<b>Total comprehensive income / (loss) for the year</b>		$\Sigma$	$\Sigma$
<b>Earnings [Loss] per share for profit [loss] attributable to the owners of the Bank, basic and diluted</b> (expressed in RR per share)	39		

*[Note: All significant categories of assets, liabilities, income and expenses (use 10% as a general limit) must be disclosed on the face of the balance sheet or statement of comprehensive income / income statement. Refer to Appendix C if the Bank is an OOO company.]*

*[If the Group has publicly traded ordinary shares or potential ordinary shares, you will need to disclose (loss)/earnings per share on the face of the consolidated statement of profit or loss and other comprehensive income and details of the calculation in the notes. If basic EPS is different from diluted EPS, then both need to be presented on the face of the consolidated statement of profit or loss and other comprehensive income / income statement. If the Group has discontinued operations, also disclose on the face of the EPS for profit from continuing operations – refer to IAS 33.66]*

*[Note: The bank may choose to present the statement of profit or loss and other comprehensive income as two separate statements following each other: (a) statement of profit or loss and (b) statement of other comprehensive income. Please see Appendix D for an illustration.]*

*[Note: Fair value gains and losses are shown before current or deferred tax effects within other comprehensive income. Income tax on transactions recorded in other comprehensive income is presented on a separate line 'Income tax recorded directly in other comprehensive income'. Alternatively components of other comprehensive income may be presented net of related tax effects, e.g. "Revaluation, net of tax", rather than showing one amount for the aggregate amount of income tax relating to those components. Additional disclosure of the tax effects should be in the notes. IAS 1.90 requires disclosure of the amount of income tax relating to each component of other comprehensive income. See Note 36.]*

<b>Balance at 31 December 2017</b>										

[Notes:

- *Include share premium in share capital amount or present it separately. If presented separately, adjust also balance sheet and Note 30.*
- *If the Group has negative retained earnings, change the heading from retained earnings to 'accumulated deficit'.*
- *Any significant capital transactions with owners of the Group should be described in Note 30.*
- *The name should be 'Statement of changes in equity' even if the Group has negative equity. Do not change equity to deficit.*
- *Treasury shares are deducted from share capital amount with additional disclosure in Note 30. If treasury shares are shown separately on the consolidated balance sheet – a separate column in this statement would be needed.*
- *In the case of equity-settled share-based payment arrangements, the credit to equity should be in the statement of changes in equity and not in other comprehensive income.*
- *If gains or losses on initial recognition of financial instruments are, in substance, distributions to or capital contributions from owners, then they should be included in the statement of changes in equity and not in the statement of comprehensive income.*
- *Transfer of realised revaluation reserve on premises and equipment to retained earnings should be presented as a capital transaction below 'Total comprehensive income' subtotal.*
- *For entities presenting financial statements in a currency which differs from the functional currency of one or more entities in the Group: Note that normal practice is for all equity components (e.g. share capital, retained earnings), except for non-controlling interest, to be presented at historic rates in the respective columns of the statement of changes in equity and notes thereto. Any effects of translating equity components from the functional currency to the presentation currency are recognised within the currency translation reserve movement for the year, except for those effects relating to non-controlling interest. As an alternative all components of equity may be translated using the closing rate as of each end of the reporting period. However, effects of translation of equity components should not be recognised in other comprehensive income but as a reclassification within equity below total comprehensive income.]*

*[Notes:*

- *IAS 7.28 states that unrealised gains and losses arising from changes in foreign currency exchange rates are not cash flows. They should, therefore, be eliminated as non-cash movements.*
- *All fair value adjustments should be eliminated as being non-cash items.*
- *All investing and financing activities should be shown gross.*
- *Investing activities may include only items that are capitalised as assets in the balance sheet.]*

## 1 Introduction

These [consolidated] financial statements have been prepared in accordance with International Financial Reporting Standards for the year ended 31 December 2017 for ABC Bank (the "Bank") and its subsidiaries (the "Group").

The Bank was incorporated and is domiciled in the Russian Federation. The Bank is a joint stock company [or state the appropriate civil code classification] limited by shares and was set up in accordance with Russian regulations. [As of 31 December 2017 and 2016 the Bank's immediate [and ultimate] parent company was \_\_\_\_\_, and the Bank was ultimately controlled by Mr \_\_\_\_\_.] [The disclosure of ownership should be made here or in the related party note.] [Tailor the above wording or include additional wording such that the Bank's ultimate parent company is disclosed under IAS 1.138(c) and ultimate controlling party under IAS 24.13.]

**Principal activity.** The Group's principal business activity is [commercial and retail] banking operations within the Russian Federation. The Bank has operated under a full banking licence issued by the Central Bank of the Russian Federation ("CBRF") since \_\_\_\_\_. The Bank participates in the state deposit insurance scheme, which was introduced by Federal Law #177-FZ "Deposits of individuals insurance in Russian Federation" dated 23 December 2003. The State Deposit Insurance Agency guarantees repayment of 100% of individual deposits up to RR 1 400 thousand per individual in the case of the withdrawal of a licence of a bank or a CBRF imposed moratorium on payments.

The Bank has \_\_\_\_\_ (2016: \_\_\_\_\_) branches within the Russian Federation and \_\_\_\_\_ (2016: \_\_\_\_\_) branches overseas in \_\_\_\_\_. Additionally, the Bank has representative offices in \_\_\_\_\_. [The Group had \_\_\_\_\_ employees at 31 December 2017 (2016: \_\_\_\_\_ employees).]

**Registered address and place of business.** The Bank's registered address is: \_\_\_\_\_, Russian Federation.

[The Bank's principal place of business is \_\_\_\_\_.] [Note: the principal place of the Bank's activity should be disclosed only where it is different from the registered address of the Bank.]

**Presentation currency.** These [consolidated] financial statements are presented in Russian Roubles ("RR"), unless otherwise stated.

## 2 Operating Environment of the Group

**Russian Federation.** The Russian Federation displays certain characteristics of an emerging market. Its economy is particularly sensitive to oil and gas prices. The legal, tax and regulatory frameworks continue to develop and are subject to frequent changes and varying interpretations (Note 43). The Russian economy was growing in 2017 after overcoming the economic recession of 2015 and 2016. The economy is negatively impacted by low oil prices, ongoing political tension in the region and international sanctions against certain Russian companies and individuals. The financial markets continue to be volatile. This operating environment has a significant impact on the Group's operations and financial position. Management is taking necessary measures to ensure sustainability of the Group's operations. However, the future effects of the current economic situation are difficult to predict and management's current expectations and estimates could differ from actual results.

Management determined loan impairment provisions using the "incurred loss" model required by the applicable accounting standards. These standards require recognition of impairment losses that arose from past events and prohibit recognition of impairment losses that could arise from future events, including future changes in the economic environment, no matter how likely those future events are. Thus final impairment losses from financial assets could differ significantly from the current level of provisions. Refer to Note 4.

[Note: This note serves as an illustrative example and should be adjusted for the facts and circumstances relevant to the Group.]

[Note: Consider adding information about situation in Ukraine or the UK if the Group has material operations in Ukraine or the UK or trades with these countries. Refer to Appendix G for examples.]

### 3 Significant Accounting Policies

**Basis of preparation.** These [consolidated] financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") under the historical cost convention, as modified by the initial recognition of financial instruments based on fair value, and by the revaluation of [premises and equipment, investment properties,] available-for-sale financial assets, and financial instruments categorised at fair value through profit or loss. The principal accounting policies applied in the preparation of these [consolidated] financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated (refer to Note 5). *[Generally should not include accounting policies that deal with balance sheet or profit or loss items that the Group does not have. In addition, ensure that an accounting policy exists for each material transaction and balance sheet and income item.]*

*[Include this text only if there is doubt about going concern.]* **[Going concern.]** Management prepared these [consolidated] financial statements on a going concern basis. Refer to Note 4 for uncertainties relating to events and conditions that may cast a significant doubt upon the Group's ability to continue as a going concern.]

**Consolidated financial statements.** Subsidiaries are those investees, including structured entities, that the Group controls because the Group (i) has power to direct relevant activities of the investees that significantly affect their returns, (ii) has exposure, or rights, to variable returns from its involvement with the investees, and (iii) has the ability to use its power over the investees to affect the amount of investor's returns. The existence and effect of substantive rights, including substantive potential voting rights, are considered when assessing whether the Group has power over another entity. For a right to be substantive, the holder must have practical ability to exercise that right when decisions about the direction of the relevant activities of the investee need to be made. The Group may have power over an investee even when it holds less than majority of voting power in an investee. In such a case, the Group assesses the size of its voting rights relative to the size and dispersion of holdings of the other vote holders to determine if it has de-facto power over the investee. Protective rights of other investors, such as those that relate to fundamental changes of investee's activities or apply only in exceptional circumstances, do not prevent the Group from controlling an investee. Subsidiaries are consolidated from the date on which control is transferred to the Group, and are deconsolidated from the date on which control ceases.

The acquisition method of accounting is used to account for the acquisition of subsidiaries [other than those acquired from parties under common control]. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest.

The Group measures non-controlling interest that represents present ownership interest and entitles the holder to a proportionate share of net assets in the event of liquidation on a transaction by transaction basis, either at: (a) fair value, or (b) the non-controlling interest's proportionate share of net assets of the acquiree. Non-controlling interests that are not present ownership interests are measured at fair value.

Goodwill is measured by deducting the net assets of the acquiree from the aggregate of the consideration transferred for the acquiree, the amount of non-controlling interest in the acquiree and fair value of an interest in the acquiree held immediately before the acquisition date. Any negative amount ("negative goodwill") is recognised in profit or loss, after management reassesses whether it identified all the assets acquired and all liabilities and contingent liabilities assumed, and reviews appropriateness of their measurement.

The consideration transferred for the acquiree is measured at the fair value of the assets given up, equity instruments issued and liabilities incurred or assumed, including fair value of assets or liabilities from contingent consideration arrangements, but excludes acquisition related costs such as advisory, legal, valuation and similar professional services. Transaction costs incurred for issuing equity instruments are deducted from equity; transaction costs incurred for issuing debt are deducted from its carrying amount and all other transaction costs associated with the acquisition are expensed.

### 3 Summary of Significant Accounting Policies (Continued)

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated; unrealised losses are also eliminated unless the cost cannot be recovered. The Bank and all of its subsidiaries use uniform accounting policies consistent with the Group's policies.

Non-controlling interest is that part of the net results and of the equity of a subsidiary attributable to interests which are not owned, directly or indirectly, by the Bank. Non-controlling interest forms a separate component of the Group's equity.

**Purchases and sales of non-controlling interests.** The Group applies the economic entity model to account for transactions with owners of non-controlling interest. Any difference between the purchase consideration and the carrying amount of non-controlling interest acquired is recorded as a capital transaction directly in equity. The Group recognises the difference between sales consideration and carrying amount of non-controlling interest sold as a capital transaction in the statement of changes in equity.

**Purchases of subsidiaries from parties under common control.** Purchases of subsidiaries from parties under common control are accounted for [in accordance with the acquisition method of accounting] [using the predecessor values method]. Under this method, the [consolidated] financial statements of the combined entity are presented as if the businesses had been combined from the beginning of the earliest period presented or, if later, the date when the combining entities were first brought under common control. The assets and liabilities of the subsidiary transferred under common control are at the predecessor entity's carrying amounts. The predecessor entity is considered to be the highest reporting entity in which the subsidiary's IFRS financial information was consolidated. Related goodwill inherent in the predecessor entity's original acquisitions is also recorded in these [consolidated] financial statements. Any difference between the carrying amount of net assets, including the predecessor entity's goodwill, and the consideration for the acquisition is accounted for in these [consolidated] financial statements as an adjustment to [other reserve / merger reserve] within equity].

**Associates.** Associates are entities over which the Group has significant influence (directly or indirectly), but not control, generally accompanying a shareholding of between 20 and 50 percent of the voting rights. Investments in associates are accounted for using the equity method of accounting, and are initially recognised at cost. The carrying amount of associates includes goodwill identified on acquisition less accumulated impairment losses, if any. Dividends received from associates reduce the carrying value of the investment in associates. Other post-acquisition changes in Group's share of net assets of an associate are recognised as follows: (i) the Group's share of profits or losses of associates is recorded in the consolidated profit or loss for the year as share of result of associates, (ii) the Group's share of other comprehensive income is recognised in other comprehensive income and presented separately, (iii); all other changes in the Group's share of the carrying value of net assets of associates are recognised in profit or loss within the share of result of associates. However, when the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates; unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

**Disposals of subsidiaries, associates or joint ventures.** When the Group ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity, are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are recycled to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss, where appropriate.

### 3 Summary of Significant Accounting Policies (Continued)

**Financial instruments - key measurement terms.** Depending on their classification financial instruments are carried at fair value [*, cost,*] or amortised cost as described below.

*Fair value* is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence of fair value is price in an active market. An active market is one in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Fair value of financial instruments traded in an active market is measured as the product of the quoted price for the individual asset or liability and the quantity held by the entity. This is the case even if a market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price. [The price within the bid-ask spread that is most representative of fair value in the circumstances was used to measure fair value, which management considers is [the last trading price on the reporting date] [the average of actual trading prices on the reporting date]. [The quoted market price used to value financial assets is the current bid price; the quoted market price for financial liabilities is the current asking price.]

[A portfolio of financial derivatives or other financial assets and liabilities that are not traded in an active market is measured at the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position (i.e. an asset) for a particular risk exposure or paid to transfer a net short position (i.e. a liability) for a particular risk exposure in an orderly transaction between market participants at the measurement date. This is applicable for assets carried at fair value on a recurring basis if the Group: (a) manages the group of financial assets and financial liabilities on the basis of the entity's net exposure to a particular market risk (or risks) or to the credit risk of a particular counterparty in accordance with the entity's documented risk management or investment strategy; (b) it provides information on that basis about the group of assets and liabilities to the entity's key management personnel; and (c) the market risks, including duration of the entity's exposure to a particular market risk (or risks) arising from the financial assets and financial liabilities is substantially the same.]

Valuation techniques such as discounted cash flow models or models based on recent arm's length transactions or consideration of financial data of the investees, are used to measure fair value of certain financial instruments for which external market pricing information is not available. Fair value measurements are analysed by level in the fair value hierarchy as follows: (i) level one are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities, (ii) level two measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices), and (iii) level three measurements are valuations not based on solely observable market data (that is, the measurement requires significant unobservable inputs). Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the reporting period. Refer to Note 51.

*[Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition and includes transaction costs. Measurement at cost is only applicable to investments in equity instruments that do not have a quoted market price and whose fair value cannot be reliably measured and derivatives that are linked to, and must be settled by, delivery of such unquoted equity instruments. Refer to Notes 4 and 12. [The notes must include disclosures required by IFRS 7.30 for such equity investments, including why fair value cannot be measured reliably. Investments measured at cost are subject to impairment assessment. Such investments are excluded from the fair value disclosure required by IFRS 13.]*

*Transaction costs* are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial instrument. An incremental cost is one that would not have been incurred if the transaction had not taken place. Transaction costs include fees and commissions paid to agents (including employees acting as selling agents), advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs.

### 3 Summary of Significant Accounting Policies (Continued)

*Amortised cost* is the amount at which the financial instrument was recognised at initial recognition less any principal repayments, plus accrued interest, and for financial assets less any write-down for incurred impairment losses. Accrued interest includes amortisation of transaction costs deferred at initial recognition and of any premium or discount to maturity amount using the effective interest method. Accrued interest income and accrued interest expense, including both accrued coupon and amortised discount or premium (including fees deferred at origination, if any), are not presented separately and are included in the carrying values of related items in the statement of financial position.

*The effective interest method* is a method of allocating interest income or interest expense over the relevant period, so as to achieve a constant periodic rate of interest (effective interest rate) on the carrying amount.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts (excluding future credit losses) through the expected life of the financial instrument or a shorter period, if appropriate, to the net carrying amount of the financial instrument. The effective interest rate discounts cash flows of variable interest instruments to the next interest repricing date, except for the premium or discount which reflects the credit spread over the floating rate specified in the instrument, or other variables that are not reset to market rates. Such premiums or discounts are amortised over the whole expected life of the instrument. The present value calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate.

**Initial recognition of financial instruments.** [Trading securities, derivatives and other financial instruments at fair value through profit or loss] are initially recorded at fair value. All other financial instruments are initially recorded at fair value plus transaction costs. Fair value at initial recognition is best evidenced by the transaction price. A gain or loss on initial recognition is only recorded if there is a difference between fair value and transaction price which can be evidenced by other observable current market transactions in the same instrument or by a valuation technique whose inputs include only data from observable markets.

All purchases and sales of financial assets that require delivery within the time frame established by regulation or market convention ("regular way" purchases and sales) are recorded at trade date, which is the date on which the Group commits to deliver a financial asset. All other purchases are recognised when the entity becomes a party to the contractual provisions of the instrument.

[The Group uses [discounted cash flow] valuation techniques to determine the fair value of [currency swaps], [foreign exchange forwards], [loans to related parties]] that are not traded in an active market. Differences may arise between the fair value at initial recognition, which is considered to be the transaction price, and the amount determined at initial recognition using a valuation technique with level 3 inputs. Any such differences are initially recognised within [other] assets or [other] liabilities and are subsequently amortised on a straight line basis over the term of the [currency swaps], [foreign exchange forwards], [loans to related parties]. The differences are immediately recognised in profit or loss if the valuation uses only level 1 or level 2 inputs.] *[See IFRS 7.IG14]*

**Derecognition of financial assets.** The Group derecognises financial assets when (a) the assets are redeemed or the rights to cash flows from the assets otherwise expired or (b) the Group has transferred the rights to the cash flows from the financial assets or entered into a qualifying pass-through arrangement while (i) also transferring substantially all risks and rewards of ownership of the assets or (ii) neither transferring nor retaining substantially all risks and rewards of ownership, but not retaining control. Control is retained if the counterparty does not have the practical ability to sell the asset in its entirety to an unrelated third party without needing to impose restrictions on the sale.

**Cash and cash equivalents.** Cash and cash equivalents are items which are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Cash and cash equivalents include [mandatory reserve deposits with the CBRF and] all interbank placements [and reverse sale and repurchase agreements with other banks] with original maturities of less than three months. Funds restricted for a period of more than three months on origination are excluded from cash and cash equivalents. Cash and cash equivalents are carried at amortised cost.

### 3 Summary of Significant Accounting Policies (Continued)

*[The above reflects the practice of many entities; however each entity should determine and disclose the composition and maturity threshold of its cash equivalents used for meeting short-term cash commitments, based on the entity's own cash management practices. E.g. for some entities cash equivalents are only those realisable within one day.]*

The payments or receipts presented in the statement of cash flows represent transfers of cash and cash equivalents by the Group, including amounts charged or credited to current accounts of the Group's counterparties held with the Group, such as loan interest income or principal collected by charging the customer's current account or interest payments or disbursement of loans credited to the customer's current account, which represents cash or cash equivalent from the customer's perspective.

**[Mandatory cash balances with the CBRF.]** Mandatory cash balances with the CBRF are carried at amortised cost and represent non-interest bearing mandatory reserve deposits which are not available to finance the Group's day to day operations, and hence are not considered as part of cash and cash equivalents for the purposes of the consolidated statement of cash flows.] *[Note: Select appropriate policy for mandatory cash balances with CBRF. A consistent policy should be applied in consolidated accounts.]*

**Trading securities.** Trading securities are financial assets which are either acquired for generating a profit from short-term fluctuations in price or trader's margin, or are securities included in a portfolio in which a pattern of short-term trading exists. The Group classifies securities into trading securities if it has an intention to sell them within a short period after purchase, i.e. within \_\_\_\_ months *[Note: short-term in this context means much less than 12 months, e.g. 3 to 6 months].*

The Group may choose to reclassify a non-derivative trading financial asset out of the fair value through the profit or loss category if the asset is no longer held for the purpose of selling it in the near term. Financial assets other than loans and receivables are permitted to be reclassified out of fair value through the profit or loss category only in rare circumstances arising from a single event that is unusual and highly unlikely to reoccur in the near term. Financial assets that would meet the definition of loans and receivables may be reclassified if the Group has the intention and ability to hold these financial assets for the foreseeable future, or until maturity.

Trading securities are carried at fair value. Interest earned on trading securities calculated using the effective interest method is presented in profit or loss for the year as interest income. Dividends are included in dividend income within **[other operating income]** when the Group's right to receive the dividend payment is established, and it is probable that the dividends will be collected. All other elements of the changes in the fair value and gains or losses on de-recognition are recorded in profit or loss for the year as gains less losses from trading securities in the period in which they arise.

**[Alternative policy.]** Trading securities are carried at fair value. Interest earned and dividend income on trading securities are included in gains less losses from trading securities in profit or loss and disclosed separately in the notes to the financial statements.]

**Other securities at fair value through profit or loss.** Other securities at fair value through profit or loss are financial assets designated irrevocably, at initial recognition, into this category. Management designates securities into this category only if (a) such classification eliminates or significantly reduces an accounting mismatch that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases; or (b) a group of financial assets, financial liabilities or both is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information on that basis is regularly provided to and reviewed by the Group's **[key management personnel]** **[Board of Directors]**. Recognition and measurement of this category of financial assets is consistent with the above policy for trading securities.

**Due from other banks.** Amounts due from other banks are recorded when the Group advances money to counterparty banks with no intention of trading the resulting unquoted non-derivative receivable due on fixed or determinable dates. Amounts due from other banks are carried at amortised cost.

### 3 Summary of Significant Accounting Policies (Continued)

**Loans and advances to customers.** Loans and advances to customers are recorded when the Group advances money to purchase or originate an unquoted non-derivative receivable from a customer due on fixed or determinable dates, and has no intention of trading the receivable. Loans and advances to customers are carried at amortised cost.

**Impairment of financial assets carried at amortised cost.** Impairment losses are recognised in profit or loss for the year when incurred as a result of one or more events ("loss events") that occurred after the initial recognition of the financial asset and which have an impact on the amount or timing of the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. If the Group determines that no objective evidence exists that impairment was incurred for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics, and collectively assesses them for impairment.

The primary factors that the Group considers in determining whether a financial asset is impaired are its overdue status and realisability of related collateral, if any. The following other principal criteria are also used to determine whether there is objective evidence that an impairment loss has occurred:

- any instalment is overdue and the late payment cannot be attributed to a delay caused by the settlement systems;
- the borrower experiences a significant financial difficulty as evidenced by the borrower's financial information that the Group obtains;
- the borrower considers bankruptcy or a financial reorganisation;
- there is an adverse change in the payment status of the borrower as a result of changes in the national or local economic conditions that impact the borrower; or
- the value of collateral significantly decreases as a result of deteriorating market conditions.

*[Please expand by describing the actual criteria used by the Group. Refer to IFRS 7.B5(f)]*

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics. Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment, are estimated on the basis of the contractual cash flows of the assets and the experience of management in respect of the extent to which amounts will become overdue as a result of past loss events and the success of recovery of overdue amounts. Past experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect past periods, and to remove the effects of past conditions that do not exist currently.

If the terms of an impaired financial asset held at amortised cost are renegotiated or otherwise modified because of financial difficulties of the borrower or issuer, impairment is measured using the original effective interest rate before the modification of terms. The renegotiated asset is then derecognized and a new asset is recognized at its fair value only if the risks and rewards of the asset substantially changed. This is normally evidenced by a substantial difference between the present values of the original cash flows and the new expected cash flows.

Impairment losses are always recognised through an allowance account to write down the asset's carrying amount to the present value of expected cash flows (which exclude future credit losses that have not been incurred) discounted at the original effective interest rate of the asset. The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account through profit or loss for the year.

### 3 Summary of Significant Accounting Policies (Continued)

Uncollectible assets are written off against the related impairment loss provision after all the necessary procedures to recover the asset have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are credited to impairment loss account in profit or loss for the year. *[Please expand by describing the actual criteria used by the Group. Refer to IFRS 7.B5(d)(ii)]*

**Repossessed collateral.** Repossessed collateral represents financial and non-financial assets acquired by the Group in settlement of overdue loans. The assets are initially recognised at fair value when acquired and included in premises and equipment, other financial assets, investment properties or inventories within other assets depending on their nature and the Group's intention in respect of recovery of these assets, and are subsequently remeasured and accounted for in accordance with the accounting policies for these categories of assets.

*[The Group applies its accounting policy for non-current assets held for sale or disposal groups to reposessed collateral where the relevant conditions for such classification are met at the end of the reporting period.]*

Where reposessed collateral results in acquiring control over a business, the business combination is accounted for using the acquisition method of accounting with fair value of the settled loan representing the cost of acquisition (refer to the accounting policy for consolidation). Accounting policy for associates is applied to reposessed shares where the Group obtains significant influence, but not control. The cost of the associate is the fair value of the loan settled by repossessing the pledged shares.

**Credit related commitments.** The Group issues financial guarantees and commitments to provide loans. Financial guarantees represent irrevocable assurances to make payments in the event that a customer cannot meet its obligations to third parties, and carry the same credit risk as loans. Financial guarantees and commitments to provide a loan are initially recognised at their fair value, which is normally evidenced by the amount of fees received. This amount is amortised on a straight line basis over the life of the commitment, except for commitments to originate loans if it is probable that the Group will enter into a specific lending arrangement and does not expect to sell the resulting loan shortly after origination; such loan commitment fees are deferred and included in the carrying value of the loan on initial recognition. At the end of each reporting period, the commitments are measured at the higher of (i) the remaining unamortised balance of the amount at initial recognition and (ii) the best estimate of expenditure required to settle the commitment at the end of each reporting period.

*[In cases where the fees are charged periodically in respect of an outstanding commitment, they are recognised as revenue on a time proportion basis over the respective commitment period.]*

**Performance guarantees.** Performance guarantees are contracts that provide compensation if another party fails to perform a contractual obligation. Such contracts transfer non-financial performance risk in addition to credit risk. Performance guarantees are initially recognised at their fair value, which is normally evidenced by the amount of fees received. This amount is amortised on a straight line basis over the life of the contract. At the end of each reporting period, the performance guarantee contracts are measured at the higher of (i) the unamortised balance of the amount at initial recognition and (ii) the best estimate of expenditure required to settle the contract at the end of each reporting period, discounted to present value. Where the Group has the contractual right to revert to its customer for recovering amounts paid to settle the performance guarantee contracts, such amounts will be recognised as loans and receivables upon transfer of the loss compensation to the guarantee's beneficiary.

**Investment securities available for sale.** This classification includes investment securities which the Group intends to hold for an indefinite period of time and which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

Investment securities available for sale are carried at fair value. Interest income on available-for-sale debt securities is calculated using the effective interest method, and recognised in profit or loss for the year.

### 3 Summary of Significant Accounting Policies (Continued)

Dividends on available-for-sale equity instruments are recognised in profit or loss for the year when the Group's right to receive payment is established and it is probable that the dividends will be collected. All other elements of changes in the fair value are recognised in other comprehensive income until the investment is derecognised or impaired, at which time the cumulative gain or loss is reclassified from other comprehensive income to profit or loss for the year. Impairment losses are recognised in profit or loss for the year when incurred as a result of one or more events ("loss events") that occurred after the initial recognition of investment securities available for sale. A significant or prolonged decline in the fair value of an equity security below its cost is an indicator that it is impaired. The cumulative impairment loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that asset previously recognised in profit or loss – is reclassified from other comprehensive income to profit or loss for the year. Impairment losses on equity instruments are not reversed and any subsequent gains are recognised in other comprehensive income. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed through profit or loss for the year.

**Sale and repurchase agreements and lending of securities.** Sale and repurchase agreements ("repo agreements"), which effectively provide a lender's return to the counterparty, are treated as secured financing transactions. Securities sold under such sale and repurchase agreements are not derecognised. The securities are reclassified as repurchase receivables in the statement of financial position if the transferee has the right by contract or custom to sell or repledge the securities. The corresponding liability is presented within amounts due to other banks or other borrowed funds.

Securities purchased under agreements to resell ("reverse repo agreements"), which effectively provide a lender's return to the Group, are recorded as due from other banks or loans and advances to customers, as appropriate. The difference between the sale and repurchase price, adjusted by interest and dividend income collected by the counterparty, is treated as interest income and accrued over the life of repo agreements using the effective interest method.

Securities lent to counterparties for a fixed fee are retained in the [consolidated] financial statements in their original category in the statement of financial position unless the counterparty has the right by contract or custom to sell or repledge the securities, in which case they are reclassified and presented separately. Securities borrowed for a fixed fee are not recorded in the [consolidated] financial statements, unless these are sold to third parties, in which case the purchase and sale are recorded in profit or loss for the year within gains less losses arising from trading securities. The obligation to return the securities is recorded at fair value in other borrowed funds.

**Investment securities held to maturity.** This classification includes quoted non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group has both the intention and ability to hold to maturity. An investment is not classified as a held-to-maturity investment if the Group has the right to require that the issuer repay or redeem the investment before its maturity, because paying for such a feature is inconsistent with expressing an intention to hold the asset until maturity. Management determines the classification of investment securities held to maturity at their initial recognition and reassesses the appropriateness of that classification at the end of each reporting period. Investment securities held to maturity are carried at amortised cost. *[The Group cannot classify any financial asset as held-to-maturity if it has, during the current financial year or during two preceding financial years sold or transferred held-to-maturity investments before maturity (unless they meet the specific exceptions in IAS 39). Further, only actively traded securities may be classified as held to maturity.]*

**Promissory notes purchased.** Promissory notes purchased are included in trading securities, available-for-sale securities, in due from other banks or in loans and advances to customers, depending on their substance and are recorded, subsequently remeasured and accounted for in accordance with the accounting policies for these categories of assets.

**Investment property.** *[Refer to Appendix E for an extended accounting policy if investment properties are material.]* Investment property is property held by the Group to earn rental income or for capital appreciation, or both and which is not occupied by the Group. Investment property includes assets under construction for future use as investment property.

### 3 Summary of Significant Accounting Policies (Continued)

Investment property is initially recognised at cost, including transaction costs, and subsequently remeasured at fair value updated to reflect market conditions at the end of the reporting period. Fair value of investment property is the price that would be received from sale of the asset in an orderly transaction, without deduction of any transaction costs. Fair value of the Group's investment property is determined based on reports of independent appraisers, who hold a recognised and relevant professional qualification and who have recent experience in valuation of property of similar location and category. *[If valuation is done by the entity's staff, amend wording accordingly and disclose that professional valuers were not involved – see IAS 40.75(e).]*

*[Investment property represents industrial land and buildings that the Group valued using its expectation to convert them into a residential complex.] *[Disclose if highest and best use differs from current use.]**

Earned rental income is recorded in profit or loss for the year within *[other operating income]*. Gains and losses resulting from changes in the fair value of investment property are recorded in profit or loss for the year and presented separately.

*[Alternative policy - cost model: Investment properties are stated at cost, restated to the equivalent purchasing power of the Russian Rouble at 31 December 2002 for assets acquired prior to 1 January 2003 less accumulated depreciation and provision for impairment, where required. If any indication exists that investment properties may be impaired, the Group estimates the recoverable amount as the higher of value in use and fair value less costs to sell. The carrying amount of an investment property is written down to its recoverable amount through a charge to profit or loss for the year. An impairment loss recognised in prior years is reversed if there has been a subsequent change in the estimates used to determine the asset's recoverable amount.]*

Subsequent expenditure is capitalised only when it is probable that future economic benefits associated with it will flow to the Group, and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred. If an investment property becomes owner-occupied, it is reclassified to premises and equipment.]

*[Precious metals. The Group has a practice of taking delivery of precious metals and selling them within a short period after delivery, for the purpose of generating a profit from short-term fluctuations in price or dealer's margin. Precious metals are carried at the lower of cost or net realisable value. [Precious metals are held by the Group's commodity broker-trader subsidiary and are measured at fair value less costs to sell with gains or losses recognised in profit or loss.]]*

**Goodwill.** Goodwill is carried at cost less accumulated impairment losses, if any. The Group tests goodwill for impairment at least annually and whenever there are indications that goodwill may be impaired. Goodwill is allocated to the cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the business combination. Such units or group of units represent the lowest level at which the Group monitors goodwill, and are not larger than an operating segment. Gains or losses on disposal of an operation within a cash generating unit to which goodwill has been allocated include the carrying amount of goodwill associated with the disposed operation, generally measured on the basis of the relative values of the disposed operation and the portion of the cash-generating unit which is retained.

**Premises and equipment.** Premises and equipment are stated at cost *[,restated to the equivalent purchasing power of the Russian Rouble at 31 December 2002 for assets acquired prior to 1 January 2003,] *[or revalued amounts, as described below,]** less accumulated depreciation and provision for impairment, where required.

*[Premises [and equipment] are subject to revaluation with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period. Increases in the carrying amount arising on revaluation are credited to other comprehensive income and increase the revaluation surplus in equity. Decreases that offset previous increases of the same asset are recognised in other comprehensive income and decrease the previously recognised revaluation surplus in equity; all other decreases are charged to profit or loss for the year.]*

### 3 Summary of Significant Accounting Policies (Continued)

The revaluation reserve for premises and equipment included in equity is transferred directly to retained earnings [accumulated deficit] when the revaluation surplus is realised on the retirement or disposal of the asset[, or as the asset is used by the Group; in the latter case, the amount of the surplus realised is the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost.] *[Disclose specific details of the valuation method applied e.g.]* If there is no market based evidence of fair value, fair value is estimated using an income approach. *[Management has updated the carrying value of land and buildings measured in accordance with the revaluation model at the end of the reporting period using market based evidence and is satisfied that sufficient market based evidence of fair value is available to support the updated fair values.]* *[Or: Management has updated the carrying value of land and buildings measured in accordance with the revaluation model at the end of the reporting period using [specify method].]* *[Describe accounting policy for valuation based on depreciated replacement cost if there is no market-based evidence of fair value because of the specialised nature of the item of premises and equipment and the item is rarely sold, except as part of a continuing business.]*

*[Note that when an item of premises and equipment is revalued, the entire class of premises and equipment to which that asset belongs should be revalued (IAS 16.36).] [The items within a class of premises and equipment are revalued simultaneously in order to avoid selective revaluation of assets and the reporting of amounts in the financial statements which are a mixture of costs and values at different dates. However, a class of assets may be revalued on a rolling basis provided revaluation of the class of assets is completed within a short period of time and provided the revaluations are kept up to date (IAS 16.38).]]*

Costs of minor repairs and day-to-day maintenance are expensed when incurred. Costs of replacing major parts or components of premises and equipment items are capitalised, and the replaced part is retired.

At the end of each reporting period management assesses whether there is any indication of impairment of premises and equipment. If any such indication exists, management estimates the recoverable amount, which is determined as the higher of an asset's fair value less costs to sell and its value in use. The carrying amount is reduced to the recoverable amount and the impairment loss is recognised in profit or loss for the year *[to the extent it exceeds the previous revaluation surplus in equity]*. An impairment loss recognised for an asset in prior years is reversed if there has been a change in the estimates used to determine the asset's value in use or fair value less costs to sell.

Gains and losses on disposals determined by comparing proceeds with carrying amount are recognised in profit or loss for the year (within other operating income or expenses).

**Depreciation.** Land and construction in progress are not depreciated. *[Delete reference to non-depreciation of construction in progress, if not relevant.]* Depreciation on other items of premises and equipment is calculated using the straight-line method to allocate their cost *[or revalued amounts]* to their residual values over their estimated useful lives:

	<u>Useful lives in years</u>
Premises	[40 to 50]
Office and computer equipment <i>[May need more than one category]</i>	[5 to 10]
Leasehold improvements	Shorter of useful life and the term of the underlying lease

*[These lives need to be consistent with IFRS and not RAR, i.e. IFRS adjustments may be needed to reflect IFRS depreciation rates. The categories in the table should be consistent with PP&E note.]*

The residual value of an asset is the estimated amount that the Group would currently obtain from disposal of the asset less the estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its useful life. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

### 3 Summary of Significant Accounting Policies (Continued)

**Intangible assets.** The Group's intangible assets other than goodwill have definite useful life and primarily include capitalised computer software and *[specify the nature of the other intangibles]*. Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. Development costs that are directly associated with identifiable and unique software controlled by the Group are recorded as intangible assets if the inflow of incremental economic benefits exceeding costs is probable. Capitalised costs include staff costs of the software development team and an appropriate portion of relevant overheads. All other costs associated with computer software, e.g. its maintenance, are expensed when incurred. Capitalised computer software is amortised on a straight line basis over expected useful lives of \_\_\_\_ to \_\_\_\_ years.

*[Specify accounting treatment of significant classes of intangible assets, e.g. in business combinations acquired trademarks, trade names, internet domain names, non-competition agreements, customer lists and databases, customer contracts and the related contractual and non-contractual customer relationships, banking or other licences, favourable lease agreements, construction permits, patented technology, etc.]*

*[Servicing contracts such as mortgage servicing contracts acquired in business combinations may be intangible assets except if mortgage loans, credit card receivables or other financial assets are acquired in a business combination with servicing retained, then the inherent servicing rights are not a separate intangible asset because the fair value of those servicing rights is included in the measurement of the fair value of the acquired financial asset. See IFRS 3R.IE36.]*

**Operating leases.** Where the Group is a lessee in a lease which does not transfer substantially all the risks and rewards incidental to ownership from the lessor to the Group, the total lease payments are charged to profit or loss for the year (rental expense) on a straight-line basis over the period of the lease. *[Operating leases include long-term leases of land with rental payments contingent on cadastral values regularly reviewed by the government.]*

Leases embedded in other agreements are separated if (a) fulfilment of the arrangement is dependent on the use of a specific asset or assets and (b) the arrangement conveys a right to use the asset.

*[When assets are leased out under an operating lease, the lease payments receivable are recognised as rental income on a straight-line basis over the lease term.]*

**Finance lease receivables.** Where the Group is a lessor in a lease which transfers substantially all the risks and rewards incidental to ownership to the lessee, the assets leased out are presented as a finance lease receivable and carried at the present value of the future lease payments. Finance lease receivables are initially recognised at commencement (when the lease term begins) using a discount rate determined at inception (the earlier of the date of the lease agreement and the date of commitment by the parties to the principal provisions of the lease).

The difference between the gross receivable and the present value represents unearned finance income. This income is recognised over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return. Incremental costs directly attributable to negotiating and arranging the lease are included in the initial measurement of the finance lease receivable and reduce the amount of income recognised over the lease term *[except for certain subsidiaries of the Group which act as manufacturer or dealer lessors, in which case such costs are expensed as part of the selling profit similarly to outright sales.]* Finance income from leases is recorded within *[other operating income]* in profit or loss for the year.

Impairment losses are recognised in profit or loss for the year when incurred as a result of one or more events ("loss events") that occurred after the initial recognition of finance lease receivables. The Group uses the same principal criteria to determine whether there is objective evidence that an impairment loss has occurred, as for loans carried at amortised cost. Impairment losses are recognised through an allowance account to write down the receivables' net carrying amount to the present value of expected cash flows (which exclude future credit losses that have not been incurred), discounted at the interest rates implicit in the finance leases. The estimated future cash flows reflect the cash flows that may result from obtaining and selling the assets subject to the lease.

### 3 Summary of Significant Accounting Policies (Continued)

**Finance lease liabilities.** Where the Group is a lessee in a lease which transferred substantially all the risks and rewards incidental to ownership to the Group, the assets leased are capitalised in premises and equipment at the commencement of the lease at the lower of the fair value of the leased asset, and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of future finance charges, are included in other borrowed funds. The interest cost is charged to profit or loss for the year over the lease period using the effective interest method. The assets acquired under finance leases are depreciated over their useful life, or the shorter lease term if the Group is not reasonably certain that it will obtain ownership by the end of the lease term.

