For the financial year ended 31 December 2009

## 3. Critical accounting estimates, assumptions and judgements<sup>1,2</sup>

Estimates, assumptions and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

FRS 1  
(122,125,126,129)

### 3.1 Critical accounting estimates and assumptions

#### (a) Estimated impairment of non-financial assets

Goodwill is tested for impairment annually and whenever there is indication that the goodwill may be impaired. Intangible assets, property, plant and equipment and investments in subsidiaries, associates and joint ventures are tested for impairment whenever there is any objective evidence or indication that these assets may be impaired.

The recoverable amounts of these assets and where applicable, cash-generating units, have been determined based on value-in-use calculations. These calculations require the use of estimates (Note 29(a)).

An impairment charge of \$4,650,000 arose in the furniture CGU in the People's Republic of China in the financial year ended 31 December 2009, which reduced the carrying amount of goodwill allocated to the furniture CGU in the People's Republic of China from \$4,680,000 to \$30,000. If the management's estimated gross margin used in the value in use calculation for this CGU at 31 December 2009 is lowered by 10%, the remaining goodwill of \$30,000 would be fully impaired, and in addition, the Group would reduce the carrying value of property, plant and equipment in this CGU, amounting to \$20,213,000, by \$350,000.<sup>3</sup>

If the management's estimated pre-tax discount rate applied to the discounted cash flows for the furniture CGU in the People's Republic of China at 31 December 2009 is raised by 1%, the carrying amounts of goodwill and property, plant and equipment in this CGU would have been reduced by \$30,000 and \$250,000 respectively.<sup>3</sup>

#### (b) Uncertain tax positions

The Group is subject to income taxes in numerous jurisdictions. In determining the income tax liabilities, management is required to estimate the amount of capital allowances and the deductibility of certain expenses ("uncertain tax positions") at each tax jurisdiction.

The Group has significant open tax assessments with one tax authority at the balance sheet date. As management believes that the tax positions are sustainable, the Group has not recognised any additional tax liability on these uncertain tax positions. The maximum exposure of these uncertain tax positions is \$3,500,000.

# Notes to the Financial Statements

For the financial year ended 31 December 2009

## 3. Critical accounting estimates, assumptions and judgements (continued)

### 3.1 Critical accounting estimates and assumptions (continued)

#### (c) Construction contracts

The Group uses the percentage-of-completion method to account for its contract revenue. The stage of completion is measured by reference to the contract costs incurred to date compared to the estimated total costs for the contract.

Significant assumptions are required to estimate the total contract costs and the recoverable variation works that will affect the stage of completion and the contract revenue respectively. In making these estimates, management has relied on past experience and the work of specialists.

If the revenue on contracts that are work-in-progress increases/decreases by 10% from management's estimates, the Group's revenue will increase/decrease by \$1,250,000 and \$1,000,000 respectively.<sup>3</sup>

If the contract costs to be incurred increase/decrease by 10% from management's estimates, the Group's profit will decrease/increase by \$800,000 and \$700,000 respectively.<sup>3</sup>

#### (d) Impairment of loans and receivables

Management reviews its loans and receivables for objective evidence of impairment at least quarterly. Significant financial difficulties of the debtor, the probability that the debtor will enter bankruptcy, and default or significant delay in payments are considered objective evidence that a receivable is impaired. In determining this, management makes judgement as to whether there is observable data indicating that there has been a significant change in the payment ability of the debtor, or whether there have been significant changes with adverse effect in the technological, market, economic or legal environment in which the debtor operates in.

Where there is objective evidence of impairment, management makes judgements as to whether an impairment loss should be recorded as an expense. In determining this, management uses estimates based on historical loss experience for assets with similar credit risk characteristics. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between the estimated loss and actual loss experience.

If the net present values of estimated cash flows increase/decrease by 10% from management's estimates for all past due loans and receivables, the Group's and Company's allowance for impairment will decrease/increase by \$584,000 (2007: \$318,000) and \$220,000 (2007: \$106,000)<sup>3</sup>.

# Notes to the Financial Statements

For the financial year ended 31 December 2009

## 3. Critical accounting estimates, assumptions and judgements (continued)

### 3.2 Critical judgements in applying the entity's accounting policies

#### (a) Deferred income tax assets

The Group recognises deferred income tax assets on carried forward tax losses to the extent there are sufficient estimated future taxable profits and/or taxable temporary differences against which the tax losses can be utilised and that the Group is able to satisfy the continuing ownership test.

During 2009, the Group reorganised shareholdings of certain group entities, for which a deferred tax asset amounting to \$250,000 was recognised based on the anticipated future use of tax losses carried forward by those entities. If the tax authority regards the group entities as not satisfying the continuing ownership test, the deferred tax income asset will have to be written off as income tax expense.

#### (b) Impairment of financial assets, available-for-sale

At the balance sheet date, the fair values of certain equity securities classified as available-for-sale financial assets amounting to \$10,230,000 have declined below cost by \$203,000. The Group has made a judgement that this decline is not significant or prolonged. In making this judgement, the Group has considered, among other factors, the short-term duration of the decline, the small magnitude by which the fair value of the investment is below cost; and the positive financial health and short-term business outlook of the investee.

If the decline in fair value below cost was considered significant or prolonged, the Group would suffer an additional loss of \$203,000 in its 2009 financial statements, being the transfer of the fair value loss included in the fair value reserve to profit or loss.

#### (c) Fair value estimation on unlisted securities

The Group holds corporate variable rate notes that are not traded in an active market amounting to \$5,347,000. The Group has used discounted cash flow analyses for valuing these financial assets and made estimates about expected future cash flows and discount rates.

If the discount rate used in the discounted cash flow analysis is increased or decreased by 1% from management's estimates, the Group's carrying amount of financial assets, available-for-sale will be reduced by \$196,000 or increased by \$209,000 respectively.

### 3. Critical accounting estimates, assumptions and judgements (continued)

#### 3.2 Critical judgements in applying the entity's accounting policies (continued)

##### (d) Revenue recognition

The Group started to design and sell a new furniture line to a new customer during 2009. Revenue of \$950,000 and profit of \$665,000 are recognised on these sales.

The buyer has the right to rescind the sales if there is 5% dissatisfaction with the quality of the first 1,000 pieces of furniture sold to its customers. Based on past experience with similar sales, the Group estimates that the dissatisfaction rate will not exceed 3% and as such, recognised the revenue on this transaction during 2009. If the sale is rescinded, the Group will suffer an estimated loss of \$700,000 in its 2010 financial statements, \$665,000 being the reversal of 2009 profits and \$35,000 being the costs for returning the inventory to the warehouse.

## Guidance notes

### Critical accounting estimates, assumptions and judgements

1. These disclosures must be tailored for another reporting entity as they are specific to an entity's particular circumstances. Additional examples are available in Appendix 2.
2. Disclosure of key sources of estimation uncertainty is not required for assets and liabilities that are measured at fair value based on recently observable market prices. This is because even if their fair values may change materially within the next financial year, these changes will not arise from assumptions or other sources of estimation uncertainty at the balance sheet date.
3. The sensitivity of carrying amounts to the methods, assumptions and estimates underlying their calculation is required to be disclosed only when it is necessary to help users of financial statements understand difficult, subjective or complex judgements made by management concerning the future and other key sources of estimation uncertainty.

## Guidance notes

### Expenses by nature

- This disclosure is required only of entities that present their expenses by function on the face of the statement of comprehensive income. This publication illustrates a reconciliation of significant/material expenses to the total expenses by function (excluding finance expenses). This presentation is encouraged as it ensures that all significant/material expenses have been disclosed. As an alternative, the reporting entity can present only selected significant/material expenses in this note.
- Where items of income and expense are of such size, nature or incidence that their disclosure is relevant to explain the performance of the entity for the period, the nature and amount of such items shall be disclosed separately. This includes:
  - write-downs of inventories or property, plant and equipment or reversals;
  - restructuring provision for costs of restructuring or reversal;
  - disposals of items of property, plant and equipment;
  - disposals of investments;
  - litigation settlements;
  - other reversals of provisions;
  - minimum lease payments; and
  - contingent rents and sub-lease payments.

### Guidance notes

#### Employee compensation

1. For Singapore entities, defined contribution plans include contributions to the Central Provident Fund. A number of countries in the region (for example, Korea, Taiwan, Thailand, Vietnam, Indonesia, India, Sri Lanka, Pakistan and Bangladesh) have local legislation that requires companies to contribute to defined benefits plans. Accounting for defined benefit plans is complicated and the disclosures are extensive. Please refer to Appendix 1 Example 5 for an illustrated disclosure.

Included in the Group's interest income on loans and receivables from non-related parties is interest income of \$80,000 (2008: \$16,000) on impaired receivables.

