Introduction

India's Convergence with IFRS - Recent developments

Indian Accounting Standards (Ind AS) being notified by the MCA

On February 25, 2011, the Ministry of Corporate Affairs ('MCA') has issued a press release stating that 35 'Ind AS' are being notified and placed on the MCA website. With this, the results of India's current efforts of convergence to International Financial Reporting Standards ('IFRS') are known and the final new standards are available for reference, although their effective date is to be notified by the MCA at a later date, after various issues (including tax related issues) are resolved within various departments of the government. Corresponding changes to corporate laws are anticipated soon to enable the standards to come into effect.

The final Ind AS are listed in Appendix A and available at http://www.mca.gov.in/Ministry/accounting_standards.html.

The differences between the final Ind AS and the near final Ind AS issued by the Institute of Chartered Accountants of India ('ICAI') on January 14, 2011 are summarised in the Appendix B.

Exposure Draft on the revised Framework for the Preparation and Presentation of Financial Statements

On January 18, 2011, the Accounting Standards Board ('ASB') of the ICAI issued the Exposure Draft on the Framework for the Preparation and Presentation of Financial Statements under Ind AS (similar to IFRS Framework), which was open for comments till January 28, 2011. The exposure draft is available at http://220.227.161.86/21510ed180111a.pdf.

Why this publication?

If you are already using IFRS as issued by the International Accounting Standards Board ('IASB') or started the conversion process using IFRS, then this publication will be useful in helping to identify the key areas where differences exist between Ind AS and IFRS. It is important to understand that compliance with Ind AS is unlikely to result in compliance with IFRS thereby companies may not necessarily achieve dual compliance given the number and nature of differences. Accordingly, when Indian entities file their Ind AS financial statements with regulatory authorities, they may need to make suitable adjustments to comply with IFRS so as to make an unreserved statement of compliance with IFRS as issued by the IASB. Nevertheless, if a company's goal is to minimise differences from IFRS, and is therefore willing to forego some of the relaxations conferred by Ind AS relative to IFRS, the careful selection of policies and options may enable companies except certain sectors like real estate, to eliminate many differences.

This publication summarises the significant differences between Ind AS and IFRS as at the date of publication, and provides an indication of which GAAP differences are avoidable if the preparer so wishes. However, IFRS is a moving target with a number of IASB's ongoing projects (listed in Appendix C), which once finalised could bring further changes in Ind AS or, alternatively, widen the gap between the two sets of standards. Companies are encouraged to keep track of changes in IFRS and assess their implications on their financial statements.

PricewaterhouseCoopers is committed to take every possible step to assist you with your conversion to Ind AS or IFRS, including keeping you updated regarding the latest developments in Ind AS or IFRS. To learn about current developments and how we can help you in Ind AS or IFRS conversion, visit our website at

http://www.pwc.com/in/en/services/IFRS/IFRS-intro.jhtml or speak to your local PwC contact.

Ind AS vis-a-vis IFRS - An overview

There are differences between IFRS and Ind AS. Some of these differences stem from the number of standards itself, while other stem from changes made while developing the Ind AS. Currently, IFRS consists of 38 standards and 26 interpretations, while the MCA has placed only 35 Ind AS (inclusive of 24

interpretations) on its website (see Appendix A for the list of final Ind AS). A high level categorisation of differences is provided below along with the list of IFRS pronouncements not currently included under Ind AS:

A. Unavoidable differences between Ind AS and IFRS

Ind AS Difference Ind AS Title Difference Reference Reference Guidance on common control transactions 103.1 Ind AS 103 **Business Combinations** Accounting for the gain on a bargain 103.2 purchase Ind AS 11 **Construction Contracts** IFRIC 15 'Agreement for the construction of real estate' scoped out of Ind AS 18 11.1 Revenue Ind AS 18 Revenue Recognition of actuarial gains and losses 19.1.2 - other long term employee benefits Ind AS 19 **Employee Benefits** Elimination of the requirement to use a high quality corporate bond rate to 19.2 discount employee benefit obligations Financial Instruments: Exception to the definition of a financial Ind AS 32 32.1 Presentation liability

B. Avoidable differences between Ind AS and IFRS

Ind AS Reference	Ind AS Title	Difference	Difference Reference	
	First-time Adoption of Indian Accounting Standards	Transition date and comparative requirements	101.1	
Ind AS 101		Reconciliation requirements to explain transition from previous GAAP	101.2	
		Transitional relief from retrospective application of Ind AS 16 PP&E, Ind AS 40 Investment properties and Ind AS 38 intangible assets		
		Transitional relief from retrospective application of effective interest method or impairment requirements for financial instruments carried at amortised cost	101.3	
		Exemption regarding translation of long-term monetary assets and liabilities denominated in a foreign currency	-	
Ind AS 21	The Effects of Changes in Foreign Exchange Rates	Option to recognise exchange differences arising on translation of long term monetary items in equity	21.1	
Ind AS 24	Related Party Disclosures	Overriding nature of statute for related party disclosures	24.1	
Ind AS 28	Investments in Associates	Different accounting periods and policies of associates	28.1	
Ind AS 39	Financial Instruments: Recognition and Measurement	Change in the fair value of a financial liability due to the entity's own credit risk	39.1	

C. Textual differences that will not prevent convergence

Ind AS Reference	Ind AS Title	Difference	Difference Reference
Ind AS 101	First-time Adoption of Indian Accounting Standards	Definition of previous GAAP	101.4
Ind AS 1	Presentation of Financial Statements	Single statement of Profit and loss	1.1
	Statements	Classification of expense recognised in profit or loss	1.3
Ind AS 7	Statement of Cash Flows	Classification of interest and dividend in Cash flow statement	7.1
Ind AS 19	Employee Benefits	Recognition of actuarial gains and losses – post employment defined benefit plan	19.1.1
Ind AS 20	Accounting for Government Grants and Disclosure of Government Assistance	Elimination of option to measure non-monetary government grants at nominal value	20.1
		Elimination of option to present grants as deduction in arriving at the carrying amount of asset	20.2
Ind AS 24	Related Party Disclosures	Change in definition of close family members	24.2
		Additional guidance for aggregation of transactions	24.3
Ind AS 27	Consolidated financial statements	Format of consolidated financial statements	27.1
Ind AS 33	Earnings per Share	Compulsory disclosure of EPS in standalone financial statements	33.1
		Adjustments to the EPS calculation	33.2
Ind AS 40	Investment Property	Elimination of option to recognise investment properties at fair value	40.1