**Non-current assets classified as held for sale.** Non-current assets and disposal groups, which may include both non-current and current assets, are classified in the statement of financial position as 'non-current assets held for sale' if their carrying amount will be recovered principally through a sale transaction, including loss of control of a subsidiary holding the assets, within twelve months after the end of the reporting period. Assets are reclassified when all of the following conditions are met: (a) the assets are available for immediate sale in their present condition; (b) the Group's management approved and initiated an active programme to locate a buyer; (c) the assets are actively marketed for sale at a reasonable price; (d) the sale is expected within one year and (e) it is unlikely that significant changes to the plan to sell will be made or that the plan will be withdrawn. Non-current assets or disposal groups classified as held for sale in the current period's statement of financial position are not reclassified or re-presented in the comparative statement of financial position to reflect the classification at the end of the current period.

A disposal group is a group of assets (current or non-current) to be disposed of, by sale or otherwise, together as a group in a single transaction, and liabilities directly associated with those assets that will be transferred in the transaction. Goodwill is included if the disposal group includes an operation within a cash-generating unit to which goodwill has been allocated on acquisition. Non-current assets are assets that include amounts expected to be recovered or collected more than twelve months after the end of the reporting period. If reclassification is required, both the current and non-current portions of an asset are reclassified.

Held for sale disposal groups as a whole are measured at the lower of their carrying amount and fair value less costs to sell. Held for sale premises and equipment [, investment properties and intangible assets] are not depreciated or amortised. Reclassified non-current financial instruments[,] [and] deferred taxes[,] [and investment properties held at fair value] are not subject to write down to the lower of their carrying amount and fair value less costs to sell.

*[Specify accounting policy if the Group holds an asset (or disposal group) previously classified as held for sale, but the held for sale criteria are no longer met – see IFRS 5.26 ff.]*

Liabilities directly associated with disposal groups that will be transferred in the disposal transaction are reclassified and presented separately in the statement of financial position.

**Discontinued operations.** A discontinued operation is a component of the Group that either has been disposed of, or that is classified as held for sale, and: (a) represents a separate major line of business or geographical area of operations; (b) is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; or (c) is a subsidiary acquired exclusively with a view to resale. Earnings and cash flows of discontinued operations, if any, are disclosed separately from continuing operations with comparatives being re-presented. *[Note: Specific disclosures for discontinued operations are not covered in this pro forma. Refer to IFRS 5.]*

**Due to other banks.** Amounts due to other banks are recorded when money or other assets are advanced to the Group by counterparty banks. The non-derivative liability is carried at amortised cost. If the Group purchases its own debt, the liability is removed from the consolidated statement of financial position and the difference between the carrying amount of the liability and the consideration paid is included in gains or losses arising from [early] retirement of debt.

### 3 Summary of Significant Accounting Policies (Continued)

**Customer accounts.** Customer accounts are non-derivative liabilities to individuals, state or corporate customers and are carried at amortised cost.

**Debt securities in issue.** Debt securities in issue include promissory notes, bonds, certificates of deposit and debentures issued by the Group. Debt securities are stated at amortised cost. If the Group purchases its own debt securities in issue, they are removed from the consolidated statement of financial position and the difference between the carrying amount of the liability and the consideration paid is included in gains arising from [early] retirement of debt.

[Upon the issue of convertible bonds, the liability component is determined by measuring the fair value of an equivalent non-convertible bond. The equity component is assigned the residual amount after deducting from the fair value of the convertible bonds as a whole the amount separately determined for the liability component. The obligation to make future payments of principal and interest to bondholders is carried at amortised cost until extinguished on conversion or maturity of the bonds. The conversion feature is accounted for as a financial derivative where the conversion right held by the lender is not to convert a fixed amount of the bond expressed in the entity's functional currency to fixed number of equity instruments.]

**Other borrowed funds.** Other borrowed funds include [preference shares, which carry a mandatory coupon, or are redeemable on a specific date or at the option of the shareholder,][obligations to return securities borrowed and sold to third parties] and [shareholder loans].

[Preference shares and] shareholder loans are carried at amortised cost. Obligations to return securities borrowed and sold to third parties are carried at fair value through profit or loss.

**Derivative financial instruments.** *[This note does not cover hedge accounting. For examples of disclosure of derivative instruments used for hedging refer to IAS 39.]* Derivative financial instruments, including foreign exchange contracts, interest rate futures, forward rate agreements, currency and interest rate swaps, and currency and interest rate options are carried at their fair value.

[The Group also enters into offsetting loans with its counterparty banks to exchange currencies. Such loans, while legally separate, are aggregated and accounted for as a single derivative financial instrument (currency swap) on a net basis where (i) the loans are entered into at the same time and in contemplation of one another, (ii) they have the same counterparty, (iii) they relate to the same risk and (iv) there is no apparent business purpose for structuring the transactions separately that could not also have been accomplished in a single transaction.]

All derivative instruments are carried as assets when fair value is positive, and as liabilities when fair value is negative. Changes in the fair value of derivative instruments are included in profit or loss for the year (gains less losses on derivatives). The Group does not apply hedge accounting.

Certain derivative instruments embedded in other financial instruments are treated as separate derivative instruments when their risks and characteristics are not closely related to those of the host contract.

**Income taxes.** Income taxes have been provided for in the [consolidated] financial statements in accordance with legislation enacted or substantively enacted by the end of the reporting period. The income tax charge [credit] comprises current tax and deferred tax and is recognised in profit or loss for the year, except if it is recognised in other comprehensive income or directly in equity because it relates to transactions that are also recognised, in the same or a different period, in other comprehensive income or directly in equity.

Current tax is the amount expected to be paid to, or recovered from, the taxation authorities in respect of taxable profits or losses for the current and prior periods. Taxable profits or losses are based on estimates if the [consolidated] financial statements are authorised prior to filing relevant tax returns. Taxes other than on income are recorded within administrative and other operating expenses.

### 3 Summary of Significant Accounting Policies (Continued)

Deferred income tax is provided using the balance sheet liability method for tax loss carry forwards and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. In accordance with the initial recognition exemption, deferred taxes are not recorded for temporary differences on initial recognition of an asset or a liability in a transaction other than a business combination if the transaction, when initially recorded, affects neither accounting nor taxable profit. [Deferred tax liabilities are not recorded for temporary differences on initial recognition of goodwill, and subsequently for goodwill which is not deductible for tax purposes.] Deferred tax balances are measured at tax rates enacted or substantively enacted at the end of the reporting period, which are expected to apply to the period when the temporary differences will reverse or the tax loss carry forwards will be utilised. Deferred tax assets and liabilities are netted only within the individual companies of the Group.

Deferred tax assets for deductible temporary differences and tax loss carry forwards are recorded only to the extent that it is probable that future taxable profit will be available against which the deductions can be utilised.

Deferred income tax is not recognised on post-acquisition retained earnings and other post acquisition movements in reserves of subsidiaries where the Group controls the subsidiary's dividend policy, and it is probable that the difference will not reverse through dividends or otherwise in the foreseeable future.

**Uncertain tax positions.** The Group's uncertain tax positions are reassessed by management at the end of each reporting period. Liabilities are recorded for income tax positions that are determined by management as more likely than not to result in additional taxes being levied if the positions were to be challenged by the tax authorities. The assessment is based on the interpretation of tax laws that have been enacted or substantively enacted by the end of the reporting period, and any known court or other rulings on such issues. Liabilities for penalties, interest and taxes other than on income are recognised based on management's best estimate of the expenditure required to settle the obligations at the end of the reporting period.

**Provisions for liabilities and charges.** Provisions for liabilities and charges are non-financial liabilities of uncertain timing or amount. They are accrued when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. [Include details of specific accounting policies for significant types of provisions.]

Levies and charges, such as taxes other than income tax or regulatory fees based on information related to a period before the obligation to pay arises, are recognised as liabilities when the obligating event that gives rise to pay a levy occurs, as identified by the legislation that triggers the obligation to pay the levy. If a levy is paid before the obligating event, it is recognised as a prepayment. [Note: This accounting policy applies to levies within the scope of IFRIC 21. It should be included if such levies are material, eg deposit insurance contributions.]

**Trade and other payables.** Trade payables are accrued when the counterparty has performed its obligations under the contract and are carried at amortised cost. [Include details of specific accounting policies for significant other payables.]

**Share capital.** Ordinary shares and non-redeemable preference shares with discretionary dividends are both classified as equity. Incremental costs directly attributable to the issue of new shares [or options] are shown in equity as a deduction, net of tax, from the proceeds. Any excess of the fair value of consideration received over the par value of shares issued is recorded as share premium in equity.

Preference shares which carry a mandatory coupon or are redeemable on a specific date or at the option of the shareholder are classified as financial liabilities and are presented in other borrowed funds. The dividends on these preference shares are recognised as interest expense on an amortised cost basis, using the effective interest method.

### 3 Summary of Significant Accounting Policies (Continued)

[Ordinary shares issued to a lender (who is not an owner of the entity) in order to settle a financial liability are recorded at the fair value of the shares issued when the settlement in shares was not part of the original terms and conditions of the borrowing. A gain or loss on the negotiated early extinguishment of the debt is recognised in profit or loss.]

**Treasury shares.** Where the Bank or its subsidiaries purchase the Bank's equity instruments, the consideration paid, including any directly attributable incremental external costs, net of income taxes, is deducted from equity attributable to the owners of the Bank until the equity instruments are reissued, disposed of or cancelled. Where such shares are subsequently disposed of or reissued, any consideration received is included in equity.

**Dividends.** Dividends are recorded in equity in the period in which they are declared. Any dividends declared after the end of the reporting period and before the [consolidated] financial statements are authorised for issue, are disclosed in the subsequent events note. The statutory accounting reports of the Bank are the basis for profit distribution and other appropriations. Russian legislation identifies the basis of distribution as the current year net profit.

**Income and expense recognition.** Interest income and expense are recorded for all debt instruments on an accrual basis using the effective interest method. This method defers, as part of interest income or expense, all fees paid or received between the parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Fees integral to the effective interest rate include origination fees received or paid by the entity relating to the creation or acquisition of a financial asset or issuance of a financial liability, for example fees for evaluating creditworthiness, evaluating and recording guarantees or collateral, negotiating the terms of the instrument and for processing transaction documents. Commitment fees received by the Group to originate loans at market interest rates are integral to the effective interest rate if it is probable that the Group will enter into a specific lending arrangement and does not expect to sell the resulting loan shortly after origination. The Group does not designate loan commitments as financial liabilities at fair value through profit or loss.

When loans and other debt instruments become doubtful of collection, they are written down to the present value of expected cash inflows and interest income is thereafter recorded for the unwinding of the present value discount based on the asset's effective interest rate which was used to measure the impairment loss.

All other fees, commissions and other income and expense items are generally recorded on an accrual basis by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided. Loan syndication fees are recognised as income when the syndication has been completed and the Group retains no part of the loan package for itself, or retains a part at the same effective interest rate as for the other participants.

Commissions and fees arising from negotiating, or participating in the negotiation of a transaction for a third party, such as the acquisition of loans, shares or other securities or the purchase or sale of businesses, and which are earned on execution of the underlying transaction, are recorded on its completion. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts, usually on a time-proportion basis. Asset management fees relating to investment funds are recorded rateably over the period that the service is provided. The same principle is applied for wealth management, financial planning and custody services that are continually provided over an extended period of time.

**Capitalisation of borrowing costs.** Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that [is not carried at fair value and that] necessarily takes a substantial period of time to get ready for its intended use or sale (a qualifying asset), form part of the cost of that asset, if the commencement date for capitalisation is on or after 1 January 2009. Other borrowing costs are recognised as an expense using the effective interest method. The Group capitalises borrowing costs that would have been avoided if it had not made capital expenditure on qualifying assets.

### 3 Summary of Significant Accounting Policies (Continued)

The commencement date for capitalisation is when (a) the Group incurs expenditures for the qualifying asset; (b) it incurs borrowing costs; and (c) it undertakes activities that are necessary to prepare the asset for its intended use or sale. Capitalisation ceases when all activities necessary to prepare the qualifying asset for its intended use or sale are complete.

Interest or other investment income is not deducted in arriving at the amount of borrowing costs available for capitalisation, except where the Group obtains specific borrowings for the purpose of acquiring a qualifying asset and has investment income on the temporary investment of funds obtained through such specific borrowings.

**Foreign currency translation.** The functional currency of each of the Group's consolidated entities is the currency of the primary economic environment in which the entity operates. The functional currency of the Bank and its subsidiaries, and the Group's presentation currency, is the national currency of the Russian Federation, Russian Roubles ("RR"). *[Consider including additional detail if the determination involved significant judgement. Include further details of the functional currency of Group entities, and the basis for the determination, if this is not RR.]*

Monetary assets and liabilities are translated into each entity's functional currency at the official exchange rate of the CBRF at the end of the respective reporting period. Foreign exchange gains and losses resulting from the settlement of transactions and from the translation of monetary assets and liabilities into each entity's functional currency at year-end official exchange rates of the CBRF, are recognised in profit or loss for the year (as foreign exchange translation gains less losses). Translation at year-end rates does not apply to non-monetary items that are measured at historical cost.

Non-monetary items measured at fair value in a foreign currency, including equity investments, are translated using the exchange rates at the date when the fair value was determined.

Effects of exchange rate changes on non-monetary items measured at fair value in a foreign currency are recorded as part of the fair value gain or loss.

Loans between group entities and related foreign exchange gains or losses are eliminated upon consolidation. However, where the loan is between group entities that have different functional currencies, the foreign exchange gain or loss cannot be eliminated in full and is recognized in the consolidated profit or loss, unless the loan is not expected to be settled in the foreseeable future and thus forms part of the net investment in foreign operation. In such a case, the foreign exchange gain or loss is recognized in other comprehensive income.

The results and financial position of each group entity are translated into the presentation currency as follows:

- (i) assets and liabilities for each statement of financial position presented are translated at the closing rate at the end of the respective reporting period;
- (ii) income and expenses are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions);
- (iii) components of equity are translated at the historic rate; and
- (iv) all resulting exchange differences are recognised in other comprehensive income.

When control over a foreign operation is lost, the exchange differences previously recognised in other comprehensive income are reclassified to profit or loss for the year as part of the gain or loss on disposal. On partial disposal of a subsidiary without loss of control, the related portion of accumulated currency translation differences is reclassified to non-controlling interest within equity.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

### 3 Summary of Significant Accounting Policies (Continued)

At 31 December 2017, the principal rate of exchange used for translating foreign currency balances was USD 1 = RR \_\_\_\_ (2016: USD 1 = RR \_\_\_\_). The principal average rate of exchange used for translating income and expenses was USD 1 = RR \_\_\_\_ (2016: USD 1 = RR \_\_\_\_).

*[If the Group reports/presents in a currency other than the parent company's functional currency, it must separately disclose the reasons – IAS 21.53.] [Note that the above policies do not cover hyperinflation.]*

*[Review IAS 21 as to whether it is appropriate for the Group's entities to be able to have non-Roubles as functional currency.]*

**Fiduciary assets.** Assets held by the Group in its own name, but on the account of third parties, are not reported in the consolidated statement of financial position. Commissions received from fiduciary activities are shown in fee and commission income.

**Offsetting.** Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position only when there is a legally enforceable right to offset the recognised amounts, and there is an intention to either settle on a net basis, or to realise the asset and settle the liability simultaneously. Such a right of set off (a) must not be contingent on a future event and (b) must be legally enforceable in all of the following circumstances: (i) in the normal course of business, (ii) the event of default and (iii) the event of insolvency or bankruptcy.

**Earnings per share.** Preference shares are not redeemable, and are considered to be participating shares. Earnings per share are determined by dividing the profit or loss attributable to owners of the Bank by the weighted average number of participating shares outstanding during the reporting year. *[Accounting policy is only applicable if earnings per share are presented.]*

**Staff costs and related contributions.** Wages, salaries, contributions to the Russian Federation state pension and social insurance funds, paid annual leave and sick leave, bonuses, and non-monetary benefits are accrued in the year in which the associated services are rendered by the employees of the Group. The Group has no legal or constructive obligation to make pension or similar benefit payments beyond the payments to the statutory defined contribution scheme. *[Separately disclose policies for other than statutory pension plans]*

**Segment reporting.** Segments are reported in a manner consistent with the internal reporting provided to the Group's chief operating decision maker. Segments whose revenue, result or assets are ten percent or more of all the segments are reported separately. *[Accounting policy is only applicable if segmental reporting is presented.]*

**Changes in presentation.** Where necessary, corresponding figures have been adjusted to conform to the presentation of the current year amounts.

The effect of reclassifications for presentation purposes was as follows on amounts at 31 December 2016:

<i>[In thousands of Russian Roubles]</i>	<b>[As originally presented]</b>	<b>[Reclassification]</b>	<b>[As reclassified at 31 December 2016]</b>
[Line item]			

### 3 Summary of Significant Accounting Policies (Continued)

The effect of reclassifications for presentation purposes was as follows on amounts at 1 January 2016:

<i>[In thousands of Russian Roubles]</i>	<b>[As originally presented]</b>	<b>[Reclassification]</b>	<b>[As reclassified at 1 January 2016]</b>
[Line item]			

The third statement of financial position as of 1 January 2016 is presented in these **[consolidated]** financial statements as a result of the above described changes in presentation. *[Note: Also disclose any reclassifications of financial assets from cost or amortised cost categories to fair value category and vice versa. See IFRS 7.12.]*

***Presentation of statement of financial position in order of liquidity.*** The Group does not have a clearly identifiable operating cycle and therefore does not present current and non-current assets and liabilities separately in the statement of financial position. Instead, assets and liabilities are presented in order of their liquidity. Refer to Note 41 for analysis of financial instruments by expected maturity. The following table provides information on amounts expected to be recovered or settled before and after twelve months after the reporting period for items that are not analysed in Note 41. *[Note: Refer to IAS 1.61 for the disclosure requirement.]*

<i>In thousands of Russian Roubles</i>	<b>31 December 2017</b>			<b>31 December 2016</b>		
	<b>Amounts expected to be recovered or settled</b>		<b>Total</b>	<b>Amounts expected to be recovered or settled</b>		<b>Total</b>
	<b>Within 12 months after the reporting period</b>	<b>After 12 months after the reporting period</b>		<b>Within 12 months after the reporting period</b>	<b>After 12 months after the reporting period</b>	
<b>ASSETS</b>						
Investment properties						
Investment in associates						
Current income tax prepayment						
Deferred income tax asset						
Goodwill						
Intangible assets						
Premises and equipment						
Other assets						
Non-current assets held for sale (or disposal groups)						
<b>LIABILITIES</b>						
Current income tax liability						
Deferred income tax liability						
Provisions for liabilities and charges						
Other liabilities						
Liabilities directly associated with disposal groups held for sale						

***Changes in accounting estimates.*** *[Note: Disclose the nature and amount of a change in an accounting estimate that has an effect in the current period or that is expected to have an effect in future periods. If it is impracticable to estimate the amount, disclose this fact. Refer to IAS 8 paragraphs 39 and 40.]*

***Amendments of the [consolidated] financial statements after issue.*** The [Bank's shareholder[s] and management have] the power to amend the [consolidated] financial statements after issue.

#### 4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies

The Group makes estimates and assumptions that affect the amounts recognised in the [consolidated] financial statements, and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. Judgements that have the most significant effect on the amounts recognised in the [consolidated] financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include: *[Refer to IAS 1.122 and 1.125 for disclosure requirements. The text below must be tailored and only significant estimates and judgements should be disclosed. For example, if no significant estimates and judgements specific to the entity's tax position are identified, but it is considered that there are some general tax risks applicable to all companies, no disclosures would be included in this note in relation to tax, as these general risks are described in Note 43 on contingencies.]*

**Going concern.** Management prepared these [consolidated] financial statements on a going concern basis. In making this judgement management considered the Group's financial position, current intentions, profitability of operations and access to financial resources, and analysed the impact of the recent financial crisis on future operations of the Group.] *[This paragraph should be included only if there is doubt about going concern. Describe material uncertainties relating to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern – IAS 1.25.]*

**Held-to-maturity financial assets.** Management applies judgement in assessing whether financial assets can be categorised as held-to-maturity, in particular (a) its intention and ability to hold the assets to maturity and (b) whether the assets are quoted in an active market. If the Group fails to keep these investments to maturity other than in certain specific circumstances – for example, selling an insignificant amount close to maturity – it will be required to reclassify the entire class as available-for-sale. The investments would, therefore, be measured at fair value rather than amortised cost. If the entire class of held-to-maturity investments is tainted, the carrying amount would increase [decrease] by RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand), with a corresponding entry in other comprehensive income. An active market exists if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The Group considers a market for a particular financial instrument as active if trades in the instrument occur on more than [90%] of the trading days.

**Impairment of available-for-sale equity investments.** The Group determines that available-for-sale equity investments are impaired when there has been a significant or prolonged decline in the fair value below its cost. This determination of what is significant or prolonged requires judgement. In making this judgement, the Group evaluates, among other factors, the volatility in share price. In addition, impairment may be appropriate when there is evidence of changes in technology or a deterioration in the financial health of the investee, industry and sector performance, or operational or financing cash flows. Had all the declines in fair value below cost been considered significant or prolonged, the Group would suffer an additional impairment loss of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand), being a reclassification from other comprehensive income to profit or loss for the year.

**Impairment losses on loans and advances.** The Group regularly reviews its loan portfolios to assess impairment. In determining whether an impairment loss should be recorded in profit or loss for the year, the Group makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

#### 4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (Continued)

[A [10]% increase or decrease in actual loss experience compared to the loss estimates used would result in an increase or decrease in loan impairment losses of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand), respectively. Impairment losses for individually significant loans are based on estimates of discounted future cash flows of the individual loans, taking into account repayments and realisation of any assets held as collateral against the loans. A [10]% increase or decrease in the actual loss experience compared to the estimated future discounted cash flows from individually significant loans, which could arise from differences in amounts and timing of the cash flows, would result in an increase or decrease in loan impairment losses of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand), respectively.] *[Sensitivity must be provided. Tailor the sensitivity disclosure to the Group's circumstances.]*

**Reversals of impairment provisions.** The Group reversed loan impairment provisions of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) primarily as a result of improvement in the financial condition of its borrowers. *[Disclose specific judgements made.]*

**Fair value of derivatives and certain other instruments.** Information about fair values of instruments that were valued using assumptions that are not based on observable market data is disclosed in Note 51.

**Finance leases and de-recognition of financial assets.** Management applies judgement to determine if substantially all the significant risks and rewards of ownership of financial assets and lease assets are transferred to counterparties, in particular which risks and rewards are the most significant and what constitutes substantially all risks and rewards. *[Disclose specific judgements made.]*

**Deferred income tax on post-acquisition retained earnings of subsidiaries.** Deferred income tax is provided on post-acquisition retained earnings and other post-acquisition movements in reserves of subsidiaries, except where the Group controls the subsidiary's dividend policy and it is probable that the difference will not reverse through dividends, or otherwise, in the foreseeable future. *[Describe any significant judgements involved. If it is probable that the difference will reverse, deferred tax must be provided based on the rate expected to apply, e.g. the withholding tax (for dividends), or the rate for capital gains (if the subsidiary will be disposed of).]*

**Structured Entities.** Structured entities are designed so that voting or similar rights are not the dominant factor in deciding who controls the entity. Judgement is also required to determine whether the substance of the relationship between the Group and a structured entity indicates that the structured entity is controlled by the Group.

The Group does not consolidate structured entities that it does not control. As it can sometimes be difficult to determine whether the Group does control a structured entity, management makes judgements about its exposure to the risks and rewards, as well as about its ability to make operational decisions for the structured entity in question. In many instances, elements are present that, considered in isolation, indicate control or lack of control over a structured entity, but when considered together make it difficult to reach a clear conclusion. In cases where more arguments are in place towards existence of control, the structured entity is consolidated. *[Tailor to disclose specific judgements made.]* Were the Group not to consolidate the assets, liabilities and the results of these consolidated structured entities, the net effect on the statement of financial position would be a [decrease] in net assets of RR \_\_\_\_ thousand (31 December 2016: decrease in net assets of RR \_\_\_\_ thousand) and [increase] in profit by RR \_\_\_\_ thousand (2016: [increase] of RR \_\_\_\_ thousand). Refer to Note 46 for further information about the Group's exposure to structured entities.

**Deferred income tax asset recognition.** The recognised deferred tax asset represents income taxes recoverable through future deductions from taxable profits, and is recorded in the statement of financial position. Deferred income tax assets are recorded to the extent that realisation of the related tax benefit is probable. The future taxable profits and the amount of tax benefits that are probable in the future are based on a medium term business plan prepared by management and extrapolated results thereafter. The business plan is based on management expectations that are believed to be reasonable under the circumstances. Key assumptions in the business plan are *[list key assumptions used to prepare the budget].*

#### 4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (Continued)

**[Tax legislation.]** Russian tax, currency and customs legislation is subject to varying interpretations. Refer to Note 43.]

**Initial recognition of related party transactions.** In the normal course of business the Group enters into transactions with its related parties. IAS 39 requires initial recognition of financial instruments based on their fair values. Judgement is applied in determining if transactions are priced at market or non-market interest rates, where there is no active market for such transactions. The basis for judgement is pricing for similar types of transactions with unrelated parties and effective interest rate analysis. Terms and conditions of related party balances are disclosed in Note 53.

**Goodwill.** The recoverable amount of goodwill was estimated based on a value in use calculation [fair value less costs to sell]. Refer to Note 17.

**Investments carried at cost.** Management could not reliably estimate fair value of the Group's available-for-sale investments in shares of \_\_\_\_\_ [names]. The investments are carried at a cost of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). The investee has not published recent financial information about its operations, its shares are not quoted and recent trade prices are not publicly accessible. Management estimates that fair value of these investments is between RR \_\_\_\_\_ thousand and RR \_\_\_\_\_ thousand (2016: between RR \_\_\_\_\_ thousand and RR \_\_\_\_\_ thousand) based on [explain here how the estimate was done]. The market for these assets is not liquid, but potentially interested buyers could be [describe potential target buyers] who are interested in [high risk and high yield investments] **[IFRS 7.30 requires disclosure of information about the market for the instruments.]**

In 2017, the Group sold its investments in shares of \_\_\_\_\_ [names] (2016: [names]), previously carried at a cost of RR \_\_\_\_\_ thousand (2015: RR \_\_\_\_\_ thousand) because their fair value could not be reliably determined. The Group recognised a gain of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) on the sale in profit or loss for the year.

**[Even if investments are not listed, management should make all reasonable effort to fair value them based on available information.]**

**Valuation of investment properties using income capitalisation method.** Investment property is stated at its fair value based on reports prepared by an international valuation company at the end of each reporting period. As a result of the current economic environment and market conditions as described in Note 2, the frequency of property transactions is low [in the Group's principal markets]. Nevertheless, in management's assessment there remains sufficient market activity to provide comparable prices for orderly transactions with similar properties when determining the fair value for the Group's investment properties, except for certain of the Group's [specify type] properties located in [location], with a carrying value of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand), because this information is not readily available there.

For these properties, the valuation was based principally on discounted cash flow projections based on reliable estimates of future cash flows, supported by the terms of any existing lease and other contracts and by external evidence such as current market rents for similar properties in the same location and condition, and using discount rates that reflect current market assessments of the uncertainty in the amount and timing of the cash flows.

In preparing the valuation reports on the Group's investment property, [the external appraisers] excluded distressed sales when considering comparable sales prices. Management has reviewed the appraisers' assumptions underlying discounted cash flow models used in the valuation, and confirmed that factors such as the discount rate applied have been appropriately determined considering the market conditions at the end of the reporting period. Notwithstanding the above, management considers that the valuation of its investment properties is currently subject to an increased degree of judgement and an increased likelihood that actual proceeds on a sale may differ from the carrying value.

#### 4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (Continued)

The principal assumptions underlying the estimation of the fair value are those relating to: the receipt of contractual rentals; expected future market rentals; void periods; maintenance requirements; and appropriate discount rates. These valuations are regularly compared to actual market yield data and actual transactions by the Group, and those reported by the market.

The principal assumptions made and the impact on the aggregate valuations of reasonably possible changes in these assumptions, with all other variables held constant, are as follows:

- The future rental rates were estimated depending on the actual location of the properties: for *[specify region and rates]* per square meter per annum for *[retail and office space]* respectively, and for *[specify region and rates]* per square meter per annum for *[retail and office space]* respectively. Had these rental rates been increased or decreased by 10 percent, the total carrying value of investment properties would be RR \_\_\_\_ thousand higher or RR \_\_\_\_ thousand lower, respectively.
- Vacancy loss rate was assumed to be in the range of \_\_\_\_% - \_\_\_\_% (2016: \_\_\_\_% - \_\_\_\_%) in different years of operation. Should the vacancy loss rate increase / decrease by 1 percentage point (2016: 1 percentage point), the carrying value of the investment properties would be RR \_\_\_\_ thousand lower / RR \_\_\_\_ thousand higher (2016: RR \_\_\_\_ thousand lower / RR \_\_\_\_ thousand higher).
- Bad debt losses are assumed to be *[nil]* in all years of operations (2016: *[nil]* in all years of operations). Should the bad debt losses increase to \_\_\_\_% (2016: \_\_\_\_%) of effective gross income each year, the carrying value of the investment properties would be RR \_\_\_\_ thousand lower (2016: RR \_\_\_\_ thousand lower).
- Property management fees are assumed to be \_\_\_\_% (2016: \_\_\_\_%) of effective gross income. Should the fees increase / decrease by 1 percentage point (2016: 1 percentage point), the carrying value of the investment properties would be RR \_\_\_\_ thousand lower / higher (2015: RR \_\_\_\_ thousand lower / higher).
- Repair expenses are assumed to be \_\_\_\_% (2016: \_\_\_\_%) of effective gross income. Should these expenses increase / decrease by \_\_\_\_ percentage point (2016: \_\_\_\_ percentage point), the carrying value of the investment property would be RR \_\_\_\_ thousand lower / higher (2016: RR \_\_\_\_ thousand lower / higher).
- The discount rate was assumed to be \_\_\_\_% - \_\_\_\_% (2016: \_\_\_\_% - \_\_\_\_%) for different properties. Should this discount rate increase / decrease by 1 percentage point (2016: 1 percentage point), the carrying value of the investment property would be RR \_\_\_\_ thousand lower / RR \_\_\_\_ thousand higher (2016: RR \_\_\_\_ thousand lower / higher).
- *[The capitalisation rate was assumed to be \_\_\_\_% - \_\_\_\_% (2016 \_\_\_\_% - \_\_\_\_%). Should this capitalisation rate increase / decrease by 1 percentage point (2016: 1 percentage point), the carrying value of the investment property would be RR \_\_\_\_ thousand lower / RR \_\_\_\_ thousand higher (2016: RR \_\_\_\_ thousand lower / RR \_\_\_\_ thousand higher).]*

**Valuation of own use premises.** Premises of the Group are stated at fair value based on reports prepared by an international valuation company. Due to the nature of the premises and lack of comparable market data, the fair value of the premises is estimated based on the income capitalisation method, where the value is estimated from the expected market rental income streams from similar properties and capitalisation yields. The method considers net income generated by comparable property, capitalised to determine the value for property which is subject to the valuation.

The principal assumptions underlying the estimation of the fair value are those relating to: the possible market rentals and appropriate discount rates. These valuations are regularly compared to actual market yield data and actual transactions by the Group and those reported by the market.

#### 4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (Continued)

The impact on the aggregate valuations of reasonably possible changes in these assumptions, with all other variables held constant, are as follows:

- The capitalisation rate was assumed to be \_\_\_\_% - \_\_\_\_% (2016: \_\_\_\_% - \_\_\_\_%). Should this capitalisation rate increase / decrease by 1 percentage point (2016: 1 percentage point), the carrying value of the premises would be RR \_\_\_\_ thousand lower / RR \_\_\_\_ thousand higher (2016: RR \_\_\_\_ thousand lower / RR \_\_\_\_ thousand higher).
- Possible property rental income was assumed to be RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) per annum. Should this rental income increase / decrease by 10 percent (2016: 10 percent), the carrying value of the premises would be RR \_\_\_\_ thousand higher / RR \_\_\_\_ thousand lower (2016: RR \_\_\_\_ thousand higher / RR \_\_\_\_ thousand lower).

**Functional currencies of different entities of the Group.** Different entities within the Group have different functional currencies, based on the underlying economic conditions of their operations. This determination, of what the specific underlying economic conditions are, requires judgement. In making this judgement, the Group evaluates among other factors, the location of activities, the sources of revenue, risks associated with activities and denomination of currencies of operations of different entities. Specifically, in determination of the functional currencies of [entity names], the Group based its judgement on the fact that the companies operate internationally on markets mainly influenced by the [US Dollar (not Russian Rouble)] and their major activities include provision of services to foreign investors. Moreover, the majority of their operations are denominated in [US Dollars] and also, the [US Dollar] is the currency in which their business risks and exposures are managed, and the performance of their business is measured.

**Accounting for subordinated loans from VEB.** The Russian government provided assistance to the Russian financial system by instructing the Russian State Corporation Bank Razvitiya i Vneshneekonomiceskoy Deyatelnosti ("VEB") to grant subordinated loans to selected banks. This was done through Federal Law 173-FZ of 13 October 2008 "On additional measures aimed at supporting the financial system of the Russian Federation".

The Group received a subordinated loan from VEB of RR \_\_\_\_ thousand, bearing a fixed interest rate of [\_\_\_\_%] per annum payable quarterly until maturity on [date]. The Group has an option to repay this loan at any time subject to approvals from the CBRF and VEB. In accordance with the terms of the loan agreement, the Group is required [(i) to maintain a portfolio of loans with a term of not less than six months issued to priority sectors of the economy in Russia in the amount of the subordinated loan outstanding; (ii) to obtain approval from VEB for certain significant transactions and (iii) to include VEB nominees in the Bank's management bodies.] The [first deputy CEO of VEB] was appointed to the Bank's Board of Directors.

Due to its unique terms and conditions, its subordinated nature and the absence of observable current market transactions providing evidence of a market rate for such instruments, the loan was originally recognised and is subsequently carried on the statement of financial position at amortised contractual value. If there was evidence that the market interest rate for the loan was higher than the contractual interest rates, the amortised contractual value of the loan would have been replaced by (i) the amortised value of the loan determined based on the fair value of the loan at the date of origination and (ii) the unamortised value of the government grant embedded in such a low interest loan; there would have been no impact on the profit or loss, since the increased effective interest rates would have been offset by the amortisation of the government grant.

**Accounting for change of interest rates on the subordinated loans from VEB.** In accordance with amendments to Federal Law 173-FZ approved in July 2012, since [Date] the interest rate on the above subordinated loan was reduced from [\_\_\_\_%] per annum to [\_\_\_\_%] per annum. All other terms of the loan remain unchanged.

The Group accounted for such reduction in accordance with IAS 20 "Accounting for Government Grants and Disclosure of Government Assistance". The revised carrying value of the loan at [Date] of RR \_\_\_\_ thousand, represented the future revised cash flows relating to the loan discounted at the loan's original effective interest rate. The difference of RR \_\_\_\_ thousand between the previous and revised carrying value of the loan, was recorded as government grant deferred income and is amortised through interest expense until the loan's maturity date.

#### **4 Critical Accounting Estimates, and Judgements in Applying Accounting Policies (Continued)**

The Group could have accounted for the above reduction of interest rate in accordance with IAS 39 “Financial Instruments: Recognition and Measurement” and the difference between the previous and revised carrying value of the loans would be recorded in full in the profit or loss for the year ended 31 December 2016.

***Classification of complex lease transactions.*** *[State specific judgements made.]*

***Assumptions to determine amount of provisions.*** *[State key sources of estimation uncertainty.]*

***De-recognition of financial assets.*** *[State specific judgements made.]*

*[Describe also other key assumptions or key sources of estimation uncertainty that have a significant risk of causing a material adjustment to the assets and liabilities within the next year. Refer to IAS 1R.125.]*

#### **5 Adoption of New or Revised Standards and Interpretations**

The following amended standards became effective for the Group from 1 January 2017, but did not have any material impact on the Group:

- Disclosure Initiative – Amendments to IAS 7 (issued on 29 January 2016 and effective for annual periods beginning on or after 1 January 2017). The new disclosures are included in Note 38.
- Recognition of Deferred Tax Assets for Unrealised Losses – Amendment to IAS 12 (issued on 19 January 2016 and effective for annual periods beginning on or after 1 January 2017).
- Amendments to IFRS 12 included in Annual Improvements to IFRSs 2014-2016 Cycle (issued on 8 December 2016 and effective for annual periods beginning on or after 1 January 2017).

## **6 New Accounting Pronouncements**

*[The list of the new pronouncements in the Illustrative financial statements is not subsequently updated for any new items.]*

Certain new standards and interpretations have been issued that are mandatory for the annual periods beginning on or after 1 January 2017 or later, and which the Group has not early adopted.

**IFRS 9 “Financial Instruments: Classification and Measurement” (amended in July 2014 and effective for annual periods beginning on or after 1 January 2018).** Key features of the new standard are:

- Financial assets are required to be classified into three measurement categories: those to be measured subsequently at amortised cost, those to be measured subsequently at fair value through other comprehensive income (FVOCI) and those to be measured subsequently at fair value through profit or loss (FVPL).
- Classification for debt instruments is driven by the entity's business model for managing the financial assets and whether the contractual cash flows represent solely payments of principal and interest (SPPI). If a debt instrument is held to collect, it may be carried at amortised cost if it also meets the SPPI requirement. Debt instruments that meet the SPPI requirement that are held in a portfolio where an entity both holds to collect assets' cash flows and sells assets may be classified as FVOCI. Financial assets that do not contain cash flows that are SPPI must be measured at FVPL (for example, derivatives). Embedded derivatives are no longer separated from financial assets but will be included in assessing the SPPI condition.
- Investments in equity instruments are always measured at fair value. However, management can make an irrevocable election to present changes in fair value in other comprehensive income, provided the instrument is not held for trading. If the equity instrument is held for trading, changes in fair value are presented in profit or loss.
- Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The key change is that an entity will be required to present the effects of changes in own credit risk of financial liabilities designated at fair value through profit or loss in other comprehensive income.
- IFRS 9 introduces a new model for the recognition of impairment losses – the expected credit losses (ECL) model. There is a 'three stage' approach which is based on the change in credit quality of financial assets since initial recognition. In practice, the new rules mean that entities will have to record an immediate loss equal to the 12-month ECL on initial recognition of financial assets that are not credit impaired (or lifetime ECL for trade receivables). Where there has been a significant increase in credit risk, impairment is measured using lifetime ECL rather than 12-month ECL. The model includes operational simplifications for lease and trade receivables.
- Hedge accounting requirements were amended to align accounting more closely with risk management. The standard provides entities with an accounting policy choice between applying the hedge accounting requirements of IFRS 9 and continuing to apply IAS 39 to all hedges because the standard currently does not address accounting for macro hedging.

Based on an analysis of the Group's financial assets and financial liabilities as at 31 December 2017 and on the basis of the facts and circumstances that exist at that date, the Management of the Group is expecting a significant impact on its consolidated financial statements from the adoption of the new standard on 1 January 2018.

