

Our Actuarial Services

PwC Bermuda's Actuarial Services team helps clients with life and property & casualty exposures act decisively on their most important issues. We apply our risk and analytical skills to turn complex data into the predictive insights that inform practical business solutions

How our team can help you:

- **Re/insurance reserving and reporting** - assessing the appropriate level of reserves and/ or completing the reporting for financial statement purposes, including on a fair value basis for ILS.
- **Independent actuarial reserve review** - a secondary “pair of eyes” or provision of an Actuarial Opinion.
- **SBA model validation and model build** - supporting life reinsurers to develop SBA models and submit BMA approvals and fully validate them in line with BMA requirements.
- **Approved Actuary services** - providing life reinsurers with an external approved actuary per BMA requirements.
- **Reinsurance strategy review** - review of current reinsurance purchasing and analysis to estimate the most appropriate reinsurance strategy.
- **Capital model development and validation** - assist with creation of a capital model or validation of a current capital model for internal or regulatory reporting purposes, including BSCR models.
- **Insurance feasibility / profitability studies** - analysis of potential insurance structures for new companies and review of insurance structures and profitability for existing companies.
- **Pricing and underwriting** - Pricing for individual contracts and/or books of business. Assist underwriters with risk selections.
- **Risk and capital management** - development and review of risk management strategy and/or framework.
- **Actuarial function process improvement** - Review of current actuarial controls and processes as well as training of insurance and actuarial staff .
- **Financial modelling** - review and/or update of the current process for creating required financial statement disclosures, including for the requirements of IFRS 17.
- **Core Income Generating Activities** - Performance within the relevant territory.
- **Internal Audit actuarial support** – providing internal audit teams with specialist support
