Middle East & North Africa (MENA) Data Sheet

Workforce Strategy Benchmarking Survey

436 organisations
17 countries
16 industries
Society is living through a fundamental transformation in the way people work. Organisations need a strong workforce strategy today that helps them take action to prepare for tomorrow’s world of work. PwC surveyed over 430 organisations in MENA to see how they stack up:

Stepping up to deliver a workforce strategy for the future

Overall maturity by diagnostic component

The maturity of MENA organisations’ workforce strategy varied across diagnostic components. Notably, 23% of MENA organisations are ranked as ‘leading’ in their strategic approach to technology, indicating they are making technology-related investments with human impacts in mind (e.g., employee experience and productivity). In comparison, only 16% are ranked as ‘leading’ in their approach to aligning workforce strategy with their talent strategy and practices and making purpose-driven decisions.

The importance of planning – when linear predictions don’t cut it

To plan for the future, organisations need to engage in integrated business, financial and workforce planning, bringing together the right stakeholders, data and mindset to engage in “scenario planning”. Overall, 36% of organisations said they ‘always’ take a scenario-based approach to their strategic planning - with 26% ‘never’ or only ‘sometimes’ taking this approach.

Question: To what extent does your company engage in strategic scenario planning?

Question: To what extent does your organisation develop future scenarios that consider the impact on your...? (percentage of those that responded ‘always’)

Regulatory, tax, and legal operating environment

Business model

Workforce plans

Note: This sheet reflects highlights and major trends for the five main components of the Workforce Strategy Diagnostic Survey. This does not reflect all questions within the diagnostic.

1: The Workforce Strategy Diagnostic was refreshed in May 2021 to reflect a small number of net-new topics related to the latest workforce trends and an organisation component for which the number of respondents is approximately 1,000
Focus on talent, humans, and the humane

While several organisations consider the people impacts of robotic process automation (RPA) and artificial intelligence (AI) on their workforce and talent programmes, this is the least mature component of the five. The percentage of respondents answering ‘always’ suggests that organisations are thinking most about RPA and AI impacts on employee engagement (32%), and the least about hiring plans (26%).

**Question:** To what extent does your organisation consider the people impacts of deploying digital solutions (e.g., automation/RPA, other productivity/cloud technology solutions, etc.) on the following? (Percentage of those that responded ‘always’)

<table>
<thead>
<tr>
<th>Diversity, equity and inclusion</th>
<th>Headcount reduction</th>
<th>Reskilling employees</th>
<th>Fair pay</th>
<th>Hiring in community</th>
<th>Influence local policy</th>
<th>Geopolitical risks</th>
<th>Crises</th>

**Embrace technology as a force for good**

Getting the technology component of workforce strategy right can be the difference between gaining competitive advantage in the market and falling behind. Decisions about technology need to be made with their impacts on the workforce clearly in mind, or they risk harming the employee experience, productivity and morale. More than 40% of organisations report that they are ‘always’ effective in the ways they digitise productivity, connectivity, and employee portal tools.

**Question:** To what extent does your organisation effectively digitise the employee experience by leveraging the following tools?

<table>
<thead>
<tr>
<th>Productivity tools</th>
<th>Connectivity tools</th>
<th>Employee portal</th>
<th>Immersive and digital collaboration tools¹</th>
</tr>

1: The Workforce Strategy Diagnostic was refreshed in May 2021 to reflect a small number of net-new topics related to the latest workforce trends and an organisation component for which the number of respondents is approximately 1,000
Embed ‘future of work’ considerations throughout the organisation structure¹

Even the most strategic of workforce plans won’t make an impact to an organisation if structure or go-to-market models are not considered hand in hand. We found that 29% of organisations report that they ‘always’ embed future of work considerations in their organisation structure, including governance and decision rights and roles & responsibilities.

Question: To what extent does your organisation embed ‘future of work’ considerations in the re-design and evolution of your operating model, including…?

About the Survey

The purpose of this diagnostic is to allow organisations to assess their workforce strategy maturity across five distinct areas: planning, purpose, technology, talent, and organisation. As of May 2021, the diagnostic has been taken by 4095 respondents in 84 countries across 16 industries.
