Highlights

Highlights

This publication analyses the Global Top 100 companies (by market capitalisation, as at 31 March 2023), highlighting the changes in the composition of the list at 31 March 2022 and other relevant periods. As a point of reference, despite a strong Q1-23, the MSCI World Index decreased by 8.6% in the year to 31 March 2023 following a challenging period for global markets.

First significant Year-on-Year (YoY) decline since 2009

- Market Capitalisation for the Top 100 companies decreased by 11% (\$3,845bn) compared to 31 March 2022, the first significant decrease since 2009 (-38%).
- A strong Q1-23 for equity markets, despite turbulence in the Banking sector, wasn't sufficient to reverse losses recorded earlier in the year with a fall in investor confidence and the tightening of fiscal policies globally amongst the key factors putting equity valuations under pressure.

Europe the only region with YoY growth

- Despite a volatile macroeconomic backdrop, Europe experienced YoY growth - the only region to do so - with total market capitalisation increasing \$341bn (9.5%), moving up to the second spot in the regional list. This was attributable to four new entries to and some outstanding YoY performers, including Novo Nordisk (+ 40%).
- The US saw a 12% (\$2,969bn) decline in market capitalisation, though retained its number one spot in the regional list.

Sector dynamic - A rotation from growth and cyclical stock to more defensive sectors

- Despite a surprising rally in Q1-23 for technology, the sector recorded an 8% YoY decline in the list, the first decline recorded for ten years.
- A poor year for Financials and Consumer Discretionary, accounting for \$2,159bn (56%) of the total fall in market capitalisation, driven by exits and performance.
- Companies featuring within the Industrial sector performed well with market capitalisation increasing 45% (\$376bn), mainly aided by four new entries into the Top 100.

Apple retains its top spot despite a challenging year for Tech valuation, leaving the top five unchanged

- The top five remain unchanged: Apple, Microsoft, Saudi Aramco, Alphabet and Amazon, however, they did contribute towards 50% of the fall in total market capitalisation. Aramco had a stable Q1-23 as commodity prices stabilised whilst the others benefitted from a recovery run in Q1-23, reversing some earlier declines.
- Despite Apple and Microsoft falling 8% and 7% respectively, they were the only two companies in the top five to outperform their relative industry sector, with Technology falling 12% overall. Saudi Aramco, was the worst performing relative to its sector down 18% versus the Energy index of a 2% decrease.

Country performance

- The top three countries (US, Saudi Arabia and China) retained their respective positions for their share of market capitalisation, despite their market capitalisation dropping by 12%, 18% and 11%, respectively.
- Germany, France and Denmark had notable growth this year despite challenging macroeconomic conditions. SAP SE, a Germany based Technology Company, saw a 12% increase in market capitalisation this year, one of a few exceptions in the Top 100.

Tightening of fiscal policies and falling investor confidence drive valuations down for the first time since 2016.

Despite a rebound in market capitalisation for most sectors in Q1-23, a challenging environment for equities caused by the ongoing tightening of fiscal policy and stubborn inflation, and compounded by the uncertainty in the US and European banking sector that arose in Q1-23, meant that the Top 100 Companies market capitalisation decreased by 11% compared to 31 March 2022. This was the first decrease since 2016. The US, the largest contributor to the Top 100, is the main driver of this decrease, with a drop of \$2,969bn (77% of the overall fall in market capitalisation) from this region alone.

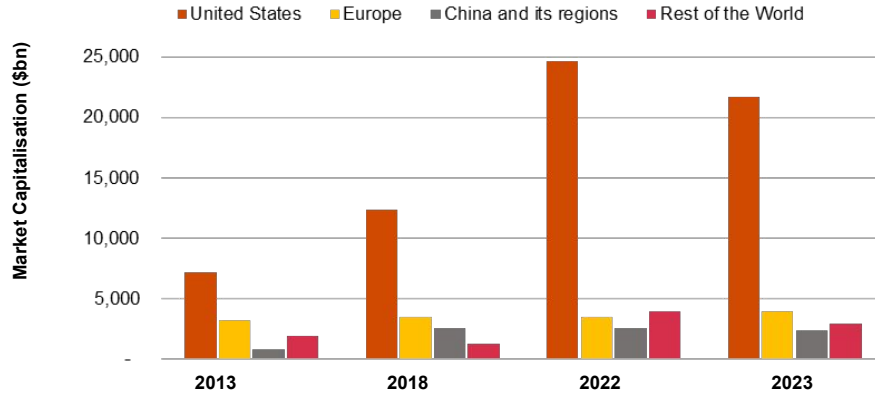

- The **Top 5 companies remain unchanged from 2022** despite significant falls in market capitalisation.
- Visa Inc., replaces Taiwan Semiconductor Manufacturing Company Limited in the Top 10 after the latter's share price fell 16% in the year whereas Visa's share price held flat throughout.
- Technology retained its top sector position despite a 12% decline in market capitalisation. Industrials was the only sector to grow in the year, up 45%.
- **91 companies** from March 2022 maintained their position in the 2023 list – adding more stability to the Top 100 than the previous year. This highlights the subdued performance across all sectors.
- There were **no direct entrants as a result of an IPO** this year.
- The **threshold to enter the Top 100 has decreased 8%** to \$119bn this year, compared to \$128bn in March 2022, evidencing the challenges facing global markets.

Europe outperforms the regions with four new entrants into the Top 100.

The European region's share increased from 10% in 2022 to 13% in 2023, marking the only region with YoY growth buoyed by four new entrants into the the Top 100. The dominance of technology and communication services in the US companies contributed to a 12% decline in US market capitalisation, its first decrease in the Top 100 in over ten years - albeit it retained it's number one status comfortably.

