The initial allowance is first deducted, and the balance is written off on a straight-line basis over a fixed period, depending on the rates of annual allowance. There is a requirement that assets not yet disposed of cannot be fully written off in the books. A nominal amount of NGN 10 per asset must be retained in the books till the assets are disposed of. However, where 95% has been claimed as an initial allowance, the 5% balance is the value that must be maintained in the books until the final disposal of the asset.
When assets are sold, the proceeds over the tax written-down value are taxed at 30% to the extent of the allowances already claimed.

**Goodwill**
There is no tax deduction for goodwill.

**Start-up expenses**
Start-up expenses are not specifically stated as non-deductible in the tax law, but, in practice, they are usually not allowed by the tax authority. This is based on the assumption that start-up expenses are not directly attributable to any taxable income of the company, which is a fundamental condition for tax deductibility of expenses.

**Interest expense**
Interest on money borrowed and employed in producing taxable income is a deductible expense. There is currently no thin capitalisation regulation in Nigeria, but general anti-avoidance rules are usually applied to limit deductible interest on related party loans.

**Bad debt**
Bad debt incurred in the course of trade is deductible.

**Charitable contributions**
Donations are deductible, subject to the provisions of the law.

**Fines and penalties**
Any punitive payments for default or violation of law are expressly not deductible for tax purposes. In practice, this is usually extended to include default surcharges and other avoidable fines.

**Taxes**
Any tax on income or profit is not deductible except where such tax was paid on profit earned outside Nigeria. In this case, if the source country has no DTT with Nigeria, the foreign tax paid is allowed as a deduction for CIT purposes. State and local taxes (business rates) and levies may be deducted from taxable income.

**Other significant items**
Other deductible expenses include the following:

- Sum payable by way of interest on capital borrowed.
- Rent for the period.
- Expenses incurred in respect of salary and wages.
- Expenses incurred for repair of assets.
- Liability incurred for purpose of trade.
- Research and development (R&D) costs.

**Net operating losses**
Losses can be carried forward indefinitely, except for insurance companies where losses can only be carried forward for four years. Losses made from one line of business cannot be relieved against another line of business. Losses cannot be carried back.

**Payments to foreign affiliates**
Payments considered to be artificial are not deductible for tax purposes. Royalties, management fees, and technical fees require the approval of the National Office for Technology Acquisition and Promotion (NOTAP) for exchange control purposes and for tax deduction. NOTAP approved royalties and technical fees are limited to a range
of 1% to 5% of net sales, while management fees are limited to a range of 2% to 5% of profit before tax, and consultancy fees are limited to 5% of total project cost. Technical fees are limited to approved man-hour rates.

Trademark fees are disallowed where the trademark owner has more than 75% equity participation in the local company.

---

**Group taxation**

There are currently no provisions for group taxation, group relief, or group filing of tax returns in Nigeria. Each legal entity within a group is treated as distinct and separate for tax purposes.

**Transfer pricing**

Nigeria has introduced a new rule, the Income Tax (Transfer Pricing) Regulations 2012, to provide guidelines on the application of the arm’s-length principle in the income tax legislation. The regulations have a commencement date of 2 August 2012 and are applicable to accounting periods commencing after this date. For example, a company with an accounting year end date of 31 December 2012 will be required to have its transfer pricing documentation in place for the accounting year commencing 1 January 2013.

The regulations are to be applied in a manner consistent with the arm’s-length principle in Article 9 of the UN and OECD Model Tax Conventions on Income and Capital; and the OECD Transfer Pricing Guidelines for Multi-national Enterprises and Tax Administrations. However, where there are inconsistencies between the model conventions and the local legislation, the provisions of the relevant local tax laws shall prevail.

The rules cover all transactions between ‘connected taxable persons’, which is broadly defined to include individuals, PEs created by head offices, subsidiaries, associates, partnerships, joint ventures, and trusts to the extent that they participate directly or indirectly in the management, control, or capital of another, or both of which have common control, management, or shareholders. Specifically, the rules will apply to sale and purchase of goods; lease or sale of tangible assets; licensing, transfer, or use of intangible assets; provision of services; lending or borrowing of money; manufacturing arrangements; and any transaction that may affect profit and loss or any other incidental matter.

The rules are applicable to both domestic and cross-border related party transactions.

**Thin capitalisation**

Nigeria has no thin capitalisation rules. However, interest charged between related parties is expected to reflect arm’s-length transactions. The tax authority may disallow any related party interest considered to be excessive.

---

**Tax credits and incentives**

Nigeria has various tax incentives intended to encourage investment in key sectors of the economy, as follows.
**Tax holidays**
Pioneer companies investing in specified industrial activities may, on application, be granted a tax holiday for a maximum period of five years. Examples of economic activities that may be granted a tax holiday include glass and glassware manufacturing, manufacturing of fertilisers, and steel manufacturing.

A new company that engages in the mining of solid minerals is exempt from tax for the first three years of its operation.

**Rural location incentives**
Certain incentives are available to companies located in rural areas. The incentives take the form of tax reductions at graduated rates for enterprises located at least 20 kilometres from available electricity, water, and tarred roads.

**Export incentives**
A company that is engaged in an approved manufacturing activity in an export processing zone (EPZ) and incurs expenditures in its qualifying building and plant equipment is entitled to 100% capital allowance in that year of assessment.

In addition, a company that is 100% export oriented but located outside an EPZ will enjoy a three year tax holiday, provided the company is not formed by splitting up or reconstruction of an already existing business and the export proceeds form at least 75% of its turnover.

Profits of companies whose supplies are exclusively inputs to the manufacture of products for export are exempt from tax. Such companies are expected to obtain a certificate of purchase of the input from the exporter in order to claim tax exemption.

Where plant and machinery are transferred to a new company, the tax written down value of the asset transferred must not exceed 25% of the total value of plant and machinery in the new company. The company should also repatriate at least 75% of the export earnings to Nigeria and place it in a Nigerian domiciliary account in order to qualify for a tax holiday.

Profits of any Nigerian company in respect of goods exported from Nigeria are exempt from tax, provided that the proceeds from such exports are repatriated to Nigeria and are used exclusively for the purchase of raw materials, plant, equipments, and spare parts.

**Gas utilisation incentives**
Companies engaged in gas utilisation are entitled to:

- A tax-free period for up to five years.
- Accelerated capital allowance after the tax-free period.
- Tax-free dividends during the tax-free period.

**Tourism incentives**
25% of the income derived from tourism by hotels in convertible currencies is exempt from tax if such income is put in a reserve fund to be utilised within five years for expansion or construction of new hotels and other facilities for tourism development.

**Interest incentives**
Interest accruing on deposit accounts of a non-resident company is tax-exempt, provided the deposits are made by transfer of funds to Nigeria on or after 1 January.
Nigeria

1990 and the depositor does not become non-resident after making the deposit while in Nigeria.

Interest on foreign-currency domiciliary accounts is also tax-exempt.

Interest on any foreign loans, and interest on any loan granted by a bank for the purpose of manufacturing goods for export, is exempt from tax as follows:

<table>
<thead>
<tr>
<th>Repayment period</th>
<th>Moratorium</th>
<th>Exemption (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 7 years</td>
<td>Not less than 2 years</td>
<td>100</td>
</tr>
<tr>
<td>5 to 7 years</td>
<td>Not less than 1.5 years</td>
<td>70</td>
</tr>
<tr>
<td>2 to 4 years</td>
<td>Not less than 1 year</td>
<td>40</td>
</tr>
</tbody>
</table>

Interest on any loan granted by a bank to a company engaged in agricultural trade, fabrication of local plant and machinery, or as working capital to any cottage industry is 100% tax free if the loan has a moratorium of not less than 18 months and the rate of interest is not more than the base lending rate.

**Investment allowances**

An investment allowance of 10% on the cost of qualifying expenditures in respect of plant and machinery is available as a deduction from assessable profits in the year of purchase. There is no restriction to the full claim of capital allowance in any year of assessment for companies in the mining, manufacturing, and agricultural sectors.

**Foreign tax credit**

Nigeria does not grant automatic tax credits to Nigerian companies for foreign tax on income derived from other countries. The Nigerian tax laws already provides for tax exemption for dividends, interest, and royalties.

Foreign tax credits are only granted based on the provisions of existing DTTs and partial credits as applicable to Commonwealth countries. In this regard, full tax credits are usually provided for in the DTTs. Tax credit for members of Commonwealth countries is granted up to half the Nigerian CIT rate.

**Withholding taxes**

WHT is applicable on specified transactions as indicated below. There is no distinction between the WHT rates for resident companies or individuals and non-resident companies or individuals.

<table>
<thead>
<tr>
<th>Types of payment</th>
<th>WHT for companies (%)</th>
<th>WHT for individuals (%)</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>Construction/building</td>
<td>5</td>
<td>5</td>
</tr>
<tr>
<td>Contracts other than sales in the ordinary course of business</td>
<td>5</td>
<td>5</td>
</tr>
</tbody>
</table>
The period for filing WHT is 21 days after the duty to deduct arose for deductions from companies.

The penalty for failure to deduct or remit tax is now 10% of the amount not deducted/remitted.

Note that companies are required to submit, in electronic form, a schedule of all their suppliers for the month showing the tax identification number (TIN), address of the suppliers, the nature of the transaction, WHT deducted, and invoice number.

**Double tax treaties (DTTs)**

Nigeria has DTTs with Belgium, Canada, China, Czech Republic, France, the Netherlands, Pakistan, Philippines, Romania, Slovak Republic, South Africa, and the United Kingdom.

The provisions of Nigeria’s DTTs allow a reduced WHT rate of 7.5% on dividends, royalties, and interest payable to a beneficiary resident in a treaty country, compared to 10% for non-treaty residents.

**Tax administration**

**Taxable period**

The taxable period is the fiscal year, which runs from 1 January to 31 December.

**Tax returns**

Companies are required to register for tax and file their audited accounts and tax computations with the FIRS within six months of their financial year end on a self-assessment basis or 18 months after incorporation (whichever comes first). A company may file an application for extension of filing tax returns for up to two months at the discretion of the FIRS.

Upon registration, a company is issued a TIN, which serves as the company’s file number for all federal taxes and future correspondence with the FIRS.

The company must file the following documents with the tax authority on an annual basis:

- Tax computation for the relevant year of assessment.
- The audited financial statements for the respective period; this should be in conformity with the local GAAP.
- A duly completed and signed self-assessment form for CIT.
- Evidence of remittance of the income tax liability (partly or in full).

PPT is payable on an actual year basis. Estimated tax returns must be filed within two months of the fiscal year. Actual tax returns should be filed within five months after the end of the accounting period, that is, not later than 31 May.

**Assessment**

Nigerian companies file their tax returns based on a self-assessment system where the taxpayer prepares its annual returns and determines its tax liability. However, the FIRS may apply a best of judgment (BOJ) assessment where it is of the opinion that the tax returns filed are deliberately misstated or where no returns are filed within the stipulated period.
Payment of tax

CIT
A company that files its self assessment within six months after the accounting year-end can apply to the FIRS in writing to pay its income tax in instalments. The maximum number of instalments the FIRS may approve is three. Evidence of the first instalment has to accompany the tax returns filed in order to qualify for the instalment payment. However, all payments have to be made not later than eight months after the financial year-end.

Assessments are made on a preceding year basis. This means that the financial statements for a period ended in 2012 will form the basis for the 2013 year of assessment.

PPT
Payments with respect to PPT in any accounting period of 12 months are made in 12 instalments, with a final 13th instalment (if there is an underpayment). The first instalment for the year is due by the end of March.

Penalty for non-compliance
Late payment of taxes attracts a 10% penalty and interest at the commercial rate.

A company that files its annual tax return late or fails to submit its accounts by the due date is liable for a nominal penalty.

Late submission of PPT returns attracts an initial penalty of NGN 10,000 and NGN 2,000 for each day such failure continues, while late payment of tax attracts a penalty of 5% of the tax not paid.

Tax audit process
Generally, the tax authority will commence a desk examination of a taxpayer’s returns immediately after filing. This may be followed by a tax monitoring exercise whereby tax officers visit taxpayers to conduct interview and on-site high level review of their tax affairs.

Random or specific tax audit may be carried out usually within six years of filing tax returns. In unusual cases, a back-duty tax investigation may be conducted for more than six years, especially where a tax fraud or wilful default is suspected.

Tax audits take a long time to conclude, usually between three to five years.

Statute of limitations
The tax authority may carry out a tax audit and issue an additional assessment within six years from the relevant tax year. However, the limitation does not apply in the event of a fraud, wilful default, or neglect by the company.

Topics of focus for tax authorities
The tax authorities are focusing on possible ways to generate more tax revenue. As a result, certain areas of taxation that have previously received very little attention, such as capital gains tax, stamp duties, and excise duties, are now key areas of focus by the tax authorities. In addition, related party transactions are increasingly being scrutinised, as well as non-resident entities doing business in Nigeria. This trend is expected to continue and possibly intensify in the coming years.
Significant developments

Changes to tax legislation

In May 2013, the government announced changes to the tax system with the aim to improve competitiveness and strengthen business growth. The main changes to the legislation, which will take effect from 2014, are as follows:

• The corporate income tax (CIT) rate will be reduced from 28% to 27%. This reduction will only apply to companies and not to individual taxpayers. A similar reduction for sole traders and partners will be introduced next year.
• The 50% special tax rate for petroleum companies will be increased to 51% so that the marginal tax rate of 78% is maintained.
• The 30% resource rent tax for hydro power companies will also be increased by 1% so that the marginal tax rate of 58% is maintained.
• To encourage investment, the government will increase the rate of depreciation for assets in Group D (cars, tractors, other vehicular machinery, instruments, fixtures and furniture, etc.). The rate will increase from 20% to 30% in the first year of the investment.
• The tax credit scheme will be strengthened by 100 million Norwegian kroner (NOK) to encourage research and development (R&D).

Limitation of inter-company interest

Until recently, interest expenses on arm’s-length terms have been tax deductible in Norway. In April 2013, the Ministry of Finance announced a bill introducing limitations on the deductibility of interest expenses between related parties. In general, interest expenses to related parties that exceed 25% of a Norwegian company’s taxable income, with some adjustments, will not be tax deductible. The new regulations will only apply to companies that have more than NOK 1 million in total interest expenses.

Two parties are related if one party directly or indirectly owns or controls the other party by at least 50%. Related parties may be resident in Norway or abroad. The interest deductibility limitation is calculated for each entity in the group. Disallowed interest deductions may be carried forward for five years.

According to the bill, the limitation applies both to local and foreign companies that have a taxable presence in Norway, as well as partnerships, controlled foreign companies (CFCs), etc. The new regulations are proposed to enter into force from 2014 and will also apply to interest costs on loans entered into prior to 2014.
**Taxes on corporate income**

A Norwegian resident company is, as a starting point, subject to CIT on its worldwide income. Non-resident companies are, as a starting point, liable for CIT in Norway when engaged in a business that is either conducted in or managed from Norway.

CIT is assessed at a rate of 28%.

As a general rule, income is taxable when the right to receive it arises and costs are deductible when the liability to cover the costs arises. The actual payment is generally not relevant.

**Petroleum tax regime**

All upstream petroleum activity on the Norwegian Continental Shelf (NCS) is taxable to Norway.

Taxation is based on net income at a marginal tax rate of 78%, which is comprised of the ordinary 28% CIT rate and a 50% special tax. All income is subject to 28% CIT, while only income from offshore production and pipeline transportation of petroleum from the NCS (offshore tax regime) is subject to the additional 50% special tax.

All upstream activity on the NCS must be consolidated within the company. There is no ring fence per oil field, and tax consolidation against other activity is limited. Crude oil sales from most of the fields are taxed at a predetermined market price set by an official board (i.e., the norm price). In theory, a norm price may be imposed on gas sales, but this has not been implemented. Instead, an extensive reporting requirement was implemented in October 2012. Investments in installations for the exploitation and production of petroleum, as well as investments in pipelines, are depreciated linearly over six years.

An investment-based ‘supplementary depreciation’ (uplift) of 30% (7.5% per year for four years) is granted on investments in installations for the exploitation and production of petroleum as well as investments in pipelines. For investments made after 4 May 2013, it is proposed to reduce the annual uplift to 5.5%. For new projects in pipeline on 4 May 2013, special transitional rules may apply. The uplift is deducted against the special tax base. Losses and unused uplift may be carried forward indefinitely with an annual interest. Both depreciation and uplift may be claimed from the year of the investment, regardless of whether title has passed or the asset has been taken into use. If the upstream activity on the NCS ceases, the tax value of losses carried forward and unused uplift may either be sold or compensated by the Norwegian state.

Exploration costs are tax deductible as incurred. If a loss is created due to exploration costs, the taxpayer may claim the tax value of such a loss repaid in the year following the income year in which the loss was created.

Special rules apply as to the deductibility of net interest costs in the special tax basis (50%).

A special regime ensures that transfer of licences on NCS is tax exempt; there is no step up in the tax basis.

Note that income taxed under the special tax is exempted from dividend withholding tax (WHT).

The Oil Taxation Office has a high focus on transfer pricing.
Hydro power tax regime
The hydro power tax regime is applicable for the taxation of income derived from the production, sales, transfer, or distribution of hydro power.

Taxation is based on net income at a marginal tax rate of 58%, which is comprised of the ordinary 28% CIT rate and a 30% resource rent tax. All income is subject to 28% CIT, while only income from hydro power production is subject to the additional 30% resource rent tax.

The resource rent is calculated per hydro power plant. The gross income is, with some exceptions, calculated based on spot market price per hour multiplied by actual production. In addition, actual income from green certificates is included in the gross income. Deductible costs will be the same as for CIT; that is, expenses related to the power plant except for interest expenses, which are not deductible. Uplift is granted. Special rules apply to the depreciation of investments in hydro power plants. Rent expenditure and depreciation related to waterfalls are not deductible, and waterfalls are not included in the basis for uplift. Tax consolidation is mandatory within the company and, provided the conditions for group taxation are fulfilled, available on a group level. Losses (negative resource rent) on a company (eventually on a group) level will be compensated by the Norwegian state.

Shipping tonnage tax regime
The tonnage tax rules in Norway are in line with those found in other European Union (EU)/European Economic Area (EEA) countries and imply that shipping income will be tax-exempt on a permanent basis.

Norwegian tonnage-taxed companies are allowed to keep only certain kinds of assets inside the tonnage regime (legal assets) and are not allowed to have income from non-tonnage-taxed activities except financial income. If the requirements are not fulfilled, the company will fall outside the scope of the model and be taxed at the ordinary rate (28%).

Qualifying assets
A tonnage-taxed company must own at least one qualifying asset (i.e. a vessel, for example bulk, tankers, container vessels, car carriers, tugboats, and entrepreneurial vessels and auxiliary vessels for use in the petroleum industry), new building contracts, a 3% share in another tonnage-taxed limited company, or a 3% ownership interest in a partnership or CFC.

Qualifying and legal business activities/income
Qualifying business income is income from the operation of the company’s own and chartered vessels. A tonnage-taxed company may, for example, charter vessels in and out on bareboat and time charter terms without limitations. Furthermore, gains upon disposal of vessels and new building contracts are exempt from taxation.

Income from related activities, such as the sale of goods and services onboard vessels, loading and discharging vessels, or leasing out containers and operations of ticket offices, is also exempt from taxation. The exemption also applies to income from the strategic and commercial management of the company's owned and chartered vessels, as well as vessels owned or operated by group companies (more than 50% joint ownership), and vessels operated according to a pool agreement. Pure management companies are not included (i.e. all companies must have at least one qualifying asset).
Financial income is permitted, except for income from shares in unlisted companies and ownership interests in partnerships that are not taxed under the tonnage tax system. The condition is that financial activities do not constitute a separate business. Net financial income is subject to ordinary taxation (28%). Currency gains and losses are partly taxable/deductible, and interest costs are partly deductible, depending on the proportion between the company's finance capital and total book capital.

**Entrance into the tonnage tax system**
Entry into the tonnage tax system is optional and may take place with effect from 1 January every year, provided that the company has fulfilled the conditions for the application into the tonnage tax system from the beginning of the year. Newly established companies will have direct entry and may enter into the tonnage tax system from the date of incorporation. All qualifying companies within the same group are obligated to make the same election (tonnage taxation or ordinary taxation).

Companies that enter into the tonnage tax system are subject to a formal ten-year lock-in period. If a company exits the tonnage tax system before the lock-in period expires, it will be excluded from the tonnage tax system until after the initial lock-in period has ended.

Upon entry into the tonnage tax system, the difference between market value and tax value of the company's assets (including vessels, new building contracts, ownership interests in partnerships, and shares in CFCs/tax exempt assets) is taxed as a capital gain (28%) that can be transferred to the gain and loss account. 20% of the balance will be entered as income each year (balance method). There is continuity for financial assets and assets covered by the tax-exemption rules (qualifying shares and derivatives).

**Exit from the tonnage tax system**
A shipping company may exit the regime on a voluntary basis or may be obligated to do so after breaching specific company requirements within the tonnage tax system. There should be no exit charge when leaving the regime, and the tax value on the company's assets will be adjusted to market value at the time of exit. However, a company that has untaxed gains calculated upon entry into the tonnage tax system could have a tax liability upon exit.

**Local income taxes**
There is no county or municipal CIT in Norway.

---

**Corporate residence**
Companies that are registered and incorporated in Norway in accordance with Norwegian company law are, as a general rule, regarded as tax resident in Norway and taxable for their worldwide income. If effective management at the board/director level is carried out outside Norway, residency in Norway for tax purposes may cease, and the company may be subject to exit taxation. Note that several factors should be considered in order to determine whether tax residency has moved (e.g. other management functions and the overall connection to Norway).

Foreign corporations will be regarded as resident in Norway if the place of effective management is in Norway. The place of effective management will be deemed to be in Norway if, for example, the board of directors makes its decisions in Norway.
Permanent establishment (PE)

According to Norwegian domestic law, a foreign company is liable to tax in Norway when engaged in a business that is either conducted in or managed from Norway. The tax liability is limited to income that is derived from Norwegian sources. As a general rule, non-residents without a PE are not liable for tax on capital gains when selling Norwegian financial instruments. However, when the property has been used in a business that is conducted in or managed from Norway, the capital gain or loss has to be included.

The legislation does not contain a reference to the treaty concepts of ‘permanent establishment’ or ‘permanent representative’. The threshold for tax liability is normally lower under legislation than the taxing right afforded to source states under double tax treaties (DTTs).

With respect to DTT’s, the Norwegian tax authorities will, to a large extent, follow the Organisation for Economic Co-operation and Development (OECD) Commentaries when interpreting the relevant DTT, if the wording is similar to the OECD Model Tax Convention.

Other taxes

Value-added tax (VAT)

The general VAT rate is 25% and applies to all supplies of goods and services not qualifying for another rate or an exemption. A reduced rate of 15% applies to supply of food and beverages, excluding tobacco, alcohol, medication, and water from waterworks. The reduced rate is not applicable to the supply of food and beverages consumed in restaurants and other food establishments.

A reduced rate of 8% applies to the television licence fee charged for broadcasting services provided by the Norwegian Broadcasting Company (NRK), domestic passenger transport services and procurement of such services, domestic ferry services related to transport of vehicles, accommodation services, and cinema tickets.

Exemptions with credit (zero-rated) include, but are not limited to, the following:

- Export of goods and services.
- Goods and services for Norwegian offshore and non-resident ships.
- Transfer of a going concern.
- Supply of newspapers and books to recipients.
- International transport services.
- Sale of vessels and aircrafts for use in taxable activity.

Exemptions without credit include, but are not limited to, the following:

- Supply of works of art owned by the artist.
- Health services.
- Social services.
- Financial services including banking, insurance, and the sale of shares.
- Educational services.
- Sale and lease of real estate (accommodation and lease of parking lots are taxable).
- Services supplied by cultural and entertainment institutions.
Exemptions, whereby an option to tax is available, include the letting of immovable
property to VAT liable lessees following a specific VAT registration with the
VAT authorities.

The registration threshold is met when VATable supplies, as comprised by the
Norwegian VAT legislation (including self-supplies), exceed NOK 50,000 during a
12-month period. For charitable and public utility institutions and organisations, the
threshold is set at NOK 140,000.

**Customs duties**

There are quite extensive customs duties on agricultural products, which must be
paid upon importation. However, it is often possible to avoid customs duties on these
products partly or completely by applying for an exemption from the agricultural
authorities in advance. Some of these exemptions are subject to tariff quotas.

Clothes are also subject to customs duties upon importation to Norway, but imports
comprised by free trade agreements (such as the EEA with the EU) and the General
System of Preferences (for developing countries) are exempt. As a result, clothes will,
as a general rule, not be subject to customs duties as long as the importer presents the
necessary certificates of origin.

There are no customs duties on other products than agricultural products and clothes.

**Excise taxes**

Excise taxes are calculated on import and domestic production of the following:

- Petroleum products, including gas.
- Alcoholic beverages.
- Non-alcoholic beverages.
- Ethanol for technical purposes.
- Tobacco.
- Chocolate, candy, sugar, etc.
- Maritime engines.
- Products containing the chemicals TRI/PER.
- Products containing the propellant gases HFK/PFK.

There are also excise taxes related to the following:

- Registration of vehicles.
- Use of vehicles (annual tax).
- Emissions of NOX.
- Sale of electricity.

**Property taxes**

Real estate may, under certain conditions, be subject to property tax. It is up to the
different municipalities to choose whether it wants to impose property tax on real
estate. Not all municipalities impose property tax on real estate. The applicable rate
varies between 0.2% and 0.7%, which is decided by the municipality. The tax base will
normally be the estimated market value (with some adjustments).

Hydro power producers must pay property tax on the hydro power plant’s capitalised
value using a capital interest rate of 4.5% for the property tax year 2014. However, the
basis for the calculation of the property tax for 2014 should fall in the range of NOK
0.95 to NOK 2.74 per kWh of the power plant average production for the last seven years. For hydro power plants with nominal capacity less than 10,000 kVA, the property tax base will be the same as the tax value for income tax purposes.

**Stamp taxes**
A tax is levied on the registration of a change of ownership of real estate. The tax is calculated at 2.5% of the fair market value.

**Net wealth taxes**
There is no net wealth tax or other capital taxes for limited liability companies, investment funds, state-owned enterprises (according to the State-owned Enterprise Act), inter-municipal companies, and companies in which somebody owns a part in or receives income from, when the responsibility for the companies’ liabilities is limited to the companies’ capital.

Some institutional holders (e.g. mutual insurance companies, savings banks, co-operatives, taxable pension funds, self-owned finance institutions, mortgage credit associations) pay 0.30% (state) net wealth tax. The maximum net wealth tax rate for a corporate body is 1.00% (state and municipal tax).

Shares in limited liability companies and equity funds are valued at 100% of quoted value for net wealth tax purposes as of 1 January of the year after the relevant income year. If quoted both on the Norwegian and a foreign stock exchange, the Norwegian stock exchange value will be applicable. If not quoted, the basis for taxation is the company’s net taxable value for wealth tax purposes as per 1 January of the income year in question. The basis for taxation of non-quoted shares in foreign companies is, as a starting point, the assumed market value of the shares as per 1 January of the assessment year.

**Exit tax**
The exit rules levy taxes upon the migration of assets or liabilities. The tax is calculated by reference to the accrued but unrealised gains at the time of migration at a rate of 28%. Exit tax is also levied if Norwegian CFC taxation lapses because the control requirement is no longer met or if a company:

- transfers its tax residency (effective management) to another country
- has assets or liabilities that are transferred to a PE that is tax exempt pursuant to a DTT, or
- has assets or liabilities that are transferred from a Norwegian PE of a foreign company to the head office or a foreign PE of the same company.

Transfer of assets or liabilities to a PE in a country where the DTT in question is based on the credit method is, however, not regarded as a taxable event.

According to the rules, the tax treatment is different depending on the type of assets being transferred. Business-related operational equipment and financial assets being transferred out of Norwegian taxing jurisdiction are considered as taxable events, but the tax charge may be deferred if certain conditions are met. The main conditions are that the taxpayer is resident within the EEA/EU and has a guarantee for the deferred tax and interest charge. The transfer of intangible assets and inventory trigger immediate and unconditional exit taxation.

*De minimis* exception rules apply when determining whether the exit tax may be levied. Exit tax on the transfer of tangible assets is applicable only if the unrealised capital
gains exceed NOK 5 million. Exit tax on the transfer of other assets and liabilities is only applicable if the unrealised capital gains exceed NOK 1 million.

Exit taxation at both the corporate and shareholder level will also be triggered when companies transfer tax residency (effective management) to another state.

**Carbon dioxide (CO₂) tax**

A CO₂ tax is calculated on petroleum that is flared and on natural gas emitted into the air, as well as on CO₂ that is separated from petroleum and emitted into the air, and on installations used for production or transportation of petroleum. The CO₂ tax is regarded as a normal operating cost for CIT purposes and is a fully deductible cost both for corporate and special tax calculations.

**Natural resource tax**

A NOK 0.013 per kWh natural resource tax applies to hydro power activities, based on one-seventh of the produced kWh for the income year in question and the six previous years. The natural resource tax is creditable against the standard CIT.

**Branch income**

Branch income is taxed at the corporate rate of 28% (the same as Norwegian companies). The basis for taxation is gross income less deductible costs. Both direct and indirect costs related to the activities carried out in Norway may be deductible.

There is no branch profit tax or other repatriation taxes. However, if assets and/or liabilities are transferred from a PE in Norway to the head office or another foreign PE of the same company, this may trigger exit taxation. The transfer of assets to another corporate entity is subject to regular taxation.
Income determination

Inventory valuation
Inventory is valued at cost. Cost is normally determined using the first in first out (FIFO) method. The last in first out (LIFO) method is not acceptable for tax purposes. Conformity between book and tax reporting is not required.

Capital gains
Capital gains realised in the course of a business activity are almost always regarded as taxable income. Gains resulting from real estate transactions are taxed, regardless of whether they are incurred in connection with business activity. Losses may be offset against the taxpayer’s other income.

Capital gains realised on both business-related and non-business-related securities are, in principle, taxable. In general, any capital gains realised on bonds at maturity are regarded as taxable income. Correspondingly, realised losses will be eligible for deductions.

Tax-exemption rules for corporate shareholders
Under the tax-exemption rules, corporate shareholders are generally exempt from tax on dividends received and capital gains on qualifying shares and on derivatives where the underlying object is qualifying shares. Correspondingly, losses on shares are, in general, non-deductible. All operational expenses related to exempt income from shares are fully tax deductible. In order to limit the benefit of these deductions, the tax-exemption method is, with some exemptions, limited to 97% for received dividends, and the remaining 3% is taxable for Norwegian corporate shareholders (at a 0.84% effective tax rate). The 3% taxable income is calculated on dividends.

Dividend distributions within a tax group (where the ultimate parent company directly or indirectly owns more than 90% of the shares and voting rights) are fully tax exempt. In addition, the tax-exemption method also applies for certain distributions from partnerships and, on certain conditions, to foreign-resident companies with taxable activity in Norway (3% of the income taxable at 28%).

Note that an investment in a company resident in a low-tax country in the EEA has to fulfil certain substance requirements to qualify for the tax-exemption rules. These requirements are intended to be in line with the substance requirements of the European Court of Justice’s (ECJ’s) decision in the Cadbury Schweppes case. A country is considered a low-tax country if the level of effective taxation is less than two-thirds of the tax that would have been due had the foreign company been resident in Norway. This is the same test used for the CFC regime (see the Group taxation section for more information). The Directorate of Taxes has published a non-exhaustive list of low-tax jurisdictions (black list) and non low-tax jurisdictions (white list).

However, for investments outside the EEA, the exemption applies only if a shareholder owns 10% or more of the share capital and the voting rights of the foreign company for a consecutive period of two or more years. To be able to deduct losses on the realisation of shareholdings outside the EEA, the shareholder and/or a related party may not own 10% or more of the share capital and the voting rights of the foreign company in a two-year period prior to the realisation. For dividends, the holding period of two years does not have to be met when dividends are distributed, but can also be met after the ex-dividend date.

Shareholdings in low-tax countries outside of the EEA do not qualify for the tax-exemption rules.
Norway

Acquisition and sales related costs (e.g. broker fees) must be added to the cost price of the shares for tax purposes. Costs incurred to manage acquired tax-exempt shares are, however, tax deductible.

Norway’s internal tax rules do not allow taxation of a non-resident’s capital gain on the disposal of financial instruments, including shares in Norwegian companies, unless the non-resident has a PE to which the financial instrument may be allocated.

Stock dividends
Stock dividends (bonus shares) are not taxable on receipt, provided that the dividends have been distributed in accordance with the Limited Liability Company Acts and distributed in proportion with the ownership level of the shares.

Interest income
In general, interest income is taxable on an accrual basis.

Foreign income
A Norwegian resident company is subject to CIT on its worldwide income. Double taxation of foreign-source income, including foreign-branch income and CFC income, is mitigated either through tax treaties or domestic tax provisions. A deduction for foreign tax may either be claimed as an expense or as a credit against Norwegian tax payable on that income. In most circumstances, foreign dividends are exempt according to the tax-exemption rules. As a consequence, foreign WHT may not be credited and constitute a real cost for the companies concerned.

Norway does not have any legislation for the deferral of tax on foreign income.

Deductions

Depreciation
In Norway, the declining-balance method of depreciation is mandatory for capitalised assets. The depreciation rates given below are the maximum rates.

There is a duty to capitalise an asset that has a value of NOK 15,000 or higher and has an economic life of at least three years.

<table>
<thead>
<tr>

</tr>
<tr>
<td>Fixed technical installations in buildings, including heating plant,</td>
<td>10</td>
</tr>
<tr>
<td>cooling and freezing plant, electrical installation, sanitary installation, elevator, etc.</td>
<td></td>
</tr>
</tbody>
</table>
Auxiliary and supplementary installations in industrial plants will be depreciated together with the building and constructions group (10% depreciation if expected operating time is less than 20 years). In addition, constructions for transfer and distribution of energy, and electronic equipment, used in other business activities than power generation will be depreciated at 5%.

The applicable rate is 10% if, from the date of its erection, the structure has an economic life of 20 years or less.

Special depreciation rules apply to assets moved in and out of Norwegian jurisdiction to and from companies resident outside the EEA.

**Goodwill**

Acquired goodwill may be amortised according to the declining-balance method at a maximum of 20% per annum. The tax authorities have, however, on several occasions recently questioned the allocation to goodwill and claimed that a part of the purchase price should be allocated to intellectual property, concessions, etc. (which may not be depreciated unless it is of a time-limited nature). Other intangibles are amortisable on the condition that they are subject to an evident loss in value (impairment test) or if they are time-limited.

**Start-up expenses**

In general, start-up expenses are deductible, provided that the costs are borne by the company. Start-up costs could include costs related to registration in the Register of Business Enterprises, lawyers and accountants fees, drafting articles of association and shareholders agreement, etc.

**Interest expenses**

In general, interest expenses are deductible. Norway does not have a rule distinguishing between different income categories (as in the United Kingdom). If income is exempt from taxation in Norway pursuant to a tax treaty, corresponding costs or losses would not be tax deductible.

In April 2013, the Ministry of Finance announced a bill proposing limitations of tax deductible inter-company interest expenses. Please see the detailed description in the Significant developments section for further information.

**Bad debts**

In general, receivables are tax deductible if the debt is clearly irrecoverable or realised (e.g. if the receivable is sold to a third party or waived) and is sufficiently connected to the company's business (the business requirement). For accounts receivables, a calculated rate multiplied by the total account receivables at year-end may be deducted. The rate is calculated based on the two preceding years losses on such receivables multiplied by a fixed rate set by the Ministry of Finance.

Losses on receivables between group companies (with more than 90% direct or indirect mutual ownership of shares) and partnerships are, as a main rule, not tax deductible. However, trade receivables and losses on receivables created in connection with mergers or demergers are deductible for tax purposes.

**Charitable contributions**

Donations to certain charitable institutions are tax deductible. The upper limit for the tax deduction per year is NOK 12,000. The same limit applies to individuals and companies. The receiving entity must be pre-approved by the Norwegian tax authorities.
Norway

**Fines and penalties**
Fines and penalties are normally not tax deductible. This also applies to some administrative charges that are penal in nature. Charges that have no statutory basis in Norwegian law may be tax deductible, provided that the general conditions are fulfilled.

**Taxes paid**
Real estate tax, as well as foreign income and capital taxes paid by the taxpayer, are deductible when determining corporate income. Foreign taxes derived from income that is taxable in Norway are deductible only if they have not been credited against Norwegian tax payable.

**Net operating losses**
Losses may be carried forward indefinitely. Losses incurred in the year of ceasing business may be carried back for a period of two years.

**Payments to foreign affiliates**
Royalties and service fees paid to related foreign companies are fully deductible, provided they meet the arm’s-length principle. There are no formal thin capitalisation or income-stripping rules in Norway. In practice, the tax authorities require that the entity in question is able to service its debts. In addition, any loan terms should be comparable to those that would have been agreed upon by unrelated parties. Interest on financing, to the extent that these rules are not satisfied, may be regarded as dividends and thus non-deductible and, in addition, may be subject to Norwegian WHT.

In April 2013, the Ministry of Finance announced a bill proposing limitations of tax deductible inter-company interest expenses. Please see the detailed description in the Significant developments section for further information.

**Group taxation**
Income taxes are assessed on companies individually, not on a consolidated basis. This may be avoided through group contributions between Norwegian companies, provided common direct or indirect (including foreign) ownership and voting rights is more than 90%. Furthermore, the Norwegian group contribution rules are, under certain conditions, also applicable to branches of foreign companies that are resident within the EEA. Note that group contributions are not deductible for companies engaged in oil and gas producing activities subject to the Petroleum Tax Act.

Assets may, pursuant to the Group Regulations, be transferred tax-free between group companies at tax book value for tax purposes and at market value for financial book purposes. Payment must equal market value of the assets transferred. The same applies to payment in the form of shares. If the transferee loses the affiliation with the tax group while still owning the transferred assets, the transferor will be taxed for the difference between the tax book value and the market value of the assets.

**Transfer pricing**
In Norway, the arm’s-length principle for related party transactions is incorporated into the Tax Act. The transfer pricing provision of the Tax Act states that the OECD Guidelines ‘shall be taken into account’ when addressing transfer pricing issues under Norwegian tax law.
A few years ago, the resources of the Norwegian tax authorities were limited, and their interest tended to focus on intra-group services and the financing of operations. However, this has changed considerably as transfer pricing has increasingly become the focus of the tax authorities’ attention. In addition, the resourcing issues have been addressed. It is fairly common for the Norwegian tax authorities to choose test cases that are subject to substantial investment. During the most recent years, focus has been on business restructuring and commissioner arrangements.

Norway does not yet have an advance pricing agreement regime. Nevertheless, it is becoming more common to discuss complex cases with the tax authorities in advance of implementation or before assessment. Furthermore, there are no safe harbour rules or any other official guidance of how to price specific transactions, etc.

**Thin capitalisation**

There is no fixed debt-to-equity ratio requirement in Norwegian tax law. However, for companies that are part of a group, adjustments may be made under the arm’s-length provisions. Generally, these provisions apply only if the company has obtained a larger loan from a group company than an independent credit institution would have granted, or if the agreed level of interest is higher than an independent credit institution would have required. Naturally, this analysis will vary based on the actual company’s credit worthiness, which consists of several elements, such as the nature of the business, financial status, future income possibilities, and group relationships. As such, there is no applicable ‘safe harbour’. The company must also be able to service its debts.

If a Norwegian entity is regarded as being thinly capitalised, part of the entity’s interest and debts may be reclassified to dividend and equity.

Please note that in April 2013, the Ministry of Finance announced a bill proposing limitations of tax deductible inter-company interest expenses. Please see the detailed description in the Significant developments section for further information.

**Controlled foreign companies (CFCs)**

Norwegian residents are taxed directly on their allocable part of the profits from a CFC’s income if the company is resident in a low-tax country, irrespective of whether income is distributed to the Norwegian investor. A low-tax country, in this respect, is a country where the effective foreign income taxation of the company’s profits is less than two-thirds of the effective taxation that would have been due had the company been resident in Norway. A condition for such taxation is that 50% or more of the foreign company’s shares or capital is held or controlled, directly or indirectly, by Norwegian taxpayers (alone or together), based on the status at the beginning and end of the income year in question.

Note that if Norwegian taxpayers own or control more than 60% of the shares or capital at the end of the income year, Norwegian control exists irrespective of the level of control at the beginning of the year. Norwegian control ceases to exist if Norwegian taxpayers own or control less than 50% of the shares or capital at both the beginning and end of the income year or less than 40% of the shares or capital at the end of the income year.

On the condition that Norway has signed a tax treaty with the country involved and the company in question is covered by the treaty, the CFC rules will be applicable only if the income of the entity in question is mainly of a passive nature. Furthermore, CFC taxation may also be prohibited if the company in question is resident within the EEA and cannot be deemed as a wholly artificial arrangement as outlined in the ECJ’s
Norway

decision in the Cadbury Schweppes case. Hence, CFC taxation will be avoided for EEA companies that fulfil certain substance requirements.

---

**Tax credits and incentives**

**Foreign tax credit**
Norwegian limited liability companies that have paid taxes on foreign-source income may, under certain conditions, offset the Norwegian tax paid against the foreign tax paid. The tax credit is limited to the lower of the Norwegian tax paid on the same type of foreign income and the foreign tax actually paid. It is possible to carry forward unused foreign taxes for five years. A credit claimed in accordance with the regulations stated above may not be used in addition to deductions pursuant to other rules and regulations. These rules are very technical, and it should be noted that there are three different ‘baskets’ of income.

**Roll-over regulations**
Upon application, the Ministry of Finance has the authority to grant tax relief on the transfer of assets within a group. The transfer may be carried out between group companies (more than 90% ownership and voting rights) or partnerships (with mainly the same owners). If a tax relief is granted, the transfer would not trigger any taxation at the time of the transfer, but all tax positions, including the tax basis of the transferred assets, will be transferred to the acquiring company. A condition for the tax relief is normally that the companies remain within the group.

The Ministry of Finance also has the authority to grant tax relief on the realisation of property, business, shares, etc. during a reorganisation. The reorganisation must improve the efficiency of the business to qualify for tax relief, and, accordingly, administrative effects would not be sufficient. The tax relief must also help companies to carry out the reorganisation. In addition, the tax relief must not reduce the Norwegian tax base; the tax positions would be transferred to the new taxpayer.

---

**Withholding taxes**
Norway does not levy WHT on payments of royalties and interest, except on interest derived from primary capital certificates (‘Egenkapitalbevis’).

The internal WHT rate is 25%, which may either be reduced under the tax-exemption rules or by an applicable tax treaty. To qualify for the tax-exemption rules, the recipient of the dividends has to be a corporate investor resident in an EEA country and must also fulfil certain substance requirements.

1. 25% of the capital.
2. 30% of the capital and an investment of no less than 100,000 United States dollars (USD).
3. 10% of the capital.
4. 10% of the voting rights.
5. 25% of the voting rights.
6. 50% of the voting rights.
7. 5% for over 70% of the capital; 10% for 25% to 70% of the capital.
8. Internal Norwegian WHT rate (i.e. 25%).
9. 15% of the capital.
10. 10% of the capital for an uninterrupted 24-month period.
11. 80% of voting rights.
12. 20% of the capital provided that such dividends are exempt from tax in the other state.
13. 10% of the capital for an uninterrupted 12-month period.
14. 10% of the capital for an uninterrupted 24-month period (effective from 1 January 2014).
Tax administration

Taxable period
The income tax year normally runs from 1 January to 31 December, with assessments being issued in early autumn of the following calendar year. Companies are liable for both advance payments and final settlements in the calendar year of assessment. Companies with a financial year other than the calendar year may use the financial year for tax purposes in certain instances (e.g. if they belong to a foreign group with a deviating accounting year, they may use the financial year of the group for tax purposes).

Tax returns
Companies are required to file their tax returns by the end of March in the year following their financial year. If filed electronically, the return must be filed by the end of May. Upon application, an extension of the time limit to file will normally be granted. The tax returns and the basic attachments are obligatory for all corporate taxpayers. Additional requirements may apply for specific business sectors, such as hydro power production. Under the petroleum tax regime, the filing deadline is the end of April, regardless of whether filed electronically or not.

The annual assessment is made by one of five regional tax departments, who notify the taxpayer if it has been determined that the taxable income will deviate from what was submitted in the tax return.

Payment of tax
Companies are required to make advance payments of tax on 15 February and 15 April in the year following the income year. The two payments should together cover all of the expected CIT to be assessed. Any balance must be paid three weeks after the assessment has been made public (i.e. in early autumn of the year following the relevant accounting year).

The above applies to all corporate taxpayers, except for taxpayers under the petroleum tax regime, where tax shall be paid in six instalments.

Tax audit process
The Norwegian tax system is tax return based. The Norwegian tax office carries out tax audits based on different selection criterions. A tax audit can be caused by the ordinary review of the tax return, random selection of companies or business sectors, information obtained from other parties, etc.

The tax office normally gives notice of an upcoming tax audit, but it can also be unannounced. The examination generally takes place by formal, written communication, and the process can take from a few weeks to several years.

Statute of limitations
The tax office has a ten-year limit for reassessing tax assessment for all open years (from the year after the income year in question). However, a two-year limit applies for negative adjustments and a three-year limit for positive adjustments if the taxpayer has provided sufficient and correct information in the tax return.

The taxpayer may file an appeal on the tax assessment within six weeks after the taxpayer receives it. The time limit for appealing other decisions is normally three weeks after the tax office’s decision.
Norway

**Topics of focus for tax authorities**
The tax office’s topics of focus can vary each year and from region to region. The primary topics of focus lately have been thin capitalisation, transfer pricing, and tax losses on receivables.

**Foreign Account Tax Compliance Act (FATCA) agreement with the United States**
In April 2013, Norway entered into an FATCA agreement with the United States. The agreement is based on the US FATCA regulations and is the basis for information exchange between the Norwegian and US tax authorities with regards to financial transactions.

According to the agreement, Norwegian financial institutions can report to the Norwegian authorities instead of reporting to the US authorities. It is expected that this will ease the reporting liabilities for Norwegian financial institutions.
Oman

**Significant developments**
The Omani tax authorities have issued new forms for various purposes as indicated in the Executive Regulations to the Income Tax Law, including for filing returns. These forms require much more detailed information to be provided by the taxpayer at the time of filing returns. Taxpayers are required to provide information on remuneration of chairmen and members of the board of directors, profits or losses from disposal of securities listed in the Muscat Securities Market, income earned by but not recorded in accounts, profits or losses derived from disposal of fixed assets, unrealised losses recorded, and others.

**Taxes on corporate income**
The rate of income tax is uniform for all types of business entities, regardless of whether it is a corporate entity and/or whether it is registered or not.

The Income Tax Law seeks to tax worldwide income of entities formed in Oman and the Oman-source income of branches and other forms of permanent establishment (PE).

The income tax rate is as follows:

<table>
<thead>
<tr>
<th>Taxable profits (OMR*)</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>First 30,000</td>
<td>0</td>
</tr>
<tr>
<td>Over 30,000</td>
<td>12</td>
</tr>
</tbody>
</table>

* Omani rial

**Petroleum income tax**
Special provisions are applicable to the taxation of income derived from the sale of petroleum. The tax rate specified for such companies is 55%. However, the tax rates are applied on income as determined by the individual Exploration and Production Sharing Agreement entered into between the government of Oman and the company engaged in the sale of petroleum. Under these agreements, the government pays the company’s share of income tax from amounts withheld from the government’s share of production. Therefore, the income tax is not actually borne by the company.

**Local income taxes**
There are no local income taxes in Oman.
Oman

**Corporate residence**

The term ‘resident’ is not defined in the tax law.

**Permanent establishment (PE)**

PE is defined in very broad terms and includes places of sale, places of management, branches, offices, factories, workshops, mines, quarries, and building sites for construction. However, the mere use of storage or display facilities does not constitute a PE. The definition of PE references carrying on business in Oman, either directly or through a dependent agent.

Additionally, the definition stipulates that a total stay of 90 days during a 12-month period creates a PE in Oman. However, this 90 day period applies to rendering of consultancy services or other services only. Under this definition, while the sale of goods into Oman will not be deemed to be a taxable activity, a contract for the supply and installation of equipment is likely to attract tax. By the same criterion, services rendered by personnel visiting Oman will be treated as taxable activities, applying the 90 day rule.

**Other taxes**

**Value-added tax (VAT)**

There is no VAT or sales tax in Oman.

**Customs duty**

Customs duty of 5% of cost, insurance, and freight (CIF) value applies to most non-Gulf Corporation Council (GCC) source goods. Exemptions apply for certain food items, medical supplies, etc.

**Excise taxes**

There are no excise taxes in Oman.

**Property taxes**

There are no property taxes in Oman.

**Stamp duty**

Stamp duty is applicable on transfer of land and property at 3% of the value.

**Social security contributions**

A 17% social security contribution is applicable to employees who are Omani nationals, but not to expatriate employees. The employee pays a contribution of 6.5% of salary, and the employer pays the balance of 10.5%.

**Municipal taxes**

Municipal taxes apply to the following items:

- Property rents: 3%.
- Hotel occupancy: 5%.
- Leisure and cinema houses: 10%.
**Oman**

---

**Branch income**

Branches of foreign entities (regardless of country) are subject to tax at the rate of 12% on income over OMR 30,000.

Expenses incurred by the head office that can be identified as directly related to the branch’s activity are deductible. The deduction for other head office expenses is limited to 3% of the branch’s gross income for the year. This rate is 5% for banks and insurance companies, and 10% for high tech industrial activities.

---

**Income determination**

**Inventory valuation**

Inventory should be valued using a method that complies with International Accounting Standards.

**Capital gains**

Gains on sales of securities listed on the Muscat Securities Market are exempt from taxation. A recent Supreme Court ruling held that gains on transfers of other assets are taxable as ordinary income.

**Dividend income**

Dividends received from Omani entities are exempt from taxation. Foreign-source dividends are taxable. Foreign-source dividends are taxed as the same rates as corporate income.

**Stock dividends**

There are no provisions in the tax law that address stock dividends.

**Interest income**

Interest income is taxable as business income.

**Rent/royalty income**

Rental income and royalties are taxed as business income.

**Unrealised exchange gains/losses**

Unrealised exchange gains are not taxable. Similarly, any unrealised loss is not deductible from the total taxable income.

**Foreign income**

Worldwide income of an entity formed in Oman is taxed in Oman. Credit for foreign taxes paid is given under the law; however, this may not exceed the amount of Omani tax payable on such income.

The Oman tax law does not contain rules on deferral of foreign income.

---

**Deductions**

**Depreciation**

Depreciation is taken on a straight-line basis on the following classes of assets at the annual rates shown.
Oman

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Permanent buildings</strong></td>
<td>4</td>
</tr>
<tr>
<td>Semi-permanent buildings</td>
<td>15</td>
</tr>
<tr>
<td>Docks, sea barriers in ports, pipelines, roads, and railway lines</td>
<td>10</td>
</tr>
<tr>
<td>Aircraft and ships</td>
<td>15</td>
</tr>
<tr>
<td>Hospital buildings, educational establishments, and equipment for scientific research</td>
<td>100</td>
</tr>
</tbody>
</table>

The rate of depreciation allowed is doubled in the case of buildings used for industrial purposes.

The tax law now provides for calculation of depreciation on a net book value basis for the following class of assets. A ‘pooling’ concept has been introduced, whereby assets subject to same rate of depreciation may be pooled together for purposes of depreciation.

<table>
<thead>
<tr>
<th>Pool</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>First pool is comprised of machinery and equipment, including computer software installations, furniture and fixtures, and vehicles</td>
<td>33.33</td>
</tr>
<tr>
<td>Second pool is comprised of drilling equipment</td>
<td>10</td>
</tr>
<tr>
<td>Third pool is comprised of ‘other machinery and equipment’ not included above</td>
<td>15</td>
</tr>
</tbody>
</table>

**Goodwill**

Goodwill is amortisable for tax purposes, generally over the life assigned for International Financial Reporting Standards (IFRS) accounting purposes.

**Start-up expenses**

Expenses incurred before the commencement of business are allowed as a deduction in the first taxable year (or period).

**Interest expenses**

Deduction of expenses incurred for the purpose of earning income is generally allowed. Interest expense is allowed for loans from unrelated parties or on loans from banks. Interest paid to related parties is allowed only to the extent the loan terms are at arm’s length.

**Bad debts and other contingencies**

Amounts charged to the profit and loss account for creating provisions in respect of bad debts, stock obsolescence, warranties, and similar types of contingencies are not tax deductible. Deduction is allowed only at the time of write-off. However, provisions created by licensed banks in respect of bad debts are allowable within the limits approved/required by the Central Bank of Oman.

**Charitable contributions**

Charitable donations are limited to specified institutions and organisations and are subject to an overall limitation of 5% of total income.

**Meals, entertainment, officers’ compensation, etc.**

All expenses incurred for the generation of gross total income are allowed. There are no specific restrictions on deduction for expenses like meals and entertainment, compensation for officers, and life insurance payments for employees. There are limits on the deductibility of directors’ fees.
Social security payments
Social security contributions paid by employers in respect of employees may also be deducted.

Pension payments
Contributions to pension funds, domestic and foreign, are deductible, provided the fund is licensed (in Oman or the country where it was established) and complies with certain other specified conditions.

Illegal payments
Payments of bribes or kickbacks, and other illegal payments, are not deductible.

Fines and penalties
Civil fines and penalties are not deductible.

Taxes
Taxes on income, whether incurred in Oman or elsewhere, are not deductible in arriving at taxable income. A credit may be available for taxes paid in a foreign jurisdiction.

Other significant items/restrictions on allowable expenses
The tax law has imposed restrictions on the deductibility of certain other expenses. The principal items affected are the following:

- Sponsorship fees paid to Omani sponsors are restricted to 5% of net taxable income before sponsorship fees. Net taxable income is determined after offsetting any losses carried forward.
- Charges or expenses allocated from the head office or other group companies are limited to 3% of gross income (5% for banks and insurance companies, and 10% for high tech industrial activities).
- Commissions paid by insurance companies are restricted to 25% of net premiums collected.
- Leasing companies are treated at par with banks as far as deduction for loan loss provision is concerned. Leasing companies are allowed deductions for loan loss provisions, subject to the limits or recommendations of the Central Bank of Oman.
- Losses arising on sale of investments listed on the Muscat Security Market are not allowed as a deduction from taxable income.
- Any expense or costs that have been incurred to generate income exempted from tax are not allowed as a deduction from taxable income.
- Amounts paid as tax consultancy or advisory fees are disallowed.

Net operating losses
Carryforward of losses is limited to five years, except in the case of companies that incurred losses during a mandatory tax-exempt period, where the net losses may be carried forward indefinitely for offset against future profits.

Carryback of losses is not allowed.

Payments to foreign affiliates
Payments to foreign affiliates normally receive in-depth scrutiny from the tax authorities. Accordingly, proper documentation should be obtained in order to establish that these transactions are made at an arm’s-length basis.
**Oman**

**Group taxation**

Businesses are taxed as separate entities, and the tax law does not recognise group taxation.

**Transfer pricing**

Transactions between related parties must be valued at arm's length. There is no specific guidance on acceptable methods for determining an arm's-length price.

**Inter-company payments**

All inter-company payments are scrutinised in detail to ensure that the profits are not transferred to avoid payment of tax.

**Thin capitalisation**

If the debt-to-equity ratio exceeds 2:1 in the case of related party debt, interest on the excess debt is not deductible for tax purposes. This rule does not apply to banks and insurance companies, PEs of foreign companies, or proprietary (Omani owned) establishments.

**Controlled foreign companies (CFCs)**

There is no CFC regime in Oman.

---

**Tax credits and incentives**

**Foreign tax credit**

Foreign taxes paid to a country with whom Oman has a double tax treaty (DTT) are eligible for a credit to the maximum of the Oman tax that would have been payable on such income. The taxpayer is required to submit an application to the Secretariat General for Taxation to claim such credit.

**Exempt activities**

Income from the principal activities listed below is exempt from tax, if an exemption is applied for and obtained.

- Industry and mining.
- Export of products manufactured or processed locally.
- Operation of hotels or tourist villages.
- Agriculture and animal husbandry and the processing of agricultural produce.
- Fishing and fish processing and aquaculture.
- University education, college or institutes of higher studies, private schools, nurseries, training colleges, and institutes.

The exemption is valid for a period of five years from the date of commencement of production or the practice of activities and may be made subject to such conditions as the Minister of Commerce and industry may specify. The exemption is renewable for a period not exceeding five years, subject to approval by the Financial Affairs and Energy Resources Council.

**Exempt income**

The following income is exempt from income tax in Oman:

- Dividends received from an Omani company.
- Profits or gains on disposal of securities listed on Muscat Security Market.
• Omani marine companies, whether wholly owned by Omanis or with foreign and Omani ownership and registered in Oman, are exempt from tax. Foreign marine companies conducting activities in Oman through an authorised agent are exempted from tax with effect from the date of commencement of activity, provided that reciprocal treatment is afforded by the country of the foreign company.
• Income realised by foreign airlines carrying on business through PEs in Oman is exempt from tax. This exemption is limited to the extent of the income from operating airplanes for international transport, provided reciprocal treatment is accorded in the airline’s home country.
• Income realised by investment funds established in Oman under the Capital Market Authority Law or established overseas for dealing in shares and securities listed on Muscat Security Market is exempt.
• Foreign companies engaged in oil and gas exploration activities, while taxable under the law, normally have their tax obligations discharged by the government under the terms of the Exploration and Production Sharing Agreement.
• Foreign companies working for the government in projects deemed to be of national importance may be able to negotiate a tax protection clause whereby any tax paid by them is reimbursed by the government.

**Withholding taxes**

Foreign companies that do not have a PE in Oman for tax purposes and that derive income from Oman in the nature of the following are subject to withholding tax (WHT) at 10% of gross income from such sources:

• Royalty.
• Consideration for research and development (R&D).
• Consideration for use of or right to use computer software.
• Management fees.

Such WHT is required to be withheld by the Omani-based company and paid to the tax department within 14 days of the end of the month in which tax is deducted or payments are due or made to the foreign company.

There is no WHT on dividends and interest payments.

The term ‘royalty’ has been defined under the law to include consideration for the use of intellectual property, including computer software, cinematography films, tapes, discs, or any other media, patents, trademarks, drawings, etc. The term further includes consideration for using industrial, commercial, or scientific equipment and consideration for information concerning industrial, commercial, or scientific experience or consideration for granting rights to exploit mining or other natural resources.

**Double tax treaties (DTTs)**

The maximum WHT rates provided by the Oman DTTs are shown in the table below. There are also agreements with various countries that are not yet in force.

Notes
1. 10% minimum shareholding required.
2. 15% minimum shareholding required.
3. 20% minimum shareholding required.
4. Interest received by financial institutions (including insurance companies) or loans/debt claims guaranteed by the government of the source state.
5. 60% minimum shareholding required.
6. 25% to 60% minimum shareholding required.
7. Only the country from which the payment is made (source country) may tax.

**Tax administration**

**Taxable period**
The tax year is the calendar year. Assessments can be made on the basis of a year-end other than 31 December, provided permission is granted in advance by the Omani tax authorities and the company then adheres to the year-end on a consistent basis.

**Tax returns**
A provisional declaration of tax must be submitted in the prescribed form within three months from the end of the accounting period to which it relates. The final annual return of income should be submitted in the prescribed format within six months from the end of the accounting period to which it relates. Reasonable time extensions can be sought and are normally provided for filing the provisional and annual returns of
income, but these do not defer payment of tax, which will be subject to additional tax at 1% per month from the due date to the actual date of payment.

In the case of companies having a paid-up capital in excess of OMR 20,000, the annual return of income should be accompanied by audited accounts signed by an auditor registered in Oman. The law requires accounts to be drawn up in accordance with IFRS consistently applied. It specifically provides for accrual accounting unless prior permission of the Secretary General of Taxation (the Secretary General) has been obtained. The accounts must be submitted in local currency unless prior approval of the Secretary General has been obtained for submitting them in foreign currency.

Delay or failure in submitting the provisional or annual returns may attract a penalty of not less than OMR 100 and not more than OMR 1,000.

Failure to file the provisional or annual returns of income may result in an estimated profit assessment by the Secretary General.

Failure to submit audited accounts as required under the Law is deemed to result in an incomplete annual return of income and may attract an estimated profit assessment.

The law confers wide powers on the Secretary General for requesting information. Experience has shown that, notwithstanding the presentation of audited accounts, the tax department requests very detailed information and supporting documentation relating to revenue and expenses. Failure to provide such information or the provision of incorrect information can result in an additional assessment by the Secretary General and/or various penalties on the company and/or the officer responsible for providing the information.

**Payment of tax**

Any tax estimated to be payable in respect of an accounting period should be paid with the provisional assessment and ‘topped up’ for any additional amount computed as payable following submission of the annual return of income. Failure to pay taxes by the due date attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

The difference between the amount paid and the amount assessed, subject to filing of an objection, should be paid within one month from the date of the assessment. The additional amount assessed attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

Under the Law, the Secretary General has the authority, with the approval of the Minister and the Tax Committee, to sequester and sell the assets of a taxable entity to recover the taxes due.

If decisive proof is presented to the Secretary General that any person has paid tax for any year exceeding the tax due and payable for such tax year as finally settled, such person has the right to recover the tax. However, if any tax has become payable by such person in respect of another tax year, the excess amount will be adjusted against the future tax liability. Any request for recovery must be presented within five years from the end of the tax year to which it relates.

Where the taxpayer fails to declare correct income in the tax return for any tax year, the Secretary General may impose a fine not exceeding 25% of the difference between
Oman

the amount on the basis of the correct taxable income and the amount of tax as per the
return submitted.

