration on foreign exchange transactions of an enterprise depends on whether the transaction is a current account item or a capital account item. Current account items refer to ordinary transactions within the context of international receipts and payments, including, but not limited to, balance of payments from trade, labour services, and unilateral transfers. Capital account items refer to items of increase or decrease in debt and equity due to inflow or outflow of capital within the context of international receipts and payments, including, but not limited to, direct investment, all forms of loans, and investment in securities. Generally, a payment that falls under the category of a current account may be remitted overseas if supported with proper contracts, invoices, and tax payment/exemption certificates. In the past, most of the transactions under the category of capital account items had to be approved by the SAFE. Since the end of 2012, the SAFE has relaxed the administration of certain capital account items so that approval is no longer needed for a few types of transactions.

Intellectual properties

Patents, trademarks, and copyrights are governed by separate laws and administered by separate governmental bodies. The government encourages the development and transfer of intellectual properties. The transfer of qualified technology and qualified technical services are exempted from VAT.

Mergers and acquisitions (M&A) activities

Both Chinese domestic and foreign investors increasingly are using M&A transactions to establish or expand their Chinese operations.

The MoF and the SAT jointly released a tax circular that addresses the CIT treatments for six forms of restructuring transactions, namely, change in legal form, debt restructuring, equity acquisition, assets acquisition, merger, and spin-off. The general principle is that enterprises undergoing corporate restructuring should recognise the gain/loss from the transfer of relevant assets/equity at fair value when the transaction takes place. However, if certain prescribed conditions are satisfied, the parties involved could opt for special tax treatments, which are essentially tax deferral tax treatment. In other words, recognition of gain/loss of the transferor from transfer of assets/equity can be deferred with respect to the equity-payment portion; and the transferee may take over the transferor's tax basis of the acquired assets/equity. Such special tax treatments are only available to a very few specific types of cross-border transactions.

Significant developments

Beginning in 2015, through the end of 2019, Colombia will transition to International Financial Reporting Standards (IFRS) as the official form of accounting. While the transition period unfolds, taxes will continue to be run on the pre-existing local Generally Accepted Accounting Principles (GAAP). It is expected that legislation will be released before the end of the transition period to deal with the tax ramifications of IFRS adoption.

A tax reform was introduced in late December 2014, effective from 1 January 2015. The primary changes are as follows.

Net wealth tax

Net wealth tax on companies is implemented for taxable years 2015, 2016, and 2017. The triggering event is the holding of net wealth for tax purposes (assets less allowable liabilities) in excess of 1 billion Colombian pesos (COP) as of 1 January 2015. *See Net wealth tax in the Other taxes section for more information.*

Income tax for equality (*Impuesto sobre la renta para la equidad or CREE*)

CREE losses incurred beginning from 2015 will be eligible for offset against CREE taxable income. CREE presumptive taxable income carryforwards incurred beginning from 2015 will be eligible for offset against CREE taxable income over a five-year period.

Recaptured income, transfer pricing, and thin capitalisation rules have been clarified to apply to CREE. A recent Tax Court ruling clarified that CREE losses incurred in years 2013 and 2014 are also eligible for carryforward against CREE taxable income.

Foreign tax credit is available for CREE, provided, among other limitations, the credit is not greater than CREE's tax liability over the respective foreign-source income.

The CREE rate is to remain at 9% for 2015, 2016, and subsequent years.

The CREE temporary surcharge, which was introduced by the December 2014 tax reform and is an absolute rate increase, is as follows:

Taxable income (COP)		CREE surcharge (%) *			
Over	Not over	2015	2016	2017	2018
0	800 million	0	0	0	0
800 million	and above	5	6	8	9

* Rate to be applied to taxable basis less applicable bracket (e.g. taxable basis for 2016: COP 2 billion - COP 800 million * 6%).

The CREE surcharge is to be fully paid through advances based on CREE for the preceding year (e.g. 2016 surcharge will be advanced on the 2015 CREE return).

Exploration and production companies operating Free Trade Zone (FTZ) qualified offshore assets/blocks are exempted from the surcharge.

Corporate income tax (CIT)

Domestic income earned by non-resident entities that is not attributable to branches and permanent establishments (PEs) will be taxed at 40% in 2016 (42% in 2017 and 43% in 2018).

An exemption is created for principal, interest, and commissions related to lending, insurance, re-insurance, and other finance trade by governmental financial entities for countries with which cooperation agreements have been executed over these areas.

Foreign tax credit calculations on dividend income have been amended.

Deductibility rules for transactions settled in cash are postponed to begin application in 2019.

A reduced 5% withholding tax (WHT) rate is available for interest income earned by non-residents on loans or bond-like instruments with terms of eight years or longer, the proceeds of which are used for certain government/private-run infrastructure projects.

Thin capitalisation rules will not apply to taxpayers engaged in the factoring business.

No effective place of management will be deemed to exist in Colombia for (i) non-resident issuers listed on the Colombian stock exchange, or any other internationally reputed exchange, nor (ii) non-resident entities when 80% or more of its revenue is sourced in the country where the entity is domiciled.

Foreign exchange gains or losses for conversion to local currency of shareholdings outside Colombia will only be taxed or deductible upon the sale or liquidation of the investment.

Net wealth complementary tax

For years 2015, 2016, and 2017, a window is created to encourage taxpayers to disclose and pay net wealth tax on under-reported assets (as well as liabilities that were claimed unlawfully) at the following rates:

Year	Rate (%)
2015	10.0
2016	11.5
2017	13.0

Taxpayers volunteering for this window will not incur penalties as long as 100% of the relevant net wealth tax is paid. The assets being disclosed will be part of the net wealth tax basis.

Other provisions

Financial transactions tax

The financial transaction tax was scheduled to be reduced to 0% beginning from 2018. The phase out is now postponed until 2022, as follows:

Year	Rate (%)
2016 thru 2018	0.4
2019	0.3
2020	0.2

Colombia

Year	Rate (%)
2021	0.1

Taxes on corporate income

National companies (i.e. incorporated in Colombia under Colombian law) are taxed on worldwide income. Foreign non-resident companies and local branches of foreign companies are taxed on their Colombian-source income only. The current general CIT rate is 25%, which is applied on taxable income.

Taxable income is generally defined as the excess of all operating and non-operating revenue over deductible costs and expenses. The customary costs and expenses of a business are generally acceptable as deductible expenditure for CIT purposes, provided they are necessary, reasonable, and have been realised during the relevant tax year under the accrual or cash method of accounting, as the case may be.

The current general capital gains tax rate is 10%.

Qualifying businesses located in FTZs enjoy a reduced rate of 15% (while subject to capital gain tax at 10%, where applicable).

Domestic income earned by non-resident entities that is not attributable to branches and PEs will be taxed at 40% in 2016 (42% in 2017 and 43% in 2018).

Minimum presumptive tax

CIT payers are required to pay a minimum amount of income tax, which is determined based on the so-called presumptive income method. Under this method, presumptive taxable income is measured as 3% of net assets (or tax equity) as of 31 December of the prior tax year as reported by the taxpayer on the corresponding CIT return. The CIT rate is then applied to the greater of regular taxable income (revenue less allowable costs and expenses) or presumptive taxable income (exempting certain business activities).

In order to determine the taxable base for presumptive income purposes, it is necessary to subtract from the total amount of net assets, which is the base to calculate presumptive income, the following amounts:

- The net asset value of the shares owned in national companies.
- The net asset value of the assets affected by *force majeure*.
- The net asset value of assets associated with operations in unproductive periods.

Each year, taxpayers must compare the value resulting from the application of the foregoing two systems. The income tax for the taxable year will be calculated on the higher value resulting from this comparison. If presumptive income is higher than the ordinary net income, the difference constitutes an excess of presumptive income, which can be carried forward (adjusted for inflation) to any of the following five taxable years and offset against the net income determined by the taxpayer.

Income tax for equality (CREE)

From 2013 on, 25% rate CIT payers are liable for an additional 9% CREE. Collections will be used to fund cuts on payroll taxes as well as health contributions to the social security system, which 25% rate CIT payers will enjoy on select headcount.

Structurally, the CREE works as an income tax.

Qualified 15% rate FTZ users existing as of 31 December 2012 are grandfathered, as well as those in the process of being qualified. This means that 15% rate CIT payers (FTZ

users), and other entities that at 1 January 2013 had already commenced the process of qualification as FTZ users, should continue to have the same tax rate.

The taxable basis will generally be calculated as revenue (excluding capital gains) minus the following:

- Rebates, discounts, and returns.
- Non-taxed revenue.
- Allowable costs and expenses.
- Select exempt income from Andean Tax Treaty countries and others.

For years 2015 and beyond, tax loss and presumptive taxable carryforward are eligible to offset the taxable amount, although the potential impact on deferred assets for tax loss needs to be considered. CREE presumptive taxable income carryforwards incurred beginning from 2015 will be eligible for offset against CREE taxable income over a five-year period.

Please be aware that in no case can the taxable amount be lower than 3% of the taxpayer's net equity as of the end of the last year (i.e. the same system is in place as for the income tax, where even loss-making taxpayers may be subject to liability). It is worth mentioning that the liability for this tax will be used to determine the amount of foreign tax credit that may be claimed by a resident.

All taxpayers are required to act as self-withholding agents on taxable income, at a rate that depends on their main activity of business.

CREE surcharge

The CREE temporary surcharge, which was introduced by the December 2014 tax reform and is an absolute rate increase, is as follows:

Taxable income (COP)		CREE surcharge (%) *			
Over	Not over	2015	2016	2017	2018
0	800 million	0	0	0	0
800 million	and above	5	6	8	9

* Rate to be applied to taxable basis less applicable bracket (e.g. taxable basis for 2016: COP 2 billion - COP 800 million * 6%).

The CREE surcharge is to be fully paid through advances based on CREE for the preceding year (e.g. 2016 surcharge will be advanced on the 2015 CREE return).

Exploration and production companies operating FTZ qualified offshore assets/blocks are exempted from the surcharge.

Stability Agreement Regime

As of 1 January 2013, the Legal and Tax Stability Framework was repealed. Applications under consideration will be grandfathered and approved if they meet the applicable requirements. Any already executed Legal Stability Agreements will continue to apply until expiration.

Local income taxes

In addition to CIT and CREE (*explained in this section*), there is a local (municipal) tax, known as industry and trade tax. *For more information, see Industry and trade tax in the Other taxes section.*

Corporate residence

Corporate residence is determined by the place of incorporation of any given company.

For CIT purposes, companies incorporated under foreign laws that have their main domicile abroad are considered 'foreign companies', whereas any company incorporated in Colombia under Colombian law qualifies as a 'national company' even if fully owned by foreign shareholders.

Rules on effective place of management are in place (*see below*).

Permanent establishment (PE)

The Colombian internal legislation incorporates the concept of PE. This concept follows the Organisation for Economic Co-operation and Development (OECD) criteria and means a fixed place of business through which an entity carries out its activity, whether partially or totally.

A PE will also be incorporated when a person (other than an independent agent) has the capacity to conclude contracts on behalf of the foreign entity, except for preparatory and auxiliary activities.

In order to define what should be understood as preparatory and auxiliary activities, local regulations have adopted the OECD criteria.

Colombian law upholds the triggering of a PE upon the presence of a fixed place of business that is located in a given place and features a certain degree of permanence (no cut-off timeline is provided) where a non-resident entity conducts part or the whole of its business.

Auxiliary and preparatory activities that do not cause a PE to exist are listed out. The regulations reiterate that a PE is subject to income tax on domestic income attributable to its course of business as well as on any domestic income directly earned.

Also, a PE will be subject to domestic WHT rates whenever engaged with resident parties.

However, payments or accruals to non-residents having a PE may continue to be subject to rates set out for non-residents if the underlying transaction is unrelated to the PE's purpose. A PE will be required to make annual CIT and CREE filings. PEs are given the capacity to withhold and remit taxes as well as to charge and collect value-added tax (VAT) to the extent of taxable transactions.

Requisites for registration of a PE are set out and include, *inter alia*, good standing documentation or proof of existence as well as an active account at a local bank or financial institution.

A PE is required to prepare contemporaneous documentation (in addition to transfer pricing compliance requirements) with a functional and technical analysis of the assets, liabilities, capital, risks income, costs, and expenses attributable to its business in Colombia. In addition, a PE must, for tax purposes, prepare separate accounts for purposes of the attribution of income and capital gains.

Effective place of management

Guidance is available (Regulation 3028 of 27 December 2013) on how to register a non-resident entity that is effectively managed in Colombia and treated as a resident for tax purposes.

The process requires submission of a good standing documentation, proof of identity of the legal representative (or attorney if a mandate to register exists), and availability of an active bank account at a resident bank or financial institution.

The rules require a non-resident entity effectively managed in Colombia to carry local books under the applicable GAAP as well as to satisfy tax compliance requirements upon completion of the tax registration.

Non-resident entities effectively managed in Colombia are given the capacity to withhold and remit taxes as well as to charge and collect VAT to the extent of taxable transactions.

No effective place of management will be deemed to exist in Colombia for (i) non-resident issuers listed on the Colombian stock exchange, or any other internationally reputed exchange, nor (ii) non-resident entities when 80% or more of its revenue is sourced in the country where the entity is domiciled.

Tax havens

Colombia has adopted a tax haven list that is updated from time to time.

Any payment or accrual, regardless of its nature, that constitutes taxable income for a beneficiary that is deemed as resident, established, located, or functioning in a tax haven jurisdiction is subject to a 33% WHT.

Transactions with entities that are tax haven residents are subject to the transfer pricing regime. As a result, Colombian taxpayers must file a transfer pricing report and a transfer pricing informative return for such transactions, regardless of whether or not the entity's equity or gross income is lower than the threshold established by Colombian law for applying such compliance obligations.

In addition, if the transaction occurs with a related party, the resident taxpayer is required to prepare and submit an additional supporting study, proving the details of the functions performed, along with any assets used or risks assumed, and the full costs and expenses incurred by the tax haven resident while rendering the service or in the overall conduct of the activity to which the deduction relates.

Other taxes

Value-added tax (VAT)

The Colombian VAT taxes the sale in the country of any items of tangible personal property that are not fixed assets and are not covered by an exemption, the provision of services within the national territory (certain services supplied outside Colombia but imported also attract VAT), and the importation of tangible personal property that is not covered by an exemption.

The Colombian VAT is based on a credit-debit system throughout the entire chain of a business. However, certain products are only taxed at the manufacturer level (one-phase VAT). For purposes of VAT calculation, the VAT payer may credit the VAT (input) paid to vendors (certain limitations apply) against any VAT (output) collected from customers.

The general VAT rate is 16%. However, certain services and goods are taxed at 5% and 0%.

The following are the most significant goods and services taxed at 5%:

- Professional storage of agricultural goods.
- Agricultural insurance.

Colombia

- Private security services and temporal work related services (some qualifications are required).
- Health insurance.

The following are the most significant goods and services taxed at 0%:

- Meat, fresh eggs, and dairy products.
- Biofuel.
- Services to be exported (some requirements are needed).
- Internet services for low to mid-income residential customers.
- Manufactured goods to be exported.
- Tourism services to be supplied to non-resident individuals.

Under current law, there are VAT exemptions available for the following items, among others:

- Equipment and materials for the construction, installation, assembly, and operation of environmental monitoring and control systems.
- Imports of raw materials and supplies made under the so-called Vallejo Plan for further processing and incorporation into products that are to be subsequently exported (*see the Tax credits and incentives section for more information on the Vallejo Plan*).
- Temporary importation of heavy machinery and equipment for basic industries (mining, hydrocarbons, heavy chemistry, the iron and steel industry, metallurgy, power generation and transmission, and the water industry).
- Importation of machinery and equipment, which is not produced in the country, for recycling and processing of waste and refuse.
- Regular imports by major exporters of industrial equipment, which is not produced in the country, for the transformation of raw material.
- Freight transportation.
- Public transportation of passengers in the national territory by water or land.
- Transportation of gas and hydrocarbons.
- Interest and other financial income from credit operations.
- Financial leasing.
- Public utilities.
- Restaurant and cafeteria services.

Withholding VAT

VAT withholding on the purchase of goods and services for most domestic transactions is 15%.

A non-resident supplier of VAT-subject services does not require VAT registration. Rather, it is the locally-based recipient that must apply a reverse-charge (100% of the VAT). No VAT fiscal representation is allowed.

VAT compliance

Filing frequency depends on taxpayer's annual revenue on 31 December of the previous taxable year. For businesses with annual revenue in excess of 92,000 tax value units (TVU) (approximately COP 2.7 billion), the frequency is bimonthly. If annual revenue is not in excess of TVU 92,000 but is higher than TVU 15,000 (approximately COP 446 million), the filing frequency is quarterly. For small businesses (annual revenue below COP 446 million), the frequency is yearly.

No VAT filings are required for periods where no inputs or outputs exist.

VAT credit

VAT paid to vendors is creditable even if paid at rates higher than those at which taxable sales are made. Where a receivable arises above that credit, a refund will be available upon request, subject to certain circumstances (e.g. zero-rate sales).

Companies are eligible for a credit against income tax for up to 2% of the VAT paid on the purchase or import of capital expenditure qualifying as 'capital goods.' Recapture provisions trigger upon the capital goods being sold prior to the end of the useful life.

Consumption tax

A national consumption tax is levied against the following select services and goods:

- Mobile phone services at 4%.
- Certain vehicles, aircraft, and other goods at 8% or at 16%.
- Restaurant and cafeteria services at 8%.

Customs duties

Imports, according to customs rules, consist of the entry of goods to the 'national customs territory' from the rest of the world, or from an FTZ, with the purpose of remaining permanently or temporarily in it for the achievement of a specific purpose.

As a general rule, the importation processes before the Colombian Internal Revenue and Customs Service (DIAN) can be carried out only by users registered in the Customs Information System, either as Customs Agencies (previously called Customs Intermediation Companies) or Permanent Customs Users (UAPs). The latter may file their own customs declarations.

According to the Harmonized System of Designation and Coding of Goods approved by the World Trade Organization (WTO), imported goods are classified into subentries composed of six digits. Also, two digits are added, which are for exclusive use of the Andean Community (CAN), and two final digits, which correspond to the digits for use of Colombia. The customs subentry or harmonized tariff schedule (HTS) code, which is the ten-digit result, is exposed in the Colombian Customs Tariff, which is governed by Decree 4927 of 2011, which also reflects the applicable tariff of each duty. VAT, which is also part of the customs duties, is regulated in the Colombian Tax Code.

The general VAT rate for the importation of goods is 16%, and the customs duties range between 0% and 20%.

Excise taxes

There are some excise taxes for the consumption of beer and its derivatives, wine, liquor and its derivatives, and cigarettes and similar products.

The excise taxes are municipal in nature; consequently, the tax rates and applicable laws vary from one municipality to another.

Property tax

The property tax is a municipal tax that is imposed annually on real estate property located in urban, suburban, or rural areas. It is levied on both improved and unimproved real estate; consequently, the taxpayers of this tax are the owners or holders of the real estate property.

The taxable base of this tax is the current cadastral value of the property, as adjusted for inflation. In some cities, such as Bogotá, the taxable base is the value of the property as appraised by the taxpayer directly.

Property tax rates depend upon the nature and usage of the property, and generally range between 0.4% and 1.2%.

Colombia

This tax is fully deductible for CIT purposes, provided the same has a causal nexus with the income producing activity of the taxpayer (for example, where the tax is paid on rental property).

Stamp tax

The stamp tax rate is 0%.

Capital gains tax

The capital gains tax rate is 10%.

Financial transactions tax

The financial transactions tax is a permanent tax on financial transactions, the collection of which is the responsibility of regulated financial institutions and the Central Bank (*Banco de la República*).

The tax rate is 0.4%, and the taxable event is the carrying out of financial transactions that involve the disposal of resources deposited in checking or savings accounts as well as in deposit accounts with *Banco de la República*, and the issuance of cashier's checks.

50% of the total tax paid is deductible for CIT purposes, regardless of whether or not the transactions have a causal nexus with the income producing activity of the taxpayer.

The law establishes a series of operations and transactions that are exempted from this tax.

The financial transactions tax will be phased out in 2022; consequently, it is being reduced annually as follows:

Year	Rate (%)
2016 thru 2018	0.4
2019	0.3
2020	0.2
2021	0.1

Net wealth tax

Net wealth tax on companies is implemented for taxable years 2015, 2016, and 2017. The triggering event is the holding of net wealth for tax purposes (assets less allowable liabilities) in excess of COP 1 billion as of 1 January 2015.

Accrual and taxable basis will be measured as assets less liabilities (for tax purposes) as of 1 January of each year (as opposed to the taxable basis being fixed to 1 January 2015) so that the legal obligation to pay the tax will arise annually as well.

Exemptions are available for foreign investment portfolio funds, companies in liquidation procedures, and certain non-income taxpayers, among others.

Net wealth taxpayers include not only resident companies but non-residents directly or indirectly (through branches or PEs) holding wealth in Colombia.

Net wealth tax rates for companies are as follows:

Net wealth (COP)		Net wealth tax rate (%) *		
Over	Not over	2015	2016	2017
0	2 billion	0.20	0.15	0.05
2 billion	3 billion	0.35	0.25	0.10
3 billion	5 billion	0.75	0.50	0.20

Net wealth (COP)		Net wealth tax rate (%) *		
Over	Not over	2015	2016	2017
5 billion	and above	1.15	1.00	0.40

* Rate to be applied to taxable basis less applicable bracket plus a flat amount (e.g. taxable basis less 2 billion * 0.35% + 4 million).

Where net wealth in 2016 and 2017 is greater than that as of 1 January 2015, the taxable basis will be the lower of net wealth as of 1 January 2015 (adjusted upwards by 25% of the inflationary index for the year before) or the net wealth as of 1 January of the taxable year of reference.

Where net wealth in any year beginning from 2016 is lower than that as of 1 January 2015, the taxable basis will be the greater of net wealth as of 1 January 2015 (adjusted downwards by 25% of the inflationary index for the year before) or the net wealth as of 1 January of the taxable year of reference.

Net wealth tax is neither deductible nor creditable nor can the liability be offset against tax receivables.

At the taxpayer's election, the net wealth tax can be charged against certain equity reserves.

Payroll taxes and social security contributions

There are three major payroll taxes and contributions.

- General pensions system.
- Health social security system.
- General system of professional risks.

The basis for contributions is determined by the monthly salary (excluding non-salary items) earned by the employee, which may not be, for ordinary salaried employees, less than the minimum legal monthly salary (COP 689,455 in fiscal year [FY] 2016) and may not exceed 25 minimum legal monthly salaries (COP 17,236,000 in FY 2016).

For employees who earn an integral salary, the basis for pension contributions will be of the lower of 25 minimum legal monthly salaries or 70% of such integral salary.

Amounts of contributions

In the two regimes (public and private), the amounts of contributions are currently 28.5% of the monthly salary.

Out of this percentage, 75% (approximately 20.5% of the monthly salary) must be borne by the employer and 25% (approximately 8% of the monthly salary) must be borne by the employee.

However, employees who earn more than four minimum legal monthly salaries must contribute an additional 1%, which will be destined to the pension solidarity fund, created by law to cover the risks of workers with scarce resources. Also, employees who earn more than 16 minimum monthly salaries must contribute an additional percentage (between 0.2% and 1%), depending on the amount of salary received.

For professional risks (*Aportes de Riesgos Profesionales*), the employer must pay a contribution ranging from 0.375% to 8.7% of the monthly salary, which is an insurance that covers risks of labour related illnesses or accidents, permanent disability, death, and incapacity also derived from the employee's activity.

Colombia

In addition, for employees with salaries higher than ten minimum monthly wages, employers must pay a payroll tax of 9% on salary items only, the basis of which is 100% for ordinary salaried employees and 70% for integral salaried employees.

Industry and trade tax

The industry and trade tax is a municipal tax that is imposed on revenue obtained from the exercise of industrial, commercial, or service activities in any Colombian municipal jurisdiction. It can be viewed as a special form of a turnover tax.

The industry and trade tax rates are determined by each municipality, and, as a rule, they range between 0.2% and 1%. All of this tax can be deducted for CIT and CREE purposes when effectively paid.

Branch income

Branch income is taxed at 25%. Additional CREE is applicable at 9% for 2016 and subsequent years, as well as CREE surcharge (*see Income tax for equality [CREE] in the Taxes on corporate income section for more information*).

The branch taxable base is limited to domestic income.

Branches are required to prepare contemporaneous documentation (in addition to transfer pricing compliance requirements) with a functional and technical analysis of the assets, liabilities, capital, risks, income, cost, and expenses attributable to its business in Colombia.

In addition, the branch must, for tax purposes, prepare separate accounts for purposes of the attribution of income and capital gains.

Branch profits are categorised as dividends; consequently, if profits are taxed at the branch level, no further taxation is required.

In fact, under the re-categorisation of branch profits to dividends, the dividend tax (at 33%) is only imposed on remittance of dividends out of untaxed earnings.

Income determination

Inventory valuation

The value of inventories, which includes all expenses and direct and indirect charges necessary to put an item in a position to use or sell, must be determined using one of the following methods: first in first out (FIFO), last in first out (LIFO), specific identification, or weighted average. Special rules may authorise the use of other methods of recognised technical value.

Capital gains

Capital gains are taxed separately from income. *See Capital gains tax in the Other taxes section for more information.*

Dividend income

The so-called double taxation on corporate earnings was eliminated from the Colombian tax system many years ago. This means that shareholders of Colombian companies are, as a rule, not required to pay any income taxes on dividend distributions to the extent that dividends are paid out from earnings that were already taxed at the corporate level prior to the dividend distribution. In this case, dividends are not subject to any WHT.

When the dividends are paid out from earnings that went untaxed at the corporate level, a foreign shareholder is required to pay income taxes on the dividends at 33% via a WHT collected by the distributing company. Certain double taxation treaties (DTTs) offer limited or full relief for the 33% WHT on taxed dividends.

Branch profits are categorised as dividends (*see the Branch income section for more information*).

Interest income

Interest income derived from activities in Colombia is considered part of the CIT and CREE base for Colombian entities; however, if interest is paid or accrued to a non-resident that is not compelled to file CIT in Colombia, a WHT is accrued over the payment or deposit at a rate of 33% if the loan term does not exceed of one year or 14% if the loan term is one year or longer.

Note that there are some special conditions derived from DTTs that decrease the WHT rate.

An exemption is in place for principal, interest, and commissions related to lending, insurance, re-insurance, and other finance trade by governmental financial entities for countries with which cooperation agreements have been executed over these areas.

A reduced 5% WHT rate is available for interest income earned by non-residents on loans or bond-like instruments with terms of eight years or longer, the proceeds of which are used for certain government/private-run infrastructure projects.

Interest on government external debt is exempted from Colombian taxes.

Royalties

Royalties paid in favour of a Colombian entity are subject to taxes in Colombia; consequently, such royalty payments are part of the CIT base. If royalties are paid in favour of a non-resident (i.e. in favour of an entity that is not compelled to file CIT in Colombia), WHT is generally accrued over the payment or deposit at a rate of 33%.

Certain DTTs offer limited relief for the 33% WHT on royalties (e.g. 10%).

Foreign income

The following cases, among others, qualify as foreign-source income:

- Income from certain loans, such as short-term loans emerging from import of goods or those disbursed to Colombian financial entities. Additionally, the expense derived from this concept will be 100% deductible.
- Income from the sale of goods stored in certain logistic spots aimed exclusively for international distribution.
- Income derived from technical services of repair and maintenance of equipment carried out abroad.

It should be noted that income triggered by other technical services, as well as consulting services and technical assistance, will be regarded as of a Colombian source and subject to a 10% WHT.

There are no tax deferral provisions in Colombia.

Deductions

In Colombia, the customary costs and expenses of a business are generally acceptable as deductible expenditure for CIT and CREE purposes, provided they are necessary,

Colombia

reasonable, and have been realised during the relevant tax year under the accrual method of accounting. Examples of common (and not so common) deductions include the items below.

Depreciation

As a general rule, the acquisition cost of tangible fixed assets is fully depreciable for CIT and CREE purposes. The normal estimated useful lives are as follows:

Asset	Useful life (years)
Buildings and pipelines	20
Machinery and equipment, office furniture, and fixtures	10
Vehicles and computer equipment	5

The acceptable methods for depreciation are:

- **Straight-line:** The straight-line method is the easiest and most commonly used method of depreciation by companies; it is calculated by dividing the value of the asset by the asset's useful life.
- **Declining-balance:** This method takes into consideration an accelerated rate of depreciation and is useful for those assets in which a higher value is lost during the beginning years of usage. Under the declining-balance tax depreciation method, in no case will a residual value lower than 10% of the asset's cost be allowed nor will accelerated depreciation based on additional shifts be deductible.
- Any other method of recognised value in accordance with the opinion of the tax authorities.

Depreciation rates can be increased by 25% for each additional eight-hour shift of asset use (and pro rata for fractions thereof). When tax depreciation exceeds book depreciation, the taxpayer is required to establish a reserve equivalent to 70% of the difference. Recapture of depreciation on the sale of depreciated property is taxable for both CIT and CREE.

Depletion

Depletion is available under certain specific circumstances.

Amortisation of intangible assets

As a general rule, taxpayers can amortise, for CIT and CREE purposes, the cost of any acquired intangible asset over a period of five years, at a minimum, unless the taxpayer is able to prove that the amortisation period should be less because of the specific nature or conditions of the business.

Goodwill

As a general rule, goodwill is deductible for CIT and CREE purposes, provided it is related to the business purpose or income producing activity. In order for such goodwill to be deductible, the intangible (goodwill) must fit the definition of an asset subject to be amortised. Amortisable investments are ones that, under the normal accounting rules, are subject to devalue and should be recorded as assets subject to be amortised in a period exceeding one year.

Goodwill cannot be amortised in a period of less than five years.

Goodwill on share purchases

Rules on amortisation of goodwill on share purchases changed in 2012. Goodwill tax amortisation on share purchases of residents or non-resident entities is currently permitted, provided:

- a loss of value (impairment) is technically proven

- the acquiring vehicle remains separate from the entity owning the business (except when, while not entirely clear, the reorganisation is required under law), and
- taxable dividends are distributed to the acquiring vehicle.

If these requirements are not met, no amortisation is allowed.

Nevertheless, there is a grandfather rule that allows taxpayers to amortise the goodwill acquired on share purchases that occurred prior to 1 January 2013, in which case some of the above requirements may not be applicable; this is also applicable on share purchase agreements entered into prior to the same date, but where completion is subject to approval or clearance by an authority, provided the relevant application was filed before 31 December 2012.

Banking institutions under surveillance by the financial authority are allowed to amortise goodwill on share purchases, even if registered after 1 January 2013.

Start-up expenses

Start-up expenses are deductible for CIT purposes, provided they are necessary, reasonable, and have been realised during the relevant tax year under the accrual method of accounting.

Interest expenses

Taxpayers are generally entitled to deduct any interest paid to financial institutions or to third parties, provided certain requirements are met.

The Colombian Tax Regime has incorporated thin capitalisation rules (*see Thin capitalisation in the Group taxation section*).

Bad debt

Bad debt is deductible for CIT and CREE purposes, provided the company keeps its accounting books under the accrual method, the debt is originated as a result of the development of an income producing activity, and the following requirements are met:

- The debt is due for over a year.
- The company is able to prove that the debt has a nature of bad debt.
- The company has registered the provision, related to the bad debt, within the same fiscal period.
- The debt does exist at the moment of the registration of the provision.
- The company has included the debt in the calculation of its CIT and CREE for previous fiscal periods.

Charitable contributions

Some specific charitable contributions are allowed as deductions, provided they are made to certain institutions dedicated to development of health, education, culture, religion, sports, scientific and technological research, ecology and the protection of the environment, or to social development programs of general interest. Most of these charitable contributions are limited with respect to their deduction.

Expenses incurred abroad

As a general rule, the deduction of expenses incurred abroad that are not subject to WHT are limited to 15% of the taxpayer's net income.

Fines and penalties

Fines and penalties are not deductible for CIT and CREE purposes.

Taxes

It is important to mention that the current tax regulations state the following as the only taxes that can be claimed as a deductible expense:

Colombia

- 100% of the industry and trade tax.
- 50% of the financial transactions tax.
- 100% of the property tax.
- The VAT that cannot be treated as output.
- Some local stamp taxes.

Special deductible items

Colombian income tax laws have established certain special deductible items, which include the following:

- 100% of the industry and trade tax and real property tax actual payments and 50% of the financial transactions tax actual payments are deductible.
- 100% of acquisition costs are available as a tax amortisation or depreciation base.
- 175% of the investments made in certain scientific and/or technological projects or in professional training projects of governmental, public, or private institutions of higher education are deductible. This deduction cannot exceed 40% of the taxpayer's net income as determined before subtracting the amount of the investment.
- 100% of the investments made for the control and improvement of the environment are deductible. This deduction cannot exceed 20% of the taxpayer's net income as determined before subtracting the amount of the investment.

Net operating losses

Net tax losses (adjusted for inflation) incurred in 2007 or thereafter may be carried forward without limitation. There is no loss carryback provision. Certain limitations apply to the offset of losses transferred on merger reorganisations.

Payments to foreign related parties

Royalties and similar charges

Royalties and the costs of exploitation or acquisition of all kinds of intangible property that are charged by foreign related parties are allowable as CIT and CREE deductions, provided that the corresponding WHT is collected at generally 33% (10% in the case of most DTTs). Other types of payments are subject to the general rules for expenses incurred abroad.

Management overhead expenses

Management overhead expenses paid to a foreign related party (e.g. the parent company) are deductible, provided they meet the arm's-length test under transfer pricing regulations and provided the management services are duly substantiated and are specifically related to the income producing activity of the local subsidiary that pays them. These expenses must also be carefully documented such that the local subsidiary can provide evidence to the authority of the fact that they are specifically related to its Colombian operations: to the planning and direction of the operations, the setting and implementation of management controls, the measurement of progress made toward specific business goals, the related financial results, etc. Where these services are supplied inside Colombia, a 33% WHT is also required to ensure deductibility.

Interest

Interest and related financial costs (including foreign exchange losses) paid to foreign related parties are deductible, provided they meet the arm's-length test under transfer pricing regulations and the thin capitalisation rules (*see the Group taxation section*). Furthermore, interest and the related financial costs paid on short-term financing relating to imports of merchandise and raw materials directly supplied by foreign related parties are also deductible for CIT purposes. Interest paid or accrued to a non-resident triggers WHT over the payment or deposit at a rate of 33% if the loan term does not exceed one year or 14% if the loan term is one year or longer.

Financial and non-financial institutions registered with the Colombian Central Bank are permitted to extend loans into Colombia.

Group taxation

Group taxation or group consolidation is not allowed for CIT purposes in Colombia.

Transfer pricing

In Colombia, transfer pricing rules are applicable to the transactions performed by local taxpayers with foreign related parties. Thus, for CIT purposes (and CREE tax as of 2015 and beyond), Colombian taxpayers must determine their income, costs, expenses, assets, and liabilities on the basis of prices and profit margins used in comparable transactions entered into with or between independent or unrelated parties.

In general terms, the rules related to comparability criteria, supporting documents, and advanced pricing agreements (APAs) follow international transfer pricing standards. However, they introduce a wide definition of 'related companies' for transfer pricing purposes, including subordination and individual or joint control exercised by a foreign parent company or by individuals located in Colombia or abroad.

The law presumes that transactions with foreign non-domiciled entities located in so-called 'tax havens' are transactions performed with related parties and are subject to transfer pricing rules (*see Tax havens in the Corporate residence section*).

If (i) the gross equity (assets) of the local taxpayer on 31 December of each year is equal to or higher than the equivalent to TVU 100,000 (COP 2,975,300,000 for FY 2016) or (ii) the gross income obtained by the local taxpayer in a given year is equal to or higher than the equivalent to TVU 61,000 (COP 1,814,933,000 for FY 2016), it shall be required to prepare transfer pricing supporting documents (i.e. a transfer pricing study) and to file with the tax authority an informative return in connection with the transactions performed, during the corresponding year, with the foreign related parties.

If the local taxpayer does not file the transfer pricing return, the penalty will be up to TVU 20,000 (COP 595,060,000 for FY 2016). There are other applicable penalties depending on the nature of the omission, but there is a relief based on a bracket system.

Thin capitalisation

Thin capitalisation rules for CIT purposes (and CREE tax as of 2015 and beyond) are applied on a 3:1 basis to related or unrelated party debt, regardless of domestic or cross-border transactions.

Debt exceeding the ratio is any total average interest bearing debt for the year less three times the net (tax) equity as of 31 December of the preceding year.

The proportion of non-deductible interest is debt in excess of three times such net equity. That proportion is then applied to the total interest accrued or paid in the taxable year.

Thin capitalisation rules do not apply to taxpayers engaged in the factoring business.

Controlled foreign companies (CFCs)

Colombian tax law does not provide for rules on CFCs.

Tax credits and incentives

Foreign tax credit

Foreign income taxes are creditable against CIT, subject to certain limitations. Generally, the amount of the credit cannot exceed the sum of Colombian taxes imposed over the same income (CIT plus the CREE). DTTs provide for more comprehensive credit systems as well.

The foreign tax credit on dividend income is enhanced to include a third-tier of credit availability, subject to specific ownership requirements. A third-tier of credit means that Colombian entities can claim a tax credit not only for taxes paid by a company in which it has a direct investment, but also for taxes paid by a company in which it has an indirect investment.

The tax credit can be claimed in the year of payment or in any of the following four years.

CIT exemptions

As items of exempt income, the law has established the following:

- The principal and interest (as well as related commissions and fees) paid pursuant to public foreign debt operations.
- Income from the sale of electric power generated from wind, biomass, or agricultural waste, for a period of 15 years, provided the seller issues and negotiates Greenhouse Gas Reduction Certificates.
- Income obtained from slow yield crops and plantations, including cocoa, rubber, palm oil, citrus, and other fruits.
- Income obtained from river transportation services with shallow draft vessels and barges, for a period of 15 years starting in 2003.
- Income obtained from hotel services offered in new hotels that are built within 15 years counted from 2003, for a term of 30 years, until 2032.
- Income obtained from hotel services offered in refurbished or enlarged hotel facilities, where the related work is started within 15 years counted from 2003, for a term of 30 years.
- Income obtained from ecotourism services, for 20 years starting in 2003.
- Income obtained from investment in new forestry plantations, sawmills, and plantations of timber-yielding trees.
- Income obtained from new medicinal and software products developed in Colombia and protected under new patents registered with the authorities, with a high content of national research and technology, until 2017.
- The gain in trading derivatives that are qualified as securities are not subject to CIT, provided that the underlying asset is stock traded in the Colombian stock exchange, indexes, or participations in funds tracking such stock.

Special CIT rate for free trade zones (FTZs)

FTZ industrial users enjoy a special CIT rate. The so-called FTZ industrial goods users and industrial service users pay CIT at a reduced rate of 15% on income earned from their FTZ operations.

Note that capital gains are taxed at the standard capital gains tax rate of 10%.

Reduction to the statutory CIT rate for small companies

Small companies (not exceeding approximately COP 3.4 billion in total assets or 50 employees for FY 2016) are subject to CIT at the following reduced rates: 0% of the statutory CIT rate for the first two years, 25% of the statutory CIT rate for the third year, 50% of the statutory CIT rate for the fourth year, and 75% of the statutory CIT rate for the fifth year.

However, note that these entities are subject to CREE on a regular basis.

Tax credit on payroll fees paid

A tax credit is granted to employers hiring employees under 28 years old; women above 40 years old that have not been legally employed in the previous year; low-income workers earning less than 1.5 times the minimum monthly wage (approximately COP 1,034,000 for FY 2016); and disabled, reintegrated (from armed conflict), or displaced (as victims of armed conflict) workers, subject to certain requisites and time limitations (two to three years).

Vallejo Plan for raw materials

The Vallejo Plan (drawback) allows for the total or partial suspension of customs duties upon receipt, within the national customs territory, of specific goods destined to be totally or partially exported within a certain period of time, after having undergone transformation, manufacture, or repair, including the materials needed for these operations.

Withholding taxes

The Colombian tax system provides for WHT as a general mechanism of advance tax collection. Under the law, as a general rule, all corporate entities are required to collect or withhold taxes from payments made to third parties. The WHT collection agents must collect the applicable WHT amounts, deposit the withheld amounts with the authority, file monthly WHT returns, and issue WHT certificates to the payees. The payees who are also CIT return filers credit the withheld taxes against the annual CIT liability computed on their returns.

Foreign non-resident persons are taxed on their Colombian-source income only. Generally, the full tax liability accruing on payments made to foreign non-resident persons is satisfied via the collection of the applicable WHT. The WHT rate on payments made to foreign non-resident persons for taxable dividends, royalties, and taxable interest is 33%. On payments made for consulting, technical assistance, and technical services, the WHT rate is 10% (whether supplied inside or outside Colombia). On payments made for software licences, the WHT rate is 26.4%.

However, domestic income earned by non-resident entities that is not attributable to branches and PEs will be taxed at 40% in 2016 (42% in 2017 and 43% in 2018). According to the tax authority's rulings, this should not have any impact on WHTs (i.e. the 33% WHT remains unchanged).

On other types of payments that give rise to Colombian-source income, the general WHT rate is 14%, with the foreign non-resident payee being required to file a CIT return in Colombia to report the final CIT liability, at 33% of net income (and being entitled to a refund where the final liability is less than the amount withheld at the 14% rate or being required to pay the deficit should the case be the opposite).

WHT returns do not need to be filed where there are no taxes to declare or pay.

Offsetting of WHT

WHT returns filed on a non-payment basis will be treated as not filed, except if the filer has a refundable tax credit balance over TVU 82,000 (approximately COP 2,439,746,000) to offset the outstanding payment. A six-month deadline applies for the taxpayer to apply the offsetting of the credit balance. Otherwise, late filing penalties will apply.

Colombia

Self-withholding on some exports

There is a 1% self-withholding tax on exports for the mining, oil, and gas industry. The self-withholding is creditable against the CIT liability.

WHT on interest

Interest payments made abroad on loans or cross-border leasing agreements are subject to a 14% WHT if the loan term is one year or longer. If the loan or cross-border agreement has a term not exceeding one year, a 33% WHT is triggered.

However, lease agreements for aircraft, ships, and the like, or parts thereof, are subject to a 1% WHT.

Summary WHT chart for payments to non-Colombian entities

Type of payment	WHT rate (%)
Dividends (if paid out of untaxed earnings)	33
Taxable interest	14 or 33
Royalties	33
Royalties on software licences	26.4
Technical assistance, consulting, and technical services	10
Other types of payments	14

DTT rates

Recipient	Dividends (%) (1)	Taxable interest (%) (2)	Royalties (%) (3)
Non-treaty	33	14/33	33
Treaty:			
Canada	5/15	0/10	10
Chile	0/7	5/15	10
Czech Republic	5/15/25	0/10	10
India	0/5	0/10	0/10
Mexico	0/33	0/10	10
Portugal	10/33	10	10
South Korea	0/5 to 10	0/10	0/10
Spain	0/5	0/10	10
Switzerland	0/15	0/10	10

Notes

1. The treaty rate depends on the participation of the shareholder in the Colombian company that distributed the dividends.
2. The rate depends on whether the lender is a financial entity or not.
3. If services are locally untaxed, there is no WHT; otherwise, a 10% WHT will apply.

Tax administration

Taxable period

For CIT and CREE purposes, the taxable period is the calendar year, with no exceptions being admissible.

Tax returns

CIT and CREE return filing due dates are set by the government every year. Usually, they fall in the month of April.

Payment of tax

For CIT purposes, corporate taxpayers are divided into 'large taxpayers' and 'other taxpayers'. Large taxpayers pay their estimated outstanding CIT liability (outstanding after deducting applicable WHT from the estimated final liability) in three instalments over the year in which they file their annual CIT return (usually in February, April, and June). The due date varies according to the last digits of its NIT (Number of Tax Identification).

Other taxpayers pay their estimated outstanding CIT liability in two instalments over the year in which they file their annual CIT return (usually in April and June). This is also the case for payment of CREE. The due date varies according to the last digit of its NIT.

Tax audit process

The audit cycle corresponds to the taxable period, which for the case of CIT and CREE is one year.

Statute of limitations

The statute of limitations is generally two years following the actual filing of the return (a longer statute of limitations applies in certain cases).

When no tax return filing has occurred, the statute of limitations is five years (counted as of the date on which the tax return should have been filed).

Topics of focus for tax authorities

While there are no specific topics to be observed by the tax authorities when performing an audit, usually they look at the formal compliance requirements, the correct application and deductibility of cost and expenses, and the inclusion of all assets of the taxpayer.

Note that income taxpayers subject to taxation on a worldwide basis are required to present an annual return to disclose and identify any form of assets held outside Colombia.

Anti-abuse regulations

Colombian regulations establish some anti-abuse provisions, which allow the tax authority to disregard the transactions considered not to have a valid commercial or business purpose and which tend to modify, reduce, eliminate, or defer the applicable tax consequences.

Under the anti-abuse provisions, the tax authority is allowed to re-classify the nature of the transaction performed by the taxpayer and to assign the tax consequences applicable to the 'real' transaction.

Other issues**International treaties**

Colombia has entered into OECD-modelled tax conventions with Canada, Chile, Czech Republic, India, Mexico, Portugal, South Korea, Spain, and Switzerland.

Colombia has also entered into an intergovernmental agreement (IGA) for the implementation of the Foreign Account Tax Compliance Act (FATCA) with the United States. Agreements for the interchange of tax information have also been entered into with other nations.

Choice of business entity

The most common type of company used in Colombia is the so-called simplified stock company or simplified corporation, known as an SAS (*sociedad por acciones*).

Colombia

simplificada). Besides SAS, foreign investors also use branch offices of an offshore entity as their investment vehicles in Colombia.

As a general rule, from a high-level perspective, there are no major differences between a branch office and a subsidiary (such as an SAS) as far as Colombian taxation is concerned.

All the taxes discussed in this summary would apply equally to a branch operation or a subsidiary operation. However, from a commercial perspective, and specifically from the perspective of corporate liability, operating through a branch office means that the head office is exposed to direct liability for all the obligations of the branch, tax obligations included. Operating through a subsidiary means that only the subsidiary is liable for its obligations as a general rule, that is to say that the shareholders are not liable for company obligations. Of corporations, the advisable choice would be an SAS, which is very flexible in nature, easy to incorporate, and can be held by one single shareholder (regular corporations require a minimum of five shareholders).

Mergers/De-mergers

Mergers and de-mergers are tax free, subject to limitations as follows:

- The surviving or the beneficiary entity must be a resident.
- De-mergers must be over units of business/going concern (substance requirement).
- If merger/de-merger participants are unrelated, shareholders owning at least 75% (85% where participants are related) must receive, as a result, shares proportional in value to what they had prior to the merger or de-merger.
- Shareholders must receive at least 90% of value in shares (99% if participants are related).
- Shareholders selling shares received within two years of the merger/de-merger must increase any income tax due on the sale by 30%.

Mergers/de-mergers failing to meet these standards will be treated as taxable dispositions. Where participants are not residents, the tax-free status is available if assets held in Colombia represent 20% or less of the worldwide aggregate of assets of the group.

C

Significant developments

In summary, the Finance Act 2016:

- Confirms most of the tax measures introduced under the Finance Act for 2015.
- Institutes a lump-sum tax payable by enterprises that carry on business but realise no turnover in a concerned year.
- Applies the threshold of subjection to value-added tax (VAT) to independent professionals.
- Unifies the date of payment of the corporate income tax (CIT), known as *impôt sur les bénéfices et profits* (IBP) in the Democratic Republic of the Congo (DRC), at 30 April for small-sized companies and micro-sized companies.
- Amends the modalities of offsetting business losses.
- Significantly reviews certain aspects of tax procedure.

Taxes on corporate income

CIT is paid on profits realised by a company or an individual that carries out any operational activity in the country.

The Democratic Republic of the Congo levies taxes on resident companies and individuals on a territorial basis (or source basis) of taxation. Foreign-sourced profits (e.g. dividends received from a foreign subsidiary) are thus exempt from CIT.

Non-resident companies or individuals that carry out an activity in the Democratic Republic of the Congo are taxable on profits they realise through permanent establishments (PEs) or fixed establishments that are located in the Democratic Republic of the Congo.

The CIT rate is 35% (30% for mining companies).

Minimum income tax

There is a minimum tax of 1% of the yearly turnover for companies other than small-sized companies (*see below for the rates for small-sized companies*).

The minimum tax applies to loss making companies as well as companies with CIT of less than 1% of turnover. Companies that carry on business but realise no turnover in a concerned year are also subject to the minimum income tax as follows:

- 2.5 million Congolese francs (CDF) for large companies.
- CDF 750,000 for medium-sized companies.
- CDF 30,000 for small-sized companies.

Note that turnover includes, *inter alia*, all profits and interest received, as well as exceptional profits, in essence, any credits on the income statement that have the nature of income or gain, as well as capital gain.

Congo, Democratic Republic of the

Micro-sized companies are those whose annual turnover is less than CDF 10 million, and small-sized companies are those whose annual turnover is between CDF 10 million and CDF 200 million.

Small-sized companies are subject to minimum tax at the following rates:

- 1% for the supply of goods.
- 2% for the supply of services.

In the event of business termination, companies pay a lump-sum amount as follows:

- CDF 500,000 for large companies.
- CDF 250,000 for medium-sized companies.
- CDF 30,000 for small-sized companies.

Tax on rental income

Rental income related to buildings, houses, offices, premises, warehouses, etc. is administered at the level of every provincial tax authority. Gross rental income is subject to tax at a flat rate of 22% in the province of Kinshasa.

In order to secure the payment of this tax, the Tax Code has put into practice a withholding tax (WHT) system. In the province of Kinshasa, the tenant is liable to withhold 20% of the rentals paid and to remit this tax to the authority. The tax authority may challenge rentals that are not at arm's length by referring to the rental prices of similar houses.

The rent of buildings and land owned by real estate companies is subject to CIT.

Local income taxes

There are no local or provincial government direct taxes on income (except for the tax on rental income that is administered at the level of provinces).

Corporate residence

Companies incorporated in the Democratic Republic of the Congo are considered resident companies, regardless of where they are managed and controlled.

Permanent establishment (PE)

A non-resident company is deemed to have a PE in the Democratic Republic of the Congo in either of the following cases:

- It has a material place of business (e.g. head office, branch) or any other fixed or permanent installations producing revenues in the Democratic Republic of the Congo.
- Without having a material place of business, it carries out a professional activity under its own name during a period of at least six months.

Other taxes

Value-added tax (VAT)

VAT rates

The VAT base includes whatever sums, amounts, goods, or services that are received as compensation for an operation; this involves subsidies as well as any other costs, taxes, rights, or any related levies, whatever their nature, excluding the VAT itself. For imports, VAT is normally charged on the customs value of the goods concerned, plus the customs duty and import-related expenses. There are two rates:

Congo, Democratic Republic of the

- A standard rate of 16%.
- A rate of 0% on exports and assimilated transactions.

VAT exemptions

The main exempted activities include some banking and financial services, education, medical services, charitable and social activities, and transactions that are subject to a specific taxation.

The import of wheat flour, corn, and corn flour; the local sale of bread, wheat flour, corn, and corn flour; the domestic sales of animals; and the import and sale of inputs for agriculture are also VAT-exempt.

Application to non-residents

A non-resident having no PE in the Democratic Republic of the Congo but who raises an invoice on a DRC resident is required to appoint a VAT representative who is based in the Democratic Republic of the Congo and who will be accountable for the payments and collections that rest with the non-resident supplier. Failing to appoint a representative will result in the authorities holding the DRC resident customer liable for the payment of VAT that is due by application of a reverse-charge mechanism.

Mechanisms of VAT

An entrepreneur is entitled to offset VAT paid on purchase of goods and services used for business purposes against VAT charged on sales of goods and/or services. Businesses exempted from VAT on part of their sales are, in principle, entitled to deduct VAT paid on a *pro rata* basis (i.e. the ratio between the turnover related to VATable activities and the global turnover).

No VAT credit is allowed for expenditures not necessary for business purposes, nor on some specific expenditure (e.g. except in some specific circumstances, fuel, accommodation or entertainment for directors and employees, gifts, company cars).

VAT returns must be filed by the 15th day of each month in respect of transactions made the previous month. The net amount of VAT payable must be remitted to the tax authorities together with the return. If VAT paid exceeds VAT charged, the resulting VAT credit can be carried forward.

Refund of VAT can only be requested in some very specific circumstances.

Customs duties

Customs duty on imports

Customs duty on imports is calculated on the cost, insurance, and freight (CIF) value of the goods. The customs tariff on imports is the following:

Example of goods	Customs tariff rate (%)
Chemical products	
Machine tools	5
Material for transport of merchandise	
Flour	
Aggregate	10
Petrol, diesel, kerosene	
Clothing	
Furniture	20
Cigarettes	

Imported goods are also subject to the following levies at the time of border crossing:

Congo, Democratic Republic of the

- VAT on imports (wheat flour, corn, and corn flour are exempt from VAT).
- For certain goods, consumption and excise duties.
- Various para-fiscal levies.

Customs regulation also allows for certain suspensive rates, such as temporary admission.

Customs duty on exports

Customs duty on exports applies to certain categories of products produced locally, which are:

- Crude coffee.
- Electric current.
- Mineral products and their concentrates.
- Mineral oils.
- Timber.
- Scrap metals.

The bond value on exports of the said goods is fixed either by ministerial decree upon suggestion of the customs administration, or in the absence of a decree, by reference to the value of the goods when they leave the Democratic Republic of the Congo.

The rates of customs duties on exports are the following:

Example of goods	Customs duty rate (%)
Coffee	1.0
Electrical energy	
Diamond (small-scale mining)	1.5
Gold (small-scale mining)	
Diamond (industrial mining)	3.0
Gold (industrial mining)	
Minerals (copper, nickel, lead, etc.)	5.0
Timber	6.0
Silver	10.0
Platinum	

Consumption and excise duties

Scope

The following goods are affected by consumption and excise duties:

- Alcohol and alcoholic drinks.
- Carbonated drinks.
- Mineral oils (petrol, oil, jet A1, diesel, etc.).
- Lubricating oil and lubricant.
- Liquid for hydraulic brakes and other liquids for hydraulic transmissions.
- Perfumes.
- Cosmetics and make-up products.
- Hair preparations.
- Soaps, organic surface-active agents, lubricating preparations, polish, and creams for footwear.
- Plastic articles.
- Rubber articles.
- Tobacco.
- Vehicles.
- Telecommunications industry's products.

Applicability and tax base

Consumption and excise duty is applicable to:

- the production in the Democratic Republic of the Congo of consumer goods subject to duty and
- the import of these products to the Democratic Republic of the Congo.

Consumption and excise duties accrue on imports, as do customs duties and VAT.

On imports, the tax base on consumption and excise duties is the raised CIF value of the customs duties, except for mineral oils, for which the tax base is the average fiscal threshold price.

Rates

The rates of consumption and excise duties vary from 5% to 60% according to the products concerned.

Excise and consumption duties	Tax basis	Rate (%)
Beer	Selling price	27/35
Grape juice	Selling price	30
Cider and poires and other alcoholic beverages	Selling price	30/45
Juice and lemonade	Selling price	8/10/15
Ethylic alcohol unaltered of less than 80%, spirits, and liquors	Selling price	60
Ethylic alcohol unaltered of less than 80%, spirits, and liquors (medical and industrial)	Selling price	5
Ethylic alcohol unaltered of more than 80%, perfumes, and scent	Selling price	15
Aromatic and other grape fruit	Selling price	37
Tobacco manufactured	Ad valorem rate	20/40
Brand new vehicles	Ad valorem rate	2
Old vehicles from 1 to 5 years	Ad valorem rate	5
Old vehicles from more than 5 years	Ad valorem rate	10
Soaps, cigars, cream, and shoes	Ad valorem rate	10
Beauty products and make-up items	Ad valorem rate	10/15/20
Mobile phone related products	Ad valorem rate	10
Chemical industry products	Ad valorem rate	10
Plastic stuffs (plastic bags and sacks)	Ad valorem rate	20

Para-fiscal taxes

Various para-fiscal taxes shall be collected at the time of the import and/or export of goods in the Democratic Republic of the Congo.

The main applicable levies include the following:

- Administrative payment: 2% of the CIF value.
- Congolese Control Office (OCC) payments: 1.5% of the CIF value, plus various other administrative charges (Laboratory and analysis charges: 30 United States dollars [USD] maximum per test).
- *Office de Gestion du Fret Maritime* (OGEFREM) payment: 0.58% of the CIF value.
- Funds for the Promotion of Industry (FPI) charge: 2% of the CIF value.
- Cost of inspection from the Bureau of Inspection, Valuation, Assessment, and Control (BIVAC): 1.5% of the free on board (FOB) value.

Congo, Democratic Republic of the

Property tax (IF)

Scope

IF is applicable to constructions (i.e. villas, apartments, and other buildings) and land located in the Democratic Republic of the Congo.

The person subject to this tax is the owner (bearer of title deed, holding, long leasehold, mining) of the construction on 1 January of the tax year.

The following types of property are exempt from IF:

- The public administrations of states, provinces, and towns, and public businesses disposing of no other resources than those coming from budgetary grants.
- Licensed religious, scientific, or philanthropic institutions.
- Private non-profit making organisations involved in religious, scientific, or philanthropic works and having obtained civil personality.
- Foreign states as far as embassy offices, consulates, or lodgings of diplomats or consuls are concerned (upon condition of reciprocity).

Some constructions and land are, notwithstanding, exempt from IF, notably depending on the status of their owner. From this perspective, the following are exempt from the property tax on goods:

- Constructions and land allocated by the owner exclusively for agriculture or farming, including constructions serving to prepare agricultural or farming products, on the condition that at least 80% of these derive from the farming of the property owner concerned.
- Constructions and land allocated by the owner for non-profit purposes:
 - for the execution of a public service, teaching, scientific research, the setting up of hospitals, hospices, clinics, free clinics, or other similar charitable institutions
 - for chambers of commerce having obtained civil personality, or
 - for social activity of mutual companies and professional unions (syndicates) having obtained civil personality, with the exception of locales providing accommodation, a public house, or any business.

Tax base

The tax rates vary according to the nature of the goods (villas, buildings of more than one floor, flats, and other buildings) and locality ranks.

For villas, rates are fixed per square metre of area (between USD 0.3 and USD 1.5), while for other taxable items the contribution is determined on an inclusive basis (by floor, by flat, by unused land - in Kinshasa, the rate for one floor is USD 75).

Transfer tax

The transfer of a building in the Democratic Republic of the Congo gives rise to the payment, by the purchaser, of a registration duty amounting to 3% of the building's value for a normal sale.

Stamp taxes

There are no stamp taxes in the Democratic Republic of the Congo.

Payroll taxes

The tax on wages is withheld at source by the employer.

Professional salaries tax (*Impôt professionnel sur les remunerations* or IPR)

Any remuneration paid by a third party, whether public or private, provided it is not part of a service contract, and remuneration paid to executive shareholders, other than those involved in joint stock companies, are subject to payroll taxes and social contributions.

These remunerations includes salaries, wages, fees, benefits that do not represent reimbursement of professional expenses, gratuities, bonuses, and all other payments, fixed or variable, whatever their qualification.

All benefits, except for housing, transport, family allowances, and medical expenses, to the extent that they are legal or reasonable, are added to remunerations.

The tax basis of the IPR for expatriate employees must not be lesser than the equivalent minimum wage applied in their home country.

The IPR is computed by applying a progressive tax scale. The overall tax shall not exceed, in any case, 30% of the taxable income.

It should be noted there are other applicable rates depending on the activity or the nature of the compensations paid as remuneration:

- Proportional (10%): Applicable on severance pay.
- Proportional (15%): Applicable on income of casual or temporary workers.

A rebate of 2% applies on the tax amount in terms of the number of the dependants.

Exceptional salaries tax (*Impôt exceptionnel sur les rémunérations* or IER)

Employers of expatriate employees are subject to a tax of 25% on the expatriates' remuneration (10% for mining companies). This amount is not deductible for corporate tax purposes, except for mining companies. This tax was established to discourage employers from hiring expatriate staff. Expatriate staff are comprised of employees from countries other than those bordering the Democratic Republic of the Congo.

Filing and payment obligations for IER are identical as for IPR. Employers are required to file a return for payroll taxes on the 15th day of the month following the payment of the salaries. An annual payroll tax return also needs to be submitted on the 15th day of the year following the year of the payment of the salaries.

Failure or default or delay in paying due taxes gives rise to:

- Tax penalties: 20% to 40% of the tax amount due.
- Tax interest: 4% per month of the tax amount due for late payment.

Social security contributions

Social security contributions are as follows:

- National insurance fund (*Institut National de Sécurité Sociale* or INSS): 3.5% for the employees' share (withheld at source by the employer) and 9% for the employer's share.
- National office for professional training (*Institut National de Préparation Professionnelle* or INPP): INPP contribution is paid only by the employer at:
 - 3% for state-owned companies and private companies with up to 50 employees.
 - 2% for private companies with 51 to 300 employees.
 - 1% for private companies with over 300 employees.
- National office of employment (*Office National de l'Emploi* or ONEM): ONEM contribution is paid only by the employer at 0.2%.

The deadline to file and to pay INSS, INPP, and ONEM return is the 15th day of the month following the month where the salary has been paid. In this regard, a single return is filed.

Business tax on pension capital

The Finance Act 2016 has introduced a business tax of 10% based on pension capital. This tax applies to companies that implement a supplementary pension scheme in favour of

Congo, Democratic Republic of the

employees of a certain category. The tax is triggered by the actual payment of the pension to the retired person and not at the time of their constitution (administrative position).

Branch income

Tax rates on branch profits are the same as on corporate profits. However, the costs incurred abroad by the head office of the branch are not deductible in the Democratic Republic of the Congo, and the branch is liable for taxation of deemed distributed profits on top of the CIT. On profits realised, a branch will pay both the 35% CIT and a 20% tax based on 50% of the net profits after deduction of CIT.

Income determination

Taxable income consists of profits from any industrial, commercial, agricultural, or real estate operations entered into by a taxpayer in the Democratic Republic of the Congo, as well as any increases in the net assets as a result of such activities and any increases derived from capital gains, either realised or not, of any nature and origin.

Inventory valuation

Since adhesion of the Democratic Republic of the Congo into the Organisation for the Harmonisation of Business Law in Africa (OHADA) law treaty effective from 12 September 2012, or as from 1 January 2015 as far as accounting matters are involved, the inventory valuation methods permitted are as follows:

- The weighted average cost method.
- Last in first out (LIFO).

Capital gains

There is no specific tax regime applicable to capital gains in DRC Tax Law.

Capital gains are included in the corporate taxable basis of the local entity benefitting from the capital gain and, as such, subject to the 35% CIT (30% for mining companies).

Dividend income

Local-sourced dividends received by a local company are subject to a 20% income tax rate under standard law. Of the gross dividends received by resident companies, 90% are excluded from the CIT base, provided that such dividends have been subject to the 20% WHT.

Interest income

Local-sourced interest received by local companies is subject to the standard CIT regime.

Foreign income

If an income is considered as foreign-sourced, by application of the territoriality principle, it is not taxable in the Democratic Republic of the Congo.

Deductions

To arrive at taxable income, a taxpayer may deduct all costs actually incurred and which have served in the production of income of the company during the year.

Depreciation

Depreciation of fixed assets used in the company's operations may be deducted. Depreciation rates are as follows:

Congo, Democratic Republic of the

Nature of the good	Depreciation rate (%)
Buildings	2 to 5 (depending on the materials used)
Machinery and equipment	10
Vehicles	20 to 25 (depending on its use)
Fixtures, facilities	10

Item's nature	Useful lives adopted (years)
Building - general purpose or heavy equipment	20 to 25
Building - specific purpose	8
Computer equipment	3 to 5
Software	3 to 5
Motor vehicles	4 or 5
Furniture and fittings	8 or 10
Office equipment	10

As per the OHADA accounting law, however, assets should be depreciated as per the practice of the specific industry so as to depreciate each category of asset over the related normal expected useful life.

Goodwill

There is no specific provision relating to depreciation of goodwill in DRC Tax Law.

However, it is generally agreed that taxpayers can amortise goodwill in accordance with the linear system. The amortisation of goodwill rate is at the discretion of the taxpayer, but with the risk that the tax authorities can assess the rate otherwise.

Start-up expenses

Start-up expenses are deductible, provided they are staggered over three or four years.

Interest expenses

Interest costs on funds borrowed from third parties and invested in the company's operations are, in principle, deductible. Further to the tax authorities, the deduction, in principle, requires an effective payment.

Please note that if the borrower is a private limited company and the lender is one of its shareholders, the interests on loans paid are not deductible from the CIT basis.

Moreover, assuming the terms of the loan are at arm's length, the interest expense will be tax deductible in the Democratic Republic of the Congo provided (i) the interest rate applied is less than the average international interbank market rate in the month the payment of the principal is made and (ii) the repayment of the principal takes place within five years from when it has been made available.

Bad debt

As a general rule, any kind of provisions (e.g. for bad debts) may not be deducted to arrive at taxable income.

Charitable contributions

Charitable contributions or donations are not deductible.

Fines and penalties

Legal or administrative fines of any nature are not deductible.

Taxes

Income taxes are not deductible.

Congo, Democratic Republic of the

Other significant items

The following are examples of other expenses that may be deducted to arrive at taxable income:

- Rents actually paid and rental expenses linked to buildings or parts of buildings used in the exercise of the activity and any overhead derived from their maintenance, lighting, etc.
- Overhead costs from maintenance of furniture and equipment used in connection with the company's activities.
- Wages, salaries, bonuses, and allowances of employees and workers used in the operation, as well as benefits in kind if these have been added to remunerations paid.
- Professional expenses incurred for the purpose of acquiring or maintaining income or earnings.

The following are examples of other expenses that may not be deducted to arrive at taxable income:

- Expenses of a personal nature (i.e. for private purposes), such as accommodation, school fees, leave indemnities, and any other expenses not necessarily incurred in the business.
- Expenses linked to rental properties as a landlord as well as related depreciation expenses.

Net operating losses

The Finance Act for 2016 significantly amends the rules applicable to the offsetting and carryover of business losses. Henceforth, the new wording of Article 42-1° of the legislative-order n° 69/009, dated 10 February 1969, pertaining to the scheduled income taxes:

- repeals the prior authorisation of the tax administration to the offsetting of the losses carried over, but
- limits the offsetting to 60% of the tax profits made in the tax period prior to applying the deduction of said business losses, and
- no longer fixes a time limit for carrying over business losses.

There is no carryback loss regime in the Democratic Republic of the Congo.

Payments to foreign affiliates

As a general rule, payments to foreign affiliates should be at arm's length and transfer pricing documentation must be provided.

In respect of payments made by a local company to a foreign company for services (e.g. management services, technical assistance services), such expenses are deductible, provided that:

- the services rendered can be clearly identified
- the services cannot be rendered by a local company, and
- the amount paid for the service is not overstated and is commensurate to the nature of the service itself.

The Finance Act 2014 has introduced the notion of abnormal acts of management, which include, in addition to expenses, any form of benefits or aid granted to third parties without equivalent consideration for the company, such as:

- Payments in the form of mark-ups or markdowns of purchases or sales.
- Payments of excessive royalties without any equivalent consideration.
- Income waivers (sales at a reduced price, free supply of services, grant of interest-free loans or loans bearing insufficient interest).
- Debt or commission waivers.
- Debt forgiveness.

- Benefits disproportionate to the service rendered.

Benefits or aids granted to companies within the same group may be deemed as normal acts of management, provided that the company shows the existence of its own interest in granting such benefits or aids. The sole general interest of the group is not sufficient to justify such practices.

Group taxation

There is no group taxation regime per the DRC tax legislation.