	2013	2018	2022	2023
United States	7,156	12,387	24,654	21,686
Europe	3,186	3,470	3,589	3,930
China and its regions	796	2,562	2,556	2,369
Rest of the World	1,916	1,211	3,915	2,885
Total	13,053	19,630	34,714	30,869

	CAGR (10 yrs)	CAGR (5 years)	% Change 22 to 23
United States	11.7%	11.9%	-12.0%
Europe	2.1%	2.5%	9.5%
China and its regions	11.5%	-1.6%	-7.3%
Rest of the World	4.2%	19.0%	-26.3%
Total	9.0%	9.5%	-11.1%

- Europe the only region to grow YoY, aided by the performance in Denmark (+40%), Germany (+18%) and France (+17%). Germany added two companies to the list, Deutsche Telekom and Siemens who increased their share price by 29% and 15% respectively,
- The US remains the number one region in the Top 100, despite a \$2,969bn reduction in its total market capitalisation, the US retained its 70% share in value of the Top 100. This highlights the fact that challenges were broad based, impacting most key regions and sectors in the period.
- China and its regions market capitalisation decreased by 7%, despite welcoming one new entrant into the Top 100, AIA Group Limited. The Finance sector accounts for more than half of overall market capitalisation drop in the region.
- The Rest of the World faced a challenging year with three exits (\$1,030bn) from the Top 100. Aramco's market capitalisation fell \$404bn.

Key sectors all decline in the year to 31 March 2023, though Technology continues the trend of increasing as a % of the Top 100.

Companies within communication services largely declined in the year, though the 28% (\$512bn) Alphabet Inc.'s share price drop was a driving factor. Despite a rebound in Q1-23 for Technology, market capitalisation fell \$726bn as increases in interest rates hurt valuations. Financials had performed well relative to the index until instability in the banking sector in Mar-23 put bank stocks under pressure.

	Energy	Financial	Communication services	Technology
2018	1,081 6%	4,516 23%	2,621 13%	3,529 18%
2019	1,340 6%	3,931 19%	2,840 14%	3,885 19%
2020	2,308 11%	3,176 15%	2,856 14%	4,440 21%
2021	2,679 9%	4,447 14%	4,698 15%	7,505 24%
2022	3,655 11%	4,897 14%	4,075 12%	9,380 27%
2023	3,232 11%	3,822 12%	3,436 11%	8,654 28%

% represents proportion of total Global Top 100

Source: Capital IQ with PwC analysis

- The **Technology sector** faces its first decline in market capitalisation since 2018, falling 8% on 2022. Despite this, all 18 tech companies from 2022 maintain their position as a Top 100 Company.
- Financials had performed well relative to the Top 100, benefitting from the rising interest rate environment. However, worries of **instability in the US and European banking sectors** resulted in share prices falling at some of the world's largest financial institutions. The aftermath led to one US bank exiting the list after shedding over 30% of its value in Mar-23.
- 89% of the drop** in Communication service is attributable to a decline in market capitalisation of **Alphabet** (\$512bn) and **Meta** (\$56bn).
- Energy** fell 12%, with varied performance amongst the seven Energy companies. Significant movers were Aramco who fell 18% (\$404bn), whilst ExxonMobil grew 28% (\$97bn) in the year.
- Of the **other sectors** not presented here (see sector comparison) **Industrials** and **Consumer Staples** were the only sectors to increase in market capitalisation with both aos outperforming respective benchmarks.

Top five retain their position but market capitalisation trends downward after a challenging year.

For the first time in ten years, all of the top five companies faced a reduction in market capitalisation, accounting for 50% of the overall drop in value this year. Q1-23 performance for Apple, Microsoft, Alphabet and Amazon was strong, reversing some of the losses incurred to Dec-22. Aramco was ranked second at Dec-22 and despite posting record annual profits in excess of \$160bn, it couldn't keep pace with Microsoft's Q1-23 share price increase, ending the year as the third largest Company in the list.

- The **constituents** of the top five and their **rank remains unchanged** from the 2022 Global Top 100 list.
- All of the top five market capitalisation dropped since the last year with the highest **drop of 36% for Amazon**, followed by **28% for Alphabet**.
- Despite the overall slowdown for the technology sector, a rebound in Q1-23 for the sector meant **Microsoft maintained its second position in the list**, ending the year to March-23 7% down.
- For the **first time since 2016**, **Apple's market capitalisation fell YoY**. The delta between the largest and smallest Company in the Top 100 remains significant at \$2,490bn.
- **Aramco**, experienced a significant 18% drop in value despite posting profits in excess of \$160bn in 2022, as commodity prices softened.

Country performance

Few countries managed to increase market capitalisation in the year. All countries that recorded an increase were within the European region - this was due to a combination of new entrants and growth in market capitalisation of existing companies. Despite double digit % declines, the US, Saudi Arabia and Mainland China retained their position in the top three and were the only countries with a combined market capitalisation of over \$1,000bn.

18	Hong Kong	-4%	122	1	127	n.a	n.a	n.a

- The ranking of the **Top 3 location and no. of companies for these respective locations** remained **unchanged** since last year.
- **France entered into the Top 5, replacing Switzerland**, following the outperformance of French equities, particularly **LVMH** which increased \$97bn (27%) on 2022.
- Strong performance by **Siemens** (up 15%) and **Deutsche Telekom** (up 29% and climbing 85 places) meant that **Germany** welcomed two new entrants to the list and moves into the **Top 10**.
- **Novo Nordisk A/S** market capitalisation increased 40% (\$102bn) moving Denmark into the Top 10 for the first time.
- **Belgium** are back in the Top 100 after **AB InBev** continued to recover from the Global Pandemic, re-entering the Top 100 list this year after an 8% increase in market capitalisation.