**Objections and appeals**
A company has a right to object to any assessment issued by the Secretary General. The
objection document should be prepared in writing (in English and in Arabic) and filed
with the office of the Secretary General for Taxation within 45 days from the date of
assessment. The Secretary General is required to give a judgment within five months,
extendable up to another five months at the Secretary General’s discretion, from the
date of receiving the objection. The tax demanded may be kept in abeyance on request.
No additional tax is payable until the Secretary General issues the judgment.

**Statute of limitation**
The tax authorities have a period of up to five years from the end of the year in which
a tax return is submitted to complete the assessment for that tax year. However, where
the entity has not submitted any tax return, the tax authorities have a period of ten
years to complete the assessments.

**Maintenance of records**
The Law requires accounting records and supporting documentation to be maintained
for ten years after the end of the accounting period to which these records relate.

**Topics of focus for tax authorities**
Related party transactions are likely to attract particular scrutiny by the tax authorities.
Taxpayers should maintain documentation that proves that transactions are carried on
at arm’s length.

Significant developments

The following significant developments in corporate taxation have recently occurred in Pakistan:

• The province of Punjab has introduced an Act to collect and levy sales tax on services. Now, two provinces, Sindh and Punjab, have introduced their own sales tax acts.
• Gain on immovable property disposed of within two years of acquisition is now taxed at 5% or 10%.
• The tax rate on capital gain on disposal of securities has been reduced.
• Exploration and production companies are extended an option to adopt a 40% tax rate, with an amended mechanism to calculate taxable income.

Taxes on corporate income

A resident company is taxed on its worldwide income. Non-resident companies operating in Pakistan through a branch are taxed on their Pakistan-source income, attributable to the branch, at rates applicable to a company. The federal corporate tax rates on taxable income are as follows:

<table>
<thead>
<tr>
<th>Company type</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Banking company</td>
<td>35</td>
</tr>
<tr>
<td>Public company other than a banking company</td>
<td>35</td>
</tr>
<tr>
<td>Any other company</td>
<td>35</td>
</tr>
<tr>
<td>Small company (see the Tax credits and incentives section for more information)</td>
<td>25</td>
</tr>
</tbody>
</table>

The term ‘public company’ implies a company listed on any stock exchange in Pakistan or one in which not less than 50% of the shares are held by the federal government or a public trust.

In the case of a modaraba (see the Income determination section for a definition), income, except relating to trading activities, is exempt from tax, provided that 90% of its profit is distributed to the certificate holders as cash dividends.

The final tax regime (FTR) for resident taxpayers, a presumptive tax scheme where taxes are withheld at the source on the sale of goods and execution of contracts or collected at the time of import (for other than industrial raw materials), is considered a final tax liability in respect of income arising from the sale, contract, or import.
In the case of exports, tax collected at the time of realisation of foreign-exchange proceeds is treated as final tax for that income.

The FTR is also applicable to non-resident taxpayers, at their option. However, it is only applicable in cases of receipts on account of the execution of a contract for construction, assembly, or installation, including a contract for the supply of management activities in relation to such project as well as certain contracts for services and contract for advertisement services rendered by television satellite channels.

**Taxation of a permanent establishment (PE) of a non-resident**

The following principles shall apply in computing taxable income of a PE:

- It is a distinct and separate entity dealing independently with the non-resident of which it is a PE.
- In addition to business expenditure, executive and administrative expenditure, whether incurred in Pakistan or elsewhere, will be allowed as deductions.
- Head office expenditure, including rent, salaries, travelling, and any other expenditure that may be prescribed, shall be allowed as a deduction in proportion to the turnover of the PE in the same proportion as the non-resident's total head office expenditure bears to its worldwide turnover.
- Royalties, compensation for services (including management services), and interest on loans (except in banking business) payable or receivable to or from PE’s head office shall be considered in computing taxable income of PE.
- No deduction will be allowed for any interest paid on loans acquired by a non-resident to finance the operations of a PE (or for the insurance premium in respect of such loans).

**Minimum tax**

Where the tax payable by a company is less than 0.5% of the turnover, except where the company is in a loss position before charging depreciation and other inadmissible expenses, the company is required to pay a minimum tax equivalent to 0.5% of the turnover. Tax paid in excess of normal tax liability can be carried forward for adjustment against tax liability of a subsequent tax year. However, such tax can only be adjusted against tax liability of the five tax years immediately succeeding the tax year for which the amount was paid.

**Local taxes on income**

No local taxes are payable in respect of income of companies.

---

**Corporate residence**

A company is resident in Pakistan if it is incorporated or formed by or under the law of Pakistan or if the control and management of its affairs is situated wholly in Pakistan in that year.

The term 'company' includes a trust, a cooperative society, a finance society, or any other society established or constituted by or under any law; a corporate body incorporated outside Pakistan; and any foreign association, incorporated or unincorporated, that the Central Revenue authorities may declare to be a company.

**Permanent establishment (PE)**

A PE is a place of business through which the business of a non-resident is wholly or partly carried out, including:
Pakistan

- A place of management, branch, office, factory or workshop, premises for soliciting orders, warehouse, permanent sales exhibition, or sales outlet, except a liaison office.
- An agriculture, pastoral, or forestry property.
- A mine, oil or gas well, quarry, or any other place of extraction of natural resources.
- A building site; a construction, assembly, or installation project; or supervisory activities connected with such site or project if such activity continued for more than 90 days within any 12-month period.
- The furnishing of services, including consultancy services, by any person through employees or other personnel engaged by the person for that purpose.
- A person acting in Pakistan on behalf of the person, other than an agent of independent status acting in the ordinary course of business.
- Any substantial equipment installed, or other asset or property capable of activity giving rise to income.

The definition of a PE provided in a double taxation treaty (DTT) will prevail in cases where a DTT is executed by Pakistan with the related country of origin of the PE.

**Other taxes**

**Value-added tax (VAT)**

VAT (locally termed as ‘sales tax’) is ordinarily levied at 16% on the value of goods, unless specifically exempt, after allowing related input credits.

Telecommunication services are levied VAT at the rate of 19.5%. VAT on services, including telecommunication services, is a provincial levy.

Significant zero-rated goods are as follows:

- Supplies and repair and maintenance of certain ships and aircraft.
- Supplies to diplomatic missions and diplomats.
- Supplies against international tenders.
- Local supply of cotton seed oil.
- Supplies of raw materials, components, and goods for export processing zones.
- Supplies of locally manufactured plant and machinery to export processing zones and supplies of certain specified machinery to the exploration and production sector.
- Supplies to exporters.

Significant exemptions are as follows:

- Live animals and live poultry.
- Live plants.
- Vegetables, pulses, edible fruits (excluding imported fruits), certain spices, sugar cane, edible oils, etc.
- Milk preparations.
- Newsprints, newspapers, journals, periodicals, and books.
- Agricultural produce not subjected to any process.

**Customs and import duties**

Custom and certain other duties are collected at the import stage at varying rates classified under the Harmonized System (HS) Code.
Pakistan

**Excise duty**
Federal excise duty (FED) is levied at the rate of 16% on certain types of manufacturing, import of goods, and rendering of services, except telecommunications services, which are charged at the rate of 19.5%. FED, under the constitution, is to be levied and collected by the provinces. Sindh and Punjab provinces have promulgated their statute, and others are expected to follow.

**Property taxes**
Property owners are required to pay property tax levied and collected by provincial governments through municipal governments at varying rates.

**Stamp duty**
In the case of sale or transfer of immovable property, stamp duty is payable (with varying rates on the basis of location of the property) on the value of the property.

**Branch income**
The rates of tax for a branch of a company incorporated outside Pakistan are the same as those applicable on resident companies, other than public and banking companies (i.e. 35%). Tax at the rate of 10% is levied on the transfer of profits to the head office, with an exception for companies engaged in the oil and gas exploration and production business.

Payments to a branch in Pakistan of a non-resident are subject to deduction of tax at source on the same basis as a resident in the case of sale of goods, rendering of professional services, and execution of contracts. In other circumstances, a reduced/0% withholding tax (WHT) certificate can be obtained from the Commissioner of Income Tax.

Pakistan has signed agreements for avoidance of double taxation with over 60 countries.

**Income determination**

**Inventory valuation**
Inventories are to be stated at the lower of cost or market. The first in first out (FIFO) and average methods are accepted. Conformity of methods used for book and tax reporting is desirable, and the method used should be consistently applied.

**Capital gains**
Capital gain on the sale of immovable property, on which depreciation is not allowed, is taxed at the rate of 10% if disposed of within one year and 5% if disposed of within two years. However, if the retention period is more than two years, the gain is not taxable.

Gain on the disposal of shares of a resident company or a non-resident company, whose assets wholly or principally consist of immovable property situated in Pakistan or rights to explore/exploit natural resources in Pakistan, shall be Pakistan-source income.

Capital gains on the sale of shares of public companies or modaraba (profit sharing) certificates are exempt from tax if held for a period of more than 12 months. Capital gains on shares and modaraba, if held for less than 12 months, are taxable under two categories, (i) held for less than six months and (ii) held for more than six months but...
less than 12 months at 7.5% and 10%, respectively, to be gradually enhanced to 17.5% and 10%, respectively, by 2015.

Capital gain, other than on statutory depreciable assets, realised within one year of acquisition is fully taxed; after one year, 75% of such gains are taxed and 25% are exempt.

Capital gains on statutory depreciable assets (other than immovable property) are chargeable to tax as normal business income in the year of sale. They are measured as the difference between the sale proceeds and the tax written-down value of the relevant asset sold.

In the case of an asset disposal transaction that is on a non-arm's-length basis, fair market value of the asset shall be taken to be the consideration received by the seller, as well as the cost for the buyer.

Where assets are transferred outside Pakistan, the original cost is treated as the sale price, which means that the entire depreciation is recaptured at the time of export, except if the assets are used in oil or gas exploration, in which case only the initial depreciation is recaptured.

No gain or loss shall be taken to arise on disposal of an asset by a resident company to another resident company, provided certain conditions are met. The required conditions include, inter alia, that the transferor is 100% owned by the transferee or vice versa or both companies are 100% owned by a third company, and the transferee income is not exempt in the year of transfer. The scheme of arrangement is approved by the Securities and Exchange Commission of Pakistan or State Bank of Pakistan.

Any distribution to the shareholders of a company, to the extent that it relates to undistributed profits, is treated as a dividend.

Capital loss can be offset only against capital gains. Unabsorbed capital loss can be carried forward for adjustment against capital gains for six years.

**Dividend income**

Dividend income is subject to WHT of 10% or a lower tax treaty rate.

The deduction at source shall be the full and final discharge of tax liability on dividend income.

**Stock dividends**

Stock dividends declared by resident companies are exempt from tax.

**Interest income**

Interest earned by a company is taxed as its income from other sources. Interest earned by a non-resident company without a PE in Pakistan attracts WHT at the rate of 10%, except where a lower rate is provided in the related DTT, which is also the final tax on such income.

**Income from royalties and fees for technical services (FTS)**

Royalties received by non-residents are deemed to accrue or arise in Pakistan and are taxable if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan.
Pakistan

Income from ‘fees for technical services’ (FTS) is deemed to accrue or arise in Pakistan if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan. FTS means any consideration for the rendering of any managerial, technical, or consultancy services (including the provision of the services of technical or other personnel), but does not include consideration for any construction, assembly, or like project undertaken by the recipient or consideration that would be income of the recipient chargeable under the head salary.

Other significant items
Liabilities allowed as a tax deduction in a tax year and remaining unpaid for three subsequent years are deemed to be income in the first tax year following the said three years. Such items are then allowed as a deduction in the year the liability is discharged.

Agricultural income is exempt from income tax.

Foreign income
A resident company is taxed on its worldwide income and on its foreign income as earned. Double taxation of foreign income is avoided by means of foreign tax credits; this relief is allowed to the resident company on the doubly taxed income at the lower of the Pakistan or foreign tax rate. Undistributed income of a non-resident subsidiary is not subject to tax.

Foreign loss can only be offset against foreign income and can be carried forward for six years.

Modaraba

Modaraba (profit sharing) is a financing vehicle that enables a management company to control and manage the business of a modaraba company with a minimum of 10% equity participation. The management company is entitled to remuneration based on an agreed percentage (but not exceeding 10%) of annual profits of the modaraba business. A modaraba can be for a specific purpose or many purposes and for a limited or unlimited period. The income of a modaraba not relating to trading activity is free from tax if 90% of its profits are distributed as cash dividend.

Deductions

Depreciation
Normal depreciation is allowed at the following prescribed rates by applying the reducing-balance method.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>10</td>
</tr>
<tr>
<td>Furniture</td>
<td>15</td>
</tr>
<tr>
<td>Machinery and equipment, including motor vehicles and ships</td>
<td>15</td>
</tr>
<tr>
<td>Computer hardware, including monitors and printers</td>
<td>30</td>
</tr>
<tr>
<td>Aircraft and aero engines</td>
<td>30</td>
</tr>
<tr>
<td>Below-ground installations in mineral oil concerns</td>
<td>100</td>
</tr>
<tr>
<td>Offshore platform</td>
<td>20</td>
</tr>
</tbody>
</table>

All depreciable assets put into service for the first time in Pakistan during a tax year, other than road transport vehicles not plying for hire, furniture (including fixtures),
plant and machinery used previously in Pakistan, or plant and machinery for which a deduction has been allowed under another section of this ordinance, for the entire cost of the asset, shall be entitled to an initial allowance at 50% of the cost of the asset, except for buildings, for which the rate is 25%.

Book depreciation need not conform to tax depreciation. Unabsorbed tax depreciation not set off against the income of the year is carried forward and added to depreciation of the assets of the same business in the following year. Tax depreciation can be carried forward without limit until fully absorbed.

**Amortisation of intangibles**
The cost incurred on acquisition of a patent, invention, design or model, secret formula or process, copyright, software, quota, licence, intellectual property or other like property or right and any expenditure that provides an advantage or benefit for a period of more than one year is allowed as a deduction on a straight-line basis over the useful life of the asset, but not exceeding a period of ten years.

Any payment made against acquisition of goodwill will also be amortised under these provisions.

**Organisational and start-up expenses**
Expenditure incurred before the commencement of a business wholly and exclusively to derive income chargeable to tax can be deducted over a period of five years.

**Interest expense**
Interest expense is allowed as an expense if required WHT is deducted and deposited in the government treasury.

**Bad debt**
Bad debts are allowed as deductible expenditure if the following conditions are satisfied:

- Debts are included previously in the income chargeable to tax.
- Debts are written off in the financial statements.
- There are reasonable grounds for believing that the debt is irrecoverable.

**Charitable contributions**
See Charitable donations credit in the Tax credits and incentives section.

**Fines and penalties**
Fines or penalties that are not paid or payable for the violation of any law, rule, or regulation are allowable as tax deductible expenses.

**Taxes**
Taxes on income are not deductible. Sales tax and excise tax are tax deductible where these are to be absorbed by the business; otherwise, these are passed on to the consumer.

**Other significant items**
Expenditure on scientific research incurred in Pakistan wholly and exclusively for the purpose of deriving income chargeable to tax is an allowable expenditure.

Exchange gains and loss on foreign currency loans specifically obtained for acquiring an asset are adjusted against the depreciable cost of the asset.
Pakistan

Any lease rental incurred by a person in the tax year to a scheduled bank, financial institution, approved *modaraba*, or approved leasing company shall be a deductible expense. However, financial charges paid for the above-mentioned leases are added back into the taxable income of the company.

**Net operating losses**
Operating losses may be carried forward and set off against the profits of the succeeding six years of the same business in which the losses were incurred. Unabsorbed depreciation can be carried forward indefinitely.

Carried forward losses of an entity in the case of group relief cannot be utilised if the ownership of the holding company is reduced to less than 55% and 75% if one of the companies is a listed company or none of the companies is a listed company, respectively.

Business losses can be carried forward up to a period of six years in the case of the amalgamation of two companies, with the condition that the same business is continued for a minimum period of five years.

The carrying back of losses is not permitted.

**Payments to foreign affiliates**
The deductibility of a head office expenditure of a non-resident taxpayer is limited to the same proportion of total head office expenditure as the Pakistan turnover has with the total world turnover. However, such domestic rules are overridden if the branch is a tax resident of a country having an agreement for avoidance of double taxation (treaty) and that treaty provides a different basis.

**Group taxation**
A locally incorporated holding company and subsidiary of a 100% owned group may be taxed as one group by giving an irrevocable option for taxation as one fiscal unit. The relief is not available for losses prior to formation of the group. The group is available if the companies are designated as entitled to avail group relief by the Securities and Exchange Commission of Pakistan.

Any company that is the subsidiary of a holding company may surrender its loss for the year to its holding company or its subsidiary, or between another subsidiary of the holding company, provided that the holding company holds directly 55% or more capital of the subsidiary if one of the companies is a listed company. However, if none of the companies is a listed company, the holding requirement is 75% or more. The loss can be surrendered for a maximum of three years, and the required holding is for at least five years.

**Transfer pricing**
The tax authorities have the power in respect of a transaction between associates to distribute, apportion, or allocate income, deductions, or tax credits between such associates to reflect the income that would have been realised in an arm’s-length transaction.

**Thin capitalisation**
Where a foreign-controlled resident company (other than a financial institution or a banking company) or a branch of a foreign company operating in Pakistan has a foreign
Pakistan
debt to foreign equity ratio in excess of 3:1 at any time during a year, a deduction shall be disallowed for the profit on debt (interest) paid by the company in that year on that part of the debt that exceeds the 3:1 ratio.

---

**Tax credits and incentives**

Any relief from Pakistani income tax that is provided in any other law and not provided for in the Income Tax Ordinance or a treaty is not valid.

**Tax exemptions**

Profits and gains derived from an electric power generation project set up in Pakistan are exempt from tax.

Profits and gains derived by a company from the export of computer software, information technology (IT) services, or IT enabled services are exempt from tax through 30 June 2016.

**Small companies**

Activities of small companies are encouraged with a reduced income tax rate of 25%.

A small company has been defined to mean a company that:

- is registered on or after 1 July 2005 under the Companies Ordinance, 1984
- has a paid-up capital plus undistributed reserves not exceeding 25 million Pakistani rupees (PKR) (0.278 million United States dollars [USD])
- has an annual turnover not exceeding PKR 250 million (USD 2.778 million), and
- is not formed by splitting up or the reconstitution of business already in existence.

**Charitable donations credit**

Companies are allowed a tax credit equivalent to 20% of their taxable income in respect of donations to:

- any board of education or university in Pakistan, established by or under federal or provincial law
- any educational institution, hospital, or relief fund established or run in Pakistan by federal government, provincial government, or local government, and
- any non-profit organisation.

**Foreign tax credit**

Where a resident taxpayer derives foreign-source income on which foreign income tax is paid within two years from the year in which it is derived, the taxpayer is allowed a tax credit equal to the lower of (i) the foreign income tax paid or (ii) the Pakistan tax payable in respect of that income. However, foreign tax paid is not refundable.

---

**Withholding taxes**

WHT on payments of royalty and FTS, when royalty or FTS is not attributable to a PE in Pakistan, is 15% or a lower treaty rate of royalty or gross fees. The tax withheld would be deemed to be the final tax liability of the non-resident. In the case of a non-resident where royalty or FTS is attributable to a PE in Pakistan, the amount of royalty/FTS shall be chargeable to tax as normal income, and withholding on payments can be avoided,
subject to approval of the commissioner. If a reduced rate is available in a tax treaty, such rate would be applicable.

Resident corporations making certain types of payments must withhold tax as follows:

<table>
<thead>

Notes

1. This table is a summary only and does not reproduce all the provisions that may be relevant in determining the application of WHT in each tax treaty.
2. Resident and non-resident imply tax status.
3. Individuals and companies are required to render annual returns of income and pay tax at the applicable rates. Credit is given for WHT deducted.
4. WHT rates for interest and royalties given to non-resident corporations (treaty countries) also apply to non-resident individuals.
5. The following remarks for dividends should be noted:
   - The inter-corporate rate of tax on dividends received by a foreign corporation is 10%; corresponding treaty WHT rates in excess of 10% have been specified.
   - The rates given in the table for treaty countries relate to recipient corporations. The maximum rate, as stated above, in respect of inter-corporate dividends is 10%. The lower rates are expressly provided in respect of dividends paid to a parent/associated corporation that has a certain minimum holding in a Pakistan industrial undertaking. The level of holding are noted:
     - Japan: 25% and 50%.
     - United States: 50%.
6. Certain treaties provide for tax exemption of interest paid to the government or the central bank of the contracting state and on foreign loans specifically approved by the federal government.
7. No concession is provided under the treaty.
8. Royalties are exempt from tax, provided the recipient does not have a PE in Pakistan.
9. Inter-corporate dividend where companies are entitled to group relief is exempt.
10. WHT rate depends on percentage of holding in the company.
11. This rate applies if the paying company is engaged in the industrial undertaking.
12. Consideration for technical know-how or information concerning industrial, commercial, or scientific experience.
13. This rate applies if the beneficial owner is a company.
14. This rate applies if the beneficial owner is a bank.
15. This rate applies if the paying company operates in preferred areas.
16. This rate applies if the company is owned by the government.
Pakistan

**Tax administration**

**Taxable period**
The tax year is 1 July through 30 June. However, tax authorities are empowered to approve a special year end.

**Tax returns**
All companies are required to file an income tax return each year by 31 December for the preceding financial year (1 July through 30 June) by accounting for business income on an accrual basis. If the special year granted by the tax authorities ends on 31 December, then the tax return is required to be filed by 30 September following the year-end.

An across-the-board self-assessment scheme is in place whereby assessment is taken to be finalised upon filing of the return. The Commissioner, however, has powers to amend the assessment if it is believed that the ordinance has been incorrectly applied or there is definite information that the assessment made is incorrect. These powers are to be exercised within a prescribed time frame. In the case of transactions between associates, the Commissioner can substitute the transaction value with the fair market consideration. The Commissioner is also empowered to determine tax liability according to the substance of the transaction, disregarding formal arrangements between the parties.

**Payment of tax**
Companies are required to pay advance tax on the basis of tax liability of the immediately preceding tax year in respect of their income (excluding capital gains and presumptive income). The advance tax is to be paid after adjusting the taxes withheld at source (other than the tax withheld relating to final tax regime).

Advance tax is required to be paid in four quarterly instalments on or before 25 September, 25 December, 25 March, and 15 June in each financial year. Credit for tax paid in a tax year shall be allowed against tax liability of that year.

The total tax liability is to be discharged at the time of filing the return of income.

Advance taxes and taxes withheld are adjustable against the tax payable with the return of income.

**Tax audit process**
The Federal Board of Revenue is authorised to prescribe criteria for selection of audit of taxpayers who has filed their returns for a tax year. Based on such criteria, cases are selected through computer ballot separately for income tax, sales tax, and federal excise duty. The returns are examined by tax authorities, and related documents and information are requisitioned. Show cause notices are then raised and, on receipt of explanations from taxpayers, income or loss is assessed. In case of disagreement with assessments, the taxpayer has the right to agitate the issues before appellate forums.

**Statute of limitations**
An audit of the tax return filed by a taxpayer can be conducted by the tax authorities within five years of the end of the financial year in which the return is filed.
**Advance rulings**
A non-resident not operating in Pakistan through a PE can apply to the Federal Board of Revenue to issue an advance ruling setting out the Board’s position regarding application of the provisions of the Income Tax Ordinance to a transaction proposed or entered into by the taxpayer. The tax ruling, once issued, is binding on tax authorities.

**Topics of focus of tax authorities**
Tax authorities focus on the following issues:

- WHT.
- Transfer pricing.
- Relationship of expenditure with the business of the taxpayer.
- Advance tax.
- Payment of tax dues within the time prescribed.
- Audit of returns filed.
- Compliance by taxpayers.
- Collection of arrears.

**Other issues**
Special rules are applicable for computation of income from exploration and production of petroleum, mineral deposits, insurance business, and banking business.
**Significant developments**

Law No. 52, 2012, enacted on 28 August 2012, modifies certain articles of the Tax Code. One of the main amendments eliminates the Monthly Prepaid Income Tax (AMIR, for its Spanish acronym) and re-implements the estimated income tax method that was previously in place (see the Tax administration section). Transition rules apply for fiscal year 2012.

Also as of August 2012, comprehensive transfer pricing obligations were established for all taxpayers and for all transactions with related parties abroad. During 2011, obligations were in force only for transactions with countries where Panama had a double tax treaty (DTT) in force.

Finally, as of August 2012, in order to benefit from the benefits of a DTT, the taxpayer must notify the tax authorities 30 days prior to the event that triggers the applicability of the DTT.

**Taxes on corporate income**

Panamanian income tax is levied based on the territoriality principle. Panamanian-source income is subject to taxation whether it is received by a resident or non-resident entity. Residency is only relevant to determine if the entity is subject to withholding tax (WHT) or not.

Corporations are subject to income tax at a fixed rate of 25%. Certain businesses and the related parties that render services to them are subject to a 27.5% tax rate. As of 1 January 2014, this tax rate will be reduced to 25%.

The higher tax rate (i.e. the 27.5% rate) applies to either the generation or distribution of energy, telecommunication services in general, insurance, reinsurance, financial institutions regulated by Law No. 42 of 2001, cement industries, the operation and management of gambling games, mining in general, and entities dedicated to banking activities in Panama.

For companies in which the state owns more than 40% of the stock, the tax rate is 30%.

The tax base (i.e. amount to which the tax rate will apply) for companies whose taxable income is greater than 1.5 million United States dollars (USD) is the greater of:

- net taxable income calculated on the normal basis or
- 4.67% of the gross taxable income (excluding exempted and non-taxable income and foreign-source income); this is called the alternate calculation of income tax (Calcolo Alternativo del Impuesto sobre la Renta or CAIR).
If the entity’s tax year results in a loss due to the alternative calculation, the taxpayer may request to the tax administration (the General Directorate of Revenues, i.e. Dirección General de Ingresos or DGI) not to be subject to the CAIR.

The taxpayer may also request not to apply the CAIR if its effective income tax rate is higher than the applicable income tax rate (i.e. 25%). Here is an example of such an instance:

<table>
<thead>
<tr>
<th>Net taxable income</th>
<th>USD</th>

The DGI has a six-month period within which to reach a decision on such requests; otherwise, the petition will be considered as granted.

**Corporate residence**

A company is considered as a tax resident when it has been incorporated in Panama, regardless of where the main office is located or whether central management is exercised in Panama or abroad. Entities incorporated abroad may also be registered with the tax administration in order to avoid WHT.

**Permanent establishment (PE)**

As of August 2012, Panama follows the Organisation for Economic Co-operation and Development (OECD) PE rules.

**Other taxes**

**Movable goods and services transfer tax (ITBMS)**

The movable goods and services transfer tax (Impuesto de Transferencia de Bienes Muebles y Prestación de Servicios or ITBMS) is the Panamanian value-added tax (VAT).

The general tax rate is currently 7%.

Alcoholic beverages and hotel accommodation are taxed at 10%, and tobacco and tobacco-derived products are taxed at 15%.
Panama

ITBMS is calculated on the value-added through a method of tax credits (i.e. ITBMS paid on transactions to produce taxable transactions) and tax debits (i.e. ITBMS collected on transactions).

Exports are not taxed, and the ITBMS paid to generate the exports may be refunded. The sale of goods such as medicines, foods, and certain products for babies are not taxed and may allow the supplier to recover the ITBMS as an exporter if certain criteria is met.

Medical services and transportation among other services are not taxed but do not produce ITBMS credit for the supplier.

The statute of limitations is five years.

**Customs duties**
All goods introduced into the Panamanian territory from another country are subject to customs duties. The duty rates are provided by the Panamanian Customs and Tariffs Office.

Customs duties may only be assessed by authorised customs brokers.

**Excise tax (selective consumption tax)**
The selective consumption tax is applied to goods (e.g. jewellery, expensive automobiles, guns, tobacco, alcoholic beverages) and services (e.g. mobile, cable TV, satellite TV) that are considered as non-essential. The tax base is the cost, insurance, and freight (CIF) price plus import duties for imported items and sales price for all other activities. The tax is levied at only one stage: on the importation of the taxed products; the sale of taxed goods produced in Panama; and for services, when the service is invoiced, the service is completely rendered, or upon receipt of advance payments, whichever occurs first.

Different tax rates apply depending on the type of service or good, with a minimum of 5% on sodas and 100% on tobacco products.

**Stamp duty**
Stamp duty is charged at a rate of USD 0.10 per USD 100 (or fraction thereof) only on certain commercial contracts.

**Capital gains tax**
The transfer of real estate property and securities is subject to WHT on the gross transactions amount, but the taxpayer may make a special income tax assessment to pay the capital gain and may request a rebate of the difference between the WHT and the capital gain.

In the case of the transfer of real estate property, a 2% real estate transfer tax plus a 3% income tax advance payment must be remitted (calculated over the gross transaction amount or the cadastral value, whichever is greater). The 3% may be deemed definitive; contrariwise, the tax will be assessed at 10% of the gain and the 3% of the advance payment will be credited. Any amount in excess may be subject to rebate.

The rates as described in the table below will be applicable to the transfer of real estate if:

- the transferor’s core business is the sale of real estate with new constructions
• it is the first transfer of the real estate after the new construction is built, and
• the construction permit was issued after 1 January 2010.

<table>
<thead>
<tr>
<th>New housing construction</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to USD 35,000</td>
<td>0.5</td>
</tr>
<tr>
<td>From USD 35,000 up to USD 80,000</td>
<td>1.5</td>
</tr>
<tr>
<td>Greater than USD 80,000</td>
<td>2.5</td>
</tr>
<tr>
<td>New commercial construction</td>
<td>4.5</td>
</tr>
</tbody>
</table>

When transferring new housing real estate, the real estate transfer tax (2%) does not apply if the transfer occurs within the next two years after an Occupancy Permit is issued.

The transfer of securities is subject to a 5% WHT, and the tax rate on capital gain is 10%. The law establishes the application of a 5% WHT that will be applied by the buyer. The seller may accept the WHT as definitive or perform the calculation of the gain, apply the rate of 10%, and deduce the applied WHT. In case the WHT is superior, the taxpayer can choose to claim the return of payments made in excess.

Example:

<table>
<thead>
<tr>
<th>Sales price (a)</th>
<th>1,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cost (b)</td>
<td>900</td>
</tr>
<tr>

<td>50</td>
</tr>
<tr>
<td>Tax at 10% of (c)</td>
<td>10</td>
</tr>
<tr>
<td>Payment in excess</td>
<td>40</td>
</tr>
</tbody>
</table>

The sale of fixed assets is subject to 10% on the capital gain, and there is no WHT.

**Franchise tax**

Franchise income tax must be paid by all corporations on an annual basis (USD 300 per year). The deadline for payment depends on the date of incorporation of the company. If the company was incorporated on any date during the first six months of the year, the due date for payment will be on 15 July of each year. If it was incorporated in the last six months, the due date will be 15 January of each year.

Non-profit organisations, cooperatives, and civil partnerships are not subject to franchise tax.

**Operations notice tax**

The notice of operations is an annual tax on equity at a rate of 2%, with a minimum tax amount of USD 100 and a maximum tax amount of USD 60,000. In the case of free zones or special trade areas, the tax will be calculated at a rate of 1% up to a maximum tax amount of USD 50,000.

The tax base is the outcome from total assets less total liabilities (excluding liabilities with related parties abroad). Special considerations apply under certain DTTs.
Panama

*Local municipal tax*
Local municipal tax is charged based on the gross income generated by the business through the corresponding accounting period; it also depends on the type of activity being conducted by the corporation. In most cases, it cannot exceed USD 2,000 per month for each activity performed.

According to Municipal Agreement No. 40 of 2011, the monthly tax return was replaced by an Annual Municipal Tax Return for the District of Panama. This return must be filed before the Municipal Authorities in the first 90 calendar days after the ending of the fiscal year. In case the taxpayer does not file the return before the deadline, a USD 500 penalty will be applicable.

*Branch income*
For tax purposes, branches are considered separate entities from the head office and must therefore keep accounts separately and will have separate tax liability.

Branches located within the Panamanian territory must pay dividend tax through definitive WHT of 10% of net taxable income generated by the Panamanian branch, less all income taxes paid by the same corporation in Panama. This amount will be paid jointly on filing the corresponding income tax return.

*Income determination*
Under the territoriality principle, the following will not be considered as taxable income:

- All income produced outside Panama.
- All income generated from operations or services performed outside the Panamanian territory.

*Inventory valuation*
Inventory should be valued at the start of any business and, subsequently, at least once every accounting period. All assets must be grouped, depending on their nature, with certain characteristics indicated (e.g. the unit of measurement, the name of the asset, the price of the unit, the total value of units). Reference to the accounting records should also be included.

Inventories are generally stated at cost and can be valued using the compound average cost method, first in first out (FIFO) method, retailer method, or specific identification method. Since all entities must keep legal records, any adjustment resulting from using different methods of inventory valuation for tax purposes and financial purposes should be recorded and must be reported to the proper authorities. Once a taxpayer adopts a method, they must maintain it for at least five years.

*Capital gains*
See Capital gains tax in the Other taxes section for a description of how capital gains are taxed in Panama.

*Dividend income*
Panamanian legislation establishes that distribution of dividends is subject to definitive WHT, applied at the moment of distribution. Generally, dividends are subject to income
tax at a rate of 10% without taking into consideration the form of payment, types of stock, assets, or money.

Dividend tax applies at a 5% rate on dividends paid from foreign-source income, from income derived from exports, as well as exempt income from banking account interests and interests and earnings derived from securities issued by the government.

Free zone users are taxed at a 5% rate as well for local-source income.

Loans to shareholders are deemed as dividend distribution, subject to a 10% withholding even in the cases where the 5% tax rate applies.

Notwithstanding the aforementioned, if the entity’s shares are issued to bearer, they will be subject to dividend tax at a rate of 20%.

Dividend tax is levied if the entity meets one of the following criteria: (i) requires an operation permit to operate in Panama, (ii) requires an operation key to operate at the Colon Free Zone, (iii) is established in a Fuel Free Zone, (iv) is established in a free zone or special zone, (v) produces Panamanian-source taxable income. Dividend tax also does not apply to dividends paid on income received as a dividend if the entity is not required to withhold dividend tax or if the entity withheld the tax.

A complementary tax applies each tax year that the entity distributes less than 40% of the net profits after income tax. The complementary tax is an advance payment of the dividend tax, calculated on the difference of the distributed dividends and 40% of the net profits after income tax and applies the corresponding tax rate. If complementary tax is paid, then the entity may offset the paid complementary tax with the dividend tax when the corresponding dividend is decreed.

**Inter-company dividends**

The distribution of dividends derived from income received as dividends from other entities is not subject to income tax or dividend tax as long as the entity that paid the dividend in the first instance was exempt from withholding any dividend tax, or if it was required to, made the corresponding withholding.

**Interest income**

Interest income is not subject to income tax.

**Foreign income**

Panamanian resident companies are taxed on their income generated within the Panamanian territory. Any other income generated abroad will be exempt from income tax payment but may be subject to dividend tax (see above).

**Deductions**

Taxable income is determined by deducting from the Panamanian-source income all costs, expenses, and non-taxable income applicable and permitted by law. The deductibility of costs and expenses depend on the relation of such costs and expenses with the generation or preservation of income source. Special restrictions apply to the following:

- Depreciation.
- Bad debt.
- Charitable contributions.
Costs and expenses related to non-taxable income are not considered as deductible. Thus, the taxpayer must split the expenses and costs related to taxable transactions from those related to non-taxable transactions. The expenses and costs allocated to taxed transactions may not exceed the amount from multiplying the portion of taxable income from the total income by the total costs and expenses.

### Example:

<table>
<thead>
<tr>
<th></th>
<th>Taxable</th>
<th>Non-taxable</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Income</td>
<td>100</td>
<td>50</td>
<td>150</td>
</tr>
<tr>
<td>Costs and expenses</td>
<td>83.75</td>
<td>41.25</td>
<td>125</td>
</tr>
<tr>
<td></td>
<td>67%</td>
<td>34%</td>
<td>100%</td>
</tr>
</tbody>
</table>

### Depreciation and depletion

The straight-line and sum-of-the-years-digits methods of depreciation are allowed, as well as any other method.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Straight-line (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>3½ as maximum</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>33 as maximum</td>
</tr>
<tr>
<td>Furniture and fixtures</td>
<td>33 as maximum</td>
</tr>
<tr>
<td>Vehicles</td>
<td>33 as maximum</td>
</tr>
</tbody>
</table>

In the case of mines, depletion will be deductible during the useful life or depending on the state contract methodology.

### Goodwill

Goodwill expenses are deductible only when the transferring agent declares them as income.

### Start-up expenses

Start-up expenses are deductible through the amortisation process, over a maximum term of five years.

### Interest expenses

Interest expenses are deductible only in cases where the interest relates to the generation or conservation of taxable income from a Panamanian source. No thin capitalisation rules are in force.

### Bad debt

A taxpayer may deduct bad debts by opting for one of the following options:

- Loading gains and losses annually to the value of such accounts in the fiscal year.
- Charging an annual profit and loss figure for the establishment of a reserve to meet contingencies of this nature.

### Charitable contributions

Donations made in cash or in kind to the government, charitable or educational institutions, activities to promote HIV disease awareness, or political parties are deductible, with certain restrictions and limited to 1% of taxable income.

### Fines and penalties

Fines and penalties are not deductible.
**Taxes**
The national and municipal taxes that affect capital, sales, and other operations related to taxable income producing activity are deductible.

**Net operating losses**
Losses incurred by common taxpayers may be carried forward and deducted from taxable profits for the following five years, at a rate of 20% each year, but limited to 50% of taxable income. Loss carrybacks are not allowed, and losses are not allowed for estimated income tax purposes.

**Payments to foreign affiliates**
A payment to a foreign entity (including affiliates) in a foreign country will be subject to WHT anytime it represents a deductible cost or expense for the payer. The tax base will be 50% of the remittance, and the income tax rate applicable is 25%.

**Group taxation**
In Panama, there are no group taxation rules.

**Transfer pricing**
Transfer pricing rules are applicable for all transactions with non-domiciled related parties.

An informative return must be filed within six months after the end of the taxable year. An additional ‘arm's length’ economic study must be kept and made available for tax authority inspection upon request.

**Thin capitalisation**
There are currently no thin capitalisation rules in Panama.

**Tax credits and incentives**

**Free zones**
Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, and selective consumption tax derived from royalties on exportation and re-exportation activities. Aside from trading activities, the following businesses may also apply for the regime: higher education centres, scientific research centres, specialised centres for health services, high technology businesses, assembling businesses, semi processed or finished products processing businesses, services businesses, environmental service businesses, general services, logistics services businesses, and manufacturing businesses.

**Tourism, industry, and agriculture allowances**
The Incentive Law for Tourism Development grants several tax benefits (e.g. exemption from import duties on certain tourism services and related goods, exemption from property tax for companies dedicated to tourism), but only for those corporations with a signed tourism agreement with the government. Income tax exemptions may apply in special cases.

In general, income from individuals or corporations that engage in agricultural production activities will be exempted from income tax if annual gross income is lower than USD 250,000.
Forestry plantations are totally exempted from income tax payment until 2018 if the lot planted has been duly registered at the Forestry Registry of the Environmental National Authority and resolution with approval from this authority has been issued.

**Special laws**

The Panamanian government has enacted special laws regarding tax exemptions for certain activities performed in Panama, such as call centres (Law No. 54 of 2001), and tax exemptions for certain appointed areas such as the Panama Pacific Economic Zone (Law No. 41 of 2004) and Law No. 41 of 2007, which creates a special regime for the establishment and operation of regional headquarters in Panama.

By means of Law No. 8 of 2010, Real Estate Investment Societies may deduct the profits distributed to their shareholders, provided that these Real Estate Investment Societies:

- raise long-term funds in a securities market
- are registered in the National Securities Commission
- distribute no less than 90% of their free cash flow
- register in the General Direction of Revenues, and
- withhold 20% of the profits distributed as an income tax advance payment on behalf of the shareholder, which may be deemed the definitive tax to be paid by the shareholder.

**Withholding taxes**

Royalties and commissions on services paid to foreign entities are taxed through the application of the corresponding tax rate (i.e. 25%) over 50% of remittance under the concept of WHT (effective tax rate is 12.5%). The taxpayer may decide not to withhold taxes and consequently not deduct the expense.

Payment of interest is also subject to income tax on 50% of the interest paid to a beneficiary abroad on loans invested in Panama, but the payer must proceed with the WHT even if one does not deduct the interest.

If the beneficiary is registered as a taxpayer in Panama before the tax administration, no WHT may be required.

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends (%)</th>
<th>Interest (%)</th>
<th>Royalties (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foreign corporations</td>
<td>5/10/20</td>
<td>12.5</td>
<td>12.5</td>
</tr>
</tbody>
</table>

In case of treaties, special rules are applicable in order to avoid double taxation.

**Notes**

1. Depending on the percentage of ownership held by the beneficial owner (at least 25% to apply the 5% rate).
2. Depending on the person or entity receiving the payment. If the beneficial owner is a bank, the 5% rate will apply; if the beneficial owner is the Central Bank of either state, the 0% rate will apply; in all other cases, the 7.5% rate will apply.
3. If the services are not rendered in any of the states, the income will only be taxed in the state where such income arose.
4. If paid to government financial institutions, the 0% rate will apply.
5. 3% for the use or right to use industrial, commercial, or scientific equipment.
6. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 5% rate).
7. Depending on the person or entity receiving the payment. If the beneficial owner is a bank, the 5% rate will apply; if the beneficial owner is the Central Bank of either state, the 0% rate will apply; in all other cases, the 10% rate will apply.
8. The 12.5% rate applies if the person rendering the services is in the other state for more than 60 days.
9. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 15% of the shares of the Dutch company, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange. Also, no WHT is levied if the foreign company is a bank or insurance company, a state or political subdivision, a headquarter owning at least 10% of the shares of the Dutch company, or a pension fund.
10. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 10% rate).
11. If the services are rendered in Panama, then the 10% rate will apply.
12. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 4% rate).
13. 5% WHT rate is levied if the recipient (excluding partnerships) is a shareholder with at least a 40% direct interest in the paying company; otherwise, a 10% rate is levied. No WHT is levied if the recipient is a shareholder with at least a 80% direct interest in the paying company, and (i) its shares are listed on a stock exchange, (ii) the recipient is at least 50% owned by residents from either of the two countries, (iii) the recipient is owned by shareholders resident for tax purposes in third countries by a proportion of less than 25%, and (iv) the recipient is owned (an interest of more than 25%) by residents in third countries, provided that a tax treaty for the avoidance of double taxation has been signed with the country of the company paying the dividends and that this tax treaty establishes the same or more favourable conditions. No WHT is levied for dividends paid to pension funds.
14. If the services are rendered in Panama, then the 7.5% rate will be applicable.

---

**Tax administration**

**Taxable period**

The accounting period is the period for which the company makes its accounts. Returns shall be made upon completion of the accounting period and may not exceed 12 months. For most companies, it is usually from 1 January to 31 December.

**Tax returns**

The due date for filing is three months after the end of the fiscal year, with the possibility for an extension of up to two additional months.
Panama

**Payment of tax**
Income tax payment shall be made depending on the income tax return and shall be made no longer than three months after closing of the corresponding accounting period.

As of August 2012, new legislation eliminates the Monthly Prepaid Income Tax (AMIR, for its Spanish acronym) and re-implements the estimated income tax method that was previously in place. Transition rules apply for fiscal year 2012.

Under the re-implemented method, taxpayers must pay estimated taxes (usually the same amount as generated income) at the end of the sixth, ninth, and 12th month after the end of the corresponding accounting period.

**Tax audit process**
Tax authorities select the taxpayers subject to audit based on internal criterion.

**Statute of limitations**
The tax administration may audit the income tax returns filed within the last three years from the last day of the year on which the tax return was filed.

**Topics of focus for tax authority**
Among the topics of focus are non-deductible expenses, withholdings, and VAT.

Significant developments

There were a number of amendments to existing tax law announced when the 2013 National Budget was handed down on 20 November 2012. The majority of these changes are effective as of 1 January 2013. In summary, the key taxation developments announced in the 2013 National Budget included:

- The general corporate income tax (CIT) rates remains at 30% for resident companies and at 48% for non-resident company.
- As of 1 January 2013, Papua New Guinea’s thin capitalisation rules apply to PNG companies across all industries with a debt-to-equity ratio of 2:1. This reform does not apply to financial institutions and does not apply to interest paid under domestic debt. See Thin capitalisation in the Group taxation section for more information.
- The 2013 Budget introduces an amendment to the legislation within the Income Tax Act 1959 recognising a nil assessment as an assessment. This will ensure that taxpayers with nil assessments are afforded the same certainty and fairness as those with positive assessments.

Under the new amendment, a nil assessment will be a statement from the Internal Revenue Commission (IRC) that states that no tax is payable. However, a nil assessment will not be an assessment of how many losses a taxpayer can take forward. This means losses will be reviewed when claimed as a deduction by the taxpayer against future income, and the IRC will have three or six years to review the losses from this point in time.

Taxes on corporate income

Papua New Guinea resident companies are liable for income tax on their worldwide income. Companies that are not resident in Papua New Guinea are only required to remit tax on income sourced in Papua New Guinea. A non-resident’s PNG-sourced passive income, including dividends, interest, and royalties, is generally only subject to withholding tax (WHT). It is ordinarily the case that the payer of the dividend, interest, or royalty must withhold the relevant amount of the tax and remit this to PNG’s IRC.

Papua New Guinea levies CIT on companies on a flat rate basis. The operations of a company, rather than the company’s taxable income level, will dictate the rate applied to the company’s taxable income.

Generally, trading profits and other income (except income that is specifically exempt) of resident companies in Papua New Guinea are assessed tax at a rate of 30%, whereas non-resident companies operating in Papua New Guinea are assessed tax at a rate.
Papua New Guinea

of 48%. There are, however, different tax rates for income derived from mining, petroleum, and gas operations.

Specifically, trading profits and other income from operations in Papua New Guinea are liable for CIT at the following rates:

<table>
<thead>
<tr>
<th>Source of income</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Income other than income from mining, petroleum, or gas operations:</td>
<td></td>
</tr>
<tr>
<td>Resident company</td>
<td>30</td>
</tr>
<tr>
<td>Non-resident company</td>
<td>48</td>
</tr>
<tr>
<td>Income from petroleum operations:*</td>
<td></td>
</tr>
<tr>
<td>Existing projects</td>
<td>50</td>
</tr>
<tr>
<td>New projects</td>
<td>45</td>
</tr>
<tr>
<td>Incentive rate projects</td>
<td>30</td>
</tr>
<tr>
<td>Income from mining operations:</td>
<td></td>
</tr>
<tr>
<td>Resident company</td>
<td>30</td>
</tr>
<tr>
<td>Non-resident company</td>
<td>40</td>
</tr>
<tr>
<td>Income from gas operations *</td>
<td>30</td>
</tr>
</tbody>
</table>

* The same rates of CIT apply to income from the petroleum operations listed above or gas operations derived by a resident or non-resident company.

**Overseas shippers**
Income derived by overseas shippers or charterers carrying passengers, livestock, mail, or goods out of Papua New Guinea is taxable in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 5% of the gross income, which is taxable at the non-resident rate of 48% in the case of companies. The IRC may exempt the overseas shipper from tax if the shipper’s home country exempts PNG shippers from a similar tax.

**Local income taxes**
There are no local income taxes in Papua New Guinea.

**Corporate residence**
A company will be deemed a resident for CIT purposes if it meets either the (i) incorporation test or (ii) the management and control test.

**Incorporation test**
A company incorporated in Papua New Guinea is automatically regarded as a PNG tax resident. However, the operation of the law of another country and a relevant double taxation treaty (DTT) may result in a company also being treated as resident in another country.

**Management and control test**
A company is a PNG tax resident if it is managed and controlled in Papua New Guinea, regardless of where it is incorporated. Generally, a company is managed and controlled in Papua New Guinea if key decisions affecting the company are made at directors’ meetings held in Papua New Guinea. This also includes a company incorporated outside Papua New Guinea that trades in Papua New Guinea and has its voting power controlled by resident shareholders.
**Dual residence**
An entity may be a tax resident of both Papua New Guinea and another country by application of domestic legislation. A DTT entered into between Papua New Guinea and another country may contain a tiebreaker test to determine the country of residence for the purposes of the DTT.

**Permanent establishment (PE)**
The concept of 'permanent establishment' has limited significance in the domestic taxation law of Papua New Guinea and is defined to mean a place at or through which a person carries on any business. Under domestic taxation law, Papua New Guinea will seek to tax the PNG-sourced income of a non-resident irrespective of whether or not that income is derived at or through a PE in Papua New Guinea.

Where PNG has entered into a DTT, the concept of PE becomes more important as it will then be one of the factors determining Papua New Guinea’s taxing rights over income sourced in Papua New Guinea, particularly with respect to the business profits of a non-resident company. In general terms, Papua New Guinea’s DTTS:

- define a PE to be a fixed place at or through which the business of an enterprise is wholly or partly carried on, and
- deem a PE to exist in various circumstances, including those relating to the presence of substantial equipment in the contracting state and the time spent by personnel of an enterprise furnishing services in a contracting state.

**Other taxes**

**Goods and services tax (GST)**
The GST rate is 10% and applies to most goods and services supplied in Papua New Guinea. Exported goods and services attract a zero rate of GST. Goods and services, other than motor cars, supplied to mining, petroleum, or gas companies are also zero-rated. Some goods and services are exempt, including medical, educational, and financial services. Land is excluded from GST, but buildings and other improvements are subject to the tax.

**Customs duties**
The majority of manufacturing inputs (including plant and machinery) attract no custom duties, and other custom duty rates are being progressively reduced. The remaining rates for custom duties vary depending on the nature of the good being imported and are assessed on the total value of the goods imported, including cost, insurance, and freight (CIF). Customs bonds may be issued for the temporary importation of goods that are to be re-exported within 12 months.

**Excise taxes**
Although customs duties are now minimal in many cases, some goods, most notably motor vehicles, now attract excise tax. Private motor vehicles generally attract excise at the rate of 60%, whereas work vehicles attract excise tax of 10%. Excise taxes can also apply to some domestically produced goods, including refined fuel products, alcohol, and tobacco.

**Land tax**
Land tax is imposed annually by provincial governments on the unimproved value of the land, and the power to levy land tax is vested exclusively with the provincial
Papua New Guinea

governments. In Papua New Guinea, land tax is difficult to implement and faces major geographical and social problems.

**Stamp duties**
Stamp duty applies at varying rates on documents and certain transactions. Of particular note is duty charged on the conveyance of property, which rises to a maximum of 5% where the value of the property being transferred exceeds 100,000 Papua New Guinea kina (PGK). The duty is payable by the purchaser, and a 5% duty on the unencumbered value of land may also be payable where there is a transfer of shares in certain landholding companies.

Other dutiable transactions include share transfers (including some share buy-backs), which are subject to a rate of 1%. The Collector of Stamp Duties has the power to amend assessments and refund overpayments of stamp duty.

Stamp duty is payable on documents executed outside Papua New Guinea that relate to property or matters done or to be done in Papua New Guinea.

**Export duties**

**Timber**
Export duty on timber logs (not sawn timber or plantation logs) is calculated with reference to the freight on board (FOB) value per cubic meter of exported logs and rates that increase as the value of the exported logs increase.

**Spices**
Levies are imposed from time to time on the export of specified spices (e.g. vanilla).

**Contributions to employee superannuation funds**
Contributions to employee superannuation funds are compulsory for entities with 15 or more permanent employees. The employer’s compulsory contribution is 8.4% of each employee’s gross basic salary. The employee’s minimum contribution is 6.0%.

Membership is generally compulsory for citizens. Non-citizens are currently exempt; however, this is under continuing review.

Contributions must be paid to an authorised superannuation fund. Contributions paid to an authorised fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee’s gross taxable salary. Contributions to non-resident funds are not tax-deductible.

**Training levy**
All businesses whose annual payroll exceeds PGK 200,000 are subject to a 2% training levy, calculated on the sum of the taxable salaries, including benefits, of all personnel. Qualifying expenses incurred in training PNG citizen employees are creditable up to the actual amount of the levy. The training levy, if payable, is not tax-deductible.

**Departure tax**
A departure tax is collected by airlines issuing tickets for persons departing Papua New Guinea.

**Gaming machine tax**
Papua New Guinea imposes a 74% tax on gross revenue from gaming machines.
**Resource project production levies**

Production royalties of 2% are payable to the national government on the net smelter return from mining operations. These royalties are tax-deductible. A royalty, at the rate of 2% of the wellhead value, is also payable from the production of petroleum and gas operations. Holders of new petroleum development licences are entitled to treat royalties as income tax paid. However, new petroleum projects will also pay a tax-deductible development levy calculated at the same rate of 2% of the wellhead value.

Mining projects are also required to pay a production levy to the Mineral Resources Authority calculated at a rate between 0.25% and 0.5% of the assessable income from production.

---

**Branch income**

Income derived by a non-resident contractor for services in Papua New Guinea is usually subject to a WHT at the rate of 12% of gross income. This amount is calculated on deemed taxable income of 25% of the gross contract income, which is taxed at the foreign contractor tax rate of 48% (subject to tax treaties). The provisions extend to payments for the following:

- The installation, maintenance, and use in Papua New Guinea of substantial equipment or machinery.
- Construction projects.
- For the lease or charter of any industrial, commercial, or scientific equipment or any machinery or vehicle.
- Consultancy or management services.

Where the non-resident contractor rules do not apply, the non-resident company will be subject to income tax at the foreign contractor tax rate of 48% on its PNG-sourced taxable income (see the Income determination section for a definition of taxable income).

PNG branch remittances are not liable for dividends WHT or any branch profits or similar tax.

---

**Income determination**

Taxable income is defined as the sum of assessable income minus allowable deductions. In practice, profits are calculated for tax purposes by reference to the profits reported in the financial accounts. Accounts must be prepared in accordance with PNG accounting principles, which follow the International Financial Reporting Standards (IFRS).

**Inventory valuation**

There is no form of stock relief or trading stock valuation adjustment to recognise the effects of inflation in Papua New Guinea. There is a once-only option to adopt the lowest of the cost amount, the market selling value, or the replacement value (which, in practice, may mean that book and tax valuations for trading stock are not aligned). Where the option is not exercised, the value of the stock is deemed to be the cost price; however, neither the income tax law nor the associated regulations provide detailed guidance on what constitutes ‘cost price’ (the Commissioner General of Internal Revenue has not produced any related guidance to date). It will generally be the case that where a taxpayer has determined a cost price in accordance with IFRS that cost price will also be accepted for income tax purposes.
Papua New Guinea

In special circumstances, the Commissioner General of Internal Revenue may accept a lower valuation.

**Capital gains**
There is no general capital gains tax in Papua New Guinea. However, profits arising on the sale of property acquired for the purpose of resale at a profit, or from the carrying out of a profit-making scheme, are taxable as ordinary income.

**Dividend income**
Unless otherwise exempt from CIT, dividends are included in the assessable income of a shareholder.

**Inter-company dividends**
Dividends received by a resident company from other companies, whether resident or non-resident, while being assessable to tax, are generally subject to a full tax rebate and are effectively received tax-free. However, where a company has losses on other activities or losses carried over from earlier years, those losses are applied against dividend income before the calculation of the dividend rebate.

**Stock dividends**
In most cases, the payment of a dividend by way of the issue of shares is subject to the same taxation treatment as the payment of a dividend by way of cash or the distribution of other property. However, dividends paid by the issue of shares wholly and exclusively out of profits arising from the sale or revaluation of assets not acquired for the purpose of resale at a profit are exempt from income tax and dividends WHT.

**Interest income**
Unless exempt under specific provisions, interest paid or credited by a financial institution, the Central Bank, or a company to a person resident in Papua New Guinea is includable in income, and the person making the payment of or crediting interest in the account is liable to withhold and pay tax upon the amount.

**Partnership income**
A partner’s share of the assessable income of the partnership less all allowable deductions to the partnership is includable in the partner’s assessable income for the year of income. Likewise, the partner’s individual interest in a partnership loss incurred in the year of income is an allowable deduction. Further, if income is exempt income to the partnership, this income will be exempt income to the individual partner relative to their individual interest.

**Unrealised exchange gains/losses**
Generally, foreign exchange gains realised and derived from debts made on or after 11 November 1986 or denominated in a currency other than the Papua New Guinea kina are included in assessable income.

**Foreign income**
PNG resident companies are liable for CIT on their income from all sources (i.e. including foreign-sourced income). A foreign tax credit may be available to offset foreign tax paid against PNG tax payable (see the Tax credits and incentives section for more information).

There are no provisions in Papua New Guinea that permit the deferral of the taxation of income derived outside Papua New Guinea. Subject to the operation of a DTT, foreign-sourced income derived by a resident of Papua New Guinea is subject to tax in Papua...
New Guinea in the year in which it is derived irrespective of whether or not that income is repatriated to Papua New Guinea.

Deductions

General deduction provisions provide that all losses and expenditures, to the extent incurred in gaining or producing the assessable income or are necessarily incurred in carrying on a business for the purpose of gaining or producing that income, are allowable deductions. However, the general deduction provisions do not allow a deduction to the extent a loss or expenditure is an outgoing of capital, or of a capital, private, or domestic nature, or incurred in relation to the gaining or production of exempt income.

Depreciation

Depreciation is allowed for equipment and other assets at prescribed rates. A taxpayer must use the diminishing-value method unless an election is made to use the prime-cost method. The applicable diminishing-value rates are 150% of the prime-cost rates.

Plant, machinery, and equipment

Plant, machinery, and equipment (including buildings) are depreciable at rates according to their estimated lives. A taxpayer other than a taxpayer who derives income from mining, petroleum, or gas operations may elect to claim special accelerated depreciation rates for certain capital items. For example, flexible depreciation rates (up to 100%) may be claimed on new industrial plant with a life exceeding five years that is used for manufacturing purposes. Other new plant and articles used in manufacturing, construction, transport, storage, communication, and agricultural production are eligible for an accelerated deduction equal to 20% of cost in the year of purchase. New plant and articles used for tourism are eligible for an accelerated deduction equal to 55% of cost in the year of purchase.

Motor vehicles

Motor vehicles are generally depreciable at 20% of prime cost. There is no upper limit in value for depreciation purposes.

Buildings

Buildings forming an integral part of plant, machinery, and equipment are depreciable at a prime-cost rate of up to 7.5%, depending on the construction materials. Buildings housing plants eligible for the one-year write-off deduction (see comments on new industrial plant under Plant, machinery, and equipment above) can be written off in the year of construction. Other income producing buildings may qualify for the accelerated deduction of 20% in the year of purchase.

Agricultural and fishing plants

Most items of new agricultural and commercial fishing plants qualify for 100% depreciation, as do boats and ships, including ancillary equipment, used solely as dive boats or for scuba diving by accredited tour operators. Other new items having a life exceeding five years used by a person carrying on agricultural operations are eligible for accelerated depreciation in the initial year of use.

Goodwill

A deduction is not available for goodwill or the amortisation of goodwill in Papua New Guinea (this being an amount not deductible under ordinary concepts and an item for which there is no specific deduction provision).
**Start-up expenses**

It will generally be the case that start-up expenses will not be deductible in Papua New Guinea. Such expenses are generally either capital, or of a capital nature, or incurred prior to the derivation of assessable income. There is no specific deduction provision for the deductibility of start-up expenses.

**Interest expenses**

A deduction is generally available for interest incurred on an arm’s-length basis, subject to meeting the general principles for deductibility. Where interest is incurred in connection with the construction or acquisition of an item of plant or capital asset, that interest is not immediately deductible. Rather, such interest is deemed to form part of the cost of that asset (and in the case of plant will then form part of the base from which future depreciation deductions may be claimed).

**Bad debt**

Bad debts are deductible if they have previously been included in assessable income and written off by year end or if the bad debt was in respect of money lent in the ordinary course of the taxpayer’s business of money lending.

**Double deductions**

An additional amount equal to the actual amount of expenditure incurred is deductible in respect of certain expenditures (e.g. export market development costs, some staff training costs, and certain donations). In other words, a ‘double deduction’ is available with respect to these items.

**Donations**

It is considered that donations made by a corporate taxpayer meet the general principles for deductibility and hence will generally be deductible (notwithstanding the specific provision dealing with gifts to charitable bodies has no current effect as there are no charitable bodies approved by the Commissioner General of Internal Revenue for this purpose). There are specific provisions in Papua New Guinea’s taxation law dealing with the deductibility of certain donations, some of which provide a deduction for up to 200% of the value of the amount donated.

**Pension expenses**

Contributions paid to an authorised superannuation fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee’s gross taxable salary. Contributions to non-resident funds are not tax-deductible. See the Other taxes section for more information.

**Fines and penalties**

There are no specific provisions denying a deduction for fines or penalties in Papua New Guinea taxation law; however, arguably, fines and penalties may not meet the general principles for deductibility, and their deductibility needs to be considered on a case-by-case basis.

**Taxes**

A deduction is not allowable in respect of payments of income tax or training levy. Other taxes may be deductible, subject to meeting the general principles for deductibility.
Net operating losses

Domestic
Trading losses may be offset against all income received in the same accounting period or carried forward and offset against future trading profits. The limitation period on the carryforward of losses is generally 20 years. Losses may not be carried back against prior years’ profits. Primary production losses and resource project losses may be carried forward without a time limitation, although, again, they may not be carried back (see the Tax credits and incentives section for more information).

Note that the carryforward of losses is subject to a 50% or more continuity of shareholding and control test, or a continuity of business test where there is a breach of the ownership test.

Foreign
Losses incurred by a resident taxpayer from a source outside Papua New Guinea (other than in relation to export market development) are not deductible against assessable income derived within Papua New Guinea. In practice, overseas losses can be carried forward and offset against overseas income for up to 20 years.

