A cybersecurity competition for undergraduate students from universities in Vietnam

Technological advancements such as Big Data, VR, IoT and mobile payments to name a few, are disrupting how companies do business and changing how individuals live their lives. However, as we continue to see cyberattacks continue to escalate in frequency, severity and impact, it is essential to maintain a focus on safeguarding our society today as well as that in the future.

Therefore our competition is not just aimed at assessing the skills and knowledge of contestants but using it as a platform to increase the competency level of Vietnam's new talent and raising cybersecurity awareness among Vietnamese youth.

Play a cyber game and win

15 VND million

+ 3 month internship at PwC Vietnam

Competition details

📅 08:00 - 19:00 | Saturday, 9 September, 2017

🏠 PwC Vietnam's Offices in Ho Chi Minh city and Hanoi

👥 Participants must be full-time undergraduate university students in Vietnam at the time of registration (or within 3 months of official graduation). The participants will join under teams. Each team must consist of 2-3 members (including Team Leader). *

📄 Register here * :

* Further information about the contest will be publicised in details at www.pwc.com/vn/hackaday2017

Content

PwC Vietnam's Hackaday 2017 aims to create a helpful playground with many career opportunities for students with an interest in cyber security. The competition will be organised in CTF Jeopardy style. All participating teams will join PwC Vietnam's offices. The form of registration and further information about the contest will be made public on the website and Fanpage of PwC Vietnam.

The competition will test the skills and knowledge of teams in four hacking categories:

- ◼ **Reverse engineering** (Reserve software, unpack…)
- ◼ **Web** (Analyse and exploit vulnerabilities on web services and program logic: SQL injection, XSS, Seasion Hijacking…).
- ◼ **Pwnable** (Exploit software).
- ◼ **MISC** (Forensic, ACM, Recon,…)

Depending on each challenge's target, the organiser will decide whether to give clues or not. One team with the highest score and the earliest completion time will be the winner. The organiser will announce the results and award the team winner at the end of the competition day.

Agenda