Ind AS issued but to be modified and/or notified later

Ind AS Reference	Ind AS Title	Remarks
Ind AS 104*	Insurance Contracts	This standard shall come into effect for insurance companies from the date to be separately announced.
Ind AS 106*	Exploration for and Evaluation of Mineral Resources	This standard will be applied with modification from a date to be notified later on.
Ind AS 18	Revenue	For rate regulated entities, this standard shall stand modified, where and to extent the recognition and measurement of revenue of such entities is affected by recognition and measurement of regulatory assets/ liabilities as per the Guidance Note on the subject being issued by the ICAI.
Appendix C of Ind AS 17**	Determining whether an Arrangement contains a Lease	Notification of this appendix (IFRIC 4 equivalent) has been deferred. The effective date for its implementation will be announced separately.
Appendix A of Ind AS 11**	Service Concession Arrangements	Notification of these appendices (IFRIC 12 and SIC 12 equivalents) has been deferred. The effective dates for implementation of these
Appendix B of Ind AS 11**	Service Concession Arrangements: Disclosures	appendices will be announced separately.

IFRS pronouncements not issued or early adopted under Ind AS

IFRS Reference	IFRS Title	Possible considerations
IFRS 9	Financial Instruments	IFRS 9 is, itself, evolving and certain components (such as hedge accounting and impairment) are still being developed
IAS 26	Accounting and Reporting by Retirement Benefit Plans	Not relevant for companies
IAS 41*	Agriculture	Major concern over the use of fair value in agriculture sector in India.
IFRIC 2	Member's share in Cooperative Entities and similar instruments	Not relevant for companies
IFRIC 15	Agreement for construction of real estate	Concern over relevance of results reported by real estate companies if sales are recognized on a 'completion' basis

^{*}In the potential delay in notification of these standards, companies may formulate accounting policies for relevant transactions that are consistent with the principles in other standards or otherwise in accordance with the Ind AS 8 hierarchy.

^{**}Companies may early adopt these appendices under Ind AS 8 hierarchy when selecting accounting policies. Once selected, accounting policies should be applied consistently.

Ind AS and IFRS - A comparison

Ind AS 101 First-time Adoption of Indian Accounting Standards

Difference 101.1	GAAP difference?	Avoidable?
Transition date and comparative requirements	Yes	Yes*

IFRS 1 defines the transition date as the beginning of the earliest period for which an entity presents full comparative information under IFRS. Ind AS 101 provides that the date of transition is the beginning of the current period. In addition, it provides an option to present comparative financial statements in accordance with Ind AS only on a memorandum basis, in which case the beginning of comparative period would be considered to be the deemed date of transition only for memorandum period. Under both scenarios of Ind AS, companies are required to present their prior year financial information that was prepared using the existing Indian GAAP. This comparative information must be reclassified to follow the disclosure form and content of Ind AS.

PwC observation

If the company decides to present comparative information in accordance with Ind AS, it would have two transition dates (one for the comparative period for memorandum reporting and another for the primary reporting period) and an additional obligation to present reclassified numbers as per existing Indian GAAP. The fact that the transitional date is a year later under Ind AS even for those companies that provide Ind AS comparatives on a memorandum basis – it may create unavoidable differences in the year of transition compared with a first-time adopter of IFRS as issued by IASB. However, assuming the Ind AS implementation date is 1st April, 20x1, if an entity chooses to comply with IFRS from the subsequent year (i.e. 31st March 20x3), it would also have a transition date of 1st April 20x1 and differences may be avoided prospectively.

Such presentation challenges may discourage companies from providing comparative information under Ind AS. For example, there could be three different balance sheets under Ind AS, i.e. as at 31st March 20x1 (existing Indian GAAP), 31st March 20x1 (Ind AS comparative period), and 1st April 20x1 (opening balance sheet for first Ind AS statutory financials). The required reconciliations between the two different transition dates may also pose a challenge to those companies that elect to present Ind AS comparatives.

^{*} Potentially avoidable from the second year of compliance with Ind AS

Difference 101.2	GAAP difference?	Avoidable?
Reconciliation requirements to explain transition from previous GAAP (Refer 101.4 for definition of previous GAAP)	Yes	Yes

IFRS 1 requires reconciliations for opening equity, total comprehensive income, the cash flow statement (if any) and closing equity for the comparative period to explain transition from previous GAAP. Ind AS 101 provides an option to provide comparative period financial statements on a memorandum basis and consequently reconciliation that are similar to IFRS. Entities that do not provide comparatives per Ind AS on a memorandum basis need not provide a reconciliation for total comprehensive income, the cash flow statement or closing equity in the first year of transition, but are expected to disclose significant differences pertaining to total comprehensive income (or if did not report such a total, Profit or loss).

PwC observation

Ind AS has significantly fewer disclosure requirements than IFRS, for companies that do not provide comparatives. Companies would have to weigh out the cost-benefit aspects of the few disclosures per Ind AS, as stakeholders may wish to know more and potentially get as much as reconciliation information normally provided under IFRS.