Transfer pricing

The following specific transfer pricing requirements are provided by the Tax Code:

- Interests on loans are not considered as deductible expenses for the borrower if the borrower is a private limited company and the lender is a shareholder.
- Where a local company is directly or indirectly controlled by a foreign company, any abnormal advantage given to the latter or related person is considered as an indirect distribution of profits and is then added back to the profits of the local company.
- In respect of payments made by a local company to a foreign company, for services (management services, technical assistance services), the Tax Code provides that such expenses may be deductible if (i) the services rendered can be clearly identified, (ii) the services cannot be rendered by a local company, and (iii) the amount paid for the service is not overstated and is commensurate to the nature of the service itself.

Finance Law 2015 imposes an obligation for companies established in the Democratic Republic of the Congo to have transfer pricing documentation on operating transactions with their affiliated companies located abroad. However, Finance Law 2015 only provides general guidelines for the information to be provided (i.e. structure of the group, selection of the most appropriate transfer pricing method).

Thin capitalisation

There are no thin capitalisation rules in the DRC tax legislation. However, it is provided in the Mining Code, from a general perspective, that, for the holder of a mining licence, the ratio of the funds borrowed against the amount of own funds does not exceed 75/25.

Moreover, the OHADA Treaty provides that shareholders' equity should be above half of the company's authorised share capital.

Controlled foreign companies (CFCs)

No specific provision relating to CFCs are provided for in DRC law.

Tax credits and incentives

Investment Code

The Investments Code allows for a certain number of tax, customs, and general order measures designed to favour direct investments (notably a CIT holiday during a defined investment period that would differ depending on the location of the investments). The preferential tax treatment measures of the Investments Code apply to direct investments and/or to entities that carry them out.

The regime of the Investments Code does not apply to numerous sectors, notably:

- Mining and hydrocarbon.
- Banking and insurance.
- Trade.

Congo, Democratic Republic of the

In order to take advantage of the provisions of the Investments Code, the following conditions must be fulfilled by the investor:

- The investor must be a Congolese legal entity.
- The investment must be at least USD 200,000.
- The investing company must comply with the rules and regulations relating to environment.
- The investing company must undertake to train local personnel in technical and executive duties.
- The investing company must undertake to create an added value of 35% of its initial investment (within a stipulated time period to be agreed).

The application file is examined by the National Agency for the Promotion of Investments in the Democratic Republic of the Congo (ANAPI) and then sent to the Minister of Finance, who decides on the grant of the advantages foreseen in the Investments Code to the applicant, by the way of a Ministerial Order.

Mining

The Mining Code, completed by the Mining Regulations, sets out a preferential customs and fiscal regime that deviates on some important points from the standard regime.

The tax rules set-up by the Mining Code are supposed to be exhaustive and exclusive (it provides for all the taxes and customs duties owed to the Treasury by eligible entities, to the exclusion of any other form of taxation) and stable. This regime applies to all holders of a mining title or career, or for which a mining title or career is established, as well as to (i) affiliated companies carrying out mining activities and (ii) sub-contractors carrying out mining activities resulting exclusively from contracts concluded with the bearer of the mining title.

Among other tax preferential features of the Mining Code, the following apply:

- A reduced CIT rate of 30%.
- Absence, under conditions, of WHT on interest paid in relation to loans denominated in foreign currency and concluded abroad.
- A reduced 10% WHT rate for dividends.
- A reduced 10% exceptional tax for expatriates' remuneration.
- A possibility to deduct some specific provisions.

The holder of a mining licence is also liable to mining royalties, computed on the basis of the amount of sales minus the cost of transport, analysis in relation to the quality control of the commercial product for sale, insurance, and cost relating to the sale transaction.

Hydrocarbons

The tax regime of oil companies is mainly provided in the production sharing contracts as well as in the Ordinance-Law 081-013 of 2 April 1981 bearing general regulations regarding Mining and Hydrocarbon.

A revision of the Hydrocarbons Code is currently under discussion.

Foreign tax credit

No specific provision relating to foreign tax credits is provided for in DRC law.

Withholding taxes

The following DRC-sourced payments are subject to a WHT in the Democratic Republic of the Congo:

Congo, Democratic Republic of the

- Dividends.
- Royalties.
- Interest. Note that if the interest is paid to a local company, the WHT does not apply since the interest is included in the taxable income of the company charging such interest.
- Directorship fees.
- Service fees paid to foreign individuals or entities not established in the Democratic Republic of the Congo.

C

The Democratic Republic of the Congo has entered into double tax treaties (DTTs) with Belgium and South Africa. However, there are still discussions from the DRC tax authorities about their effective entry into force.

WHT rate and payments

The standard rate of WHT on dividends, royalties, interest, and directorship fees is 20%, which is based on the gross amount of sums paid.

If the payee does not withhold the tax from the amount invoiced and pays the tax of 20% directly, then the tax authorities consider that the basis of the 20% tax is composed of the amount invoiced plus the amount of the tax.

Consequently, in the case that the DRC company takes in charge the corresponding WHT, the WHT rate will be 25% (20/80) and the amount of tax will not be tax-deductible.

For royalties, the WHT is charged on the net amount of the royalties paid. The tax authorities consider that the net amount of royalties is calculated by deducting 30% from the royalties invoiced (i.e. the taxable basis will be 70% of the royalties invoiced).

The rate of WHT on amounts paid as compensation for services provided by foreign individuals/entities is 14%, which is based on the gross amount of sums paid.

The treaties concluded by the Democratic Republic of Congo with Belgium and South Africa provide for reduced rates for dividends, interest, and royalties. It is also generally agreed that, by application of treaty, services furnished by providers being tax resident of those countries and being not established in the Democratic Republic of Congo should not be subject to the 14% services fees WHT (however, one may note that the DRC tax authorities are still discussing the entry into force of these treaties on the grounds that the implementation measures have not yet been published by the Ministry of Finance).

The table below provides a summary of different WHT rates:

Recipient	WHT (%)				
	Dividends (1)	Interest	Royalties	Directorship fees	Services
Resident	10/20	N/A	20	20	N/A
Non-resident (not established)	10/20	0/20	20	20	14
Treaty:					
Belgium	10/15	0/10	10	20	N/A
South Africa	5/15 (2)	0/10	10	20	N/A

Notes

1. A reduced 10% WHT rate for dividends is applied in the mining sector.
2. The WHT charged shall not exceed 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

Congo, Democratic Republic of the

Tax administration

Taxable period

The taxable period is 1 January to 31 December. This duration can be less than 12 months for the first accounting period beginning in the course of the first half of the calendar year. The same duration can also be more than 12 months for the first accounting period beginning in the course of the second half of the calendar year.

Tax returns

The yearly CIT return is due by 30 April of the following year.

Payment of tax

Final payment of CIT is required when submitting the yearly tax return, which is due by 30 April of the following year.

CIT is payable in local currency through a DRC bank account by a wire transfer to the bank account of the Public Treasury. Consequently, in order to operate in the Democratic Republic of the Congo, the opening of a bank account in a DRC bank is mandatory. Moreover, the tax authorities require the bank account number of the applicant in order to grant a taxpayer number.

The collection of CIT is performed on an instalment basis. Collection by way of prepayment has been abrogated.

Instalments of corporate tax

Instalments, in respect of CIT, apply to taxpayers who come under the supervision of two specific kinds of tax departments: the Directorate General (DGE), the department of the tax authorities in charge of the most important taxpayers, and the *Centre des Impôts* (CDI), tax centres.

These taxpayers have to pay two instalments each representing 40% of the CIT paid during the previous fiscal year (including the amounts assessed by the tax authorities). This, therefore, totals 80% of the CIT actually paid in the previous year. The first instalment must be paid before 1 August, and the second instalment before 1 December. Both payments are offset against the final CIT due for the fiscal year. The balance is paid when the tax return is submitted.

Small-sized companies shall make an advance payment amounting to 60% no later than on 31 January of the year following the one of the realisation of the concerned income. The balance payment is henceforth to be made no later than on 30 April. As a reminder, the rate of the CIT applicable to small-sized companies is 1% based on the turnover for enterprises selling goods and 2% for enterprises providing services.

Micro-sized companies shall pay an annual lump-sum tax amounting to CDF 50,000, no later than on 30 April of the year following the one of the realisation of the income.

Tax audit process

In practice, there is a tax audit every year.

Statute of limitations

Since 27 February 2013, a company may get audited up to four years after submission of a tax return (previously five years).

Topics of focus for tax authorities

The tax authorities shall discuss any relevant topic in relation to any tax.

There is no general statutory system of advance rulings.

C

Significant developments

During the past year, two different laws were promulgated (although not published yet, according to the General Director of the Tax Administration, the two laws entered into force from the date of their promulgation):

- The Law No. 10-2015 of 5 August 2015 on the revised Finance Act for the year 2015, which was promulgated by the President of the Republic but has not yet been published in the official Gazette.
- The 2016 Finance Act (Law 33 dated 15 January 2016).

The following new tax measures have been introduced:

Concerning the Law No. 10-2015 of 5 August 2015 on the revised Finance Act for the year 2015

- Exemption from corporate income tax (CIT) for companies in the following sectors:
 - Agriculture.
 - Agro pastoral.
 - Poultry or fishing.
- All traders carrying out an economic activity in the Republic of Congo and subject to taxes provided in the General Tax Code must have an Identification Number. The absence of an Identification Number exposes the taxpayer to the following:
 - The loss of the right to deduct the value-added tax (VAT), custom clearance duties on goods.
 - The loss of the right to mandate any payment by the Public Treasury, local authorities, and public institutions.
 - The payment of a fine of 1 million *Coopération financière en Afrique centrale* (Central African CFA) francs (XAF).
- The General Director, Departmental Director, and Tax Collector have authority to decide on deferred or instalment payment of the minimum tax in the following manner:
 - When the amounts claimed are less than or equal to XAF 200 million, deferred or instalment payment authorisation is given by the Departmental Director.
 - When the amounts claimed are beyond XAF 200 million, deferred or instalment payment is authorised to the taxpayer from the General Director.
- The extension of excise duties to imported non-alcoholic beverages following their specific customs classification.
- The increase of the fees for the issuance and renewal of authorisations for the establishment and exploitation of networks electronic communication services for pylons operators as follows:
 - Authorisation fee is now at XAF 100 million.
 - Authorisation renewal fee is now at XAF 75 million.
 - Royalties for management of the authorisation is now at XAF 50,000 per pylon (previously XAF 10,000 per pylon).
- The increase of the tax on transfer fund from 1% to 1.5%.
- A special tax regime for manufacturing animal feed, processing and packaging of agricultural, livestock, fish farming, and fishing continental products.

Congo, Republic of

- Establishment of tax on exportation of processed wood products from natural forests or plantations. The rates are based on value of the exports' free on truck (FOT) and free alongside (FAS) quality. The applicable rates range from 0.5% to 4%.
- Institution of royalties for public market regulations at the rate of 1% on the amount, duty free, regardless of its tax and customs regime.

Concerning the tax provisions of the 2016 Finance Act (Law 33 dated 15 January 2016)

- The reduction of VAT on imported goods from 18% to 5%.
- The creation of the Medium Enterprises Unit in the cities of Brazzaville and Pointe-Noire, with a list of medium-sized companies that will be managed by the Unit (to be launched shortly).
- The introduction of the bank guarantee as security for litigation claim.
- The payment of taxes by bank transfer to the Public Treasury for security purposes.
- Change of the tax on electronic communications due by consumers. This tax is declared monthly and withheld spontaneously by phone operators.
- Change of the tax on tobacco and alcohol.
- Reinforcement of tax provisions applicable to the forestry industry.

Taxes on corporate income

Congolese registered companies are taxed on the territoriality principle. As a result, Congolese companies engaged in business outside of the Republic of Congo are not taxed in the Republic of Congo on the related profits.

In the absence of a tax treaty stating otherwise, a non-resident company is liable for CIT on income realised in the Republic of Congo or derived from or resulting from work/services of any nature supplied or used in the Republic of Congo.

The standard CIT rate in the Republic of Congo is 30%, with certain exceptions.

A withholding tax (WHT) of 15% or 20% is imposed on income sourced in the Republic of Congo that is derived by foreign companies not necessarily engaged in activities in the Republic of Congo (*see the Withholding taxes section for more information*).

Minimum tax

The minimum tax payable is 1% of the annual turnover and cannot be less than XAF 1 million (XAF 500,000 if annual turnover is less than XAF 10 million).

A 2% minimum tax is payable by companies showing losses during two consecutive fiscal years. The 2% rate is applied to the sum of gross turnovers and products and benefits realised by the company in the most recent year in which it earned a profit. The 2% tax is not deductible for CIT purposes. However, in a company's first profit-making year after incurring the losses, half of the 2% tax is deductible.

Industry specific rates

Companies in the following sectors are exempt from CIT:

- Agriculture.
- Agro pastoral.
- Poultry or fishing.

A CIT rate of 25% applies for microfinance companies and private schools organised as a company.

A CIT rate of 30% applies for mining companies and real estate companies.

A CIT rate of 35% is applied on a deemed profit equal to 22% of the total gross remuneration (i.e. an effective tax rate of 7.70% of the taxable turnover made in the Republic of Congo) derived from services rendered by:

- Foreign companies that qualify for this simplified tax regime.
- Local companies and branches that realise more than 70% of their annual turnover with oil companies and oil services companies (in this case, the deemed profit tax is regarded as a final burden).
- Catering activities performed or delivered on petroleum sites.

Note that these companies revert to the general taxation regime the second year after the turnover realised with oil and gas sector companies becomes less than 70% of their annual turnover.

A substantiated request shall be made to the Director General of Taxation between 10 October and 20 October of the second year, who shall reply, at the latest, by 15 December of the same year.

Headquarters operations of foreign companies

The headquarters operations of foreign enterprises taxation regime is subject to prior approval by the tax authorities.

If enacted, headquarters operations of foreign enterprises and international groups will be granted a favourable tax status in the Republic of Congo. For those that qualify, CIT is charged on a deemed profit equivalent to a prescribed percentage of headquarters expenses, the percentage of which is currently unknown.

To qualify, the headquarters must be registered under the form of a public limited company or branch and must act solely for the benefit of the group in the area of management, control, or coordination.

Global flat taxation

The global flat tax is at 7% (of the annual turnover) or 10% (of the annual margin) and applies in lieu of the standard CIT rate. It is calculated on the annual turnover of very small and small enterprises taxable under the flat rate regime, whose turnover does not exceed XAF 100 million.

Local income taxes

See *Business tax in the Other taxes section*.

Corporate residence

A company is considered resident in the Republic of Congo if it has its registered office or principal office for all its activities in the Republic of Congo.

Permanent establishment (PE)

There is no general definition for a PE. However, a PE has been defined by the double tax treaties (DTTs) signed between the Republic of Congo and France and the Customs and Economic Union of Central Africa (UDEAC) to include a place of management, a branch, an office, a factory, a workshop, and a mine, oil or gas well, quarry, or other place of extraction of natural resources.

Congo, Republic of

Other taxes

Value-added tax (VAT)

The Congolese VAT rate is 18%. In addition to VAT, a surtax calculated at the rate of 5% applies to the amount of VAT, which must be invoiced and paid at the same time as the VAT. Therefore, the VAT rate is globally 18.9%. The surtax is not deductible (final cost).

A reduced VAT at the rate of 5% is levied on importation.

Under the provisions of the VAT Law, all economic activities conducted in the Republic of Congo are subject to VAT, regardless of their purpose, profitability, or the legal status of the business performing them, and irrespective of whether these activities are habitual, occasional, or originate in the Republic of Congo or from a foreign country. Therefore, any person, natural or legal, engaged in an industrial, commercial, or professional activity is subject to VAT unless specifically exempt by law.

Section 8 of the VAT Law states that a service is considered as provided in the Republic of Congo when the service is used or exploited in the Republic of Congo.

In principle, an entrepreneur is entitled to credit the VAT paid on purchases of goods, equipment, and services for use in business (input VAT) against the total of the tax charges to one's customers for deliveries made and services rendered (output VAT).

Taxpayers not exclusively carrying out transactions giving rise to a VAT deduction shall deduct VAT proportionally on the portion of the income pertaining to taxable transactions.

VAT payers carrying structural VAT credit have the obligation to do inventories in the presence of tax administration representatives for companies in October, failure to which the VAT credit shall be cancelled.

VAT payers have the obligation to provide an excerpt of their VAT trial balance of each account on VAT in accordance with the accounting system used by the company, failure to which all VAT deductions shall be added back.

Taxpayers without a Tax Identification Number (NIU) will lose the right to deduct the VAT on custom clearance duties on goods.

Exporters subject to VAT who realise more than 80% of their sale transactions abroad are obligated to withhold VAT paid on the purchases of goods and services (the list of exporters entitled to withhold VAT will be published by the tax authorities).

VAT resulting from tax assessment is not deductible.

VAT paid in cash in connection with invoices exceeding XAF 500,000 is not deductible.

A VAT return must be filed on a monthly basis before the 20th day of every month.

Customs duties

When applicable, import duties are payable at rates ranging from 5% to 30% on the customs value of imported goods. Customs value is calculated on the cost, insurance, and freight (CIF) level.

Customs duties rates

Group	Rates (%)
Basic necessities	5
Raw materials and capital goods	10

Group	Rates (%)
Intermediate and miscellaneous goods	20
Consumer goods	30

Additional entry taxes

Additional entry taxes apply on the importation of goods, such as:

- Economic and Monetary Community of Central Africa (CEMAC) integration tax: 1% on CIF value.
- Statistic tax: 0.2% on CIF value.
- Organisation for the Harmonisation of Business Law in Africa (OHADA) contribution: 0.05% on CIF value.
- Economic Community of Central African States (CEEAC) contribution: 0.04% on CIF value.

2% customs duties reduced rate

In addition to a VAT exemption on imports, as an exceptional measure, a 2% customs duty reduced rate on imports of machinery and equipment used for agriculture, flower, forest, and fish industries, as well as fertilisers and other goods necessary for agriculture, is applicable.

Computer royalty

A 2% computer royalty, to cover expenses incurred by the Customs Administration on computer data processing, is applicable without exception or exemption to all importation and exportation of goods. The royalty applies on the customs taxable value of any imported or exported goods in the Republic of Congo.

Excise taxes

Excise duties on all locally made products are due at the rate of 10%, while imported goods are subject to excise duty at the rate of 25%.

Imported non-alcoholic beverages are subject to excise duties following specific customs classification.

Land tax on built properties

Land tax is payable annually on built properties and is due from the owner. However, properties built for the purpose of accommodation are exempt for ten years, and properties built for business purposes are exempt for five years. The effective rate is determined every year by the local council.

The land tax is levied on the rental value after a deduction of 75% (decline, maintenance, and repair expenses) for properties built for business purposes. The land tax is levied on the cadastral value after a deduction of 75% (decline, maintenance, and repair expenses) for properties built for accommodation purposes.

Land tax on non-built properties

Land tax is payable annually on non-built properties and is due from the owner. However, properties intended for plantations and breeding are temporarily exempt for a three to ten year range. The effective rate is determined every year by the local council.

The land tax is levied on 50% of the cadastral value, determined every year by the Ministry of Finances. The land tax is arbitrarily assessed by hectares in rural areas according to the nature of the plantations.

Congo, Republic of

Rent tax

Rent tax is payable annually on the rental of built property. It also applies on non-built property for business purposes. The rent tax is imposed on the occupant of the premises (whether the occupant is the owner, a tenant, or a subtenant).

The rent tax, which is equal to one-twelfth of the rents due within a year, is due annually on or before 20 March. For new lease agreements, the rent tax is due within three months of the effective date of the lease agreement and is calculated as a proportion of the rents due until the end of the year.

The rent tax is paid by the tenant on behalf of the owner, or by the subtenant on behalf of the tenant. The tenant/subtenant has the legal obligation to pay this tax on behalf of the lessor. Tenant and subtenants make a once-a-year deduction between 1 January and 30 April of the same year from all the rents due to the owner.

A 50% fine, assessed on the amount of the tax, is due for any late payment of the rent tax.

Registration fees and stamp duties

Lease agreement registration fees amount to 3% of the value of the annual rent paid during the tax year, including premises charges if any. 'Additional centimes' also apply at a 5% rate of the registration fees. Stamp duties and registration fees should be paid for the total duration of the lease agreement. In the case where the lease agreement is renewed, stamp duties and registration fees should be paid for the renewable period.

Stamp duty ranges from XAF 200 to XAF 20,000 on certain documents.

Examples of documents that are subject to stamp duty include:

- Letters of agreement and other letters that are prepared for use as evidence of act, fact, or condition of civil nature.
- Notarial deeds and their copies.
- Visas and flight tickets.

The following fees for the registration of contracts are due within three months from date of signature:

- Purchase orders for public contracts at the rate of 2% for contracts with a value exceeding XAF 10 million.
- Subcontracts in the building construction and public work sector at a fixed fee of XAF 100,000.
- Insurance contracts are registered free of charge and failure to register such contracts will be subject to penalty at the fixed fee of XAF 3 million.
- A fixed fee of XAF 1 million for the registration of every oil services contract with foreign companies and their sub-contractors before the execution of the contract.
- All insurance policies carried out by oil, mining, and telephone companies are subject to registration free of charge; failure to register will result in penalties that total XAF 3 million.
- Registration fee on lease of movables and immovables used for habitation or commercial purposes at the rate of 3%.
- Registration fee on the transfer of rights in a lease at the rate of 10%.

Private contracts, as well as contracts signed abroad or in jurisdictions where registration is not required, do not have to be registered within three months after their signature. They can be registered at any time.

Insurance contracts shall be registered and tax on insurance paid on the 20th day of the month following the insurance subscription. All importers have an obligation to insure imported equipment with local insurance companies.

Transfer of company shares are subject to a 5% registration fee.

The direct or indirect transfer of assets or social rights of Congolese companies is also subject to a registration duty of 5% calculated on the value of the assets transferred and social rights of these companies. This registration duty is also due in the event of change of control of the company by a change of at least 60% shareholding.

Oil and gas

Specific rules and caps apply for the upstream (production) oil and gas industry.

Tax on pollution

The tax on pollution is payable by petroleum and mining extracting companies in the production phase, at the rate of 0.2% on the annual turnover.

This tax constitutes a non-deductible expense for the extracting mining/hydrocarbon company in the production phase.

This tax is due in the course of the year and payable quarterly by instalment, proportionally to the production realised during the just-ended quarter and not later than the 20th day of the month following the end of the quarter.

Business tax

The business tax (*'patente'*, in French) is a tax collected for local communities.

Legal entities that carry out, in the Republic of Congo, a commercial activity, industrial activity, or any other activity not included in the statutory exemptions are subject to business tax.

The taxable basis of the business tax is:

- For taxpayers under the general regime: The annual turnover, excluding taxes of the previous fiscal year declared or assessed by the administration, for fiscal years ended on 31 December of the year N-1 and to be filed to the tax administration between 10 May and 20 May of the year N.
- For taxpayers that do not realise turnover: All operating expenses in the Republic of Congo.

Newly registered companies in their first calendar year are exempt from paying business tax.

Foreign companies subject to the deemed profit tax regime are taxed for the entire year from the start of operations in the Republic of Congo on the basis of the estimated contract value of their services.

The business tax is payable on the basis of graduated rates as follows:

Annual turnover (XAF)	Rate
Below 1,000,000	XAF 10,000
1,000,001 to 20,000,000	0.75%
20,000,001 to 40,000,000	0.65%
40,000,001 to 100,000,000	0.45%
100,000,001 to 300,000,000	0.20%
300,000,001 to 500,000,000	0.15%

Congo, Republic of

Annual turnover (XAF)	Rate
500,000,001 to 1,000,000,000	0.14%
1,000,000,001 to 3,000,000,000	0.135%
3,000,000,001 to 20,000,000,000	0.125%
Above 20,000,000,000	0.045%

Business tax is due for the 12-month period from 1 January to 31 December of the taxation year and must be paid in full by the taxpayer, not later than 20 April of each year. Beyond this date, the taxpayer is liable to a penalty of 100% of the amount in excess of the principal amount.

Business tax due by foreign companies subject to the deemed profit tax is payable within 15 days after the beginning of activities. Otherwise, a penalty of 100% is applied.

Business tax paid to the Inland Revenue is not refundable.

Tax on company-owned cars

The tax on company-owned cars applies to the previous fiscal year company-owned cars and is due on 20 March at the latest.

With the exception of estate cars, private cars of companies falling into the category of own use cars for the issuance of vehicle registration documents are subject to tax.

The tax rates vary from XAF 200,000 for engine ratings not over nine horsepower, to XAF 500,000 for the rest.

Cars registered more than ten years ago are exempt from tax.

Single tax on remuneration

A single tax, at the rate of 7.5% on the gross salary of resident employees and non-resident seafarers' employees, shall be borne by the employer. This tax is payable on the 20th day of the following month after the remunerations were due.

Social contributions

The employer shall be liable for the following social contributions:

- Family allowance fixed at the rate of 10.035% of gross salary, benefits in kind inclusive, capped at XAF 7.2 million annually.
- Work accident contribution fixed at the rate of 2.25% on gross salary, benefits in kind inclusive, capped at XAF 7.2 million annually.
- Old age, invalidity, and death insurance fixed at the rate of 8% of gross salary, benefits in kind inclusive, capped at XAF 14.4 million annually.

Branch income

70% of the net profits made by branch offices and foreign companies carrying out business are automatically considered as distributed profits and subject to tax on dividends at the rate of 15%.

Income determination

Taxable income is based on financial statements prepared according to standard statements of the OHADA treaty.

Business expenses are generally deductible, unless specifically excluded by law.

Inventory valuation

Stocks are valued at cost price. However, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.

Capital gains

Capital gains are treated as ordinary business income and are taxed at the standard CIT rate of 30%. However, a capital gain realised on the disposal of a fixed asset in the course of trading is excluded from income for a period of three years if the taxpayer reinvests the gain in new fixed assets for the business.

If the business is totally or partially transferred or discontinued, only half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business and only one-third of the gain is taxed if the event occurs five years or more after the business is started or purchased. However, the total gain is taxed if the business is not carried-on in any form.

Capital gains realised by non-residents on transfers of shares of Congolese companies are subject to taxation at the rate of 20%. This tax shall be paid upon registration of the deed of transfer of the considered shares. Under such sale transactions, the seller, the buyer, and the company whose shares are transferred are jointly and severally liable for the levied tax.

Net capital gains realised as part of a direct or indirect transfer of social assets and/or rights resulting in a change of control of a Congolese company become subject to CIT.

Dividend income

Dividends are treated as ordinary business income and are taxed at the standard CIT rate of 30% for resident corporations.

After three years, profits credited to the non-compulsory reserve are considered to be dividends and are, accordingly, subject to the 15% WHT on dividends.

Amounts claimed as a result of a tax adjustment and added back to revenue, if not invested in the company, are subject to tax on dividend.

Inter-company dividends

Dividends received from a Congolese company (DivCo) by a commercial company incorporated in the Republic of Congo (HoldCo) are exempt from CIT and subject to a final 15% WHT if the following conditions are met:

- HoldCo and DivCo are incorporated in the CEMAC.
- HoldCo holds 25% of the capital of DivCo.
- HoldCo holds the shares for at least two years from the date of purchase.

However, 10% of dividends that are deemed to represent the share of cost and expenses are included in the taxable profits of HoldCo and liable for the CIT.

If the above conditions are not met, dividends received from a Congolese company by another Congolese company are subject to a 15% WHT, which is an advance payment of the recipient's CIT.

Interest income

Subject to any specific provisions, interest paid or deemed to be paid is subject to a WHT at the rate of 20% of the interest paid.

The interest paid is deductible for CIT purposes for the Congolese company to the limit of 20% of the taxable profit before deduction of the expenses in question.

Congo, Republic of

Foreign income

Resident companies are taxed only on income (except for dividends received abroad) derived from their activities carried out in the Republic of Congo.

Deductions

Generally, a deduction is allowed for all expenditures incurred to obtain, collect, and maintain business profits. To be deductible, expenses should be incurred necessarily for the normal purposes of the business and be supported by suitable evidence.

Depreciation and depletion

In general, all types of fixed assets, except land, are depreciable for tax purposes as long as they can be shown to have been acquired for business purposes of the corporation. Depreciation must be calculated on the original purchase price. The straight-line method is used, and the Congolese General Tax Code sets forth maximum rates of depreciation. Goods costing less than XAF 500,000 per item may be written-off at purchase as expenses.

Depreciation recorded when the company is in a loss position may be carried forward without limitation and deducted from the first available taxable profits, provided it was appropriately disclosed in the annual CIT return.

Recoverable and identifiable packaging is regarded as a fixed asset and is recorded in a fixed asset account at the time of purchase. This packaging is regarded as returnable packaging when the supplier intends to act as the sole owner of the packaging.

Unrecoverable packaging is recorded as an expense and is deductible for tax purposes.

Exceptional accelerated depreciation may be authorised in certain circumstances for heavy equipment with a value of more than XAF 40 million. This special accelerated depreciation does not apply to private vehicles owned by the enterprises.

The following list contains maximum rates of depreciation as set forth in the General Tax Code:

Assets	Rates per year (%)
Construction	5 to 20
Fixed devices and equipment	5 to 25
Movable equipment	10 to 100
Transport materials	5 to 33.33
Furniture, fittings, and other equipment	10 to 33.33
Fishing equipment	10 to 20
Hotels, bars, and restaurants	10 to 50
Plastic equipment (moulding)	10 to 33.33
Equipment subject to chemical action	20

Exceptional depreciation method

The exceptional depreciation method is an accelerated depreciation method.

Companies may elect the accelerated depreciation method for heavy materials and equipment that:

- are purchased new for a value higher than XAF 40 million
- have a useful life of at least three years
- are used for manufacturing, processing, transport, and handling, and

- are bound to an intensive use.

The application for the accelerated depreciation method must be submitted to the head office of taxes within three months of the purchase of the assets to be depreciated. The option is granted upon approval of the Ministry of Finances. If the administration fails to respond to the application for accelerated depreciation within three months, the application is tacitly granted.

Under the exceptional depreciation method, a 40% deduction may be taken in the year of acquisition of the previously mentioned assets, increased by the normal rate calculated on the residual value after application of the accelerated depreciation. These assets are depreciated on a straight-line basis thereafter.

Goodwill

There is no specific provision relating to amortisation of goodwill in the Republic of Congo.

Start-up expenses

There is no specific provision in the Congolese General Tax Code on the deduction of start-up expenses. Start-up expenses that occurred in the first year of incorporation (N) are deductible in the second year of operation (N + 1).

According to the OHADA Uniform Act relating to Accounting Systems and Accountancy, start-up expenses can be amortised either in one year (in such case, they are booked in the deductible expenses during the first fiscal year) or in two years (50% during the first fiscal year and 50% during the second fiscal year).

Interest expenses

Interest is deductible, subject to the following conditions:

- General limit: Regardless of the form under which a legal entity is registered, the deduction is allowed with an interest rate limited to the rate of the advances in current accounts on states funds of the Bank of the States of Central Africa (BEAC) raised by two points. Currently, the ceiling for the deduction of interest is 7.25%.
- For private limited companies and public limited companies, the deduction is allowed according to the status of control over the management of the enterprise, as follows:
 - For shareholders who have control over the company *de facto* or *de jure*, the deduction is allowed only to the extent that the sums paid do not exceed, for the shareholders as a whole, half of the paid-up capital and are within the limit sets forth in the 'general limit'.
 - For other shareholders, the 'general limit' applies.

Bad debt

Expenses and debts not recovered within two years after their account recording shall be added back to the taxable basis of the first fiscal year, subject to general accounting audit even if the fiscal year is statute barred.

Charitable contributions

Donations and gifts made to beneficiaries in the Republic of Congo are deductible from CIT basis at a limit of 0.5‰. The limit is 0.5% as regards donations and subsidies made for the support and development of sport. 50% of amounts of donations and payments upon the occurrence of a natural disaster or accidental disaster are deductible.

Fines and penalties

Penalties relating to violation of regulations are not deductible.

Congo, Republic of

Taxes

Taxes, other than income taxes, are usually deductible. Examples of deductible taxes include customs duties, excise duties, payroll taxes, business tax and accessory taxes, registration taxes, and unrecoverable VAT.

CIT itself is not deductible, nor is the special tax on company-owned cars.

Taxes withheld on remuneration, paid to third parties (third parties taxes), and remitted to the tax office by a Congolese enterprise are not deductible.

Net operating losses

For tax purposes, losses may be carried forward to offset profits earned in the three succeeding fiscal years. Carryback losses are not permissible.

As mentioned above, depreciation recorded when the company is in a loss position may be carried forward without limitation.

Payments to foreign affiliates

Allowable deductions include sums paid abroad to foreign companies for:

- actual services, notably overhead for the operations made for the benefit of a company based in the Republic of Congo, including costs of studies; technical, financial, and accounting assistance; commissions and fees; and interests, and
- use of patents, licences, trademarks, drawings, manufacturing processes, patterns, and similar rights to the extent the payer proves they correspond to actual operations, and they are neither abnormal nor excessive.

Subject to the provisions of tax treaties (France, Italy, Mauritius, and CEMAC), the deduction is allowed within a limit of 20% of taxable profits before deduction of the expenses in question. For specific activities, such as, namely, public works business, the limitation of deductibility is capped at 2% of turnover.

In the event of losses, the rate is applied on the results of the last profit period that is not statutory limited. In the absence of profits during the period out of statutory limitation, the sums paid are not allowed as tax deductions.

When the sums are not allowed, as a whole or in part, in the deductible expenses, they are deemed to be paid benefits and are subject to tax on the dividends at the rate of 15%.

Royalties for the transfer or concession of patents, trademarks, drawings, and other similar titles are deductible to the extent the payer proves they are still valid. When these royalties benefit an enterprise contributing in the management or share capital of an enterprise in the Republic of Congo, they are deemed to be paid benefits and are subject to tax on the dividends at the rate of 15%.

Commission or brokerages relating to goods purchased on behalf of enterprises based in the Republic of Congo are allowable tax deductions at up to 5% of the purchase amount made by the central purchasing office, the head office, or the intermediaries. The reductions shall benefit enterprises based in the Republic of Congo. An original supplier's invoice must be attached to the intermediary's invoice.

The payer shall prove that:

- the purchases necessitated the interventions of a broker or intermediary
- the commissions provided better supply conditions compared with the actual situations on the market, and
- the commissions are not excessive compared with the nature of the services.

Group taxation

There is specific group taxation within the CEMAC area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent company represent at least 25% of the capital of the subsidiary company.
- The parent company and subsidiary companies have a registered office in the CEMAC state (Cameroon, Central Africa Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company, which undertakes to retain them for at least two consecutive years in registered form.

Another group taxation regime is also available upon option and under certain conditions, wherein the taxable profits of the group's companies can be consolidated at the level of the holding company, which will pay the tax due.

Transfer pricing

For companies under the control, *de facto or de jure*, of companies or groups situated outside the Republic of Congo, payments made by whatever means are considered as transfer of profits and subject to CIT and tax on income from securities if the transfer includes:

- Increase in the purchase price or decrease in the sale price.
- Payment of excessive royalty or without a consideration.
- Loans without interest or at an unjustifiable rate.
- Reduction of debts.
- Benefits that are out of proportion in relation to the service rendered.

Transfer pricing rules have been reinforced, and taxpayers can request their transfer method to be approved by the tax authorities before implementation.

Thin capitalisation

There are no specific thin capitalisation rules in the Republic of Congo.

Holding companies

A taxation regime applies to incorporated holding companies complying with certain conditions.

Within this regime, capital gains on shares are:

- subject to CIT at standard rate if the shares transferred have been held during less than two years
- subject to a reduced CIT rate (25% of the standard rate, i.e. 7.5%) if the shares transferred have been held during more than two years, and
- tax exempted if (i) the shares transferred have been held for more than two years and (ii) the shares held include at least 60% of shares of CEMAC resident companies.

In addition, these companies benefit from other tax advantages, such as a WHT exemption on certain types of interest as well as a reduced WHT on dividends paid (i.e. 50% of applicable rate).

Congo, Republic of

Controlled foreign companies (CFCs)

There is no provision under Congolese tax law related to CFCs.

Tax credits and incentives

The current investment regime in the Republic of Congo was set out by Law No. 6-2003 of 18 January 2003, which established the investment charter. The charter's application, Decree No. 2004-30 of 18 February 2004, established modes of business registration.

- Scope: The following may be registered under the investment charter:
 - Businesses wishing to pursue an activity in the Republic of Congo, except for activities such as brokerage, trade, import, and production of arms, and import or processing of toxic waste and by products.
 - Under certain conditions, commercial activities linked to collection, storage, distribution, and export of locally produced products, except alcoholic beverages and tobacco.
 - New activities (as opposed to pre-existing activities).
 - Forestry businesses benefiting from a forestry permit called the forestry development unit.
 - New companies coming from the redemption of a registered company.
- Conditions of eligibility for the investment charter: To be eligible, a company must satisfy the following conditions:
 - Be registered with the Trade and Personal Credit Registry in the Republic of Congo.
 - Create permanent employment, to be carried out over a minimum of 280 days per year.
 - Maintain company share capital equal to or greater than 20% of investments.
 - Primarily use local principal materials necessary for the production of the finished or semi-finished product, when available, with equal conditions concerning price, quality, and time of delivery to outside, in the case of industry.
 - Primarily use local business services, when available, with equal conditions concerning quality, price, and time of realisation regarding payments to external businesses, for the case of service businesses.
 - Be registered at the Congolese National Welfare Fund.
 - Open an account at a local bank or any other financial, savings, or credit establishment.
 - Primarily use a local workforce, when available, with the same expertise as the foreign workforce.
- Registration procedure: Entitlement to the benefits prescribed by the charter is subject to obtaining a registration agreement, provided by the National Investment Commission.
- Fiscal and customs benefits set out by the Investment Charter: These benefits vary according to privileged regimes, motivation measures, and in a general manner.

Privileged regimes

The charter sets out three privileged regimes:

- General regime (G).
- Special regime (S).
- Preferential development zone regime.

General regime (G)

The general regime applies to businesses that fulfil the aforementioned general requirements and carry out investments greater than or equal to XAF 100 million.

Special advantages are conferred according to the period of activity of the registered business.

During the set-up period and the first three exploitation tax years, the company receives several benefits, as follows:

- In customs matters, the company benefits from the provisions of the CEMAC customs code relative to asset improvement mechanisms for export activity and from the suspension of customs duty in the form of temporary admission or franchise for natural resource research activities.
- In fiscal matters, the company benefits from the 50% reduction of registration fees for business foundation, increases in capital, company mergers, and transfer of company stocks and shares.

For the three first exploitation tax years and until the first year of sale or first service, the following fiscal benefits are added with the aforementioned reduction of registration duties:

- Total exemption from the tax on company earnings.
 - Companies that are subject to CIT because of their size or activity will be exempt from CIT.
 - Businesses that are subject to personal income tax (PIT) because of their size or activity will be exempt from PIT.
- The authorisation to proceed to accelerated depreciation.
- The authorisation to carry forward losses for the first three tax years.
- The application of zero-rate VAT on exported products.

Special regime (S)

The special regime applies to businesses that fulfil the aforementioned general requirements and carry out investments between XAF 30 million and XAF 100 million.

In addition to the advantages of the aforementioned (G) regime, businesses registered under the (S) regime benefit during the set-up period and the first three exploitation tax years from the moderation of registration duties for the incorporation of the business, increases in capital, company mergers, and transfer of company stocks and shares.

This moderation of registration duties is granted exclusively by decree of the Minister in charge of the Economy and Finances upon a decision of the National Investment Commission.

Preferential development zone regime

All exporting businesses registered under the investment charter are eligible for the preferential development zone system, including free-trade zones.

The institution, organisation, and function of the preferential development zone are fixed by a specific text.

Incentives to set up in remote areas

All new businesses registered under (G) or (S) regimes that are located in a remote area benefit from a reduction of 50% on the tax on company earnings in the fourth and fifth year following the first three tax years for which the business benefited from total exemption from the tax on earnings or PIT.

The business is considered as belonging to a remote area from the moment its production units are set-up and 90% of the production unit workforce is working in the remote location.

The appraisal of a zone's location results from the exclusive competency of the National Investment Commission.

Congo, Republic of

Incentives for social and cultural investment

All new businesses registered under (G) or (S) regimes carrying out investments of a social and cultural character may benefit from a fiscal reduction by ministerial decree of the Minister in charge of Finance and the Economy, upon the decision of the National Investment Commission.

These benefits may not, however, be added to those mentioned above and allocated to remote areas, even if the business concerned is set-up in such a location.

General measures

For the duration of the privileged regime, and subject to current texts, the company shall enjoy fiscal stability in terms of local and state taxes.

Privileged regimes (G) and (S) are allocated only once and are not renewable. The business may receive fiscal and customs advantages pertaining to the set-up period.

Fiscal advantages concerning the exploitation period are applicable only after the set-up period.

The end of the set-up period is certified by decision of the Minister in charge of Finance and the Economy after the adoption of the verification report by the National Investment Commission.

Respect of the aforementioned general requirements set out by the charter is a prerequisite for benefiting from these motivation measures.

Export incentives

A measure is reserved for businesses that export at least 20% of their production.

The benefits are as follows:

- The provisions of the CEMAC customs code, relating to asset improvement mechanisms.
- Exemption from customs duties and taxes on manufactured products, except computing fees and statistic tax.
- Application of a zero-rate VAT on exported products.

Non-manufactured goods remain subject to the common law export system.

Incentive to reinvest earnings

A measure is reserved for businesses that carry out new investments of at least one-third of existing assets.

The benefit conferred consists of a 50% reduction of the tax on company earnings for the three years following the realisation of the investment.

Notwithstanding, this benefit is granted upon the following conditions:

- The business declares to the permanent secretary of the National Investment Commission its investments, planned investment, and the state of existing capital assets.
- The National Investment Commission, on the report of checking teams, verifies if the new investments correspond to one-third of the preceding capital assets.
- All investments are realised within one year.
- Investments generate new employment.
- Investments increase capacity of production by at least 10%.
- The business has sound ethical concerns.

Institution of preferential tax regime for special economic and industrial zones and health free zones

The 2014 Finance Act provides for incentives in special economic zones as follows:

- CIT and dividend tax exemptions for six years.
- From seven to ten years: CIT and dividend tax rate of 5%.
- Beyond ten years: CIT rate of 15% and dividend tax rate of 10%, permanently.
- Single tax on remuneration rate of 2.5%, permanently.
- Exemption from registration fees for company creation and 50% reduced rates on transfer deeds.

The 2014 Finance Act provides for incentives in industrial zones as follows:

- CIT and dividend tax exemption for five years.
- From six to ten years: CIT rate of 10% and dividend tax rate at 5%.
- Beyond ten years: CIT rate of 20% and dividend tax rate of 10%, permanently.
- Single tax on remuneration rate of 2.5%, permanently.
- Exemption from registration fees for company creation and 50% reduced rates on transfer deeds.

The 2014 Finance Act provides for incentives in health free zones, as follows:

- CIT total exemption.
- Dividend tax rate of 5%.
- Single tax on remuneration rate of 2.5%.

It should be noted that eligibility requirements for the preferential regimes described above have not been set yet.

Foreign tax credit

There are no specific rules relating to foreign tax credits in the Republic of Congo.

Withholding taxes

Services, dividends, and attendance fees

Services

Services rendered by foreign suppliers are subject to a 20% WHT.

In addition, companies that have no tax residence in the Republic of Congo are subject to a 20% WHT if they earn revenues realised in the Republic of Congo or coming from the Republic of Congo, and which come from works or services of any nature performed or used in the Republic of Congo.

WHT does not apply to resident suppliers of a country that has signed an international tax treaty with the Republic of Congo, provided certain conditions are met.

Payments made by building and public work companies to their sub-contractors

WHT is applicable on payments made by building and public work companies to their sub-contractors, including to engineering offices, at the following rates:

- 3% for sub-contractors taxable on their net profit.
- 10% for sub-contractors taxable on a deemed profit (*Régime du forfait*).

Congo, Republic of

Non-observances, omissions, or underpayments are sanctioned by an XAF 5 million fine and by the non-deductibility of the amounts so paid. Late payments are sanctioned by a 2% penalty per month or portion of month, with a maximum penalty of 100%.

For the considered sub-contractors, said withholding is considered as an instalment of tax.

Dividends

Dividends distributed by a Congolese company are subject to a 15% WHT unless a different rate applies under an international tax treaty (e.g. France, Italy, Mauritius, CEMAC). The same rate applies for dividends distributed to a resident shareholder.

Under the tax treaties between France and the Republic of Congo and between Italy and the Republic of Congo, the applicable WHT rate is 15%.

Under the tax treaty between Mauritius and the Republic of Congo, the applicable WHT rate is 5%.

There is no specific rate defined in the CEMAC tax treaty.

Attendance fees

Attendance fees are subject to a 17% WHT unless a different rate applies under an international tax treaty (e.g. France, CEMAC).

Payments to local independent contractors

Payments to local independent contractors (self-employed contractors, i.e. those not registered with the Congolese Trade Registry) are subject to a WHT at the rate of 5% from such payments, to be remitted to the Public Treasury.

Late remittance of the WHT is subject to a late payment penalty of 50% within the first two months and 100% if the late payment exceeds two months.

The application of the 5% WHT also applies to companies regrouping professionals and increases penalties in case of non-payment (200% penalty, plus 5% interest per month for late payment).

Revenues of legal entities subject to CIT are excluded from the application of the WHT of 5%.

WHT rates summary

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations	15	0	0
Resident individuals	15	0	0
Non-resident corporations and individuals (Non-treaty)	15	20	20
Treaty with:			
France	15	0	15
Italy	15	0	10
Mauritius	5	0	0
CEMAC	20	0	0

Tax administration

Taxable period

The taxable period is the calendar year.

Tax returns

The annual CIT return is a specific form (*Déclaration Statistique et Fiscale* or DSF) that should be prepared in accordance with OHADA accounting principles. The form cannot be completed electronically.

Companies have to use the CEMAC CIT return form, which has been modified to be compliant with Congolese tax law (new form for the determination of the CIT basis and new tax balances for debts and liabilities).

The books must be maintained in French and in Central African CFA francs. This accounting system must follow the OHADA chart of accounts. All entries have to be booked under OHADA standards throughout the year.

The annual CIT return must be filed on 20 May at the latest.

Payment of tax

Resident companies are required to pay quarterly instalments of tax (20 February, 20 May, 20 August, and 20 November), and these quarterly instalments are generally calculated with reference to the most recent CIT return. Special calculations of instalments apply to new taxpayers.

Based on the self-assessment system, when submitting annual tax returns due by 20 May every year, taxpayers must pay the amount of tax calculated in the annual tax return to the extent this amount exceeds tax instalments paid during the year.

Non-resident companies and individuals shall appoint tax representatives in the Republic of Congo. The Congolese resident shall be considered as tax representative if the non-resident person fails to appoint a tax representative.

Tax audit process

Tax audits are usually announced by a letter from the tax authorities to the entity concerned of their intention to audit, while stating the period to be audited and the taxes that will be covered by the audit.

The tax authorities may organise meetings with the taxpayer to inform the taxpayer of the preliminary outcomes of the audit, and the taxpayer has the possibility to make counter remarks.

Thereafter, the tax authorities notify the taxpayer, in writing, of their proposed tax adjustments, and the taxpayer makes counter remarks in writing within 30 days from date of receipt of the tax adjustment notice.

Based on whether the tax authorities find the counter remarks from the taxpayer grounded or not, a letter confirming the tax adjustments or renouncing the proposed tax adjustments shall be sent to the taxpayer, who has the choice to either pay the taxes claimed, negotiate for a reduction of fines, or open up a tax litigation process.

The taxpayer may negotiate the taxes, fines, and the mode of payment of the tax claimed by the tax authorities thereby renouncing one's right to open up tax litigation.

The taxpayer has the right to request from the Director General of Taxation and Real Estate a transactional mode of payment of fines or payment of tax by friendly settlement. If the taxpayer opts for the transaction, the taxpayer loses the right to object to the outcome of the transaction and is obligated to immediately pay the taxes due (principal and penalties) according to the agreement.

To open up a tax litigation process, the taxpayer will pay a prior deposit of 10% of the sum contested as guarantee (or a banking guarantee as security for litigation) and 5 per

Congo, Republic of

thousand of the sum contested for the treatment of the tax claim file and will submit the tax claim file to the Tax Head Office if the amount of the claim exceed XAF 30 million and to the Director of Tax Department if the amount claimed is less than XAF 30 million.

The tax authorities will respond to the tax counter claim of the taxpayer, who, if not satisfied, could open a court claim.

Statute of limitations

Generally, the statute of limitations period for CIT is four years following the year in which the tax was due. However, this rule does not apply in the case of fraudulent acts reported by the tax administration.

Topics of focus for tax authorities

The tax authorities particularly focus on aspects such as:

- Compliance of deductible expenses.
- CIT compliance.

Significant developments

There have been no significant corporate tax developments in Costa Rica during the past year.

Taxes on corporate income

The Costa Rican tax system is based on the principle of territoriality, according to which any business that carries on industrial, agricultural, or commercial activity in Costa Rica is subject to income taxation on local income in the same way as a registered business, irrespective of the place of incorporation. Such corporations doing business in Costa Rica are subject to the permanent establishment (PE) rules.

Under the Costa Rican income tax law, income from transactions carried out abroad may be regarded as non-Costa Rican-source income and is not subject to income taxes.

In addition, it is important to bear in mind that Costa Rican income tax applies specifically to those incomes that directly originate in the lucrative activities carried out by the taxpayer within the country's territory.

Corporate income is taxed at a 30% rate. However, the law establishes special regulations for small companies whose gross income does not exceed 105,241,000 Costa Rican colones (CRC). For this category, the following rates apply:

- 10% for companies with gross income up to CRC 52,320,000.
- 20% for companies with gross income of more than CRC 52,320,000, but not more than CRC 105,241,000.
- 30% for companies with gross income over CRC 105,241,000.

Please note that these corporate income tax (CIT) brackets are adjusted yearly, effective 1 October to 30 September of the following year. The tax brackets listed are for the 2016 fiscal year (i.e. 1 October 2015 to 30 September 2016).

Local income taxes

There are no provincial income taxes in Costa Rica; however, there is a municipal tax. The rate depends on the municipality in which the company is located, but most apply a percentage of net income or sales.

Corporate residence

In most cases, the place where a company is incorporated is regarded by Costa Rican authorities as the corporate residence.

Costa Rica

Permanent establishment (PE)

According to Costa Rica's tax system, a PE of non-domiciled persons in the country is every office, factory, building, or any other real estate; plantation, mining, forest, agricultural, and farming development; warehouse or any other permanent business centre, included the temporary use of warehouse facilities as well as the ones destined to the purchase and sale of merchandise and products inside the country; and any other company property of non-domiciled persons that develops commercial and lucrative activities in Costa Rica.

The Costa Rican Tax Administration has manifested that the essential characteristic of a PE is given by a territorial criteria, according to which the income and earnings generated in Costa Rica as well as the assets located in it are taxable, not taking into consideration the nationality or domicile of its owner.

The Tax Administration also applies the criteria of the Organisation for Economic and Co-operation and Development (OECD) to determine when a person can be considered a PE of a company in a determined state. Accordingly, the Tax Administration takes into consideration the following conditions to determine the existence of a PE:

- The existence of a business centre (i.e. facilities such as an office or business centre or, in certain cases, machinery).
- Said business centre must be permanent (i.e. must be established in a determined place with a significant level of permanence).
- The company has to develop its essential activity through this permanent centre (i.e. the persons who depend in a way or another on the company [the staff] must develop the company's business inside the country on which the permanent centre is located).

Note that the Costa Rican Tax Administration uses these OECD criteria to support and base its administrative resolutions; consequently, they hold a significant importance for the Costa Rican tax system. Regarding these criteria, the OECD has established as a generally accepted principle that a company will be treated as the owner of a PE in a determined state if a person acts on behalf of that company under certain circumstances, even if they are not in the presence of a permanent business centre in said state. These circumstances are as follows:

- The person has to be an agent on account of the non-domiciled company: A dependent agent, individual, or company, under an employment regime or outside of this, that, due to the nature of its activities or to the scope of its faculties, involves the non-domiciled company in commercial activities of certain significance.
- The person or local company has to be a dependent agent with enough faculties to celebrate and subscribe agreements on behalf of the non-domiciled company. The faculties of the person or local company have to be sufficient to involve the non-domiciled company in business activities inside the country on which the person or local company are situated.
- The agent has to be authorised to negotiate all elements and details of agreements on which the non-domiciled company is involved and obligated, even if said agreement is signed by another person in the country on which the non-domiciled company is located. In other words, it isn't simply a mere authorisation to sign the agreement.
- The faculty to subscribe agreements must include those agreements that are part of the main commercial activity of the company.
- The agent has to take risks on behalf of the abroad domiciled company.
- The agent has to act according to detailed instructions or general control of the abroad domiciled company.
- The concept of PE under this context implies that this agent uses its authority on a repeatedly basis and not only on isolated cases. The faculties must be exercised regularly in the country on which the agent is located, a characteristic that is determined according to the real commercial situation. A person or company whose

activities are limited to the following conditions and circumstances is not considered a PE:

- Its activities consist only in storage, expose, or delivery of goods and merchandise that belong to the company domiciled in another country.
- Its activity consists only in purchase of goods or merchandise or compiling information for the abroad domiciled company.
- Its activity consists only in developing any other auxiliary or preparatory activity for the company.
- To consider a person as a PE of a company in a state, it has to be determined if the activities that this person develops are, by themselves, an essential and significant part of the activities of the company as a whole, which is why every case must be studied and analysed according to its own particular circumstances.

Other taxes

Sales tax

A fixed sales tax rate of 13% is applied at all stages of the sale of merchandise or the invoicing of certain limited services. The tax is levied on (i) sales of merchandise within the national territory (except sales of land, buildings, exports, and certain basic necessity items, such as basic foodstuffs, certain medicines, and veterinary products); (ii) the value of services performed by restaurants, bars, motels, printing companies, social and recreational clubs, painting and repair shops, and others; and (iii) imports consisting of merchandise for personal use or consumption or to satisfy commercial needs.

Selective consumption tax

The selective consumption tax may be applied at a rate of up to 100% and is levied on goods that are considered non-essential. The tax base is the cost, insurance, and freight (CIF) price plus import duties for imported items or the sales value for items produced in Costa Rica. The tax is levied at only one stage in the sale of merchandise. Payment of the tax is required at the time of importation or, for articles produced in Costa Rica, within 15 days of the month of the sale.

Customs duties/import tariffs

In Costa Rica, all importation of goods and merchandise, with certain exemptions, are liable for corresponding import tariffs and customs duties. Other taxes (e.g. sales tax, selective consumption tax) are also levied on the importation of said goods and merchandise.

The most important legal instruments for customs regulations are the Central American Uniformed Customs Code, the Customs Law and its rulings, and other administrative rulings that are periodically issued by the Customs Authority.

Property tax

Each local municipal government is in charge of real estate appraisal. The annual property tax to be applied throughout the Costa Rican territory is 0.25% of the appraised value, registered in the respective municipality where the tax liability originates.

Real estate transfer tax

Real estate transfer tax is calculated as 1.5% of the selling price of the real estate or its property tax value, whichever is greater. The tax is triggered by the direct sale of the real estate or through the indirect transfer of real estate when there is a modification in the control of the entity holding the real estate.

Costa Rica

Stamp duties

Stamp duties in Costa Rica are determined according to the transaction that is carried out (e.g. property transactions, service contracts, movable assets transactions).

Franchise tax

The payments realised abroad for the use of a franchise will be subject to remittances abroad with a 25% withholding tax (WHT).

Withholdings on salary

Companies are required to withhold from employees the amount corresponding to the tax on salary according to the following progressive table on a monthly basis:

Salary (CRC)	Withholding rate (%)
Up to 787,000	0
787,000 to 1,181,000	10
Over 1,181,000	15

Social security contributions

Companies must withhold the monthly contribution to social security and submit its own contribution calculated as a percentage of the monthly income received by the employee:

Social security contribution	Contribution rate (%)
Employee's contribution	9.34
Employer's contribution	26.33

Branch income

Branch income is subject to tax at the same rates as corporate income.

There is a WHT of 15% on dividends distributed within the country and a 15% tax, in lieu of a dividend WHT, on profits transferred abroad.

Income determination

Inventory valuation

Inventories are generally stated at cost and can be valued using the compound average-cost method, first in first out (FIFO), retailer method, or specific identification method. Since all entities must keep legal records, any adjustment resulting from different methods of inventory valuation for tax and financial purposes should be recorded.

Capital gains

There is no capital gain tax on the sale of real estate or securities when such sales are not a habitual activity. There is a capital gain tax, at the regular rate, on the sale of depreciable assets when their sale price is higher than their adjusted basis (book value).

Dividend income

Dividends are subject to a 15% WHT if the stock is not listed in an officially recognised stock exchange or 5% if the stock is registered in a stock exchange officially recognised by the Costa Rican government.

Dividends between domestic subsidiaries and other domestic corporations are not subject to taxes. There are no ownership requirements to qualify for this exclusion.

Stock dividends

Dividends paid in the form of stock of the distributing company are allowed and are exempt from taxes.

Interest income

Interest income coming from sources related to normal business activities is taxable. Interest income coming from investments on financial entities included in the National Banking System is subject to an 8% withholding on the source as definitive tax.

Interest coming from investments abroad is considered non-Costa Rican-source income and is not taxable.

Foreign income

Foreign-source income is not taxable in Costa Rica.

Deductions

In general, any costs and expenses that are useful, necessary, and pertinent for the production of actual or potentially taxable income will be deductible from the company's gross income, as long as they are duly supported by documentation authorised by the law and they comply with the following requirements:

- That they are necessary expenses to obtain actual or potential income, taxed under the law.
- That any withholding obligations, as stated in other sections of the law, have been carried out.
- That the supporting documentation has been authorised by the Tax Administration.

However, the Tax Administration may reject or disregard, in whole or in part, any expenses that it considers excessive, inadmissible, or not indispensable to obtain taxable income.

Depreciation

The straight-line and sum-of-the-years-digits methods of depreciation are allowed over the following useful lives:

Assets	Useful life (years)
Buildings	50
Machinery and equipment	10
Furniture and fixtures	10
Vehicles	10
Agricultural plantations	2 to 10

The Tax Administration, at the request of the taxpayer, can adopt technically acceptable special depreciation methods in cases duly justified by the taxpayer. In addition, the Tax Administration can authorise, through general resolution, accelerated depreciation methods on new assets acquired by corporations with monetary activities requiring constant technological updates, higher installed production capacity, and productive reconversion processes in order to maintain and strengthen their competitive advantage.

Goodwill

If the intangible asset can be amortised, the gain is considered taxable and the loss is considered deductible from the income tax base. However, if the intangible asset is not amortisable, the gain is not taxable and the loss is not deductible.

Costa Rica

Start-up expenses

A company's organisational expenses may be deducted in the tax year in which they are paid or credited, or, if they accumulate, in five consecutive tax years, starting from the date of start of productive operations, until the balance is exhausted. Organisational expenses will be considered to be those costs and expenses that are necessary to initiate the production of taxable income, that, in accordance with the law, are deducted from gross income.

Interest expenses

Interest and other financial expenses paid or incurred by the taxpayer during the fiscal year directly related to the management of their business and the creation of taxable income are deductible from gross income, as long as those interest expenses are not capitalised.

Note that those interest expenses with rates that exceed the usual market rates will not be considered deductible expenses by the Tax Administration.

Bad debt

Manifestly uncollectible unpaid debt will be deductible as long as this debt is originated in habitual operations from the taxpayer's business and all legal actions towards its collection have been exercised.

Charitable contributions

All donations duly supported by documentation that are given to the government, public institutions, municipal corporations, public universities, to the Social Protection Board, to the Educational Boards, to the Costa Rican Red Cross, and other institutions, such as those foundations and associations with non-charitable, scientific, and cultural ends that are authorised by the Tax Administration to receive deductible donations, among other entities, will be deductible from gross income.

Taxes

With the exception of sales tax, selective consumption tax, specific taxes over consumption and special duties established by law, penalties and interest paid over any tax obligation, and the income tax itself, all other taxes that affect the goods, services, and negotiations of the company's habitual commercial activity will be considered deductible.

Net operating losses

Losses incurred by industrial and agricultural enterprises may be carried forward and deducted from the taxable profits for the following three years for industrial enterprises and five years for agricultural enterprises. Loss carrybacks are not allowed.

Payments to foreign affiliates

Corporations may claim deductions for royalties, technical and management service fees, and interest charges paid to foreign affiliates, provided that a tax of 25% for royalties, franchises, and other services, and a tax of 15% for interest, is withheld. However, the deductions for technical, management service fees, and royalties may not exceed 10% of gross sales in the aggregate if paid to the parent company.

Group taxation

There is no group taxation in Costa Rica.

Transfer pricing

Under Decree No. 37898-H 'Provisions on Transfer Pricing', published on 13 September 2013, taxpayers are forced to evaluate the prices agreed upon in operations of goods or services sold to related companies, locally and abroad, considering the prices that will

be agreed between independent parties and in compliance with the Principle of Free Competition and Economic Reality.

Additionally, the Decree indicates, in the definition of this principle, that taxpayers must “determine their income considering costs and deductions for these operations using the prices and amounts of considerations that would be agreed upon between individuals or independent entities in comparable operations”.

According to the definition related to ‘binding parties’, legal or natural persons that directly or indirectly participate in the address, control, or capital of the taxpayer, or due to another cause may systematically influence their pricing decisions, shall be deemed to be related. Also, those persons or entities residing in jurisdictions without sufficient powers to exchange tax information are presumed to be related parties. In addition, there are other specific conditions for a person or an entity to be qualified as a binding party.

The Decree establishes the need for an Analysis of Comparability (Functional Analysis) to consider the following elements:

- Characteristics of the operations, products, or services.
- Functions or activities, including assets and assumed risk.
- Contract terms and conditions.
- Economic circumstances.
- Business strategies.
- Identification of prices and comparable transactions (internal and external).

Also, the methods for the determination of prices in comparable operations are established and mentioned in the following list:

- Non-controlled comparable price.
- Additional cost.
- Resale price.
- Split profit.
- Net margin of the transaction.

The Decree authorises the Tax Administration to check the assessment of prices with related parties made by the taxpayer; however, when as a result of the application of a convention for the avoidance of double taxation, an adjustment to the Costa Rican company is generated, the company may request verification of the origin of the adjustment.

The Tax Administration shall dictate the general documentation guidelines that the taxpayer must comply with in relation to the valuation of its transactions with related parties; however, the Decree establishes that it must be made available for the Tax Administration in Spanish and that it must be kept for five years according to the provisions of Article 109 of the Code of Norms and Tax Procedures. Likewise, a list of the information and documentation (formal obligations) that the taxpayer must keep has been established, which includes the details of the activities and functions, organisational structure, registration information from the parties, financial statements, and method used.

In addition, the Decree establishes an annual informative return for taxpayers who are engaged in transactions with related parties and for large taxpayers, large territorial taxpayers, and companies located within a free zone. Note, however, that the annual informative return has not been provided by the Tax Administration, so it is not yet in force.

Costa Rica

Lastly, the Decree allows the application of advance pricing agreements (APAs) between the taxpayer and the Tax Administration, which will be valid for three years once approved.

The Tax Administration is currently working on a resolution for the informative returns and then will work on a resolution expanding upon the features and requirements of APAs.

Thin capitalisation

In Costa Rican legislation, there is no mention of thin capitalisation rules. However, as with transfer pricing, the Tax Administration applies general rules and principles for the treatment of these types of situations. For instance, the Income Tax Law gives the Tax Administration the faculty of reviewing and rejecting all expenses that it may consider excessive, not proportional, or unreasonable.

Controlled foreign companies (CFCs)

In Costa Rican legislation, there is no mention of CFC rules.

Tax credits and incentives

Foreign tax credit

Costa Rica's tax system does not allow for the possibility of foreign tax credits.

Free zones

Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, selective consumption tax, real estate transfer tax, and WHT on payments abroad, as well as the discretionary use of foreign currency generated abroad. However, these incentives will be affected by the rules established by the World Trade Organization (WTO) in force in the year 2015, which required for a modification of the Free Trade Zone Law, now enforced, in which it was a requisite by manufacturing companies to be mainly dedicated to exportation. Now, it is possible for manufacturing companies to apply to the Free Trade Zone Regime whether the sale of their products is in Costa Rica or outside Costa Rica as long as they comply with the requisites established in the Law.

Drawback industries

Special benefits exist for industries that import semi-manufactured materials for assembly in Costa Rica and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

Tourism development

The Incentive Law for Tourism Development grants several tax benefits, such as exemption from import duties on certain tourism service-related goods and from property tax for companies dedicated to tourism, but only for those with a signed tourism agreement.

Withholding taxes

Payments to non-domiciled foreign corporations or individuals

Regarding payments to non-domiciled foreign corporations or individuals, taxes are withheld as follows:

Payment	WHT rate (%)
Dividends (1)	5/15

Payment	WHT rate (%)
Interest and other financial expenses (2)	5.5/15
Royalties, patents, trademarks, franchises, and formulas	25
Technical service and management fees	25
Personal services from a Costa Rican source:	
Employees	10
Directors	15
Others	30
Transportation and communication services	8.5

Notes

1. 5% if the stock is registered in a stock exchange officially recognised by the Costa Rican government.
2. Interest paid from a financial entity supervised in Costa Rica to a financial entity outside Costa Rica is subject to a withholding of 5.5%. The payments to multilateral entities for development are not subject to withholding.

Double taxation treaty (DTT) with Spain

Law No. 8888, regarding the DTT between Costa Rica and Spain, was published in the Official Gazette on 6 December 2010. This treaty entered into force on 1 January 2011 with the purpose of avoiding double taxation and tax evasion between the two countries. It established the following reduced rates:

Payment	Rate (%)
Personal independent work	10
Dividends (1)	5/12
Interest, commission, and financial expenses (2)	5/10
Financial technical advisory, patents, formulas, trademarks, franchises, royalties	10

Notes

1. The 5% withholding applies when the beneficiary directly has at least 20% of the shareholder's equity of the paying company. In all other cases, the withholding is 12%.
2. The 5% withholding applies when the loan has a duration of at least five years. In all other cases, the withholding is 10%.

Tax administration**Taxable period**

The tax year in Costa Rica is a 12-month period from 1 October to 30 September. Current legislation contemplates that other fiscal year-ends may be adopted with the prior approval of the Tax Administration.

Tax returns

With certain exceptions, all corporations must file a tax return by 15 December on the basis of a fiscal year-end of 30 September. The general rule is that all companies must file the tax return two and a half months after its fiscal closing. Entities with an operating period of less than four months may present a return together with the following year's tax return.

The tax system is one of self-assessment with occasional auditing by the Tax Administration.

Costa Rica

Payment of tax

In March, June, and September, all taxpayers with a 30 September fiscal year-end must prepay instalments that total 75% of the average income taxes paid in the past three fiscal years, or the amount paid in the prior year, whichever is greater. Failure to pay on these dates results in the accrual of interest unless the taxpayer has requested, on a timely basis, that the Tax Administration eliminate the corresponding payments. If the amount of tax due is determined to be greater than the sum of the instalment payments on the date the taxpayer files the tax return, the taxpayer must pay the difference no later than 15 December, along with the tax return.

For taxpayers with a special fiscal year authorised by the Tax Administration, the first advance payment must be provided within six months of the authorised fiscal year-end.

Tax audit process

For a tax audit to begin, it is necessary that the Tax Administration send a notification to the taxpayer to be audited. The taxpayer is selected according to one of the selection criteria previously established, and this should be indicated in the communication at the beginning of the tax audit. The Tax Administration must start the audit within two months of the communication to the taxpayer.

Once the audit is completed, the auditors hold a meeting with the company and invite them to correct the issues found.