## 6 New Accounting Pronouncements (Continued)

The following table reconciles the carrying amounts of financial assets, from their previous measurement categories in accordance with IAS 39 into their new measurement categories upon transition to IFRS 9 on 1 January 2018:

	Measurement category		Carrying value per IAS 39 (closing balance at 31 December 2017)	Effect				Carrying value per IFRS 9 (opening balance at 1 January 2018)
	IAS 39	IFRS 9		Remeasurement ECL	Other	Mandatory	Voluntary	
<i>In thousands of Russian Roubles</i>								
<b>Cash and cash equivalents</b>	L&R	AC						
<b>Mandatory cash balances with the Central Bank of Russian Federation</b>	L&R	AC						
Investments in debt securities	Trading assets	FVTPL (mandatory)						
Investments in debt securities	FVTPL	FVTPL (mandatory)						
Investments in debt securities	FVTPL	FVTPL (designated)						
Investments in debt securities	AFS	FVOCI						
Investments in debt securities	AFS	FVTPL (mandatory)						
Investments in debt securities	HTM	AC						
Investments in debt securities	HTM	FVTPL (mandatory)						
<b>Total investments in debt securities</b>								
Investments in equity securities	Trading assets	FVTPL (mandatory)						
Investments in equity securities	FVTPL	FVTPL (mandatory)						
Investments in equity securities	AFS	FVOCI						
Investments in equity securities	AFS	FVTPL (mandatory)						
<b>Total investments in equity securities</b>								
<b>Due from other banks</b>	L&R	AC						

## 6 New Accounting Pronouncements (Continued)

	Measurement category		Carrying value per IAS 39 (opening balance at 31 December 2017)	Effect				Carrying value per IFRS 9 (closing balance at 1 January 2018) IFRS 9
	IAS 39	IFRS 9		Remeasure- ment	ECL	Other	Mandatory	
<i>In thousands of Russian Roubles</i>								
Loans and advances to customers		L&R	AC					
Loans and advances to customers		L&R	FVTPL (mandatory)					
<b>Total loans and advances to customers</b>								
Repurchase receivables	FVTPL		FVTPL (designated)					
Repurchase receivables	AFS		FVOCI					
Repurchase receivables	HTM		AC					
<b>Total repurchase receivables</b>								
Other financial assets	L&R		AC					
Other financial assets	FVTPL		FVTPL (mandatory)					
<b>Total other financial assets</b>								
<b>Total financial assets</b>								

No significant changes are expected for financial liabilities, other than changes in the fair value of financial liabilities designated at FVTPL that are attributable to changes in the instrument's credit risk, which will be presented in other comprehensive income.

The new standard also introduces expanded disclosure requirements and changes in presentation. These are expected to change the nature and extent of the Group's disclosures about its financial instruments particularly in the year of the adoption of the new standard. *[Expand further the narrative text on impact of IFRS 9 (if required) depending on the nature and structure of financial instruments.]*

**IFRS 15, Revenue from Contracts with Customers (issued on 28 May 2014 and effective for the periods beginning on or after 1 January 2018).** The new standard introduces the core principle that revenue must be recognised when the goods or services are transferred to the customer, at the transaction price. Any bundled goods or services that are distinct must be separately recognised, and any discounts or rebates on the contract price must generally be allocated to the separate elements. When the consideration varies for any reason, minimum amounts must be recognised if they are not at significant risk of reversal. Costs incurred to secure contracts with customers have to be capitalised and amortised over the period when the benefits of the contract are consumed. *[The Group is currently assessing the impact of the new standard on its financial statements.]*

## 6 New Accounting Pronouncements (Continued)

**IFRS 16, Leases (issued on 13 January 2016 and effective for annual periods beginning on or after 1 January 2019).** The new standard sets out the principles for the recognition, measurement, presentation and disclosure of leases. All leases result in the lessee obtaining the right to use an asset at the start of the lease and, if lease payments are made over time, also obtaining financing. Accordingly, IFRS 16 eliminates the classification of leases as either operating leases or finance leases as is required by IAS 17 and, instead, introduces a single lessee accounting model. Lessees will be required to recognise: (a) assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value; and (b) depreciation of lease assets separately from interest on lease liabilities in the income statement. IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17. Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently. [The Group is currently assessing the impact of the new standard on its financial statements.]

**IFRS 17 "Insurance Contracts" (issued on 18 May 2017 and effective for annual periods beginning on or after 1 January 2021).** IFRS 17 replaces IFRS 4, which has given companies dispensation to carry on accounting for insurance contracts using existing practices. As a consequence, it was difficult for investors to compare and contrast the financial performance of otherwise similar insurance companies. IFRS 17 is a single principle-based standard to account for all types of insurance contracts, including reinsurance contracts that an insurer holds. The standard requires recognition and measurement of groups of insurance contracts at: (i) a risk-adjusted present value of the future cash flows (the fulfilment cash flows) that incorporates all of the available information about the fulfilment cash flows in a way that is consistent with observable market information; plus (if this value is a liability) or minus (if this value is an asset) (ii) an amount representing the unearned profit in the group of contracts (the contractual service margin). Insurers will be recognising the profit from a group of insurance contracts over the period they provide insurance coverage, and as they are released from risk. If a group of contracts is or becomes loss-making, an entity will be recognising the loss immediately. [The Group is currently assessing the impact of the new standard on its financial statements.]

**IFRIC 22 "Foreign currency transactions and advance consideration" (issued on 8 December 2016 and effective for annual periods beginning on or after 1 January 2018).** This interpretation considers how to determine the date of the transaction when applying the standard on foreign currency transactions, IAS 21. The interpretation applies where an entity either pays or receives consideration in advance for foreign currency-denominated contracts. The interpretation specifies that the date of transaction is the date on which the entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the Interpretation requires an entity to determine the date of transaction for each payment or receipt of advance consideration. [The Group is currently assessing the impact of the interpretation on its financial statements.]

**IFRIC 23 "Uncertainty over Income Tax Treatments" (issued on 7 June 2017 and effective for annual periods beginning on or after 1 January 2019).** IAS 12 specifies how to account for current and deferred tax, but not how to reflect the effects of uncertainty. The interpretation clarifies how to apply the recognition and measurement requirements in IAS 12 when there is uncertainty over income tax treatments. An entity should determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments based on which approach better predicts the resolution of the uncertainty. An entity should assume that a taxation authority will examine amounts it has a right to examine and have full knowledge of all related information when making those examinations. If an entity concludes it is not probable that the taxation authority will accept an uncertain tax treatment, the effect of uncertainty will be reflected in determining the related taxable profit or loss, tax bases, unused tax losses, unused tax credits or tax rates, by using either the most likely amount or the expected value, depending on which method the entity expects to better predict the resolution of the uncertainty. An entity will reflect the effect of a change in facts and circumstances or of new information that affects the judgments or estimates required by the interpretation as a change in accounting estimate. Examples of changes in facts and circumstances or new information that can result in the reassessment of a judgment or estimate include, but are not limited to, examinations or actions by a taxation authority, changes in rules established by a taxation authority or the expiry of a taxation authority's right to examine or re-examine a tax treatment. The absence of agreement or disagreement by a taxation authority with a tax treatment, in isolation, is unlikely to constitute a change in facts and circumstances or new information that affects the judgments and estimates required by the Interpretation. [The Group is currently assessing the impact of the interpretation on its financial statements.]

## **6 New Accounting Pronouncements (Continued)**

The following other new pronouncements are not expected to have any material impact on the Group when adopted:

- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture - Amendments to IFRS 10 and IAS 28 (issued on 11 September 2014 and effective for annual periods beginning on or after a date to be determined by the IASB).
- Amendments to IFRS 15, Revenue from Contracts with Customers (issued on 12 April 2016 and effective for annual periods beginning on or after 1 January 2018).
- Amendments to IFRS 2, Share-based Payment (issued on 20 June 2016 and effective for annual periods beginning on or after 1 January 2018).
- Amendments to IFRS 4, Insurance Contracts (issued on 12 September 2016 and effective for annual periods beginning on or after 1 January 2018).
- Transfers of Investment Property – Amendments to IAS 40 (issued on 8 December 2016 and effective for annual periods beginning on or after 1 January 2018).
- Annual Improvements to IFRSs 2014-2016 cycle – Amendments to IFRS 1 and IAS 28 (issued on 8 December 2016 and effective for annual periods beginning on or after 1 January 2018).

Unless otherwise described above, the new standards and interpretations are not expected to affect significantly the Group's [\[consolidated\]](#) financial statements.

## 7 Cash and Cash Equivalents

<i>In thousands of Russian Roubles</i>	2017	2016
Cash on hand		
Cash balances with the CBRF (other than mandatory reserve deposits)		
Mandatory cash balances with CBRF		
Correspondent accounts and overnight placements with other banks		
Placements with other banks with original maturities of less than three months		
Reverse sale and repurchase agreements with other banks with original maturities of less than three months		
<b>Total cash and cash equivalents</b>		

*[Exclude from the note any cash amounts restricted for more than three months.]*

The credit quality of cash and cash equivalents balances may be summarised [\[based on Standard and Poor's ratings\]](#) as follows at 31 December 2017:

The effect of collateral at 31 December 2016:

In thousands of Russian Roubles	Over-collateralised assets		Under-collateralised assets	
	Carrying value of the assets	Fair value of collateral	Carrying value of the assets	Fair value of collateral
Correspondent accounts and overnight placements with other banks				
Placements with other banks with original maturities of less than three months				
Reverse sale and repurchase agreements with other banks with original maturities of less than three months				

Investing and financing transactions that did not require the use of cash and cash equivalents, and were excluded from the statement of cash flows are as follows:

In thousands of Russian Roubles	2017	2016
<b>Non-cash investing activities</b>		
Acquisition of investment securities available for sale in exchange for _____ <i>[e.g. assumed liability]</i>		
Proceeds from disposal [and redemption] of investment securities available for sale in the form of _____ <i>[e.g. investment property]</i>		
Acquisition of investment securities held to maturity in exchange for _____		
Acquisition of premises and equipment in exchange for _____		
Proceeds from disposal of premises and equipment in the form of _____		
Acquisition of associates in exchange for _____		
Proceeds from disposal of associates in the form of _____		
Acquisition of investment properties in exchange for _____		
Proceeds from disposal of investment properties in the form of _____		
Acquisition of intangible assets in exchange for _____		
Proceeds from disposal of intangible assets in the form of _____		
Non-cash dividends received		
Recognition of finance lease receivables and liabilities		

### Non-cash investing activities

**7 Cash and Cash Equivalents (Continued)**

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
<b>Non-cash financing activities</b>		
Proceeds from other borrowed funds in the form of _____		
Repayment of other borrowed funds in _____ <i>[e.g. gold]</i>		
Issue of ordinary shares in exchange for _____		
Issue of preference shares in exchange for _____		
Capital contributions from shareholders other than share issues in the form of _____		
Acquisition of treasury shares in exchange for _____		
Disposal of treasury shares for _____		
Transfer of _____ as a capital distribution to the shareholders other than a dividend		

**Non-cash financing activities**

---

[Further non-cash transactions are presented in Note 54 which includes details of assets acquired and liabilities assumed in business combinations, and in Note 21 which includes details of assets and liabilities of disposed subsidiaries.] *[Include if the exchange was partly or wholly for non-cash consideration.]*

[The Group's exposure to the Cypriot economy is limited to bank deposits of RR \_\_\_\_\_ thousand (31 December 2016: RR \_\_\_\_\_ thousand) and loans to borrowers with significant operations in Cyprus of RR \_\_\_\_\_ thousand (31 December 2016: RR \_\_\_\_\_ thousand). In March 2015, the Group recognised an impairment loss of RR \_\_\_\_\_ thousand in respect of uninsured deposits in Cypriot banks.]

At 31 December 2017 the Group had \_\_\_\_\_ counterparty banks (2016: \_\_\_\_\_ banks) with aggregated cash and cash equivalent balances above RR \_\_\_\_\_ thousand. The total aggregate amount of these balances was RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) or \_\_\_\_\_% of the cash and cash equivalents (2016: \_\_\_\_\_%).

Interest rate analysis of cash and cash equivalents is disclosed in Note 41. Information on related party balances is disclosed in Note 53.

## 8 Trading Securities

<i>In thousands of Russian Roubles</i>	<b>2016</b>	<b>2015</b>
Russian government bonds		
Municipal bonds		
Corporate bonds		
Promissory notes		
 Total debt securities		
 Corporate shares		
<b>Total trading securities</b>		

*[Any securities that are subject to a repo and where the counterparty has the right to resell or repledge them should be presented in Note 13 and not here.]*

Corporate shares are shares of Russian companies.

Trading securities are carried at fair value, which also reflects any credit risk related write-downs. As trading securities are carried at their fair values based on observable market data [\[using bid prices from \[MICEX/RTS\] stock exchange\]](#), the Group does not analyse or monitor impairment indicators.

Analysis by credit quality of debt trading securities is as follows at 31 December 2017:

<i>In thousands of Russian Roubles</i>	<b>Russian government bonds</b>	<b>Municipal bonds</b>	<b>Corporate bonds</b>	<b>Pro-missory notes</b>	<b>Total</b>

<b>Total past due amounts</b>					
<b>Total debt trading securities</b>					

[The credit ratings are based on Standard & Poor's ratings where available, or Moody's or Fitch rating converted to the nearest equivalent on the Standard & Poor's rating scale.]

*[In case the securities have Moody's or S&P's credit ratings, an analysis by that rating should be disclosed, for example as indicated above. If no external ratings are available, then credit quality will need to be disclosed in some other way, e.g. using internal ratings. The requirement in IFRS 7.36 is to disclose information about the credit quality of financial assets that are neither past due nor impaired. This may be achieved by providing the Group's internal or any external credit ratings where available.]*

The debt securities are not collateralised. *[Otherwise disclose information about collateral as in Note 11 on loans and advances.]*

At 31 December 2017, included in trading securities are securities effectively pledged under sale and repurchase agreements whose fair value is RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand). In addition, at 31 December 2017 trading securities with a fair value of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) have been pledged to third parties as collateral with respect to term placements of other banks and other borrowed funds. Refer to Notes 22 [\[and 25\]](#).

Interest rate analyses of trading securities are disclosed in Note 41. Information on trading securities issued by related parties is disclosed in Note 53.

The Bank is licensed by the Federal Commission on Securities Markets for trading in securities.

**9 Other [Securities] [Financial Assets] at Fair Value Through Profit or Loss**

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
Russian government bonds		
Municipal bonds		
Corporate bonds		
Promissory notes		
 Total debt securities		
 Corporate shares		
<b>Total other [securities] [financial assets] at fair value through profit or loss</b>		

*[Any securities that are subject to a repo and where the counterparty has the right to resell or repledge them should be presented in Note 13 and not here.]*

The Group irrevocably designated the above securities, which are not part of its trading book, as at fair value through profit or loss. The securities meet the criteria for classification at fair value through profit or loss because [key management personnel assess] [the Board of Directors assesses] performance of the investments based on their fair values in accordance with a strategy documented in the [business plan]. *[The disclosure requirement is how the entity has satisfied the conditions for the designation, including a narrative description of the accounting mismatch that would otherwise arise or how designation at fair value through profit or loss is consistent with the entity's documented risk management or investment strategy. See IFRS 7.B5(a)(iii)] [Disclose the nature of the financial assets designated at fair value through profit or loss. Refer to IFRS 7.B5(a)(i)]*

At 31 December 2017, included in other securities at fair value through profit or loss are securities effectively pledged under sale and repurchase agreements whose fair value is RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand). In addition, at 31 December 2017 other securities at fair value through profit or loss with a carrying amount of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) have been pledged to third parties as collateral with respect to term placements of other banks and other borrowed funds. Refer to Notes 22 [and 25].

Promissory notes are not quoted in an active market. The amount of the change, during 2017 and cumulatively by 31 December 2017, in the fair value of the promissory notes that is attributable to changes in the credit risk was RR \_\_\_\_ thousand and RR \_\_\_\_ thousand, respectively (2016: RR \_\_\_\_ thousand and RR \_\_\_\_ thousand, respectively). These amounts were determined as the change in the fair value that is not attributable to changes in market conditions that give rise to market risk, which include changes in the benchmark interest rate (including USD LIBOR rates), commodity price, foreign exchange rate or index of prices or rates.

## 9 Other [Securities] [Financial Assets] at Fair Value Through Profit or Loss (Continued)

Securities designated at fair value through profit or loss are carried at fair value, which also reflects any credit risk related write-downs. As the securities are carried at their fair values based on observable market data, the Group does not analyse or monitor impairment indicators. Analysis by credit quality of debt securities designated at fair value through profit or loss outstanding at 31 December 2017, is as follows:

	Russian govern- ment bonds	Municipal bonds	Corporate bonds	Pro- missory notes	Total
<i>In thousands of Russian Roubles</i>					
<i>Neither past due nor impaired (at fair value)</i>

## 10 Due from Other Banks (Continued)

[The credit ratings are based on Standard & Poor's ratings where available, or Moody's rating converted to the nearest equivalent on the Standard & Poor's rating scale.]

The primary factor that the Group considers in determining whether a deposit is impaired is its overdue status. As a result, the Group presents above an ageing analysis of deposits that are individually determined to be impaired.

During 2017, a gain [loss] on initial recognition of due from other banks at rates above [below] market in the amount of RR \_\_\_ thousand (2016: RR \_\_\_ thousand) has been recorded [in profit or loss for the year].

The Group has a right to sell or repledge securities with a fair value of RR \_\_\_ thousand (2016: RR \_\_\_ thousand) received under reverse sale and repurchase agreements. *[Disclose any material terms and conditions associated with the use of the collateral.]* The financial effect of collateral is presented by disclosing collateral values separately for (i) those assets where collateral and other credit enhancements are equal to or exceed carrying value of the asset ("over-collateralised assets") and (ii) those assets where collateral and other credit enhancements are less than the carrying value of the asset ("under-collateralised assets"). The effect of collateral at 31 December 2017 :

In thousands of Russian Roubles	Over-collateralised assets		Under-collateralised Assets	
	Carrying value of the assets	Fair value of collateral	Carrying value of the assets	Fair value of collateral
Reverse sale and repurchase agreements with other banks with original maturities of less than three months				

The effect of collateral at 31 December 2016:

In thousands of Russian Roubles	Over-collateralised assets		Under-collateralised assets	
	Carrying value of the assets	Fair value of collateral	Carrying value of the assets	Fair value of collateral
Reverse sale and repurchase agreements with other banks with original maturities of less than three months				

Movements in the provision for impairment of due from other banks are as follows:

In thousands of Russian Roubles	2017		2016	
	Placements with other banks	Reverse repurchase agreements	Placements with other banks	Reverse repurchase agreements
<b>Provision for impairment at 1 January</b>				
(Recovery of)/provision for impairment during the year*				
Amounts written off during the year as uncollectible				
Transfer to non-current assets held for sale (and disposal groups)				
Disposal of subsidiaries				
[Effect of translation to presentation currency]				
<b>Provision for impairment at 31 December</b>				

**10 Due from Other Banks (Continued)**

[\*The provision for impairment during the year differs from the amount presented in profit or loss for the year due to recovery of amounts equal to RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) previously written off as uncollectible. The amount of the recovery was credited directly to the provisions line in profit or loss for the year.]

At 31 December 2017 the Group had balances with \_\_\_\_\_ counterparty banks (2016: \_\_\_\_\_ banks) with aggregated amounts above RR \_\_\_\_\_ thousand. The total aggregate amount of these deposits was RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) or \_\_\_\_\_% of the total amount due from other banks (2016: \_\_\_\_\_%).

[As an active participant in the banking markets, the Group has a significant concentration of credit risk with other financial institutions. In total, credit risk exposure to financial institutions is estimated to have amounted to RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) comprising cash and cash equivalents, deposits and other amounts due from banks, repurchase receivables and financial derivatives.] *[Disclose any other concentrations.]*

Refer to Note 51 for the estimated fair value of each class of amounts due from other banks. Interest rate analysis of due from other banks is disclosed in Note 41. Information on related party balances is disclosed in Note 53.

## 11 Loans and Advances to Customers

*[This note covers both loans originated and purchased by the Group.]*

*[\*The provision for impairment during 2017 differs from the amount presented in profit or loss for the year due to recovery of amounts equal to RR \_\_\_\_ thousand, previously written off as uncollectible. The amount of the recovery was credited directly to the provisions line in profit or loss for the year.]*

## 11 Loans and Advances to Customers (Continued)

Movements in the provision for loan impairment during 2016 are as follows *[Adjust classes as appropriate; movements must be by class]*:

	Corporate loans	Consumer loans	Individuals – entrepreneurs	Mortgage loans	Reverse repurchase agreements	State and municipal organisations	Total
<i>In thousands of Russian Roubles</i>							

### Provision for loan impairment at 1 January 2016

(Recovery of)/provision for impairment during the year\*  
 Amounts written off during the year as uncollectible  
 Transfer to non-current assets held for sale (and disposal groups)  
 Disposal of subsidiaries  
*[Effect of translation to presentation currency]*

### Provision for loan impairment at 31 December 2016

*[\*The provision for impairment during 2016 differs from the amount presented in profit or loss for the year due to RR \_\_\_\_\_ thousand, recovery of amounts previously written off as uncollectible. The amount of the recovery was credited directly to the provisions line in profit or loss for the year.]*

Economic sector risk concentrations within the customer loan portfolio are as follows:

<i>In thousands of Russian Roubles</i>	2017		2016	
	Amount	%	Amount	%
State and public organisations				
Cities and municipalities				
Manufacturing				
Real estate				
Trade				
Agricultural				
Individuals				
Other				
<i>[Expand sectors as deemed necessary]</i>				
<b>Total loans and advances to customers (before impairment)</b>				

State and public organisations exclude government owned profit orientated businesses.

At 31 December 2017 the Group had \_\_\_\_\_ borrowers (2016: \_\_\_\_\_ borrowers) with aggregated loan amounts above RR \_\_\_\_\_ thousand. The total aggregate amount of these loans was RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) or \_\_\_\_\_% of the gross loan portfolio (2016: \_\_\_\_\_%). *[Consider concentration risk but also consider disclosure based on 'large exposure' notion of Basel Accord – i.e. loans in excess of 10% of Basel capital.]*

## 11 Loans and Advances to Customers (Continued)

Information about collateral at 31 December 2017 is as follows:

	Corpo- rate loans	Consu- mer loans	Indivi- duals – entrepre- neurs	Mortga- ge loans	Reverse repur- chase agree- ments	State and muni- cipal organi- sations	Total
<i>In thousands of Russian Roubles</i>							
Unsecured loans							
Loans guaranteed by other banks							
Loans guaranteed by other parties, including credit insurance							
Loans collateralised by:							
- residential real estate							
- other real estate							
- tradable securities							
- cash deposits							
- other assets							
<b>Total loans and advances to customers</b>							

Information about collateral at 31 December 2016 is as follows:

	Corpo- rate loans	Consu- mer loans	Indivi- duals – entrepre- neurs	Mortga- ge loans	Reverse repur- chase agree- ments	State and muni- cipal organi- sations	Total
<i>In thousands of Russian Roubles</i>

<b>Less impairment provisions</b>							
<b>Total loans and advances to customers</b>							
<i>[The requirement in IFRS 7.36 includes disclosure of information about the credit quality of financial assets that are <u>neither past due nor impaired</u>. This may be achieved by providing the Group's internal or any external credit ratings where available. In the absence of such ratings, the Group should group the balances into other categories indicating credit risk, e.g. as shown above.]</i>							

## 11 Loans and Advances to Customers (Continued)

Analysis by credit quality of loans outstanding at 31 December 2016 is as follows:

<i>In thousands of Russian Roubles</i>	<b>Corpo- rate loans</b>	<b>Consu- mer loans</b>	<b>Indivi- duals – entrepre- neurs</b>	<b>Mortga- ge loans</b>	<b>Reverse repur- chase agree- ments</b>	<b>State and muni-cipal organisa- tions</b>	<b>Total</b>
<i>Neither past due nor impaired</i>							
- [Large borrowers with credit history over two years]							
- [Large new borrowers]							
- [Loans to medium size entities]							
- [Loans to small entities]							
- [Loans to individuals with credit limit over RR _____ thousand]							
- [Loans to individuals with credit limit below RR _____ thousand]							
<b>Total neither past due nor impaired</b>							
<i>Past due but not impaired</i>							
- less than 30 days overdue							
- 30 to 90 days overdue							
- 91 to 180 days overdue							
- 181 to 360 days overdue							
- over 360 days overdue							
<b>Total past due but not impaired</b>							
<i>Loans individually determined to be impaired (gross)</i>							
- less than 30 days overdue							
- 30 to 90 days overdue							
- 91 to 180 days overdue							
- 181 to 360 days overdue							
- over 360 days overdue							
<b>Total individually impaired loans (gross)</b>							
<b>Less impairment provisions</b>							
<b>Total loans and advances to customers</b>							

The Group applied the portfolio provisioning methodology prescribed by IAS 39, *Financial Instruments: Recognition and Measurement*, and created portfolio provisions for impairment losses that were incurred, but have not been specifically identified with any individual loan, by the end of the reporting period. The Group's policy is to classify each loan as 'neither past due nor impaired' until specific objective evidence of impairment of the loan is identified. The impairment provisions may exceed the total gross amount of individually impaired loans as a result of this policy and the portfolio impairment methodology.

## 11 Loans and Advances to Customers (Continued)

The primary factors that the Group considers in determining whether a loan is impaired are its overdue status and realisability of related collateral, if any. As a result, the Group presents above an ageing analysis of loans that are individually determined to be impaired.

Past due, but not impaired loans primarily include collateralised loans where the fair value of collateral covers the overdue interest and principal repayments. The amount reported as past due but not impaired is the whole balance of such loans, not only the individual instalments that are past due.

The financial effect of collateral is presented by disclosing collateral values separately for (i) those assets where collateral and other credit enhancements are equal to or exceed carrying value of the asset ("over-collateralised assets") and (ii) those assets where collateral and other credit enhancements are less than the carrying value of the asset ("under-collateralised assets"). The effect of collateral at 31 December 2017:

In thousands of Russian Roubles	Over-collateralised assets		Under-collateralised assets	
	Carrying value of the assets	Fair value of collateral	Carrying value of the assets	Fair value of collateral
Corporate loans				
Loans to individuals - consumer loans				
Loans to individuals - entrepreneurs				
Mortgage loans				
Reverse sale and repurchase agreements				
State and municipal organisations <i>[Adjust classes as appropriate]</i>				

The effect of collateral at 31 December 2016:

In thousands of Russian Roubles	Over-collateralised assets		Under-collateralised assets	
	Carrying value of the assets	Fair value of collateral	Carrying value of the assets	Fair value of collateral
Corporate loans				
Loans to individuals - consumer loans				
Loans to individuals – entrepreneurs				
Mortgage loans				
Reverse sale and repurchase agreements				
State and municipal organisations <i>[Adjust classes as appropriate]</i>				

*[The fair value of residential real estate collateral at the end of the reporting period was estimated by indexing the values determined by the Group's internal credit department staff at the time of loan inception for the average changes in residential real estate prices by city and region. The fair value of other real estate and other assets was determined by the Group's credit department by considering the condition and location of the assets accepted as collateral.] *[Tailor this disclosure based on what was actually done.]**

Refer to Note 51 for the estimated fair value of each class of loans and advances to customers. Interest rate analysis of loans and advances to customers is disclosed in Note 41. Information on related party balances is disclosed in Note 53.

**12 Investment Securities Available for Sale**

Disposals of subsidiaries		21	
Exchange differences relating to debt securities			
<b>[Effect of translation to presentation currency]</b>			
<b>Carrying amount at 31 December</b>			

*[Exchange differences (other than those on translation from the functional currency to a different presentation currency) on non-monetary items which are carried at fair value (available-for-sale equity securities) are included in gains/(losses) from changes in fair value in OCI (unless fair value hedging rules apply), whereas non-monetary items carried at cost are included at historical exchange rates.]*

*[Consider description of most significant debt securities.] [Consider description of largest equity securities in the format suggested below:]*

At 31 December, the principal equity investment securities available for sale were:

<b>Name</b>	<b>Nature of business</b>	<b>Country of registration</b>	<b>Fair value</b>
			<b>2017</b>
<b>Total</b>			

## **12 Investment Securities Available for Sale (Continued)**

Investment securities available for sale include equity securities with a carrying value of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) which are not publicly traded. Due to the nature of the local financial markets, it is not possible to obtain current market value for these investments. For these investments, fair value is estimated by reference to the discounted operating cash flows of the investee [the earnings of the investee, the investee's net asset value]. Refer to Note 51. For other investments traded in active markets, fair value is determined by reference to the [quoted bid] price at the end of the reporting period.

Management could not reliably estimate the fair value of the Group's investment in shares of \_\_\_\_ [name]. The investment is carried at a cost of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand). The investee has not published recent financial information about its operations, its shares are not quoted and recent trade prices are not publicly accessible. *[Describe (a) the market in these instruments; (b) how management plans to dispose of the investment.] [Make this disclosure here or in the critical judgements note. There is no need to duplicate the disclosure.]*

In 2017, the Group sold its investment in shares of \_\_\_\_ [name], previously carried at a cost of RR \_\_\_\_ thousand because its fair value could not be reliably determined. The Group recognised a gain of RR \_\_\_\_ thousand on the sale in profit or loss for the year.

At 31 December 2017, included in investment securities available for sale are securities pledged under sale and repurchase agreements whose fair value is RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand). The counterparty is not allowed to sell further or repledge the investments. *[Otherwise reclassify as required by IAS 39.37(a).]* In addition, at 31 December 2017 investment securities available for sale with a fair value of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) have been pledged to third parties as collateral with respect to term placements of other banks and other borrowed funds. Refer to Notes 22 and 25.

Interest rate analysis of investment securities available for sale is disclosed in Note 41. Information on related party debt investment securities available for sale is disclosed in Note 53.

### **13 Repurchase Receivables**

Repurchase receivables represents securities sold under sale and repurchase agreements which the counterparty has the right, by contract or custom, to sell or repledge. The repurchase agreements are [short-term] in nature and mature by \_\_\_\_\_ [Date].

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>

*[Adjust the table and related disclosures in this note as necessary where HTM securities are also subject to repos.]*

The primary factor that the Group considers in determining whether a debt security classified as a repurchase receivable is impaired is its overdue status. As a result, the Group presents below an ageing analysis of repurchase receivables that are individually considered to be impaired. The debt securities are not collateralised. *[Otherwise disclose information about collateral as in Note 11 on loans and advances.]*

The carrying amount of financial assets that the Group reclassified as repurchase receivables during 2017 was RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). Refer to Note 51 for the disclosure of the fair value of each class of repurchase receivables. Trading securities and available-for-sale securities reclassified to repurchase receivables continue to be carried at fair value in accordance with accounting policies for these categories of assets.

### 13 Repurchase Receivables (Continued)

Analysis by credit quality of debt securities classified as repurchase receivables outstanding at 31 December 2017 is as follows:

	Securities held for trading				Available-for-sale securities

- over 360 days overdue					
<b>Total individually impaired debt securities (gross)</b>					
<b>Other debt securities (gross)</b>					
<b>Less impairment provision</b>					
<b>Total debt securities held to maturity</b>					

[The credit ratings are based on Standard & Poor's ratings where available, or Moody's rating converted to the nearest equivalent on the Standard & Poor's rating scale.]

The primary factor that the Group considers in determining whether a debt security is impaired is its overdue status. As a result, the Group presents above an ageing analysis of debt securities that are individually determined to be impaired.

## 14 Investment Securities Held to Maturity (Continued)

The debt securities are not collateralised. *[Otherwise disclose information about collateral as in Note 11 on loans and advances.]*

Refer to Note 51 for the disclosure of the fair value of each class of investment securities held to maturity. Interest rate analysis of investment securities held to maturity is disclosed in Note 41. Information on related party investment securities held to maturity is disclosed in Note 53.

## 15 Investment in Associates

The table below summarises the movements in the carrying amount of the Group's investment in associates.

<i>In thousands of Russian Roubles</i>	2017	2016
<b>Carrying amount at 1 January</b>		
Fair value of net assets of associate acquired		
Goodwill arising on acquisition of associate		
Share of profit of associates		
Share of other equity movements of associates		
Dividends from associates		
Impairment of investments in associates		
<i>[Translation to presentation currency]</i>		
<b>Carrying amount at 31 December</b>		

The Group's interests in its principal associates were as follows:

Name	2017		2016	
	% ownership interest held (% of voting rights if different)	Place of business (country of incorporation if different)	% ownership interest held (% of voting rights if different)	Place of business (country of incorporation if different)
[Associate X]				
[Associate Y]				
<b>Total</b>				

*[Disclose here the nature of the entity's relationship with each associate (by, for example, describing the nature of the activities of the associate and whether it is strategic to the entity's activities) - IFRS 12.21]*

Summarised financial information of each material associate is as follows at 31 December 2017:

<i>In thousands of Russian Roubles</i>	Associate X	Associate Y	Other individually immaterial associates	Total associates
Current assets				
Non-current assets				
Current liabilities				
Non-current liabilities				
Revenue				
Profit or loss from continuing operations				
Profit or loss from discontinued operations				
Other comprehensive income				
Total comprehensive income				

## 15 Investment in Associates (Continued)

Summarised financial information of each material associate is as follows at 31 December 2017:

	Associate X	Associate Y	Other individually immaterial associates	Total associates
<i>In thousands of Russian Roubles</i>				
Current assets				
Non-current assets				
Current liabilities				
Non-current liabilities				
Revenue				
Profit or loss from continuing operations				
Profit or loss from discontinued operations				
Other comprehensive income				
Total comprehensive income				

The only reconciling difference between the above amounts and the carrying amount of the investments in associates is elimination of the ownership interest held by the other investors in the associates.

The fair value of the Group's investment in its associate \_\_\_\_\_, which is listed, is RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand).

[Associate X] has outstanding borrowing from a third party bank that includes a clause restricting payment of dividends to the investors without the lender's approval. *[Disclose the nature and extent of any significant restrictions on the ability of associates to transfer funds to the entity in the form of cash dividends, or to repay loans or advances made by the entity – IFRS 12.22]*

The Group's share of contingent liabilities of the associates was RR \_\_\_\_\_ thousand at 31 December 2017 (2016: RR \_\_\_\_\_ thousand). In addition, the Group's contingent liabilities related to the associates incurred jointly with the other investors in the associate amount to RR \_\_\_\_\_ thousand at 31 December 2017 (2016: RR \_\_\_\_\_ thousand).

The carrying value of the Group's investment in associate \_\_\_\_\_ is nil. The unrecognised share of loss of this associate is RR \_\_\_\_\_ thousand for 2017 (2016: RR \_\_\_\_\_ thousand). Cumulatively, the unrecognised share of losses of this associate is RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand).

## 16 Investment Properties

Transfer from owner-occupied premises	18	
Transfer to other assets		
Fair value gains/(losses)	34	
Other		
[Effect of translation to presentation currency]		
<b>Investment properties at fair value at 31 December</b>		

[The Group did not classify any properties held under operating leases as investment properties.] The investment properties are valued annually on 31 December at fair value, by an independent, professionally qualified valuer who has recent experience in valuing similar properties in the Russian Federation. The methods and significant assumptions applied in determining the fair value were [Describe methods and assumptions, e.g. capitalisation rate used.]

[Describe to what extent the determination of fair value was supported by market evidence or was more heavily based on other factors (which should be disclosed) because of the nature of the property and lack of comparable market data.]

[If an independent professionally qualified valuer has not done the valuation, disclose that fact. See IAS 40.75(e)]

Valuations of properties obtained from independent professionally qualified valuers were adjusted for the purpose of the [consolidated] financial statements to avoid double-counting of assets and liabilities that are recognised separately from the valuation in the statement of financial position. Reconciliation between the valuations obtained and the carrying amount of investment properties, is as follows:

	<b>Note</b>	<b>31 December 2017</b>	<b>31 December 2016</b>
<b>Valuations obtained</b>			
Less future construction costs and developers profit deducted from properties valued on an “as if complete” basis			
Less accrued rental income recognised as a separate asset			
Plus finance lease liabilities recognised for investment properties held under leases [See IAS 40.50]			

## Fair value in the statement of financial position

## 16 Investment Properties (Continued)

[Consider describing how the Group complies with property regulations, e.g.: Investment properties with a carrying value of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) were fully completed and in use at the end of the reporting period. The properties are required to comply with relevant health and safety and other environmental requirements, subject to ongoing self-certification and periodic inspections from independent oversight bodies, in order to continue in operation. Management considers that the Group's completed properties comply substantially with all relevant requirements, and based on the Group's historical experience, all properties are expected to continue to be approved for ongoing use.]

At 31 December 2017, investment properties carried at RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) have been pledged to third parties as collateral with respect to [other borrowed funds]. Refer to Note [25].  
 [Disclose the existence and amounts of any other restrictions on the realisability of investment property or the remittance of income and proceeds of disposal.]

Where the Group is the lessor, the future minimum lease payments receivable under non-cancellable operating leases, are as follows: [Refer to IAS 17.4 to determine whether the leases meet the definition of "non-cancellable"; if a lease as a whole is considered to be cancellable, it should be included in the disclosure only to the extent of payments during any notice period and/or penalties that apply on cancellation.]

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
Not later than 1 year		
Later than 1 year and not later than 5 years		
Later than 5 years		
<b>Total operating lease payments receivable</b>		

Total contingent payments receivable recognised as income in 2017 under the Group's non-cancellable operating leases were RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand). [Refer to IAS 17.4 to determine whether the leases meet the definition of "non-cancellable"; if a lease as a whole is considered to be cancellable, it should be included in the disclosure only to the extent of payments during any notice period and/or penalties that apply on cancellation.]

[Disclose also a general description of the leasing arrangements.]

## 17 Goodwill

Movements in goodwill arising on the acquisition of subsidiaries are:

<i>In thousands of Russian Roubles</i>	<i>Note</i>	<b>2017</b>	<b>2016</b>
Gross book value at 1 January			
Accumulated impairment losses at 1 January			
<b>Carrying amount at 1 January</b>			
Acquisition of subsidiary	54		
Transfer to non-current assets held for sale (or disposal groups)	21		
Disposal of subsidiary			
Impairment loss	35		
<b>[Effect of translation to presentation currency]</b>			
Other			
<b>Carrying amount at 31 December</b>			
Gross book value at 31 December			
Accumulated impairment losses at 31 December			
<b>Carrying amount at 31 December</b>			

### *Goodwill Impairment Test*

Goodwill is allocated to cash-generating units (CGUs, which represent the lowest level within the Group at which goodwill is monitored by management and which are not larger than a segment), as follows:

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
[CGU 1]		
[CGU 2]		
[CGU 3]		
[...]		
<b>Total carrying amount of goodwill</b>		

*[If some or all of the carrying amount of goodwill is allocated across multiple CGUs (or groups of CGUs) and the amount allocated to each CGU (or group of CGUs) is not individually significant, that fact should be disclosed, together with the aggregate carrying amount of goodwill allocated to those CGUs (or group of CGUs). Refer to IAS 36.135 for additional required disclosures if goodwill is allocated across multiple CGUs (or groups of CGUs)]*

*[If any portion of the goodwill acquired in a business combination during the reporting period has not been allocated to a CGU at the end of the reporting period (IAS 36.84), disclose the amount of the unallocated goodwill, together with the reasons why that amount remains unallocated.]*

*[The disclosures below only cover situations when the recoverable amount is value in use. If fair value less costs to sell is higher than value in use, refer to IAS 36.134(e) for required disclosures.]*

## **17 Goodwill (Continued)**

The recoverable amount of each CGU was determined based on value-in-use calculations. These calculations use cash flow projections based on financial budgets approved by management covering a five-year period. *[Note: Disclose why period of more than 5 years would be justified – IAS 36.134(d)(iii).]* Cash flows beyond the five-year period are extrapolated using the estimated growth rates stated below.

The growth rates do not exceed the long-term average growth rate for the business sector of the economy in which the CGU operates.

Assumptions used for value-in-use calculations to which the recoverable amount is most sensitive were:

	<b>2017</b>	<b>2016</b>
<b>[State assumptions, e.g. gross margin, sales growth, etc]</b>		
Growth rate beyond five years	X% p.a.	Y% p.a.
Pre-tax discount rate	X% p.a.	Y% p.a.
[.....]		