Payments to foreign affiliates
The deduction available to a taxpayer for management fees paid to an associated person is limited to the greater of:

- 2% of assessable income derived from PNG sources by the taxpayer or
- 2% of the total allowable deductions, excluding management fees incurred by the taxpayer in Papua New Guinea.

The limitation applies to both resident and non-resident taxpayers. Special rules apply to mining, petroleum, and gas companies. These limits may not apply where the recipient of the management fee is resident in a country with which Papua New Guinea has a DTT or where it can be demonstrated that the management fee arrangements do not have the purposes or effect of avoiding or altering the income tax payable in Papua New Guinea.

Group taxation
Companies are assessed for CIT separately, regardless of whether they are part of a group of associated or related companies. Losses of one company within a group cannot be offset for tax purposes against the profits of another company within that group.

The Companies Act allows two or more companies to amalgamate and continue as one, and provisions are in place to allow this to occur without any adverse CIT consequences.

Transfer pricing
Papua New Guinea has transfer pricing provisions that require transactions with foreign affiliates to be conducted on an arm’s-length basis.

Thin capitalisation
Thin capitalisation rules apply to prevent taxpayers from incurring excessive levels of debt. By excessively gearing their investments, companies are able to claim greater tax deductions through the interest expense charged on such debt. Thin capitalisation rules typically feature a debt-to-equity ratio that governs the ratio by which companies can
borrow from related parties relative to their equity. Any interest charged on debt that exceeds this ratio will not be deductible for CIT purposes.

Previously, Papua New Guinea’s (PNG’s) thin capitalisation rules, which featured a debt-to-equity ratio of 3:1, applied only to taxpayers in the natural resource (mining, oil, gas) sector. As of 1 January 2013, Papua New Guinea’s thin capitalisation rules apply to PNG companies across all industries with a debt-to-equity ratio of 2:1.

This reform does not apply to licensed financial institutions and does not apply to interest paid under domestic debt. If the ratio is breached, a proportion of the interest on foreign debt will be denied as a tax deduction.

**Tax credits and incentives**

In this section, we comment on the more significant tax credits and incentives available in Papua New Guinea, followed by a summary of those with more limited application.

**Foreign tax credit**

A foreign tax credit may be available to offset foreign tax paid against PNG tax payable. The foreign tax credit is limited to either the foreign tax paid or the average PNG tax payable on that foreign income, whichever is less. There is no mechanism to carry forward excess foreign tax credits for utilisation in a subsequent year.

**Research and development (R&D) deduction**

A 150% deduction is available for expenditures on R&D. The deduction is available to all sectors of the economy. Broadly, R&D expenditures are defined as systematic, investigative, and experimental activities that involve innovation or a high degree of technical risk carried out for the purpose of acquiring new knowledge, or creating new or improved materials, products, devices, processes, or services.

**Primary production incentives**

Key incentives that are available with specific application to primary production activities include:

- Outright deductions for certain capital expenditures, including clearing, preparing, or conserving land for agriculture; eradicating pests; providing labourers’ accommodation; and for the conservation and conveyance of water.
- A 100% deduction is available for a new plant used directly for the purposes of agricultural production, and an initial 20% accelerated depreciation deduction is allowed for a new plant with a life exceeding five years.
- Losses incurred in carrying on a primary production business can be carried forward indefinitely; they are not restricted to the 20-year limit that generally applies to company tax losses.
- Agricultural companies may transfer to their shareholders the benefit of the outright tax deduction available for many types of capital expenditures. The total deduction available to shareholders may not exceed the amounts paid on their shares.
- As part of promoting investment in primary production, a 20% tax rate is prescribed in respect of ‘incentive rate primary production income’ derived by a company (as opposed to the normal 30% tax rate for a resident company or 48% for a non-resident company) for up to ten years.
Agricultural production extension services deduction
A 150% deduction is available for expenditure on services provided free of charge to smallholder growers, including the provision of advice, training, and technical assistance in relation to primary production to assist growers with production, processing, packaging, and marketing issues.

Incentive rate for large scale tourist accommodation facilities
A 20% tax rate applies to income derived by a taxpayer from the operation of a large scale tourist accommodation facility or a substantially improved large scale tourist accommodation facility. The rate applies for 14 years after the end of the year of income in which the taxpayer first derives income from the facility.

Double deduction for staff training costs
Certain staff training costs, including the cost of full-time training officers and tourism training, are eligible for a double deduction. The total tax saving is limited to 75% of the expenditure incurred.

Double deduction for export market development costs
Expenditure incurred in the promotion for sale outside Papua New Guinea of goods manufactured in Papua New Guinea or tourism promotion is eligible for double deduction. The total tax saving cannot exceed 75% of the expenditure incurred.

Export incentives
The net export income from the export sale of certain types of goods is exempt for the first four years of income, with a partial exemption in the following three years. This exemption will cease to apply from 1 January 2015 (except in respect of goods that qualified for the exemption prior to that date).

Tax credit for infrastructure development by agricultural, mining, petroleum, and gas companies
A tax credit is available to agricultural, mining, petroleum, gas, and certain tourism companies that incur expenditure on a prescribed infrastructure development. In the case of taxpayers engaged in mining, petroleum, and gas operations, the credit is limited to 0.75% of the assessable income or the amount of tax payable for the year (in respect of that mining, petroleum, or gas project), whichever is less. Excess expenditure over the 0.75% or tax payable may be included in the following year’s rebate claim.

Unutilised credits or excess expenditure can generally only be carried forward for two years. In the case of taxpayers engaged in agricultural production, the credit is limited to 1.5% of the assessable income or the amount of tax payable for the year, whichever is less.

A prescribed infrastructure development includes a school, aid post, hospital road, and other capital assets that have been approved as such by the Department of National Planning and the IRC. It cannot be an expenditure required under the Mining Act or the Oil and Gas Act.

A 1.25% tax credit scheme also exists in respect of expenditure incurred in connection with the emergency repair of the Highlands Highway.

Other tax incentives in Papua New Guinea
Other tax incentives available in Papua New Guinea include:

- Manufacturers’ wage subsidy.
Papua New Guinea

- Immediate deduction for the costs of acquiring and installing solar heating plant.
- A ten year tax exemption for qualifying new business located in prescribed remote areas of Papua New Guinea.
- A specific deduction for environmental protection and clean-up costs.

**Incentives for petroleum, mining, and gas operations**

Special incentives and rules apply to mining, petroleum, and gas exploration, extraction, and production activities. The main aspects are as follows:

**Project basis of assessment**

A project basis of assessment (ring-fencing) is adopted for all resource projects. This means losses from other operations, regardless of whether or not they are resource related, cannot generally be offset against resource project income from a particular ring-fenced project. However, there are some concessions to the ring-fencing principle in respect of exploration expenditure and expenditure in respect of discontinued projects and losses arising from site restoration costs.

In general, all costs incurred in the exploration and development phases of the project are accumulated and amortised over the life of the project. Once production starts, an immediate deduction is allowed for ‘normal’ operating and administration expenses. Capital expenditure incurred after the start of production are capitalised and amortised over the life of the project.

**Rate of tax**

The rates of tax in respect of income from a resource project are:

<table>
<thead>
<tr>
<th>Source of income</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Non-resident companies</td>
</tr>
<tr>

</tr>
<tr>
<td>New projects</td>
<td>45</td>
</tr>
<tr>
<td>Incentive rate</td>
<td>30</td>
</tr>
<tr>
<td>Gas</td>
<td>30</td>
</tr>
</tbody>
</table>

**Interest deductions**

Interest is not deductible prior to the commencement of a resource project. Following the issue of a resource development licence, a person carrying on a resource project or exploration in relation to a resource project may claim a deduction against resource income for interest on money borrowed for carrying on the relevant operations or exploration. This is subject to a number of conditions, including maintaining a debt-to-equity ratio of 3:1.

**Capital allowances**

Allowable exploration expenditures (AEE) are amortised over the life of the resource project. The deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. The amount of the deduction is limited to the amount of income remaining after deducting all other deductions, other than deductions for allowable capital expenditure. In other words, the deduction cannot create a tax loss.
Allowable capital expenditures (ACE) are amortised over the life of the resource project. The ACE is split into two categories: capital expenditures with an estimated effective life of more than ten years (long-life ACE) and capital expenditures with an estimated effective life of less than ten years (short-life ACE).

The annual deduction for long-life ACE is claimed on a straight-line basis over ten years.

Where the remaining life of the project is less than ten years, the rate at which the deduction is allowed is calculated by referring to the remaining life of the project. For short-life ACE, the annual deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. For new mining projects, the deductions for both long-life ACE and short-life ACE are calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less.

The amount of the deduction for ACE is limited to the amount of income remaining after deducting all other deductions. In other words, the deduction cannot create a tax loss.

Off licence exploration expenditure
A major easing of the ring-fencing principle applies to taxpayers that are involved in a producing project, where the taxpayer or a related party incurs exploration expenditure outside the area of the productive project. In this situation, the taxpayer can elect (whether or not it is currently involved in a producing project) to add such exploration expenditure to an exploration pool that can be amortised against income from the producing project.

The amount allowable as a deduction from this exploration pool in respect of resource operations carried on by the taxpayer or a related corporation is the lesser of:

- 25% of the total undeducted balance of expenditure in the exploration pool or
- such amount as reduces CIT (other than additional profits tax [see below]) that would, but for this deduction, be payable by the taxpayer and its related corporations in respect of those resource operations for that year of income, by 10% (or 25% for mining projects).

Management fees
Once a resource project derives assessable income, the deduction for management fees is restricted to 2% of operating expenses other than management fees. During the exploration phase of a project, the amount of management fees that can be treated as allowable exploration expenditure is limited to 2% of the exploration expenditure other than management fees. Furthermore, during the development phase, the amount of management fees that can be treated as allowable capital expenditure is limited to 2% of the allowable capital expenditure other than management fees.

Transfer of expenditure
When interests are transferred from one taxpayer to another, the vendor and purchaser can agree to transfer deduction entitlements for the unamortised balances of allowable exploration expenditure and allowable capital expenditure to the purchaser.

Liquefied natural gas (LNG) project
A number of provisions with specific application to the PNG LNG project have been included in the Income Tax Act, Stamp Duties Act, Goods and Services Tax Act, Customs Act, and Excise Act.
Other provisions were added or amended at the same time as the PNG LNG project-specific provisions, the most notable being the re-introduction of additional profits tax for all designated gas projects.

**Additional profits tax**

Designated gas projects are potentially subject to additional profits tax (this tax does not currently have application to mining or petroleum projects). This is essentially a tax on positive cash flows arising from a gas project in excess of a hurdle rate of return. There are two calculations required, and, in summary, they operate as follows:

- Under Calculation X, once the cash flows become positive, after exceeding a 17.5% accumulation rate, the positive cash flow is subject to tax at a 7.5% rate.
- Under Calculation Y, once the cash flows become positive, after exceeding a 20.0% accumulation rate and any additional profits tax paid under Calculation X, the positive cash flow is subject to tax at a 10.0% rate.

**Withholding taxes**

**Dividends, interest, royalties, and technical/management fees**

The following WHT rates apply to dividends, interest, royalties, and technical fees under PNG domestic law and tax treaties. PNG domestic legislation provides an exemption from WHT for dividends and interest in certain circumstances. The higher rates quoted are the maximum rates allowable under the treaties.

<table>

Notes

1. The rate of WHT on dividends paid by mining companies is 10%. Dividends paid to a resident or a non-resident out of income from petroleum or gas operations are exempt from income tax and are not subject to WHT. There are also some other specific exemptions from WHT on dividends.
2. There is no WHT on interest when:
   - interest is paid or credited to a licensed financial institution in Papua New Guinea, the Bank of Papua New Guinea, or the state
   - interest is paid or credited by a resource company to a non-resident lender, or
   - the interest income is otherwise exempt income in the hands of the recipient.
3. A royalty paid to a non-resident associate of the payee will suffer a 30% WHT. Where the non-resident is not an associate of the payee, the WHT rate will be 10% (or 48% of the taxable income derived from the royalty if the non-resident chooses to lodge an income tax return in Papua New Guinea).
4. The treaty with Germany has not yet been ratified by Germany.
**Business income WHT**
Income derived by local contractors in certain industries is covered by the business income WHT regime. The industries affected include:

- Building and construction
- Road transport
- Motor vehicle repairs
- Joinery and cabinet making
- Architecture
- Engineering
- Surveying
- Security
- Cleaning and maintenance
- Advertising
- Entertainment
- Consultancy
- Equipment hire

Businesses affected are required to have a certificate of compliance and to produce it when entering into contracts with their customers. Payers are required to file an annual income reporting statement where they make either an eligible payment of PGK 500 or more in relation to one contract or eligible payments for several contracts exceeding PGK 3,000 in the year of income in relation to a single payee. Payers are required to deduct a 10% WHT if payees do not produce a certificate of compliance.

**Non-resident insurer WHT**
Premiums paid to non-resident insurers in respect of insurance contracts on property situated in Papua New Guinea or insured events that can only occur in Papua New Guinea are subject to tax in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 10% of the gross premium, which is taxed at the non-resident tax rates of 48% (companies) or 30% (unincorporated associations). Tax treaties may limit the rate of tax applied.

**Tax administration**

**Taxable period**
The tax year is generally the period 1 January to 31 December; however, application may be made for a substituted tax year-end. These will normally be granted where the substituted tax year-end coincides with the accounting year-end of an overseas holding company. A company’s tax year does not need to be the same as its accounting period.

**Tax returns**
Papua New Guinea operates on a full assessment basis, and companies are required to lodge an annual CIT return showing the calculation of taxable income for the year. In addition, the return must provide detailed disclosures in relation to income derived and expenses incurred during the year of income.

A company must file a tax return by 28 February in the year following the year of income to which the return relates. However, the following automatic extensions apply where the company lodges its return through a registered tax agent:

- To 30 June for taxable returns and partnership returns.
Papua New Guinea

- To 31 August for resource company returns.
- To 31 October for non-taxable returns.

**Payment of tax**

CIT is collected under a provisional tax system. Under this system, tax is paid in respect of a company's current year profits (i.e. payments made in the year of income are in respect of income derived in the same year as the payment is due).

Provisional tax is assessed by the IRC based on the last return lodged. In the event that no tax was payable on the previous year's return, the Commissioner General has the right to estimate the amount of tax based on any other information available.

Provisional tax is payable in three equal instalments by 30 April, 31 July, and 31 October.

Applications may be made to reduce provisional tax assessed if the tax due for the year in question is expected to be lower than the provisional tax assessed. Where estimated provisional tax is less than 75% of the income tax ultimately assessed, additional tax may be levied. Additional tax at a rate of 20% will be assessed, based on the difference between the estimate lodged and the provisional tax originally determined, or the actual tax payable, whichever is less. The Commissioner General has the discretion to require payment of additional tax.

Mining, petroleum, and gas companies are subject to advance payments tax, a system that broadly mirrors the provisional tax system in place for non-resource companies. The main difference for resource companies is they have the option to lodge an estimate of their taxable income for the year prior to 30 April, 31 July, and 31 October each year, which the IRC uses to assess each advance payments tax instalment.

Following the lodgement of the CIT return, the IRC will serve a notice of assessment on the company. The balance of tax payable for a year of income, after the application of provisional tax (or advance payments tax in the case of a resource company) and other tax credits or rebates, is due to be paid within 30 days of the date of service of the notice of assessment.

**Tax audit process**

There is no prescribed tax audit process in Papua New Guinea, and resource constraints have limited the IRC's audit activities.

**Period for amendment of assessments**

Where the IRC considers that a taxpayer made a full and true disclosure of all the material facts necessary for assessing their returns as originally assessed, the IRC may only amend an assessment that increases the tax liability of the taxpayer within three years from the date that tax became due and payable under the original assessment.

Where the IRC considers that a taxpayer did not make a full and true disclosure of all the material facts necessary for the assessment of their returns, and there has been an avoidance of tax, then:

- the IRC may amend any assessments previously issued to the participants if the IRC is of the opinion that the avoidance of tax was due to fraud or evasion (i.e. no time limit applies), or
• in cases of tax avoidance due to reasons other than fraud or evasion, the IRC may amend an assessment within six years from the date that tax became due and payable under the original assessment.

Topics of focus for the Internal Revenue Commission (IRC)
The IRC released guidance on transfer pricing matters in the form of Taxation Circular No. 2011/2 in late 2011. The IRC has indicated to tax agents that over time it will increase its focus on transfer pricing matters.

The IRC has not otherwise publicly announced areas of focus for tax compliance or audit programs.
Significant developments

There have been no significant corporate tax developments in Paraguay during the past year.

Taxes on corporate income

Income is taxed in Paraguay according to the resource principle (i.e. the territorial system of taxation).

There are three tax systems in Paraguay, depending on the type of taxpayer, as follows:

- Commercial income tax (CIT): For income from commercial, industrial, and service activities, the general income tax rate of 10% applies. See Capital gains and Dividend income in the Income determination section for a description of how such income is taxed. Note that dividend distributions require an additional 5% tax that must be paid on the amount of dividend approved for distribution at the shareholder meeting.
- Agriculture income tax (AIT): For income from agricultural and cattle activities, the rate ranges from 2.5% to 10% (determined by annual income).
- Little taxpayer income tax (LTIT): For those taxpayers with annual income of less than 100 million Paraguayan guaraníes (PYG), a single tax at a rate of 10% applies.

Local income taxes

There are no local taxes on income in Paraguay.

Corporate residence

Corporate legal residence is determined as the place where direction or central management takes place, unless the corporation’s charter states otherwise.

Permanent establishment (PE)

The Paraguayan Tax Law establishes the definition of a PE.

The following activities may be considered as a PE in the country:

- Branches or agencies.
- A factory, industrial plant, or cattle ranch entity.
- Mine activities, or any other natural resources extraction activities.
- Civil construction or assemble activities that exceed 12 months.
If a person provides instructions related to the agreement of certain operations on behalf of a foreign entity, this operation may be considered as a PE in the country, except in cases where the mentioned instructions are related to the purchase of goods.

**Other taxes**

**Value-added tax (VAT)**
VAT applies to all corporations and to individuals or associations of individuals rendering personal services.

The general VAT rate is 10%, but a special VAT rate of 5% applies for selling real estate, basic groceries, farming products, pharmaceutical products, and loan interest.

**Custom taxes**
As products are introduced into Paraguay directly by the local importer, the importer is responsible for payment of the related taxes (VAT on imports) before clearing the goods from Paraguayan customs, apart from customs tariffs. The other expenses involved in the import of products are the following:

- Port rates (between 0.65% and 1.50% of customs valuation).
- Customs valuation service (0.5% of customs valuation).
- Consular fee (15 United States dollars [USD] for each commercial document receiving a visa from the Paraguayan consulate at the originating country and USD 30 for each document not subject to visa).
- Indian contribution fee (7% on consular fee).
- IT system utilisation fee (between USD 15 and USD 25 according to importation value).

Other expenses should be added to the above, such as photocopying, handling fees, customs agent fees, etc.

**Excise taxes**
The excise tax, called the selective tax on consumption, is assessed on local goods and imported products listed, either specifically or generically, in the legislation. The importation of goods listed and the first sale of goods produced in Paraguay are taxed. The selective tax on consumption is collected independently of custom duty.

Some goods subject to this tax include whiskey and other alcoholic beverages, beer, tobacco products, etc.

**Real estate tax**
Real estate tax is levied annually at 1% of the fiscal value of the property, which is generally less than actual value (or market value). A tax rate of 0.5% applies if the area of rural property is smaller than five hectares and is used for agricultural or cattle ranching. In certain areas, an additional tax is levied on the fiscal value of vacant and semi-vacant land when the area of the built-up portion falls within certain determined percentage limits. Large tracts of land in rural areas are subject to an additional tax determined on a percentage basis and to a proportional tax of 0.5% to 1% on the fiscal value of tracts with areas ranging from 10,000 to 60,000 or more hectares.

The 1992 Paraguayan Constitution established that municipalities and departments are entitled to the tax revenues directly related to real estate. Collection of these taxes is the responsibility of municipal governments.
Paraguay

**Stamp taxes**
There are no taxes on acts and documents in Paraguay.

---

**Branch income**
Branches are taxed at the same rate as domestic corporations. Profits transferred or credited to the head office are subject to a 15% withholding tax (WHT) when remitted to the head office abroad.

Additionally, the payment of dividends (by the head office’s instructions) is subject to a 5% WHT to be paid at the time of the remittance and charged to the local entity.

---

**Income determination**

**Inventory valuation**
Taxpayers may adopt any method of inventory valuation, provided it is technically acceptable according to tax administration criteria (e.g. first in first out [FIFO], average cost). The valuation must be applied consistently and may be changed only with the prior approval of the Treasury Ministry.

Damaged, deteriorated, and obsolete inventories may be written down to fixed values by the taxpayer. The tax administration can reject valuations that are not realistic.

**Capital gains**
Gains on all assets, tangible and intangible, are taxable as part of profits and subject to income tax at a rate of 10%.

**Dividend income**
Dividends are taxable income when the recipient (or shareholder) is a non-resident, in which case a 15% WHT applies. An additional 5% tax is charged to local entities when the income or dividend is distributed to a local (resident) or foreign (non-resident) shareholder.

**Stock dividends**
Stock dividends are not taxable income, except when dividends represent more than 30% of the taxable income of an investor.

The mentioned exemption is not applicable in relation to the 15% WHT (in case of foreign shareholders) and 5% additional tax for dividend distribution (charged to the local entity that made the distribution).

**Interest income**
Interest income of a Paraguayan resident from capital abroad is subject to income tax. This case is the only exception to the resource principle rules enacted under Paraguay Tax Law.

**Foreign income**
Foreign-source income is not taxable. Interest, commissions, and capital gains are considered Paraguayan-source income when the investor is resident in Paraguay.
**Deductions**

**Depreciation and depletion**
The maximum allowable depreciation rates range from 2.5% for urban buildings to 25% for computer equipment. Depreciation is calculated using the straight-line method based on the useful life of assets as determined by the Treasurer. The Treasurer may also authorise the use of other depreciation or depletion methods that are deemed to be technically justified and generally accepted.

Fixed assets must be revalued annually based on the increase of the price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

**Goodwill**
Amortisation of goodwill is not deductible.

**Start-up expenses**
Amortisation of start-up expenses may occur over three to five years, depending on the taxpayer's decision.

**Interest expenses**
The interest expenses on loans taken for Paraguayan residents or Paraguayan taxpayers may be considered as deductible expenses.

Additionally, it is important to mention that certain investment projects may be subject to a special exemption of the taxes on the interest, commission, and other expenses for loans taken for banking entities abroad (see Investment incentives in the Tax credits and incentives section).

**Extraordinary losses/bad debts**
The deduction of extraordinary losses and bad debts require the meeting of certain conditions (e.g. communication to the tax authority, evaluation of the actual loss in monetary terms, audit review).

**Charitable contributions**
The deduction of a donation is subject to formal registration of the beneficiary entity as a public benefactor before the Treasury Ministry.

**Executive remuneration**
The deduction of executive remuneration is limited to a percentage defined according to the enterprise’s profits. However, in the event that the executive employees are subject to personal income tax (PIT), the deduction of their salaries is not limited for CIT purpose. The PIT was enacted from 1 August 2012.

**Fines and penalties**
Fines and penalties are considered as non-deductible expenses for income tax purposes.

**Taxes**
In general, all taxes mentioned in the Other taxes section are deductible. Income tax and any fiscal surcharges or fines are not deductible.

**Other significant items**
General provisions for expenses or other potential losses are not deductible.

Other specific non-deductible items include:
Paraguay

- Interest on capital, loans, or any other investment by an owner, partner, or shareholder in a business.
- Personal expenses of an owner, partner, or shareholder, except when they are subject to PIT.
- Money drawn on account of future earnings.
- Direct expenses incurred in earning non-taxable income.
- Earnings from any fiscal period that are retained in the business as capital increases or reserve accounts.

**Net operating losses**

Net operating losses are not permitted to be carried forward and applied against future years. However, Congress is considering amending the law to permit carrying forward of losses for three years.

Losses may not be carried back in Paraguay. However, a taxpayer may modify one’s tax returns at a later date.

**Payments to foreign affiliates**

There are no limits on the deductibility of payments to foreign affiliates, including management fees, royalties, research and development (R&D), and general and administrative expenses, provided that the taxpayer maintains corresponding legal documentation that includes the country of origin and applies appropriate WHT. See the Withholding taxes section for the applicable WHT rates.

---

**Group taxation**

Group taxation is not permitted in Paraguay.

**Transfer pricing**

There are no transfer pricing rules in current Paraguayan legislation requiring compliance with certain conditions or minimum prices for the purpose of fiscal deductions, except for the following regulation applicable to importations and exportations:

“In the case of importers, it will be assumed that, in the absence of proof to the contrary, the cost of goods introduced to the country may not exceed the wholesalers price ruling in their place of origin plus freight and insurance costs and expenses to Paraguayan territory, and therefore, the excess of such value will constitute taxable income for the importers.

In the case of exporters, where a price has been fixed or the price declared is lower than the wholesalers price in Paraguay plus the freight and insurance costs and expenses to point of destination, this latter aggregate value shall be taken as the basis for determining the exporter's taxable income.

To this effect, the nature of the goods and the transaction mode adopted will be taken into account.” (Section 16 of Law No. 2421/04).

**Thin capitalisation**

There are no thin capitalisation rules in Paraguay.
**Tax credits and incentives**

**Foreign tax credit**
Foreign tax credits are not applied to local tax payments in Paraguay.

**Investment incentives**
The framework of economic investment was established in the Law No. 60/90, which offers some special tax exemption benefits to foreign and local investors.

The benefits of the Law No. 60/90 may be available for the following investments:

- Cash, financing, provision of credit, or other financial instruments, under the conditions established by the administration of the President of Paraguay and the corresponding ministries.
- Capital goods, raw materials, and inputs for local industry for the fabrication of capital goods.
- Transfers of licensing rights with respect to trademarks, industrial processes and models, and other technologies.
- Technically specialised services.
- Capital leases.
- Other forms that the administration of the President of Paraguay and the corresponding ministries determined by law.

The investment incentives included in Law 60/90 that remain enacted after tax law modification (Law No. 2421/04) are the exemptions from certain fiscal, municipal, and customs duties taxes.

When the amount of financing for an investment is equal or greater than USD 5 million, it will be exempt from WHTs on interest, commissions, and capital that have to be paid to financial or banking entities abroad. This benefit is for five years.

If the investment is at least USD 5 million and the project is approved by the tax authorities, the dividends and profits derived from the project are tax exempt. The mentioned exemption is granted for five years and may be extended to ten years.

**Maquila tax exemptions (Law No. 1064/97)**
Under the ‘Maquila’ Regime, investors may import goods or products to be assembled, repaired, improved, worked on, or processed with the purpose of exporting such goods or products, prior to the addition of value or the ‘Paraguayan component’. This regime is subject to a special tax treatment: a 1% tax rate applies to the value added within Paraguayan territory.

Innovative regulations have recently been introduced, allowing for virtual commerce between maquila factories, which improve the utilisation of goods imported under the temporary regime (called ‘virtual maquila’).

This regime also establishes the service maquila, which enjoys the same tax benefits, and its main purpose is to provide support to entities abroad (currently, there are call centres that benefit from this regime).

Paraguayan legislation does not impose restrictions in terms of the types of products and services that the maquila industry may comprise. The maquila activity’s national policy is regulated and supervised by the National Council of the Maquila Industry for...
Paraguay

Export (CNIME). Both individuals and legal entities domiciled in Paraguay, whether national or foreign, may take advantage of these regulatory benefits.

This industry has been receiving broad government support, given that it is considered an element of social interest in the strive to combat unemployment. There are currently over 40 maquila companies in the country.

Duty and tax-free zones (called ‘zona franca’ Law No. 523/95)
Duty and tax-free zones, where all types of commercial, industrial, and service activities may be carried out, constitute a relevant incentive for business.

The legal framework governing such zones offer several advantages in terms of tax exemptions, as well as a special tax regime with an income tax rate of 0.5%.

The main purpose of free trade zones is the development of activities in connection with foreign markets; however, operations within the country are also allowed.

Act 523/95, ‘which authorises and establishes the Free Trade Zone Regime’, and its regulatory decree 15.554/96, ‘which regulates the Free Trade Zone Act’, among others, establish the guidelines related to activities within free trade zones.

The aforementioned regulation establishes two main entities, the ‘concessionaire’, responsible for providing the necessary infrastructure for freight operational management, and the user, responsible for carrying out the commercial, industrial, or service activity. The regulation therefore establishes the administrative measures that enable operations in free trade zones and its supervision, control, and development.

There are currently two free trade zones located in the Alto Paraná region (northeastern region, in close proximity to the border with Brazil and Argentina), in which national and international companies actively operate.

Other incentives
- Exports are exempt from certain customs duties and from VAT.
- A Capital Market Law (No. 1284/98) established incentives for issuance of bonds abroad.
- Under the Export Incentives Regime, exports are VAT exempt. The legislation recognises a tax credit for pre-production stages. A Temporary or Provisional Admission Regime is also in place, which exempts imports from import tariffs and VAT.

Withholding taxes
In accordance with the regulations in force, foreign entities may be subject to income tax withholdings in respect of services rendered to them deemed to be of Paraguayan source, including payments made by the branch or affiliate of a foreign home office.

Business income tax regulations consider that branches, agencies, or PEs of foreign entities are taxpayers, independently from the foreign home office status.

The withholdings are to be made from the payments made by local entities for such services.
WHT on payments made by a domestic corporation

Tax treaty with Chile:
- Non-resident corporations: 10, 10, 10/15 (%)
- Non-resident individuals: 10, 10

Notes
1. Local entities are required to pay an additional 5% WHT when the income or dividend is distributed.
2. The WHT on interest is based on 100% of the amount paid when remitted to the head office abroad. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The tax rate is 30%. For financing loans, the WHT effective tax rate is 6%.
3. In the case of financing operations (loans), VAT is withheld at a rate of 4.76%. VAT is withheld on royalties and other services provided for non-resident corporations or individuals at a rate of 9.09%.
4. The WHT on royalties is based on 100% of the amount paid when remitted to the head office abroad. The tax rate is 30%. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The tax rate is 15%.
5. The WHT on fees is based on 100% of the amount paid when remitted to the head office abroad. The tax rate is 30%. In other cases, it is based on 50% of the amount paid. The tax rate is 15%.
6. Fees for technical assistance services rendered by non-resident corporations are subject to WHT at a rate of 15% on the amount paid. In case the mentioned services are rendered by the head offices or direct shareholder, the tax rate is increased to 30%. Fees for personal services rendered by non-resident individuals are subject to PIT. The withholding of PIT has to be made on 50% of the amount paid. The tax rate is 20% (effective tax rate of 10%).
7. In case of a loan to Chile, the WHT on the interest is 15% if the loan is provided by a bank or insurance company. On the other hand, if the loan is provided by an associated company or head office, the tax rate is 10%. Regarding VAT WHT, see Note 3.

Tax administration

Taxable period
For the CIT, AIT, and LTIT, the taxable period is the calendar year.

Tax returns
Income tax returns are submitted on a fiscal-year basis as a self-assessment and must be filed by the fourth month following the end of the fiscal year.

Payment of tax
Income tax is due on varying days in the fourth month following the end of the fiscal year, depending on the taxpayer ID number, according to a calendar established by the Treasury Ministry. Four equal advance payments are made throughout the year, calculated based on 100% of the tax due in the previous year. Payments must be made in May, July, September, and November of each year after the due date for filing the income tax return, according to the calendar established by the tax authorities.

Penalties
Tax legislation provides the following penalties:
• Late payment of income tax is penalised by a fine varying from 4% to a maximum of 14%, plus interest at 0.116 per day.
• Tax fraud is punished by a charge of from one to three times the value of the tax in default.
• Tax law infringements are penalised through fines varying from the equivalent of USD 10 to USD 250.
• Omission of payment incurs a fine of 50% of the tax pending.

**Tax audit process**
The auditing process is performed by the tax authorities when there is a certainty or suspicion of tax evasion. Additionally, the taxpayer may be audited according to a draw process that is made by the tax authority.

The tax law also establishes an obligatory tax audit, which has to be made by external auditors, when the taxpayer obtains PYG 6 billion of gross income during the year. An annual audit report on tax compliance rules is presented to and reviewed by the tax authorities. When a tax issue is identified, the tax authority may apply a penalty to the taxpayer.

**Statute of limitations**
The tax authority may audit the last five fiscal years.

---

**Significant developments**

The following changes to the Peruvian tax legislation were incorporated during the past year.

**General Anti-avoidance Rule (GAAR)**  
The most significant change to the Tax Code has been the introduction of the GAAR (Rule XVI of the Tax Code). The scope and application of the aforementioned rule are still unclear.

Rule XVI allows the Peruvian tax authority (Superintendencia Nacional de Administración Tributaria or SUNAT) to consider the acts, situations, and economic activities performed, established, or desired by the taxpayers in order to determine the real nature of the taxable event. To this extent, Rule XVI establishes that when tax evasion is detected, the SUNAT is entitled to collect the tax debt and fines; reduce the amount of balances due, net operating losses (NOLs), or tax credits; or eliminate any tax advantage, without prejudice, to recover any amount that was wrongfully reimbursed.

While interpreting the tax legislation, substance should be selected over a legal form. The fact that a taxpayer's transactions are legal does not imply that they are acceptable with reference to the underlying meaning embedded in the tax rules. Thus, where there is no business purpose except to obtain a tax benefit, the SUNAT should challenge such transactions as artificial and apply the corresponding tax rules.

**Controlled foreign company (CFC) rules**

As of 1 January 2013, CFC rules entered into force in order to avoid the deferral of income tax on passive income obtained from CFCs (defined as at least 50% of ownership, voting rights or gains) by domiciled taxpayers, provided such companies are situated in tax havens or jurisdictions with nil or reduced tax rates.

**Rejection of deferral applicable to construction regime**

The tax deferral regime to which construction companies were subject has been rejected. The regime allowed construction companies that executed long term contracts that lasted longer than one fiscal year to defer the recognition of income under those long-term contracts until the project ended, when these contracts were executed within a term no longer than three years. As such, the corresponding tax would be applied to the profits in the fiscal year in which the contracts were concluded.

Now, the aforementioned deferral possibility will not apply for construction projects beginning as of 1 January 2013. These activities will be subject to an accrual or
Peru

perception regime in order to assess and determine their taxable income on a yearly basis.

The Income Tax Regulation states that for purposes of the payments, the companies that had adopted the deferral method before its repeal will consider as net amounts the income received in each month for the construction progress.

In case the works of construction have a term longer than three years, the monthly advance payment should be made using the method indicated above.

The modification of the article includes a definition of gross income.

Sale of movable property located in Peru
Before the changes included in the Law, which are effective as of 1 January 2013, non-domiciled parties were taxed only on the income generated by movable property located in Peru, but no Peruvian-source income had to be recognised on the sale of the aforementioned movables goods or rights.

After the changes, non-domiciled parties will also generate Peruvian-source taxable income on the sale of movable property located in Peru or rights that are economically used within Peru. Previously, this income was not taxed for foreign entities unless they developed a business activity in Peru.

Taxes on corporate income
Companies incorporated in Peru are considered resident in Peru for tax purposes and thus subject to a corporate income tax rate of 30% on worldwide net income.

For purpose of determining taxable income, such entities are allowed to deduct expenses to the extent that they are necessary to generate or maintain the source of taxable income. Requirements, limitations, and/or caps may apply to the deduction of certain expenses (thin capitalisation rules), bad debt provisions, salaries, travel expenses, gifts, donations, penalties, etc.

The Peruvian Income Tax Law (PITL) allows crediting for various payments against income tax, including income taxes paid in advance, amounts paid for certain other taxes, and income taxes paid in foreign tax jurisdictions, provided that the foreign country's tax rate is not higher than the Peruvian corporate tax rate and the taxable income qualifies as foreign-source income for Peruvian income tax purposes.

Dividends and any other type of profit distributions are taxed at a 4.1% rate, upon distribution, when the distribution is made to a non-resident entity (either individuals or legal entities) and, when the distribution is agreed to by the shareholders, if this happens first, to resident individuals (resident legal entities are not subject to 4.1% withholding tax [WHT] over dividends received from other Peruvian corporations). The entity distributing dividends or profits is liable for WHT at a rate of 4.1%.

Nevertheless, enterprises are subject to an additional tax rate of 4.1% on every amount or payment in kind that, as result of a tax audit, is construed as taxable income to the extent that it is an indirect distribution of such income that escapes further control from the tax administration, including income that has not been declared.
On the other hand, companies incorporated abroad are considered as non-domiciled in Peru for tax purposes and thus subject, in most cases, to an income tax rate of 30% over the gross Peruvian-source income. As a general rule, foreign companies are not allowed to deduct expenses and are taxed on gross income.

**Local income taxes**

There are no local or provincial taxes on income in Peru.

---

**Corporate residence**

For income tax purposes, the following entities, among others, are considered as resident entities in Peru:

- Corporations duly incorporated in Peru.
- Branches, agencies, and permanent establishments (PEs) in Peru of non-resident individuals or entities.
- Partnerships and limited liability companies.

**Permanent establishment (PE)**

According to the PITL, a foreign company is considered to have a PE (i) if it has a fixed place of business through which it carries out business activities in whole or in part; (ii) if an individual has a power of attorney of a foreign entity and uses it on a regular basis to sign agreements on behalf of the foreign entity; and (iii) if the person with powers of attorney of the foreign entity keeps in Peru inventory and/or goods to be negotiated in Peru on behalf of the foreign entity.

The consequence of a PE presence in Peru is that the PE will be obligated to comply with all the formal and substantial tax obligations of any domiciled taxpayer, meaning that it will have to be registered before with the tax administration (get a tax identification [RUC] number), keep full accounting books, file monthly and yearly tax returns, withhold taxes, allocate a reasonable income for its Peruvian source activities, etc. If a PE presence is determined, then the tax contingency will have to be quantified by calculating the taxes, fines, and interest accrued as from the moment in which the PE presence can be deemed, except for the period barred by statute of limitations.

---

**Other taxes**

**Value-added tax (VAT)**

The general rate of VAT is 18% and is applicable to the following operations:

- Sale of goods within the country.
- Rendering or first use of services within the country.
- Construction contracts.
- The first sale of real estate made by construction firms.
- Import of goods.

For all transactions, the vendor is subject to VAT, except in the case of importation of goods or services rendered abroad, but economically used within Peru, for which VAT is self-assessed by the importers and users, respectively.
The VAT law follows a debit/credit system, and input VAT may be offset by output VAT. Should excess input VAT be obtained in a particular month, it shall offset output VAT obtained during the following months, until it is exhausted.

The export of movable goods (including the sale of goods in the international zone of ports and airports) is not subject to VAT, nor is the exportation of certain services. Thus, VAT paid upon the acquisition of goods, performance of services, construction agreements, and the importation of goods related to exported goods or services creates a positive VAT export balance.

The positive balance may offset output VAT, income tax, or any other outstanding tax debt in favour of the central government. If the positive balance is not completely offset, as the amount of the aforementioned tax obligations is insufficient, the taxpayer may apply for a refund.

**Tax Obligatory Payment System (SPOT)**
The SPOT is applicable to the sale of certain goods and the rendering of services subject to Peruvian VAT. The main purpose of the SPOT is to generate funds to enable the payment of tax obligations by the VAT payer.

According to the SPOT, all the sales of goods and services listed in the appendices of the Resolution that are levied with VAT will be subject to withholding, applying the rates established for each kind of good and service.

Any service subject to VAT, except expressly excluded, will be subject to the SPOT with a withholding rate of 9%.

The purchaser or service recipient must withhold a percentage of the transaction price and deposit such amount within the seller’s or service provider’s State Bank (*Banco de la Nación*) account. It is important to note that the right of the purchaser or user of the service to offset input VAT related to such goods and services may be exercised only after the deposit with the State Bank has been executed.

The amount deposited is applied towards the payment of the seller’s or service provider’s Peruvian tax obligations (not just VAT). If after four consecutive months such amount is not utilised, the seller or service provider may apply for a refund or use the amount to pay withholding applicable to purchasers or services recipients.

**Customs duties**
Customs duties applied to imports are linked to their classification under the Custom Tariff, given by NANDINA subheading that is determined by the information provided by the importer (through the invoice and other complementary information), as well as the physical recognition by the Customs Officer at the time of customs clearance.

As such, the taxes required are:

- *Ad valorem* custom duty (rates of 0%, 6%, and 11%, as the case may be).
- VAT (16%).
- Municipal promotion tax (2%).

Other taxes that may apply, depending on the equipment, include the following:

- Selective consumption tax.
- Specific duties.
- Antidumping and compensatory.
- VAT perception.

There are no restrictions on imports and exports, although there is a limited list of products that cannot be imported or exported. Exports are not subject to any taxes. The importation of most capital goods is subject to the 0% rate.

The government is empowered to grant duty exemptions under certain circumstances and also to temporarily suspend the assessment of duties on certain products. Customs duties are imposed on an *ad valorem* basis (the carriage, insurance, and freight [CIF] value of the imported goods). Goods are classified for customs duty purposes under the Harmonized System.

Pursuant to the drawback regimen, an exporter may apply for a refund of the custom duties that it paid upon: (i) the importation of goods contained in the exported goods or (ii) the importation of goods that are consumed during the production of the exported goods.

The refund rate is currently 5% of the freight on board (FOB) value of the exported good, provided such amount does not exceed 50% of the good’s production cost. The refund will proceed for each type of good exported by the exporter and for the first 20 million United States dollars (USD) worth of goods exported per year (the excess will not be subject to refund).

For such purpose, the beneficiaries of the drawback regime are the manufacturer/exporter companies whose cost of production has been increased by the custom duties paid upon the importation of: (i) raw material, (ii) intermediate products, or (iii) pieces incorporated or consumed in the production of the exported good. Note that fuel or any other energy source used to generate heat or energy for purposes of obtaining the exported good is not considered as raw material.

**Excise tax**

The sale of specific goods, including fuel, cigarettes, beer, liquor, and vehicles, is subject to excise tax.

Excise tax rates, and the manner on which the tax is applied, depend on the type of goods or services.

**Real estate property tax**

The real estate property tax is levied on the value of urban and rural real estate property. Individuals and legal entities owning the referred real estate properties are considered taxpayers for such purposes. The taxable base is calculated taking into account the value of all the properties owned in a specific local district, as reflected in the internal records of the corresponding local authorities.

The tax is calculated and paid on an annual basis applying the following progressive cumulative scale:

<table>
<thead>
<tr>
<th>Real estate’s value</th>
<th>Real estate property tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 15 tax units</td>
<td>0.2</td>

Peru

Real estate transfer tax
The real estate transfer tax is levied on all transfers of urban and rural real estate property. The taxpayer is the purchaser of the property. The taxable base is equivalent to the consideration agreed upon by the parties to the transaction, provided it is higher than the property's value (in the relevant year for purposes of the real estate property tax) as reflected in the internal records of the corresponding local authorities.

The tax rate is 3% and must be borne exclusively by the buyer, regardless of whatever the parties agree. The first ten tax units (approximately USD 13,000) of the taxable base are exempt from this tax.

Stamp taxes
There are no stamp taxes in Peru.

Financial transactions tax (FTT)
FTT is applied at a rate of 0.005% on all debits and/or credits on bank accounts held by the taxpayers.

The following operations, among others, are exempted from the FTT:

- Operations made between accounts of the same holder.
- Credits to bank accounts for payment of salaries.
- Credits and debits to bank accounts of diplomatic representations and international organisations recognised in Peru.

Payments of FTT are deductible as expenses for income tax purposes.

Temporary net assets tax (TNAT)
Companies subject to income tax are obligated to pay TNAT, except for companies that are in preoperative stages or that commenced business on 1 January of the fiscal year in which TNAT must be paid.

The taxable basis is the value of the assets set forth in the taxpayer’s balance sheet as of 31 December of the year prior to that of the tax payment, adjusted for deductions and amortisations accepted by the Peruvian law.

The amount of TNAT is determined by applying the following rates on the taxable basis:

- Up to 1 million Peruvian nuevo soles (PEN): 0%.
- Excess of PEN 1 million: 0.4%.

The amount paid for TNAT may be credited against the taxpayer’s income tax. If not totally utilised, the remaining TNAT may be refunded by the tax administration.

Special taxation on mining industry
A new tax regime for the mining industry was recently introduced. The new mining royalty (NMR) regime, special mining tax (SMT), and special mining contribution (SMC) are economic considerations paid to the Peruvian government for the exploitation of mineral resources. The NMR applies to metallic and non-metallic mineral resources, while the SMT and SMC only apply to metallic mineral resources.

The SMC is only applicable to mining companies with projects with tax stability agreements in force. Such companies have voluntarily entered into agreements with
the Peruvian government with the purpose of paying this contribution. This special contribution is determined for each stability agreement entered into.

In all three cases, the tax basis is the operating profit of the company, and the special rates and considerations are explained below:

<table>

</tbody>
</table>

The amounts paid will be deductible for income tax purposes as long as they are actually paid during the fiscal year.

**Payroll taxes**

**Health contributions**
Employers shall make monthly health contribution payments equal to 9% of the compensation paid to employees.

Employees shall be affiliated either to the National Health System (EsSalud) or the Private Health System (EPS), according to what option they choose. In the latter, a portion (25%) of the amount paid to the EPS may be used by the employer as a credit to be offset against EsSalud contributions.

**Pension funds contributions**
Employers shall apply monthly withholdings for pension funds contributions equal to 13% of the remuneration received by the employee in cases where the employee is affiliated with the National Pension System (ONP) or approximately 12.4% in cases where the employee is affiliated with the Private Pension System (AFP). In this last case, 10% corresponds to the personal pension account and almost 2.4% to insurance and commissions for managing the fund.

Should a foreign individual’s labour contract end and the individual leave Peru, their pension funds deposited in AFP may be wired to an account of the employee in a foreign bank (the aforementioned 10%).

**Branch income**
Branches, agencies, and PEs of non-resident companies or entities incorporated in Peru are subject to income tax at a 30% rate on their Peruvian-source income.

For tax purposes, branches or subsidiaries are subject to the same obligations applicable to all companies in Peru, including income tax, VAT, FTT, filing of the corresponding income tax and VAT returns, issuance of invoices, etc.
Nevertheless, the following important differences between subsidiaries and branches resident in Peru must be taken into account:

- Branches are subject to income tax only for their Peruvian-source income, while subsidiaries are subject to income tax on their global-source income (both Peruvian and foreign income).
- For branches, the 4.1% WHT on profit for distribution is applied on the date the annual income tax return is submitted. Subsidiaries are subject to the 4.1% WHT on the earlier of the date in which the corresponding shareholders agreement took place or the date when the beneficiary receives the dividends. For non-domiciled shareholders, the withholding will be applied whenever the dividend is actually paid, without taking into account the moment in which the shareholder agreement is executed.

**Income determination**

**Inventory valuation**
The first in first out (FIFO), average, specific-identification, retail, and normal or base-stock methods are allowed for inventory valuation. The last in first out (LIFO) method is not permitted.

**Capital gains**
Capital gains are taxed as ordinary income. However, capital gains derived from the sale of stock issued by a Peruvian company through the Lima Stock Exchange are taxed at a 5% rate.

**Dividend income**
Cash dividends distributed to resident corporations are not subject to any taxes.

**Interest income**
The PITL establishes that the WHT rate on interest arising from loans is 4.99%, provided the following requirements are met:

- In case of cash loans, the entrance into Peru of the foreign currency must be duly accredited.
- The credit must not accrue an effective interest that surpasses that of the London Interbank Offered Rate (LIBOR) plus 7 points (for loans proceeding from Europe or the United States).
- The loan must be destined to finance business or taxable activities.
- The parties involved must not qualify as related parties for tax purposes.

If any of the above mentioned conditions are not met, or to the extent they are not fulfilled, a withholding rate of 30% over the gross interest will be applied. A 30% withholding rate will also apply whenever the debtor and creditor are related parties or when the participation of the creditor only aims to conceal a transaction between related parties.

**Foreign income**
A Peruvian corporation is taxed on foreign-source income. Foreign-source income is recognised upon accrual. No tax deferral is allowed on this type of income (see **Controlled foreign companies in the Group taxation section**). Double taxation may be avoided by means of foreign tax credits.
Deductions

Acceptable payment methods
Obligations that are fulfilled through cash payments exceeding PEN 3,500 must be made via bank account deposits, wire transfers, payment orders, credit cards, non-negotiable cheques, or other means of payment provided by entities of the Peruvian financial system. Failure to use one of these payment methods when such an obligation exists will result in the disallowance of deductions for any expenses or costs for income tax purposes and the disallowance of a credit for the corresponding VAT.

Expenses derived from transactions entered into with entities resident in tax havens
Certain expenses are not tax-deductible, including expenses incurred with respect to transactions with (i) entities resident in tax havens on the list attached to the PITL regulations, (ii) PEs located in tax havens, or (iii) entities that generate revenues or income through tax havens.

Nonetheless, expenses incurred from the following transactions are excluded from the above mentioned limitations, provided the consideration paid falls within market value:

- Interest on loans.
- Insurance premiums.
- Leases of aircraft or ships.
- Maritime freight.
- Fees for passing through the Panama Canal.

Depreciation
Assets may be depreciated for tax purposes via the straight-line method, capped at the following rates, but without exceeding the amount of the financial depreciation:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cattle (both labour and reproduction) and fishing nets</td>
<td>25</td>
</tr>
<tr>
<td>Vehicles (except trains) and any kind of ovens</td>
<td>20</td>
</tr>
<tr>
<td>Machines and equipment used for mining, oil and construction activities, excluding furniture, household, and office goods</td>
<td>20</td>
</tr>
<tr>
<td>Equipment for data processing</td>
<td>25</td>
</tr>
<tr>
<td>Machines and equipment acquired as of 1 January 1991</td>
<td>10</td>
</tr>
<tr>
<td>Other fixed assets</td>
<td>10</td>
</tr>
</tbody>
</table>

Buildings must be subject to a flat 5% depreciation rate, regardless of the financial depreciation.

Amortisation of intangibles assets
The amortisation of property rights, trademarks, patents, and manufacturing procedures, as well as other similar intangible assets, are not deductible for income tax purposes. However, the price paid for intangible assets of a limited duration, at the taxpayer’s choice, may be considered as an expense and applied to the results in a single year or amortised proportionally in a ten-year term.

The Peruvian tax administration, prior to an opinion from the corresponding technical organisms, is permitted to determine the real value of those intangible assets for tax purposes, when the price does not reflects the real one.
Organisational and start-up expenses
Organisation expenses, pre-operating expenses (including initial operations and further expansion of operations), and interest accrued during the pre-operating period may be expensed in the first period of operation or amortised using the straight-line method over a maximum of ten years. However, once a company has elected to recover start-up costs via the straight-line method, it may revoke such election only upon receiving approval of the tax authorities.

Interest expenses
In general terms, interest on loans and related expenses are deductible, provided they are related to the acquisition of goods or services incurred, or to be incurred, in order to obtain or produce taxable income or to maintain the source of such income.

In the case of loans entered into between related parties, the amount of interest to be deducted is limited to interest from indebtedness not exceeding three times the net equity of the debtor as of the end of the previous fiscal year (see Thin capitalisation in the Group taxation section).

Bad debts
Write-offs of bad debts and equitable provisions are deductible, provided that the accounts to which they belong are determined. For the provisions of bad debts, it is necessary that:

- there is a debt due and the taxpayer can provide evidence of the financial difficulties of the debtor that could foresee a risk in the collection of the debt and
- the provision is registered separately in the inventory and balance book at the fiscal year closing. In this sense, generic bad debt provision will not be deductible in the assessment of the net taxable income, nor will bad debts whose terms have not yet elapsed.

Bear in mind that the following debts are not considered bad debts:

- Debts incurred between related parties.
- Debts guaranteed by banks or financial companies by means of rights over real property, money deposits, or purchase-sale agreements with reservation of right of legal ownership.
- Debts that have been subject to renewal or express extension.

Charitable contributions
Donations made to entities of the public sector, except companies, and to non-profit associations with certain purposes are deductible, provided that the receiver of the donation is duly qualified, through ministerial resolution, issued by the Ministry of Economy and Finance.

The deduction will be limited to 10% of the net income of the donor and only during the fiscal year in which it is granted (carryforward of the donation is disallowed). This means that if the donor does not obtain taxable income in the fiscal year in which the donation is made, no deduction will be available.

Profit sharing
Entities with more than 20 employees, provided they obtain taxable income during the fiscal year, must distribute a percentage (5%, 8%, or 10% depending on the industry) of their profits (the basis is the tax profit of the fiscal year) among their employees. The
amount of distribution for each employee depends on the effective working days during the year and annual remuneration.

**Employee’s retributions and health insurance premiums**  
Employee’s retributions paid during a fiscal year may be deducted in such year, provided the payments are made by the employer before the term to file its annual income tax return expires. Likewise, health insurance premiums for employees, their spouses, and children are deductible.

**Vehicle expenses deductions**  
Vehicle expenses may be deducted, provided the vehicles are essential to a company’s business activities and are continually used for such purpose. There is a limitation on the tax deductibility of car expenses used for administrative or representation purposes, depending on the amount of income generated by the company. The number of company cars assigned to directors, managers, and representatives of a company may not exceed five under any circumstances.

**Fines and penalties**  
Fines and penalties are not deductible for income tax purposes.

**Taxes**  
Other taxes assessable on properties and activities generating taxable income are deductible for income tax purposes.

**Net operating losses**  
Tax losses may be offset according to either of the following systems:

- Against net income generated within the following four fiscal years after the year in which the loss is incurred. Any losses that are not offset within such period may not be carried forward to any future year.
- Against 50% of the net income generated in the following fiscal years after the year in which the loss was generated. Under this system, there is no time limitation for carrying forward the losses.

After choosing one of the aforementioned systems, the taxpayers may not change the system until the accumulated tax losses from prior fiscal years are exhausted. Losses may not be carried back to years prior to the year in which the loss is generated.

**Payments to foreign affiliates**  
Payment of royalties to non-resident affiliates is permitted and deductible from gross income.

**Group taxation**  
Group taxation is not permitted in Peru.

**Transfer pricing**  
The rules related to market value and transfer pricing establish that, in any kind of transaction, the value assigned to the goods and services must be the market value for tax purposes. If such value differs from the market value, either by overvaluation or sub-valuation, the tax administration will proceed to adjust it for both the purchaser and the seller, even when one of them is a non-domiciled entity, provided that the value agreed to results in a lower tax than the one that would have applied if transfer pricing.
rules had been applied. The adjustment will be imputed in the taxable period in which the operations with related parties were performed.

In case of transactions between related parties or those entered with tax havens, the market value will be equivalent to the value agreed with independent parties in similar transactions, being mandatory to support such value with a transfer pricing study.

The law states that transfer pricing rules will not apply for VAT purposes.

**Tax price adjustments**

Adjustments to prices are only required whenever the price paid generates a higher tax deduction or a lower income tax in Peru; consequently, the existence of a tax prejudice will be required for an adjustment to be requested.

Adjustments are performed individually (on each operation) and not in an overall or global manner.

The adjustment of the value assigned by the SUNAT or the taxpayer will be effective for both the transferor and the purchaser or transferee, without any constraints. Previously, such bilateral adjustment was conditioned to both parties being domiciled or incorporated in Peru, a condition that has now been rejected. In the case of non-domiciled parties, the bilateral adjustment will only proceed on transactions that could trigger taxable income in Peru and/or deductions for determining the income tax in Peru.

The adjustments are attributed to the corresponding tax period, according to the attribution rules depicted in the PITL (accrual regime for corporate taxpayers). However, when, under such rules, the adjustment cannot be attributed to a particular period, the adjustment will be allocated among all tax periods where income or expense has been allocated, in proportion.

Operations where no consideration has been paid are subject to transfer pricing rules. In this kind of transaction, the adjustment shall be allocated to the period or periods in which revenue would have accrued if consideration had been paid and the income was to be acknowledged by a domiciled taxpayer. On the other hand, if the income was to be recognised by a non-domiciled taxpayer, it would be attributed to the period or periods where the expenses accrued, even if it was a non-deductible expense.

**Commodities**

A new methodology has been added for determining prices in the sales of internationally traded commodities to tax havens or intermediaries.

In this methodology, it is required to determine the price of the specified operation based on the international price without taking into account the particularities of each case. Such method will not be applied as long as the taxpayer has entered into futures contracts for hedging purposes in respect of imported or exported goods, or irrefutably accredit that the international intermediary has real presence in the territory of residence and their core business does not consist of obtaining passive incomes, or brokering in the sale of goods to members of the same economic group.

**Thin capitalisation**

In the case of loans entered into between related parties, the amount of interest to be deducted is limited to interest from indebtedness not exceeding three times the entities net equity as of the end of the previous fiscal year. In this connection, even though
Peruvian corporate law has no requirements as to a minimum amount of share capital to incorporate a legal entity, it should be noted that having a small share capital may jeopardise the deductibility of interest payable for loans granted by related entities since, in case of newly incorporated entities, the share capital (equity) to be considered for calculating the thin capitalisation limit is the original one (this is, the one with which the entity was incorporated). In any case, this will only trigger a deductibility problem for the fiscal year in which the entity is incorporated, since for the following fiscal year the thin capitalisation rule will be calculated on the basis of the net equity at the end of the prior fiscal year (which, at that moment, may have already been increased through new contributions or capitalisations).

**Controlled foreign companies (CFCs)**

As of 1 January 2013, CFC rules entered into force in order to avoid the deferral of income tax on passive income obtained from CFCs (defined as at least 50% of ownership, voting rights or gains) by domiciled taxpayers, provided such companies are situated in tax havens or jurisdictions with nil or reduced tax rates.

**Taxation of indirect disposal of shares in Peruvian entities**

The indirect transfer of Peruvian shares of a foreign entity that, in turn, own (directly or indirectly through other entities) shares of a Peruvian entity is levied with income tax.

---

**Tax credits and incentives**

**Foreign tax credit**

Pursuant to the PITL, taxpayers may deduct the foreign income taxes paid due to their foreign-source income levied by the PITL, provided that it doesn’t exceed the amount that results from applying the average rate of the taxpayer to the incomes obtained abroad, or the tax paid abroad. The amount that, for any circumstance, is not used in the corresponding fiscal year cannot be set off (or compensated) in others fiscal years or be refunded.

Also, the following will be taken into account:

- Tax credit will be granted for the entire tax paid abroad that falls upon income taxed by the PITL.
- Taxes paid abroad, whatever its denomination, shall bear the characteristics of income taxes.
- Tax credit will only be granted when the payment of the foreign income tax is supported by reliable documentation.

**Early recovery of VAT**

Companies in a preoperative stage with large projects in process may apply for early recovery of VAT prior to commencing operations. An investment agreement with the government (the Ministry of its sector) is required.

**Stability agreement**

Investors may enter into stability agreements with the government, either under the general regime or specific regimes (i.e. mining and petroleum).

Under the general regime, investors may enter into Juridical Stability Agreements that guarantee the following advantages for a ten-year period:
Peru

- Stability of the income tax regime in force at the time the agreement is entered into with respect to dividends and profit distribution.
- Stability of the Peruvian government monetary policy, according to which there is a complete absence of exchange controls, foreign currency can be freely acquired or sold at whatever exchange rate the market offers, and funds can be remitted abroad without any previous authorisation.
- Right of non-discrimination between foreign and local investors.

Under the mining regime, local mining companies may enter into stability agreements of guarantees and investment promotion measures that guarantee the following for ten or 15 years:

- Stability of the overall tax regime.
- Stability of the overall administrative regime.
- Free disposition of funds (foreign currency) arising from export operations.
- No exchange rate discrimination.
- Free trade of products.
- Stability of special regimes for tax refunds, temporary importation, etc.

Oil companies may enter into stability agreements that guarantee the following for the term of the contract:

- Stability of the overall tax regime.
- Free disposition of funds (foreign currency) arising from export operations.
- Free convertibility of its funds.
- Free trade of products.

**Investment promotion in the Amazon**

Certain tax benefits with regard to VAT and income tax have been established for taxpayers located in the area designated by the law as the ‘Amazon’ and that are engaged in the following activities:

- Agriculture and livestock enterprises.
- Aquaculture.
- Fishing.
- Tourism.
- Manufacturing activities linked to the processing, transformation, and commercialisation of primary products originating in the activities listed above and in forest transformation, provided these products are produced in the area.

**Special zones - Centres of Export, Transformation, Industry, Commercialisation, and Services (CETICOS)**

CETICOS are geographical areas duly delimited with custom primary zone status and special treatment, destined to generate development poles through industrial, maquila, assembling, or storage activities. CETICOS are located in Paita, Ilo, and Matarani cities.

Agribusiness and agro-exporting activities may be performed within a CETICOS. Agribusiness activity is primarily the transformation of agro-farming products produced in the country. Such transformation must be carried out at CETICOS.

Companies engaged in industrial, maquila, or assembling activities, established or set up in the CETICOS, until 31 December 2022, are exempt from income tax, VAT, excise tax, municipal promotion tax, as well as from any other taxes, fees, contributions levied by the Central Administration, and even taxes that require express exempt regulation.
Withholding taxes

Domestic corporations are required to withhold income tax with respect to income paid to non-resident entities at the following rates:

<table>
<thead>
<tr>
<th>Type of payment</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interest on non-related party loans, provided certain requirements are fulfilled</td>
<td>4.99</td>
</tr>
<tr>
<td>Interest on related party loans</td>
<td>30</td>
</tr>
<tr>
<td>Interest paid by Peruvian financial entities or banks to foreign beneficiaries for</td>
<td>4.99</td>
</tr>
<tr>
<td>credit lines used in Peru</td>
<td></td>
</tr>
<tr>
<td>Royalties</td>
<td>30</td>
</tr>
<tr>
<td>Digital services</td>

<td>Other income</td>
<td>30</td>
</tr>
<tr>
<td>Sale of securities within Peru</td>
<td>5</td>
</tr>
<tr>
<td>Sale of securities outside Peru</td>
<td>30</td>
</tr>
</tbody>
</table>

Note that resident taxpayers may not deduct the WHT of a third party, except in the case of loans provided by non-resident creditors, to the extent that the debtor has contractually assumed the obligation of bearing the WHT cost.