If the company does not accept the correction, then the Tax Administration will notify the Administrative Settlement Act Office (ALO) of the indicated tax adjustments within the next ten business days. The payment of assessed tax must be made by the taxpayer within the following 30 days, unless guarantees were granted with regard to the debt and related interest. Within the same 30 days, the taxpayer may appeal for reversal against the ALO. If an adverse decision is issued, the taxpayer can file an appeal before the Administrative Tax Tribunal. In cases where the debt was declared inadmissible by a final decision, the Tax Administration will reimburse the amount paid or the cost of guarantees provided. Further appeals are handled by the court.

Statute of limitations

The statute of limitations is four years starting from 1 January of the year following the income tax return filing. For taxpayers with an ordinary tax period with a due date to file their 2016 period return on 15 December 2016, the statute of limitations starts counting on 1 January 2017; however, for taxpayers with a special period of January to December with a due date to file their 2016 period return on 15 March 2017, the statute of limitations starts counting on 1 January 2018.

Topics of focus for tax authorities

Important topics for tax audits are transfer pricing, sales tax credits, gross margin on sales, employee benefits, and income tax.

Other issues

Tax information exchange agreements (TIEAs)

Costa Rica has a TIEA with the United States (US), effective since 12 February 1991, whereby both countries agree to exchange information, from and/or in relation to public and private entities and individuals, at the request of the party's corresponding authority in relation to any tax relevant issue.

Costa Rica has also signed TIEAs with several other countries: Argentina, Australia, Denmark, Ecuador, Faroe Island, Finland, France, Greenland, Iceland, Mexico, The Netherlands, Norway, and Sweden.

Foreign Account Tax Compliance Act (FATCA) agreement

In November 2013, Costa Rica's Treasury Department and the Deputy in charge of negotiations of the US embassy in Costa Rica signed an intergovernmental agreement (IGA). The IGA will allow Costa Rica's financial entities to comply with the provisions established in FATCA. The IGA was chosen under Model 1, in which each entity must submit a report to the Treasury Department, and it will be this entity that is in charge of the transfer of information to the United States Treasury Department.

The IGA must be sent for ratification to the Costa Rican Congress for the agreement to enter into force; at the same time, the technological platform for FATCA compliance is being developed.

Free-trade bilateral treaties

Costa Rica is a full member of the Central American Common Market, which guarantees free trade among the countries of the area. It also has a free-trade bilateral treaty in force with Mexico, the Dominican Republic, Chile, Canada, the Caribbean Community (CARICOM), China, Panama, Singapore, the European Free Trade Association (EFTA), and Peru. The US-Central American-Dominican Republic Free Trade Agreement (CAFTA-DR) entered into force on 1 January 2009. Additionally, there is a free commerce and cooperation agreement with the European Union (EU) in force since 2013. These agreements aim to provide favourable conditions for the exchange of merchandise between contracting parties.

Significant developments

There have been no significant corporate tax developments in Croatia during the past year.

Taxes on corporate income

Corporate income tax (CIT) is paid at a flat 20% rate by enterprises engaged in independent activities on a long-term basis for the purpose of deriving profit, branches of foreign enterprises, enterprises that control shares in capital (unless the object of investment itself pays CIT), and natural persons who choose to pay CIT instead of personal income tax (PIT).

The CIT base is the accounting profit adjusted for deductions and disallowed items. Croatian residents pay CIT on profit derived in Croatia and abroad, and non-residents (e.g. branches) pay CIT only on profits derived in Croatia. The tax base also includes gains arising from liquidation, sale, change of legal form, and division of the taxpayer where it is determined at the market rates.

Payments into voluntarily pension funds paid by an employer for an employee under certain conditions prescribed by the CIT Act are also considered expenditures.

Expenditures are not considered to be expenditures if they are not related to the taxpayer's business activity.

The CIT base is reduced by the following items:

- Income from dividends and profit sharing (i.e. dividends and shares in capital that are paid by the company that pays CIT that is identical to Croatian CIT, which has a prescribed legal form, and dividends and shares in capital that the payer didn't use as recognised cost [i.e. deduction] in one's CIT return).
- Unrealised gains from value adjustments of shares (increase of financial asset value) if they were included as income in the profit and loss (P&L) account and offset previously recognised tax non-deductible unrealised losses from the same financial year.
- Income from collected written-off claims that were included in the tax base in the previous tax periods but not excluded from the tax base as recognised expenditure.
- The amount of depreciation not recognised in previous tax periods, up to the amount prescribed by the CIT Act.
- The amount of tax relief or tax exemption in line with special regulations (i.e. costs of education, costs of research and development (R&D), costs of a new employee's salary).
- For reinvested profit, other than that earned in the banking or the financial non-banking sector, under the following conditions: (i) during the tax period for which the tax return is submitted, the taxpayer has made investment in fixed assets; (ii) during the tax period for which the tax return is submitted and at the time of the submission of the CIT return, the taxpayer has kept the number of workers established at the beginning of that period; (iii) profit or part of the profit of the tax period for which the

CIT return is submitted was used to increase the share capital via a minimum amount of investment made in fixed assets during that tax period; and (iv) the increase of the share capital was registered in the court registry.

The CIT base is increased by the following items:

- Unrealised losses from value adjustments of shares (decrease of financial asset value) if they were included as expenses in the P&L account and do not offset previously recognised gains from value adjustments from the same financial asset.
- The amount of depreciation in excess of the amounts prescribed by the CIT Act.
- 70% of entertainment costs (food and drink, gifts with or without the printed firm logo or product brand, and expenses for vacation, sport, recreation and leisure-time, renting cars, vessels, airplanes, and holiday cottages). Entertainment costs do not include the costs of goods and merchandise adapted by a taxpayer for business entertainment purposes, labelled 'not for sale', and other promotional objects with the name of the firm or merchandise or other advertising objects (e.g. glasses, ashtrays, table cloths, mats, pencils, business diaries, cigarette lighters, tags) put to use in the selling area of the purchaser and given to consumers, provided that their value does not exceed 160 Croatian kuna (HRK) per item.
- 30% of the costs, except insurance and interest costs, incurred in connection with owned or rented motor vehicles or other means of personal transportation (e.g. personal car, vessel, helicopter, airplane) used by managerial, supervisory, and other employees, provided that the use of means of personal transportation is not defined as salary.
- Asset shortages exceeding the amount prescribed by the Croatian Chamber of Economy or Croatian Chamber of Trades and Crafts, in accordance with the Value-added Tax (VAT) Act and on the basis of which no PIT was paid.
- The costs of forced collection of taxes and other levies.
- Fines imposed by competent bodies.
- Late payment interest charged between associated persons.
- Privileges and other economic benefits granted to natural or legal persons for the purpose of causing or preventing a certain event in favour of the company (generally related to commissions paid to parties acting on behalf of the taxpayer).
- Donations in excess of the amounts prescribed by the CIT Act.
- Expenditures identified during tax authority's audit, including VAT and contributions related to hidden profit payments and withdrawals from shareholders, company members, and physical persons performing independent activities taxable by CIT.
- Any other expenditure not directly related to profit earning, as well as other increases in the tax base, which were not included in the tax base.

Local income taxes

A legal entity that is liable to pay CIT and is registered for the performance of the business activity may be subject to tax on trade name at the amount of up to HRK 2,000, depending on the decision of the municipality or city.

Corporate residence

In terms of the CIT Act, residents are legal or natural persons whose seat is recorded in the Register of Companies or other register in Croatia, or whose place of effective management and control of business is in Croatia. Residents are also entrepreneurs/natural persons with domicile or habitual residence in Croatia whose business activity is recorded in a register or other records.

A non-resident is any person who does not satisfy one of the requirements referred to above.

Croatia

Permanent establishment (PE)

Definition of a business unit of a non-resident is based on the Organisation for Economic Co-operation and Development (OECD) guidelines, which provides that a non-resident's business unit is a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources or construction site or project for a period longer than six months, including agents acting in its name, having the right to conclude contracts or hold stock of products that it distributes on the Croatian market in the name of a foreign entrepreneur. The business unit of a non-resident also includes the performance of services (i.e. advisory and business consulting services) for the same or a related project, which lasts for more than three months in a 12-month period.

Other taxes

Value-added tax (VAT)

The Croatian VAT system is in line with the provisions of the European Union (EU) VAT Directive.

VAT is payable on sales of goods and supply of services, import of goods, and intra-Community acquisition of goods.

Croatia has not introduced any VAT grouping rules.

VAT rates

The general VAT rate is 25%.

A reduced rate of 13% is applicable for:

- Organised stays (accommodation or accommodation with breakfast, full or half board, in all kinds of commercial hospitality facilities).
- Services of preparing food and restaurant services, as well as preparing and serving non-alcoholic drinks and beverages, wine, and beer in such premises, in accordance with special legislation.
- Periodic newspapers and magazines of a publisher for which there is no obligation of adoption of the statute of media according to a special law (with the exception of those that consist entirely of advertisements or are used mainly for advertising purposes).
- Edible oils and fat of animal and vegetable origin.
- Children's food and processed cereal based foods for infants and small children.
- Water delivery, except for water in bottles and other packaging on the market.
- White sugar from cane or beet.
- Concert tickets.

A reduced rate of 5% is applicable for:

- Bread and milk, including baby food used as a substitute for mother's milk.
- Books of a scholarly, scientific, artistic, cultural, and educational character, as well as school textbooks (primary, secondary, and tertiary education, on all kinds of media).
- Certain medicines and surgical implants.
- Scientific journals.
- Services rendered by cinemas.
- Daily newspapers of a publisher that has a statute of media (with the exception of those that consist entirely of advertisements or are used mainly for advertising purposes).

Reporting obligations

Taxpayers have to file monthly VAT returns by the 20th day of the month following the reporting month. Exceptionally, taxpayers who do not have any transactions with EU taxpayers (inbound or outbound) and whose aggregate value of goods delivered and

services provided in the previous year does not exceed HRK 800,000 can submit the VAT return quarterly.

Any annual adjustments are made in the VAT return for December, which is the last monthly VAT return in a financial year.

In addition, both intra-Community acquisitions and supplies, as well as services provided to or received from an EU-registered taxpayer, have to be reported in a recapitulative statement, submitted by the 20th day of the month following the reporting month.

Where the amount of input tax credits exceeds the entity's VAT liability, a taxpayer is entitled to a refund of the difference or may choose to use the difference as a VAT prepayment.

VAT registration

VAT payers are defined as entrepreneurs that deliver goods or perform services in Croatia. An 'entrepreneur' is a legal entity or a natural person that continuously and independently performs an activity for the purpose of deriving profit. In addition to those that may be regarded as 'normal' taxpayers, domestic enterprises receiving imported services from foreign enterprises and legal entities and individuals that issue invoices or receipts including VAT without authorisation are also liable to pay VAT.

A taxpayer is required to register for VAT where turnover in the previous year exceeded HRK 230,000. Voluntary registration is also possible.

Reclaiming of input VAT is granted to EU-registered VAT payers. No tax representative is required.

Entrepreneurs registered in third countries can apply for a VAT refund, provided reciprocity agreements are in place and a tax representative is used.

Determination of VAT base

The VAT base for goods and services supplied is the consideration that includes everything that the supplier has received or is supposed to receive from the buyer or a third person in connection to the supply, including the subventions directly related to price of goods and services supplied.

Where no consideration is provided, for instance where goods are exchanged, the VAT base is considered to be the market value of the goods or services. The VAT base of imports is the customs value as prescribed by customs regulations, increased by customs duties, import duties, special taxes, and other fees paid during customs clearing.

VAT-exempt supplies

VAT-exempt supplies include rental of residential property (with some exceptions); granting of credits and credit guarantees; transactions related to bank accounts, interest, winnings from special games of chance in casinos, slot machine clubs, and other forms of gambling; supplies of domestic and foreign legal tender, securities and shares.

Other exemptions include the following:

- Services and deliveries of goods by public institutions in the field of culture, such as museums, galleries, archives, libraries, theatres, religious communities and institutions, primary and secondary schools, universities, and student catering and boarding institutions.
- Medical services, including services conducted by doctors, dentists, nurses, physiotherapists, and biochemistry laboratories engaged in private practices; services of medical care performed in healthcare institutions; and services performed by social care institutions and child and adolescent care institutions.

Croatia

- Supplies (transfers) of real estate (land, buildings, parts of buildings, housing premises, and other structures) with the exception of newly built buildings. Newly built buildings subject to VAT are buildings that have not been used for more than two years, counting from the date of the last delivery. Buildings not subject to VAT are subject to real estate transfer tax (RETT).
- Temporary imports of goods that are exempt from customs duty.

Customs duties

Croatian customs legislation and policies have been fully harmonised with the EU legislation. Goods imported from non-EU countries are subject to import customs clearance, and goods exported from the EU customs territory must be declared for export customs clearance. For performance of customs clearance procedures, each person has to be identified by an Economic Operator Registration and Identification (EORI) number, which is issued by the Customs office upon request.

Excise duties

There are a number of excise duties and special taxes levied on specific products. They are levied at a fixed amount and are payable by the producer or importer. VAT is applied first, after which the fixed amounts are added.

Excise taxes

Product	Excise tax rate
Oil derivatives	From HRK 100 to HRK 4,500 per 1,000 l/kg
Natural gas	HRK 4.05 per MWh for business purpose heating HRK 8.10 per MWh for non-business purpose heating
Cole and coke	HRK 2.30 per Gj
Electricity	HRK 3.75 per MWh for business use HRK 7.5 per MWh for non-business use
Tobacco products:	
Cigarettes	HRK 230 per 1,000 pieces plus 38% of retail price Minimal excise duty is HRK 648 per 1,000 pieces
Cigars and cigarillos	HRK 600 per 1,000 pieces
Fine-cut tobacco	HRK 550 per kg
Other tobacco for smoking	HRK 500 per kg
Beer	HRK 40 per 1 volume percentage alcohol in 1 hectolitre (hl)
Alcohol:	
At 15% alcohol or higher	HRK 800 per hl
Less than 15% alcohol	HRK 500 per hl
Ethyl alcohol	HRK 5,300 per hl

Special taxes

Product	Special taxes
Coffee and soft drinks:	
Roasted coffee	HRK 6 per kg
Coffee extracts, essence, and concentrates	HRK 20 per kg
Roasted coffee contained in finished products	HRK 6 per kg of coffee net mass
Coffee extracts, essence, and concentrates in finished products	HRK 20 per kg of coffee net mass
Sugar or sweetener added water, aromatised water (mineral water and fruit juices exempt)	HRK 40 per hl

Product	Special taxes
Other drinks with max 1.2% alcohol (mixture of beer and soft drinks with more than 0.5% alcohol exempt)	HRK 40 per hl
Syrups and concentrates for soft drinks preparation	HRK 240 per hl
Powders and granules for soft drinks preparation	HRK 400 per 100 kg
Motor vehicles on which special tax was not already paid for the use on public roads:	
Passenger cars, 'pick-up' vehicles	From 1% to 14% depending on the purchase price, and from 1.5% to 31% depending on CO ₂ emission in g/km
Motor cycles, mopeds, bicycles, and ATV vehicles	From 2.5% to 5.5% depending on the motor volume in cm ³ , and from 5% to 15% depending on the level of gas emission
Producers, dealers, and dealers of used motor vehicles	Obligated to register in the registry of motor vehicle producers and dealers eight days before the beginning of the activities. Also, they are obligated to deposit a security instrument for the payment of special taxes.
Acquisition of used motor vehicles on which special tax on motor vehicles was paid; supply was not subject to VAT, gift, or inheritance tax	5% of the market value
Liability and comprehensive road vehicle insurance premiums	15% of the contractual amount for obligatory motor vehicle insurance premium 10% of the contractual amount for comprehensive motor vehicle insurance premium

Property taxes

There are no property taxes in Croatia.

Real estate transfer tax (RETT)

The acquisition of real estate is subject to taxation. 'Real estate' generally includes agricultural, construction, and other land as well as residential, commercial, and other buildings. Transactions include the sale, exchange, and any other means of acquiring real estate for consideration. The acquisition of real estate on which the VAT is paid is not subject to the RETT.

Tax is charged at 5% of the market value of the real estate on the contract date and is paid by the acquirer.

Stamp tax

There are no stamp taxation provisions in Croatia.

Payroll taxes

Employers are required to withhold a percentage of their employees' salaries and benefits as a payment on account of their PIT. The rate of withholding is a progressive rate between 12% and 40%, depending on the employee's personal circumstances and income.

Social security contributions

The Croatian social security system covers pension, health, and unemployment insurance. In case of dependently employed individuals, social security charges are borne by the employee and employer.

Employers make social contributions at the rate of 17.2% for the following social security benefits:

Croatia

- Health insurance: 15%.
- Health insurance for health protection while at work: 0.5%.
- Unemployment insurance: 1.7%.

The basis for payment of employer's social security contributions is gross salary, which is not capped.

Employers have certain obligations with respect to disabled individuals. Apart from some exceptions, employers employing 20 or more employees are obligated to employ a prescribed number of disabled individuals. The number depends on the total number of employees and nature of activities the employer carries out but it cannot be lower than 2% or higher than 6% from the total number of employees.

Employers who do not comply with prescribed requirements are obligated to pay a monthly fee amounting to 30% of minimal salary (minimal salary for 2016 amounts to HRK 3,120) for each disabled individual that employer was due to employ.

Chamber of Commerce contribution

Employers pay a mandatory contribution to the Croatian Chamber of Commerce. The amount varies between HRK 42 and HRK 3,973, depending on company size.

Branch income

Foreign corporations carrying on business in Croatia are taxed on their Croatian-source income at a 20% rate.

Income determination

Inventory valuation

Inventories are generally valued at the lower of their acquisition cost or net realisable value. Taking into consideration the accounting principles set out in the Accounting Act and the International Financial Reporting Standards (IFRS), a company can choose to adopt the most favourable method.

Capital gains

Capital gains or losses are covered by the CIT regime. They are either an increasing or decreasing item to the CIT base.

Dividend income

Dividend and profit shares payments made to resident companies are not taxable. Dividends and profit shares paid to non-resident companies are taxed at the withholding tax (WHT) rate of 12%. *Please see the Withholding taxes section for more information.*

Interest income

Interest income is taxable at the rate of 20% as a part of total income stated in the P&L account. Interest paid to non-resident companies can be taxed at the WHT rate of 15%. *Please see the Withholding taxes section for more information.*

Interest income on loans between related companies has to be determined at the minimum interest rate prescribed by the Ministry of Finance or Croatian National Bank (prescribed interest rate in Croatia is 5.14% as of 31 December 2015).

Foreign income

The tax base of a resident taxpayer subject to CIT is the profit earned both in Croatia and abroad, excluding the case where the taxpayer has registered a branch office abroad and taking into account the provisions of respective double tax treaties (DTTs).

Deductions

Depreciation

Most companies depreciate assets on a straight-line basis; this is because depreciation calculated this way, at the prescribed rates, is recognised for tax purposes. Companies are, however, free to use any depreciation method defined in the IFRS and to estimate the useful lives of all fixed assets in accordance with their accounting policies.

Prescribed annual depreciation rates are as follows:

Assets	Depreciation period (years)	Depreciation rate (%)
Buildings and ships of over 1,000 gross registered tonnage (GRT)	20	5
Basic herd and personal cars	5	20
Intangible assets, equipment, vehicles (except personal cars), and machinery	4	25
Computers, computer hardware and software, mobile telephones, and computer network accessories	2	50
Other non-mentioned assets	10	10

However, depreciation expenses in excess of the amount allowed for tax purposes are taxable. The value adjustment expenses of tangible fixed assets are non-deductible if such expenses exceed the amount of expense calculated by using the prescribed depreciation rate.

The cost of depreciation of assets that are not used for business purposes is not deductible.

Plant and equipment are considered to be acquired in the period in which installed or ready for use. Plant and equipment includes: tools of trade, information technology infrastructure (including software), furniture and fittings, and motor vehicles (excluding vehicles for personal use).

If the taxpayer writes off a portion of a depreciable asset, the remaining undepreciated portion will be depreciated at the rate prescribed by law. According to the CIT Act, the taxpayer can double the depreciation rates.

Land and forests (renewable resources) are not depreciated.

Financial assets, cultural monuments, and art work are not depreciated.

Depreciation of vessels, aircraft, condominiums, and vacation houses can be tax deductible only if certain conditions are met.

Goodwill

Goodwill is usually the difference between the consideration paid and the fair value of acquired net assets. If the taxpayer applies Croatian Financial Reporting Standards for its financial reporting, then goodwill must be amortised over five years.

The amortisation of goodwill is not recognised for tax purposes.

If the taxpayer applies IFRS for its financial reporting, goodwill impairment (if any) is considered as a non-deductible expense for tax purposes.

Croatia

Start-up expenses

Generally, start-up expenses are considered to be expenses in the financial year in which they are incurred. As no special rule is provided for tax purposes, they are considered as tax deductible expenses for CIT purposes in the year in which they are incurred.

Interest expenses

According to the CIT Act, late payment interests are tax deductible, unless those interests are due to related companies, regardless of whether the late payment interests are charged by resident or non-resident related parties.

Interest expenses on loans between related companies is also deductible, up to the amount prescribed by the Ministry of Finance or Croatian National Bank (prescribed interest rate in Croatia is 5.14% as of 31 December 2015) and if compliant with thin capitalisation rules (4:1 ratio).

Bad debt

Value adjustments arising from the adjustment of the value of claims against customers for goods delivered and services rendered are recognised as deductible expenses if more than 60 days elapsed between the maturity of the claim and the end of the tax period, and if the claims were not collected up to 15 days before filing the CIT return. The claim needs to be recorded in the business books as revenue, and all measures for debt collection have to be taken (legal actions) in accordance with best management practices.

Charitable contributions

Donations in a form of gifts in kind or cash for cultural, scientific, educational, health, humanitarian, sports, religious, environmental, or other socially beneficial purposes are tax deductible by 2% of the revenues generated in the previous year. Exceptionally, the amount may exceed 2% of the revenues generated in the previous year, provided that it is granted pursuant to the decisions of competent ministries on the financing of special programs and activities.

The donations of food to prescribed persons for social, humanitarian, and other purposes, and to people affected by natural disasters, made by taxpayers that are food producers and food traders can also be considered as tax deductible (provided the donations are in line with the relevant regulations of the Ministry of Agriculture).

Fines and penalties

Fines and penalties prescribed by Croatian administrative and judicial authorities are considered to be non-deductible expenses.

Taxes

There are no provisions for tax treatment of taxes paid/accrued. *For foreign tax credits, please see the Tax credits and incentives section.*

Net operating losses

Tax losses may be carried forward and utilised within five years following the year in which the losses were incurred and must be utilised in the order in which they occurred. The losses may not be transferred to any third party except in the case of merger, demerger, or acquisition. Tax losses cannot be carried back.

Utilisation of tax losses from previous years in case of statutory changes of legal entities is prescribed in detail in the CIT Act, limiting the entitlement where the legal predecessor is inactive and in case of a significant change in business activity or ownership structure.

Payments to foreign affiliates

The treatment of payments made to foreign affiliates is dealt with through the mechanism of the CIT base. The CIT base is increased for any concealed profit payments made. The tax authorities may audit the expenditure of non-resident taxpayers, examining

expenditure on goods and services abroad as well as management, intellectual property (IP), and other fees and payments that may have the character of a profit transfer. If the tax authorities discover that transactions have been used to conceal profit transfers, the difference between the declared price/fee and the average market price/fee will be added back into the taxpayer's tax base.

Group taxation

There are no group taxation provisions in Croatia.

Transfer pricing

Prices between a Croatian entity and its foreign related parties must be set at fair market value (the arm's-length principle). Provisions on transfer pricing and interests are also introduced in transactions between resident related parties if one of the parties has:

- beneficial tax status (i.e. reduced tax rates) or
- entitlement to carry forward tax losses from previous years.

If the prices between related entities are different than those between non-related resident and non-resident entities, the tax base must be calculated with prices that would be charged between unrelated companies. In order to determine the market value of the related party's transaction, the following methods can be used:

- Comparable uncontrolled price.
- Resale price.
- Cost plus.
- Profit split.
- Net profit.

Thin capitalisation

Interest on loans from a shareholder or a member of a company holding at least 25% of shares or voting power of the taxpayer will not be recognised for tax purposes in relation to the amount of the loan that exceeds four times the amount of the shareholder's share in the capital or their voting power. Interest on loans obtained from financial institutions is exempt from this provision. Loans from a shareholder or a member of a company are considered to be:

- Third-party loans if guaranteed by a shareholder.
- Loans from related parties.

Controlled foreign companies (CFCs)

No CFC regulations exist in Croatia.

Tax credits and incentives

The Act on Investment Incentives provides the following relief and incentives for taxpayers.

Investment incentives

Investment incentives are usually organised as corporate tax credits applicable for up to ten years upon completion of various conditions.

General incentives apply for investors profit earned as a result of an investment under the following conditions:

Croatia

Investment amount (EUR*)	Tax benefit rate (%)	Period (years)	Necessary to employ (employees)
0 to 1 million	50	10	5
1 million to 3 million	75	10	10
More than 3 million	100	10	15

* euros

Furthermore, tax benefits are prescribed for micro entrepreneurs. A minimum investment of EUR 50,000 allows tax incentives in the form of a 50% decrease of the tax rate over a period of five years, with a minimum of three new jobs.

Tax benefits cannot exceed investment amount.

Incentives for investments in technological development and innovation activities, strategic business support activities, and high value-added services

Incentives are available for investments in technological development and innovation activities, strategic business support activities, and high value-added services. High value-added services relate to:

- Creative services (activities in a field of architecture, design, marketing, art, etc.).
- Touristic services (projects related to accommodation facilities with four or more stars; accommodation facilities in cultural and historic buildings; activities for developing health, congress, nautical, and cultural tourism; recreation centres and parks and environmental projects in tourism).
- Managing, consulting, and educational services.
- Industrial engineering services.

These investments allow an additional non-refundable monetary subsidy over the incentive for creating new jobs, as follows:

Investment type	Additional non-refundable subsidy (%)
Technological development and innovation activities	50
Strategic business support activities and high value-added services	25

Additionally, a non-refundable money subsidy for the purchase of equipment in the amount of up to 20% of justified costs related to investment in technological development and innovation activities and strategic business support activities (maximum amount of up to EUR 500,000) can be granted to a company, provided that equipment bought is high technology equipment.

Incentives for investments into capital intensive and work intensive projects

An investment qualifies as capital intensive if the minimum amount of the investments is EUR 5 million and 50 new jobs are created. Those projects can benefit from additional non-refundable subsidies between 10% and 20% of recognised costs of new plants, objects, equipment, and other capital costs, depending on the unemployment rate of the county where located.

Work intensive projects are those with at least 100 new jobs created within a three-year period from the start of the investments project. Initial incentives can be increased by an additional 25% for up to 300 new jobs, 50% for a minimum of 300 new jobs, and up to 100% for 500 new jobs.

Custom free zones

Taxpayers that were engaged in or participating in the building of infrastructure within a custom free zone, in projects with a value exceeding HRK 1 million before July 2008, and did not fully utilise the incentive prescribed by the Investment Incentive Act are exempt from paying CIT until the full amount has been used, but no later than 31 December 2016.

Employment incentives

Employment subsidies are incentives for creating new jobs and incentives for training required by the new jobs.

Newly created jobs should be kept for at least five years.

Unemployment rate (%)	Non-refundable cash subsidy (%)	Maximum costs per employee (EUR)
Up to 10	10	3,000
10 to 20	20	6,000
More than 20	30	9,000

Incentives for training required by new jobs are also increased, as given in the table below.

Entrepreneurs' size	General training (% of non-refundable subsidy)
Large and when training is provided for employees with disability	50
Medium	60
Small and micro	70

Research and development (R&D) incentives

Registered scientific organisations, centres of scientific excellence, individual scientists, and groups of scientists are entitled to apply for the state subsidies and tax incentives for scientific research, basic research, and applied R&D research.

Depending on the type of research (e.g. scientific, basic, applied research, or technical feasibility) and size of entrepreneur (i.e. small, medium, or large entrepreneur, according to the Accounting Act), the percentage of the costs covered by state subsidy can vary between 25% and 100%. Additionally, the CIT base can be decreased (depending on the same criteria) by up to 150% of the amount of the costs covered by the state subsidy, where the CIT liability decrease is granted up to the amount of the percentage of the costs covered by state subsidy.

Foreign tax credit

If a domestic taxpayer has paid tax abroad on profit derived abroad, the tax paid can be included in its CIT return, up to the CIT rate in Croatia. The amount of paid tax abroad, which can be offset with the domestic tax, is calculated in the following way:

- The domestic tax rate is charged on the revenues/profit derived from abroad, and the result represents the highest amount of tax that can be offset with the domestic tax.

If the amount of paid tax abroad was charged at a rate lower than 20%, the actual amount of foreign tax paid can be offset with the domestic tax.

Withholding taxes**General rules**

Taxpayers who pay fees for the use of IP rights (the right to reproduction, patents, licences, copyrights, designs or models, manufacturing procedures, production formulas,

Croatia

blueprints, plans, industrial or scientific experience, and such other rights); fees for market research services, tax consulting services, legal, auditing, or such other services; or interest to foreign legal entities, natural persons excluded, shall, when making the payment, calculate and withhold tax at a rate of 15%.

Interest payments are subject to WHT at a 15% rate, unless they relate to the following:

- Commodity loans for the purchase of goods used for carrying out a taxpayer's business activity.
- Loans granted by a non-resident bank or other financial institution.
- Holders of government or corporate bonds who are non-resident legal persons.

Exceptionally, WHT on dividends and profit shares are taxed at the rate of 12%. If the company uses a tax allowance for reinvested profit, other than that earned in the banking or the financial non-banking sector, WHT on such dividends and profit shares is not applied. WHT does not apply on dividends and profit shares if they are paid out from the profit realised before 29 February 2012.

Generally, taxpayers who pay fees for the use of IP rights, pay interest, or pay out dividends and shares in profit to natural persons have to withhold 25% in the case of IP rights, 12% for interest, and 12% for dividends and shares in profit.

EU Directives

The CIT Act provisions and certain EU Directives provide special treatment for dividends, royalties, and interest paid to related companies in EU member states.

Regarding interest and royalty payments, full exemption only applies to payments between related companies, provided that:

- there is a direct minimum holding of 25% for an uninterrupted period of at least two years and
- the beneficial owner of the interest or royalties is a company of another member state or a PE situated in another member state of a company of a member state.

Regarding dividend and profit shares payments, full exemption applies when dividends and shares of profits are distributed to a parent company of different EU member state, provided that:

- the recipient of the dividend or profit share has a minimum holding of 10% in the capital of a company distributing the dividend or profit share, and
- the minimum holding is held for an uninterrupted period of at least two years.

The recipient of a dividend or profit share is any company:

- that takes one of the forms that are subject to the common system of taxation applicable to parent companies and subsidiaries of different EU member states
- resident in a member state for tax purposes and, under the terms of a DTT concluded with a third state, not considered to be resident for tax purposes outside the European Union, and
- subject to one of the taxes in the common system of taxation applicable to parent companies and subsidiaries of different EU member states, without the possibility of an option or of being exempt.

Treaty rates

If a country has a DTT signed with Croatia, WHT rates are lowered if the treaty rate is lower than the non-treaty rate. There are specific applications that need to be fulfilled in order to benefit from a DTT between countries.

The following countries have a DTT with Croatia:

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Non-treaty countries	12	15	15
Treaty countries:			
Albania	10	0/10 (23)	10
Armenia	0/10 (15)	10	5

* DTT is applicable as of 1 January 2016.

** DTT is applicable as of 1 January 2017.

Notes

- The 0% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 10% of the capital of the payer. The 15% rate applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 25% of the capital of the payer. The 15% rate applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly holds at least 10% of the capital of the payer. The 15% rate applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 25% of the capital of the payer. The 10% rate applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly controls at least 10% of the voting power of the payer, or directly holds at least 25% of the capital of the payer. The 15% rate applies to dividends paid by an investment corporation resident of Canada that is owned by a non-resident and in all other cases.
- The 5% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 20% of the capital of the payer. The 15% applies to other dividends.
- The 5% rate applies if the recipient is an entity that directly holds at least 25% of the voting power of the payer. The 15% applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 10% of the capital of the payer. The 15% rate applies to other dividends.
- The 0% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly holds at least 10% of the capital of the payer. The 15% rate applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity that directly controls at least 10% of the voting power of the payer. The 10% rate applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity that holds at least 25% of the capital of the payer, provided that ownership is not achieved for the purposes of exploiting these provisions. The 10% rate applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 10% of the capital of the payer. The 10% rate applies to other dividends.
- The 0% rate applies if the recipient is an entity that directly holds at least 25% of the capital of the payer. The 15% rate applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 25% of the capital of the payer. The 10% rate applies if the recipient is an entity (beneficial owner) that directly holds at least 10% of the capital of the payer, which is a resident of Israel and dividends are paid out of the profit that is subject to lower corporate tax rate than usual. The 15% rate applies to other dividends.
- The 0% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly holds at least 25% of the capital of the payer and if the dividends aren't subject to CIT in the other contracting state. The 10% rate applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 25% of the capital of the payer and has invested in the payer at least EUR 150,000. The 10% rate applies to other dividends.
- The 8% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 25% of the capital of the payer. The 10% rate applies to other dividends.
- The 5% rate applies if the recipient (beneficial owner) is an entity (except a partnership) that directly holds at least 25% of the capital of the payer if dividends are held for at least one year without interruption and are published within this period. The 5% also applies if the beneficial owner is a pension fund or other similar institution. The 10% rate applies to other dividends.

19. The 5% rate applies if dividends are paid from a Croatian resident to a resident in Malta. If a resident from Malta pays dividends to a Croatian resident the rate cannot be higher than the CIT on profit from which dividends are paid out.
20. The 5% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 25% of the capital of the payer and that share shall be at least 100,000 United States dollars (USD). The 10% rate applies to other dividends.
21. The 5% rate applies if the recipient (beneficial owner) is an entity that holds at least 25% of the capital of the payer. The 10% rate applies to other dividends.
22. The 5% rate applies if the recipient of dividends (beneficial owner) is an entity that directly or indirectly holds at least 25% of the capital of the payer. The 15% rate applies for the dividends that are paid out of the profit derived directly or indirectly from the real estate from an investment company (that distributes most of the profit on an annual basis and when income from such real estate is not taxable). The 10% rate applies to other dividends.
23. Interest to the government, local authority, and the Central Bank is exempt from WHT.
24. Interest on commercial claims for debts, interest on an issued, guaranteed, or insured loan or credit with the purpose of promotion of export, interest on loan from banks, interest on deposits held in banks, and interest that is paid to the state or local authority is exempt from WHT.
25. The 5% rate applies to interests on loans granted by bank and insurance companies. The 15% rate applies to other interest.
26. Interest arising in a contracting state and derived by the government of the other contracting state, a local authority, and the Central Bank thereof or any financial institution wholly owned by that government, or by any resident of that other contracting state with respect to debt and claims indirectly financed by the government of that other contracting state, or the local authority, or the Central Bank thereof or any financial institution wholly owned by the government is exempt from WHT.
27. Interest arising in a contracting state and derived by the government of the other contracting state, local authority, and the Central Bank thereof or any financial institution wholly owned by that government, or interest on loans from the government is exempt from WHT.
28. Interest arising in the contracting state and derived by the government of the other contracting state, local authority, the Central Bank, or any other financial institution wholly owned by the government is exempt from WHT.
29. Interest is exempt from WHT when the payer of interest is the government or local authority in the contracting state or when interest is paid to the government, local authority, or agency of the other contracting state that is wholly owned by the government or local authority, or when interest is paid to any other agency on loans arising from the application of contracts between contracting states.
30. The 5% rate applies to interest on all type of loans granted by banks. The rate of 10% applies to other interest. Interest arising in a contracting state and derived by the government of the other contracting state, a local authority, and the Central Bank thereof, or on a loan that is approved, guaranteed, or insured by an insurance institution, or financing of international business transactions to the extent that it acts on behalf of the other contracting state is exempt from WHT. Interest arising in a contracting state and paid to a resident of the other contracting state who is the beneficial owner is also exempt from WHT to the extent that such interest is paid to the seller of any industrial, commercial, or scientific equipment or other property that is sold on credit.
31. Interest paid to the government or Central Bank of the other contracting state is exempt from WHT.
32. Interest paid to the government is exempt from WHT.
33. Interest is exempt from WHT when the payer is the government or local authority, when the receiver is the government, local authority, or body wholly owned by the government or the local authority, and when interest is paid in the name of the government to the other bodies (including financial institutions) related with a loan that the government received under the agreement between the governments of the contracting states.
34. Interest on loans that give, approve, or guarantee the government, local authority, Central Bank, or institution authorised for insurance and financing of international business transactions is exempt from WHT.
35. Interest on loans from banks, interest on sale on credit for industrial, commercial, or scientific equipment, interest on sale on credit for commercial goods, and interest from the government, Central Bank, or other financial institution owned and controlled by the government is exempt from WHT.
36. Interest arising in a contracting state and derived by the government of the other contracting state, a local authority, and the Central Bank thereof, or on a loan that is approved, guaranteed, or insured by the government of the contracting state, Central Bank, or the agency (including financial institution) that is owned or controlled by the government is exempt from WHT.
37. Interest is exempt from WHT when the payer of interest is the government, Central Bank, or government agency or institution.
38. The 5% rate applies on royalties for use or the right to use any type of industrial, commercial, or scientific equipment. The 10% rate applies to other royalties.
39. The 5% rate applies if the recipient of dividends (beneficial owner) (except partnership) is an entity that directly holds at least 10% of the capital of the payer. The 15% rate applies to other dividends.
40. The 5% rate applies if the recipient of dividends (beneficial owner) (except partnership) is an entity that directly holds at least 10% of the assets of the payer. The 10% rate applies to other dividends.
41. Interest is exempt from WHT when sourced in one contracting party and paid to another contracting party or to central bank of the contracting party.
42. The 5% rate applies if the recipient of dividends (beneficial owner), except a partnership, is an entity that directly holds at least 10% of the assets of the payer. The 15% rate applies to other dividends.
43. Interest is exempt from WHT when paid by the government, Central Bank, or local authority if interest is paid by the country, local authority, or official body in which interest occurs, if interest is paid on loan or receivables owned or guaranteed by that country, local authority, or export financial agency, or if paid to a financial institution or subject for joint investment.
44. Interest is exempt from WHT when paid regarding the sale on credit of industrial, commercial, and scientific equipment, the sale on credit of any commodity between two companies, or on bank loans.

Croatia

In addition to the current WHT rates of 15% and 12%, an increased rate of 20% applies to all services not listed under 'General rules' (*see above*) paid to foreign entities whose place of seat or management is in countries considered to be tax havens or financial centres on the list of countries published by the Ministry of Finance. This provision does not apply to EU member countries and countries with which Croatia has signed a DTT.

Countries listed by the Ministry of Finance are as follows:

- Andorra
- Anguilla
- Antigua and Barbuda
- Aruba
- Bahamas
- Bahrain
- Barbados
- Belize
- Bermuda
- British Virgin Islands
- Brunei Darussalam
- Cayman Islands
- Christmas Island
- Cook Islands
- Dominica,
Commonwealth of
- Dominican Republic
- Falkland Islands
- Fiji
- Gibraltar
- Grenada
- Guam
- Guernsey
- Guyana
- Hong Kong
- Isle of Man
- Jersey
- Liberia
- Liechtenstein
- Macau
- Maldives
- Marshall Islands
- Monaco
- Monserrat
- Nauru
- Netherlands Antilles
- Niue
- Palau
- Panama
- Saint Kitts and Nevis
- Saint Lucia
- Saint Vincent and the
Grenadines
- Samoa
- Seychelles
- Solomon Islands
- Tonga
- Trinidad and Tobago
- Turks and Caicos Islands
- Tuvalu
- United States (US)
Virgin Islands
- Vanuatu

Tax administration

Taxable period

The CIT shall be assessed for a period that is normally a calendar year. The tax authorities may agree, at the request of a taxpayer, that the tax period should not correspond with the calendar year, where the tax period may not exceed 12 months. The chosen tax period cannot be changed for three years.

Tax returns

All CIT payers are obligated to submit an annual CIT return to the tax authorities no later than four months after the end of the tax period for which CIT is assessed.

The Ministry of Finance administers taxation matters through the tax administration. These organisations have responsibilities and powers defined by law.

Payment of tax

Every taxpayer is required to pay monthly CIT advances (on the last day of each month) on the basis of the previous year's tax return.

In the first year of operation, taxpayers are not obligated to pay any CIT advances.

CIT is assessed at the end of the tax period, and the assessed amount, less any instalments made, is payable by the day of submission of the tax return.

Tax audit process

The Inspection Sector of the Croatian tax authority performs a tax audit of a taxpayer.

The tax audit process is usually performed as follows:

- Notification of a tax audit is sent to the taxpayer.

- Tax audit is conducted.
- Minutes of the tax audit are issued.
- Taxpayer can object to the minutes within a prescribed filing deadline. If objection shows new facts and evidence, the tax inspector will prepare supplementary minutes.
- Resolution of the tax audit is issued within 60 days as of the day (supplementary) minutes have been provided to the taxpayer.
- Appeal against the resolution can be filed within 30 days as of the day the taxpayer received the resolution. It needs to be replied to within two months as of the day the appeal has been filed.
- After a rejected appeal, the taxpayer can initiate court litigation procedures.

Statute of limitations

The Croatian tax authority is entitled to review the tax returns of a company within three years following the end of the year in which the tax return is submitted. This period may be extended to a maximum of six years where the three-year period has been interrupted by actions taken by the tax authorities, such as a tax audit. Where the tax authority considers that there may be a significant impact from the results of the investigation, earlier years may be examined. This means that, in theory, even the closed years can be reopened and additional taxes can be imposed.

Topic of focus for tax authorities

Tax authorities are focusing on business relations with related parties. The recent conduct of the tax authority implies that transfer pricing documentation is expected to be delivered along with the income tax return (PD form).

Also, after the accession of Croatia to the European Union, transactions between member states within the European Union are of focus for the tax authorities.

Binding opinions

Opinions and instructions issued by tax authority central offices are binding for all tax authority regional offices, and the goal is to ensure uniformity of the tax authority representatives' treatment of taxpayers.

Other issues

US Foreign Account Tax Compliance Act (FATCA)

On 2 April 2014, the US Treasury announced that an intergovernmental agreement (IGA) was 'in effect', and, on 20 March 2015, the US Treasury and Croatia signed and released the IGA.

Base erosion and profit shifting (BEPS)

Even though Croatia is not a member of the OECD, a BEPS plan will become applicable according to the EU Directives. The exact time when BEPS will become applicable is not known at this time.

Significant developments

Recent tax developments

Reduction in profit tax rates

The profit tax rate has been reduced as of 1 January 2016 from 25% to 22%.

Limitation of deductions

Parallel with the tax rate reduction, the government has limited the deduction of expenses.

Depreciation of real estate

From 1 January 2016, real estate may be depreciated up to 50% of the value of the property based on the valuation for real estate tax. Accelerated depreciation will no longer be possible after 1 January 2016.

Turnover tax

The levy of the room tax (*logeergastenbelasting*) has been incorporated into the turnover tax. The rate remains at 7%.

Tax court

As of 1 January 2016, it is now possible to appeal the verdict of the tax court. This improves the protection of taxpayers and the quality of the tax system.

Transitional legislation

While the offshore tax regime was abolished in 2001, qualifying offshore companies incorporated before 1 January 2002 may continue to apply the old regime until 2019, provided that certain conditions are met under transitional legislation.

Taxes on corporate income

Resident corporations are taxed on worldwide income. Non-resident companies are taxed on the following Curaçao-source income:

- Income attributable to a permanent establishment (PE).
- Income from real property situated on Curaçao.
- Interest on loans secured by a mortgage on property situated on Curaçao.

Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 22% as of 1 January 2016 (previously 25%).

Minimum rates

Special minimum rates apply to the taxable income of certain companies:

Type of company	Minimum rate (%)
E-zone companies	2.0
Export companies	3.2
New industries and hotels	2.0
Land development companies	2.0

Shipping business

Shipping companies are subject to the general profit tax rate of 22% but may apply for two alternative regimes.

Tonnage regime

If a shipping company applies the tonnage regime, the actual profits or losses are not taken into account, regardless of whether they are regular profits or capital gains. Instead, their profit is calculated based on the rates provided in the table below.

The calculated profit based on the table below is subject to the general profit tax rate of 22% as of 1 January 2016 (previously 25%).

Over (tons)	Not over (tons)	Profit per net ton (ANG*)
0	10,000	2.00
10,000	25,000	1.35
25,000		0.60

* Antilles guilders

Shipping and airline regime

International shipping companies may opt for the shipping and airline regime instead of the tonnage regime. This regime is also available for international aviation companies. International shipping and aviation companies who opt for this regime may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of Curaçao. As a result, the overall effective tax rate is 6.2% as of 1 January 2016 (previously 7%).

Exempt companies

Please see the *Tax credits and incentives* section for information on tax exempt companies.

Companies under transitional offshore rules

The transitional rules distinguish three types of offshore companies.

- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support subject to tax rates of 2.4% to 3% (while capital gains and losses were not taken into account) will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to tax rates of 4.8% to 6% or, under certain circumstances, 2.4% to 3% and that had a valid ruling with the tax inspector (e.g. trading companies, banks, captives commissions, and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. These revenues were, under the old offshore regime, exempt from tax. For profit tax

Curaçao

purposes, these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules, provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.

Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management on Curaçao is considered to be a resident. A company that has been established on Curaçao will always be considered a resident of Curaçao.

Offshore entities on Curaçao must have a local managing director. This function is easily provided by one of the many trust companies established on Curaçao.

Permanent establishment (PE)

The definition of a PE on Curaçao is generally in line with the Organisation for Economic Co-operation and Development (OECD) model.

Transfer of legal seat

Legislation has been enacted under which a Curaçao company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction) and a foreign company is allowed to migrate to Curaçao.

Other taxes

Turnover tax

The general turnover/sales tax rate is 6%. This rate applies to revenue derived from services and deliveries rendered by an entrepreneur or company on Curaçao.

In addition to services rendered on Curaçao, if a foreign entrepreneur performs a service from abroad to a customer on Curaçao, this service is subject to turnover tax. A local entrepreneur receiving such a service from abroad is liable to pay the turnover tax, based on the reverse-charge mechanism.

Non-commercial rental of property is also subject to turnover tax.

A limited number of services and deliveries are exempt, such as:

- Exports.
- Electricity and water.
- Certain services to non-residents.
- Medical services.
- Services at the airport or in the harbour regarding imported or exported goods or goods in transit.
- Advisory and management services provided to or by offshore companies and offshore banks.
- Rental of a dwelling that is the principal residence of the tenant.

A rate of 7% applies to insurance premiums. Exempt from this tax are life insurance, health insurance, and reinsurance, as well as the services provided by insurance intermediaries. As of 2016, the rate of 7% also applies to the room rate of hotels as well as short-term house rentals. It replaces the former room tax with the same tax rate of 7%.

Specific goods and services are subject to a rate of 9%. These are, among others:

- Motor vehicles, yachts, and recreational craft (e.g. surfboard, jet ski, water scooter, kayak) and renting these vehicles, yachts, and craft.
- Food prepared for immediate use (e.g. takeaway, fast food) as well as food and drink consumed in hotels, cafes, bars, and restaurants.
- Soft drinks, alcoholic beverages, and tobacco.
- Digital storage devices upon which computer games, movies, music, and similar data are stored, as well as the rental of these storage devices.

An entrepreneur liable to turnover tax must file a declaration with the Tax Inspectorate before the 16th day of the month following the month concerned, at the Tax Collector's office.

Import tariffs

Import tariffs vary, in general, between 5% and 27%. There is also a range of products that may be imported without import duties. Below, we provide some examples, but we note that in each category there may be specific exemptions to the general tariff.

- Basic food products are tax exempt.
- Other food products are generally taxed at a rate of 5.5% up to 13%.
- Books, computers: 0%.
- Furniture: 22%.
- Cars: 27%.

Excise taxes

Excise tax is due on gasoline; alcohol, with different tariffs for liquor and beer; and tobacco.

Some examples include:

- ANG 0.4725 per litre of gasoline.
- ANG 23 per volume percent of alcohol per hectolitre of distilled products.
- ANG 14.55 per 100 cigarettes (imported).

Land and property taxes

The annual real estate tax rates are as follows:

Value of real estate (ANG)		Tax on column 1 (ANG)	Tax on excess (%)
Over	Not over		
0	350,000	0	0.4
350,000	750,000	1,400	0.5
750,000	-	3,400	0.6

Transfer taxes

The transfer of immovable property located on Curaçao is subject to a 4% transfer tax.

Stamp taxes

A stamp tax is levied in two ways, in the form of stamps and as stamped paper.

Curaçao

Stamp tax applies to documents such as government licences, leases, agreements, and court documents. The rate depends on the type of document. As an example, the stamp tax for bank checks is ANG 0.25. The general rate for each page of a legal document is ANG 10.

Payroll taxes

Employers must not only withhold wage tax but also the employee part of social security premiums (*see below*) from their employees and pay the amount withheld, together with the amount payable by the employer, to the tax collector.

Social security contributions

Basic health care insurance (BVZ)

The basic health care insurance insures all residents against the costs of healthcare.

With regard to employees

The BVZ premium is 13.6%, of which 9.3% must be paid by the employer and 4.3% by the employee. The maximum premium income remains at ANG 150,000.

Employers also pay 1.9% for insurance against loss of income of the employee in case of illness. The maximum premium income is ANG 65,005.

With regard to non-employees

Residents with income other than from an employment pay 13.6%. However, persons from the age of 65 pay 6.5%. The maximum premium income is ANG 150,000.

Accident insurance

Employees are insured against loss of income as a result of an accident that occurs at work. The premium varies from 0.5% to 5%, depending on the class of risk, to be paid fully by the employer. Maximum premium income is ANG 65,005.

Old age insurance (AOV) and widows and orphans insurance (AWW)

The collective premium for AOV and AWW amounts to 16%, up to an income of ANG 100,000, of which 9.5% is to be paid by the employer.

Additionally, anyone who enjoys an income of more than ANG 100,000 must pay a premium of 1% on the excess income. In case of wage income, this is borne by the employee.

Branch income

Tax rates on the profits of PEs are the same as for resident corporations.

There are specific rules for the PE of an insurance company. In that case, the company may elect to declare profit based on a percentage of premiums received by the PE, as well as premiums the company has received from insured residents and from insured risks on Curaçao. The insurance company may also elect to declare a profit that is in the same proportion to total profit of the company as the aforementioned premiums to total premiums.

No tax is withheld on transfers of profits to the head office.

Income determination

Inventory valuation

Both the last in first out (LIFO) and first in first out (FIFO) methods of inventory valuation are permitted, provided the chosen method conforms to sound commercial practice. Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.

Capital gains

Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages (dividends and capital gains) from a qualifying participation (*see Dividend income below*).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired asset. The reserve may be maintained for a maximum of four years. If the reserve has not been fully applied, the remainder will be liable to taxation in the fourth year.

Under the transitional regime for offshore companies (investment, holding, finance, and patent holding companies), capital gains and losses are tax exempt.

Dividend income

In general, a full participation exemption applies to all local, as well as foreign, participations for dividends as well as for capital gains. However, it is required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.

Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax on Curaçao.

Non-portfolio investment clause

A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest, or royalties received other than from an enterprise of that participation.

Subject-to-tax clause

A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited, resulting in an effective tax rate of 10% on these dividends.

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

Immovable property

The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

Definition of dividend

A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.

Curaçao

Minimum cost-price threshold for participations

The minimum cost-price threshold for shareholdings, profit-sharing notes, or voting rights of less than 5% is ANG 890,000.

Interest income

There is no specific regime for interest received. Interest income is therefore taxed at the same rate as other income.

Foreign income

A Curaçao corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

Curaçao has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a PE in Aruba, St. Maarten, or the Netherlands, including the Caribbean Netherlands, are tax exempt on Curaçao based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

The profits of a branch with more than 50% low-taxed passive investment income will be taxed against an effective tax rate of 10%. The branch profit is in line with the treatment of participation profits and losses.

Foreign real estate is always deemed to be part of a PE and, as such, is fully tax exempt.

Deductions

Depreciation and amortisation

Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs, and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable.

The cost basis of certain intangible assets, such as patents, trademarks, and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.

The tax department has issued the following estimated depreciation table.

Assets	Rate (%)	Residual value (%)
Buildings *	2/2.5	10
Renovation	10	0
Inventory	10/20	10
Computer:		
Hardware	33/50	0
Mainframe	10/12.5	0
Machinery and installations	10	10
Transportation:		
Cars	20	10
Rental cars	33	15

Assets	Rate (%)	Residual value (%)
Trucks and buses	10	15
Start-up costs	20	0
Goodwill	20	0

* As of 2016, real estate may not be further depreciated than 50% of the value of the property for real estate tax.

Start-up expenses

Start-up expenses should be capitalised and may be depreciated, comparable to goodwill, over five years.

Anti-abuse rules regarding interest and loans

Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction, or in case the interest in the hands of the recipient is taxed at an effective tax rate that is considered adequate by Curaçao standards, the interest may be deductible.

In case of intra-group financing, the amount of interest paid or received for profit tax purposes should be based on arm's-length principles.

In case of profit participating loans, the interest will be qualified as a dividend and will not be deductible. Interest received on such loans may meet the definitions of the participation exemption if the creditor also holds a qualifying participation in the debtor.

A write-down of an intra-group loan may be denied in case of a profit-participating loan, or if, at the time of issuance, it was foreseeable that the loan would never be fully repaid.

Provision for bad debt

It is possible to make a provision for future expenses with a cause existing on the balance sheet of the tax year in question. Therefore, a provision may be made for bad debts.

Charitable donations

Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

Bribes, kickbacks, and illegal payments

Expenses that are connected to a criminal offence for which a taxpayer has been convicted are not deductible. Bribes paid to public servants and politicians are not deductible.

Fines and penalties

Fines and penalties are not deductible in cases where they have been imposed by a criminal court in Curaçao, or have been paid to avoid prosecution, and in cases of administrative fines imposed by a government agency in Curaçao.

Taxes

Taxes, other than the corporate profit tax itself, incurred in the course of doing business are deductible.

Other significant items

Gifts, promotional presents, and the costs of courses, conferences, seminars, symposiums, etc. are 100% deductible.

Curaçao

The costs of food and beverages, as well as travel and accommodation expenses related to courses, conferences, seminars, symposiums, etc. are 80% deductible.

The costs of representation, including receptions and parties, excursions, study trips, etc., but excluding food and beverages, are not deductible. For receptions, for instance, this means that the costs of venue hire, personnel, and performers are not deductible.

Net operating losses

Losses may be carried forward for a period of ten years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.

Payments to foreign affiliates

The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

Group taxation

Fiscal unity

The Corporate Tax Act provides for fiscal unity treatment for corporate profit tax purposes. Resident companies with wholly owned resident subsidiaries can qualify for this regime. The parent company is entitled to submit one consolidated income tax return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of Curaçao, the Netherlands, Aruba, or St. Maarten. The companies that invoke this relief must have their place of management on Curaçao.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime provided that they are resident on Curaçao.

Transfer pricing

There are no specific regulations with regard to transfer pricing. However, based on case law, businesses can be required to show that in case of intra-company transactions, these transactions have been made at arm's length.

Thin capitalisation

In cases where a company receives a loan from an associated exempt private limited liability company (*Besloten Vennootschap* or BV), and the amount of the loan is more than three times the net equity of the company, the interest on the loan is not deductible for the part that is more than three times the net equity.

Controlled foreign companies (CFCs)

There are no CFC provisions.

Tax credits and incentives

Foreign tax credit

A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the Curaçao profit tax that is attributable to that foreign income.

Inward investment and capital investment

There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.

Investment allowance

For a minimum investment of ANG 5,000, a 10% investment allowance on acquisitions and improvements is permitted as a deduction from taxable profit in the year of investment for businesses operating on Curaçao.

Accelerated depreciation and tax rollover reserve

An accelerated deduction of one-third of the assets' depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.

Export regime

An export regime applies to companies that are active internationally. The most important requirement is that 90% or more of the company's business income is the result of transactions with foreign clients. There is no distinction between income from trade or from services. The regime supports the following activities:

- Export of goods.
- International trade and services.
- Repair and maintenance services performed on behalf of foreign clients or performed abroad.
- International warehousing services.
- Providing of loans and licences, providing the use of intellectual property, acting as a holding company, or being a member of a cooperation.
- Other services performed for foreign clients.

There are also some specific activities excluded from the export regime, such as:

- Acting as a director of companies whose registered office or effective management is situated on Curaçao and other similar trust services.
- Services performed by a notary public, lawyers, accountants, tax advisers, and other such services.

The effective tax rate for the regime is approximately 3.2% as of 1 January 2016 (previously 3.6%).

Tax exempt company

It is possible to elect tax-exempt status for a limited liability company (*Naamloze Vennootschap* or NV) or BV. To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, and financials of the company. An exempt company may be used for investment and finance activities as well as licensing of intellectual and industrial property rights and other comparable property and usage rights.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of Curaçao. A profit tax regime is comparable to that

Curaçao

of Curaçao if the foreign tax regime provides for a profit tax rate of at least 11% as of 1 January 2016 (50% of the Curaçao tax rate; previously 12.5%).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all European Union (EU) and OECD member states and all jurisdictions with which Curaçao has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

Independent expert

An independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax comparable to that of Curaçao, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.

International shipping and aviation companies

Ocean shipping companies may opt for the tonnage regime, in which case they are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control).

Instead of the tonnage regime, international shipping companies, as well as international aviation companies, may opt to apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of Curaçao. As a result, the overall effective tax rate is 6.2% as of 1 January 2016 (previously 7%).

E-zone companies

An e-zone is an area designated for international trade and services. The activities of companies established in an e-zone must be focused on trading or providing services to companies located outside of Curaçao. There are two types of e-zones:

- Designated areas where, amongst others, goods can be stored, processed, machined, assembled, packaged, displayed, and released or handled in any other way. On Curaçao, there are two of this type of e-zone that are dedicated to goods, one located at the harbour, and the other at the airport.
- E-zones where international trade and trade supportive services may be performed, supported by electronic communication and information equipment (e-commerce). There are several e-commerce zones on Curaçao.

E-zone companies are subject to a minimum 2% corporate profit tax until 1 January 2026. They will be granted special facilities regarding turnover tax.

New industries and hotels

New industries and hotels are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

Land development companies

Land development companies are granted a tax holiday. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1 million is required. Activities should be expected to enhance the economic development of Curaçao.

Private foundations

Private foundations are exempt from Curaçao profit tax, and their distributions are exempt from Curaçao gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor's country may be applicable.

The 'private' foundation is a variant of the long-existing 'common' foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. If, however, a private foundation does realise profits from a business or enterprise, that profit will be taxed at the normal tax rate of 22% as of 1 January 2016 (previously 25%). Acting as a holding company or investment company is not considered running a business. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

It is possible to opt for a taxable status for a private foundation. In that case, its profits, other than those arising from active business activities, will be taxed at a rate of 10%.

Special purpose fund

An NV or BV, as well as a private foundation or trust, may opt for the status of a special purpose fund. A special purpose fund will be taxed at a rate of 10% rather than the general tax rate. Unlike for an exempt company, it is no obstacle for a special purpose fund if more than 5% of the revenues consist of dividends from subsidiaries that are not subject to a tax comparable to that of Curaçao.

Transparent companies

It is possible to opt for a transparent status. This option is available to corporate entities with capital divided into shares, provided that these entities reside in Curaçao. Newly established companies can request the status from the start, provided the request is filed with the Inspectorate within three months. Existing companies can request the status as of the next following year.

A transparent company will be treated as a partnership for tax purposes, and the shareholders will be treated as the partners in that partnership.

Withholding taxes

Although a dividend withholding tax (WHT) was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time on Curaçao.

Tax treaties

Curaçao currently has tax treaties in effect with Aruba, the Netherlands, Norway, and St. Maarten. A double tax agreement (DTA) has been negotiated with Jamaica, but this has not entered into force yet. *See the Other issues section for a description of tax information exchange agreements (TIEAs).*

Tax arrangement for the Kingdom of the Netherlands (TAK)

As part of the Kingdom of the Netherlands (TAK), Curaçao is party to a federal tax agreement with Aruba, St. Maarten, and, until 2015, the Netherlands. Subject to this treaty, dividends, interest, and royalties paid out to a Curaçao company may qualify for reduced rates of WHT in the subject countries.

The TAK will remain in force with regard to Aruba and St. Maarten until a separate agreement has been signed with each of these countries.

Curaçao

As of 1 January 2016, the TAK between the Netherlands and Curaçao has been replaced by the Tax Agreement Netherlands Curaçao (TANC).

Dutch dividend WHT is 15% if the Curaçao company owns less than 25% of the Dutch company. The Dutch WHT is now 0% for the following entities:

- Government of Curaçao.
- Pension fund.
- Company listed at a stock exchange or whose shares are held for more than 50% by companies listed at a stock exchange.
- Head office or a group financing company.
- Entity with at least three qualified employees.
- Entity with real business activities.
- Entity whose shares are held by one or more residents of Curaçao or the Netherlands.

With the exception of government entities and pension funds, a participation of at least 10% in the dividend paying entity is required.

A transitional regime applies until 2019 to the old Curaçao offshore companies, which reduces the WTH to 5% (under the TAK 8.3%).

Tax administration

Taxable period

Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar-year basis or on a different book year. On request, this may also apply, for example, when a resident company is the subsidiary of a foreign parent company (i.e. only a local company must request for a different tax year-end).

Tax returns

A provisional return must be filed within three months after the end of the book year. A final return must be filed within six months after the end of the book year.

For the provisional return, no extensions are granted. For the final return, an extension may be requested. In general, no extensions will be granted for more than 12 months after the book year.

Payment of tax

Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment. This means that if the book year equals the calendar year, the provisional return is due before 1 April of the following year, and the final return before 1 July of the following year.

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2015 was 100, then at the time of filing the provisional return for 2016, which is due before 1 April 2017, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2016 will be lower than for 2015, upon request, the estimated lower amount may be paid at the time of filing the provisional return.

At the time of filing the final return for the year 2016, which is due before 1 July 2017, the balance due must be paid, or if the total amount is less than the amount already paid up, a repayment will follow.

Tax audit process

As the profit tax is levied based on self-assessment, the tax department does not issue a final tax assessment. There is no specific cycle for audits. Depending on a desk review of the tax returns of the last couple of years, an audit may follow.

Statute of limitations

A reassessment can be imposed until five years after the tax year. In cases where the taxpayer is considered to be in bad faith, a reassessment can be imposed until ten years after the tax year.

Topics of focus for tax authorities

There are no specific topics of focus for the tax authorities. In case an audit is started, each aspect may be investigated. Often the audit will not only focus on the profit tax, but also the other tax obligations, such as sales tax, wage tax, and social security premiums.

Other issues**Exchange controls**

In general, exchange control regulations are very liberal for offshore companies. Offshore companies established on Curaçao can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a licence fee of 1%.

Business combinations

The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

Tax information exchange agreements (TIEAs)

TIEAs have been signed with several countries, including Australia, Canada, Colombia, Denmark, Mexico, New Zealand, Spain, Sweden, and the United States. As a result, Curaçao, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

Intergovernmental agreements (IGAs)

Curaçao signed an IGA with the United States on 16 December 2014. Financial institutes in Curaçao must file the required reporting with regard to the Foreign Account Tax Compliance Act (FATCA) through a website set up by the Curaçao government.

Common Reporting Standard (CRS)

Curaçao signed the Multilateral Agreement on Automatic Exchange of Information and will start the exchange of information based on the CRS in 2017.

Significant developments

Cyprus is expanding and updating its double tax treaty (DTT) network. In this regard, Cyprus has two new DTTs effective as of 1 January 2016, these being with Guernsey and Switzerland. New DTTs with Georgia and Bahrain will be effective from 1 January 2017. New/amended DTTs with Ethiopia, Iran, Latvia, and Ukraine have been signed and are awaiting entry into force.

Cyprus is an early adopter of the Common Reporting Standard (CRS) on automatic exchange of information. In November 2015, the Global Forum on Tax Transparency rated Cyprus as 'Largely Compliant'.

Cyprus is working in cooperation with the European Commission (EC) regarding the EC's recent focus into fiscal state aid and tax rulings. To date, the EC has not raised any specific investigations regarding Cyprus.

The Cyprus government is monitoring the Organisation for Economic Co-operation and Development's (OECD's) and European Union's (EU's) anti-base erosion and profit shifting (BEPS) developments. With effect from 1 January 2016, Cyprus has implemented the latest anti-hybrid and anti-avoidance rules of the amended EU Parent-Subsidiary Directive. The enacted anti-hybrid rule applies to all dividends, which are treated as deductible for the paying company, received by Cyprus tax resident companies (or Cyprus permanent establishments [PEs]) and is not restricted to EU subsidiary dividend payments.

On 25 May 2016, the Economic and Financial Affairs Council (ECOFIN) politically adopted the EU's proposed Directive implementing within the European Union the G20/OECD BEPS Action 13 country-by-country (CbC) reporting requirements. Cyprus should transpose these measures into its domestic laws with effect for accounting periods beginning from 1 January 2016. The EU's Anti-Tax Avoidance Directive (ATAD) was also under discussion at the May 2016 ECOFIN. This is proposing EU legislation in the areas of interest limitation rules, exit taxation, a general anti-avoidance rule (GAAR), controlled foreign company (CFC) rules, and hybrid mismatches with the European Union. It also contains possible rules on a switch-over clause. It is expected that Cyprus should implement the ATAD provisions in its tax law with effect from 1 January 2019 at the latest, except for exit taxation rules, which are expected to be extended by one year.

Additionally, the Cyprus Ministry of Finance (MoF) has made specific announcements regarding proposed amendments to the current Cyprus Intellectual Property (IP) Box aiming to align this with BEPS Action 5 conclusions (*see the Tax credits and incentives section for more information*).

In 2015, a number of amendments to the Cyprus corporate and personal tax laws were enacted with the aim of making the tax system in Cyprus fairer and even more competitive for both individuals and businesses. With regards to corporate tax laws, these amendments comprise, *inter alia*, the following:

- A tax-allowable deduction on new corporate equity by way of a notional interest deduction (NID) (*see the Tax credits and incentives section for more information*).
- Exemption from future capital gains tax for Cyprus-located immovable property purchased by the end of 2016 (*see the Other taxes section for more information*).
- Extension of accelerated tax depreciation on plant and equipment and industrial buildings and hotels until the end of 2016 (*see the Deductions section for more information*).
- Neutral tax treatment for foreign currency exchange (forex) differences that do not relate to trading in forex and related derivatives (*see the Income determination section for more information*).
- Harmonisation of group tax loss relief provisions with EU Law (*see the Group taxation section for more information*).

Further, within 2016, a Tax Department Circular communicated that the Cyprus tax authorities will review and provide their position on advance tax ruling requests within 21 working days from their submission if expedition is explicitly requested.

At the end of May 2016, a proposed legislative amendment has been submitted to parliament for approval under which building land will be subject to value-added tax (VAT) at the standard rate of 19%. If enacted into law, supplies of building land will be subject to VAT at the rate of 19%. *Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries for any developments in this area after 1 June 2016.*

Taxes on corporate income

Corporate income tax (CIT)

All companies that are tax residents of Cyprus are taxed on their income accrued or derived from all sources in Cyprus and abroad. A non-Cyprus tax resident company is taxed on income accrued or derived from business activity that is carried out through a PE in Cyprus and on certain other income arising from sources in Cyprus.

The standard CIT rate in Cyprus is 12.5%.

The Cyprus CIT law provides explicitly for a number of exemptions for many and varied types of incomes, profits, and gains (*see the Income determination section for more information*).