FRS 107(20)(d)

Included in the Group's rental income from investment properties is contingent rent of \$50,000 (2008: \$62,000). The contingent rent was computed based on sales by the lessees.

FRS 17(56)(b)

The Jobs credit scheme is a cash grant introduced in the Singapore Budget 2009 to help businesses preserve jobs in the economic downturn. The Jobs Credit will be paid to eligible employers in 2009 in four payments and the amount an employer can receive would depend on the fulfilment of the conditions as stated in the scheme.

FRS 20(39)(b)(c)

## Guidance notes

### Other income

- Where "Other income" is immaterial, a reporting entity may combine it with "Other losses – net" (Note 8 to the financial statements).

### Interest and dividend income

- As indicated in the guidance notes under Accounting Policy Note 2.11(d), this publication illustrates the disclosure where the entity has elected to recognise interest income, interest expense and dividend income on financial assets, at fair value through profit or loss, as part of the net fair value gains or losses.

FRS 39(55)(a)  
FRS 107(20)(a),  
AppB5(e)

As an alternative, an entity may recognise interest income, interest expense and dividend income separately. When this option is adopted, interest income and expense shall be computed using the effective interest method in accordance with FRS 18.30(a) and FRS 39.9.

## Guidance notes

### Income taxes

#### Applicable tax rate(s)

1. In explaining the relationship between tax expense (or income) and accounting profit, an entity shall use an applicable tax rate that provides the most meaningful information to the users of its financial statements. This publication illustrates the disclosure where the corporate tax rate in the country in which the Company is domiciled (Singapore) is the most meaningful tax rate.

FRS 12(85)

Another entity operating in several jurisdictions may find it more meaningful to aggregate separate reconciliations prepared using the domestic rates in those jurisdictions. When that approach is issued, the line item "effect of different tax rates in other countries" will no longer be relevant.

2. In the event that changes to tax laws relating to the new tax incentives are not finalised by the reporting date and the effect is expected to be material, the following disclosure can be considered:

FRS 12(81)(d)

*"The Group's and Company's tax liabilities have been computed based on the corporate tax rate and tax laws prevailing at balance sheet date. On 22 January 2009, the Singapore Second Minister for Finance announced changes to the Singapore tax laws, which included new incentives that might be available to certain group entities with effect from the year of assessment 2009. The Group's and Company's tax expense for the financial year ended [31 December 2009] have not taken into consideration the effect of these incentives as the final detailed interpretation of the incentives had not been released by the tax authority as of the date of authorisation of these financial statements."*

Following the approval of the Group's management and shareholders on 31 May 2009 to sell 70% in PwC Glass Sdn Bhd in Malaysia (comprising of the Group's glass business segment), the entire assets and liabilities related to PwC Glass Sdn Bhd are classified as a disposal group held-for-sale on the balance sheet, and the entire results from PwC Glass Sdn Bhd are presented separately on the statement of comprehensive income as "Discontinued operations". The transaction is expected to be completed by April 2010.

### Guidance notes

#### Discontinued operations

1. An entity shall re-present the prior period's results for the discontinued operations.
2. The net cash flows attributable to operating, investing and financing activities of discontinued operations (including comparatives) shall be disclosed either in the notes or on the face of the cash flow statement. This publication illustrates the disclosure when the entity elects to disclose in the notes to the financial statements.

FRS 105(34)

FRS 105(33)(c)

FRS 105(34)

If the entity elects to present net cash flows on the face of the cash flow statement, the relevant net cash flows should be presented under operating, investing and financing activities respectively. It is not appropriate to combine and present the net cash flows from three activities as one line item under operating, investing or financing activities.

## 12. Earnings per share<sup>1,2</sup>

### (a) Basic earnings per share

Basic earnings per share is calculated by dividing the net profit attributable to equity holders of the Company by the weighted average number of ordinary shares outstanding during the financial year.

	Continuing operations		Discontinued operations		Total		
	2009	2008	2009	2008	2009	2008	
Net profit/(loss) attributable to equity holders of the Company (\$'000)	<u>29,928</u>	17,576	<u>100</u>	(480)	<u>30,028</u>	17,096	FRS 33(70)(a)

Basic earnings/(loss) per share (\$ per share)	<u>1.33</u>	0.90	<u>0.01</u>	(0.02)	<u>1.34</u>	0.88	

### (b) Diluted earnings per share

For the purpose of calculating diluted earnings per share, profit attributable to equity holders of the Company and the weighted average number of ordinary shares outstanding are adjusted for the effects of all dilutive potential ordinary shares. The Company has two categories of dilutive potential ordinary shares: convertible bonds and share options.

FRS 33(30,31)

FRS 33(33,36)

FRS 33(44)

Convertible bonds are assumed to have been converted into ordinary shares at issuance and the net profit is adjusted to eliminate the interest expense less the tax effect.

FRS 33(49)

For share options, the weighted average number of shares on issue has been adjusted as if all dilutive share options were exercised. The number of shares that could have been issued upon the exercise of all dilutive share options less the number of shares that could have been issued at fair value (determined as the Company's average share price for the financial year) for the same total proceeds is added to the denominator as the number of shares issued for no consideration. No adjustment is made to the net profit.

FRS 33(45)

### Guidance notes

#### Earnings per share ("EPS")

- If the number of ordinary or potential ordinary shares increases as a result of a capitalisation, bonus issue or share split, or decreases as a result of a reverse share split before the financial statements are authorised for issue, the basic and diluted EPS for all periods presented shall be adjusted retrospectively, even when this occurs after the balance sheet date.
- If the reporting entity discloses, in addition to basic and diluted EPS, per share amounts using another measure of net profit, such amounts shall be calculated using the weighted average number of ordinary shares determined based on FRS 33. The basic and diluted per share amount shall be disclosed in the notes to the financial statements. A reconciliation shall be provided between the measure used and a line item reported in the statement of comprehensive income.

## Guidance notes

### Cash and cash equivalents

#### Cash equivalents for the purpose of presenting cash flow statement

- Under FRS 7, cash equivalents are defined as "short-term highly liquid investments that are readily convertible to a known amount of cash and which are subject to an insignificant risk of changes in value". An investment normally qualifies as a cash equivalent when it has a short maturity of, say, three months or less from the date of acquisition.
- Bank deposits pledged as collateral shall not be included as cash and cash equivalents in the cash flow statement.

FRS 7(7-9)

FRS 7(6)

#### Cash not available for use

- There may be circumstances in which cash and bank balances held by an entity are not available for use by the Group. An example is when a subsidiary that operates in a country where exchange controls or other legal restrictions apply. When this occurs, the following disclosure can be considered:

FRS 7(49)

FRS 7(48)

*"Included in the cash and cash equivalents are bank deposits amounting to \$[] (2008: \$[]) which are not freely remissible for use by the Group because of currency exchange restrictions."*

*Period when the cash flows on cash flow hedges are expected to occur or affect profit or loss*

FRS 107(23)(a)

(a) Interest rate swaps

Interest rate swaps are entered to hedge floating quarterly interest payments on borrowings that will mature on 31 December 2012. Fair value gains and losses on the interest rate swaps recognised in the hedging reserve are transferred to profit or loss as part of interest expense over the period of the borrowings.

FRS 39(100)

(b) Currency forwards

Currency forwards are entered to hedge highly probable forecast transactions denominated in foreign currency expected to occur at various dates within three months from the balance sheet date. The currency forwards have maturity dates that coincide within the expected occurrence of these transactions. Gains and losses recognised in the hedging reserve prior to the occurrence of these transactions are transferred to profit or loss within three months from the balance sheet date except for those forwards used to hedge highly probable forecast foreign currency purchases of property, plant and equipment, whose gains and losses are included in the cost of the assets and recognised in profit or loss over their estimated useful lives as part of depreciation expense.

## Guidance notes

### Investments in associated companies

#### Cumulative preference shares issued by associated company

1. If the associated company has cumulative preference shares that are held by parties outside the Group and that are classified as equity, the investor computes its share of results after adjusting for the dividends on such shares, whether or not the dividends have been declared.

FRS 28(28)

#### Summarised financial information of associated companies

2. An alternative method of presenting summarised financial information is to disclose the Group's proportionate share instead of the gross amounts of assets, liabilities and results as recorded in the associated companies' financial statements. The alternative method is recommended when the reporting entity has several associated companies with differing interests.
3. Where the reporting entity is an investor that is exempted under paragraph 13(c) of FRS 28 from applying equity accounting for its investments in associated companies and elects to use that exemption, the summarised financial information of the associated companies shall continue to be presented in the investor's separate financial statements. No similar requirement is applicable to joint ventures.

FRS 28(37)(i)

#### Interest in an associated company

4. The interest in an associated company is the carrying amount of the investment in the associated company together with any long-term interests that, in substance, form part of the investor's net investment in the associated company. For example, an item for which settlement is neither planned nor likely to occur in the foreseeable future is, in substance, an extension of the entity's investment in that associated company.