Management determined budgeted gross margin based on past performance and its market expectations. The weighted average growth rates used are consistent with the forecasts included in industry reports. *[Note: The assumptions should be disclosed separately for each CGU for which the allocated carrying amount of goodwill is significant in comparison to the entity's total goodwill. Describe Management's approach to developing each assumption, whether assumptions reflect past experience or whether they are consistent with external sources of information. Describe if and why assumptions differ from past experience or external sources of information. Refer to IAS 36.134(d)(i) and (ii)]*

The discount rates used are pre-tax, and reflect specific risks relating to the relevant CGUs. If the revised estimated pre-tax discount rate applied to the discounted cash flows of \_\_\_\_\_ CGU had been \_\_\_\_\_ % higher than management's estimates, the Group would need to reduce the carrying value of goodwill by RR \_\_\_\_\_ thousand, and premises and equipment by RR \_\_\_\_\_ thousand. Had this impairment been recognised, the Group would not be able to reverse any impairment losses that arose on goodwill in subsequent periods, even if circumstances improve. The recoverable amount of \_\_\_\_\_ CGU exceeds its carrying amount by RR \_\_\_\_\_ thousand. The CGUs' carrying amount would be equal to value in use at a discount rate of \_\_\_\_\_ % p.a. *[Note: This disclosure must be made if a reasonably possible change in a key assumption would cause the CGU to be impaired. Similarly describe sensitivity to all other key assumptions for each major CGU or groups of CGUs; include the same disclosure for 2016, if relevant!]*

The impairment charge arose in \_\_\_\_\_ CGU. *[Explain circumstances of the impairment, e.g. management decision to reduce the manufacturing output allocated to the operations; include the same disclosure for 2016, if relevant.] [Refer to IAS 36 for further disclosures if the Group has intangibles with indefinite life.]*

**18 Premises, Equipment and Intangible Assets**

	Note	Premises	Office and computer equipment	Construction in progress	Total premises and equipment	Computer software licences	Internally developed software	Total

## 18 Premises, Equipment and Intangible Assets (Continued)

*[Note: Adjust categories in the above table, as appropriate.] [IFRS 3 requires separate recognition of acquired intangibles. If intangible assets are of any size, a separate note is required for intangibles.]*

*[Movements in significant amounts of internally developed intangibles, e.g. computer software, should be shown separately from acquired intangibles, e.g. acquired software licences.]*

*[Any purchase of equipment or furniture should be recorded in respective categories and not first go through construction in progress. Any impairment charge should be separately identified and described per IAS 36. Refer to IAS 36 for additional guidance.]*

During 2017, the Group capitalised borrowing costs of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) relating to the construction of own premises. The capitalisation rate was \_\_\_\_\_ % p.a.

Construction in progress consists **[mainly]** of construction and refurbishment of branch premises **[and equipment]**. Upon completion, assets are transferred to premises and equipment. **[Additions to construction in progress include capitalised borrowing costs of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). The capitalisation rate was \_\_\_\_\_ % (2016: \_\_\_\_\_ %).]**

Included in office and computer equipment are assets held under finance leases with a carrying value of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). Refer to Note 25. **[This disclosure should be made for each class of assets.]**

Premises have been revalued at fair value at \_\_\_\_\_ 2017. The valuation was carried out by an independent firm of valuers, \_\_\_\_\_, who hold a recognised and relevant professional qualification and who have recent experience in the valuation of assets in similar locations and in a similar category. The basis used for the appraisal was **[replacement cost, market value, discounted cash flow, etc.]** Fair values were estimated using appropriate valuation techniques and using the following assumptions: **[State here assumptions. If valuation is based on observable market prices in an active market, state that fact.]** **[Note that replacement cost and discounted cash flow methods may be used only if there is no market-based evidence of fair value because of the specialised nature of the item of property, plant and equipment and the item is rarely sold.]**

At 31 December 2017, the carrying amount of premises would have been RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) had the assets been carried at cost less depreciation. The amount reconciles to the carrying value of the premises as follows:

<i>In thousands of Russian Roubles</i>	<b>31 December 2017</b>	<b>31 December 2016</b>
Premises at revalued amount in the statement of financial position		
Revaluation reserve presented in equity, net of tax		
<b>[Difference between accumulated depreciation based on cost and based on revalued amount not yet transferred to retained earnings]</b>		
Deferred tax on revaluation (Note 36)		

### **Premises at cost less accumulated depreciation**

At 31 December 2017, premises **[and equipment]** carried at RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) have been pledged to third parties as collateral with respect to **[other borrowed funds]**. Refer to Note **[25]**. **[Disclose amount of intangible assets whose title is restricted, if any.]**

**[Provide the description, carrying amount and remaining amortisation period of any individual intangible asset that is material to the financial statements as a whole.]** **[Impairment losses were recognised as a result of the impairment test described in Note 17.]** **[If impairment is for individual assets or CGUs not including goodwill, refer to IAS 36 for disclosure requirements.]**

**19 Other Financial Assets**

<i>In thousands of Russian Roubles</i>	<i>Note</i>	<b>2017</b>	<b>2016</b>
Trade receivables			
Finance lease receivables	<i>[consider disclosing separately on the face of the balance sheet if significant]</i>		
Credit and debit cards receivables			
Settlements on conversion operations			
Foreign exchange forward contracts		50	
Precious metals forward contracts		50	
Other financial derivatives		50	
Restricted cash	<i>[Alternatively, report it within 'Due from other banks']</i>		
[Deferred day 1 losses on derivatives]		[51]	
Other			
[ <i>Expand as appropriate</i> ]			
Less: Provision for impairment			

**Total other financial assets**

Restricted cash represents balances on correspondent accounts with foreign banks placed by the Group on behalf of its customers. The Group does not have the right to use these funds for the purposes of funding its own activities. The Group has received restricted deposits from these customers in the same amounts which are recorded in customer accounts.

Movements in the provision for impairment of other financial assets during 2017 are as follows *[Adjust classes as appropriate; movements must be by class]*:

<i>In thousands of Russian Roubles</i>	<b>Trade receivables</b>	<b>Finance lease receivables</b>	<b>Credit and debit cards receivables</b>	<b>Conversion operations</b>	<b>Restricted cash</b>	<b>Other</b>	<b>Total</b>
--	--------------------------	----------------------------------	---	------------------------------	------------------------	--------------	--------------

**Provision for impairment at**

**1 January 2017**

(Recovery of)/provision for impairment during the year\*  
Amounts written off during the year as uncollectible  
Transfer to non-current assets held for sale (and disposal groups) (Note 21)  
Disposal of subsidiaries  
[Effect of translation to presentation currency]

**Provision for impairment at**

**31 December 2017**

[\*The provision for impairment during 2017 differs from the amount presented in profit or loss for the year due to recovery of amounts equal to RR \_\_\_\_\_ thousand, previously written off as uncollectible. The amount of the recovery was credited directly to the provisions line in profit or loss for the year.]

**19 Other Financial Assets (Continued)**

Movements in the provision for impairment of other financial assets during 2016 are as follows *[Adjust classes as appropriate; movements must be by class]*:

	Trade receivables	Finance lease receivables	Credit and debit cards receivables	Conversion operations	Restricted cash	Other	Total
<i>In thousands of Russian Roubles</i>							

**Provision for impairment at  
1 January 2016**

(Recovery of)/provision for impairment during the year\*  
 Amounts written off during the year as uncollectible  
 Transfer to non-current assets held for sale (and disposal groups) (Note 21)  
 Disposal of subsidiaries  
 [Effect of translation to presentation currency]

**Provision for impairment at  
31 December 2016**

[\*The provision for impairment during 2016 differs from the amount presented in profit or loss for the year due to recovery of amounts equal to RR \_\_\_\_\_ thousand, previously written off as uncollectible. The amount of the recovery was credited directly to the provisions line in profit or loss for the year.]

## 19 Other Financial Assets (Continued)

Analysis by credit quality of other financial assets outstanding at 31 December 2017 is as follows:

	Trade receivables	Finance lease receivables	Credit and debit cards	Conver- sion opera- tions	Restric- ted cash	Deriva- tives	Other	Total
<i>In thousands of Russian Roubles</i>								
<i>Neither past due nor impaired</i>								
<ul style="list-style-type: none"> <li>- [Collected or settled after the end of the reporting period]</li> <li>- [Amounts that became past due after the end of the reporting period]</li> <li>- [Not due at the date of authorisation of the [consolidated] financial statements for issue]</li> </ul>								
<b>Total neither past due nor impaired</b>								
<i>Past due but not impaired</i>								
<ul style="list-style-type: none"> <li>- less than 30 days overdue</li> <li>- 30 to 90 days overdue</li> <li>- 91 to 180 days overdue</li> <li>- 181 to 360 days overdue</li> <li>- over 360 days overdue</li> </ul>								
<b>Total past due but not impaired</b>								
<i>Receivables individually determined to be impaired (gross)</i>								
<ul style="list-style-type: none"> <li>- less than 30 days overdue</li> <li>- 30 to 90 days overdue</li> <li>- 91 to 180 days overdue</li> <li>- 181 to 360 days overdue</li> <li>- over 360 days overdue</li> </ul>								
<b>Total individually impaired (gross)</b>								
<b>Less impairment provision</b>								
<b>Total other financial receivables</b>								

*[The requirement in IFRS 7.36 is to disclose information about the credit quality of financial assets that are neither past due nor impaired. This may be achieved by providing the Group's internal or any external credit ratings where available. In the absence of such ratings, the Group should group the balances into other categories indicating credit risk, e.g. as shown above.]*

**19 Other Financial Assets (Continued)**

Analysis by credit quality of other financial assets outstanding at 31 December 2016 is as follows:

	Trade receivables	Finance lease receivables	Credit and debit cards	Conver- sion opera- tions	Restric- ted cash	Deriva- tives	Other	Total
<i>In thousands of Russian Roubles</i>								
<i>Neither past due nor impaired</i>								
<p>- [Collected or settled after the end of the reporting period]</p> <p>- [Amounts that became past due after the end of the reporting period]</p> <p>- [Not due at the date of authorisation of the [consolidated] financial statements for issue]</p>								
<b>Total neither past due nor impaired</b>								
<i>Past due but not impaired</i>								
<p>- less than 30 days overdue</p> <p>- 30 to 90 days overdue</p> <p>- 91 to 180 days overdue</p> <p>- 181 to 360 days overdue</p> <p>- over 360 days overdue</p>								
<b>Total past due but not impaired</b>								
<i>Receivables individually determined to be impaired (gross)</i>								
<p>- less than 30 days overdue</p> <p>- 30 to 90 days overdue</p> <p>- 91 to 180 days overdue</p> <p>- 181 to 360 days overdue</p> <p>- over 360 days overdue</p>								
<b>Total individually impaired (gross)</b>								
<b>Less impairment provision</b>								
<b>Total other financial receivables</b>								

## **19 Other Financial Assets (Continued)**

The primary factors that the Group considers in determining whether a receivable is impaired are its overdue status and realisability of related collateral, if any. As a result, the Group presents above an ageing analysis of receivables that are individually determined to be impaired. The rights to the leased assets revert to the Group in the event of default by the lessee.

Finance lease receivables of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) and RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) relate to leases of equipment and real estate, respectively. *[The requirement is to describe nature of collateral.]* Other receivables are not collateralised. *[Otherwise disclose information about collateral as in Note 11 on loans and advances also for these other financial assets.]*

Information on related party balances is disclosed in Note 53.

Finance lease payments receivable (gross investment in the leases) and their present values are as follows:

<i>In thousands of Russian Roubles</i>	<b>Due within 1 year</b>	<b>Due between 1 and 5 years</b>	<b>Due after 5 years</b>	<b>Total</b>
<b>Finance lease payments receivable at 31 December 2017</b>				
Unearned finance income				
Impairment loss provision				
<b>Present value of lease payments receivable at 31 December 2017</b>				
<b>Finance lease payments receivable at 31 December 2016</b>				
Unearned finance income				
Impairment loss provision				
<b>Present value of lease payments receivable at 31 December 2016</b>				

*[Include a general description of the leasing arrangements.]*

The carrying amount of the finance lease receivables includes RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) of unguaranteed residual values accruing to the benefit of the Group.

The Group owns **equipment** of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) obtained by terminating finance leases of counterparties which were in breach of their contractual obligations, primarily as a result of overdue lease payments. Refer to Note 20. *[See IFRS 7.38. IFRS 7.BC56 states that the purpose of the disclosure is to indicate the amount recognised in the balance sheet for such assets.]*

## 19 Other Financial Assets (Continued)

The financial effect of [equipment] held as collateral is presented by disclosing collateral values separately for (i) those receivables where collateral and other credit enhancements are equal to or exceed carrying value of the receivable ("over-collateralised assets") and (ii) those receivables where collateral and other credit enhancements are less than the carrying value of the receivable ("under-collateralised assets"). The effect of collateral at 31 December 2017:

<i>In thousands of Russian Roubles</i>	Over-collateralised assets		Under-collateralised assets	
	Carrying value of the assets	Fair value of collateral	Carrying value of the assets	Fair value of collateral
Finance lease receivables				
Other receivables				

The effect of collateral at 31 December 2016:

<i>In thousands of Russian Roubles</i>	Over-collateralised assets		Under-collateralised assets	
	Carrying value of the assets	Fair value of collateral	Carrying value of the assets	Fair value of collateral
Finance lease receivables				
Other receivables				

Refer to Note 51 for the disclosure of the fair value of each class of other financial assets. Information on related party balances is disclosed in Note 53.

## 20 Other Assets

<i>In thousands of Russian Roubles</i>	<i>Note</i>	<i>2017</i>	<i>2016</i>
Prepayments for construction in progress			
Prepayments for services			
Repossessed collateral			
Precious metals			
Other			
<b>Total other assets</b>			

[Repossessed collateral represents real estate assets acquired by the Group in settlement of overdue loans. The Group expects to dispose of the assets in the foreseeable future. *[Depending on materiality, disclose in more details the policies for disposing of such assets or for using them in the Group's operations. See IFRS 7.38.]* The assets do not meet the definition of non-current assets held for sale, and are classified as inventories in accordance with IAS 2 "Inventories". The assets were initially recognised at fair value when acquired.]

*[Depending on materiality, disclose more details in respect of prepayments, e.g. a table showing opening and closing balances and movements due to additions, amounts derecognised, etc.]*

All of the above assets are expected to be recovered more than twelve months after the year-end, except for prepayments for services of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) and precious metals of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). Information on related party balances is disclosed in Note 53.

## 21 Non-Current Assets Classified as Held for Sale (or Disposal Groups)

Major classes of non-current assets classified as held for sale (or disposal groups) are as follows:

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
<i>Assets of a disposal group held for sale:</i>		
Cash and cash equivalents		
Trading securities		
Due from other banks		
Loans and advances to customers		
Investment properties		
Investment in associates		
Current income tax prepayment		
Deferred income tax asset		
Goodwill		
Intangible assets		
Premises and equipment <i>[expand as appropriate]</i>		
<i>Non-current assets held for sale:</i>		
Premises and equipment <i>[expand as appropriate]</i>		
<b>Total non-current assets (or disposal groups) held for sale</b>		

Major classes of liabilities directly associated with disposal groups held for sale are as follows:

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
Due to other banks		
Customer accounts		
Debt securities in issue <i>[Promissory notes issued]</i>		
Other borrowed funds		
Current income tax liability		
Deferred income tax liability		
Provisions for liabilities and charges		
Other liabilities <i>[expand as appropriate]</i>		
<b>Total liabilities directly associated with disposal groups held for sale</b>		

*[Disclosure of the major classes of assets and liabilities is not required only if the disposal group is a newly acquired subsidiary that meets the criteria to be classified as held for sale on acquisition. Do not reclassify or re-present amounts presented for non-current assets or for the assets and liabilities of disposal groups classified as held for sale in the balance sheet for 2016 to reflect the classification in the balance sheet at 31 December 2017.]*

Management approved a plan to sell \_\_\_\_ assets on \_\_\_\_ due to \_\_\_\_\_. The Group is actively marketing these assets and expects the sale to complete by \_\_\_\_\_. *[Describe facts and circumstances, expected manner and timing of that disposal.]* *[Refer to Note 35 for loss on write-down to fair value less costs to sell of non-current assets (or disposal groups) held for sale.]*

*[If applicable, disclose, in the period of the decision to change the plan to sell the non-current asset (or disposal group), a description of the facts and circumstances leading to the decision and the effect of the decision on the results of operations for the period and any prior periods presented.]*

*[If material, make IFRS 7 and IFRS 13 disclosures about measurement of financial assets and liabilities that are not otherwise included in Note 41, Financial Risk Management or Note 51, Fair Value of Financial Instruments. This includes for example analysis of credit quality of financial assets and information about fair value measurement. Refer to IFRS 5.5B.]*

## 21 Non-Current Assets Classified as Held for Sale (or Disposal Groups) (Continued)

On \_\_\_\_ 2017, the Group disposed of \_\_\_\_% of the share capital of \_\_\_\_\_. The subsidiary was previously classified as a disposal group and its assets and liabilities were accordingly reclassified in the statement of financial position. The details of the disposed assets and liabilities and disposal consideration are as follows:

<i>In thousands of Russian Roubles</i>	<b>Note</b>	<b>[Date of disposal]</b>
Goodwill	17	
Cash and cash equivalents		
Loans and advances to customers		
Available for sale financial assets		
Other assets		
Customer accounts		
Other liabilities		
<i>[expand as appropriate]</i>		

### Net assets of subsidiary, including attributed goodwill

Less: non-controlling interest

### Carrying amount of disposed net assets

### Total disposal consideration

Less: fair value of receivable arising on disposal

19

Less: cash and cash equivalents in disposed subsidiary

### Cash inflow on disposal

The gain **[loss]** on disposal of the subsidiary comprises:

<i>In thousands of Russian Roubles</i>	<b>Note</b>	<b>Gain on disposal of subsidiary</b>
Consideration for disposal of the subsidiary		
Carrying amount of disposed net assets, net of non-controlling interest		
Cumulative currency translation reserve on foreign operation recycled from other comprehensive income to profit or loss		
Revaluation reserve for available-for-sale financial assets recycled from other comprehensive income to profit or loss upon disposal		

### Gain **[loss]** on disposal of subsidiary

The portion of the gain or loss on disposal of the subsidiary attributable to measuring the investment retained in the former subsidiary at fair value at the date when control was lost amounts to RR \_\_\_\_ thousand.

*[Provide also the same information about disposals for the comparative period, 2016.]*

*[If the subsidiary is significant or was acquired with a view to resale, IFRS 5 discontinued operations disclosures may apply – these disclosures are not covered in this pro forma.]*

## 22 Due to Other Banks

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
Correspondent accounts and overnight placements of other banks		
Short-term placements of other banks		
Sale and repurchase agreements with other banks		
Liability to return collateral sold or repledged		
Overdue term placements of other banks		
<b>Total due to other banks</b>		

During 2017, a gain [loss] on initial recognition of balances due to other banks at rates below [above] market in the amount of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) has been recorded in profit or loss for the year. *[Explain commercial reason for the gain/loss and consider whether the gain/loss should be recognised as a capital transaction in equity if it arises from transactions with parties under common control.]*

At 31 December 2017, included in amounts due to other banks are liabilities of RR \_\_\_\_ thousand (2015: RR \_\_\_\_ thousand) from sale and repurchase agreements. Refer to Notes 8, 9, 12, 13 and 14.

The Group accepted [securities] as collateral that it was allowed to sell or repledge (Notes 10 and 11). The Group sold [or repledged] such collateral and recognised the cash proceeds as a liability carried at fair value of RR \_\_\_\_ thousand at the end of the reporting period (2016: RR \_\_\_\_ thousand).

*[The Group should disclose the aggregate amount of secured liabilities and the nature and carrying amount of the assets pledged as security. If this is very detailed, consider a separate note.]*

Refer to Note 51 for the disclosure of the fair value of each class of amounts due to other banks. Interest rate analysis of due to other banks is disclosed in Note 22. Information on related party balances is disclosed in Note 53.

*[Disclose any concentrations, etc.]*

## 23 Customer Accounts

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
<b>State and public organisations</b>		
- Current/settlement accounts		
- Term deposits		
<b>Other legal entities</b>		
- Current/settlement accounts		
- Term deposits		
<b>Individuals</b>		
- Current/demand accounts		
- Term deposits		
<b>Total customer accounts</b>		

### 23 Customer Accounts (Continued)

State and public organisations exclude government owned profit orientated businesses. During 2017, a gain [loss] on initial recognition of term deposits at rates below [above] market in the amount of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) has been recorded in profit or loss for the year [statement of changes in equity because it effectively represents a capital contribution from [distribution to] the Group's owners].

Economic sector concentrations within customer accounts are as follows:

In thousands of Russian Roubles	2017		2016	
	Amount	%	Amount	%
State and public organisations				
Cities and municipalities				
Manufacturing				
Real estate				
Trade				
Agriculture				
Individuals				
Other				
<i>[Expand as necessary]</i>				
<b>Total customer accounts</b>				

At 31 December 2017, the Group had \_\_\_\_ customers (2016: \_\_\_\_ customers) with balances above RR \_\_\_\_ thousand. The aggregate balance of these customers was RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) or \_\_\_\_% (2016: \_\_\_\_%) of total customer accounts.

At 31 December 2017, included in customer accounts are deposits of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) held as collateral for irrevocable commitments under import letters of credit. Refer to Note 43.

*[Significant material aspects of customer accounts should be discussed, i.e. special concentrations, loan/deposit schemes, etc.]*

*[The Group should disclose the aggregate amount of secured liabilities and the nature and carrying amount of the assets pledged as security. If this is very detailed, consider a separate note.]*

Refer to Note 51 for the disclosure of the fair value of each class of customer accounts. Interest rate analysis of customer accounts is disclosed in Note 41. Information on related party balances is disclosed in Note 53.

### 24 Debt Securities in Issue [Promissory Notes Issued]

In thousands of Russian Roubles	2017	2016
Promissory notes		
Eurobonds <i>[Specify each issue and if material, disclose eurobonds separately on the face of the balance sheet]</i>		
Bonds issued on domestic market		
Deposit certificates		
Debentures		
<b>Total debt securities in issue [Promissory notes issued]</b>		

## 24 Debt Securities in Issue [Promissory Notes Issued] (Continued)

*[The Group should disclose the aggregate amount of secured liabilities and the nature and carrying amount of the assets pledged as security. If this is very detailed, consider a separate note.]* At 31 December 2017, the Group has debt securities in issue of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) in US Dollars denominated [Eurobonds]. These bonds mature on \_\_\_\_\_, have a coupon rate of \_\_\_\_\_% (2016: \_\_\_\_\_%) and a yield to maturity of \_\_\_\_\_% (2016: \_\_\_\_\_%) based on market quotes at the reporting date [and an effective interest rate of \_\_\_\_\_% (2016: \_\_\_\_\_%) based on their issue price, net of transaction costs, at the date of origination.]

Refer to Note 51 for the disclosure of the fair value of each class of debt securities in issue. Interest rate analyses of debt securities in issue [promissory notes issued] are disclosed in Note 41. Information on debt securities in issue [promissory notes issued] held by related parties is disclosed in Note 53.

At 31 December 2017, the Group had debt securities in issue held by \_\_\_\_\_ counterparties (2016: \_\_\_\_\_ counterparties) with balances above RR \_\_\_\_\_ thousand. The aggregate amount of these balances was RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) or \_\_\_\_\_% (2016: \_\_\_\_\_%) of total debt securities in issue. *[If in default, describe the situation, penalties, carrying amount of the securities, whether the breach was remedied or the terms of the loans payable renegotiated before the date the financial statements were authorised for issue, etc. Refer to IFRS 7.18.]*

## 25 Other Borrowed Funds

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
Syndicated loan maturing on _____ <i>[If the creditors are banks, include the loan within Note 22 - 'Due to Other Banks']</i>		
Term borrowings from companies/government agencies		
Liability to return collateral sold or repledged		
Borrowings through securitisation transaction (Note 47)		
Finance lease liabilities		
<b>Total other borrowed funds</b>		

*[Describe the terms of significant other borrowed funds: interest rate, collateral pledged, maturity date, covenants.]*

The Group accepted [securities] as collateral that it was allowed to sell or repledge (Notes 10 and 11). The Group sold [or repledged] such collateral and recognised the cash proceeds as a liability carried at a fair value of RR \_\_\_\_\_ thousand at the end of the reporting period (2016: RR \_\_\_\_\_ thousand). *[The Group should disclose the aggregate amount of secured liabilities and the nature and carrying amount of the assets pledged as security. If this is very detailed, consider a separate note.]*

*[If in default, describe the situation, penalties, carrying amount of the loan, whether the breach was remedied or the terms of the loans payable renegotiated before the date the financial statements were authorised for issue, etc. Refer to IFRS 7.18]*

Minimum lease payments under finance leases and their present values are as follows:

<i>In thousands of Russian Roubles</i>	<b>Due within 1 year</b>	<b>Due between 1 and 5 years</b>	<b>Due after 5 years</b>	<b>Total</b>
<b>Minimum lease payments at 31 December 2017</b>				
Less future finance charges				
<b>Present value of minimum lease payments at 31 December 2017</b>				

**25 Other Borrowed Funds (Continued)**

<i>In thousands of Russian Roubles</i>	Due within 1 year	Due between 1 and 5 years	Due after 5 years	Total
<b>Minimum lease payments at 31 December 2016</b>				
Less future finance charges				
<b>Present value of minimum lease payments at 31 December 2016</b>				

Leased assets with the carrying amount disclosed in Note 18 are effectively pledged for finance lease liabilities, as the rights to the leased asset revert to the lessor in the event of default.

*[Where applicable, disclose also the amount of contingent rents recognised in profit or loss; the total of future minimum sublease payments expected to be received under non-cancellable subleases at the end of the reporting period (refer to IAS 17.4 to determine whether the subleases meet the definition of “non-cancellable”; if a sublease as a whole is considered to be cancellable, it should be included in the disclosure only to the extent of payments during any notice period and/or penalties that apply on cancellation); and a general description of the significant leasing arrangements, including (i) the basis on which contingent rent payments are determined; (ii) the existence and terms of renewal or purchase options and escalation clauses; and (iii) restrictions imposed by lease arrangements, such as those concerning dividends, additional debt and further leasing.]*

Refer to Note 51 for disclosure of the fair value of each class of other borrowed funds. Interest rate analysis of other borrowed funds is disclosed in Note 41. Information on related party balances is disclosed in Note 53.

**26 Provisions for Liabilities and Charges**

Movements in provisions for liabilities and charges are as follows:

<i>In thousands of Russian Roubles</i>	Note	Tax risks	Other	Total
<b>Carrying amount at 1 January 2017</b>				
Additions charged to profit or loss	35			
Additions through business combinations	54			
Utilisation of provision				
Unwinding of the present value discount and effect of changes in discount rates				
Unused amounts reversed	35			
<b>[Effect of translation to presentation currency]</b>				
Other				
<b>Carrying amount at 31 December 2017</b>				

*[Comparatives are not required for movements in provisions. Adjust categories as appropriate.]*

## 26 Provisions for Liabilities and Charges (Continued)

**Provision for uncertain [value added] tax positions and related penalties and interest.** The Group has recorded provisions of RR \_\_\_\_ thousand in respect of uncertain [value added] taxes and the related penalties and interest. [Insert explanation of the specific tax matters; separate disclosures for taxes or situations that are different in nature]. The balance at 31 December 2017 is expected to be either fully utilised or released when the inspection rights of the tax authorities with respect to the relevant tax returns expire, as follows: RR \_\_\_\_ thousand by the end of 2018, RR \_\_\_\_ thousand by the end of 2019 and RR \_\_\_\_ thousand by the end of 2020. [Disclose movements in provisions by class.] [Provide additional disclosure as to the nature of the exposure as appropriate]

**Other provisions:** Other provisions include a provision for certain legal claims brought against the Group by \_\_\_\_ relating to \_\_\_\_\_. The balance at 31 December 2017 is expected to be utilised by the end of 20\_\_\_. In management's opinion, after taking appropriate legal advice, the outcome of these legal claims will not give rise to any significant loss beyond the accrued amounts. Refer to Note 43.

[For each class of provisions provide a brief description of the nature of the obligation and of the expected timing of any resulting outflows; an indication of the uncertainties about the amount or timing of those outflows (where necessary to provide adequate information, disclose the major assumptions made concerning future events, as addressed in IAS 37.48); and the amount of any expected reimbursement, stating the amount of any asset that has been recognised for that expected reimbursement.]

Information on related party balances is disclosed in Note 53.

## 27 Other Financial Liabilities

Other financial liabilities comprise the following:

<i>In thousands of Russian Roubles</i>	<b>Note</b>	<b>2017</b>	<b>2016</b>
Trade payables			
Dividends payable	37		
Debit or credit card payables			
Settlements on conversion operations			
Foreign exchange forward contracts	50		
Other derivative financial instruments	50		
Precious metal forwards	50		
Provision for credit related commitments			
Other accrued liabilities			
<i>[Expand as necessary]</i>			
<b>Total other financial liabilities</b>			

Provision for credit related commitments represents specific provisions created for losses incurred on financial guarantees and commitments to extend credit to borrowers whose financial conditions deteriorated.

Refer to Note 51 for disclosure of the fair value of each class of other financial liabilities.

## 28 Other Liabilities

Other liabilities comprise the following:

<i>In thousands of Russian Roubles</i>	<i>Note</i>	<b>2017</b>	<b>2016</b>
Taxes payable other than on income			
Accrued employee benefit costs			
Deferred consideration for acquisitions	54		
Deferred income <i>[specify its nature]</i>			
Other			
<i>[Expand as necessary]</i>			
<b>Total other liabilities</b>			

## 29 Subordinated Debt

Subordinated debt of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) carries a **[fixed] [variable]** interest rate of \_\_\_\_\_ % p.a. and matures on \_\_\_\_\_. The debt ranks after all other creditors in the case of liquidation.

Refer to Note 51 for the disclosure of the fair value of subordinated debt. Interest rate analysis of subordinated debt is disclosed in Note 41. Information on related party balances is disclosed in Note 53.

## 30 Share Capital

*[For limited liability companies (OOOs)/partnerships refer to separate guidance to determine whether these amounts should be classified as debt. Adjust categories in the table below as appropriate.]*

<i>In thousands of Russian Roubles except for number of shares</i>	<i>Number of outstanding shares [in thousands]</i>	Ordinary shares	Share premium	Preference shares	Treasury shares	Total
<b>At 1 January 2016</b>						
New shares issued						
Treasury shares purchased						
Treasury shares sold						
<b>[Translation to presentation currency]</b>						
<b>At 31 December 2016</b>						
New shares issued						
Treasury shares purchased

<b>At 31 December 2017</b>						

### **30 Share Capital (Continued)**

The nominal registered amount of the Bank's issued share capital, prior to restatement of capital contributions made before 1 January 2003 to the purchasing power of the Russian Rouble at 31 December 2002, is RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand). [The Bank's shareholders [management] approved a resolution to transfer from retained earnings to share capital the monetary loss recognised in previous years on the restatement of share capital for the effects of hyperinflation. Following the transfer, the nominal registered amount of the Bank's issued share capital corresponds to the amount reported in these [consolidated] financial statements. *[Note that the transfer has to be made in the reporting year or earlier if it is to be effective for the financial statements.]*]

The total authorised number of ordinary shares is \_\_\_\_ thousand shares (2016: \_\_\_\_ thousand shares), with a par value of RR \_\_\_\_ per share (2016: RR \_\_\_\_ per share). All issued ordinary shares are fully paid.

[The number of ordinary shares issued but not fully paid in was \_\_\_\_ (2016: \_\_\_\_).] Each ordinary share carries one vote.

The total authorised number of preference shares is \_\_\_\_ thousand shares (2016: \_\_\_\_ thousand shares), with a par value of RR \_\_\_\_ per share (2016: RR \_\_\_\_ per share). All issued preference shares are fully paid. [The number of preference shares issued but not fully paid in was \_\_\_\_ (2016: \_\_\_\_).]

The preference shares are not redeemable and rank ahead of the ordinary shares in the event of the Bank's liquidation. [The preference shares give the holders the right to participate in general shareholders' meetings without voting rights, except in instances where decisions are made in relation to reorganisation and liquidation of the Bank, and where changes and amendments to the Bank's charter which restrict the rights of preference shareholders are proposed.] Preference share dividends are set at \_\_\_\_ % p.a. (2016: \_\_\_\_ % p.a.) and rank above ordinary dividends. If preference dividends are not declared by ordinary shareholders, the preference shareholders obtain the right to vote as ordinary shareholders until such time that the dividend is paid.

*[Describe share issue(s) shares pledged and written share options. Provide a description of all non-cash movements, e.g. capitalisation of reserves.]*

At 31 December 2017, treasury shares include \_\_\_\_ [ordinary] shares of the Bank (2016: \_\_\_\_ [ordinary] shares) owned by wholly owned subsidiaries of the Group. These ordinary shares carry voting rights in the same proportion as other ordinary shares. Voting rights of ordinary shares of the Bank held by the entities within the Group are effectively controlled by the management of the Group.

Share premium represents the excess of contributions received over the nominal value of shares issued.

In accordance with Russian legislation, the Bank distributes profits as dividends or transfers them to reserves on the basis of financial statements prepared in accordance with Russian Accounting Rules. The Bank's reserves under Russian Accounting Rules at 31 December 2017 amount to RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand).

*[Ordinary shares held by associate companies should be disclosed as balances with related parties.]*

### 31 Other Comprehensive Income Recognised in Each Component of Equity

An analysis of other comprehensive income by item for each component of equity is as follows:

Attributable to owners of the Bank						Non-controlling interest	Total equity
Share capital	Revaluation reserve for available-for-sale securities	Revaluation reserve for pre-reserves	Current currency translation reserves	Retained earnings [Accumulated deficit]	Total		

**Year ended 31 December 2016**

#### Available-for-sale investments:

- Gains less losses arising during the year
- Gains less losses recycled to profit or loss upon disposal or impairment

## Revaluation of premises and equipment

### Share of other comprehensive income of associates

## Exchange differences on translation to presentation currency

Income tax recorded directly in other comprehensive income

### Total other comprehensive income

**Year ended 31 December 2017**

### Available-for-sale investments:

- Gains less losses arising during the year
- Gains less losses recycled to profit or loss upon disposal or impairment

## Revaluation of premises and equipment

### Share of other comprehensive income of associates

## Exchange differences on translation to presentation currency

### Income tax recorded directly in other comprehensive income

### Total other comprehensive income

**31 Other Comprehensive Income Recognised in Each Component of Equity (Continued)**

The cumulative amounts recognised in other comprehensive income relating to non-current assets held for sale (or disposal group) are as follows:

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
Revaluation reserve for available-for-sale securities		
Revaluation reserve for premises		
Currency translation reserve		

**32 Interest Income and Expense**

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>

Gain on remeasurement or disposal of investment properties			
Income from sale of goods			
Income from royalties			
<i>[Expand as necessary]</i>			
Other <i>[Should be less than 10%]</i>			
<i>[Arrange in descending order]</i>			
<b>Total other operating income</b>			

*[Where alternative accounting policy is used to include dividends in gains/losses on FVTPL instruments, disclose the following:]* *[Dividend income of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) is presented as part of the gains less losses from trading securities in profit or loss. Dividend income of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) was included in gains less losses from other securities at fair value through profit or loss.]*

*[Classify reversals of provisions for liabilities and charges and reversals of impairment losses for premises and equipment as negative expense in Note 35.]*

**35 Administrative and Other Operating Expenses**

<i>In thousands of Russian Roubles</i>	<i>Note</i>	<b>2017</b>	<b>2016</b>
Staff costs			
Depreciation of premises and equipment	18		
Impairment of premises and equipment	18		
Reversals of impairment of premises and equipment	18		
Impairment of goodwill	17		
Amortisation of software and other intangible assets	18		
Utilities			
Operating lease expense for [premises] [and equipment]			
Other costs of premises and equipment			
Professional services			
Advertising and marketing services			
Security services			
Taxes other than on income			
Provisions for tax risks	26		
Provisions for performance guarantees	43		
Write-down of non-current assets (or disposal groups) to fair value less costs to sell	21		
Cost of goods sold			
Other <i>[Should be less than 10%]</i>			
<i>[Expand as necessary]</i>			
<i>[Arrange in descending order]</i>			
<b>Total administrative and other operating expenses</b>			

Included in staff costs are statutory pension contributions of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). *[Consider further description or breakdown of staff costs.]*

*[Included in staff costs is the amount of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand), which represents share-based remuneration provided to the Group's personnel directly by shareholders.]*

### 35 Administrative and Other Operating Expenses (Continued)

*[These accounts do not cover share-based compensation provided by the entity or its shareholders. Review shareholder agreements and other arrangements to identify such compensation because IFRS 2, Share-based Payment, generally requires that such compensation be recorded by the entity that received the employee services even if it is funded or provided directly by the shareholders.]*

Direct operating expenses for investment properties that generate rental income amounted to RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) and consisted of costs of utilities and staff costs. Direct operating expenses for investment properties that did not generate rental income amounted to RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand).

### 36 Income Taxes

#### (a) Components of income tax expense / (benefit)

Income tax expense [credit] [recorded in profit or loss for the year] comprises the following: *[Note that income taxes also include withholding taxes on the Group's income.]*

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
Current tax		
Deferred tax		
<b>Income tax expense/(credit) for the year</b>		

#### (b) Reconciliation between the tax expense and profit or loss multiplied by applicable tax rate

The income tax rate applicable to the majority of the Group's 2017 income is 20% (2016: 20%). The income tax rate applicable to the majority of income of subsidiaries ranges from \_\_\_\_\_% to \_\_\_\_\_% (2016: from \_\_\_\_\_% to \_\_\_\_\_%). A reconciliation between the expected and the actual taxation charge is provided below.

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
<b>Profit/(loss) before tax</b> <i>[This is the IFRS profit before tax.]</i>		
Theoretical tax charge [credit] at statutory rate (2017: 20%; 2016: 20%)		
Tax effect of items which are not deductible or assessable for taxation purposes:		
- Income which is exempt from taxation <i>[separately disclose significant items]</i>		
- Non-deductible expenses <i>[separately disclose significant items]</i>		
- Income on government securities taxed at different rates		
- Loss/(income) earned in tax free jurisdictions		
Under/over provision of current tax in prior years <i>[Effects of different tax rates in other countries]</i>		
Changes in expected manner of recovery or settlement resulting from controlled foreign company legislation		
Unrecognised tax loss carry forwards		
Unrecognised other potential deferred tax assets		
Utilisation of previously unrecognised tax loss carry forwards		
Recognition of previously unrecognised other deferred tax assets <i>[Expand as appropriate]</i>		
<b>Income tax expense/(credit) for the year</b>		

## **36 Income Taxes (Continued)**

### **(c) Tax loss carry forwards**

The Group has unrecognised potential deferred tax assets in respect of unused tax loss carry forwards of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). The tax loss carry forwards expire as follows:

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
Tax loss carry-forwards expiring by the end of:		
- 31 December 2018		
- 31 December 2019		
- 31 December 2020		
- 31 December 2021		
- after 31 December 2021		
<b>Total tax loss carry forwards</b>		

The Group also has unrecognised potential deferred tax assets in respect of deductible temporary differences of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand).

### **(d) Deferred taxes in respect of subsidiaries, joint ventures and associates**

The Group has not recorded a deferred tax liability in respect of temporary differences of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) associated with investments in subsidiaries [associates and joint ventures] as the Group is able to control the timing of the reversal of those temporary differences, and does not intend to reverse them in the foreseeable future.