Special Defence Contribution (SDC)

SDC is imposed only on non-exempt dividend income, 'passive' interest income, and rental income earned by Cyprus tax residents. Non-tax residents of Cyprus are exempt from SDC.

Dividends generally are exempt from SDC, subject to certain rarely applicable limitations (*see Dividend income in the Income determination section*).

Interest received by close-ended or open-ended collective investment schemes (CIS) is never subject to SDC as it is considered as 'active' interest income. Such interest is only taxed under CIT (after deducting allowable expenses) at the standard CIT rate of 12.5%.

Interest received by companies in the ordinary course of business, including interest closely connected to the ordinary course of business, is also considered as 'active' interest income and is only taxed under CIT (after deducting allowable expenses) at the standard CIT rate of 12.5%.

When companies receive interest that does not satisfy the conditions prescribed immediately above, the interest is considered to be 'passive' interest income, which is

Cyprus

subject to SDC (without expense deduction) at the rate of 30%. Such 'passive' nature interest is, however, exempt from CIT.

Gross rental income reduced by 25% is also subject to SDC at the rate of 3% in addition to CIT (after deducting allowable expenses) of 12.5%.

Tonnage tax

For ship-owning companies, the profits derived by the owner of a ship registered in the European Union or European Economic Area (EEA) (as well as other foreign jurisdictions, subject to conditions) from its operation/charter out are fully exempt from all direct taxes. The term 'owner' includes a bareboat charterer of a non-Cyprus flag vessel parallel registered in Cyprus. A similar exemption applies to charterers and ship managers.

Instead of CIT, ship owners, charterers, and managers pay tonnage tax on the net tonnage of the ships they own, charter, or manage. In addition, there is no tax on dividends paid at all levels of distribution by the above persons out of profits subject to tonnage tax and related capital gains on the sale of the ship and no capital gains tax on the sale or transfer of a ship, share in a ship, or shares in a ship-owning company. The same legislation also provides for income tax exemption of the salaries and benefits of the captain, the officers, and the crew aboard a Cyprus flag vessel.

This treatment applies until 2020 and is compulsory for Cyprus flag ship owners, but optional for other ship owners, charterers, and ship managers.

Local income taxes

There are no local government taxes on income in Cyprus.

Corporate residence

Only companies managed and controlled in Cyprus are treated as tax resident of Cyprus.

Permanent establishment (PE)

Cyprus domestic income tax legislation also explicitly provides for the determination of a taxable Cyprus PE of a non-Cyprus tax resident company. These specific legislative provisions are broadly in line with the relevant article of the OECD model treaty.

Other taxes

Value-added tax (VAT)

VAT is imposed on the provision of goods and services in Cyprus as well as on the acquisition of goods from the European Union and the importation of goods into Cyprus. Taxable persons charge VAT on their taxable supplies (output tax) and are charged with VAT on goods or services that they received (input tax).

The standard VAT rate in Cyprus is 19%. Two reduced VAT rates, a 9% rate and a 5% rate, apply in Cyprus:

- The reduced VAT rate of 9% applies on accommodation, restaurant and catering services, as well as on certain local passenger transport services. The term 'restaurant and catering services' includes the supplies of prepared and unprepared foodstuffs and beverages that are accompanied by sufficient support services that enable the immediate consumption of the foodstuffs and beverages supplied.
- The reduced rate of 5% applies on foodstuffs, pharmaceutical products, books and newspapers, as well as on a variety of other goods and services that are beyond the scope of this summary. The reduced rate of 5% also applies, subject to conditions, on

the sale of new buildings/houses to individuals/eligible persons, who will use them as their primary and main residences. The 5% reduced rate also applies to renovation and repair of all private residences that are considered as being old (i.e. a period of at least three years has elapsed from their first use), excluding the materials that comprise of more than 50% of the value of the services.

Exports from Cyprus are zero-rated (i.e. no VAT must be charged on the export, and the company is entitled to recover the relevant input VAT suffered). The services for the international transport of passengers as well as the transportation of goods either from or to countries outside the European Union are also zero-rated.

Supplies of goods to businesses resident in other EU member states are outside the scope of Cyprus VAT.

Certain education services, as well as the majority of financial, insurance, and medical services, are exempt from Cyprus VAT. Supplies of land and buildings also are exempt from VAT unless the supply relates to new buildings before first use.

VAT registration

VAT registration is compulsory for business with:

- turnover in excess of 15,600 euros (EUR) during the 12 preceding months or
- an expected turnover in excess of EUR 15,600 within the next 30 days.

Businesses with turnover of less than EUR 15,600, or with supplies that are outside the scope of VAT but for which the right to claim the amount of the related input VAT is granted, have the option to register on a voluntary basis.

An obligation for registration also arises for businesses that:

- make acquisitions of goods from other EU member states in excess of EUR 10,251.61 during any calendar year, or
- are engaged in the provision of intra-Community services or supplies of goods for which the recipient must account for VAT under the reverse-charge provisions. No registration threshold exists for the provision of intra-Community supplies of goods and services.

Furthermore, an obligation for VAT registration arises for businesses carrying out economic activities as a result of the receipt of services from abroad for which an obligation to account for Cyprus VAT under the reverse-charge provision exists, subject to the registration threshold of EUR 15,600 per any consecutive 12-month period.

Exempted products and services, and disposals of items of capital nature, are not taken into account for determining annual turnover for registration purposes.

Registration is effected by completing the appropriate application form.

VAT declaration and payment/return of VAT

VAT returns must be submitted quarterly, and the payment of VAT must be made by the tenth day of the second month that follows the month in which the VAT period ends.

VAT registered persons have the right to request for a different filing period. Approval of the VAT authorities is required. The VAT Commissioner also has the right to request for a taxable person to file one's VAT returns for a different period.

Where, in a quarter, input VAT is higher than output VAT, the difference is refunded (subject to certain conditions) or is transferred for set-off against the VAT payable of the next VAT returns.

Cyprus

Customs duties

Customs duties may be imposed upon the importation of goods into Cyprus. The customs duties are imposed in accordance with the provisions of the applicable legislation.

Whether customs duties are imposed depends on the nature of the goods and the respective customs duty codes.

Excise taxes

Excise taxes are imposed on certain products, including means of transport, petroleum, tobacco products, and alcoholic drinks.

Immovable property tax (IPT)

The owner of immovable property situated in Cyprus is liable to an annual IPT calculated on the market value of the property as at 1 January 1980. The varying rates, as noted in the table below, apply per owner, not per property.

Property value (as at 1 January 1980) (EUR)	Tax rate (‰)	Accumulated tax (EUR)
Up to 40,000 *	6	240
40,001 to 120,000	8	880
120,001 to 170,000	9	1,330
170,001 to 300,000	11	2,760
300,001 to 500,000	13	5,360
500,001 to 800,000	15	9,860
800,001 to 3 million	17	47,260
Over 3 million	19	

* Property owners whose property has a total value of EUR 12,500 or less (based on 1 January 1980 values) are exempt from IPT.

The IPT is payable by 30 September each tax year, based on the 1 January 1980 values of the immovable properties owned by a taxpayer on 1 January of the same tax year. A discount of 10% of the tax due is available if the tax is paid by 31 August each year.

Stamp duty

The general rule is that Cyprus stamp duty is imposed only on written instruments relating to assets located in Cyprus or to matters that will take place in Cyprus. The applicable rates are based on the value stipulated in each instrument and are nil for values up to EUR 5,000, 0.15% for values from EUR 5,001 up to EUR 170,000, and 0.2% for values above EUR 170,000, subject to an overall maximum amount of stamp duty of EUR 20,000. Exemption from stamp duty applies in the case of a qualifying reorganisation scheme.

Capital duty

Upon incorporation of a Cyprus company

Upon incorporation of a Cyprus company, capital duty is due on the authorised share capital at EUR 105 plus 0.6% of the authorised share capital. It is important to note that the 0.6% rate applies only to the nominal value of the authorised share capital and not to any share premium.

As for the issued share capital, there is no stamp duty payable if the shares are issued at their nominal value. There is a flat duty of EUR 20 if the shares are issued at any premium.

Upon subsequent increases

Upon subsequent increases, capital duty is due on the authorised share capital at 0.6% of the nominal value of the additional share capital. Again, the 0.6% rate applies only to the nominal value of the authorised share capital and not to any share premium.

As for the issued share capital, EUR 20 is due on every issue batch, whether the shares are issued at a premium or not and irrespective of the number of shares issued in the batch.

Capital gains tax

Capital gains tax only relates to gains relating to Cyprus-located immovable property. A 20% tax is imposed on gains arising from the disposal of immovable property situated in Cyprus or the disposal of shares of companies (other than companies whose shares are listed in any recognised stock exchange) that own such Cyprus-located immovable property. Further, as of 17 December 2015, shares of companies that indirectly own immovable property located in Cyprus, and at least 50% of the market value of the said shares derive from such immovable property, are subject to capital gains tax. In the case of disposal of company shares, the gain is calculated exclusively on the basis of the gain from the immovable property situated in Cyprus. The value of the immovable property will be its market value at the time the shares were disposed of.

The taxable gain is the difference between the disposal proceeds and the original cost of the property plus any improvements as adjusted for inflation up to the date of disposal on the basis of the consumer price index in Cyprus. In the case of property acquired before 1 January 1980, the original cost is deemed to be the value of the property as at 1 January 1980 on the basis of the general valuation conducted by the Land Registry Office under the Immovable Property Law.

Other expenses that relate to the acquisition and disposal of immovable property are also deducted from the gain, subject to certain conditions (e.g. interest costs on related loans, transfer fees, legal expenses).

Land and buildings acquired at market value (excluding exchanges and donations) from unrelated parties in the period 16 July 2015 to 31 December 2016 will be exempt from capital gains tax upon a future disposal.

Immovable property transfer fees

The fees charged by the Department of Land and Surveys to the acquirer for transfers of immovable property are as follows:

Market value (EUR)	Rate (%)	Fee (EUR)	Accumulated fee (EUR)
Up to 85,000	3	2,550	2,550
85,001 to 170,000	5	4,250	6,800
Over 170,000	8		

Subject to conditions, (i) the above transfer fees do not apply if the transaction is subject to VAT, or (ii) the above transfer fees are reduced by 50% for any immovable property, in cases where the transfer takes place by 31 December 2016 irrespective of the date of the signing of the contract or its date of submission to the Land Registry, or where the contract was signed and submitted to the Land Registry between the period 2 December 2011 and 31 December 2016 irrespective of the transfer date.

In the case of free transfers of property, the transfer fees are calculated on the value of the property as follows:

- From parents to children: Nil.
- Between spouses: 0.1%.

Cyprus

- Between third-degree relatives: 0.1%.
- To trustees: EUR 50.

'Value' in these cases refers to values as at 1 January 2013.

Mortgage registration fees are 1% of the current market value.

In the case of companies' reorganisations, transfers of immovable property are not subject to transfer fees or mortgage registration fees.

Payroll taxes

In addition to the responsibility to withhold from earnings employees' contributions to the social insurance fund and employees' Special Contribution (see below), employers must also withhold employees' personal income tax (PIT) burden through the pay-as-you-earn (PAYE) system.

Social security contributions

Employed persons are compulsorily insured under a state-administered social insurance fund. Contributions to the fund are borne by both employer and employee. The employer's contributions are calculated as a percentage of the employee's earnings. The employer also contributes to other funds as set out in the table below:

Funds	Employer contribution (% of employee's earnings) (1)
Social insurance fund	7.8 (2, 3)
Redundancy fund	1.2
Training development fund	0.5
Social cohesion fund	2.0
Holiday fund (if not exempt)	8.0

Notes

1. With the exception of the social cohesion fund, the maximum amount of monthly earnings on which the contributions are paid is EUR 4,533 for 2016. This maximum is usually adjusted for inflation annually at the beginning of each calendar year.
2. The rate of 7.8% is applicable up to 31 December 2018.
3. The employee must also contribute at the same rate as the employer to the social insurance fund, but not to the other funds. It is the employer's responsibility to withhold this contribution upon payment of employee's earnings.

Special Contribution

For 2014 through 2016, the following Special Contributions are payable on the gross monthly earnings and pensions of private sector employees, on profits of self-employed individuals, and on private sector pensions from work/business within Cyprus:

Gross monthly emoluments from private sector employment/profits of self-employment/pension (EUR)	Contribution (%) (1)	Monthly accumulated tax (EUR)
0 to 1,500	0	0
1,501 to 2,500	2.5 (minimum EUR 10)	25
2,501 to 3,500	3.0	55
Over 3,500	3.5	

Notes

1. In the case of employed individuals, the employer is liable for half the Special Contribution and the employee for the other half. It is the employer's responsibility to withhold this contribution upon payment of employee's earnings.

Branch income

The rate of tax on Cyprus branch profits is the same as on corporate profits (12.5%). No further tax is withheld on transfers of profits or funds to a foreign head office.

Income determination

Inventory valuation

Inventories generally are stated at the lower of cost and net realisable value. Last in first out (LIFO) is not permitted for taxation purposes. First in first out (FIFO) is permitted. Conformity between book and tax reporting is not required.

Capital gains

Profits from disposals of corporate 'titles' are unconditionally exempt from income tax. 'Titles' is defined as shares, bonds, debentures, founders' shares, and other titles of companies or other legal persons incorporated in Cyprus or abroad and options thereon. According to a circular issued by the Cyprus tax authorities, the term includes, *inter alia*, futures/forwards on titles, short positions on titles, swaps on titles, depositary receipts on titles, repos on titles, units in open or close CISOs, international collective investment schemes (ICISs), undertakings for collective investment in transferable securities (UCITSs), investment trusts and funds, mutual funds, real estate investment trusts (REITs), and units in stock exchange indices on titles.

Capital gains on Cyprus-located immovable property (and on non-quoted shares directly or indirectly holding such Cyprus-located immovable property) are taxed separately in Cyprus. *See Capital gains tax in the Other taxes section for more information.*

For capital gains on IP, see Intellectual property (IP) regime in the Tax credits and incentives section.

Dividend income

Dividends received from other Cyprus tax resident companies are exempt from all taxes, subject to certain anti-avoidance provisions.

Dividends earned from foreign investments are exempt from CIT in Cyprus with the exception, as of 1 January 2016, of dividends that are deductible for tax purposes for the paying company. Such foreign dividends are exempt from SDC. Other foreign dividend income is also exempt from SDC unless:

- more than 50% of the foreign paying company's activities directly or indirectly result in investment income, and
- the foreign tax is significantly lower than the tax burden in Cyprus (i.e. an effective tax rate of less than 6.25%).

Where the above mentioned Cyprus participation exemption on foreign dividend income is not available, any foreign withholding tax (WHT) imposition on dividends paid to the Cyprus company will be credited against the Cyprus flat SDC rate of 17% on such dividends. Furthermore, in some cases, a credit for the underlying tax will also be granted.

Stock dividends

A Cyprus corporation can distribute tax-free dividends of common stock (bonus shares) proportionately to all common stock shareholders.

Interest income

See Special Defence Contribution (SDC) in the Taxes on corporate income section for a description of the tax treatment of interest income.

Cyprus

Rental income

See *Special Defence Contribution (SDC) in the Taxes on corporate income section* for a description of the tax treatment of rental income.

Foreign currency exchange (forex) differences

With effect from 1 January 2015, forex differences are tax neutral for CIT purposes (i.e. all forex gains are not taxable and all forex losses are not deductible), with the exception of forex differences arising from trading in foreign currencies (and related derivatives), which remain subject to tax.

Foreign income

Resident corporations are subject to tax on their worldwide income. However, foreign-branch income (*see below*), as well as most dividend income from abroad (*see Dividend income above*), is exempt from taxation in Cyprus.

Profits from a branch/PE abroad are exempt from CIT. This exemption is always applicable, unless:

- more than 50% of the foreign PE's activities directly or indirectly result in investment income and
- the foreign tax on the income of the foreign PE is significantly lower than the tax burden in Cyprus (i.e. an effective tax rate of less than 6.25%).

Losses from a branch/PE abroad are eligible to be offset with other profits of the Cyprus company in Cyprus (and via group relief, *see the Group taxation section*). In such a case, future profits of an exempt branch/PE abroad become taxable up to the amount of losses previously allowed.

Where foreign income is taxed in Cyprus, double taxation is avoided through unilateral relief (by giving credit for foreign taxation) or by treaty relief. This credit may not exceed the Cyprus taxes imposed on the same income.

Deductions

Generally, expenditure wholly and exclusively incurred for the generation of taxable income is deductible against the company's taxable income. Such expenditure should be supported by invoices and relevant receipts or other supporting documents.

Depreciation and amortisation

For tangible assets, depreciation is computed on a straight-line basis at set rates that vary, depending on the type of asset. On the sale of such depreciated property, tax depreciation may be recaptured and taxed as ordinary income, depending upon the level of sale proceeds.

Property and equipment acquired during the tax years 2012 through 2016 will be eligible to claim accelerated tax depreciation at the rate of 20% *per annum* (excluding assets that are already eligible for a higher annual rate of tax depreciation).

In case of industrial and hotel buildings that are acquired during the tax years 2012 through 2016, tax depreciation at the rate of 7% *per annum* may be claimed.

Any expenditure of a capital nature for the acquisition or development of qualifying IP is claimed as a deduction in the tax year in which it was incurred and in the immediate four following years on a straight-line basis (*see Intellectual property [IP] regime in the Tax credits and incentives section*).

Goodwill

Any amounts paid for the acquisition of trading goodwill should be deductible upon the subsequent sale of such trading goodwill.

Start-up expenses

Start-up expenses, such as formation expenses, are generally not tax deductible in the computation of the company's taxable income.

Research and development (R&D) expenses

Any expenditure on scientific research of a capital nature for which no tax depreciation is granted is deductible from taxable income and spread equally over the year in which it has been incurred and the five subsequent years. Scientific research expenditure of a revenue nature is deducted in the year incurred.

See Intellectual property (IP) regime in the Tax credits and incentives section as well.

Interest expenses

Generally, interest expenses incurred by the company for the generation of its taxable income should be deductible in the company's tax computation.

Interest financing assets that generate tax-exempt income is not deductible in the first seven years of ownership of such assets. Interest expense associated with such assets held beyond seven years becomes tax deductible from thereon.

Interest expense financing the acquisition of 100% shareholdings in subsidiaries that are directly or indirectly trading is deductible, provided that the acquisition was made on or after 1 January 2012.

See the Significant developments section in relation to a proposed EU Anti-Tax Avoidance Directive.

Bad debts

Bad debts of any business should generally be deductible, provided they are write-offs/provisions against specific trading receivables and the taxpayer can evidently prove that sufficient steps were taken beforehand to recover them.

Charitable contributions

Charitable donations or contributions made for educational, cultural, or other charitable purposes to the Republic of Cyprus (including local authorities), or to approved charitable institutions, are wholly deductible, provided that these expenses are supported with relevant vouchers.

Fines and penalties

Fines and penalties are generally not deductible in the computation of the taxable income of the company.

Taxes

Taxes that are deducted in computing profits for CIT purposes include VAT not recovered and the employer's share of contributions to the social insurance and other funds, as well as the Special Contribution.

Net operating losses

Tax losses can be carried forward (from the end of the tax year in which the loss occurred) and set-off against taxable profits of the next five years. Carryback of tax losses is not permitted. Under certain conditions, they may also be eligible for group relief (*see the Group taxation section*).

Payments to foreign affiliates

A Cyprus corporation can claim a deduction for royalties and interest charges paid to foreign affiliates, and a reasonable amount of head office expenses of an overseas company, provided such expenditures can be justified as having been incurred in the production of the income and subject to the rules generally applicable for the deduction of such expenditure.

In the case of insurance companies, the amount of head office expenses should not exceed 3% of the net premiums in Cyprus for the general insurance business and 2% for the life insurance business.

Group taxation

Group relief provisions allow, subject to certain conditions, companies of the same group to transfer tax losses from loss-making group companies to profitable group companies. A group includes a Cyprus company directly or indirectly holding at least a 75% interest in another Cyprus company or two or more Cyprus companies directly or indirectly held at least 75% by a third company.

As of 1 January 2015, the interposition of a non-Cyprus tax resident company(ies) will not affect the eligibility for group relief as long as such company(ies) is tax resident of either an EU country or a country with which Cyprus has a DTT or an exchange of information agreement, bilateral or multilateral.

Further, as of 1 January 2015, a Cyprus tax resident company may also claim the tax losses of a group company that is tax resident in another EU country, provided such EU company firstly exhausts all possibilities available to utilise its losses in its country of residence or in the country of any intermediary EU holding company.

Transfer pricing

Transactions between related parties should be carried out at pure commercial terms (i.e. at arm's length). If not carried out at pure commercial terms, the Cyprus tax authorities have the powers within the tax legislation to adjust results for tax purposes to those that would apply at pure commercial terms. Therefore, it is strongly recommended that the taxpayer be able to support the arm's-length nature of transactions.

The Cyprus tax authorities have communicated that the transfer of shares of companies within a group at a value different than the market value should not have any adverse Cyprus tax implications in certain circumstances.

Thin capitalisation

There are no thin capitalisation provisions in the Cyprus tax law.

See the Significant developments section in relation to a proposed EU Anti-Tax Avoidance Directive.

Controlled foreign companies (CFCs)

There are no CFC provisions in the Cyprus tax law.

See the Significant developments section in relation to a proposed EU Anti-Tax Avoidance Directive.

Tax credits and incentives

Foreign tax credit

See Foreign income in the Income determination section for a description of the foreign tax credit regime.

The Cyprus holding company

The exemptions for dividends received from abroad (see Dividend income in the Income determination section), foreign PE trading profits (see Foreign income in the Income determination section), and profits from transactions in titles (see Capital gains in the Income determination section), together with the fact that Cyprus does not withhold taxes on dividend, interest, and royalty (unless right is used in Cyprus) payments made abroad, and its extensive DTT network, as well as full adoption and access to all EU Directives, make Cyprus an ideal 'holding company' EU jurisdiction.

The Cyprus financing company

The low CIT rate of 12.5% imposed on interest incomes, coupled with acceptable thin spreads under certain conditions, make Cyprus a very competitive 'financing company' EU jurisdiction.

Notional interest deduction (NID) rules

New equity introduced to a company as of 1 January 2015 in the form of paid-up share capital or share premium may be eligible for an annual deduction for tax purposes.

New equity may be contributed in cash or in assets in kind. Notional interest on equity is tax deductible for tax purposes in a similar manner as for actual interest expense (see the Deductions section for more information); it cannot, however, exceed 80% of the taxable profit generated by the activities financed by the new equity (as calculated prior to the NID). Any NID deduction that is restricted due to the cap of 80% is not available to be utilised by way of carryforward to future tax years or otherwise.

The NID interest rate is the yield on ten-year government bonds (as at 31 December of the prior tax year) of the country where the funds are employed in the business of the company plus a 3% premium. This is subject to a minimum amount, which is the yield of the ten-year Cyprus government bond (as at the same date) plus a 3% premium, accordingly, the minimum NID interest rate is 6.685% for 2016 (8.037% for 2015).

In order to tackle possible abuse of the NID, the NID provisions include specific anti-avoidance provisions and a general anti-avoidance provision for non-commercial transactions.

Intellectual property (IP) regime

The income tax law provides for generous exemptions from tax of income related to IP.

More specifically:

- 80% of any income generated from owned IP (net of any direct expenses) is exempt from CIT
- 80% of profit generated from the disposal of owned IP (net of any direct expenses) is exempt from CIT
- the definition of IP includes copyrights, patents, and trademarks
- registrable IPs need not be registered in Cyprus to benefit from this IP regime, and
- any expenditure of a capital nature for the acquisition or development of IP can be claimed as a deduction in the tax year in which it was incurred and the immediate four following years on a straight-line basis.

Cyprus

The Cyprus MoF announced on 30 December 2015 that it will propose amendments to the current Cyprus IP Box in order to introduce a new IP Box as of 1 July 2016, which will be fully aligned with the conclusions of the OECD's BEPS Action 5 conclusions.

Per the MoF announcement, Cyprus intends to provide for the maximum possible transitional arrangements. It is therefore expected that IP already benefiting from the current Cyprus IP Box by 30 June 2016 will continue to receive the current benefits for a further five years (i.e. until 30 June 2021). A much shorter transitional period to 31 December 2016, however, is expected in the case of IP that is directly or indirectly acquired from related parties at any time in the first six months of 2016, where the IP was not already benefiting from an IP Box.

Although not referred to in the MoF announcement, it is expected that the planned new Cyprus IP Box will retain the benefit of the competitive 80% exemption but only a portion of income may qualify. The qualifying portion of the income is expected to reflect the R&D expenditure undertaken by the IP owner itself (or outsourced to unrelated parties) as compared to the total R&D expenditure required to develop the asset.

In line with BEPS Action 5 recommendations, it is expected that Cyprus will spontaneously exchange information (under existing international agreements) on taxpayers who benefit from the transitional arrangements of the current IP Box if the IP entered the current IP Box in the period 7 February 2015 to 30 June 2016.

Exemption from capital gains tax on acquired Cyprus immovable property

Land and land with buildings acquired at market value (excluding exchanges and donations) from unrelated parties in the period 16 July 2015 to 31 December 2016 will be exempt from capital gains tax upon a future disposal.

The Cyprus Alternative Investment Funds (AIFs) and undertakings for collective investment in transferable securities (UCITSs)

The sole objective of AIFs and UCITSs is the collective investment of funds of the investors/unitholders.

AIFs and UCITSs are liable to tax or not depending on their legal status.

Under certain conditions, management fees charged for the management of AIFs and UCITSs funds can be exempt from VAT.

AIFs

AIFs can take the following types and legal forms:

AIF types

- Limited number of investors (75).
- Unlimited number of investors.

AIF legal forms

Limited number of investors:

- Variable capital company (VCC).
- Fixed capital company (FCC).
- Limited partnership (LP).

Unlimited number of investors:

- VCC.

- FCC.
- LP.
- Common fund (CF).

UCITSS

UCITSS can take the following legal forms:

- CF.
- VCC.

C

Withholding taxes

Cyprus does not levy a WHT on dividends, interests, and royalties paid to non-residents of Cyprus except in the case of royalties earned on rights used within Cyprus, which are subject to WHT of 10% (5% in the case of cinematograph films). Such Cyprus WHT on royalties for rights used within Cyprus may be reduced or eliminated by DTTs entered into by Cyprus or by the EU Interest and Royalty Directive as enacted in the Cyprus tax legislation.

WHT on other types of income

Cyprus levies a 10% WHT on technical services performed by non-residents in Cyprus. However, no such WHT is levied if such services are performed via a PE in Cyprus or between 'associated' companies as defined by the EU Interest and Royalty Directive as enacted in the Cyprus tax legislation.

Cyprus also levies a 10% WHT on the gross income/receipts derived from the exercise in Cyprus by a non-resident individual of any profession or vocation and the remuneration of non-resident public entertainers (e.g. theatrical, musical, football clubs, other athletic missions).

Further, with effect from 1 January 2016, a 5% WHT is levied on gross income derived from within Cyprus by non-residents relating to extraction, exploration, or use of the continental shelf, as well as the establishment and use of pipelines and other installations on the ground, on the seabed, and on the surface of the sea, where there is no local PE.

WHT on dividend, interest, and royalties table

In the table below, we illustrate the applicable Cyprus WHT rates outbound for dividend, interest, and royalty payments.

Recipient	WHT (%)			
	Dividends (1)	Interest (1)	Royalties rights not used within Cyprus	Royalties rights used within Cyprus

United States	0	0	0	0

Notes

- Under Cyprus legislation, there is no WHT on dividends and interest paid to non-residents of Cyprus.
- Royalties earned on rights used within Cyprus are subject to WHT of 10% (except royalties relating to cinematographic films, where the WHT rate is 5%).
- A WHT rate of 5% is applicable on cinematographic films, including films and videotape for television.

4. 0% on literary, dramatic, musical, or artistic work (excluding motion picture films and works on film or videotape for use in connection with television).
5. The WHT rate of 5% is applicable on cinematographic film royalties.
6. 5% WHT applies for any copyright of literary, dramatic, musical, artistic, or scientific work.
7. Bosnia, Montenegro, and Serbia apply the Yugoslavia/Cyprus treaty.
8. A 5% WHT will be levied on payment of royalties in respect of any copyright of scientific work, any patent, trademark, secret formula, process, or information concerning industrial, commercial, or scientific experience and cinematographic films.
9. The Cyprus-Czechoslovakia treaty applies with the Slovak Republic.
10. 5% rate applies for patents, trademarks, designs or models, plans, secret formulas, or processes, or any industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
11. 10% for patent, trademark, design, or model, plan, secret formula or process, computer software or industrial, commercial, or scientific equipment, or for information concerning industrial commercial, or scientific experience.
12. The treaty is effective as of 1 January 2016.
13. The treaty with Bahrain was signed on 9 March 2015, and entered into force on 26 April 2016. It is effective as of 1 January 2017.
14. The treaty with Georgia was signed on 13 May 2015, and entered into force on 4 January 2016. It is effective as of 1 January 2017.

Tax administration

Taxable period

In Cyprus, the tax year is the calendar year.

Tax returns

Business organisations are required to prepare audited accounts based on generally accepted auditing standards. Tax returns are completed based on these accounts on a calendar-year basis.

Electronic submission

Companies should be registered online and submit their annual tax returns electronically. In this respect, the submission deadline of the 2016 corporate tax return is 31 March 2018.

Payment of tax

Corporate entities must pay provisional tax on the current year's income. Such provisional tax payment is made in two equal instalments on 31 July and 31 December of the tax year. A final balancing payment must be made on or before 1 August of the following year on a self-assessment basis to bring the total payments of tax to the total actually due according to the tax return.

Tax audit process

The Cyprus tax process is one of self-assessment. Following the filing of a tax return, the Cyprus tax authorities have six years from the end of the relevant tax year to raise an enquiry (12 years in cases of established fraud or wilful default). These can range from simple information requests to detailed technical challenges over treatments adopted in the tax return.

Any enquires are often conducted between the taxpayer and the Cyprus tax authorities by exchange of information via correspondence and meetings. Where agreement cannot be reached, litigation may be necessary.

A taxpayer may also proactively request that the Cyprus tax authorities review the company's 'open' tax years if the taxpayer requires a tax clearance certificate (e.g. upon commencement of voluntary liquidation).

For companies in a tax-loss position per the self-assessment return, the Cyprus tax authorities are not restricted to the above mentioned six-year (or 12-year) period; however, outside of this period, any adjustments may only reduce or nullify a loss.

Cyprus

Topics of focus for tax authorities

Tax authorities generally focus on the tax statements being computed based on generally accepted auditing standards prepared and audited financial statements and on the principles of taxation as per the tax laws and their issued circulars.

Other issues

Business combinations

Transfers of assets and liabilities between companies can occur without tax implications within the framework of a tax-exempt qualified reorganisation. Reorganisations include mergers, demergers, partial divisions, transfers of divisions of activities, exchanges of shares, and transfers of registered office of a European company (SE) or a European cooperative company (SCE).

Intergovernmental agreements (IGAs) and cooperation

Alongside DTTs, Cyprus is a signatory to the OECD/Council of Europe Convention on Mutual Administrative Assistance in Tax Matters and is an early adopter of the CRS on automatic exchange of information. Cyprus has also signed an IGA with the United States for the United States (US) Foreign Account Tax Compliance Act (FATCA) initiative on automatic exchange of information.

Cyprus, as a member state of the European Union, incorporates all EU Directives in its domestic Laws.

Cyprus is in cooperation with the European Commission regarding the EC's recent focus into fiscal state aid and tax rulings. To date, the EC has not raised any specific investigations regarding Cyprus.

**C**

Significant developments

Changes were made to the value-added tax (VAT) legislation. As of 1 January 2016, the local reverse-charge mechanism will also be applied for transfer of real estate (immovable property) in cases where the option to tax is chosen.

From January 2016, all VAT payers registered in the Czech Republic have to start submitting a new detailed report, a so-called 'control statement'. This concerns all Czech VAT payers if they received or performed taxable supplies with place of supply in the Czech Republic. This report is not a substitute for the regular VAT return.

Start-up expenses incurred after 1 January 2016 are no longer recognised as intangible assets and are instead directly deductible expenses. Start-up expenses incurred in previous periods remain under the original regime.

Taxes on corporate income

Corporate income tax (CIT) applies to the profits generated by all companies, including branches of foreign companies. Corporate partners in general partnerships (i.e. unlimited) and corporate general partners (i.e. unlimited) in a limited partnership are subject to CIT on their share of the profits in the partnership.

Czech resident companies are required to pay CIT on income derived from worldwide sources. Non-resident companies are required to pay CIT on income sourced in the Czech Republic.

The 19% CIT rate applies to all business profits, including capital gains from the sale of shares (if not exempt under the participation exemption regime).

There is a special tax rate of 15% levied on dividend income of Czech tax resident entities from non-resident entities (unless subject to participation exemption).

A 5% CIT rate applies to income of defined investments, and a 0% CIT rate applies to pension funds.

Local income taxes

There are no local income taxes in the Czech Republic.

Corporate residence

A company is resident in the Czech Republic for CIT purposes if it is registered in, or has a place of management located in, the Czech Republic.

Czech Republic

Permanent establishment (PE)

Under domestic law, the creation of a PE of a foreign tax resident in the Czech Republic is triggered by a fixed place available for carrying out business activities, long-term provision of services (for more than six months in any 12 consecutive months), or presence of a dependent agent, unless an applicable double taxation treaty (DTT) stipulates otherwise. For interpretation purposes, the Organisation for Economic Co-operation and Development (OECD) Model Tax Commentary is followed. The Czech Republic tends to have a service PE clause included in its DTTs.

Other taxes

Value-added tax (VAT)

VAT is generally charged at 21% on the supply of goods and services within the Czech Republic. Certain supplies (such as groceries and accommodation, restaurant, and transport services) are taxed at a rate of 15%, and a second reduced rate of 10% is applicable for specified categories of goods (some medicaments, books, and baby food).

Exports are generally exempt from VAT with a credit. Some supplies are exempt without a credit, including the lease of real estate (with certain exceptions), financial and insurance services, radio and TV broadcasting, education, health, and welfare.

VAT registration

Companies seated in the Czech Republic whose turnover exceeds 1 million Czech korun (CZK) in any consecutive 12-month period must register as a VAT payer with the tax authorities.

For non-resident companies, there is no registration threshold, but they must register as a VAT payer if they:

- make any supply subject to Czech VAT (unless the liability to declare and pay VAT is shifted to the recipient of the supply), or
- supply goods from the Czech Republic to another European Union (EU) member state.

A company can register as a VAT payer voluntarily even if its turnover does not reach the threshold if it renders or is going to render taxable supplies or VAT exempt supplies with credit in the Czech Republic.

Under certain circumstances, companies not registered for VAT to whom VAT liability arises due to acquired goods or services become persons identified for VAT. A person identified for VAT only pays VAT from received supplies without being entitled to recover related input VAT in its VAT return.

VAT returns and payments

The VAT return must be filed and tax paid within 25 days after the end of the taxable period. The taxable period is a calendar month (or calendar quarter under certain circumstances). Effective from January 2016, all VAT payers registered in the Czech Republic will also have to start submitting a new report, a so-called 'control statement'. In the control statement, the VAT payers will have to give detailed evidence of data from invoices that have been issued and received, so that the Czech Financial Administration can compare and check transactions with business partners. The control statement does not substitute for a VAT return. Legal entities have to file the report every calendar month, and the deadline for submission of the control statement is no later than 25 days after the taxable period. Companies have to submit all VAT reports to the Czech tax authorities electronically.

Customs duties

The Czech Republic is an EU member state; consequently, the EU customs code applies.

Excise taxes

Excise tax is charged on the production or import of certain products, such as tobacco and tobacco products, wines, semi-products, spirits and pure ethanol, beer, fuel, and mineral oils.

Energy taxes

Energy tax is charged on natural gas and certain other gases, solid fuels, and on electricity sold to final customers in the Czech Republic.

Real estate tax

Real estate tax is payable annually by the owner of land or buildings. The amount of the tax is dependent on area, location, and usage of the land or buildings. Paved areas used for business purposes (such as concrete areas in logistics centres) are taxable, with taxpayers obligated to self-assess the tax. However, some areas (e.g. publicly accessible parking lands in shopping malls) are not taxable.

Real estate transfer tax

The real estate transfer tax rate is 4% and applies to the greater of the transaction price or the officially appraised value of the real estate transferred. The taxpayer is the buyer; however, in some cases, it may be the seller if the parties agree.

Stamp duties

There are no stamp duties in the Czech Republic. Certain business operations in which a notary has to be involved by operation of law are subject to notarial fee.

Payroll taxes

Employers (including economic employers and certain types of PEs) in the Czech Republic are obligated to submit monthly withholdings and an annual reconciliation in respect of their employees. The withholdings include personal income tax (PIT) plus solidarity surcharge and statutory social security and health insurance.

Social security and health insurance contributions

Employers contribute 34% of the employee's gross salary to the state health and social security funds. A cap on only the social security premium is available.

Road tax

Road tax is payable annually with respect to vehicles (including private vehicles) used for commercial purposes. Rates vary depending on engine capacity and vehicle size.

Branch income

A foreign company can trade in the Czech Republic through a Czech branch. A branch usually creates a Czech PE of the foreign entity for CIT purposes (depending on the character of the activities carried out through the branch). The basis of taxation is the same as for corporations (i.e. tax base is calculated as taxable revenues less tax-deductible costs). In some cases, it may be possible for taxpayers to negotiate with the tax authorities regarding the basis on which profits are attributed to the branch.

A branch is liable for tax on its attributable profits at the standard CIT rate.

Income determination

The starting point for the calculation of the CIT base is the accounting result as per the Czech accounting standards. The tax non-deductible costs are then added and non-taxable revenues deducted from the accounting result.

Czech Republic

Inventory valuation

Stock (i.e. inventory) is valued at cost. Czech legislation specifically provides for the use of the arithmetical average cost and first in first out (FIFO) methods to value stock. Last in first out (LIFO) and the replacement-cost methods (except for livestock) may not be used.

Capital gains

No separate capital gains tax is levied in the Czech Republic. Capital gains are included in the CIT base and taxed as ordinary income in the year in which they arise.

Capital gains from the sale of shares may be exempt from Czech taxation if all of the following conditions are met:

- The Czech or EU parent holds at least 10% of the shares of the subsidiary for at least 12 months.
- The subsidiary is a tax resident of the Czech Republic or another EU member state.
- Both the parent and the subsidiary have one of the legal forms listed in the Annex to the EU P/S directive.
- The parent or the subsidiary are not exempt from corporate taxation or may not choose to be exempt, and the tax rate applicable to their income is greater than 0%.

If the subsidiary is not a tax resident of the Czech Republic or another EU member state, the exemption may be applied, provided that the subsidiary is a tax resident of a country where there is a DTT in place with the Czech Republic, it has a legal form similar to a limited liability company or a joint stock company, it is subject to CIT at the nominal rate of at least 12% in a year when dividends are paid, and the time test of 10% for at least 12 calendar months is met. The time test may be met both prospectively and retrospectively.

Dividend income

Dividends received by Czech tax resident corporations from non-resident entities are subject to a special tax rate of 15%, unless exempt under the participation exemption regime *described below*.

Dividends paid by Czech tax resident corporations to Czech resident entities are subject to 15% final withholding tax (WHT), unless exempt under the participation exemption regime.

Dividends paid by Czech tax resident corporations to Czech non-resident entities are subject to 15% final WHT, unless exempt under the participation exemption regime or decreased under the relevant DTT. Dividends paid to entities that are residents of countries outside of the European Union and European Economic Area (EEA), and countries with which the Czech Republic does not have an enforceable DTT or tax information exchange agreement (TIEA), are subject to 35% WHT.

Participation exemption regime

Dividend income may be exempt from Czech taxation (i.e. WHT when a Czech company is paying dividends, CIT when a Czech company is receiving dividends) if all of the following conditions are met:

- The Czech or EU parent holds at least 10% of the shares of the subsidiary for at least 12 months.
- The subsidiary is a tax resident of the Czech Republic or another EU member state.
- Both the parent and the subsidiary have one of the legal forms listed in the Annex to the EU P/S directive.
- The parent or the subsidiary are not exempt from corporate taxation or may not choose to be exempt, and the tax rate applicable to their income is greater than 0%.

Regarding dividends paid, provided that conditions above are met, the exemption also applies when dividends are paid by a Czech subsidiary to Switzerland, Norway, or Iceland.

Regarding dividends received, if the subsidiary is not a tax resident of the Czech Republic or another EU member state, exemption on dividends received by a Czech resident may be applied, provided that the subsidiary is a tax resident of a country where a DTT with the Czech Republic is in place, it has a legal form similar to a limited liability company or a joint stock company, it is subject to CIT at the nominal rate of at least 12% in a year when dividends are paid, and the time test of at least 10% for at least 12 consecutive calendar months is met.

C

Interest and royalty income

Interest and royalties received by Czech tax residents are included in the standard tax base subject to the 19% CIT rate.

Czech-source interest and royalty income received by Czech tax non-residents is subject to 15% WHT, unless subject to domestic exemption or a DTT stipulates otherwise. Interest and royalties paid by Czech tax residents to entities that are residents of countries outside of the European Union and European Economic Area, and countries with which the Czech Republic does not have an enforceable DTT or TIEA, are subject to 35% WHT.

Under domestic law, interest and/or royalty income is exempt if it is paid by a Czech resident to an EU resident recipient who is a beneficial owner of the interest and/or royalty income, provided that for at least 24 months before the payment:

- the payer is in at least a 25% parent-subsidiary or at least a 25% direct sister relation to the recipient of the income and
- the interest and/or royalty is not attributable to a Czech PE of the recipient.

The exemption is applicable subject to approval by the tax authorities.

Exchange gains and losses

Realised foreign exchange gains and losses are accounted for in profit and loss accounts and represent taxable revenues or tax-deductible costs, respectively. The same treatment applies to unrealised foreign exchange differences; however, there are court cases dated 2012 concluding that unrealised foreign exchange income is not taxable as it is only virtual income rather than a real increase of the taxpayer's property.

The default functional currency is the Czech koruna. A Czech company cannot opt for any foreign currency to be the functional currency for tax purposes.

Foreign income

Companies resident in the Czech Republic are taxed on their worldwide income. A Czech corporation is taxed on its foreign branch income when earned (accrual basis) and on foreign dividends when approved by general meeting.

The participation exemption regime *described above* may be applicable.

There is no controlled foreign company (CFC) legislation in the Czech Republic.

Deductions

Depreciation and amortisation

Methods of tax depreciation are prescribed by tax legislation and are independent from depreciation methods for accounting purposes. Tax depreciation is calculated

Czech Republic

on an asset-by-asset basis, applying the straight-line or accelerated basis methods of depreciation at statutory rates. Under both methods, depreciation expense in the first year is lower than for subsequent years. The company may choose which method to apply to a new asset, but once the choice is made, it cannot be altered. All assets are classified into six groups, which determine the number of years over which the asset will be written off, as follows:

Depreciation group	Assets	Minimum depreciation period (years)
1	Office machines and computers, tools	3
2	Engines, motor vehicles, machines, audio-visual equipment	5
3	Elevators, escalators, turbines, air conditioning equipment, electric motors, and generators	10
4	Buildings made of wood and plastic, long-distance lines, and pipes	20
5	Buildings (except for those listed in groups 4 and 6), roads, bridges, tunnels	30
6	Administrative buildings, department stores, historical buildings, and hotels	50

'Tangible assets' (i.e. assets that are subject to tax depreciation) are defined by tax legislation generally as assets with economic useful lives of greater than one year and acquisition prices higher than CZK 40,000. Certain assets, such as buildings, are always considered tangible assets.

Taxpayers are generally not obligated to depreciate a tangible asset for tax purposes every year. Depreciation may be interrupted in any year and continued in a later year without a loss of depreciation potential.

Tangible assets are generally depreciated by the taxpayer with ownership title. Certain exceptions apply, for instance, technical appreciation of a rented asset carried out by a tenant may be depreciated by that tenant, subject to certain conditions.

Depreciation can start only once the assets are put into use and comply with the requirements of specific laws.

Certain assets have special depreciation methods (e.g. moulds are depreciated based on expected life or number of products).

The value to be used as the basis for tax depreciation depends on how the asset is acquired, for example:

- Acquisition cost (construction and equipment costs, architect fees, legal fees, notary's fees, etc.) if the asset is acquired for consideration.
- Internal costs incurred if the asset is acquired or produced internally.

'Intangible assets' are defined by tax legislation as software, valuable rights, intangible results of research and development (R&D), and other assets regarded as assets for accounting purposes, provided that they:

- were acquired from a third party or developed internally for the purpose of trading with them
- have an acquisition price of more than CZK 60,000, and
- have a useful life of greater than one year.

Intangible assets are amortised for tax purposes based on the number of years that the taxpayer has a licence for the assets if the licence is for a limited number of years.

Otherwise, amortisation for tax purposes will vary depending on the asset (e.g. software is amortised over 18 months, results of R&D is amortised over 36 months).

Goodwill

Goodwill arisen as a result of the purchase of a business (or its part) as a going concern may be evenly amortised for 180 months. Any other goodwill (e.g. arisen within a merger) is disregarded for tax purposes.

Start-up expenses

Start-up expenses incurred in 2016 and after are directly deductible expenses and are no longer recognised as intangible assets.

Start-up expenses incurred before 2016 and exceeding CZK 60,000 with a useful life of more than one year accounted in line with Czech generally accepted accounting principles (GAAP) should be amortised evenly over a period of 60 calendar months.

Interest expenses

Interest as accrued and duly accounted for under Czech GAAP is generally tax deductible, with the following exceptions:

- Interest disallowed based on the thin capitalisation restriction (*please refer to Thin capitalisation in the Group taxation section*).
- Interest disallowed for its relation to income that is tax exempt or taxed outside the standard tax base.
- Interest disallowed due to its relation to holding a subsidiary.
- Profit-dependent interest.

Bad debt

Doubtful or bad receivables that have not yet become statute-barred may be provisioned for under special rules. Generally, provisions may be created for trade receivables overdue for more than 18 months. Provisions of 100% may be created for debts overdue for 30 months. For receivables, banks, insurance companies, and defined financial institutions have their specific system for provisioning.

Charitable contributions

Certain charitable donations are deductible. The minimum deductible donation is CZK 2,000 and the maximum deductible donation is 10% of the tax base.

Travel expenses and meal allowances

Payments for travel expenses and meal allowances that are made to employees are tax-deductible, but only within the statutory limits.

Fines and penalties

Contractual fines and penalties are generally tax deductible on a cash basis. Non-contractual fines are not tax deductible.

Taxes

Road tax, real estate tax, and most other taxes, with the exception of income taxes, are deductible, as are social security contributions paid by an employer with respect to employees.

Other significant items

Fees paid to members of other statutory bodies of companies (i.e. board of directors of joint stock companies and cooperatives) for their services are deductible for tax purposes.

Czech Republic

Net operating losses

Losses incurred in a tax year may be carried forward to offset taxable profits generated in the following five tax years. Losses may not be carried back. The possibility to utilise tax loss carried forward has been extended even to cross-border mergers (subject to certain limitations).

Payments to foreign affiliates

Generally, deductions may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length.

Group taxation

Currently, the Czech Republic does not permit group taxation. Each company in a group is taxed individually. Consolidated tax base applies only for the general partners and their shares in profit of their general partnership.

Transfer pricing

For tax purposes, prices agreed between related parties have to meet the definition of the arm's-length principle, and these prices are often subject to tax audits by tax authorities. The consequences of incorrect transfer pricing adjustments are tax exposure and penalties. In the case of companies receiving investment incentives, incorrect transfer pricing can cause a loss of the investment incentives. Generally, pricing methods as described in OECD guidelines should be followed.

Although there is no legal requirement to keep transfer pricing documentation, in practice it is strongly recommended to keep it as the taxpayer bears the burden of proof upon challenge of prices by tax authorities.

Taxpayers may request the tax administrators to issue an advance pricing agreement (APA) regarding progressing or future transactions between related parties.

Thin capitalisation

Thin capitalisation rules apply in the Czech Republic and may limit the tax deductibility of interest payments on debt financing from related parties as well as in certain cases from third parties (e.g. back-to-back financing with a bank interposed between two related parties).

Below is a brief summary of the thin capitalisation rules:

- The tax-deductibility test applies not only to interest but also to all so-called 'financial costs' on loans (e.g. interest plus other related costs, such as bank fees).
- Thin capitalisation applies only to related-party loans.
- The debt-to-equity ratio for related-party loans is 4:1 (6:1 for financial services industry), i.e. interest on such part of the related-party loans by which the principal of these loans exceeds four times the accounting equity (based on Czech GAAP) of the borrower is tax non-deductible.
- Unrelated-party loans (e.g. bank loans) guaranteed by a related party are not considered related-party loans for thin capitalisation purposes. If, however, a bank provides a back-to-back loan to a Czech entity where the loan is provided to the bank by a related party, such a bank loan to the Czech entity is considered a related party loan.
- Interest on profit-participating loans is not deductible for tax purposes.

Controlled foreign companies (CFCs)

There is no CFC legislation in the Czech Republic.

Tax credits and incentives

Foreign tax credit

Foreign tax credits are available only under tax treaties. If credit is not available under a treaty, CIT paid abroad may be deducted as an expense in the following year, provided it is imposed on the income included in Czech taxable income.

Investment incentives

Investment incentives are available only to Czech entities (including Czech subsidiaries of foreign companies). Incentives include income and real estate tax relief, financial support for the creation of new jobs, financial support for training or retraining of employees, cash grant on capital expenditures, and a transfer of land at a specially reduced price.

Investment incentives are available in the manufacturing industry and also for support of technology centres, strategic services, data centres, and customer support centres.

Research and development (R&D) allowance

Up to 100% of specific R&D expenses (or costs) incurred in a given tax year may be deducted from the tax base as a special tax allowance. These costs are deducted twice for tax purposes: once as a normal tax-deductible cost and then again as a special tax allowance. An additional 10% may be applied as an allowance from the difference by which the current year qualifying costs exceed those of the prior period.

The following costs can be included in the R&D tax allowance:

- Direct costs (e.g. personnel costs of R&D engineers, consumed materials).
- Tax depreciation of fixed assets used for R&D activities.
- Other operational expenses directly related to the realisation of R&D activities (e.g. telecommunications fees, electricity, water, gas).

Only qualifying expenses are deductible for tax purposes and must be separately identified from other expenses (or costs). This allowance does not apply to costs of purchased services or intangible results of R&D acquired from other entities, except for expenses (or costs) incurred from an R&D organisation. In addition, expenses that were supported from public sources are also excluded.

Any non-utilised R&D allowance may be carried forward for three subsequent years.

A taxpayer may request a binding ruling with respect to R&D costs from the respective tax office in the event that the taxpayer is unsure of whether certain R&D costs are eligible for the allowance.

Withholding taxes

Czech corporations are required to withhold tax on payments of dividends, interest, and royalties as follows:

Recipient	Dividend (%) (1)	Interest (%) (2)	Royalties (%) (3)
Resident corporations	15	0	0
Resident individuals	15	0	0
Non-resident corporations and individuals:

Notes

1. The lower rate applies if the recipient is a company that owns at least a certain amount of the capital or a certain amount of the voting shares of the company paying the dividend directly. Non-treaty residents: Dividends paid to residents of countries outside of the European Union and European Economic Area, and countries with which the Czech Republic does not have an enforceable DTT or TIEA, are subject to 35% WHT.
2. The lower rate applies mostly in situations when the interest is received by the government or a state-owned institution or is paid by the government. Non-treaty residents: Interest paid to residents of countries outside of the European Union and European Economic Area, and countries with which the Czech Republic does not have an enforceable DTT or TIEA, is subject to 35% WHT.
3. The lower rate applies mostly to cultural royalties. Non-treaty residents: Royalties paid to residents of countries outside of the European Union and European Economic Area, and countries with which the Czech Republic does not have an enforceable DTT or TIEA, are subject to 35% WHT.

Tax administration

Taxable period

A corporation may choose either a calendar year or an accounting year as its tax year.

Czech Republic

Tax returns

Returns must be filed within three months of the end of the tax period.

A three-month extension of the filing deadline is available if a taxpayer is represented by a registered tax advisor or if the taxpayer is subject to a statutory accounting audit.

In some special cases, a filing deadline of less than three months may apply (e.g. upon merger or liquidation). This shorter deadline may, however, be extended if approved by the tax office.

Payment of tax

Tax payments are due on the same day as the filing deadline.

A company is obligated to make CIT advances based on its last known tax liability. The tax advances are paid semi-annually or quarterly, depending on the amount of the last known tax liability.

Upon filing a tax return, tax advances paid during the year for which the tax return is filed will offset the tax liability declared in the tax return. Any outstanding amount must be paid on the date the tax return is due. Any overpayment will be refunded upon request or may be credited against future tax liabilities.

Tax audit process

There is no statutory tax audit cycle. Entities are picked by the tax authorities based on selected criteria (e.g. tax loss position, huge marketing costs) or randomly.

Statute of limitations

The tax may be assessed within three years after the deadline for regular tax return filing. In certain cases (e.g. filing of supplementary tax return), such assessment period may be prolonged by one year, maximally up to ten years. Tax liability arisen as result of criminal action may be assessed any time within two years after the year of the relevant penal court decision becoming effective.

Topics of focus for tax authorities

The tax authorities seem to focus on marketing costs, transfer pricing in intra-group relations, entities in a tax loss position, entities with tax investment incentives, and entities with an R&D allowance. More and more attention is drawn to the topic of tax law abuse.

Other issues

International agreements

In 2014, the United States and the Czech Republic signed an intergovernmental agreement (IGA) implementing the tax reporting and withholding procedures associated with the Foreign Account Tax Compliance Act (FATCA).

The Czech Republic has an effective bilateral TIEA with the following countries: Andorra, Aruba, Bahamas, British Virgin Islands, Cayman Islands, Cook Islands, Guernsey, the Isle of Man, Jersey, Monaco, and San Marino.

The Czech Republic is also a party to the multilateral OECD Convention on Mutual Administrative Assistance in Tax Matters.

Significant developments

In late February 2016, the Danish Minister of Taxation presented a bill suggesting reducing the tax rate on dividends and sales proceeds for foreign entities, which are taxable to Denmark. It is suggested to reduce the tax rate from 27% to 22% in order to align the rate with the current Danish corporate income tax (CIT) rate. It should be noted that it is not planned to reduce the withholding tax (WHT) rate, meaning that a 27% WHT must be withheld. Subsequently, the receiving foreign company would then claim a refund with the Danish tax authorities.

As part of the same bill, a change of the definition of 'subsidiaries shares' has been presented. The proposed changes will influence whether Danish companies can receive tax-exempt dividends from a foreign company. According to the current wording of the law, subsidiary shares are defined as follows:

- The Danish parent company holds 10% or more of the shares in the foreign subsidiary.
- The taxation of dividends from the foreign subsidiary to the Danish parent company must be waived or reduced in accordance with the Parent/Subsidiary Directive or a double tax treaty (DTT).

It is proposed that the subsidiary shares should be defined as follows:

- The Danish parent company holds 10% or more of the shares in the foreign subsidiary.
- The foreign subsidiary must be subject to CIT in its domicile state and the applicable CIT rate exceed 0%.
- Denmark must hold an agreement to exchange tax information with the domicile state of the subsidiary. Such agreement must be in force at the time of distribution of dividends, etc.

It is proposed that the changes listed above should be effective as of 1 July 2016. Both the proposed reduction of the CIT rate on dividends for foreign companies and the definition of subsidiary shares will have retroactive effect, in some cases back to 1 January 2007.

For tax years beginning 1 January 2016 or later, new requirements regarding transfer pricing documentation will be in place. These include an obligation to structure the transfer pricing documentation in a master file and local files. In addition, groups with a consolidated turnover of 5.6 billion Danish kroner (DKK) are required to file a country-by-country (CbC) report, which will provide an overview of the economic activities of the group as well as the taxes paid.

Taxation of dividends and interest paid by Danish entities to foreign group companies has been a hot topic in Danish taxation in the last few years. One of the main issues still seems to be whether holding companies incorporated in the European Union (EU) can qualify as the beneficial owner of dividend and interest payments received from Danish group entities or if such payments should be subject to Danish WHTs.

Denmark

A number of cases have been publicly disclosed, but several cases have been appealed and are currently pending in the Danish courts and may not be concluded for years.

As of the tax year 2014, tax returns must be filed digitally. In May 2015, the online system for filing of tax returns was opened. Due to technical issues, the deadline for filing of the tax returns for the tax year 2014 and 2015 has been postponed to 1 September of the following year.

In addition to technical issues, the new system for filing of tax returns has also entailed a number of tax related issues. The Danish tax authorities have presented several specifications to Danish tax law and tax practice.

Please note that this summary is current as of 1 June 2016. Typically, pending legislation is announced and/or enacted in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2016.

Taxes on corporate income

According to Danish tax law, a territoriality principle prevails. Hence, a Danish company is not taxed on its worldwide income. Instead, income from a permanent establishment (PE) outside Denmark or from real estate located abroad is excluded from taxable income. Non-resident companies are taxed only on profits distributed from income sourced in Denmark.

The CIT rate is 22% for the income year 2016 onward (previously 23.5%).

Hydrocarbon income tax

A special income tax, labelled 'hydrocarbon tax', is levied on profits from the exploration and extraction of oil and gas on the Danish continental shelf at a rate of 52% in addition to ordinary CIT. Ordinary CIT is deductible in computing the hydrocarbon tax. The regular CIT rate for companies within the exploration and extraction of oil and gas is 25% and is not lowered according to the above mentioned for other companies.

Activity connected to the prospecting, exploration, or exploitation of oil and gas is taxable under a more aggressive regime than non-oil/gas activity. Any activity connected to oil and gas (e.g. drilling, seismic surveying, oilfield services) is taxable, regardless of whether a PE exists or not. This may be tempered by provisions in applicable DTTs.

Tonnage Tax Scheme

Danish tax law provides for a special tax scheme for shipping entities.

The main principle of the Tonnage Tax Scheme is that qualifying shipping entities are not taxed on the basis of their actual income derived from their business but on a fictitious income based on the net tons carrying capability of their fleet used for purposes covered by the Tonnage Tax Act.

The Tonnage Tax Scheme is available to:

- Danish shipping entities organised as limited liability companies (*Aktieselskab* [A/S] or *Anpartsselskab* [ApS])
- foreign shipping companies with the place of management and control in Denmark, and
- EU shipping companies with a PE in Denmark.

The scheme is available upon application to the Danish tax authorities. A decision to enter into the scheme is binding for a period of ten years.

As a general rule, group-related shipping companies based in Denmark must make the same choice regarding the Tonnage Tax Scheme. However, shipping companies that do not have the same management or operating organisation and do not conduct business in related fields may be exempt from the joint decision provision.

The Tonnage Tax Scheme is restricted to certain types of business activities. The entity must carry out commercial transportation of passengers or cargo between different destinations. The ships must be owned or chartered on a 'bareboat' or time-charter with a call/buy option by the company' basis and have a minimum gross tonnage of 20 tons. Certain restrictions apply for ships chartered on a time charter basis without a call/buy option. The ships must be strategically and commercially run from Denmark.

Income from activities that are carried out in close connection with this business, such as the usage of containers and loading facilities, etc. may also be included in the Tonnage Tax Scheme. Ships used for exploration, diving, fishing, towing, sand dredging, etc. are specifically exempt from the scheme. The same applies for certain types of ships, such as barges, floating docks, etc. However, EU or European Economic Community (EEC) registered ships used for towage activities at sea (i.e. not in and around ports) during at least 50% of their operating time during the income year may be included in the tonnage tax system.

Ship management companies may also use the Tonnage Tax Scheme. A ship manager is defined as a company doing business with crew management and technical management of ships qualified for use in the tonnage tax system. It is a requirement that the ship manager has taken over the full operating responsibility and all obligations and responsibilities according to the International Safety Management codex.

Taxable income

The taxable income for the part of the business that qualifies for the Tonnage Tax Scheme is determined for each ship as a fixed amount of Danish kroner per 100 net tons (NT) per day according to the following:

Ship net ton (NT)	Fixed amount per day (DKK per 100 NT)	
	2015	2016
0 to 1,000	9.27	9.40
1,001 to 10,000	6.66	6.75
10,001 to 25,000	3.98	4.04
Over 25,000	2.62	2.65

The income is taxed at the ordinary CIT rate (23.5% in 2015 and 22% in 2016). No deductions relating to shipping income will be allowed. However, the Tonnage Tax Scheme is covered by the rules of 'thin capitalisation', which entails that there is a deduction right for net financial income under certain circumstances and to a certain extent. Income that does not qualify for the Tonnage Tax Scheme is taxed according to the general tax provisions in Denmark.

Depreciation

Shipping entities that apply the Tonnage Tax Scheme from the time of their establishment may not deduct depreciation for tax purposes. Special rules apply for shipping entities that were already in existence when they elected to become subject to the scheme and for entities that elect to include certain other assets at a later point in time that were not previously subject to the scheme.

Gains on the sale of ships

Gains on the sale of ships that have not been used in the scheme prior to 1 January 2007 are tax exempt. The same applies to gains on the sale of contracts on the delivery of ships if the ship was destined to be delivered after 1 January 2007. Gains on the sale of

Denmark

ships used in the scheme in prior years are taxable. The taxable gain is calculated as the sale price minus the purchase price plus improvements. Any losses on ships acquired and sold within the same income year as the income year in which a gain is realised may be offset against the gain.

New activities to be included

The Danish Parliament has passed a proposal to include more activities under the Tonnage Tax Scheme in December 2015. The proposal awaits final approval from the European Commission before entering into force. If this approval is obtained, the new activities that can be covered include the following:

Guard, supply, and construction vessels

The proposal includes revenue from guard service (e.g. in connection with cable laying and other non-fixed installations).

It is also proposed that all activities relating to supply services are included in the Tonnage Tax Scheme. This means that, for example, transportation of victuals or bunker fuel oil will be covered.

The Danish Tax Administration (SKAT) interprets the current rules in a way that does not allow for the inclusion of the above-mentioned activities. The explanation for this is that these activities are supposedly not carried out between different destinations.

Ice management vessels

Every kind of ice handling at sea is included in the proposal. This can be escorting of vessels through icy waters, protection of drilling units against floating icebergs in arctic waters, and actual ice breaking.

Wind farm service vessels

The proposal includes construction at sea. First, this means the building, repair, and dismantling of wind farms at sea. These activities are typically carried out by wind farm service vessels.

Secondly, the proposal includes the building, repair, and dismantling of other offshore installations, such as oil installations, wave-breaking installations, and other coast protection measures. In regards to oil installations, the building, repair, and dismantling of these is only included when the activities are carried out outside the Danish sea territory or continental shelf.

Thirdly, the proposal includes the laying, inspection, and repair of pipelines and cables on the seabed. Specialised pipeline layers and cable layers typically carry out these activities.

Accommodation and support vessels (ASVs)

Income from the housing of employees, spare parts, or workshop facilities in connection to offshore operations is included in the proposal. Specialised ASVs typically carry out these activities. The vessels can be part of comprehensive and lengthy offshore works and form an integral and necessary part thereof.

Local income taxes

There is no local CIT or similar surcharge.

Corporate residence

A corporation is resident in Denmark for tax purposes if it is incorporated in Denmark and registered in the Companies Register as having a Danish place of business. Further, foreign companies having their actual place of management in Denmark are also tax

resident in Denmark. The actual place of management is typically the place where the management decisions concerning the company's day-to-day operations are made.

Permanent establishment (PE)

Non-resident companies are liable to tax in Denmark on business profit if derived through a PE in Denmark. The existence of a PE is determined according to Danish tax law, which makes either a reference to a specific DTT or to text similar to Article 5 of the Organisation for Co-operation and Development (OECD) Model Convention.

D

Other taxes

Value-added tax (VAT)

The general VAT rate is 25% of the price charged (exclusive of VAT).

Exemption or a special reduced rate of 0% applies to a limited range of supplies (e.g. newspapers; hospital treatment; insurance and reinsurance services; most financial activities, including deposits of money, loans, and provision of loans).

Denmark was one of the first countries to introduce a VAT system. Since the first VAT Act came into force on 3 July 1967, the VAT legislation in Denmark has undergone several changes. The most important changes have been modifications to bring the legislation in line with the Council Directive 2006/112/EC on the common system of VAT.

Compared to the Directive, the Danish VAT legislation includes minor deviations and the use of various discretionary provisions.

All supplies of goods and services by so-called 'taxable persons' (entrepreneurs who independently carry out economic activity) are subject to VAT, unless specifically exempted. The VAT exemptions are restricted to a limited range of services and goods but are nonetheless subject to discussions and complications in the Danish VAT jurisprudence. Transactions are subject to Danish VAT only when they are deemed to take place in Denmark. For the sake of tax neutrality, VAT is also levied on (i) imports (i.e. receipt of goods from non-EU territories), (ii) intra-Community acquisitions (i.e. receipt of goods from EU member states), and (iii) purchase of most types of services from abroad.

In order to avoid VAT being borne by anyone other than the final consumer, those who qualify as taxable persons can, with some exceptions, recover VAT charged by their suppliers according to the invoice/credit method, provided that the purchases relate to VATable transactions. VAT is recovered either via the periodical VAT return (as a deduction in VAT payable) or by filing a special application.

In general, it is the supplier's responsibility to collect and report VAT on supply of goods or services.

Customs duties

Denmark is a member state of the European Union, and, according to EU's Common Customs Tariff, many goods imported into Denmark from outside the European Union are subject to customs duties. The rates of duty vary widely between goods.

Excise duties

According to Danish tax law, several excise duties are levied on different products. Some of the excise duties are enacted based on EU regulations while others are enacted according to domestic law only.

Excise duties are chargeable on a long list of goods, including hydrocarbon oil products, certain packaging, alcoholic drinks and tobacco, chocolate and sweets, coffee/tea, etc.

Denmark

The excise duty rates depend on the type of goods (e.g. chocolate, packaging) as well as, in some cases, the category of the goods (e.g. plastic bags, paper bags). Furthermore, many of the excise duty rates are regulated every year.

Only goods sold in Denmark (or taken into Denmark) are liable to the Danish excise duties. Companies importing goods into Denmark or companies producing goods in Denmark must be registered with the Danish tax authorities to settle the excise duties. This will often also be the case even though they are selling the goods on to other companies in Denmark.

The type of registration is decisive for when the companies must pay the excise duties. Companies just storing goods must register and settle excise duties in Denmark in spite of the fact that the goods are not being sold in Denmark.

As excise duties are a tax for national consumption in Denmark, a company can, in principle, obtain a reimbursement of the excise duties on products sold outside of Denmark. Companies are entitled to a reimbursement even if the company is not registered for the excise duties in question and even if the excise duties have been paid by previous resellers, etc.

Property taxes

Owners of non-residential property must pay land tax annually. The land tax rate is set by the municipalities and must be between 1.6% and 3.4% of the value of the land. Municipalities may also levy a special coverage charge on certain non-residential properties at a maximum of 1% of the value of the property minus the value of the land and minus a property value threshold of DKK 50,000. Land tax and coverage charge are deductible from CIT.

Stamp tax

Stamp tax is payable on a few documents, such as a deed of transfer of real estate (DKK 1,660 plus 0.6% of the transfer sum). There is no stamp duty on transfer of shares.

Payroll taxes

Employer's tax (social security charges)

The employer's contribution to *Arbejdsmarkedets Tillægspension* (ATP) (i.e. old-age pension) charges is DKK 2,160 *per annum* for a full-time employee.

Companies that provide VAT-exempt services are liable to pay the employer's tax, which is calculated on the total annual salary cost. The rate can be as high as 13.6%, which is the rate for 2015 for banks and other financial institutions, the most significant sector paying the employer's tax. The rate will increase to 15.3% by the year 2021 for banks and other financial institutions. This tax is deductible for income tax purposes.