## 24. Investment in a joint venture

The Company has a 60% equity interest at a cost of \$880,000 (2008: \$880,000) in PwC JV Logistics (PRC) Ltd (“PwC JV Logistics”), which provides freight forwarding and warehousing services in the People’s Republic of China. PwC JV Logistics is deemed to be a joint venture of the Company as the appointment of its directors and the allocation of voting rights for key business decisions require the unanimous approval of its venturers.<sup>1</sup>

## Guidance notes

### Investment in a joint venture

#### Legal subsidiary not required to be consolidated

1. Under the Companies Act, a company is a subsidiary of another company if the latter owns more than 50% of the equity interest in the former. This definition is different from FRS 27, which defines subsidiary as an entity that is controlled by another entity. Accordingly, the Accounting and Corporate Regulatory Authority ("ACRA") issued Practice Direction No. 4 of 2006 to clarify that:
  - (a) a parent (under FRS 27) which is not a holding company (under the Companies Act) must prepare consolidated accounts in accordance with FRS 27 as mandated by the Companies Act;
  - (b) a holding company (under the Companies Act) which is also a parent (under FRS 27) must prepare consolidated accounts in accordance with FRS 27 as mandated by the Companies Act; and
  - (c) a holding company (under the Companies Act) which is not a parent (under FRS 27) must incorporate financial information relating to its legal subsidiaries in its financial statements in accordance with the relevant FRS (FRS 28, 31 or 39).

The above is possible because ACRA interprets the term "consolidated accounts" in Section 201(3A) of the Companies Act as not restricted to the meaning of consolidated financial statements under FRS 27. Instead, the phrase "consolidated accounts" is viewed wide enough to include the incorporation of the financial information of a legal subsidiary as accounted for in accordance with FRS 28, 31 or 39.

#### Summarised financial information of joint ventures

2. Where the reporting entity is a venturer that is exempted under paragraph 2 of FRS 31 from applying proportionate consolidation or equity accounting for its investments in joint ventures and elects to use that exemption, the summarised financial information of the joint ventures need not be disclosed in the venturer's separate financial statements. This disclosure shall be made in the consolidated financial statements only when the joint ventures are either proportionately consolidated or equity accounted for. This treatment is different from that applicable to associated companies.
3. The reporting entity must also present the summarised financial information of joint ventures based on the Group's proportionate interests in the joint ventures. There is no option to present the items at their gross amounts, unlike associated companies.

### Acquisition of a subsidiary

On 1 October 2009, the Company acquired 70% of equity interest of XYZ Electronics Pte Ltd (now known as PwC Components (China) Pte Ltd (“PwC China”) for a cash consideration (inclusive of transaction costs of \$550,000) of \$14,250,000. Additional consideration of \$1,000,000 will be payable in cash if the acquired operations achieve certain profit targets. At the date of these financial statements, it is the directors’ assessment that no additional consideration is likely to be payable.

FRS 103(66)(a)  
FRS 103(67)(a-d)

The fair value of identifiable net assets of the acquiree at the date of acquisition amounted to \$15,141,000, resulting in goodwill on acquisition of \$3,651,000. Details of identifiable net assets acquired are disclosed in Note 13.

FRS 103(67)(f)

The goodwill was attributable to the distribution network of the acquired business and the synergies expected to arise after the acquisition.

FRS 103(67)(h)

The acquired subsidiary contributed revenue of \$4,500,000 and net profit of \$675,000 to the Group for the period from 1 October 2009 to 31 December 2009. The subsidiary’s assets and liabilities as at 31 December 2009 were \$2,950,000 and \$890,000 respectively. If the acquisition had occurred on 1 January 2009, Group revenue would have been \$230,214,000 and total profit would have been \$35,276,000.

FRS 103(67)(i)

FRS 103(70)

Information about an acquisition that took place on 1 March 2010, which is a transaction after the balance sheet date, is set out in Note 47.

### Guidance notes

#### Investment properties

- Under the amendment to FRS 40 that became effective 1 January 2009, investment property that is being constructed or developed for future use as investment property is accounted for as investment property. Accordingly, the amounts are reclassified from property, plant and equipment to investment property.

FRS 40(50,77)

#### Adjustment to fair value

- When a valuation obtained for investment property is adjusted significantly for the purpose of the financial statements, for example to avoid double-counting for assets or liabilities that are recognised as separate assets and liabilities, the entity shall disclose a reconciliation between the valuation obtained and the adjusted valuation included in the financial statements, showing separately the aggregate amount of each type of significant adjustment.

For the financial year ended 31 December 2009

## 28. Property, plant and equipment (continued)

(a) Included in additions in the consolidated financial statements are plant and equipment, and motor vehicles acquired under finance leases amounting to \$400,000 (2008: Nil) and \$200,000 (2008: Nil) respectively.

FRS 7(43)

The carrying amounts of plant and equipment, and motor vehicles held under finance leases are \$745,000 (2008: \$450,000) and \$180,000 (2008: Nil) respectively at the balance sheet date<sup>5</sup>.

FRS 17(31)(a)

(b) The freehold and leasehold land and buildings of the Group and the Company were valued by an independent professional valuer based on the properties' highest-and-best-use using the Direct Market Comparison Method at the balance sheet date.

FRS 16(77)(a-d)  
SGX 1207(10)

(c) If the land and buildings stated at valuation were included in the financial statements at cost less accumulated depreciation, their net book values would be:

FRS 16(77)(e)

	Group	
	2009	2008
	\$'000	\$'000
Freehold land	8,010	8,108
Leasehold land	28,455	7,800
Buildings	<u>51,609</u>	<u>21,529</u>

(d) Bank borrowings are secured on property, plant and equipment of the Group and the Company with carrying amounts of \$52,835,000 and \$537,000 respectively (2008: \$75,530,000 and \$390,000) (Note 31(a)).

## Guidance notes

### Property, plant and equipment (“PPE”)

#### Disposals

1. Disposal of PPE due to the sale of subsidiary may be included in the “Disposals” line item, as illustrated in this publication.

#### Revaluations

2. When an item of PPE is revalued, the accumulated depreciation at the date of the revaluation can either be :

- (a) restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount; or
- (b) eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Method (b) is illustrated in this publication.

FRS 16(35)

3. Entities are required to perform regular subsequent revaluations unless the initial revaluations were performed before 1984 or only one-off revaluations were performed between 1 January 1984 and 31 December 1996 (both dates inclusive). In the event that an item of PPE has been revalued more than once between 1 January 1984 and 31 December 1996, the entity shall explain why the PPE shall be exempted from subsequent revaluation and obtain its independent auditor’s concurrence on this.

FRS 16(81)

### Property under development

4. Property under construction or development for future use as investment property is in the scope of FRS 40 for annual periods beginning on or after 1 January 2009 (“the effective date”) (Improvements to FRS published in October 2008). Investment property under construction that was previously accounted for as property under development under FRS 16 shall be reclassified as investment property from the effective date onwards.

FRS 40(8)(e), (85B)

### Leased assets

5. Net carrying amount at the balance sheet date shall be disclosed for each class of assets acquired by finance lease.

FRS 17(31)(a)

### Acquisition of subsidiary

6. Property, plant and equipment acquired as part of a business combination should be initially recorded at fair value from the perspective of the Group. From the viewpoint of the acquired entity, however, the property, plant and equipment continue to be recorded at cost less accumulated depreciation, including accumulated depreciation recorded prior to the date of the business combination. At Group level, consolidation adjustments may be necessary to adjust subsidiary book values to the Group numbers. For example, any pre-acquisition accumulated depreciation at the subsidiary level should not be carried forward to the consolidated Group numbers.

## 29. Intangible assets (continued)

### (a) Goodwill arising on consolidation (continued)

#### *Impairment tests for goodwill*

Goodwill is allocated to the Group's cash-generating units ("CGUs") identified according to countries of operation and business segments.

A segment-level summary of the goodwill allocation is as follows:

	Group						FRS 36(134)(a)	
	2009			2008				
	Component parts	Furniture	Total	Component parts	Furniture	Total		
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000

	<b>10,543</b>	<b>317</b>	<b>10,860</b>	7,020	4,980	12,000		

The recoverable amount of a CGU was determined based on value-in-use. Cash flow projections used in the value-in-use calculations were based on financial budgets approved by management covering a five-year period. Cash flows beyond the five-year period were extrapolated using the estimated growth rates stated below. The growth rate did not exceed the long-term average growth rate for the component parts business in which the CGU operates.

