

Environmental Policy

PwC in the Caribbean

This environmental policy applies to the PwC firms operating in the Caribbean (PwC Bahamas, PwC Bermuda, PwC British Virgin Islands, PwC Cayman Islands, PwC East Caribbean, PwC Guyana, PwC Jamaica and PwC Trinidad & Tobago and their respective affiliates (Caribbean region)).

Purpose

This environmental policy is designed to express the commitment of the PwC firms operating in the Caribbean to minimising the environmental impacts of our operations and business activities and to align our vision to make a difference to the success of our clients, people and communities.

Our commitment is to:

- drive efficiency to reduce our absolute carbon footprint, offset air travel emissions and source renewables for our electricity consumption whenever possible
- reduce our consumption of resources and improve the efficient use of those resources
- manage waste generated from our business operations incorporating reduction, re-use and recycling
- promote the use of appropriate technology solutions for our staff to reduce our environmental footprint
- give due consideration to environmental issues and energy performance in the design, refurbishment and use of buildings
- ensure environmental criteria are taken into account in the procurement of goods and services from our suppliers where possible
- comply with all relevant environmental legislation and other environmental requirements that we subscribe to, and
- continuously improve our environmental performance and integrate recognised environmental management best practice into all our business operations.

To meet our commitments we will:

- provide leadership team oversight and review of environmental policies and performance, and allocate resources for their effective direction and implementation
- monitor key objectives and set targets for managing our environmental performance at least annually
- engage with stakeholders, including communicating internally and externally our environmental policy and related commitments and performance on a regular basis, and encourage feedback
- communicate the importance of environmental issues to our people
- work together with our people, service partners, suppliers, landlords and their agents to promote improved environmental performance
- promote appropriate consideration of sustainability and environmental issues in the services that we provide to our clients, and
- review our environmental policy on a regular basis.

This environmental policy represents our general position on environmental issues, and the policies and practices we will apply in conducting our business. It is accessible online via internal sites and to other interested parties via our website (www.pwc.com/cb), and on request.