Other than these taxes, an employer's obligation for social security taxes is minimal. The main social security charge is an additional income tax of 8% on salaries and wages, which is borne by employees.

Environmental taxes/Energy taxes

Danish companies must pay environmental taxes, which were introduced to reduce companies' energy consumption, discharges of fluids with an environmental impact, and emission. These taxes are paid to the companies that provide the energy, who then pay the taxes to the Danish tax authorities. Most of the environmental tax rates are regulated every year.

In general, almost all VAT-registered companies in Denmark can obtain a reimbursement of some of the environmental taxes on energy (also called energy taxes). The size of

the reimbursement of the energy taxes depends on the type of energy used and to what extent the companies can deduct VAT.

Branch income

PEs of foreign companies are taxed under the same rules and rates as Danish resident companies. There is no branch remittance tax or other similar tax on branch profits. As a branch is considered to be the same legal entity as the headquarters, interest paid from the branch to the headquarters is not tax deductible.

D

Income determination

Taxable income generally is calculated as income determined for accounting purposes that is adjusted and modified for several items, as prescribed by the tax laws. Typical timing differences include reserves, work in progress, and depreciation.

Inventory valuation

Inventory is valued at acquisition cost, current market value, or manufacturing cost (if manufactured by the company itself) according to a first in first out (FIFO) principle. The company may opt for different principles for each category of goods and may change principle from income year to income year, provided certain conditions are met.

Capital gains

Gains and losses realised on the sale of tangible and intangible assets, including goodwill, are generally included in taxable income. However, gains realised on the sale of shares are tax-exempt if the shares qualify as either 'subsidiary shares', 'group shares' or 'tax-exempt portfolio shares'.

'Subsidiary shares' are shares held by a corporate shareholder that holds a minimum of 10% of the share capital in a subsidiary that is located in the European Union, European Economic Area (EEA), or a country with which Denmark has a DTT. A special anti-avoidance rule applies, which is targeted at Danish shareholders joining their shareholdings in order to reach the 10% threshold.

'Group shares' are defined as shares in companies with which the shareholder is jointly taxed or might be jointly taxed. The definition of a group is therefore the same as in the joint taxation rules and generally corresponds to the definition of a group for accounting purposes. The location where the companies are registered is irrelevant, as long as the companies are affiliated.

If the shares do not constitute group shares, subsidiary shares, or treasury shares, they constitute portfolio shares. Portfolio shares are divided into two types: tax-exempt portfolio shares and taxable portfolio shares.

'Tax-exempt portfolio shares' consist of shareholdings less than 10% in unlisted companies.

The residual constitute taxable portfolio shares, unless held by the company that has issued the shares (gains on 'own shares' are also tax exempt).

Gains on taxable portfolio shares are fully taxable regardless of holding period, whereas losses on the sale of portfolio shares are generally tax-deductible.

Gains realised on the sale of real estate property are taxable, whereas losses are not tax-deductible unless the property is a building qualifying for tax depreciation. A loss realised on the sale of land and other buildings may be utilised only against taxable

Denmark

profits on the sale of real estate properties in the same year or may be carried forward infinitely.

A capital gain may, under certain conditions, be deferred if the capital gain is reinvested in properties. Reinvestment must be made no later than the income years following the income year of disposal.

For receivables, capital gains are, in general, taxable and losses are, in general, tax deductible. However, capital losses related to intra-group receivables are non-deductible for companies, and, correspondingly, capital gains are not taxable for the debtor.

Special rules apply in relation to compositions, remission of debt, and conversion of debt. Special rules also apply for financial activities.

As a main rule, capital gains and capital losses should be included in the taxable income using the inventory principle. However, the realisation principle should be applied for unlisted debt. Companies may choose to apply another principle in relation to some specific items (e.g. exchange rate adjustments).

Gains and losses on financial instruments are generally included in taxable income, according to the mark-to-market principle, which is required. There are special rules for losses on certain share-based contracts.

Dividend income

Dividends received on 'subsidiary shares' or 'group shares' are tax exempt, regardless of the length of the ownership period.

Only 70% of the dividends received from unlisted portfolio shares by a Danish company should be included in the taxable income, whereas dividends received on listed portfolio shares are fully included in taxable income.

Regardless of whether the shares qualify as 'subsidiary shares' or 'group shares', dividends are fully taxable if received from a foreign company that can deduct the dividends paid.

Stock dividends

Stock dividends may be distributed to shareholders free of tax, provided that the dividends are in proportion to the existing shareholdings (i.e. bonus shares).

Interest income

Interest income is generally included in the determination of taxable income.

Foreign income

As a general rule, foreign-source income, such as interest, is included in taxable income. However, income from a PE or real estate outside Denmark is excluded from taxable income.

The income of a foreign subsidiary may be taxed in the hands of its Danish parent company if the subsidiary constitutes a controlled foreign company (CFC). *See the Group taxation section for more information.*

Deductions

Depreciation, amortisation, and depletion

Tax depreciation need not be in conformity with book depreciation.

Annual depreciation allowances on machinery and equipment may be claimed under the diminishing-balance method at up to 25%. The depreciation base is the cost of fixed assets less sales proceeds from disposals and depreciation allowances previously claimed.

New machinery and equipment acquired between 30 May 2012 and 31 December 2013 could be included in the base with a supplement of 15%. Hence, 115% of costs of new fixed assets was added to the base and depreciated at up to 25% per year. If a company has applied this principle, the assets in question must be kept on a separate account until the end of the tax year 2017.

For ships, the depreciation rate is 20% in the year of construction and a 12% declining-balance basis in subsequent years.

Depreciation allowances on buildings (other than residential buildings and office buildings not adjoining an industrial building) may be claimed at up to 4% on the straight-line basis.

Airplanes, trains, and utility plants can be depreciated only at a 15% declining balance for the tax year 2016 onward (previously 17%).

Rails, telecommunications facilities, and certain other long-life plant and equipment can be depreciated only at a 7% declining balance.

Depreciation allowances that are recaptured as part of a capital gain on the sale of an asset generally are fully taxable.

Acquired goodwill and other intangible property rights can be amortised at up to one-seventh per year on a straight-line basis. Costs related to the purchase of patents or know-how (including rights/licences to utilise patents or know-how) can either be fully expensed in the year of acquisition or amortised over a seven-year period on a straight-line basis.

Certain restrictions regarding the depreciable value of goodwill apply in the case of group transactions. Goodwill on the purchase of shares cannot be amortised for tax purposes.

Depletion of the cost of acquisition or exploitation of natural resources is subject to special rules.

Start-up expenses

No specific rules in Danish tax law govern the treatment of start-up expenses. Instead, these expenses are treated according to general tax law.

Companies may, under certain conditions, benefit from a scheme allowing for a cash payment equal to the tax value (22% for tax year 2016 onward) of negative taxable income, provided the negative income is created from research and development (R&D) costs (*see the Tax credits and incentives section*).

Interest expenses

See Thin capitalisation and interest relief limitations in the Group taxation section.

Bad debt

Companies may deduct loss on bad debt.

The main rule for calculation and taxation of companies' gains and losses on receivables for tax purposes will be the inventory principle (i.e. taxation based on the difference in value at the beginning and end of the assessment year). Use of the inventory principle

Denmark

means that recognition of losses on these types of receivables for tax purposes is not conditional on a final loss having been ascertained.

Special rules apply to gains and losses on trade and inter-company receivables, as these, as a main rule, should be calculated according to realisation principles. Companies may, however, opt for the inventory principle for each category of receivables.

Charitable contributions

Companies may deduct a small amount in gifts to certain organisations approved by the Danish tax authorities and mentioned in the Danish tax authorities' guidelines. The deduction cannot exceed DKK 15,200 per year (for tax year 2016).

Furthermore, companies may deduct gifts to cultural organisations that receive a maintenance grant for operating expenses from either the government or the municipality. According to these rules, there is no limitation in terms of value, but certain restrictions regarding the use of the gift are applicable.

Finally, gifts to certain charitable organisations within Denmark or the European Union may be deducted, provided the recipient uses the funds for research. Deductibility is conditioned upon the organisation being approved by the Danish tax authorities. No limitation in regards to amount is applicable.

Fines and penalties

Fines and penalties are, in general, not deductible, as these are not considered operational expenses.

Bribes, kickbacks, and illegal payments

Even if considered economically reasoned and custom in certain jurisdictions, amounts used for bribery of officials are not deductible.

Taxes

Taxes are non-deductible for CIT purposes, except for employer's tax, non-recoverable VAT, land tax, and coverage charge (*see the Other taxes section*).

Net operating losses

Tax losses may be carried forward indefinitely. However, the utilisation of tax losses carried forward may be restricted. According to the rules, taxable income up to DKK 7,852,500 (for 2016) can always be eliminated by tax losses carried forward, whereas taxable income exceeding DKK 7,852,500 can merely be reduced by 60% as a result of tax losses carried forward. For Danish tax consolidation groups, the rules apply for the group collectively. If losses are restricted, the limitation must be allocated to each of the companies according to complex rules.

Certain restrictions on the right to carry tax losses forward apply when more than 50% of the share capital or 50% of the voting rights at the end of the financial year are owned by shareholders different from those that held control at the beginning of the income year in which the tax loss was incurred.

Similarly, under certain circumstances, tax losses are cancelled if a Danish company receives a debt forgiveness or comparable transaction. However, there are numerous exceptions (e.g. inter-company transactions).

Tax losses may not be carried back and utilised in previous income years.

Payments to foreign affiliates

A Danish corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm's-length basis and reflect services received. Interest at normal commercial rates paid to

foreign affiliates will generally be allowed as a deduction but is subject to very complex thin capitalisation and interest relief limitation rules (*see Thin capitalisation and interest relief limitations in the Group taxation section*).

Group taxation

Mandatory Danish tax consolidation

A mandatory tax consolidation regime obligates all Danish resident companies and Danish branches that are members of the same Danish or international group to file a joint group tax return. The definition of a group generally corresponds with the definition of a group for accounting purposes. The tax consolidated income is equal to the sum of the taxable income of each individual Danish company and Danish branches of foreign companies that are a member of the consolidated group.

The top parent company participating in the Danish tax consolidation group will be appointed the role of a so-called management company; this company is responsible for settling tax on account and final corporate tax payments of all group members.

Companies included in a mandatory tax consolidation are jointly and severally liable for payment of corporate taxes. WHTs on dividends, interest, and royalty payments are also covered by the joint and several liability. For companies with external minority shareholders, the company has a reduced liability and is merely liable if none of the other jointly taxed companies are able to pay the taxes.

Elective cross-border tax consolidation

A non-Danish subsidiary may be included as a member to a Danish tax grouping, provided that the group includes all of its foreign companies and branches in the Danish tax grouping. In effect, this all-or-nothing provision rules out the possibility for major international groups to have their Danish subgroup file a Danish group tax return that includes only certain hand-picked (typically loss-making) foreign group members. Losses deducted in an elective cross-border tax consolidation will be recaptured either fully or to a limited extent.

If a general cross-border tax consolidation is established, it will be binding for ten years; however, there are certain possibilities of 'breaking' the ten-year period (e.g. in connection with takeovers). 'Breaking' the ten-year period will result in a full recapture of previously deducted tax losses.

The comments under Mandatory Danish tax consolidation with respect to the calculation of the tax consolidation income, 'management' company, etc. generally also apply to international tax consolidation.

Transfer pricing

Danish transfer pricing rules apply to transactions between related parties (e.g. inter-group transactions) whether the transactions are made between residents or non-residents. The rules apply when a company or person directly or indirectly owns at least 50% of the share capital or 50% of the voting rights in another company.

Companies are obligated to disclose in the annual tax return certain information regarding type and volume of intra-group transactions. Companies (with 250 or more employees at the group level or with consolidated revenue of DKK 250 million combined with a balance sheet sum of DKK 125 million or more) are also obligated to maintain detailed and extensive transfer pricing documentation to substantiate that intra-group transactions are conducted in accordance with arm's-length principles. A company is subject to fines for failure to comply with the documentation rules. The penalty is DKK 250,000 per company per income year plus 10% of any increase in the taxable income as a result of a tax audit.

Denmark

Traditionally, there have been no specific requirements regarding the format of transfer pricing documentation. As a result of the OECD's base erosion and profit shifting (BEPS) project, new requirements for tax years starting 1 January 2016 or later have been introduced into Danish legislation, and more are expected.

Thus, a new executive order is expected in 2016. Based on the executive order in hearing, the new structure will correspond with BEPS Action 13 (i.e. a master file and local files). The master file will include high-level information regarding the enterprises' global business operations and transfer pricing policies, while the local files will include detailed transfer pricing documentation specific to each country.

Also in line with BEPS Action 13, Denmark has introduced the requirement of CbC reporting, which applies to groups with a consolidated turnover of DKK 5.6 billion. The CbC report will annually provide the amount of revenue, profit before income tax, tax paid and accrued, and other indicators of economic activities for each tax jurisdiction in which the group does business. The purpose is to enhance transparency for tax authorities.

Furthermore, rules on an auditor's statement regarding transfer pricing documentation are applicable. The Danish tax authorities can require a company to obtain an auditor's statement if certain criteria are met. The auditor must state whether any circumstances regarding the performed work causes the auditor to conclude that the transfer pricing documentation of the company does not provide a true and fair view.

Thin capitalisation and interest relief limitations

Danish resident companies and Danish branches of foreign companies are subject to three sets of restrictions, each of which may seriously limit or disallow Danish tax deductions for financing costs.

Firstly, there is the thin capitalisation rule. This rule works to disallow gross interest costs and capital losses on related company debt to the extent the overall debt-to-equity ratio based on market values exceeds 4:1. Related company debt includes external bank debt if group member companies have provided guarantees to the bank. This rule does not apply if the controlled debt is less than DKK 10 million. When calculating the 4:1 ratio, a special consolidation rule applies if two or more companies are considered affiliated (note that the definition of affiliated companies differs from the definition under the Danish rules on joint taxation). There is no recharacterisation of interest as dividends.

Secondly, there is an asset-based rule that applies in relation to financing costs that remain after the thin capitalisation limitation. To the extent a Danish company on a stand-alone basis or, if part of a joint tax group, together with group companies has net financing costs in excess of DKK 21.3 million, the deductibility of the remaining financing costs can be limited to an amount equal to 3.4% (for tax year 2016) of the tax basis of certain assets of the group. Net financing costs consist of, among other things, interest income/expenses, taxable gains/losses on debt, receivables and financial contracts, taxable gains/losses on shares, and taxable dividends.

Thirdly, there is an earnings before interest and tax (EBIT) based rule that works to limit the deductibility of financing costs that remain after the thin capitalisation-test and the asset-based rule to an amount equal to 80% of the Danish company's/tax group's taxable EBIT income. This rule applies the same definition of net financing costs as the asset-based rule, and it also allows for a minimum deduction of DKK 21.3 million in cases where EBIT is too low or negative. Financing costs that are limited in accordance to this rule do not lapse but can be carried forward to the next tax year.

If a Danish resident company has a debt to a non-Danish resident creditor (person or company) that considers the payments as dividends on a contributed capital (hybrid

financing), the debt will also, in accordance with Danish rule, be requalified as equity. The Danish debtor company is then cut off from deducting the interest cost and/or capital losses on the requalified debt.

Controlled foreign companies (CFCs)

According to the Danish CFC rules, a Danish company has to include in its taxable income the total income of a subsidiary, foreign or Danish, if such subsidiary qualifies as a CFC. A subsidiary qualifies as a CFC if all of the following criteria are met:

- The Danish company, together with other group member companies, directly or indirectly owns more than 50% of the capital or controls more than 50% of the voting rights in the subsidiary.
- More than half of the subsidiary's taxable profits, as hypothetically assessed under Danish tax laws, are predefined CFC income types (mainly interest, royalty, capital gains, etc.).
- During the income year, the subsidiary's CFC assets (assets, where the return is characterised as a CFC income type) make up more than 10% of the subsidiary's total assets.

There is no black or white list that exempts subsidiaries resident in certain countries.

Tax credits and incentives

Foreign tax credit

According to Danish tax law, relief is generally available to credit foreign tax paid on non-Danish source profits against the Danish tax on the same profits. As Danish companies are not taxed on income from foreign PEs or properties, the rules have limited application.

For share holdings of 10% or more of the share capital in foreign companies, Denmark has further rules allowing 'underlying' tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved where dividends flow to Denmark via a chain of companies. As Danish tax law, as a main rule, exempts dividends from companies resident in countries with which Denmark has a tax treaty in which the Danish recipient company holds 10% or more, this rule, as well, has a limited application.

Capital expenditure incentives

A small variety of tax incentives are available in the form of deductions for capital expenditures.

Danish tax law allows for an immediate write-off of capital expenditures for R&D. Alternatively, the taxpayer may choose to take tax depreciation in the same year and the following four years on a straight-line basis. Costs incurred in connection with the exploration for raw materials may also be fully deducted in the same year.

Companies in a loss making situation may not benefit from an immediate write-off of capital expenditures. However, companies have been granted the opportunity to apply to the Danish tax authorities for a payment equal to the tax value (22% for tax year 2016 onward) of negative taxable income. It is a condition that the negative taxable income relates to R&D costs. The rule does not cover costs incurred in connection with exploration for raw materials.

Tax payment according to this rule cannot exceed an amount of DKK 5.5 million (for tax year 2016; tax value of DKK 25 million). For companies participating in joint taxation, the limit applies for all companies in total.

Denmark

Costs related to purchase of patents and know-how (including rights/licences to utilise patents or know-how) may either be fully expensed in the year of acquisition or amortised over a seven-year period on a straight-line basis.

Withholding taxes

WHTs on payments to foreign corporations and non-resident aliens

Dividends

Dividends paid to a parent company in another EU member state or a state with which Denmark has a DTT are exempt from WHT, provided that the shares qualify as subsidiary shares. The same applies for dividends paid on group shares (that are not also subsidiary shares, i.e. holdings below 10%), provided that the recipient company is resident within the EU/EEA.

However, the dividends are not exempt from WHT if they are regarded as a redistribution of tax-exempt dividends that the Danish company has received from a foreign subsidiary where the Danish company cannot be regarded as the beneficial owner.

Dividends paid on portfolio shares to a foreign shareholder are levied WHT of 27%. If the portfolio shareholder is situated in a country with which Denmark has a tax information exchange agreement (TIEA), the tax rate on the dividend is reduced to 15% and the difference between the higher WHT rate and the lower WHT rate may be reclaimed. However, the reduced rate does not apply if the shareholder is resident outside the European Union and together with related entities owns more than 10% of the capital in the Danish distributing company.

Interest

Interest is generally not subject to WHT unless paid to a foreign group member company that is tax resident outside the European Union and outside any of the states with which Denmark has concluded a tax treaty. In this situation, interest WHT is levied at 22% for interest accrued or paid on 1 March 2015 or later (25% for interest that is accrued or paid before 1 March 2015). Certain other exemptions apply, mainly relating to CFC taxation.

For recipients resident in countries within the European Union with which Denmark does not have a tax treaty, it is a condition that the paying company and the recipient company are associated as mentioned in the EU Interest/Royalty Directive.

Royalties

Royalties are subject to a 22% WHT for royalties accrued or paid on 1 March 2015 or later (25% for royalties that are accrued or paid before 1 March 2015). In most cases, the WHT rate can be reduced in accordance with the tax treaty applicable to the payee. Also, the EU Interest/Royalty Directive may provide an exemption from WHT if the payee is an immediate parent, sister, or subsidiary company resident in the European Union.

Treaty WHT rates

Notes

- Denmark does not operate a system of WHT on dividends when the parent company holds:
 - at least 10% of the share capital of the distributing Danish company, provided the receiving company is resident in a EU/EEA member state or a state with which Denmark has entered a DTT (subsidiary shares) and that Denmark is obligated to reduce or waive taxation according to the Parent/Subsidiary Directive or a DTT, or
 - less than 10% of the share capital in the distributing company, provided the receiving company is an EU/EEA-resident, the distributing and the receiving company are affiliated companies (group shares), and that Denmark is obligated to reduce or waive taxation according to the Parent/Subsidiary Directive or a DTT.
- Interest is generally not subject to WHT unless paid to a foreign group member company that is tax resident outside of the European Union and outside of any of the states with which Denmark has concluded a tax treaty. In this situation, interest WHT is levied at 22% for interest accrued or paid on 1 March 2015 or later (25% for interest that is accrued or paid before 1 March 2015).
- Exemptions apply if the receiving company is directly or indirectly controlled by a Danish parent company or if the receiving company is controlled by a company resident in a state with which Denmark has a double tax convention and that company may be subject to CFC taxation. Finally, an exemption applies if the receiving company establishes that the foreign taxation of interest is not less than three-quarters of the Danish corporate taxation and that the interest is not paid to another foreign company subject to taxation that is less than three-quarters of the Danish corporate taxation.
- Denmark has terminated its treaty with Spain and France with effect from 1 January 2009. The termination means that each country will tax the relevant income according to its domestic tax rules. New treaties are not expected to be agreed in the near future. Companies in Spain and France receiving dividends from a Danish company may, however, qualify for tax exempt dividends since they are EU member states.

5. The EU Interest/Royalty Directive may provide an exemption from WHT if the payee is an immediate parent, sister, or subsidiary company resident in the European Union.
6. Serbia has succeeded in the treaty between Denmark and Yugoslavia.
7. Different rates apply depending on the characteristics of the assets on which royalty is paid.
8. The 10% rate is applicable for royalties, whereas the 5% rate is applicable to fees for technical support.
9. The WHT rate is 25% for interest and royalties that are accrued or paid before 1 March 2015.
10. Dividends, interest, and royalties received by a company resident in Denmark are included in the taxable income and taxed in accordance with the current tax rate for companies (22% in 2016). It is possible to get credit for foreign taxes on the received dividends, interest, or royalties. For individuals resident in Denmark, received dividends are included in a special share income that is taxed at 27% of the first DKK 50,600 of share income (2016) and at 42% for the rest. Interest and royalties are included in the person's taxable income and are taxed in line with other taxable income.

Tax administration

Taxable period

Danish corporate taxpayers are taxed on an annual basis. Corporate taxpayers may choose a tax year that is different from the calendar year.

Tax returns

Tax returns are completed on the basis of audited financial accounts with adjustments for tax. Tax returns should be filed no later than six months following the end of the accounting year. Corporations with an accounting year-end that falls in the period from 1 January to 31 March must file a tax return no later than 1 August in the same calendar year.

As of the tax year 2014, tax returns must be filed digitally. In May 2015, the online system for filing of tax returns was opened. Due to technical issues, the deadline for filing of the tax returns for the tax year 2014 and 2015 has been postponed to 1 September of the following year. Please note that this extended deadline does not apply for co-operatives and companies with income related to hydrocarbon. Such entities should file their tax returns as in prior years.

The tax system, in practice, is based on self-assessment. Tax assessments are made automatically by the tax authorities on the basis of the tax return. However, the tax authorities may subsequently audit the tax return.

Payment of tax

CIT must be paid on a current year basis in two equal instalments due on 20 March and 20 November. The authorities request payments of 50% of the average of the last three years' final income tax. In addition, voluntary additional payments may be made on the same dates. An allowance is granted in case of voluntary payment on 20 March, and voluntary payments on 20 November are subject to interest when set against the final tax bill. The allowance granted for voluntary payments on 20 March 2015 was 0.3% and the interest for payments on 20 November 2015 was 0.0%.

In August 2015, new rules were adopted for the calculation of interest charge on underpaid tax and repayment supplement on overpaid tax. The actual interest rates for the tax year 2015 were published in December 2015.

As of the tax year 2015, companies may make a voluntary additional payment no later than 1 February following the assessment year (i.e. no later than 1 February 2016 for the tax year 2015). Such voluntary payment will be subject to an additional interest charge based on the interest rate of the underpaid tax for the period 20 November 2015 to 1 February 2016. This interest was 0.7% for the tax year 2015.

The final tax bill is settled by 20 November in the following year. Underpaid tax is then payable by 20 November with a surtax of 3.6% of the tax amount (for tax year 2015).

Denmark

Overpaid tax is refunded by November of the following year with interest of 0.1% (for tax year 2015).

The actual interest rates, adjustments, etc. for the tax year 2016 will be published in December 2016.

Tax audit process

The Danish tax system is based on self-assessment. Companies are, in general, subject to audit on a random basis, but some large companies/groups are subject to annual audit by the Danish tax authorities.

Statute of limitations

The general statute of limitations is 1 May in the fourth calendar year after that of the end of the relevant accounting period. This limitation is extended for another two years with respect to inter-company (transfer pricing) issues and certain tax-exempt restructurings.

Topics of focus for tax authorities

Once a year, the Danish tax authorities publish a list of topics subject to increased focus by the tax administration during their audit. Transfer pricing issues are on top of this list.

In general, all aspects of transfer pricing are in focus. However, specific topics certainly seem to have caught the tax authorities' attention. These are mainly transactions with group companies resident in countries with which Denmark does not have a tax convention, use and transfer of intangible assets, restructurings, and companies making continuous losses.

Attention has also been drawn to whether Danish entities have complied with the WHT requirements regarding dividends and interest.

Last but not least, the tax authorities have increased their focus on tax deductions for costs related to the creation of tax-exempt income, such as dividends from and capital gains on certain shares.

Other issues

Tax-free restructuring

Restructuring (e.g. mergers, demergers, share exchanges, drop-down of assets) can, in many cases, be carried out tax-free under the provisions of the EU Mergers Directive as implemented into Danish law. These types of restructuring can be carried out in a tax-exempt manner without prior approval from the tax authorities. However, several objective conditions must be fulfilled. Formation, merger, reorganisation, and liquidation expenses are mostly non-deductible.

Danish Intergovernmental Agreement (IGA) with the United States (US)

Denmark has entered into an Intergovernmental Agreement (IGA Model 1) with the United States on the Danish implementation of the Foreign Account Tax Compliance Act (FATCA). The IGA is implemented into Danish law and is, to a large extent, an overlay to existing Danish tax reporting rules applying to Danish banks. The scope of FATCA is, however, wider than the existing rules in terms of both entities and products covered and customer due diligence procedures. The IGA implies that Danish foreign financial institutions (FFIs) must report to the Danish tax authorities instead of directly to the US Internal Revenue Service (IRS). The Denmark-US IGA contains important exceptions for both the Danish mutual fund and pension savings industries.

Common Reporting Standard (CRS)

Denmark is among the 'early adopters' of the CRS, whereby the first exchange of information will take place in 2017.

The Council Directive 2014/107/EU, amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation, has been fully implemented in Denmark and is effective from 1 January 2016.

The reporting Danish financial institutions are required to register as such by 31 December 2016.

Significant developments

The corporate tax rate was reduced from 28% to 25% effective 1 January 2016.

Taxes on corporate income

Resident companies are taxed on gains or profits accrued directly or indirectly from all sources, whether in or out of Dominica, and are subject to tax at a flat rate of 25%.

Non-resident companies are taxed on Dominican-source income. The gross amount of such income is liable to 15% withholding tax (WHT).

Associations of underwriters are taxed at 25% on 10% of the gross premium arising in Dominica, and life insurance companies are taxed at 25% on 20% of the gross investment income arising in Dominica.

Corporate residence

Companies are regarded as resident if they are incorporated in Dominica or managed and controlled through a permanent establishment (PE) in Dominica.

Permanent establishment (PE)

A PE is defined in Dominica as a fixed place or premises through which the business is wholly or partly carried on. A PE includes:

- A place of management.
- A branch or office.
- A factory or workshop.
- Premises used as a sales outlet.
- A building site or construction or assembly project.
- The maintenance of plant and machinery for rental.

Other taxes

Value-added tax (VAT)

VAT applies to practically all supply of services and the import as well as domestic sale of goods or import of services, other than an exempt import. The tax is imposed at a rate of 15% of the value of every taxable supply by a taxable person in Dominica, except if the supply is classified as accommodations and diving activity, which carries a rate of 10%.

Certain transactions are zero-rated or exempt from VAT. Export sales by VAT-registered persons are zero-rated.

Certain supply of services is exempt from VAT, including services provided by financial intermediaries, schools, and medical practitioners. Exempt imports include goods imported by Dominicans returning home for permanent residence, motor vehicles imported by natural persons on change of permanent residence, unconditional gift of goods to an approved charitable organisation, other than for purposes of re-sale, etc.

Every registered person is required to file a tax return for each tax period with the Inland Revenue Division (IRD) within 20 calendar days after the end of the period, whether or not tax is payable in respect of that period. This return should be in the form prescribed by the IRD and should state the information necessary to calculate the tax.

D

Customs duties

Customs duties are charged on a wide range of imported goods. On approval by the Cabinet of Ministers (Cabinet), through the advice of Invest Dominica Authority, exemptions are granted for raw materials and plant and machinery used in manufacturing and for certain items imported by hotels under construction, extension, or refurbishing projects.

Excise taxes

Excise tax is imposed on taxable goods (other than taxable goods previously imported into Dominica) removed for consumption in Dominica from a warehouse of a manufacturer registered or required to be registered and taxable goods imported into Dominica. Excise taxes are calculated either on the chargeable value of the goods or via the authorised tariff code.

For importers, the tax is to be paid to the Comptroller of Customs before the goods are entered for use in Dominica. In the case of local manufacturers, the due date for payment is the 20th day of each calendar month.

Taxable goods include alcohol, cigarettes, petrol, and vehicles.

Tax rates are currently as follows:

Good	Excise tax rate
Stout/beer	XCD* 1.2/litre
Wine	XCD 1.2/litre
Shandy	XCD 0.28/litre
Brandy/ginger/vodka	XCD 8.5/litre
Whiskey	XCD 12.6/litre
Rum	XCD 2.6/litre
Cigarette	XCD 22/kilogram
Petrol (jet fuel, kerosene)	XCD 1.14/gallon
Petrol (diesel)	XCD 2.38/gallon
Petrol (gas)	XCD 3.00/gallon
Vehicles	15% and 28%
Liquor and cordial	XCD 2.6/litre

* East Caribbean dollar

Property taxes

There are no property taxes administered by the IRD. However, there is municipal tax, which is collected by the city and village councils. The rate varies from district to district (e.g. 1.25% on the assessed value of the property).

Dominica, Commonwealth of

Stamp taxes

Stamp tax is charged on any document that evidences a legal or contractual relationship between two or more parties. Additionally, many types of commercial and legal documents must be stamped, denoting the payment of taxes, which may be either at a fixed rate or at an *ad valorem* rate, depending, for example, on the value of the property transferred.

For a conveyance or transfer on sale of any property (except stock and debentures), a stamp duty of 6.5% on the value of the property, real or personal, transferred shall be paid, of which 2.5% shall be paid by the transferor and 4% by the transferee. A judicial fee of 2.5% and an assurance fee of 1% are also paid by the transferee. Stamp duty, as set out above, shall also be paid on any stock or shares of a company or corporation whose assets consist of 50% or more real property.

Payroll taxes

Other than employers' social security contributions (*see below*), there are no other payroll taxes, the burden of which falls on the employer. Employers are, however, responsible for deducting the employees' income tax liability at source, through the pay-as-you-earn (PAYE) system.

Social security contributions

An employer is required to remit a social security contribution (for retirement, sickness, and disability benefits) equal to 7% of an employee's gross income. The employee's share is 5%. The employer is responsible for remitting the total amount (12%) to the Dominica Social Security on or by the 14th day of the following month.

Branch income

The tax rate on branch income is the same as that on income earned by resident companies. Every non-resident company carrying on business in Dominica is liable to WHT of 15% on such part of the profits of the business for any year of assessment as is remitted out of Dominica.

Where a controlled company fails to make a sufficient distribution in relation to any year of assessment, it is liable to pay tax on the undistributed profits of that year of assessment at the rate of 15%. A 'controlled company' means a resident company that is owned by not more than five shareholders, excluding the government and any company that is not itself a controlled company.

In determining the amount of a sufficient distribution, the Comptroller of the IRD shall give regard to the nature of the sources of its income and the financial resources available to it and may, where satisfied that it would be detrimental to the business of the company to regard the whole of its chargeable income after deduction of the tax payable thereon as a sufficient distribution, direct that such proportion thereof as the Comptroller may specify (hereinafter referred to as 'a retention allowance') may be retained for the purpose of the business without liability to tax.

Income determination

Inventory valuation

Stocks generally are valued at the lower of cost or market value. The first in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. Obsolescence is permitted where it occurs, but there are no provisions to account for monetary inflation on inventory valuation.

Capital gains

There is no tax on capital gains except in instances where such gains comprise a portion of the income-earning activities of the business. In such instances, the corporate tax rate applies.

Dividend income

Dividends may be subject to tax. However, there is a tax credit given that is equal to the amount by which the tax payable of a company has been increased by the inclusion of such dividend in its taxable income.

Interest income

The corporate tax rate applies to interest income. However, income earned on securities issued by member governments of the Eastern Caribbean Central Bank and any income accruing to the buyer, seller, or issuer from any transfer of securities that are listed on the Eastern Caribbean Securities Exchange through the facilities of that Exchange is tax exempt.

Any expenditure incurred for the purpose of producing exempt income is not deductible.

Foreign income

Resident companies are taxed on foreign branch income as earned. Double taxation is avoided by means of foreign tax credits. There are no provisions in Dominica for deferral of foreign-source income.

Deductions

Depreciation and amortisation

Capitals allowances are available in Dominica.

Annual allowances for wear and tear, ranging from 3% to 20%, are granted on the acquisition of industrial and commercial buildings; on plant and machinery, including motor vehicles and furniture; and on fixtures and equipment.

The Comptroller of the IRD may also grant, on application, a higher rate for annual allowance for assets that have higher or abnormal wear and tear.

Goodwill

Neither the amortisation of impaired goodwill nor the related write-off of it is an allowable deduction.

Start-up expenses

All expenditures incurred in connection with incorporation costs for the establishment of a company are deductible unless considered as capital expenditure.

Interest expenses

Interest on any loan, including interest payable on debentures, is an allowable deduction to the extent that the amount of such loan was used for the purpose of producing assessable income.

Bad debt

Bad debt expense is deductible, provided it has been brought to account in generating the company's assessable income for any income year.

Subscriptions or donations

Subscriptions or donations are an allowable deduction when made to a business or professional organisation approved by the Comptroller, where it is satisfied that

Dominica, Commonwealth of

the organisation is a non-profit body established with the object of maintaining and advancing the standards of the business or profession.

Contributions or donations to any charitable institution designated as an approved charity by the Order of the Cabinet are also allowable.

Fines and penalties

Fines and penalties are not allowable deductions.

Taxes

Taxes are not allowable deductions, except taxes imposed on any immovable property used for the purpose of producing assessable income.

Net operating losses

Net operating losses may be carried forward up to a maximum five years. In carrying losses forward, the amount that can be claimed in any subsequent year is the full amount of the available loss. Losses cannot be carried back.

Payments to foreign affiliates

There are no restrictions on the deductibility of interest paid to foreign affiliates if the transaction is carried out at arm's length and at commercial rates. However, deduction for management charges, which is subject to 15% WHT, is restricted to the lesser of such charges or 5% of all allowable deductions, excluding such charges and capital allowances.

Group taxation

Group tax filing is not allowed in Dominica.

Transfer pricing

Related party transactions are accepted if they are made on an arm's-length basis. The Comptroller of the IRD has the power, under the Income Tax Act, to make any adjustment deemed necessary to place such transaction at arm's length.

Thin capitalisation

No provision exists for thin capitalisation in Dominica.

Controlled foreign companies (CFCs)

Dominica does not have tax provisions relevant to CFCs.

Tax credits and incentives

Foreign tax credit

Dominica is signatory to the CARICOM Double Taxation Agreement (DTA) Order 2008, which provides relief against double taxation and seeks to prevent fiscal evasion with regard to taxes on income, profits, or gains. Where income has accrued to a resident and has been taxed in a foreign country with which there is no DTA, or is income to which a DTA, if there is one, does not relate, credit for tax on such income is allowed for the lesser of the tax payable in the foreign country or the tax charged under Dominican tax law.

Tax holidays

Tax holidays are available for various types of business activities, including manufacturing companies. In the case of a manufacturing company, the incentives are aimed at increasing the manufacturing base of Dominica, the level of exports, and the use of local materials and labour in production. An approved manufacturing enterprise

will be granted a tax holiday up to a maximum of 15 years. In determining the length of the tax holiday, the extent of the local value added to approved products is taken into account.

Investment incentives

Income tax incentives and other fiscal concessions are provided under the Fiscal Incentives Act and other concessions granted by the Cabinet. The extent of the incentives and concessions granted are specific to the legislation or Cabinet conclusions and depend on the impact that the investment would have on local employment, exports, and the generation of foreign exchange earnings. The incentives granted include the following:

- Duty free importation of raw materials, machinery, components, and spare parts and other inputs used in manufacturing, and the duty-free importation of construction materials, equipment, and other inputs used in the construction and operation of hotels and other hospitality products.
- Income tax waivers of up to 100% of the taxable income of companies engaged in manufacturing, tourism, and agriculture and other employment generating activities, for periods of up to 15 years.
- Whole or partial waivers of stamp duties, Alien Landholding License fees, and WHT with respect to investments in specific areas, or in specific industries and activities.
- Export allowances for goods manufactured in Dominica and exported. Companies that engage in such activity are given tax exemption on the export of such goods up to a maximum of 10 to 15 years.

Withholding taxes

Resident corporations and persons that make certain payments of an income nature to non-residents are required to withhold tax on these payments:

Payment	WHT (%)
Dividend	15
Interest or discounts	15
Rental, lease, premium, or licence in relation to immovable property	15
Rental of plant, machinery, equipment, or other movable property	15
Royalty	15
Management charge	15
Commission or fee, not being in respect of employment	15
Annuities or other periodic payments	15
Distribution of income of a trust	15
Any other payment of an income nature	15
Profits of a non-resident company from carrying on business in Dominica that is remitted out of Dominica	15

There is a multilateral tax treaty in existence between the member states of CARICOM that limits the WHT on interest, royalties, and management fees to 15% at source. There is no WHT on CARICOM-sourced dividend income.

There are no WHTs on payments to residents.

Dominica, Commonwealth of

Tax administration

Taxable period

Returns must cover a 12-month period, which may be changed only with the Comptroller's permission.

Tax returns

Tax returns must be filed within three months of the company's fiscal year-end. An extension of the filing date may be obtained.

Financial statements must be submitted with the returns, together with a schedule reconciling taxable income with book income and various other schedules of additional information.

The system is one of self-assessment. Upon receipt of the returns, the IRD examines the information provided and issues a notice of assessment at any time, subject to the statute of limitations. The IRD may also issue assessments in the absence of returns.

Payment of tax

Tax is payable in instalments on 31 March, 30 June, and 30 September in each income year (or the end of the third, sixth, and ninth month where the accounting year of the company is other than a calendar year), based on the tax payable in the preceding income year or the estimated tax payable for the current year. Any remainder is payable on or before 31 March of the subsequent year (or the end of the third month after the end of the accounting year where the accounting year of the company is other than a calendar year).

Tax audit process

The IRD carries out audits of a selection of tax returns, usually at the taxpayer's place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations, whether or not notices of assessment have been issued. The IRD has wide powers in determining the information it requires for these audits.

Within 30 days after the date of service of a notice of assessment or reassessment, the taxpayer may submit a written objection to the IRD on any matters in such assessment or reassessment. If the IRD confirms its assessment, the taxpayer may file an appeal with the Appeal Commissioners, which comprises persons appointed by the Cabinet. A decision by that body may be further appealed to the High Court. An appeal against an order from this Court may be made to the Court of Appeal.

Statute of limitations

Assessments are not final until six years after the end of the income year, within which period assessments may be made at any time. In cases of misrepresentation or failure to disclose any material fact, a reassessment can be made at any time.

Topics of focus for tax authorities

The IRD does not have any specific compliance program; however, when an audit is done, the focus is on returns that may have an incidence of tax risk, such as returns with huge losses, large refunds, questionable reporting of tax liability, and omission of income.

Other issues

Tax Information Exchange Agreements (TIEAs)

TIEAs provide for the exchange of information on tax matters. TIEAs with Australia, Canada, Denmark, Finland, France, Iceland, the Netherlands, Norway, the United Kingdom (UK), and the United States (US) are in force.

US Foreign Account Tax Compliance Act (FATCA)

As of 19 June 2014, the United States and Dominica have reached an agreement in substance regarding FATCA, and Dominica has consented to disclose this status. In accordance with this status, the text of such intergovernmental agreement (IGA) has not been released, and financial institutions in Dominica are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

The 1% asset tax has been eliminated in 2016 in accordance with the Law.

Taxes on corporate income

The Dominican Republic follows a territorial concept (i.e. resident companies, branches, and permanent establishments [PEs] are generally subject to taxation on Dominican-source income only); consequently, the tax treatment for corporations, partnerships, and limited liability companies is similar in most aspects.

The corporate income tax (CIT) rate is 27% from fiscal year 2015 onward (previously 28%).

Dividends/profits remitted abroad or paid locally are subject to a withholding tax (WHT) of 10% as a definitive tax payment.

Local income taxes

In the Dominican Republic, local government income taxes do not apply.

Corporate residence

A company is resident when it is registered or incorporated under the laws of the Dominican Republic. Foreign entities are considered as domiciled when they are registered in the Dominican Republic as a branch or PE, and they are subject to local tax in the same manner.

Permanent establishment (PE)

According to local tax legislation, which follows the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital, a PE is defined as a fixed place of business where a foreign entity or individual performs all or part of its activities, such as:

- An address in the Dominican Republic.
- Office.
- Branches.
- Workshop.
- Mine.
- Petroleum or gas well.
- Quarry or any other natural resource extraction place.
- Assembly projects, including supervision activities of such projects.
- Construction/supervision activities derived from the sale of machinery and equipment when its cost exceeds 10% of the sale price of such equipment.
- Consulting services, provided these exceed six months within the same fiscal period.

- Representatives or dependent or independent agents, when these act on behalf of the entity.

Other taxes

Tax on the Transfer of Industrialised Goods and Services (ITBIS)

ITBIS is a value-added tax (VAT) applied to industrialised goods (movable) and services at a rate between 13% and 18%, with exemptions established by law to certain goods and services.

Exempt goods include a wide variety of goods, among which are basic products (eggs, milk, grains, live animals, frozen meats), seeds for planting, fruits and vegetables, medicine, insecticide and pesticides, books/magazines, educational material, wheelchairs, and prosthesis.

Exempt services include educational, health, financial (including insurance), pensions, ground transportation of people and cargo, electricity, water and waste pick-up, housing rental and personal care, and exported services.

A 0% rate applies to exports, including sales to free trade zones (FTZs).

Tax on gross sales made by FTZs to local market

A 3.5% tax was created on the gross sales of goods and services made by companies in Dominican FTZs to individuals and legal entities in the local market.

Customs duties

Customs duties are assessed at various rates depending on the nature of the goods and their country of origin. Free trade agreements exist (e.g. the Central America-Dominican Republic-US Free Trade Agreement [DR-CAFTA]) that decrease the customs duty rates for goods imported from the member countries.

Selective consumption taxes (Impuesto Selectivo al Consumo or ISCs)

ISC is applied to the acquisition or import of certain goods and services.

There is an ISC for alcoholic goods and cigarettes, adjusted by inflation annually:

- Alcohol: ranges from 356.84 Dominican pesos (DOP) to DOP 437.56 for every litre of pure alcohol.
- Cigarettes: DOP 40 for a 20 pack and DOP 20 for a 10 pack.

There is a 16% *ad valorem* ISC for fossil fuel and petroleum derivatives. A DOP 2 tax (adjustable by inflation on a quarterly basis) is charged per gallon of regular and premium fuel and diesel.

There are ISCs that vary based on the product, which range from:

- 10% on the transfer of alcoholic beverages, applied on the retail price. Imports and transfers made by local manufacturers are accountable for this tax.
- 50% on the transfer of 20 units of tobacco products and 25% on the transfer of 10 units of tobacco products, applied on the retail price. Imports and transfers by local manufacturers are accountable for this tax.
- 19.5% to 130% on the consumption of certain imported goods (listed in the law) that are considered to be non-essential.
- 10% on telecommunications services.
- 16% on insurance services.
- 0.0015% on the value of cheques or wire transfers made through financial entities (this tax does not apply to cash withdrawals or credit card use).

Dominican Republic

Real Property Transfer Tax

The Real Property Transfer Tax is assessed at a basic rate of 3% on any transfer of ownership of real estate.

Stamp taxes

Stamp taxes have been abolished in the Dominican Republic.

Social security contributions

Pensions

Employers contribute 7.10% of salaries and withhold 2.87% from employees' salaries for pensions. The quotable salaries for contribution are 20 minimum wages.

Family healthcare

Employers contribute 7.09% of salaries and withhold 3.04% from employees' salaries for family healthcare. The quotable salaries for contribution are ten minimum wages.

Labour risks insurance

Employers contribute 1.2% of salaries for labour risks insurance. The quotable salaries for contribution are four minimum wages.

Payroll taxes

In addition to the social security contributions, a 1% contribution from the payroll amount shall be made to the Governmental Training Institution (INFOTEP) on a monthly basis. This is paid solely by the employer (not subject to withholding). In addition, a 0.5% contribution shall be paid to INFOTEP, and the employer shall withhold said 0.5% contribution from employees' bonus (not salary).

Employers must share 10% of their net profits with their employees. The Dominican Labor Code, however, allows employers to cap the amount distributed as follows: an employee with less than three years on the job will receive a maximum of 45 days' salary; an employee with three years or more will receive a maximum of 60 days' salary.

Branch income

Branch profits are taxed at the same rate as corporate profits. Tax Reform Law No. 253-12 imposes a 10% WHT as definite payment on remittances abroad.

Income determination

Inventory valuation

The last in first out (LIFO) method of inventory valuation is established for tax purposes. Other methods may be authorised upon request.

Conformity between book and tax reporting is not required.

Capital gains

Capital gains are added to ordinary taxable income and subject to the CIT rate. Capital gains are defined as the difference between the sale price of an asset and the acquisition or production price, adjusted for inflation.

Dividend income

Dividend distributions in cash are subject to a 10% WHT as a sole and definite payment.

Stock dividends

Stock dividends are not subject to taxation.

Interest income

Interest income is considered as part of taxable income; in the case of non-resident, non-domiciled taxpayers, the tax should be paid through WHT.

Foreign income

Dominican-resident companies, branches, and PEs are subject to taxation on income from Dominican sources and on income from foreign sources arising from investments and financial gains. Tax determined on income from foreign source is subject to a credit mechanism. Taxes paid in the country where the income is originated can be credited up to the amount of the tax payable in the Dominican Republic on the same income.

Deductions**Depreciation and amortisation**

Depreciation allowances on fixed assets are determined by the declining-balance method at the following rates:

Assets	Depreciation rate (%)
Buildings	5
Office furniture, fixtures, computers, light vehicles, etc.	25
Other assets not specified	15

The fiscal book value is adjusted by the annual inflation rate.

Amortisation of intangible assets (e.g. patents, author's rights, drawings, franchises, and contracts without set expiration date) is not deductible.

Goodwill

Goodwill is not deductible.

Start-up expenses

The Dominican tax legislation does not establish specific provisions regarding the deduction of start-up expenses. The general deductions rule is the accrual method.

Interest expenses

Interest expenses are deductible, provided they are associated with the acquisition, maintenance, and/or exploitation of taxable income-generating assets.

The interest expense deduction is limited when the beneficiary is a non-resident located in a tax haven or in a low taxation jurisdiction, or when the interest is not otherwise subject to tax by the recipient. Thin capitalisation rules may also limit the deduction (*see Thin capitalisation in the Group taxation section*).

Bad debt

Bad debts are deductible only in the year the loss is suffered. Authorisation may be obtained to use an alternative method, which consists of creating a provision allowing the deduction only in the year the bad debts qualify as doubtful, up to 4% of the balance of the accounts receivable at year-end.

Charitable contributions

Donations made are not tax deductible in the Dominican Republic.

Fines and penalties

Fines and penalties are considered non-deductible expenses.

Dominican Republic

Taxes

Income taxes are not deductible. Other taxes can be deductible; however, interest and surcharges imposed on taxes are not deductible in general.

Other significant items

For tax purposes, the following significant items should be considered:

- Changes in methods are not allowed without prior approval.
- Bonuses paid to employees within 120 days after the end of the taxable year are deductible for the year just ended.

Net operating losses

The carryforward of losses of legal entities can be used to offset profits up to the fifth year following the year in which the losses were generated, with a maximum amortisation of 20% in each year. For the fourth year, the deduction allowed should not exceed 80% of the net taxable income. In the fifth year, the percentage is 70%.

There is no carryback loss mechanism in the Dominican Republic.

Payments to foreign affiliates

Payments to foreign affiliates for royalties, interest, or service fees are deductible, provided that the 27% WHT was paid (10% on interest).

Group taxation

Group taxation is not permitted in the Dominican Republic.

Transfer pricing

Per the Dominican Tax Code (DTC), related-party transactions carried out between Dominican companies, regardless of whether the companies are foreign-owned or not, or with companies located in areas of low or no taxation, must be carried out in accordance with the prices agreed in the transfer of goods or services between independent parties.

These provisions shall also apply to transactions carried out by Dominican companies with related companies located in the country that is benefiting from a favourable tax regime.

The tax authorities, following the procedures in the current tax laws in the exercise of its powers of determination, verification, or investigation, may challenge the values declared by taxpayers if such values:

- do not correspond to the economic reality of the operation involved, or
- differ substantially from independent companies under similar conditions.

Persons are considered related parties or related persons or entities, resident or not in the Dominican Republic, when among them there is a financial dependency or capital of both is mostly owned by one of them, following (but not limited to) these criteria:

- One party participates, directly or indirectly, in the management, control, or capital of the other.
- The same natural persons, companies, or firms participate, directly or indirectly, in the management, control, or capital of such parties.
- An individual, company, or companies have the ability to influence the business decisions of the company.
- When participation is defined in terms of the share capital or control of voting rights, a direct or indirect participation of at least 25% will be necessary in either case.

Regarding the advance pricing agreement (APA) regime, an APA may be requested from the tax authorities that sets the values of the transactions carried out between related parties if made prior to completion. Please note the following:

- The APA may be approved, denied, or modified by the tax authorities with customer acceptance and is valid within 36 months after approval.
- Subsequent agreements may be valid for up to 36 months; in cases in which it has expired and no new agreement exists, the existing agreement shall continue in effect until it is approved before a new APA.
- The tax authorities may challenge the taxpayers' declared values included within the APA when they do not correspond with the criteria agreed in the APA and apply the penalties established in the DTC.
- For economic sectors, whose business has particular ties or high linkage between the parties, the tax authorities may determine a minimum price or profit margin. Once such price or margin is set, according to the sector, the companies covered by the scheme will act as independent companies. The price or minimum tax profit margin of the taxpayer may be calculated taking into account the total income, the assets used in the business operations during the fiscal year, the total amount of costs and expenses, and/or other sector variables.

Finally, taxpayers must file an annual Informative Tax Return of transactions between related parties, which shall contain detailed information of each transaction, the related party's identification, transfer pricing method, etc.

Thin capitalisation

According to the thin capitalisation rule, the maximum debt-to-equity ratio allowed to taxpayers is 3:1; over this threshold, the deduction of interest expense is limited.

Controlled foreign companies (CFCs)

The Dominican Republic does not have provisions for CFCs.

Tax credits and incentives

In the Dominican Republic, tax incentive laws exist for the following.

Tourism incentives

Law 158-01 on the Promotion of Tourist Development for New or Low Development Locations in Provinces and Areas with Great Tourist Potential, and for the Creation of the Tourist Promotion Official Fund, enacted on 9 October 2001, establishes special incentives and benefits to individuals or companies, residing in the Dominican Republic, that promote or invest capital in any tourist activity described in said Law. In order to benefit from said Law, a special Resolution shall be obtained from the Council for the Promotion of Tourism. Recent Law No. 195-13 added other areas that could benefit from the tax incentives established in Law 158-01.

Alternative energy incentives

Law 57-07 provides significant incentives for the use and development of renewable sources of energy. The renewable energy sources subject to this law include bio-fuel, bio-diesel, ethanol, and wind, solar, and other renewable energy.

Additionally, the credit on investment expense granted to self-power producers is 40%.

Industrial renovation and modernisation incentives

The main objective of Law 392-07 about competitive development and local industrial manufacture is to promote policies and support programs for industrial renovation and innovation so to diversify local production, create industrial parks, and link the country

Dominican Republic

to international markets. Main benefits include VAT exemption on import of machinery and materials, priority on imports granted at customs, and accelerated depreciation.

Industrial FTZ operations

Law 8-90 about Export FTZs was created to promote employment, production, and economic growth. Entities that would like to benefit from said Law shall be engaged in manufacture/service within a confined space (FTZ park). Special FTZ classification entities, which are entities located outside an FTZ park (e.g. call centres), were abolished with Law No. 253-12.

Border development incentives

Law No. 28-01, dated 1 February 2001, creates a special development frontier zone for industrial, agro-industrial, agriculture/livestock, metalmechanic, FTZ, tourism, metallurgical, and energy companies that exist at the time of promulgation of said law, and those that may be installed in the future within the border of the Dominican Republic and Haiti. Main incentives include 100% exemption on CIT and VAT, as well as customs duties.

Foreign tax credit

Taxes paid abroad on foreign income taxed in the Dominican Republic may be credited up to the amount of the Dominican tax liability generated by such income. The credits should be determined on a case-by-case basis.

Withholding taxes

WHT on dividends

Dividends paid in cash to resident and non-resident individuals or corporations are subject to a WHT of 10%.

WHT on transfers of shares

There is a 1% WHT on the value of the transfer of shares received by the seller. Foreign entities are not exempt from this obligation. In this case, WHT may be made by a person appointed as WHT agent by the tax authorities.

Such WHT is a payment on account against capital gain tax, payable by the seller through the Form IR-2 (legal entities) or Form IR-1 (individuals), as applicable. However, if they can substantiate that the transaction will not generate a capital gain or that the 1% WHT would generate a capital loss, they may request of the tax authorities, no later than 30 days prior to withholding filing/payment's due date, to be exempt from this obligation.

This 1% WHT should be filed and paid to the tax authorities through the monthly WHT return (IR-17 Form) within the first ten days of the month following the payment to the seller. In case the purchaser is an individual, the 1% WHT is not applicable.

WHT on interest payments

Financial institutions are appointed as 1% WHT agents on the value paid or credited on account for interest payments of any nature to legal entities.

The interests paid by financial institutions will constitute a deductible expense for tax purposes, provided the WHT was made.

In addition, this rule obligates financial institutions to provide a monthly electronic file, directly to the tax authorities or through the Banks Superintendency, containing all the information related to the interest payment, including the date, value, and identity of the beneficiary.

WHT on payments to foreign corporations

The WHT on payments to foreign corporations, which are not permanently established in the Dominican Republic, are as follows:

Recipient	WHT (%)			
	Dividends and interest	Royalties	Technical assistance	Other services
Non-treaty, basic	10	27	27	27
Treaty:				
Canada	18	18	27	27
Spain	*	Up to 10	N/A	Up to 10

* 0% or 10% depending on if the Spanish parent company has more than 75% participation in the Dominican subsidiary. Branches are not subject to profit remittance tax.

Tax administration

Taxable period

The DTC establishes as year-end one of the following: 31 December, 31 March, 30 June, or 30 September. Once the year-end is selected, any change should be authorised by the tax authorities.

Tax returns

The Corporate Annual Tax Return (Form IR-2) must be filed within 120 days after year-end. Tax authorities may allow extensions of up to 60 days, upon request.

Tax returns are based on self-assessment and must be filed on electronic forms supplied by the internal tax department.

Payment of tax

The balance of any tax due must be paid no later than the due date for filing the return. Corporations domiciled in the country and PEs of foreign enterprises shall be obligated to make advance payments on the 15th day of every month for tax related to the period in progress.

Tax audit process

The audit cycle is not established by law or practice. During the statute of limitations, tax authorities select the taxpayers subject to audit based on internal criterion.

Statute of limitations

The statute of limitations is three years, and five years if the entity has been notified of a tax audit, counting from the filing due date.

Topics of focus for tax authorities

Among the topics of focus for the tax authorities are: non-deductible expenses, withholdings, VAT, and proportionality of VAT credits.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

Currently, the Dominican Republic has not signed any FATCA agreements; nonetheless, financial entities in Dominican Republic are implementing the corresponding measurements regarding the FATCA dispositions. For the time being, the Dominican and United States governments are in a negotiation stage for the subscription of an intergovernmental agreement (IGA) to improve the international tax compliance

Dominican Republic

regarding FATCA, which is supported by a previous signed agreement between the United States and Dominican Republic referred to as 'Tax Information Exchange Agreement'. Additionally, local financial entities signed a bank information exchange agreement with the US income tax authorities on 15 July 2014.

**E**

Significant developments

In December 2015, the Law of Incentives for Public-Private Alliances and Foreign Investment was approved by the Ecuadorian Congress.

The main objective of this Law is to grant corporate tax incentives and fiscal stability for projects developed under public-private initiatives, together with the promotion and financing of productive foreign investment. To this end, public-private alliances are oriented to strategic sectors established by the government, including energy, telecommunications, non-renewable natural resources, and transportation, among others.

During fiscal year 2015, the Internal Revenue Service (*Servicio de Rentas Internas*), modified certain transfer pricing requirements to the transfer pricing report. Transfer pricing regulations establish that Ecuadorian taxpayers that have undertaken transactions with local or foreign related parties exceeding 3 million United States dollars (USD) within a fiscal year are required to file a transfer pricing annex before the tax authorities. Additionally, where the transactions exceed USD 15 million, a transfer pricing report must be filed in addition to the aforementioned annex.

On 20 May 2016, in response to the magnitude 7.8 earthquake that struck parts of the Ecuadorean coast in April 2016, the Ecuadorean government enacted a Solidarity Law with the purpose to fund the rebuilding of areas wrecked by the earthquake. The tax measures derived from the Solidarity Law that impact companies are as follows:

- Increase in the value-added tax (VAT) rate from 12% to 14% for up to one year, from June 2016.
- One-time 3% surcharge over the gross profit applicable to companies of the year 2015.

Please note this information is current as of 1 June 2016. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2016.

Taxes on corporate income

Resident entities are taxed on their worldwide income. Non-resident entities are subject to tax on Ecuadorian-source income only.

International Financial Reporting Standards (IFRS) are in force for all entities. Local tax authorities have established that for corporate income tax (CIT) purposes, and corresponding pre-payments, companies are obligated to follow these accounting principles.

Taxes on corporate income are levied at the following rates:

Ecuador

Type of income	CIT rate (%)
Distributed or undistributed profits of local corporations and branches	22 to 25
Reinvested profits of local corporations and branches	12 or 15

Ecuadorian companies owned by Ecuadorian residents or non-Ecuadorian residents resident in a non-tax-haven country will be subject to a 22% CIT rate. If the company has direct or indirect participation from tax haven residents who collectively own more than 50% of the Ecuadorian company, a 25% rate will apply to all of the company's taxable income. If the direct or indirect tax haven ownership does not exceed 50%, the 25% tax rate will apply only to the portion of income attributable to the tax haven residents. The 25% rate also will apply if the foreign owner's residence has not been disclosed to the Ecuadorian tax authorities.

See the Branch income section for a list of countries and territories considered as tax havens by the tax authorities.

The Solidarity Law established a one-time 3% surcharge over the gross profit obtained during the year 2015. Regulations for its application are expected to be published from June 2016.

Local income taxes

No other government taxes on income are imposed on companies.

Corporate residence

Corporate residence is determined by the place of incorporation. For foreign branches, it is the place stated in the domiciliary deed.

Permanent establishment (PE)

According to the local tax legislation, a company can be deemed to have a PE in Ecuador if it maintains any place or fixed centre, within the country, in which a foreign company develops all or part of its activities.

The corresponding regulations point out that a PE also exists when a foreign company maintains, within the country, a person or an entity that acts on its behalf and habitually exercises an economic activity. It contemplates several instances where this is applicable, among them:

- A person with legal representation, which is normally granted through a power of attorney or through a legalised decision by the company and includes the capacity to legally act on behalf of the company.
- A person working under a contractual relationship for a foreign company to carry out economic activities on behalf of that company.
- A centre for the direction of the activities of the foreign company.
- A branch, agency, or office that acts on behalf of the foreign company.
- An office for the provision of technical consultancy services related to contracts that are executed in the country.

Other taxes

Value-added tax (VAT)

VAT is levied at the rates of either 12% or 0% on the transfer of goods, import of goods, and the rendering of services, as well as on services rendered within the country or imported. Royalties and intangible property, imported or locally paid, are also levied with a 12% VAT.

The following are transactions exempt from VAT:

- In-kind contributions to capital of companies.
- Inheritance and assets obtained from liquidation of companies.
- Transfer of business as a whole, amalgamations, mergers, takeovers, and spin-offs.
- Donations to public entities and non-profit organisations.
- Transfers of shares and securities.

Goods and services that are subject to the 0% rate are explicitly listed in the law.

Among others, the following goods are taxed at a 0% rate upon either importation or local transfer of ownership:

- Most agricultural goods and foodstuff, when these remain in their natural state; this includes refrigerated or packaged goods that have not undergone further processing. Also included in this category are milk, meats, sugar, salt, bread, butter and margarine, flour, and cooking oil.
- Drugs, medicines, and other pharmaceutical products, including raw materials for their production.
- Fertilisers, insecticides, animal foods, and similar products, including the raw materials required for processing such goods.
- Agricultural machinery and equipment.
- Goods that are exported.
- Paper, books, magazines, and newspapers.

Among others, the following services are taxed at a 0% rate:

- Transportation of persons and cargo, except air transportation of persons and local air transportation of cargo.
- Book printing services.
- Housing rental.
- Water, electric, sewage, and other public services, including garbage collection.
- Exported services.

The 12% VAT paid on imports and local purchases can be deducted from the 12% VAT charged on sales or services rendered. VAT paid on raw materials, fixed assets, or components required for the production of goods or rendering of services is also creditable when the final product is considered taxable at 12%. On the other hand, VAT paid on raw materials, services, components, or fixed assets necessary for production of export goods is recoverable.

The 12% VAT paid in the acquisition of goods and services utilised for the production or rendering of services levied at 0% VAT is not creditable. Therefore, it will be considered as part of the cost.

Companies designated as 'special taxpayers' (qualified as such by the tax authorities, which, in recognition of its economic importance defined in special parameters, contributes to the effective collection of taxes, subject to special regulations regarding the compliance of their formal duties and payment of taxes) are required to withhold 30% of VAT applicable on their purchases of goods taxed at 12%, and 70% of VAT applicable on their purchase of services taxed at 12%, except with respect to services rendered by professionals, in such case 100% of VAT charged must be withheld.

For transactions levied with 12% VAT carried out between two companies qualified as 'special taxpayers', VAT withholding rates shall be applied as follows:

- 10% of VAT on purchases of goods.
- 20% of VAT on the acquisition of services.

Ecuador

In the importation of services, VAT at 12% must be self-determined and withheld at 100% by the local entity. This VAT is creditable.

Customs duties

Since Ecuador is a member of the Andean Community, goods to be imported are classified under the Common Nomenclature of the Andean Countries participating in the Cartagena's Agreement (NANDINA) Pact, which is based on the Customs Cooperation Council Nomenclature (also known as the Brussels tariff nomenclature). Most consumer good imports pay 25%, while intermediate goods are usually imported at a 10% or 15% rate. Raw materials and capital goods generally pay 0% to 5%. Ecuador has negotiated exceptions under the Andean common tariff that allow lower duties on certain capital goods and industrial inputs. There is duty-free import of agricultural goods and equipment.

The price listed on the commercial bill or invoice is the basis for the assessment of duties, except when the Central Bank of Ecuador (CBE) considers the listed price unreasonable, in which case market prices in arm's-length transactions will be used. The burden of proof lies with the importer.

In addition to import duties, all imports are subject to 12% VAT and other minor taxes that do not exceed 1%. Charges are based on the cost, insurance, and freight (CIF) value of the merchandise.

All Ecuadorian imports and exports are subject to inspection by authorised international verification companies operating in the country (there are some imports exempt from verification). Goods are appraised for value, quantity, quality, and weight at the port of origin.

With the purpose of reducing the consumption of imported goods and improving the country's trade balance, the Ecuadorian government established 'protective duties' (or 'safeguards') on the importation of several goods since March 2015. The rate of the aforementioned safeguards ranges from 15% up to 45%. The Ecuadorian government announced that the safeguards would be in place for 15 months, and then will be subject to progressive elimination. Since January 2016, a 5% reduction of the aforementioned safeguards took place.

Special consumption tax (*Impuesto a los Consumos Especiales* or ICE)

ICE is imposed on domestic and imported goods that are explicitly listed in the law. This tax is levied at a progressive rate from 5% to 35% on certain automobiles and 15% on airplanes, helicopters, and boats. The taxable basis on cigarettes and alcoholic beverages is obtained by the number of produced or imported cigarettes or degrees of alcohol, respectively. It must be paid monthly and is collected upon sales. The ICE tax base for imported goods is the *ad valorem* value.

Foreign assets tax (*Impuesto a los Activos en el Exterior*)

The tax base for the foreign assets tax is the average monthly balance of cash deposits held in foreign entities by private entities registered in the stock market and regulated by the Superintendent of Banks and Companies. The monthly tax rate is 0.25% (0.35% for assets held in tax haven jurisdictions).

Remittance tax (*Impuesto a la Salida de Divisas*)

Remittance tax of 5% is imposed on the transfer of money abroad in cash or through cheques, transfers, or courier of any nature carried out with or without the mediation of the Ecuadorian financial system, including transfer from foreign bank accounts. Dividends are exempt from this tax, under certain considerations.

Stamp taxes

No stamp taxes are levied in Ecuador.

Redeemable Tax on Non-Returnable Plastic Bottles

A tax is levied on the bottling of beverages in non-returnable plastic bottles utilised for containing alcoholic and non-alcoholic drinks, beverages, soft drinks, and water. In the case of imported beverages, this tax is levied upon their customs clearance for home use.

For each plastic bottle levied with this tax, the rate is up to USD 0.02. This amount is fully reimbursed to whoever collects, delivers, and returns the bottles.

Taxpayers of this tax are the bottlers of drinks contained in plastic bottles and importers of drinks in plastic bottles.

Milk products and medicines filled in plastic bottles are exempt from this tax.

This tax is not considered as a deductible expense for CIT purposes.

Environmental Tax on Vehicle Pollution (ETVP)

ETVP is levied to offset environmental pollution caused by the use of ground transportation motor vehicles.

Taxpayers of ETVP are individuals, undivided inheritances, and national or foreign corporations who are proprietors of ground transportation motor vehicles.

There are several vehicles exempt from this tax, including government vehicles, public transportation of passengers, school buses, taxis, ambulances, moving hospitals, vehicles regarded as 'classical', electric vehicles, and those destined for the use and transportation of handicapped individuals.

The taxable base of the ETVP corresponds to the cylinder capacity of the vehicle motor, expressed in cubic centimetres, and a percentage related to the potential level of environmental pollution provoked by motorised vehicles in connection with the vehicle's motor's years of antiquity.

Payroll taxes

There are no additional payroll taxes applicable other than Social Security contributions (see below).

Social Security contributions

Employers and employees pay contributions to the Social Security at the rates of 12.15% and 9.45%, respectively, on the minimum monthly taxable wages as established for the different contributing categories by the Social Security. Such categories are revised annually.

Labour profit sharing

Although it is not considered a tax, companies are obligated to pay 15% of their pre-tax earnings to their employees. This payment is considered a deductible expense for CIT computation purposes.

Profits generated in fiscal year 2016, to be distributed during the fiscal year 2017, shall not exceed 24 Basic Unified Wages per worker (USD 8,784). Any surplus shall be distributed to the Ecuadorian Social Security Institute.