FRS 36(134)(c)

FRS 36(134)(d)(iii)

#### **Key assumptions used for value-in-use calculations:**

## 29. Intangible assets (continued)

### (a) Goodwill arising on consolidation (continued)

2008	Component parts				Furniture			
	Singapore	PRC	Philippines	Other	Singapore	PRC	Philippines	Other
Gross margin <sup>1</sup>	60.0%	59.0%	60.0%	56.0%	58.0%	56.0%	58.0%	55.0%
Growth rate <sup>2</sup>	5.8%	8.8%	7.8%	1.9%	5.1%	8.3%	7.1%	1.4%
Discount rate <sup>3</sup>	6.3%	10.0%	10.7%	12.8%	6.5%	11.0%	11.8%	13.5%

<sup>1</sup> Budgeted gross margin

<sup>2</sup> Weighted average growth rate used to extrapolate cash flows beyond the budget period

<sup>3</sup> Pre-tax discount rate applied to the pre-tax cash flow projections

These assumptions were used for the analysis of each CGU within the business segment. Management determined budgeted gross margin based on past performance and its expectations of the market development. The weighted average growth rates used were consistent with the forecasts included in industry reports. The discount rates used were pre-tax and reflected specific risks relating to the relevant segments.

FRS 36(134)(d)(ii)  
FRS 36(55)

An impairment charge of \$4,650,000 (2008: Nil) is included within "Administrative expenses" in the statement of comprehensive income<sup>1</sup>. The impairment charge has arisen from the furniture CGU in the People's Republic of China segment following a decision to reduce the manufacturing output as a result of reducing customer demand. The Group has also reassessed the useful lives of its property, plant and equipment and determined that no change in the useful lives was required.

FRS 36(126)(a)  
FRS 36(130)

The impairment test carried out as at 31 December 2009 for the component parts CGU in Singapore, which includes 55% of the goodwill recognised on the balance sheet has revealed that the recoverable amount of the CGU is only \$10,000,000 or 3% higher than its carrying amount. This is the result of the significant pressure felt on selling prices and a sharp decrease in demand encountered as a result of the economic crisis. A further decrease in the growth margin by 1% or a decrease in the growth rate by 0.2% would result in the recoverable amount of the component parts CGU in Singapore to equal its carrying amount<sup>2</sup>.

- These disclosures are required only for entities that present expenses by function on the face of the statement of comprehensive income.

FRS 38(118)(d)

#### Effects of reasonably possible changes on impairment key assumptions

- If a reasonably possible change in a key assumption on which management has based its determination of the unit's (group of units') recoverable amount would cause the unit's (group of units') carrying amount to exceed its recoverable amount, disclose:
  - the amount by which the unit's (group of units') recoverable amount exceeds its carrying amount;
  - the value assigned to the key assumption;
  - the amount by which the value assigned to the key assumption must change, after incorporating any consequential effects of that change on the other variables used to measure recoverable amount, in order for the unit's (group of units') recoverable amount to be equal to its carrying amount.

Total borrowings include secured liabilities of \$49,557,000 (2008: \$74,884,000) and \$3,500,000 (2008: \$41,951,000) for the Group and the Company respectively. Bank overdrafts of the Group and the Company are secured by debenture deeds which provide for first floating charges on inventories (Note 18) of the Company and certain subsidiaries. Bank borrowings of the Group and the Company are secured over certain bank deposits (Note 13), certain trade receivables (Note 17), certain inventories (Note 18), investment properties (Note 26) and certain land and buildings (Note 28(d)). Finance lease liabilities of the Group are effectively secured over the leased plant and equipment, and motor vehicles (Note 28(a)), as the legal title is retained by the lessor and will be transferred to the Group upon full settlement of the finance lease liabilities.

	<b>38,900</b>	<b>25,000</b>	<b>15,010</b>	<b>14,280</b>

The facilities expiring not later than one year from the balance sheet date are facilities subject to annual review at various dates during 2010. The other facilities are arranged mainly to help finance the Group's proposed expansion in Asia.

## Guidance notes

- FRS 107 requires additional disclosures in the event of defaults and breaches on borrowings. Appendix 1 Example 6 includes an illustration.
- Under an existing loan facility, if an entity has the discretion to refinance or roll over the borrowing for at least twelve months after the balance sheet date and expects to do so, it classifies the borrowings as non-current. However, when refinancing or rolling over the borrowing is not at the discretion of the entity (for example, there is no agreement to refinance), the potential to refinance is not considered and the obligation is classified as current.

## 32. Convertible bonds

On 2 January 2009, the Company issued 5% convertible bonds denominated in Singapore Dollars with a nominal value of \$50,000,000. The bonds are due for repayment five years from the issue date at their nominal value of \$50,000,000 or conversion into shares of the Company at the holder's option at the rate of 33 shares per \$500 nominal value of the bonds.

FRS 107(17)

The fair value of the liability component, included in non-current borrowings, is calculated using a market interest rate for an equivalent non-convertible bond at the date of issue. The residual amount, representing the value of the equity conversion component, is included in shareholders' equity in other reserves (Note 39(b)(vi)), net of deferred income taxes.

FRS 32(28)

FRS 32(31)

DV (disclosed in  
Note 2.13(c))

The carrying amount of the liability component of the convertible bonds at the balance sheet date is derived as follows:

## Guidance notes

### Convertible bonds

1. Certain tax authorities may compute the tax base of the liability component of such convertible bonds as the sum of the carrying amount of both the liability and equity components. When this occurs, the issuer shall recognise a deferred tax liability on the resulting temporary differences at the date of issuance of these instruments, with the corresponding entry charged directly to the carrying amount of the equity component (i.e. equity component reserve).

## 33. Redeemable preference shares

On 4 January 2006, the Company issued 30 million cumulative redeemable preference shares at \$1 per share to its immediate holding corporation. The shares are mandatorily redeemable at \$1 per share on 4 January 2016 or by the Company at any time before that date. The shares pay fixed dividends of 6.5% per annum.

FRS 107(31), AppB22

## 34. Finance lease liabilities

The Group leases certain plant and equipment, and motor vehicles from non-related parties under finance leases. The lease agreements do not have renewal clauses but provide the Group with options to purchase the leased assets at nominal values at the end of the lease term.

### (a) Warranty

The Group and the Company give two-year warranties on certain products and undertake to repair or replace items that fail to perform satisfactorily. A provision is recognised at the balance sheet date for expected warranty claims based on past experience of the level of repairs and returns.

FRS 37(85)(a)

Movement in provision for warranty is as follows:

	Group		Company	
	2009 \$'000	2008 <sup>1</sup> \$'000	2009 \$'000	2008 <sup>1</sup> \$'000

### (b) Restructuring

The restructuring of the furniture segment will result in the retrenchment of 110 employees at two factories. An agreement was reached with the employees' union that specified the number of staff involved and quantified the amounts payable to those made redundant. Estimated staff redundancy costs amounting to \$840,000 are recognised in the financial year ended 31 December 2009. Other restructuring expenses amounting to \$260,000 mainly comprise penalties on the early termination of leases on vacated properties.

FRS 37(85)(a)

The provision for restructuring of \$1,100,000 is an update of the amount of \$800,000 recorded in the Group's interim consolidated financial report for the six months ended 30 June 2009, following the finalisation of certain restructuring costs in the second half of 2009. The provision for restructuring is expected to be fully utilised during the first half of 2010.<sup>2</sup>

FRS 37(84)(b)

FRS 34(26)

In conjunction with the restructuring exercise, a goodwill impairment charge of \$4,650,000 is recognised (Note 29(a)).

FRS 36(130)(a)

## 35. Provisions for other liabilities and charges (continued)

### (c) Legal claims

The provision for legal claims is in respect of certain legal claims brought against the Group by customers, and is expected to be utilised in 2011. In the opinion of the directors, after taking appropriate legal advice, the outcomes of these legal claims are not expected to give rise to any significant loss beyond the amounts provided at 31 December 2009. The directors consider that disclosure of further details of these claims will seriously prejudice the Group's negotiating position and accordingly, further information on the nature of the obligation has not been provided.

FRS 37(85)(a)

FRS 37(92)

At the date of acquisition of PwC China, the acquiree was the defendant in a pending lawsuit for maximum claims of up to \$1,000,000. The fair value of the contingent liability related to that lawsuit, which is estimated to be \$300,000 at the acquisition date, has been recognised as a provision for legal claims. In addition, the sale and purchase agreement contains an indemnification clause in which the previous owners of PwC China agreed to reimburse the Company up to an amount of \$200,000 for the lawsuit. This possible compensation from the selling shareholders of PwC China has not been recognised as an indemnification asset of the acquirer. However, it would be adjusted against goodwill once received from the vendor.

Movement in provision for legal claims is as follows:

#### Provisions for other liabilities and charges

1. Comparative information is encouraged, but not required for the movement of each class of provision.
2. If an estimate of an amount reported in an interim period is changed significantly during the final interim period of the financial year but a separate financial report is not published for that final interim period, the nature and amount of that change in estimate shall be disclosed in a note to the financial statements for that financial year.

