

Real estate

Your challenges. Our solutions

In today's fast-changing world, the myriad challenges facing the real estate industry grow more and more complex. Specific areas of activity such as real estate development, management, financing and ownership structures – especially the growing influence of REITs and REIT-related structures – carry with them specialized bodies of knowledge as well as unique concerns. Moreover, national and world events can conspire with the rapid and unpredictable changes brought about by investment instruments, market conditions and tax regulations to create a business environment in which sound and timely answers to real estate concerns are crucial – and hard to find.

How PwC can help

Our real estate professionals will work with you to help your organization manage risk and improve performance. Our integrated approach to problem-solving involves an international network of real estate accounting, tax and consulting professionals who can quickly mobilize to form highly qualified teams that can respond to your unique business needs.
