PwC insurance industry thought leadership: Top issues and strategic risk management

PwC has released the following thought leadership pieces of interest to the insurance industry:

Top Issues: The Insurance Industry in 2012

This thought leadership piece discusses risk and capital management (impact of persistently low interest rates), improving financial reporting as well as strategy and execution as it relates to Mergers and Acquisitions. Moreover, it discusses the impact of Dodd-Frank as well as tax compliance updates relating to the enactment of SSAP 101 and FATCA.

Strategic Risk Management: Facilitating Risk-Based Insurance Decisions

As described in the thought leadership piece, PwC believes that insurers require a *strategic* risk management ("SRM") solution that identifies, assesses, and economically manages potentially enterprise-threatening losses over time. In other words, SRM is a way to mitigate evolving risks before they spiral out of control.