Difference 101.3	GAAP difference?	Avoidable?
Inclusion/modification of existing exemptions to make them relevant for India	Yes	Yes

- Transitional relief from retrospective application of Ind AS 16 Property, Plant and Equipment, Ind AS 40 Investment properties and Ind AS 38 intangible assets

 Ind AS 101 provides an option to use previous GAAP carrying values at the date of transition to Ind AS for all its property, plant and equipment. The carrying amount for these assets on transition become their deemed cost after adjusting for decommissioning liabilities as per Para D21 and D21A of Ind AS 101. A similar option can also be applied for investment properties and intangible assets.
- Transitional relief from retrospective application of effective interest method or impairment requirements for financial instruments carried at amortised cost

 If it is impracticable to apply retrospectively the effective interest method or the impairment requirements of Ind AS 39 for financial instruments carried at amortised cost,

 Ind AS 101 requires that the fair value of the financial instruments at the date of transition to Ind AS be used as the new amortised cost of that financial instrument at the date of transition to Ind AS.
- Exemption regarding retranslation of long-term monetary assets and liabilities denominated in a foreign currency
 Ind AS 101 allows an entity to exercise the option in paragraph 29A of Ind AS 21 (to recognise unrealised gains and losses on any long-term monetary assets or liabilities in equity) either retrospectively or prospectively.

PwC observation

- Transitional relief from retrospective application of effective interest method or impairment requirements for financial instruments carried at amortised cost

 The standard uses the term 'impracticable' to claim the exemption from the retrospective application. However, 'impracticable' is a high threshold, and hence it is unlikely that a

 GAAP difference will arise.
 - If an entity elects to make use of any of the above exemptions, the resultant financial statements will not comply with IFRS.

Difference 101.4	GAAP difference?	Avoidable?
Definition of previous GAAP	No	

IFRS 1 defines previous GAAP as the basis of accounting that a first-time adopter used immediately before adopting IFRS. Ind AS 101 requires companies to consider existing notified Indian accounting standards as previous GAAP when they transition to Ind AS.

(Also refer consequential amendment 1 and minor difference 1 & 2 in 'Other differences' section)

Ind AS 103 Business Combinations

Difference 103.1	GAAP difference?	Avoidable?
Guidance on common control transactions	Yes	No

IFRS 3 excludes from its scope business combinations of entities under common control. Ind AS 103 gives detailed guidance for common control transactions, and requires that business combinations involving entities or businesses under common control should be accounted for using the pooling of interests method. The excess of the consideration given over the amount of share capital is recorded as goodwill, whereas shortfall is treated as capital reserve. It also requires that financial information in respect of prior period should be restated as if the business combination has occurred at the beginning of the earliest period presented in the financial statements, irrespective of the actual date of combination.

PwC observation

Since IFRS 3 excludes common control transactions, entities typically elect as their accounting policy either the application of the pooling of interests method (i.e. predecessor accounting), or the fair value method required for all other business combinations within the scope of IFRS 3. Unlike Ind AS, no new goodwill arises while using the pooling of interest method under IFRS. The excess or short consideration given over aggregate book value of the assets and liabilities of the acquired entity is included in retained earnings or in a separate reserve.

Difference 103.2	GAAP difference?	Avoidable?
Accounting for the gain on a bargain purchase	Yes	No

IFRS 3 requires any gain arising from a bargain purchase (i.e. where the cost of acquiring a business is less than the fair value of the identifiable assets and liabilities acquired) except arising in common control transactions to be recognised in profit or loss. Ind AS 103 requires this gain to be recognised in other comprehensive income and accumulated in equity as a capital reserve, unless there is no clear evidence for the underlying reason for classification of the business combination as a bargain purchase, in which case it should be recognised directly in equity as a capital reserve.

A similar requirement also applies to associates accounting for in accordance with Ind AS 28.

Ind AS 1 Presentation of Financial Statements

Difference 1.1	GAAP difference?	Avoidable?
Single statement of Profit and loss	No	

IAS 1, Presentation of Financial Statements, provides an option either to follow the single statement approach or to follow the two statement approach to the preparation of the Statement of Comprehensive Income. The single statement approach requires all items of income and expense to be recognised in the statement of comprehensive income, while the two statements approach requires two statements to be prepared, one displaying components of profit or loss (separate income statement) and the other beginning with profit or loss and displaying components of other comprehensive income.

Ind AS 1 allows only the single statement approach, and requires this to be titled the 'Statement of Profit and Loss'. Corresponding amendments have been made to other Ind AS.

PwC observation

The requirement per Ind AS is in line with an IASB exposure draft on financial statement presentation issued in May 2010, which required the single statement approach. Since the single statement approach is an acceptable option under IFRS, it will not preclude convergence with IFRS.

Difference 1.2	GAAP difference?	Avoidable?
Statement of changes in equity to be shown as a part of the balance sheet	Not known	

IAS 1 requires the preparation of a Statement of Changes in Equity as a separate statement. Ind AS 1 requires the statement of changes in equity to be shown as a part of the balance sheet.

PwC observation

In India, the format of financial statements of companies is governed by the Schedule VI to Companies Act. The MCA has recently issued Revised Schedule VI which prescribes the format of financial statements under existing accounting standards and not under Ind AS. Since Schedule VI in line with Ind AS has not been issued yet, hence at this point of time it's not known whether the above difference would result in a GAAP difference.

Difference 1.3	GAAP difference?	Avoidable?
Classification of expense recognised in profit or loss	No	

IAS 1 requires an entity to present an analysis of expenses recognised in profit or loss using a classification based on either their nature or their function within the entity. Ind AS 1 requires expenses to be classified by nature.