Capital gains derived from the sale of stocks issued by a Peruvian company through the Lima Stock Exchange are taxed at a 5% rate.

In the case of the services mentioned below that entail the execution of activities both in Peru and abroad, non-resident entities are subject to a 30% WHT on deemed Peru-source income determined by applying the following percentages to gross income:

<table>
<thead>
<tr>
<th>Type of payment</th>

Tax treaties

Peru has entered into treaties with Brazil, Canada, and Chile regarding double taxation on income tax under the Organisation for Economic Co-operation and Development (OECD) Model. Recently, Peru has entered into double-taxation treaties (DTTs) with Spain, Mexico, Portugal, Korea, and Thailand, but the treaties are not in force, as ratification by the Peruvian Congress is still pending. In addition, Peru, as a member of the Andean Community of Nations (ACN), which also includes Bolivia, Colombia, and Ecuador, is subject to a double-taxation standard (based in source income and not on the OECD Model).
Please see the chart below for the reduced WHT rates that apply under DTTs in force.

</table>

**Tax administration**

**Taxable period**
According to law, the fiscal year is the calendar year.

**Tax returns**
The filing deadline for the income tax return is generally the first week of April. The system is one of self-assessment, but the tax return filed with the tax authorities is subject to review.

**Payment of tax**
The due date for the final income tax payment for a year is generally the first week of April.

As of August 2012, a new estimated payment calculation system has been established, and the amount of the estimated payment will be the greater of the result of multiplying the net revenue of the month by (i) 1.5% or (ii) the applicable coefficient. The coefficient is calculated by dividing the income generated in the previous fiscal year by the income tax that was determined. For the coefficient to be applied during January and February, the income and the income tax will correspond to the fiscal year preceding the previous year.

Taxpayers who had no taxable income in the previous year, or whose coefficient for that period is less than 1.5%, will have to make their monthly payments applying the 1.5% rate.

For the estimated payments corresponding to May, taxpayers will apply to the net revenue of the month the coefficient determined based on the profit and loss (P/L) calculated as of 30 April. However, if the calculated coefficient is lower than the coefficient determined on the financial statements of the previous year, the latter will be applied. If no tax is calculated through 30 April, or in the previous year, estimated payments will be suspended.

Taxpayers who opted to apply the coefficient determined according to the P/L as of May, or who have suspended advance payments, must again recalculate the coefficient utilising the P/L generated through 31 July. In this sense, as of the estimated payments corresponding to August, taxpayers can apply to the net revenue of the month the coefficient determined based on the P/L of 31 July. If no tax is calculated through 31 July, payments will be suspended.
**Tax authority**
The SUNAT is responsible for administering all of the aforementioned taxes (income tax, VAT, etc.). Companies resident in Peru must be registered with the tax administration (Taxpayer’s Registry).

The Tax Court (Tribunal Fiscal) is a specialised administrative tribunal, which depends on the Ministry of Economy and Finance, but is otherwise autonomous regarding its specific functions. Its mission is to rule over tax controversies that may arise between the tax administration and the taxpayers, by interpreting and applying the corresponding tax legislation, issuing mandatory observance jurisprudence, and establishing homogenous criteria that continue to support the progress of the tax system.

Finally, taxpayers are entitled to file an appeal before the Judiciary (Superior Court) against resolutions issued by the Tax Court, but payment of the tax debt must be performed or guarantees must be provided.

**Tax audit process**
The tax audit performed by the SUNAT includes all the aspects of the tax and period being subject to review. The tax audit is formal and the process is fully regulated.

The SUNAT is also able to conduct partial audits of limited scope.

**Statute of limitations**
Pursuant to the Peruvian tax legislation, the SUNAT is entitled to audit taxpayers in order to assess their tax liabilities, request the payment of any due tax, and assess any applicable penalty for up to (i) four years from 1 January of the year following the date the corresponding tax return had to be filed, (ii) six years to the extent that the corresponding tax return was not filed, and (iii) ten years when the tax withheld by the taxpayer has not been paid to the SUNAT.

**Topics of focus for tax authorities**
The SUNAT mainly focuses on the following topics:

- Deduction of expenses, including cost share expenses.
- Market value of transactions between related parties.
- Peruvian source income WHT.
- Income tax advance payments.

**General Anti-avoidance Rule (GAAR)**
The GAAR (Rule XVI of the Tax Code) allows the SUNAT to consider the acts, situations, and economic activities performed, established, or desired by the taxpayers in order to determine the real nature of the taxable event. To this extent, Rule XVI establishes that when tax evasion is detected, the SUNAT is entitled to collect the tax debt and fines; reduce the amount of balances due, NOLs, or tax credits; or eliminate any tax advantage, without prejudice, to recover any amount that was wrongfully reimbursed.

While interpreting the tax legislation, substance should be selected over a legal form. The fact that a taxpayer’s transactions are legal does not imply that they are acceptable with reference to the underlying meaning embedded in the tax rules. Thus, where there is no business purpose except to obtain a tax benefit, the SUNAT should challenge such transactions as artificial and apply the corresponding tax rules.
Other issues

Corporate reorganisations

Spin-off and sale of shares
As of 1 January 2013, a corporation that acquires one or more equity blocks spun off from other corporations will generate taxable income for the difference between the market value and the tax basis of the received assets as a result of the spin-off if the partners or shareholders to whom shares are issued transfer, amortise, or cancel those shares for a later reorganisation, whenever: (i) the shares that are transferred, amortised, or cancelled represent more than 50%, in capital or in voting rights, of all the shares issued to the partners of the entity resulting from the spin-off and (ii) the transfer, amortisation, and/or cancellation of the shares is carried out by the closing of the year following the year in which the spin-off was effective.

The partners who transfer property, amortise, and/or cancel the shares will be considered as jointly liable for the income tax debt of the corporation, without prejudice, for any income tax they could generate on their sale.

Corporate reorganisation and sale of shares
As of 1 January 2013, a corporation that segregates one or more equity blocks within a simple reorganisation and cancels the shares received as a result of the reorganisation will generate taxable income for the difference between the market value of assets received due to the reorganisation or the amount received from the corporation whose shares or participations are amortised, whichever is the higher, and the tax basis of such assets, whenever: (i) the shares that are transferred, amortised, or cancelled represent more than 50%, in capital or in voting rights, of all the shares issued to the corporation due to the reorganisation; and (ii) the amortisation of the shares is carried out until the closing of the year following the year on which the reorganisation was effective.

Disallowance of NOLs on corporate reorganisations
As a result of changes included in the PITL as of 1 January 2013, any NOLs transferred as a result of a corporate reorganisation cannot be used to offset any income tax generated on the gain generated from the revaluation of assets as a result of such taxable corporate reorganisation.
Significant developments

Transfer pricing
The Secretary of Finance recently issued the Philippine Transfer Pricing Regulations, which are generally based on Organisation for Economic Co-operation and Development (OECD) principles. Under the Regulations, cross-border and domestic transactions between associated enterprises must be at arm’s length. The application of the arm’s-length principle may follow the ‘three-step’ approach prescribed by the Philippine tax authority, namely: (i) the conduct of a comparability analysis, (ii) the identification of the tested party and the appropriate transfer pricing method; and (iii) the determination of the arm’s-length results.

International carriers
In March 2013, the President signed into law Republic Act No. 10378, which amended the tax rules for international carriers. The new law expressly provides that international carriers can avail of exemption from 2.5% gross Philippine billings tax under international agreement to which the Philippines is a signatory or on the basis of reciprocity in cases where the home country of the international carrier grants income tax exemption to Philippine carriers. The law also exempts transport of passengers by international carriers from 12% value-added tax (VAT) and 3% common carriers tax.

Taxes on corporate income
A domestic corporation is subject to tax on its worldwide income. On the other hand, a foreign corporation is subject to tax only on income from Philippine sources (see the sub-sections on Resident foreign corporations and Non-resident foreign corporations below).

Domestic corporations
The following corporate income tax (CIT) rates apply to domestic corporations:

<table>
<thead>
<tr>
<th>Income</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>In general, on net income from all sources</td>
<td>30</td>
</tr>
<tr>
<td>Minimum corporate income tax (MCIT) on gross income, beginning in the fourth taxable year following the year in which business operations commence. MCIT is imposed where the CIT at 30% is less than 2% MCIT on gross income.</td>
<td>2</td>
</tr>
<tr>
<td>Proprietary educational institutions and non-profit hospitals:</td>
<td></td>
</tr>
<tr>
<td>On net taxable income if gross income from unrelated trade, business, and other activities does not exceed 50% of the total gross income from all sources</td>
<td>10</td>
</tr>
<tr>
<td>On net taxable income if gross income from unrelated activities exceeds 50% of income</td>
<td>30</td>
</tr>
</tbody>
</table>
Philippines

<table>
<thead>
<tr>
<th>Income</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-stock, non-profit educational institutions (all assets and revenues used actually, directly, and exclusively for educational purposes)</td>
<td>Exempt</td>
</tr>
</tbody>
</table>

Certain passive income from domestic sources is subject to final tax rather than ordinary income tax *(see the Income determination section)*.

**Improperly accumulated earnings tax**

An improperly accumulated earnings tax of 10% is imposed on improperly accumulated income. The tax applies to every corporation formed or used for the purpose of avoiding income tax with respect to its shareholders, or the shareholders of any other corporation, by permitting earnings and profits to accumulate instead of being divided or distributed. Exceptions are made for publicly held corporations, banks and non-bank financial intermediaries, and insurance companies.

**Local income taxes**

Local government units impose local business taxes that are generally based on the prior year’s gross sales or gross receipts. The local business tax shall not exceed 3%.

**Resident foreign corporations**

Resident foreign corporations are taxed in the same manner as domestic corporations (except on capital gains on the sale of buildings not used in business, which are taxable as ordinary income), but only on Philippine-source income.

International carriers are subject to an income tax of 2.5% on their gross Philippine billings. Where there is a tax treaty, the preferential rate provided in it applies. Exemption from this tax is also available under international agreement to which the Philippines is a signatory or on the basis of reciprocity in cases where the home country of the international carrier grants income tax exemption to Philippine carriers.

Income of offshore banking units (OBUs) and foreign currency deposit units (FCDUs) of depository banks from foreign currency transactions with non-residents, other OBUs, or FCDUs and local commercial banks (including branches of foreign banks) authorised by the Bangko Sentral ng Pilipinas (central bank) to transact business with OBUs and FCDUs are exempt from all taxes except net income specified by the Secretary of Finance upon recommendation of the Monetary Board. Interest income from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to a 10% final income tax.

**Non-resident foreign corporations**

In general, non-resident foreign corporations are taxed on gross income received from sources within the Philippines at 30%, except for reinsurance premiums, which are exempt, and on interest on foreign loans, which is taxed at 20%. Dividends from domestic corporations are subject to a final withholding tax (WHT) at the rate of 15% if the country in which the corporation is domiciled does not impose income tax on such dividends or allows a tax deemed paid credit of 15%. If the recipient is a resident of a country with which the Philippines has a tax treaty, the treaty rate applies, if lower. Otherwise, the normal corporate rates apply.

Rentals and charter fees payable to non-resident owners of vessels chartered by Philippine nationals on leases or charters approved by the Maritime Industry Authority are subject to a final tax of 4.5%. Rentals, charter fees, and other fees payable to non-
resident lessors of aircraft, machinery, and other equipment are subject to a final tax of 7.5%.

Regional or area headquarters of multinational corporations that do not earn or derive income from the Philippines, and that act as supervisory, communications, and coordinating centres for their affiliates, subsidiaries, or branches in the Asia-Pacific region and other foreign markets are not subject to CIT.

---

**Corporate residence**

A domestic corporation is a corporation that is created or organised under Philippine laws. A foreign corporation that is duly licensed to engage in trade or business within the Philippines is referred to as a 'resident foreign corporation'.

**Permanent establishment (PE)**

The business profits provision in most Philippine treaties permits the Philippines to tax only those profits attributable to a PE. While Philippine treaties adopt the United Nations (UN) Model Convention, OECD commentaries have often been cited by tax authorities to support their interpretation of treaty provisions. The main implication is that most Philippine treaties contain a rule deeming a PE to arise when services are performed in the Philippines for a specified period of time.

---

**Other taxes**

**Value-added tax (VAT)**

VAT applies to practically all sales of services and imports, as well as to sales, barter, exchange, or lease of goods or properties (tangible or intangible). The tax is equivalent to a uniform rate of 12%, based on the gross selling price of goods or properties sold, or gross receipts from the sale of services. On importation of goods, the basis of the tax is the value used by the Bureau of Customs in determining tariff and customs duties plus customs duties, excise taxes, if any, and other charges. Where the valuation used by the Bureau of Customs is by volume or quantity, the VAT basis is the landed cost plus excise taxes, if any.

Certain transactions are zero-rated or exempt from VAT. Export sales by VAT-registered persons are zero-rated.

Certain sales of services exempt from VAT, including services provided by financial intermediaries, are subject to percentage taxes based on gross sales, receipts, or income. A 3% percentage tax also applies to persons who are not VAT-registered because their annual sales or receipts do not exceed 1,919,500 Philippine pesos (PHP).

**Customs duties**

Applicable customs duties are determined based on the tariff classification of the import product. As with the rest of the Association of South East Asian Nations (ASEAN) countries, tariff classification in the Philippines is based on the ASEAN Harmonised Tariff Nomenclature (AHTN), which is patterned after the Harmonised Commodity Classification and Coding System (HS) Convention and its 2002 revisions. The latest edition, HS Code 2012, entered into force on 1 January 2012. With HS Code 2012, the overall AHTN tariff lines were reduced by 247, or an approximately 4% cut in the number of AHTN tariff lines in 2010. Although 267 classification rulings were issued to address commonly raised valuation and tariff classification, it is still advisable that
Philippines

tariff classification rulings from the Philippine Tariff Commission be secured prior to importation into the Philippines in case of uncertainty as to the correct classification of a product. Note that while the tariff classification rulings issued by the Philippine Tariff Commission do not prevent the Bureau of Customs from conducting its own verification, these rulings carry persuasive reference in support of the classification and duty rate used by an importer.

Executive Order No. 61 has been released to implement the Comprehensive Tariff Reform Program (CTRP) for 2012.

The Philippines adopts the World Trade Organization (WTO) Valuation Agreement, where the declared invoice price is used as the basis for determining customs duties.

As a protective measure, the Philippines retains higher tariff rates (20% to 50%) on sensitive agricultural products, such as grains, livestock and meat products, sugar, certain vegetables, and coffee. A few agricultural commodities are subject to minimum access volumes, but these represent less than 1% of all tariff lines.

In view of the existing free trade agreements in the region, such as the ASEAN Free Trade Area (AFTA), ASEAN-China Free Trade Area (ACFTA), ASEAN-Korea Free Trade Area (AKFTA), the ASEAN-Australia-New Zealand Free Trade Area (AANZFTA), the ASEAN-Japan Comprehensive Economic Partnership Agreement (AJCEPA), and the ASEAN-INDIA Free Trade Area, the Philippines has taken steps to progressively eliminate tariffs. Tariff reductions for the Philippines range from 10% to 35% for most products included in the Normal Track list.

**Excise taxes**

Excise tax is payable at varying rates on alcohol products, tobacco products, petroleum products, mineral products, and automobiles. Excise tax is also payable on all goods commonly or commercially known as jewellery, whether real or imitation; perfumes and toilet waters; and yachts and other vessels intended for pleasure or sport at 20% of the wholesale price or value of the importation used by the Bureau of Customs in determining tariff and custom duties.

**Documentary stamp tax (DST)**

DST is payable at varying rates on various documents and transactions. The following table contains selected examples:

<table>
<thead>
<tr>
<th>Taxable document/transaction (tax base)</th>
<th>DST rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Original issue of shares</td>
<td>PHP 1 for every PHP 200 or fractional part of par value</td>

<tr>
<td>Bank check, draft, certificate of deposit not bearing interest, other instruments</td>
<td>PHP 1.50 for each instrument</td>
</tr>
</tbody>
</table>
**Capital gains tax**

Capital gains arise from the sale or exchange of ‘capital assets’. Capital assets are property held by the taxpayer (whether or not connected with its trade), other than the following:

- Inventories or property held primarily for sale to customers in the ordinary course of business.
- Real property or depreciable property used in trade or business.
- Property of a kind that would be included in the inventory of the taxpayer if on hand at the close of the taxable year.

Capital losses are deductible only to the extent of capital gains.

There are no holding period requirements for capital assets of corporations.

A 6% final tax is imposed on the higher of the gross selling price or fair market value upon the sale, exchange, or disposition of land or buildings not actually used in the business of a corporation. The tax is withheld by the buyer at the time of sale.

Net capital gains derived from the sale, exchange, transfer, or similar transactions of shares of stock not traded through a local stock exchange are taxed at 5% of gains not over PHP 100,000, and 10% of gains in excess of PHP 100,000. Sales of shares of stock listed and traded on a local stock exchange, other than the sale by a dealer in securities, are subject to a stock transaction tax of 0.5% based on the gross selling price, provided the listed corporation observes a minimum public ownership of at least 10% based on the company’s issued and outstanding shares, exclusive of any treasury shares or such percentage as may be prescribed by the Securities and Exchange Commission (SEC) or Philippine Stock Exchange (PSE), whichever is higher; otherwise, the 5% (or 10%) tax shall apply.

Capital gains from the sale of bonds, debentures, or other certificates of indebtedness with a maturity of more than five years are exempt from tax.

A tax is levied on every sale, barter, exchange, or other disposition through an initial public offering (IPO) of shares of stock in closely held corporations. A ‘closely held corporation’ is any corporation of which at least 50% in value of the total outstanding capital stock, or at least 50% of the total combined voting power of all classes of stock

**Fringe benefits tax**

A final tax of 32%, payable by the employer, is imposed on the grossed-up monetary value of fringe benefits (e.g. housing, expense accounts, vehicles of any kind, household personnel, interest on loans at lower than market rates [the current benchmark rate is 12%], membership dues for social and athletic clubs, foreign travel expenses, holiday and vacation expenses, educational assistance, insurance) furnished or granted to managerial or supervisory personnel by the employer. An exception is for fringe benefits required by the nature of or necessary to the trade, business, or profession of the employer, or when the fringe benefit is for the convenience or advantage of the employer.

The following fringe benefits are not subject to the tax:

- Those authorised and exempted from tax under special laws.
- Contributions of the employer for the benefit of the employee to retirement, insurance, and hospitalisation benefit plans.
- Those granted to rank-and-file employees (however, the employees may be subject to WHT on compensation).
- Those of relatively small value or de minimis benefits.

The fringe benefits tax is payable on the calendar quarter basis and is an additional deductible expense for the employer. Fringe benefits already subjected to fringe benefits tax will no longer be included in the employee’s taxable income.

The grossed-up monetary value of the fringe benefit is generally computed by dividing the actual monetary value of the benefit by 68%.

**Social security contributions**

Foreign corporations doing business in the Philippines must be registered with the social institutions, such as the Social Security System (SSS), Home Development Mutual Fund (HDMF), and Philippine Health Corporation (PHIC), upon employment of any employee and prior to the due date of the remittance of any social contributions.

Employee contributions for social security are deducted from employee’s salary payments. For 2013, the maximum monthly deductions are PHP 500 for SSS, PHP 100 for HDMF, and PHP 437.50 for PHIC.

Employers are also required to make contributions. Employers’ maximum contribution for each employee is PHP 1,090 per month. Employer contributions for HDMF and PHIC are generally of the same amount as the employee contributions.
Local government taxes
Local government units impose local (business) taxes and permit fees, which are generally based on the prior year’s gross sales or gross receipts, and real property taxes, which are levied annually on the basis of a fixed proportion of the value of the real property (taxable value). Real property located in a province may be subject to real property tax of not more than 1% of its taxable value, while real property in a city (or municipality in Metro Manila) may be subject to real property tax of not more 2% of its taxable value.

Branch income
The income tax rate on branch profits is the same as on corporate profits. In general, profits remitted abroad by a branch office are subject to a 15% tax rate, based on the total profits applied or earmarked for remittance, without any deduction for the tax component thereof. A lower rate may apply under certain tax treaties. Profits from qualified activities remitted by a branch registered with the Philippine Economic Zone Authority (PEZA) are exempt.

Regional operating headquarters (ROHQ) pay a tax of 10% of their taxable income. A ROHQ is a branch established in the Philippines by a multinational company that is engaged in any of the following services: general administration and planning, business planning and coordination, sourcing and procurement of raw materials and components, corporate finance advisory services, marketing control and sales promotion, training and personnel management, logistic services, research and development services and product development, technical support and maintenance, data processing and communication, or business development.

Income determination
Inventory valuation
Inventories are generally stated at cost or at the lower of cost or market. Last in first out (LIFO) is not allowed for tax purposes. Generally, the inventory valuation method for tax purposes must conform to that used for book purposes.

Capital gains
Capital gains are not generally subject to CIT, but may be subject to capital gains tax. See Capital gains tax in the Other taxes section for more information.

Dividend income
Dividends received by a domestic or resident foreign corporation from another domestic corporation are not subject to tax. These dividends are excluded from the taxable income of the recipient.

Dividends received by a non-resident foreign corporation from a domestic corporation are subject to a final WHT at the rate of 15% if the country in which the corporation is domiciled either does not impose income tax on such dividends or allows a tax deemed paid credit of 15%. If the recipient is a resident of a country with which the Philippines has a tax treaty, the treaty rate applies if lower. Otherwise, the normal CIT rate of 30% applies.
Philippines

Stock dividends
A Philippine corporation can distribute stock dividends tax-free, proportionately to all shareholders.

Interest income
Interest on bank savings, time deposits, deposit substitutes, and money market placements received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%.

Interest income of domestic or resident foreign corporations from FCDU deposits is subject to a final tax of 7.5%. Such income is excluded from gross income reportable in CIT returns.

Interest income of OBUs and FCDUs from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to 10% tax.

Royalty income
Royalties received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%.

Other significant items
Other items exempt from CIT include the following:

- Proceeds of life insurance policies.
- Return of policy premium.
- Gifts, bequests, and devises.
- Interest on certain government securities.
- Income exempt under a treaty.
- Gains from sale, exchange, or retirement of bonds.
- Gains from redemption of shares of stock in mutual fund companies.

Foreign income
A Philippine (domestic) corporation is taxed on its worldwide income. A domestic corporation is taxed on income from foreign sources when earned or received, depending on the accounting method used by the taxpayer.

Income earned through a foreign subsidiary is taxed only when paid to a Philippine resident shareholder as a dividend. Meanwhile, income earned through a foreign branch is taxed as it accrues. The losses incurred by the foreign branch are deductible against other income earned by the Philippine corporation.

Double taxation is generally relieved through a credit for foreign taxes. However, a taxpayer can take a deduction for foreign taxes instead, if that leads to a more favourable outcome.

Deductions
Note that corporate taxpayers are given the option to avail themselves of the optional standard deduction computed at 40% of gross income. The optional standard deduction is in lieu of the itemised operating expenses.
**Depreciation and depletion**

Depreciation is generally computed on a straight-line basis, although any reasonable method may be elected if the aggregate amount of depreciation, plus salvage value at the end of the useful life of the property, will equal the cost of the property. Gain on the sale of depreciated property is taxable as ordinary income. Generally, tax depreciation should conform to book depreciation, unless the former includes incentives.

Properties used in petroleum operations may be depreciated over a period of ten years using the straight-line or declining-balance method, at the option of the service contractor. Properties used in mining operations with expected life of more than ten years may be depreciated over any number of years between five years and their expected life.

A cost depletion allowance is available as follows:

- For oil and gas wells, depletion is based on actual reduction in flow and production ascertained, not by flush flow, but by the settled production or regular flow.
- For mines, depletion is allowable up to an amount not to exceed the market value, as used for purposes of imposing the mining ad valorem taxes, of the products mined and sold during the year.

**Goodwill**

Goodwill is not deductible for tax purposes.

**Start-up expenses**

Start-up expenses are deductible when incurred.

**Interest expenses**

The allowable deduction for interest expense is reduced by an amount equal to 33% of interest income that is subject to final tax.

**Bad debts**

Bad debts are deductible expenses when written-off, subject to certain requirements.

**Charitable contributions**

The deduction for charitable contributions ordinarily may not exceed 5% of taxable income. However, contributions to certain institutions are 100% deductible, subject to certain conditions.

**Entertainment expenses**

Entertainment, amusement, and recreation expenses should not exceed 0.5% of net sales for taxpayers engaged in the sale of goods or properties, or 1% of net revenue for taxpayers engaged in the sale of services, including professionals and lessors of properties.

**Special deductions**

Special deductions are allowed for certain businesses (e.g. insurance, mining, petroleum, and real estate investment trust).

**Fines and penalties**

Fines and penalties are deductible as necessary and ordinary business expenses. Surcharge and compromise penalty imposed for non-payment or late payment of taxes is not deductible for tax purposes.
**Philippines**

**Taxes**
Corporate taxpayers can claim a deduction for all taxes paid or accrued within the taxable year in connection with their trade or business, except for the following:

- Philippine CIT.
- Income taxes imposed by authority of any foreign country, unless the taxpayer elects to take a deduction in lieu of a foreign tax credit.
- Estate and donor’s taxes.
- Taxes assessed against local benefits of a kind tending to increase the value of the property assessed.

In the case of a foreign corporation, deductions for taxes are allowed only if they are connected with income from sources within the Philippines.

**Net operating losses**
A net operating loss for any taxable year immediately preceding the current taxable year, which had not been previously offset as a deduction from gross income, may be carried over as a deduction from gross income for the next three consecutive taxable years immediately following the year of this loss (except losses during the period when the taxpayer was tax-exempt), provided there has been no substantial change in the ownership of the business or enterprise.

For mines, other than oil and gas wells, a net operating loss calculated without the benefit of incentives provided for under Executive Order (EO) No. 226, or the Omnibus Investments Code of 1987, as amended, incurred in any of the first ten years of operation may be carried over as a deduction from taxable income for the next five years immediately following the year of such loss.

Loss carrybacks are not allowed.

**Payments to foreign affiliates**
A Philippine corporation can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are equal to what it would pay an unrelated entity, and the appropriate WHTs are withheld and remitted.

The registration of licensing and management agreements, now known as technology transfer arrangements (TTAs), has been liberalised. Only TTAs not conforming to certain provisions of the Intellectual Property Code require approval by, and registration with, the Documentation, Information, and Technology Transfer Bureau of the Intellectual Property Office (formerly Bureau of Patents, Trademarks, and Technology Transfer) to render the contracts enforceable.

**Head office expense allocations**
A resident foreign corporation is allowed to claim allocated head office expenses as a deduction, subject to compliance with certain requirements.

**Group taxation**
Group taxation is not permitted in the Philippines.

**Transfer pricing**
On 23 January 2013, the Secretary of Finance issued the Philippine Transfer Pricing Regulations governing the cross-border transactions between associated enterprises.
and the domestic transactions between associated enterprises. The Regulations state that the ‘arm’s-length principle’ shall be adopted in determining the transfer price in related party transactions. The application of the arm’s-length principle may follow a ‘three-step’ approach prescribed by the Philippine tax authority (i.e. the Bureau of Internal Revenue, or BIR) under the Regulations, to wit: (i) the conduct of a comparability analysis, (ii) the identification of the tested party and the appropriate transfer pricing method, and (iii) the determination of the arm’s-length results.

Taxpayers must keep adequate documentation supporting their transfer prices so that they can defend their transfer pricing analysis, prevent transfer pricing adjustments arising from tax examinations, and support their applications for Mutual Agreement Procedure (MAP). There is also a ‘contemporaneous’ requirement that transfer pricing documents must exist or be brought into existence at the time the taxpayers develop or implement any arrangements that may raise transfer pricing issues. This can generally mean that while transfer pricing documentation is not required to be submitted together with the tax returns, such documents should be retained and submitted to the BIR when required or requested to do so. There is no prescribed period within which such documentation may be made available, but it should be available in cases of audit/investigation.

An Advance Pricing Arrangement (APA) is made available to taxpayers who are engaged in cross-border transactions. An APA is an agreement entered into between the taxpayer and the BIR to determine in advance an appropriate set of criteria (e.g. method, comparables, and appropriate adjustments thereto) to ascertain the transfer prices of controlled transactions over a fixed period of time. The APA is not mandatory, but may be advisable since the purpose of the APA is to reduce the risk of transfer pricing re-examination and double taxation. The BIR will be issuing separate guidelines on this.

Transactions entered into prior to the Transfer Pricing Regulations being effective shall be governed by the laws and other administrative issuances prevailing at the time the controlled transactions were entered into.

**Thin capitalisation**

There are no thin capitalisation rules in the Philippines.

**Controlled foreign companies (CFCs)**

There are no CFC rules in the Philippines.

---

**Tax credits and incentives**

**Foreign tax credit**

Domestic corporations are allowed to claim a credit for any income taxes paid to a foreign country, provided that the taxes are not claimed as deductions. Foreign corporations are not allowed foreign tax credits.

Credits for foreign taxes are determined on a country-by-country basis. The amount of foreign tax credit in respect to the tax paid in a country shall not exceed the same proportion of the tax against which the tax credit is taken, which the taxpayer’s income from the country bears to its entire taxable income. There is, however, a further limitation based on the total amount of foreign-sourced income that the taxpayer earns. The total amount of foreign tax credits shall not exceed the same proportion of the tax
Philippines

against which the tax credit is taken, which the taxpayer’s foreign-sourced income bears to its entire taxable income.

Export incentives
Tax incentives available to export enterprises registered with the Board of Investments (BOI) are as follows:

- Income tax holiday (ITH) giving full exemption from CIT for six years for pioneer firms and those locating in less-developed areas and four years for non-pioneer firms from the date of commercial operation, or target date of operation, whichever is earlier. Expanding export-oriented firms are given three years. If prescribed conditions are met, an ITH may be extended by up to three years. In no case, however, can an ITH exceed eight years. Subject to certain exceptions, new and expansion projects located in the National Capital Region (NCR) or Metro Manila are no longer entitled to an ITH.
- Tax and duty exemption on imported spare parts and supplies for export producers with a customs bonded manufacturing warehouse exporting at least 70% of annual production, if foreign-owned, or 50%, if Filipino-owned.
- Full deduction of the cost of major infrastructure undertaken by enterprises in less-developed areas.
- Additional deduction of 50% of the incremental labour expense if the prescribed ratio of capital assets to annual labour is met and 100% of the incremental labour if located in less-developed areas within five years from date of registration (this incentive cannot be availed of simultaneously with the income tax holiday).
- Ten-year exemption from taxes and duties on importation of breeding stock and genetic materials.
- Tax credit on domestic breeding stocks and genetic materials (ten years).
- Exemption from wharfage, any export tax, duty, impost, or fees.
- Tax credits equivalent to taxes and duties paid on purchases of raw materials, supplies, and semi-manufactured products forming part of the products for export.

Other incentives
Export and free-trade enterprises, information technology (IT) enterprises, and special economic zone developers/operators (including IT buildings located in Metro Manila and IT parks) registered with PEZA are entitled to an ITH of six years for pioneer firms and four years for non-pioneer firms. Foreign articles brought into the zones will be exempt from import duties and taxes. Local purchases of goods from VAT-registered suppliers outside the economic zones are zero-rated. After the lapse of the ITH incentives, enterprises registered and operating within special economic zones/export processing zones (EPZs) will pay only 5% final tax on gross income earned, in lieu of paying all local and national taxes.

A regional or area headquarters established in the country as a supervisory, communications, and coordination centre for a corporation’s subsidiaries, affiliates, and branches in the Asia-Pacific region, and whose headquarters do not derive income from the Philippines, are not subject to any CIT nor VAT and are entitled to certain non-tax incentives.

An ROHQ that is allowed to derive income in the Philippines by performing qualifying business services to its affiliates, subsidiaries, or branches in the Philippines, in the Asia-Pacific Region, and other foreign markets may avail itself of the following incentives:

- Income tax at the preferential rate of 10% of its taxable income.
• Exemption from all kinds of local taxes, fees, or charges imposed by a local
government unit, except real property tax on land improvements and equipment.
• Tax and duty-free importation of equipment and materials for training and
conferences that are needed and used solely for its functions as an ROHQ and are not
locally available, subject to the prior approval of the BOI.
• Importation of new motor vehicles, subject to the payment of corresponding duties
and taxes.
• Exemption from travel tax, specific immigration fees, and requirements, subject to
certain conditions.

The following are the incentives granted to exporters under the Export Development
Act (Republic Act No. 7844):

• Exemption from Presidential Decree No. 1853 (requiring 100% of Letter of Credit),
provided that the importation shall be used for the production of goods and services
of export.
• Tax credit for incremental export performance. The tax credit for increase in current
export revenues shall be computed as a percentage to be applied on the incremental
export revenue converted to pesos at the current rate. The percentages or rates are
as follows:
  • For the first 5% increase in annual export revenues over the previous year: 2.5%.
  • For the next 5% increase: 5.0%.
  • For the next 5% increase: 7.5%.
  • In excess: 10%.

Note that this incentive is not available for exporters enjoying ITH or VAT exemption or
whose local VAT is below 10%.

In addition to the above incentive, all existing incentives being enjoyed by the
enterprise if registered with the BOI, PEZA, Subic Bay Metropolitan Authority (SBMA),
Clark Development Corporation (CDC), or other ecozone regulating agencies.

**Withholding taxes**

Corporations and individuals engaged in business and paying certain types of income
to non-residents are required to withhold the appropriate tax, which generally is 30%
in the case of payments to non-resident foreign corporations or 25% for non-resident
aliens not engaged in trade or business. For **WHT on resident corporations, see the
discussions in the Income determination section.**

**Tax treaty rates**

For countries with which the Philippines has concluded tax treaties, the taxes to be
withheld are as follows:

As of April 2013:

<table>

### Notes

1. The lower rate generally applies if the beneficial owner of the dividends is a company with a substantial ownership in the dividend paying company.
2. Interest derived by a foreign government or its agencies is typically exempt from Philippine tax. Many treaties also contain special rules for both Philippine and home country taxation of interest paid on instruments secured by a government agency of one of the countries. Such provisions have been excluded from the analysis.
3. A 15% rate applies under domestic law if the home country exempts the dividend from tax or permits a 15% or greater credit for corporate taxes paid by the company paying the dividend.
4. Entitlement to the lower rate depends on how the dividend will be taxed in Australia.
5. The 10% rate applies to interest paid in respect of the public issues of bonds, debentures, or similar obligations.
6. The lower rate applies to royalties paid by an enterprise registered with the Philippine BOI and engaged in preferred areas of activity.
7. The threshold for substantial ownership is 10%.
8. The 10% rate also applies to interest paid by a company registered with the BOI and engaged in preferred pioneer areas of investment in the Philippines.
9. The treaty also contains a most-favoured-nation rule, limiting the Philippine tax on royalties to the lowest rate of Philippine tax that may be imposed on royalties of the same kind paid in similar circumstances to a resident of a third state.
10. The 15% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films or tapes for television or broadcasting.
11. The threshold for substantial ownership is 25%.
12. The 25% rate applies to royalties arising from the use or the right to use trademarks and cinematographic films, films or tapes for television or radio broadcasting. The 15% applies to any other royalties.
13. The 10% rate applies to the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. Strictly, application of the rate is generally at the discretion of the Philippine Competent Authorities, but the BIR has never raised this as an issue.
14. The 10% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work (other than copyright of cinematograph films), any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
15. The 15% rate applies to royalties paid by an enterprise registered and engaged in preferred areas of activities, and to royalties in respect of cinematographic films or tapes for television or broadcasting, and for the use of, or the right to use, any copyright. The 25% rate applies to other royalties.
16. The 10% rate also applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment.
17. The 10% rate also applies to interest paid on any loans granted by a bank.
18. The 15% rate also applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 20% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 15% rate applies to all other royalties.
19. The 7.5% rate applies to the lease of containers. The 10% rate applies to royalties paid by an enterprise registered with the BOI. The 25% rate applies to other royalties.
20. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 25% rate applies to all other royalties.
21. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 15% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 25% rate applies to all other royalties.
22. The threshold for substantial ownership is 15%.
23. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 20% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 15% rate applies to all other royalties.

**Tax administration**

**Taxable period**
The accounting period may be either a calendar year or a fiscal year. With prior approval of the Commissioner of Internal Revenue, corporations may change their accounting period from calendar year to fiscal year, or vice versa.

**Tax returns**
Corporations should file their returns and compute their income on the basis of an accounting period of 12 months.

Corporate taxpayers file self-assessing returns. Electronic filing and payment of taxes are available under the Electronic Filing and Payment System (EFPS) of the BIR.

A domestic or resident foreign corporation is required to file income tax return on a quarterly basis. Within 60 days from the close of the first three quarters in its taxable year, the corporation must file, in duplicate, a return summarising its gross income and deductions for the year to date. A final annual income tax return must be filed on or before the 15th day of the fourth month following the close of the tax year.

**Payment of tax**
Every corporation files cumulative quarterly income tax returns for the first three quarters and pays the tax due thereon within 60 days after each quarter. A final
Philippines

adjustment return covering the total net taxable income of the preceding taxable year must be filed on the 15th day of the fourth month following the close of the taxable year. The balance of the tax due after deducting the quarterly payments must be paid, while the excess may be claimed as refund or tax credit. Excess estimated quarterly income taxes paid may be carried over and credited against estimated quarterly income tax liabilities for succeeding taxable years. Once the option to carry over has been made, such option is irrevocable, and no cash refund or tax credit certificate (TCC) is allowed, except upon liquidation of the company.

Tax audit process
An annual statutory audit is required for all corporations with authorised capital stock or paid-up capital exceeding PHP 50,000, including branches of foreign corporations. It is also required for any corporation whose gross sales or earnings exceed PHP 150,000 in any quarter.

Statute of limitations
There is no statutory obligation on the Commissioner to make an assessment for internal revenue taxes, and most taxes are collected based on the taxpayer’s self-calculation. If an assessment is to be issued, however, it must be done within three years from the deadline or the date of actual filing of the return, whichever comes later. The taxpayer and the Commissioner can, however, agree in writing to extend this period.

In the case of a false or fraudulent return or of failure to file a return, the tax may be assessed or a proceeding in court for collection may be commenced without assessment at any time within ten years from the discovery of the falsity, fraud, or omission.

Any internal revenue tax that has been assessed within the period of limitation may be collected by distraint or levy or by a proceeding in court within five years following the assessment of the tax.

The prescription periods are suspended in certain circumstances, such as when the offender is absent from the Philippines, the Commissioner grants a taxpayer’s request for a reinvestigation, or the taxpayer and the BIR agree to extend the prescriptive period for assessment through a written waiver.

In the case of overpayment of tax, a claim for refund or credit may be filed with the BIR within two years from the date of erroneous payment of the tax. If the claim is denied or no decision is received from the BIR, a petition for review may be filed with the Court of Tax Appeals (CTA). This must be filed before the two-year period expires, and in the case of a denied claim, within 30 days from the receipt of the denial.

Topics of focus for tax authorities
The BIR generally prepares an annual audit program that provides for mandatory cases subject to tax audit, as well as priority taxpayers.

Significant developments

Value-added tax (VAT)

As of 1 April 2013, the use of the reverse-charge mechanism with respect to the delivery of goods is only available to taxpayers established outside of Poland and not registered for VAT purposes in Poland.

From a practical point of view, this mean that for all sale of goods transactions for which VAT was reconciled by the purchaser (registered for VAT with fixed place of business in Poland) and was neutral for the foreign company from a VAT point of view, the company will be obligated to pay the output VAT.

Taxes on corporate income

The corporate income tax (CIT) is the only tax levied on corporate income. The standard CIT rate is 19%.

Polish tax residents are subject to tax on their worldwide income. Non-residents are taxed only on their Polish-sourced income. The tax authorities’ right to tax a non-resident is further limited if the non-resident’s country of residence concluded a double-tax treaty (DTT) with Poland. In this case, the Polish tax authorities are, as a rule, entitled to tax only the portion of the non-resident’s income that may be attributed to a permanent establishment (PE) located in Poland if such income has arisen in Poland for the foreign tax resident. Exceptions relate to specific types of income, such as royalties, interest, dividends, and capital gains, that may be in Poland even if no PE exists.

Polish companies with foreign participation may be set up as either limited liability companies or joint-stock companies. There is no limitation on the percentage of foreign participation. Both types are subject to the general CIT rules, including the standard 19% tax rate (and other rates, depending on the type of revenue sourced in Poland). The same rate applies to branches of foreign companies (see the Branch income section for more information).

From the group of taxpayers, certain entities are explicitly excluded in the CIT law (e.g. Treasury, National Bank of Poland). Polish and European Union (EU)/European Economic Area (EEA) based investment funds are also exempted on the grounds of such provision.

Local income taxes

There are no local income taxes in Poland.
Poland

**Corporate residence**

A company is considered to be a resident in Poland if its registered office or management is located in Poland.

**Permanent establishment (PE)**

**PE under Polish CIT law**

According to Polish CIT law, the following are understood to be a PE:

- A permanent place of business through which a non-Polish tax resident conducts its business activities, in whole or in part, within the territory of Poland; in particular, a branch, agency, office, factory, workshop, or place of extraction of natural resources.
- A construction site, construction, assembly, or installation works carried on within the territory of Poland by a non-Polish tax resident.
- A person who, on behalf and for the benefit of a non-Polish tax resident, operates in Poland, if such person holds and exercises a power of attorney to enter into agreements on one’s behalf.

We note that Polish CIT law:

- does not encompass any provisions concerning the period required for construction works to create a PE
- does not include provisions indicating that an independent agent does not create a PE, and
- does not include provisions indicating that actions of an auxiliary or preparatory character do not lead to creation of a PE in Poland.

**PE from a DTT perspective**

In general, the provisions of DTTs concluded by Poland are based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital (OECD Model), except for provisions related to taxation of royalties, which are based on the United Nations (UN) Model Double Taxation Convention.

As a principle, treaties based on the OECD Model provide for the following concepts, which determine whether activities of a foreign entrepreneur constitute a PE (usually in Article 5):

- Fixed place of business concept.
- Dependent agent concept.
- Construction PE concept.

Note that some DTTs concluded by Poland also encompass other PE concepts (e.g. service PE concept or offshore PE concept).

**Other taxes**

**Value-added tax (VAT)**

Polish VAT applies to the following activities:

- Supplies of goods and services within the territory of Poland.
- Exports of goods outside the territory of the European Union.
• Imports of goods from countries that do not belong to the European Union.
• Intra-Community acquisitions of goods (imports from countries belonging to the European Union).
• Intra-Community supplies of goods (exports to the countries belonging to the European Union).

**VAT rates**
The VAT rates are 23% (standard rate), 8%, 5%, 0%, and exemption.

The standard 23% VAT rate generally applies to the supply of all goods and services, except for those that are covered by special VAT provisions that provide other rates or treatments.

Supplies covered by a reduced rate of 8% include, among others, supplies of pharmaceutical products and passenger transport services and also supply of goods for the Social Housing Programme (no greater than 150 square metres).

Supplies covered by a reduced rate of 5% include books and journals, unprocessed food, and basic food.

Zero-rated activities include, among others, exports of goods to countries outside the European Union.

VAT-exempt supplies include, among others, certain financial, insurance, and educational services.

**Basic calculation rules**
In general, the VAT due equals the VAT on outputs decreased by the VAT on inputs (in other words, input VAT is deducted from output VAT). Input VAT may be deducted from output VAT when a business (with a VAT payer status) receives an invoice for goods or services purchased. Input VAT may not be deducted unless a purchased supply is linked to the VATable activities. Furthermore, the deductibility of input VAT is restricted by the VAT law with respect to the purchase of certain goods and services. In addition, subject to numerous conditions, output VAT may be reduced when receivables, resulting from VATable sales, become uncollectible.

**VAT refunds**
The Polish VAT law allows direct refunds when input VAT (available for deduction) exceeds output VAT.

A Polish business may also be entitled to the VAT refund owed by another country under certain circumstances. Likewise, a foreign business having seat or fixed place of business for VAT purposes outside of Poland may be, in most cases, entitled to the refund of Polish VAT. If the respective countries belong to the European Union, the procedure is substantially simplified due to the EU Directive, which provides favourable rules for businesses based in EU countries that are seeking VAT refunds in other EU countries (i.e. electronic VAT refunds are possible).

**Reporting rules**
Generally, the VAT reporting period is one month. VAT returns should be submitted by the 25th day of the month following the VAT reporting period. All taxpayers may opt for a quarterly, instead of monthly, reporting period. Note that businesses involved in intra-Community acquisitions or supplies of goods are obligated to submit additional VAT returns with respect to these particular transactions.
International services
The treatment of international services largely depends on the place of supply, since it is determinative of whether particular services are subject to the Polish VAT. The Polish VAT applies only to those services that are supplied within Poland.

Generally, the place of supply depends on the recipient of services. If the recipient is a business entity, the place of supply is determined to be the recipient's country; if the recipient is a private person, the place of supply is determined to be the service provider's country. Thus, according to general rules, if a Polish entity supplies services to a foreign business entity, the place of supply is outside Poland (these services are not subject to Polish VAT); if a foreign company supplies services to a Polish business entity, the place of supply (taxation) is in Poland. However, these general rules are subject to several exceptions.

If services are supplied by a taxpayer without seat or fixed place of business in Poland and the place of supply (taxation) is Poland, the purchaser who is the Polish VAT payer has to apply the reverse-charge mechanism. The reverse charge is mandatory (i.e. the foreign supplier cannot voluntarily register and settle the Polish VAT).

The reverse-charge mechanism also applies to a domestic supply of goods performed by a taxpayer not having a seat or fixed place of business in Poland to a purchaser who is a taxpayer and has a seat or fixed place of business in Poland or is a legal entity (and is not taxpayer) and has a seat in Poland. As of 1 April 2013, the use of obligatory reverse-charge mechanism relating to such supplies of goods will only be applicable with respect to deliveries performed by taxpayers established abroad and not registered for VAT purposes in Poland.

Customs duties
As a member of the European Union, Poland belongs to a customs union, thus only goods imported from non-EU countries or exported from Poland to non-EU countries are subject to customs duties and formalities. Moreover, all the Community customs regulations are directly applicable in Poland. The most important act is the Community Customs Code and its implementing provisions, as well as the Community Customs Tariff.

These regulations are supplemented with certain Polish national rules, especially in respect to procedures and specific areas that are not defined in the Community customs law (e.g. strict regulations concerning the export of works of art and animals, limits on the amount of cash that may be brought from Poland to non-EU countries).

Excise duties
Excise duties are levied on the production, sale, import, and intra-Community acquisition of ‘excise goods’, which are listed in the excise duty law and include (among others) alcohol, cigarettes, energy products (e.g. petrol, oils, gas), passenger cars, and electricity.

Depending on the excise goods in question, one of four methods of calculating excise tax may be applicable:

• A percentage of the taxable base.
• An amount per unit.
• A percentage of the maximum retail price.
• An amount per unit and a percentage of the maximum retail price.
Poland

The excise rate for car petrol is 1,565 Polish złoty (PLN) per 1,000 litres.

Passenger cars are subject to the following excise rates:

- 3.1% for cars with engine cubic capacity that does not exceed 2,000 cc.
- 18.6% for cars with engine cubic capacity that exceeds 2,000 cc.

Notwithstanding the above, Polish excise duty law provides for a wide system of excise duty exemptions as well as 0% taxation. Under specified circumstances, such preferential treatment may apply to specified goods that are otherwise taxed based on general rules. This concerns, for example, specific energy products used for other purposes than as a fuel or for heating.

There is also an excise duty placed on coal. Depending on the type of coal product, the excise rates are PLN 30.5 per 1,000 kg of coal, PLN 11 per 1,000 kg of lignite, and PLN 35.2 per 1,000 kg of coke. In practice, there are a wide range of excise duty exemptions (practically, Poland has used all the exemption options provided in the EU directive); nevertheless, many new administrative obligations have been set for entities producing, distributing, and using coal. The fulfilment of those obligations is necessary in order to apply an excise duty exemption.

**Property taxes**

Property tax rates are fixed by municipalities within limits set in the Law on Local Taxes and Fees. In 2013, land used for business purposes is subject to a rate limit of PLN 0.88 per square metre. Buildings used for business purposes are subject to a rate limit of PLN 22.82 per square metre.

**Transfer taxes**

A transfer tax may apply to certain civil law transactions, determined as a percentage of the transaction (i.e. such as sale, loan, donation). A tax obligation on civil law transactions does not arise when one of the parties of the transaction is a VAT payer.

**Stamp duty**

In Poland, some activities are charged a stamp duty. Payment is required, for example, in connection with the submission of a power of attorney, after completion of an official act, or the issue of a certificate or permit.

**Capital tax**

A share capital increase (in case of corporations) and contribution/contribution increase (in case of partnerships) is subject to a 0.5% capital tax, payable by a company or partnership that receives a capital contribution. This tax applies equally to limited liability companies as well as joint-stock companies. A merger, division, or transformation of a corporation into another corporation is not subject to capital tax, even if the transaction results in a share capital increase. A similar exemption applies to a capital increase resulting from (i) an in-kind contribution of an enterprise or its organised part or (ii) contribution of shares of the other corporation giving the majority of votes in this corporation or contribution of additional shares in case the corporation to which the shares are contributed already has the majority of votes.

**Social security contributions**

Both the employer and the employee are obligated to contribute to the Polish social security system. Apart from paying its own share, the employer is obligated to withhold the employee’s share of the social security contributions and remit them to
Poland

the Social Security Authorities (ZUS). In both cases, the relevant payments shall be made monthly.

The employer pays total contributions in a range of 19.48% to 22.14% of the employee’s gross salary (the employer’s contribution rate includes an accident insurance element that varies according to the number of employees insured and the business sector). The contribution rate for the employee is 13.71% of gross salary. The social security shares payable by the employer and the employee are tax-deductible items in their respective income tax settlements.

The rates apply to salaries below the cap of PLN 105,780 in 2012 (approximately 25,000 euros [EUR]). The cap changes every year. After exceeding this cap, the salary is subject to a contribution rate of 3.22% to 5.88% payable by the employer and 2.45% payable by the employee.

**Branch income**

Foreign businesses are allowed, under certain conditions, to establish their branch offices (exclusively within the scope of their ‘foreign’ business activity) and representative offices (exclusively with regard to promotion and advertising) in Poland.

A branch office almost always has PE status in Poland. Once a branch is established, the foreign company pays CIT at the standard rate of 19%, based on the income attributable to the operations of the Polish branch. For this purpose, as well as for accounting purposes, a branch is obligated to keep accounting books that include all the data necessary to establish the taxable base. In this respect, general income determination rules relevant to Polish companies apply to branches as well. In the few cases in which a branch can demonstrate, based on a DTT, that its business presence in Poland does not constitute a PE, its profits are not subject to Polish CIT.

**Income determination**

The tax base for CIT purposes is the overall income, which is the difference between aggregated taxable revenue and aggregated tax-deductible costs. A tax-deductible cost is defined as a cost incurred for the purposes of deriving revenues, as well as for the purpose of securing or preserving a source of revenue.

Subject to numerous exemptions, the tax base includes all sources of income. Consequently, there is no special treatment for income such as capital gains or interest.

In practice, taxable income is calculated by adjusting the profit reported for accounting purposes. The relevant adjustments are necessary due to differences between tax and accounting treatment of numerous revenue and cost items. As a result, the taxable base is usually higher than the accounting profit.

**Inventory valuation**

Generally, the value of inventory shortages may be included as a tax-deductible cost. Other write-offs in the value of inventory are not recognised for tax purposes until the inventory in question is sold.

When inventory is lost or sold, a tax deduction is allowed for the costs incurred when the inventory was purchased. The methods acceptable for inventory valuation for tax
(and accounting) purposes are standard cost, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO).

**Capital gains**
There is no separate capital gains tax. Capital gains or losses are aggregated with an entity’s other taxable income or losses. Capital losses are tax-deductible.

**Dividend income**

**Domestic dividend income**
Dividends received from Polish residents (domestic dividends) are excluded from overall income. Instead, such dividends are subject to a 19% withholding tax (WHT), which is withheld and remitted to the tax office by the payer of dividends. Based on a participation exemption, however, domestic dividends are not subject to the 19% WHT if the Polish beneficiary holds at least a 10% share in the paying company for at least two years.

The revenue arising from voluntary redemption of shares is not treated as a dividend for tax purposes and does not enjoy the benefits of the participation exemption (i.e. the method of redemption, whether voluntary or automatic, will matter).

**Dividend income from abroad**
Generally, dividends collected by a Polish corporate tax resident, if paid by a non-resident, are treated as regular income and taxed at the standard CIT rate. CIT on such dividends paid in other countries may be credited proportionately against Polish CIT.

Additionally, dividends received from entities seated in the European Union (including Poland), EEA member states, or Switzerland can benefit from CIT exemption if the Polish company owns, respectively, at least 10% (in respect to companies seated in the EU/EEA member states) or 25% (in respect to companies seated in Switzerland) in the share capital of the payer for two consecutive years (and certain other conditions are met).

Dividends received from non-EU/non-EEA member states may benefit from underlying tax credit. If a Polish company or a PE of a company from an EU/EEA member state located in Poland receives a dividend from a company seated in a non-EU/non-EEA country, it may deduct the tax paid by the payer on profits out of which the dividend was paid. The deduction is only possible if the Polish company/company from EU/EEA, which PE is located in Poland, holds (for two consecutive works) at least 75% of shares of the dividend payer. The tax may be deducted in an appropriate proportion. Furthermore, the deduction is possible if there is a DTT. Based on the provisions of the relevant DTT or other agreement concluded by Poland, the Polish tax authority may exchange tax information with its counterparty.

**Interest income**
Interest income is aggregated with an entity’s other taxable income.

**Foreign income**
Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland (see Foreign tax credit in the Tax credits and incentives section).
Poland

**Deductions**

Generally, a tax-deductible cost is defined as a cost incurred for the purposes of deriving revenues, as well as for the purpose of securing or preserving a source of revenue. The last element of the definition of a tax-deductible cost was added a few years ago to reduce uncertainties surrounding the deductibility of business expenses that do not directly generate revenue.

The CIT law provides a list of items that are not deductible for tax purposes, even if the items meet the general conditions described above. This list contains over 60 items including, among others, the following:

- Written-off, lapsed accounts receivable.
- Entertainment costs.
- Accrued but unpaid interest.
- Accounting and comparable provisions.
- Tax penalties and penalty interest.
- A portion of the insurance premium paid on a passenger car (i.e. the portion calculated on the excess of the car value over EUR 20,000).
- A portion of the depreciation write-offs made on a passenger car (i.e. the portion calculated on the excess of the car value over EUR 20,000).

Furthermore, expenses incurred in connection with the acquisition of fixed and intangible assets (e.g. licences, trademarks, know-how) are not deductible directly. Instead, the acquired assets are subject to depreciation. If such assets are sold, a business is entitled to deduct the net value (cost of acquisition reduced by the overall value of the tax depreciation allowances made). Similar treatment relates to the acquisition of shares or land, except that these particular assets are not depreciable. Therefore, the full cost of an acquisition of shares or land may be deducted when such assets are sold.

**Depreciation**

Depreciation write-offs are treated as a tax-deductible cost. Generally, depreciation allowances are calculated based on the straight-line method and the maximum rates provided in the CIT law. If this is the case, a taxpayer deducts equal annual write-offs, calculated by multiplying the maximum rate of depreciation by the asset’s initial value until the total value of write-offs equals the initial value (typically, the initial value equals the purchase price).

For certain categories of machinery and vehicles (but not passenger cars), the reducing-balance depreciation method may be applied. Under this method, the tax depreciation may be accelerated during the initial period of the asset’s use by multiplying the statutory maximum rate by two. The rate is then applied to the net value of fixed assets (i.e. initial value reduced by earlier annual write-offs). The reducing-balance method is applied until the annual depreciation write-off equals the hypothetical write-off that would be made under the straight-line method. From this point, the depreciation allowance is taken based on the straight-line method for its remaining useful life.

The main categories of assets and the related statutory annual tax depreciation rate are as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Various buildings and constructions</td>
<td>1.5 to 10</td>
</tr>
</tbody>
</table>
Apart from the above, the Polish CIT law includes provisions for accelerated depreciation (within specified limits) for assets used in deteriorated conditions and for second-hand assets.

**Goodwill**
Under the provisions of CIT law, goodwill is subject to tax amortisation if it is created as a result of acquisition of an enterprise, or its organised part, made in one of the following ways: (i) purchase; (ii) payable use, provided that the user of such enterprise/organised part of an enterprise makes the depreciation write-offs; or (iii) contribution to a company based on commercialisation and privatisation regulations. The goodwill is amortised for tax purposes for a minimum period of five years.

**Start-up expenses**
There are no specific provisions in the Polish CIT law relating to start-up expenses; the general rules of tax deductibility described above apply.

**Interest expenses**
Accrued interest on loans and credit that were paid or capitalised are deductible for CIT purposes. Polish CIT law provides some exceptions, such as instances where costs are not associated with earning revenue.

In Poland, there are also some limitations of interest tax deductibility connected with thin capitalisation regulations. See Thin capitalisation in the Group taxation section for more information.

**Bad debt**
As a general rule, debts written off as uncollectable cannot be considered as tax deductible. However, in certain situations, the provisions of Polish CIT law provide some exceptions. According to these provisions, only strictly defined uncollectable debts (which based on the CIT law were booked as taxable revenues) may be considered by the taxpayer as a tax-deductible cost, provided that their uncollectability was properly documented (e.g. by a court decision). In some cases, uncollectability may be considered probable (e.g. debtor’s death).

Also, a VAT payer has a possibility to correct the output tax on the supply of goods or the provision of services, in addition to ‘bad debts’ whose uncollectability was made plausible. To do so, a few conditions must be met. They mainly concern the debtor’s and creditor’s VAT status, lapse of the time limit for payment (specified in an invoice), and proper notifications made by the taxpayer.

**Charitable contributions**
Companies are entitled to deduct donations for the purposes of public benefit and to volunteer activity organisations up to the total amount not exceeding 10% of income; however, deductions may not be made for donations to:
Poland

- natural persons or legal persons or organisational units having no legal personality who carry on economic activity consisting in the production of electronic goods; fuel; tobacco; spirits, wines, beers, and other alcohol beverages containing over 1.5% alcohol; products made of noble metals or containing such metals; or incomes received from trading in such goods.

Donations for religious practice purposes can be deducted up to the total amount not exceeding 10% of income.

Additionally, the donations of food products made for the purposes of so-called public benefit constitute tax deductible costs in the amount of production costs or purchase price.

**Fines and penalties**
Fines and penalties can be recognised as tax deductible items if they meet the general conditions. However, the Polish CIT law provides some exceptions, which include contractual penalties and indemnities for defects in supplied goods, works, and services performed; delayed supply of non-defective goods; and delay in the elimination of defects in goods, works, and services performed.

**Taxes**
Income tax and, in most cases, VAT incurred on purchases are not deductible. However, as a rule, VAT is deductible for CIT purposes if it cannot be offset against the company's output VAT. Other taxes, if paid in the course of business activities, are generally deductible in full.

**Net operating losses**
A tax loss reported in a tax year may be carried forward over the next five consecutive tax years; however, in any particular tax year, the taxpayer may not deduct more than 50% of the loss incurred in the year for which it was reported. For example, a taxpayer that incurred PLN 100 annual loss in 2010 may carry it forward to 2011 through 2015. However, the maximum loss deduction in any of these years may not exceed PLN 50 (assuming that there are no other losses available for deduction).

Currently, there is no possibility to carry back tax losses in Poland.

**Payments to foreign affiliates**
Deductions may be claimed for royalties, management services, and interest charges paid to foreign affiliates. However, note that interest expenses are subject to the thin capitalisation restrictions (see Thin capitalisation in the Group taxation section for more information). Furthermore, note that transactions with related companies should be made according to the market conditions. Where a company shifts income to another entity (especially a foreign entity), the tax authorities may adjust the taxable base upward (see Transfer pricing in the Group taxation section for more information).

**Group taxation**
The CIT law includes provisions on group taxation (i.e. in theory, a group of companies) if it meets certain conditions and can be treated as a single taxpayer. However, the required conditions are extremely demanding and very few taxpayers of this type exist.
Transfer pricing
Transactions between related parties should be conducted in accordance with the arm's-length principle. The tax authorities may increase the taxable base if the pricing used between related parties differs from what would have been used between unrelated parties in a similar business transaction and the difference results in income being shifted from a Polish taxpayer to another entity (whether a Polish resident or not). Similar rules apply to transactions between Polish residents and the residents of tax haven countries. These transactions may be subject to the transfer pricing principles even if the parties thereto are not related. The CIT law also contains detailed requirements for transfer pricing documentation.

Taxpayers can reduce the transfer pricing risk by applying for an advance pricing arrangement (APA). An APA decision shall be issued by the Minister of Finance in response to a taxpayer's application. An APA will obligate a taxpayer to follow a specified methodology when calculating the transfer prices applicable to transactions between related entities. In exchange, the tax authorities may not challenge the agreed upon methodology.

Thin capitalisation
A portion of the interest paid by a Polish company on a loan granted by a qualified lender (a qualified shareholder or a qualified sister company) will not be considered a tax-deductible cost if the value of the Polish company's overall debt from the shareholders and other affiliates mentioned in the tax law exceeds three times the value of the Polish company's share capital (3:1 debt-to-equity ratio). A qualified shareholder is defined as a holder of 25% or more of the voting power of a Polish company. A qualified sister company is a company of which a shareholder holds at least 25% of the value of the shares.

