IFRS 15 Revenue from contracts with customers
IFRS 16 Lease
IFRS 16 – New leasing standard gamified training (3 hours)

ACCA CPD points
US CPA CPE accreditation approved by NASBA
Insurers have expressed an urgent need to increase the knowledge of their global employees with respect to IFRS developments. Together with our clients, we identified relevant topics and the preferred learning tool: e-learnings. This will allow insurers to update their organisation on IFRS developments that are relevant to their industry and to distribute this globally at relatively low costs. Anytime, anywhere.

For whom:
Our IFRS e-learnings are specifically designed for those in financial and actuarial functions within insurers. These modules are also of interest to those working within Reporting, Controlling, IT, Internal Audit, Risk, ALM / Treasury, Account Management and Tax Subject Matter Expertise. The IFRS subject matter experts within our Capital Markets and Accounting Advisory Services group have designed the modules together with learning experts. They have extensive knowledge of and experience in implementing IFRS for insurers and other financial institutions. In designing the modules, they have focused on the relevance and impact of IFRS, in theory and in practice, for insurers specifically.
Today’s companies face a vast array of cyber risks — both known and unexpected. Some risks turn into crises that have significant implications for operations or even a company’s future. Given this setting, it’s a challenge for boards to get comfortable with addressing cyber threats appropriately — but it’s a critical responsibility. Boards frequently delegate elements of risk oversight to committees — most commonly to the audit committee. But ultimately the responsibility for cyber risk oversight resides with the full board, and each director should understand the key threats facing the company.

This module helps boards better understand the changing landscape of cybersecurity oversight, management’s role in managing crisis, and effective ways to oversee the process. It also includes insights on how boards can most effectively discharge their responsibilities when a crisis strikes.
Banking e-learning modules (English)

*Monitoring Bank’s Performance (50 minute)*
*(Financial and non-financial measures, best practices)*

After completing this e-learn you will be more familiar with different metrics, used in monitoring bank’s performance.

After the introduction, financial statement related metrics will be discussed based on publicly available investor information, prepared by OTP Bank. The e-learn provides insight into the most important numbers and ratios, but also discusses related considerations, limitations, etc.

For monitoring bank’s performance financial metrics are useful, but not sufficient. How can we monitor performance based on non-financial metrics? This topic is elaborated in the fourth chapter, after which suggested approaches to performance measurement are described in the closing remarks chapter of this e-learn.
The aim of the e-learning course is to provide essential knowledge about financial reporting issues under IFRS as a result of COVID-19 or any other crisis situation. The 2.5-hour course introduces the different accounting implications of the pandemic.

The course will answer the following questions:

- Can we apply the same procedures when as a result of COVID-19 there are lockdowns, social distancing, lower economic activity, economic downturn, government relief programmes, etc.?

- Which accounting standards should we focus on?

- What are the financial reporting implications of COVID-19 or any crisis situation?
Covid related:

**Trust based remote working (2 hours 30 min)**

It is recommended to everyone who needs to work in a remote format: managers working with distributed and virtual teams, company employees working with colleagues from other regions. The course deals with the following issues:

- Why do we need remote teams?
- Trust
- Remote team set-up, technology and tools
- Tips for remote employees
- Remote team working meetings
- Team building stages
- Motivation and engagement
- Project completion, manager’s checklist

At the beginning and at the end of each modules we measure the "relation temperatures" of the team members that help us understand the dynamics of a remote team.