Ind AS 7 Statement of Cash Flows

Difference 7.1	GAAP difference?	Avoidable?
Classification of interest and dividend in cash flow statement	No	

IAS 7 gives an option to classify dividends paid as an item of operating activity. Further, in case of other than financial entities, IAS 7 gives an option to classify interest paid and interest and dividends received as operating or financing cash flows. However, Ind AS 7 does not provide such options and requires as follows:

For Financial entities

Items	Classification in cash flow statement
Interest and dividends received	Operating Activities
Interest paid	Operating Activities
Dividends paid	Financing Activities

For other entities

Classification in cash flow statement	
Investing Activities	
Financing Activities	
Financing Activities	

Ind AS 11 Construction contracts and Ind AS 18 Revenue

Difference 11.1	GAAP difference?	Avoidable?
IFRIC 15 'Agreement for the construction of real estate' scoped out of IAS 18 Revenue	Yes	No

IAS 18 Revenue applies to agreements for the construction of real estate, unless the buyer is able to specify the major structural elements of the design of real estate before construction begins, and /or specify major structural changes once construction is in progress. For many real estate developers, application of IAS 18 requires revenue (and profit) from sale to be recognised on completion of the construction and hand-over of control of the property to the buyer.

Ind AS, however, brings revenue transactions of real estate developers into the scope of Ind AS 11. Accordingly, revenue (and profit) is recognised, using a percentage of completion method, over the construction period.

PwC Observation

Under existing Indian GAAP, companies recognise revenue from agreements for the construction of real estate based on a percentage of completion method. The amendments to IAS 11 and IAS 18 in arriving at the Ind AS equivalent standards allow real estate developers to continue to use their existing accounting policy. This is a significant departure from IFRS and will prevent financial statements issued by real estate developers under Ind AS from being comparable with their international counterparts.

In addition, the change to the scope of Ind AS11 could be construed as bringing all agreements of real estate development into the scope of Ind AS11, not merely those relating to construction of real estate. If the final standard continues to use the present wording, and in the absence of a definition of a 'real estate developer', this could result in unintended consequences.

The IASB has recently issued an exposure draft, Revenue, which proposes to replace IAS 11 Construction Contracts, IAS 18 Revenue, IFRIC 13 Customer Loyalty Programmes, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfers of Assets from Customers, and SIC 31 Barter Transactions Involving Advertising Services. It proposes a new revenue recognition model that could fundamentally alter the way entities recognise revenue.

Refer to our 'Practical guide to IFRS - Revenue recognition full speed ahead' (available on our website www.pwc.com/in/en/services/IFRS/Publication-IFRS) for more details.

Ind AS 19 Employee Benefits

Difference 19.1	GAAP difference?	Avoidable?
19.1.1 Recognition of actuarial gains and losses – post employment defined benefit plan	No	

IAS 19 gives three options to recognise actuarial gains and losses for post employment defined benefit plans namely:

- 1. recognise in other comprehensive income;
- 2. recognise immediately in the income statement;
- 3. amortise to profit or loss using a 'corridor approach'.

Ind AS 19 does not incorporate the second and third options, thereby requiring actuarial gains and losses to be recognised in other comprehensive income (OCI). The actuarial gains and losses that have been recorded in OCI shall be recognised immediately in retained earnings and shall not be reclassified to profit or loss in a subsequent period.

19.1.2 Recognition of actuarial gains and losses – other long term employee benefits

Yes

No

As per IAS 19, actuarial gains and losses for other long term defined benefits are recognised in profit or loss, while as per Ind AS 19 these are to be recognised in OCI. The actuarial gains and losses that have been recorded in OCI shall be recognised immediately in retained earnings and shall not be reclassified to profit or loss in a subsequent period.

Difference 19.2 GAAP difference? Avoidable?

Elimination of the requirement to use a high quality corporate bond rate to discount employee benefit obligations Yes No

Ind AS 19 requires post employment benefit obligations to be discounted using the market yield on government bonds. This requirement is contrary to IAS 19, which requires government bond yields to be used only where there is no deep market for high quality corporate bonds.

PwC observation Yes No

Ind AS has removed the use of a discount rate based on high quality corporate bonds on the basis that there is no deep market for such bonds in India. While this will not impact solely domestic companies, where IAS 19 would also require the yield on government bonds to be used, it will give rise to a difference for companies that have defined benefit schemes where payment will be made in a foreign currency (e.g. overseas subsidiaries of Indian companies), for which there is a deep market of high quality corporate bonds, such as in the UK or US.

Difference 19.3 (Not part of the Standard)

Frequency of Actuarial valuation

No
--

The appendix to Ind AS 19 (unlike IAS 19) states that detailed actuarial valuation of defined benefit obligations may be made at intervals not exceeding three years.

PwC observation

The appendix to Ind AS 19 indicates that there may have originally been an intention to require the detailed actuarial valuation of defined benefit obligations at least every three years. However, no such amendment is in the main text of the standard. This discrepancy should be clarified by the standard setters.

Ind AS 20 Accounting for Government Grants and Disclosure of Government Assistance

Difference 20.1	GAAP difference?	Avoidable?
Elimination of option to measure non-monetary government grants at nominal value	No	

IAS 20 gives an option to measure non-monetary government grants either at their fair value or at nominal value. Ind AS 20 requires measurement of such grants only at their fair value. Consequential amendments have been made to Ind AS 38 Intangible Assets.

Difference 20.2	GAAP difference?	Avoidable?
Elimination of option to present grants as deduction in arriving at the carrying amount of asset	No	

IAS 20 gives an option to present the grants related to assets either by setting up the grant as deferred income or by deducting the grant in arriving at the carrying amount of the asset. Ind AS 20 requires presentation of such grants in the balance sheet as deferred income.

Ind AS 21 The Effects of Changes in Foreign Exchange Rates

Difference 21.1	GAAP difference?	Avoidable?
Option to recognise exchange differences arising on translation of long term monetary items in equity	Yes	Yes

Ind AS 21 provides companies with an option to recognise unrealised exchange differences arising on translation of long-term monetary items (assets and liabilities) denominated in a foreign currency directly in equity, and accumulated as a separate component therein. Such accumulated exchange differences must be transferred to profit or loss over the period of maturity 'in an appropriate manner'. The option, if applied, is to be exercised when the exchange difference is initially recognised. Once exercised, it is irrevocable and applied for all long term monetary items.