Deferred income tax assets are recognised for tax losses and capital allowances carried forward to the extent that realisation of the related tax benefits through future taxable profits is probable. The Group has unrecognised tax losses of \$5,000,000 (2008: \$5,244,000) and capital allowances of \$400,000 (2008: \$544,000) at the balance sheet date which can be carried forward and used to offset against future taxable income subject to meeting certain statutory requirements by those companies with unrecognised tax losses and capital allowances in their respective countries of incorporation. The tax losses have no expiry date except for an amount of \$213,000 which will expire in 2010. The capital allowances will expire between 2011 and 2012.

FRS 12(82)

FRS 12(81)(e)

Deferred income tax liabilities of \$170,000 (2008: \$127,500) have not been recognised for the withholding and other taxes that will be payable on the earnings of an overseas subsidiary when remitted to the holding company. These unremitted earnings are permanently reinvested and amount to \$2,000,000 (2008: \$1,500,000) at the balance sheet date.

## Guidance notes

### Tax on employee share option scheme

1. With effect from the Year of Assessment 2007, companies are allowed tax deduction for costs incurred in the purchase of treasury shares that are transferred to employees pursuant to employee share-based payment ("SBP") arrangements. For details, please refer to the Inland Revenue Authority of Singapore circular – "Use of treasury shares to fulfil obligations under an employee equity-based remuneration scheme" issued in June 2006 and a supplemental circular issued in January 2007.

As the timing of the tax deduction and the recognition of the employee share option expense differs, FRS 12 requires the recognition of the related deferred tax asset if the deferred tax asset recognition criteria are met. For an equity-settled SBP, if the cumulative amount of tax deduction exceeds the tax effect of the related cumulative remuneration expense at the reporting date, the excess of the associated deferred tax shall be recognised directly in equity. All taxes related to cash-settled SBPs shall be recognised in profit or loss.

## 37. Share capital and treasury shares (continued)

### (a) Treasury shares

The Company acquired 1,000,000 (2008: 725,000) of its new shares in the open market during the financial year. The total amount paid to acquire the shares was \$2,072,000 (2008: \$900,000) and this was presented as a component within shareholders' equity.

FRS 32(33)

The Company re-issued 750,000 (2008: Nil) treasury shares during the financial year pursuant to the PwC Employee Share Option Scheme at the exercise price of \$1.31 (2008: Nil) each, for a total cash consideration (net of expense) of \$982,000 (2008: Nil).

### (b) Share options

Share options were granted to key management and employees with more than three years of service under the PwC Employee Share Option Scheme, which became operative on 1 January 2006.

FRS 102(45)(a)

The exercise price of the options is determined at the average of the closing prices of the Company's ordinary shares on the Singapore Exchange for five market days immediately preceding the date of the grant. The vesting of the options is conditional on the key management or employee completing another two years of service to the Group and the Group achieving its targets of profitability and sales growth.

Once they have vested, the options are exercisable during a contractual option term of four years. The options may be exercised in full or in part in respect of 1,000 shares or a multiple thereof, on the payment of the exercise price. The persons to whom the options have been issued have no right to participate by virtue of the options in any share issue of any other company. The Group has no legal or constructive obligation to repurchase or settle the options in cash.

FRS 1(76)(a)(vii)

On 1 January 2009, options to subscribe for 964,000 ordinary shares of the Company at an exercise price of \$2.95 per ordinary share were granted pursuant to the Scheme ("2009 Options"). The 2009 Options are exercisable from 1 January 2011 and expire on 31 December 2014.

FRS 102(45)(b)(vii)

Out of the unexercised options for 3,496,000 (2008: 3,582,000) shares, options for 1,000,000 (2008: 1,850,000) shares are exercisable at the balance sheet date. Options exercised in 2008 resulted in 750,000 treasury shares (2008: Nil) being re-issued at the exercise price of \$1.31 (2008: Nil) each. The weighted average share price at the time of exercise was \$3.20 (2008: Nil) per share. The related transaction costs amounting to \$500 (2008: Nil) were deducted against the proceeds received.

FRS 102(45)(c)

FRS 102(46,47(a))

The fair value of options granted on 1 January 2009 (2008: 1 January 2008), determined using the Binomial Valuation Model, was \$600,000 (2008: \$780,000). The significant inputs into the model were the share price of \$2.95 (2008: \$1.28) at the grant date, the exercise price of \$2.95 (2008: \$1.28), standard deviation of expected share price returns of 30% (2008: 27%), the option life shown above and the annual risk-free interest rate of 5% (2008: 4%). The volatility measured as the standard deviation of expected share price returns was estimated based on statistical analysis of share prices over the last three years.

## Guidance notes

### Other reserves

#### Borrowings designated as net investment hedges

- For a monetary item that is receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur in the foreseeable future, the item is in substance a part of the entity's net investment in that foreign operation. Currency translation differences arising from such items shall be recognised (a) in profit or loss in the separate financial statements of the reporting entity or of the foreign operation; and (b) in a separate component of equity in the consolidated financial statements.

FRS 21(15,32)

### Minority interests

- Minority interests' share of reserve movement (net of tax) should be separately disclosed, where applicable.

FRS 16(41)

### Transfer of revaluation surplus on property, plant and equipment ("PPE")

- This publication illustrates the disclosure where the entity has elected to transfer revaluation surplus of an item of PPE directly to retained profits when that asset is derecognised. An entity can also choose to transfer the revaluation surplus to retained profits progressively as the asset is used by the entity; the amount to be transferred will then be the difference in depreciation based on the revalued amount and the depreciation based on the asset's original cost.

### Distributability of reserves

- Distributability or otherwise of the reserves will depend on the Articles of Association of the Company subject to any regulatory restrictions.

## 41. Contingencies

### (a) Contingent liabilities

Contingent liabilities, excluding those relating to business combinations (Note 35(c)), investments in associated companies (Note 23) and the investment in a joint venture (Note 24), of which the probability of settlement is not remote at the balance sheet date, are as follows:

FRS 37(86)

#### Group

A claim for unspecified damages was lodged by a customer during the financial year against a subsidiary and certain of its executives in respect of damages allegedly caused by the use of furniture supplied by the subsidiary. The subsidiary has disclaimed the liability and is defending the action. Legal advice obtained indicates that it is unlikely that any significant liability will arise. At the date of these financial statements, the directors are of the view that no material losses will arise in respect of the legal claim.

#### Company

The Company has issued corporate guarantees to banks for borrowings of certain subsidiaries with net liability positions. These bank borrowings amount to \$16,000,000 (2008: Nil) at the balance sheet date.

### (b) Contingent assets

In respect of the disposal of PwC Logistics Pte Ltd ("PwC Logistics") on 28 June 2009 (Note 8), the Group will receive additional consideration of \$70,000 if the net profit of PwC Logistics for the 18-month period ending 31 December 2010 exceeds \$200,000.

FRS 37(89)

### (b) Operating lease commitments – where the Group is a lessee

The Group leases land, factories and warehouses from non-related parties under non-cancellable operating lease agreements. The leases have varying terms, escalation clauses and renewal rights.

FRS 17(35)(d)

The future minimum lease payables under non-cancellable operating leases contracted for at the balance sheet date but not recognised as liabilities, are as follows:

	Group		
	2009 \$'000	2008 \$'000

## 43. Financial risk management<sup>1</sup>

FRS 107(31)

### *Financial risk factors*

The Group's activities expose it to market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management strategy seeks to minimise adverse effects from the unpredictability of financial markets on the Group's financial performance. The Group uses financial instruments such as currency forwards, interest rate swaps and foreign currency borrowings to hedge certain financial risk exposures.

FRS 107(33)(b)

The Board of Directors is responsible for setting the objectives and underlying principles of financial risk management for the Group. The Financial Risk Management Committee ("FRMC") then establishes the detailed policies such as authority levels, oversight responsibilities, risk identification and measurement, exposure limits and hedging strategies, in accordance with the objectives and underlying principles approved by the Board of Directors.

Financial risk management is carried out by a central treasury department ("Group Treasury") in accordance with the policies set by the FRMC. The trading team of Group Treasury identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units. The reporting team of Group Treasury measures actual exposures against the limits set and prepares daily reports for review by the Heads of Group Treasury and each operating unit. Regular reports are also submitted to the FRMC and the Board of Directors.

### (a) Market risk

#### (i) *Currency risk*

FRS 107(33)(a)

The Group operates in Asia with dominant operations in Singapore, the People's Republic of China and the Philippines. Entities in the Group regularly transact in currencies other than their respective functional currencies ("foreign currencies").