[Management has performed an analysis of the dividend policies at the Group's associates and joint ventures with regards to the Group's potential deferred tax liabilities where the Group does not control reversal of the temporary difference, or expects the reversal to occur in the foreseeable future. For [list of associates and JVs], management expects that the carrying value of the investments would be recovered primarily through a sale and partially through dividends. No deferred taxes relating to a future sale are recognised in respect of [list associates and JVs], because any sale would occur in a tax free jurisdiction. Deferred taxes relating to a future sale are recognised in respect of [list associates and JVs] because these are held through subsidiaries in taxable jurisdictions, [Ukraine and Russia].

In 2016, the Controlled Foreign Company (CFC) legislation introduced Russian taxation of profits of foreign companies and non-corporate structures (including trusts) controlled by Russian tax residents (controlling parties). Starting from 2017, CFC income is subject to a 20% tax rate. As a result, management reassessed the Group's tax positions and recognised additional current tax expense as well as deferred taxes for temporary differences that arise from the expected taxable manner of recovery of the relevant Group's operations to which the CFC legislation applies to and to the extent that the Group (rather than its owners) is obliged to settle such taxes.

### **(e) Uncertain income tax positions**

**Uncertain income tax positions.** Current income tax liabilities include RR \_\_\_\_\_ thousand in respect of uncertainties relating to tax deductions taken for [describe type of expenses]. Management estimates that these exposures are more likely than not to require settlement if challenged by the tax authorities. Related penalties and interest are accrued and disclosed in Note 35 as operating expenses. The balance at 31 December 2017 is expected to be either fully utilised or released when the inspection rights of the tax authorities with respect to the relevant tax returns expire, as follows: RR \_\_\_\_\_ thousand by the end of 2017, RR \_\_\_\_\_ thousand by the end of 2017 and RR \_\_\_\_\_ thousand by the end of 2018.

## 36 Income Taxes (Continued)

### (f) Deferred taxes analysed by type of temporary difference

Differences between IFRS and statutory taxation regulations in Russia [and other countries] give rise to temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and their tax bases. The tax effect of the movements in these temporary differences is detailed below.

	1 January 2017	Business combi- nations	Transfer to non- current held for sale	Credited/ (charged)	Credited/ (charged)	Credited/ (charged)	31 Dec 2017
<i>In thousands of Russian Roubles</i>							
<b>Tax effect of deductible/(taxable) temporary differences [and tax loss carry forwards]</b>

Recognised deferred tax asset							
Recognised deferred tax liability							
<b>Net deferred tax asset/(liability)</b>	.	.	.	.	.	.	.

In the context of the Group's current structure and Russian tax legislation, tax losses and current tax assets of different group companies may not be offset against current tax liabilities and taxable profits of other group companies and, accordingly, taxes may accrue even where there is a consolidated tax loss. Therefore, deferred tax assets and liabilities are offset only when they relate to the same taxable entity and the same taxation authority. *[Tailor wording if non-Russian tax legislation also applies to Group entities.]*

**36 Income Taxes (Continued)**

	1 January 2016	Business combi- nations	Transfer to non- current held for sale	Credited/ (charged) to profit or loss	Credited/ (charged) to other compre- hensive income	Credited/ (charged) directly to equity	31 Dec 2016

Revaluation of premises <b>[and equipment]</b>						
Share of other comprehensive income of associates						
<b>[Exchange differences on translation to presentation currency]</b>						
<b>Other comprehensive income</b>						

### **37 Dividends**

<i>In thousands of Russian Roubles</i>	<b>2017</b>		<b>2016</b>	
	<b>Ordinary</b>	<b>Preference</b>	<b>Ordinary</b>	<b>Preference</b>
<b>Dividends payable at 1 January</b>				
Dividends declared during the year				
Dividends paid during the year <b>[Translation to presentation currency]</b>				
<b>Dividends payable at 31 December</b>				
<b>Dividends per share declared during the year</b>				

All dividends are declared and paid in Russian Roubles.

*[If preference shares are classified as a liability, any dividends on these shares should be presented as interest expense. A separate note would be required for disclosure of such dividends if preference shares are a liability.]*

### 38 Net Debt Reconciliation

The table below sets out an analysis of our debt and the movements in our debt for each of the periods presented. The debt items are those that are reported as financing in the statement of cash flows. *[2016 comparatives are not mandatory in the first year of adoption of the amendment to IAS 7]:*

	Liabilities from financing activities			Total	
	Other borrowed funds	[Syndicated] long term borrowings from other banks	Subordinated debt		
<i>In thousands or Russian Roubles</i>					
<b>Net debt at 1 January 2016</b>					
Cash flows					
Foreign exchange adjustments					
Other non-cash movements					
<b>Net debt at 31 December 2016</b>					
Cash flows					
Foreign exchange adjustments					
Other non-cash movements					
<b>Net debt at 31 December 2017</b>					

### 39 Earnings [Loss] per Share

*[EPS disclosure applies if ordinary shares or potential ordinary shares are publicly traded or the Company is in the process of issuing ordinary shares or potential ordinary shares in public markets.]*

Basic earnings/(loss) per share are calculated by dividing the profit or loss attributable to owners of the Parent by the weighted average number of ordinary shares in issue during the year, excluding treasury shares. *[If you have a rights issue the wording above should be amended in accordance with IAS 33.]*

The Bank has no dilutive potential ordinary shares; therefore, the diluted earnings per share equal the basic earnings per share. Earnings per share are calculated as follows: *[Note that the below does not cover disclosures for discontinued operations.] [Calculation and presentation will change if there are dilutive elements of equity, e.g. share options or convertible bonds.]*

<i>In thousands of Russian Roubles except for number of shares</i>	<i>Note</i>	<b>2017</b>	<b>2016</b>
Profit/(loss) for the year attributable to ordinary shareholders			
Profit/(loss) for the year attributable to preference shareholders			
<hr/>			
Profit or loss for the year attributable to the owners of the Parent			
<hr/>			
Weighted average number of ordinary shares in issue (thousands)			
<i>[need to disclose calculation in separate table if complicated.]</i>	30		
Weighted average number of preference shares in issue (thousands)

<b>Basic and diluted earnings/(loss) per ordinary share (expressed in RR per share)</b>			
<b>Basic and diluted earnings/(loss) per preference share (expressed in RR per share)</b>			
<hr/>			

### **39 Earnings [Loss] per Share (Continued)**

Profit/(loss) for the year attributable to ordinary and preference shareholders is calculated as follows:

<i>In thousands of Russian Roubles</i>	<b>Note</b>	<b>2017</b>	<b>2016</b>
Profit or loss for the year attributable to the owners of the Parent			
Less dividends on ordinary and preference shares	37		
Undistributed profit for the year			
Undistributed profit or loss for the year attributable to preference shareholders based on terms of the shares			
Preference dividends declared during the year	37		
Profit or loss for the year allocated to preference shareholders			
Undistributed profit or loss for the year attributable to ordinary shareholders based on terms of the shares			
Ordinary dividends declared during the year	37		
Profit or loss for the year allocated to ordinary shareholders			

### **40 Segment Analysis**

*[Segment information is only required if debt or equity securities are publicly traded or the entity is in the process of filing its financial statements with securities regulator. Please note that the disclosures below are illustrative only and segment reporting has to be tailored to follow internal reporting to CODM.]*

Operating segments are components that engage in business activities that may earn revenues or incur expenses, whose operating results are regularly reviewed by the chief operating decision maker (CODM), and for which discrete financial information is available. The CODM is the person - or group of persons - who allocates resources and assesses the performance for the entity. The functions of the CODM are performed by [the Board of Directors (management board)] of the Group.

#### **(a) Description of products and services from which each reportable segment derives its revenue**

The Group is organised on the basis of [three] main business segments:

- Retail banking – representing private banking services, private customer current accounts, savings, deposits, investment savings products, custody, credit and debit cards, consumer loans and mortgages;
- Corporate banking – representing direct debit facilities, current accounts, deposits, overdrafts, loan and other credit facilities, foreign currency and derivative products;
- Investment banking – representing financial instruments trading, structured financing, corporate leasing, merger and acquisitions advice.

#### **(b) Factors that management used to identify the reportable segments**

The Group's segments are strategic business units that focus on different customers. They are managed separately because each business unit requires different [marketing strategies and service level].

## 40 Segment Analysis (Continued)

Segment financial information reviewed by the CODM includes [loans and advances to customers] of the Group's subsidiaries, but not their results and other items in the statement of financial position. Regular review of these subsidiary banks is delegated to the local management teams. The CODM obtains financial statements of the Group's subsidiaries. Such financial information overlaps with segment analysis provided internally to the CODM. Management, therefore, applied the core principle of IFRS 8 "Operating Segments", in determining which of the overlapping financial information sets should form the basis of operating segments. Management considered that information on subsidiary banks is available less frequently in concluding that segments exclude details of the subsidiaries other than information about [their loan portfolios].

### **(c) Measurement of operating segment profit or loss, assets and liabilities**

The CODM reviews financial information prepared based on Russian accounting standards adjusted to meet the requirements of internal reporting. Such financial information differs in certain aspects from International Financial Reporting Standards:

- (i) the fair value changes in available for sale securities are reported within the segments' profits or losses rather than in other comprehensive income;
- (ii) funds are generally reallocated between segments at internal interest rates set by the treasury department, which are determined by reference to market interest rate benchmarks, contractual maturities for loans and observed actual maturities of customer accounts balances;
- (iii) income taxes are not allocated to segments;
- (iv) loan provisions are recognised based on management judgement and availability of information, rather than based on the incurred loss model prescribed in IAS 39;
- (v) commission income relating to lending is recognised immediately rather than deferred using the effective interest method; and
- (vi) liabilities for the Group's post-employment obligations are not recognised.

The CODM evaluates performance of each segment based on [profit before tax].

### **(d) Information about reportable segment profit or loss, assets and liabilities**

Segment information for the reportable segments for the year ended 31 December 2017 is set out below:

<i>In thousands of Russian Roubles</i>	Retail banking	Corporate banking	Investment banking	[Other]	Eliminations	Total
Non-current assets (or disposal groups) held for sale						
Investment in associates						
Investment in joint ventures

#### **40 Segment Analysis (Continued)**

Reconciliation of other material items of income or expenses for the year ended 31 December 2017 is as follows:

<i>In thousands of Russian Roubles</i>	Total amount for all reportable segments	[Adjustment 1]	[Adjustment 2]	[Adjustment 3]	[Adjustment 4]	As reported under IFRS
<b>Material income or expenses for year ended 31 December 2017</b>						
<i>External revenues:</i>						
- Interest income						
- Fee and commission income						
- Other operating income						
Interest expense						
Provision for loan impairment						
[Provision for impairment of loans to customers and amounts due from other banks]						
Impairment of investment securities available for sale						
Impairment of investment securities held to maturity						
Depreciation and amortisation						
Fee and commission expense						
Gains less losses from trading securities						
Gains less losses from financial derivatives						
Gains less losses from other [securities] [financial assets] at fair value through profit or loss						
Gains less losses from trading in foreign currencies						
Gains less losses on revaluation of investment properties						
Foreign exchange translation gains less losses						
Gains less losses from disposals of investment securities available for sale						
Gains/(losses) arising from early retirement of debt						
Administrative and other operating expenses						
Share of profit of associates and joint ventures						

The reconciling items are attributable to the following:

- (i) [description of each adjustment];
- (ii) [description of each adjustment];
- (iii) [description of each adjustment];

#### **40 Segment Analysis (Continued)**

Reconciliation of other material items of income or expenses for the year ended 31 December 2016 is as follows:

<i>In thousands of Russian Roubles</i>	Total amount for all reportable segments	[Adjustment 1]	[Adjustment 2]	[Adjustment 3]	[Adjustment 4]	As reported under IFRS
<b>Material income or expenses for year ended 31 December 2016</b>						
<i>External revenues:</i>						
- Interest income						
- Fee and commission income						
- Other operating income						
Interest expense						
Provision for loan impairment						
[Provision for impairment of loans to customers and amounts due from other banks]						
Impairment of investment securities available for sale						
Impairment of investment securities held to maturity						
Depreciation and amortisation						
Fee and commission expense						
Gains less losses from trading securities						
Gains less losses from financial derivatives						
Gains less losses from other [securities] [financial assets] at fair value through profit or loss						
Gains less losses from trading in foreign currencies						
Gains less losses on revaluation of investment properties						
Foreign exchange translation gains less losses						
Gains less losses from disposals of investment securities available for sale						
Gains/(losses) arising from early retirement of debt						
Administrative and other operating expenses						
Share of profit of associates and joint ventures						

The reconciling items are attributable to the following:

- (i) [description of each adjustment];
- (ii) [description of each adjustment];
- (iii) [description of each adjustment];

#### 40 Segment Analysis (Continued)

Reconciliation of material assets and liabilities at 31 December 2017 and of capital expenditure for 2017 is as follows<sup>3</sup>:

<i>In thousands of Russian Roubles</i>	Total amount for all reportable segments	[Adjustment 1]	[Adjustment 2]	[Adjustment 3]	[Adjustment 4]	As reported under IFRS
<b>Assets at 31 December 2017</b>						
Non-current assets (or disposal groups) held for sale						
Investment in associates						
Investment in joint ventures						
Other reportable segment assets						
<b>Liabilities at 31 December 2017</b>						
Liabilities directly associated with disposal groups held for sale						
Other reportable segment liabilities						
<b>Capital expenditure for 2017</b>						

The reconciling items are attributable to the following:

- (i) [description of each adjustment];
- (ii) [description of each adjustment];
- (iii) [description of each adjustment];

Reconciliation of material assets and liabilities at 31 December 2016 and of capital expenditure for 2016 is as follows:

<i>In thousands of Russian Roubles</i>	Total amount for all reportable segments	[Adjustment 1]	[Adjustment 2]	[Adjustment 3]	[Adjustment 4]	As reported under IFRS
<b>Assets at 31 December 2016</b>						
Non-current assets (or disposal groups) held for sale						
Investment in associates						
Investment in joint ventures						
Other reportable segment assets						
<b>Liabilities at 31 December 2016</b>						
Liabilities directly associated with disposal groups held for sale						
Other reportable segment liabilities						
<b>Capital expenditure for 2016</b>						

<sup>3</sup> IFRS 8.28(e) requires a reconciliation of total of reportable segments amounts for every material item of information disclosed to the corresponding IFRS amount for the entity.

## **40 Segment Analysis (Continued)**

The reconciling items are attributable to the following:

- (i) [description of each adjustment];
- (ii) [description of each adjustment];
- (iii) [description of each adjustment];

### **(f) Analysis of revenues by products and services**

The Group's revenues are analysed by products and services in Notes 32 (interest income), Note 33 (fee and commission income) and in Note 34 (other operating income).

### **(g) Geographical information**

Revenues for each individual country for which the revenues are material are reported separately, as follows:

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
Russia		
Ukraine		
Kazakhstan		
Other countries		
<i>[expand as appropriate]</i>		
<b>Total consolidated revenues</b>		

The analysis is based on domicile of the customer. Revenues from off-shore companies of Russian customers are reported as revenues from Russia. Revenues comprise interest income, fee and commission income and other operating income.

Capital expenditure for each individual country for which it is material is reported separately, as follows:

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
Russia		
Ukraine		
Kazakhstan		
Other countries		
<i>[expand as appropriate]</i>		
<b>Total consolidated revenues</b>		

The analysis is based on location of assets. Capital expenditure represents additions to non-current assets other than financial instruments, deferred tax assets, post-employment benefit assets and rights arising under insurance contracts.

## 40 Segment Analysis (Continued)

### (h) Major customers

Revenues from customers which represent 10% or more of the total revenues are as follows:

<i>In thousands of Russian Roubles</i>	Retail banking	Corporate banking	Investment banking	[Other]	Total
<b>2017</b>					
[Customer 1] [Customer 2] <i>[expand as appropriate]</i>					
<b>Total revenues for 2016</b>					
<i>In thousands of Russian Roubles</i>	Retail banking	Corporate banking	Investment banking	[Other]	Total
<b>2016</b>					
[Customer 1] [Customer 2] <i>[expand as appropriate]</i>					
<b>Total revenues for 2015</b>					

Management considered the extent of economic integration between entities controlled by the Russian government, and concluded that entities under the control of the government are not in general a single customer for the purposes of the above disclosure. Revenues comprise interest income, fee and commission income and other operating income.

*[The Group does not have customers with the revenues exceeding 10% of the total revenue of the Group.]*

## 41 Financial Risk Management

*[The below disclosures are illustrative and should be extensively tailored to the Group's circumstances while maintaining compliance with IFRS 7's disclosure requirements.]*

The risk management function within the Group is carried out in respect of financial risks, operational risks and legal risks. Financial risk comprises market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk. The primary objectives of the financial risk management function are to establish risk limits, and then ensure that exposure to risks stays within these limits. The operational and legal risk management functions are intended to ensure proper functioning of internal policies and procedures, in order to minimise operational and legal risks.

**Credit risk.** The Group takes on exposure to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Exposure to credit risk arises as a result of the Group's lending and other transactions with counterparties giving rise to financial assets.

The Group's maximum exposure to credit risk is reflected in the carrying amounts of financial assets on the consolidated statement of financial position. *[The impact of possible netting of assets and liabilities to reduce potential credit exposure is not significant.]* For guarantees and commitments to extend credit, the maximum exposure to credit risk is the amount of the commitment. Refer to Note 43. The credit risk is mitigated by collateral and other credit enhancements as disclosed in Note 44.

## 41 Financial Risk Management (Continued)

The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical and industry segments. Limits on the level of credit risk by product and industry sector are approved regularly by management. Such risks are monitored on a revolving basis and are subject to an annual, or more frequent, review.

[The Group established a number of credit committees which are responsible for approving credit limits for individual borrowers:

- The senior credit committee reviews and approves limits above RR \_\_\_\_ thousand and meets monthly. It is also responsible for issuing guidance to lower level credit committees;
- The junior credit committees review and approve credit limits below RR \_\_\_\_ thousand and meet weekly.]

Loan applications originated by the relevant client relationship managers are passed on to the relevant credit committee for approval of the credit limit. Exposure to credit risk is also managed, in part, by obtaining collateral and corporate and personal guarantees. In order to monitor credit risk exposures, regular reports are produced by the [credit department's] officers based on a structured analysis focusing on the customer's business and financial performance. Any significant exposure to customers with deteriorating creditworthiness are reported to, and reviewed by, [the Board of Directors]. [The Group does not use formalised internal credit ratings to monitor exposure to credit risk. Management monitors and follows up on past due balances.]

The Group's [credit department] reviews the ageing analysis of outstanding loans and follows up on past due balances. Management, therefore, considers it appropriate to provide ageing and other information about credit risk as disclosed in Notes 8, 9, 10, 11, 12, 13, 14 and 19. *[If disclosures in the respective notes at the end of the reporting period are not representative of exposures during the period, the Group must disclose additional information sufficient to give the reader information about exposures that the Group faced during the period. One way would be to disclose here information about the average exposures during the period, similarly to the tables in the respective notes.]*

*[IFRS 7 para 33 also requires disclosures of processes for management of credit risk. The Group must disclose additional information sufficient to give the reader information about such processes. As these will be different in each bank, standard wording is not given. One way to disclose credit risk management processes would be to include here narrative information about the Group's processes for management of credit risk.]*

*[Disclose here any additional internal information about credit risk provided to key management personnel.]*

Credit risk for off-balance sheet financial instruments is defined as the possibility of sustaining a loss as the result of another party to a financial instrument failing to perform in accordance with the terms of the contract. The Group uses the same credit policies in assuming conditional obligations as it does for on-balance sheet financial instruments, through established credit approvals, risk control limits and monitoring procedures.

**Market risk.** The Group takes on exposure to market risks. Market risks arise from open positions in (a) currency, (b) interest rates and (c) equity products, all of which are exposed to general and specific market movements. Management sets limits on the value of risk that may be accepted, which is monitored on a daily basis. However, the use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

**Currency risk.** In respect of currency risk, management sets limits on the level of exposure by currency and in total for both overnight and intra-day positions, which are monitored daily.

*[Disclose here detailed processes for management of currency risks. Processes need to be disclosed in addition to objectives and policies for managing the currency risk.]*

#### 41 Financial Risk Management (Continued)

The table below summarises the Group's exposure to foreign currency exchange rate risk at the end of the reporting period:

In thousands of Russian Roubles	At 31 December 2017				At 31 December 2016			
	Monetary financial assets	Monetary financial liabilities	Derivatives	Net position	Monetary financial assets	Monetary financial liabilities	Derivatives	Net position
Russian Roubles								
US Dollars								
Euros								
Pound Sterling								
Ukrainian Hryvnia								
Other								
<b>Total</b>								

[Derivatives presented above are monetary financial assets or monetary financial liabilities, but are presented separately in order to show the Group's gross exposure.]

*[Do not include above non-monetary items, including shares and derivatives on shares. Total monetary financial assets and liabilities are different from total financial assets and liabilities as shares and other non-monetary items are excluded from the table and derivatives are presented in a separate column.]*  
 Amounts disclosed in respect of derivatives represent the fair value, at the end of the reporting period, of the respective currency that the Group agreed to buy (positive amount) or sell (negative amount) before netting of positions and payments with the counterparty. The amounts by currency are presented gross as stated in Note 50. The net total represents the fair value of the currency derivatives. The above analysis includes only monetary assets and liabilities. Investments in equities and non-monetary assets are not considered to give rise to any material currency risk.

The following table presents sensitivities of profit or loss and equity to reasonably possible changes in exchange rates applied at the end of the reporting period relative to the functional currency of the respective Group entities, with all other variables held constant:

In thousands of Russian Roubles	At 31 December 2017		At 31 December 2016	
	Impact on profit or loss	Impact on equity	Impact on profit or loss	Impact on equity
US Dollar strengthening by 20% (2016: strengthening by [30%])				
US Dollar weakening by 20% (2016: weakening by [30%])				
Euro strengthening by 20% (2016: strengthening by [30%])				
Euro weakening by 20% (2016: weakening by [30%])				
Ukrainian Hryvnia strengthening by __% (2016: strengthening by [__%])				
Ukrainian Hryvnia weakening by __% (2016: weakening by [__%])				
Other strengthening by 20% (2016: strengthening by [30%])				
Other weakening by 20% (2016: weakening by [30%])				
<b>Total</b>				

#### 41 Financial Risk Management (Continued)

The exposure was calculated only for monetary balances denominated in currencies other than the functional currency of the respective entity of the Group. [The Group's exposure to currency risk at the end of the reporting period is not representative of the typical exposure during the year. The following table presents sensitivities of profit and loss and equity to reasonably possible changes in exchange rates applied to the average exposure to currency risk during the year, with all other variables held constant:]

In thousands of Russian Roubles	Average exposure during 2017		Average exposure during 2016	
	Impact on profit or loss	Impact on equity	Impact on profit or loss	Impact on equity
US Dollar strengthening by 20% (2016: by [30]%)				
US Dollar weakening by 20% (2016: by [30]%)				
Euro strengthening by 20% (2016: by [30]%)				
Euro weakening by 20% (2016: by [30]%)				
Ukrainian Hryvnia strengthening by 20% (2016: by [__]%)				
Ukrainian Hryvnia weakening by 20% (2016: by [__]%)				
Other strengthening by 20% (2016: by [30]%)				
Other weakening by 20% (2016: by [30]%)				
<b>Total</b>				

**Interest rate risk.** The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes, but may reduce or create losses in the event that unexpected movements arise. Management monitors on a daily basis and sets limits on the level of mismatch of interest rate repricing that may be undertaken.

*[Disclose here detailed processes for management of interest risks. Processes need to be disclosed in addition to objectives and policies for managing the interest risks.]*

The table below summarises the Group's exposure to interest rate risks. The table presents the aggregated amounts of the Group's financial assets and liabilities at carrying amounts, categorised by the earlier of contractual interest repricing or maturity dates:

In thousands of Russian Roubles	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	More than 1 year	Non-monetary	Total
<b>31 December 2017</b>						
Total financial assets						
Total financial liabilities						
<b>Net interest sensitivity gap at 31 December 2017</b>						
<b>31 December 2016</b>						
Total financial assets						
Total financial liabilities						
<b>Net interest sensitivity gap at 31 December 2016</b>						

**41 Financial Risk Management (Continued)**

All of the Group's debt instruments reprice within 5 years [except fixed interest rate [eurobonds] of RR \_\_\_\_ thousand, which mature in \_\_\_\_] (2016: all reprice within 5 years [except fixed interest rate [eurobonds] of RR \_\_\_\_ thousand, which mature in \_\_\_\_]).

At 31 December 2016, if interest rates at that date had been 200 basis points lower (2016: [200] basis points lower) with all other variables held constant, profit for the year would have been RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) higher, mainly as a result of lower interest expense on variable interest liabilities [and higher fair value of debt trading and other securities at fair value through profit or loss]. Other components of equity would have been RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) higher, [mainly] as a result of an increase in the fair value of fixed rate financial assets classified as available for sale. *[Disclose also assumptions made in calculating the sensitivities. Consider presenting sensitivities by currency.]*

If interest rates had been 200 basis points higher (2016: [200] basis points higher), with all other variables held constant, profit would have been RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) lower, mainly as a result of higher interest expense on variable interest liabilities [and lower fair value of debt trading and other securities at fair value through profit or loss]. Other components of equity would have been RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) lower, [mainly] as a result of a decrease in the fair value of fixed rate financial assets classified as available for sale. *[Disclose also assumptions made in calculating the sensitivities. Consider presenting sensitivities by currency.]* [The Group's exposure to interest rate risk at the end of the reporting period is not representative of the typical exposure during the year. For the average exposure during 2017, if interest rates had been 200 basis points lower (2016: [200] basis points lower) with all other variables held constant, profit for the year would have been RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) higher, [mainly] as a result of lower interest expense on variable interest liabilities [and higher fair value of debt trading and other securities at fair value through profit or loss]. Other components of equity would have been RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) higher, [mainly] as a result of an increase in the fair value of fixed rate financial assets classified as available for sale.]

For the average exposure during 2017, if interest rates had been 200 basis points higher (2016: [200] basis points higher), with all other variables held constant, profit would have been RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) lower, [mainly] as a result of higher interest expense on variable interest liabilities [and lower fair value of debt trading and other securities at fair value through profit or loss]. Other components of equity would have been RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) lower, [mainly] as a result of a decrease in the fair value of fixed rate financial assets classified as available for sale.]

*[Alternatively, if the Group prepares and uses sensitivity analysis that reflects interdependencies between risk variables, such as value-at-risk, it may replace the above disclosure with that method. The explanation of the method and its potential limitations should be disclosed (IFRS 7.41). Overall, the disclosure should cover all the relevant financial assets and liabilities, not only the "trading book".]*

## 41 Financial Risk Management (Continued)

The Group monitors interest rates for its financial instruments. The table below summarises interest rates at the respective reporting date based on reports reviewed by key management personnel. For securities, the interest rates represent yields to maturity based on market quotations at the reporting date:

In % p.a.	2017				2016			
	RR	USD	Euro	Other	RR	USD	Euro	Other
<b>Assets</b>								
Cash and cash equivalents								
Debt trading securities								
Other debt [securities] [financial assets] at fair value through profit or loss								
Due from other banks								
Loans and advances to customers								
Debt investment securities available for sale								
Repurchase receivables								
Debt investment securities held to maturity								
Other financial assets								
Financial assets included in non-current assets held for sale (or disposal groups)								
<b>Liabilities</b>								
Due to other banks								
Customer accounts								
- current and settlement accounts								
- term deposits								
Debt securities in issue [Promissory notes issued]								
Other borrowed funds								
Other financial liabilities								
Subordinated debt								
Financial liabilities associated with non-current assets held for sale (or disposal groups)								

*[Include all monetary assets and liabilities in the above table.]*

The sign “-“ in the table above means that the Group does not have the respective assets or liabilities in the corresponding currency.

**Other price risk.** The Group has [limited] exposure to equity price risk. Transactions in equity products are monitored and authorised by the [Group treasury]. At 31 December 2017, if equity prices at that date had been [20% (2016: 25%)] lower with all other variables held constant, profit for the year would have been RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) lower, [mainly as a result of impairment of corporate shares classified as available-for-sale and revaluation of trading and other corporate shares at fair value through profit or loss,] and other components of equity would have been RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) lower, mainly as a result of a decrease in the fair value of corporate shares classified as available for sale. *[Disclose also assumptions made in calculating the sensitivities.]*

## 41 Financial Risk Management (Continued)

The Group is exposed to prepayment risk through providing [fixed or variable rate] loans, including mortgages, which give the borrower the right to repay the loans early. The Group's current year profit [loss] and equity at the end of the current reporting period would not have been significantly impacted by changes in prepayment rates because such loans are carried at amortised cost and the prepayment right is at, or close to, the amortised cost of the loans and advances to customers (2016: no material impact). *[Please disclose information about any other price risk that the Group may be exposed to.]*

**Geographical risk concentrations.** The geographical concentration of the Group's financial assets and liabilities at 31 December 2017 is set out below:

	Russia	Ukraine	Portugal, Italy, Cyprus, Greece, Spain	[Other OECD]	[Non- OECD]	Total
<i>In thousands of Russian Roubles</i>						
<b>Financial assets</b>						
Cash and cash equivalents						
Trading securities						
Other [securities] [financial assets] at fair value through profit or loss						
Due from other banks						
Loans and advances to customers						
Investment securities available for sale						
Repurchase receivables						
Investment securities held to maturity						
Other financial assets						
<b>Total financial assets</b>						
<b>Financial liabilities</b>						
Due to other banks						
Customer accounts						
Debt securities in issue [Promissory notes issued]						
Other borrowed funds						
Other financial liabilities						
Subordinated debt						
<b>Total financial liabilities</b>						
<b>Net position in on-balance sheet financial instruments</b>						
<b>Credit related commitments</b> <i>[should agree to commitments footnote]</i>						

## 41 Financial Risk Management (Continued)

Assets, liabilities and credit related commitments have [generally] been based on the country in which the counterparty is located. Balances with Russian counterparties actually outstanding to/from offshore companies of these Russian counterparties, are allocated to the caption “Russia”. Cash on hand [and precious metals] have been allocated based on the country in which they are physically held.

The geographical concentration of the Group’s financial assets and liabilities at 31 December 2016 is set out below:

	Russia	Ukraine	Portugal, Italy, Cyprus, Greece, Spain	[Other OECD]	[Non- OECD]	Total
<i>In thousands of Russian Roubles</i>						
<b>Financial assets</b>						
Cash and cash equivalents						
Trading securities						
Other [securities] [financial assets] at fair value through profit or loss						
Due from other banks						
Loans and advances to customers						
Investment securities available for sale						
Repurchase receivable						
Investment securities held to maturity						
Other financial assets						
<b>Total financial assets</b>						
<b>Financial liabilities</b>						
Due to other banks						
Customer accounts						
Debt securities in issue [Promissory notes issued]						
Other borrowed funds						
Other financial liabilities						
Subordinated debt						
<b>Total financial liabilities</b>						
<b>Net position in on-balance sheet financial instruments</b>						
<b>Credit related commitments</b> [should agree to commitments footnote]						

**Other risk concentrations.** Management monitors and discloses concentrations of credit risk by obtaining reports listing exposures to borrowers with aggregated loan balances in excess of 10% of net assets. [Refer to Notes 10 and 11.] [The Group did not have any such significant risk concentrations at 31 December 2017 and 2016.]

#### 41 Financial Risk Management (Continued)

**Liquidity risk.** Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Group is exposed to daily calls on its available cash resources from overnight deposits, current accounts, maturing deposits, loan draw-downs, guarantees and from margin and other calls on cash-settled derivative instruments. The Group does not maintain cash resources to meet all of these needs as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty. Liquidity risk is managed by [the Asset/Liability Committee] of the Group. *[Needs tailoring to the Group's circumstances.]*

The Group seeks to maintain a stable funding base primarily consisting of amounts due to other banks, corporate and retail customer deposits and [debt securities]. The Group invests the funds in diversified portfolios of liquid assets, in order to be able to respond quickly and smoothly to unforeseen liquidity requirements.

The liquidity management of the Group requires consideration of the level of liquid assets necessary to settle obligations as they fall due; maintaining access to a range of funding sources; maintaining funding contingency plans; and monitoring liquidity ratios against regulatory requirements. The Bank calculates liquidity ratios on a daily basis in accordance with the requirement of the Central Bank of Russia. These ratios are:

- Instant liquidity ratio (N2), which is calculated as the ratio of highly-liquid assets to liabilities payable on demand. The ratio was \_\_\_\_ at 31 December 2017 (2016: \_\_\_\_);
- Current liquidity ratio (N3), which is calculated as the ratio of liquid assets to liabilities maturing within 30 calendar days. The ratio was \_\_\_\_ at 31 December 2017 (2016: \_\_\_\_);
- Long-term liquidity ratio (N4), which is calculated as the ratio of assets maturing after one year to regulatory capital and liabilities maturing after one year. The ratio was \_\_\_\_ at 31 December 2017 (2016: \_\_\_\_).

The [Treasury Department] receives information about the liquidity profile of the financial assets and liabilities. The Treasury Department then provides for an adequate portfolio of short-term liquid assets, largely made up of short-term liquid trading securities, deposits with banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Group as a whole.

The daily liquidity position is monitored and regular liquidity stress testing, under a variety of scenarios covering both normal and more severe market conditions, is performed by the Treasury Department. *[Tailor to the Group's circumstances and the recent liquidity shortfalls in financial markets.]*

The table below shows liabilities at 31 December 2017 by their remaining contractual maturity. The amounts of liabilities disclosed in the maturity table are the contractual undiscounted cash flows, including gross finance lease obligations (before deducting future finance charges), gross loan commitments and financial guarantees. Such undiscounted cash flows differ from the amount included in the statement of financial position because the amount in the statement of financial position is based on discounted cash flows. Financial derivatives are included at the contractual amounts to be paid or received, unless the Group expects to close the derivative position before its maturity date in which case the derivatives are included based on the expected cash flows. For the purposes of the maturity analysis, embedded derivatives are not separated from hybrid (combined) financial instruments.

The table below shows the maturity analysis of non-derivative financial assets at their carrying amounts and based on their contractual maturities, except for assets that are readily saleable if it should be necessary to meet cash outflows on financial liabilities. Such financial assets are included in the maturity analysis based on their expected date of disposal. Impaired loans are included at their carrying amounts net of impairment provisions, and based on the expected timing of cash inflows. Derivatives are presented based on their [contractual maturities].

When the amount payable is not fixed, the amount disclosed is determined by reference to the conditions existing at the end of the reporting period. Foreign currency payments are translated using the spot exchange rate at the end of the reporting period.

#### **41 Financial Risk Management (Continued)**

The maturity analysis of financial instruments at 31 December 2017 is as follows:

	<b>Demand and less than 1 month</b>	<b>From 1 to 6 months</b>	<b>From 6 to 12 months</b>	<b>From 12 months to 5 years</b>	<b>Over 5 years</b>	<b>Total</b>
<i>In thousands of Russian Roubles</i>						
<b>Assets</b>						
Cash and cash equivalents						
Trading securities						
Other [securities] [financial assets] at fair value through profit or loss						
Due from other banks						
Loans and advances to customers						
Investment securities available for sale						
Repurchase receivables						
Investment securities held to maturity						
<i>Gross settled swaps and forwards:</i>						
- inflows						
- outflows						
Net settled derivatives						
Other financial assets						
<b>Total</b>						
<b>Liabilities</b>						
Due to other banks						
Customer accounts – individuals						
Customer accounts – other						
Debt securities in issue [Promissory notes issued]						
Other borrowed funds						
Subordinated debt						
<i>Gross settled swaps and forwards:</i>						
- inflows						
- outflows						
Net settled derivatives						
Gross loan commitments						
Financial guarantees						
Other financial liabilities						
<b>Total potential future payments for financial obligations</b>						
<b>Liquidity gap arising from financial instruments</b>						

#### **41 Financial Risk Management (Continued)**

Liquidity requirements to support calls under guarantees and standby letters of credit are considerably less than the amount of the commitment disclosed in the above maturity analysis, because the Group does not generally expect the third party to draw funds under the agreement. The total outstanding contractual amount of commitments to extend credit as included in the above maturity table does not necessarily represent future cash requirements, since many of these commitments will expire or terminate without being funded.

The maturity analysis of financial instruments at 31 December 2016 is as follows:

	<b>Demand and less than 1 month</b>	<b>From 1 to 6 months</b>	<b>From 6 to 12 months</b>	<b>From 12 months to 5 years</b>	<b>Over 5 years</b>	<b>Total</b>
<i>In thousands of Russian Roubles</i>						
<b>Assets</b>						
Cash and cash equivalents						
Trading securities						
Other [securities] [financial assets] at fair value through profit or loss						
Due from other banks						
Loans and advances to customers						
Investment securities available for sale						
Repurchase receivables						
Investment securities held to maturity						
<i>Gross settled swaps and forwards:</i>						
- inflows						
- outflows						
Net settled derivatives						
Other financial assets						
<b>Total</b>						
<b>Liabilities</b>						
Due to other banks						
Customer accounts – individuals						
Customer accounts – other						
Debt securities in issue [Promissory notes issued]						
Other borrowed funds						
Subordinated debt						
<i>Gross settled swaps and forwards:</i>						
- inflows						
- outflows						
Net settled derivatives						
Gross loan commitments						
Financial guarantees						
Other financial liabilities						
<b>Total potential future payments for financial obligations</b>						
<b>Liquidity gap arising from financial instruments</b>						

Payments in respect of gross settled forwards will be accompanied by related cash inflows. Customer accounts are classified in the above analysis based on contractual maturities. However, in accordance with Russian Civil Code, individuals have a right to withdraw their deposits prior to maturity if they forfeit their right to accrued interest.

#### 41 Financial Risk Management (Continued)

The Group does not use the above maturity analysis based on undiscounted contractual maturities of liabilities to manage liquidity. Instead, the Group monitors expected maturities and the resulting expected liquidity gap as follows:

	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	From 12 months to 5 years	Over 5 years	Total
<i>In thousands of Russian Roubles</i>						
<b>At 31 December 2017</b>						
Financial assets						
Financial liabilities						
<b>Net liquidity gap based on expected maturities</b>						
<b>At 31 December 2016</b>						
Financial assets						
Financial liabilities						
<b>Net liquidity gap based on expected maturities</b>						

The entire portfolio of trading securities is classified within demand and less than one month based on management's assessment of the portfolio's realisability.

The matching and/or controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the management of the Group. It is unusual for banks ever to be completely matched since business transacted is often of an uncertain term and of different types. An unmatched position potentially enhances profitability, but can also increase the risk of losses. The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature, are important factors in assessing the liquidity of the Group and its exposure to changes in interest and exchange rates.

Management believes that in spite of a substantial portion of customer accounts being on demand, diversification of these deposits by number and type of depositors, and the past experience of the Group would indicate that these customer accounts provide a long-term and stable source of funding for the Group. *[Note: Tailor as appropriate.]*

*[Liquidity position discussion should be tailored depending on the Group's particular circumstances. Significant mismatch in the liquidity position should be discussed in the financial statements with the explanation of the main reasons for such mismatch and management's assessment of the effect of this mismatch on the Group's ability to be a going concern and continue in operation for the foreseeable future.]*

## **42 Management of Capital**

The Group's objectives when managing capital are (i) to comply with the capital requirements set by the Central Bank of the Russian Federation, (ii) to safeguard the Group's ability to continue as a going concern and (iii) to maintain a sufficient capital base to achieve a capital adequacy ratio based on the Basel Accord of at least 8%. The Group considers total capital under management to be [equity as shown in the consolidated statement of financial position]. The amount of capital that the Group managed as of 31 December 2017 was RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). Compliance with capital adequacy ratios set by the Central Bank of the Russian Federation is monitored monthly, with reports outlining their calculation reviewed and signed by the Bank's Chief Executive Officer and Chief Accountant. Other objectives of capital management are evaluated [annually].