Municipal taxes**Municipal asset tax**

The municipal asset tax is levied on all individuals and companies required to keep accounting records in accordance with Ecuadorian tax legislation. This tax is levied annually at a rate of 1.5 per thousand (or 0.15%) of total assets less current and contingent liabilities, as shown on the balance sheet.

Ecuador

Municipal real estate tax

The city governments assess an annual municipal property tax, which ranges between 0.25 per thousand and 5 per thousand (0.025% to 0.5%) of the commercial value of the property, as determined by valuation carried out by the city government, for both urban and rural properties (rural property is taxed at a maximum of 0.3%).

Municipal tax on capital gain in the transfer of real estate (Plusvalía)

The real estate transfer tax applies to the transfer of real estate. It is taxed at 10% of profits.

Branch income

Distributed or retained branch profits are taxed at a 22% to 25% rate (*see the Taxes on corporate income section*). No further taxes are payable when profits are remitted to headquarters, except if located in a tax haven country. Re-invested profits are levied at a 12% or 15% CIT rate. Companies must increase their share capital within the following fiscal year to be beneficiaries of the CIT rate reduction.

Countries and territories considered as tax havens by tax authorities

Besides the tax haven list published by the tax authorities shown below, 'low-tax jurisdictions' shall be subject to the same tax treatment. 'Low-tax jurisdictions' are defined as a territory where the effective rate of income tax or taxes of an identical or similar nature is less than 60% of the applicable rate in Ecuador.

- Albania
- American Samoa
- Andorra
- Angola
- Anguilla
- Antigua and Barbuda
- Aruba
- Ascension Island
- Azores Islands
- Bahamas
- Bahrain
- Barbados
- Belize
- Bermuda
- Bonaire, Saba, and St. Eustatius
- Brunei
- Darussalam
- Cabo Verde
- Campione D'italia
- Cayman Islands
- Channel Islands (Guernsey, Jersey, Alderney, Greater Sark, Herm, Little Sark, Brechou, Jethou, Lihou)
- Christmas Islands
- Cocos (Keeling) Islands
- Cook Islands
- Curaçao

- Turks and Caicos Islands
- Tuvalu
- United Arab Emirates
- Vanuatu
- Virgin Islands (British)
- Virgin Islands of the United States
- Western Samoa
- Yemen

Income determination

Inventory valuation

The valuation of inventories is not specifically treated in the tax law, IFRS must be applied.

Capital gains

Gains from stock/shares sales and gains from investment funds and investment trusts are levied with income tax. Gains on the sale of fixed assets are added to the taxable base and levied at regular CIT rates, except gains derived from occasional sales of real estate, which are tax exempt.

Dividend income

Dividends received by a resident company or foreign company, not domiciled in a tax haven, from a resident company are tax exempt.

Interest income

In general terms, interest income is considered as part of the CIT base for Ecuadorian entities.

Foreign income

Foreign-source income is considered exempt for tax purposes if the company demonstrates that the income tax was paid abroad. Income generated in tax haven jurisdictions is not considered to be part of this exemption and should be added to regular income.

Deductions

As a general rule, payments on operations that exceed USD 5,000 should be made through an institution of the financial system; otherwise, such operations will become non-deductible.

Depreciation and amortisation

Straight-line depreciation applies at rates specified by law. The director of the Internal Revenue Service of Ecuador can authorise higher rates of depreciation in cases such as obsolescence, excessive use, and faster than expected wear-out of assets.

Annual depreciation rates are as follows:

Asset	Depreciation rate (%)
Real estate (except land), aircraft, naval crafts, and similar property	5
Facilities, machinery, equipment, and furniture	10
Vehicles, trucks, and tractors used for construction	20
Computer equipment and software	33.33

Depreciation rates apply to the cost of assets.

In the case of vehicles, if, at the time of purchase of the vehicle, its appraisal exceeds USD 35,000, the deductibility on the excess will not apply, unless it is an armoured car or a vehicle exempt from the tax on vehicles. The limitation on the deductibility will also not apply in the cases of taxpayers that have car rental business as their only activity.

Intangible assets are amortised either within the terms specified in the contract or over a 20-year period.

Ecuador

Goodwill

Goodwill can be amortised in Ecuador in some instances.

Organisational and start-up expenses

Organisation, experimentation, and preoperational expenses are to be amortised over five years at the rate of 20% per year.

Interest expenses

Interest on debts incurred for business purposes are deductible.

In general, foreign loan interests are deductible for CIT purposes to the extent that the credits are registered before the CBE and the interest rates do not exceed the referential rates established by the CBE.

If the above-mentioned criteria are not met at the moment of the registration of the loan before the CBE, the excess will not be deductible for CIT purposes. This does not eliminate the obligation of the WHT on the total amount of the interests.

Interest paid on loans obtained from non-resident financial institutions is deductible and not subject to withholding tax (WHT) unless the interest rate is higher than the referential interest rate established by the CBE. In such cases, any excess is subject to a 22% WHT (*in all cases where a 22% WHT is applicable, please refer to the Withholding taxes section for more information*). The above-mentioned rules have limitations for financial entities domiciled in tax haven countries.

Interest paid for loans granted by a related party are subject to WHT at 22% over the gross amount.

Bad debt

If the bad debt provision is less than 1% of the portfolio granted in the year, it will be deductible. Any excess will be non-deductible.

Charitable contributions

Payments for charitable contributions are non-deductible for CIT purposes.

Fines and penalties

Interest and fines paid as penalties imposed on late payments of tax obligations and on CIT payments are not deductible for CIT calculation purposes.

Taxes

Taxes, rates, and levies related to the generation of taxable income, as well as contributions to the Social Security system, are deductible.

Net operating losses

The carryforward of losses is allowed to a maximum of five years, with an amortisation limit of 25% per year over the taxable base. There is no loss carryback.

Payments to foreign affiliates

In most cases, payments made abroad are deductible, as long as income taxes have been withheld (at the rate of 22% and 35% over the taxable base) and do not exceed some maximum limits. Professional fees, royalties, commissions, or any payment made abroad is subject to WHT at a rate of 22% and 35% over the taxable base. Payments on imports are deductible and are not subject to WHT.

Group taxation

Group taxation is not permitted in Ecuador.

Transfer pricing

The transfer pricing regime in Ecuador is based on the Organisation for Economic Co-operation and Development (OECD) guidelines. Related-party transactions must be carried out at arm's length. Formal documentation requirements exist.

A regulation has established the procedures to follow in order to apply for an advance pricing agreement (APA) from the tax authorities in regards to transfer pricing methods for related-party transactions. Accordingly, the taxpayer may submit a formal application for a binding rule.

Thin capitalisation

A thin capitalisation rule on foreign loans granted by related parties at a 3:1 ratio over equity must be considered. For branches of a foreign corporation, only capital must be taken into account.

Controlled foreign companies (CFCs)

There are no CFC provisions in Ecuador.

Tax credits and incentives**Foreign tax credit**

There are no provisions in Ecuador for a foreign tax credit. In general terms, income taxed abroad is considered as exempt income, with some special exceptions.

Handicapped employee and new employee hiring incentives

An amount equivalent to 150% and 100% of remunerations of handicapped and new employees, respectively, can be considered as an additional deduction for income tax calculation purposes. In the case of handicapped employees, the deduction will apply over the excess of the minimum handicapped employees that the employer is obligated to hire. New employees must work with the company for at least six months.

CIT exemptions

Investments made by new companies located outside the cities of Quito and Guayaquil, in specific sectors determined by law, will have a five-year CIT exemption.

Tax credit on remittance tax paid

5% remittance tax paid on imports of raw material and goods included in a list issued by the authorities and used for the production of other goods and services can be considered as a tax credit for CIT computation purposes.

Withholding taxes

Dividends paid to non-resident entities generally are not subject to WHT. However, dividends paid to non-resident entities in tax haven countries are subject to 13% WHT.

Revenues from occasional services provided by non-resident individuals are levied at 22% WHT. Payments made abroad to non-resident individuals and companies are subject to a 22% WHT. Other payments made abroad, other than dividends or profits to neutral jurisdictions, are subject to a 22% WHT.

The Internal Revenue Service of Ecuador establishes WHT percentages on local payments, which are not greater than 10%. Current rates are 1%, 2%, 8%, and 10% withholding. Specifically:

- Dividend payments to resident companies are subject to a 0% WHT.
- Dividend payments to resident individuals are subject to a 0% to 13% WHT.

Ecuador

- Interest payments to resident companies are subject to a 0% to 2% WHT.
- Interest payments to resident individuals are subject to a 2% WHT.
- Royalty payments to resident companies are subject to an 8% WHT.
- Royalty payments to resident individuals are subject to an 8% WHT.

Tax treaties

As a member of the Andean Community, Ecuador has adopted Decision 578, which provides relief from double taxation for individual or company members. Furthermore, Ecuador has similar tax treaties with the countries provided in the table below.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Resident corporations	0	0 to 2	8
Resident individuals	0 to 13	2	8
Non-resident corporations and individuals:			
Non-treaty	0/13	0/22	0/22/35 (1)
Treaty:			
Andean Community	0	22	22
Belgium	0	10	10
Brazil	0	15	15/25 (2)
Canada	0	15	10/15 (3)
Chile	0	15	10/15 (3)
China	0	10	10
France	0	10/15 (5)	15
Germany	0	10/15 (5)	15
Italy	0	10	5
Korea, Republic of	0	12	5/12 (3)
Mexico	0	10/15 (6)	10
Romania	0	10	10
Singapore	0	10	10
Spain	0	5/10 (5)	5/10 (4)
Switzerland	0	10	10
Uruguay	0	15	10/15 (3)

Notes

1. 35% WHT may be applied where the payment's beneficiary is domiciled in a tax haven jurisdiction.
2. The higher rate is applicable to payments for the use of or right to use trademarks.
3. The lower rate is applicable to payments for the use of or right to use industrial, commercial, or scientific equipment.
4. The lower rate is applicable to payments made for copyrights.
5. The lower rate is applicable to interests derived from loans granted for the sale of industrial, commercial, or scientific equipment.
6. The lower rate is applicable to interest payments made to banks.

Tax administration

Taxable period

The fiscal year is the calendar year.

Tax returns

The tax system operates on the basis of self-assessment, with subsequent inspection by the tax authorities.

Tax filing deadlines begin on 10 April and continue up to 28 April. The tax return due dates are determined by the ninth digit of the company's Tax Identification Number (TIN).

Payment of tax

Local tax authorities have established that for CIT purposes, and its corresponding prepayments, companies are obligated to follow IFRS accounting principles.

In general terms, most companies are required to keep accounting records and must make CIT prepayments in two equal instalments in July and September, based on the following calculation:

The sum of 0.4% of the taxable income, 0.4% of total assets, 0.2% of total equity, and 0.2% of deductible expenses from the last fiscal year. Some special considerations might apply depending on the economic activity of the company.

The final CIT obligation cannot be lower than the total amount of the tax prepayment calculated; there are minimum exceptions to this rule. The final CIT payment is due between 10 April and 28 April.

Tax audit process

In general terms, tax authorities look at the consistency of the information delivered by the taxpayers and information reported by third parties. Tax authorities can issue communications in order to require explanations on any detected inconsistency. Additionally, accounting inspections can be performed.

Statute of limitations

Fiscal authorities have three years from the date of filing to start proceedings for tax audits or assessment and collection of taxes.

The statute of limitations is extended from three to six years if the corresponding tax returns have not been filed or are incompletely filed. A tax audit can be reopened, verified, or amended within one year from the date of completion.

Topics of focus for tax authorities

Tax authorities usually focus on substance, formal compliance requirements, and consistency of information filed.

Significant developments

A new law was introduced in Egypt (law no. 96 of 2015) on 20 August 2015 amending certain articles of the Egyptian income tax law. Among these changes is the following:

- The corporate income tax (CIT) rate was amended to be a flat rate of 22.5% on the net profits of a company.
- The 5% surtax on the taxable income exceeding 1 million Egyptian pounds (EGP) was abolished.
- The tax on capital gains on listed shares has been placed on hold for two years as of 17 May 2015.
- There have been recent amendments to the customs duty in Egypt, where new registration processes as well as an increase in some of the customs rates (specifically those imposed on 500 tariff items) have been imposed within the past six months.

Taxes on corporate income

Resident companies are taxed on worldwide income. Non-resident corporations and partnerships pay tax on income derived from their permanent establishments (PEs) in Egypt.

The CIT rate in Egypt is 22.5% as of 20 August 2015 (previously 25%) on the net profits of a company.

The above rate applies to all types of business activities except for oil exploration companies, whose profits are taxed at 40.55%. In addition, the profits of the Suez Canal Authority, the Egyptian Petroleum Authority, and the Central Bank of Egypt are taxable at a rate of 40%.

Surtax

As per the amendments introduced by law no. 96 of 2015, the 5% surtax on the taxable income exceeding EGP 1 million has been abolished.

Local income taxes

There are no local income taxes on corporate income.

Corporate residence

Foreign corporations and partnerships are classified as residents of Egypt if they meet one of the following conditions:

- The entity is established according to the Egyptian law.
- The government or a public authority owns more than 50% of the capital of the entity.

- The effective place of management is in Egypt.

The executive regulations of the law indicate that Egypt is considered as the effective place of management if the entity meets any two of the following conditions:

- Daily managerial decisions take place in Egypt.
- Members of the board of directors hold their meetings in Egypt.
- At least 50% of the board members or managers reside in Egypt.
- The major shareholders (owners of more than 50% of the shares or voting rights) reside in Egypt.

Permanent establishment (PE)

The PE concept is defined in the Income Tax Law as follows:

- Headquarters.
- Branch.
- Building used as sale outlet.
- Office.
- Factory.
- Workshop.
- Places of extraction of natural resources.
- Farms.
- Building site, construction or assembly point, installations, supervisory activities of the same.
- An agent who has the power to ratify contracts on behalf of a foreign company.
- An independent broker or agent who is proved to have dedicated most of one's time during the year in the interest of a foreign company.

A foreign company that is deemed to have a PE risk, according to the Egyptian Companies Law, should incorporate a legal entity in Egypt.

There are several legal forms existing under the Egyptian Companies Law from which a foreign company can choose to incorporate, and these are: joint-stock company, limited liability company, branch, or a representative office.

Other taxes

Sales tax

The standard sales tax rate is 10% of the value of commodities (except for those referred to in special schedules of the law) and 5% to 10% for specific services. Some examples of the commodities subject to sales tax rates other than the standard 10% rate are as follows:

- Cement: 5%.
- Specific types of televisions and fridges: 25%.
- Air conditioners: 25%.

The Sales Tax Department is responsible for assessing the tax on the sales of locally produced goods and imported goods, except for those exempted by a special decree.

Consequently, all natural persons and legal entities are required to collect general sales tax and remit it to the Sales Tax Department. This includes manufacturers and providers of taxable services and every importer of commodities or taxable services.

Customs duties

The liability for customs duty rests with the person who is importing the goods from abroad.

Egypt

Customs duty rates on imported goods range from 5% to 40%, with the exception of vehicles for which different rates apply.

Where entities import machines and equipment as capital assets, and to establish the company's project, the machines and equipment will be charged customs duty at 5%.

Component parts, which are imported to be assembled in Egypt, are assessed customs duty based on the complete product. Then, it is reduced by a percentage ranging from 10% (if the local content of the final product is less than 30%) to a maximum of 90% (if the local content exceeds 60%).

Machines, equipment, and similar capital assets (with the exception of private motor cars) imported on a temporary basis are subject to fees at 20% of the original customs duty for each year or fraction of a year during which they remain in Egypt until they are exported.

It is worth noting that, within the past six months, recent amendments have been introduced in the customs duty law. These amendments include:

- The Ministry of Trade and Industry in Egypt ('the Ministry') issued Resolution no. 43 of 2016 concerning the new rules of registering qualified foreign manufacturers prior to exporting their products to Egypt. The new requirement mandates that foreign manufacturers, their authorised distributors, or companies owning the manufacturer products' trademarks to register with the General Organisation Export and Import Control (GOEIC) in order to clear their products into Egypt for trading purposes. The new requirements are applicable for a wide range of products, including foodstuff, cosmetics, cutlery, steel bars, household appliances, furniture, clothes, shoes, toys, motorcycles, and other products.
- Central Bank Instruction of 21 December 2015 stipulates that customs documents that are related to import transactions conducted through 'cash against documents' must only be exchanged between the importer and exporter's banks. Previously, customs documents were allowed to be sent directly from the exporter to the local importer or its representative in Egypt by mail, courier, etc.
- The Egyptian Authorities through Resolution no. 25 of 2016 have increased the customs duty rate on 500 tariff items effective on 31 January 2016. The customs duty applied to these items has been increased by 10% (e.g. from 5% to 15%, from 30% to 40%). Some of the items subject to increased customs duties are clothes, cosmetics products, vegetables and fruits, furniture, toys, and other goods.
- The Egyptian Customs Authority issued Instruction no. 202 of 2015 enforcing the requirement for submitting attested invoices for import customs purposes. The attestation is only required at the level of the Chamber of Commerce in the exporting country. Although the Egyptian Customs Law and its amendments required the submission of authenticated customs documents already, the submission of an attested invoice was not being enforced at the borders. This Instruction is applied as of 21 January 2016.

Excise taxes

There are no excise taxes in Egypt.

Real estate taxes

The Real Estate Tax Law takes into consideration the different variables that can affect the value of a property, such as location, value of similar buildings, and the economic situation of the district in which the property is located. This is to be updated every five years (most recently in August 2014).

Real estate tax is levied annually on all constructed real estate units, with the exemption of schools, orphanages, charitable organisations, and private residences with a market

value of less than EGP 2 million. This tax covers land and buildings, excluding plant and machinery.

Such tax is assessed based on the rental value of the land and building, and these value assessments are set by the committees, after approval of the Minister or whomever the Minister delegates, and published in the Official Journal. Based on the announcement, any taxpayer can appeal the rental value assessment.

The real estate tax rate is 10% of the rental value, and the calculation of the rental value differs for residential units and non-residential units. Specific percentages of deductions are provided by the law to account for all the expenses incurred by the taxpayer, including maintenance costs.

E

Stamp tax

There are two distinct types of stamp tax, which are imposed on legal documents, deeds, banking transactions, company formation, insurance premiums, and other transactions, as follows:

- The nominal stamp tax is imposed on documents, regardless of their value. The tax rate for items such as contracts is EGP 0.9 for each paper.
- Percentage or proportionate stamp tax is levied based on the value of transactions.

An annual proportional stamp tax at the rate of 0.4%, shared by the bank and the client, is imposed on a bank's loans. This stamp tax is due on a quarterly basis on the beginning balance of each quarter of credit facilities and loans and advances provided by Egyptian banks or branches of foreign banks during the financial year in addition to the amounts utilised within the quarter.

Loans from other establishments are not subject to this tax.

Stamp tax is imposed on advertisements at the rate of 20%.

Payroll taxes

There is no payroll tax other than the employer's social insurance contribution.

Social insurance (employer's contribution)

The social insurance contribution of the employer is 26% of the basic salary (up to EGP 1,120) and 24% of the variable salary (up to EGP 2,110).

Branch income

Branches of foreign corporations operating in Egypt receive tax treatment identical to that of corporate entities for the results of their activities in Egypt.

A branch, but not a subsidiary, may deduct a 'head office charge' of an amount of up to 10% of its taxable income.

According to law no. 53 of 2014, which imposed withholding tax (WHT) on dividend payments, a PE's profits will be deemed dividend payments (and thus subject to 5% tax) if not repatriated within 60 days of the following financial year end.

Income determination

Inventory valuation

Egyptian generally accepted accounting principles (GAAP) should be applied to inventory valuation, and all methods that are acceptable by Egyptian GAAP can be used.

Egypt

The methods acceptable are the same as those acceptable under International Financial Reporting Standards (IFRS).

Capital gains

The new law defines capital gains as the difference between the acquisition cost and the fair value/selling price of the share. As for listed shares acquired before 1 July 2014 and sold after that date, the capital gain will be calculated as the difference between either the acquisition price or the closing price on 30 June 2014 (whichever is higher) and the selling price.

Capital gains tax treatment applicable to resident companies

- Listed shares/securities: Capital gains realised from the sale of listed shares will be subject to 10% WHT. However, law no. 96 of 2015 has put the tax on capital gains on listed shares on hold for two years as of 17 May 2015.
- Unlisted shares/securities: Capital gains realised from the sale of unlisted shares will be subject to CIT (i.e. 22.5%).
- Foreign shares/securities (invested abroad): Capital gains realised from shares invested abroad will be subject to CIT, with a credit to be given for the foreign tax paid.

Capital gains tax treatment applicable to non-resident companies

- Listed shares/securities: Capital gains realised from the sale of listed shares will be subject to 10% WHT. However, law no. 96 of 2015 has put the tax on capital gains on listed shares on hold for two years as of 17 May 2015.
- Unlisted shares/securities: Capital gains realised from the sale of unlisted shares will be subject to CIT (i.e. 22.5%).
- Foreign shares/securities (invested abroad): Capital gains realised from shares invested abroad will not be taxable in Egypt.

Capital losses

A capital loss can be offset against a capital gain arising during the same tax year, provided that they both arise from the sale of shares. Excess capital losses that are not utilised during a tax year can be carried forward for a period of three years and should be offset against capital gains from the sale of shares.

Dividend income

Dividend income treatment applicable to resident companies

A 10% WHT will be imposed on dividends paid by Egyptian companies to resident corporate shareholders. The 10% WHT can be reduced to 5% if both of the following conditions are met:

- The shareholder holds more than 25% of the share capital or the voting rights of the subsidiary company.
- The shares are held for at least two years.

Dividends received by resident companies from other resident companies, and the related costs, are excluded from the recipient companies' taxable profit.

Dividend income treatment applicable to non-residents

A 10% WHT will be imposed on dividends paid by Egyptian companies to non-resident corporate shareholders. The 10% WHT can be reduced to 5% if both of the following conditions are met:

- The shareholder holds more than 25% of the share capital or the voting rights of the subsidiary company.

- The shares are held for at least two years.

Participation exemption

90% of the dividends distributed by a non-resident corporate shareholder to a resident one will be exempt from tax (i.e. only 10% of the amount of the dividends will be subject to tax). Such exemption can be benefited from if both of the following conditions are met:

- The shareholder holds at least 25% of the share capital or the voting rights of the subsidiary company.
- The company holds or commits to hold the shares of the subsidiary for at least two years.

E

Permanent establishments (PEs)

A PE's profits can be deemed dividend payments, and thus subject to the above treatment, if they were not repatriated to the parent company within 60 days of the PE's financial year end.

Stock dividends

Stock dividends are not subject to tax in Egypt.

Interest income

Interest expenses are deducted from interest income when calculating the interest income to be included in taxable income if certain conditions are met.

Rent/royalty income

Rent/royalty income are not taxed separately; they are considered as part of the company's income and taxed accordingly (i.e. at the 22.5% CIT rate).

Foreign income

Income from any source, domestic or foreign, received by a corporation within Egypt is subject to CIT. The scope of tax covers the activities carried out inside and outside Egypt, which are administered or managed within Egypt.

There is no provision for deferring income earned abroad.

Deductions

In order for expenses to be acceptable for tax deduction, such expenses must be:

- actual and supported by documents
- business related, and
- necessary for performing the company's activity.

Depreciation and amortisation

The tax law set the depreciation and amortisation rates for tax purposes to the following:

- 5% of the cost of purchasing, establishing, developing, and renovating buildings and establishments is deductible based on the straight-line method.
- 10% of the cost of purchasing, developing, and improving intangible assets is deductible based on the straight-line method.
- Computers, information systems, software, and data storage sets are depreciated at a 50% rate on a declining-balance method.
- All others assets are depreciated at a rate of 25% of the depreciation basis for each fiscal year, on a declining-balance method.

Egypt

Accelerated depreciation

A company may have the option to deduct 30% accelerated depreciation from the cost of new or used machines and equipment used in industries during the first fiscal year of their employment. This should be done by submitting a request to the tax authority prior to deducting the 30% accelerated depreciation.

Goodwill

According to Article 25 of the Egyptian Income Tax Law, goodwill is amortised at the rate of 10% using the straight-line method.

Start-up expenses

Start-up expenses are tax deductible, and the whole amount can be amortised for the first year.

Interest expenses

Interest expenses are deductible for tax purposes after offsetting any tax-exempt interest income.

Interest expense deductions are only allowed if the following conditions are fully met:

- The interest rate does not exceed twice the discount rate as determined by the Central Bank of Egypt at the beginning of the calendar year in which the tax year ends.
- The interest expense is in return for loans complying with the local thin capitalisation rule: 4:1 debt-to-equity ratio.
- The Egyptian transfer pricing rules (i.e. arm's-length principle) are being followed (*see Transfer pricing in the Group taxation section for more information*). In case of a tax audit, if the interest rate isn't proven to be at arm's length, the tax authority has the right to adjust this price to arrive at the 'arm's-length price' and re-calculate the taxes due accordingly.
- The loan is business related.

Bad debt

According to Article 28 of the Egyptian Income Tax Law, deduction of bad debts shall be allowed, subject to submitting a report from the external auditor indicating the fulfilment of the following conditions:

- The company is maintaining regular books and records.
- The debt is related to the company activities.
- That debt value was previously included within the company accounts and records.
- The company has taken serious procedures for settlement of such debt and has been unable to collect it after 18 months from its due date.

Charitable contributions

Donations to the government are tax deductible. Donations to Egyptian charities are also deductible, but only up to 10% of taxable income.

Fines and penalties

Financial fines and penalties paid by the taxpayer because they or one of their subordinates has committed a deliberate felony or misdemeanour are not deductible.

Taxes

Income tax payable according to the Income Tax Law is not deductible.

Other significant items

The following other items are not deductible:

- Reserves and appropriations of all different types.

- Profit shares, distributed dividends, and the attendance fees paid to shareholders for attending the general assembly's meetings.
- Compensation and allowances obtained by the chairmen and board members.
- Workers profit share to be distributed according to the law.

Net operating losses

A company may carry losses forward for a period not to exceed five years. Nevertheless, if a change occurs in the ownership of its capital exceeding 50% of the shares, stocks, or the voting rights, if the company is either a joint-stock company or a company limited by shares whose shares are not listed on the Egyptian Stock of Exchange, and if the company changes its activity, the company cannot carry the losses forward.

In general, companies cannot carry losses back, except for contracting companies, which are allowed a loss carryback period of five years.

Payments to head office

A branch may deduct head-office charges of up to 10% of its taxable income. Moreover, the branch or subsidiary should withhold taxes before the payment of interest, royalties, and service fees to non-resident foreign corporations or affiliates.

Group taxation

The Egyptian tax law treats every company in a group of companies as a separate legal entity. Thus, affiliated companies or subsidiaries cannot shift the profits/losses within the group.

Transfer pricing

Transfer pricing rules follow the arm's-length principle, specifying that any transaction between related parties should be at arm's length (i.e. market value).

The law does not specify penalties with regard to transfer pricing. However, the law states that the Egyptian tax authorities may adjust the pricing of transactions between related parties if the transaction involves elements that would not be included in transactions between non-related parties, and whose purpose is to shift the tax burden to tax exempt or non-taxable entities. Where this is the case, the tax authorities may determine the taxable profit on the basis of the neutral price. The acceptable methods for determining such neutral price, according to the rule of the law, are as follows:

- Comparative free price (same as Comparable Uncontrolled Price method [CUP]).
- Total cost with an added margin of profit (same as Cost Plus method).
- Resale price.

On 29 November 2010, the Egyptian Tax Authority launched the Transfer Pricing Guidelines ('TP Guidelines'). The TP Guidelines are being issued as a series of parts, the first part of which was issued in final version to the public and provides guidance on the arm's-length principle, how to establish comparability, choosing the most appropriate transfer pricing method(s), and documentation requirements. The coming parts should cover more complex transfer pricing topics, specifically transactions involving intellectual property (IP), intra-group services, cost contribution arrangements, and advanced pricing agreements (APAs).

Taxpayers are required to prepare contemporaneous documentation studies to support the arm's-length nature of their controlled transactions. The Egyptian tax authority does not require the submission of transfer pricing documentation studies with the tax return; rather, they are required to be available upon request in a tax audit. Studies are acceptable in English, but a translation may be requested from the taxpayer.

Egypt

The Egyptian tax authority explained that the TP Guidelines will be utilised as a practical guide to assist taxpayers and tax inspectors in understanding how to implement and examine transfer pricing transactions. The Egyptian TP Guidelines were compared to the Organisation for Economic Co-operation and Development (OECD) by an OECD representative and were found to be similar.

Thin capitalisation

The Egyptian thin capitalisation rule provided by the Egyptian Income Tax Law dictates that the debt-to-equity ratio is 4:1. Accordingly, the Law disallows the deductibility of debit interests of Egyptian companies on loans and advances if such loans and advances are in excess of fourfold the equity average (which is calculated according to the financial statements prepared pursuant to the Egyptian accounting standards).

The debit interest includes all amounts chargeable by the company in return for loans, advances of any kind obtained thereby, bonds, and bills. Loans and advances include, for purposes of this item, bonds and any form of financing by debts through securities with fixed or variable interest.

For determining the equity, the following items represent the basis for the calculation: the paid-up capital in addition to all reserves and dividends reduced by retained losses, provided that the differences of the adjusted account is not included in the reserves account and is determined to be non-taxable. In case of retained or carryforward losses, they must be used to reduce retained profits and reserves solely; the percentage is calculated on the basis of total loans and advances in proportion to the remaining equity amount after deducting the retained losses with a minimum of the paid-up capital.

Controlled foreign companies (CFCs)

Egypt currently does not define specific rules for CFCs; however, in an effort to exert similar CFC provisions, investments are evaluated according to the Egyptian Accounting Standards and the equity rights method where the profits generating from the disposal of such investments are determined on the basis of the difference between the cost of investment acquisition and its sale value.

Tax credits and incentives

Egypt offers no specific tax incentives.

Foreign tax credit

The foreign tax paid by a resident company on its profits earned abroad is deductible from the tax payable in Egypt; however, losses incurred abroad are not deductible.

Withholding taxes

A corporation paying invoices must withhold 0.5% to 5% of payments, depending on the services and commodities, to local taxpayers and remit them quarterly to the tax department.

A 10% WHT is imposed on dividends paid by Egyptian companies to resident corporate shareholders. *See Dividend income in the Income determination section for further information.*

Payments of dividends, interest, royalties, and services by a domestic corporation to foreign or non-resident bodies are subject to WHT as follows.

Dividends to non-residents

A 10% WHT is imposed on dividends paid by Egyptian companies to non-resident corporate shareholders (see *Dividend income in the Income determination section for further information*). However, an applicable double tax treaty (DTT) between Egypt and the foreign country may result in the reduction of such tax rate.

Interest to non-residents

Interest on loans with a three-year term or more entered into by private sector companies is exempt from WHT, while loans of less than three years are subject to 20% WHT on interest. However, an applicable DTT between Egypt and the foreign country may result in the reduction of such tax rate. *Please see below for the ministerial decree affecting the treatment of interest and royalty payments.*

Royalties to non-residents

Royalty payments are subject to the 20% WHT. However, an applicable DTT signed between Egypt and the foreign country may result in a reduction in this rate. *Please see below for the ministerial decree affecting the treatment of interest and royalty payments.*

Service payments to non-residents

Service payments are subject to the 20% WHT. However, an applicable DTT signed between Egypt and the foreign country may result in the exemption of these payments if the services are performed abroad and not through PE in Egypt.

For payments withheld on behalf of non-resident entities, tax shall be remitted to the tax authority the day following the withholding of the amount.

Tax treaties

Egypt has concluded DTTs with about 50 countries, which could change the tax treatment of transactions carried out between Egyptian entities and residents of a treaty country.

Notes

- Dividends paid out by a company resident of Egypt to an individual of the other contracting state shall not be taxed more than the maximum amount mentioned. 15% in all other cases.
- Reduced rate of the gross amount of dividends is applied if the beneficial owner is a company that holds at least 25% of the company's capital. Higher rate applies in all other cases.
- In the absence of specific provisions, dividends may be taxed under the local law at 10%, which may be reduced to 5% under certain conditions.
- Lower rate applies if the foreign company holds more than 25% of the capital in the company.
- Lower rate applies if the beneficial owner is a company.
- Taxed in both the resident and source state.
- The reduction in the rate does not apply if the recipient is engaged in a trade or business in the United States through a PE that is in the United States. However, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States to apply the reduced treaty rate to that item of income.
- See *Dividend income in the Income determination section for descriptions of instances when the 5% rate applies.*

Procedures for applying the WHT on payments to non-residents

Ministerial decree no. 771 for 2009 dictates that the reduced rate of WHT on interest or royalties provided by an applicable DTT should not be automatically applied. The rate of 20% (Egyptian tax rate) should be imposed upon deduction. However, under certain conditions, the foreign recipient of payments will be able to get a refund for the amount resulting from the variance between the normal rate of 20% and the reduced treaty rate.

Certain documents should be submitted to the tax authority along with the refund claim.

A special unit responsible for interest and royalty WHT refunds is tasked with reviewing each refund case and with issuing refund letters (subject to compliance with the requirements of the 2009 ministerial decree). A refund letter is required to be able to get a refund of excess WHT from the tax office to which the taxes were actually paid.

Please note that free zone entities, which are considered tax exempt, are obligated to withhold tax when dealing with non-resident entities and shall remit the tax to the tax authority.

In April 2015, the Egyptian tax authority issued new Executive Regulations to amend certain articles of the original Executive Regulations of the Egyptian Income Tax Law no. 91 of 2005. The amendments introduced by the new Executive Regulations abolished some provisions of article 76 of the original Executive Regulations of the law; however, it's still controversial whether or not the provisions of decree 771 regarding paying the 20% tax and claiming a refund should continue to apply or the DTT should apply automatically.

Tax administration**Taxable period**

The tax year is the financial year of the taxpayer.

Tax returns

The taxpayer is required to assess taxes due for every financial year and settle them with the tax return.

The CIT return is due within four months from the end of the financial year; consequently, if a company's financial year ends 31 December, then the tax return has to be filed before the end of April of the following year.

For the filing requirements of the WHT on dividends, the entity executing the transaction should withhold 1% of the dividends distributed by an Egyptian entity, and remit it to the tax authority at a maximum date of the fifth day of the month following the month at which the distribution took place. This amount is considered part of the dividends tax. Later, the shareholder should remit the remaining amount of the tax to the tax authority.

Payment of tax

Advance payments are deducted from taxes assessed per the tax return, and the balance is payable in a lump sum at the date of submitting the tax return.

Note that tax on capital gains realised on shares listed on the Egyptian stock exchange should be remitted to the tax authority by the legal entity undertaking the sale transaction. However, in case the shares are unlisted in the Egyptian stock exchange, the tax on capital gains should be withheld by any party executing the transaction.

The advance payment (i.e. WHT) is submitted on a quarterly basis.

Egypt

Penalties

If the taxpayer included a tax amount in the tax return that is less than the finally assessed tax, the taxpayer is liable to a fine based on the non-included percentage, as follows:

- 5% of the tax payable on the non-included amount if such amount is equivalent to 10% up to 20% of the final tax due.
- 15% of the tax payable on the non-included amount if such amount is more than 20% up to 50% of the final tax due.
- 40% of the tax payable on the non-included amount if such amount is more than 50% of the final tax due.

Tax audit process

The audit cycle proceeds as follows:

Inspection

The tax authority inspects the company based on its documents and records in order to assess the total tax due on the company and determines the difference in tax due as per the company declaration and the tax authority assessment. The authority issues an assessment including the total tax due on the company. If the company objects to the inspection result, the dispute is transferred to the Internal Committee.

Internal Committee

The dispute is transferred to the Internal Committee to discuss the dispute points that arose from the inspection further to issue a modified assessment based on its opinion. If the company objects to the Internal Committee result, the dispute is transferred to the Appeal Committee to review the dispute points arising from the Internal Committee.

Appeal Committee

The Appeal Committee's decision is final and binding on the company and the tax department unless a case is appealed by either of them at the court within 30 days of receiving the decision. Based on the fact that the total taxes due on the assessment as per the Appeal Committee are considered final if they are not paid within the appropriate period, there will be penalties for the late payment.

Court

If the decision of the Appeal Committee is not satisfactory for either party, the case will be transferred to the court system, which is considered the final stage of the disputes. Normally, the court will appoint an expert witness to investigate the case and prepare a report. The court process usually takes a long period of time.

Statute of limitations

The statute of limitations is five years according to the Egyptian Income Tax Law and is extended to be six years in case of tax evasion.

Topics of focus for tax authorities

The most important topic for tax authorities is transfer pricing.

General anti-avoidance rule (GAAR)

A GAAR is applicable to arrangements entered into on or after 1 July 2014. The primary objective of the GAAR is to deter taxpayers from entering into abusive arrangements for the purpose of obtaining an abusive tax advantage. The law stipulates that the tax effect of any transaction whose main purpose, or one of the main purposes thereof, is tax avoidance shall not be reckoned with. In this case, the crucial factor when making tax assessments is the real economic substance of the transaction in question. The burden of proving that the main purpose, or one of the main purposes, of conducting a transaction has been to avoid taxation lies with the tax authority.

Significant developments

Law for the Special Contribution of Large Taxpayers for the Public Safety Plan

On 29 October 2015, the Legislative Assembly passed the Special Contribution of Large Taxpayers for the Public Safety Plan, which taxes domestic and foreign legal entities with net earnings greater than 500,000 United States dollars (USD) within a fiscal year through a special contribution of 5% of the total amount thereof, which must be filed by a return within the first four months of the following year.

Entities that benefit from tax incentives under special regimes, such as the free trade zone program and the international services program, also are subject to the contribution tax.

The 5% contribution tax is in addition to the 30% corporate income tax (CIT) and the 5% withholding tax (WHT) applicable to dividend distributions (25% if the parent company resides in a tax haven). The special contribution tax is not deductible for CIT purposes.

The taxable base consists of 'net gains' obtained during the tax year (1 January to 31 December). Income partially or totally exempt from CIT is still subject to the special contribution. 'Net gains' means net income subject to CIT plus excluded or exempt income reduced by expenses related to that excluded or exempt income.

Taxpayers must inform the Salvadoran tax authorities of the total amount of gains subject to this tax and the corresponding tax liability by means of a specific tax return that must be filed within the first four months of the following year (i.e. 1 January to 30 April of the following year).

The special contribution tax applies to net gains generated during the five-year period beginning 13 November 2015. For tax year 2015, the tax applies from 13 November 2015.

Law of Special Contribution for Security and Coexistence

The Law of Special Contribution for Security and Coexistence is effective from November 2015 and is directed to providers of telecommunications services in all its forms; providers of subscription television services, by wire, wireless, or any other physical medium; service providers to transfer data between two or more points related to information provided by the user, by any means or technological means; and taxpayers that transfer technological devices, terminals, or equipment and accessories to enable the use of the services listed in Article 3 of the Law of Special Contribution for Citizen Security and Coexistence. The rate of the special tax is 5% and must apply to the taxable amount determined according to the law.

El Salvador

Reduced WHT rate for securities listed on the Salvadoran stock exchange

Pursuant to Decree No. 179, income received from securities listed on the Salvadoran stock exchange by entities not resident in El Salvador is subject to a reduced WHT rate of 3%. This is a substantial reduction from the standard WHT rate of 20% (25% if the income was received by entities resident in a tax haven).

Taxes on corporate income

The CIT rate is 30%, and this rate is applicable on the total amount of the company's revenues.

CIT is based on the principle of territoriality, and, by general rule, taxes are paid on goods located, activities realised, and capital invested in El Salvador as well as on services rendered or utilised in the country. Nevertheless, there is a special rule regarding securities and financial instruments, since such income is considered to be obtained in El Salvador if the issuing entity is domiciled in El Salvador.

Taxable income is equal to gross income net of costs and expenses considered necessary for generating and maintaining the related source of income and other deductions allowed by law. Gross income is comprised of income or profits collected or accrued, either in cash or in kind, from any sources in El Salvador.

Corporations are required to follow the accrual method of accounting.

Minimum payment of income tax

Minimum payment of income tax was declared unconstitutional in April 2015.

Income tax advance payment

A 1.75% tax is applied to gross revenues accrued. This tax is paid monthly as an advance payment that is applied against the CIT at the end of the year.

Special Contribution of Large Taxpayers for the Public Safety Plan

Effective from November 2015, a special tax is levied on net earnings of taxpayers that are equal to or greater than USD 500,000, with a rate of 5% over such net earnings. The contribution shall be applicable for legal persons, unions of persons, and irregular companies, domiciled or not. This law will be applicable for the next five years.

Local income taxes

There is a municipal tax related to taxpayers' income. This tax depends on the location of the operations where the taxpayer performs its activity.

Corporate residence

A company incorporated in El Salvador is a resident entity in the country for tax purposes and subject to CIT on Salvadorian-source income. Also, branches from foreign companies authorised in El Salvador and entities operating as a permanent establishment (PE) are considered resident entities for tax purposes and subject to CIT on Salvadorian-source income.

The general rule for the determination of the corporate domicile is that it will be the one established on the incorporation document.

Permanent establishment (PE)

A foreign resident creates a PE in El Salvador when corporate activities are performed through one of the following:

- A fixed place of business where partially or totally developed business activities or personal independent services are carried out (e.g. branches, offices, factories, workshops, locations of natural resource exploitation).
- A different person, who is not an independent agent, who has the following qualities: (i) acts on behalf of the subject, (ii) has authority to conclude or carry out contracts in the subject's name, and (iii) habitually exercises this authority to conclude or carry out contracts in the subject's name.
- A construction/installation project or a supervision activity that exceeds six months.

Other taxes

E

Value-added tax (VAT)

VAT (i.e. *Impuesto al Valor Agregado* or IVA) is levied at a rate of 13% over the taxable amount. As a general rule, the taxable amount is the price or remuneration agreed upon by the parties. For imports, the taxable amount is the customs value.

The following transactions are subject to VAT when performed within the Salvadoran territory:

- Transfer/sale of tangible movable goods.
- Withdrawal of tangible movable goods from the inventory made by the company for self-consumption by its partners, directors, or personnel.
- Import of goods and services.
- The supply of services of any type, whether permanent, regular, continuous, or periodic, including technical advice and project designs; lease and sublease agreements over tangible goods; lease and sublease agreements over real estate for commercial purposes; lease of services in general; construction of real estate properties or building contracts; auctions; freight, whether inland, air, or maritime; and lease, sublease, and any form of use regarding trademarks.

The following imports are exempt from VAT:

- Imports made by diplomats and consulate representatives of foreign nations with presence in the country according to international agreements adopted by El Salvador.
- Imports made by international organisations to which El Salvador is a party.
- Traveller's luggage according to customs regulations.
- Donations to non-profit organisations.
- Imports made by municipalities, if the goods imported are for the public benefit of the community.
- Imports of machinery by taxpayers duly registered for this purpose, which will be part of the taxpayer's fixed assets.
- Vehicles for public transportation, which can only be transferred after five years.

The following services are exempt from VAT:

- Health services rendered by public institutions.
- Lease and sublease of real estate properties for housing.
- Services rendered under a labour relationship, as well as those rendered by public and municipal employees.
- Cultural public performances authorised by competent authorities.
- Educational services rendered by authorised entities, i.e. *Ministerio de Educación* (the Ministry of Education).
- Interest on deposits and loans provided by local financial institutions or entities registered at the Salvadoran Central Bank (BCR).
- Interest on securities issued by the government and/or private entities traded through a stock exchange.

El Salvador

- Water supply by public institutions.
- Public transportation.
- Insurance premiums covering individuals, and reinsurance in general.

VAT is levied on exports at a rate of 0%. Foreign-source income is not subject to VAT.

VAT paid by a registered taxpayer company on its purchases (tax credits) is credited against VAT charged to its customers (tax debits) on a monthly basis.

VAT returns are filed on a monthly basis within the first ten working days of each month following the period under taxation.

Customs duties

In El Salvador, the *Arancel Centroamericano de Importación* (Central America Import Duty) is applied, which is constituted in the *Sistema Arancelario Centroamericano* (SAC) (Duty Central American System) and its correspondent duties for import.

All duties for import are *ad valorem* and are applied at the cost, insurance, and freight (CIF) value of the merchandise. The duty is common for all the countries in Central America.

Excise taxes

Tax on simple or sweetened soft drinks

An *ad valorem* tax on simple or sweetened soft drinks is levied at the rate of 10% over the selling price to the public as suggested by the manufacturer, importer, or distributor, excluding VAT and returnable bottle taxes.

Tax on the production and importation of alcohol and spirits

A tax is levied on domestically produced or imported alcohol and spirits at rates ranging from USD 0.09 to USD 0.16 for each 1% of alcohol volume per litre or in proportion thereof. Spirits and alcohol also have an *ad valorem* tax levied at the rate of 8% over the suggested selling price to the public, excluding VAT.

Tax on tobacco products

A tax is levied at USD 0.005 per cigarette, cigar, little cigarette, or other tobacco product. Also, an *ad valorem* tax is levied at the rate of 39% over the suggested consumer selling price to the public, excluding VAT.

Special Contribution for Security and Coexistence

Effective from November 2015, a special tax is directed to providers of telecommunications services in all its forms; providers of subscription television services, by wire, wireless, or any other physical medium; service providers to transfer data between two or more points related to information provided by the user, by any means or technological means; and taxpayers that transfer technological devices, terminals, or equipment and accessories to enable the use of the services listed in Article 3 of the Law of Special Contribution for Citizen Security and Coexistence. The rate of the special tax is 5% and must apply to the taxable amount determined according to the law. This law will be applicable for the next five years.

Tax on transfer of real estate property

A 3% tax is applied to transfers of real estate property. This tax is applied to the amount by which the value of the real estate exceeds USD 28,571.43.

Stamp taxes

No stamp taxes are assessed as the pertinent law was abrogated in 1992.

Capital gains tax

Capital gains are taxed at a flat rate of 10% of net profits, except when gains are realised within 12 months following the purchase date, in which case they are taxed as ordinary income. Capital losses can only be offset against capital gains. Whenever capital losses exceed capital gains, the remaining balance may be carried forward to future capital gains within a five-year period.

Annual business tax

Companies are required to register themselves with the Registry of Commerce and pay an annual business licence fee assessed on the company's assets, as follows:

Assets (USD)	Fee (USD)
2,000 to 57,150	91.43
57,151 to 114,286	137.14
114,287 to 228,572	228.57
An additional charge for each office, branch, or agency property of a company	34.29

If the assets exceed the amount of USD 228,572, there is an additional duty of USD 11.43 for each additional USD 100,000 in assets or fraction thereof. In any case, the relevant duties are limited to USD 11,428.57.

Social security contributions

Social security contributions (ISSS) are mandatory for both employee and employer and are destined to public health services. The employee's contributions are withheld from the employee's monthly salary and are transferred by the employer to the Salvadorian Institute of Social Security through monthly payrolls. The contribution amounts are summarised in the table below:

Monthly employee's salary (USD)	Employee's rate (%)	Employer's rate (%)
0 to 1,000	3	7.50

Note: For individuals who have salaries above USD 1,000, the social security contribution applicable is USD 30.00 for the employee and USD 51.49 for the employer.

Contributions to pension fund (AFP) are mandatory for both employee and employer. The employee's contributions are withheld from the employee's monthly salary and are transferred by the employer. The employer's contributions are paid to the AFP. Both contributions are reported to the Pension Fund Administrator through a monthly payroll. The percentages are summarised below:

Monthly employee's salary (USD)	Employee's rate (%)	Employer's rate (%)
0 to 6,377.15	6.25	6.75

Payroll taxes

Entities with more than ten employees must also pay a payroll tax that is destined to the National Institute of Professional Development (INSAFORP), which promotes professional development through courses and complementary studies. The percentages are summarised below:

Monthly employee's salary (USD)	Employer's rate (%)
0 to 1,000	1
Over 1,000	0

El Salvador

Tax on Financial Operations

A tax on the amount paid for any type of check and electronic transfers in the country has been established. The taxable events are debits on deposit accounts and money orders or wire transfers corresponding to:

- Payments by electronic transfer when the transaction value exceeds USD 1,000.
- Transfers to third parties, in any form or by any technological means, when the value of the transaction exceeds USD 1,000.
- Disbursements of loans or financing of any kind.
- Transactions between the entities of the financial system, based on any instruction of their clients or for their own interest.

These transactions are taxable at a rate of 0.25% on the amount of the transactions.

Additionally, the Law of Tax on Financial Operations introduced a WHT to control liquidity, which consists of a deduction of 0.25% on the excess of USD 5,000, originated from operations deposits, payments, and cash withdrawals, individually or cumulatively, in each month.

Municipal taxes

Municipal taxes are assessed according to a progressive tariff list issued by each municipality. The taxes are applicable to the company's assets located in each municipality and are paid on a monthly basis. The tariff lists are applied separately to commercial, industrial, and financial sectors.

Branch income

In El Salvador, tax rates on branch profits are the same as for domestic corporations. Dividends and profits paid or credited by headquarter (HQ) representatives, affiliates, branches, subsidiaries, agencies, and others not domiciled in El Salvador are subject to 5% WHT.

The law does not provide separate treatment for administrative offices located in El Salvador.

The general regulations indicate that branches, agencies, and/or establishments permanently operating in the country, with owned or leased installed infrastructure, employing domestic staff, and performing their economic activities in a material and perceptible manner in the country are subject to the same taxes as companies duly incorporated.

Income determination

In El Salvador, income is considered taxable if it is obtained from goods located in the country, activities undertaken within the national territory, or services rendered or utilised in the country.

Inventory valuation

For tax purposes, taxpayers are authorised to use any one of the following inventory methods, provided they are technically appropriate for the particular business, consistently applied, and easily audited:

- Purchase or manufacturing costs.
- Last purchase costs.
- Direct average allocation costs.
- Average costs.

- Last in first out (LIFO).
- First in first out (FIFO).
- Specific methods for fruits and farm products.
- Specific method for cattle.

Other than the methods enumerated above, taxpayers are not permitted to use other methods for valuing their inventories except with prior authorisation of the tax office, provided that in the latter's judgement the method in question contains clear determination and *bona fide* elements available to the office. Once an inventory valuation method is adopted, the taxpayer may not change it without the tax office's prior authorisation.

E

Capital gains

Capital gains are subject to capital gains tax, except when gains are realised within 12 months following the purchase date, in which case they are taxed as ordinary income. See *Capital gains tax in the Other taxes section for more information.*

Dividend income

Cash profits or dividends remitted or credited to shareholders are subject to a 5% WHT.

Interest income

Interest income is taxable in El Salvador when the entity paying the interest is resident in El Salvador, when the capital is invested in the country, and when the risk is assumed in El Salvador.

Partnership income

Partnership income is taxable if it is Salvadorian-source income; nevertheless, no specific provisions exist in El Salvador regarding partnership income.

Rent/royalties income

Rent and royalties income is taxable if it is Salvadorian-source income; nevertheless, no specific provisions exist in El Salvador regarding rent and royalties income.

Condoned debts

Condoned debts are considered taxable income and must be included as part of the income generated in that fiscal period.

Foreign income

Under the territoriality source of income principle, extraterritorial income is not taxable in El Salvador, with the exception of income and other benefits from securities and other financing operations. In this case, interest arising from loans granted to a resident of El Salvador is considered as taxable income, and the person or entity making the payment should withhold 10% of the interest. If financial services are rendered between related parties, the withholding must be at 20%.

Deductions

All business expenses considered necessary to produce taxable income and/or maintain income sources (e.g. freight, marketing, power, telecommunications, water, salaries, lease contracts, merchandise and transport insurance, fuel, and interest paid on loans used by income generating sources) are deductible for income tax purposes.

Depreciation and amortisation

Depreciation is calculated using the straight-line method, which results in the following maximum annual rates for determining depreciation deductions.

El Salvador

Assets	Rate (%)
Buildings	5
Machinery	20
Vehicles	25
Other movable assets	50

Depreciation of new software is permitted at a rate of 25% of purchase or production costs.

Amortisation of goodwill, trademarks, and other similar intangible assets are not deductible for income tax purposes.

Start-up expenses

In El Salvador, there is not a special regulation for expenses related to the starting up of a company.

Interest expenses

Interest expenses are deductible if the amount of the loan is invested in a source that generates taxable income.

Bad debt

In El Salvador, bad debt is deductible if the following requirements are presented:

- The debt is generated from the business activity.
- The debt had been registered as taxable income.
- The debt is registered in the accounting system.
- The debt has been expired for 12 months.

Charitable contributions

The deductibility of charitable donations is limited to 20% of the donor's net income after deducting the donation amount.

Fines and penalties

In general, penalties, late payment charges, and fines of that type are not deductible.

Taxes

Taxes paid are not deductible.

Net operating losses

Operating losses cannot be carried forward to future years or carried back. Capital losses, however, may be carried forward to offset capital gains for five years.

Payments to foreign affiliates

Remittance of royalties, interest income, and service fees to foreign affiliates are deductible, provided proper contracts are in place, the corresponding withholdings are applied (i.e. 20% WHT for non-domiciled entities, 25% for entities domiciled in tax havens), and there is sufficient evidence that these services have actually been received.

Group taxation

There are no grouping rules in El Salvador between independent entities. Each entity, even if related, is treated separately and must report and pay their taxes independently.

Transfer pricing

In El Salvador, it is mandatory for entities that have operations with related parties or with entities resident in tax havens to undertake these operations in compliance with the arm's-length principle.

Local tax authorities can establish the value of the operations according to market prices rules if, according to their point of view, these operations have not been undertaken according to the arm's-length principle.

Thin capitalisation

No specific provision for thin capitalisation exists in El Salvador.

Controlled foreign companies (CFCs)

There are no CFC rules in El Salvador.

E

Tax credits and incentives

El Salvador offers a wide range of incentives to attract foreign investment and drive new commercial and industrial developments. There are also no restrictions on foreign ownership or on mergers, acquisitions, or joint ventures.

There are two specific laws in El Salvador that seek to encourage foreign investment by improving the country's competitiveness in all areas involving the granting of tax incentives. These laws are the Industrial and Commercial Free Zone Law and the Law of International Services.

The Industrial and Commercial Free Zone Law No. 405, dated 3 September 1998, grants companies the following incentives:

- CIT exemption.
- VAT exemption.
- Municipal tax exemption.
- Exemption from real estate transfer taxes when land is intended to be used for productive activities.
- Exemption from duties for imports on machinery, raw materials, equipment, and intermediate goods used for production.
- An option to sell merchandise or services linked to international trade produced in the free zone in the Salvadoran market as long as the corresponding import taxes, CIT, VAT, and municipal taxes are paid on the final goods or services.

Any foreign company may establish and function in a free zone or bonded warehouse and benefit from these incentives if they are engaged in production, assembly, manufacturing, processing, transformation, or commercialisation of goods and services and/or rendering of services linked to international or regional trade, such as gathering, packaging and repackaging, cargo consolidation, distribution of merchandise, and other activities connected or complementary to them.

The Law of International Services No. 431, dated 11 October 2007, grants the same benefits as the Free Zone Law, but the beneficiaries are companies operating in Service Centres specially created according to this law and dedicated to international services as defined therein.

Foreign tax credit

There is no foreign tax credit available in El Salvador.

El Salvador

Withholding taxes

Payments or amounts credited to non-residents arising from income obtained in El Salvador are subject to a 20% WHT. Income earned in El Salvador covers income from assets located in the country, from any activities performed or capital invested in the land, and from services rendered or used in the national territory, regardless of whether they are provided or paid outside the country. Income from services used in the country is income earned in El Salvador by the service provider, irrespective of whether the relevant income generating activities are performed abroad. Note that payments to foreign entities located in tax haven regimes are subject to a 25% WHT. Guidelines issued by the Salvadoran tax administration list the territories and countries considered as tax havens for El Salvador tax purposes. The current Guideline is DG-002/2014.

Payments to resident individuals with respect to services rendered, other than under a labour relationship, are subject to a 10% WHT.

The acquisition of intangible goods among resident entities in the country is subject to a 10% WHT.

Certain transactions are subject to a reduced WHT rate of 5%, such as the following:

- Dividends.
- International transport services paid to non-residents.
- Insurance services, re-insurances, and bondings paid to non-residents.
- Payments for transfer of intangible assets or use of the rights to intangibles and tangible assets related to films, movies, music records, cable TV, satellite, etc.

Moreover, a treaty to avoid double taxation exists between El Salvador and Spain, this treaty established reduced WHT, such as the following:

- 12% WHT (or 5% since the local rate is more favourable to the taxpayer) made to dividend payments. Note that the payment is exempt from WHT if the dividend is paid by a local entity to a Spanish company that owns 50% or more of the capital of the local entity.
- 10% WHT made to interest payments.
- 10% WHT made to rent and royalties payments.
- 10% WHT made to payments for services.

Tax administration

National taxes, fees, and other contributions on all types of goods, services, and income in El Salvador are levied by the National Congress. Local governments (municipalities) may suggest contribution rates and propose their approval to the National Congress by way of a specific law.

The Ministry of Finance (*Ministerio de Hacienda*) controls the state's finances and defines and guides the government's financial policy. It also harmonises, directs, and implements its policies on taxation through its agencies.

Taxable period

In El Salvador, the fiscal year is from 1 January to 31 December.

Tax returns

CIT annual returns must be filed each year no later than 30 April, following the end of the year under taxation.

Payment of tax

Taxes are due on the date established for filing the tax returns. In El Salvador, tax payments are made together with the filing of tax returns, and payments must be made at the banks of the local financial system.

In addition, public and private legal entities resident in the country for tax purposes, other than farm and cattle concerns, are required to make advance income tax payments at 1.75% of gross revenues. These advance payments are due, together with the corresponding return, within ten working days following the corresponding calendar month and are ultimately applied against the CIT at the end of the year.

Tax audit process

In El Salvador, the audit cycle is constituted by the following steps:

- The tax administration issues a resolution of an auditor designation.
- The requirement of financial information of the company.
- The requirement of complimentary documentation to verify possible issues.
- The tax administration issues an audit report where the issues are expressed.
- A resolution hearing is issued by the tax administration, which gives the taxpayer the right to provide evidence to refute the issues made by the mentioned authority.
- Final resolution is determined regarding the complimentary tax or the penalties to be paid.

Statute of limitations

In El Salvador, the statute of limitations for the compliance of the payment of tax debts is ten years.

The tax administration's power to perform a tax audit is for three years in the case of tax returns presented on time by the taxpayer; five years in the case of tax returns presented in a delayed way, but this time is going to start from the day after the extemporary presentation; and five years in cases where the taxpayer has not presented the tax return.

Topics of focus for tax authorities

In El Salvador, when the tax administration performs a tax audit, it focuses on the following topics:

- Compliance of the transfer pricing rules, this can be considered as the main element for the tax authorities.
- Compliance of the obligations held with non-domiciled subjects, especially those domiciled in tax havens.
- Deductions.
- VAT issues.

Significant developments

There have been no significant corporate tax developments in Equatorial Guinea during the past year.

Taxes on corporate income

The corporate income tax (CIT) must be paid by any resident entity.

Taxable profit is determined by deducting from gross income all expenses tied to the performance of taxable activities in Equatorial Guinea. In principle, all expenses are deductible, but the Tax Code provides deductibility rules for some of them.

Resident companies are subject to CIT on their worldwide income (even if, in practice, it is tolerated for CIT only to be applied to income related to activities carried out in Equatorial Guinea). Non-resident entities are subject to a 10% withholding tax (WHT) on gross income derived from sources in Equatorial Guinea.

The CIT rate is 35% on taxable profits.

Minimum income tax (MIT)

The MIT rate is 3% of the turnover of the company for the previous year. This amount cannot be lower than 800,000 Central African CFA francs (XAF) (even if the company does not generate any revenue).

MIT can be totally or partially deducted from the CIT liability to be paid.

Local income taxes

There are no local income taxes in Equatorial Guinea.

Corporate residence

A legal entity present in Equatorial Guinea more than three months within a calendar year, or more than six months within two consecutive calendar years, and performing an economic activity or providing paid services in the country is considered as a resident for taxation purposes.

The notion of residence applies equally to any kind of activity (even if there is some specificity in the oil and gas sector).

Permanent establishment (PE)

The notion of 'permanent establishment' is not defined in Equatorial Guinea's Tax Code. Authorities mainly refer to the notion of residence as defined above.

Other taxes

Value-added tax (VAT)

VAT is an indirect tax on consumption based on turnover.

All operations performed in Equatorial Guinea are subject to VAT unless they are included in the list of exemptions provided by the Equatorial Guinea Tax Code or a specific tax regime.

VAT is generally chargeable on the following:

- Goods sold or assigned for valuable consideration.
- Services provided.
- Self-consumed goods and services.
- Imports.
- Other operations carried on by individuals or legal entities in their sphere of business, professional, and individual activities, including extraction activities.

The standard VAT rate is 15%.

A rate of 0% is applicable to a specific list of products and equipment provided in the Tax Code (e.g. certain medical products, some equipment for construction).

A reduced rate of 6% is applicable to a limited list of basic consumables and books.

Customs duties

The customs duties are based on the categories of goods as follows:

- Category I: Primary necessity goods: 5%.
- Category II: Raw material and materials: 10%.
- Category III: Intermediary goods and miscellaneous: 20%.
- Category IV: Current consumption goods: 30%.

Excise taxes

Excise taxes are applicable on specific goods, such as alcoholic drinks and tobacco. The rates are from 20% to 50% plus a special Economic and Monetary Community of Central Africa (CEMAC) contribution from 0% to 35%.

Real property tax

A 1% urban property tax applies annually to 40% of the value of the land and the buildings on such land. Urban property is defined by the Tax Code as “any land with or without buildings and the buildings built thereon, whenever located in urban areas”.

Transfer tax

For the transfer of goods between residents and non-residents, and between non-residents, there is a 3% tax on the value of the goods.

Real estate transfers between residents are taxed at the rate of 5% on the value of the real estate. The rate increases to 25% on real estate transfers between residents and non-residents, and between non-residents.

Stamp duties

Stamp duties are payable on a variety of instruments and transactions and vary depending on the concerned legal act.

Payroll taxes

The personal income tax (PIT) liability is withheld from the employee’s salary and declared and paid by the employer.

Equatorial Guinea

The tax tables applicable to individuals are provided in the Taxes on personal income section of Equatorial Guinea's Individual tax summary at www.pwc.com/taxsummaries.

Social security contributions

Employers contribute 1% of gross salary to the Work Protection Fund (*Fondo de Protección al Trabajo* in Spanish) and 21.5% to the National Institute of Social Security (INSESO for its Spanish acronym) on a monthly basis.

Employees contribute 0.5% of net salary to the Work Protection Fund and 4.5% to the INSESO on a monthly basis.

Both of these contributions are declared and paid by the company.

Branch income

Branch income is subject to CIT. We understand there is no branch remittance tax, even if tax authorities have tried to challenge this position in the past.

Income determination

Inventory valuation

Inventory is evaluated at cost price for tax purposes. The tax method generally matches the book method.

Capital gains

Capital gains are, in principle, subject to CIT.

Some exemptions and specific tax regimes can apply, as follows:

- Capital gains that come from the assignment, in the ongoing operation, of the components of the fixed assets will not be included in the taxable profit of the fiscal year in the course of which they have been obtained if the taxpayer puts them in a special account named 'capital gains to be reused' and is committed to reinvesting in new fixed assets in the company before the expiration of a period of time of three years, starting from the close of this fiscal year, an amount equal to the amount of these capital gains plus the cost of the assigned components.
- Capital gains different from those obtained on goods, resulting from free assignment of stock, corporate portions, or liabilities, as a consequence of the merger of corporations, limited partnerships by shares, or limited companies, will be exempt from the tax regarding the profits made by those corporations, on condition that the take-over company or the new company has its corporate headquarters in Equatorial Guinea.

Dividend income

All dividends received by a resident company are subject to CIT.

A personal income WHT of 25% is applicable on dividends paid to individuals or companies not having their usual domicile or headquarters in Equatorial Guinea. This tax is a final tax for those taxpayers.

The net products of the shares owned and earned by the parent company from its subsidiary can be deducted from the total net profits of the parent company after offsetting from this amount 25% (expenses and charges lump sum amount) if the:

- shareholder holds at least 25% of shares of the subsidiary and

- shareholder guarantees the shares have always been registered in the name of the participating company and commits it will hold these shares for at least two consecutive years.

This proportional part is established at 10% of the amount of these products and represents the management expenses already deducted from overhead costs.

Interest income

Interest earned by companies established in Equatorial Guinea is subject to CIT (35% rate).

Interest earned by companies not having their usual domicile or headquarters in Equatorial Guinea is considered as dividend income and subject to WHT at a 25% rate.

Foreign income

Resident companies are subject to CIT on their worldwide income.

There is no tax deferral in Equatorial Guinea.

Deductions

Depreciation

A straight-line method of computation of depreciation should be applied to fixed assets according to the normal useful lives of the assets involved, as provided by the Tax Code.

Goodwill

Goodwill is, in principle, not deductible.

Start-up expenses

Start-up expenses can be amortised (regarding tangible assets) or fully deductible (regarding registration costs and fees).

Interest expenses

Interest expenses are deductible if they do not exceed the limit for loans set up by the Central Bank.

Bad debt

Bad debts are deductible, given they are supported.

Charitable contributions

Charitable contributions are deductible, given they are for philanthropic, sport, educative, scientific, social, or family purposes and do not exceed 0.5% of the turnover for the fiscal year of the company.

Fines and penalties

Fines and penalties are not deductible.

Taxes

Only professional taxes are deductible.

Net operating losses

Net operating losses can be carried forward for three years (five years for companies belonging to the oil and gas sector). Losses cannot be carried back. Losses of one entity cannot be transferred to another entity in a reorganisation.

In theory, when the results of a company, no matter the kind of company, are negative during a maximum period of three consecutive years, this company will immediately be

Equatorial Guinea

removed from the register by the Tax Administration for the practice of the activity for which it was registered, except when the company is newly created.

Payments to foreign affiliates

The deductibility of the technical assistance made by the parent company to its subsidiary is limited to 50% of the intermediary tax result (accounting result plus potential fiscal reintegration).

In case of a deficit, the relevant basis for the evaluation of the foreign technical assistance amount to be reintegrated will be the intermediary result of the last beneficiary fiscal year.

Group taxation

Equatorial Guinea law does not provide specific provisions for taxation of groups.

Transfer pricing

There are no specific rules regarding transfer pricing, even if there are indirect references in the Tax Code.

Indeed, according to the Tax Code, in order to determine the CIT liability of entities under dependence and control of companies located outside of Equatorial Guinea, any transfer of profits shall be recorded in the accounting's profits and losses.

Furthermore, CEMAC's Directive related to CIT states that head office costs are fully deductible if they correspond to real operations, and they are neither unusual nor exaggerated.

However, there is no regulation in force providing a definition of 'transfer of profits' and neither any criterion that would allow the determination of the 'exaggerated' nature of costs.

Thin capitalisation

According to the Tax Code:

"Interest paid to the partners for amounts made available to the company, in addition to their capital contributions, no matter the form of the company, will be admitted (for deduction) within the limits established for the advances of the Central Bank.

In incorporated or limited companies, the deduction of interest will not be allowed for partners or shareholders that have the right to hold, or actually hold, the company management except to the extent that the amounts deposited do not exceed the combination of the contributions of these partners or shareholders."

Controlled foreign companies (CFCs)

According to the Tax Code:

"Regarding legal entities located outside of Equatorial Guinea and which have subsidiary or interdependence ties with other legal entities or companies located in Equatorial Guinea, the place of their taxation will be the same as that of the legal entities or companies with which it maintains those ties (i.e. Equatorial Guinea). These latter are jointly and severally liable for the payment of the tax owed by the legal entities located outside of Equatorial Guinea."