Tax credits and incentives

Foreign tax credit
Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland. In all other cases (in particular, when the income is not covered by any treaty), Poland uses the ordinary credit method to avoid double taxation. Therefore, a Polish resident is liable for income tax imposed on its worldwide income, but the tax is proportionately reduced by the income tax paid abroad.

Special Economic Zones (SEZs)
Polish legislation provides investment incentives related to business activities carried out in 14 zones defined as SEZs. A business entity can benefit from tax incentives, provided that the entity obtains a permit from the Ministry of the Economy to conduct business activities there and meets other legal requirements. Note that a CIT credit applies only to income earned on activity conducted within the territory of SEZs and covered by permit.

In general, the amount of the tax incentive depends on project location and size of the enterprise. For large enterprises, it can be 30%, 40%, or 50% of eligible expenditures (i.e. investment expenditures or two-year labour costs). In other words, the CIT credit allows the investor to avoid paying income tax up to the limit calculated on the basis of eligible expenditures and state aid intensity (percentage as above). In case of investment valued PLN 20 million and intensity aid of 40%, the investor would be
entitled not to pay tax due up to PLN 8 million. If the available limit of the tax credit exceeds the annual tax due generated on SEZ activity, the excess may be utilised in the following tax years. Consequently, in the case of significant investments, it is possible for businesses that run activities in the SEZs to enjoy exemption from income tax for a considerable period. According to current regulations, the deadline for utilising available tax credit is the end of 2020.

Note that in the case of small enterprises, the limit of the tax credit may be increased by 20%. In the case of medium-sized enterprises, the limit of the tax credit may be increased by 10%.

**Withholding taxes**

**Domestic provisions: General rules**

The general domestic WHT rate for dividends is 19%. Dividends also encompass income from liquidation of a company and the income from the redemption of shares (with the exception of gain from voluntary redemption, which is treated as a capital gain subject to 19% CIT rate in Poland if the gain is realised by a taxpayer from a non-treaty country or the treaty includes a so-called real estate clause).

The general WHT rate on interest and royalties paid to non-residents is 20% (10% regarding services of sea or air transportation). These WHT rates may be reduced by DTTs.

There is also a 20% WHT on payments made to non-residents for intangible services (such as consulting services). However, if a payment is made to a country that has a DTT with Poland, this tax may be avoided with the completion of certain minimal administrative formalities. Few treaties treat payments for technical services as royalties (e.g. India).

**Special treatment: EU directives**

The CIT law provisions and certain EU directives provide special treatment for dividends, royalties, and interest paid to numerous European countries.

When joining the European Union, Poland was granted a transitional period to phase out the WHT on interest and royalty payments paid by Polish corporate residents to associated EU or EEA companies. As of 1 July 2009, the WHT rate on these payments is 5%. Starting on 1 July 2013, a full exemption will apply. In general, the transitional rules, as well as the full exemption after 1 July 2013, only apply to interest and royalty payments between associated companies (parent-subsidiary relationships or sister-sister relationships) in which capital involvements are significant, i.e. the paying company owns or is owned at least 25% by the company receiving interest or the company that pays interest and the company that receives interest are owned at least 25% by the same parent company. Shareholding should be kept for a minimum of two consecutive years.

In relation to all given payments (i.e. interest, royalties, dividends), the condition regarding holding shares is also fulfilled if two years passes after the day of the interest/royalty/dividend payment. If the period is interrupted afterwards, the company is obligated to pay the tax at the standard rate with interest.

Dividends paid to corporate residents of EU and EEA countries are exempt from WHT, subject to certain conditions specified in the CIT law. The basic requirement is that the foreign beneficiary holds at least 10% of the shares in the Polish company for a
minimum of two consecutive years. In relation to all given payments (i.e. interest, royalties, dividends), the condition regarding holding shares is also fulfilled if two years pass after the day of the interest/royalty/dividend payment. If the period is interrupted afterwards, the company is obligated to pay the tax at the standard rate with interest.

Note that several additional conditions have to be met for the reduced rate/exemption from the WHT based on the Directive to be applied (e.g. the company receiving the dividend/interest/royalty cannot be exempt from tax on all its income, regardless of its source; the recipient has to have ownership title to the shares in the Polish company).

Additionally, the CIT law states that in order to enjoy the exemption from WHT on dividends and decreased WHT rate on interest and royalties, based on the Directives’ provisions, the relevant DTT or other agreement concluded by Poland should allow exchange of tax information between the tax authorities of Poland and the country of the payment recipient.

Given the fact that Poland did not conclude a DTT with Liechtenstein, payments made to tax residents of Liechtenstein should not benefit from the Directive.

Treaty rates

If EU special rules do not apply, the domestic WHT rates can be decreased by a DTT concluded between Poland and the payment recipient’s country of residence if certain administrative conditions are met (i.e. the payer obtains a valid certificate of a fiscal residence of the payment recipient/beneficial owner).

The following table lists the WHT rates as provided in the treaties concluded by Poland. Notably, the following table shows only rates that result from general treaty provisions; the treaties themselves occasionally include special provisions (applicable in special circumstances or to special entities) that provide lower WHT rates than the ones listed.

Furthermore, if a treaty rate is higher than a domestic one, the latter should apply.

Notes

1. When the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends.
2. When interest is paid to the government, the central bank of the state, including local authorities or other government bodies.
3. When the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends.
4. When interest is paid to the government, a political subdivision, or a local authority in connection with:
   - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
   - a sale on credit of any industrial, commercial, or scientific equipment, or
   - any loan granted by a bank.
5. When the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends.
6. When the interest is paid:
   - to the Central Bank of Poland
   - to the Central Bank of Bangladesh
   - to the government of the Republic of Poland or the government of the Republic of Bangladesh, or
   - in respect of a loan made or guaranteed or insured by the government of the other state, or any agency including a financial institution owned or controlled by the government.
7. When the beneficial owner is a company (other than a partnership) that holds directly at least 30% of the capital of the company paying the dividends.
8. When the beneficial owner is a company (other than a partnership):
   - that holds directly at least 25% of the capital of the company paying the dividends or
   - that holds directly at least 10% of the capital of the company paying the dividends, and the value of investments in the company is at least EUR 500,000 or is equal to the amount in the other currency.
9. When interest is paid:
   - on loan granted, guaranteed, or insured, or credit granted, guaranteed, or insured, by a general system organised by the state, including political subdivisions or local authorities for purposes of promoting exports
   - on loan of whatever kind, except in the form of bearer securities, granted by a banking company, or
   - to other states, including political subdivisions and local authorities.
10. When interest is paid to the government, including local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government.
11. When interest is paid in respect of a loan made, guaranteed, or insured by the state or agreed public body.

12. Copyright royalties and other similar payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work (not including royalties in respect of motion picture films and works on film or videotape for use in connection with television).

13. When the beneficial owner is a company that controls directly 20% of the voting stock of the company paying the dividends.

14. For the use of, or the right to use any industrial, commercial, or scientific equipment.

15. When interest is paid:
   • to the government, a local authority, and the central bank or any financial institution wholly owned by that government or
   • to the other resident of the other state with respect to debt-claims indirectly financed by the government of the other state, a local authority, and the central bank or any financial institution wholly owned by the government.

16. For the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films, and films or tapes for radio or television broadcasting, or any patent, know-how, trademark, design or model, plan, secret formula, or process.

17. As of 1 January 2013, the Protocol of 22 March 2012 entered into force. The Protocol introduces a maximum 5% rate of WHT on dividends and exempts dividends paid (after or on 1 January 2013) to an immediate parent company (other than partnership) that owns at least 10% of the capital of the company paying the dividend. The DTT previously provided for 10% WHT rate instead.

18. When the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends.

19. When the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends, where such holding is being possessed for an uninterrupted period of no less than one year and the dividends are declared within that period.

20. When the beneficial owner is a pension fund or other similar institution providing pension schemes in which individuals may participate in order to secure retirement benefits, when such pension fund or other similar institution is established, recognised for tax purposes and controlled in accordance with the laws of the other state.

21. When interest is paid:
   • on loan whatever kind granted, insured, or guaranteed by a financial institution owned or controlled by the state
   • in connection with the sale on credit of any industrial, commercial, or scientific equipment
   • in respect of a bond, debenture, or other similar obligations of the government of the state, or of a political subdivision or local authority, or
   • to the government of the other state, or to a political subdivision or local authority.

22. When interest is paid to the government of the other state, including local authorities and the central bank.

23. When the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.

24. When interest is paid to the government of the other state, including political sub-divisions and local authorities, the central bank, or any financial institution owned by the government or on loans guaranteed by the government.

25. From copyright of literary, artistic, or scientific work.

26. When the beneficial owner is the government of the other state or central bank.

27. When the interest, subject to certain exceptions related to silent shareholders, is paid:
   • to the government of Poland or Germany on a loan of whatever kind granted, insured, or guaranteed by a public institution for purposes of promoting exports
   • in connection with the sale on credit of any industrial, commercial, or scientific equipment
   • in connection with the sale on credit goods between companies, or
   • on any loan of whatever kind granted by a bank.

28. If the following conditions are met:
   • Interests paid to:
     • the government, a political sub-division, or a local authority of the other contracting state or
     • the central bank of other contracting state.
   • When the beneficial owner is a resident of the other contracting state and is derived in connection with a loan or credit extended or endorsed by:
     • Bank Handlowy (in scope of financing export and import) - for Poland
     • the Export-Import Bank of India (in scope of financing export and import) - for India
     • any institution in the other contracting state in charge of public financing of external trade, or
     • any other person, provided that the loan or credit is approved by the government of the first mentioned contracting state.

29. When the beneficial owner is the government, ministry, other governmental institution, municipality, central bank, or any other bank wholly owned by the government of the other contracting state.

30. When the beneficial owner is a resident of the other contracting state and holds directly at least 25% of the voting power of the company paying the dividends.

31. Interest paid in connection with:
   • the sale on credit of any industrial, commercial, or scientific equipment
   • the sale on credit of any merchandise by one enterprise to another, or
   • on any loan of whatever kind granted by the bank.
32. When the beneficial owner is a company that holds directly at least 15% of the capital of the company paying the dividends.

33. If the following conditions are met:
   - When the payer of interests is the government or contracting state or a local authority thereof.
   - Interest is paid to the government of other contracting state or local authority thereof.
   - Interest is paid to any other entity, including financial institutions, in relation to loans made in application of an agreement concluded between governments of contracting states.

34. When the beneficial owner is the government of other contracting state, including local authorities thereof, the central bank, any financial institutions controlled by that government or any resident of the other contracting state with respect to debt-claims, guaranteed or indirectly financed by institutions mentioned above.

35. For payments connected with copyrights, literary, artistic, and scientific activity, including payments connected with films for cinemas and films and tapes for TV.

36. When the beneficial owner is a company that holds directly or indirectly, at least 20% of the capital of the company paying the dividends.

37. When interest is paid to the government or local authorities.

38. When interest:
   - arising in contracting state and received by the government of the other contracting state, including political subdivision or a local authority thereof or the central bank of that other contracting state
   - arising in contracting state is paid in respect of loans and credits made or guaranteed:
     - by the Bank Handlowy - for Poland
     - by the Export-Import Bank of Korea and Korea Development Bank - for Korea
   - is paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or
   - is paid in connection with the sale on credit of any merchandise by one enterprise to another.

39. Interest paid to government or central bank.

40. When the beneficial owner is:
   - the government of the other contracting state, entity, or any governmental institution or
   - a company that is a resident of the other contracting state and at least 25% of its capital is owned directly or indirectly by the entities mentioned above.
   - When interest is paid in connection with loans guaranteed by the entities mentioned above.

41. If the following conditions are met:
   - When the beneficial owner is:
     - the government of the other contracting state, entity, or governmental institution or
     - a company that is a resident of the other contracting state and at least 25% of its capital is owned directly or indirectly by the entities mentioned above.
   - When interest is paid in connection with loans and credits granted by bank.

42. When interest is paid:
   - to the government, including the local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government or
   - to the resident in the other contracting state.

43. If the following conditions are met:
   - When the beneficial owner is another contracting state.
   - When interest is paid in connection with loans and credits granted by bank.

44. Dividends paid by:
   - a resident of Poland to a resident of Malaysia who is subject to Malaysian tax in respect thereof or
   - a resident of Malaysia to a resident of Poland who is subject to Polish tax in respect thereof.

45. Interest paid to resident of Poland on an approved loan or a long-term loan.

46. Royalties paid to resident of Poland by resident of Malaysia and approved by the competent authority of Malaysia.

47. If the following conditions are met:
   - When the beneficial owner is:
     - a contracting state, a political subdivision, or a local authority, or The National Bank of Poland or Banco de Mexico or
     - a recognised pension or retirement fund provided that its income is generally exempt from tax in this state.
   - When interest is paid by any of entities mentioned above
   - arises in Poland and is paid in respect of a loan for a period not less than three years granted, guaranteed, or insured by Banco de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C. or Banco National de Obras y Servicios Publicos S.N.C., or
   - arises in Mexico and is paid in respect of a loan for a period not less than three years granted, guaranteed, or insured by PKO S.A., Corporation of Credit Insurance, and Bank Handlowy in Warsaw.

48. If the following conditions are met:
   - When the beneficial owner is a bank or insurance company.
   - When interest is derived from bonds and securities that are regularly and substantially traded on a recognised securities market.

49. When dividends are paid to the company that holds directly at least 10% of the capital paying the dividends on the day they are paid and has done (or will do) so for an interrupted 24-month period from which that date falls.
50. When interests is paid:
   • by a resident of Pakistan to a Polish company or enterprise on loans approved by the Ministry of
     Finance of the government of Pakistan
   • to the State Bank of Pakistan from sources in Poland, or
   • to Bank Handlowy in Poland from the sources in Pakistan.

51. For payments of any kind received in consideration for the use of, or the right to use:
   • any copyright, patent, trademark, design or model, plan, secret formula, or process
   • an industrial, commercial, or scientific equipment, or
   • motion picture films, and works on films and videotapes for use in connection with television.

52. For payments received in consideration of technical know-how concerning industrial, commercial, or
    scientific experience.

53. Interests paid in respect of:
   • a bond, debenture, or other similar obligations of the government, state, political subdivision, or
     local authority thereof or
   • a loan or credit extended, guaranteed, insured, or refinanced by:
     • Central Bank of Philippines - for Philippines
     • Central Bank of Poland - for Poland, or
     • other lending institutions as specified and agreed in letters of exchange between competent
       authorities of the contracting states.

54. When dividends are paid to the company that holds directly at least 25% of the capital stock of the
    company paying the dividends for an uninterrupted 24-month period prior to the payment.

55. If the following conditions are met:
   • When the debtor of such interests is the government, a political subdivision, or local authority.
   • When the interest is paid to the government of other contracting state, a political subdivision, or
     local authority thereof, or an institution or body in connection with any financing granted by them
     under an agreement between the governments of the contracting states.
   • Loans or credit made on central banks of contracting states and any other financial institution
     controlled by the state and financing external business that may be agreed upon between the
     competent authorities of the contracting states.

56. Interests paid to government, administrative, territorial, or the central bank.

57. Dividends paid by:
   • the company that is a resident of Singapore to a resident of Poland (as long as Singapore does
     not impose a tax on dividends in addition to the tax chargeable on the profits or income of a
     company) or
   • to government of either contracting state with respect to shares in joint stock companies of that
     other state.

58. Interest paid to government.

59. Interests paid to government, local authorities, or the central bank.

60. Exempt income tax in Sri Lanka, not exceeding 331/3% on the company that pays dividends and
    other than the additional tax not exceeding 6% on companies whose shares are not movable property
    situated in Sri Lanka for the purpose of the law of Sri Lanka relating to Estate duty.

61. Interests:
   • received by any banking institution that is a resident of contracting state
   • derived from contracting state of the other contracting state either directly or through any agency, or
   • accruing to any company, partnership, or other body of persons resident in the contracting
     state for any loans in money, goods, and services or in any other form, granted by them to the
     government of the other contracting state, or to a state corporation, or to any state institution,
     or to any other institution, to the capital of which, the other contracting state has made any
     contribution, or to a credit agency, or an undertaking in that other contracting state with the
     approval of the government of the same state.

62. For payment in consideration, for the use of, or the right to use, any copyrights or cinematograph
    films.

63. As long as Switzerland will not tax royalties paid to foreign recipients, the payments are taxed only in
    the country of residence of the recipient (currently there is no WHT in Switzerland).

64. If the following conditions are met:
   • When recipient is a contracting state, or one of its local authorities, or the statutory body of either,
     including the central bank; or when interests are paid by a contracting state, or one of its local
     authorities, or the statutory body of either.
   • Such interest is paid in respect of any debt-claim or loan guaranteed, insured, or supported by a
     contracting state or another person acting on state's behalf.

65. Payments payable to contracting state or a state owned company in respect of tape or films.

66. Royalties made as consideration, for the alienation, or the use of, or the right to use, any copyright
    of literary, artistic, or scientific work, excluding cinematographic films or tapes for television or
    broadcasting.

67. When the beneficial owner is the government or a government institution.

68. When dividends are paid to a company that is the resident of the other contracting state and that
    holds directly at least 10% of the capital, paying the dividends on the day they are paid and has done
    (or will do so) for an uninterrupted 24-month period from which that date falls.

69. When interests are paid to the government, a political subdivision, or a local authority in connection
    with:
70. When the beneficial owner is a company that holds directly at least 10% of the outstanding shares of the voting stock of the company paying the dividends.
71. When the beneficial owner is a company that holds directly at least 20% of the capital of the company paying the dividends.
72. When the beneficial owner is:
   • the government or a local authority or
   • the National Bank of Poland or the Central Bank of Uzbekistan Republic.
73. For payment of any kind, received in consideration, for the use of, or the right to use:
   • any patent, design or model, plan, secret formula, or process or
   • any information concerning industrial or scientific experience.
74. Treaty allows application of the domestic tax rate.
75. As long as Iceland does not levy tax at source of income, interest is taxable only in the contracting state of which the beneficial owner of the interest is a resident.
76. When interest is paid to the government, a political subdivision, or a local authority in connection with:
   • a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
   • a sale on credit of any industrial, commercial, or scientific equipment
   • any loan granted by a bank
   • in respect of a bond, debenture, or other similar obligations of the government of a contracting state, or of a political subdivision or local authority thereof, or
   • to the other contracting state, or to a political subdivision or local authority thereof.
77. Provided that any new contribution is made to the capital of a company resident in Sri Lanka by a company resident in Poland.
78. When the tax is charged by Poland.
79. When the dividends are paid by a company resident of Poland to a resident of Malta that holds directly at least 10% of the capital company paying the dividends on the date they are paid and has done so or will have done so for an uninterrupted 24-month period in which that date falls.
80. When the recipient is the beneficial owner.
81. According to the Protocol of 22 March 2012 that entered into force on 1 January 2013, a maximum WHT rate on interest paid after or on 1 January 2013 is 5% (while the DTT previously provided for 10% WHT rate). However, as it was until 31 December 2012, when interest is paid to the government, including public sub-divisions and local authorities, the central bank, or any statutory body of the state with respect to loans or credits made or guaranteed by the government of the other state, including public sub-divisions and local authorities, the central bank, or any statutory body of the other state, it shall be exempt from tax in the first mentioned contracting state.
82. The new DTT, applicable from 1 January 2013, introduces WHT exemption on interest payable: (i) on any loan or credit granted by a bank; (ii) to the government of the other contracting state, including any political subdivision or local authority thereof, the central bank, or any financial institution owned or controlled by that government; or (iii) to a resident of the other state in connection with any loan or credit guaranteed by the government of the other state, including any political subdivision or local authority thereof, the central bank, or any financial institution owned or controlled by that government. The new DTT introduces a maximum rate of WHT on interest at 5%, while the old DTT provided 10% WHT rate.
83. The new DTT, applicable from 1 January 2013, increases the maximum WHT rate on royalties to 10%, while the old DTT imposed 5% WHT rate. The new DTT amends the definition of ‘royalties’.
84. The lower rate applies to fees for technical services.
85. When interest is paid: (i) by the government of a contracting state, administrative subdivision, or local authority thereof; (ii) to the government of the other contracting state, administrative subdivision, or local authority thereof; or (iii) to the central bank of the other contracting state or a corporate body (including financial institution) controlled or owned by that state, a political or administrative subdivision, or local authority thereof.
86. From 1 July 2013, the rate will be reduced to 5%.
87. If the recipient of the interest is the beneficial owner and interest is paid: (i) to the Republic of Poland or the State of Qatar; (ii) on a loan of whatever kind granted, insured, or guaranteed by a public institution for purposes of promoting exports; (iii) in connection with the sale on credit of any industrial, commercial, of scientific equipment; or (iv) on any loan of whatever kind granted by a bank.
88. The treaty rate is 15% for all types of interest. However, by virtue of a most-favoured-nation clause of the protocol (and since the Chile-Spain treaty provides a reduced rate), the rate is reduced to 5% in respect of interest (i) paid to a bank or insurance company or (ii) derived from bonds or securities that are regularly and substantially traded on a recognised securities market.
89. The general treaty rate is 15%. However, by virtue of a most-favoured-nation clause of the protocol (and since the Chile-Spain treaty provides a reduced rate), the rate is reduced to 10%.
90. The Protocol of 22 March 2012 has not changed the WHT rate in relation to royalties; however, the beneficial owner clause was introduced. Additionally, the new DTT amends the definition of ‘royalties’.

Poland 1605
Poland

**Tax administration**

**Taxable period**
The taxable period is the calendar year (between 1 January and 31 December). Companies are entitled to choose another (than calendar) fiscal year (e.g. between 1 April and 31 March).

**Tax returns**
The annual CIT return should be submitted to the tax office within three months following the end of the tax year.

**Payment of tax**
The same deadline as the CIT return applies to the settlement of the annual CIT liability. In financial terms, the final settlement is not significant since most of the annual liability is paid by CIT advances throughout the tax year.

The CIT advances should be paid for each month by the 20th day of the following month. Entities that started business activities (except for companies organised as a result of certain transformations) and entities whose gross sales revenue (including VAT) in the prior tax year did not exceed EUR 1.2 million are entitled to opt to make advance settlements on a quarterly basis (instead of a monthly basis).

**Tax audit process**
The tax authorities generally shall notify its intention to initiate a tax audit. The inspection shall be initiated not earlier than after seven days and not later than 30 days from the receipt of the notice.

The duration of all audits in one calendar year may not exceed the following:

- For micro entrepreneurs: 12 working days.
- For small entrepreneurs: 18 working days.
- For medium entrepreneurs: 24 working days.
- For large entrepreneurs: 48 working days.

**Statute of limitations**
Tax liability expires five years after the end of the calendar year in which the tax payment deadline passed. There are also situations when the statute of limitations can be suspended or interrupted (e.g. litigation).

**Topics of focus for tax authorities**
The Ministry of Finance publishes tasks for audit authorities every year. It is not an official document but rather an internal ordinance.

The topics of focus for tax authorities include the following:

- Excise duty, especially connected with liquid fuels trade.
- VAT on intra-Community transactions.
- Tax frauds in VAT on domestic transactions.

In practice, the main fields of control held by audit authorities are as follows:

- Validity of the VAT refund.
- Possibility to correct excise duty resulting from post-transaction rebate.
- Correctness of VAT returns concerning scrap sales.
- Correctness of settlements concerning the use of a trademark.
Significant developments

April/May 2013: Further announcements on corporate income tax (CIT) reform

Within the context of the strategy for growth, employment, and industrial development for the period 2013 to 2020, the government has announced more details on the guidelines of the CIT reform underway, following the announcement of the creation of the reform commission in January 2013.

The reform aims at reviewing and simplifying the tax regime of companies by reducing tax obligations, reducing context costs, broadening the taxable basis, reducing the nominal rate (expected reduction to 20% until 2018), and reviewing some of the most relevant provisions focusing on the promotion of national and foreign investment, employment, competitiveness, and internationalisation of Portuguese companies in strategic foreign markets.

A first draft of the project shall be presented at the end of June 2013. Following a period for public consultation between 1 July and 31 August, and a public debate in September, the reform project will be presented to the government by 1 October 2013.

Other short-term measures have been announced, aiming at promoting investment, expected to apply already in 2013, namely:

- Creation of an Extraordinary Tax Credit for Investment.
- Reinforcement of the Tax Regime for Investment Support (RFAI).
- Broadening of the contractual tax benefits.
- Reduction of the response time to binding ruling requests.
- Creation of an International Investor’s Tax Department.
- Introduction of a value-added tax (VAT) cash-based regime, which provisions were already approved by the Council of Ministers in May 2013.

December 2012: 2013 State Budget Law

The 2013 State Budget Law was published in the Official Gazette on 31 December 2012. The measures included generally apply as of 1 January 2013.

The most significant tax measures included are the following.
Portugal

CIT

State surtax
The state surcharge has increased by means of the reduction (from 10 million euros [EUR] to EUR 7.5 million) of the minimum taxable income threshold to which the 5% rate applies.

Limitation on the deductibility of financing expenses
The current rules on thin capitalisation have been replaced with the introduction of a limitation on the deductibility of net financing expenses, which may now only be deductible up to the higher of (i) EUR 3 million or (ii) 30% of the profit obtained before depreciation, net financing expenses, and taxes. This limitation shall apply to all types of financing (banks, private, domestic, and foreign financing), and a transitional period is foreseen under which the limitation on profit will gradually increase. It will be 70% in 2013 and will reach 30% in 2017.

Withholding taxes (WHTs)
WHT rates increased from 15% to 25% for royalties, commissions, service fees, and property income earned by non-residents.

Securities investment funds
The tax rate applicable on the positive balance between capital gains and capital losses obtained by securities investment funds increased from 21.5% to 25%.

Real estate investment funds
The tax rate applicable to property income obtained by real estate investment funds increased from 20% to 25%.

Financial sector contribution
The financial sector contribution was extended to 2013.

Stamp duty

Social games
Stamp duty will be levied at a 20% rate on prize amounts equal to or higher than EUR 5,000 regarding Euromillion, National Lottery, Lotaria Instantânea, Totobola, Totogolo, Totoloto, and Joker.

Tax benefits and incentives

Tax regime for investment support (Regime Fiscal de Apoio Ao Investimento or RFAI)
RFAI will be extended until 31 December 2013.

Incentives for the acquisition of companies in a difficult economic situation
As of 1 January 2013, the regime of incentives applicable to the acquisition of companies in a difficult economic situation, for cases approved by the Coordination Office for the Recovery of Companies (GACRE), may also apply to situations approved by the Institute for the Support of Small and Medium Enterprises and Innovation (IAPMEI) within the framework of the Incentive System for the Revitalization and Modernization of Companies (SIRME).

Generically, the regime foresees the possibility of deduction of tax losses assessed but not yet deducted by the acquired company in the five fiscal years preceding the application of the regime against the taxable income of the acquiring company, in
proportion of its participation in the share capital of the acquired company, capped at 60% of such taxable income and as long as such tax losses are still within the carry forward period allowed by the CIT Code for tax losses.

Special tax regime applicable to debt securities issued by non-resident entities
The CIT exemption on income from debt securities representing public and non-public debt issued by non-residents will be maintained.

The exemption applies if the income is considered to be obtained in Portugal, under Portuguese tax rules, and paid by the Portuguese state as a guarantor of the obligations undertaken by the entities in which it owns a participation, together with other European Union (EU) member states.

This exemption applies to effective beneficiaries that fulfil the requirements stated in the legal diploma of the debt securities regime.

Tax regime applicable to external loans
The CIT exemption applicable on interest derived from Schuldscheindarlehen loan agreements signed by the Public Treasury Institute (IGCP), on behalf of the Portuguese Republic, provided the creditor is not resident in Portugal and has no permanent establishment (PE) herein to which the loan can be allocated to, will be extended to 2013.

The tax exemption depends on the verification by IGCP of the established requirements.

Repo operations
The CIT exemption on gains obtained by non-resident financial institutions on securities’ repo operations, undertaken with resident credit institutions, will be maintained.

The exemption applies if such gains are not attributable to Portuguese PEs of non-resident financial institutions.

Property taxes
The exemptions from property taxes (IMI and IMT) on the acquisition or conclusion of real estate located in areas of business location (Áreas de localização empresarial or ALE) have been extended until 31 December 2013.

Investment funds for urban rehabilitation
The possibility of setting up investment funds for urban rehabilitation that can benefit from the favourable tax regime set in the Statute of Tax Benefits will be maintained until 31 December 2013.

Tax administration

Electronic mailbox
A new penalty, between EUR 100 to EUR 250 for corporate entities, will apply in case of failure to report or for the late reporting to the Portuguese Tax Authorities (PTA) of the adoption of the electronic mailbox.

Term for tax assessments
The term for tax assessments regarding facts related to bank accounts held at branches of Portuguese resident financial institutions located outside the European Union that
Portugal

have not been reported by the taxpayer in one’s annual income tax return of the year in which the taxable event has occurred has been extended from four to 12 years.

Exercise of the right of hearing
The term for the taxpayer to exercise its right of hearing in a preliminary decision of the PTA has increased to a period of between 15 to 25 days (previously, between eight and 15 days).

Legislative authorisations
The following authorisations are granted to the government.

Exit tax provisions
The government is authorised to amend the exit tax regime currently in force, applicable to the transfer of a company’s head-office and place of effective management to an EU or European Economic Area (EEA) member state, as well as to PEs in Portugal ceasing their activities or transferring their assets to an EU or EEA member state residence, in accordance with the decision of the Court of Justice of the European Union, dated 6 September 2012 (Case C-38/10).

The regime to be introduced shall foresee that companies transferring its assets may opt between (i) the immediate payment of the tax due, (ii) the payment of the tax due in instalments, or (iii) the deferral of the payment of the tax due on the difference between the market value and the tax basis of their assets until such assets are extinguished, transferred, or unallocated to the business activities.

In case of the option for the deferral of the payment of the tax due, interest and warranties may be due.

Financial transactions tax (FTT)
The government is authorised to introduce an FTT within the scope of the stamp duty.

FTT shall apply to financial transactions in the secondary markets, such as buy/sell transactions of equities, bonds, money market instruments, units, or shares in funds, derivatives, and other financial instruments, and to the conclusion or amendment of derivatives contracts at the following rates:

- Up to 0.3% as a general rate.
- Up to 0.1% applicable to high frequency trading.
- Up to 0.3% applicable to transactions of financial derivatives.

October 2012: Additional austerity measures
On 29 October 2012, Law no. 55-A/2012, in force as of 30 October 2012, amended the Corporate and Personal Income Tax Codes, Stamp Duty Code, and General Tax Law. The main changes impacting corporate taxpayers are as follows:

CIT
The WHT rate applicable on investment income has increased from 30% to 35% in the following situations:

- Income paid or made available on account of unidentified third parties, unless the real beneficiary is identified.
- Income obtained by non-resident entities that are located in a territory with a more favourable tax regime, as per a list approved by the Ministry of Finances.
The WHT rates applicable on payments made between Portuguese resident companies is levelled at 25%, with the exception of remuneration paid to board members, which remains at 21.5% (currently, only dividends and interest are taxed at 25%; other types of income, such as royalties, service fees, and rental payments, are taxed at 16.5% or 21.5%).

**Stamp duty**
Stap duty will apply in 2013 to the ownership, usufruct, or surface right of urban housing buildings with a tax registration value equal to or higher than EUR 1 million. Stamp duty is assessed on the buildings’ tax registration value at the following rates:

- 0.5% for buildings already evaluated according to the current rules of the IMI Code.
- 0.8% for buildings that are not evaluated according to the current rules of the IMI Code.
- 7.5% for buildings, regardless of their use, owned by companies resident in jurisdictions with a more favourable tax regime.

---

**Taxes on corporate income**

Resident companies in Portugal are taxed on their worldwide income. Tax is also applicable to Portugal-source income attributable to a PE of a non-resident company in Portugal. Special WHT rates apply to income generated in Portugal that is attributable to non-residents without a PE in Portugal (see the Withholding taxes section for more information).

A flat CIT rate of 25% applies on the global amount of taxable income realised by companies resident for tax purposes in Portugal mainland or in the Autonomous Region of Madeira (also applicable to Portuguese PEs of foreign entities).

Entities that do not carry out a commercial, industrial, or agricultural activity as their main activity are subject to a 21.5% CIT rate on the global amount of their taxable income.

A lower CIT rate of 17.5% applies to companies that are tax resident in the Autonomous Region of Azores, including PEs of foreign entities registered therein.

**Surtaxes**
The following surtaxes may also apply:

- A local surtax (Derrama) of up to 1.5% of taxable income, prior to the deduction of any available carryforward tax losses, is levied in certain municipalities. The local surcharge is assessed and paid when filing the CIT return.
- A state surtax (Derrama Estadual) applies at the following rates:
  - 3% applicable to the taxable profit exceeding EUR 1.5 million up to EUR 7.5 million, prior to the deduction of any available carryforward tax losses.
  - 5% applicable to the taxable profit exceeding EUR 7.5 million.

The state surtax is levied on resident taxpayers carrying on commercial, industrial, or agricultural activity and by non-residents with a PE in Portugal, and it is expected to apply until the 2013 tax year; however, its maintenance beyond 2013 is yet unknown. The state surtax is paid in three instalments.
Portugal

A regional surtax (Derrama Regional) applies in the Autonomous Region of Madeira on the same terms as the state surtax.

**Autonomous taxation**
Autonomous taxation applies at different rates on certain expenses incurred by entities subject to CIT. It is self-assessed in addition to CIT, and even if no CIT is due, at the rates provided below:

- Representation and entertainment expenses: 10%.
- Company car expenses: 10%.
- Mileage allowance: 5%.
- Per diem allowance: 5%.
- Non-documented payments: 50% (70% for partially or fully exempted taxpayers).
- Company car expenses for which acquisition cost exceeds certain limits as established in the law: 20%.
- Dividends distributed to wholly or partially exempt taxpayers regarding participations held for less than one year: 25%.
- The total amount of the expenses incurred with any compensation paid as a result of the termination of functions of managers or board members, if not related to the productivity targets previously established under the existing labour relation; or the amount that exceeds the remuneration that would be received by the manager or the board member until the term of the labour agreement, in case of redundancy prior to that term; or in all cases, if the liability for the payment is shifted to another entity: 35%.
- The total amount of the expenses incurred with bonuses paid to managers or board members if the respective amount corresponds to more than 25% of the annual salary and exceeds EUR 27,500: 35%.

All the above-mentioned rates of autonomous taxation are increased by 10% if the taxpayer has tax losses in the same tax year in which the relevant expenses are incurred.

**Corporate residence**
A resident company is one whose head office or effective management is located in Portugal.

**Permanent establishment (PE)**
Under Portuguese tax law, any fixed place of business in Portugal through which the business of an enterprise is wholly or partly carried on is deemed to constitute a PE in Portugal.

A fixed place of business comprises, among others, a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, and also a building site or a construction or installation project if it lasts more than six months (time period may differ considering the applicable tax treaty).

A PE may also be deemed to exist in case of a person (a dependent agent), which is not an independent agent, acting, in the Portuguese territory on behalf of a company, with powers to intermediate and conclude binding contracts for that company, within the scope of its business activity.
No PE should exist where a fixed place of business in Portugal is used solely for carrying out ancillary or preparatory activities, or, in the case of a company, carries out its activities in Portugal through a broker, general commission agent, or other agent of an independent status, acting in the normal course of its business, bearing all related business risks.

Additionally, the term PE shall be deemed not to include the following actions:

- Use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display, or delivery.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise.
- Maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise, or of collecting information, for the enterprise.
- Maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character.
- Maintenance of a fixed place of business solely for any combination of activities mentioned above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

**Other taxes**

**Value-added tax (VAT)**

There are three levels of VAT rates: The standard rate of 23% (22% in the Autonomous Region of Madeira; 16% in the Autonomous Region of the Azores), the intermediate rate of 13% (12% in Madeira; 9% in the Azores), and the reduced rate of 6% (5% in Madeira; 4% in the Azores).

The intermediate rate is applicable to supplies of some foodstuffs and to admissions to concerts, shows, theatre, cinemas, circus, and bullfighting. The reduced rate is applicable to the supplies of some basic foodstuffs, periodical publications, books, pharmaceutical products, hotel accommodation, agricultural goods, and passenger transport.

Exports and intra-EU supplies of goods are zero-rated.

Supplies of goods are subject to VAT in Portugal if the goods are located in Portugal at the moment their transport or dispatch to the customer begins. If the goods are located in Portugal and there is no transport or dispatch, then supplies of the goods are subject to VAT at the moment they are put at the disposal of the customer.

Supplies of services are subject to VAT in Portugal whenever: (i) acquired by taxable persons that have their business, a fixed establishment, domicile, or residence in Portugal to which the services are provided (B2B rule) or (ii) supplied to non-taxable persons if the provider has established its business, a fixed establishment, domicile, or residence in Portugal from where these services are provided (B2C rule).

Independent of the place where the service provider and the acquirer are established and independent of the acquirer being a taxable person or not, the supply of the following services is subject to VAT in Portugal if physically carried out in Portugal: services connected with immovable property; passenger transport for the distances
Portugal

covered in Portugal; admission to cultural, artistic, scientific, sporting, educational, entertainment, or similar events; restaurant and catering services; and short-term hiring of a means of transport (up to 30 days, for boats up to 90 days) if the means of transport is put at the disposal of the customer in Portugal.

The supply of the following services is subject to VAT in Portugal if physically carried out in Portugal and if the acquirer is a non-taxable person: transport of goods, other than intra-Community transport of goods, for the distances covered in Portugal; intra-Community transport of goods, if the place of departure is Portugal; valuations of and work on movable property; services and ancillary services relating to cultural, artistic, sporting, scientific, educational, entertainment, or similar activities, such as fairs and exhibitions, including the supply of services of the organisers; and hiring of a means of transport, other than short-term hiring, when the acquirer is established, has one's permanent address, or usually resides in Portugal.

In May 2013, the Council of Ministers approved the VAT cash-based accounting scheme, which will, in principle, enter into force on 1 October 2013. Access to the regime is subject to requirements, and it allows a deferral of the payment of the VAT to the Revenue until effective receipt of funds from the debtors, instead of paying the VAT upon issuance of the invoice. However, at the end of each year, the taxpayer must pay the VAT charged on the invoices issued that have not yet been paid by customers. The deduction of the input VAT is allowed only when the invoice is paid. The legislation enacting the regime is yet to be published.

**Customs duties**

Custom duties are regulated by the Community Customs Code. Therefore, the rules foreseen for the import and export of goods in Portugal are similar to the rules applicable in other EU member states.

The custom duties’ rates applied in Portugal vary according to the origin of the goods. There are several origin agreements that exempt from custom duties the importation of goods from certain countries or that determine reduced rates.

**Excise duties**

There are different types of excise duties, such as:

- petroleum and energy products tax
- alcohol and alcoholic beverages tax
- tobacco tax, and
- vehicle tax.

The tax applicable to petroleum and energetic products depends on the goods supplied, and it varies between EUR 650 per 1,000 litres for leaded petrol and EUR 2.78/gJ for natural gas used as fuel.

As of 1 January 2013, a new excise duty applies on the supply of natural gas to final consumers at the rate of EUR 0.30/gJ.

The tax applicable to alcohol and alcoholic beverages also depends on the type of good supplied, varying between EUR 7.11 per hectolitre for a certain type of beer and EUR 1,031.57 per hectolitre for spirits. In 2013, excise duties on alcoholic beverages increased by 7.5% and excise duties on other beverages subject to excise duty increased by 1.3%.
The tax applicable to tobacco also varies in accordance with the type of product supplied, namely it varies between 60% of the sale price for fine-cut tobacco for the rolling of cigarettes and 13% of the sale price for cigars and cigarillos.

The tax applicable to vehicles varies in accordance with the type of vehicle, the fuel used, and the cylinder of the vehicle. The higher taxation is applicable for cars used for the transport of passengers using petrol as fuel and the lower taxation is applicable for motorcyles.

An excise duty on consumption of electricity is due by producers, traders, self-producers, and consumers that buy electricity in organised markets. As of 1 January 2013, the minimum level of the rates on electricity increased (previously between 0 and EUR 1 per MWh) as follows:

- Minimum level: from EUR 0.5/kw to EUR 1/kw.
- Maximum level: from EUR 1/kw to EUR 1.1/kw.

**Property tax (Imposto Municipal sobre Imóveis or IMI)**

IMI is a municipal property tax upon which the taxable basis is calculated by reference to a formula based on objective criteria, such as the construction cost per square metre, area, age, construction quality, and comfort indexes.

Following the Memorandum of Understanding between the Portuguese Republic and the European Commission, the European Central Bank, and the International Monetary Fund (IMF), which covers the financial assistance to be granted to Portugal by the European Fund for Financial Stability, reassessments of the tax value of real estate are expected to be concluded in the first quarter of 2013, as per recent information from the PTA (increase to close the market value).

IMI is levied at the following rates, in addition to corporate or individual tax assessed on actual income generated by real estate:

<table>
<thead>
<tr>
<th>Property type</th>
<th>IMI (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Urban real estate</td>
<td>0.5 to 0.8</td>
</tr>
<tr>
<td>Urban real estate (valued under the new rules)</td>
<td>0.3 to 0.5</td>
</tr>
<tr>
<td>Rural real estate</td>
<td>0.8</td>
</tr>
</tbody>
</table>

Note that the tax rate of IMI on properties owned by entities resident for tax purposes in a black-listed territory is 7.5%.

The list of countries, territories, and regions that provide a more favourable tax regime (i.e. black-listed territories) is presented below:

- Andorra (1)
- Anguilla (1)
- Antigua and Barbuda (1)
- Netherlands Antilles
- Aruba
- Ascension Island
- Bahamas
- Bahrain
- Barbados
- Belize (1)
- Bermuda (1)
- Bolivia
- Brunei
- Cayman Islands (1)
- Channel Islands (1, 2)
- Cocos (Keeling)
- Cook Islands
- Costa Rica
- Djibouti
- Dominica (1)
- Falkland Islands or Malvinas
- Fiji Islands
- Gambia
- Grenada
- Gibraltar (1)
- Guam
- Guyana
- Honduras
- Hong Kong
- Jamaica
Notes

1. The Portuguese authorities have signed tax information exchange agreements (TIEAs) with these jurisdictions (in case of the Channel Islands, only with Guernsey and Jersey). The following TIEAs are in force: Andorra, Bermuda, Cayman Islands, Gibraltar, Jersey, Isle of Man, and Saint Lucia.

IMI rates are increased three times when the urban real estate is vacant for a period of over one year.

**Property transfer tax (Imposto Municipal sobre as Transmissões Onerosas de Imóveis or IMT)**

IMT is a municipal tax payable in Portugal on the onerous transfer of local real estate. The tax is levied on the purchaser, and the taxable basis is the same as for IMI or the price agreed upon by the contracting parties, whichever is higher.

The IMT rates are set at 5% for rural real estate and 6.5% for urban real estate and land for construction. For non-residents located in black-listed jurisdictions, the rate is 10%.

**Stamp duty**

Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis. Important examples include the following:

<table>
<thead>
<tr>
<th>Item</th>
<th>Stamp duty (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Loans (on the principal):</td>
<td></td>
</tr>
<tr>
<td>With determined term, over one year</td>
<td>0.5 to 0.6</td>
</tr>
<tr>
<td>Current account/overdraft/credit with undetermined term or determined term under one year</td>
<td>0.04 per month or fraction</td>
</tr>
<tr>
<td>Credit to consumers:</td>
<td></td>
</tr>
<tr>
<td>With a term up to one year/current account, overdraft, or other form of credit with undetermined term</td>
<td>0.07 per month or fraction</td>
</tr>
<tr>
<td>With a term equal to or higher than one year</td>
<td>0.9</td>
</tr>
<tr>
<td>With a term equal to or higher than five years</td>
<td>1</td>
</tr>
<tr>

<td>Stamp duty (%)</td>
</tr>
<tr>
<td>---------------------------------------------------------------------</td>
<td>----------------</td>
</tr>
<tr>
<td>Guarantees (1):</td>
<td></td>
</tr>
<tr>
<td>Undetermined/five or more years</td>
<td>0.6</td>
</tr>
<tr>
<td>Over one year</td>
<td>0.5</td>
</tr>
<tr>
<td>Under one year or with undetermined term</td>
<td>0.04 per month or fraction</td>
</tr>
<tr>
<td>Bank interest and fees</td>
<td>4</td>
</tr>
<tr>
<td>Insurance premiums</td>
<td>3 to 9</td>
</tr>
<tr>
<td>Real estate purchases and sales</td>
<td>0.8</td>
</tr>
<tr>
<td>Donations and inheritances</td>
<td>10</td>
</tr>
<tr>
<td>Sale of business as a going concern</td>
<td>5</td>
</tr>
<tr>
<td>Social game prizes (on the amount exceeding EUR 5,000)</td>
<td>20</td>
</tr>
<tr>
<td>Ownership, usufruct, or surface right of urban housing</td>
<td>0.5/0.8/7.5</td>
</tr>
<tr>
<td>buildings whose tax registration value is equal to or higher than EUR 1 million (2)</td>
<td></td>
</tr>
</tbody>
</table>

Notes

1. Guarantees provided in favour of the state or social security institutions upon the payment of debt by instalments under enforcement procedures or relating to the recovery of tax and social security credits are exempt from stamp duty in 2013.
2. The rates apply as follows:
   - 0.5% for buildings already evaluated according to the current rules of the IMI Code.
   - 0.8% for buildings that are not evaluated according to the current rules of the IMI Code.
   - 7.5%, for buildings, regardless of their use, owned by companies resident in jurisdictions with a more favourable tax regime.

**Financial sector contribution**

Portuguese headquartered credit institutions, Portuguese subsidiaries of foreign credit institutions, as well as branches in Portugal of foreign credit institutions, except EU residents, are subject to a financial sector contribution, applicable on a taxable base composed as follows:

- **Base I**: Liabilities, defined as the set of elements accounted for in the balance sheet representing liabilities towards third parties, irrespective of their form or nature (excluding, amongst others, items accounted for as equity, liabilities for defined benefit retirement plans; provisions, liabilities concerning the revaluation of financial derivatives).
- **Base II**: The notional amount of off-balance sheet financial derivatives, excluding hedging derivatives and back-to-back derivatives.

The financial sector contribution is applicable at 0.05% on Base I and at 0.00015% on Base II.

**Social security contributions**

Employers are required to make monthly social security contributions at the standard rate of 23.75% on the monthly gross remuneration of their employees.

Social security contributions are deductible for CIT purposes.

**Branch income**

Branch profits are taxed on the same basis as corporate profits. Income remitted by a branch to the head office is not subject to taxation.
**Income determination**

Taxable profit is based on accounting income adjusted according to specific provisions of the tax legislation, when applicable.

**Inventory valuation**

Inventories are valued at the lower of the following values: cost or net realisable value. The first in first out (FIFO) and average-cost methods of valuation are accepted. The last in first out (LIFO) method is not allowed.

Inventory adjustments are deductible for tax purposes on the amount accounted for in the tax year, capped at the difference between the acquisition or production value and, if lower, the net realisable value (duly documented) with reference to the balance sheet.

**Capital gains**

The positive net difference between capital gains and capital losses arising from the disposal of fixed assets or shares held for more than one year is taxed as part of normal income.

Capital gains and capital losses are determined by the difference between the sales proceeds, deducting any related cost, and the acquisition value, deducting impairment losses and tax deductible depreciation or amortisation, adjusted by the inflation index (in the case of at least two years of ownership).

Only half the amount of the negative difference between capital gains and capital losses arising from the disposal of shares or other negative net worth variations related to participations or other parts of the equity of a company, such as supplementary capital contributions, is considered for purposes of assessing the taxable income.

In certain circumstances, only 50% of the net gains on disposal of tangible fixed assets or shares are taxed, provided the sales proceeds are reinvested.

Capital losses regarding shares owned for less than three years when acquired from related companies, from black-listed entities, or from Portuguese companies subject to a special tax regime are not deductible. Capital losses are also not tax deductible if the shares are transferred to related parties to black-listed entities or to Portuguese resident entities subject to a more favourable tax regime.

Capital gains/losses realised by holding companies (Sociedade Gestora de Participações Sociais or SGPS) are not taxed/deductible if the underlying shares have been held for more than one year (or three years if the shares were acquired from related parties, offshore companies, or Portuguese resident entities subject to a special tax regime).

**Dividend income**

For Portuguese-resident companies holding shares in other Portuguese companies, or in companies resident in Portuguese African speaking countries, or in companies resident in the EU or the EEA (meeting the EU Parent/Subsidiary Directive 2011/96/CEE), 100% of the dividends distributed are excluded from the taxable income. In case of Portuguese, EU, and EEA subsidiaries, the shares should represent at least 10% of total capital and have been held for at least one year (this minimum holding period should be met before or after distribution).
This also applies to regional development corporations (Sociedades de desenvolvimento regional), investment companies, securities dealers, and insurance companies (where technical reserves are concerned).

The deduction of the dividends when distributed by Portuguese, EU, or EEA subsidiaries only applies if the underlying income has been subject to 'effective taxation'. According to the PTA, it is considered that profits have been subject to 'effective taxation' when they:

- have been subject to Portuguese CIT or to a comparable tax (no minimum amount of tax effectively paid is required)
- have been taxed at the level of the immediate subsidiary distributing the profits, or at any other lower tier of the corporate structure, or
- refer to profits distributed by a EU or EEA subsidiary, which are subject and not exempt from CIT.

The burden of proof lies with the Portuguese parent company (recipient of the dividends), which should be able to demonstrate that the profits received derive from income that has been effectively subject to taxation.

**Interest income**

Interest income obtained by Portuguese taxpayers is taxed as part of normal income and taxed at the standard CIT rate. Any WHT incurred in interest income received is treated as a payment on account of the final CIT liability, refundable even if no CIT is due.

**Foreign income**

A Portuguese company is taxed on all its foreign income. Taxes paid abroad can be offset against corresponding Portuguese tax (see Foreign tax credit in the Tax credits and incentives section for more information).

There are no provisions concerning tax deferral of income earned abroad.

### Deductions

**Depreciation and amortisation**

The qualifying cost of an asset for tax purposes is the acquisition or production cost.

Depreciation must be computed by using the straight-line method or the declining-balance method. The latter cannot be applied to buildings, passenger vehicles, furniture, social welfare equipment, or second-hand assets. Straight-line rates of depreciation are normally consistent with rates privately used by business and industry and are increased, for the purposes of applying the declining-balance method, by coefficients of:

- 1.5 if assets have a useful life of less than five years.
- 2 if useful life is five or six years.
- 2.5 for useful lives in excess of six years.

Different depreciation methods may be applied without previous approval from the PTA (annual depreciation cannot, however, exceed the depreciation resulting from using either the straight-line or declining-balance methods).
Some examples relating to the maximum straight-line depreciation rate are as follows:

<table>
<thead>
<tr>
<th>Type of asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office building</td>
<td>2</td>
</tr>
<tr>
<td>Industrial building</td>
<td>5</td>
</tr>
<tr>
<td>Electronic equipment</td>
<td>20</td>
</tr>
<tr>
<td>Computers</td>
<td>33.33</td>
</tr>
<tr>
<td>Ordinary tool and paintings</td>
<td>25</td>
</tr>
<tr>
<td>Engines and machine tools</td>
<td>12.5</td>
</tr>
<tr>
<td>Office equipment</td>
<td>20</td>
</tr>
<tr>
<td>Furniture</td>
<td>12.5</td>
</tr>
<tr>
<td>Software</td>
<td>33.33</td>
</tr>
<tr>
<td>Light passenger vehicles</td>
<td>25</td>
</tr>
</tbody>
</table>

Rates can be reduced by 50% in any one year at the taxpayer’s option. If the reduction is more than 50%, the difference is allowed for tax purposes at a future date. Any depreciation in excess of the maximum allowed must be subsequently adjusted in the accounting records to be allowed for tax purposes in future years. A total of 60% of additional depreciation on revaluation of fixed assets, as permitted by law from time to time, is allowed for tax purposes.

Depreciation rates of tangible assets may be increased by 25% in the case of companies with a schedule of two shifts (for three shifts, 50%), given the faster deterioration of those assets.

Assets with an acquisition value lower than EUR 1,000 can be depreciated in the acquisition year, unless the assets are part of a set of elements that should be depreciated as a whole.

Depreciation of yachts and airplanes that are not essential for business activities is not allowed as a cost for tax purposes.

Depreciation of passenger cars and certain other vehicles on the part of their cost of acquisition that exceeds certain amounts (as defined by law), with reference to their acquisition value, is also disallowed as a cost for tax purposes. The following caps apply (i.e. disallowed cost above the values below):

- EUR 29,927.87 of acquisition cost, in the case of vehicles acquired until 31 December 2009.
- EUR 40,000 of acquisition cost, in the case of vehicles acquired between 1 January 2010 and 31 December 2010.
- EUR 30,000 of acquisition cost, in the case of vehicles acquired between 1 January 2011 and 31 December 2011 (a limit of EUR 45,000 applies to electric vehicles).
- EUR 25,000 of acquisition cost, in the case of vehicles acquired from 1 January 2012 onwards (a limit of EUR 50,000 applies to electric vehicles).

Development expenses, patents, trademarks, licences, and similar rights may be amortised for tax purposes if acquired for a limited period of time.

Depreciation of non-consumable biological assets is tax deductible.
Expenses relating to assets generated internally are deductible for tax purposes in the tax year in which the cost is incurred.

**Goodwill**

Goodwill cannot be amortised for tax purposes (unless subject to an effective economic amortisation approved by the PTA).

**Start-up expenses**

Start-up and research expenses are deductible for tax purposes in the respective tax year. Transitional adjustments of remaining start-up expenses incurred prior to the adoption of the new accounting system in 2010 (*Sistema de Normalização Contabilística* or SNC) should be written off the balance sheet against equity and are deductible over a five-year period (until 2014).

**Limitation on the deductibility of financing expenses**

As of 1 January 2013, companies may only deduct net financing expenses up to the higher of the following limits:

- EUR 3 million or
- 30% of the earnings before depreciations, taxes, and net financing expenses.

Under the transitional period foreseen, the 30% limit only applies in 2017; 70% will apply in 2013, 60% in 2014, 50% in 2015, 40% in 2016, and 30% in 2017. In the cases where the taxable year is less than a calendar year, the EUR 3 million limit is reduced proportionally to the duration of the taxable year.

Besides Portuguese tax resident entities, PEs of non-resident entities are also covered by the scope of this rule. Entities subject to the supervision of the Portuguese Central Bank (Banco de Portugal) and the Portuguese Insurance and Pension Fund Supervisory Authority (Instituto de Seguros de Portugal), as well as Portuguese branches of financial entities or insurance companies resident for tax purposes in the European Union, are excluded from this rule.

No distinction is made between bank and intra-group financing, domestic or foreign financing (EU or non-EU).

Financing expenses considered as excessive (not deductible) in a certain fiscal year may be deductible in the following five fiscal years, provided that, together with the net financing expenses of that year, the above-mentioned limits are not exceeded.

Additionally, where financing expenses do not exceed 30% (or the applicable percentage) of the earnings before depreciations, net financing expenses, and taxes, the unused difference is added to the maximum deductible amount in the following five tax years, until its total deduction.

For the purposes of the regime, net financing expenses consist of, among others, any amounts due in connection to the remuneration of financing, including interest on overdraft facilities, short-term loans, bonds, financial expenses related to financial leases, or exchange losses, deducted from the profits or gains of the same nature.

Where the special regime of group taxation applies, the calculation must be made individually, per company.
Interest on shareholder loans
If the rate applicable to interest and other compensation regarding loans provided by the shareholders to the company is higher than the Euro Interbank Offered Rate (EURIBOR) 12-month rate rounded up with a spread of 1.5% (at the date the loan was granted), the amount paid in excess is not tax deductible. This rule does not apply when the shareholder is a resident of a tax treaty country or when the interest rate is at arm’s length under the transfer pricing provisions.

In the case of small and medium-sized companies, shareholders’ loans with an interest rate of the EURIBOR 12-month rate plus a spread up to 6% are tax deductible.

Bad debt
Impairment losses on doubtful debts are deductible for tax purposes when an insolvency or recovery has been requested or the credits have been claimed in court.

The annual amount of accumulated impairment losses on doubtful debts due for more than six months, with evidence that measures towards its perception were taken, is capped at the following percentages of the debts:

- More than 6 and less than 12 months: 25%.
- More than 12 and less than 18 months: 50%.
- More than 18 and less than 24 months: 75%.
- More than 24 months: 100%.

Amounts guaranteed by insurance or mortgage, or due or secured by the state, autonomous regions, or municipalities, or due by related parties (e.g. 10% shareholding) are not considered as doubtful debts, and the respective impairment loss is disallowed for tax purposes.

The ageing of bills of exchange is calculated from the date when the respective payment is due.

Uncollectable debts are allowed as tax deductible costs if supported under insolvency, recovery enforcement, or in an out-of-court conciliation procedure for the viability of insolvent companies or companies in a difficult economic situation (mediated by the Institute for the Support of Small and Medium-Sized Enterprises or IAPMEI). This rule applies to the amount of the uncollectable debts that were not deducted for tax purposes as impairment losses (or for which the amount was insufficient).

Charitable contributions
Donations to authorised charitable institutions are allowable up to 0.8% of turnover, with the possibility of the cost being raised up to 150%. Donations to authorised cultural institutions are allowable up to 0.6% of turnover, with the possibility of the cost being raised up to 130%.

Donations to the state, municipalities, and foundations where the state or municipalities participate in the initial capital are fully deductible, with the possibility of the cost being raised up to 140%. Special application may be made by certain entities in order to be included under the referred regime.

Donations of computers, software equipment, training, and consultancy in the area of computers granted to the state, municipalities, foundations, museums as well as to authorised charitable and cultural institutions are allowable up to 0.8% of turnover, with the possibility of the cost being raised up to 140%.
**Vacation accrual**

Vacation allowance is tax deductible in the year in which the benefit accrues, regardless of the year in which payment is made.

**Pension expenses**

Pension, invalidity, and health schemes are tax deductible up to a rate of 15% of annual staff expenses, provided they are available to all employees and the management and disposition of the benefits are outside the control of the taxpayer, such as under an insured scheme with vested benefits.

**Fines and penalties**

Fines and penalties for infractions that have not a contractual nature, including late assessment interest, are disallowed for CIT purposes.

**Taxes**

All taxes other than CIT, state surtax (Derrama Estadual), and local surtax (Derrama) constitute a normal business expense.

**Other significant items**

The costs borne from the acquisition of social passes are regarded as tax-deductible costs to the extent the employer attributes them on a general basis.

Uninsured losses, including indemnities to third parties, are disallowed unless the risk could not be insured.

Non-documented expenses are not tax deductible and are subject to a 50% tax surcharge for fully taxable entities.

In the course of 2013, exceptional write-off arising from the replacement of invoicing programs or equipments, replaced due to software certification requirements, are considered as impairment losses, without the need of obtaining an approval by the PTA.

In the course of 2013, expenses on the acquisition of certified invoicing programs and hardware will be accepted as a cost for tax purposes in the relevant fiscal year.

**Net operating losses**

Tax losses generated prior to 2012 can be carried forward for four years (six years in the case of tax losses generated prior to 2010).

Tax losses generated from 2012 onwards can be carried forward for five years. As of the tax year of 2012, the deduction of tax losses carried forward (even in case of tax losses generated before 2012) is capped at 75% of the taxable profit assessed in the relevant fiscal year. The unrelieved tax losses can be carried forward for the respective carryforward period (six years, four years, or five years, depending on whether the tax losses were generated respectively before 2010, in 2010 and 2011, or from 2012 onwards).

Carryback of losses is not allowed.

The tax losses carried forward are lost if one of the following situations occurs:

- Change in direct ownership of the company of at least 50% shareholding or voting rights (not applicable in case of changes within the same group of companies, under certain conditions).
Portugal

- Change in the scope of the business as stated in the articles of association or, regardless of any formal change, if the nature of the activity carried out by the company is substantially modified.

In special cases of economical merits, the Ministry of Finance may authorise the use of tax losses upon a request filed by the taxpayer before those changes occur.

**Payments to foreign affiliates**
A Portuguese corporation is allowed to deduct royalties, interest, and other costs paid to foreign affiliates, provided the amounts are at arm's length. Service fees paid are allowed if there is adequate proof that the service was effectively rendered, has economic substance, and qualifies as indispensable for the generation of taxable revenue, as well as if the amount is at arm's length.

**Payments to non-residents subject to a more favourable tax regime**
Payments made or due, indirectly, to non-resident entities subject to a more favourable tax regime, when the taxable person has or should have had knowledge of the final purpose given to such payments, will be non-deductible for tax purposes, except if the taxpayer demonstrates that such charges relate to genuine transactions and are not of an abnormal or exaggerated amount. Such knowledge is presumed whenever there are special relations between the taxpayer and the entities subject to the more favourable tax regime or between the taxpayer and the legal representative, fiduciary, or intermediary.

---

**Group taxation**

**Special regime for group taxation**
Taxation under the special tax regime for groups of companies is available, upon the filing of a special form with the PTA, to companies with head office and effective management in Portugal.

The group taxation regime may apply, provided one of the companies, directly or indirectly, holds 90% or more of the statutory capital of the others and more than 50% of the voting rights. Tax grouping generally enables the group companies to offset losses incurred by one company against profits of another company.

Tax losses obtained prior to the beginning of the tax grouping can be carried forward only against the particular company's taxable income (for the carryforward of tax losses regime, see Net operating losses in the Deductions section).