Under the current capital requirements set by the Central Bank of Russia, banks have to maintain a ratio of regulatory capital to risk weighted assets ("statutory capital ratio") above a prescribed minimum level. Regulatory capital is based on the Bank's reports prepared under Russian accounting standards and amounts RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand).

The Group and the Bank have complied with all externally imposed capital requirements throughout 2017 and 2016. *[Disclose consequences of non-compliance with any externally imposed capital requirement. See IAS 1.135(e). The actual % capital adequacy ratio does not have to be disclosed.]*

## **43 Contingencies and Commitments**

**Legal proceedings.** From time to time and in the normal course of business, claims against the Group may be received. On the basis of its own estimates and both internal [and external] professional advice, management is of the opinion that no material losses will be incurred in respect of claims, and accordingly no provision has been made in these [consolidated] financial statements.

[At 31 December 2017, the Group was engaged in litigation proceedings with \_\_\_\_\_ in relation to \_\_\_\_\_. No provision has been made as the Group's management believes that it is not likely that any significant loss will eventuate.] *[Provide also information for 2016, if relevant]*

[At 31 December 2017, the Group was engaged in litigation proceedings with \_\_\_\_\_ in relation to \_\_\_\_\_. A provision of RR \_\_\_\_\_ thousand has been made as professional advice has indicated that it is likely that a loss will eventuate. Refer to Note 26.] *[Provide also information for 2016, if relevant]*

**Tax contingencies.** Russian tax [and customs] legislation which was enacted or substantively enacted at the end of the reporting period, is subject to varying interpretations when being applied to the transactions and activities of the Group. Consequently, tax positions taken by management and the formal documentation supporting the tax positions may be challenged by tax authorities. Russian tax administration is gradually strengthening, including the fact that there is a higher risk of review of tax transactions without a clear business purpose or with tax non-compliant counterparties. Fiscal periods remain open to review by the authorities in respect of taxes for three calendar years preceding the year when decision about review was made. Under certain circumstances reviews may cover longer periods.

*[Remove the transfer pricing wording only if clearly not applicable:]* The Russian transfer pricing legislation is generally aligned with the international transfer pricing principles developed by the Organisation for Economic Cooperation and Development (OECD), although it has specific features. This legislation provides for the possibility of additional tax assessment for controlled transactions (transactions between related parties and certain transactions between unrelated parties) if such transactions are not on an arm's-length basis. *[The Management has implemented internal controls to be in compliance with this transfer pricing legislation.]*

### 43 Contingencies and Commitments (Continued)

Tax liabilities arising from controlled transactions are determined based on their actual transaction prices. It is possible, with the evolution of the interpretation of transfer pricing rules, that such transfer prices could be challenged. The impact of any such challenge cannot be reliably estimated; however, it may be significant to the financial position and/or the overall operations of the Group. *[Add where tax exposure is quantified by management: The Management's best estimate of the exposure to transfer pricing is RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand). In addition, alternative assumptions may be used for tax calculation purposes. Therefore, this amount should not be interpreted as the final assessment of future taxes payable if tax authorities challenge the transfer prices. The Management plans to defend vigorously the Group's transfer pricing positions.]*

*[Remove the permanent establishment wording only if clearly not applicable:]* The Group includes companies incorporated outside of Russia. The tax liabilities of the Group are determined on the assumption that these companies are not subject to Russian profits tax, because they do not have a permanent establishment in Russia. This interpretation of relevant legislation may be challenged but the impact of any such challenge cannot be reliably estimated currently; however, it may be significant to the financial position and/or the overall operations of the Group. The Controlled Foreign Company (CFC) legislation introduced Russian taxation of profits of foreign companies and non-corporate structures (including trusts) controlled by Russian tax residents (controlling parties). The CFC income is subject to a 20% tax rate. As a result, management reassessed the Group's tax positions and recognised current tax expense as well as deferred taxes for temporary differences that arise from the expected taxable manner of recovery of the relevant Group's operations to which the CFC legislation applies to and to the extent that the Group (rather than its owners) is obliged to settle such taxes. Refer to Note 36.

As Russian tax legislation does not provide definitive guidance in certain areas, the Group adopts, from time to time, interpretations of such uncertain areas that reduce the overall tax rate of the Group. While management currently estimates that the tax positions and interpretations that it has taken can probably be sustained, there is a possible risk that outflow of resources will be required should such tax positions and interpretations be challenged by the tax authorities. The impact of any such challenge cannot be reliably estimated; however, it may be significant to the financial position and/or the overall operations of the Group.

In addition to the above matters, management estimates that the Group has other possible obligations from exposure to other than remote tax risks of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) *[Alternative wording:....in the range from RR \_\_\_\_ thousand to RR \_\_\_\_ thousand (2016: in the range from RR \_\_\_\_ thousand to RR \_\_\_\_ thousand)]*. These exposures primarily relate to *[Insert explanation of the specific tax matters]*. These exposures are estimates that result from uncertainties in interpretation of applicable legislation and related documentation requirements. Management will vigorously defend the entity's positions and interpretations that were applied in determining taxes recognised in these financial statements if these are challenged by the authorities.

Included in the above disclosed amount of possible obligations for uncertain tax positions are RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) *[Alternative wording: Included in the above disclosed range of possible obligations for uncertain tax positions are obligations of RR \_\_\_\_ thousand to RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand to RR \_\_\_\_ thousand)]* for which the inspection rights of tax authorities have expired, but which may be challenged by regulatory bodies under certain circumstances. In management's estimate, no losses are anticipated from these contingent liabilities.

### 43 Contingencies and Commitments (Continued)

**Capital expenditure commitments.** At 31 December 2017, the Group has contractual capital expenditure commitments in respect of premises and equipment totalling RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand), and in respect of software and other intangible assets of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand).

[Contractual obligations to purchase, construct or develop investment properties totalled RR \_\_\_\_ thousand at 31 December 2017 (2016: RR \_\_\_\_ thousand). Contractual obligations for repairs, maintenance or enhancements of investment properties totalled RR \_\_\_\_ thousand at 31 December 2017 (2016: RR \_\_\_\_ thousand).]

The Group has already allocated the necessary resources in respect of these commitments. The Group believes that future net income and funding will be sufficient to cover this and any similar such commitments. *[Also include any other commitments, e.g. funding of additional share capital to subsidiary companies in case of separate financial statements of the Bank.]*

**Operating lease commitments.** Where the Group is the lessee, the future minimum lease payments under non-cancellable operating leases are as follows: *[Refer to IAS 17.4 to determine whether the leases meet the definition of "non-cancellable"; if a lease as a whole is considered to be cancellable, it should be included in the disclosure only to the extent of payments during any notice period and/or penalties that apply on cancellation.]*

In thousands of Russian Roubles	2017	2016
Not later than 1 year		
Later than 1 year and not later than 5 years		
Later than 5 years		
<b>Total operating lease commitments</b>		

At 31 December 2017, total future sublease payments receivable under the Group's non-cancellable operating subleases are RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand). *[Refer to IAS 17.4 to determine whether the subleases meet the definition of "non-cancellable"; if a sublease as a whole is considered to be cancellable, it should be included in the disclosure only to the extent of payments during any notice period and/or penalties that apply on cancellation.]*

*[Disclose also a general description of the leasing arrangements. This would include: (i) the basis on which contingent rent payments are determined; (ii) the existence and terms of renewal or purchase options and escalation clauses; and (iii) restrictions imposed by lease arrangements, such as those concerning dividends, additional debt and further leasing.]*

*[Disclosure of details of significant operating leases is required.] [For capital commitments and operating lease commitments review implications of IAS 39, specifically if the commitments are linked to a currency other than the relevant Group entity's functional currency.]*

**Compliance with covenants.** The Group is subject to certain covenants primarily relating to its [borrowings]. Non-compliance with such covenants may result in negative consequences for the Group including [growth in the cost of borrowings and declaration of default]. Management believes that the Group was in compliance with covenants at 31 December 2017 and 31 December 2016. *[Refer to disclosures in IFRS 7.18-19 that must be made with respect to any identified covenant breaches.]*

[The Group and the Bank are also subject to minimum capital requirements established by covenants stated in loan agreements, including capital adequacy levels calculated in accordance with the requirements of the Basel Accord, as defined in the International Convergence of Capital Measurement and Capital Standards (updated April 1998) and the Amendment to the Capital Accord to incorporate market risks (updated November 2005), commonly known as Basel I. The Group complied with this loan covenant.

### 43 Contingencies and Commitments (Continued)

The composition of the Group's capital calculated in accordance with the Basel Accord is as follows:]

<i>In thousands of Russian Roubles</i>	<b>2017</b>	<b>2016</b>
<b>Tier 1 capital</b>		
Share capital		
Cumulative translation reserve		
Retained earnings		
Non-controlling interest		
<b>Total tier 1 capital</b>		
<b>Tier 2 capital</b>		
Revaluation reserves		
Subordinated debt		
<b>Total tier 2 capital</b>		
<b>Total capital</b>		

**Credit related commitments.** The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit, which represent irrevocable assurances that the Group will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Group on behalf of a customer authorising a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions, are collateralised by the underlying shipments of goods to which they relate or cash deposits and, therefore, carry less risk than a direct borrowing.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in an amount equal to the total unused commitments, if the unused amounts were to be drawn down. However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group monitors the term to maturity of credit related commitments, because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments. Outstanding credit related commitments are as follows:

<i>In thousands of Russian Roubles</i>	<b>Note</b>	<b>2017</b>	<b>2016</b>
Commitments to extend credit that are irrevocable or are revocable only in response to a material adverse change. <i>[See IFRS 7.B10(d)]</i>			
Undrawn credit lines that are irrevocable or are revocable only in response to a material adverse change. <i>[See IFRS 7.B10(d)]</i> <i>[Check also applicability of IAS 39.47(d) to loan commitments.]</i>			
Export letters of credit			
Import letters of credit		23	
Financial guarantees issued			
Less: Provision for credit related commitments		27	
Less: Commitment collateralised by cash deposits			
<b>Total credit related commitments, net of provision and cash covered exposures</b>			

### 43 Contingencies and Commitments (Continued)

The total outstanding contractual amount of undrawn credit lines, letters of credit, and guarantees does not necessarily represent future cash requirements, as these financial instruments may expire or terminate without being funded. The fair value of credit related commitments was RR \_\_\_\_ thousand at 31 December 2017 (2016: RR \_\_\_\_ thousand). *[IFRS 7 requires fair value of the off-balance sheet instruments, including loan commitments to be disclosed. The amount disclosed should be fair value and not the committed or guaranteed amount.]* Credit related commitments are denominated in currencies as follows:

<i>In thousands of Russian Roubles</i>	<i>Note</i>	<b>2017</b>	<b>2016</b>
Russian Roubles US Dollars <i>[Expand as appropriate]</i>			
<b>Total</b>			

**Performance guarantees.** Performance guarantees are contracts that provide compensation if another party fails to perform a contractual obligation. Such contracts do not transfer credit risk. The risk under performance guarantee contracts is the possibility that the insured event (i.e. the failure to perform the contractual obligation by another party) occurs. The key risks the Group faces are significant fluctuations in the frequency and severity of payments incurred on such contracts relative to expectations. The Group uses historical data and statistical techniques to predict levels of such payments. Claims must be made before the contract matures and most claims are settled within short term. This allows the Group to achieve a high degree of certainty about the estimated payments and therefore future cash flows. The Group manages such risks by constantly monitoring the level of payments for such products and has the ability to adjust its fees in the future to reflect any change in claim payments experience. The Group has a claim payment requests handling process which includes the right to review the claim and reject fraudulent or non-compliant requests. The exposure and concentration of performance guarantees expressed at the amounts guaranteed is as follows:

<i>In thousands of Russian Roubles</i>	<i>Note</i>	<b>2017</b>	<b>2016</b>
[Product/Exposure 1]			
[Product/Exposure 2]			
[Product/Exposure 3]			
...			
<b>Total guaranteed amounts</b>			

Movements in provisions for performance guarantees are as follows:

<i>In thousands of Russian Roubles</i>	<i>Note</i>	<b>2017</b>	<b>2016</b>
<b>Carrying amount at 1 January</b>			
Initial recognition of issued performance guarantees			
Losses charged to profit or loss		35

Utilisation of provision			
Unwinding of the present value discount and effect of changes in discount rates			
Unused amounts reversed		35	
<b>[Effect of translation to presentation currency]</b>			
Other			
<b>Carrying amount at 31 December</b>			

### 43 Contingencies and Commitments (Continued)

**Assets pledged and restricted.** The Group had assets pledged as collateral with the following carrying value:

Notes <i>In thousands of Russian Roubles</i>	31 December 2017		31 December 2016	
	Asset pledged	Related liability	Asset pledged	Related liability
Trading securities	8, 22			
Gross receivables under currency swaps	19, 22			
Other securities at fair value through profit or loss	9, 22			
Investment securities available for sale	12, 22			
Investment securities held to maturity	14, 22			
Repurchase receivables	13, 22			
Investment properties	16, 22			
Premises and equipment	18, 22			
<b>Total</b>				

At 31 December 2017, due from other banks balances of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) are placed as a cover for letters of credit and international payment cards transactions. [In addition, mandatory cash balances with the CBRF of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) represent mandatory reserve deposits which are not available to finance the Bank's day to day operations as disclosed in Note 3.]

#### 44 Offsetting Financial Assets and Financial Liabilities

Financial instruments subject to offsetting, enforceable master netting and similar arrangements are as follows at 31 December 2017:

<i>In thousands of Russian Roubles</i>	<b>Gross amounts before offsetting in the statement of financial position</b>	<b>Gross amounts set off in the statement of financial position</b>	<b>Net amount after offsetting in the statement of financial position</b>	<b>Amounts subject to master netting and similar arrangements not set off in the statement of financial position</b>	<b>Net amount of exposure</b>
	<b>(b)</b>	<b>(c) = (a) - (b)</b>	<b>(d)</b>	<b>(e)</b>	<b>(c) - (d) - (e)</b>

#### ASSETS

##### **Due from other banks**

*[Expand table as appropriate]*

---

#### **TOTAL LIABILITIES SUBJECT TO OFFSETTING, MASTER NETTING AND SIMILAR ARRANGEMENT**

---

#### 44 Offsetting Financial Assets and Financial Liabilities (Continued)

The amount set off in the statement of financial position reported in column (b) is the lower of (i) the gross amount before offsetting reported in column (a) and (ii) the amount of the related instrument that is eligible for offsetting. Similarly, the amounts in columns (d) and (e) are limited to the exposure reported in column (c) for each individual instrument in order not to understate the ultimate net exposure.

The Group has master netting arrangements with counterparty banks, which are enforceable in case of default. In addition, applicable legislation allows an entity to unilaterally set off trade receivables and payables that are due for payment, denominated in the same currency and outstanding with the same counterparty. These fall in the scope of the disclosure as they were set off in the statement of financial position. The Group also made margin deposits with [clearing house counterparty] as collateral for its outstanding derivative positions. The counterparty may set off the Group's liabilities with the margin deposit in case of default.

The disclosure does not apply to loans and advances to customers and related customer deposits unless they are set off in the statement of financial position.

*[Disclose description of the rights of set-off associated with the entity's recognised financial assets and recognised financial liabilities subject to enforceable master netting arrangements and similar agreements that are disclosed in accordance with paragraph 13C(d) of IFRS 7, including the nature of those rights.]*

*[Refer to paragraphs B40 and B41 of IFRS 7 that define the scope of this disclosure in detail, that is, which financial instruments and collateral should be included in the tables. The disclosure requirements are set out in IFRS 7.13A to 13F.]*

#### 45 Non-Controlling Interest

The following table provides information about each subsidiary that has non-controlling interest that is material to the Group:

In thousands of Russian Roubles	Place of business (and country of incorporation if different)	Proportion of non-controlling interest	Proportion of non-controlling interest's voting rights held	Profit or loss attributable to non-controlling interest	Accumulated non-controlling interest in the subsidiary	Dividends paid to non-controlling interest during the year
---------------------------------	--	--	---	---	--	--

Year ended 31 December 2017

[NAME OF SUBSIDIARY 1]  
 [NAME OF SUBSIDIARY 2]  
*[Expand table as appropriate]*

Year ended 31 December 2016

[NAME OF SUBSIDIARY 1]  
 [NAME OF SUBSIDIARY 2]  
*[Expand table as appropriate]*

**TOTAL**

#### **45 Non-Controlling Interest (Continued)**

The summarised financial information of these subsidiaries was as follows:

	Current assets	Non-current assets	Current liabilities	Non-current liabilities	Revenue	Profit/(loss)	Total comprehensive income	Cash flows
<i>In thousands of Russian Roubles</i>								
<b>Year ended 31 December 2017</b>								
[SUB 1]								
[SUB 2]								
<b>Year ended 31 December 2016</b>								
[SUB 1]								
[SUB 2]								
<i>[Expand as appropriate]</i>								
<b>Total</b>								

[Subsidiary 1] has outstanding borrowing from a third party bank that includes a clause restricting payment of dividends to the parent without the lender's approval. *[Disclose significant restrictions (eg statutory, contractual and regulatory restrictions) on ability to access or use the assets and settle the liabilities of the group.]*

Holders of the non-controlling interest in [Subsidiary 1] approve disposals of assets above [5%] of the subsidiary's total assets and have a right to veto any transaction with related parties with a financial effect above RR \_\_\_\_ thousand. These restrictions apply to all assets of the subsidiary as disclosed above. *[Disclose the nature and extent to which protective rights of non-controlling interests can significantly restrict the entity's ability to access or use the assets and settle the liabilities of the group. Disclose the carrying amounts in the consolidated financial statements of the assets and liabilities to which those restrictions apply.]*

#### **46 Interests in Structured Entities**

##### **(a) Consolidated structured entities**

[The Group holds less than 50% of voting rights in a fully consolidated subsidiary \_\_\_\_\_. The Group has the power and exposure to variable returns of this subsidiary through contractual arrangements with \_\_\_\_\_.] [The Group issued bonds through a consolidated structured entity incorporated in the [country]. This entity was consolidated as it was specifically set up for the purposes of the Group, and the Group has exposure to substantially all risks and rewards through outstanding guarantees of the entity's obligations. The Group guarantees all obligations of this entity represented by the bonds issued of RR \_\_\_\_ thousand.] *[Disclose significant judgements and assumptions made in determining that (a) The Group controls another entity even though it holds less than half of the voting rights of the other entity; and (b) it is an agent or a principal (see paragraphs B58–B72 of IFRS 10).] [Disclose the terms of any contractual arrangements that could require the parent or its subsidiaries to provide financial support to a consolidated structured entity. This applies also to securitisation transactions. Also disclose details of any support provided during the year and an intention to provide support – see IFRS 12.15-16]*

##### **(b) Unconsolidated structured entities**

[The Group holds more than 50% of voting rights in \_\_\_\_\_ but does not have the power over this entity due to contractual arrangements with \_\_\_\_\_, which specify that \_\_\_\_\_. Consequently \_\_\_\_\_ [entity] is not consolidated.] *[Disclose significant judgements and assumptions made in determining that: (a) the Group does not control another entity even though it holds more than half of the voting rights of the other entity; (b) it is an agent or a principal (see paragraphs B58–B72 of IFRS 10); (c) it does not have significant influence even though it holds 20 per cent or more of the voting rights of another entity and (d) it has significant influence even though it holds less than 20 per cent of the voting rights of another entity.]*

#### 46 Interests in Structured Entities (Continued)

Information about unconsolidated structured entities is as follows:

	Year ended 31 December 2017			At 31 December 2017		
	Income from the structured entity for the year	Carrying amount of assets transferred to the structured entity during the year	Support provided to the structured entity during the year	Carrying amount of assets recognised for exposure to the structured entity	Carrying amount of liabilities recognised for exposure to the structured entity	Maximum exposure to loss from interest in structured entity
<i>In thousands of Russian Roubles</i>						
[Leasing entity]						
[Securitisation vehicle]						
[Expand table as appropriate]						
<b>TOTAL</b>						

[Disclose narrative text to cover the following information where material:

- the nature, purpose, size and activities of the unconsolidated structured entity;
- how the unconsolidated structured entity is financed;
- how it has determined which structured entities the Group has sponsored;
- a description of the types of income from structured entities presented above;
- the line items in the statement of financial position in which the assets and liabilities relating to unconsolidated structured entity are recognised;
- description how the maximum exposure to loss is determined;
- the type of support provided to structured entity, including situations in which the entity assisted the structured entity in obtaining financial support; and the reasons for providing the support;
- any current intentions to provide financial or other support to an unconsolidated structured entity, including intentions to assist the structured entity in obtaining financial support;
- the terms of an arrangement that could require the entity to provide financial support to an unconsolidated structured entity (eg liquidity arrangements or credit rating triggers associated with obligations to purchase assets of the structured entity or provide financial support), including: (i) description of events or circumstances that could expose the reporting entity to a loss, (ii) whether there are any terms that would limit the obligation, (ii) whether there are any other parties that provide financial support and, if so, how the reporting entity's obligation ranks with those of other parties.
- losses incurred by the entity during the reporting period relating to its interests in unconsolidated structured entities.
- the types of income the entity received during the reporting period from its interests in unconsolidated structured entities.
- whether the entity is required to absorb losses of an unconsolidated structured entity before other parties, the maximum limit of such losses for the entity, and (if relevant) the ranking and amounts of potential losses borne by parties whose interests rank lower than the entity's interest in the unconsolidated structured entity.
- information about any liquidity arrangements, guarantees or other commitments with third parties that may affect the fair value or risk of the entity's interests in unconsolidated structured entities.
- any difficulties an unconsolidated structured entity has experienced in financing its activities during the reporting period.
- in relation to the funding of an unconsolidated structured entity, the forms of funding (e.g. commercial paper or medium-term notes) and their weighted-average life. That information might include maturity analyses of the assets and funding of an unconsolidated structured entity if the structured entity has longer-term assets funded by shorter-term funding.]

## 47 Transfers of Financial Assets

### (a) Transfers that did not qualify for de-recognition of the financial asset in its entirety.

The Group transferred financial assets in transactions that did not qualify for de-recognition in the current and prior periods.

**Disposal of loans.** At 31 December 2017, the Group had [corporate] loans of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) that were transferred to [a related party under common control]. The Group guaranteed repayment of the nominal value of the transferred loans in case of their default after 360 days. The Group is not exposed to late payment risk as it did not guarantee payment of accrued interest. As the transfer did not meet criteria for de-recognition of the loans, at 31 December 2017 the sale proceeds of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) were recognised as borrowings and are presented in Note 25. *[Note: disclose by class of financial assets the nature of the transferred assets, nature of retained risks and rewards and description of the relationship with the related liabilities including any restrictions on the use of the transferred assets.]*

**Securitisation transaction.** In addition, at 31 December 2017 the Group transferred [corporate] loans of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) to a securitisation structured entity that the Group consolidates because it acquired all of its subordinated borrowings amounting to RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand). Refer to Note 25 for carrying value of the related borrowings that are represented by senior notes issued by the securitisation special purpose entity to third party investors.

**Sale and repurchase transactions.** At 31 December 2017, the Group has trading securities represented by [Russian government bonds] of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) and available for sale securities represented by [corporate bonds] of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) that are subject to obligation to repurchase the securities for a fixed pre-determined price. Refer to Notes 22 and 23 for the carrying value of obligations from these sale and repurchase transactions.

**Securities lending transactions.** At 31 December 2017, the Group had trading securities represented by [Russian government bonds] of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) that were provided to counterparties in a securities lending transaction in exchange for a fee.

The following schedule summarises transfers where the entity continues to recognise all of the transferred financial assets. The analysis is provided by class of financial assets.

Notes <i>In thousands of Russian Roubles</i>	31 December 2017		31 December 2016	
	Carrying amount of the assets at year end	Carrying amount of the associated liabilities	Carrying amount of the assets at year end	Carrying amount of the associated liabilities

<b>Total</b>						

#### (b) Transfers that qualified for de-recognition of the financial asset in its entirety.

The Group transferred financial assets in transactions that qualified for de-recognition in the current and prior periods and to which the Group retained exposed to a certain extent.

#### 47 Transfers of Financial Assets (Continued)

**Disposal of loans.** At 31 December 2017, the Group had remaining exposure to [mortgage] loans that had carrying value of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) immediately before they were transferred to [a related party under common control]. The Group is exposed to late payment risk as it guaranteed payment of interest over a period up to 30 days from the date of transfer. The loans were derecognised in their entirety as the retained late payment risk was not considered significant.

**Securitisation transaction.** In addition, at 31 December 2017, the Group had remaining exposure to [corporate] loans that had carrying value of RR \_\_\_\_ thousand (2016: RR \_\_\_\_ thousand) immediately before their transfer to a securitisation special purpose entity that the Group does not consolidate. The loans were derecognised in their entirety because the written put option to repurchase them was deeply out of money at the date of the transfer and substantially all of the subordinated borrowings of the securitisation special purpose entity were acquired by third party investors.

The following schedule summarises information about continuing involvement in the transferred financial assets that qualified for de-recognition. The analysis is provided by type of continuing involvement outstanding at 31 December 2017:

	Cash outflows to repurchase the derecognised assets or other payments	Carrying amount of continuing involvement in the consolidated statement of financial position			Fair value of continuing involvement		Maximum exposure to loss
		Derivative financial assets	Derivative financial liabilities	Provisions	Assets	Liabilities	
<i>In thousands of Russian Roubles</i>							
Written put options							
Purchased call options							
Late payment risk guarantee							

The analysis is provided by type of continuing involvement outstanding at 31 December 2016:

	Cash outflows to repurchase the derecognised assets or other payments	Carrying amount of continuing involvement in the consolidated statement of financial position			Fair value of continuing involvement		Maximum exposure to loss
		Derivative financial assets	Derivative financial liabilities	Provisions	Assets	Liabilities	
<i>In thousands of Russian Roubles</i>							
Written put options							
Purchased call options							
Late payment risk guarantee							

*[Note: The 'Cash outflows to repurchase the derecognised assets or other payments' represent maximum possible future payments that the entity could be required to pay, e.g. exercise price of the written put option, exercise price of the purchased call option or the maximum amount that the entity could be required to pay under the late payment risk guarantee.]*

The following schedule presents remaining contractual maturity analysis of the undiscounted cash flows to repurchase the transferred assets or other amounts payable to the transferee in respect of financial assets that qualified for derecognition. Where the cash flows are variable, they are disclosed based on the conditions that existed at each reporting date. The analysis is provided by type of continuing involvement outstanding at the respective end of the reporting period:

**47 Transfers of Financial Assets (Continued)**

	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	From 12 months to 5 years	Over 5 years	Total
<i>In thousands of Russian Roubles</i>						

**At 31 December 2017**

Written put options  
Purchased call options  
Late payment risk guarantee

**Total potential cash outflows**

**At 31 December 2016**

Written put options  
Purchased call options  
Late payment risk guarantee

**Total potential cash outflows**

The following schedule presents gains less losses recognised on the date of transfer, subsequent gains or losses recognised on the continuing involvement and the cumulative amount of the gains or losses. The analysis is provided by type of continuing involvement.

	Year ended 31 December 2017			Year ended 31 December 2016		
	The gain or loss recog- nised at the date of transfer	Subse- quent gains and losses recog- nised in the reporting period	Cumula- tive amount of gains and losses recog- nised	The gain or loss recog- nised at the date of transfer	Subse- quent gains and losses recog- nised in the reporting period	Cumula- tive amount of gains and losses recog- nised
<i>In thousands of Russian Roubles</i>						

Written put options

Later payment risk guarantee

**Total**

#### **47 Transfers of Financial Assets (Continued)**

The transfer activity was not evenly distributed during the reporting period. The following schedule provides analysis of transfer activity by month and by type of the continuing involvement during 2017:

<i>In thousands of Russian Roubles</i>	Jan	Feb	Mar	April	May	June	July	Aug	Sept	Oct	Nov	Dec
<i>Written put options:</i>												
Gains less losses recognised												
Proceeds from transfer activity												
<i>Purchased call options:</i>												
Gains less losses recognised												
Proceeds from transfer activity												
<i>Late payment risk guarantee:</i>												
Gains less losses recognised												
Proceeds from transfer activity												

The following schedule provides analysis of transfer activity by month and by type of the continuing involvement during 2016:

<i>In thousands of Russian Roubles</i>	Jan	Feb	Mar	April	May	June	July	Aug	Sept	Oct	Nov	Dec
<i>Written put options:</i>												
Gains less losses recognised												
Proceeds from transfer activity												
<i>Purchased call options:</i>												
Gains less losses recognised												
Proceeds from transfer activity												
<i>Late payment risk guarantee:</i>												
Gains less losses recognised												
Proceeds from transfer activity												

*[Note: Where there was only a small number of transactions, the text may replace the above table, e.g. as follows:]* [The transfer activity was not evenly distributed during the reporting period. In [month] 2017, the Group sold a portfolio of [loans] for RR \_\_\_\_ thousand recognising a net gain of RR \_\_\_\_ thousand. In this transaction, the Group [guaranteed late payment risk up to 30 days by agreeing to pay late payment interest for such period to the purchaser]. In [month] 2017, the Group sold a portfolio of [loans] for RR \_\_\_\_ thousand recognising a net gain of RR \_\_\_\_ thousand. In this transaction, the Group [issued to the purchaser a put option that was deeply out of money].]

In [month] 2016, the Group sold a portfolio of [loans] for RR \_\_\_\_ thousand recognising a net gain of RR \_\_\_\_ thousand. In this transaction, the Group [guaranteed late payment risk up to 30 days by agreeing to pay late payment interest for such period to the purchaser]. In [month] 2016, the Group sold a portfolio of [loans] for RR \_\_\_\_ thousand recognising a net gain of RR \_\_\_\_ thousand. In this transaction, the Group [issued to the purchaser a put option that was deeply out of money].]

## 48 Reclassifications of Financial Instruments made in 2008

### (a) *Reclassification from assets held for trading*

The Group reclassified the following financial assets from held for trading category during 2008:

<i>In thousands of Russian Roubles</i>	<b>Amount reclassified</b>	<b>Cash flows expected to be recovered (at the date of reclassification)</b>	<b>Effective interest rate</b>
<i>Reclassified into held to maturity</i>			
Russian government bonds			
Municipal bonds			
Corporate bonds			
Promissory notes			
<i>Reclassified into loans and receivables</i>			
Russian government bonds			
Municipal bonds			
Corporate bonds			
Promissory notes			
<i>Reclassified into available for sale</i>			
Russian government bonds			
Municipal bonds			
Corporate bonds			
Promissory notes			
<b>Total</b>			

The reclassification was made effective from [1 July 2008 when, in management's opinion, the third quarter 2008 collapse in financial markets liquidity and stability commenced, which has also led to the International Accounting Standards Board issuing the amendment allowing reclassifications from that date]. [Management believes that the decline in market prices that occurred in the third quarter of 2008, represents a rare event as it is significantly out of line with historical volatilities observed in financial markets.] *[If a different date is chosen, describe the rare event that occurred on that date.]*

At the end of the reporting period, the carrying amounts and fair values of all financial assets that have been reclassified from trading securities and which were not yet sold or otherwise derecognised, were as follows:

<i>In thousands of Russian Roubles</i>	<b>31 December 2017</b>		<b>31 December 2016</b>	
	<b>Carrying value</b>	<b>Fair value</b>	<b>Carrying value</b>	<b>Fair value</b>
<i>Held to maturity assets</i>				
Russian government bonds				
Municipal bonds				
Corporate bonds				
Promissory notes				
<i>Loans and receivables</i>				
Russian government bonds				
Municipal bonds				
Corporate bonds				
Promissory notes				
<i>Available for sale</i>				
Russian government bonds				
Municipal bonds				
Corporate bonds				
Promissory notes				
<b>Total</b>				

#### 48 Reclassifications of Financial Instruments made in 2008 (Continued)

The fair value gain/(loss) recognised in profit or loss up to the date of reclassification in 2008 was RR \_\_\_\_\_ thousand for Russian government bonds, RR \_\_\_\_\_ thousand for municipal bonds, RR \_\_\_\_\_ thousand for corporate bonds and RR \_\_\_\_\_ thousand for promissory notes.

The income or loss recognised after reclassification, and fair value gain or loss that would have been recognised if the assets had not been reclassified, were as follows:

<i>In thousands of Russian Roubles</i>	Russian government bonds		Municipal bonds		Corporate bonds		Promissory notes	
	Income after reclassification*	Gain/ (loss) without reclassification**	Income after reclassification*	Gain/ (loss) without reclassification**	Income after reclassification*	Gain/ (loss) without reclassification**	Income after reclassification*	Gain/ (loss) without reclassification**
Year								
2008								
2009								
2010								
2011								
2012								
2013								
2014								
2015								
2016								
2017								

\* Income/(loss) recognised in profit or loss after reclassification. It comprises interest income, foreign exchange gains less losses and impairment losses.

\*\* Gain/ (loss) that would have been recognised if the assets had not been reclassified

In addition, for assets reclassified to available for sale category, income or loss recognised in other comprehensive income after reclassification was as follows:

<i>In thousands of Russian Roubles</i>	Russian government bonds		Municipal bonds		Corporate bonds		Promissory notes	
	Income after reclassification*	Gain/ (loss) without reclassification**	Income after reclassification*	Gain/ (loss) without reclassification**	Income after reclassification*	Gain/ (loss) without reclassification**	Income after reclassification*	Gain/ (loss) without reclassification**

2015								
2016								
2017								

**48 Reclassifications of Financial Instruments made in 2008 (Continued)**

**(b) Reclassification from available-for-sale assets**

The Group reclassified the following financial assets from the available-for-sale category during 2008:

<i>In thousands of Russian Roubles</i>	<b>Amount reclassified</b>	<b>Cash flows expected to be recovered (at the date of reclassification)</b>	<b>Effective interest rate</b>
<i>Reclassified into held to maturity</i>			
Russian government bonds			
Municipal bonds			
Corporate bonds			
Promissory notes			
<i>Reclassified into loans and receivables</i>			
Russian government bonds			
Municipal bonds			
Corporate bonds			
Promissory notes			
<b>Total</b>			

The reclassification was made effective from [1 July 2008 when, in management's opinion, the third quarter 2008 collapse in financial markets liquidity and stability commenced, which has also led to the International Accounting Standards Board issuing the amendment allowing reclassifications from that date].

Management believes that the decline in market prices that occurred in the third quarter of 2008 represented a rare event as it was significantly out of line with historical volatilities observed in financial markets. *[If a different date is chosen, describe the rare event for the reclassification that occurred on that date.]*

The carrying amounts and fair values of financial assets that have been reclassified from investment securities available for sale, and which were not yet sold or otherwise derecognised, were as follows:

<i>In thousands of Russian Roubles</i>	<b>31 December 2017</b>		<b>31 December 2016</b>	
	<b>Carrying value</b>	<b>Fair value</b>	<b>Carrying value</b>	<b>Fair value</b>
<i>Loans and receivables</i>				
Russian government bonds				
Municipal bonds				
Corporate bonds				
Promissory notes				
<b>Total</b>				

#### 48 Reclassifications of Financial Instruments made in 2008 (Continued)

The fair value gain/(loss) recognised in other comprehensive income up to the date of reclassification in 2008 was RR \_\_\_\_\_ thousand for Russian government bonds, RR \_\_\_\_\_ thousand for municipal bonds, RR \_\_\_\_\_ thousand for corporate bonds and RR \_\_\_\_\_ thousand for promissory notes.

The fair value gains or losses on these financial assets that would have been recognised in other comprehensive income if the assets had not been reclassified, were as follows:

<i>In thousands of Russian Roubles</i>	<b>Russian government bonds</b>	<b>Municipal bonds</b>	<b>Corporate bonds</b>	<b>Promissory notes</b>
Year				
2008*				
2009**				
2010**				
2011**				
2012**				
2013**				
2014**				
2015**				
2016**				
2017**				

\* The fair value gain/(loss) recognised in other comprehensive income up to the date of reclassification (in 2008).

\*\* Gain/(loss) that would have been recognised in other comprehensive income if the assets had not been reclassified.

The fair value gain/(loss) recognised in profit or loss up to the date of reclassification in 2008 was RR \_\_\_\_\_ thousand for Russian government bonds, RR \_\_\_\_\_ thousand for municipal bonds, RR \_\_\_\_\_ thousand for corporate bonds and RR \_\_\_\_\_ thousand for promissory notes.

The income or loss recognised in profit or loss after reclassification and fair value gain or loss that would have been recognised in profit or loss if the assets had not been reclassified, were as follows:

<i>In thousands of Russian Roubles</i>	<b>Russian government bonds</b>		<b>Municipal bonds</b>		<b>Corporate bonds</b>		<b>Promissory notes</b>	
	<b>Income after reclassification*</b>	<b>without reclassification**</b>						
Year								
2008

\* Income/(loss) recognised in profit or loss after reclassification. It comprises interest income, foreign exchange gains less losses and impairment losses.

\*\* Gain/ (loss) that would have been recognised if the assets had not been reclassified

## 49 Reclassifications of Financial Instruments made in 2014

### (a) *Reclassification from assets held for trading*

The Group reclassified the following financial assets from held for trading category in December 2014:

<i>In thousands of Russian Roubles</i>	<b>Amount reclassified</b>	<b>Cash flows expected to be recovered (at the date of reclassification)</b>	<b>Effective interest rate</b>
<i>Reclassified into held to maturity</i>			
Russian government bonds			
Municipal bonds			
Corporate bonds			
Promissory notes			
<i>Reclassified into loans and receivables</i>			
Russian government bonds			
Municipal bonds			
Corporate bonds			
Promissory notes			
<i>Reclassified into available for sale</i>			
Russian government bonds			
Municipal bonds			
Corporate bonds			
Promissory notes			
<b>Total</b>			

The reclassification was made on 16 December 2014 when, in management's opinion, the effects of falling crude oil prices combined with the international sanctions culminated in a collapse in Russian financial markets liquidity and stability evidenced by a significant depreciation of the rouble exchange rate, a significant fall in stock market prices, and a sudden rise in interest rates as the Central Bank of Russia lifted the refinancing rate to 17 percent, up from 10.5 per cent, in an attempt to stop the depreciation of the rouble. Management believes that these events, referred to by the press as "Black Tuesday", represent a rare event that is unusual and highly unlikely to recur in the near term.

At the end of the reporting period, the carrying amounts and fair values of all financial assets that have been reclassified from trading securities and which were not yet sold or otherwise derecognised, were as follows:

<i>In thousands of Russian Roubles</i>	<b>31 December 2017</b>		<b>31 December 2016</b>	
	<b>Carrying value</b>	<b>Fair value</b>	<b>Carrying value</b>	<b>Fair value</b>
<i>Held to maturity assets</i>				
Russian government bonds				
Municipal bonds				
Corporate bonds				
Promissory notes				
<i>Loans and receivables</i>				
Russian government bonds				
Municipal bonds				
Corporate bonds				
Promissory notes				
<i>Available for sale</i>				
Russian government bonds				
Municipal bonds				
Corporate bonds				
Promissory notes				
<b>Total</b>				

#### 49 Reclassifications of Financial Instruments made in 2014 (Continued)

The fair value gain/(loss) recognised in profit or loss up to the date of reclassification in 2008 was RR \_\_\_\_\_ thousand for Russian government bonds, RR \_\_\_\_\_ thousand for municipal bonds, RR \_\_\_\_\_ thousand for corporate bonds and RR \_\_\_\_\_ thousand for promissory notes.

