

# Summary

**Students learn the basics of creating webpages using HTML and CSS coding languages through an online tutorial.** HTML is the markup language that you surround content with, to tell browsers about headings, lists, tables, etc. CSS is the stylesheet language that you style the page with, to tell browsers to change the color, font, layout, and more. With this lesson, students are able to use these languages and see these changes come to life on sample webpages.

\*Lesson requires students to use computers.