This option is not available for the long-term monetary items which are classified as at fair value through profit or loss in accordance with Ind AS 39, either because they are held for trading or because of their designation as at fair value through profit or loss. Monetary items are considered to be long-term if it has a maturity period of twelve months or more from the date of the initial recognition.

IAS 21 requires all gains and losses arising on retranslation of monetary assets and liabilities denominated in a foreign currency to be recognised in profit or loss (unless it is designated as a hedging instrument in a cash flow or net investment hedge).

Ind AS 32 Financial Instruments: Presentation

Difference 32.1	GAAP difference?	Avoidable?
Exception to the definition of financial liability	Yes	No

Ind AS32 introduces an exception to the IFRS definition of a 'financial liability'. Ind AS classifies a conversion option embedded in a convertible bond denominated in a foreign currency as an equity instrument if it entitles the holder to acquire a fixed number of entity's own equity instruments for a fixed amount of cash, and the exercise price is fixed in any currency. IAS 32 requires the exercise price to be fixed in the entity's functional currency.

PwC observation on Ind AS 21 & Ind AS 32

These provisions may help to prevent income statement volatility for Indian entities resulting from IFRS accounting for (a) translations of long term monetary items from foreign currency to functional currency (i.e. IAS 21) and (b) equity conversion options embedded in a foreign currency convertible bond denominated in foreign currency to acquire a fixed number of entity's own equity instruments for a fixed amount in a foreign currency (i.e. IAS32).

A suitable example that contains both the above mentioned features i.e. Foreign Currency Convertible Bond (FCCB) is explained over here. Indian companies often issue long term FCCBs, denominated in a currency different from the functional currency of the issuing entity to raise foreign funds at competitive rates. These FCCBs contain a plain vanilla equity conversion option, for which the number of shares to be issued on conversion as well as the underlying consideration (redemption amount of the bond) are fixed in a foreign currency.

IFRS prescribes split accounting for these FCCBs (i.e. liability and conversion feature), where the debt host is liability component initially recorded at fair value and subsequently measured at amortised cost with foreign exchange translation difference being recognised in profit and loss account; while the conversion feature is treated as derivative liability (as 'fixed-for-fixed' condition not satisfied due to the exchange rate variation) and subsequently re-measured through profit and loss account.

However, Ind AS 21 provides an irrevocable option to recognise exchange differences on the translation of such long term monetary items from foreign currency to functional currency in equity and for these to be transferred to the profit or loss over the maturity of such instruments in an appropriate manner (subject to certain conditions.) Under Ind AS 32, an exception to the definition of financial liability permits that such conversion option will be recognised as an equity instrument rather than as a derivative liability as specified under IFRS. These are significant GAAP differences relative to IFRS.

Ind AS 24 Related Party Disclosures

Difference 24.1	GAAP difference?	Avoidable?
Overriding nature of statute for related party disclosures	Yes	Yes

In Ind AS 24 eliminates the need to provide related party disclosures that are considered to conflict with the confidentiality requirements of statute, a regulator or similar competent authority, on the basis that accounting standards cannot override legal/regulatory requirements (Para 4A and 4B of Ind AS 24). IAS 24 has no equivalent requirement.

PwC observation

Para 4A and 4B are open for interpretation and could lead to non-disclosure of information, which may not be the intention of the standard. Further, it is unclear what constitutes a 'similar competent authority'.

Difference 24.2	GAAP difference?	Avoidable?
Change in definition of close family members	Unlikely	

IAS 24 defines, 'close members of the family' of an individual as those family members who may be expected to influence, or be influenced by, that individual in their dealings with the entity. They may include:

- 1. the individual's domestic partner and children;
- 2. children of the individual's domestic partner; and
- ${\it 3.} \quad {\it dependants\ of\ the\ individual\ or\ the\ individual\ 's\ domestic\ partner.}$

However, Ind AS 24 defines 'close members of the family' of a person as the persons specified within meaning of 'relative' under the Companies Act 1956 and that person's domestic partner, children of that person's domestic partner.

Difference 24.3	GAAP difference?	Avoidable?
Additional guidance for aggregation of transactions	No	

Ind AS 24 provides additional clarificatory guidance regarding the aggregation of transactions for disclosure. This guidance states that aggregation 'should not be done so as to obscure the importance of significant transactions', for example:

- Purchases or sales of goods should not be aggregated with purchases or sales of fixed assets;
- A material related party transaction with an individual party should not be clubbed in an aggregated disclosure.

Ind AS 27 Consolidated and Separate Financial Statements

Difference 27.1	GAAP difference?	Avoidable?
Format of consolidated financial statements (Refer difference 1.2 also)	Unlikely	

Ind AS 27 prescribes specific format for presentation of consolidated financial statements or as near thereto as circumstances admit, where parent is a company. It sets out the minimum requirements for disclosure on the face of

- 'Consolidated Balance Sheet' at the end of the period and a 'Consolidated Statement of Changes in Equity' for the period as a part of the 'Consolidated Balance Sheet',
- 'Consolidated Statement of Profit and Loss' for the period, and
- Notes to accounts.

However, IAS 27 does not prescribe any specific format for presentation of consolidated financial statements.

Ind AS 28 Investments in Associates

Difference 28.1	GAAP difference?	Avoidable?
Different accounting periods and policies of associates	Yes	Yes

Where the financial statements of an associate used in applying equity method are prepared as of a date different from that of the investor, IAS 28 requires that this difference should not be more than three months. IAS 28 also requires that the accounting policies of an associate should be aligned with those of the reporting entity. Ind AS 28 provides exceptions to these requirements if they are 'impracticable'.

PwC observation

Ind AS 28 explains that these changes have been made because the investor does not control the associate, and hence it may not be able to obtain the information necessary to comply with the requirements of IAS 28. Nevertheless, if the company is unable to influence its associate sufficiently in order to obtain the relevant financial statements or information, this could bring into question whether it has significant influence over its investment, and hence whether its classification as an associate is appropriate. However, 'impracticable' is a high threshold, and hence it is unlikely that a GAAP difference will arise.