FRS 107(33)(b)

FRS 107(22)(c)

Currency risk arises within entities in the Group when transactions are denominated in foreign currencies such as the Singapore Dollar ("SGD"), United States Dollar ("USD") and Chinese Renminbi ("RMB"). To manage the currency risk, individual Group entities enter into currency forwards with Group Treasury. Group Treasury in turn manages the overall currency exposure mainly by entering into currency forwards with banks.

FRS 107(33)(b)

Group Treasury's risk management policy is to hedge between 60% and 80% of highly probable forecast transactions (mainly export sales and import purchases) in the next three months and approximately 90% of firm commitments denominated in foreign currencies.

FRS 107(33)(b)

In addition, the Group is exposed to currency translation risk on the net assets in foreign operations. Currency exposure to the net assets of the Group's foreign operations in the People's Republic of China, the Philippines, Hong Kong and Thailand are managed primarily through borrowings denominated in the relevant foreign currencies. Borrowings designated and qualified as hedges of net investments in the Group's subsidiaries have a carrying amount of \$2,986,000 (2008: \$3,154,000) and a fair value of \$2,577,000 (2008: \$3,121,000) at the balance sheet date.

## Guidance notes

### Financial risk management – currency risk

#### Qualitative disclosures on currency risk

1. The publication illustrates some disclosures that may be required for financial risk management. The matters and level of detail to be disclosed depend on the circumstances and the extent of financial risks faced by the entity.

FRS 107(7)

#### Quantitative disclosures on currency risk – based on management information

2. A reporting entity shall disclose summary quantitative data about its exposure to currency risk at the reporting date. This disclosure shall be based on the information provided internally to key management personnel.

#### Quantitative disclosures on currency risk – factors considered

3. This publication illustrates the disclosure where management has monitored the entity's currency risk exposure, taking into consideration (a) financial assets/liabilities denominated in the respective entities' functional currencies; (b) firm commitments and highly probable forecast transactions in foreign currencies; (c) the effects of currency forwards used for hedges and held for trading; and (d) net non-financial assets of foreign subsidiaries.

FRS 107(34)(a)

FRS 107 is not prescriptive in the presentation format of these quantitative disclosures. If management monitors the entity's currency risk exposure using other basis, these line items shall be replaced as appropriate.

#### Sensitivity analysis for currency risk

4. An entity shall provide sensitivity analysis for the whole of its business but may provide different types of sensitivity analysis for different classes of financial instruments. A sensitivity analysis shall be disclosed for each currency to which an entity has significant exposure. In this publication, the entity has significant exposure to two major currencies, namely USD and RMB.

FRS 107 AppB21

#### Sensitivity analysis – reasonably possible change

5. In determining what a reasonably possible change in the relevant risk variables is, an entity shall consider:
  - (a) the economic environments in which it operates. This shall not include remote or 'worst case' scenarios or 'stress test'; and
  - (b) the effects of changes reasonably possible over the period until the entity next presents these disclosures (usually the next annual reporting period).

FRS 107 AppB19

#### Sensitivity analysis – prior year disclosures

6. In the event that the reasonably possible change in the risk variables changes, the prior year disclosures should not be restated. However, the entity can present as additional information the sensitivity information for the comparative financial year using the new percentage for the current financial year.

#### Sensitivity analysis – Narrative text or tabular format

7. Instead of using a table format, the entity may disclose as follows:

FRS 107 IG36

"At 31 December 2009, if the USD has strengthened/weakened by [ ]% (2008: [ ]%) against the SGD with all other variables including tax rate being held constant, the Group's and Company's equity will be \$[ ] (2008: \$[ ]) higher/lower and \$[ ] (2008: \$[ ]) higher/lower respectively as a result of currency translation gains/losses on securities classified as available-for-sale. The Group's and Company's profit after tax will be \$[ ] (2008: \$[ ]) higher/lower and \$[ ] (2008: \$[ ]) higher/lower, as a result of currency translation gains/losses on the remaining USD-denominated financial instruments....."

Where the impacts to profit after tax and/or equity are different even though the exchange rates may have strengthened or weakened by the same percentage, the table format disclosure will likely be more useful. If the reporting entity holds option-based financial instruments, the upside and downside impacts may also be different.

## Guidance notes

### Financial risk management – currency risk (continued)

#### Foreign currency inter-company receivables and payables

8. Foreign currency inter-company receivables and payables should be included in the sensitivity analyses. This is because even though the intra-group receivables and payables are eliminated in the consolidated balance sheet, the effect on profit or loss on their revaluation under FRS 21 is not fully eliminated.

However it must be noted that the foreign exchange revaluation effects of a foreign currency inter-company loan which is part of the net investment in a foreign operation are deferred in equity until disposal (or partial disposal) of the foreign operation. Such foreign currency revaluation effects should not be included in the sensitivity analysis for foreign currency risks as they represent a translation risk rather than a transaction risk.

#### Equity investments that are denominated in foreign currencies

9. Currency risk is not considered separately for financial instruments that are non-monetary e.g. equity investments. The foreign currency exposure arising from investing in non-monetary financial instruments would be considered and reflected in the other price risk disclosures as part of the fair value gains and losses.

FRS 107 App B23

#### Disclosures at reporting date needs to be representative for the period

10. If the quantitative data disclosed as at the reporting date are unrepresentative of an entity's exposure to risk during the period, an entity shall provide further information that is representative. For example, if an entity typically has a large exposure to a particular currency, but at year-end unwinds the position, the entity might disclose a graph that shows the exposure at various times during the period, or disclose the highest, lowest and average exposures.

FRS 107(35), IG20

Similarly, when the sensitivity analyses disclosed are unrepresentative of a risk inherent in a financial instrument (for example because the year-end exposure does not reflect the exposure during the year), the entity shall disclose that fact and the reason it believes the sensitivity analyses are unrepresentative.

FRS 107(42), IG37-40

#### Changes in financial risk management/exposure from the previous period

11. An entity needs to include disclosures on the following if there are changes from the previous period:

- (a) the exposures to each type of risk arising from financial instruments;
- (b) the entity's objectives, policies and processes for managing the risk and the methods used to measure the risk.

FRS 107(33)

For instance, if there has been a change in the hedging policy, this should be disclosed accordingly.

#### (ii) Price risk

The Group is exposed to equity securities price risk arising from the investments held by the Group which are classified on the consolidated balance sheet either as available-for-sale or at fair value through profit or loss. These securities are listed in Singapore and the United States. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.

FRS 107(33)(a,b)

If prices for equity securities listed in Singapore and the United States change by 15% (2008: 6%) and 14% (2008: 6%) respectively with all other variables including tax rate being held constant, the effects on profit after tax and equity will be:

### (a) Market risk (continued)

#### *(iii) Cash flow and fair value interest rate risks*

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the fair value of a financial instrument will fluctuate due to changes in market interest rates. As the Group has no significant interest-bearing assets, the Group's income is substantially independent of changes in market interest rates.

FRS 107 AppA

The Group's policy is to maintain 80 – 90% of its borrowings in fixed rate instruments. The Group's exposure to cash flow interest rate risks arises mainly from non-current variable-rate borrowings. The Company's exposure to cash flow interest rate risks arises mainly from non-current borrowings and loans to subsidiaries at variable rates. The Group manages these cash flow interest rate risks using floating-to-fixed interest rate swaps.

FRS 107(33)(a,b)

The Group's and the Company's borrowings at variable rates on which effective hedges have not been entered into are denominated mainly in SGD. If the SGD interest rates increase/decrease by 0.50% (2008: 0.50%) with all other variables including tax rate being held constant, the profit after tax will be lower/higher by \$44,000 (2008: \$77,000) and \$18,000 (2008: \$51,000) as a result of higher/lower interest expense on these borrowings. Other comprehensive income would have been higher/lower by \$313,000 (2008: \$835,000) mainly as a result of higher fair value of interest rate swaps designated as cash flow hedges of variable rate borrowings.

### (b) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The major classes<sup>1</sup> of financial assets of the Group and of the Company are bank deposits and trade receivables. For trade receivables, the Group adopts the policy of dealing only with customers of appropriate credit history, and obtaining sufficient collateral or buying credit insurance where appropriate to mitigate credit risk. For other financial assets, the Group adopts the policy of dealing only with high credit quality counterparties.

FRS 107(33)(a,b)

Credit exposure to an individual counterparty is restricted by credit limits that are approved by the Head of Credit Control based on ongoing credit evaluation. The counterparty's payment profile and credit exposure are continuously monitored at the entity level by the respective management and at the Group level by the Head of Credit Control.

As the Group and the Company do not hold any collateral, the maximum exposure to credit risk for each class of financial instruments is the carrying amount of that class of financial instruments presented on the balance sheet, except as follows:

FRS 107(36)(a,b)

	Company	
	2009	2008
	\$'000	\$'000
Corporate guarantees provided to banks on subsidiaries' loans	<b>60,000</b>	<b>35,000</b>

The trade receivables of the Group and of the Company comprise 5 debtors (2008: 5 debtors) and 3 debtors (2008: 3 debtors) respectively that individually represented 5 – 10% of trade receivables.