Tax credits and incentives

Some tax and customs exemptions can be granted by the government for some specific economic sectors (e.g. oil and gas sector, public work sector). These exemptions shall be negotiated in the contract signed between the company and the administration (e.g. Production Sharing Contract, Public Work Contract).

Foreign tax credit

There is no foreign tax credit in Equatorial Guinea.

Withholding taxes

WHT in the general regime (i.e. any sector other than the oil and gas sector)

There is a 10% tax withheld on the gross incomes obtained in Equatorial Guinea by non-residents.

There is a 25% WHT on royalties for non-CEMAC residents.

Dividends and interests paid to non-residents are subject to 25% WHT.

WHT on the oil and gas sector

In Equatorial Guinea:

- a 6.25% WHT must be applied to payments made to a resident entity within the oil and gas sector and
- a 10% WHT must be applied to payments made to a non-resident entity within the oil and gas sector.

In practice, the tax authorities consider this tax only applies to sales of services.

The tax basis is composed of the gross amount paid to the provider.

Tax administration

Taxable period

The taxable period is from 1 January to 31 December for CIT purposes.

Tax returns

CIT returns must be filed within the first four months of the year following the taxable fiscal year.

Payment of tax

Payment of CIT must be made within 15 days from the day following the date of receipt of the tax liquidation issued by the Ministry of Finance and Budget.

The MIT of 3% of the previous year's turnover is payable before 31 March.

Penalties

Penalties of XAF 200,000 per month late, up to 75% of the tax owed, apply for late filing of CIT returns.

A penalty of 50% to 100% of the undeclared amount applies in case of shortfall in the return and in case of arbitrary settlement, 50% of the total amount if the good faith of the taxpayer is established or assumed and 100% wherever the taxpayer does not prove good faith.

Equatorial Guinea

Tax audit process

There is no specific provision related to the tax audit cycle in Equatorial Guinea.

Statute of limitations

The statute of limitations is five years from the date the tax is due.

Topics of focus for tax authorities

Topics systematically assessed by tax authorities in the framework of audits are:

- WHT of the oil and gas sector.
- PIT and social contributions.

In the framework of recent audits, the tax authorities are more and more interested in assessing transfer pricing operations.

**E**

Significant developments

Estonia is regarded as offering a relatively favourable income tax regime, as all undistributed corporate profits are tax exempt. Estonia levies a corporate income tax (CIT) only on profits that are distributed as dividends, share buy-backs, capital reductions, liquidation proceeds, or deemed profit distributions. Distributed profits are generally subject to 20% corporate tax (20/80 on the net amount of the profit distribution).

A general anti-avoidance rule (GAAR) and an anti-hybrid rule will be introduced to the Estonian Income Tax Act as provided by the amendments to the Parent Subsidiary Directive. Although the law has not yet been passed, the changes will most likely become effective as of 1 July 2016. As a result of these amendments, it is expected that the tax authorities will start taking a closer look at holding structures, and the issue of substance in holding companies will become more relevant.

In relation to the new Protocol of the Estonia-Switzerland double tax treaty (DTT) becoming effective from 1 January 2016, Estonia's tax treatment of royalties payable to a number of foreign territories became more favourable. The reason is that a number of tax treaties that Estonia has concluded stipulate that should Estonia agree to limit the definition of royalties or the tax rate in the future with any other Organisation for Economic Co-operation and Development (OECD) member state (in this case, Switzerland), such amendments automatically apply to the treaty with the respective contracting party. The countries that this amendment applies to are Belgium, Canada, Denmark, Finland, France, Hungary, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Spain, Sweden, and the United Kingdom (UK). Consequently, royalties paid to tax residents of these countries from 2016 preclude fees paid for the use of industrial, commercial, or scientific equipment from the definition of royalties, and royalties are no longer subject to withholding tax (WHT) in Estonia.

Taxes on corporate income

All undistributed corporate profits are tax exempt. This exemption covers both active (e.g. trading) and passive (e.g. dividends, interest, royalties) types of income. It also covers capital gains from the sale of all types of assets, including shares, securities, and immovable property. This tax regime is available to Estonian resident companies and permanent establishments (PEs) of non-resident companies that are registered in Estonia.

The taxation of corporate profits is postponed until the profits are distributed as dividends or deemed to be distributed, such as in the case of transfer pricing adjustments, expenses and payments that do not have a business purpose, fringe benefits, gifts, donations, and representation expenses.

Estonia

Distributed profits are generally subject to the 20% CIT at 20/80 of the net amount of profit distribution. For example, a company that has profits of 100 euros (EUR) available for distribution can distribute dividends of EUR 80, on which it must pay CIT of EUR 20.

From the Estonian perspective, this tax is considered a CIT and not a WHT, so the tax rate is not affected by an applicable tax treaty. Certain distributions are exempt from such tax (*see the Income determination section*).

In Estonia, resident companies are taxed on profits distributed from their worldwide income, while PEs of non-residents are taxed only on profits distributed from income derived from Estonian sources. Other Estonian-source income derived by non-residents may be subject to final WHT or CIT by way of assessment.

Local income taxes

There are no local income taxes in Estonia.

Corporate residence

A legal entity is considered resident in Estonia for tax purposes if it is established under Estonian law. There is no management and control test for the purpose of determining corporate residency. Most tax treaty tie-breakers for legal entities are based on competent authority procedures.

Permanent establishment (PE)

A PE (including a branch registered in the Commercial Register) of a foreign entity is deemed to be a non-resident taxpayer. Under the domestic law, which deviates from the OECD Model Tax Convention, a PE is defined as an enterprise through which the permanent business activities of the non-resident are conducted in Estonia. A PE is deemed to be created as a result of the business activities conducted in Estonia that are geographically linked or have movable character or as a result of the business activities of an agent that is authorised to conclude contracts in the name of the non-resident.

Other taxes

Value-added tax (VAT)

The following transactions are subject to Estonian VAT:

- Taxable supplies of goods and services (the place of supply of which is Estonia).
- Taxable imports of goods.
- Taxable intra-Community acquisitions of goods.

The standard VAT rate is 20%. A reduced rate of 9% is applied to books, periodicals (with few exceptions), hotel accommodation services, and listed pharmaceuticals.

As of January 2017, it is planned that the VAT rate for hotel accommodation services will be raised from 9% to 14%.

The VAT rate on the export of goods and certain services is 0% (i.e. exempt with credit). Some services, such as health care, insurance, certain financial, and transactions with securities, are exempt (i.e. exempt without credit).

Transactions in real estate are generally exempt from VAT, but there are certain significant exceptions (e.g. transactions in new and significantly renovated buildings). Taxpayers can elect to add VAT to real estate transactions if certain conditions are met.

The reverse-charge mechanism applies to the supply of gold, waste metal, and real estate, under which VAT is accounted for by the VAT liable purchaser and not by the supplier. For real estate and investment gold, the reverse charge applies only when the seller has opted for taxation.

If the taxable supplies of Estonian resident businesses or a PE of a non-resident business in Estonia exceed EUR 16,000 in a calendar year, VAT registration is required. Voluntary registration is also possible. Certain transactions of non-resident businesses require Estonian VAT registration without any threshold.

The VAT accounting period is generally a calendar month, and VAT should be declared and paid on or before the 20th day of the following month.

Under certain conditions, a European Union (EU) taxable person that is not registered for VAT in Estonia will be entitled to a refund of input VAT paid in Estonia. Non-EU taxable persons are entitled to claim VAT refunds based on reciprocity.

Estonia has implemented a system that allows, under certain conditions, a company to account for VAT on imports on the VAT return without paying VAT to the customs authority.

Customs duties

After becoming a member of the European Union, Estonia also became a member of the Customs Union. The Community Customs Code and related implementation regulations apply, meaning that:

- trade between Estonia and other EU countries is customs-free
- imports from non-EU countries are subject to EU customs tariffs, and
- numerous free trade agreements concluded between EU and non-EU countries apply to Estonia.

Excise duties

Excise taxes are levied on tobacco, alcohol, electricity, some packaging materials, and motor fuel.

Land and property taxes

Land is subject to an annual land tax, which is calculated on the assessed value of land at rates between 0.1% and 2.5%, depending on the municipality. The tax is paid by the owners of land, or sometimes by the users of land, in two instalments, by 31 March and 1 October (amounts not exceeding EUR 64 are paid in one instalment by 31 March).

There is no property tax (i.e. tax on the value of buildings).

Property transfers are generally subject to state and notary fees.

Transfer taxes

There are no transfer taxes in Estonia.

Stamp taxes

Certain transactions may be subject to insignificant stamp taxes (i.e. state fees).

Social security and unemployment insurance

Employers operating in Estonia (including non-residents with a PE or employees in Estonia) must pay social tax on certain payments to individuals at the rate of 33% (where 20% is used for financing public pension insurance and 13% is used for financing public health insurance). Social tax paid by employers is not capped and mainly applies to salaries, directors' fees, and service fees paid and fringe benefits granted to individuals.

Estonia

In addition to social tax, employers are also required to pay and withhold unemployment insurance contributions. Employers must pay 1% and employees must pay 2% (collected by employers through payroll withholding). The contributions mainly apply to salaries and service fees paid to individuals.

Compulsory accumulative pension scheme

Employers' payroll withholding includes 2% contributions to the compulsory accumulative pension scheme if the employee has joined that pension scheme. Under the compulsory accumulative pension scheme, resident employees born after 31 December 1982 are obligated to join the compulsory accumulative pension scheme and make contributions at 2% from gross salary. For resident employees born before 1983, joining the compulsory accumulative pension scheme is voluntary, but, after joining, it becomes compulsory and employees may not subsequently leave the scheme. In 2013, employees had an opportunity to increase the pension contribution rate temporarily (for the period 2014 to 2017) from 2% to 3% by submitting the respective application. The state will contribute 6% (instead of 4%) to the employees' pension account where the increase of the contribution has been opted.

Other payroll taxes

In addition to payment of the social tax, unemployment insurance contributions, and compulsory accumulative pension scheme contributions, employers should withhold personal income tax (PIT) at the flat rate of 20% after deduction of the employee's contribution to unemployment insurance scheme, compulsory accumulative pension scheme, and, if relevant, personal deduction of EUR 154 per month.

Heavy goods vehicle tax

The heavy goods vehicle tax is paid for the following classes of vehicles that are registered with the Estonian National Motor Vehicle Register and are intended for the carriage of goods:

- Lorries with a maximum authorised weight or gross laden weight of not less than 12 tons.
- Road trains composed of trucks and trailers with a maximum authorised weight or gross laden weight of not less than 12 tons.

The tax is paid by the owners or users of the vehicles. The quarterly tax rates range from EUR 0 to EUR 232.60 per heavy goods vehicle.

Gambling tax

Gambling tax is imposed on amounts received from operating games of skill, totalisator, betting, lotteries, and promotional lotteries. Tax is also charged on gambling tables and machines used for games of chance located in licensed premises. The tax is paid monthly by authorised operators.

Local taxes

Local taxes can be imposed by rural municipalities or city councils; however, the fiscal significance of local taxes is almost non-existent. Local taxes include advertisement tax, road and street closure tax, motor vehicle tax, tax on keeping animals, entertainment tax, and parking charges.

Branch income

Registered PEs of non-residents, much as with resident companies, are subject to CIT only in respect of profit distributions, both actual and deemed, as defined in domestic law.

Transactions and dealings between a head office and its PE(s) should be conducted on arm's-length terms. Thus, such profits should be attributed to a PE of a non-resident taxpayer that the PE would be expected to make if it were a distinct and separate taxpayer engaged in the same or similar activities, and under the same or similar conditions, and dealing in a wholly independent manner with its head office.

Income determination

Distributable profits are determined based on financial statements drawn up in accordance with Estonian Generally Accepted Accounting Principles (GAAP) or International Accounting Standards (IAS)/International Financial Reporting Standards (IFRS), and there are no adjustments to accounting profits for tax purposes (e.g. tax depreciation, tax loss carryforward or carryback).

The CIT liability associated with the distribution of dividends is accounted for as an expense at the time the dividends are declared, regardless of when the profits were generated or distributed.

Dividends paid by Estonian companies are generally subject to 20/80 CIT at the level of the distributing company. However, dividends distributed by Estonian companies are exempt from CIT if the distributions are paid out of:

- dividends received from Estonian, EU, European Economic Area (EEA), and Swiss tax resident companies (except tax haven companies) in which the Estonian company has at least a 10% shareholding
- profits attributable to a PE in the European Union, European Economic Area, or Switzerland
- dividends received from all other foreign companies in which the Estonian company (except tax haven companies) has at least a 10% shareholding, provided that either the underlying profits have been subject to foreign tax or if foreign income tax was withheld from dividends received, or
- profits attributable to a foreign PE in all other countries provided that such profits have been subject to tax in the country of the PE.

In addition, stock dividends (bonus shares) distributed to stockholders are exempt from 20/80 CIT charge.

Certain domestic and foreign taxes can also be credited against the 20/80 CIT charge under domestic law or tax treaties.

Deductions

Distributable profits are determined based on financial statements drawn up in accordance with Estonian GAAP or IAS/IFRS, and there are no adjustments to accounting profits for tax purposes (e.g. tax depreciation, tax loss carryforward or carryback).

Fringe benefits

Employers operating in Estonia (including non-resident companies that have a PE or employees in Estonia) are liable to Estonian taxation on any fringe benefits granted to their employees (including directors).

Fringe benefits are subject to an exceptional tax treatment in Estonia, as only the employer is obligated to pay taxes on the fringe benefits furnished to the employee. Taxable fringe benefits received by a resident employee are generally not included in the taxable income of the employee for Estonian tax purposes. Fringe benefits are subject to

Estonia

20/80 CIT and 33% social tax. For example, where the amount of the benefit is EUR 100, the CIT due by the employer would be EUR 25 ($20/80 \times 100$) and the social tax due EUR 41.25 (0.33×125), for a total fringe benefit tax charge of EUR 66.25.

Gifts, donations, and representation expenses

The 20/80 CIT is generally due on gifts and donations. Gifts and donations made to certain qualifying recipients are only subject to 20/80 CIT if such expenses exceed one of two limitations:

- 3% of the calculated social tax base for the existing calendar year or
- 10% of the profit of the last financial year according to statutory financial statements.

Representation expenses, those expenditures whose character and primary purpose is for representational or entertainment related activities, are generally subject to 20/80 CIT only if they exceed the threshold of EUR 32 per month plus 2% of the calculated social tax base of the calendar month in which the expenses are paid.

Taxes

All taxes paid are deductible for CIT purposes. In certain circumstances, domestic or foreign taxes may be creditable against the 20/80 CIT charge under domestic law or an applicable tax treaty.

Other significant items

The 20/80 CIT is generally due on expenses and payments that do not have a business purpose and that are regarded as deemed profit distributions. These may include, for example, late payment interest on tax arrears, penalties imposed by law, bribes, purchase of services or settlement of obligations not related to the taxpayer's business, and acquisition of assets not related to the taxpayer's business.

Furthermore, there are specific anti-tax haven rules treating certain transactions and dealings with tax haven companies as deemed profit distributions, which are therefore subject to 20/80 CIT. These include the following:

- Acquisition of securities issued by a tax haven entity (exception for certain listed securities).
- Acquisition of an ownership interest in a tax haven entity.
- Payment of fines or penalties to a tax haven entity, unless settled by court or arbitration.
- Granting loans or making prepayments to a tax haven entity or otherwise acquiring a claim against a tax haven entity.

Payments to foreign affiliates

Payments to foreign affiliates are deductible for tax purposes (i.e. not subject to 20/80 CIT as deemed profit distributions) if the payment serves a business purpose, provides a benefit to the payer, is at arm's length, and is substantiated by sufficient documentation.

Payments to foreign affiliates may also be subject to various WHTs. Certain payments to affiliates located in tax haven countries are always subject to 20/80 CIT or a 20% WHT rate.

Group taxation

There is no form of consolidation or group taxation for CIT purposes in Estonia.

Transfer pricing

Transfer pricing rules are applicable to all types of transactions between related parties. Both domestic and cross-border transactions with related parties must be conducted at

arm's length. Estonian tax legislation includes a relatively broad definition of related parties. Under the present corporate tax system, if the transactions between related parties do not follow the arm's-length principle, then the subsequent transfer pricing adjustments are treated as hidden profit distributions subject to 20/80 monthly CIT.

As a general rule, Estonian group companies and PEs of foreign companies are obligated to prepare transfer pricing documentation to prove the arm's-length nature of the inter-company transactions with all related parties.

However, this documentation requirement does not apply to small and medium-size enterprises (SMEs), unless they have conducted transactions with entities located in low-tax territories. A company or PE is deemed to be an SME if the consolidated results of the previous financial year of an Estonian company or a PE, together with its associated enterprises or head office (i.e. at the group level), are below all of the following criteria:

- EUR 50 million annual sales.
- EUR 43 million balance sheet.
- 250 employees.

Apart from the formal transfer pricing documentation and general requirement to disclose the transactions with the related parties in the annual reports, there are no additional reporting requirements related to transfer pricing in relation to inter-company transactions.

Thin capitalisation

There are no thin capitalisation rules in the Estonian tax legislation.

Controlled foreign companies (CFCs)

Estonia has no CFC rules for corporate taxpayers.

Tax credits and incentives

There are no special tax incentives in Estonia. However, the entire Estonian corporate tax system, which provides for an indefinite deferral for taxing corporate profits, may be viewed as a tax incentive that promotes reinvestment of profits and thus stimulates economic growth.

Foreign tax credit

In certain circumstances, domestic or foreign taxes may be creditable against the 20/80 CIT charge under domestic law or an applicable tax treaty. *See the Income determination section for more information.*

Withholding taxes

Withholding agents must withhold CIT from certain payments. Withholding agents include resident legal entities, resident individuals registered as sole proprietorships or acting as employers, and non-residents having a PE or acting as employers in Estonia. The tax must be reported and paid by the tenth day of the month following the payment. CIT is not withheld from payments to resident companies, registered sole proprietorships, and registered PEs of non-resident companies. The following rules are in place with respect to payments that are subject to WHT:

- There is no WHT on dividends.
- There is no WHT on interest payments to non-residents. Interest payments to resident individuals are subject to a 20% WHT rate.

Estonia

- Royalties (including payments for the use of industrial, commercial, or scientific equipment) paid to non-residents are generally subject to a 10% WHT rate under domestic law, but reduced rates may be available under DTTs. Certain royalty payments to associated EU and Swiss companies that meet certain conditions are exempt from WHT.
- Rental payments to non-residents for the use of immovable property located in Estonia and movable property subject to registration in Estonia (excluding payments for the use of industrial, commercial, or scientific equipment) are subject to a 20% WHT rate under domestic law, but DTTs may exempt payments for the use of movable property from WHT.
- Royalties and rental payments to resident individuals are subject to a 20% WHT rate.
- Payments to non-resident companies for services provided in Estonia, including management and consultancy fees, are subject to a 10% WHT rate under domestic law, but may be exempt under DTTs. Service fee payments to tax haven entities are always subject to a 20% WHT rate.
- Salaries, directors' fees, and service fees paid to individuals are subject to a 20% WHT rate under domestic law, but DTTs may exempt service fee payments to non-resident individuals from WHT.
- Payments for the activities of non-resident artistes or sportsmen carried out in Estonia are subject to a 10% WHT rate.
- Certain pensions, insurance benefits, scholarships, prizes, lottery winnings, etc. paid to non-residents and resident individuals are subject to a 20% WHT rate under domestic law.

For non-residents without a PE in Estonia, the tax withheld from these payments at domestic or treaty rates constitutes final tax in terms of their Estonian-source income, and they do not have any tax reporting requirements in Estonia.

For certain types of Estonian-source income, non-residents are liable under Estonian domestic law to self-assess their Estonian tax and submit a tax return to the Estonian tax authorities. These types of income include:

- Taxable capital gains.
- Profits derived from business conducted in Estonia without a registered PE.
- Other items of income from which tax was not withheld but should have been withheld.

From 2016, Estonia has effective tax treaties with the territories listed in the table below. Treaties have been signed with Morocco and Vietnam, but these are not yet effective.

The following WHT rates apply to dividends, interest, and royalties paid to a recipient or beneficial owner resident in a tax treaty country. The lower of the domestic or the treaty rate is given.

Recipient	Dividends (%) (1)	Interest (%) (2)	Royalties (%) (3)

Notes

- Under the domestic law, the rate is nil for all non-resident individual and corporate shareholders.
- Under the domestic law, the rate is nil for all non-resident individual and corporate creditors.

Estonia

3. The rate is nil for arm's-length royalties paid to an associated EU or Swiss company if certain conditions are met.
4. The lower 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
5. The lower 5% rate applies to royalties paid for the use of copyright royalties, excluding software royalties.
6. The lower 8% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
7. From 1 January 2016, the definition of royalties precludes fees paid for the use of equipment, and royalties are exempt from WHT in Estonia.

Tax administration

Taxable period

The tax period is a calendar month.

Tax returns

The combined CIT and payroll tax return (form TSD with appendices) must be submitted to the local tax authorities by the tenth day of the month following a taxable distribution or payment. Tax returns may be filed electronically via the Internet.

Payment of tax

CIT and payroll taxes must be remitted to the local tax authorities by the tenth day of the month following a taxable distribution or payment. No advance CIT payments are required.

Advance rulings

The aim of the advance ruling system is to provide certainty on the tax consequences of specific transactions or combination of transactions taking place in the future. The ruling is binding on the authorities (and not on the taxpayer) if the transaction was made within the deadline and the description provided in the ruling and the underlying legislation has not been substantially changed in the meantime. Estonian legislation specifically excludes obtaining rulings when the interpretation of the legislation is objectively clear, the situation is hypothetical, or the main purpose of the planned transaction is tax avoidance. In addition, transfer pricing valuation issues are excluded from the scope of the binding ruling system.

Tax audit process

There is no statutory tax audit cycle in Estonia.

Statute of limitations

As a general rule, the statute of limitations is three years. In case of intentional tax evasion, it is five years.

Topics of focus for tax authorities

The main topics of focus for tax authorities are 'envelope wages', personal services companies, VAT fraud, and transfer pricing.

Other issues

Company restructurings

In accordance with the EC Directive 2009/133/EC on mergers, divisions, partial divisions, transfers of assets, and exchanges of shares concerning companies of different member states, the mergers, divisions, and re-organisations of companies are generally tax-neutral in Estonia. The principle of going concern is applied in taxation of referred restructuring transactions.

F

Significant developments

Effective 1 January 2016, a new Fiji Income Tax Act (FITA 2015) has been introduced, which includes provisions covering income tax, capital gains tax (CGT), and fringe benefits tax (FBT). The FITA 2015 repeals the previous FITA, CGT Decree, and FBT Decree.

Corporate income tax (CIT)

Some of the changes introduced by the FITA 2015 are as follows:

- Amortisation of intangibles may be claimed as a tax deduction.
- The export income deduction of 50% has been extended to 2016.
- Thin capitalisation rules have been introduced for foreign-controlled resident companies with a debt equity ratio of 2:1 (subject to the arm's-length test) for deductibility of interest on foreign associated entity loans.
- A 150% deduction has been introduced for foreign companies for capital expenditure incurred for the relocation to Fiji of its regional or global headquarters, which provides management, technical, or other supporting services to its offices or associated companies, subject to certain conditions.
- The investment allowance incentive for hotel projects has been reduced from 55% to 25%.
- The loss carryforward for hotels qualifying for hotel incentives has been reduced from eight years to four years.
- The Tax Free Region (TFR) incentives have been extended from the Nausori Airport side of the Rewa Bridge (excluding the township boundary) to the Ba side of the Matawalu River.
- Certain tax and duty incentives are available to residential housing development projects.
- CIT exemption of ten years is available for the establishment of private hospitals with a capital investment of over 7 million Fijian dollars (FJD).
- 60% investment allowance is available for the refurbishment, renovation, and extension of existing private hospitals with capital investment of over FJD 1 million.
- CIT exemption of four years is available for the establishment of ancillary medical services with capital investment of over FJD 2 million.
- 60% investment allowance is available for the refurbishment, renovation, and extension of existing ancillary medical services with capital investment of over FJD 500,000.
- Loss carryforward of eight years is now available to private hospitals and ancillary medical services.
- The Minister of Finance has the power to revoke any temporary studio city zone.
- The contractors' provisional or withholding tax (WHT) has been reduced from 15% to 5% and Certificates of Exemption (COE) will no longer be issued.
- Credit card levy has been increased from 2% to 3%.

Fiji

- Dividends paid out of profits of the 2016 tax year and subsequent years are now subject to final WHT of 3% (to resident individuals) or 9% (to non-residents), with no credits for corporate tax paid.
- Transitional tax of 1% is imposed on 2014 and 2015 profit after income tax.
- The Short Life Investment Package (SLIP) and investment allowance incentives currently available for hotel projects under the Eleventh Schedule will be repealed from 1 January 2017.
- A new SLIP incentive with a four-year tax holiday will be available to new hotels effective 1 January 2017. The SLIP incentive will not be applicable to renovations.
- Effective 1 January 2017, new hotels will enjoy a 25% investment allowance but only once for the project (previously 55% for all relevant projects).

Value-added tax (VAT)

The following amendments to the VAT Decree are effective from 1 January 2016:

- The normal VAT rate is reduced from 15% to 9%.
- The importation of the following shall not be subject to import VAT:
 - Artificial parts of a body, corrective glasses, invalid carriages, etc.
 - Goods for disabled persons.
- The VAT exemption on the importation of the following items is repealed:
 - Basic food items.
 - Imported fish supplied to fish processors.
- Film production companies with provisional approval for rebate under the Sixth Schedule of the FITA shall be entitled to VAT refund.
- VAT exemption for residential accommodation shall exclude apartments that provide hotel-like accommodation and facilities.
- The following supplies shall no longer be zero-rated:
 - Medicines and drugs dispensed on the prescription of a medical practitioner or a registered dentist.
 - Kerosene and other basic food items.
 - Fish supplied to a local fish processor.

Stamp duties

Effective 1 January 2016, the Fiji Revenue and Customs Authority (FRCA) may waive or refund stamp duty not exceeding FJD 10,000 while the Minister of Finance may waive or refund stamp duty in excess of FJD 10,000.

Effective 1 January 2016, the following contracts are subject to stamp duty as follows:

- Deed of Assignment of Trademark: 3%.
- Finance lease or loan agreement: 1.75%.
- New registration of vehicles: FJD 25 to FJD 500, depending on the engine capacity of the vehicle.

Effective 1 January 2016, the following contracts may be exempt from stamp duty:

- Any instrument executed by a small and medium-sized enterprise (SME) with an annual gross turnover not exceeding FJD 500,000, subject to certain conditions.
- Any crop lien.

Service turnover tax (STT) and environmental levy (EL)

The following amendments to the STT Decree are effective from 1 January 2016:

- The STT rate has been increased from 5% to 10%.
- The threshold for bistros, coffee shops, and restaurants has been reduced from FJD 1.5 million to FJD 1.25 million.

- The threshold for charter flight services, water sports activities, and accommodation in private residences or property that accommodates tourists, international students, and overseas visitors has been removed.
- Non-consumption services by hotel properties are no longer subject to STT.

Effective 1 January 2016, EL at the rate of 6% is also applicable on the prescribed services subject to STT.

Tax Administration Decree (TAD)

The following amendments to the TAD are effective from 1 January 2016:

- A resident person should have a Tax Compliance Certificate if the person:
 - wishes to submit an expression of interest or tender to supply goods or services to any government or public sector, or
 - applies for registration, permit, or licence from any government entity.
- The tax authority can reinstate bad debts previously written off, subject to certain conditions.
- Penalties for misleading statements and VAT evasion are introduced for cases where the taxpayer does not have tax payable.

F

Taxes on corporate income

Resident corporations are taxed on their worldwide income. Non-resident corporations may only be taxed on their Fiji-sourced income.

CIT is payable and assessed on the chargeable income of the business calculated by subtracting deductible expenses from all assessable income specified under the FITA.

CIT is payable on taxable income at the following rates:

Type of company	CIT rate (%)
Non-resident shipping companies in respect of outgoing business from carriage of passengers, livestock, mail, merchandise, or goods embarked or loaded in Fiji	2
Non-resident company that establishes its regional or global headquarters in Fiji (subject to certain conditions)	17
Company listed on the South Pacific Stock Exchange (SPSE)	10
All other companies, including non-resident companies carrying on business in Fiji (e.g. branch profits)	20

Corporate residence

A company incorporated, formed, or settled in Fiji is considered a 'resident' in Fiji. A company not incorporated in Fiji is resident in Fiji if it has any part of its central management and control located in Fiji.

Permanent establishment (PE)

PE is determined based on the applicable tax treaty. The FITA also defines 'permanent establishment' as a fixed place of business through which the business of a person is wholly or partly carried on and includes the following:

- A place of management, branch, office, factory, warehouse, or workshop, but not a liaison office.
- A mine site, oil or gas well, quarry, or other place of exploration for, or extraction of, natural resources.

- A building site, or a construction, assembly, or installation project, or supervisory activities connected with such site or project, but only if the site, project, or activities continue for more than six months.
- The furnishing of services by the person, including consultancy services, through employees or other personnel engaged by the person for such purpose, but only if activities of that nature continue for the same or a connected project for a period or periods aggregating more than six months in any 12-month period.
- A person, referred to as an 'agent', acting on behalf of another person, referred to as the 'principal', if the agent:
 - has and habitually exercises an authority to conclude contracts on behalf of the principal, or
 - habitually maintains a stock of trading stock from which the agent regularly delivers trading stock on behalf of the principal but does not include an agent of independent status.
- Substantial equipment used for more than six months within a 12-month period or installed by, for, or under contract with the person.
- The carrying on of activities, including the operation of substantial equipment in the exploration for, or exploitation of, natural resources or standing timber for the period or periods exceeding in aggregate of 90 days in any 12-month period, for or under contract with a person.

Other taxes

Value-added tax (VAT)

Effective 1 January 2016, VAT of 9% (previously 15%) generally applies on the supply of goods and services in Fiji by a registered person in the course or furtherance of a taxable activity carried on by that person. The threshold amount for VAT registration is FJD 100,000 for the supply of goods and/or services.

The supply of financial services (except for certain insurance services), residential accommodation (subject to certain conditions), and education by an approved institution is exempt.

Exports of goods and services and international transportation are zero-rated. The export of services, however, is zero-rated only under certain conditions.

The due date for lodgement of VAT returns and payment of any VAT payable is the end of the month following the taxable period, which is normally a month. However, where an entity's supplies do not exceed FJD 300,000, it may opt to lodge VAT returns and pay any VAT payable on an annual basis.

Under certain conditions, directors of companies with insufficient funds may be held liable for any outstanding VAT or CIT liability of the company and may be sued in their personal capacity.

Customs duties/import excise taxes

Import excise tax (from 5% to 15%) applies to selected goods (in addition to the fiscal duties imposed on importation), including:

- Alcohol and tobacco.
- Used or second-hand liquefied petroleum gas (LPG) powered motor vehicles.
- New or used licensed mini buses.
- Some goods that are also locally manufactured.
- Certain white goods and luxury items.

Excise taxes

Excise tax is payable on tobacco, alcohol products, and carbonated soft drinks manufactured in Fiji, based on quantities produced.

Property taxes

There are no property taxes at the national level. However, the municipalities may charge property rates in their respective areas.

Stamp duties

Under the Fiji Stamp Duties Act, stamp duty is payable in respect of instruments, including, but not limited to, declaration of trusts, leases, mortgages, transfer of property (or interest therein), and shares.

Capital gains tax (CGT)

Capital gains made from the following assets (excluding trading stock, depreciable assets, or business intangibles) may be subject to CGT of 10%:

- Land or an interest therein.
- Vessels of over 100 tonnes.
- Yachts.
- Shares, securities, equities, or other financial assets (except shares listed on the SPSE).
- Intangible assets.
- Interest in a partnership or trust.
- Aircraft.
- Option, right, or other interest in an asset referred to above.

A capital gain made on disposal of an asset that is used solely to derive income that is exempt from tax under the FITA shall be exempt from CGT.

Foreign tax paid in respect of the disposal of a capital asset may be allowed as a tax credit against the CGT payable.

There is no carryforward of capital losses in calculating CGT.

Any gain on the disposal of shares listed on the SPSE shall be exempt from CGT.

Any gain on the disposal of shares in any Unit Trust in Fiji shall be exempt from CGT, subject to certain conditions.

Any gain on the disposal of shares by a Fiji resident shall be exempt from CGT where a private company goes through reorganisation, restructure, or amalgamation for the purpose of listing on the SPSE, subject to certain conditions.

Effective 1 January 2016, transfer of shares due to corporate reorganisation shall not be subject to CGT, subject to certain conditions.

Service turnover tax (STT) and environmental levy (EL)

Effective 1 January 2016, STT at the rate of 10% (previously 5%) is imposed on the turnover of a person conducting a business involving the provision of a prescribed service, which includes the following:

- Provision of accommodation, refreshments, and any other services by a hotel.
- Any services provided in a vessel that is principally or wholly engaged in the carriage of tourists in Fiji.
- Provision of meals, beverages, and any other services in a bar.
- Provision of services in a nightclub.
- Provision of in-bound tour services.

Fiji

- Live entertainment provided by artists for a fee.
- Provision of services for recreational activity for gain.
- Provision of services relating to exhibition of films to the public or section thereof by an exhibitor where a charge is made for admission, including services provided by cinema operators.
- Provision of services by hired or rental car operators.
- Provision of meals, beverages, and any other services by bistros or coffee shops with an annual gross turnover over FJD 1.5 million.
- Provision of meals, beverages, and any other services on sale by restaurants with annual gross turnover over FJD 1.25 million.
- Provision of charter flight services by an aircraft or helicopter, excluding such services for medical or natural disaster relief evacuation.
- Provision of all water sports, including underwater activities and river safaris.
- Provision of accommodation in a private residence or property that accommodates tourists, international students, or overseas visitors who are paying guests.

Effective 1 January 2016, the above-prescribed services are also subject to EL at the rate of 6%. However, non-consumption services by hotel properties are no longer subject to STT (or EL).

The due date for payment of STT and EL is aligned with the VAT Decree requirements (i.e. end of the month following the taxable period).

Fringe benefits tax (FBT)

FBT of 20% is payable by the employer on the grossed-up value of certain fringe benefits provided to employees (the effective tax rate is 25%).

Payroll taxes

Employers are required to deduct and remit monthly to the tax authority appropriate Pay-As-You-Earn (PAYE) tax and social responsibility tax (SRT) from employee gross cash emoluments.

If appropriate PAYE taxes and SRT are not deducted and remitted, the tax authority may recover the taxes from the employer or the employee and/or disallow a tax deduction for the expenditure.

Contributions to the Fiji National Provident Fund (FNPF)

The FNPF is a compulsory superannuation scheme for local employees. Under the FNPF Decree, employers and employees are required to contribute 10% and 8%, respectively, of cash emoluments of employees to the Fund.

Employers are not required to contribute to the FNPF for expatriate employees.

Telecommunication levy

Telecommunication levy of 1% is imposed on all voice call charges.

Credit card levy

Effective 1 January 2016, credit card levy of 3% (previously 2%) is imposed on the outstanding credit card balance at the due date for payment for the credit card holder's monthly billing cycle, including interest and other bank charges. The credit card provider shall be liable to pay the levy on behalf of the credit card holder.

Third party insurance levy

Third party insurance levy of 20% is imposed on the total third party insurance premium collected in a month.

Gambling turnover tax (GTT)

GTT is imposed on the value of consideration paid or payable in respect of the provision of prescribed gambling services (i.e. acceptance of bets and provision of tickets for any lottery) at the rate of 15%.

Branch income

The profits of a foreign company's branch operating in Fiji are subject to the same tax rate as the tax rate levied on profits of a resident corporation (i.e. 20%).

Income determination

CIT is payable and assessed on taxable income of the business. Taxable income is calculated by subtracting allowable deductions from all assessable income (i.e. all sources of income).

Inventory valuation

Inventories are normally valued at the lower of cost and net realisable value. While the first in first out (FIFO) method is acceptable, the last in first out (LIFO) method is not, for either book or tax purposes. Conformity between book and tax reporting is not required, and there are no special provisions for valuing inventories or determining inventory flows.

Capital gains

Any profit or gain accrued or derived from the sale or disposal of real or personal property, or any interest therein, shall be subject to income tax when:

- the business of the company comprises dealing in such property
- the property is acquired for the purpose of selling or otherwise disposing thereof, or
- any profit or gain is derived from the carrying on or carrying out of any undertaking or scheme entered into or devised for the purpose of making a profit.

Otherwise, the capital gain may be subject to CGT of 10% (*see Capital gains tax [CGT] in the Other taxes section for more information*).

Dividend income

Transfers of property by private companies to shareholders and associates may be deemed to be a dividend paid by that company.

The following dividends are exempt from tax:

- Dividends received from a company incorporated in Fiji by resident corporations.
- Dividends paid by a resident company listed on the SPSE.
- Nominal value of bonus shares provided to shareholders arising from the reconstruction or reorganisation of a company for the purpose of listing on the SPSE (subject to certain conditions).

Interest income

Effective 1 January 2016, interest income over FJD 200 derived by a resident from a company shall be appropriately subject to resident interest WHT of 10% (previously 20% on interest from a financial institution), which may be claimed as a tax credit against income tax payable on income. Exempt income shall not be subject to WHT.

Partnership income

The income of the partners from a partnership for any income year is equal to each partners' respective share of income from that partnership. Each partner declares

Fiji

income separately and is individually liable for filing a tax return for each applicable year.

Liability of directors/shareholders

Directors/shareholders of companies in liquidation or with insufficient assets to satisfy tax liabilities may be held liable for any outstanding tax liability of the company, under certain conditions.

Other significant items

Where a foreign-controlled business in Fiji produces less income than might be expected, the revenue authorities may determine the income for tax purposes.

Foreign income

Resident corporations are taxed on their worldwide income. Foreign income derived from a treaty country is taxed according to the treaty. Foreign income sourced from a non-treaty country by a Fiji tax resident is subject to income tax in Fiji. A credit is allowed in Fiji for foreign tax paid on foreign income. The tax credit is limited to the lesser of the Fiji tax payable or the foreign tax paid on such income. There are no special provisions for taxing undistributed income of foreign subsidiaries.

Deductions

Generally, expenses wholly and exclusively incurred in deriving assessable income are allowable deductions. Expenditures that are capital or domestic in nature are generally not deductible.

Depreciation and depletion

Depreciation may be calculated on the cost of a business asset on a straight-line or diminishing-value basis. The prescribed rates of depreciation are based on the estimated life of the asset. Upon disposal of a business asset, either recoupment of depreciation claimed is taxable or the excess of tax written-down value over sale proceeds is deductible. The taxpayer has an option to set-off recoupment of depreciation against the cost of replacement assets. Conformity between book and tax depreciation is not required.

Effective 1 January 2016, there are three broad bands of depreciation rates for assets (other than buildings). The three broad bands and the depreciation rates are as follows:

Band	Kind of asset	Diminishing value (%)	Straight line (%)
1	Motor vehicles; buses and minibuses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than seven tonnes; computers and data handling equipment; and construction equipment and earthmoving equipment	40	25
2	Buses with a seating capacity of 30 or more passengers; goods vehicles designed to carry or pull loads of more than seven or more tonnes; specialised trucks; tractors; trailers and trailer-mounted containers; and plant and machinery used in manufacturing, mining, or farming operations	30	20
3	Vessels, barges, tugs, and similar water transportation equipment; aircraft; specialised public utility plant, equipment, and machinery; office furniture, fixtures, and equipment; and any depreciable asset not included in another category	20	12.5

Subject to certain conditions, accelerated depreciation is available for (i) buildings constructed between 1999 and 2018 that are to be used for agricultural, commercial, or industrial purposes; (ii) multi-storey, multi-unit residential buildings; and (iii) other capital expenditure considered of benefit for the economic development of Fiji. Up to one-fifth of the expenditure may be claimed in each of any five years of an eight-year period.

Certain renewable energy plant and water storage facilities also qualify for a 100% write-off.

Capital expenditure aimed at economising on the consumption of fuel, electricity, or its derivatives, or on an asset using energy sources indigenous to Fiji, may be eligible for accelerated depreciation at varying rates.

The cost of the acquisition of a mining lease or tenement and the cost of development of mines may be written off in equal instalments in any five of the first eight years, commencing with the year in which the expenditure was incurred.

A deduction for depletion of other natural resources is not available.

Goodwill

Effective 1 January 2016, goodwill, and the amortisation thereof, may be deductible for income tax purposes.

Start-up expenses

Effective 1 January 2016, start-up expenses are deductible for income tax purposes.

Interest expenses

Interest expenses that are revenue expenditure wholly and exclusively incurred in deriving taxable income are generally deductible in calculating taxable income, subject to the thin capitalisation rules (*see Thin capitalisation in the Group taxation section for more information*).

Provisions

Provisions for expenses not yet incurred (e.g. bad debts) are not tax-deductible. Deductions are generally permitted in respect to amounts that are actually paid or incurred.

Charitable and other contributions

Contributions to approved academic (effective 1 January 2016) and charitable organisations of up to FJD 100,000 are deductible.

There are certain other specific donations that qualify for varying levels of deductions, including:

- Donations to the Fiji Heritage Foundation, which qualify for a deduction of 150%.
- Donations to Tourism Fiji, which qualify for a deduction of 150%.
- Cash donations exceeding FJD 50,000 to the Poverty Relief Fund for Education, which qualify for a deduction of 200%.
- Cash donations exceeding FJD 50,000 to a Sports Fund (as approved by the CEO of the FRCA) for purposes of sports development in Fiji, which qualify for a deduction of 150%.
- Total cost of new computers, laptops, and tablets of not less than FJD 10,000 but not exceeding FJD 100,000 that are donated to urban and rural schools registered with the Ministry of Education, which qualify for a deduction of 150% and 200%, respectively.
- The following payments qualify for a deduction of 150%:

Fiji

- Cash donations of not less than FJD 10,000 but not exceeding FJD 100,000 to the Disaster Rehabilitation Fund.
- Cash sponsorships of more than FJD 100,000 but not exceeding FJD 200,000 towards the hiring of international sporting coaches.
- Cash donations not exceeding FJD 50,000 towards any approved housing project for squatters by the Fiji government.
- Cash donations of not less than FJD 10,000 to the Farmers Disaster Relief Emergency Fund Account, which qualify for a 200% deduction.

Fines and penalties

Generally, fines and penalties are not deductible for income tax purposes.

Taxes

Taxes levied on income are not deductible. Only 50% of the employer's statutory FNPF contribution paid by the employer is allowed as a deduction for tax purposes in the year the contribution was paid (*see Contributions to the FNPF in the Other taxes section for more information*).

Employee cost not appropriately subject to Pay-As-You-Earn (PAYE) final WHTs is not allowed as a deduction for tax purposes.

FBT is not allowed as a deduction for tax purposes.

Net operating losses

Tax losses may be carried forward for four consecutive years, provided the company can demonstrate a minimum 51% continuity of shareholding between the year of loss and the year of claim. Notwithstanding the change in ownership, losses may also be carried forward where a company carries on the same business in the carried forward year as it did in the loss year (subject to certain conditions).

Effective 1 January 2016, in relation to certain private hospitals and medical services businesses, tax losses may be carried forward for eight years. *Please refer to the Medical industry incentives in the Tax credits and incentives section.*

Loss carrybacks are permitted, but only in very limited circumstances.

Payments to foreign affiliates

Subject to the normal rules of deductibility, a deduction may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates.

Group taxation

Group taxation is not available in Fiji.

Transfer pricing

Transfer pricing provisions state that the tax authority may allocate income and expenses between associates (related entities) to reflect income and expenses on an arm's-length basis.

The Income Tax (Transfer Pricing) Regulations provide that the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing guidelines may be used in interpreting the provisions of the Regulations in determining income or expenses on an arm's-length basis.

Thin capitalisation

Effective 1 January 2016, if a foreign controlled resident company, other than a financial institution, has a debt to equity ratio in excess of 2:1 at any time during a tax year,

interest expense in relation to that part of the debt that exceeds the ratio is not allowed as a tax deduction unless the company can properly substantiate the arm's-length nature of the debt.

Controlled foreign companies (CFCs)

Fiji does not have specific rules in relation to CFCs.

Tax credits and incentives

The tax incentives in Fiji are designed primarily to promote export sales and to encourage the development of industries that are considered of benefit to the economic development of Fiji.

Export income deduction

A deduction for export income is allowed in accordance with the following:

Year of assessment	Percentage of export income to be deducted (%)
2015	50
2016	50

'Export income' means net profit derived by a taxpayer from the business of exporting goods and services; and the CEO of the FRCA may, where separate records for export income are not maintained, determine what this income should be.

The Fifth Schedule of the FITA, 'Export Incentives', has been repealed. However, the existing beneficiaries are expected to continue to enjoy the incentives under this schedule until the expiry of the incentives granted.

Information and communication technology (ICT) tax incentives

The income of an ICT operator may be exempt from CIT, provided that the business employs 50 employees or more for six months within the income year and 60% or more of the total value of its services in that income year is exported, if it is:

- operating on or before 1 January 2007 in the declared Kalabu Tax Free Zone (exempt from 1 January 2007 to 31 December 2016), or
- granted a licence after 1 January 2009 (exempt for a period of 13 years from the date of issue of the licence).

The income of the following may be exempt from CIT for a period of 13 years from the date of approval:

- ICT start-ups involved in application design or software development.
- Accredited ICT training institutions.

The expenses incurred by the following entities shall qualify for a 150% deduction:

- ICT start-ups involved in application design or software development.
- Accredited ICT training institutions.

Employment incentives

Salary and wages paid to first-time employees (including apprentices and trainees) for the first 12 months of employment qualify for a 150% deduction. This deduction is available until 31 December 2018.

Hotel industry incentives

Effective 1 January 2016, approved capital expenditure incurred in building, renovating, or expanding a hotel is subject to an investment allowance of 25% (previously 55%) of the approved expenditure, in addition to normal depreciation.

Under the Short Life Investment Package (SLIP), the following concessions are available to a company:

- Exemption from CIT for a period of ten years (four years effective from 1 January 2017), provided that the capital investment in the hotel is more than FJD 7 million.
- Duty-free entry of certain capital equipment, plant, and machinery, upon receiving provisional approval from the Minister.
- Permission to generate one's own electricity, the excess to be sold to the Fiji Electricity Authority.

Effective 1 January 2016, any tax losses incurred by an entity granted approval for the investment allowance or SLIP may be carried forward for four years (previously eight), but may only be set off against income of the hotel business or from the hotel premises.

The recipients of provisional approval for hotel investment tax incentives are required to complete the hotel projects within two years from the date provisional approval is granted.

The incentives are also available for new apartments, subject to certain conditions.

Medical industry incentives (effective 1 January 2016)

Approved capital expenditure incurred in building, renovating, or expanding a private hospital (minimum capital investment of FJD 1 million) or ancillary medical centre (minimum capital investment of FJD 500,000) is allowed an investment allowance of 60% of the approved expenditure, in addition to normal depreciation.

Under the Medical Investment Package (MIP), the following concessions are available to a company:

- Exemption from CIT for a period of ten years, provided that the capital investment in the private hospital or ancillary medical centre is more than FJD 7 million or FJD 2 million, respectively.
- Duty-free entry of certain capital equipment, plant, and machinery, upon receiving provisional approval from the Minister.

Any tax losses incurred by an entity granted approval for the investment allowance or MIP may be carried forward for eight years, but may only be set off against income of the medical business or from the hospital premises.

The recipients of provisional approval are required to complete the projects within two years from the date provisional approval is granted.

Residential housing incentives (effective 1 January 2016)

The following concessions are available to a company developing buildings for residential purposes with a capital investment of more than FJD 2 million and at least 20 residential housing units:

- Subsidy of 5% or 7% (depending on capital investment) of the total approved capital expenditure incurred, in addition to normal depreciation.
- Duty-free and VAT-free entry of certain capital equipment, plant, and machinery, upon receiving provisional approval from the Minister.

The recipients of provisional approval are required to complete the projects within two years from the date provisional approval is granted.

Filmmaking and audio-visual incentives

A tax exemption or reduced tax rate is available on the income of non-resident employees of an approved non-resident company engaged or intending to be engaged in making a film in Fiji.

A resident entity (excluding an entity holding a broadcast licence in television or radio in Fiji or with substantial shareholdings in the same) may deduct up to 150% of expenditure on audio-visual production in respect of income in the year of the expenditure. 'Audio-visual productions' include production for exhibition or sale of theatrical films, broadcast television, direct-to-video and video disk programme, audio recording, computer software, and interactive websites.

A tax exemption is available on the income derived by a taxpayer from the commercial exploitation of a copyright until the taxpayer has received from the commercial exploitation a return of up to 60% of the expenditure. The expenditure must be of capital nature and in relation to the audio-visual production costs in respect of a qualifying audio-visual production.

Tax concessions are also available for residents of areas declared as studio city zones by the appropriate government minister.

Tax Free Regions (TFRs)

The following concessions may be available to a newly incorporated entity engaged in trade, business, or manufacture in the TFRs:

- Exemption from CIT for a period of five to 20 consecutive fiscal years for a new activity established between 1 January 2009 to 31 December 2018, depending on the level of investment and the equity held by an iTaukei landowner.
- Duty-free entry of raw materials, machinery, and equipment (including parts and materials) required for the establishment of the business.

The areas declared TFRs are Vanua Levu, Rotuma, Kadavu, Lomaiviti, Lau, and, effective 1 January 2016, the airport side of the Rewa Bridge, excluding the town of Nausori up to the Ba side of the Matawalu River (previously Korovou to Tavua).

Effective 1 January 2016, CIT exemption of five, seven, or 13 years (depending on the amount of capital investment) is available to a taxpayer engaged in any new activity established in the TFR from the airport side of the Rewa Bridge, excluding the town of Nausori up to the Ba side of the Matawalu River, subject to certain conditions.

Other tax incentives

An investment allowance of 55% is available for the construction or refurbishment and renovation of a vessel, in addition to normal depreciation, subject to certain conditions.

An approved mining company may, for a specified period, be exempt from CIT or taxed at a lower rate. The holder of a valid prospecting licence may write off approved expenditure on prospecting for minerals against income from all sources.

A 150% deduction is available for direct capital expenditure incurred by commercial banks in rural banking programmes.

Investors engaged in value adding processes in the food processing, agricultural processing, fisheries, or forestry business may be able to claim a 100% deduction with respect to amounts invested or re-invested (for expansion), provided that the businesses meet the 50% local content rule.

Fiji

A CIT exemption may be available to a taxpayer engaged in the following commercial agricultural farming and agro-processing activities, subject to certain conditions:

- Any new activity with a capital investment of at least FJD 2 million approved and established between 1 January 2010 and 31 December 2014, for a period of ten consecutive fiscal years.
- Any new activity approved between 1 January 2015 and 31 December 2018, for a period of five to 13 consecutive fiscal years, depending on the level of capital investment.

Income derived by a taxpayer from a new activity in processing agricultural commodities into bio-fuels established between 1 January 2009 and 31 December 2018 may be exempt from CIT for a period of ten years, under certain conditions.

An exemption from CIT for a period of five years may be available to a taxpayer engaging in renewable energy projects and power cogeneration.

Entities in the agriculture, fisheries, and tourism industries, with a maximum turnover threshold of FJD 500,000, may also be exempt from CIT.

A 150% deduction is available on expenses incurred in reorganising a company for the purpose of listing on the SPSE.

Any gain derived from the following sale of shares shall be exempt from CIT:

- For the purpose of listing on the SPSE, subject to certain conditions.
- By a resident of shares in a SPSE-listed company.

40% of capital expenditure of not less than FJD 50,000 incurred by any existing business located in Vanua Levu is allowed as a deduction for tax purposes, subject to certain conditions.

A 150% deduction is available on expenditure not exceeding FJD 250,000 incurred in marketing goods and services for export to any of the South Pacific countries, excluding Australia and New Zealand.

The income of a shipping company derived from servicing Rotuma and the Lau Group shall be exempt from CIT for a period of seven years, subject to certain conditions.

Effective 1 January 2016, a 50% deduction is available on expenditure incurred for uniforms made in Fiji and supplied to an employee, provided that the cost is not recovered from the employees.

Effective 1 January 2016, a 150% deduction is available for foreign companies for capital expenditure incurred for the relocation to Fiji of its regional or global headquarters, which provides management, technical, or other supporting services to its offices or associated companies, subject to certain conditions.

Foreign tax credit

A credit is allowed in Fiji for foreign tax paid on foreign income, limited to the lesser of the Fiji tax payable or the foreign tax paid on such income.

Withholding taxes

WHTs are levied as follows:

Recipient	WHT (%)				
	Dividends	Interest	Royalties	Know-how, management fees	Professional fees
Resident corporations	0	10 (1)	5 (4)	5 (4)	5 (4)
Resident individuals	3	10 (1)	5 (4)	5 (4)	5 (4)
Non-resident corporations:					
Non-treaty	9	10	15	15	15
Treaty:					
Australia	9	10	15	15	0/15 (3)
India	5	10	10	10	0/10 (3)
Japan	0/9 (3)	10	10	10	0/10 (3)
Korea, Republic of	9	10	10	10	0/10 (3)
Malaysia	9	10	15	15	0/15 (3)
New Zealand	9	10	15	15	0/15 (3)
Papua New Guinea	9	10	15	15	0/15 (3)
Qatar	0	0	5	5	0/5 (3)
Singapore	5/9 (2)	10	10	10	0/10 (3)
United Arab Emirates	0	0	10	10	0/10 (3)
United Kingdom	9	10	15	15	0/15 (3)

Notes

1. Applies to interest (over FJD 200) but is not applicable if income is exempt.
2. 5% of gross amount of dividends if beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 9% in all other cases.
3. Depending on the provisions of the applicable double taxation agreement.
4. This WHT only applies where there is a formal written contract.

Tax administration

The Tax Administration Decree (TAD) was promulgated with the stated intention of harmonising the administration of the various tax laws, including CIT and VAT. CGT, FBT, and STT are also covered by the provisions of the TAD.

If a due date falls on a Saturday, Sunday, or holiday, the due date is the last working day before the due date.

Taxable period

Tax is assessed on income derived during the calendar year preceding the year of assessment. Returns are therefore generally accepted on a calendar-year basis, although approval is also given to use an alternative fiscal-year basis. For purposes of assessment of returns completed on a fiscal-year basis, the calendar year in which more than one-half of the fiscal year falls is deemed to be the calendar year in which the income is derived.

Tax returns

The Fiji tax system is not based on self-assessment. Returns of income contain information on the basis of which assessments are raised by the tax authorities.

The due date for lodgement of CIT returns is three months after the end of the income year. However, under the Tax Agent Lodgement Programme, an extension of time may be granted to lodge the CIT returns.

Payment of tax

Final payment of CIT (i.e. the balance of actual tax payable) is generally due one month after an assessment is issued.

Effective 1 January 2016, advance tax payments are required to be made in three instalments, as follows:

- First advance: Due on the last day of the sixth month of the current fiscal year (33 $\frac{1}{3}$ % of the preceding income year's tax payable or estimated tax liability).
- Second advance: Due on the last day of the ninth month of the current fiscal year (33 $\frac{1}{3}$ % of the preceding income year's tax payable or estimated tax liability).
- Third advance: Due on the last day of the fiscal year (33 $\frac{1}{3}$ % of the preceding income year's tax payable or estimated tax liability).

The TAD provides for various ways to ensure the collection of taxes, including, but not limited to, the following:

- Departure prohibition order: A departure prohibition order may be used by the tax office to prevent taxpayers from leaving the country without settling outstanding taxes.
- Garnishee orders: The tax office may garnish bank accounts for outstanding taxes.
- Registration of charges on personal and real properties of the taxpayer.
- Distress and sale of personal property.
- Temporary closure of business.

Penalties

Administrative penalty provisions have been amended and increased under the TAD. Some of the penalties are as follows:

- Failure to register: Every person who fails to apply for registration as required pursuant to the Decree commits an offence against the Decree and will, on conviction, be liable to a fine not exceeding 50% of the tax payable where the delay does not exceed six months; or a fine not exceeding the tax payable where the delay exceeds six months.
- Late filing of a return: A registered person who fails to lodge a tax return is liable for a penalty of 20% of the tax payable in the case where tax is payable and a penalty of 5% of the tax payable for every month of default.
- Late payment of tax payable: Where any tax remains unpaid on the expiry of the due date, a penalty of 25% of the tax payable in respect of that taxable period will apply.
- Failure to comply with the late payment penalty: Every person who fails to comply with the late payment penalty is liable for penalty of 5% of the unpaid tax for each month of default.
- Failure to maintain proper records: A registered person who fails to keep, retain, or maintain account, documents, or records is liable for a penalty of 75% (knowingly or recklessly made) or 20% (in other cases).
- Insufficient payment of advance taxes: A taxpayer who makes advance payment of taxes less than the required amount per instalment is liable for a penalty of 40%.

Tax audit process

The FRCA undertakes ongoing compliance activities to ensure corporations are meeting their tax obligations. Compliance activities take various forms, including questionnaires, reviews of specific issues, and audits.

Statute of limitations

Generally, the tax authority may issue notices of amended assessment within six years after service of a notice of assessment. However, the six-year limit does not apply in cases of fraud, wilful neglect, or serious omission.

Under the TAD, 'fraud' is defined as an act of making a false statement to the tax authority; 'wilful neglect' is defined as the deliberate act to minimise tax payable; and 'serious omission' is defined as the omission of any amount of tax as determined by the tax authority.

Topics of focus for tax authorities

The FRCA has recently been focusing on transfer pricing issues, the introduction and implementation of PAYE tax as a final tax, FBT, and excise and fiscal duties.

Significant developments

Recent significant changes to the Finnish tax legislation include the following:

- Finland has implemented into domestic tax legislation the amendments in the Parent-Subsidiary Directive (concerning mismatches in tax treatment of profit distribution to avoid situations of double non-taxation and general anti-abuse rules, directives 2014/86/EU and 2015/121/EU) by limiting Finnish companies' right to receive tax-exempt dividends starting from the beginning of 2016. The new limitations apply to situations where the dividend is tax deductible for the distributing company or the dividend distribution relates to an arrangement or series of arrangements that are not based on genuine business reasons.
- Finland has implemented the Organisation for Economic Co-operation and Development (OECD) Common Reporting Standard (CRS) and European Union (EU) Directive of Administrative Co-operation in Tax Matters (Council Directive 2014/107/EU, the so called 'DAC 2' or 'EU FATCA') into domestic law. The first reporting under CRS and DAC 2 will take place in 2017 (with respect to information collected from the beginning of 2016).

Taxes on corporate income

Finnish resident companies are subject to Finnish corporate income tax (CIT) on their worldwide income (i.e. unlimited tax liability). Also, Finnish permanent establishments (PEs) of non-resident companies are subject to Finnish CIT on their worldwide income attributable to the PE.

The CIT rate is 20%.

Local income taxes

No local income taxes are levied in Finland on the income of a company.

Corporate residence

A company is deemed to be resident on the basis of incorporation. Consequently, a company is deemed to be resident in Finland if it is incorporated (registered) in Finland.

Permanent establishment (PE)

A PE is, in general, formed in line with the OECD Model Convention.

Other taxes

Value-added tax (VAT)

The general VAT rate is 24%. A reduced rate of 14% is applied to food and animal feed. The reduced VAT rate of 14% also applies to restaurant and catering services. A reduced VAT rate of 10% is applied to certain goods and services (e.g. books, subscriptions of

newspapers and magazines lasting one month or longer, accommodation, passenger transport).

A zero rate applies in certain instances (e.g. intra-Community supplies of goods and exports of goods). Additionally, certain services (e.g. financial services, insurance services, and certain educational services) are exempted from VAT.

Customs duties

Many goods imported into Finland from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

Excise duties

Alcohol and alcoholic beverages, tobacco products, liquid fuels, electricity, natural gas, and coal are subject to EU harmonised excise duties. National excise duties are levied in Finland on waste delivered to landfill sites, lubricating oil, oil imported into or through Finland, ice cream, sweets, soft drinks, beverage containers, and tall oil.

Real estate tax

Municipalities impose an annual real estate tax. The tax is levied on the taxable value of buildings and land. The municipal council determines the applicable tax rates, although the minimum and maximum tax rates are set by tax legislation (e.g. 0.37% to 0.80% for permanent dwellings, 0.80% to 1.55% for other real estate). The tax is deductible from taxable business income if the real estate is used for business purposes. The tax is deductible from taxable income of the so-called other source of income if the real estate is used to acquire other taxable income than business income.

Transfer tax

A transfer tax of 4% of the sales price is payable on the transfer of real estate situated in Finland. The transfer of shares in Finnish companies (other than housing companies and real estate companies) and other domestic securities is subject to a transfer tax of 1.6%. The transfer of shares in Finnish housing companies and real estate companies is subject to a transfer tax of 2%.

A transfer tax of 2% of the sales price is payable on the transfer of shares in a foreign company whose activities consist mainly of owning or holding (directly or indirectly) real estates in Finland, provided that either the transferor or the transferee is a resident of Finland or, alternatively, a Finnish branch of a foreign credit institution, a Finnish branch of a foreign investment firm, or a Finnish branch of a foreign fund management company.

Generally, the transfer tax is payable by the transferee.

No transfer tax is payable on the transfer of securities that are subject to trading on a regulated market or multilateral trading facility in the European Economic Area (EEA). Similarly, no transfer tax is payable if both the seller and the transferee are non-residents. Transfer tax is, however, always payable on transfers between non-residents if the transferred shares are shares in a Finnish housing or real estate company.

Stamp tax

No stamp taxes are levied in Finland.

Public service broadcasting tax

Public service broadcasting tax (*Yleisradio* or YLE tax) for companies and organisations is based on the taxable income for a fiscal year. The tax amounts to 140 euros (EUR) per year if the taxable income of the organisation is at least EUR 50,000. For organisations with taxable income exceeding EUR 50,000, the tax is levied at EUR 140 plus 0.35% of the taxable income exceeding EUR 50,000. The maximum of the annual tax is EUR

Finland

3,000, which will be payable by organisations with taxable income of EUR 868,000 or more.

YLE tax is deductible in the taxation of income of a company.

Payroll taxes

The employer has a liability to income tax withholding, but the withholding liability is limited to the amount of cash remuneration.

Social security contributions

According to the Finnish social security legislation, both Finnish and foreign employers have a liability to pay several social security payments in Finland in cases where an employee performs one's tasks partly or wholly in Finland. The liability concerns all employers, regardless of the form of the company and whether the foreign company has a PE in Finland. The percentage rates for the employer's (and employee's) social security contributions are revised on an annual basis.

Compulsory social security contributions payable by the employer in 2016, according to the paid salaries, are as follows:

- Employer's social security charge: 2.12% (no cap).
- Employer's pension insurance contribution: 18% (on average, no cap).
- Employer's unemployment insurance contribution: 1% for the first EUR 2,044,500 of gross salaries and 3.9% for the portion of the gross salaries exceeding EUR 2,044,500 (no cap).
- Group life insurance premium: 0.07% (on average, no cap).
- Accident insurance premium: 0.9% (on average, no cap).

The new rates for employer's social security charge are applicable to salaries paid as of 1 January 2016. The employer's social security charge is paid to the regional tax office, and the other contributions are paid to the insurance company. All of these contributions are tax deductible as salary cost.

Compulsory social security contributions payable by the employee in 2016 are as follows:

- Employee's pension insurance contribution: 5.7% or 7.2% used for employees of age 53 or over (no cap).
- Employee's unemployment insurance contribution: 1.15% (no cap).

The above mentioned contributions are tax deductible for the employee. These contributions are withheld from the gross salary at the time of salary payment and remitted by the employer to the appropriate insurance company together with the employer's pension and unemployment contributions.

- Employee's sickness insurance contribution: 2.12% (no cap).

The sickness insurance consists of two payments, a daily allowance contribution of 0.82% and a medicare contribution of 1.30%. From these two contributions, only the daily allowance contribution is tax deductible for the employee. The medicare contribution is not tax deductible. Unlike other employee's social security contributions, the sickness insurance contribution is included in the withholding tax (WHT) rate of the employee's personal WHT card and, thus, withheld and remitted to the tax authorities together with the withheld income taxes and is finally settled in the final assessment.

If an employee is regarded as a foreign-posted employee and has an A1 certificate or a certificate of coverage from one's home country, neither the aforementioned employer's

social security contributions nor the employee's social security charges are payable in Finland.

Branch income

As a general rule, a branch is taxed like a corporation (tax rate 20%) on the profits attributable to it, provided the branch constitutes a PE in Finland. No tax is withheld on transfers of (taxed) profits to the head office.

Income determination

Companies and other legal entities may have income from three different sources: income from business activities, agricultural income, and personal source income. The net taxable income is calculated separately for each source. The expenses of one source of income cannot be deducted from the taxable income of another source, and a loss from one source of income cannot offset taxable income from another source. All taxable income received by a company is taxed at the CIT rate of 20%, irrespective of the source to which it is attributable.

Income from business and professional activities falls into 'business source' income (taxed in accordance with the Business Income Tax Act or BITA), while income from non-business activity is 'personal income'. Typically, personal income is passive income derived, for example, from investments. As an example, rental income from real estate let to non-related companies is usually regarded as 'personal source' income. The same can apply to a dividend received from stock exchange quoted companies, where the recipient of the dividend is a passive holding company. Farming and forestry income are, as a main rule, treated as agricultural source income.

In general, Finland has a very broad income concept, and taxable income includes all income derived from a company's activities, though there are some significant exceptions, including (among others):

- Capital contributions by shareholders.
- In most cases, dividends from unlisted companies (*see Dividend income below*).
- Liquidation gains and capital gains qualifying for the participation exemption (*see Capital gains below*).
- Proceeds from disposal of company's own shares.
- Merger gain.

There is no general distinction between capital gains and other income; capital gains of a company are taxed as part of its general income either in the 'business income' basket or the 'other income' basket. No rates other than the general CIT rate of 20% are applied to any part of taxable income of a company.

Taxable income of a company generally is computed on an accrual basis (i.e. income is taxable in the year it is earned). However, exemptions to this main rule do exist, including unrealised exchange gains and losses, which are taxable/deductible in the year of the rate change.

Inventory valuation

Inventories may be written down to the lower of direct first in first out (FIFO) cost, replacement cost, or net realisable value. Conformity between book and tax reporting is required.

Finland

Capital gains

Capital gains and losses are generally included in the taxable business income (i.e. sales proceeds are included in the taxable income, and the undepreciated balance of the asset sold is deducted in the sales year) and treated as ordinary income. However, the entire stock of machinery and equipment is treated as a single item, and the capital gain on machinery and equipment is entered as income indirectly by deducting the selling price from the remaining value of the stock of machinery and equipment.

Capital gains arising from the sale of shares are tax exempt via a participation exemption, under certain circumstances. Specifically, capital gains arising from the sale of shares are tax exempt if:

- the seller is not a company carrying out private equity activities (as defined by the BITA)
- the seller has owned continuously, for a period of at least one year, at least 10% of the share capital of the target company, and
- the shares are part of the seller's fixed assets and the shareholding is included in the seller's business income source for tax purposes.

For the participation exemption to apply, the target company cannot be a real estate company, a housing company, or a company the activities of which mainly include owning of real estates. The target company must also be a Finnish company, a company referred to in the European Commission (EC) Parent-Subsidiary Directive, or a company resident in a country with which Finland has concluded a tax treaty that applies to the target company's dividend distribution.

Note that a capital gain is taxable to the extent that the gain corresponds with a previous tax-deductible write-down or provision made in connection with the acquisition cost of shares, subsidies received for acquiring shares, or previous capital losses deducted for Finnish tax purposes from intra-group transfer of the shares.

Capital losses are non-deductible in situations where capital gains are exempt from tax.

Dividend income

Dividends received by a Finnish company are tax exempt in most cases.

