

# Driving to tomorrow

The OEM pivot to e-mobility

16 September, 10:00-11:00am CET

Register now >>

**E-mobility is emerging at an accelerated pace despite the industry's overall global decline. This is partly because environmental social governance (ESG) is becoming non-negotiable for both consumers and leaders.**

From manufacturers to consumers, we want to explore what new challenges will arise in e-mobility. Join us on our third e-mobility webcast as we discuss:

- The anticipated impact the rise of e-mobility will have on manufacturers
- What you need to wisely invest in e-mobility
- The key partnerships for success in e-vehicle manufacturing

**Hear from our panelists:**

**Bohdan Wojnar**, former member of the board at ŠKODA, **Pavel Stefek**, Risk Assurance partner, PwC Czech Republic and **Jens Hörrning**, Automotive Industry Leader, PwC Central and Eastern Europe and gain insight on how manufacturers will cope with e-mobility.