FRS 107(34)(c)

Bank deposits that are neither past due nor impaired are mainly deposits with banks with high credit-ratings assigned by international credit-rating agencies. Trade receivables that are neither past due nor impaired are substantially companies with a good collection track record with the Group.

FRS 107(36)(c)

The Group's and Company's trade receivables not past due include receivables amounting to \$440,000 (2008: \$320,000) and \$20,000 (2008: Nil) respectively that would have been past due or impaired if the terms were not re-negotiated during the financial year.

## Guidance notes

### Financial risk management – credit risk

#### Class versus category of financial instrument

1. An entity is required to make certain credit risk exposures by class of financial instrument. A 'class' of financial instruments is not the same as a 'category' of financial instruments. Categories are defined in FRS 39 as financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables, available-for-sale financial assets, financial liabilities at fair value through profit or loss and financial liabilities measured at amortised cost.

FRS 107(36)

Classes are expected to be determined at a lower level than the categories in FRS 39 and reconciled to the balance sheet as required by FRS 107(6). However, the level of detail for each class shall be determined on an entity-specific basis. Items are treated as one class when they share similar characteristics.

#### Quantitative disclosures on credit risk

2. The quantitative disclosures on credit risk exposure shall be based on information provided internally to key management personnel of the entity. This publication illustrates the disclosure where (a) management monitors the credit risk exposures only on the major classes of financial assets, which are bank deposits and trade receivables; and (b) the credit risk exposures on trade receivables are analysed and reported to key management by geographical areas and by types of customers. Other measures such as industry sector, credit rating and group of closely related counterparties might be used by another reporting entity.

FRS 107(34)

#### Allowance account for credit losses

3. When financial assets are impaired by credit losses and the entity records the impairment in a separate allowance account rather than directly reducing the carrying amount of the asset, it shall disclose a reconciliation of changes in that account during the period for each class of financial assets.

FRS 107(16)

#### Collateral and other credit enhancements obtained

4. When an entity obtains financial or non-financial assets during the period by taking possession of collateral it holds as security or calling on other credit enhancements, and such assets meet the recognition criteria in other Standards, the following disclosure can be considered:

*"During the financial year, the Group obtained assets by taking possession of collateral held as security as follows:*

<u>Nature of assets</u>	<u>Carrying amount</u>
Inventories	20,000
Property, plant and equipment	129,000

*Repossessed items are sold as soon as practicable, with the proceeds used to reduce outstanding receivables. They are presented within "other current assets" on the balance sheet.*

### (c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities (Note 31(c)) and the ability to close out market positions at a short notice. At the balance sheet date, assets held by the Group and Company for managing liquidity risk included cash and short-term deposits as disclosed in Note 13.

FRS 107 p33, 39(cb)  
FRS 107 B11E

Management monitors rolling forecasts of the Group's and Company's liquidity reserve (comprises undrawn borrowing facility (Note 31) and cash and cash equivalents (Note 13)) on the basis of expected cash flow. This is generally carried out at local level in the operating companies of the Group in accordance with practice and limits set by the Group. These limits vary by location to take into account the liquidity of the market in which the entity operates. In addition, the Group's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these; monitoring liquidity ratios; and maintaining debt financing plans.

## Guidance notes

### Financial risk management – liquidity risk

#### Contractual undiscounted cash flows

- Irrespective of whether they are reported to key management, a maturity analysis should be disclosed for:

- (a) non-derivative financial liabilities (including issued financial guarantee contracts) that shows the remaining contractual maturities; and
- (b) derivative financial liabilities that includes the remaining contractual maturities for those derivative financial liabilities for which contractual maturities are essential for an understanding of the timing of the cash flows.

For derivative financial liabilities, it is judgemental as to whether the remaining contractual maturities would be essential for an understanding of the timing of the cash flows. FRS 107 specifies that contractual maturities would be essential in the following situations:

- (a) an interest rate swap with a remaining maturity of five years in a cash flow hedge of a variable rate financial asset or liability; and
- (b) all loan commitments.

The amounts disclosed in the maturity analysis are contractual undiscounted cash flows of **financial liabilities only**, for example:

- (a) gross finance lease obligations (before deducting finance charges);
- (b) prices specified in forward agreements to purchase financial assets for cash;
- (c) net amounts for pay-floating/receive-fixed (or vice versa) interest rate swaps for which net cash flows are exchanged;
- (d) contractual amounts to be exchanged in a derivative financial instrument (for example, a currency swap) for which gross cash flows are exchanged; and
- (e) gross loan commitments.

Contractual cash flows are undiscounted and may therefore differ from the carrying amount on the balance sheet. This difference is not expected to be material for balances due within 12 months.

#### Variable amount payable

- When the amount payable is not fixed, the amount disclosed is determined by reference to the conditions existing at the reporting date. For example, when the amount payable varies with changes in an index, the amount disclosed may be based on the level of the index at the reporting date.

#### Expected maturity dates

- An entity should disclose summary quantitative data about its exposure to liquidity risk on the basis of the information provided internally to key management personnel. If the outflows of cash (or another financial asset) included in that data could occur significantly earlier than indicated in the data, the entity should state this fact and provide quantitative information that enables this risk to be assessed.

#### Time buckets

- In preparing the maturity analysis, an entity uses its judgement to determine an appropriate number of time buckets. FRS 107 prescribes that:
  - (a) When a counterparty has a choice of when an amount is to be paid, the liability is included on the basis of the earliest date on which the reporting entity can be required to pay.
  - (b) When an entity is committed to make amounts available in instalments, each instalment is allocated to the earliest period in which the entity can be required to pay.
  - (c) For issued financial guarantee contracts the maximum amount of the guarantee is allocated to the earliest period in which the guarantee can be called.

### (d) Capital risk

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern and to maintain an optimal capital structure so as to maximise shareholder value. In order to maintain or achieve an optimal capital structure, the Group may adjust the amount of dividend payment, return capital to shareholders, issue new shares, buy back issued shares, obtain new borrowings or sell assets to reduce borrowings.

FRS 1(124A,  
124B),IG5  
FRS 1(124B)(a)

Management monitors capital based on a gearing ratio<sup>1,2</sup>. The Group and the Company are also required by the banks to maintain a gearing ratio of not exceeding 70% (2008: 70%). The Group's and Company's strategies, which were unchanged from 2008, are to maintain gearing ratios within 45% to 50% and 60% to 70% respectively.

FRS 1(124B)(a)

The gearing ratio is calculated as net debt divided by total capital. Net debt is calculated as borrowings plus trade and other payables less cash and cash equivalents. Total capital is calculated as equity plus net debt.

## Guidance notes

### Capital risk management

1. This publication illustrates the capital risk disclosure for a reporting entity that monitors its capital using a gearing ratio. Other entities may use different and/or more complex methods to monitor capital. An entity decides, in the light of its circumstances, which measures are more suitable to monitor its capital and how much detail it should disclose. For instance, some entities may monitor capital based on Return on Capital Employed, Economic Value Added, or dividend payout ratio.
2. An entity may be subject to a number of different capital requirements. For example, a conglomerate may include entities that undertake insurance activities and banking activities and those entities may also operate in several jurisdictions. When an aggregate disclosure will not provide useful information, the entity shall disclose separate information for each capital requirement to which the entity is subject.
3. The word "capital" denotes the Company's overall funding; it does not mean "equity capital".

### (e) Fair value measurements

Effective 1 January 2009, the Group adopted the amendment to FRS 107 which requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- (a) quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- (b) inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (ie derived from prices) (Level 2); and
- (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

FRS 107p27B(a)

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in Level 1.

## 43. Financial risk management (continued)

### (e) Fair value measurements (continued)

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used to estimate fair value for long-term debt for disclosure purposes. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using quoted forward exchange rates at the balance sheet date. These investments are included in Level 2 and comprise debt investments and derivative financial instruments. In infrequent circumstances, where a valuation technique for these instruments is based on significant unobservable inputs, such instruments are included in Level 3.

The following table presents the changes in Level 3 instruments for the financial year ended 31 December 2009.

FRS 107p27B(c)

	Trading derivatives at fair value through profit or loss \$'000	Debt investments available- for-sale \$'000	Total \$'000
Opening balance	–	5,264	5,264
Transfers into level 3	115	–	115
Purchases of level 3 securities	–	83	83
Gains and losses recognised in profit or loss	(4)	–	(4)
Closing balance	111	5,347	5,458
Total gains or losses for the period included in profit or loss for assets held at the end of the reporting period	(4)	–	(4)

During the financial year ended 31 December 2009, the Group transferred a held-for-trading forward foreign exchange contract from Level 2 into Level 3 as the counterparty for the derivative encountered significant financial difficulties which resulted in a significant increase in the discount rate due to increased counterparty credit risk which is not based on observable inputs.