To be taxed under this regime, the group companies must meet the following conditions:

- Must be tax resident in Portugal.
- Must be subject to the normal regime of taxation at the highest corporate tax rate.
- Must maintain a minimum holding participation of 90%.
- All companies must be held by the parent company for more than one year (excluding newly incorporated companies).
- Cannot be dormant for more than one year.
- Cannot be dissolved or insolvent.
- Cannot have tax losses in the three years prior to the regime application, unless the companies have been held by the parent company for more than two years.
- Cannot have a tax period different from that of the parent company.
Additionally, the parent company:

- should not be controlled by any other Portuguese-resident company that fulfils the requirements to be the parent company and
- should not have renounced to the application of this regime in the three previous years.

When the regime comes to an end or when one company ceases to qualify for this regime, the tax losses obtained during the regime cannot be carried forward and deducted against future individual taxable income of the companies.

The parent company is responsible for demonstrating that the requirements for the application of the group taxation regime are met.

**Transfer pricing**

The PTA is entitled to adjust taxable income if the taxpayer and another individual or entity, due to their special relationship, have established particular conditions that diverge from the conditions normally agreed upon between independent entities and distort the results that would arise if those relations were at arm’s length. Portugal’s transfer pricing legislation broadly follows the Organisation for Economic Cooperation and Development (OECD) guidelines.

Companies with sales and other profits higher than EUR 3 million are required to prepare transfer pricing documentation, which should be filed with the PTA if requested. Penalties arise from non-compliance with this obligation.

An advance pricing agreement (APA) mechanism has been introduced for taxpayers and PTA to establish agreements on a taxpayer’s future transfer pricing policy. This aims to guarantee compliance with the arm’s-length principle. This regime applies to transactions carried out with related parties and between a PE and the respective head office.

The conclusion of an APA implies the payment of a charge calculated with reference to the taxpayer’s turnover, capped at EUR 35,000. This charge is reduced by 50% in the case of a renewal or revision of an existing APA.

The assessment of an APA procedure takes 180 days for unilateral APAs, and 360 days for bilateral or multilateral APAs. This period is reduced to 100 business days for APAs concluded in connection with a relevant investment project in Portugal, as foreseen in the Tax Investment Code (*Código Fiscal do Investimento*).

For the PTA to confirm compliance of the transfer pricing method(s) with the terms and conditions set out in the APA, the taxpayer must prepare an annual report. The report must be made available to PTA before the last business day of May in the year following that in which the transactions took place (i.e. when the tax year corresponds to the calendar year). Failure to comply invalidates the APA.

**Thin capitalisation**

Thin capitalisation rules have been revoked following the adoption of new rules for the limitation on the deductibility of financing expenses, effective as of 1 January 2013. See [Limitation on the deductibility of financing expenses in the Deductions section for more information](#).
Controlled foreign companies (CFCs)
Profits or income derived by an entity resident in a black-listed offshore jurisdiction, or in a jurisdiction where it is subject to an effective tax rate equal to or lower than 60% of the Portuguese standard CIT rate, are imputed to the Portuguese taxpayer, provided it holds, directly or indirectly, at least 25% of the share capital (10% if more than 50% of the capital is held by Portuguese taxpayers), voting rights, or rights on income or assets of that entity. Upon distribution of the profits, a deduction is available for previously imputed income.

CFC rules also apply if the controlled entity (as defined above) is held by a Portuguese entity through a legal representative, fiduciary, or intermediary.

CFC rules do not apply if the CFC is resident in another EU country or in an EEA member state (bound to administrative cooperation on tax matters), provided that there are valid economic reasons underlying the incorporation and running of such company and it carries out agricultural, commercial, industrial, or services activities.

Upon a dividend distribution by the CFC, the tax credit of the tax paid abroad, which is not used, cannot be carried forward to subsequent tax years.

Tax credits and incentives

Foreign tax credit
Taxes paid abroad can be offset against corresponding Portuguese tax, capped at the lower of (i) the tax liability corresponding to the foreign income, net of costs directly or indirectly incurred, or (ii) the foreign tax paid. In both cases, it is limited to the foreign tax as foreseen in the applicable double-taxation treaty. No carryforward of foreign tax is allowed.

General tax benefits and incentives

Contractual tax incentives
Relevant investment projects up to 2020 (minimum investment of EUR 5 million) that qualify for strategic economic interest and promote the creation of jobs are eligible for tax incentives, as foreseen in the Tax Benefits Code and the Investment Tax Code. These are granted on a case-by-case basis under a government contract for a period not exceeding ten years and include a tax credit of 10% to 20% of the investment and exemptions or reductions from property transfer tax, property tax, and stamp duty.

Investment funds
Portfolio investment funds are taxable at the following final rates:

<table>
<thead>
<tr>
<th>Portfolio investment fund activity</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Capital gains (net of capital losses) on shares held less than 12 months, realised by closed or mixed investment funds</td>
<td>25</td>
</tr>
<tr>
<td>Capital gains (net of capital losses) on shares held greater than 12 months, realised by open investment funds</td>
<td>25</td>
</tr>
<tr>
<td>Other income:</td>
<td></td>
</tr>
<tr>
<td>Earned in Portugal</td>
<td>20/25</td>
</tr>
<tr>
<td>Earned abroad</td>
<td>20/25</td>
</tr>
</tbody>
</table>
Real estate investment funds are subject to corporate tax at the following rates:

<table>
<thead>
<tr>
<th>Real estate investment fund activity</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rents (net of expenses)</td>
<td>25</td>
</tr>
<tr>
<td>Real estate capital gains (net of capital losses)</td>
<td>12.5</td>
</tr>
<tr>
<td>Capital gains (net of capital losses) on shares held less than 12 months, realised by closed or mixed real estate investment funds</td>
<td>20</td>
</tr>
<tr>
<td>Capital gains (net of capital losses) on shares held greater than 12 months, realised by open real estate investment funds</td>
<td>0</td>
</tr>
<tr>
<td>Earned in Portugal</td>
<td>20/25</td>
</tr>
<tr>
<td>Earned abroad</td>
<td>20/25</td>
</tr>
</tbody>
</table>

Income paid by portfolio and real estate investment funds to individuals is not subject to taxation. Income paid to companies is taxed as normal income, and taxes paid by the fund are considered as payment on account against the final CIT due.

**Funds of funds**
Income paid by investment funds of funds is exempt from CIT. Other income is subject to the same taxation as investment funds. Income received by individuals is not subject to further taxation. Income received by companies is taxed at the standard CIT rate on 40% of the respective amount as normal income.

**Pension funds**
Pension funds are exempt from CIT and IMT.

The CIT exemption is applicable to pension funds incorporated under the Portuguese law as well as to pension funds established in another EU country or in an EEA member state (bound to administrative cooperation on tax matters) that cumulatively fulfil the following requirements:

- Exclusively assure the payment of retirement pensions granted from elderly, handicapped, surviving, pre-retired, health, and post-employment benefits, as well as death benefits when complementary and ancillary to the previously mentioned.
- Are the effective beneficiaries of the income.
- In the case of dividend distributions, the related shareholding should have been held for a consecutive one-year period.

**Contractors for North Atlantic Treaty Organization (NATO) infrastructures**
Contractors for NATO infrastructures are exempt from CIT.

**Net young employment creation**
150% of the costs related to net increase job creation, under labour contracts without term, for employees up to 35 years (including) of age and for long-term unemployed individuals may be deducted from taxable income. For this purpose, the fixed remunerations paid and the contributions made by the employer to social security should be considered. The maximum amount of annual increase on deductible costs for each eligible employee is 14 times the national minimum retribution (EUR 485 in 2013).
Portugal

The increase in 50% of the expenses incurred with the same employer is applicable to more than one employee, provided that there are no special relations.

This tax benefit is not cumulative with any tax benefits or other incentives (e.g. social security) concerning the same employee.

This deduction applies for a period of five years for each employee.

Research and development (R&D) (Sistema de Incentivos Fiscais em Investigação e Desenvolvimento Empresarial or SIFIDE II)

Portuguese tax resident companies carrying out commercial, industrial, or agricultural activities, and non-resident companies with a PE in the Portuguese territory, are allowed to deduct from the CIT due, up to the respective amount, the value of eligible expenses incurred with R&D, in a double percentage as follows:

- **Base rate:** 32.5% of the R&D expenses incurred; this rate is increased by 10% in case of small and medium-sized companies that do not benefit from the incremental rate of 50% (applicable to entities that had completed two years of activity).
- **Incremental rate:** 50% of the difference between the R&D expenses made in the tax year and the average amount of the R&D expenses made in the previous two years, up to the limit of EUR 1.5 million.
- **The incremental rate is increased to 70% and the deduction limit is increased to EUR 1.8 million with respect to expenses incurred with the employment of people with a doctorate degree.**

Expenses that, due to insufficient tax due, cannot be deducted in the tax year they were incurred can be carried forward for six years.

Eligible expenses related to allowances paid to personnel directly involved with R&D tasks are capped at 55% of the operational expenses incurred.

The deductibility of eligible expenses related to allowances paid to personnel directly involved with R&D tasks is capped at 90% of the respective value in the case of entities that are not small and/or medium-sized enterprises.

Expenses related to demonstrations are eligible for the SIFIDE II regime, provided they are notified up front.

Expenses incurred with the execution of R&D projects, and related with mandatory public contractual obligations, are no longer eligible.

Expenses incurred with the acquisition, registration, and maintenance of patents, essential for the performance of R&D activities and audits, will be accepted only for micro, small, or medium-sized companies. The deduction of R&D expenses requires that the entity develops agricultural, industrial, or commercial activities or services as its main business activity.

The applications should be submitted by the end of July of the year following the year in which the investment was made, and applications referring to years previous to that fiscal year will not be accepted.
Incentives for the acquisition of companies in a difficult economic situation
As of 1 January 2013, the regime of incentives applicable to the acquisition of companies in a difficult economic situation may also apply to cases approved by IAPMEI within the scope of the SIRME.

Under this regime, the acquiring company may deduct tax losses assessed but not yet used by the acquired company for a period of five years in proportion of its participation in the share capital of the acquired company, capped at 60% of the taxable income.

Tax regime for investment support (Regime Fiscal de Apoio Ao Investimento or RFAI)
The RFAI, which establishes several tax incentives to investment realised within specific business sectors, will remain in force in 2013.

Among other incentives, companies will still benefit from a deduction against CIT otherwise payable (capped at 25% of the CIT due) of 20% (for qualified investments lower than EUR 5 million) or 10% (for qualified investments higher than EUR 5 million) of the qualified investment; from being able to carry forward any unused credit for four years; and from an exemption from property transfer tax (IMT), property tax (IMI), and stamp duty on the acquisition of real estate for investment purposes. IMT exemptions are subject to the approval of the municipality where the real estate is located and where the investment is made.

Dividends from entities resident in the Portuguese Speaking African countries (Países Africanos de Língua Oficial Portuguesa or PALOP) and in East Timor
The payment of dividends from entities resident in Portuguese Speaking African countries (Angola, Cape Verde, Guinea-Bissau, Mozambique, and São Tomé e Príncipe) and in East Timor are not subject to CIT at the level of the Portuguese parent, provided that:

• The entity in Portugal is subject and not exempt to CIT.
• The entities in the PALOP and in East-Timor are subject to and not exempt from a corporate tax.
• The entity in Portugal holds a direct participation in the share capital of the subsidiary of not less than 25% for at least two years.
• Dividends distributed have been taxed at a rate of at least 10% and do not arise from a determined type of income expressly mentioned in the law.

Loan interest and lease rentals on imported equipment
When paid by the state, regional authorities, and public services, loan interest and lease rentals on imported equipment can qualify for partial or full exemption from tax upon an appropriate application.

Real Estate Investment Fund for Residential Lease (REIFRL)
A regime is applicable: (i) both to REIFRL and to Real Estate Investment Companies for Residential Lease (REICRL) incorporated in accordance with the Portuguese law within a term of five years following the entering into force of the State Budget for 2009; and (ii) to the real estate properties acquired by those entities during that same term, i.e. from 1 January 2009 until 31 December 2014.

The incorporation of the REIFRL will be done in accordance with the provisions applicable to the Real Estate Investment Funds (REIFs) laid down in the Portuguese
The REIFRL portfolio is required to be comprised of at least 75% real estate properties located in Portugal destined for the lease of permanent residences.

The following benefits are established for this tax regime:

- CIT exemption on income obtained by REIFRLs.
- CIT exemption for the income obtained by participation unit holders, except for the capital gains arising from the sale of such participation units.
- Local property tax exemption established for the real estate properties destined for the lease of permanent residences that integrate the REIFRL.
- Municipal property transfer tax exemption on real estate property acquisition made within this regime by the REIFRL, as well as the acquisitions arising from the option for the acquisition by the lessees, until 2020, of the real estate properties that integrate the assets of the REIFRL.
- Stamp duty exemption is established for the acts arising from the transfer of the real estate properties by means of the conversion of holdings rights in real estate properties into a lease right with the option of acquisition in respect of the same real estate property by the lessee.

The above-referred tax regime and respective exemptions will not be applicable to entities resident in a country or jurisdiction with a more favourable taxable regime included in the Decree-Ruling published by the Ministry of Finance.

Incentives to urban rehabilitation

Incentives are applicable to real estate property covered by rehabilitation projects undertaken between 1 January 2008 and 2020.

Real estate investment funds incorporated between 2008 and 31 December 2013 may benefit from:

- CIT: the income obtained by real estate investment funds is tax exempt when the funds are incorporated in accordance with the Portuguese law, and respective assets are comprised of at least 75% real estate subject to rehabilitation projects in qualifying areas.
- Property transfer tax: urban property (buildings or autonomous units) destined for permanent residence and located in a rehabilitation area may benefit from an IMT exemption on the first transfer of such urban property upon undertaking of rehabilitation works. The granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.
- Property tax: the IMI exemption granted in respect of urban properties subject to rehabilitation works is extended from eight to ten years (it is granted for a five years term and renewable for an additional five-year period). Again, the granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.

Areas of Business Location

Buildings acquired or completed until 31 December 2013, located in Areas of Business Location (Áreas de Localização Empresarial or ALE) are exempt from IMT and IMI, for a period of ten years.

ALE are geographical areas in municipalities, and have a structuring nature. The exemption from IMT and IMI implies that municipalities renounce to the respective revenue in order to attract investment.
**Tax benefits and incentives for non-resident corporate entities**

**Capital gains**
Capital gains on the sale of shares and quotas held in a Portuguese company by a non-resident company may be tax exempt. However, there are some important exceptions, such as:

- Where the non-resident shareholder is owned more than 25%, directly or indirectly, by a Portuguese resident company.
- Where the non-resident shareholder is located in a country that is included in a black list from the Ministry of Finance.
- Where the assets of the company sold consist mainly of immovable property.

**Government and corporate bonds**
Interest and capital gains on government and corporate bonds are tax exempt (where held by entities not located in black-listed offshore jurisdictions) under certain conditions.

**Interest paid by resident credit institutions**
Interest paid by resident credit institutions to non-resident financial companies deriving from loans as well as gains arising from swap transactions are tax exempt.

**Interest obtained by resident credit institutions**
Interest obtained by non-resident credit institutions derived from term deposits held on resident entities authorised to receive such deposits are tax exempt.

**Tax regime applicable to external loans**
Interest derived from *[Schuldscheindarlehen]* loan agreements signed by the Public Treasury Institute (IGCP), on behalf of the Portuguese Republic, is tax exempt, provided the creditor is not resident in Portugal and has no PE herein to which the loan can be allocated to.

**Special tax regime applicable to debt securities issued by non-resident entities**
Income from debt securities representing public and non-public debt issued by non-resident entities is tax exempt, provided that the income is considered to be obtained in Portugal, under Portuguese tax rules, and paid by the Portuguese state as a guarantor of the obligations undertaken by the entities in which it owns a participation, together with other EU member states.

**Repo operations**
Gains obtained by non-resident financial institutions on securities’ repo operations undertaken with resident credit institution are exempt from CIT, provided that such gains are not attributable to Portuguese PEs of non-resident financial institutions.

Securities repos or similar rights exchanged in stock markets, as well as the repo and fiduciary sales in guarantee, performed by financial institutions intermediated by central counterparties, are also exempt from stamp duty.

**Madeira International Business Centre (MIBC)**
Entities licensed to operate in the MIBC in the period between 2007 and 31 December 2013 benefit from a special tax regime, which is applicable until 31 December 2020. The MIBC is not available to entities pursuing financial and/or intra-group activities.
Portugal

The 2007 MIBC special tax regime applies to companies licensed until 31 December 2013 and provides, besides full exemptions from taxation to non-resident shareholders (except for dividends and interest) and service providers, for a reduced CIT rate of 5% for these entities on their qualifying foreign source income, based on thresholds of income and subject to job creation requirements, applicable from 2013 to 2020.

MIBC based companies generally benefit from Portugal’s network of double taxation treaties (DTTs). EU laws and regulations apply to Madeira.

MIBC based companies are, in general, exempt from IMI regarding real estate used to pursue its business activity. This exemption does not apply in case of entities engaged in financial brokerage and insurance, including auxiliary entities related with such activities, as well as entities providing ‘intra-group services’ (coordination, treasury, and distribution centres).

**Withholding taxes**

**General WHT rates**

<table>

**Notes**

1. For residents, tax withheld constitutes a payment on account of final corporate or individual income tax due. For non-residents, tax withheld is the final tax, except for property income, in which case it is a payment on account.
2. Not subject to WHT in the case of holdings of at least 10% owned for at least one year.
4. WHT rate is increased to 35% when the income is paid or due to entities resident in black-listed jurisdictions.
5. Until 30 June 2013, the applicable rate is 5%; it will be 0% from 1 July 2013 onwards.
6. WHT rate is increased to 35% when the income is paid in bank accounts open in the name of one or more account holders but on behalf of non-identified third parties.
7. Not subject to WHT if a tax treaty is applicable.

**Tax treaty rates**

Tax treaties reduce the above-mentioned rates as follows:

<table>
<thead>
<tr>

</tbody>
</table>

Notes

1. The lower of the listed rates applies to royalties when the beneficiary holds 50% or less of the paying company's share capital.
2. There is no WHT on dividends if the EU Parent/Subsidiary Directive applies.
3. The lower of the listed rates applies to dividends when the beneficiary directly holds 25% or more of share capital. Depending on each DTT, a two year holding period may be required.
4. The lower of the listed rates applies to interest on debentures raised in France after 1 January 1965 or on significant loans or debentures raised in Portugal or abroad under major development projects listed in the treaty annex.
5. The lower of the listed rates applies to bank loans, but if interest is payable from Portugal, the bank loans must qualify as being of economic or social interest or fall under an approved development plan.
6. The lower of the listed rates applies to interest received by financial institutions.
7. The lower of the listed rates applies to technical assistance.
8. The lower of the listed rates applies on interest related to loans with a minimum maturity of two years.
9. The rate of 5% regarding interest applies to bonds interest or other securities transacted in the stock market. The rate of 10% applies to loans from banks or insurance companies or credit selling of equipment.
10. The rate of 5% regarding royalties applies to equipment lease.
11. The rate of 10% applies if the company that is paying the dividends is a resident of Israel and the dividends derive from profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax. The rate of 5% applies if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends.
12. The treaty is signed but not yet in force. The wording of the treaty is not yet known.
13. The lower of the listed rates on dividends applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. Depending on each DTT, a one year holding period may be required.
14. Treaty signed in 2011 that will replace the treaty currently in force. The rate of 5% on dividends applies if the beneficial owner is a company (other than a partnership) that for an uninterrupted period of at least 12 months prior to the payment of the dividends or if the company paying the dividends has existed for less than 12 months, during the lifetime of the company, holds directly at least 10%
of the capital of the company paying the dividends, or if the beneficial owner of the dividends is: (i) in the case of Portugal, the state, a political or administrative subdivision, or a local authority thereof, or the Bank of Portugal; and, (ii) in the case of Norway, the government of Norway, a political or administrative subdivision, or a local authority thereof, or the Central Bank of Norway.

15. The treaty is signed but not yet in force.

16. A proposal for amendment of the Protocol of the DTT has been approved providing for a reduction of WHT to 5% on dividends in case of shareholdings of at least 25% on the company distributing the dividends, as well as for an exemption on dividends, in case of shareholdings of at least 25% held for at least two years. An exemption is also foreseen regarding interest and royalties, when paid between associated companies (shareholdings of at least 25% held for at least two years), in line with the Agreement between the European Community and the Swiss Confederation. WHT exemption on interest and royalties will apply as of 1 July 2013.

17. The lower of the listed rates applies to dividends if the beneficial owner is a company (other than a partnership) that (i) holds directly at least 10% of the capital of the Portuguese company paying the dividends or (ii) controls directly at least 10% of the voting rights of the Peruvian company paying the dividends.

18. The lower of the listed rates applies to interest related to credits of any nature granted by a financial institution.

19. The lower of the listed rates applies to royalties paid for technical assistance provided in connection with the use of, or the right to use of author's rights, or information concerning industrial, commercial, or scientific experience.

---

**Tax administration**

**Taxable period**

The tax year is, as a general rule, the calendar year. A different tax year is allowed in the case of companies obligated to accounting consolidation and of PEs of non-resident entities, which can adopt the tax period of the non-resident company. If this option is taken, the new tax period must be maintained for a minimum of five years. The five year minimum period is not applicable if the taxpayer is transferred to a group of companies that are subject to consolidation of financial statements and the holding company has a fiscal year different from the one that was being adopted by the taxpayer.

Other entities may apply for a different tax period based on economic grounds.

**Tax returns**

The annual CIT return must be submitted by electronic data transmission by the last day of May of the year following the year of income.

Whenever the tax year ends on a date other than 31 December, the annual CIT return shall be submitted by electronic data transmission by the last day of the fifth month following the year end.

The system is one of self-assessment.

**Payment of tax**

Tax is paid in instalments. Three payments on account due on 15 July, 15 September, and 15 December of the year in which taxable income arises corresponding to 95% of the previous year’s corporate tax assessment (for taxpayers with a turnover above EUR 500,000; 80% if below this amount). A last instalment is paid (or received) through self-assessment upon filing the annual tax return in May of the following year.

If the tax year ends on a date other than 31 December, interim payments take place in the seventh, ninth, and 12th months of the tax year. Filing of the annual tax return together with the final payment is in the fifth month following the close of the tax year.

Given the introduction of a state surtax (*Derrama Estadual*) of 3% on the excess of taxable profit above EUR 1.5 million to EUR 7.5 million and 5% on the excess of taxable
Portugal

Profit exceeding EUR 7.5 million, before the deduction of carryforward tax losses, three additional payments on account are due on the same dates as the interim payments mentioned above. The additional payments on account correspond to 2.5% of taxable profit above EUR 1.5 million and EUR 7.5 million and 4.5% of taxable profit above EUR 7.5 million assessed in the previous year.

Payments on account are not required if the previous year’s corporate tax assessment is less than EUR 199.52. The payment of the third payment may be suspended upon declaring that no further tax is due in respect of the current year. However, interest is assessed at a rate of 4% if this results in postponing more than 20% of the tax that would otherwise have been paid.

In particular situations, a special payment on account is due of a minimum of EUR 1,000 up to EUR 70,000, paid in March, or in March and October (the third or the third and tenth month of the tax year if it ends on a date other than 31 December).

**Interest and penalties**

Late assessment interest is due in case of delay on the assessment of taxes due. Late assessment interest is computed on a daily basis, according to the following formula: (tax due X interest rate X number of days outstanding) / 365. The current rate of late assessment interest is 4% (year).

Late penalty interest is due in case of delay in the payment of the tax assessed. The current rate is approximately 6%.

Late penalty interest is computed on a daily basis. Tax penalties for companies are capped at EUR 165,000 in the case of dolus and EUR 45,000 in the case of negligence.

In general, in case of failure or late payment of CIT, companies are liable to a penalty varying between 30% and 100% of the tax due, capped at EUR 45,000 (in case of negligence).

Specific tax penalties apply regarding transfer pricing documentation and the CFC regime (between EUR 1,000 and EUR 20,000 for companies) and regarding omissions or inaccuracies regarding ruling requests (between EUR 750 and EUR 45,000 for companies in the case of urgent rulings or 25% of the previous amounts in the case of non-urgent rulings).

A new penalty, between EUR 100 and EUR 250, applies as of 1 January of 2013 in case of failure to report or for the late reporting to the PTA of the adoption of the electronic mailbox.

There is the possibility of applying for penalty reduction, provided certain requirements are met (e.g. regularisation of the tax situation/payment of the tax due; situation where there was no damage to the Revenue).

**Tax audit process**

Taxpayers are audited by the PTA based on several criteria, as detailed in a specific document prepared by the PTA.

The PTA must notify the taxpayers of the preliminary conclusions reached in cases where these may lead to tax assessment acts unfavourable to the taxpayers, further to which taxpayers may present their argumentation.
The PTA must then prepare a final report of the tax audit performed, identifying the facts detected.

Tax audits may be initiated within the statute of limitation (see below).

Tax audits must be concluded within six months. A prorogation of the deadline to one year may apply under certain conditions (e.g. complexity of the facts involved, necessity to make use of mechanisms of mutual assistance on tax matters).

The PTA release on a periodical basis a list of taxpayers that, due to the nature of their activities, their turnover, or other criteria, are subject to regular monitorisation. Very recently, a specific department for major taxpayers has been created.

**Statute of limitations**

The statute of limitation period is four years, but can be extended in case of tax losses. Regarding facts involving black-listed jurisdictions, the statute of limitation for the right to assess taxes is extended to 12 years while the time period allowed to collect taxes is extended to 15 years. The statute of limitation period is also increased from four to 12 years in case of facts related to deposit and securities accounts in financial institutions outside the European Union.

**Topics of focus for tax authorities**

Currently and mainly further to the Memorandum of Understanding between the Portuguese Republic, the European Commission, the European Central Bank, and the IMF, the PTA have been exhibiting a more aggressive approach, especially with regards to the fight against tax fraud and evasion, mainly by aggravating taxation in fields where tax avoidance is significant and by introducing additional compliance and reporting obligations.

Increased focus has also been verified on transfer pricing matters, mainly on the transfer pricing policies in transactions with non-resident entities and especially in case of payments made to entities that are resident in jurisdictions with a more favourable tax regime. In this regard, cooperation on transfer pricing matters with other tax administrations has been strengthened.

Situations of recognition of PEs in Portugal, usually triggered by inspections to VAT registers, are now recurrent.

**Anti-avoidance**

A general anti-avoidance provision is in force, pursuant to which contracts and other acts are ineffective whenever it is demonstrated that they were tax driven to reduce taxation that would be due under contracts bearing a similar economic effect, in which case taxation would be based on the latter.

The anti-avoidance procedure is initiated within the general term foreseen (statute of limitation) and is now more flexible in terms of proof by the PTA.

Anti-avoidance rules are not applicable in cases where a request for obtaining binding information is not answered by the PTA within 150 days.
Portugal

**Binding rulings**

Binding rulings can be:

- **Urgent**: A decision should be taken in 120 days; these are subject to the payment of a fee ranging between EUR 2,500 and EUR 25,500, depending on the complexity of the matter; if no decision is taken within the deadline established, there is a tacit approval of the taxpayer’s understanding of the tax matter.
- **Non-urgent**: A decision should be taken in 150 days; no fees are charged; a decision is required (no tacit approval, as in case of an urgent ruling).

**Fight against tax fraud and evasion**

It is mandatory that payments above EUR 1,000 (previously EUR 9,700) are made by a means that allows the identification of the recipient of the income (e.g. bank transfer, nominative cheque, or direct debit).

Council Directive 2011/16/EU, dated 15 February 2011, on matter of administrative cooperation in the field of taxation, has been transposed to the Portuguese legislation, reviewing the exchange information mechanisms between tax authorities and aiming at a more effective action against tax evasion and fraud at an international level.

**Significant developments**

Act 12-2013 was enacted on 29 April 2013, providing an amnesty covering various Puerto Rico taxes to alleviate and assist taxpayers with the payment of their debts. The amnesty was applicable to income tax, estate and gift tax, the special real property tax, withholding at source tax (WHT), sales and use tax (SUT), and excise tax. Taxpayers with a tax exemption grant can also avail of the amnesty. This amnesty eliminates interests, surcharges, and penalties; consequently, taxpayers only have to pay the principal amount. The amnesty also provides for the debt to be paid in instalments if 10% of the principal is satisfied. This amnesty will be in effect until 30 June 2013 and covers taxable years ended on or before 31 December 2011, as well as months or periods ended before 1 January 2013 for SUT and WHT purposes.

On 28 February 2013, Act 2 was enacted to amend Act 154-2010. This act amended the excise tax rate phase out by increasing the rate to 4% from 1 July 2013 to 31 December 2017. This Act also amended the due date for submitting the tax from the 15th to the 13th day of the month following the month in which the acquisition occurred, beginning with purchases made on or after March 2013.

Act 1 of 10 February 2013, known as the Employment Now Act (Act 1), introduced significant incentives (mostly tax and payroll related) for eligible businesses that create new employments after 31 December 2012. Most of Act 1’s incentives are available for new businesses, expanding businesses, and developing businesses that enter into an agreement with the Puerto Rico government (the Agreement) within nine months after March 2013. In the Agreement, the eligible business will commit to the creation of new employments, among other conditions, in order to avail to the benefits of Act 1. For a description of the incentives available, please see Employment creation incentives in the Tax credits and incentives section.

**Pending legislation**

Please note this information is current as of 1 June 2013. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2013.

---

**Taxes on corporate income**

A domestic corporation is taxable in Puerto Rico on its worldwide income. A foreign corporation engaged in trade or business in Puerto Rico is taxed at the regular...
corporate tax rates on income from Puerto Rico sources that is effectively connected income and at a 29% WHT rate on its Puerto Rico-source gross income not effectively connected with that business.

The current corporate income tax (CIT) rate is comprised of a 20% normal tax and a graduated surtax (computed on the ‘surtax net income’) up to a maximum combined and effective tax rate of nearly 30%. The ‘surtax net income’ is basically the net taxable income subject to regular tax less a surtax deduction in the amount of 750,000 United States dollars (USD).

Surtax tax rates are as follows: (i) 5% for income up to USD 1,750,000 and (ii) USD 87,500 plus 10% of income in excess of USD 1,750,000 for a maximum nominal tax rate of nearly 30%. This latter 10% surtax might only be applicable up to 2013, leaving the maximum nominal tax rate at nearly 25% from 2014 thereafter, provided certain fiscal and economical conditions are met.

The determination of the applicable surtax rate is now made on a consolidated basis for controlled groups and related companies, whereas the net taxable income of all the entities subject to tax in Puerto Rico within said groups has to be combined for the determination of the 5% or 10% applicable surtax rate.

**Alternative minimum tax (AMT)**
The AMT tax rate is 20%. For certain companies purchasing personal property from related parties, the tentative AMT is the greatest of the abovementioned 20% or 1% of said purchases of personal property. For AMT purposes, expenses paid or incurred for services performed by a related party outside Puerto Rico are considered a permanent adjustment in the determination of the alternative minimum net income (i.e. non-deductible for AMT purposes).

**Tax on improper accumulation of income**
A surtax of 50% is imposed on corporations that improperly accumulate earnings to prevent the imposition of tax on shareholders or partners rather than paying the earnings out as dividends. The tax is not imposed on accumulated earnings and profits but is imposed on the net income for the year computed without taking capital loss carryover or net operating loss (NOL) carryover deductions, and reduced by the following items: Puerto Rico income taxes paid or accrued, disallowed net capital losses, and charitable contributions in excess of the deductible amount. The net income does not include industrial income exempted from income taxes under Industrial Incentives Acts. However, an exempt business can be subject to the penalty tax on non-exempt income.

**Corporate residence**
A corporation organised or created under the laws of Puerto Rico is a domestic corporation. A domestic corporation is a resident corporation even if it does not conduct business operations in Puerto Rico. A corporation created elsewhere is considered a foreign corporation.

**Permanent establishment (PE)**
The Puerto Rico Tax Code does not provide specific guidance on PE. Facts and circumstances need to be analysed in order to determine if a corporation has created a PE in Puerto Rico or not. However, having an office or fixed place of business in Puerto
Puerto Rico may deem the corporation to be engaged in a trade or business in Puerto Rico (i.e. having a PE).

**Sourcing rules pursuant to Act 154**

Act 154’s source rules are segregated into two parts. The first part treats a non-Puerto Rico resident manufacturing entity as having an office or fixed place of business in Puerto Rico merely as a result of engaging in transactions above a certain threshold with a related Puerto Rico entity. The second part treats a portion of the income earned by a non-Puerto Rico resident entity as Puerto Rico-source income.

Act 154’s source rule applies where a non-Puerto Rico resident purchases goods and services from a related company that manufactures personal property or performs services in Puerto Rico that account for 10% or more of the total gross receipts of the seller from sales of such property or services in Puerto Rico, or at least 10% of the purchase cost of personal property and services acquired by the purchaser, for the taxable year or any of the three prior taxable years.

Where Act 154’s source rule applies, a portion of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as Puerto Rico-source income that is effectively connected with the conduct of a Puerto Rico trade or business. The portion of the non-Puerto Rico resident’s income that is treated as Puerto Rico source is determined under an equally weighted, four-factor (i.e. purchases, sales, property, and payroll) formulary apportionment method. Where the purchaser fails to provide adequate documentation regarding the formulary apportionment factors, 50% of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as sourced where the property is manufactured or produced (i.e. Puerto Rico). The source rule also will apply to agency and commissionaire arrangements, in addition to buy-sell transactions involving related parties. In addition, the source rule contains an anti-abuse provision that disregards a transaction, for purposes of the source rule, where one of the principal purposes of the transaction is avoidance of the source rule.

**Other taxes**

**Sales and use tax (SUT)**

As a general rule, the SUT shall be applied, collected, and paid on all transactions of taxable items in Puerto Rico. Taxable items consist of tangible personal property, taxable services, admissions, and what is known as bundled transactions. Excluded from this definition are professional associations and certain membership fees; stamps issued by professional associations, the Commonwealth of Puerto Rico, or the federal government; human blood, tissue, and organs; maintenance fees paid to resident associations; air and maritime tickets; real property; and bingos, raffles, and lottery. Other transactions that are exempt from SUT include export transactions; duty-free stores located at airport or maritime ports; prescription medicines; insulin; taxable items acquired for certain manufacturing operations (e.g. raw materials); and food and ingredients for food (except for prepared food, diet supplements, sweets, and carbonated beverages).

SUT is imposed at 5.5% at the state level and an additional 1.5% at the municipal level, for an aggregate tax of 7%. The 7% tax should be remitted to the Puerto Rico
government as follows: 6% to the Puerto Rico Treasury Department (PRTD) and the remaining 1% to the corresponding municipality. However, there are some municipalities that have entered into an administration agreement with the PRTD by which the PRTD will collect the entire 7% of the sales and use tax from merchants and remit the 1% to the municipality (collected on the municipality's behalf).

Every natural or juridical person who does or wishes to do business of any kind in Puerto Rico shall request registration in the Merchant’s Registry of the PRTD at least 30 days before starting operations. Once the registration application is filled out and approved, the Secretary of Treasury will grant a Merchant’s Registration Certificate. This certificate constitutes the merchant’s authorisation to do business in Puerto Rico and confirms the merchant’s obligation as a withholding agent. The Merchant’s Registration Certificate shall be displayed, at all times, in a visible place for the general public in the commercial establishment for which it was issued. Please note that if a merchant is doing business in one or more of the 78 municipalities in Puerto Rico, the merchant only needs to register with the PRTD.

Unless specifically exempted, all persons selling taxable items are required to file a monthly tax return. This return shall be delivered to the PRTD no later that the tenth day of the calendar month following the month during which the sales occurred. If the merchant wishes to claim any exemption corresponding to taxable items, the merchant needs to file the monthly return and claim the exemption in it.

Merchants whose SUT deposits exceeded USD 12,000 are required to file the monthly SUT return and remit the payment electronically. In addition, merchants with volume of business of USD 200,000 or more should remit the SUT withheld electronically.

There is a credit for purchases of products manufactured in Puerto Rico for purposes of SUT. In general, the credit will be 10% of the excess of the purchases of eligible products over the average of the purchases of eligible products for three out of ten prior taxable years. This credit can be carried forward until exhausted. It is important to note that the credit used will be considered taxable income for income tax purposes of the year the credit is taken.

**Customs duties and import tariffs**
 Puerto Rico does not have customs duty and import tariff provisions. Since Puerto Rico is a Commonwealth of the United States, it follows the United States’ customs duties and import tariffs.

**Excise taxes**
 There are certain articles subject to a special excise tax, such as cigarettes, fuels, crude oils, vehicles, alcoholic beverages, cement, sugar, and plastic products, among others.

**Act 154’s excise tax**
 Companies with manufacturing operations in Puerto Rico may be subject to an excise tax on goods or services provided to offshore-related entities under Act 154 of 2010, as amended. This Act created an excise tax that works in tandem with Act 154’s source rules. Where the excise tax applies, it is in lieu of the tax that otherwise would arise from the application of Act 154’s source rules. Under this excise tax rule, offshore purchasers that acquire goods from Puerto Rico sellers with gross receipts in excess of USD 75 million for any of the three preceding taxable years and that otherwise meet the source-of-income rule thresholds (set forth above) are subject to this excise tax equal to the ‘applicable percentage of the value’ of such personal property or services, which is essentially a scaled-back percentage. The excise tax rate phases out as follows:
• 3.75% between 1 January 2012 and 31 December 2012.
• 2.75% between 1 January 2013 and 30 June 2013.
• 4.00% between 1 July 2013 and 31 December 2017.

Various tax credits are provided to offset the excise tax mentioned above.

The excise tax is collected by the Puerto Rico seller on receipts from the sale of personal property or services rendered to a related offshore purchaser. The tax has to be deposited with the Secretary of the Treasury on or before the 13th day of the month following the sale. Each person required to collect the excise tax must file a quarterly excise tax return on 30 April, 31 July, 31 October, and 1 January and pay any remaining tax liability not deposited on a monthly basis, as outlined above.

Act 154 sets forth the process for which a credit may be claimed for (i) taxes paid to any of the states of the United States on the acquisition of personal property and services and (ii) taxes paid to Puerto Rico by another member of the taxpayer’s controlled group on a series of purchases.

**Personal property taxes**

Every corporation engaged in a trade or business in Puerto Rico that on 1 January of each year owns personal property used in its trade or business within Puerto Rico, whether it is leased to another entity, is subject to tax on such property. The tax is self-assessed by the corporation and it is paid together with the filing of an annual return. The tax ranges between 5.08% and 8.23%, depending on the municipality. A 5% statutory discount is available if payment is made in full on the return due date (15 May of each year).

In general, all personal property not specifically exempted, including cash, finished goods inventory, supplies, and depreciable property, is subject to the tax. The personal property tax is generally based on the book value of the asset as of 1 January. Finished goods inventory, however, is assessed on the average of the monthly balances for the 12-month period preceding 1 January of each year.

The valuation of the personal property subject to tax is determined by multiplying the book value of such property by the applicable tax rate determined by the municipality in which the property is located. If the book value of depreciable property is below its estimated residual value, the property should be assessed at its estimated residual value.

**Real property taxes**

The property tax system is administered by the Municipal Revenue Collection Center (MRCC). The tax on real property is directly assessed by the MRCC and may be paid in two instalments. The tax, (which varies from a minimum of 7.80% to a maximum of 10.23%, depending on the municipality) is applied to an amount based on the hypothetical fair market value (FMV) of the relevant property in the year 1957. In general terms, this hypothetical FMV normally ranges between 40% and 50% of the cost of the property.

**Transfer taxes**

Puerto Rico does not have transfer tax provisions.
Puerto Rico

**Stamp taxes**

Puerto Rico does not have stamp tax provisions. However, recordation fees are imposed at the time of officially recording a real estate transaction with the Puerto Rico Property Registry.

**Municipal license tax**

Every corporation is required to file an annual volume-of-business declaration with each of the municipalities in which it establishes or conducts business operations during the year. The declaration must indicate the actual volume of business (i.e. net sales, gross income from any service rendered, and other gross receipts) attributable to each municipality. When a business operates in more than one municipality but does not receive income in all of them, the license tax shall be computed based on a distribution of sales apportioned to each municipality by square feet of the building used in each municipality.

For a non-financial business, the license tax payment varies from a minimum of 0.20% to a maximum of 0.50%, depending on each municipality. The payment must be made in two equal instalments on or before 15 July and 15 January on the basis of the volume of business generated by the entity during its accounting year ended within the immediately preceding calendar year before the due date of the declaration. A 5% discount is available when the tax is fully paid on the declaration due date (on or before five working days after 15 April of each year).

For the first six months after a new business is established, the new company is generally exempt from the municipal license tax, provided that the business informs the municipality that it has established a new business in the municipality within the first 30 days of operations and request the provisional license tax as established in each municipality. A copy of the municipal licence is generally requested as a perquisite for obtaining other licences and permits in Puerto Rico.

**Branch income**

Corporations operating in Puerto Rico as a branch may be subject to a 10% tax on the dividend equivalent amount (commonly known as the branch profit tax or BPT). The BPT should be determined and paid along with the CIT return. There will not be an income tax withholding at source at the time cash transfers are made by the Puerto Rico branch to its home office outside of Puerto Rico.

**Income determination**

The gross income of a corporation generally includes business income, profits from the sale of property, interest, dividends, and income derived from any source, unless specifically exempted by law.

A corporation’s net income is generally calculated in accordance with the method used for financial statement purposes, except for various items of income and expenses, which are treated differently. For example, the cash method of accounting may not be used by a corporation with inventory or with an average annual gross income in excess of USD 1 million. Long-term contract methods and the instalment method can be used for regular tax calculations.
**Inventory valuation**
In general, inventory is valued at the lower of cost or market. Retail merchants can use the retail method of accounting.

**Capital gains**
Tax-advantaged treatment is provided for net long-term gains (holding period of more than six months) from the sale of capital assets. For corporations, net long-term capital gains, reduced by any short-term capital losses, are subject to an alternative (preferential) tax of 15% in lieu of the regular CIT rates.

**Dividend income**
Dividends from a corporation that derives 20% or more of its profits from sources within Puerto Rico are taxable in Puerto Rico. However, a dividend-received deduction may apply.

**Dividends-received deduction**
All corporations engaged in trade or business in Puerto Rico are entitled to an 85% deduction on dividends received from a domestic corporation but not in excess of 85% of the net income of the corporation. A 100% dividend-received deduction applies for dividends received from taxable controlled domestic corporations (if ownership in a corporation is 80% or more).

**Interest income**
Interest income is generally taxable, except interest from obligations of the federal government or any state, or territory, or political subdivisions; the District of Columbia; and the Commonwealth of Puerto Rico or any of its instrumentalities or political subdivisions.

**Royalty income**
Royalties from property located in Puerto Rico or from any interest in such property are included in gross income.

**Partnership income**
The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership’s taxable income (loss).

**Other income**
Service fees are generally taxable as ordinary income.

**Foreign income**
Generally, a Puerto Rico domestic corporation is taxed on its worldwide income, including foreign income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credit or deduction. In the case of resident foreign corporations, these are only taxed on their Puerto Rico-source income and on their effectively connected Puerto Rico income (i.e. foreign income won’t be taxable for Puerto Rico purposes).

**Deductions**
All ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business are deductible by corporations operating in Puerto Rico.
**Depreciation**

A reasonable depreciation allowance is deductible for the exhaustion, wear and tear, and obsolescence of property used in business. The most common depreciation method used by corporations is the straight-line method. Nevertheless, any other consistent method may be used in lieu of the straight-line method as long as it is in accordance with the recognised trade practice. In addition, a corporation (other than one that is exempt under an Industrial Incentives Act) can elect an accelerated depreciation method for new or used tangible property acquired by purchase in taxable years commencing after 30 June 1995.

For property acquired after 31 December 2009, when using the straight-line depreciation method, the useful life has to be determined based on the same rules of accelerated depreciation.

</table>

For intangibles (other than goodwill) acquired or created after 1 September 2010, the deduction is calculated using the straight-line method over the lower of a useful life of 15 years or the intangible useful life.

**Goodwill**

The cost of goodwill is generally capitalised and amortised ratably over 15 years.

**Start-up expenses**

Generally, start-up expenditures may be deducted in the tax year in which the trade or business begins or they may be ratably amortised over five years.

**Interest expenses**

In general, interest expense is deductible without limitation. However, interest expenses related to exempt income are not deductible. If interest is paid to a non-Puerto Rico resident related party, a 29% withholding at source would apply.

**Bad debt**

Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless (i.e. uncollectible). The reserve method is not admissible for Puerto Rico purposes.

**Charitable contributions**

Deductions for allowed charitable contributions are limited to 10% of net income, computed regardless of the contributions.
Rent expense
Corporations are entitled to a rent expense deduction if the rented property is used in the business.

Employee remuneration
Corporations may deduct payments of reasonable salaries or other compensation for services actually rendered.

Insurance premiums
Insurance premiums paid or accrued on risks related to a trade or business are deductible, as well as premiums on group life policies covering employees where the beneficiary is not the corporation. No deduction is allowed for premiums paid to an insurance company not authorised to provide insurance in Puerto Rico or through an agent or broker not authorised to operate in Puerto Rico.

Meals and entertainment
Meals and entertainment expenses are deductible, subject to a 50% limitation. Travelling expenses are fully deductible if the trip is for business purposes.

Automobiles expenses
A corporation is allowed to depreciate non-cargo automobiles used in trade or business over a five year useful life (three years in the case of sales persons) up to a maximum base of USD 30,000 for a maximum annual depreciation of USD 6,000.

On the other hand, for non-cargo automobile maintenance expenses (e.g. gas, repairs, insurance), a deduction based on USD 0.60 per mileage is allowed.

Fines and penalties
Penalty payments, such as with respect to Commonwealth taxes, whether on account of negligence, delinquency, or fraud, are not deductible from gross income.

Taxes
A corporation is allowed a deduction for taxes paid (except for Puerto Rico CIT), including income tax paid to the United States, its other possessions, and any foreign country. The deduction is in lieu of claiming a foreign tax credit.

Other significant items
The cost of incidental repairs (not adding value to the property) is deductible as a business expense.

Subject to certain limitations, savings and retirement plans for the benefit of the employees are deductible if qualified by the Secretary of the Treasury.

Net operating losses (NOLs)
All corporations are generally entitled to the NOL deduction in computing their tax. NOLs may be carried over for seven years (there are no carryback provisions). Also, losses from sales or exchanges of capital assets are allowed only to the extent of gains from such sales or exchanges. The carryforward period in this instance, however, is five years.

The NOL carryforward period was increased from seven taxable years to ten taxable years for NOLs generated from taxable years beginning after 31 December 2004 and before 31 December 2012.
Payments to foreign affiliates
Management fees paid to a foreign affiliate are deductible to the extent that they are reasonable compensation for the services rendered. However, the Secretary of the Treasury has the authority to reallocate items of income and expense to properly reflect the Puerto Rico taxable income.

Group taxation
Puerto Rico does not have group taxation rules. In other words, corporations can not file a consolidated return for Puerto Rico CIT purposes.

Transfer pricing
There are no specific transfer pricing rules in Puerto Rico.

Thin capitalisation
There are no specific thin capitalisation rules in Puerto Rico.

Tax credits and incentives
A corporation engaged in specific eligible activities may apply for a reduced CIT rate, among other incentives, through the request of a Tax Exemption Grant to the Puerto Rico Office of Industrial Tax Exemption (OITE) under Act 73 of 28 May 2008 (Act 73).

After 17 January 2012, a corporation engaged in eligible activities related to the exportation of services may apply for a reduced CIT rate, among other incentives, through the request of a Tax Exemption Grant to OITE under Act 20 of 17 January 2012 (Act 20), instead of through Act 73.

Tax rate incentives
Under Act 73
Exempt entities may elect one of the following two scenarios:

• General scenario: 4% CIT rate with a WHT rate on royalty payments of 12%. Under this scenario, the amount of WHT on the royalty payments is creditable against the 4% CIT.
• Alternate scenario: 8% CIT rate with a WHT rate on royalty payments of 2%. Under this scenario, the WHT on royalty payments is creditable against the 8% CIT.

Companies may elect one of these scenarios at the time of applying for the benefits under the act. However, there are other possibilities:

• 4% fixed income tax rate on Incentive Development Income (IDI), excluding income from certain investments provided by Section 2(j).
• Pioneer industries are eligible for a 1% CIT rate.
• Activities for the development in Puerto Rico of intangible property are eligible for a 0% CIT rate.
• Any exempt business having operations at a municipality located in a ‘low or intermediate development zone’ may reduce its CIT rate by an additional 5%.
• Any exempt business having operations in Vieques and Culebra may be totally exempt from income taxes during the first ten years of operations as established in the act. The remaining years covered by its tax decree may qualify for a 2% CIT rate.
Puerto Rico

Under Act 20

- 4% CIT on export services income or
- 3% CIT when more than 90% of the eligible business’s gross income is derived from export services and such services are considered strategic services, according to the criteria established in Act 20.

Special deductions
Special deductions under Act 73 are available for capital investment in buildings, structure, machinery and equipment, and the NOL carryforwards.

There are no special deductions allowed under Act 20.

Credits
The following credits are only available under Act 73. Please note that no credits are allowed under Act 20.

Credit for purchases of Puerto Rico manufactured product
Subject to certain limitations, the credit for purchases of products manufactured in Puerto Rico is 25% (35% in the case of recycled products).

Job creation credit
There is a credit for every incremental job applicable to exempt business starting operations after 1 July 2008. The amount of the credit (maximum of USD 5,000 per each employment) depends upon the location of the industrial development zone.

Research and development (R&D) investment credit
A 50% credit is granted for the eligible investment in R&D activities, including operational expenditures, clinical trials, infrastructure, renewable energy, or intellectual property.

Energy investment credit
A 50% credit is granted for the eligible investment in the acquisition of machinery and equipment for the creation of energy.

Energy cost credit
There is also a 3% credit (which could be increased up to 10% if certain employment requirements are met) for payments made to the Puerto Rico Power Authority during the corresponding taxable year. This credit is available for a ten-year period starting as of 1 July 2008. Additional credits (for the purpose of reducing the cost of energy) may be available to industrial units subject to certain limitations.

Technology transfer credit
A 12% credit (2% in the case of exempt businesses that opted for the alternate tax) is available for payments made to resident entities for the use or privilege of using intangible property in Puerto Rico.

Strategic projects investment credit
There is a 50% credit for eligible investment in strategic projects, including activities for the design, development, and construction of dams.

Industrial investment credit
There is a 50% credit, up to a maximum of USD 8 million, for cash invested in the purchase of 50% or more of the stock or operating assets of an exempt business that is
Puerto Rico

in the process of shutting down operations, amount used to start-up small or medium-exempt business, or amounts used for a substantial expansion of an exempt business.

**Property tax incentives**

Similar to the previous incentives laws, Act 73 allows for a 90% property tax exemption on personal and real property. However, Act 73 introduced a methodology for the classification and assessment of real property owned by the exempt businesses. Under the provisions of Act 73, a taxpayer can self-assess one’s real property tax responsibility (similar to the current personal property tax system) and remit the related tax liability due along with a real property tax return (to be issued by the MRCC) by 15 May of each year. The self-appraisal method is only applicable to real property that has not been appraised by the MRCC and is mainly limited to machinery and equipment classified as real property. Note that this method is not available for assets such as land, building, and building equipment.

For purposes of Act 20, there is a 100% exemption from property taxes during the first five years of operations in the case of eligible services as call centres, management services, and shared services. After said five year period, a 90% exemption will apply during the term remaining under the Tax Exemption Grant.

**Municipal license tax and other municipal tax incentives**

Under Act 73, the municipal license tax exemption continues at 60% for exempted businesses. Exempt businesses operating in Vieques or Culebra are 90% exempt; small or medium-exempt businesses are 75% exempt; and central or regional corporate headquarters providing managerial services to affiliated companies are 100% exempt during the first five years after becoming eligible for the exemption.

There are no municipal tax exemptions under Act 20.

**Employment creation incentives**

Act 1 of 10 February 2013, known as the Employment Now Act (Act 1), introduced significant incentives (mostly tax and payroll related) for eligible businesses that create new employments after 31 December 2012. Most of Act 1’s incentives are available for new businesses, expanding businesses, and developing businesses that enter into an agreement with the Puerto Rico government (the Agreement) within nine months after March 2013. In the Agreement, the eligible business will commit to the creation of new employments, among other conditions, in order to avail to the benefits of Act 1. Among the incentives provided by Act 1 are the following:

- **CIT:** The first taxable year of operations under the Agreement, the new business will be subject to a fixed tax rate of 10%, or the lower rate applicable under the 2011 Internal Revenue Code, as amended (the Tax Code). The following taxable year after the signing of the Agreement, the new business will be subject to a fixed tax rate of 15% or the lower rate applicable under the Tax Code.
- **NOL deduction:** New businesses operating under an Agreement will be able to carry forward the NOL incurred during the first two years under the Agreement against the income derived from the operation covered by the Agreement for a period of ten years.
- **Municipal license tax:** New businesses operating under an Agreement will be exempt from the payment of municipal licenses tax during the two economic years following the signing of the Agreement.
- **Personal property tax:** A total exemption on personal property tax will be available during the two economic years following the signing of the Agreement.
Puerto Rico

• Real property tax: A total exemption will apply on real property tax of property used by the eligible business on its operations and that, prior to its acquisition by the eligible business, was not in use. The exemption will apply on real property taxes payable during the first two government fiscal years (i.e. 1 July to 30 June) after the acquisition of the real property.

Act 1 also provides for payroll incentives and energy credits.

Foreign tax credit
Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction the foreign income and excess profit taxes paid or accrued during the taxable year to any foreign country. A foreign tax credit reduces the Puerto Rico income tax liability dollar for dollar, while a deduction reduces the Puerto Rico income tax liability at the marginal rate of the taxpayer. There are no carryforward provisions for foreign tax credit purposes.

Withholding taxes
Corporations not engaged in a trade or business in Puerto Rico are subject to a 29% WHT at source on certain gross income items (considered fixed or determinable, annual or periodical [FDAP]) from Puerto Rico sources.

FDAP income may include interest received from a related person, rents, royalties, salaries, annuities, compensation, remuneration, and net capital gains. However, if the payment received is from dividends and partnership profits, a 10% WHT should apply.

The payer, as a withholding agent, is responsible for the deduction and remittance of the 29% (10% in the case of dividends) to the PRTD. Such tax is due on or before the 15th day of the month following the receipt of the income by the non-resident corporation. An annual informative return is also required to be filed no later than 15 April of the following year.

Tax treaties
There are no tax treaties between foreign countries and Puerto Rico. However, the Puerto Rico Supreme Court has recognised that, although Puerto Rico is generally not a signatory party to a treaty entered into by the United States, if an international treaty with the United States does not explicitly exclude Puerto Rico, the treaty will be applicable to Puerto Rico.

Tax administration

Taxable period
The annual accounting period may be on the basis of the calendar year, a fiscal year ending on the last day of a month, or a 52/53 week year.

Tax returns
The Puerto Rico tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual income tax return by the 15th day of the fourth month following the close of its tax year. In general terms, a taxpayer can obtain an automatic extension of three months to file its income tax return. Failure to timely file can result in penalties.
Puerto Rico

A corporate taxpayer may also be subject to file a personal property tax return by 15 May and/or a volume of business declaration by the 5th business day after 15 April.

**Payment of tax**
A corporation must substantially satisfy its annual income tax liability, if any, through estimated income tax payments. The amount of estimated income taxes should be paid on equal instalments on the 15th day of the fourth, sixth, ninth, and 12th month of the taxable year of the corporation. The estimated payments should equal or exceed 90% of the actual tax for the year or, in the case a CIT return was filed by the corporation in the preceding year, 100% of such tax liability. Any tax not covered with the estimated tax payments should be paid along with the CIT return. Failure to pay the tax by the due dates indicated above may result in a penalty of 10% of the instalment due.

**Annual report**
Every corporation is required to file an annual corporation report with the Puerto Rico Department of State. This annual report must be filed by the 15th day of April along with a USD 150 annual fee and a balance sheet as of the close of operations of the prior year. The report should be filed through the Puerto Rico Department of State’s website. In the case of for-profit corporations, if the volume of business exceeds USD 3 million, the annual report must be accompanied by a balance sheet certified by a certified public accountant (CPA) licensed in Puerto Rico. In the event that the volume of business does not exceed USD 3 million, a balance sheet prepared under generally accepted accounting principles (GAAP) by a person with a general knowledge in accounting has to be submitted along with the corporate annual report. An extension of 60 days, an additional 30 day period may be requested, for filing the annual report can be obtained if timely requested. The Secretary of State is authorised to impose a penalty for failure to timely or accurately file the annual corporate report that would be between USD 75 and USD 2,000 if a non-profit corporation, and between USD 750 and USD 2,000 if a for-profit corporation.

**Audited financial statements**
Accounting records must be prepared in accordance with the general accepted accounting principles (GAAP) followed in the United States. Domestic corporations (i.e. incorporated in Puerto Rico) with volume of business of more than USD 3 million must include, with their CIT return, audited financial statements of the Puerto Rico operations for the accounting year ended on or before the preceding 31 December. The financial statements should be submitted with an audit report issued by a CPA licensed in Puerto Rico. Nevertheless, foreign corporations with volume of business of more than USD 3 million must include, with their CIT return, audited financial statements of the Puerto Rico operations.

Also, qualified and disclaimer opinions are now allowed to the extent that the qualification or disclaimer does not result from a restriction in scope. However, no adverse opinions are allowed. All groups of related entities engaged in a trade or business in Puerto Rico are required to file consolidated or combined financial statements (CFS), which should contain a consolidating schedule and general information of the related parties. The determination of the gross income threshold for purposes of the audited financial statement requirement should be made taking into consideration the volume of business of all the entities within a controlled group. In the case of foreign entities, these will be able to submit audited financial statements with their Puerto Rico operations on a stand-alone basis; in other words, the CFS will not be required. The requirement for audited financial statements will not apply to non-profit organisations. There is a waiver for the taxable year commencing after 31 December 2011 and before 1 January 2013. This waiver provided for the submission
of stand-alone audited financial statements for all entities within a consolidated group with volume of business of more than USD 1 million, instead of the consolidated or combined audited financial statements.

With respect to the municipal license and personal property tax filings, the threshold amount for the audited financial statements requirement is gross revenues of more than USD 3 million, regardless of the corporate residency (i.e. foreign or domestic).

**Tax audit process**

Many taxpayers are under audit by the PRTD. The audits may include income, payroll, withholding, and sales and use taxes.

**Statute of limitations**

The PRTD generally has four years after an original return is filed to assess income, payroll, and sales and use taxes. A return will be deemed to have been filed on the later of (i) its due date or (ii) the date the return was actually filed.

**Topics of focus for tax authorities**

Currently, the PRTD is focused on sales and use tax, intercompany loans, withholding at source, and payments to foreign affiliates, among others.

**Significant developments**

There were no significant tax developments during the course of the year in Qatar. Certain developments are expected in respect of the taxation of profits and gains arising from shares and securities listed on the Qatar Exchange; however, at the time of writing, they have not been confirmed.

**Taxes on corporate income**

An entity that is wholly or partially foreign owned and that derives income from sources in Qatar is taxable in Qatar. In the case of a joint venture, the tax liability of the joint venture is dependent upon the foreign partners’ share of the joint venture’s profit.

Currently, no corporate income tax (CIT) is levied on a corporate entity that is wholly owned by Qatari nationals and Gulf Cooperation Council (GCC) nationals.

Unless specifically exempt from tax, an entity will be taxable in Qatar if it has generated Qatar-source income, regardless of the place of its incorporation.

Taxable income generally is subject to a flat (CIT) rate of 10%, with certain exceptions available.

The following tax rates apply in the specific circumstances noted:

- If a special agreement has been reached with the government of Qatar prior to 1 January 2010, the rate specified in the agreement continues to apply. If no rate is specified in the agreement, a rate of 35% will be used.
- The rate applied with respect to oil operations, as defined in Law No. 3 of 2007, may not be less than 35%.
- Payments made to non-residents with respect to certain service activities not connected with a permanent establishment (PE) in Qatar are subject to withholding taxes (WHTs) *(see the Withholding taxes section)*.

The amount of tax payable is reduced for companies that are partly foreign owned, depending on the extent of local ownership.

**Qatar Financial Centre (QFC)**
The QFC was established in 2005 to attract companies in the financial services sector. It should be noted that this summary is directed towards non-Qatar Financial Centre (QFC) entities with Qatar-source income. The QFC has its own tax regulations and rules, and the State of Qatar tax laws do not apply to the licensed activities of entities established in the QFC. QFC entities are subject to CIT in respect of activities undertaken pursuant to their QFC licence at the rate of 10%.
Local income taxes
There are no local, state, or provincial government taxes on income in Qatar.

Corporate residence
It is important to recognise that residence is not the basis used to determine whether an entity is taxable for CIT purposes in Qatar. Accordingly, a CIT exposure in Qatar may arise even if a company is not resident in Qatar. Residence is, however, relevant when considering whether WHT will apply on payments received rather than CIT.

A company is resident in Qatar if it is incorporated in accordance with Qatari laws, its head office is situated in Qatar, or its place of effective management and control is in Qatar.

Permanent establishment (PE)
A PE is defined as a fixed place of business through which the business of a taxpayer is wholly or partly carried on. A PE is deemed to include a branch, office, factory, workshop, mine, oil or gas well, quarry, a building site, an assembly project, or a place of exploration, extraction, or exploitation of natural resources. A PE also includes activity carried on by the taxpayer through a person acting on behalf of the taxpayer or in the taxpayer’s interest, other than an agent of an independent status.

Other taxes
Value-added tax (VAT)
Qatar imposes no VAT or sales tax on operations in Qatar. However, the introduction of VAT in the GCC remains under discussion.

Customs duties
Customs duties are applied to goods with an origin outside the GCC countries, normally at a rate of 5%. Higher rates sometimes apply for specific types of goods, such as tobacco products. Temporary import exemptions are sometimes available.