The income or loss recognised after reclassification, and fair value gain or loss that would have been recognised if the assets had not been reclassified, were as follows:

In thousands of Russian Roubles	Russian government bonds		Municipal bonds		Corporate bonds		Promissory notes	
	Income after reclassification*	Gain/ (loss)						
Year								
2014								
2015								
2016								
2017								

\* Income/(loss) recognised in profit or loss after reclassification. It comprises interest income, foreign exchange gains less losses and impairment losses.

\*\* Gain/ (loss) that would have been recognised if the assets had not been reclassified

In addition, for assets reclassified to available for sale category, income or loss recognised in other comprehensive income after reclassification was as follows:

In thousands of Russian Roubles	Russian government bonds	Municipal bonds	Corporate bonds	Promissory notes
Year				
2014				
2015				
2016				
2017				

##### (b) Reclassification from available-for-sale assets

The Group also reclassified the following financial assets from the available-for-sale category in December 2014:

In thousands of Russian Roubles	Amount reclassified	Cash flows expected to be recovered (at the date of reclassification)	Effective interest rate
<i>Reclassified into held to maturity</i>			
Russian government bonds			
Municipal bonds			
Corporate bonds			
Promissory notes			
<i>Reclassified into loans and receivables</i>			
Russian government bonds			
Municipal bonds			
Corporate bonds			
Promissory notes			
<b>Total</b>			

#### **49 Reclassifications of Financial Instruments made in 2014 (Continued)**

The reclassification was made on 16 December 2014 when, in management's opinion, the effects of falling crude oil prices combined with the international sanctions culminated in a collapse in Russian financial markets liquidity and stability evidenced by a significant depreciation of the rouble exchange rate, a significant fall in stock market prices, and a sudden rise in interest rates as the Central Bank of Russia lifted the refinancing rate to 17 percent, up from 10.5 percent, in an attempt to stop the depreciation of the rouble. Management believes that these events, referred to by the press as "Black Tuesday", represent a rare event that is unusual and highly unlikely to recur in the near term.

The carrying amounts and fair values of financial assets that have been reclassified from investment securities available for sale, and which were not yet sold or otherwise derecognised, were as follows:

<i>In thousands of Russian Roubles</i>	<b>31 December 2017</b>		<b>31 December 2016</b>	
	<b>Carrying value</b>	<b>Fair value</b>	<b>Carrying value</b>	<b>Fair value</b>
<i>Loans and receivables</i>				
Russian government bonds				
Municipal bonds				
Corporate bonds				
Promissory notes				
<b>Total</b>				

The fair value gain/(loss) recognised in other comprehensive income up to the date of reclassification in 2014 was RR \_\_\_\_\_ thousand for Russian government bonds, RR \_\_\_\_\_ thousand for municipal bonds, RR \_\_\_\_\_ thousand for corporate bonds and RR \_\_\_\_\_ thousand for promissory notes.

The fair value gains or losses that would have been recognised in other comprehensive income if the assets had not been reclassified, were as follows:

<i>In thousands of Russian Roubles</i>	<b>Russian government bonds</b>	<b>Municipal bonds</b>	<b>Corporate bonds</b>	<b>Promissory notes</b>
Year				
2014**				
2015**				
2016**				
2017**				

\* The fair value gain/(loss) recognised in other comprehensive income up to the date of reclassification (in 2008).

\*\* Gain/(loss) that would have been recognised in other comprehensive income if the assets had not been reclassified.

## 49 Reclassifications of Financial Instruments made in 2014 (Continued)

The fair value gain/(loss) recognised in profit or loss up to the date of reclassification in 2014 was RR \_\_\_\_\_ thousand for Russian government bonds, RR \_\_\_\_\_ thousand for municipal bonds, RR \_\_\_\_\_ thousand for corporate bonds and RR \_\_\_\_\_ thousand for promissory notes.

The income or loss recognised in profit or loss after reclassification and fair value gain or loss that would have been recognised in profit or loss if the assets had not been reclassified, were as follows:

	Russian government bonds		Municipal bonds		Corporate bonds		Promissory notes	
	Income after reclassi- fication*	Gain/ (loss) without reclassi- fication**	Income after reclassi- fication*	Gain/ (loss) without reclassi- fication**	Income after reclassi- fication*	Gain/ (loss) without reclassi- fication**	Income after reclassi- fication*	Gain/ (loss) without reclassi- fication**
<i>In thousands of Russian Roubles</i>								
Year								
2014								
2015								
2016								
2017								

\* Income/(loss) recognised in profit or loss after reclassification. It comprises interest income, foreign exchange gains less losses and impairment losses.

\*\* Gain/ (loss) that would have been recognised if the assets had not been reclassified.

## 50 Derivative Financial Instruments

The table below sets out fair values, at the end of the reporting period, of currencies receivable or payable under foreign exchange forward and swap contracts entered into by the Group. The table reflects gross positions before the netting of any counterparty positions (and payments) and covers the contracts with settlement dates after the end of the respective reporting period. The contracts are short term in nature:

	Notes	2017		2016	
		Contracts with positive fair value	Contracts with negative fair value	Contracts with positive fair value	Contracts with negative fair value
<i>In thousands of Russian Roubles</i>					
<b>Foreign exchange forwards and swaps: fair values, at the end of the reporting period, of</b>					
<b>foreign exchange forwards and swaps: fair values, at the end of the reporting period, of</b>	41				
- USD receivable on settlement (+)					
- USD payable on settlement (-)					
- Euros receivable on settlement (+)					
- Euros payable on settlement (-)					
- RR receivable on settlement (+)					
- RR payable on settlement (-)					
- Other currencies receivable on settlement (+)					
- Other currencies payable on settlement (-)					
<b>Net fair value of foreign exchange forwards and swaps</b>	19, 27				

*[Include in the above table the present value of foreign currencies receivable or payable on the future settlement of the foreign exchange forward contracts. The net amount is the fair value of the forwards at the end of the reporting period.]*

**50 Derivative Financial Instruments (Continued)**

Foreign exchange [and other] derivative financial instruments entered into by the Group are generally traded in an over-the-counter market with professional market counterparties on standardised contractual terms and conditions. Derivatives have potentially favourable (assets) or unfavourable (liabilities) conditions as a result of fluctuations in market interest rates, foreign exchange rates or other variables relative to their terms. The aggregate fair values of derivative financial assets and liabilities can fluctuate significantly from time to time.

[At 31 December 2017, the Group had outstanding obligations to deliver precious metals with fair value of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) and obligations to accept delivery of precious metals with fair value of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). *[The amounts in the previous sentence are gross values. For example you disclose RR 450k for a contract to deliver 1kg of gold for RR 400k when price of gold is 450k/kg at the end of the reporting period.]* The Group expects to settle these forward contracts net in cash and, therefore, recognised them in the statement of financial position as an asset at net fair value of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) and a liability at net fair value of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). Refer to Notes 19 and 27. ]

At 31 December 2017, the Group had outstanding obligations from unsettled spot transactions with foreign currencies [and precious metals] of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). The net fair value of unsettled spot transactions is insignificant.

[The Group had outstanding obligations to deliver shares with fair value, at the end of the reporting period, of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) and obligations to accept delivery of \_\_\_\_\_ shares with fair value, at the end of the reporting period, of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). *[The amounts in the previous sentence are gross values, similarly to precious metals disclosure.]* These forwards were recognised in the statement of financial position as an asset at fair value of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) and a liability at fair value of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). Refer to Notes 19 and 27.]

*[Describe any other derivatives held by the Group, e.g. share options – for example as follows:]*

At 31 December 2017, the Group had outstanding [written] [purchased] put options giving [the counterparty] [the Group] the right to sell [shares] with fair value of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) to [the Group] [the counterparty] for RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). The options can be exercised [from \_\_\_\_\_ 200X to \_\_\_\_\_ 200X]. The fair value of the outstanding put options was recognised as [a liability] [an asset] of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). Refer to Notes 19 and 27.

At 31 December 2017, the Group had outstanding [written] [purchased] call options giving [the counterparty] [the Group] the right to buy [shares] with fair value of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand) from [the Group] [the counterparty] for RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). The options can be exercised [from \_\_\_\_\_ 200X to \_\_\_\_\_ 200X]. The fair value of the outstanding call options was recognised as [a liability] [an asset] of RR \_\_\_\_\_ thousand (2016: RR \_\_\_\_\_ thousand). Refer to Notes 19 and 27.

## 51 Fair Value Disclosures

*[Note: This note should be tailored to the circumstances of each entity, e.g. description of valuation processes, disclosure of assumptions and valuation methods will significantly differ among entities.]*

Fair value measurements are analysed by level in the fair value hierarchy as follows: (i) level one are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities, (ii) level two measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices), and (iii) level three measurements are valuations not based on observable market data (that is, unobservable inputs). Management applies judgement in categorising financial instruments using the fair value hierarchy. If a fair value measurement uses observable inputs that require significant adjustment, that measurement is a Level 3 measurement. The significance of a valuation input is assessed against the fair value measurement in its entirety.

### **(a) Recurring fair value measurements**

Recurring fair value measurements are those that the accounting standards require or permit in the statement of financial position at the end of each reporting period. The level in the fair value hierarchy into which the recurring fair value measurements are categorised are as follows:

<i>In thousands of Russian Roubles</i>	31 December 2017			31 December 2016			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
<b>ASSETS AT FAIR VALUE</b>							
<b>FINANCIAL ASSETS</b>							
<i><b>Trading securities</b></i>							
- Russian government bonds							
- Municipal bonds

- Other derivative financial instruments								
- Short sales of securities								
<b>TOTAL LIABILITIES RECURRING FAIR VALUE MEASUREMENTS</b>								

The investment in [company] included in trading securities ceased to be traded in an active market in [October 2016] due to the deteriorating financial markets liquidity, and was reported as a level 2 instrument in the above analysis at 31 December 2016. In [November 2017], trading resumed and the investment was reclassified and reported as a level 1 instrument in the above analysis at 31 December 2017. *[Disclose transfers between Level 1 and Level 2 and reasons for the transfers.]*

The Group uses a [discounted cash flow] valuation technique to measure the fair value of [currency swaps] that are not traded in an active market. However, in accordance with IFRS, the fair value of an instrument at inception is generally the transaction price. If the transaction price differs from the amount determined at inception using the valuation technique, that difference is amortised on a straight line basis over the term of the [currency swaps]. The differences yet to be recognised in profit or loss for the year ([as gains less losses on financial derivatives]) are as follows:

<i>In thousands of Russian Roubles</i>	2017	2016
Balance at 1 January		
New transactions		
Amounts recognised in profit or loss for the year ([as gains less losses on financial derivatives])		
Other		
<b>Balance at 31 December (Note 19)</b>		

*[The above reconciliation table should be provided separately for each class of financial instruments. Refer to IFRS 7.28].*

## 51 Fair Value Disclosures (Continued)

<b>TOTAL RECURRING FAIR VALUE MEASUREMENTS AT LEVEL 2</b>						

## 51 Fair Value Disclosures (Continued)

The above tables disclose sensitivity to valuation inputs for financial assets and financial liabilities, if changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would change fair value significantly. For this purpose, significance was judged with respect to profit or loss, and total assets or total liabilities, or, when changes in fair value are recognised in other comprehensive income, total equity.

There were no changes in valuation technique for level 3 recurring fair value measurements during the year ended 31 December 2017 (2016: none). *[Disclose nature and reason for change in valuation technique, disclose inputs used in prior valuation technique.]* Investment property represents industrial land and buildings that the Group valued using its expectation to convert them into a residential complex. *[Disclose if highest and best use differs from current use.]*

The Group has margin deposits with its counterparties, which serves as collateral for its outstanding derivative liabilities. In addition, the Group's liabilities to its customers are subject to state deposit insurance scheme as described in Note 1. The fair value of these liabilities reflects these credit enhancements. *[See IFRS 13.98.]*

The sensitivity of fair value measurement disclosed in the above table shows the direction that an increase or decrease in the respective input variables would have on the valuation result. For equity securities, increases in the EBITDA multiple would each lead to an increase in estimated value. However, an increase in the discount for lack of marketability would lead to a decrease in value. For debt securities, increases in discount rates and probability of default would both lead to a decrease in estimated value. No interrelationships between unobservable inputs used in the Group's valuation of its Level 3 equity investments have been identified. However, for Level 3 debt securities, a change in the assumption used for the probability of default is expected to be accompanied by a directionally similar change in the discount rate. A reconciliation of movements in Level 3 of the fair value hierarchy by class of instruments for the year ended 31 December 2017 is as follows:

<i>In thousands of Russian Roubles</i>	Other securities at fair value through profit or loss		Securities available for sale		Financial derivative assets	Financial derivative liabilities <i>[Expand as appropriate]</i>
	Corporate shares	Promissory notes	Promissory notes	Corporate shares		
<b>Fair value at 1 January 2017</b>						
Gains or losses recognised in profit or loss for the year						
Gains or losses recognised in other comprehensive income						
Purchases						
Issues or origination						
Sales						
Settlements						
Transfers out of level 3						
Transfers into level 3						
<b>Fair value at 31 December 2017</b>						
<b>Unrealised revaluation gains less losses recognised in profit or loss for the year for assets held at 31 December 2017</b>						

Certain derivatives and promissory notes were reclassified from level 3 to level 2 instruments due to the increased activity in financial markets in 2016. *[Describe significant transfers into and out of level 3.]*

## 51 Fair Value Disclosures (Continued)

A reconciliation of movements in Level 3 of the fair value hierarchy by class of instruments for the year ended 31 December 2016 is as follows:

In thousands of Russian Roubles	Other securities at fair value through profit or loss		Securities available for sale		Financial derivative assets	Financial derivative liabilities
	Corporate shares	Promissory notes	Promissory notes	Corporate shares		[Expand table as appropriate]

### Fair value at 1 January 2016

Gains or losses recognised in profit or loss for the year  
 Gains or losses recognised in other comprehensive income  
 Purchases  
 Issues or origination  
 Sales  
 Settlements  
 Transfers out of level 3  
 Transfers into level 3

### Fair value at 31 December 2016

Unrealised revaluation gains less losses recognised in profit or loss for the year for assets held at 31 December 2016

Gains and losses on derivatives are [presented separately in profit or loss for the year.] *[Disclose where the gains/losses are in the profit for the year.]*

Certain derivatives and promissory notes were reclassified from level 3 to level 2 instruments due to the increased activity in financial markets in 2016. *[Describe significant transfers into and out of level 3.]*

### (b) Non-recurring fair value measurements

The Group has written down its non-current assets held for sale to fair value less costs to sell. The fair value belongs to level 3 measurements in the fair value hierarchy. The valuation technique and inputs used in the fair value measurement at 31 December 2017:

In thousands of Russian Roubles	Fair value	Valuation technique	Inputs used	Range of inputs (weighted average)	
				31 Dec 2017	31 Dec 2016
Non-current assets held for sale	[Discounted cash flows ("DCF")]		WACC Terminal growth Growth rate for years 1 to 5	[5.0 -6.0% (5.5%)]	[5.0 -6.0% (5.5%)]

[Non-current assets held for sale include an investment property that represents industrial land and buildings. The Group valued it using its expectation to convert it into a residential complex.] *[Disclose that highest and best use differs from current use.]*

## **51 Fair Value Disclosures (Continued)**

### **(c) Valuation processes for recurring and non-recurring level 3 fair value measurements**

Level 3 valuations are reviewed on a weekly basis by the Group's valuation committee who report to the Board of Directors on a monthly basis. The committee considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognised as standard within the financial services industry. In selecting the most appropriate valuation model the committee performs back testing and considers which model's results have historically aligned most closely to actual market transactions. In order to value level three equity investments, the Group utilises comparable trading multiples. Management determines comparable public companies (peers) based on industry, size, developmental stage and strategy. Management then calculates a trading multiple for each comparable company identified. The multiple is calculated by dividing the enterprise value of the comparable company by its earnings before interest, taxes, depreciation and amortisation (EBITDA). The trading multiple is then discounted for considerations such as illiquidity and differences between the comparable companies based on company-specific facts and circumstances.

The level three debt instruments are valued at the net present value of estimated future cash flows. The Group also considers liquidity, credit and market risk factors, and adjusts the valuation model as deemed necessary.

*[For fair value measurements categorised within Level 3 of the fair value hierarchy, an entity is required to disclose a description of the valuation processes used by the entity (including, for example, how an entity decides its valuation policies and procedures and analyses changes in fair value measurements from period to period) [IFRS13p93(g)]. To satisfy this new requirement, the illustrative example provided in IFRS 13 states that an entity might disclose information, such as the group within the entity that decides the entity's valuation policies and procedures, to whom that group reports, the frequency and methods for calibration, back testing and other testing procedures of pricing models, etc. [IFRS13p1E65]. The above illustrative disclosure must be tailored to the entity's specific circumstances.]*

## 51 Fair Value Disclosures (Continued)

### **(d) Assets and liabilities not measured at fair value but for which fair value is disclosed**

Fair values analysed by level in the fair value hierarchy and carrying value of assets not measured at fair value are as follows:

	31 December 2017				31 December 2016			
	Level 1 fair value	Level 2 fair value	Level 3 fair value	Carry- ing value	Level 1 fair value	Level 2 fair value	Level 3 fair value	Carry- ing value

<b>Subordinated debt</b>								
- Subordinated debt								
<b>TOTAL</b>								

## **51 Fair Value Disclosures (Continued)**

The fair values in level 2 and level 3 of fair value hierarchy were estimated using the discounted cash flows valuation technique. The fair value of floating rate instruments that are not quoted in an active market was estimated to be equal to their carrying amount. The fair value of unquoted fixed interest rate instruments was estimated based on estimated future cash flows expected to be received discounted at current interest rates for new instruments with similar credit risk and remaining maturity.

For assets, the Group used assumptions about counterparty's incremental borrowing rate and prepayment rates. *[Note: Incremental borrowing rate is the interest rate at which the counterparty could currently obtain new borrowing from an unrelated lender. Prepayment rates are a percentage of loans in the portfolio for which the bank expects the borrower to exercise the right to repay the loan in the current period before maturity.]* Liabilities were discounted at the Group's own incremental borrowing rate. Liabilities due on demand were discounted from the first date that the amount could be required to be paid by the Group.

The Group's liabilities to its customers are subject to state deposit insurance scheme as described in Note 1. The fair value of these liabilities reflects these credit enhancements. *[See IFRS 13.98.]*

*[If fair value of an available-for-sale financial asset cannot be estimated and is thus carried at cost, refer to para 30 of IFRS 7 and cross-reference to section 'Investments carried at cost' in Note 4. Add to this note any particular items which may not be covered above.]*

## **52 Presentation of Financial Instruments by Measurement Category**

*[Note: The following represents a short disclosure for simple entities. The full disclosure is on following pages.]*

*[For the purposes of measurement, IAS 39 "Financial Instruments: Recognition and Measurement", classifies financial assets into the following categories: (a) loans and receivables; (b) available-for-sale financial assets; (c) financial assets held to maturity and (d) financial assets at fair value through profit or loss ("FVTPL"). Financial assets at fair value through profit or loss have two sub-categories: (i) assets designated as such upon initial recognition, and (ii) those classified as held for trading. In addition, finance lease receivables form a separate category. All of the Group's financial assets fall in the loans and receivables category except financial derivatives. All of the Group's financial liabilities except for derivatives were carried at amortised cost. Derivatives belong to the fair value through profit or loss measurement category and were held for trading.]*

## 52 Presentation of Financial Instruments by Measurement Category (Continued)

For the purposes of measurement, IAS 39 "Financial Instruments: Recognition and Measurement", classifies financial assets into the following categories: (a) loans and receivables; (b) available-for-sale financial assets; (c) financial assets held to maturity and (d) financial assets at fair value through profit or loss ("FVTPL"). Financial assets at fair value through profit or loss have two sub-categories: (i) assets designated as such upon initial recognition, and (ii) those classified as held for trading. In addition, finance lease receivables form a separate category. The following table provides a reconciliation of financial assets with these measurement categories as of 31 December 2017:

<i>In thousands of Russian Roubles</i>	Loans and receiv- ables	Availa- ble-for- sale assets	Trading assets	Assets desig- nated at FVTPL	Held to maturity	Finance lease recei- vables	Total
<b>ASSETS</b>

- Credit and debit cards receivables							
- Settlements on conversion operations							
- Foreign exchange forward contracts							
- Precious metals forward contracts							
- Other financial derivatives							
- Restricted cash							
- <i>Other</i>							
<b>TOTAL FINANCIAL ASSETS</b>							

As of 31 December 2017 and 31 December 2016, all of the Group's financial liabilities except for derivatives [and short positions in securities (Note 27)] were carried at amortised cost. Derivatives [and short positions in securities (Note 27)] belong to the fair value through profit or loss measurement category.

### 53 Related Party Transactions

Parties are generally considered to be related if the parties are under common control, or one party has the ability to control the other party or can exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

At 31 December 2017, the outstanding balances with related parties were as follows: *[Include subsidiaries in the disclosure as a separate column if these are the Bank's separate financial statements.]*

<i>In thousands of Russian Roubles</i>	Immediate parent significant company	Other significant share-holders	[Entities under common control]	Key management personnel	Associates	Joint ventures	Other related parties
Trading securities							
- Debt securities (contractual interest rate: _____ %)							
- Shares of _____ ( _____ % holding)							
Other securities at fair value through profit or loss							
- Debt securities (contractual interest rate: _____ - _____ %)							
- Shares of _____ ( _____ % holding)							
Due from other banks							
(contractual interest rate: _____ - _____ %)							
Gross amount of loans and advances to customers							
(contractual interest rate: _____ - _____ %)							
Impairment provisions for loans and advances to customers at 31 December							
Investment securities available for sale							
- Debt securities (contractual interest rate: _____ - _____ %)							
- Shares of _____ ( _____ % holding)							
Repurchase receivables							
- Debt securities (contractual interest rate: _____ - _____ %)							
- Shares of _____ ( _____ % holding)							
Investment securities held to maturity (contractual interest rate: ( _____ - _____ %))							

*(continued on the following page)*

*“Other significant shareholders” are those with the power to participate in the financial and operating policy decisions of a group entity with which they transact, through controlling over 20% of the group entity’s voting power, or otherwise.]*

*[Disclosure of information on balances and transactions with immediate parent is mandatory.]*

**53 Related Party Transactions (Continued)**

<i>In thousands of Russian Roubles</i>	Immediate parent company	Other significant company	[Entities under common control]	Key management personnel	Associates	Joint ventures	Other related parties
(continued)							
Investment in associates							
Other assets							
Non-current assets held for sale (or disposal groups)							
- Debt securities (contractual interest rate: _____ - _____ %)							
- Shares of _____ ( _____ % holding)							
Due to other banks (contractual interest rate: _____ - _____ %)							
Customer accounts (contractual interest rate: _____ - _____ %)							
Debt securities in issue [Promissory notes issued]							
(contractual interest rate: _____ - _____ %)							
Other borrowed funds (contractual interest rate: _____ - _____ %)							
Provisions for liabilities and charges							
Other liabilities							
Subordinated debt (contractual interest rate: _____ - _____ %)							
Liabilities directly associated with disposal groups held for sale (contractual interest rate: _____ - _____ %)							

*[Common control is a defined term in Appendix A to IFRS 3. Common control requires existence of an ultimate controlling party (not parties in plural) and that the control is not transitory. Refer to IAS 24.18-19 for guidance on determining categories of related parties for disclosure purposes.]*

### 53 Related Party Transactions (Continued)

The income and expense items with related parties for 2017 were as follows:

<i>In thousands of Russian Roubles</i>	Imme- di- ate parent company	Other signifi- cant share- holders	[Entities under common control]	Key management per- sonnel	Asso- ciates	Joint ventures	Other related parties
Interest income							
Interest expense							
Provision for loan impairment							
Dividend income							
Gains less losses from trading securities							
Gains less losses from other securities at fair value through profit or loss							
Gains less losses from trading in foreign currencies							
Foreign exchange translation gains less losses							
Fee and commission income							
Fee and commission expense							
Gains/(losses) on initial recognition of assets at rates above/below market							
Gains/(losses) on initial recognition of liabilities at rates below/above market							
Impairment of investment securities available for sale							
Impairment of investment securities held to maturity							
Provision for credit related commitments							
Other operating income <i>[consider providing breakdown]</i>							
Gains arising from early retirement of debt							
Administrative and other operating expenses <i>[consider providing breakdown]</i>							
Share of profit of associates							

*[Disclose also any other information about the transactions and outstanding balances that is necessary for an understanding of the potential effect of the related party relationship on the financial statements.]*

### 53 Related Party Transactions (Continued)

At 31 December 2017, other rights and obligations with related parties were as follows:

	Immediate parent company	Other significant shareholders	[Entities under common control]	Key management personnel	Associates	Joint ventures	Other related parties
<i>In thousands of Russian Roubles</i>							
Guarantees issued by the Group at the year end							
Guarantees received by the Group at the year end							
Import letters of credit at the year end							
Export letters of credit at the year end							
Contractual commitments to purchase goods							
Contractual commitments to purchase services							
Contractual commitments to sell goods							
Contractual commitments to sell services							
Other commitments							
Other contingent obligations							

Aggregate amounts lent to and repaid by related parties during 2017 were:

	Immediate parent company	Other significant shareholders	[Entities under common control]	Key management personnel	Associates	Joint ventures	Other related parties
<i>In thousands of Russian Roubles</i>							
Amounts lent to related parties during the year							
Amounts repaid by related parties during the year							

### 53 Related Party Transactions (Continued)

At 31 December 2016, the outstanding balances with related parties were as follows: *[Include subsidiaries in the disclosure only if these are separate financial statements of the Bank.]*

	Immediate parent company	Other significant shareholders	[Entities under common control]	Key management personnel	Associates	Joint ventures	Other related parties
<i>In thousands of Russian Roubles</i>

<i>In thousands of Russian Roubles</i>							
Amounts lent to related parties during the year							
Amounts repaid by related parties during the year							

*[Consider additional disclosures if the government is a related party. State the nature and amount of individually significant transactions and describe the collectively significant transactions. An example follows.]*

The Russian state has [control / significant influence / joint control] over the Group. The Group decided to apply the exemption from disclosure of individually insignificant transactions and balances with the government and parties that are related to the entity because the Russian state has control, joint control or significant influence over such party.

Refer to Note 4 for the information relating to financing received by the Group from the Russian State Corporation Bank Razvitiya i Vneshekonomiceskoy Deyatelnosti.

The Group lends to and received deposits from a large number of government related entities. Such loans and deposits are individually insignificant and are generally entered into on an arm's length basis.

Transactions with the state also include taxes which are detailed in Notes 36, 19 and 26.

### 53 Related Party Transactions (Continued)

Key management compensation is presented below:

<i>In thousands of Russian Roubles</i>	2017		2016	
	Expense	Accrued liability	Expense	Accrued liability
<i>Short-term benefits:</i>				
- Salaries				
- Short-term bonuses				
- Benefits in-kind				
<i>Post-employment benefits:</i>				
- Defined benefit retirement scheme				
- State pension and social security costs				
- Termination indemnity benefits				
<i>Other long-term employee benefits:</i>				
- Long-term bonus scheme				
- Jubilee benefits				
<i>Share-based compensation:</i>				
- Cash-settled share-based compensation				
- Equity-settled share-based compensation	<i>[These accounts do not cover all the disclosures about share-based compensation provided by the entity or its shareholders. Refer to IFRS 2 for guidance.]</i>			
Termination benefits				
<b>Total</b>				

Short-term bonuses fall due wholly within twelve months after the end of the period in which management rendered the related services.

Commitments and contingent obligations towards key management personnel are as follows:

<i>In thousands of Russian Roubles</i>	2017	2016
<i>Post-employment benefits:</i>		
- Committed future retirement benefits not yet recognised as an expense		
- Committed future termination indemnity benefits not yet recognised as an expense		
<i>Other long-term employee benefits:</i>		
- Committed long-term bonuses to be provided in exchange for future services		
- Committed jubilee benefits not yet recognised as an expense		
<i>Share-based compensation:</i>		
- Unamortised balance of cash-settled share-based compensation obligation		
- Unamortised balance of equity-settled share-based compensation	<i>[These accounts do not cover all the disclosures about share-based compensation provided by the entity or its shareholders. Refer to IFRS 2 for guidance.]</i>	
Unrecognised termination benefits entitlement in case of involuntary termination of employment		
<b>Total commitments and contingent liabilities to key management personnel</b>		

### **53 Related Party Transactions (Continued)**

*[Note:*

- *A related party transaction is defined as a transfer of resources, services or obligations between related parties, regardless of whether a price is charged. Appropriate disclosures should be made even if no price is charged.*
- *Nature of the relationship with “other related parties” should be disclosed.*
- *Consider disclosing the volume of transactions where the amounts are significant.*
- *Consider disclosing in more detail individually significant and unusual transactions with related parties. If such transactions are disclosed in more detail elsewhere in the financial statements reference is necessary.*
- *Profit oriented state controlled entities are not exempt from disclosing individually significant transactions with other state controlled entities.*
- *Disclosure should be made of terms and conditions of the transactions.*
- *The revised IAS 24 also introduced reporting of related party commitments such as committed purchases of goods or services.]*

*[Special consideration should be given to the nature of lending to the shareholders.]*

As of 31 December 2017 and 2016, the Bank’s immediate [and ultimate] parent company was \_\_\_\_\_, and the Bank was ultimately controlled by Mr \_\_\_\_\_.

*[The disclosure of ownership should be made here or in Note 1.]*

*[Tailor the above wording or include additional wording such that the Bank’s ultimate parent company is disclosed under IAS 1.126(c) and ultimate controlling party under IAS 24.12.] [If neither the entity’s parent nor the ultimate parent produces financial statements available for public use, the name of the next most senior parent that does so should be disclosed.] [Consider whether additional disclosure of shareholder structure either here or in share capital or related party footnotes may make the consolidated financial statements more meaningful.]*

## **54 Business Combinations**

On \_\_\_\_ 2017, the Group acquired \_\_\_\_ % of the share capital of \_\_\_\_ and obtained control through its ability to cast a majority of votes in the general meeting of shareholders **[requirement is to describe how acquirer obtained control]**. The acquired subsidiary will increase the Group's penetration of its chosen retail and corporate markets and is expected to improve profitability through the economies of scale **[requirement is to disclose reason for the business combination]**.

The acquisition-date fair value of the total purchase consideration and its components are as follows:

*In thousands of Russian Roubles*

---

Cash consideration paid
Fair value of new issued shares of the acquirer
Tangible or intangible assets of acquirer transferred
Liability for contingent consideration incurred

---

**Total consideration transferred**

---

Less remuneration for future services of the former owner
Less indemnification asset
Investment in the acquiree prior to the acquisition

---

**Total purchase consideration and previously held interest in the acquiree**

---

The investment in the acquiree held prior to the acquisition was remeasured to its fair value at the acquisition date and a gain of RR \_\_\_\_ thousand was recognised in gains less losses on disposal of **[available for sale investments]**. The fair value of the new issued shares of the acquirer was determined on the basis of the closing market price of the ordinary shares on the acquisition date.

**[The contingent consideration arrangement requires the Group to pay the former owners of the acquiree \_\_\_\_ per cent of the revenues of an unconsolidated equity investment owned by the acquiree, in excess of RR \_\_\_\_ thousand for 2017, up to a maximum amount of RR \_\_\_\_ thousand (undiscounted). The potential undiscounted amount of all future payments that the Group could be required to make under the contingent consideration arrangement is between RR \_\_\_\_ thousand and RR \_\_\_\_ thousand. The fair value of the contingent consideration arrangement of RR \_\_\_\_ thousand was estimated by applying the income approach. The fair value estimates are based on an assumed discount rate range of \_\_\_\_ – \_\_\_\_ per cent and assumed probability-adjusted revenues in equity investee of RR \_\_\_\_ thousand to RR \_\_\_\_ thousand. As of 31 December 2017, neither the amount recognised for the contingent consideration arrangement, nor the range of outcomes or the assumptions used to develop the estimates had changed.]** **[Describe terms and conditions of the contingent purchase consideration: (i) description of the arrangement and the basis for determining the amount of the payment; (ii) an estimate of the range of outcomes (undiscounted) or, if a range cannot be estimated, that fact and the reasons why a range cannot be estimated. If the maximum amount of the payment is unlimited, the acquirer shall disclose that fact.]**

Acquisition related transaction costs of RR \_\_\_\_ thousand were expensed as general and administrative expenses. The contractual acquisition arrangement included remuneration of RR \_\_\_\_ thousand for future services of the former owner. This amount was separated and will be expensed as staff costs over a period of three years from acquisition. **[For transactions that are recognised separately from the acquisition of assets and assumption of liabilities in the business combination in accordance with paragraph 51 of IFRS 3 disclose: (i) a description of each transaction; (ii) how the acquirer accounted for each transaction; (iii) the amounts recognised for each transaction and the line item in the financial statements in which each amount is recognised; and (iv) if the transaction is the effective settlement of a pre-existing relationship, the method used to determine the settlement amount.]**

#### 54 Business Combinations (Continued)

The consideration paid by the Group was based on results of an external appraisal[, by an internationally recognised investment bank,] of the acquiree's business taken as a whole. However, in accordance with IFRS 3 "Business Combinations", the Group must account for acquisitions based on fair values of the identifiable assets acquired, and liabilities and contingent liabilities assumed. These two different approaches can lead to differences; and, as set out in the table below, recognition of [goodwill] [or the excess of the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over cost ("negative goodwill") immediately in profit or loss for the year (as 'excess of the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over cost of the business combination')].

Details of the assets and liabilities acquired and goodwill arising are as follows:

<i>In thousands of Russian Roubles</i>	<b>Note</b>	<b>Attributed fair value</b>
Cash and cash equivalents		
Loans and advances to customers		
Other financial assets		
Other assets		
Customer accounts		
Contingent tax exposures		
Other liabilities		
<i>[expand as appropriate]</i>		
<b>Fair value of identifiable net assets of subsidiary</b>		
Less: non-controlling interest		
Goodwill arising from the acquisition	17	
<b>Total purchase consideration and previously held interest in the acquiree</b>		26
Less: Non-cash consideration		
Less: Cash and cash equivalents of subsidiary acquired		
<b>Outflow of cash and cash equivalents on acquisition</b>		

The non-controlling interest represents share in net assets of the acquiree attributable to owners of non-controlling interest. [Alternatively: The non-controlling interest was measured at its market value. The fair value of the non-controlling interest was estimated by applying an income approach. The fair value estimates are based on: (a) an assumed discount rate range of [\_\_\_\_ – \_\_\_\_] per cent; (b) an assumed terminal value based on a range of terminal EBITDA multiples between [\_\_\_\_ and \_\_\_\_] times; (c) assumed financial multiples of companies deemed to be similar to the acquiree; and (d) assumed adjustments because of the lack of control or lack of marketability that market participants would consider when estimating the fair value of the non-controlling interest.] *[If a valuation technique was used, disclose it and the key model inputs used for determining that fair value].*

The fair values of assets and liabilities acquired are based on [discounted cash flow models]. The valuation of identifiable intangible assets was performed by an independent professional appraiser. Based on the appraisal report, the following items were included in the purchase price allocation:

- [core deposits intangibles valued at RR \_\_\_\_ thousands;]
- [brand name valued at RR \_\_\_\_ thousands; and]
- [proprietary software valued at RR \_\_\_\_ thousands.]

The fair value of the acquired identifiable intangible assets of RR \_\_\_\_ thousand is provisional pending receipt of the final valuations for those assets.

## **54 Business Combinations (Continued)**

For each class of acquired receivables, the gross contractual amounts receivable and the best estimate of the contractual cash flows not expected to be collected are as follows:

	<b>Gross contractual amounts receivable</b>	<b>The contractual cash flows not expected to be collected</b>
<i>In thousands of Russian Roubles</i>		
<b>Loans and advances to customers</b>		
- Corporate loans		
- Loans to individuals - consumer loans		
- Loans to individuals - entrepreneurs		
- Mortgage loans		
- Reverse sale and repurchase agreements		
- State and municipal organisations <i>[Adjust classes as appropriate]</i>		
<b>Other financial assets:</b>		
- Trade receivables		
- Finance lease receivables		
- Credit and debit cards receivables		
- Settlements on conversion operations		
<b>Total</b>		

Contingent tax exposures are attributable to [transfer pricing tax risks] and expire within [three] years from acquisition. Refer to Note 43. *[If a contingent liability is not recognised because its fair value cannot be measured reliably, the acquirer shall disclose: (i) the information required by paragraph 86 of IAS 37; and (ii) the reasons why the liability cannot be measured reliably.]*

The goodwill is primarily attributable to the profitability of the acquired business, the significant synergies and combined cost savings expected to arise. *[The requirement is to disclose description of factors that make up the goodwill.]* The goodwill will not be deductible for tax purposes in future periods.

The acquired subsidiary contributed revenue of RR \_\_\_\_\_ thousand and profit of RR \_\_\_\_\_ thousand to the Group for the period from the date of acquisition to 31 December 2017. If the acquisition had occurred on 1 January 2017, Group revenue for 2017 would have been RR \_\_\_\_\_ thousand, and profit for 2017 would have been RR \_\_\_\_\_ thousand.

## 55 Events After the End of the Reporting Period

**Dividends.** Management proposed to the [Annual General Meeting of Shareholders] a dividend on ordinary shares in the amount of RR \_\_\_\_ thousand (RR \_\_\_\_ per ordinary share) and a dividend on preference shares in the amount of RR \_\_\_\_ thousand (RR \_\_\_\_ per preference share or \_\_\_\_% of the nominal value of the underlying preference shares). [On \_\_\_\_ 2018 an [Annual General Meeting of Shareholders] declared a dividend on ordinary shares in the amount of RR \_\_\_\_ thousand (RR \_\_\_\_ per ordinary share) and a dividend on preference shares in the amount of RR \_\_\_\_ thousand (RR \_\_\_\_ per preference share or \_\_\_\_% of the nominal value of the underlying preference shares).]

**Business combinations.** *[If the acquisition date of a business combination is after the end of the reporting period but before the financial statements are authorised for issue, the acquirer shall disclose the information required by paragraph B64 of IFRS 3 unless the initial accounting for the business combination is incomplete at the time the financial statements are authorised for issue. In that situation, the acquirer shall describe which disclosures could not be made and the reasons why they cannot be made.]* On \_\_\_\_ 2018, the Group acquired \_\_\_\_% of the share capital of \_\_\_\_ and obtained control through its ability to cast a majority of votes in the general meeting of shareholders *[requirement is to describe how acquirer obtained control]*. The acquired subsidiary will increase the Group's penetration of its chosen retail and corporate markets and is expected to improve profitability through the economies of scale *[requirement is to disclose reason for the business combination]*.

The acquisition-date fair value of the total purchase consideration and its components are as follows:

*In thousands of Russian Roubles*

Cash consideration paid  
 Fair value of new issued shares of the acquirer  
 Tangible or intangible assets of acquirer transferred  
 Liability for contingent consideration incurred

**Total consideration transferred**

Less remuneration for future services of the former owner  
 Less indemnification asset  
 Investment in the acquiree prior to the acquisition

**Total purchase consideration and previously held interest in the acquiree**

The investment in the acquiree held prior to the acquisition was remeasured to its fair value at the acquisition date, and a gain of RR \_\_\_\_ thousand was recognised in gains less losses on disposal of *[available for sale investments]*. The fair value of the new issued shares of the acquirer was determined on the basis of the closing market price of the ordinary shares on the acquisition date.