FRS 107.27B(c)(iv)

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated based on quoted market prices or dealer quotes for similar instruments by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments. The fair value of current borrowings approximates their carrying amount.

## 46. Segment information<sup>1</sup>

Management has determined the operating segments based on the reports reviewed by the Executive Committee ("Exco") that are used to make strategic decisions. The Exco comprises the Chief Executive Officer, the Chief Financial Officer, and the department heads of each business within each geographic segment.

FRS 108(22)(a)

The Exco considers the business from both a geographic and business segment perspective. Geographically, management manages and monitors the business in the three primary geographic areas: Singapore, the People's Republic of China and the Philippines. All geographic locations are engaged in the manufacture and sale of electronic parts. In addition, the segments in the People's Republic of China and the Philippines also derive revenues from the sale of household and office furniture, while the Singapore segment derives revenue from construction of specialised equipment.

FRS 108(22)(b)

Other services included within Singapore, the People's Republic of China, the Philippines and Vietnam include investment holding and provision of logistics services; but these are not included within the reportable operating segments, as they are not included in the reports provided to the Exco. The results of these operations are included in the "all other segments" column.

FRS 108(16)

In the prior year, the Group carried out glass manufacturing operations in Malaysia. However, this was discontinued in the current period (see Note 11).

## 46. Segment information (continued)

The Exco assesses the performance of the operating segments based on a measure of Earnings before interest, tax, depreciation and amortisation ("adjusted EBITDA"). This measurement basis excludes the effects of expenditure from the operating segments such as restructuring costs and goodwill impairment that are not expected to recur regularly in every period. Interest income and finance expenses are not allocated to segments, as this type of activity is driven by the Group Treasury, which manages the cash position of the group. Since the Exco reviews adjusted EBITDA, the results of discontinued operations are not included in the measure of adjusted EBITDA.

FRS108(27)(b), (28)

A reconciliation of adjusted EBITDA to profit before tax and discontinued operations is provided as follows:

FRS 108(28)(b)

	2009 \$'000	2008 \$'000
Adjusted EBITDA for reportable segments	<b>76,684</b>	44,069

<b>Profit before tax and discontinued operations</b>	<b>47,397</b>	26,218

Reportable segments' assets are reconciled to total assets as follows:

The amounts provided to the Exco with respect to total assets are measured in a manner consistent with that of the financial statements. For the purposes of monitoring segment performance and allocating resources between segments, the Exco monitors the property, plant and equipment, intangible assets, inventories, receivables, operating cash and investment properties attributable to each segment. All assets are allocated to reportable segments other than deferred income tax assets, short-term bank deposits, derivative financial instruments, financial assets at fair value through profit or loss, available-for-sale financial assets and held-to-maturity financial assets.

### Geographical information

The Group's three business segments operate in four main geographical areas:

FRS 108(33)

- Singapore – the Company is headquartered and has operations in Singapore. The operations in this area are principally the manufacture and sale of electronic component parts, construction of specialised equipment, and investment holding;
- People's Republic of China – the operations in this area are principally the sale of furniture, manufacture and sale of electronic component parts and provision of logistics services;
- Philippines – the operations in this area are principally the manufacture and sale of electronic component parts and sale of furniture; and
- Other countries – the operations include the manufacture and sale of electronic component parts in Thailand, sale of furniture in Vietnam and investment holding.

## 47. Events occurring after balance sheet date

On 25 February 2010, the Group issued \$4,300,000 6.5% Singapore-dollar bonds to finance the purchase of an additional 40% interest in PwC A Property (Hong Kong) Limited ("PwC Hong Kong") and new equipment in the construction segment. The bonds are repayable on 25 February 2014.

FRS 10(21)

On 1 March 2010, the Group acquired an additional 40% interest in PwC Hong Kong, a company incorporated in Hong Kong which is engaged in investment holding, for a cash consideration of \$3,500,000. The fair value of the Group's share of the identifiable net assets of PwC Hong Kong at the date of acquisition was \$2,500,000. PwC Hong Kong will be consolidated with effect from 1 March 2010.

## 48. New or revised accounting standards and interpretations

Certain new standards, amendments and interpretations to existing standards have been published<sup>1</sup> and are mandatory for the Group's accounting periods beginning on or after 1 January 2010 or later periods and which the Group has not early adopted. The Group's assessment of the impact of adopting those standards, amendments and interpretations that are relevant to the Group is set out below:

FRS 8(30)(a)

(a) Amendments to FRS 39 *Financial Instruments: Recognition and Measurement – Eligible Hedged Items* (effective for annual periods beginning on or after 1 July 2009)

This amendment clarifies how the principles that determine whether a hedged risk or portion of cash flows is eligible for designation should be applied in particular situations. The Group will apply this amendment from 1 January 2010, but it is not expected to have a material impact on the financial statements.

(b) INT FRS 117 *Distributions of Non-Cash Assets to Owners* (effective for annual periods beginning on or after 1 July 2009)

FRS 8(30)(a)

INT FRS 117 clarifies how the Group should measure distributions of assets, other than cash, to its owners. INT FRS 117 specifies that such a distribution should only be recognised when appropriately authorised, and that the dividend should be measured at the fair value of the assets to be distributed. The difference between the fair value and the carrying amount of the assets distributed should be recognised in profit or loss. INT FRS 117 applies to pro rata distributions of non-cash assets except for distributions to a party or parties under common control.

The Group will apply INT FRS 117 from 1 January 2010, but it is not expected to have a material impact on the financial statements.

FRS 8(30)(b)

(c) INT FRS 118 *Transfer of Assets to Customers* (effective for annual periods beginning on or after 1 July 2009)

FRS 8(30)(a)

INT FRS 118 prescribes the accounting requirements for arrangements where the Group receives an item of property, plant and equipment from a customer which must be used to provide an ongoing service to the customer. It also applies to cash received from a customer that must be used to acquire or construct such property, plant and equipment.

The Group will apply INT FRS 118 from 1 January 2010, but it is not expected to have a material impact on the financial statements.

FRS 8(30)(b)

# Notes to the Financial Statements

For the financial year ended 31 December 2009

## 48. New or revised accounting standards and interpretations (continued)

(d) FRS 27 (revised) Consolidated and Separate Financial Statements (effective for annual periods beginning on or after 1 July 2009).

FRS 8(30)(a)

FRS 27 (revised) requires the effects of all transactions with non-controlling interests to be recorded in equity if there is no change in control and these transactions will no longer result in goodwill or gains and losses. The standard also specifies the accounting when control is lost. Any remaining interest in the entity is re-measured to fair value, and a gain or loss is recognised in profit or loss. The Group will apply FRS 27 (revised) prospectively to transactions with minority interests from 1 January 2010.

FRS 8(30)(b)

(e) FRS 103 (revised) Business Combinations (effective for annual periods beginning on or after 1 July 2009)

FRS 8(30)(a)

FRS 103 (revised) continues to apply the acquisition method to business combinations, with some significant changes. For example, all payments to purchase a business are to be recorded at fair value at the acquisition date, with contingent payments classified as debt subsequently re-measured through the income statement. There is a choice on an acquisition-by-acquisition basis to measure the non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets. All acquisition-related costs should be expensed. The Group will apply FRS 103 (revised) prospectively to all business combinations from 1 January 2010.

FRS 8(30)(b)

FRS 27(40)(c)

# Notes to the Financial Statements

For the financial year ended 31 December 2009

## Guidance notes

### Listing of significant companies in the Group

1. The term "significant" is not defined in FRS. However, in the SGX-ST Listing Manual, a subsidiary or associated company is considered significant if its net tangible assets represent 20% or more of the issuer's consolidated net tangible assets, or its pre-tax profits account for 20% or more of the issuer's consolidated pre-tax profits. In the absence of a formal definition in FRS, it is preferable to adopt this definition set out in the SGX-ST Listing Manual.  
SGX 718
2. Companies listed on the Singapore Exchange are also required to disclose name(s) of auditing firm(s) of its significant subsidiaries and associated companies. It is a good practice for listed companies to inform the auditing firm(s) that their name(s) will be disclosed in the financial statements.  
SGX 717
3. It shall be noted that under the SGX-ST Listing Manual, an issuer may appoint different auditors for its subsidiaries or significant associated companies provided that:
  - (i) the issuer's board and audit committee are satisfied that the appointment would not compromise the standard and effectiveness of the audit of the issuer; or
  - (ii) the issuer's subsidiary or associated company, is listed on a stock exchange.  
SGX 716
4. It shall be noted that under the Companies Act, a holding company is required to ensure that the financial year of its subsidiaries coincides with its financial year within two years after incorporation and/or acquisition.