Excise taxes
There are no excise taxes in Qatar.

Property taxes
There are no property taxes in Qatar. However, fees may be payable to the government by the owner on the registration of property and by the landlord on the registration of leases.

Transfer taxes
There are no transfer taxes in Qatar.

Stamp taxes
There are no stamp taxes in Qatar.

Branch income
The profits of a branch owned by a foreign parent entity are subject to the same tax rules as apply to other forms of taxable entities.
Income determination

CIT is levied on a company’s Qatar-source income. Some examples of Qatar-source income include:

- Income derived from an activity carried on in Qatar.
- Income derived from contracts wholly or partially performed in Qatar.
- Income from real estate situated in Qatar, including income from the sale of shares of companies with assets consisting of mainly real estate situated in Qatar.
- Income from shares in companies resident in Qatar or listed on Qatar’s stock market.

Inventory valuation

Inventory must be valued in accordance with International Financial Reporting Standards (IFRS).

Capital gains

Any chargeable gains on the sale of capital assets are taxed as ordinary income. Specific rules exist in respect of gains realised on the disposal of real estate.

Dividend income

Dividends are not taxable in Qatar if received from profits that have been subject to Qatar tax or from companies that are exempt from Qatar tax.

Interest income

Interest arising in Qatar and bank interest realised outside Qatar, if it results from the taxpayer’s activity in Qatar, are taxed as ordinary income.

Foreign income

Non-Qatar-sourced income is not subject to tax in Qatar.

Deductions

Taxable income is determined after deducting all expenditures, costs, and losses incurred to generate gross income. A deduction is usually available for expenses that are not considered to be ‘capital’ in nature and are incurred in generating Qatar-source revenue.

Depreciation

Depreciation should be calculated in accordance with rates specified by the Qatar tax law and the related regulations. In practice, however, the deduction for depreciation is restricted to the amount of the accounting depreciation.

For certain assets, depreciation is calculated on the cost on a straight-line basis. The rates of depreciation are as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (% per annum)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and constructions, including roads, bridges, pipelines, storage tanks, and port ducks inside the establishment and excluding ready-made light constructions</td>
<td>5</td>
</tr>
<tr>
<td>Ships and boats</td>
<td>10</td>
</tr>
<tr>
<td>Airplanes and helicopters</td>
<td>20</td>
</tr>
</tbody>
</table>
## Qatar

### Depreciation rate (% per annum)

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (% per annum)</th>
</tr>
</thead>
<tbody>
<tr>

<td>Furniture, fixtures and fittings, and other fixed assets</td>
<td>15</td>
</tr>
</tbody>
</table>

### Goodwill

There are no specific provisions dealing with the taxation of goodwill. Accordingly, the accounting tax treatment should be followed from a tax perspective.

### Interest expenses

Interest on loans used for the purpose of the taxpayer's activity is tax deductible, except where the loan is between a Qatar branch and its head office or a party related to the head office.

### Bad debt

Bad debts approved by the tax authorities in accordance with the criteria set out in the tax law are deductible.

### Charitable contributions

Donations, gift aid, and subscriptions to charitable, humanitarian, scientific, cultural, or sporting activities paid in Qatar to government authorities or public bodies are deductible, provided the value does not exceed 5% of net profit in the year in which the deduction is claimed.

### Fines and penalties

Fines and penalties are not deductible for Qatar tax purposes.

### Taxes

Taxes and duties, other than the income tax, provided for in the law are deductible.

### Other significant items

Other deductible expenditures include the following:

- Employee costs (including salaries, wages, gratuities, and other end of service benefits).
Qatar

- Losses resulting from the sale of assets.
- Rents.
- Insurance premiums.

**Net operating losses**
Losses may be deducted from net income during the year. Losses can be carried forward for three years after the year in which they were incurred. Losses cannot be carried back.

**Allocations of overhead costs to branches**
The branch’s share of head office expenses (i.e. indirect or allocated overhead) generally is deductible only up to a certain limit. The deduction is capped at 3% (1% for banks) of the total revenue less certain other costs.

---

**Group taxation**

There is no definition of a ‘group’ for Qatar tax purposes; consequently, there is no concept of group taxation.

**Anti-avoidance provision**
The Qatar tax law contains an anti-avoidance provision that gives the Qatar tax authorities wide powers to counteract transactions that have been carried out with a tax avoidance purpose. These powers include substituting an arm’s-length value or recharacterising transactions.

**Transfer pricing**
The executive regulations, which supplement Qatar’s tax law, have made it clear that the anti-avoidance provision will be applied to related-party transactions. In determining the arm’s-length value, the Unrelated Comparable Price Method should be used (i.e. the price of services or goods that would have been applied should the transaction be between unrelated parties). It is possible to make an application to the Qatar tax authorities to use another method approved by the Organisation for Economic Co-operation and Development (OECD).

**Thin capitalisation**
There are no specific thin capitalisation rules in Qatar, although consideration should be given to the anti-avoidance provision noted above.

---

**Tax credits and incentives**

**Foreign tax credit**
Unless double tax relief is available under a double tax treaty (DTT), there is no tax relief available under the Qatar tax law for tax suffered by Qatari companies overseas.

**Qatar Science and Technology Park (QSTP)**
Qatar has established the QSTP, which is aimed at entities with research and development (R&D) activities. QSTP entities can be fully exempt from Qatar tax; however, tax exempt entities are required to file tax returns.

**Other tax exemptions**
An application for a tax exemption may be made for certain projects that are considered to be strategically significant to the Qatar economy. The exemptions are generally
granted for a period of three or six years. Applications for an exemption are assessed based on certain criteria set out in the Qatar tax law.

Notwithstanding the fact that an exemption is granted, an entity that is exempt is still required to file a tax return under the Qatar tax law.

**Withholding taxes**

WHT is levied on certain payments made to non-residents in relation to royalties and technical services (the applicable rate is 5%) and on interest, commissions, brokerage fees, directors’ fees, attendance fees, and any other payments for services carried out wholly or partly in Qatar (the applicable rate is 7%). The executive regulations have excluded certain payments from the scope of WHT.

The company that makes the payment to its foreign supplier is required to withhold the tax and remit to the tax department the funds that were withheld by the 16th day of the following month. In the event that the company does not make a payment to the tax department, the company will be liable for a penalty equal to the amount of unpaid tax due, in addition to the WHT.

**Retention system**

Pursuant to circulars issued by the tax department, a retention system is in place whereby certain final contract amounts are required to be retained from payments made to Qatari resident entities and non-resident entities with a PE in Qatar in connection with services performed in Qatar. All ministries; government departments; public, semi-public, and private establishments; and Qatar taxpayers are required to retain. Companies resident in Qatar and permanent branches can secure a release of the final payment by presenting a tax card. A retention equivalent to the higher of 3% of the contract value or the final contractual payment will apply to temporary branches registered for activities of at least one year until they produce a tax clearance certificate from the Qatar tax authorities. All other non-residents are expected to be subject to WHT in respect of payments that fall within the scope of WHT.

**Tax treaties**

Qatar has a growing DTT network with over 50 DTTs currently in force. The WHT rates under these treaties in respect of dividends, interest, and royalties are as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends</th>
<th>Interest</th>
<th>Royalties</th>

### Notes

1. 5% if capital exceeds USD 100,000, and 10% in all other cases.
2. 0% if the beneficial owner is a company that owns at least 10%, 5% if 10% direct participation is held by an individual who has resided in the relevant state for a period of at least 48 month, and 10% in all other cases.
3. 5% if the beneficial owner is a company that has owned, directly or indirectly, at least 25%, and 10% if participation is less than 25%.
4. 5% if the beneficial owner is a company that owns at least 10%, and 10% in all other cases (i.e. less than 10% shareholding).
5. 0% if the beneficial owner is a company that owns at least 7.5%, and 10% in all other cases (i.e. less than 7.5% shareholding).
6. 5% if the beneficial owner is a company that owns at least 10%, and 15% in all other cases (i.e. less than 10% shareholding).
7. 5% if the beneficial owner is a company that directly holds at least 10%, 10% if the beneficial owner is an individual that directly holds at least 10%, and 15% in all other cases.
8. 10% if the beneficial owner is a company that has owned at least 25%, and 15% in all other cases (i.e. less than 25% shareholding).
9. 0% where the beneficial owner of the interest carries on business in the other contracting state where the interest arises (i.e. through a PE therein), and 5% if the contracting company does not have a PE.
10. 0% if interest arising in contracting state is derived from government debt, and 10% if the contracting company does not have a PE.
11. It should be noted that there is limited information available in respect of the treaty with this country, and the date provided above may be the date on which the treaty was signed or entered into force rather than its effective date.
12. Reduced to zero if the beneficial owner has a PE in the contracting state.
13. 10% if the beneficial owner is a company that has at least a 10% shareholding; 15% in all other cases.
14. 5% if the beneficial owner is a bank, and 10% in all other cases.

---

**Tax administration**

**Taxable period**
The tax year is generally the same as the calendar year, although advance approval may be sought from the Qatar tax authorities to use a company’s accounting year-end.

**Tax returns**
The tax return is due within four months from the end of a company's accounting period.

**Payment of tax**
The tax payable is based on the tax declaration and should be paid on the same day that the tax return is due.

**Late filing penalties**
The Qatar tax law contains a penalty regime, which imposes a penalty for the late filing of a tax return. In addition, a penalty applies where there is a late payment of tax.

**Objection and appeals process**
It is possible for a taxpayer to initially object directly to the tax department regarding a decision related to a tax position. If the objection is unsuccessful with respect to altering the tax department's decision, an appeal may be made by the taxpayer to the Tax Appeals Committee. Based on the Tax Appeals Committee’s decision with respect to the appeal, a final appeal may be made by either the tax department or the taxpayer to the administrative chamber of the court. The law prescribes time limits for each stage of the appeal process.

**Accounting and audit requirements**
A company’s CIT return is required to be accompanied by audited financial statements if the company’s capital or profit exceeds 100,000 riyals (QAR) or the head office is situated outside Qatar. The audit report must be signed by a Qatar registered auditor.

Qatar tax law requires accounts to be prepared in accordance with IFRS.
Qatar

**Accounting record retention**
All accounting books, registers, and documents relating to activity in Qatar are required to be retained in Qatar for a ten-year period.

**Topics of focus for tax authorities**
The following areas appear to be the focus of the Qatar tax authorities from a tax compliance perspective:

- Representative offices of non-residents are being required to file tax returns, notwithstanding the fact that they may only be promoting their business.
- The Qatar tax authorities are closely examining the taxpayer’s activities to establish whether or not a PE exists.
- Related party transactions and large and unusual items of expenditure are being scrutinised by the Qatar tax authorities.

Significant developments

Please note this information is current as of 1 June 2013. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2013.

Corporate taxation

• As of 1 February 2013, the micro-company tax regime is mandatory (i.e. no longer optional).
• The percentage for the additional deduction for eligible research and development (R&D) expenses was increased from 20% to 50% as of February 2013.
• As of 1 October 2012, fiscal losses can be transferred within spin-off and merger operations. In particular, losses can be recovered by the successors of the spin-offs and merger operations in proportion to the assets and liabilities transferred to them. The successors of these restructuring operations are able to use such losses during the remaining period of the initial five or seven years.
• Provisions and adjustments for depreciation of receivables that were acquired from credit institutions for the purpose of being collected are deductible for the difference between the receivables value and the amount due to the assignee, provided several conditions are met.
• As of 1 January 2013, taxpayers may opt to declare and pay the annual profit tax by making quarterly advance payments, with some exceptions provided by law (e.g. non-profit organisations, taxpayers deriving income from agriculture).
• Starting July 2012, all direct expenses attributable to vehicles with up to nine seats that are not used exclusively for business purposes are 50% deductible for profit tax purposes, under certain conditions provided by law.
• For vehicles with up to nine seats, tax depreciation is limited to a maximum of 1,500 Romanian leus (RON) per month for each vehicle starting from 1 February 2013.
• As of 1 February 2013, all income obtained by non-residents from Romanian taxpayers for the provision of services rendered in Romania or abroad will be subject to a 16% withholding tax (WHT) rate in Romania (previously, only revenue from management and consultancy services rendered in Romania or abroad was subject to WHT in Romania).
• An increased 50% WHT rate is applicable for payments made by Romanian taxpayers (e.g. dividends, interest, commissions, royalties, services and performing independent activities) to countries with which Romania does not have a legal instrument in place for exchange of information. This WHT rate is applicable only to the extent such payments result from artificial transactions.
• Starting with 1 June 2013, daily allowances granted to employees for travels in Romania and abroad are fully deductible for profit tax purposes (previously, such
expenses were deductible up to the limit of 2.5 times the legal threshold set for public institutions).

- With effect from 1 July 2013, foreign companies that carry on activity in Romania through several permanent establishments (PEs) must appoint one of the PEs as liable for the profit tax declaration and payment obligations for the activity of all the PEs.

**Value-added tax (VAT)**

- The simplification measures for domestic supplies of cereals and industrial plants are extended until 31 May 2014.
- As of July 2012, taxable persons with a turnover below 65,000 euros (EUR) are not required to register for VAT purposes in Romania.
- A cash accounting VAT scheme (CAVS) is mandatory for taxpayers with a turnover lower than EUR 500,000 and for newly founded companies since 1 January 2013.
- Starting February 2012, all taxpayers that fall under the administration of the same tax authority can use the benefits of a VAT fiscal group (i.e. offset input and output VAT). This measure was previously applicable only to large taxpayers.
- The period under which VAT on imported goods can be deferred, based on a VAT deferment certificate, was extended until 31 December 2016.

**Excise duties**

- As of 1 January 2013, the excise duty level of diesel has reached the minimum threshold imposed at the European Union (EU) level, i.e. EUR 391/tonne.
- As of 1 April 2013, the level of the excise duties on tobacco increased to EUR 56.71/1,000 cigarettes from EUR 53.18/1,000 cigarettes.

---

**Taxes on corporate income**

The standard profit tax rate is 16% for Romanian companies and foreign companies operating through a PE in Romania. Resident companies are taxed on their worldwide income, unless a double tax treaty (DTT) stipulates otherwise. Non-resident companies are taxed on all income derived from Romanian taxpayers, regardless of whether the services are rendered in Romania or abroad.

The profit tax due for nightclubs and gambling operations is either 5% of the revenue obtained from such activities or 16% of the taxable profit, whichever is higher.

**Micro-company tax regime**

As of 1 February 2013, micro-companies are subject to a mandatory revenue tax rate of 3%, provided they meet all the following criteria at the end of the previous year:

- Derive income from activities other than banking, capital markets, insurance and reinsurance, gambling, consultancy, and management.
- Their annual turnover is lower than the Romanian leu equivalent of EUR 65,000.
- Their shares are held by entities other than the state or local authorities.
- Must not be involved in a registered procedure of dissolution with liquidation.

The tax rate applicable to micro-company revenue is 3%. Payment of the tax and filing of the returns is made quarterly, by the 25th day of the month following the end of the quarter for which the tax is calculated.
Newly established companies are required to follow the micro-company tax regime starting with the first fiscal year. Newly incorporated Romanian legal entities that, upon registration with the Trade Registry, are due to perform banking, insurance and reinsurance, consultancy and management, or gambling activities are excepted from this rule. If, during a fiscal year, a micro-company registers a turnover above EUR 65,000, that company will pay profit tax starting with the quarter in which the limit was exceeded. Companies that, at the moment of incorporation, have a share capital of at least EUR 25,000 may opt to apply the profit tax rules during the first fiscal year.

Micro-companies have the obligation to communicate to the tax authorities the change in their tax system by 31 January of the year in which the tax is due.

**Local income taxes**
There are no local taxes on corporate income.

---

**Corporate residence**

A company is considered tax resident in Romania if it was set-up under Romanian law or has its place of effective management in Romania.

**Permanent establishment (PE)**

A PE is generally defined as being the place through which the activity of a non-resident company is conducted, fully or partially, directly or through a dependent agent.

Once a PE is created, Romania has the right to tax the profits of the non-resident parent company derived from the activities performed through the PE.

The Romanian legislation explicitly states the conditions that trigger a PE:

- Fixed base PE is created through a place of business with a certain degree of permanency through which business is conducted in Romania (with some exceptions).
- Agency PE is created through agents with a dependent status that operate in Romania on behalf of the foreign company.

The registration, reporting, and tax payment requirements for a PE are similar to those for a Romanian company.

---

**Other taxes**

**Value-added tax (VAT)**

The standard rate of VAT is 24% and is applied to all supplies of goods and services (including imports) that do not qualify for an exemption (with or without credit) or for the VAT reduced rate.

The reduced VAT rate of 9% is levied on admission fees at museums, historical monuments, architecture and archaeological monuments, zoos and botanical gardens, fairs and exhibitions, cinema tickets, supply of school manuals, books, newspapers and periodicals, supply of prostheses and orthopaedic products (except for dentures), medicine for human and veterinarian use, and accommodation in hotels or in areas with a similar function.
The reduced VAT rate of 5% is applicable to the supply of housing delivered as part of welfare policy, including homes for the elderly, retirement homes, orphanages, and rehabilitation centres for children with disabilities. Buildings supplied as housing to an individual or family with no more than 120 square metres and a value of a maximum of RON 380,000 also qualify for the reduced 5% VAT rate.

VAT exemption without credit applies to a range of activities, including the supply of services in relation to banking, finance, and insurance. However, some financial services are subject to 24% VAT (e.g. factoring, debt collection, managing, and depositing certain equity papers).

There are also operations exempt with credit (i.e. deduction right for the related input VAT), such as the following:

- Supply of goods shipped or transported outside the European Union, and related services.
- Intra-Community supply of goods.
- International transport of passengers.
- Goods placed into free trade zones and free warehouses.
- Supply of goods to a bonded warehouse, a VAT warehouse, and related services.
- Supply of goods that are placed under suspensive customs regimes.
- Supply of services in connection with goods placed under suspensive customs regimes or goods placed into free trade zones.
- Supply of goods and services to diplomatic missions, international organisations, and North Atlantic Treaty Organization (NATO) forces.

VAT on imported goods will continue to be paid at customs until 31 December 2016, except for taxable persons registered for VAT purposes that obtain an import VAT deferment certificate from the customs authorities. For these taxpayers, the VAT is not paid in customs but shown in the VAT return as both input and output VAT. The import VAT deferment is available only to companies for which the value of imports performed in the previous year/previous 12 consecutive months has exceeded the threshold of RON 100 million. As of 1 January 2017, this incentive will be applicable to all the taxable persons registered for VAT purposes, irrespective of the aforementioned threshold.

The rules for establishing the place of VAT taxation for supply of goods and services are determined based on the same rules as those presented in the EU 2009/112 and EU 2008/8 Directives. Services provided by non-resident entities to Romanian companies with deemed place of supply in Romania are subject to Romanian VAT.

**VAT consolidation**

Companies that are legally independent but are closely related in terms of financial, economic, and organisational purposes may choose to form a tax group as long as they are administered by the same competent fiscal body. However, transactions between the members of the group fall within the scope of VAT.

**Reverse-charge mechanism**

Under the VAT reverse-charge mechanism, VAT is not actually paid, but only shown in the VAT return as both input and output tax, provided both beneficiary and supplier are registered for VAT purposes.

The reverse-charge mechanism applies for services performed by non-resident entities. The place of supply is where the beneficiary is established or has a fixed establishment.
(e.g. consultancy, marketing services, telecommunications, and electronically supplied services). This is possible if the suppliers are not established in Romania for VAT purposes.

Domestic supplies of cereals and industrial plants performed between companies registered for VAT purposes will be subject to the reverse-charge mechanism. The measure applies until 31 May 2014.

**Limited VAT deduction right**
The VAT deduction right related to the acquisition of road vehicles used for the transport of passengers and vehicles that meet certain characteristics, as well as the acquisition of fuel and all related services used for the respective vehicles, is limited to 50%.

**VAT compliance**
The annual turnover threshold for VAT registration in Romania is the Romanian leu equivalent of EUR 65,000.

As a general rule, the fiscal period is the calendar month. For taxable persons registered for VAT purposes whose previous year-end turnover did not exceed EUR 100,000, the fiscal period is the calendar quarter.

Taxable persons must keep complete and detailed records for calculation of VAT liabilities.

VAT returns should be submitted to the tax authorities by the 25th day of the month following the end of the fiscal period; the VAT payment is due by the same date. The VAT return is submitted by electronic means.

Taxable persons not registered for VAT purposes in Romania and not required to register are obligated to pay VAT and to submit a special VAT return on services rendered by non-residents with a deemed place of supply in Romania. These obligations must be fulfilled by the 25th day of the month following that when the services are supplied.

Taxable persons are required to file VAT statements related to acquisitions/supplies of goods/services performed on Romanian territory on a monthly/quarterly basis, based on invoices issued/received to/from taxable persons registered for VAT purposes in Romania.

A taxable person registered for VAT purposes who does not exceed the exemption threshold of EUR 65,000 (approximately RON 220,000) during the course of a calendar year may request deregistration from the VAT registered persons record between the first and tenth day of each month following the fiscal period used (month or quarter).

**The cash accounting VAT scheme (CAVS)**
As of 1 January 2013, the CAVS was introduced in the Romanian tax legislation. The CAVS is mandatory for taxpayers with a turnover lower than EUR 500,000 registered in the previous calendar year and for newly founded companies.

The CAVS entails the deferment of the VAT chargeability until the value of goods or services delivered is cashed in. Moreover, the right to deduct VAT for the acquisition of goods/services from companies required to apply the CAVS is deferred until the date the payment is performed through the bank. Consequently, approximately 93% of
Romania

Romanian companies are affected by this system. However, non-resident entities do not fall under these rules.

**Customs regulations**

Customs values are determined and declared by importers in accordance with the provisions of the World Trade Organization (WTO) Customs Valuation Agreement (i.e. the Agreement pertaining to the implementation of Article VII of the General Agreement on Trade and Tariffs [GATT]).

**Customs duties**

The customs duties are those specified in the EU Common Customs Tariff and are expressed as a percentage applied to the customs value (i.e. *ad valorem* taxes) or as a fixed amount applied to a specific quantity (i.e. specific taxes).

Agricultural products (i.e. products from chapters 1-24 of the EU Common Customs Tariff) are subject to specific taxation.

In certain cases (e.g. meat), the customs duty rate is established with regard to the cost, insurance, and freight (CIF) or the entry price of the products. In other cases, the customs duty rate is established by adding additional duties, such as agricultural components, to the *ad valorem* tax.

**Authorised Economic Operator (AEO) status**

Operators that obtain AEO status benefit from simplifications regarding customs inspection, obtaining customs authorisations, and performing customs formalities.

Moreover, through the AEO certificate, the holder is recognised by the customs authorities as a reliable person, giving comfort as regards observance of the safety and security standards.

**Customs rulings**

Companies can obtain rulings (binding tariff information or BTI) from Romanian customs authorities regarding the tariff classification of imported goods that are binding for the customs authorities for a six-year period, whenever goods identical to those described in the BTI are imported.

A similar type of ruling can also be obtained regarding the origin of goods (binding origin information or BOI). The BOI is valid for a three-year period.

**Excise duties**

**Harmonised excise goods**

The following products are subject to harmonised excise duties: alcohol and alcoholic beverages, manufactured tobacco products, energy products (e.g. unleaded petrol, diesel oil, gas, coal), and electricity.

Excise duties are due when excise goods are released for consumption (e.g. imported into Romania, taken out of an excise duty suspension arrangement).

Excise goods can be produced, processed, held, and received under a duty suspension arrangement only in an authorised tax warehouse, which should have prior approval from the tax authorities. Such excise goods can also be received from within the European Union under excise duty suspension arrangements by those who are authorised as registered consignees.
The movement of these excise goods under a duty suspension arrangement has to be substantiated with the electronic accompanying administrative document (e-AD).

The production, holding, and movement of excise goods under duty suspension arrangements are subject to a guarantee in order to ensure the payment of the excise duties that may become chargeable. The value of the guarantee cannot be lower than the minimum provided by the legislation in force.

Ethyl alcohol and other alcoholic products are exempt from the payment of excise duties if they are denatured and used in the nutritional, pharmaceuticals, or cosmetics industry.

Some energy products subject to movement control are excepted from excise duty, provided that an end-user authorisation is obtained and the payment of excise duties is secured.

Manufactured tobacco is also exempt from excise duties when exclusively intended for scientific and quality testing.

In some cases, traders can claim a refund of the excise duties paid (e.g. excise duty paid for goods released for consumption in Romania, but intended for consumption in other EU member states; excise duties paid for goods released for consumption and then returned to the production tax warehouse for recycling, reprocessing, or destruction; excise duties paid for goods acquired from the European Union or imported and then returned to the suppliers).

Before being released for consumption in Romania, intermediary products, alcohol, fermented beverages (other than beer and wines), and tobacco products have to be marked with duty stamps. The responsibility for such marking lies with the tax warehouse keepers, registered consignees, and authorised importers releasing such goods for consumption.

For cigarettes, the excise duty due is equal to the sum of the specific excise duty and the ad valorem excise duty. The specific excise duty expressed in EUR/1,000 cigarettes is annually determined based on the ponderate medium retail price, the legal percentage related to the ad valorem excise duty and the total excise duty.

The schedule concerning the increase in the excise duty level related to cigarettes has been modified, being moved forward three months (1 April 2013 instead of 1 July 2013, as was previously provided). As a result, the level of the minimum excise duty for cigarettes for the period 1 April 2013 to 1 April 2014 is EUR 79/1,000 cigarettes.

The total level of excise duty on cigarettes for the period 1 April 2013 to 1 April 2014 is set at EUR 81.78/1,000 cigarettes.

Excise duty rates for fermented still beverages, other than beer and wines, are set at EUR 100/hectolitre of product, and for intermediary products are set at EUR 165/hectolitre.

The current level of excise duties on gasoline and diesel are EUR 467/tonne and EUR 391/tonne, respectively.

Companies selling fuel in gas stations have to register with the tax authorities.
Romania

Other excise goods
Other excise goods are green coffee, roasted coffee (including coffee with substitutes), and soluble coffee (including blends with soluble coffee).

Excise duties are due when the actual receipt takes place for coffee received from EU countries or on the date of the import for the coffee received from non-EU countries.

Traders purchasing coffee are entitled to a refund of the excise duties paid if the products are exported, supplied to another EU member state, or returned unchanged to the supplier.

For intra-Community acquisitions of coffee, prior authorisation is needed.

Property taxes

Building tax
For buildings owned by companies, the building tax rate is set by the Local Council at between 0.25% and 1.5% of the entry value of the building, adjusted by the value of reconstruction, consolidation, modification and extension works, and the revaluation, if applicable. From a tax perspective, a reconstruction, consolidation, modernisation, modification, or enlargement will be considered only if it led to at least a 25% increase in the value of the building. If a building has not been revalued in the last three years, the rate will be increased by 10% to 20%, while if it has not been revalued in the last five years, the rate will be increased by 30% to 40%. The taxable value of fully depreciated buildings is reduced by 15%.

Building tax is paid annually, in two equal instalments, by 31 March and 30 September. For the payment of the entire annual tax by 31 March, a reduction of up to 10% is granted by the Local Council.

Land tax
Owners of land are subject to land tax established at a fixed amount per square metre, depending on the rank of the area where the land is located and the area or category of land use, in accordance with the classification made by the Local Council.

Companies are not subject to tax on land where buildings are sited.

Similar to building tax, land tax is paid annually, in two equal instalments, by 31 March and 30 September. A 10% reduction is granted for full advance payment of this tax by 31 March.

Transfer taxes
There are no transfer taxes for companies for the transfer of property. The income derived from such a transfer will be included into the taxable profits of the company and subject to the flat tax rate.

Stamp duty
For judicial claims, issue of licences and certificates, and documentary transactions that require authentication, stamp duty (in the form of notary fee) has to be paid.

Environmental taxes
For certain activities (e.g. selling ferrous and non-ferrous waste, dangerous substances, activities that generate polluting emissions, releasing packaging materials/tyres
on the market), companies have to pay contributions and taxes to the Romanian Environmental Fund.

All producers/importers/exporters of electric and electronic equipment (EEE) batteries and accumulators are required to register with the National Agency for Environmental Protection as ‘EEE producers’.

Importers and producers of packed goods are liable to contribute to the Environmental Fund. The contribution is RON 2 per kilogram of packaging introduced on the market and is due if companies do not reach the recovery/recycling targets stipulated by the law for any shortfall of the objective. For air pollutants, the computation is based on the CORINAIR/AP-42 methodology and the tax is applied based on the nature of the air pollutants.

A tax of RON 2/litre is levied on industrial oils and lubricants placed on the market. The tax applies to the difference between the annual administration obligations and the administrated quantities of used oil.

Companies conducting activities that result in the discharge of air-pollutant emissions from fixed sources (e.g. nitrogen oxides, sulphur oxides, persistent organic pollutants, heavy metal emissions, such as lead, cadmium, mercury) have to pay contributions to the Environmental Fund of between RON 0.02/kg (about EUR 0.0046) and RON 20/kg (about EUR 4.65).

The contribution for tyres placed on the market is RON 2/kg.

**Social security contributions**

Employers must pay social security contributions, calculated on the gross salary costs, as follows: 20.8%, 25.8%, or 30.8%, depending on labour conditions. The monthly contribution is capped at five average gross salaries multiplied by the number of insured individuals employed under employment contract. For 2013, the national average gross salary is set at RON 2,223.

Other mandatory contributions on labour paid by employers for employees, calculated on gross salary costs, are:

- Contribution for medical leaves: 0.85%.
- Health insurance fund: 5.2%.
- Unemployment fund: 0.5%.
- Guarantee fund: 0.25%.
- Labour accidents insurance fund: 0.15% to 0.85%.

**Branch income**

**Branch**

A foreign company can set up a branch in Romania, as long as the branch only operates in the same field of activity as the parent company. A branch is considered to have the same legal personality as the parent company and is not a separate legal entity (no own share capital, no separate name, etc.)

Profits derived by the branch are taxed at the standard profit tax rate of 16%.
Romania

**Representative offices**
Representative offices are often established as a first step to operating in Romania. A representative office can undertake only auxiliary or preparatory activities, cannot trade in its own name, and cannot engage in any commercial activities. A representative office can perform only a limited range of activities without being considered a PE for profit tax purposes.

Representative offices are subject to a flat annual tax of EUR 4,000 (payable in local currency, i.e. Romanian leu). The tax is paid in two equal instalments, by 25 June and 25 December. If a representative office is set up or closed down during a year, the tax due for that year is pro-rated for the months that the representative office was operational in that fiscal year.

---

**Income determination**
The taxable profit of a company is calculated as the difference between the revenue derived from any source and the expenses incurred in obtaining the taxable revenue throughout the tax year, adjusted for fiscal purposes by deducting non-taxable revenue and adding non-deductible expenses. Other elements similar to revenue and expenses are also to be taken into account when calculating the taxable profit.

For taxpayers that apply International Financial Reporting Standards (IFRS) (i.e. financial institutions and listed companies), there are specific rules in relation to the fiscal value assessment, profit tax computation, adjustments for step-down in value, amortisation, and fiscal treatment of deferred profit tax.

**Inventory valuation**
The methods permitted for inventory valuation under Romanian law are standard cost, detailed sale price, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO). The accounting method is also recognised for tax purposes.

Assets are generally valued at their acquisition cost, production cost, or market value. Fixed assets may be re-valued at certain points in time for various purposes.

**Capital gains**
Capital gains earned by a Romanian resident company are included in their ordinary profits and are taxed at 16%. Capital losses related to sale of shares are, in general, tax-deductible. Capital gains obtained by non-residents from real estate property located in Romania or from the sale of shares held in a Romanian company are also taxable in Romania. However, the income may be subject to treaty protection.

**Dividend income**
Dividends received by a Romanian company from another Romanian company are not subject to profit tax, but are subject to a final WHT of 16%. Those payments are non-taxable if the shareholder held, at the time of distribution, a minimum of 10% of the shares in the other company for an uninterrupted period of at least two years.

Dividends distributed by a company resident in another EU member state to a Romanian company are tax exempt if the Romanian company has held, prior to the time of distribution, a minimum of 10% of the shares in the respective non-resident company for an uninterrupted period of at least two years.
Dividends received by a Romanian company from a foreign company are taxed in Romania at the normal profit tax rate. Credit is available for tax paid abroad.

**Interest and royalty income**

Interest and royalty payments made by Romanian companies to other Romanian companies are taxable income in the hands of the beneficiary.

Romanian-sourced interest and royalty payments of an affiliated company, resident in a EU or European Free Trade Association (EFTA) member state, are exempt from WHT, provided that certain conditions are met, e.g.:

- 25% minimum direct holding of the share capital (i.e. one company has a direct minimum holding of 25% in the share capital of the other company or a third company has a direct minimum holding of 25% in the share capital of both companies involved in the payment of the interest and royalties).
- The holding period must be maintained for an uninterrupted period of at least two years prior to the payment of the interest and royalties.
- The company receiving the interest or royalty payments must be the beneficial owner of these payments.

**Fiduciary contracts**

If the settlor of a fiduciary contract is also the beneficiary, then:

- the transfer of the patrimony from the settlor to the fiduciary is not considered a taxable transfer, and
- the fiduciary will keep separate bookkeeping entry for the fiduciary patrimony and will communicate to the settlor, on a quarterly basis, the income and expenses resulting from the administration of the patrimony.

If the beneficiary is the fiduciary or a third party, the expenses recorded from the transfer of the patrimony from the settlor to the fiduciary is considered non-deductible.

**Other significant items**

The other most relevant types of non-taxable revenue stipulated by the Romanian Fiscal Code are:

- Favourable fluctuations in the price of shares and long-term bonds registered by the company in which the shares and long-term bonds are held, as a result of capitalisation of reserves, benefits, or share premiums.
- Revenue from reversal or cancellation of provisions/expenses that were previously non-deductible, recovery of expenses that were previously non-deductible, and revenue from reversal or cancellation of interest and late payment penalties that were previously non-deductible.
- Revenue from the annulment of a reserve registered as a result of a participation in nature to the capital of other legal entities.
- Revenue from deferred income tax.
- Revenue resulting from the change in the fair value of real estate investments/biological assets owned by the taxpayers applying IFRS.
- Non-taxable revenue expressly provided for under agreements and memoranda enforced by regulatory documents.

**Foreign income**

Resident companies are taxed on their worldwide income unless a DTT provides otherwise. However, in case of foreign subsidiaries of Romanian companies, income is
Romania

not taxed in Romania until remitted back. Otherwise, there is no specific tax deferral regime in place.

**Deductions**

Expenses fall into three categories: deductible expenses, limited deductibility expenses, and non-deductible expenses.

**Deductible expenses**

As a general rule, expenses are deductible only if incurred for the purpose of generating taxable income.

Some of the deductible expenses specifically mentioned by the Fiscal Code include:

- Marketing and advertising expenses.
- R&D expenses that are not recognised as intangible assets for accounting purposes.
- Expenses incurred for environmental protection and resource conservation.
- Expenses incurred for management improvement; updating information technology (IT) systems; introducing maintaining, and developing quality management systems; and obtaining quality compliance confirmation.
- Losses incurred when writing off client receivables in any of the following cases:
  - The bankruptcy procedure of the debtor was closed due to a court ruling.
  - The debtor is deceased and the receivable cannot be recovered from the heirs.
  - The debtor is dissolved or liquidated.
  - The debtor has major financial difficulties affecting its entire patrimony.
- Expenses related to losses from the valuation of shares and long-term bonds.
- Travel and accommodation expenses related to business; this also includes transportation of personnel to and from the workplace.
- Daily allowances for expenses incurred by employees in connection to travels in Romania and abroad.
- Expenses incurred from professional training and development of employees.
- Expenses related to benefits granted to employees as equity instruments settled with cash, at the moment of the effective granting, if the benefits are subject to personal income tax (PIT).
- Expenses incurred in connection to work safety, prevention of work accidents and occupational diseases, the related insurance contributions, and professional risk insurance premiums.
- Expenses incurred in connection to the acquisition of packaging materials, during the useful life set by the taxpayer.
- Fines, interest, penalties, and other increased payments due under commercial contracts.

Note that credit institutions apply IFRS rules, and certain deductibility rules are provided for this category of taxpayers.

**Limited deductibility expenses**

The deductibility of the following expenses is limited:

- Interest expenses and foreign exchange losses under thin capitalisation rules (see the Group taxation section for more information).
- Provision and reserve expenses (see details below).
- Depreciation and reduction in value of fixed assets under fiscal depreciation rules (see details below).
• Perishable goods capped by the relevant specialist bodies.
• Protocol expenses are deductible at up to 2% of the difference between the total taxable revenue and the total related expenses, except for protocol and profit tax expenses.
• Social expenses are deductible at up to 2% of salary expenses and include, among other items, maternity allowances, expenses for nursery tickets, funeral benefits, and allowances for serious or incurable diseases and prostheses, as well as expenses for the proper operation of certain activities or units under taxpayers’ administration (i.e. kindergartens, nurseries, health services supplied for occupational diseases and work accidents prior to admission to health establishments, canteens, sports clubs, clubs, etc). Expenses incurred for benefits granted under a collective labour agreement are also deductible within the same limits.
• Health insurance premiums are deductible for employers up to the limit of EUR 250 per employee per year; private pension insurance premiums are deductible up to the limit of EUR 400 per employee per year.
• Taxes and fees paid to non-government organisations or professional associations related to the taxpayer’s activity are deductible up to the limit of EUR 4,000 per year.
• Expenses incurred from company vehicles weighing under 3,500 kg and with fewer than nine passenger seats (including driver’s seat) that are not used exclusively for business purposes are 50% deductible. These expenses are fully deductible for vehicles used for the following activities:
  • Emergency, safety and security, courier services, cars used by sales and acquisitions agents.
  • Paid transportation services and taxi activities.
  • Rental.
  • Driving schools.
  • Vehicles used as commodities.

**Non-deductible expenses**
Expenses deemed non-deductible include, among other items, the following:

• Domestic profit tax and profit tax paid in foreign countries.
• Expenses related to non-resident income tax borne by Romanian taxpayers on behalf of non-residents.
• Interest, fines, and penalties due to Romanian or foreign authorities.
• Expenses incurred for management, consultancy, assistance, or other supply of services if no written contracts or any other lawful agreements are entered into and the beneficiary cannot justify the supply of such services for the activities performed and their necessity.
• Sponsorship and patronage expenses and expenses for private scholarships. Taxpayers are, however, granted a fiscal credit of up to 0.3% of turnover and 20% of the profit tax due, whichever is lower.
• Other salary and/or assimilated expenses (if not taxed at the level of the individual), except for those specifically exempted from individual income taxation.
• Expenses resulted from benefits granted to employees as equity instruments settled with shares, unless subjected to PIT.
• Expenses incurred from insurance premiums unrelated to company assets or business, save for those regarding goods that are bank collateral on loans used in the business or those used under rental or leasing contracts.
• Expenses recorded without justifying documents.
• Expenses in favour of shareholders, other than those related to goods or services provided by the shareholders at market value.
• Expenses representing fixed assets impairments when, as a result of a revaluation, a step-down in value is recorded.
Romania

• Expenses registered in the accounting records based on documents issued by an inactive taxpayer whose fiscal registration certificate was suspended.
• Expenses relating to missing or damaged non-imputable inventories or tangible assets, for which no insurance contracts have been concluded.
• Losses incurred from writing off doubtful or unsettled liabilities, for the part which is not covered by a bad debt provision.
• Expenses reflected in accounting records, irrespective of their nature, that later prove to be related to acts of corruption as defined under the law.

Note that credit institutions apply IFRS rules, and certain non-deductibility rules are provided for this category of taxpayers.

Depreciation
Romanian law makes an explicit distinction between fiscal and accounting depreciation. Fiscal depreciation is treated as an expense deductible from the tax base, while accounting depreciation is treated as a non-deductible expense. Companies should maintain a separate record to reflect the separate computation of the fiscal and accounting depreciation. Any accounting revaluations of fixed assets are not taken into account in computing the tax depreciation.

Assets are generally depreciated using the straight-line method. However, accelerated or degressive depreciation methods may be used to determine fiscal depreciation, while the accounting depreciation method may be different.

The useful lives to be used for tax purposes are the ones stated in the Official Fixed Assets Catalogue, published under government decision. Ranges are provided for classes of fixed assets, from which the taxpayers can choose the useful life (e.g. office and housing buildings: 40 to 60 years, commercial buildings: 32 to 48 years, commercial furnishings: 9 to 15 years, automobiles: 4 to 6 years).

For vehicles with up to nine seats, the fiscal depreciation is limited to a maximum of RON 1,500 per month for each vehicle. Certain categories of vehicles are exempt from this monthly deduction limitation (e.g. used exclusively for emergency, security, or delivery services; used for paid passenger transport; or used for paid supply of services).

Land cannot be depreciated.

Accelerated depreciation
Under the Fiscal Code, machinery and technical equipment, computers and their peripherals, as well as patents, may be depreciated by using the accelerated method, under which a maximum of 50% of the asset’s fiscal value may be deducted during the first year of usage, while the rest of the asset’s value can be depreciated using the straight-line method over the remaining useful life.

Goodwill
As a rule, goodwill is deemed non-depreciable from a Romanian fiscal perspective.

Start-up expenses
According to accounting rules, start-up expenses may be capitalised and depreciated over a maximum period of five years. However, according to the fiscal rules, start-up expenses should not be depreciated for tax purposes.
**Provisions and reserves**

As a general rule, provisions and reserves are non-deductible for profit tax purposes. However, there are certain provisions and reserves that are deductible, such as:

- Setting up or increasing the legal reserve fund up to 5% of the adjusted annual accounting gross profit before tax (before profit tax) and until it reaches 20% of the share capital.
- Provisions related to guarantees for proper execution granted to the clients.
- Provisions for doubtful debts recorded after 1 January 2006 are deductible at up to 30% if the related receivables meet the following conditions simultaneously:
  - Booked after 1 January 2004.
  - Not collected for a period exceeding 270 days from the due date.
  - Not guaranteed by another person.
  - Due by a person not affiliated with the taxpayer.
  - Included in the taxable income of the taxpayer.
- Bad debt provisions are fully deductible if all the following conditions are met:
  - Receivables are booked after 1 January 2007.
  - The debtor is a company declared bankrupt by a court ruling.
  - Receivables are not guaranteed by another person.
  - The debtor is not a related party.
  - Receivables were included in the taxable income of the taxpayer.
- Specific provisions established by credit institutions, non-banking financial institutions, and other similar entities.
- Technical reserves set up by insurance and reinsurance companies, in accordance with their regulatory legal framework, except for the equalisation reserve.
- Risk provisions for transactions carried out on financial markets, in accordance with the rules issued by the Romanian National Securities Commission.

The reduction or cancellation of any provision or reserve deducted from the taxable profit, due to changing the destination of the provision or reserve, distribution towards shareholders in any form, liquidation, spin-off, merger, or any other reason, is included in the taxable revenue and taxed accordingly.

Note that special rules are applicable to credit institutions that are required to apply IFRS rules.

**Fiscal losses**

Companies are allowed to carry forward fiscal losses declared in the annual profit tax returns for a period of up to five years (for losses incurred prior to 2009) or seven years (for losses incurred after 2009), based on the FIFO method. No related adjustment for inflation is allowed.

Any loss incurred by a PE of a Romanian company located in a non-EU/EFTA member state or in a country that has a DTT in place with Romania is only deductible for tax purposes from the revenue derived by that PE, and losses can be carried forward only for a period of five years.

For foreign legal persons, carryforward of losses applies only to revenue and expenses attributable to their PE in Romania.

As of 1 October 2012, losses incurred by a company can be transferred within a merger/spin-off operation and can be recovered by the successors, in proportion to the assets and liabilities transferred.
Romania

Carryback of losses is not available in Romania.

**Payments to foreign affiliates**
Transactions with Romanian-affiliated companies and with non-resident related parties fall within the scope of the investigations regarding compliance with transfer pricing legislation (see Transfer pricing in the Group taxation section).

**Group taxation**

There is no tax consolidation or group taxation in Romania. Members of a group must file separate returns and are taxed separately. Losses incurred by group members cannot be offset against profits made by other members of the group.

**Transfer pricing**
Transfer pricing requirements are applicable to transactions between Romanian related parties as well as foreign related parties.

Transactions between related parties should observe the arm’s-length principle. If transfer prices are not set at arm’s length, the Romanian tax authorities have the right to adjust the taxpayer’s revenue or expenses so as to reflect the market value.

Traditional transfer pricing methods (i.e. comparable uncontrolled prices, cost plus, and resale price methods), as well as any other methods that are in line with the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines (i.e. transactional net margin and profit split methods), may be used for setting transfer prices.

**Transfer pricing documentation**
Taxpayers engaged in related party transactions have to prepare and make their transfer pricing documentation file available upon the written request of the Romanian tax authorities.

Transfer pricing audit activity has significantly increased during the past few years, and requests for presenting the transfer pricing documentation file have started to become common practice. We are aware of recent cases where the Romanian tax authorities adjusted the taxable result of local taxpayers in accordance with the applicable regulations.

The content of the transfer pricing documentation file has been approved by order of the president of the National Agency for Tax Administration. The Order is supplemented by the Transfer Pricing Guidelines issued by the OECD and the Code of Conduct on transfer pricing documentation for associated enterprises in the European Union Transfer Pricing Document (EUTPD).

The deadline for presenting the transfer pricing documentation file will not exceed three calendar months, with the possibility of a single extension equal to the period initially established.

Failure to present the transfer pricing documentation file or presenting an incomplete file following two consecutive requests may trigger estimation of transfer prices by the tax authorities on the basis of generally available information.
Advance pricing agreement (APA)
Taxpayers engaged in transactions with related parties have the possibility to apply for an APA. These taxpayers can also schedule a pre-filing meeting to discuss the feasibility of the APA.

The request for an APA is filed together with the relevant documentation and payment evidence of the fee (ranging between EUR 10,000 and EUR 20,000). The required documentation is based on the EUTPD and suggests up-front the content of the APA.

The term provided by the Fiscal Procedural Code for issuance of an APA is 12 months for unilateral APAs and 18 months for bilateral and multilateral APAs. The APA is issued for a period of up to five years. In exceptional cases, such as long-term agreements, it may be issued for a longer period.

APAs are opposable and binding on the tax authorities as long as there are no material changes in the critical assumptions. In this view, the beneficiaries are obligated to submit an annual report on compliance with the terms and conditions of the agreement.

If taxpayers do not agree with the content of the APA, they can notify the National Agency for Tax Administration within 15 days. In this case, the agreement does not produce any legal effects.

Possible adjustments of the VATable base
As of 1 February 2013, Romanian legislation contains new provisions in respect of possible adjustments of the taxable base for VAT purposes based on the market value of a supply of goods/provision of services between related parties.

Thin capitalisation
If the company’s equity is negative or the debt-to-equity ratio is higher than 3:1, expenses incurred from interest charges and net losses related to foreign exchange differences on long-term loans are fully non-deductible. However, these expenses may be carried forward to the following fiscal years and become fully tax deductible in the year the debt-to-equity ratio becomes lower than or equal to 3:1.

The deductibility of interest expenses and net foreign exchange losses related to long-term loans (with a maturity period of over one year) is further subject to the debt-to-equity ratio test. Debt included in the calculation of the debt-to-equity ratio is represented by all such (non-financial institution) loans with a maturity period of over one year.

The equity includes share capital, share/merger premiums, reserves, retained earnings, current year earnings, and other equity elements. Both debt and equity are calculated as the average of values existing at the beginning and at the end of the period for which profit tax is calculated.

Tax credits and incentives

Foreign tax credits
Tax credits for taxes paid to a foreign state may be obtained in Romania only if the DTT concluded between Romania and the foreign state applies and only if proper documentation confirming the tax was paid is available.
Romania

**Research and development (R&D) incentives**
Companies can benefit from an additional deduction of 50% of the eligible expenses for their R&D activities. Moreover, accelerated depreciation may be applied for devices and equipment used in the R&D activity.

In order to benefit from this supplementary deduction, the eligible R&D activities must be applicative research and/or technological development relevant to the taxpayer's activity and must be performed in Romania or in the EU/European Economic Area (EEA) member states.

**Dividend tax exemption for reinvestments**
Distributed dividends are exempted from taxation if they are invested in the same or in another Romanian company's share capital.

To benefit from this exemption, dividends must be reinvested to preserve and increase the number of employees and to boost existing lines of business.

**Local tax exemptions for business located in industrial parks**
No property tax is due for buildings and constructions located in an industrial park. Also, land within industrial parks is exempt from land tax.

The incentives granted for the set up and development of industrial parks include:

- Local tax exemptions/reductions for immovable assets and land related to the industrial park.
- Other incentives that may be granted by the local tax authorities.
- Development programmes for infrastructure, investments, and equipment endowments granted by local and central public administration, companies, and foreign financial assistance.
- Concessions and structural funds for development.

The companies operating within the industrial park benefit from:

- Various services offered by the park administrator free of charge or with reduced fees.
- Advantageous conditions with regard to location, use of the infrastructure, and communications of the park, with payment in instalments.

**Employment incentives for special categories**
For employment of recent graduates, employers can apply for a monthly grant of 1 to 1.5 (depending on the level of educational background) multiplied by the reference social indicator (currently set at RON 500) for each new graduate of a recognised institution for a period of 12 months. Employers benefiting from this incentive are obligated to keep this employment relationship for a time period of at least three years.

Moreover, employers may also be exempt for these 12 months from paying the unemployment contribution due for these graduates. In addition, grants amounting to the social security contributions for two years for recent graduates are available if they are still employed by the company for two additional years after the first three years pass.

The same incentives apply for the employment of recent graduates with disabilities, except that the period for which the exemption from contributions to the unemployment fund and the monthly grants apply is extended to 18 months.
Employers can also apply for exemption from unemployment fund contributions and for a monthly grant equal to the reference social indicator for each unemployed person with an age exceeding 45 years, or for each such person who is the sole family supporter. This monthly grant is available for a period of 12 months. Employers benefiting from this incentive have the obligation to keep this employment relationship for at least two years.

Employers running professional training programmes for their employees may apply for a refund of 50% of their expenses for up to 20% of their workforce, subject to certain conditions and limitations.

**Other incentives granted to taxpayers**
For justified claims of the taxpayers, the tax authorities may grant incentives for the payment of taxes, such as the rescheduling of tax payments due.

Rescheduling of tax payment obligations may be granted by the tax authorities to individuals and legal entities upon request. The time-frame for the rescheduling is a maximum of five years for taxpayers with tax liabilities below or equal to RON 300 million and up to seven years for taxpayers with liabilities higher than RON 300 million. The time-frame is set after taking into consideration the taxpayer’s financial situation and the total tax burden.

In order to benefit from the rescheduling of tax payment obligations, taxpayers must meet certain conditions and also provide a guarantee that covers the rescheduled liabilities, interest, and also a supplementary percentage of the rescheduled liabilities, depending on the duration of the rescheduling time-frame.

**Withholding taxes**

**Domestic dividend tax**
Dividends paid by a Romanian company to another Romanian company are subject to 16% tax. The payments are non-taxable if the shareholder held, at the time of distribution, a minimum of 10% of the Romanian company's shares for an uninterrupted period of at least two years.

**WHT for non-residents**
As of 1 February 2013, all income obtained by non-residents from Romanian taxpayers for the provision of services rendered in Romania or abroad will be subject to 16% WHT rate in Romania (under previous regulations, only revenue from management and consultancy services rendered in Romania or abroad was subject to WHT in Romania).

Non-resident companies not operating through a PE are subject to a 16% WHT on revenue sourced in Romania, such as interest, royalties, revenue from services, dividends, commissions, and revenue derived from liquidation of a Romanian legal entity.

Certain specific provisions and exceptions apply to non-resident WHT, as follows:

- A 50% WHT applies to payments made by Romanian residents (e.g. dividends, interest, royalties, commissions, services) to non-residents in countries that do not have an exchange of information agreement concluded with Romania, regardless of whether the beneficiary of the income is resident of a state with which Romania...
has concluded a DTT or not. However, this WHT is applicable only to the extent such payments result from artificial transactions.

- As Romania is an EU member state, the provisions of the Parent-Subsidiary Directive apply. Consequently, dividends paid by Romanian companies to companies resident in one of the EU/EEA member states are exempt from WHT if the dividend beneficiary has held, at the time of distribution, a minimum of 10% of the shares of the Romanian company for an uninterrupted period of at least two years.
- Dividend and interest income obtained from Romania by EEA registered pension funds is exempt from WHT.
- Romania has implemented the Interest and Royalties Directive. Payments of interest and royalties made by a Romanian company to another company resident in an EU/EEA member state are tax exempt from WHT if the non-resident company held, for an uninterrupted period of at least two years, at least 25% of the share capital of the Romanian company prior to the time of payment.

In order to apply EU legislation, non-resident recipients of the income are required to present a certificate of tax residence and a declaration attesting to compliance with the necessary requirements provided by the European Directives.

The following categories of income derived by non-residents from Romania are exempt from WHT:

- Interest income and income derived from the sale of debt instruments issued by the Romanian authorities (e.g. government bonds).
- Revenue from international transportation and accessory services.
- Prizes obtained by individual non-residents from artistic, cultural, or sport festivals/competitions paid from public funds.
- Income obtained from a partnership constituted in Romania by a non-resident company (the related profits are subject to corporate profit tax).

* If certain conditions are met.

** Rates applicable as of 1 January 2013.

In order to apply the provisions of the relevant DTT, the non-resident recipient of the income should provide to the Romanian paying company a tax residency certificate attesting its tax residency for the purpose of the DTT.

If the tax rates prescribed by domestic legislation differ from those prescribed by the DTT, then the most favourable rate will apply. The tax rate applicable to income obtained by a resident of an EU member state in Romania is the most favourable rate provided under either domestic legislation, the EU Directives transposed into domestic legislation, or the DTT.

---

**Tax administration**

**Taxable period**
The fiscal year is the calendar year or the period during which the entity existed if it was set up or ceased to exist during that calendar year.

The accounting year is usually the calendar year. Certain categories of entities (i.e. Romanian branches of foreign companies, Romanian consolidated subsidiaries and subsidiaries of the subsidiaries of foreign companies) are allowed to set an accounting
Romania

year other than the calendar year if the financial year of the parent company is different from the calendar year. However, establishing a financial reporting period different from the calendar year does not modify the period for which profit tax is calculated, namely the calendar year.

**Tax returns**

Taxpayers (except for non-profit organisations and taxpayers deriving most of their income from agriculture) must submit the profit tax returns by the 25th day of the first month following the first, second, and third quarters. The annual profit tax return is due by 25 March of the following year.

Non-profit organisations and taxpayers that obtain income mainly from agricultural activities have to declare and pay annual profit tax by 25 February of the year following the reporting period.

As of 1 January 2013, taxpayers (except those specifically mentioned by law) may opt to declare and pay the annual profit tax by making quarterly advance payments (see **Payment of tax below**). The decision to take this option has to be communicated by 31 January of the fiscal year in which the taxpayer wants to apply the option and it has to be maintained for at least two consecutive years.

Large and medium-sized taxpayers have the obligation to submit fiscal forms online, using the [www.e-guvernare.ro](http://www.e-guvernare.ro) portal. The electronic signature of the tax returns can only be made using a qualified certificate issued by a legally accredited certification services provider. Other categories of taxpayers may file their tax return electronically as an alternative way of compliance.

Taxpayers required to withhold tax, with the exception of salary payers, are required to submit a statement to the tax authorities regarding the tax withheld for each beneficiary of income. This statement must be submitted for the previous year by the last day of February of the current fiscal year and refers to the tax withheld and paid by Romanian residents on income obtained in Romania by non-resident beneficiaries.

If taxpayers have failed to submit their tax returns, the tax authorities will assess, by way of default, all the tax obligations found in the taxpayer’s fiscal liability records for each fiscal period in which tax returns were not submitted.

**Payment of tax**

Taxpayers (except for banks, non-profit organisations, taxpayers deriving most of their income from agriculture) must pay the quarterly profit tax by the 25th day of the first month following the first, second, and third quarters. The annual profit tax has to be paid by 25 March of the following year.

Banks and branches of foreign banks in Romania are required to apply the system of advance quarterly profit tax payments. Other taxpayers, with some exceptions mentioned by law, may use this system as an alternative reporting and payment procedure.

The anticipated quarterly payments are calculated as a quarter of the previous year’s profit tax increased by the consumer price index (CPI) inflation rate, with the payments due by the 25th day of the month following the end of the quarter. The CPI inflation rate is published by Order of the Ministry of Finance by 15 April of the year for which the advance payments are made. For 2013, the CPI inflation rate is 104.3%. If taxpayers incur fiscal losses in the first year of the application of the option, the advance profit tax
payments are calculated by applying the profit tax rate to the accounting profit for the period in which tax payments are made in advance.

Non-profit organisations and taxpayers that obtain income mainly from crop production have to pay annual profit tax by 25 February of the following year.

Newly established banks and branches of foreign banks in Romania (i.e. without a previous year history) or those that incurred fiscal losses in the previous year make quarterly advance payments at the level of the amount resulted from applying the profit tax rate on the accounting profit for the period for which the advance payment is made.

**Late-payment penalty**
The late-payment interest rate is 0.04% for each day of delay. Subsequent late-payment penalties include:

- 5% of the fiscal liabilities, if the payment is made after 30 days but before the expiry of 90 days from the due date.
- 15% of the remaining unpaid fiscal liabilities, if the payment is made after 90 days from the due date.

**Non-resident companies**
Non-resident companies deriving income from the sale of real estate located in Romania or from the sale of shares held in a Romanian company are subject to a 16% profit tax in Romania and are liable to declare and pay such tax. Non-residents may appoint a tax agent/representative to fulfil this requirement. However, if the buyer is a Romanian company or a Romanian PE of a non-resident company, the obligation to declare and pay the annual profit tax rests with the buyer.

For capital gains tax declaration and payment, the Romanian legislation requires the following tax returns to be submitted:

- Quarterly statements, starting the 25th day of the month following the quarter in which the non-resident first earned capital gains taxable in Romania.
- An annual profit tax return.

The quarterly statements and annual return must be submitted during the entire period in which the non-resident is registered with the Romanian tax authorities, even if, throughout that period, it no longer carries out transactions generating taxable revenue in Romania.

**Tax audit process**
Tax inspections can be carried out in respect of all legal persons, irrespective of their organisational structure, that are bound to determine, withhold, and pay taxes, duties, contributions, and other amounts owed to the general consolidated budget.

The tax authorities may not inspect the same taxes for a period previously inspected, unless additional data is obtained of which the tax inspectors were unaware when carrying the first inspection or calculation errors were made.

Prior to the tax inspection commencing, the tax authorities must notify the taxpayer in writing, by sending a tax inspection notice, except in the cases explicitly laid down in the Fiscal Procedural Code.
Romania

Tax inspections are generally carried out at the taxpayer’s business premises and may not exceed a six-month period in the case of large taxpayers or three months for other taxpayers. For taxpayers that have secondary offices, the tax inspections may not exceed six months. The tax authorities may suspend the tax inspection if they deem it necessary for the clarification of the taxpayer’s tax status.

Before finalisation of the tax inspection, the tax authorities are required to inform the taxpayer of their findings and the tax consequences and allow the taxpayer to express its point of view, within three days from the ending of the tax inspection. Upon completion of the tax inspection, the authorities conclude a tax inspection report, based on which the tax assessment is made, which in turn is to be communicated to the taxpayer within 30 days from the ending of the tax inspection.

Statute of limitations
As a general rule, the statute of limitation is five years and begins to run on 1 January of the year following the one in which the taxable event occurred. However, the statute can be suspended for the duration of a tax inspection but will recommence after the inspection has been completed.

Topics of focus for tax authorities
Areas of focus during tax audits include:

- VAT reimbursable positions.
- Deductibility of service expenses.
- Transfer pricing.
- Transactions with tax havens.

Other issues

Mergers and acquisitions
Mergers, spin-offs, transfers of assets, and exchanges of shares between two Romanian companies should not trigger capital gains tax.

In the case of a relocation of the registered office of a European Company (SE) and a European Cooperative Society (SCE) from Romania to another EU member state, no tax will apply on the difference between the market value of the transferred assets and liabilities and their fiscal value, if certain conditions are met. There will also be no tax on such movements at the shareholder level. Therefore, a tax basis step-up may be achieved in the case of Romanian shareholders.

If a Romanian company has a PE in another EU member state, and the Romanian company is dissolved as a result of a cross-border reorganisation, the Romanian tax authorities will not have the right to tax the PE.

As of 1 October 2012, new provisions have been introduced for the recovery of fiscal losses in the case of restructuring operations carried out by Romanian legal entities and those involving Romanian legal entities and residents of other EU member states. Herewith, the right to recover fiscal losses by legal entities that are successors of merger or spin-off operations is regulated. The recovery is correlated with the assets and liabilities transferred according to the merger/spin-off project.
Also, some amendments were introduced to the Romanian Company Law, simplifying and, in some cases, reducing the time-frame for performing the legal steps that have to be followed in case of mergers and spin-offs.

**Significant developments**

**Recent significant changes in tax legislation**

**Amendments to the corporate property tax**
Movable property recorded on the books as fixed assets starting from 1 January 2013 onward will not be taxed.

At the same time, the property of natural monopolies, which were exempted earlier, will be taxed. The tax rates applicable under the laws of Russia’s constituent regions to public rail roads, trunk pipelines, power lines, and facilities constituting an integral technical component of the above objects cannot exceed 0.4% in 2013, 0.7% in 2014, 1% in 2015, 1.3% in 2016, 1.6% in 2017, and 1.9% in 2018.

**Amendments to the list of value-added tax (VAT) exempt services**
Starting from 2013, the financial services provided by the following companies will be exempted from VAT: registrars, depositaries, dealers, brokers, securities management businesses, investment, mutual and private pension funds management companies, clearing organisations, and trade organisers.