Ind AS 33 Earnings per Share

Difference 33.1	GAAP difference?	Avoidable?
Compulsory disclosure of EPS	No	

IAS 33 provides that when an entity presents both consolidated financial statements and separate financial statements, it may give EPS related information in consolidated financial statements only, whereas, the Ind AS 33 requires EPS related information to be disclosed both in consolidated financial statements and separate financial statements.

Difference 33.2	GAAP difference?	Avoidable?
Adjustments to the EPS calculation	No	

Ind AS 33 provides that where any item of income and expense which is otherwise required to be recognised in profit or loss in accordance with Ind AS, is debited or credited to securities premium account / other reserves in accordance with legal requirements, the amount in respect of thereof shall be deducted from profit or loss from continuing operations for the purpose of calculating basic and diluted earnings per share.

PwC observation

This amendment eliminates a GAAP difference in reported EPS in circumstances where a GAAP difference already exists in reported profit or loss due to the requirements of Indian law e.g. share issue expense need to be written off against securities premium rather than to be recognised in profit and loss account.

Ind AS 39 Financial Instruments: Recognition and Measurement

Difference 39.1	GAAP difference?	Avoidable?
Change in the fair value of a financial liability due to the entity's own credit risk	Yes	Yes

Ind AS 39 has amended the subsequent measurement of financial liabilities designated at fair value through profit or loss so as to ignore changes in the fair value consequent to changes in the entity's own credit risk. Accordingly, such liabilities are not recognised at fair value, but using a 'frozen credit spread' methodology. IAS 39 requires all changes in fair values in such liabilities to be recognised in profit or loss.

PwC observation

This provision is introduced to prevent the recognition of unrealised gains or losses resulting from the changes in fair value of financial liabilities consequent to changes in the entity's own credit risk. The IASB has also introduced measures in IFRS 9 Financial Instruments to prevent volatility in profit or loss from changes in the entities own credit risk. However, these measures differ significantly from those in Ind AS 39, as IFRS 9 continues to require such financial liabilities to be recognised at fair value, but with changes due to own credit being recognised in other comprehensive income (i.e. outside profit or loss).

The Fair Value Through Profit or Loss designation is itself optional under Ind AS, and hence the GAAP difference technically could be avoided by not using this measurement category.

Ind AS 40 Investment Property

Difference 40.1	GAAP difference?	Avoidable?
Elimination of option to recognise investment properties at fair value	No	

IAS 40 permits investment property to be measured using either the cost model or the fair value model after initial recognition. Ind AS 40 requires the use of the cost model. Accordingly, following provisions of 'IAS 17 Leases' have been removed under Ind AS 17:

- Paragraph 18 of IAS 17 dealing with measurement of the land and buildings elements when the lessee's interest in both land and buildings is classified as an investment property in accordance with IAS 40 Investment Property and the fair value model is adopted.
- Paragraph 19 of IAS 17 dealing with property interest held under an operating Lease as an investment property, if the definition of investment property is otherwise met and the fair value model is applied.

Other differences

Applicability of Ind AS

Applicability or exemptions to Ind AS are governed by the Companies Act, 1956 and the rules made there under. Accordingly, the following changes have been made:

- 1. Applicability or exemption of Ind AS 33 Earnings per Share and Ind AS 108 Operating segments has been changed to be based on 'Companies (Accounting Standards) Rules 'rather than based on listing criteria given in IFRS.
- 2. The scope of Ind AS 28 Investments in Associates and Ind AS 31 Interests in Joint Ventures have been modified so as to exclude mutual funds, unit trusts and similar entities (including insurance linked investment funds) as the Companies Act, 1956 is not applicable to them.
- 3. The exemption from preparing consolidated financial statements under Para 10 of IAS 27 has been removed in Ind AS 27. Similar amendments have been made to Ind AS 28 Investments in Associates and Ind AS 31 Interests in Joint Ventures.

'Companies (Accounting Standards) Rules 'to make Ind AS effective are yet to be notified.

Consequential amendments

- 1. IFRS 1 requires specific disclosures if the entity provides non-IFRS comparative information and historical summaries. Since comparatives are optional under Ind AS, these disclosure requirements have been removed from Ind AS 101.
- 2. IAS 1 contains Implementation Guidance. Ind AS 1 does not include the same because various enactments have prescribed formats, e.g., Schedule VI to the Companies Act, 1956.
- 3. Ind AS 12 Income Taxes has been modified consequent to the change in accounting treatment of gains on bargain purchases, the adoption of a single statement approach in Ind AS1, and government grant presentation.
- 4. Additional guidance is included in Ind AS 23 Borrowing Costs on exchange differences arising from foreign currency borrowings that are to be treated as an adjustment to interest costs.
- 5. With regard to the acquisition of an intangible asset by way of a government grant, IAS 38, Intangible Assets, provides the option to an entity to recognize both asset and grant initially at fair value or at a nominal amount plus any expenditure that is directly attributable to preparing the asset for its intended use. Ind AS 38 allows only fair value for recognising the intangible asset and grant in accordance with Ind AS 20.

Other differences (Contd.)

Minor differences

- 1. Deletion of IFRS 1 exemptions not relevant for India
 - Since Ind AS 19 does not allow the corridor approach to be used to defer actuarial gains and losses, the corresponding IFRS 1 exemption for setting actuarial gain or loss to zero under corridor approach has been removed from Ind AS.
 - The option in IFRS 1 to capitalise borrowing costs on a prospective basis has been removed from Ind AS, on the basis that existing Indian GAAP already requires an entity to capitalise borrowing costs.
- 2. Transitional provisions for the accounting for insurance contracts and service concession arrangements have been incorporated in Ind AS 101 so as to require prospective application on or after date of transition to Ind AS. Earlier application is encouraged.
- 3. Normally, an entity consistently prepares financial statements for a one-year period. However, for practical reasons, some entities prefer to report, for 52-week period. IAS 1 allows this practice but Ind AS 1 does not.
- 4. When there is a change in functional currency of either the reporting currency or a significant foreign operation, IAS 21 requires disclosure of that fact and the reason for the change in functional currency. Ind AS 21 requires an additional disclosure of the date of change in functional currency.
- 5. Additional disclosures regarding the duration of hyperinflationary existing in the economy has been added to Ind AS 29 Financial Reporting in Hyperinflationary Economies.

