

PwC leads the professional services market thanks to its independent, timely and comprehensive advisory services, which help improve governance and ensure business continuity. Our audit and other assurance services are based on extensive experience, providing an accurate and reliable overview of an organisation's financial and operational performance. PwC provides business advisory services in several different areas.

Audit services

Financial audit and other assurance services

Our technology-based audit ensures efficient collaboration between people and technology in order to provide high-quality results and an in-depth overview that helps save you a significant amount of time.

- Audit and review of reports prepared in accordance with IFRS or Estonian financial reporting standards.
- Assurance for sustainability reports.
- Other engagements in accordance with international auditing standards (non-monetary contributions, project funding assurance, special audits, etc).

Internal audit and risk management

PwC's internal audit and risk management services provide solutions aligned with your organisation's strategy, increasing operational efficiency, helping to anticipate and manage future multi-risks, achieve objectives, and keep the control environment and processes reliable and up to date.

Business advisory

Deal advisory

PwC's deal advisory services are designed to help companies achieve their financial and strategic goals by offering several key solutions:

- Advising on the sale of companies or business segments;
- Advising on mergers and acquisitions;
- Conducting due diligence;
- Financial analysis and valuation;
- Market overviews and competition analysis.

Management consulting

PwC's broad-based team provides a wide range of advisory services and support to both the public and private sectors.

- Mapping business processes, identifying bottlenecks and automation opportunities, and improving efficiency;
- Data analytics, preparation of management information, visualisation and automation of manual work;
- Independent studies and analyses (market analyses, competitor benchmarking, international practices);
- Optimisation of management systems, structures and roles;
- Strategy advisory and business model adaptation for expansion into new markets;
- Financial advisory, including development of financial models and cost accounting methodologies;
- Project management and ensuring implementation of work plans;
