Consumer Data Sheet

594 organisations
4 regions
18 countries
Society is are living through a fundamental transformation in the way people work. Organisations need a strong workforce strategy today that helps them take action to prepare for tomorrow’s world of work. PwC surveyed over 590 Consumer respondents to see how they stack up:

Stepping up to deliver a workforce strategy for the future

Overall maturity by diagnostic component

The maturity of Consumer organisations’ workforce strategy varied across diagnostic components. Notably, 20% of Consumer organisations are ranked as ‘leading’ in their strategic approach to technology, indicating they are making technology-related investments with human impacts in mind (e.g., employee experience and productivity). In comparison, only 8% are ranked as ‘leading’ in their approach to aligning workforce strategy with their talent strategy and practices.

Overall maturity by diagnostic component

1: The Workforce Strategy Diagnostic was refreshed in May 2021 to reflect a small number of net-new topics related to the latest workforce trends and an organisation component for which the number of respondents is approximately 1,000.

Note: This sheet reflects highlights and major trends for the five main components of the Workforce Strategy Diagnostic Survey. This does not reflect all questions within the diagnostic.

The importance of planning – When linear predictions don’t cut it

To plan for the future, organisations need to engage in integrated business, financial and workforce planning, bringing together the right stakeholders, data and mindset to engage in “scenario planning”. Overall, 25% of organisations said they ‘always’ take a scenario-based approach to their strategic planning – With 34% ‘never’ or only ‘sometimes’ taking this approach.

Question: To what extent does your company engage in strategic scenario planning?

Question: To what extent does your organisation develop future scenarios that consider the impact on your...? (percentage of those that responded ‘always’)

Focus on talent, humans, and the humane

While several organizations consider the people impacts of robotic process automation (RPA) and artificial intelligence (AI) on their workforce and talent programmes, this is the least mature component of the four. The percentage of respondents answering 'always' suggests that organisations are thinking most about RPA and AI impacts on employee engagement (22%) and the least about headcount reduction (13%) and hiring plans (15%).

**Question:** To what extent does your organisation consider the people impacts of deploying digital solutions (e.g., automation/RPA, other productivity/cloud technology solutions, etc.) on the following? (Percentage of those that responded 'always')

Embrace technology as a force for good

Getting the technology component of workforce strategy right can be the difference between gaining competitive advantage in the market and falling behind. Decisions about technology need to be made with their impacts on the workforce clearly in mind, or they risk harming the employee experience, productivity, and morale. More than 28% of organizations report that they are 'always' effective in the ways they digitise productivity, connectivity, employee portal, and immersive digital collaboration tools.

**Question:** To what extent does your organisation effectively digitise the employee experience by leveraging the following tools?

<table>
<thead>

Embed ‘future of work’ considerations throughout the organisation structure¹

Even the most strategic of workforce plans won’t make an impact to an organisation if structure or go-to-market models are not considered hand in hand. We found that 22% of organisations report that they ‘always’ embed future of work considerations in their organisation structure, including governance and decision rights and roles & responsibilities.

**Question:** To what extent does your organisation embed ‘future of work’ considerations in the re-design and evolution of your operating model, including...?