General differences

- 1. Different terminologies are used, as used in existing laws e.g. term 'Balance Sheet' is used instead of 'Statement of financial position' and 'Statement of profit and loss' is used instead of 'Statement of comprehensive income'. Words 'approved for issue' have been used instead of 'authorised for issue' in the context of financial statements considered for the purpose of events after the reporting period.
- 2. Provisions relating to Transition included in individual IAS have been deleted from Ind AS since all transitional provisions related to Ind AS where ever considered appropriate have been included in Ind AS 101.
- 3. IFRICs (except IFRIC 2 & 15) and SICs are included as appendices in the Ind AS. Thus the references to IFRICs and SICs have been replaced with references to Appendices.
- 4. IFRS includes a Basis for Conclusions ('BC') as an appendix, which summarises the IASB's considerations in reaching the conclusion of each standard; these do not form part of Ind AS.

Challenges Ahead

India is moving ahead on the path of IFRS convergence, and with the Ind AS being notified by the MCA, it brings forth a few questions about the next steps in the process of convergence.

Key Questions to be answered

The convergence to IFRS by India is a very significant step in the right direction and the path taken has been challenging given the need to consider the numerous aspects in play. With the welcome move by the MCA of issuing Ind AS, there are other vital steps that are anticipated with some anxiety given the time at hand, and include:

- When would these Ind AS be notified in the official gazette?
- When would the date of implementation of Ind AS be announced by the Government?
- How and by when will consequential amendments to existing legislation (e.g. the Companies Act, Income tax Act, SEBI guidelines, etc), be made?
- When will SEBI require the use of Ind AS for quarterly reporting?
- How would Ind AS synchronize with, and what would the impact be of, new changes on the horizon, such as DTC, GST, etc?
- Will Ind AS continue to evolve alongside changes to IFRS?

Is convergence achieved?

India has adopted a step towards convergence with IFRS, but with certain 'carve-outs' (and 'carve-ins') to ease adoption and temper IFRS to be more acceptable in the local marketplace. The fundamental question remains: how will India participate (if not influence) in the future development of IFRS? Will the inclusion of significant differences between Ind AS and IFRS mute India's voice relative to fully converged territories?

Further, with IFRS itself changing in the near to medium term (see Appendix C for IASB's ongoing projects), when and how would all these be incorporated into the path India is taking? Finally, and perhaps most importantly, will the benefits of 'almost converging' outweigh the pain being endured by those adopting Ind AS?

Are Companies prepared for this change?

Though the final Ind AS have been issued by the MCA but there is no clarity on the date of implementation of Ind AS. Recently, there has been media coverage of various stakeholders questioning the timing of the convergence plans in India, given the numerous moving parts in the Indian context and IFRS being a moving platform.

Appendix A - List of Ind AS

These are the final Ind AS being notified by the MCA. The date of implementation of these Ind AS is expected to be announced by the MCA at a later date. Following IFRS are not issued under Ind AS – Financial Instruments (IFRS 9), Accounting and Reporting by Retirement Benefit Plans (Ind AS 26) and Agriculture (Ind AS 41).

Notes:

- $1. \quad \text{The term `International Financial Reporting Standards' (`IFRS') comprises of:} \\$
 - International Financial Reporting Standards (IFRS)
 - International Accounting Standards (IAS)
 - Interpretations from the International Financial Reporting Interpretations Committee (IFRIC)
 - Interpretations from Standing Interpretations Committee (SIC)
- 2. Existing AS refers to existing Accounting Standards notified under Companies (Accounting Standards) Rules, 2006.

Appendix B - Differences between near final and final Ind AS

Deferral of certain standards and interpretations

- Ind AS 106 Exploration for and Evaluation of Mineral Resources (i.e. IFRS 6 equivalent)

 This standard will be applied with modification from a date to be notified later. In the potential delay in notification of this standard, companies will need to formulate accounting policies for relevant transactions that are consistent with the principles in other standards or otherwise in accordance with the Ind AS 8 hierarchy. It would be problematic for companies to apply other standards (Ind AS 16 Property, plant and equipment; Ind AS 38 Intangible assets; and Ind AS 36 Impairment of assets), as Ind AS 106 provides relief from certain requirements of these standards.
- Notification of following appendices has been deferred.
 The effective date of implementation will be announced separately.
 - » Appendix C of Ind AS 17, determining whether an Arrangement contains a Lease (i.e. IFRIC 4 equivalent)
 - » Appendix A of Ind AS 11, 'Service Concession Arrangements' (i.e. IFRIC 12 equivalent)
 - » Appendix B of Ind AS 11 'Service Concession Arrangements: Disclosures' (i.e. SIC 29 equivalent)

Companies may early adopt these appendices under Ind AS 8 hierarchy when selecting accounting policies. Once selected, accounting policies should be applied consistently.

Ind AS 18 Revenue

For rate regulated entities, Ind AS 18 is expected to be modified, where and to extent the recognition and measurement of revenue of such entities is affected by recognition and measurement of regulatory assets/liabilities. A Guidance Note on the subject is also being issued by the Institute of Chartered Accountants of India.