However, dividends received by a Finnish company are fully taxable (100%) if:

- the dividend is received from a publicly quoted company, the receiving company is not a publicly quoted company, and the shareholding is less than 10% of the equity of the distributing company
- the dividend is distributed by a non-resident company that is not such as mentioned in the EC Parent-Subsidiary Directive or other company resident in an EU or EEA country that is not liable to pay at least 10% tax for its income, or
- the dividend is distributed by a company resident outside the European Union or European Economic Area.

Note that most of the Finnish tax treaties include provisions enabling tax-exempt dividends from the tax treaty country in case of at least a 10% shareholding.

Furthermore, dividends received are partly (75%) taxable if the dividend is received on shares belonging to 'investment assets' and the receiving company does not own at least 10% of the equity of the distributing company that is resident in another EU member state and covered by the EC Parent-Subsidiary Directive or the dividend is received on shares belonging to 'investment assets' and the distributing company is resident in Finland or an EEA country but not a company covered by the EC Parent-Subsidiary Directive (note that only financial, pension, and insurance institutions may have assets that are considered as 'investment assets').

Finland has implemented into domestic tax legislation the changes in the Parent-Subsidiary Directive (concerning mismatches in tax treatment of profit distribution to avoid situations of double non-taxation and general anti-abuse rules, directives 2014/86/EU and 2015/121/EU) by limiting Finnish companies' right to receive tax-exempt dividends starting from the beginning of 2016. Due to these changes, dividends received by a Finnish company are always considered fully taxable in case:

- the dividend is tax deductible for the distributing company, or
- the dividend distribution relates to an arrangement or series of arrangements mainly aimed at achieving a tax benefit that is not meant to be the purpose of the dividend article and is not genuine, taking into account all the facts and circumstances related to the case (i.e. the arrangement or series of arrangements is not based on solid business reasons).

F

Stock dividends

Stock dividends (bonus shares) may be distributed to stockholders, which are corporations and other legal entities with some exceptions, free of tax on the shareholder (*see Dividend income above*).

Distributions from reserves for invested unrestricted equity

Distributions from reserves for invested unrestricted equity are, in general, deemed as dividends as of 2014. However, distributions from non-listed companies can be deemed as capital gain if they are:

- a return of capital investment made by the same taxpayer
- distributed within ten years of the investment, and
- clarified by the taxpayer that the abovementioned conditions are met.

Distributions cannot be deemed as a capital gain if the reserves for invested unrestricted equity have been formed in conjunction with company restructurings (merger and acquisition [M&A] processes). This new legislation is applied for the first time in fiscal year 2016.

Interest income

Interest income of a company is taxed as part of its general income, thus the regular CIT rate of 20% is applied.

Foreign income

A Finnish corporation is taxed on foreign dividends when the decision to distribute dividends is made and on foreign branch income and other foreign income (e.g. interest and royalties) as earned. The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in a few older treaties (*see the Tax credits and incentives section for more information*).

Deductions

As with taxable income, the concept of deductible costs is wide and covers, in general, all costs incurred in the pursuance of taxable income. Significant exceptions to this rule include (among others):

- Income taxes (*see below*), tax late payment interests, and punitive tax increases.
- Fines and other punitive payments.
- 50% of entertainment costs.
- Capital losses and liquidation losses if capital gains from the sale of shares of a target company would qualify for the participation exemption (*see Capital gains in the Income determination section*).
- Losses from the disposal of a company's own shares.

Finland

- Merger losses.
- Net interest expenses exceeding 25% of taxable profit as increased with interest expenses, depreciation, and received group contribution, and as decreased with given group contribution (EBITDA) (*see Thin capitalisation in the Group taxation section*).

As the accrual method is applied to the calculation of taxable income, expenses are usually deductible in the year they are realised (i.e. the year the obligation to pay has arisen).

Depreciation, amortisation, and depletion

The maximum annual rates of depreciation calculated on the remaining acquisition cost for tax purposes (declining-balance method) are 25% for machinery and equipment and from 4% to 20% for buildings and other constructions, depending on the type and estimated life of the asset. The remaining acquisition cost for tax purposes is defined as cost less accumulated tax depreciation and, in the case of machinery and equipment, proceeds on disposal of the assets. The straight-line method is applied to certain intangible assets and capitalised expenditures and to assets with long economic use, such as dams. Tax depreciation is limited to the cumulative charges made in the books.

Costs related to qualifying intangible property are usually amortisable over a period of ten years or a shorter period if the economic life is proven to be less than ten years.

The capital cost of mines, sandpits, quarries, and peat bogs is written off in proportion to the quantities extracted. Short-lived items (the economic life of which is three years or less) may be written off immediately.

Land is not a depreciable asset.

Temporary double depreciation for investments in production is applied for fiscal years 2013 thru 2016 (originally limited to fiscal years 2013 and 2014). The double depreciation is applied to new factories and workshops and new equipment and machinery used in factories and workshops. Such new investments should be taken into use in 2013 thru 2016. The double deduction can be made up to two years in a row during 2013 thru 2016. The double depreciation is 50% of the undepreciated balance for tax purposes for machinery and equipment and 14% of the undepreciated balance for tax purposes for buildings.

Goodwill

Acquired goodwill is amortisable for tax purposes over its economic life, up to a maximum of ten years.

Start-up expenses

Start-up expenses are generally deductible expenses when determining taxable income.

Interest expenses

As a general rule, interest expenses are fully deductible. However, deductibility of interest expenses for intra-group loans is restricted to 25% of fiscal EBITDA (*see Thin capitalisation in the Group taxation section*).

Bad debt

In general, bad debts incurred from sales receivables, etc. are tax deductible. The bad debts must also be deducted for accounting purposes. Additionally, loan receivables may be tax deductible in cases where external loans or ownership of less than 10% is in question.

Charitable contributions

Donations are deductible for CIT purposes in certain cases.

In order for a donation to be tax deductible, the amount of the donation should be at least:

- EUR 850, but not more than EUR 250,000, if made to an EEA member state or to a publicly financed university or other higher educational institution in the EEA to benefit the sciences, the arts, or the Finnish cultural heritage, or
- EUR 850, but not more than EUR 50,000, if made to an association, foundation, or other institution in the EEA nominated by the Tax Administration and to benefit the sciences, the arts, or the Finnish cultural heritage.

Donations of not more than EUR 850 (e.g. to charitable purposes) are, in general, tax deductible.

Taxes

No income taxes are deductible when determining taxable income. However, the real estate tax and YLE tax are deductible.

Education costs of employees

Employers are allowed to make an additional tax deduction for certain education costs of their employees. It is required that the employer has made a qualifying education plan and the education relates to the current or future tasks of the employee. The deduction entails both internal and external courses. The amount of the deduction is the average daily salary of all employees working for the employer multiplied by the amount of all qualifying educational days of all employees. This amount is subsequently divided by two. The maximum amount of qualifying education days is three days per employee within the fiscal year in question. The deduction has no tax consequences for the employees.

Net operating losses

Losses may be carried forward for ten subsequent years. However, the right to carry forward losses may be forfeited in certain instances, such as in cases where there is a direct or indirect change in the ownership of the company operating at a loss. However, a special permit can be applied in certain situations from the Finnish tax authorities to retain the tax losses despite the change in ownership. Loss carrybacks are not allowed.

Payments to foreign affiliates

A Finnish corporation may claim a deduction for royalties, service fees, and interest charges paid to foreign affiliates, provided the underlying transaction is beneficial to it and the amounts paid are at arm's length.

Group taxation

Companies within a group are not consolidated for CIT purposes. However, via group contributions (i.e. lump sum payments of cash based on annual taxable profits), group companies may even out their taxable profits and losses, which leads effectively to the same result as consolidation would. A group contribution is a deductible cost for the granting company and taxable income for the receiving company, provided that all of the following are true:

- Both companies belong to a group where there is a direct or indirect common ownership of at least 90%, and the group structure has existed for the entire fiscal year.
- Both companies are Finnish resident for tax purposes.
- Both companies are limited liability companies or co-operatives with business activities (i.e. have a source of income from business activities, *see the Income determination section*) and are not financial, insurance, or pension institutions.

Finland

- The contribution is recorded in the annual statutory accounts of both companies involved and must affect their annual net income.
- The accounting period for both companies ends at the same date.
- The amount of contribution does not exceed the taxable business income of the granting company.
- The contribution is not considered a capital investment.

Based on case law, the ownership chain may also be traced via foreign entities, provided there is a tax treaty between Finland and the country wherein the ultimate parent for the group is resident.

Transfer pricing

All transactions between related parties must take place at arm's length. The requirement is imperative even in relation to purely domestic transactions. If the arm's-length requirement is not followed, income or deductions of a company may be adjusted for tax purposes, in addition to which a risk for substantial penalties exists.

The guidance provided by the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations is adopted as a significant source of interpretation in the application of the arm's-length principle. According to Finnish Tax Administration's statement, the OECD's Base Erosion and Profit Shifting (BEPS) Reports are applied retrospectively.

A Finnish company is obligated to prepare transfer pricing documentation to support transactions between its non-Finnish related parties. Documentation is subject to statutory requirements regarding content, which vary depending on the volume of related party transactions. The documentation requirement concerns Finnish companies and Finnish PEs of foreign companies that are a part of a group that has more than 250 employees or a group that has a turnover of more than EUR 50 million and a balance sheet exceeding EUR 43 million.

These thresholds are calculated at the group level. Failure to present appropriate documentation within 60 days from the tax authorities' request may lead to a punitive tax increase. The documentation may be requested six months after financial year end at the earliest.

Thin capitalisation

There are no thin capitalisation rules as such; interest limitation rules have been implemented instead. Deductibility of interest expenses for intra-group loans is restricted to 25% of fiscal EBITDA. Excess interest can be carried forward to future years. The limitation rules do not apply if (i) net annual interest expense (including both intra-group and third party interest) does not exceed EUR 500,000 or (ii) if the Finnish company's equity-to-gross-assets ratio is greater than or equal to the group-consolidated ratio. In addition, the amount of debt and rate of interest should be at arm's length. If not, a possibility for application of the general anti-avoidance provision may exist.

Controlled foreign companies (CFCs)

The CFC rules are applicable with respect to foreign entities in low tax jurisdictions controlled by Finnish residents. The undistributed profits of such foreign entities may be taxed as profit of the Finnish resident direct or indirect shareholders. The entity is deemed to be controlled by Finnish residents if at least 50% of the capital or total voting rights are directly or indirectly held by Finnish residents or if Finnish residents have the right to at least 50% of the profits of the entity. The taxable person in such a case is the Finnish resident shareholder who directly or indirectly owns at least 25% of the capital of the corporate body or has the right to at least 25% of the profits of the entity. A foreign entity is considered to be low taxed if the actual income tax burden of the foreign corporation in its country of residence is lower than three-fifths of the tax burden of a comparable Finnish corporation.

Foreign PEs of non-resident companies can be regarded as equal to foreign companies, provided that the PE's profits are not taxed in the head office state. Due to the transitional period, the PE provision is applicable to PEs of foreign entities only as of 1 January 2015.

Certain types of businesses are excluded from the scope of the CFC rules (e.g. income principally from industrial, manufacturing, or shipping activities, as well as sales or marketing activities related to such activities, if they are directed principally to the country of residence of the sales or marketing company). Also, companies resident in a country with which Finland has a double tax treaty (DTT) generally are outside the scope of the CFC rules if the company does not benefit from any special tax incentives in that treaty country. Tax treaty countries that are not covered by this rule are exhaustively mentioned in a specific 'black list' provided by the Ministry of Finance. These countries are Barbados, Bosnia-Herzegovina, Georgia, Kazakhstan, Macedonia, Malaysia, Moldova, Montenegro, Serbia, Singapore, Switzerland, Tajikistan, United Arab Emirates, Uruguay, and Uzbekistan.

In addition to these two mentioned exclusions, the Finnish CFC rules are not applicable in cases of genuine economical establishment in a foreign country, which is either an EU/EEA member state or a tax treaty state not on the 'black list'. The genuine economical establishment is evaluated in light of the requirements of the business in question and paying special attention to capable personnel and office space located in the low tax jurisdiction.

Tax credits and incentives

Foreign tax credit

The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in a few older treaties. Foreign tax can be credited against taxes payable in Finland on the same income over the same period on a *pro-rata* basis. The credit is given for taxes paid to a foreign state and covered by the relevant DTT. The maximum credit is the lesser of either the amount of the foreign tax or an amount equal to the Finnish tax payable on the income from a foreign state. This maximum is calculated on a source-by-source basis. Unused credit of foreign tax paid may be carried forward for five years on an income basket basis.

Research and development (R&D) activities

R&D related costs may be deducted annually, or they can be capitalised.

Withholding taxes

Finnish corporations paying certain types of income are required to apply a 20% or 15% WHT on payments to foreign corporations and a 30% WHT on payments to non-resident individuals or other than corporate entities.

According to domestic legislation, interest paid to a non-resident is usually tax exempt in Finland.

No WHT is levied on dividend payments received by companies resident in the EU/EEA area, which would have been tax-free if paid to a Finnish corporate body, if the WHT cannot be fully credited in the company's country of residence.

Dividends paid to a company referred to in the EC Parent-Subsidiary Directive, owning at least 10% of the capital of the dividend distributing company, are also tax exempt.

Finland

The domestic WHT rate may be 15% (or lower under a relevant tax treaty) in cases where the shares of the distributing company belong to the investment assets of the non-resident beneficiary of dividends and if certain prerequisites are met.

See the table below for WHT rates on dividends and other payments from Finland to non-residents.

For countries not included in the table, the WHT rate is 20% (corporate entity) and 30% (individual or other than corporate entity).

Note that each tax treaty should be studied carefully because there are often exceptions to general rules.

Recipient	WHT (%)

Notes

* The recipient is a company whose share in the company making the payment is at least the percentage indicated in brackets.

Finland

1. Tax is not levied on literary, scientific, or artistic royalties (*for film royalties see text of treaty*).
2. If corporate entity, then:
 - no tax if these dividends were tax free under Business Tax Act and if the recipient does not receive a full credit for the Finnish tax in the country of residence, and
 - no tax on dividend paid to a company meant in the EC Parent-Subsidiary Directive owning at least 10% of the capital of the paying company.
3. The tax rate is 15% on films, tapes used in television or radio broadcasts, use of copyright of literary, artistic, or scientific works, or royalty paid for usufruct.
4. The tax rate is 10% on literary, scientific, artistic, and film royalties.
5. The tax rate for an individual is 30% if income is tax-exempt in the country of residence.
6. A lower tax in certain cases.
7. Foreign capital greater than 100,000 United States dollars (USD) when dividend becomes due and payable.
8. See the treaty for additional requirements.
9. The tax rate is 7% on industrial, scientific, and commercial royalties.
10. The tax agreement does not apply if the recipient is a special holding company.
11. The tax rate is 5% on royalties from films and tapes.
12. The tax rate is 5% on royalties paid for the use of industrial, commercial, or scientific equipment.
13. The tax rate is 15% if the payer is also an industrial enterprise.
14. The 10% is calculated on the total voting stock.
15. There is no tax on profit shares meant in EC Directive 2003/48/EC.
16. The tax rate is 1% for finance lease of equipment and 5% for operating lease of equipment and computer software.
17. The tax rate is 5% for the use of secret process or for know-how; there is no tax for computer software or patent.
18. The tax rate is 10% on industrial royalty, 3% on royalties to news agency, and 5% on artistic royalty to the author or the author's *mortis causa* successor.
19. The tax rate is 2.5% on royalties paid for the use of industrial, commercial, or scientific equipment or computer software.
20. The tax rate is 5% on royalties paid for the use or the right to use of industrial, commercial, or scientific equipment or software.
21. The tax rate is 15% if the recipient is a company.
22. There is no tax on dividends to qualified parents-subsidiaries and pension funds.
23. There is no tax if the recipient proves that one has domicile (individual) or is incorporated in the United Arab Emirates.
24. If corporate entity tax is 15% or 20%.
25. There is no tax on royalties between associated companies meant in EC Directive 2003/49/EC.

Non-treaty areas include Andorra, Antigua and Barbuda, Bahama Islands, Bahrain, Belize, Cayman Islands, Channel Islands, Gibraltar, Grenada, Greenland, Hong Kong, the Spitsbergen, Jan Mayen, Liberia, Macao, Mauritius, Monaco, Panama, Samoa, San Marino, Vanuatu, and Virgin Islands.

Tax administration

Taxable period

The fiscal year is generally the calendar year. A company having an accounting period other than the calendar year is taxed for the accounting period or the accounting periods ending during the calendar year.

Tax returns

A company must file a CIT return within four months from the end of the month during which the accounting period ends.

Payment of tax

Income taxes are levied as prepayments during the fiscal year. Advance tax payments for companies are collected in two or 12 instalments during the fiscal year. If the total amount to be paid is not more than EUR 1,700, the instalments are due in the third and the ninth month of the accounting period. If the total amount to be paid exceeds EUR 1,700, the instalments are due monthly (due date is the 23rd day of each month).

If the final taxes exceed the advance payments, the difference is payable in the form of a supplementary payment due on the 25th day of the month following the month during which the final assessment is completed (ten months after the end of accounting period). Interest is payable on the supplementary amount if paid after the filing deadline of the CIT return (*see above*).

The YLE tax is included in the advance taxes payments.

After the assessment of the taxes, any excess prepayments are refunded without application.

Tax audit process

Tax audits are performed at irregular intervals by tax auditors, who are entitled to examine the accounts of a company and to request additional information necessary to the examination. Generally, the taxpayer receives an advance notice of an audit from the tax authorities.

Statute of limitations

Tax assessment must be completed within ten months from the end of the fiscal year. After the assessment, a tax office can change an incorrect assessment. A correction for the benefit of the taxpayer has to be made in five years, from the beginning of the year following the assessment year.

Any correction disadvantageous for the taxpayer must be made within the following time limits, from the beginning of the year following the assessment year:

- One year: All errors.
- Two years: Writing errors made by the administration, calculation errors, and other comparable errors, as well as errors caused by erroneous or inadequate information given by third parties.
- Five years: If the taxpayer has failed to file one's return or has filed an incomplete, false, or misleading return.

Topics of focus for tax authorities

Current issues of special focus for tax audits are transfer pricing and PEs.

The Tax Account system

The Tax Account system is a taxpayer-specific information system under which unprompted taxes (e.g. VAT and employer's social charges) are declared on a monthly basis. Payments are made through regular payment channels.

Tax types not covered by the Tax Account system are income tax, real estate tax, inheritance tax, gift tax, forestry fees, and transfer tax. It is important to note that WHTs are declared through the Tax Account system.

Other issues

Company restructurings

In accordance with the EC Directive 2009/133/EC on mergers, divisions, partial divisions, transfers of assets, and exchanges of shares concerning companies of different EU member states, it is possible to carry out the said restructurings tax neutral if statutory conditions are met. In cross-border situations, both parties should be resident in the European Union. The principle of going concern is applied in taxation (i.e. the receiving company receives the assets with the values the transferring company had for those assets in its taxation).

Notification duty for construction businesses

A monthly notification duty of the employee and contract information to the Tax Administration applies to construction work subscribers and the main contractor of a joint construction site.

Finland

Foreign Account Tax Compliance Act (FATCA)

On 5 March 2014, Finland signed an intergovernmental agreement (IGA) concerning FATCA with the United States. On the basis of the agreement, Finland agreed to bring into force legislation according to which Finnish financial institutions are required to carry out specific due diligence procedures in order to identify their customers subject to tax in the United States and to report information relating to these customers' income and wealth to the Finnish Tax Administration. The information to be reported includes, for example, interest income, income from dividends and derivatives, life insurance payments, and gross sales prices of shares and bonds. The Finnish Tax Administration shall forward the information to the US Internal Revenue Service (IRS).

The domestic law regarding the FATCA agreement was approved by the Finnish President on 20 February 2015. The financial sector began recognising their customers in accordance with FATCA as of 1 July 2014. The first FATCA reports (for year 2014) were required to be submitted to the Finnish Tax Administration by 30 April 2015.

The Finnish Tax Administration published tax technical guidance on the interpretation of the Finland-US FATCA IGA on 15 April 2015. The guidance in the circular can be used to interpret the FATCA-related customer due diligence and reporting obligations faced by Reporting Finnish Financial Institutions.

Common Reporting Standard (CRS)

On 29 October 2014, Finland signed an international agreement on automatic exchange of information, which requires Finland to apply the CRS for Automatic Information Exchange published by the OECD.

Finland has implemented the CRS into domestic law as of 15 April 2016. The amendment requires Finnish financial institutions (as defined in the CRS) to identify their financial account holders and to annually report to the Finnish Tax Administration certain income and asset information with respect to account holders that have been identified to be tax resident in the countries outside of Finland.

Finland has agreed to exchange information automatically in accordance with CRS for the first time in 2017 regarding certain financial information collected from the beginning of 2016.

Information exchange within the European Union

Starting from 2016, the amended EU Directive of Administrative Co-operation in Tax Matters (Council Directive 2014/107/EU, the so called 'DAC 2' or 'EU FATCA') was implemented into domestic legislation. Under DAC 2, EU member states have to require their financial institutions to implement reporting and due diligence rules that are fully consistent with those set out in the CRS.

Significant developments

F

New dividend exemption

The Court of Justice of the European Union (CJEU) concluded in a recent case (CJEU, 2 September 2015, case C-386/14, *Groupe Steria* SCA) that the 5% taxable portion of dividends received from 95% held EU subsidiaries is not compatible with the EU freedom of establishment.

Companies should consider filing claims to obtain a refund of the corporate income tax (CIT) paid in 2014 and 2015 and assessed on the 5% dividends received by a French company from 95% held EU or European Economic Area (EEA) subsidiaries. A recent French Constitutional Court decision (3 February 2016 - *Ste Metro Holding France*) could open claims to situations involving third-party states.

Further to above-mentioned case law, Finance Bill for 2016 has changed dividend exemption mechanisms as follows.

Under the prior regime, there was a 100% exemption on dividends within a French tax group (except the first fiscal year in the tax group) and 95% for all other qualifying dividends.

Under the new regime, there is a 99% exemption on dividends received by a member of a tax group from:

- another member of the same group or
- a company:
 - subject to a tax equivalent to French CIT in another member state, or in an EEA member state that has concluded an administrative assistance agreement with France to fight against tax fraud and tax evasion, and
 - that fulfils the conditions to participate in a French tax consolidated group if it is established in France (other than being subject to CIT in France).

All other qualifying dividends remain 95% exempt (e.g. dividends from French subsidiaries that are not part of a consolidated group, dividends received from a foreign subsidiary if the French parent is not a member of the French consolidated group).

This new regime applies to fiscal years that begin on or after 1 January 2016.

Amendments to withholding tax (WHT) exemptions

WHT on French-source dividends

The EU WHT exemption has been extended to dividends paid by foreign companies whose effective place of management is in an EEA member state that has concluded an administrative assistance agreement with France (including Iceland, Norway, and Liechtenstein).

France

Shares held in bare ownership are now taken into account for the computation of the 10% percentage in the distributing entity's capital in order to benefit from the WHT exemption. The ownership percentage required to benefit from the WHT exemption may be reduced from 10% to 5% if the beneficial owner of the dividends (EU or EEA) cannot offset the French domestic WHT in its home country.

These measures apply to fiscal years ending on or after 31 December 2015.

The WHT exemption now applies if dividends are paid to a parent company based in the European Union or in a third country that has concluded an administrative assistance agreement with France that is in a tax loss position and is declared bankrupt or is in a similar situation.

This measure applies to proceeds received on or after 1 January 2016.

Dividends received by a French parent from qualifying holdings

Shares held in bare ownership are now taken into account for the computation of the 5% percentage in the subsidiary's capital in order to benefit from the participation-exemption regime.

Participation exemption is available for fiscal years ending on or after 31 December 2015 to distributions received from entities established in non-cooperative states or territories (NCSTs), provided the parent company demonstrates that these operations are not designed for, or do not result in, locating profits in such NCST for tax fraud purposes.

There is now an exclusion of certain dividend distributions (e.g. distributions made by *société d'investissement immobilière côtée* [SIIC], *société immobilières pour le commerce et l'industrie* [SICOMI], *société de placement à prépondérance immobilière à capital variable* [SPPICAV], etc.) from the participation-exemption regime.

New General Anti-Abuse Rule (GAAR)

A new GAAR provided by the EU Directive is implemented in French law and applies to the:

- Parent-subsidiary regime.
- French WHT exemption.

The new French GAAR provides that the benefit of these regimes cannot be claimed:

- if the distributions result from a scheme or series of schemes put in place to obtain, as a main objective or as one of the main objectives, a tax benefit that is contrary to the purpose of the parent-subsidiary regime, and
- that is not genuine based on the applicable facts and circumstances.

According to parliamentary works, this new GAAR aims to exclude from the exemption holding companies with a sole purpose of holding shares.

This new GAAR applies to fiscal years beginning on or after 1 January 2016.

Country-by-country (CbC) reporting

France has introduced CbC reporting for multinational corporations applicable to tax years beginning on or after 1 January 2016. The annual obligation requires those corporations to file with the French tax authorities anytime within the 12 months following their fiscal year-end a CbC report disclosing information regarding the name, activities, and profits of foreign entities in the same group. Concerned corporations will therefore file their first CbC report sometime in 2017.

There is automatic exchange of information by the French tax administration with other states or territories that have implemented CbC reporting, subject to reciprocity.

French parent companies are subject to this new obligation if they:

- establish consolidated accounts
- directly or indirectly control at least one legal entity established abroad or have foreign branches
- generate annual consolidated group revenue of at least 750 million euros (EUR), and
- are not held by one or several legal entities established in France or abroad that are subject to the French CbC reporting requirement.

An entity established in France is also subject to CbC reporting when that entity is directly or indirectly held by a legal entity in a foreign country with CbC reporting and:

- the French entity is designated by the consolidated group, or
- that entity is not able to demonstrate that any other entity of the group has been designated to perform this reporting for the group.

An entity that fails to provide CbC reporting is subject to a penalty of up to EUR 100,000 and increases in the risk of tax audit and of tax reassessment.

New temporary incentive measure

A new temporary investment incentive measure is introduced by Finance Bill for 2016, enabling companies to claim an additional deduction equal to 40% of the asset investment, provided the investment meets the following three conditions:

- Conditions of the fiscal special depreciation regime (i.e. a new asset having a minimum useful life of three years).
- Belonging to some limited categories defined by the government (industrial assets, such as plant machinery and equipment, manufacturing equipment, and research operations fittings).
- Investments made between 15 April 2015 and 14 April 2016.

Increase of tax raids

The French tax authorities use tax raids against French subsidiaries of foreign groups most of the time to substantiate a permanent establishment (PE) assessment.

The French tax authorities have the right, within the framework of the raid procedure, to research infringement of CIT and value-added tax (VAT) when the French tax authorities have presumption that a taxpayer makes tax avoidance. The judge has to allow the French tax authorities to visit the premises of the taxpayer (and third parties), and its decision indicates the scope of the visit (most of the time very wide).

The raid can be made at any place, even private places, in the company's location or in a third party's location. The French tax authorities can ask any employees physically present at the time of the visit for access to their computers and servers linked to said computers. In practice, the French tax authorities are well aware about the key persons that may have relevant information.

Since the Google court decision and the Financial Act for 2012, the French tax authorities are allowed to seize data located on a foreign server if the equipment is in the premises visited. This has been confirmed by the Yahoo Supreme Court decision in November 2014 and Mondelez Supreme Court decision in January 2016.

The French tax authorities are liable to professional secrecy; it is not possible to provide a document by arguing that the document is confidential (exchange of correspondences with lawyers cannot be seized in principle).

Taxes on corporate income

France levies CIT at a rate of 33.33%.

A resident company is subject to CIT in France on its French-source income. In that respect, income attributable to foreign business activity (if there is no treaty in force between France and the relevant foreign country) or to a foreign PE (if a tax treaty applies) is excluded from French tax basis.

A non-resident company is subject to CIT in France on income attributable to French business activity or to a French PE, as well as on income from real estate located in France.

Social contribution tax

Concerning large-size companies, a social contribution tax amounting to 3.3% is assessed on the CIT amount from which a EUR 763,000 allowance is withdrawn.

Temporary CIT surcharge

A CIT surcharge of 10.7% assessed on the CIT amount is due by companies whose turnover exceeds EUR 250 million.

This temporary surcharge is applicable to fiscal years ending on or after 31 December 2013 until 30 December 2016.

3% additional contribution on dividend distributions

Dividend distributions (or deemed distributions for tax purposes) made as of 17 August 2012 by French companies are subject to a genuine 3% additional tax, which comes on top of underlying CIT. The 3% tax is not due (i) by French companies meeting the EU small and medium enterprise (SME) criteria, (ii) by foreign partners in a tax transparent French partnership, and (iii) by French branches of EU companies.

Tax credits are not creditable, with the possible exception of foreign tax credits eligible under a double tax treaty (DTT).

Distortion of taxation resulting from the form of establishment in France (branch vs. subsidiary) will generate new litigations based on EU principles. Foreign investors may revisit the most appropriate structure (branch vs. subsidiary) for investment in France.

In fact, in March 2015, the European Commission launched an infringement procedure against France regarding the 3% tax as non-compliant with EU Directive 2011/96/EU of 30 November 2011 on the common system of taxation applicable in the case of parent companies and subsidiaries, articles 4 and 5. Under this procedure, the French government will have to submit its observations.

Patent box regime

Under certain conditions, income derived from the sale or license of patents or patentable inventions is taxed at a reduced CIT levied at the rate of 15%.

Capital gains

A reduced tax rate of 15% applies to certain capital gains. *See Capital gains in the Income determination section for more information.*

Local income taxes

No tax is levied on income at the regional or local level.

Corporate residence

France is defined as metropolitan France (excluding the overseas territories [TOM], but including the continental shelf), Corsica, and the overseas departments (DOM, i.e. French Guyana, Guadeloupe, Martinique, Reunion).

As a general rule, a resident company is a company that is incorporated under French commercial laws.

Permanent establishment (PE)

The notion of PE is not defined by the French Tax Code (FTC) and has been specified by a case law of the French Administrative Supreme Court (i.e. '*Conseil d'Etat*'). The notion of PE refers to an enterprise exploited in France that can be materialised in one of the three following situations:

- Business activity conducted through an establishment (i.e. a fixed business installation operating with some degree of autonomy [e.g. a branch, sales office]).
- Business conducted in France by a dependent agent.
- Existence of a complete commercial cycle in France.

Other taxes

Turnover taxes

Turnover taxes are assessed on goods sold and services rendered in France, and operate as a VAT. The normal rate is 20%. Sales of certain kinds of medicines and transports of persons are taxable at a 10% reduced rate. Food products, subscription to gas and electricity (under certain circumstances), sales of books, and products and services provided to disabled persons are taxable at a 5% reduced rate. Other specific sales and services are taxable at a 2.1% reduced rate. Exports and certain specific services invoiced to non-French residents are zero-rated.

Business-to-business (B2B) suppliers of services are generally taxable at the location of the customer and not at the location of the supplier. For business-to-consumer (B2C) suppliers of services, the place of taxation is generally where the supplier is established.

Turnover taxation applies only to taxable persons, partly taxable persons, and non-taxable legal persons that are registered for turnover taxes.

Specific turnover taxation rules apply to leases of transportation equipment; cultural, arts and sports services; electronic and telecommunication services; and transportations of goods.

Customs duties

Depending on their country of origin, goods may be subject to customs duties. The rules are aligned with the EU customs regulations.

Under certain circumstances, the payment of the duties can be deferred depending on the terms and conditions of the warehousing arrangements.

Excise taxes

Some specific goods are subject to excise duties, notably:

- Alcohol and alcoholic drinks (e.g. wine, beer, ethylic alcohol).
- Processed tobaccos (e.g. cigars, cigarettes, tobacco).
- Oil and gas products.

France

Real estate tax

All properties located in France are subject to a 3% real estate tax. The tax is assessed annually on the fair market value of the real estate, in proportion to the direct or indirect interest held. All entities in the chain of ownership are jointly liable for the payment of the tax.

Automatic exemptions apply in three situations. First, to entities whose French real estate assets represent less than 50% of their total French assets. Second, to entities listed on a regulated market whose shares, units, or rights are significantly traded on a regular basis. Third, to entities having their registered office in France, in an EU member state, or in a country that has concluded a DTT with France providing for an administrative assistance or a non-discrimination clause, where:

- their direct or indirect interest in the French real estate is less than either EUR 100,000 or 5% of the fair market value of the French real estate
- they are pension funds or public charities recognised as fulfilling a national interest whose activities justify the need to own French real estate, or
- they are non-listed French real estate funds (*société de placement à prépondérance immobilière à capital variable* [SPPICAV] or *fonds de placement immobilier* [FPI]) or foreign funds subject to equivalent regulations.

Where an automatic exemption does not apply, a claim may be submitted for conditional exemption.

Territorial economic contribution

The territorial economic contribution (*Contribution Economique Territoriale* or CET) is comprised of two different taxes: the companies' land contribution (*Cotisation Foncière des Entreprises* or CFE) and the companies' added value contribution (*Cotisation sur la valeur ajoutée des entreprises* or CVAE). Although they have a similar scope, the taxes are subject to very different rules.

The CFE tax is based on the rental value of assets that are subject to the real estate tax, excluding movable goods and equipment. For industrial plants, the taxable base is reduced by 30%. There is a specific rental value for each town and an upgrading ratio is set forth at the national level each year.

The CVAE is based on a company's added value. Only taxpayers that are not exempt from the CFE and whose turnover is greater than EUR 152,500 are subject to CVAE. However, tax relief equal to the amount of the tax is provided for companies whose turnover is below EUR 500,000. The tax rate for companies whose turnover ranges from EUR 500,000 to EUR 50 million is assessed according to a progressive scale, which ranges from 0% to 1.5%.

There is an upper ceiling on the added value that applies to the CET. As a consequence, tax relief applies and is equal to the excess of the sum of CFE and CVAE over 3% of the added value of the company.

Registration duties

Registrations duties mentioned hereafter are imposed on the purchaser. However, the seller may be liable for these duties in case of non-settlement by the purchaser.

Transfer of goodwill

The transfer of goodwill is subject to a registration duty at a rate of 3% on the part of the transfer price amounting from EUR 23,000 to EUR 200,000 and at a rate of 5% on the part exceeding EUR 200,000.

Transfers of shares

The transfer of shares is subject to registration duty at a rate of 3% with no cap.

The transfer of listed shares recorded by a deed is subject to registration duty at a rate of 0.1%.

Several exemptions are added to the list of the transactions that are not subject to transfer duties:

- Transactions subject to the financial transaction tax (FTT).
- Repurchase by companies of their own shares intended to be sold to the subscribers of a company employee saving plan, with some exceptions.
- Transactions between companies in the same group within the meaning of Article L233-3 of the French Commercial Code.
- Transfer of ownership resulting from a merger, a contribution, or a spin-off made under the provisions of Article 210 A and 210 B of the FTC and acquisition shares of a company by its employees.

F

Transfer of interest or quotas in legal entities whose capital is not divided into shares

The transfer of interests or quotas in legal entities whose capital is not divided into shares (e.g. *Société à responsabilité limitée* [SARLs] or *Société en nom collectif* [SNCs], which are a form of private limited liability corporate entity) is subject to a registration duty of 3%.

Transfer of shares in non-quoted real estate companies

The transfer of shares in non-quoted companies whose assets consist principally of immovable property is subject to a registration duty of 5%. In case of disposal of shares held in real estate companies, the taxable basis for transfer tax purposes is equal to the fair market value of the real estate assets or rights reduced by the debt contracted for the acquisition of such assets or rights. Other kinds of debts are not taken into account to compute the taxable basis of the transfer tax.

Transfer of real estate

The sale of land and buildings is subject to registration duty at a rate of 5.09% on the transfer price, including expenses.

Exit tax rules in case of transfer of French head office or establishment

In the case of a transfer of assets outside France as part of a transfer of a head office or an establishment, unrealised gains are immediately taxable. However, in the case of a transfer to an EU member state or, under certain conditions, to an EEA member state, taxpayers are able to either pay the full amount of tax immediately or pay it over five years in five equal instalments.

Systemic risk tax

A bank tax known as a systemic risk tax has been implemented to prevent excessive risk behaviour by banks. This tax is payable by certain financial institutions (including credit institutions).

It should be noted that 'fund' entities (e.g. hedge funds or securitisation vehicles) are outside the scope of the tax.

French banks are subject to the bank tax on their worldwide business activities. The equity requirements that are used as the taxable basis for the calculation of the bank tax are calculated on a consolidated basis. Therefore, institutions that fall within the scope of the tax and that belong to a consolidated group are not subject to the tax on an individual basis. Where they are not part of such a group, institutions pay a contribution calculated on their individual position. The taxable basis is made up of the minimum equity required of the institution, as set out by the Prudential Control Authority to meet reserve ratio requirements in accordance with Basel II standards and specified during the previous calendar year.

France

The rate of the bank tax amounts to 0.25% of the taxable basis, and any amounts paid in that respect will be deductible for CIT purposes.

A tax return must be filed by 30 June every year, and the tax due must be settled at the same time.

Subject to the principle of reciprocity, it should be noted that taxpayers for which the registered office or the group parent company is located in a country that has enforced a similar tax on systemic risk can benefit from a tax credit. This tax credit can be used to settle the tax due or can be reimbursed.

Amending Finance Bill for 2014 gradually reduces the tax rate before its complete abolition in 2019. In addition, a new tax (in order to finance the support fund for local authorities who contract 'toxic loans'), whose characteristics are similar to systemic risk tax, is created as of 1 January 2015.

As of 31 December 2016, this tax will no longer be deductible from CIT.

Payroll tax

Companies that are not liable for VAT on at least 90% of their annual turnover are subject to payroll tax (*taxe sur les salaires*) regarding salaries paid during the following calendar year. Companies below the 90% trigger are liable for the payroll tax on the complement of their VAT recovery ratio, called the counter VAT recovery ratio.

Payroll tax is assessed on gross salaries. The rate varies from 4.25% to 13.6%. A 20% rate is applicable on annual gross salaries above EUR 150,000. The taxable base also includes compulsory or voluntary profit sharing.

French social security contributions

The French social security system is composed of various schemes providing a wide range of benefits. This system includes social security basic coverage, unemployment benefits, compulsory complementary retirement plans, complementary death/disability coverage, and complementary health coverage.

The contributions are shared between employer and employee; on average the employer's share of contributions represents 45% of the gross salary. For 2016, the employee's share of French social contributions represents approximately 20% to 23% of the remuneration. However, since the contributions are assessed using various ceilings, the average rate will decrease as the gross salary increases.

Employers' contributions made to additional medical coverage schemes (which are mandatory and collective) are taxable.

Generally, for any employee who carries out a salaried activity in France, the employer withholds the employer's and employee's share of French social security charges.

Financial transaction tax (FTT)

FTT applies to acquisitions for consideration of equity securities or similar securities in the meaning of the French Monetary and Financial Code issued by certain French-listed companies (i.e. financial instruments giving access to capital or to voting rights in the company and securities issued under foreign law representing French-eligible securities). FTT applies regardless of whether the transaction is executed inside or outside of France.

The tax is due by the investment service provider (ISP) that has executed the purchase order or, when there is no ISP, by the custodian, irrespective of its place of establishment.

In most cases, the central securities depository will be in charge of centralising the collection of the tax, the reporting to the French tax authorities, and the payment of the tax to the French Treasury.

The tax rate is 0.2% computed based on the acquisition price of the shares.

Branch income

Tax rates on branch profits are the same as on corporate profits. As a principle, branch profits are deemed to be distributed to the head office. WHT is levied on French branches of non-resident, non-EU corporations at the rate of 30%, or a reduced tax treaty rate (e.g. for the United States [US], 5%), on net profits. Refund (limited or full) of tax may be claimed to the extent that the taxable amount exceeds the dividend(s) actually distributed by the foreign corporation during the 12 months following the close of the fiscal year concerned, or to the extent the dividends are distributed to residents of France.

Profits realised in France by non-resident corporations whose head offices are located in an EU country are not subject to branch WHT, provided that certain conditions are met (e.g. effective head office in an EU country or non-resident corporation subject to corporate taxation).

Income determination

Inventory valuation

Inventories must be valued at the lower of cost or market. Cost must be determined in accordance with the first in first out (FIFO) or the average-cost method. The last in first out (LIFO) method is prohibited.

Capital gains

Capital gains generally are taxable as ordinary income and subject to CIT at the standard rate of 33.33%, regardless of the duration of ownership of the assets sold.

However, a reduced rate of 15%, increased by the social contribution tax, is applied to capital gains on the disposal of patents or patentable inventions, as well as on income from the licensing of patents or patentable inventions.

Gains on the sale of shares in subsidiaries held for at least two years benefit from significant relief (88% of such capital gains are excluded from CIT, with the remaining 12% portion being taxed at the standard 33.33% rate).

Capital gains and losses on shares sold to a related company

Capital gains derived from the disposal of shares held in subsidiaries for less than two years are immediately taxable at the common rate of CIT.

Capital losses derived from such disposal are not immediately deductible. In such a case, the loss will be deducted if, before a period of two years (as from the date of acquisition by the purchaser):

- the vendor stops being subject to CIT
- the shares are, after a restructuring of the transferee company, held by a company that is not related to the vendor, or
- the shares stop being held by the related company (notably further to a new sale).

If no event mentioned above arises within a period of two years starting from the acquisition by the vendor, the capital loss that has not been immediately deducted is

France

treated in accordance with the long-term regime (i.e. the capital loss is therefore not deductible).

Otherwise, the vendor has to join to its corporate tax return a specific form mentioning capital losses that are not immediately deducted.

Capital gains of non-residents

As a general rule, non-resident companies are not taxable in France regarding capital gains derived from the disposal of French assets unless these are part of a PE.

There are two main exceptions to this principle:

- Capital gains derived from the disposal of real estate assets located in France or derived from the disposal of French real estate non-listed companies are subject in France to WHT at a 33.33% rate.
- Capital gains derived from the disposal of shares held in a French company subject to CIT are subject in France to WHT at a 19% rate in the specific case where the seller has owned, at any point in time during the five years preceding the sale, at least 25% of the rights in the profits of the French company, unless provided otherwise by the DTT applicable, if any.

Note that in the specific case where the non-resident company is located in an NCST, all capital gains derived from the disposal of French assets are subject to WHT in France at a specific rate of 75%.

Dividend income

Dividends generally are taxable as ordinary income and subject to CIT at the standard rate of 33.33%.

For information on the taxation of inter-company dividends, see Participation exemption regime in the Group taxation section.

Interest income

Interest income generally is taxable as ordinary income and subject to CIT at the standard rate of 33.33%.

Foreign income

Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches and foreign PEs. Other foreign income is not taxable until actually repatriated to French resident corporations. As a result, undistributed income of foreign subsidiaries is not taxable. The only exception to the territoriality principle is provided by Article 209 B of the Tax Code, known as the Controlled Foreign Company (CFC) rules (*see the Group taxation section for more information*).

Deductions

Depreciation

The depreciation of fixed assets has to be carried out component by component. The components of a fixed asset have to be depreciated separately according to their own lifetime.

Declining-balance depreciation is allowed for certain new and renovated assets whose useful life is in excess of three years.

For assets bought or manufactured between 4 December 2008 and 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.75, if the useful life of the asset is three or four years
- 2.25, if the useful life of the asset is five or six years, or
- 2.75, if the useful life of the asset is more than six years.

For assets bought or manufactured after 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.25, if the useful life of the asset is three or four years
- 1.75, if the useful life of the asset is five or six years, or
- 2.25, if the useful life of the asset is more than six years.

A new temporary investment incentive measure is introduced by Finance Bill for 2016, enabling companies to claim an additional deduction equal to 40% of the asset investment, provided the investment meets the following three conditions:

- Conditions of the fiscal special depreciation regime (i.e. a new asset having a minimum useful life of three years).
- Belonging to some limited categories defined by the government (industrial assets, such as plant machinery and equipment, manufacturing equipment, and research operations fittings).
- Investments made between 15 April 2015 and 14 April 2016.

Goodwill

Under current French tax rules, goodwill (e.g. *clientele*, trademarks) cannot be amortised.

Start-up expenses

No specific rules apply regarding deduction of start-up expenses, except the qualified expenses incurred in establishing the company (so called '*frais d'établissement*'), which can be either deducted or depreciated over five years.

Research and development (R&D) and software expenses

Concerning R&D and software expenses, a business may elect to immediately deduct costs incurred in R&D of software or to amortise their cost on a straight-line basis over a maximum period of five years.

The cost of acquiring software may be written off on a straight-line basis over 12 months.

The cost of patents acquired can be amortised over a five-year period.

Interest expenses

In principle, interest expenses are tax deductible.

Restriction of interest deduction

A test is applicable to the existing rules governing interest deductions for financing by a party that is directly or indirectly related to a French borrower.

Interest deductions are allowed only if the French borrower demonstrates that the lender is, for the current financial year, subject to a CIT on the interest that equals 25% or more of the CIT that would be due under French tax rules. When the lender is domiciled or established outside of France, the CIT determined under French law equals the tax liability that the lender would have owed on the interest had it been resident or domiciled in France.

Taxpayers must provide documentation to support the CIT calculation if requested by the French tax authorities.

France

Carrez Amendment

In accordance with Article 40 of the fourth amended Finance Act for 2011 (i.e. 'Carrez Amendment'), interest expenses incurred by a French company for the acquisition of participation or shareholding acquisitions will not be deductible for CIT purposes unless the French acquiring company is in a position to demonstrate that it actually:

- makes decisions relating to the acquired participation and
- exercises an actual control or influence over the participations.

The purpose of the legislation is to prevent the interest deduction for the participation acquisition by a French entity when the acquired participation is effectively managed outside of France.

This rule does not apply where:

- the total fair market value of the participations owned by the French acquiring company does not exceed EUR 1 million
- the participation acquisition has not been financed by debt at the level of the French acquiring company or at the level of a company of the same group, or
- the debt-to-equity ratio of the group is equal to or higher than the acquiring company's debt-to-equity ratio.

Additional limit on interest deductions

25% of the net finance expenses of a company subject to French CIT is not deductible. This limit applies in addition to existing limits. In a tax group, this limit applies to the consolidated tax result of the group. This is a permanent disallowance, as there is no mechanism to carry the disallowed interest forward to subsequent fiscal years. 'Net finance expense' is defined as the total amount of finance expense incurred as consideration for financing granted to the company, reduced by the finance income received by the company in consideration for financing granted.

Rents incurred as part of a rental agreement between related parties or a financial lease agreement also are included in finance expenses after the deduction for depreciation of the lessor. However, rents paid in relation to real estate rental agreements between related parties should be excluded. This limit applies to both related and third party financing, regardless of the purpose of the financing.

This limit does not apply if a company's annual net finance expense is lower than EUR 3 million. In a tax group, this applies if the net finance expense of the group is lower than EUR 3 million. Groups need to consider the impact of this provision on how tax is shared among the members of the tax group in the tax sharing agreement.

In addition, in a tax consolidated group, this limit does not apply to the portion of net finance expense resulting from financing transactions between members of a French tax unity.

Thin capitalisation

Please see comments regarding thin capitalisation in the Group taxation section.

Bad debt

Bad debts that are definitively non-recoverable are treated, from a tax point of view, as losses.

Under certain conditions, a tax-deductible reserve can be established for debts whose collection is uncertain.

Charitable donations

Charitable donations made by companies to certain foundations or societies are deductible at up to 60% of their amount (limited to EUR 5,000 of the turnover before taxes).

Fines and penalties

As a general principle, fines and penalties are not tax deductible for CIT purposes.

Taxes

Most taxes, including unrecoverable turnover taxes, registration duties, and CET, are deductible. The major exceptions are CIT and tax penalties.

CIT losses

Carryforward of tax losses

Tax losses carried forward are available to offset the first EUR 1 million of taxable profits and 50% of taxable profits in excess of this.

The carryforward is conditional to certain limitations, namely that the entity continues the same business activities. The FTC provides criteria for measuring such a change of activity that jeopardises the right to carry forward net operating losses. Under certain circumstances, a ruling can be obtained from the French tax authorities to keep all or part of the net operating losses despite a business reorganisation.

Carryback of tax losses

Tax losses are available for carryback to the fiscal year immediately preceding that in which the losses arise and up to a maximum of EUR 1 million. Any unused surplus will be carried forward and used as set out above. In addition, the election to carry back tax losses must be filed prior to the deadline for submission of the tax return for the loss-making period.

Tax groups

The overall tax losses of a French tax group, as well as pre-election tax losses of the individual members of the group, will be attributed, whether carried forward or carried back, in the same manner and within the same limits as those set out above.

Payments to foreign-related parties

Payments to foreign affiliates are allowed, as long as they meet the arm's-length test. If they do not, Article 57 of the FTC provides that income directly or indirectly transferred to the foreign-related parties, through either the increase or the reduction of the purchase or sales price of goods and services, or through any other means, must be added back to taxable income. For the purpose of this provision, foreign-related parties are defined as a parent, subsidiaries, or sister companies.

Where the payments are made to companies located in a country with a privileged tax regime, the French taxpayer must prove, in addition, that the transaction is *bona fide* and that the amount due is not exaggerated (*see the Group taxation section for more information on countries with a privileged tax regime*).

Royalties

Article 11 of the Finance Act for 2012 restricts the conditions for deducting licensing royalties where the licensor and the licensee are related parties. A full deduction for the royalty expense may only be allowed if the licensee can demonstrate, and properly document, that:

- the use of the licence results in added value for the licensee over the entire licensing period, and
- such use is real (i.e. does not consist of an artificial scheme).

Group taxation

Tax consolidation regime

French corporations and their 95% owned domestic subsidiaries may elect to file one single tax return, thus allowing the offset of losses of one group corporation against the profits of a related corporation. CIT is then levied on the aggregate income after certain adjustments for intra-group provisions (e.g. debt waivers, dividend distributions) have been made.

When shares in a company that will be integrated into the group are acquired by a group company from individuals or legal entities that control this group, either directly or indirectly, a portion of the group's overall financial expense incurred by the members of the group is progressively added back to the group's taxable income on a straight-line basis over a nine-year period.

A French subsidiary can be included in a tax consolidated group even if its parent company is not located in France. However, at least 95% of the share capital of the foreign company must be held, directly or indirectly, by the French company that is head of the tax consolidated group. In addition, the foreign company must be subject to CIT, be located in the European Union or in a member state of the European Economic Area whose tax treaty with France includes a mutual administrative assistance clause to fight tax fraud and tax evasion, and hold 95% of the lower-tier subsidiary's shares.

Amending Finance Bill for 2014 adds the opportunity for the companies subject to CIT to adopt horizontal tax consolidation. The creation of a horizontal tax consolidation between French companies' subsidiaries of the same parent located in an EU member state, or Iceland, Norway, and Liechtenstein, and subject to a tax equivalent to CIT ('non-resident parent entity') is now permitted, allowing one of its subsidiaries (called 'parent company') to be solely liable for CIT. This new regime applies, optionally, for fiscal years beginning on or after 1 January 2015.

A PE of a foreign company subject to French CIT can be a member of a French tax consolidated group if the shares of the foreign company are held by other French companies, which are members of the consolidated group.

Provisions on the tax neutrality of intra-group transaction flows (e.g. dividends, amortisation, waivers of debts, interest, and capital gains/losses on the sales of shares) have been modified to treat tax consolidated groups with an intermediate foreign company the same as other tax consolidated groups. Before 1 January 2016, under the parent-subsidiary regime, dividends distributed within a tax consolidated group were exempt up to 95% and the remaining 5% was neutralised. As of 1 January 2016, dividends distributed within a tax consolidated group under the parent-subsidiary regime are exempt up to 99% and the remaining 1% may not be neutralised.

Allocation of the tax charge within a tax consolidated group

In an important decision dated 12 March 2010 ('Wolseley Centers France'), the French Supreme Court disagreed with the French tax authorities by ruling that the tax charge of the group can be freely allocated between members of the consolidated tax group.

Following this decision, group companies are free to enter into a tax consolidation agreement stating the conditions for the allocation of the group tax charge or, where applicable, the tax savings arising from the group arrangement.

The Supreme Court concludes that since the terms of an agreement to allow a re-allocation taking into account the specific results of each of the group companies, the terms of this re-allocation cannot be regarded as an indirect subsidy. However, this allocation should neither undermine the corporate benefit of each group member

nor the minority shareholders rights; otherwise, this will result in an abnormal act of management.

Underpriced sale of asset between two entities of a same tax consolidated group

In a decision dated 10 November 2010 (*'Société Corbfi'*), the French Supreme Court specified that an underpriced sale of an asset between two members of the same tax group must be neutralised at the group level only after the computation of the entities results on a standalone basis.

First, on a standalone basis, the seller has to add back the advantage given to the buyer (i.e. the difference between the fair market value and the amount paid) and the buyer adds back this advantage as if it was a dividend. Second, when reprocessing the different entities results, the advantage added back by the buyer has to be neutralised at the group level.

F

Participation exemption regime

French parent companies (i.e. companies incorporated in France and holding qualifying shares that represent at least 5% of the issued capital of subsidiaries, French or foreign) have the option of excluding 95% of the subsidiaries' net dividends from CIT (5% of charges and expenses must be added back to the parent company's taxable results). The French parent-subsidiary regime extends to certain shares without voting rights. There is no formal commitment to have held the shares for at least two years, and companies can benefit from this regime from the acquisition date of the shares. However, the obligation remains to hold the shares over this two-year period. Certain shares of listed real estate companies are not eligible to the French parent-subsidiary regime.

The taxation of dividends received by a parent company from its subsidiary cannot be capped at the amount of the expenses actually incurred by the parent company. Thus, the tax liability will be equal to 5% of the dividends received, tax credits included.

The French parent-subsidiary regime is not applicable to dividends paid from entities located in an NCST.

In principle, the subsidiary's shares must be kept by the parent company for at least two years in order to benefit from the participation exemption regime. However, some operations lead to a break of the two-year holding period. In that case, the exchanged shares are deemed withheld until the sale of the securities received in exchange.

The exchanged shares will be deemed kept for the application of the participation exemption regime only if the gain or loss is not taken into account in the result of that exchange. If the gain or loss is included in the result, the dividends received may not benefit from the participation exemption regime and will be taxed.

In case of tax consolidated group

Finance Bill for 2016 has changed dividend exemption mechanisms.

Under the prior regime, there was a 100% exemption on dividends within a French tax group (except the first fiscal year in the tax group) and 95% for all other qualifying dividends.

Under the new regime, there is a 99% exemption on dividends received by a member of a tax group from:

- another member of the same group or
- a company:

France

- subject to a tax equivalent to French CIT in another member state, or in an EEA member state that has concluded an administrative assistance agreement with France to fight against tax fraud and tax evasion, and
- that fulfils the conditions to participate in a French tax consolidated group if it is established in France (other than being subject to CIT in France).

All other qualifying dividends remain 95% exempt (e.g. dividends from French subsidiaries that are not part of a consolidated group, dividends received from a foreign subsidiary if the French parent is not a member of the French consolidated group).

This new regime applies to fiscal years that begin on or after 1 January 2016.

Distribution followed by absorption or sale of subsidiary

The FTC prevents the possibility for a company to accumulate the exemption of dividends received from its subsidiaries (under the participation exemption regime or the tax consolidation regime) and the deduction of a loss in value resulting from the dividends' distribution due to previous distributions at the time of the securities exchange or sale of shares.

Transfer pricing

Light but annual transfer pricing documentation is to be provided within six months from CIT filing, reporting all intra-group flows in excess of EUR 100,000 and any change in the transfer pricing policy compared to the previous period.

Upon tax audit, companies whose gross assets exceed EUR 400 million, have a turnover that exceeds a specific threshold (EUR 152.4 million or EUR 76.2 million, depending on the activity of the company), or that are part of a group that meet those criteria, and assuming they have management accounts or consolidated accounts, have to provide the French tax administration with analytical and consolidated accounts.

Identically, rulings granted by foreign tax authorities have to be part of the transfer pricing documentation.

It is not possible to defer the collection of CIT reassessed when a mutual agreement procedure is launched.

Transfer pricing documentation

Large corporations located in France (i.e. with annual turnover or amount of gross assets in excess of EUR 400 million) are required to provide documentation containing general information regarding the relevant group of companies, including main activities, operational and legal structures of the related companies, functions performed and risks borne, main intangible assets, and group transfer pricing policy, amongst others.

Advanced pricing agreements (APAs)

APAs are available for taxpayers only on the basis of international agreements entered into in accordance with Article 25 of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention. Currently, taxpayers are also allowed to enter into APAs with the French tax authorities on a unilateral basis. In practice, taxpayers are entitled to submit their transfer pricing policy to the French tax authorities. Agreement of the tax authorities to the APA precludes a later challenge as long as facts and circumstances described in the APA and actual ones are identical.

Light French transfer pricing annual reporting obligation

All French entities with turnover or gross assets on the balance sheet exceeding EUR 400 million, or with more than 50% direct or indirect shareholder or subsidiary interest meeting this threshold, are also subject to the light but annual French transfer pricing documentation requirements.

French companies subject to these transfer pricing obligations must file Form 2257 no later than six months after the deadline to file the annual CIT return with the tax authorities.

Form 2257 discloses general information related to the consolidated group (i.e. activities performed, group transfer pricing policy, country of location of intangibles, etc.). The form also includes specific information on the French entity (i.e. aggregated amounts of intercompany transactions exceeding EUR 100,000, main transfer pricing method used for each kind of transaction, etc.).

The 2016 Finance Act introduces two main changes:

- Electronic filing of Form 2257.
- If the relevant French entities are members of a French fiscal unity (consolidated group), Form 2257 must be filed by the head company of the French fiscal unity on behalf of the entire consolidated tax group.

Country-by-country (CbC) reporting

To align with recommendations of the OECD and the G20 Base Erosion and Profit Shifting (BEPS) Initiative (Action 13), France has introduced CbC reporting for multinational corporations, applicable to tax years beginning on or after 1 January 2016. The annual obligation requires multinational corporations to file with the French tax authorities anytime within the 12 months following their fiscal year-end a CbC report disclosing information regarding the name, activities, and profits of foreign entities in the same group.

Multinational corporations will therefore file their first CbC report sometime in 2017. As an example, for fiscal years opened on 1 January 2016, the filing must be made no later than 31 December 2017.

French entities are subject to the new CbC reporting requirement if they:

- establish consolidated accounts
- directly or indirectly hold or control one or several legal entities established abroad, or have foreign branches
- generate annual consolidated group revenue of at least EUR 750 million, and
- are not held by one or several legal entities established in France already subject to the French CbC reporting requirement, or by legal entities established abroad that are subject to similar CbC reporting requirements pursuant to foreign legislation.

The French government will publish a list of states or territories that have implemented a similar CbC reporting requirement, have concluded an automatic exchange of information agreement with France, and comply with this agreement.

An entity established in France is also subject to the French CbC reporting requirement when that French entity is held, directly or indirectly, by a legal entity established in a foreign state or territory that would have been subject to the CbC reporting requirement if established in France when:

- the French entity is designated by the consolidated group to perform the CbC reporting obligation for that group, and the French tax authorities have been informed of that designation, or
- the French entity is not able to demonstrate that any other entity of the group, either established in France or in a listed state or territory, has been designated to perform the CbC reporting for the group.

Failure to provide the French tax authorities with complete CbC reporting will result in a penalty of up to EUR 100,000.

France

Thin capitalisation

Under current rules, the tax deduction of interest paid by a French company to its foreign controlling shareholders is subject to the following three restrictions:

Interest rate limitation

Under the amended Article 212 of the FTC, tax deduction of interest paid to related parties is limited to the higher of (i) the average annual interest rate applied by credit institutions to companies for medium-term variable rate loans or (ii) the interest that the borrowing company could have obtained from independent banks under similar circumstances. This rate is 2.15% for financial years ending on 31 December 2015. Having passed this interest rate test, French indebted companies have to pass a second test: the debt ratio.

Debt ratio

That part of interest paid to related parties that is deductible under the rate limitation test is disqualified if it exceeds all of the three following limitations during the same financial year:

- Interest relating to financing of any kind granted by related parties, within the limit of 1.5 times the net equity of the borrower.
- 25% of adjusted net income before tax (*'résultat courant avant impôt'*, defined as the operating income, increased by certain items).
- Interest income received from related parties (i.e. there is no limitation on thin capitalisation grounds when the borrowing company is in a net lending position vis-à-vis related entities).

The portion of the interest that exceeds the three above limits is not deductible, except if it is lower than EUR 150,000.

Carryforward of excess interest

That part of the interest that is not deductible immediately by the borrowing company can be carried forward, without time limit, for relief in subsequent years, provided there is an excess capacity during such years. The amount in excess is, however, reduced by 5% each year, from the second financial year following the financial year in which the interest expense has been incurred.

Exceptions

The thin capitalisation rules do not apply to interest payable by banks and credit institutions, and also to certain specific situations, such as interest in connection with intra-group cash pools or with certain financial lease operations.

The thin capitalisation rules do not apply if the French indebted company can demonstrate that the debt-to-equity ratio of the worldwide group to whom it belongs exceeds its own debt-to-equity ratio.

Deductibility is also facilitated within a French tax consolidated group. The thin capitalisation rules apply to each company member of the group taken on a stand-alone basis. Any excess interest incurred by such company is, however, not carried forward by it. Instead, it is appropriated at the group level.

Extension of the thin capitalisation mechanism to loans granted by related parties

In the specific case where the repayment of a loan granted by a third party (including banks) is guaranteed by a related party or by a third party whose commitment is itself secured by a related one, then the proportion of interest that is payable on that part of the loan that is secured in this way is potentially subject to thin capitalisation rules.

The provisions will not apply where the loan:

- takes the form of a bond issued by way of a public offering or under equivalent foreign regulations, although this excludes private placements
- is guaranteed by a related party solely by way of a pledge of shares in the debtor, security over the debtor's receivables, or shares in a company directly or indirectly owning the debtor so long as the holder of such shares and the debtor are members of the same tax group; as a result, this exception will not apply where a foreign company grants a pledge of shares in its French subsidiary to guarantee the bank loan granted to it
- is obtained in the context of a refinancing to allow the debtor to complete the mandatory repayment of a pre-existing debt, which is required as a result of a direct or indirect takeover of the debtor (allowed up to the amount of the loan principal repaid and accrued interest to that date), or
- has been obtained prior to 1 January 2011 in connection with an acquisition of securities or the refinancing of such acquisition debt.

F

Controlled foreign companies (CFCs)

The CFC rules provide that:

- French corporations are required to include in their taxable income profits made by their more than 50% owned foreign subsidiaries and branches. The 50% holding is determined by direct and indirect control of shares and voting rights.
- The minimum holding threshold has to be reduced to 5% if over 50% of the share capital of the foreign entity is indirectly held through French or foreign companies controlled by the French parent company. However, if the shares in the foreign entity are listed on a regulated market, the French tax authorities will have to demonstrate that the French parent company, together with other entities holding shares in such foreign entity, is acting in concert.
- The CFC rules are only applicable if the foreign legal entity or PE in which the French company owns the requisite percentage of shares is in a country with a privileged tax regime. A privileged tax regime is defined by the FTC as a tax regime in which a foreign jurisdiction subjects taxable income of a foreign entity to at least 50% or lower of the income tax liability that would have been incurred in France, had the activity of the foreign entity been performed in France.
- Profits of the foreign entity that fall under the CFC rules are no longer taxed separately. They are now aggregated with the other taxable profits of the French parent company. Consequently, any tax losses incurred by the French parent company may be offset against the foreign entity's profits.
- The French parent company can avoid the application of the CFC rules if it demonstrates that the foreign entity carries an effective trading or manufacturing activity, conducted from its country of establishment or registered office. Furthermore, the CFC rules, in principle, are not applicable with respect of foreign branches or subsidiaries located in another EU country. However, this exception is not applicable if the French tax authorities can demonstrate that the foreign entity located in another EU country constitutes an artificial arrangement, set up to circumvent French tax legislation. This concept is similar to the 'abuse of law' concept, although it does not have all the same characteristics.

Tax credits and incentives

Foreign tax credit

Under DTTs signed by France, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties, which allows for the deduction of not only the tax actually paid but a higher amount of tax.

France

Tax credit to boost competitiveness and employment

To improve the competitiveness of the French economy and reduce employment costs, France has a tax credit that is available to French and foreign enterprises subject to CIT in France.

Partnerships will pass their tax credit through to their partners, provided the partners are subject to French tax.

There are no requirements regarding the nature of the activity carried out in France.

The tax credit is calculated as a percentage of the wages paid during the calendar year to employees receiving less than 2.5 times the French regulated minimum wage (SMIC).

The current gross monthly SMIC is EUR 1,466.62. The rate applicable for this tax credit is 6%. The tax credit can be offset against the CIT liability payable by the taxpayer with respect to the calendar year during which the wages are paid. Any excess credit can be carried forward and offset against the tax liability of the taxpayer during the next three years.

Credits unused after three years will be refunded to the taxpayer. The 'receivable' (unused credits) can be transferred or sold only to credit institutions. Finally, special provisions apply in the case of mergers and assimilated restructuring operations.

R&D tax credit

The R&D tax credit is determined on the basis of the eligible R&D expenses incurred during the calendar year.

Currently, the R&D credit equals 30% of the R&D eligible expenses incurred during the year, up to EUR 100 million in eligible R&D expenses, and 5% beyond this amount. In addition, eligible R&D expenses incurred by the company can be included in the basis for computation of the tax credit at up to 100% of that amount.

Moreover, the 'standard' rate is 40% and 35% for the first and the second year, respectively, during which the company incurs eligible R&D expenses, or after the expiration of a period of five consecutive years during which the company did not benefit from the tax credit, provided, in both cases, that the concerned company is not affiliated with another company that benefited from the R&D tax credit within the same time period.

The tax code classifies eligible technical and scientific research operations in three areas: fundamental research, applied research, and experimental development.

The eligible expenditures include the following:

- Tax deductible depreciation expenses relating to fixed assets, created or acquired newly, assigned to eligible R&D works/projects, including patents acquired.
- Costs relating to staff qualifying as scientists and/or engineers (staff costs relating to 'young graduate doctors' are retained at up to 200% during the 24 months following their hiring by the company).
- Expenses resulting from outsourced R&D works/projects.
- Expenses incurred for patent registration and/or in connection with the defence of patents.
- Expenses relating to the monitoring of technical developments.
- Premiums paid in connection with insurance contracts relating to the legal defence of patents.

Operating costs are taken into account by retaining 50% of the R&D staff costs plus 75% of the depreciation on the assets allocated to the research. Also, spending on outsourcing

to private research organisations is included in the limit of three times the total amount of other research expenses qualifying for the tax credit.

The use of patented or patentable technologies in manufacturing

Companies that are involved in the manufacturing of products in France containing patented or patentable technologies, or companies that incorporate such technologies into goods that are manufactured in France, benefit from a reduced effective rate of tax.

In the case of a licensing arrangement between connected French companies, the licensor will benefit from a reduced 15% tax rate on royalty income, whereas the licensee company will benefit from a tax deduction at 33.33%.

In order for a licensee company to benefit from full deductibility for royalties paid, the rules require that the licensee company 'effectively exploits' the rights available to it.

F

Inbound investment incentives

No particular incentives are available to foreign investors in France. However, the government offers a comprehensive programme of tax incentives and development subsidies to encourage investment in underdeveloped areas.

Capital investment is encouraged through the declining-balance method of depreciation as well as through exceptional depreciation for certain capital expenditures.

Withholding taxes

Payments to resident corporations and individuals are not subject to WHT.

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

In a decision given on 9 November 2015, the French Administrative Supreme Court ruled that a person who is exempt from tax in a contracting state by reason of one's status or activity cannot be considered liable to taxation and, consequently, is not a resident of the contracting state under the DTT if the treaty defines a 'resident' as a person who is liable to tax in a contracting state.