[The contingent consideration arrangement requires the Group to pay the former owners of the acquiree \_\_\_\_ per cent of the revenues of an unconsolidated equity investment owned by the acquiree, in excess of RR \_\_\_\_ thousand for 2017, up to a maximum amount of RR \_\_\_\_ thousand (undiscounted). The potential undiscounted amount of all future payments that the Group could be required to make under the contingent consideration arrangement is between RR \_\_\_\_ thousand and RR \_\_\_\_ thousand. The fair value of the contingent consideration arrangement of RR \_\_\_\_ thousand was estimated by applying the income approach. The fair value estimates are based on an assumed discount rate range of \_\_\_\_–\_\_\_\_ per cent and assumed probability-adjusted revenues in equity investee of RR \_\_\_\_ thousand to RR \_\_\_\_ thousand.] *[Describe terms and conditions of the contingent purchase consideration: (i) description of the arrangement and the basis for determining the amount of the payment; (ii) an estimate of the range of outcomes (undiscounted) or, if a range cannot be estimated, that fact and the reasons why a range cannot be estimated. If the maximum amount of the payment is unlimited, the acquirer shall disclose that fact.]*

## 55 Events After the End of the Reporting Period (Continued)

Acquisition related transaction costs of RR \_\_\_\_ thousand were expensed as general and administrative expenses. The contractual acquisition arrangement included remuneration of RR \_\_\_\_ thousand for future services of the former owner. This amount was separated and will be expensed as staff costs over a period of three years from acquisition. *[For transactions that are recognised separately from the acquisition of assets and assumption of liabilities in the business combination in accordance with paragraph 51 of IFRS 3 disclose: (i) a description of each transaction; (ii) how the acquirer accounted for each transaction; (iii) the amounts recognised for each transaction and the line item in the financial statements in which each amount is recognised; and (iv) if the transaction is the effective settlement of a pre-existing relationship, the method used to determine the settlement amount.]*

The consideration paid by the Group was based on results of an external appraisal [*, by an internationally recognised investment bank,*] of the acquiree's business taken as a whole. However, in accordance with IFRS 3 "Business Combinations", the Group must account for acquisitions based on fair values of the identifiable assets acquired, and liabilities and contingent liabilities assumed. These two different approaches can lead to differences; and, as set out in the table below, recognition of *[goodwill]* [*or the excess of the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over cost ("negative goodwill") immediately in profit or loss for the year (as 'excess of the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over cost of the business combination')*].

Details of the assets and liabilities acquired and goodwill arising are as follows:

<i>In thousands of Russian Roubles</i>	<b>Note</b>	<b>Attributed fair value</b>
Cash and cash equivalents		
Loans and advances to customers		
Other financial assets		
Other assets		
Customer accounts		
Contingent tax exposures		
Other liabilities		
<i>[expand as appropriate]</i>		
<b>Fair value of identifiable net assets of subsidiary</b>		
Less: non-controlling interest		
Goodwill arising from the acquisition	17	
<b>Total purchase consideration and previously held interest in the acquiree</b>		
Less: Non-cash consideration (items as disclosed above)	26	
Less: Cash and cash equivalents of subsidiary acquired		
<b>Outflow of cash and cash equivalents on acquisition</b>		

The non-controlling interest represents a share in net assets of the acquiree attributable to the owners of the non-controlling interest. *[The non-controlling interest was measured at its market value. The fair value of the non-controlling interest was estimated by applying an income approach. The fair value estimates are based on: (a) an assumed discount rate range of [\_\_\_\_–\_\_\_\_] per cent; (b) an assumed terminal value based on a range of terminal EBITDA multiples between [\_\_\_\_ and \_\_\_\_] times; (c) assumed financial multiples of companies deemed to be similar to the acquiree; and (d) assumed adjustments because of the lack of control or lack of marketability that market participants would consider when estimating the fair value of the non-controlling interest.]* *[If a valuation technique was used, disclose it and the key model inputs used for determining that fair value].*

## 55 Events After the End of the Reporting Period (Continued)

The fair values of assets and liabilities acquired are based on [discounted cash flow models]. The valuation of identifiable intangible assets was performed by an independent professional appraiser. Based on the appraisal report, the following items were included in the purchase price allocation:

- [core deposits intangibles valued at RR \_\_\_\_ thousands;]
- [brand name valued at RR \_\_\_\_ thousands; and]
- [proprietary software valued at RR \_\_\_\_ thousands.]

The fair value of the acquired identifiable intangible assets of RR \_\_\_\_ thousand is provisional pending receipt of the final valuations for those assets.

For each class of acquired receivables, the gross contractual amounts receivable and the best estimate of the contractual cash flows not expected to be collected are as follows:

<i>In thousands of Russian Roubles</i>	<b>Gross contractual amounts receivable</b>	<b>The contractual cash flows not expected to be collected</b>
<b><i>Loans and advances to customers</i></b>		
- Corporate loans		
- Loans to individuals - consumer loans		
- Loans to individuals - entrepreneurs		
- Mortgage loans		
- Reverse sale and repurchase agreements		
- State and municipal organisations <i>[Adjust classes as appropriate]</i>		
<b><i>Other financial assets:</i></b>		
- Trade receivables		
- Finance lease receivables		
- Credit and debit cards receivables		
- Settlements on conversion operations		
<b>Total</b>		

Contingent tax exposures are attributable to [transfer pricing tax risks] and expire within [three] years from acquisition. Refer to Note 43. *[If a contingent liability is not recognised because its fair value cannot be measured reliably, the acquirer shall disclose: (i) the information required by paragraph 86 of IAS 37; and (ii) the reasons why the liability cannot be measured reliably.]*

The goodwill is primarily attributable to the profitability of the acquired business, the significant synergies and combined cost savings expected to arise. *[The requirement is to disclose description of factors that make up the goodwill.]* The goodwill will not be deductible for tax purposes in future periods.

**Non-current assets held for sale (or disposal groups).** After the end of the reporting period, the Group reclassified assets which had a carrying value of RR \_\_\_\_ thousand, to non-current assets held for sale (or disposal groups). Management approved a plan to sell \_\_\_\_ assets on \_\_\_\_ due to \_\_\_\_\_. The Group is actively marketing these assets and expects the sale to complete by \_\_\_\_\_. *[Describe facts and circumstances, expected manner and timing of that disposal]*

The reclassified assets belong to the [Retail] [Corporate] [Investment] banking segment operating in [Russia] [Europe] [the United States of America].

**Refinancing.** *[Disclose post-balance sheet (a) refinancing of loans on a long-term basis; (b) rectification of a breach of a long-term loan agreement; and (c) the receipt from the lender of a period of grace to rectify a breach of a long-term loan agreement ending at least twelve months after the end of the reporting period. Refer to IAS 1.67.]*

## **55 Events After the End of the Reporting Period (Continued)**

**Transactions with shareholders.** *[Provide a description of ordinary share transactions or potential ordinary share transactions, other than those accounted for in accordance with IAS 33.64, that occur after the end of the reporting period and that would have changed significantly the number of ordinary shares or potential ordinary shares outstanding at the end of the period if those transactions had occurred before the end of the reporting period. Refer to IAS 33.70]*

*[Consider descriptions of other significant subsequent events. If subsequent event is disclosed elsewhere in the notes then reference to the respective note needs to be made from the subsequent events note.]*

*[IAS 10.22 gives examples of non-adjusting events after the end of the reporting period that would generally result in disclosure, including abnormally large changes after the end of the reporting period in asset prices or foreign exchange rates.]*

**Ask secretaries to help you with formatting the document:**

- The document's default format is font ARIAL, with font size of 10 pts for the text and 9 pts for the tables.
- Do NOT change the size of the margins.
- Do NOT change the size or width of tables, since all of them have a standard size, unless you really need to do so.
- Use the styles to format the document. You can find them at the top left of your screen, or you can copy them using the brush.
- Do NOT add page numbers manually in the Table of Contents. We have an automated Table of Contents. There are two ways to update it, depending on if only the page number has changed or if the notes' titles have changed also. In the first case, click on the table with the right button of the mouse, then click on "Update fields" and on "Update page number only". In the second case, click on "Update the entire table" at the last step - you might have to do a little bit of formatting in this case to have all the Notes aligned.
- When printing a portion of your document, you may save time by specifying what you want to print, for example, section 3 only (see help topic in "Print" window).
- Use the command "Replace" to change all "ABC BANK GROUP" for the name of your client ("Edit", "Replace", then specify your needs, or use "CTRL+H").
- Do not use the function "replace all" for changing "Group" to "Bank" - we are often ending up with phrases like "This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a Bank, or national or local economic conditions that correlate with defaults on assets in the Bank. "
- Note that all comments in brackets or written in Italic font should be removed or included as appropriate.

**Applicable version of IFRS standards**

These pro forma financial statements are based on IFRS, effective for the financial statements covering reporting year ending 31 December 2017. Early adoption of the standards or interpretations listed in Note 6 is not assumed.

**First-time adoption note**

These illustrative financial statements include a first time adoption of IFRS note in appendix C. This note replaces Note 5, Adoption of New or Revised IFRSs, which is applicable for existing IFRS preparers only. Other disclosures requiring amendment for first-time adopters are also detailed in Appendix C.

**Disclaimer and key events or transactions that are not covered**

These pro forma financial statements are not a substitute for reading the Standards and Interpretations themselves or for professional judgement as to fairness of presentation. They do not cover, for example:

- Hedge accounting;
- Discontinued operations;
- Embedded derivatives;
- Defined benefit plans;
- Share-based payments;
- Joint arrangements;
- Presentation of financial statements of companies with puttable shares (e.g. OOO companies);

and other possible disclosures required by IFRS. Depending on the circumstances, further specific information may be required in order to ensure fair presentation under IFRS and we recommend that reference is made to separate publications:

- IFRS Disclosure Checklist (available as an electronic package and as a document)
- IFRS Illustrative Bank Financial Statements
- IFRS Illustrative Corporate Financial Statements
- IFRS Illustrative Financial Statements - Investment Funds
- Illustrative Consolidated Financial Statements - Investment Property
- IFRS Illustrative Consolidated Financial Statements – Insurance

Use of these pro forma financial statements does not exempt from completion of the IFRS disclosure checklist.

Certain disclosures do not apply to first-time adopters because they have to apply accounting policies consistently throughout all periods presented in the first IFRS financial statements. Replace Note 5 with the below text and amend other relevant disclosures, when required:

## 5 First-time Adoption of IFRS

These [consolidated] financial statements are the Group's first annual [consolidated] financial statements that comply with IFRS. The Group's IFRS transition date is 1 January 2016. Subject to certain exceptions, IFRS 1 requires retrospective application of the version of IFRS valid as of 31 December 2017 in preparing the opening IFRS statement of financial position at 1 January 2016 and in subsequent periods up to the end of the first IFRS reporting period. In preparing these [consolidated] financial statements, the Group has applied the mandatory exceptions and has elected to apply the following optional exemptions: *[Tailor the text to actual exemptions taken]*

- (a) **Fair value as deemed cost exemption.** The Group has elected to measure certain items of premises and equipment at fair value at 1 January 2016. The effect of the exemption was to increase the RAR carrying amount of premises and equipment by RR \_\_\_\_\_ thousand to RR \_\_\_\_\_ thousand under IFRS on the date of transition, 1 January 2016.
- (b) **Cumulative translation differences exemption.** The Group has elected to set the previous cumulative currency translation reserve to zero at 1 January 2016. This exemption has been applied to all subsidiaries in accordance with IFRS 1. *[...describe any other exemptions taken by the Group in accordance with IFRS 1....]*

Exceptions from retrospective application, which are mandatory under IFRS 1 are:

- (a) **De-recognition of financial assets and liabilities exception.** Financial assets and liabilities derecognised before the transition to IFRS are not re-recognised under IFRS. Management did not elect to apply the IAS 39 de-recognition criteria from an earlier date.
- (b) **Hedge accounting exception.** The Group does not apply hedge accounting.
- (c) **Estimates exception.** Estimates under IFRS at 1 January 2016 and 31 December 2016 should be consistent with estimates made for the same dates under previous GAAP, unless there is evidence that those estimates were in error.
- (d) **Non-controlling interests exception.** Certain requirements of IFRS 10 in relation to accounting for equity in a subsidiary not attributable, directly or indirectly, to a parent are applied prospectively from the date of transition to IFRS. Management did not elect to apply IFRS 3 retrospectively to past business combinations.
- (e) **Government loans.** The Group has not recognised the corresponding benefit of the government loan at a below market rate of interest as a government grant. Management did not elect to apply the requirements of IAS 20 and IFRS 9 retrospectively to government loans.

The following reconciliations provide a quantification of the effect of the transition from Russian Accounting Regulations ("RAR") to IFRS at 1 January 2016, 31 December 2016 and for the year ended 31 December 2016: *[Adjust dates as appropriate if the Group's latest issued annual statutory financial statements were for 2017, not 2016 – see IFRS 1.24]*

<i>In thousands of Russian Roubles</i>	<b>31 December 2016</b>	<b>1 January 2016</b>
<b>EQUITY UNDER RAR</b>		
<b>Effects of changes in accounting policies:</b>		
(i) Loans and advances to customers: loan origination fees		
(ii) Loans and advances to customers: impairment losses		
(iii) Premises and equipment: restatement for hyperinflation		
(iv) Trading securities: valuation at quoted bid prices		
(v) Loans and advances to customers: gains/(losses) on initial recognition

---

**IFRS TOTAL COMPREHENSIVE INCOME [LOSS]**

---

The key adjustments for the differences between RAR and IFRS were attributable to the following: *[The adjustment number and description should correspond to the above tables.]*

- (i) **Loan origination fees.** Loan origination fees are deferred as part of interest income under the effective interest method as opposed to RAR cash basis of accounting.
- (ii) **Impairment loss on loans and advances.** Provisions for loan impairment under RAR are calculated following a formalised procedure. The provision is a prescribed percentage of the gross loan amount and depends on credit history, financial performance of a borrower and certain other relevant factors. Under IFRS, the amount of the provision is calculated as the difference between the carrying amount and estimated recoverable amount, calculated at the present value of expected cash flows, including amounts recoverable from guarantees and collateral, discounted at the instrument's effective interest rate.
- (iii) **Premises and equipment: restatement for hyperinflation.** The Russian Federation has previously experienced relatively high levels of inflation and was considered to be hyperinflationary as defined by IAS 29. As part of the Group's transition to IFRS, non-monetary assets, non-monetary liabilities and equity items arising from transactions prior to 1 January 2003 were restated in

accordance with IAS 29 for the changes in the general purchasing power of the Russian Rouble from the dates of the transactions until 31 December 2002. The amounts expressed in the measuring unit current at as 31 December 2002 are treated as the basis for the carrying amounts in these [consolidated] financial statements. As the characteristics of the economic environment of the Russian Federation indicate that hyperinflation has ceased, transactions after 1 January 2003 are not subject to restatement in accordance with the provisions of IAS 29.

- (iv) **Trading securities: valuation at quoted bid prices.** Trading securities are carried at fair values determined based on quoted bid prices. RAR fair values determined on a different basis were adjusted on transition to IFRS. In addition, assets \_\_\_\_\_ were reclassified to trading securities and were carried under RAR at \_\_\_\_\_.
- (v) **Loans and advances to customers: gains/(losses) on initial recognition.** Under RAR, low or zero interest bearing loans issued solely for cash, with no other right or privilege exchanged, are recognised at transaction price. Conversely, IFRS requires initial recognition of the loan at its fair value plus transaction costs and the difference from the transaction price is recognised in profit or loss for the year immediately, unless it qualifies for recognition as an asset or liability under other applicable IFRS.
- (vi) **Other securities at fair value through profit or loss:** \_\_\_\_\_. [describe relevant adjustments]
- (vii) **Due from other banks:** \_\_\_\_\_. [describe relevant adjustments]
- (viii) **Investment securities available for sale:** \_\_\_\_\_. [describe relevant adjustments]
- (ix) **Repurchase receivables:** \_\_\_\_\_. [describe relevant adjustments]
- (x) **Investment securities held to maturity:** \_\_\_\_\_. [describe relevant adjustments]
- (xi) **Investment in associates:** \_\_\_\_\_. [describe relevant adjustments]
- (xii) **Intangible assets:** \_\_\_\_\_. [describe relevant adjustments]
- (xiii) **Deferred tax: recognition under the balance sheet liability method.** The adjustment was required to recognise deferred taxes under the balance sheet liability method for temporary differences detailed in Note 36. [describe other relevant adjustments]
- (xiv) **Other:** \_\_\_\_\_. .... Certain RAR provisions do not meet requirements of IAS 37 "Provisions, Contingent Liabilities and Contingent Assets" ("IAS 37") for recognition as a liability, and were reversed. [describe other relevant adjustments]
- (xv) **Consolidation of subsidiaries.** The Bank's Russian statutory financial statements include only assets, liabilities, equity and income and expense items of the Bank. IAS 27 "Consolidated and Separate Financial Statements" requires consolidation of all subsidiaries. [describe other relevant adjustments]
- (xvi) **Correction of \_\_\_\_\_.** [describe relevant correction of errors]

The Group's operating, investing and financing cash flows reported under RAR did not significantly differ from IFRS. [Otherwise describe the differences, including disclosure of amounts of adjustments.]

## APPENDIX B – GUIDANCE NOTE AND FIRST-TIME ADOPTION SUPPLEMENT

The statement of changes in equity for first-time adopters should not include effects of adoption of new or revised standards. The amended version is:

**Investment property.** Investment property is property held by the Group to earn rental income or for capital appreciation, or both, and is not occupied by the Group.

*[Include if applicable:]* [Land held under operating leases is classified and accounted for by the Group as investment property when the rest of the definition of investment property is met. The operating lease is accounted for as if it were a finance lease.] *[Include policy for finance leases here if not separately included.]*

*[Tailor to reflect the actual sources used by the Group/their external valuer:]* Investment property is initially recognised at cost, including transaction costs, and subsequently remeasured at fair value updated to reflect market conditions at the end of the reporting period. Fair value of investment property is the price at which the property could be sold in an orderly transaction in the principal market. An orderly transaction is not a forced transaction or a distress sale. The best evidence of fair value is given by current prices in an active market for similar property in the same location and condition. In the absence of current prices in an active market, the Group considers information from a variety of sources, including:

- (a) current prices in an active market for properties of different nature, condition or location, adjusted to reflect those differences;
- (b) recent prices of similar properties on less active markets, with adjustments to reflect any changes in economic conditions since the date of the transactions that occurred at those prices; and
- (c) discounted cash flow projections based on reliable estimates of future cash flows, supported by the terms of any existing lease and other contracts and (when possible) by external evidence such as current market rents for similar properties in the same location and condition, and using discount rates that reflect current market assessments of the uncertainty in the amount and timing of the cash flows.

[If, in exceptional cases, there is clear evidence when the Group first acquires an investment property (or when an existing property first becomes investment property following a change in use) that the fair value of the investment property is not reliably determinable on a continuing basis, then the Group measures that investment property using the cost model in IAS 16 *[expand further if the Group has had to apply this rule.]*

*If investment properties are material, refer to this long version for illustrative extended accounting policy.*

**Investment properties.** The fair value of the Group's investment property is determined based on reports of independent appraisers, who hold a recognised and relevant professional qualification, and who have had recent experience of the valuation of property in similar locations and of similar category. *[If the valuation is done by the entity's staff, amend wording accordingly and disclose that professional valuers were not involved – see IAS 40.75(e).]*

[If a valuation obtained for a property is net of all payments expected to be made, any related lease liability recognised separately in the statement of financial position is added back to arrive at the carrying value of the investment property for accounting purposes.]

[Investment property that is being developed or redeveloped for use as investment property is also measured at fair value.]

Earned rental income is recorded in profit or loss for the year within *[other operating income]*. Gains and losses resulting from changes in the fair value of investment property are recorded in profit or loss for the year and presented separately. *[Gains or losses on disposal of investment property are calculated as proceeds less carrying amount. Where the Group disposes of a property at fair value in an arm's length transaction, the carrying value immediately prior to the sale is adjusted to the transaction price, and the adjustment is recorded in profit or loss for the year within net gain from fair value adjustment on investment property.]*

[In certain circumstances the Group may dispose of a property other than at fair value, such as when there are special terms or circumstances allowing the parties to the transaction to obtain a benefit which would not generally be available to other market participants. In such circumstances, the carrying value immediately prior to the sale is adjusted to the estimated fair value at the disposal date, and any difference between proceeds and the carrying amount is recorded separately in profit or loss for the year within realised gains or losses on disposal of the investment property.]

[If an investment property becomes owner-occupied, it is reclassified as property, plant and equipment, and its carrying amount at the date of reclassification becomes its deemed cost for accounting purposes.]

[If an item of owner-occupied property becomes an investment property because its use has changed, any difference resulting between the carrying amount and the fair value of this item at the date of transfer is treated in the same way as a revaluation under IAS 16. Any resulting increase in the carrying amount of the property is recognised in profit or loss for the year to the extent that it reverses a previous impairment loss, with any remaining increase credited directly to other comprehensive income. Any resulting decrease in the carrying amount of the property is initially charged against any revaluation surplus previously recognised in other comprehensive income, with any remaining decrease charged to profit or loss for the year.]

Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Group, and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred.

*[Alternative policy - cost model:* Investment properties are stated at cost, restated to the equivalent purchasing power of the Russian Rouble at 31 December 2002 for assets acquired prior to 1 January 2003 less accumulated depreciation and provision for impairment, where required. If any indication exists that investment properties may be impaired, the Group estimates the recoverable amount as the higher of value in use and fair value less costs to sell. The carrying amount of an investment property is written down to its recoverable amount through a charge to profit or loss for the year. An impairment loss recognised in prior years is reversed if there has been a subsequent change in the estimates used to determine the asset's recoverable amount.

Subsequent expenditure is capitalised only when it is probable that future economic benefits associated with it will flow to the Group, and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred. If an investment property becomes owner-occupied, it is reclassified to premises and equipment

*[Note: The longer version of Notes 5 and 6 should be used for more complex entities when the new standards have an impact.]*

## **5 Adoption of New or Revised Standards and Interpretations**

The following new standards and interpretations became effective for the Group from 1 January 2017:

***Disclosure Initiative – Amendments to IAS 7, Statement of Cash Flows (issued on 29 January 2016 and effective for annual periods beginning on or after 1 January 2017).*** The amended IAS 7 require disclosure of a reconciliation of movements in liabilities arising from financing activities, that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both cash and non-cash changes. [The Group has provided the required disclosure in these (consolidated) financial statements in Note 38.]

***Recognition of Deferred Tax Assets for Unrealised Losses – Amendments to IAS 12, Income Taxes (issued on 19 January 2016 and effective for annual periods beginning on or after 1 January 2017).*** The amendment has clarified the requirements on recognition of deferred tax assets for unrealised losses on debt instruments. The entity should recognise deferred tax asset for unrealised losses that arise as a result of discounting cash flows of debt instruments at market interest rates, even if it expects to hold the instrument to maturity and no tax will be payable upon collecting the principal amount. The economic benefit embodied in the deferred tax asset arises from the ability of the holder of the debt instrument to achieve future gains (unwinding of the effects of discounting) without paying taxes on those gains. [The amendments had the following impact on the Group's financial statements: \_\_\_\_.]

***Amendments to IFRS 12, included in Annual Improvements to IFRSs 2014-2016 Cycle (issued on 8 December 2016 and effective for annual periods beginning on or after 1 January 2017).*** IFRS 12, Disclosure of Interests in Other Entities states that the entity need not provide summarised financial information for interests in subsidiaries, associates or joint ventures that are classified (or included in a disposal group that is classified) as held for sale. The amendments clarify that this is the only concession from the disclosure requirements of IFRS 12 for such entities. [The Group is currently assessing the impact of the amendments on its financial statements.]

## **6 New Accounting Pronouncements**

Certain new standards and interpretations have been issued that are mandatory for the annual periods beginning on or after 1 January 2017 or later, and which the Group has not early adopted.

**IFRS 9 “Financial Instruments: Classification and Measurement” (amended in July 2014 and effective for annual periods beginning on or after 1 January 2018).** Key features of the new standard are:

- Financial assets are required to be classified into three measurement categories: those to be measured subsequently at amortised cost, those to be measured subsequently at fair value through other comprehensive income (FVOCI) and those to be measured subsequently at fair value through profit or loss (FVPL).
- Classification for debt instruments is driven by the entity's business model for managing the financial assets and whether the contractual cash flows represent solely payments of principal and interest (SPPI). If a debt instrument is held to collect, it may be carried at amortised cost if it also meets the SPPI requirement. Debt instruments that meet the SPPI requirement that are held in a portfolio where an entity both holds to collect assets' cash flows and sells assets may be classified as FVOCI. Financial assets that do not contain cash flows that are SPPI must be measured at FVPL (for example, derivatives). Embedded derivatives are no longer separated from financial assets but will be included in assessing the SPPI condition.
- Investments in equity instruments are always measured at fair value. However, management can make an irrevocable election to present changes in fair value in other comprehensive income, provided the instrument is not held for trading. If the equity instrument is held for trading, changes in fair value are presented in profit or loss.
- Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The key change is that an entity will be required to present the effects of changes in own credit risk of financial liabilities designated at fair value through profit or loss in other comprehensive income.
- IFRS 9 introduces a new model for the recognition of impairment losses – the expected credit losses (ECL) model. There is a ‘three stage’ approach which is based on the change in credit quality of financial assets since initial recognition. In practice, the new rules mean that entities will have to record an immediate loss equal to the 12-month ECL on initial recognition of financial assets that are not credit impaired (or lifetime ECL for trade receivables). Where there has been a significant increase in credit risk, impairment is measured using lifetime ECL rather than 12-month ECL. The model includes operational simplifications for lease and trade receivables.
- Hedge accounting requirements were amended to align accounting more closely with risk management. The standard provides entities with an accounting policy choice between applying the hedge accounting requirements of IFRS 9 and continuing to apply IAS 39 to all hedges because the standard currently does not address accounting for macro hedging.

Based on an analysis of the Group's financial assets and financial liabilities as at 31 December 2017 and on the basis of the facts and circumstances that exist at that date, the Management of the Group is expecting a significant impact on its consolidated financial statements from the adoption of the new standard on 1 January 2018.

## APPENDIX F – LONG VERSION OF NEW ACCOUNTING PRONOUNCEMENTS NOTE

The following table reconciles the carrying amounts of financial assets, from their previous measurement categories in accordance with IAS 39 into their new measurement categories upon transition to IFRS 9 on 1 January 2018:

	Measurement category		Carrying value per IAS 39 (closing balance at 31 December 2017)	Effect				Carrying value per IFRS 9 (opening balance at 1 January 2018)
	IAS 39	IFRS 9		Remeasurement ECL	Other	Reclassification Mandatory	Voluntary	
<i>In thousands of Russian Roubles</i>								
<b>Cash and cash equivalents</b>	L&R	AC						
<b>Mandatory cash balances with the Central Bank of Russian Federation</b>	L&R	AC						
Investments in debt securities	Trading assets	FVTPL (mandatory)						
Investments in debt securities	FVTPL	FVTPL (mandatory)						
Investments in debt securities	FVTPL	FVTPL (designated)						
Investments in debt securities	AFS	FVOCI						
Investments in debt securities	AFS	FVTPL (mandatory)						
Investments in debt securities	HTM	AC						
Investments in debt securities	HTM	FVTPL (mandatory)						
<b>Total investments in debt securities</b>								
Investments in equity securities	Trading assets	FVTPL (mandatory)						
Investments in equity securities	FVTPL	FVTPL (mandatory)						
Investments in equity securities	AFS	FVOCI						
Investments in equity securities	AFS	FVTPL (mandatory)						
<b>Total investments in equity securities</b>								
<b>Due from other banks</b>	L&R	AC						

**APPENDIX F – LONG VERSION OF NEW ACCOUNTING PRONOUNCEMENTS NOTE**

	Measurement category		Carrying value per IAS 39 (opening balance at 31 December 2017)	Effect		Carrying value per IFRS 9 (closing balance at 1 January 2018) IFRS 9
	IAS 39	IFRS 9		Remeasure- ment	Reclassification	
<i>In thousands of Russian Roubles</i>						
Loans and advances to customers	L&R	AC				
Loans and advances to customers	L&R	FVTPL (mandatory)				
<b>Total loans and advances to customers</b>						
Repurchase receivables	FVTPL	FVTPL (designated)				
Repurchase receivables	AFS	FVOCI				
Repurchase receivables	HTM	AC				
<b>Total repurchase receivables</b>						
Other financial assets	L&R	AC				
Other financial assets	FVTPL	FVTPL (mandatory)				
<b>Total other financial assets</b>						
<b>Total financial assets</b>						

No significant changes are expected to impact the measurement of financial liabilities, other than changes in the fair value of financial liabilities designated at FVTPL that are attributable to changes in the instrument's credit risk, which will be presented in other comprehensive income.

The new standard also introduces expanded disclosure requirements and changes in presentation. These are expected to change the nature and extent of the Group's disclosures about its financial instruments particularly in the year of the adoption of the new standard. *[Expand further the narrative text on impact of IFRS 9 (if required) depending on the nature and structure of financial instruments.]*

**IFRS 15, Revenue from Contracts with Customers (issued on 28 May 2014 and effective for the periods beginning on or after 1 January 2018).** The new standard introduces the core principle that revenue must be recognised when the goods or services are transferred to the customer, at the transaction price. Any bundled goods or services that are distinct must be separately recognised, and any discounts or rebates on the contract price must generally be allocated to the separate elements. When the consideration varies for any reason, minimum amounts must be recognised if they are not at significant risk of reversal. Costs incurred to secure contracts with customers have to be capitalised and amortised over the period when the benefits of the contract are consumed. *[The Group is currently assessing the impact of the new standard on its financial statements.]*

**IFRS 16 "Leases" (issued on 13 January 2016 and effective for annual periods beginning on or after 1 January 2019).** The new standard sets out the principles for the recognition, measurement, presentation and disclosure of leases. All leases result in the lessee obtaining the right to use an asset at the start of the lease and, if lease payments are made over time, also obtaining financing. Accordingly, IFRS 16 eliminates the classification of leases as either operating leases or finance leases as is required by IAS 17 and, instead, introduces a single lessee accounting model. Lessees will be required to recognise: (a) assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value; and (b) depreciation of lease assets separately from interest on lease liabilities in the income statement. IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17. Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently. *[The Group is currently assessing the impact of the amendments on its financial statements.]*

**IFRS 17 "Insurance Contracts" (issued on 18 May 2017 and effective for annual periods beginning on or after 1 January 2021).** IFRS 17 replaces IFRS 4, which has given companies dispensation to carry on accounting for insurance contracts using existing practices. As a consequence, it was difficult for investors to compare and contrast the financial performance of otherwise similar insurance companies. IFRS 17 is a single principle-based standard to account for all types of insurance contracts, including reinsurance contracts that an insurer holds. The standard requires recognition and measurement of groups of insurance contracts at: (i) a risk-adjusted present value of the future cash flows (the fulfilment cash flows) that incorporates all of the available information about the fulfilment cash flows in a way that is consistent with observable market information; plus (if this value is a liability) or minus (if this value is an asset) (ii) an amount representing the unearned profit in the group of contracts (the contractual service margin). Insurers will be recognising the profit from a group of insurance contracts over the period they provide insurance coverage, and as they are released from risk. If a group of contracts is or becomes loss-making, an entity will be recognising the loss immediately. [The Group is currently assessing the impact of the new standard on its financial statements.]

**IFRIC 23 "Uncertainty over Income Tax Treatments" (issued on 7 June 2017 and effective for annual periods beginning on or after 1 January 2019).** IAS 12 specifies how to account for current and deferred tax, but not how to reflect the effects of uncertainty. The interpretation clarifies how to apply the recognition and measurement requirements in IAS 12 when there is uncertainty over income tax treatments. An entity should determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments based on which approach better predicts the resolution of the uncertainty. An entity should assume that a taxation authority will examine amounts it has a right to examine and have full knowledge of all related information when making those examinations. If an entity concludes it is not probable that the taxation authority will accept an uncertain tax treatment, the effect of uncertainty will be reflected in determining the related taxable profit or loss, tax bases, unused tax losses, unused tax credits or tax rates, by using either the most likely amount or the expected value, depending on which method the entity expects to better predict the resolution of the uncertainty. An entity will reflect the effect of a change in facts and circumstances or of new information that affects the judgments or estimates required by the interpretation as a change in accounting estimate. Examples of changes in facts and circumstances or new information that can result in the reassessment of a judgment or estimate include, but are not limited to, examinations or actions by a taxation authority, changes in rules established by a taxation authority or the expiry of a taxation authority's right to examine or re-examine a tax treatment. The absence of agreement or disagreement by a taxation authority with a tax treatment, in isolation, is unlikely to constitute a change in facts and circumstances or new information that affects the judgments and estimates required by the Interpretation. [The Group is currently assessing the impact of the interpretation on its financial statements.]

**IFRIC 22 "Foreign currency transactions and advance consideration" (issued on 8 December 2016 and effective for annual periods beginning on or after 1 January 2018).** This interpretation considers how to determine the date of the transaction when applying the standard on foreign currency transactions, IAS 21. The interpretation applies where an entity either pays or receives consideration in advance for foreign currency-denominated contracts. The interpretation specifies that the date of transaction is the date on which the entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the Interpretation requires an entity to determine the date of transaction for each payment or receipt of advance consideration. [The Group is currently assessing the impact of the interpretation on its financial statements.]

**Sale or Contribution of Assets between an Investor and its Associate or Joint Venture - Amendments to IFRS 10 and IAS 28 (issued on 11 September 2014 and effective for annual periods beginning on or after a date to be determined by the IASB).** These amendments address an inconsistency between the requirements in IFRS 10 and those in IAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognised when a transaction involves a business. A partial gain or loss is recognised when a transaction involves assets that do not constitute a business, even if these assets are held by a subsidiary. [The Group is currently assessing the impact of the amendments on its financial statements.]

---

## APPENDIX F – LONG VERSION OF NEW ACCOUNTING PRONOUNCEMENTS NOTE

---

**Amendments to IFRS 15, Revenue from Contracts with Customers (issued on 12 April 2016 and effective for annual periods beginning on or after 1 January 2018).** The amendments do not change the underlying principles of the Standard but clarify how those principles should be applied. The amendments clarify how to identify a performance obligation (the promise to transfer a good or a service to a customer) in a contract; how to determine whether a company is a principal (the provider of a good or service) or an agent (responsible for arranging for the good or service to be provided); and how to determine whether the revenue from granting a licence should be recognised at a point in time or over time. In addition to the clarifications, the amendments include two additional reliefs to reduce cost and complexity for a company when it first applies the new Standard. [The Group is currently assessing the impact of the amendment on its financial statements.]

**Amendments to IFRS 2, Share-based Payment (issued on 20 June 2016 and effective for annual periods beginning on or after 1 January 2018).** The amendments mean that non-market performance vesting conditions will impact measurement of cash-settled share-based payment transactions in the same manner as equity-settled awards. The amendments also clarify classification of a transaction with a net settlement feature in which the entity withholds a specified portion of the equity instruments, that would otherwise be issued to the counterparty upon exercise (or vesting), in return for settling the counterparty's tax obligation that is associated with the share-based payment. Such arrangements will be classified as equity-settled in their entirety.

Finally, the amendments also clarify accounting for cash-settled share based payments that are modified to become equity-settled, as follows (a) the share-based payment is measured by reference to the modification-date fair value of the equity instruments granted as a result of the modification; (b) the liability is derecognised upon the modification, (c) the equity-settled share-based payment is recognised to the extent that the services have been rendered up to the modification date, and (d) the difference between the carrying amount of the liability as at the modification date and the amount recognised in equity at the same date is recorded in profit or loss immediately. [The Group is currently assessing the impact of the amendment on its financial statements.]

**Amendments to IFRS 4, Insurance Contracts (issued on 12 September 2016 and effective for annual periods beginning on or after 1 January 2018).** The amendments introduce two approaches: (i) an overlay approach and (ii) a deferral approach. Insurers will have the option to recognise in other comprehensive income, rather than profit or loss, the volatility that could arise when IFRS 9 is applied before the new insurance contracts standard is issued. In addition, entities whose activities are predominantly connected with insurance will have an optional temporary exemption from applying IFRS 9 until 2021.

**Amendments to IAS 40, Investment Property (issued on 8 December 2016 and effective for annual periods beginning on or after 1 January 2018).** The amendments clarify that a transfer to, or from, investment property necessitates an assessment of whether a property meets, or has ceased to meet, the definition of investment property, supported by observable evidence that a change in use has occurred. The amendments further clarify that the situations listed in IAS 40 are not exhaustive and that a change in use is possible for properties under construction (i.e. a change in use is not limited to completed properties). [The Group is currently assessing the impact of the amendment on its financial statements.]

**Annual Improvements to IFRSs 2014 – 2016 Cycle (effective for annual periods beginning on or after 1 January 2018).** The amendments impact 2 standards. IFRS 1 was amended to delete certain short-term exemptions because the reporting period to which the exemptions applied have already passed. As such, these exemptions are no longer applicable. The amendments to IAS 28 clarify that the option for a venture capital organisation and other similar entities to measure investments in associates and joint ventures at FVTPL is available separately for each associate or joint venture, and that election should be made at initial recognition of the associate or joint venture. In respect of the option for an entity that is not an investment entity (IE) to retain the fair value measurement applied to its associates and joint ventures that are IEs when applying the equity method, the amendments make a similar clarification that this choice is available for each IE associate or IE joint venture. [The Group is currently assessing the impact of the amendment on its financial statements.]

Unless otherwise described above, the new standards and interpretations are not expected to affect significantly the Group's [consolidated] financial statements.

---

## APPENDIX G – EXPOSURES TO UKRAINE

---

*Consider updating Note 2 with information about economic environment in Ukraine if the bank has operations in Ukraine, e.g.:*

**Ukraine.** Starting in 2013, the political situation in Ukraine has experienced instability with numerous protests and continued political uncertainty that has led to deterioration of the state's finances, volatility of financial markets and sharp depreciation of the national currency against major foreign currencies. The ratings of Ukrainian sovereign debt were downgraded by international rating agencies with negative outlooks for the future. The central bank of Ukraine, among other measures, imposed certain restrictions on processing of client payments by banks and on the purchase of foreign currency on the inter-bank market.

The recent political situation has been volatile, with changes in the Ukrainian Parliament and the Presidency. In March 2014, various events in Crimea led to the accession of the Republic of Crimea to the Russian Federation. This event resulted in a significant deterioration of the relationship between Ukraine and the Russian Federation. The Group's exposure to Ukraine comprises loans of RR \_\_\_\_ thousand [etc. describe the exposure].

The final resolution of the political and economic crisis in Ukraine and the final effects are difficult to predict but it may have further severe effects on the Ukrainian economy and the Group's business. *[Note: Consider including the text where the Group has significant operations in Ukraine.]*

**Impact of UK referendum result on financial reports in CEE.** In June 2016 the people of the UK voted for an exit from the EU. There will be a period of negotiation and resulting uncertainty as the detailed political and legal issues are worked out and the real impact of leaving unfolds. The political situation in the UK is also changing in response to the outcome of the referendum. It will be at least two years, and probably longer, until the UK actually leaves the EU. This uncertainty will likely impact all UK businesses and those that do business with/ invest in the UK. There has been an immediate impact on the financial markets, both in the UK and elsewhere, with the pound significantly weakening against other currencies and share prices fluctuating as the markets react to the decision.

Whilst it is impossible to predict the impact on the UK economy or the final situation in terms of trade regulation, trade and labour agreements and political positions in the coming years, there could be significant impairment, going concern and/or capital issues to consider. Entities in the UK or those who trade with the UK will likely have to reassess their trading outlook once there is more clarity on the impact of the decision, as the impact could be substantial.

Risk disclosures (operational and financial) in Note 41, sensitivity and significant judgments disclosures in Note 4 have been updated to reflect current volatility in financial markets. The impact on impairment calculations is disclosed in Note 11, 12, *[13 14]*.

*[Note: This note serves as an illustrative example, should be included only if relevant to the Group and should be adjusted for the facts and circumstances relevant to the Group.]*