Ind AS 21 Effects of changes in foreign exchanges rates

- When there is a change in functional currency of either the reporting entity or a significant foreign operation, IAS 21 requires disclosure of that fact and the reason for the change in functional currency. Ind AS 21 requires an additional disclosure of the date of change in functional currency.
- Appendix B: Illustrative examples on application of Para 14, 25, 33 and 37 (i.e. functional currency in case of a hyperinflationary economy, impairment loss, net investment in foreign operations denominated in the functional currency of the reporting entity and effects of change in functional currency) have been included.

Ind AS 24 Related party disclosures

Ind AS 24 defines 'close members of the family' of a person as the persons specified within meaning of 'relative' under the Companies Act 1956 and that person's domestic partner, children of that person's domestic partner and dependants of that person's domestic partner. In near final draft it was defined on the similar lines as given in IAS 24 i.e. those family members who may be expected to influence, or be influenced by, that individual in their dealings with the entity including brothers, sisters, father and mother of that person. *Refer difference 24.2 for more details*.

Ind AS 27 Consolidated and Separate Financial Statements

Appendix C 'Form of Consolidated Financial Statements' is added in this standard. This appendix sets out the minimum requirements for disclosure on the face of

- » 'Consolidated Balance Sheet' at the end of the period and a 'Consolidated Statement of Changes in Equity' for the period as a part of the 'Consolidated Balance Sheet',
- » 'Consolidated Statement of Profit and Loss' for the period, and
- » Notes to accounts.

Refer difference 27.1 and 1.2 for more details.

Ind AS 34 Interim financial reporting

A footnote has been inserted which states that unaudited financial results required to be prepared and presented under clause 41 of listing agreement with stock exchanges is not an 'Interim Financial Report' as defined in this standard.

Ind AS 101 First-time adoption of Indian Accounting Standards

- Para 2A has been removed from Ind AS 101 where relief
 was provided to existing filers of financial statements in
 accordance with the IFRS issued by the IASB, which would
 have been entitled to adopt the balance sheet so filed as at
 the end of the immediately preceding financial year as the
 opening Ind AS balance sheet after making adjustments for
 differences in Ind AS and IFRS as on the date of transition
 to Ind AS.
- Clarification has been provided on application of Ind AS 101 when comparative information is provided from the deemed date of transition. A first time adopter for whom the first reporting period is financial statements for the year ending March 31, 2012 must apply the exceptions and exceptions as at April 1, 2010 and April 1, 2011; accordingly the balance sheet as at end of March 31, 2011 may not be equivalent to the opening Balance Sheet as at April 1, 2011.
- Paragraph D7A provides an entity with the option to use the carrying value of all property, plant and equipment as at the date of transition (instead of carrying values of all such assets on or before April 1, 2007 as in near final Ind AS) in accordance with previous GAAP as an acceptable starting point under Ind-AS. This option can also be applied to investment properties and intangible assets.
- Para D19A provides transitional relief for retrospective application of the effective interest method and impairment requirements for financial instruments carried at amortised cost. The word 'financial asset' (as given in the near final draft) is replaced with 'financial instrument' in the final standard in order for this relief to be applicable for financial liabilities as well as 'financial assets'.

Appendix C-IASB's ongoing projects

	Estimated publication date	
Financial Crisis related projects	2011 Q1	2011 Q2
Financial instruments (IAS 39 replacement)		
Impairment		
Hedge accounting		IFRS
Asset and liability offsetting		
Consolidation		
Replacement of IAS 27	IFRS	
Disclosures unconsolidated entities	IFRS	
Investment companies		ED
Fair value measurement	IFRS

Financial statement presentation (Presentation of OCI)	IFRS	
Leases		IFRS
Revenue recognition		IFRS
Joint ventures	IFRS	
Post-employment benefits (incl. pensions)	IFRS	
Other Projects		
Insurance contracts		IFRS
Annual improvements 2009-2011		ED

Note - This timetable is taken from IASB website (ifrs.org) as on 28 February 2011. It shows the current best estimate of publication dates and is subject to change. Refer http://www.ifrs.org/Current+Projects/IASB+Projects/IASB+Work+Plan.htm for more details.

Other projects

In November 2010 the IASB and FASB (Financial Accounting Standards Board) decided to amend the timetable for projects that are important but less urgent and expect to resume discussing these topics after June 2011:

- Financial Statement Presentation (the replacement of IAS 1 and IAS 7),
- Financial instruments with characteristics of equity,
- Emissions Trading Schemes, Liabilities (IAS 37 amendments), and
- Income Taxes.

Additionally, the IASB is deferring publication of exposure drafts for Investment Companies and Annual improvements (see the timetable above) and the IASB and FASB do not expect to complete the phase A of the conceptual framework reporting entity until the Q2 2011.

Further, IASB will consider research and other projects like rate-regulated activities, intangible assets etc. in its future agenda in 2011.

Recently completed projects

- Deferred tax: recovery of underlying assets
- Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters
- additions to IFRS 9 Financial Instruments in relation to financial liabilities
- Management Commentary
- Derecognition Disclosures
- Conceptual Framework Phase A
- Improvements to IFRSs

Refer http://www.ifrs.org/Current+Projects/IASB+Projects/IASB+Work+Plan.htm for effective dates.

About PwC

PwC firms provide industry-focused assurance, tax and advisory services to enhance value for their clients. More than 161,000 people in 154 countries in firms across the PwC network share their thinking, experience and solutions to develop fresh perspectives and practical advice. See pwc.com for more information.

In India, PwC (www.pwc.com/India) offers a comprehensive portfolio of Advisory and Tax & Regulatory services; each, in turn, presents a basket of finely defined deliverables. Network firms of PwC in India also provide services in Assurance as per the relevant rules and regulations in India.

Complementing our depth of industry expertise and breadth of skills is our sound knowledge of the local business environment in India. We are committed to working with our clients in India and beyond to deliver the solutions that help them take on the challenges of the ever-changing business environment.

PwC has offices in Ahmedabad, Bangalore, Bhubaneshwar, Chennai, Delhi NCR, Hyderabad, Kolkata, Mumbai and Pune.