**Significant changes expected in 2014 - 2016**
The Russian government regularly publishes the key directions in Russian tax policy for the next three-year period. The following changes were announced in the most recent document:

- Introduction of controlled foreign company (CFC) rules.
- Introduction of the beneficial owner concept.
- Changes in taxation for financing structures involving Eurobonds to be issued after 1 January 2014.
- Introduction of a real estate tax.

**Taxes on corporate income**

**Profits tax**
The maximum profits tax rate for all taxpayers in the Russian Federation is established at 20% (2% is paid to the federal budget and 18% is paid to the budgets of constituent regions). The amount payable to the budgets of constituent regions may be reduced by such regions, so the total minimum tax rate may be 15.5% (e.g. the rate of 15.5% is established for certain categories of taxpayers located in Moscow, St. Petersburg, the Samara region, the Kaluga region, and some other regions).
Russian legal entities pay tax on their worldwide income (credit relief is available for foreign tax paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules).

Foreign legal entities pay tax on Russia-source income derived through a permanent establishment (PE) (at the rate of 20%) and are also subject to withholding tax (WHT) on income from Russian sources not related to a PE (at rates varying from 10% to 20%, depending on the type of income and the method used to calculate it).

**Local income taxes**
The there are no local taxes on income.

---

**Corporate residence**
The effective Russian tax legislation does not contain terminology of corporate residence. The tax system in Russia distinguishes between Russian and foreign legal entities on the basis of their incorporation.

**Permanent establishment (PE)**
A PE is broadly defined as 'a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Russia'. Russia's various double tax treaties (DTTs) may define a PE differently. Conducting business through an agent also may create a taxable PE in Russia.

---

**Other taxes**

**Value-added tax (VAT)**
VAT is a federal tax in Russia, payable to the federal budget. There is no separate VAT registration in Russia. The established general tax registration requirements are applicable to all taxes, including VAT.

Taxpayers follow a ‘classical’ input-output VAT system, whereby a VAT payer generally accounts for VAT on the full sales price of the transaction and is entitled to recover input VAT incurred on inventory costs and other related business expenses. The Russian VAT system, although not originally based on the European Union (EU) model has moved towards it. However, it still currently differentiates from the EU VAT system in multiple ways.

**Output VAT**
Generally, VAT applies to the value of goods, works, services, or property rights supplied in Russia. The standard VAT rate is 18% in Russia (with a lower rate of 10% applicable for certain basic foodstuff, children's clothing, medicines and medical products, certain printed publications, etc). The same VAT rates apply for imports of goods into Russia.

Exports of goods, international transportation and other services related to the export of goods from Russia, international passenger transportation, and certain other supplies are zero-rated with an input VAT recovery right. The application of the 0% VAT rate and recovery of the respective input VAT should be confirmed by submitting a number of documents to the tax authorities within certain time limits. Special rules are provided in
Russian Federation

respect of the documentary confirmation of the right to tax export supplies to Customs Union member countries with a 0% VAT rate, including an input VAT recovery right.

The list of VAT-exempt goods and services includes basic banking and insurance services, services provided by the companies of the financial sector (depositaries, brokers, and some others), educational services by certified establishments, sale of certain essential medical equipment, passenger transportation, and certain other socially important services. Most accredited offices of foreign legal entities (as well as the accredited employees of these offices) may be exempt from VAT on property rental payments. Performance of VAT-exempt supplies gives no right for the recovery of the attributable input VAT; instead, costs associated with non-recoverable input VAT are, in most cases, deductible for profits tax purposes.

Withholding VAT
Russian VAT law contains rules for determining where services are supplied from a VAT perspective. These rules divide all services into different categories for determining where they are deemed to be supplied for VAT purposes. For example, certain services are deemed to be supplied where they are performed, some where the ‘buyer’ of the services carries out the activity, others where the immovable property is located, etc.

Under the reverse-charge mechanism, a Russian company must account for VAT on any payment it makes to a non-tax registered foreign company, if the payment is connected to a supply of goods or services regarded as supplied in Russia, based on the VAT place of supply rules and not falling under any VAT exemption based on the domestic VAT law. In such circumstances, according to the law, the Russian buyer shall act as a tax agent for Russian VAT purposes by withholding Russian VAT at the rate of 18/118 from payments to the foreign supplier and remit such withheld VAT to the Russian budget. The withheld VAT may be recovered by the Russian payers in accordance with the standard input VAT recovery rules provided by law.

Input VAT recovery
Generally, taxpayers are eligible to recover input VAT associated with the purchase of goods, works, services, or property rights, provided a set of rules established by the VAT legislation is met. Input VAT could potentially be recovered by the taxpayer in the following cases:

• VAT related to goods, services, or works acquired for the purpose of conducting VATable transactions.
• VAT related to the purchased goods, works, or services used in non-VATable transactions, provided the portion of expenses related to non-VATable operations does not exceed 5% of total amount of expenses.
• Input VAT related to advance payments performed to Russian suppliers of goods (works, services), provided such acquired goods (works, services) are aimed at being used in VATable activities. Please note that application of this rule is the right of taxpayers (rather than an obligation), and taxpayers may choose whether to enjoy this right or not.

VAT compliance requirements
Each taxpayer performing supplies of goods, works, services, or property rights is liable to issue VAT invoices and provide them to customers. VAT invoices shall be issued within five days after the supply has occurred. The form of the VAT invoice is a standard one, established by the government. Compliance with invoicing requirements is critical to the buyer’s ability to recover input VAT.
E-invoicing is also allowed under the Russian Tax Code. However, the e-invoice format and the necessary protocol are not yet established by the respective authorities. E-invoicing requires digital signature and data transfer via operators and is subject to mutual agreement of the transaction parties. Operators are companies who provide services for exchange of open and confidential information via telecommunication channels.

Generally, incoming and outgoing VAT invoices shall be registered by taxpayers in special purchases and sales VAT ledgers.

VAT returns shall be submitted to the tax authorities on a quarterly basis. VAT must be paid to the Russian budget after the end of each quarter in three instalments not later than the 20th day of each of the three consecutive months following the quarter, except for the remittal of VAT withheld by Russian buyers under the reverse-charge mechanism, which is to be transferred to the Russian budget at the date of the external payment.

**Import VAT**

Import VAT is payable in customs upon importation of goods. The tax base for import VAT purposes is generally the customs value of the imported goods, including excise payments. Either the 18% or 10% VAT rate may apply upon import of goods in Russia, depending on the specifics of the goods.

A limited range of goods is eligible for exemption from import VAT. The list of such goods includes, for example, certain medical products and goods designated for diplomatic corps. Relief from import VAT is available on certain technological equipment (including their components and spare parts) analogues of which are not produced in Russia. The list of such equipment is established by the Russian government.

**Import duties**

In addition to VAT, customs duties are levied on assets imported into the Russian Federation. The rate varies according to the tariff code of the goods imported and the country of origin (generally the rate varies from 0% to 20% of the customs value of imported goods). There is special relief from customs duties for qualifying goods contributed to the charter capital of Russian companies with foreign investments.

The foundation of the Customs Union and deeper integration processes amongst Russia, Belarus, and Kazakhstan (hereinafter ‘the CU’) has resulted in unification of the customs legislation of the members of the CU and creation of a single customs territory, within which goods in mutual trade between the CU member states are moved without any customs clearance formalities. Members of the CU should apply unified customs tariffs and customs valuation methodology, general rules of non-tariff regulation, uniform technical regulations, etc.

**Customs processing fee**

Goods transported across the Russian Federation customs border are subject to a customs processing fee with a flat rate. The fee depends on a customs value of transported goods. Generally the fee is not significant.

**Excise duty**

Excise taxes apply to the production and import of cars, tobacco, alcohol, petrol, and lubricants. Special excise rates for each type of excisable goods are established in the Tax Code. The rates are widely variable and are based on multiple factors.
Property tax
The maximum property tax rate is 2.2%, and regional legislative bodies have the right to reduce this rate. The property tax base includes only the annual book value of fixed assets recorded on the taxpayer’s balance sheet (including property leased out). Intangible assets, inventories, work-in-progress, and financial assets are not subject to property tax in Russia.

Movable property recorded on the books as fixed assets from 1 January 2013 and further will not be taxed.

At the same time, the property of natural monopolies, which was exempted earlier, will be taxed. The tax rates applicable under the laws of Russia's constituent regions to public rail roads, trunk pipelines, power lines, and facilities constituting an integral technical component of the above objects cannot exceed 0.4% in 2013, 0.7% in 2014, 1% in 2015, 1.3% in 2016, 1.6% in 2017, and 1.9% in 2018.

Transfer taxes
There are no transfer taxes in Russia.

Transport tax
A transport tax is imposed on certain types of land, water, and air transport registered in Russia. Fixed rates apply (per unit of horsepower, gross tonnage, or unit of transport), which are differentiated based on engine capacity, gross tonnage, and type of transport. The actual rates in the regions may be subject to a maximum ten-fold increase/decrease by the legislative bodies of Russian Federation constituent subjects. Reporting and payment rules are established by regional legislative authorities.

Social contributions
Annual salary under 512,000 Russian rubles (RUB) (approximately 12,350 euros [EUR]) per one employee is subject to social contributions at a consolidated rate of 30%. An additional 10% charge is imposed on salary that exceeds RUB 512,000 per annum per one employee. Remuneration of foreign nationals temporarily staying in Russia is covered by pension insurance contributions at a rate of 22% within the threshold of RUB 512,000 and 10% top up charge on remuneration paid in excess of the threshold. The only exception is made for highly qualified specialists (with the respective work permit) and employees who have entered into a labour contract for a term of less than six months.

Mineral Resources Extraction Tax (MRET)
The method of MRET calculation depends on the type of mineral resource.

MRET for coal, oil, gas, and gas condensate is calculated using the extracted volume of respective resource. The tax rate is established as a fixed rate or as a formula linked to world prices. For depleted oil fields, a special reducing coefficient can be applied to the standard MRET rate. A zero MRET rate applies to oil extracted from green fields located in certain regions of Russia (e.g. East Siberia, internal and territorial waters located in the northern polar zone, the Azov and Caspian Seas, and the Nenets and Yamal regions) during the initial stage of production.

MRET on other natural resources depends on the value of resources extracted. The tax rate varies from 3.8% to 8% (e.g. 3.8% for potassium salt, 4.8% for ferrous metals, 6% for products containing gold, 8% for non-ferrous metals and diamonds).
Branch income

Foreign legal entities pay tax on profits attributable to a PE. A PE’s profits are computed on substantially the same basis as Russian legal entities, including the composition of tax-deductible expenses. The tax code does not provide specifically for the deductibility of expenses incurred abroad by a head office with respect to its PE in Russia (including a reasonable allocation of administration costs), although most DTTs provide for such an option.

A provision regarding taxable income of a PE has been included in the Russian tax legislation. Taxable income of a PE in Russia should be determined taking into account the PE’s functions, assets, and economic/commercial risks. The provision does not contain any guidance on specific transfer pricing methods that taxpayers should follow.

If a foreign legal entity conducts free-of-charge preparatory and/or auxiliary services for the benefit of third parties, a PE is considered to have been formed, and the tax base is calculated as 20% of its expenses relating to such activities.

Foreign legal entities operating in Russia through a PE are to follow the filing and payment schedules established for Russian legal entities, although they do not make monthly advance payments, but pay profits tax on a quarterly and annual basis only.

Income determination

The accounting period in Russia is a calendar year. Different periods are not permitted. The taxable base is calculated on an accrual basis (only small-scale taxpayers are still allowed to use the cash basis).

Taxable income is to be computed following the rules and principles established in the tax code. Taxpayers must maintain tax accounting registers. Statutory accounts may be used for computing tax items for which accounting methods are the same. In practice, most taxpayers use statutory accounts as a basis and apply adjustments to arrive at the taxable income.

Inventory valuation

Inventory can be valued using one of the following methods: first in first out (FIFO), last in first out (LIFO), average cost, and individual unit cost.

Capital gains

Capital gains are subject to the same 20% profits tax rate and are added to ordinary income to arrive at the taxable income.

Four separate tax baskets are calculated for tax purposes: (i) results from general operations, (ii) results from operations with listed securities, (iii) results from operations with non-listed securities, and (iv) results from operations with non-listed derivatives. A loss in one basket cannot be offset with income in another basket. Results from operations with listed derivatives are included into the general tax basket.

Gains from the sale of fixed assets and other property equal the difference between the sale price and their net book value for tax purposes. Losses resulting from the sale of fixed assets should be deducted in equal monthly instalments during the period, defined as the difference between their normative useful life and the actual time of use.
A significant exemption was introduced for capital gains from the sale or other disposal (including redemption) of shares in Russian entities (interests in Russian entities' charter capital), provided that, as of the date of sale, they have been continuously held by the taxpayer on the basis of a right of ownership or another proprietary right for more than five years. One of the following conditions must be met in order to apply a 0% tax:

- The shares have been non-listed securities over the entire period of the taxpayer's ownership of such shares.
- The shares are listed securities, and the company issuing shares has belonged to the technology/innovative sector of the economy over the entire period of the taxpayer's ownership of such shares.
- As of the date of acquisition by the taxpayer, the shares qualified as non-listed securities and, as of the date of their sale by this taxpayer or of another disposal (including redemption) by this taxpayer, they are listed securities of the high technology/innovative sector of the economy.

The beneficial tax treatment will only apply to shares and interests in charter capital acquired by taxpayers after 1 January 2011 (which means that the exemption may be first used in 2016).

**Dividend income**

Dividends received by Russian legal entities from Russian or foreign legal entities are taxed in Russia at a 9% flat rate.

Dividends received from 'strategic investments' are exempt from Russian income tax. An investment is considered strategic when:

- the owner (recipient of dividends) owns at least 50% of the capital of the payer of dividends or owns depository receipts entitling it to receive at least 50% of the total amount of paid dividends and
- the share or depository receipts have been owned for at least 365 calendar days on the day dividends are declared.

Dividends from companies residing in ‘offshore’ zones with preferential tax regimes are not eligible for the tax exemption. The list of offshore zones is established by the Ministry of Finance.

Tax on dividends from abroad withheld in the source country may be credited against Russian tax.

The standard 15% tax rate is applicable to dividends paid by Russian legal entities to foreign legal entities. The tax should be withheld by the Russian legal entity paying dividends. The tax may be reduced based on a relevant DTT, typically to 10% or 5% (please see the Withholding taxes section for more details).

**Interest income**

Interest income is taxed on the accrual basis. A standard tax rate of 20% is applied to interest income, except for interest on state and municipal securities, which is taxed at 0%, 9%, or 15%, depending on the type of security. The rate may be reduced (typically to zero) based on a relevant tax treaty.
Exchange gains and losses
Foreign exchange gains and losses are recognised for tax purposes on the accrual basis. However, gains and losses from settlements in a local currency of amounts denominated in (tied to) a foreign currency are taxable (deductible) on payment.

Foreign income
Russian legal entities pay tax on their worldwide income. Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

The effective tax legislation does not contain provisions that allow tax deferral in respect to foreign income.

Deductions
Expenses are deducted on the accrual basis. The main criteria for deductibility of expenses is that the expense is (i) incurred in the course of an income-generating activity, (ii) properly documented, and (iii) not mentioned in the tax code as non-deductible for tax purposes.

Depreciation and amortisation
Two methods of depreciation are allowed: the straight-line method and the declining-balance method. The ranges of useful life of assets for tax purposes are established in the Classification of Fixed Assets adopted by the Russian government, for example:

<table>
<thead>
<tr>
<th>Fixed asset</th>
<th>Useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Personal computer</td>
<td>2 to 3</td>
</tr>
<tr>
<td>Motor-car</td>
<td>3 to 5</td>
</tr>
<tr>
<td>Truck (capacity more than 5 tonnes)</td>
<td>7 to 10</td>
</tr>
<tr>
<td>Aircraft</td>
<td>10 to 15</td>
</tr>
<tr>
<td>Blast furnace</td>
<td>20 to 25</td>
</tr>
</tbody>
</table>

Accelerated depreciation is permitted for leased property, where a special ratio of up to three may be applied (with some exceptions). Accelerated depreciation in a harsh environment and/or increased turnover conditions has been abolished starting from 2014.

An upfront premium is allowed, which means that a taxpayer has the right to deduct 10% (or 30% for certain categories of fixed assets) of the cost of fixed assets purchased (or constructed) in the month when the depreciation started. The balance is depreciated over the useful life of the asset. A premium must be recaptured if a relevant asset is sold within five years of its acquisition (the requirement to recapture does not apply to sales to unrelated parties starting from 2013).

Intangible assets are amortised over their useful life (or over ten years if their useful life cannot be established).

Goodwill
According to the tax law, mark-up (difference between the acquisition value and net assets of the business [property complex] purchased) should be recognised as goodwill for tax purposes and may be amortised by a buyer over five years.
Russian Federation

To apply this tax regime, a business (subject of a deal) needs to be registered as a property complex with the state authorities. Since the sellers hardly ever do this, the practice of implementation of such tax regime is not likely.

**Start-up expenses**
Russian tax law does not contain specific provisions on deductibility of start-up expenses. In some cases, they may be lost for tax purposes.

**Interest expenses**
Interest expenses are deductible within the following limits:

- The average interest rate on similar loans obtained within one quarter from Russian lenders multiplied by 1.2.
- If there are no similar loans, or at the taxpayer’s discretion, the following limits are applied:
  - For loans denominated in a foreign currency: the refinancing rate of the Central Bank of Russia multiplied by 0.66 (0.8 prior to May 2013).
  - For loans denominated in rubles: the refinancing rate of the Central Bank of Russia multiplied by 1.485 (1.8 prior to May 2013).

**Bad debt**
Generally, losses in the form of bad debts written off are deductible. Companies may create a bad debt reserve. The method of accrual for a bad debt reserve for tax purposes may differ from that in financial accounting because it is based only on the overdue payment period (i.e. if the delay exceeds 90 days, the full amount of the account receivable is included in the reserve).

**Charitable contributions**
Russian tax legislation does not provide any benefits in respect to charitable contributions. Such expenses are not deductible for tax purposes.

**Research and development (R&D) expenses**
Currently, R&D expenses (including R&D with a negative result) are deductible within one year after completion. Certain R&D expenses may be deducted using a coefficient of 1.5. The list of such types of R&D is established by the Russian government. A provision for future R&D expenses may be accrued for tax purposes.

**Insurance premiums**
Expenses related to all types of obligatory insurance are deductible, subject to state tariff limitations, where established. Voluntary insurance expenses are deductible to the extent that they relate to the insurance of damage and losses related to certain classes of assets, and the insurance of construction activity risks. Contract liability insurance expenses are deductible to the extent that such insurance is required by an international treaty to which Russia is a party or a generally accepted international trade custom.

Long-term life and pension insurance is deductible within a limit of 12% of the payroll fund. Voluntary medical insurance is deductible within a limit of 6% of the payroll fund.

**Fines and penalties**
Fines and penalties paid to contractors for the violation of contractual terms may be deducted for tax purposes.

Fines and penalties paid to a budget are not deductible.
Taxes
Taxes paid by a taxpayer, as well as social contributions of employers, are deductible for tax purposes.

Net operating and capital losses
Tax losses may be carried forward for up to ten years without limitation (i.e. they can be used to offset the entire taxable profit before a loss carryforward deduction). Carryback of losses, however, is not allowed.

Losses from the sale of fixed assets are recognised evenly during the remaining useful life.

Losses and income from different tax baskets can't be offset (please see Capital gains in the Income determination section for more details).

Payments to foreign affiliates
There are no special tax provisions regarding deducibility of payments to foreign affiliates for services provided. They may be deducted in full if the general deductibility criteria are met. Charges with respect to administrative support provided by foreign affiliates may be deductible, but due care should be taken with regard to documentary support of the nature and actual receipt of the service.

Group taxation

Consolidated taxpayer regime
The new consolidated taxpayer regime is available to large Russian groups starting from 1 January 2012.

A group can comprise two or more Russian organisations where the direct or indirect equity interest of one member in the charter/share capital of the other members equals at least 90%. To establish and apply the regime in 2013, all group members should meet the following requirements:

- At least RUB 10 billion in total profits tax, VAT, excise tax, and MRET paid during 2011.
- At least RUB 100 billion in sales proceeds and other income in 2011.
- Total cost of assets of at least RUB 300 billion on 31 December 2011.

The advantages of application of the regime are the following. Firstly, transactions among members will not be controllable under the new transfer pricing legislation (with one exception: transactions with mineral resources subject to MRET with percentage rate will still be controlled). Secondly, for the purposes of calculating profits tax, it will become possible to consolidate members’ profits and losses.

Transfer pricing
The new transfer pricing legislation came into effect on 1 January 2012. Compared to the prior Russian transfer pricing rules, the new ones appear to be more technically elaborate and, to a certain extent, better aligned with the international transfer pricing principles developed by the Organisation for Economic Co-operation and Development (OECD).
Russian Federation

The main changes are as follows:

- Change in the list of transactions where the Russian tax authorities may control prices for tax purposes.
- Expansion of the list of related parties.
- Burden of proof that prices of controlled transactions do not correspond to the market will rest with the Russian tax authorities.
- Introduction of the arm’s-length principle as the fundamental principle of Russian transfer pricing rules.
- Abolishment of the ‘safe harbour’ provision (the 20% fluctuation of controlled transaction prices from market prices that was previously allowed).
- Expansion of the list of sources of information for determining market prices.
- Formally introducing a functional analysis as one of the comparability factors.
- Introduction of new methods for determining market prices, i.e. transactional net margin and profit split methods.
- Introduction of reporting and transfer pricing documentation requirements.
- Introduction of special transfer pricing audits to be performed by the Federal Tax Service.
- Introduction of penalties for non-compliance with reporting and transfer pricing documentation requirements. However, for the transitional period of 2012/13, no penalties can be assessed in case of transfer pricing adjustments.
- Introduction of unilateral and multilateral advance pricing agreements (APAs) for Russian companies registered as ‘largest’ taxpayers.

**Thin capitalisation**

Under the Russian Tax Code, interest on loans received from foreign shareholders (as well as their Russian affiliates, or loans guaranteed by foreign shareholders or their Russian affiliates) owning more than 20% of capital is deductible, provided the loans do not exceed by three times the amount of equity (12.5 times for banks and leasing companies). If the loans exceed this limit, the excess interest on the loans will be reclassified for taxation purposes as dividends paid to foreign shareholders. Such dividends are not deductible for profits tax purposes and are subject to WHT at the rate of 15% (treaty benefits may apply to reduce the rate).

**Tax credits and incentives**

At present, the following types of incentives exist in Russia:

- Regional incentives granted by regional or local authorities with respect to taxes paid to their budgets.
- Special tax regimes in special economic zones (SEZs).
- Incentives related to certain activities (e.g. activities related to R&D, information technology).
- Incentives related to particular projects (e.g. Skolkovo, Olympic Winter Games in Sochi).

The incentives are briefly described below.

It is also worth mentioning that the Russian tax legislation provides for special tax regimes to support small and medium-size businesses. Such regimes include a unified tax regime, simplified tax regime, and unified agricultural tax.
Regional incentives
Regional incentives in the form of reduced tax rates for taxes payable to regional budgets (primarily profits tax and property tax) are granted to certain classes of taxpayers (typically large investors or entities operating in specific industries). The extent of regional incentives and the willingness of regional authorities to grant them have been diminishing over time.

Special economic zones (SEZs)
The following types of SEZ are established in Russia:

- Technical research and implementation zones for scientific projects.
- Industrial production zones to develop industrial production.
- Tourism-recreation zones for the development and effective use of Russian tourist resources.
- Port zones.

SEZ residents may take advantage of different combinations of benefits, such as reduced profits tax, exemption from property tax and land tax, and, in some cases, exemption from customs duty and VAT.

Activities incentives
The following 'activities' incentives are available to taxpayers in Russia:

- Certain R&D services are exempt from VAT.
- Certain R&D service-related expenses, as listed by the government, are deductible using a coefficient of 1.5.
- Fixed assets used in the sphere of science and technology may be amortised with an accelerated coefficient up to 3.
- Reduced rates for contribution payments to social funds are established for information technology (IT) companies.

Special project incentives
The following 'special project' incentives are established in Russia:

- Participants in the Skolkovo innovation centre will enjoy a number of benefits, the primary of which are the following: exemption from profits and property taxes, exemption from VAT obligations, and reduced rates for mandatory contributions to social funds.
- Olympic Winter Games (Sochi 2014). The Russian tax legislation provides certain tax exemptions for foreign and Russian organisers of the Games, marketing partners of the International Olympic Committee, and official broadcasting companies in relation to their activity on the Games, as well as exemption from personal income tax for income received by sportsmen for participation in the Games.

Foreign tax credit
Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

Withholding taxes
In accordance with the general provisions of the tax code, income received by a foreign legal entity and not attributed to a PE in Russia is subject to WHT in Russia (to be withheld at source). WHT rates are as follows:
Russian Federation

- 15% on dividends and income from participation in Russian enterprises with foreign investments.
- 10% on freight income.
- 20% on certain other income from Russian sources, including royalties and interest.
- 20% of revenue or 20% of the margin on capital gains (from the sale of immovable property located in Russia or non-listed shares in Russian subsidiaries where the immovable property located in Russia represents more than 50% of assets).

Taxation of the margin (rather than the gross amount of income received from the above sales) may be applied only if proper documentary support of expenses is available.

Income of foreign organisations (not performing activity in Russia through a PE) from the sale of certain listed securities of Russian entities (and their derivatives) is not regarded as income derived from sources in Russia subject to WHT.

The list of exempt income (not subject to WHT) was extended by the Federal Law of 29 June 2012 to include: (i) interest payments on Russian state securities, (ii) interest payments on tradable bonds, issued in accordance with the laws of foreign states, and (iii) payments made by Russian companies to finance coupons on Eurobonds issued by special purpose vehicles (SPVs) incorporated outside of Russia. This latter exemption is effective in relation to Eurobonds issued before 1 January 2014.

Tax should be withheld by the tax agent and paid to the Russian budget. WHT rates may be reduced under a relevant DTT, whose provisions may be applied based on confirmation of tax residence, to be provided by a foreign company to the Russian tax agent prior to the date of payment (no advance permission from the Russian tax authorities is required) and also provided general conditions are fulfilled (proof of beneficial ownership, etc.).

The Russian tax authorities recognise the terms of former Union of Soviet Socialist Republics (USSR) treaties until they are renegotiated by the Russian government, and the tax treaty network is continuously updated.

The list below is current as of May 2013, and indicates the WHT rates stipulated in the treaties.

#### Notes

1. In most cases, a 0% tax rate applies to interest payments to the governments of contracting states and to payments guaranteed by the government.
2. If the resident of the other contracting state directly holds at least 25% of the capital of the company paying the dividends.
3. If the resident of the other contracting state contributed at least 40,000 United States dollars (USD) (or an equivalent amount in the domestic currency of either of the contracting states) to the authorised capital of the enterprise paying the dividends.
4. If the following conditions are met:
   a. Dividends are paid to a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
   b. The resident of the other contracting state has invested a minimum of 700,000 Australian dollars (AUD), or an equivalent amount in Russian rubles, in the capital of that company.
   c. If the dividends are paid by a company that is resident in Russia, the dividends are exempt from Australian tax.
5. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends and the participation exceeds USD 100,000 or an equivalent amount in any other currency.
6. If the resident of the other contracting state directly holds at least 25% of the capital of the company paying the dividends.
7. If the beneficial owner of the dividends directly holds at least 20% of the total capital of the company paying the dividends.
8. If the beneficial owner of the dividends is a company that owns at least 10% of the voting stock (or in the case of Russia, if there is no voting stock, at least 10% of the statutory capital) of the company paying the dividends.
9. 0% WHT is applied to the following types of Royalties:
   - Royalties for the production or reproduction of any literary, dramatic, musical, or other artistic work (but not including royalties for motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting).
   - Royalties for the use of, or the right to use, computer software.
   - Royalties paid to an unrelated party for the use of, or the right to use, any patent or any information concerning industrial, commercial, or scientific experience.
10. If the beneficial owner of the dividends is a company that directly holds at least 25% of the capital of the company paying the dividends (this share should be at least USD 100,000 or its equivalent in another currency).
11. If the beneficial owner of the dividends is a company (excluding partnerships) that directly holds at least 25% of the capital of the company paying the dividends.
12. The Protocol to the Russia-Cyprus DTT introduces some new provisions that will come into effect from 2013.
13. If the beneficial owner of the dividends has directly invested in the capital of the company not less than EUR 100,000 or its equivalent in another currency.
14. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends, and the foreign capital invested exceeds USD 100,000 or its equivalent in the national currencies of the contracting states at the moment when the dividends become due and payable.
15. If the following conditions are met:
   a. Where the beneficial owner of the dividends has invested in the company paying the dividends, irrespective of the form or the nature of such investments, a total value of at least 500,000 French
francs (FF) or the equivalent in another currency; as the value of each investment is appreciated as of the date it is made.

b. Where that beneficial owner is a company that is liable to tax on profits under the general tax laws of the contracting state of which it is a resident and which is exempt from such tax in respect of such dividends.

16. If only one of the conditions of 15 (a) or 15 (b) are met.
17. If the beneficial owner of the dividends is a company that directly holds at least 10% of the basic or common stock of the company paying the dividends and such capital share amounts to at least EUR 80,000 or the equivalent value in rubles.
18. If the beneficial owner of the dividends is a company (other than partnership) that directly holds at least 25% of the capital of the company paying the dividends.
19. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and the foreign capital invested exceeds USD 100,000 or its equivalent in the national currency of the contracting state.
20. If the recipient of the dividends is a company (excluding partnership) that directly holds at least 25% of the capital of the company paying the dividends.
21. If the beneficial owner of the dividends is a company that directly holds at least 10% of the capital of the company paying the dividends (this share should be at least USD 100,000 or its equivalent in another currency).
22. Literary, artistic, or scientific work including cinematograph films and films or tapes for radio or television broadcasting.
23. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends and invests not less than USD 100,000 or the equivalent in local currencies to the company paying the dividends.
24. The 0% rate applies to dividends paid to governmental agencies, financial institutions or companies controlled by the government, or companies where the government holds at least 25% of the capital of the company paying the dividends and the capital directly invested by this beneficial owner is not less than USD 100,000 or the equivalent in the national currency of the contracting state.
25. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and the capital directly invested by this beneficial owner is not less than USD 100,000 or the equivalent amount in the national currency of a contracting state.
26. For the use of industrial, commercial, or scientific equipment.
27. If the beneficial owner of the dividends directly holds at least 30% of the capital of the company paying the dividends and of an acquisition price of at least 75,000 European Currency Units (ECU) or its equivalent in the national currency.
28. The 15% rate applies to profits received from a joint venture by a resident of Malaysia.
29. Any patent, trademark, design or model, plan, secret formula or process, or any copyright of scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
30. Cinematograph films or tapes for radio or television broadcasting, any copyright of literary or artistic work.
31. If the invested amount equals or exceeds FF 1 million.
32. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or the equivalent in the national currencies of the contracting states.
33. If the beneficial owner of the dividends has invested in the capital of the company paying dividends of more than USD 500,000.
34. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends and has directly invested in the equity share capital of that company not less than USD 100,000 or its equivalent in another currency.
35. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and has invested in it at least ECU 75,000 or its equivalent in the national currencies.
36. If the beneficial owner of the dividends is a company that, for an uninterrupted period of two years prior to the payment of the dividends, directly owned at least 25% of the capital of the company paying the dividends.
37. The 0% rate applies to dividends paid to governmental agencies or financial institutions.
38. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or its equivalent in the national currencies of the contracting states.
39. If the beneficial owner of the dividends is the government of the other contracting state or if the beneficial owner of the dividends is a company that directly holds at least 15% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or its equivalent in other currencies.
40. If residents of the other contracting state hold at least 30% of the capital of the company paying the dividends and have directly invested in the equity share capital (authorised fund) of that company an amount of not less than USD 100,000 or its equivalent in the currency of the first state.
Russian Federation

41. If the following conditions are met:
   a. The beneficial owner of the dividends is a company (other than a partnership) that has invested at least ECU 100,000 or its equivalent in any other currency in the capital of the company paying the dividends.
   b. Those dividends are exempt from tax in the other contracting state.
42. If only one of the conditions of 41 (a) or 41 (b) are met.
43. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
44. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds 100% of the capital of the company paying the dividends; or, in the case of a joint venture, not less than 30% of the capital of the joint venture; and, in either case, the foreign capital invested exceeds USD 100,000 or its equivalent in the national currencies of the contracting states at the moment of the actual distribution of the dividends.
45. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends and the foreign capital invested exceeds 200,000 Swiss francs (CHF) or its equivalent in any other currency at the moment when the dividends become due.
46. N/A
47. N/A
48. Cinematography films, programmes, and recordings for radio or television broadcasting.
49. Any copyright of literary, artistic, or scientific work.
50. Any patent, trademark, design or model, plan, secret formula or process, any computer software programme, or for information concerning industrial, commercial, or scientific experience.
51. If the beneficial owner of the dividends directly holds at least 25% of the capital of the company paying the dividends.
52. If a resident of the other contracting state has invested in its joint-stock capital (registered fund) at least USD 50,000 or its equivalent in the national currencies of the contracting states.
53. If the beneficial owner of the dividends is a company that owns at least 10% of the voting stock (or, in the case of Russia, if there is no voting stock, at least 10% of the statutory capital) of the company paying the dividends.
54. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends and the foreign capital invested exceeds 200,000 Swiss francs (CHF) or its equivalent in any other currency at the moment of the actual distribution of the dividends.
55. In the case of banks.
56. In the case of fees for technical assistance.
57. If the residents of the other contracting state have directly invested in the equity share capital of that company not less than USD 10 million.
58. If the beneficial owner of the dividend income owns more than 25% of the capital of a company paying dividends, and it contributed more than USD 75,000.
59. 5% is applicable to interbank loans only.
60. If the recipient of dividends directly holds at least 25% of the capital of the company paying the dividends.
61. If the recipient of dividends directly holds at least 25% of the capital of the company paying the dividends.
62. 5% with respect to intellectual property (IP) rights for use of any industrial, commercial, or scientific equipment.

---

**Tax administration**

All taxpayers are required to obtain tax registration and be assigned a taxpayer identification number, irrespective of whether their activities are subject to Russian taxation.

**Taxable period**

The taxable period runs from 1 January to 31 December.

**Tax returns**

An annual profits tax return must be filed by 28 March of the year following the end of the reporting year.

**Payment of tax**

Companies pay advance profits tax payments on a monthly basis. The final payment for the year is due by 28 March of the following year.
**Tax audit process**
Tax returns are desk-audited by the tax authorities upon their submission. The tax authorities also have a right to perform regular field audits of companies. Field audits should not last for more than two months. In cases of audit of ‘major’ taxpayers or taxpayers that have several subdivisions, the duration of an audit may be extended to four or six months. Once the tax period has been audited, the tax authorities may not audit the same period again, except when a taxpayer is reorganised or liquidated, or if the respective tax audit is performed as part of a superior tax office's review, or if a taxpayer has filed an amended tax return with a reduced amount of tax due.

**Statute of limitations**
The statute of limitations is established as three years. For example, in 2013 the tax authorities may examine 2012, 2011, and 2010 profits tax returns through site tax audit.

**Topics of focus for tax authorities**
The recent court practice demonstrates that tax authorities concentrate on (i) tax evasion schemes and relationships with one-day contractors, and (ii) financing structures and thin capitalisation rules.

**Significant developments**

Summarised below are some of the significant corporate tax developments during the past year:

- The government of Rwanda terminated the Double Tax Treaty (DTT) Agreement with Mauritius at the beginning of 2013. However, the two countries agreed to renegotiate the terms of the Agreement, and this is ongoing.
- The government has introduced an online filing system that is now a requirement while filing tax returns for corporate income tax (CIT), value-added tax (VAT), withholding tax (WHT), and pay-as-you-earn (PAYE) tax.
- As per the new law, directors who are involved in the control and management of the company will be liable for tax liabilities incurred by the company if it can be proved that they intentionally or negligently caused the company to incur the tax liabilities. This provision is also extended to shareholders who become involved in the management of the company.
- A new stage in the tax appeal process has been introduced that now allows taxpayers and the Rwanda Revenue Authority (RRA) to explore ways of resolving tax disputes through an amicable settlement process and, where this is successful, avoid the court process.
- A new gaming law has been introduced that levies a special gaming tax of 13% and WHT of 15%.
- An amendment to the law on direct taxes now allows taxpayers with turnover of 200 million Rwanda francs (RWF) to file their PAYE returns and make tax payments on a quarterly basis. Previously, this was available in respect of VAT returns but has now been extended to cover PAYE. However, the taxpayers may still opt to for monthly declaration of PAYE.

---

**Taxes on corporate income**

Rwanda operates both a source and residence-based taxation system. This means that any income that is deemed to be from sources within Rwanda will be liable to tax in Rwanda. In addition, resident entities are taxed on their worldwide income. However, where such income is taxed in another country, a tax credit is allowed, which does not exceed the tax that would have been payable on the same income in Rwanda.

Non-resident entities are taxed on income sourced in Rwanda through a permanent establishment (PE).
The standard CIT rate is 30%; however, small businesses and individuals (whose business has a turnover of less than RWF 20 million or 34,500 United States dollars [USD] in a tax period) pay profit tax at the rate of 4% of turnover.

**Special CIT regimes**
There are special CIT rates for certain industries or sectors of the economy.

Newly listed companies on capital markets are taxed as follows for a period of five years:

- If a company sells at least 20% of their shares to the public, the CIT rate is 28%.
- If a company sells at least 30% of their shares to the public, the CIT rate is 25%.
- If a company sells at least 40% of their shares to the public, the CIT rate is 20%.

Venture capital companies registered with the Capital Markets Authority in Rwanda enjoy a CIT rate of 0% for a period of five years. This is also the same rate applicable to companies that carry out microfinance activities.

Investment entities that operate in a Free Trade Zone or foreign companies that have their headquarters in Rwanda pay CIT at 0%.

**Local income taxes**
Rwandan legislation does not provide for any local taxes on income.

---

**Corporate residence**
Rwanda incorporated companies or associations are treated as Rwanda resident entities. In addition, companies incorporated overseas are also treated as Rwandan resident companies if they have a place of effective management in Rwanda at any time during the tax period. The term ‘effective management’ is not defined in the tax law.

Rwandan government companies are also considered to be residents in Rwanda.

**Permanent establishment (PE)**
The definition of a PE for Rwanda is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition. According to Rwandan tax law, a PE means a fixed place of business through which the business of a person is wholly or partially carried on.

For non-resident companies, CIT liability will arise if they have a PE in Rwanda through which a trade is carried on. The profits attributable to the PE will be taxed in Rwanda. However, there are no rules or guidance on how the PE’s profit should be evaluated for Rwanda tax purposes. The general understanding is that entities are required to use transfer pricing methods to determine the level of profits that should be attributable to the PE based on the functions it performs.

In particular, the existence of the following triggers a PE: an administrative branch; a factory; a workshop; a mine, quarry, or any other place for the exploitation of natural resources; a building site; or a place where construction or assembly works are carried out.

There are a number of specific exceptions from the definition of a PE. A person is deemed not to have a PE if that person:
a. uses facilities solely for the purpose of storage or display of goods or merchandise
b. maintains a stock of goods or merchandise solely for the purpose storage or display
c. maintains a stock of goods or merchandise solely for the purpose of processing by another person
d. has a place of operation aimed purposely at purchasing goods or merchandise or at collecting information related to one’s business, or
e. has a place of operation solely for the purpose of carrying on preparations of one’s activities and performing any other activities that make them more effective.

Where an agent, except an independent person concerned with (e) above, acts on behalf of a company (or person) and the agent has capacity to conclude contracts in the name of that company, the company is considered as having a PE in respect of activities one’s agent undertakes except if such activities of the agent are limited to those mentioned in (b) above.

However, a person is not considered as having a PE if it carries out activities through a broker, general commission agent, or any other private agent in accordance with procedures of the ordinary course of the activities of such an agent.

A company that controls or is controlled by another company does not, of itself, constitute either company to be a PE of the other.

**Other taxes**

**Valued-added tax (VAT)**

VAT is levied on the supply of taxable goods and services in Rwanda as well as on the importation of taxable goods and services into Rwanda.

The threshold for VAT registration is taxable turnover of RWF 20 million (approximately USD 34,000) in any relevant year or RWF 5 million in a calendar quarter.

The standard VAT rate is 18% and applies to goods and services that are neither exempt from VAT nor zero-rated.

Export of goods and services are subject to VAT at 0%. Supplies to privileged persons, such as goods imported for official purposes of diplomatic missions, supplies made under special arrangements between the government of Rwanda and donors, and supplies or importation made under special technical aid agreements, are subject to VAT at 0%. Persons entitled to zero rating of goods or supplies received by them are required to pay VAT at the time of receiving the supply and then apply for a refund of the VAT paid.

Some supplies are exempt from VAT, the main categories being supply of water service, goods and services for health purposes, educational materials and services, transport services, books and newspapers, financial and insurance services, lending or leasing interests in land or building for residential purposes, funeral services, energy supplies, all unprocessed agricultural and livestock products, mobile handsets, and equipment for information, communication, and technology.

Suppliers who provide zero-rated services or goods are entitled to recover input VAT incurred in making the supply. This is unlike exempt supplies, where input VAT recovery is not allowed. Therefore, zero rating is preferable to exemption.
The VAT returns and relevant payment are due to the RRA on a monthly basis by the 15th day of the following month. However, VAT payers with annual turnover of RWF 200 million (USD 340,000) or below may elect to file VAT returns or make payments on a quarterly or monthly basis.

**Customs duties**
Rwanda is a member of the East African Community, which uses the East African Community Customs Act (EACMA) for levying import duty. The EACMA prescribes Common External Tariffs (CET) for goods originating outside the Customs Union. Goods are generally subject to import duty of 0% for raw materials and capital goods, 10% for intermediate goods, and 25% for finished goods.

Goods will only enjoy the preferential community tariffs if they meet the EAC Customs Union Rules of Origin.

Certain industries and items are also entitled to exemptions under the customs law (e.g. assemblers of bicycles and motor cycle kits, importers of gas cylinders, certain hotel equipment, solar equipment, and energy saving bulbs).

Enterprises established in Free Trade Zones are exempt from customs duty on machinery and inputs for exported products. There also exists an import duty remission scheme, where import duty may be remitted for raw materials used to manufacture goods for export. This is subject to a requirement for proof of export and execution of the bond.

**Excise taxes**
Excise tax is imposed on the manufacturer or importation of certain commodities, mainly soft drinks, bottled water, cigarettes, alcohol, fuels, and lubricants.

The following rates apply in respect of products and services for which excise duty is applied:

- Juice from fruits: 5%.
- Soda and lemonade: 39%.
- Mineral water: 10%.
- Beer: 60%.
- Brandies, liquors, and whisky: 70%.
- Cigarettes: 150%.
- Telephone communication: 8%.
- Fuel (excluding benzene), gas oil, and lubricants: 76%.
- Powdered milk: 10%.
- Vehicles with an engine capacity of above 2500cc: 15%.
- Vehicles with an engine capacity of between 1500cc and 2500cc: 10%.
- Vehicles with an engine capacity of less than 1500cc: 5%.

**Property taxes/fixed asset tax**
Local government levies fixed asset tax on:

- the market value of parcels of land
- the market value of buildings and all improvements thereto registered with the land registration centre and for which the owner has obtained a title deed from the time the building is inhabited or used for other activities
- the value of land exploited for quarry purposes, and
- the market value of usufruct with a title deed.
Rwanda

The tax rate is fixed at a thousandth (1/1000) of the taxable value per year. The tax payment must be paid not later than 31 March of the year.

Transfer taxes
There is a fixed fee of RWF 20,000 on transfer of property. However, no transfer of ownership of a fixed asset can be effected without a tax clearance certificate issued by the concerned decentralised entity.

Stamp taxes
There are no stamp duties in Rwanda.

Trading licence fee
Districts charge a trading licence fee, which is paid by any person who commences a profit-oriented activity in Rwanda. The tax year starts on 1 January, and the trading licence fee must be paid for a whole year. If such activity starts after January, the taxpayer must pay a trading licence fee equivalent to the remaining months, including the one in which the activities started.

The tax declaration is done not later than 31 March of the tax year. The trading licence fee is calculated on the basis of turnover, and the amount of the fee varies between RWF 60,000 (for turnover of RWF 40 million) and RWF 250,000 (for turnover of over RWF 150 million).

The turnover applied is as per the amount approved in the previous year by the RRA. Every year, not later than 31 January, the RRA submits the necessary data to the concerned decentralised entity.

There are also different rates for trading licence fee for other small traders, such as small-scale technicians, transport activities by boat, traders, and technicians.

Social security contributions
All people working in Rwanda, both nationals and foreigners, are required to contribute to a national social security contribution fund managed by the Rwanda Social Security Fund. The employer is required to contribute 5% of the employee’s gross salary to the scheme, while the employee’s contribution is 3%.

Gross salary means total remuneration received by the employee, including allowances, bonuses, commissions, and all other cash benefits, as well as any fringe benefits, but excludes reimbursement of business expenses and transport allowances.

Branch income
The tax law does not prescribe special provisions for taxation of branches; consequently, tax rates on the profits of PEs are the same as for domestic corporations. PEs are subject to tax at a rate of 30% and treated as domestic companies.

A branch is considered a PE for the parent company; therefore, it is taxed on the income that is sourced from Rwanda only.
Income determination

Inventory valuation
Trading stock is valued at a lower of cost price or market price on the last day of the tax period. Work in progress is valued at cost.

Capital gains
There is a general capital gains tax law in Rwanda that provides that capital gains arising from the sale of commercial immovable property are subject to tax at the rate of 30%. However, capital gains arising from secondary market transactions on listed securities are exempt from taxation.

In addition, capital gains and losses arising on reorganisation are exempt from tax in respect of the transferring company. Reorganisation is defined to include the following:

- a merger of two or more resident companies
- the acquisition or a takeover of 50% or more of shares or voting rights by number or value in a resident company in exchange for shares of the purchasing company
- the acquisition of 50% or more of the assets and liabilities of a resident company by another resident company solely in exchange of shares in the purchasing company, or
- splitting of a resident company into two or more resident companies.

Dividend income
Dividend income includes income from shares and similar income distributed by companies, cooperative societies, public business enterprise, and partnerships. Dividend income is subject to WHT at flat rate of 15%.

If dividend distribution has been subjected to WHT, this becomes the final tax.

In determination of taxable business profit of a resident company or partnership, dividends and other profit-shares received from a resident entity are therefore excluded.

Interest income
Interest income includes income from loans, deposits, guarantees, and current accounts. It also includes income from government securities and bonds, as well as from negotiable securities issued by public and private companies.

Interest income is subject to WHT at flat rate of 15%.

Foreign income
Resident companies and enterprises are taxed on their worldwide income. However, a foreign tax credit is granted in respect of taxes paid on the foreign income, subject to the limit of the tax that would have been paid in Rwanda on the same income.

There are no provisions in Rwanda for tax deferral of income earned abroad.

Deductions
A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for purposes of the company’s trade, provided these costs are not capital in nature and are charged to the profit and loss account.
The Rwandan tax law stipulates that deductible expenses should fulfil the following conditions:

- Used for direct purpose of and in normal course of business.
- Actual expenses substantiated by proper documents.
- Result in a decrease in net assets.
- Used for activities related to the tax period in which they are incurred.

**Depreciation and amortisation**
Accounting depreciation of fixed assets is not allowable as a deduction for tax purposes. The same applies in the case of amortisation of assets. However, businesses are allowed specified deductions, referred to as tax depreciation in respect of specified classes of assets. This is deducted in arriving at taxable income.

Tax depreciation allowance is granted to persons who own depreciable assets at the end of the tax period and use such assets in the production of income.

Land, fine arts, antiquities, jewellery, and any other assets that are not subject to wear and tear or obsolescence are not granted tax depreciation. Cost of refining or reconstruction of building, equipment, and heavy machinery fixed to the walls attract tax depreciation at the rate of 5%.

Intangible assets, including goodwill that is purchased from third party, enjoy tax depreciation at the rate of 10%, while computers and accessories, information and communication systems, software products, and data equipment are granted tax depreciation at 50%.

Tax depreciation allowance is also available on all other classes at the rate of 25%.

There is also an enhanced allowance in the form of an investment allowance that is granted to investors where they incur an investment of at least RWF 30 million (USD 50,000). The rate is 40% where the investment is within Kigali city or 50% where the investment is within priority sectors defined by the Rwandan Investment Code or a registered business located outside Kigali. Businesses are required to hold the investment for at least three years in order to benefit from the investment allowance.

**Goodwill**
As mentioned above, purchased goodwill will attract tax depreciation at the rate of 10%, which is an allowable deduction. However, amortisation of goodwill is not tax deductible.

**Start-up expenses**
There is no clear guidance on the tax treatment of start-up expenses. However, in practice, start-up expenses of a capital nature are not deductible for tax purposes. Where they relate to purchase of assets, respective tax depreciation is claimed. Start-up expenses of a revenue nature are tax deductible.

**Interest expenses**
Interest on borrowed money used for earning business profit or interest in respect of an amount payable for property acquired to earn income is deductible, provided the interest paid is pursuant to a legal obligation and is reasonable under the circumstances.
Thin capitalisation rules can limit interest deductions when debt owed to related entities exceeds four times the amount of the corporation’s equity. Thin capitalisation does not apply to banks and insurance companies.

**Bad debt**
A bad debt provision will be deductible for tax purposes if it fulfils the following conditions:

- The amount was previously included in the income of the taxpayer.
- Debt is written off in the books of accounts.
- All possible steps have been pursued by the taxpayer, and there is concrete proof that the debtor is insolvent.

It is the last condition that makes the criteria difficult to satisfy, and local taxpayers rarely obtain bad debt relief in practice.

However, licensed commercial banks and leasing entities duly licensed as such are allowed to deduct, in determining business profit, any increase of the mandatory reserve for non-performing loans as required by the directives related to management of bank loans and similar institutions of the National Bank of Rwanda. Similarly, the business profit is increased by the entire amount recovered from bad debts deducted from such reserves.

**Charitable contributions**
Donations and gifts to charitable organisations and other non-profit making organisations are tax deductible where the amounts are less than 1% of turnover. However, donations to profit making organisations are not allowed for tax, irrespective of the amount.

**Fines and penalties**
Fines and penalties imposed for breaking the law or for statutory offences, such as payment of taxes late, are not tax deductible.

The law does not specify which type of non-statutory fines or penalties are not allowed for tax. For example, there is no guidance on whether fines or penalties paid for breach of contract are deductible or not.

**Taxes**
Income tax paid on business profit and recoverable VAT are not deductible for tax purposes. This includes any back taxes paid by the business.

**Net operating losses**
Tax losses can be carried forward for the next five tax periods, earlier losses being deducted before later losses.

If the direct or indirect ownership of the share capital or the voting rights of an unlisted company changes more than 25% by value or by number during a tax period, such a company is restricted from carrying forward losses incurred during the tax period and previous tax periods.

There are no provisions for carryback of tax losses.
Rwanda

**Payments to foreign affiliates**
Royalties, management fees, and similar payments to affiliated non-residents are deductible expenses to the extent that they are incurred to earn income of the Rwandan company and the payments adhere to the arm's-length principle and comply with transfer pricing requirements.

**Group taxation**
There is no provision for group taxation in Rwanda. Each individual corporate group member is required to submit their own tax return on a stand-alone basis.

**Transfer pricing**
Rwandan transfer pricing legislation and the prescribed transfer pricing methods are generally consistent with the OECD guidelines. The law requires that transactions between related parties be carried out under the arm's-length principle.

The tax law empowers the Commissioner General to adjust profits earned between related parties if he considers that the trading arrangements between related parties do not adhere to the arm's-length principle. The arm's-length principle requires that transfer prices charged between related parties are equivalent to those that would be charged between independent parties in the same circumstances.

Rwanda operates a self-assessment system; therefore, taxpayers are obligated to self-assess their compliance to the tax legislation, which includes transfer pricing policy. However, there are no specific transfer pricing documentation requirements currently in place.

Rwanda's transfer pricing legislation provides an opportunity for advance pricing agreements (APAs) with the RRA, a progressive development giving businesses operating in Rwanda a greater degree of certainty. Taxpayers can discuss and negotiate their transfer pricing arrangements with the RRA and obtain an advance ruling confirming that their transfer pricing arrangement is appropriate. This is intended to minimise the potential for future disputes.

**Thin capitalisation**
The interest paid on loans and advances from related entities is not tax deductible to the extent that the total amount of loans/advances exceeds four times the amount of equity during the tax period. For purposes of determining the above, equity excludes provisions and reserves. This provision does not apply to commercial banks and insurance companies.

**Tax credits and incentives**
A variety of tax incentives are given in the form of enhanced tax depreciation allowances (known as capital allowances). The incentives are granted based on the type of assets purchased and used for business and the amount of investment made (see Depreciation and amortisation in the Deductions section).

There are also tax incentives in the form of lower CIT rates (see Special CIT regimes in the Taxes on corporate income section). These are provided for certain sectors, such as microfinance companies, venture capital companies registered with Capital Markets Authority, and newly listed companies.
Rwanda also grants tax incentives in the form of profit tax discounts. This is based on the number of Rwandans employed and maintained during a six-month period. The rate of profit tax discount ranges between 2% (for employees between 100 to 200 Rwandans) to 7% (where a company employs more than 900 Rwandans).

Companies that export commodities and services that bring into the country export revenue are also entitled to profit discount at 3% (between USD 3 million to USD 5 million) or 5% (over USD 5 million).

**Foreign tax credit**
Rwanda allows a foreign tax credit on income generated from business activities performed abroad by a tax resident. The income tax payable is offset by the foreign tax paid on that income. However, the foreign credit is limited to the amount of tax that would have been applicable on that income in Rwanda.

The credit is allowed where it is supported by appropriate evidence, such as a tax declaration, a WHT certificate, or any other similar acceptable document.

---

**Withholding taxes**
A resident individual or resident entity is required to deduct a WHT of 15% when making the following payments:

- Interest.
- Dividends.
- Royalties.
- Service fees, including management and technical service fees, with the exclusion of international transport.
- Performance payments made to artists, a musician, or a sports person.
- Lottery and other gambling proceeds.
- Goods supplied by companies or physical persons not registered with the tax administration.

There is also a WHT of 5% that is applicable on goods imported for commercial use. Public institutions are required to retain 3% on payments to winners of public tenders. However, businesses that posses a tax clearance certificate are exempted from deduction of the above WHT.

The WHT deducted should be remitted to the RRA within 15 days following the month of deduction.

**Tax treaties**
Rwanda has DTTs with Belgium, Mauritius, and South Africa.

The DTT between Rwanda and Belgium provides for a lower rate of 10% on interest and royalties, but 0% on dividends.

The DTT between Rwanda and Mauritius is currently under re-negotiation.

The DTT between Rwanda and South Africa provides for a lower WHT rate of 10%.
Rwanda

The DTT agreements contain conditions to be complied with for the preferential rates to apply; therefore, it is recommended that professional advice is sought before application.

**Tax administration**

**Taxable period**
The normal taxable period is between January and December. However, a different tax period can be allowed on approval by the Minister of Finance.

**Tax returns**
Companies are assessed with reference to accounting periods. This refers to the period for which a company prepares its accounts. However, an accounting period for CIT purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one CIT return.

Rwanda operates a self-assessment regime. Quarterly tax returns are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). The annual tax return/declaration must be filed within three months after the tax period. The tax declaration must include audited financial statements as well as any other documents that may be requested by the tax administration.

**Payment of tax**
Advance CIT is payable in three instalments. Tax payments are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). Each instalment is 25% of the tax liability as calculated in the tax return/declaration of the previous tax period. This amount can be reduced by WHT paid during the tax period. The final payment of CIT for taxpayers with a December year-end is 31 March of the following year. In the case of other accounting year-ends, the final CIT payment is due on the last day of the third month following the accounting year-end.

**Tax audit process**
Large taxpayers are selected for audit by the RRA on a regular basis. The RRA tends to audit two tax periods, but this can be extended on request by the taxpayer. Most audits are carried out onsite. The RRA may conduct a desk audit of taxpayer’s tax affairs where they note discrepancies on tax returns filed by the taxpayer or anomalies with turnover or any other situations that justify an audit.

Under normal in-depth audits, the RRA is required to issue a taxpayer with a draft notice of assessment following the completion of the field audit. The draft assessment is referred to as a rectification note. The taxpayer is granted 30 days within which to respond. In case the tax issues are not resolved, a final notice of assessment is issued. The taxpayer is allowed 30 days within which to appeal. Once an appeal is submitted to the Commissioner General, the RRA has 30 days within which to respond to the objection. This can be extended by another 30 days but not beyond this period. At this stage, the appeal is handled by the appeal committee, and the taxpayer and the taxpayer’s agent are invited for a meeting to provide explanations.

Once the final assessment is issued, the tax due is payable, although the Commissioner has powers to suspend the payment pending the determination of the appeal.

A taxpayer that disagrees with the response on the final assessment can appeal to the high court within 30 days.
Statute of limitations
The RRA has powers to audit a taxpayer for a period going back ten years. Taxpayers are now required to keep their records for a period of ten years.

Topics of focus for tax authorities
Topics of interest for the RRA include:

• Deduction of WHT on payments to non-resident persons and reverse VAT.
• Treatment of capital gains on disposal of assets.
• Recovery of reverse VAT on services that are regarded as being available in the local market.
• Reconciliation of turnover per financial statements to receipts as per taxpayer bank statements.

Significant developments
During 2012, the government of Saint Kitts and Nevis (St. Kitts-Nevis) amended the Income Tax Act and included specific provisions in relation to transactions and arrangements between related parties and tax avoidance arrangements. See Anti-avoidance provisions in the Tax administration section for more information.

Taxes on corporate income
Companies incorporated in St. Kitts-Nevis pay corporate income tax (CIT) on their worldwide income with relief available under existing double taxation agreements (DTAs). Non-resident companies deriving income from St. Kitts-Nevis are liable for CIT and should be registered if they have a physical presence in St. Kitts-Nevis.

St. Kitts-Nevis imposes CIT at a flat rate of 35%.

Taxable income or assessable income is ascertained by deducting from income all expenses that are wholly and exclusively incurred during the year in the production of the income. Assessable income is normally arrived at by adjusting the net profit per the financial statements for non-taxable income, non-deductible expenses, and prior-period losses of up to 50% of chargeable income.

Where a person resident in St. Kitts-Nevis makes to another person not resident in St. Kitts-Nevis a payment, as noted in the Withholding taxes section, then a withholding tax (WHT) at a rate of 10% must be deducted and remitted to the Inland Revenue within 15 days.

A company that carries on business exclusively with persons who are not resident in St. Kitts-Nevis is exempt from all income, capital gains, and WHTs.

Companies registered under the Condominium Act are governed by that act and are not required to pay CIT.

Corporate residence
A corporation is deemed to be resident if it is incorporated in St. Kitts-Nevis or if it is registered as an external company doing business in St. Kitts-Nevis under the Companies Act.
Permanent establishment (PE)
A PE is not defined in the Income Tax Act; however, any company that would meet the general definition of a PE must be registered.

Other taxes

Value-added tax (VAT)
The standard VAT rate is 17%, while hotel accommodation, tour operators, and restaurants carry a reduced rate of 10%.

Persons who have made or are likely to make taxable supplies in excess of 96,000 East Caribbean dollars (XCD) for certain professional services and XCD 150,000 for other business activities in a continuous period of 12 calendar months are required to register for VAT.

Customs duties
All imports are subject to import duties, VAT, and customs service tax (CST). In all instances, certain exemptions will apply.

Customs duty is levied on a wide range of imported goods at rates from 0% to 70% as specified in the Custom Duties Act. VAT is applied at a rate of 17%, and CST at a rate of 6%. Customs duty is levied on goods based on the cost, insurance, and freight (CIF) values and rates determined by the Caribbean Community (CARICOM) Common External Tariff.

Excise tax
The excise tax applies to a small range of goods, such as alcoholic beverages, tobacco products, petroleum products, motor cycles, aerated beverages, and firearms. The excise tax rate ranges between 5% and 25%.

Property tax

Saint Kitts
Property tax in Saint Kitts is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property classes and rates of tax are as follows:

- Residential use property: 0.2%.
- Commercial use property: 0.3%.

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.
- No property tax will be assessed on any buildings, condominiums, etc. that are under construction.
- New residential use property and condominiums are exempt from tax for one year from the date certified by the valuation officer.
Saint Kitts and Nevis

Note that residential use properties located in the South East Peninsula are assigned values based on fixed rates for land (XCD 20 per square foot) and building (XCD 300 per square foot). Property tax is then applied at a rate of 0.2%.

Where property situated in the South East Peninsula area is not developed within five years, a surcharge can be assessed at the rate of 1% of the assessed market value per annum, and increased annually at the rate of 1% thereafter until it reaches a maximum rate of 5% of the assessed market value while the property remains undeveloped. If property is less than one acre, undeveloped, and owned by a resident for the purpose of erecting a house, such property shall be exempt from the surcharge upon application in writing to the Comptroller of Inland Revenue.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% per annum on the unpaid taxes.

Nevis

Property tax in Nevis is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property class and rates are as follows:

<table>
<thead>
<tr>
<th>Property class</th>
<th>Building tax rate (%)</th>
<th>Land tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential</td>
<td>0.156</td>
<td>0.075</td>
</tr>
<tr>
<td>Commercial</td>
<td>0.3</td>
<td>0.2</td>
</tr>
<tr>
<td>Accommodation</td>
<td>0.3</td>
<td>0.2</td>
</tr>
<tr>
<td>Certified farming</td>
<td>0</td>
<td>0.01</td>
</tr>
<tr>
<td>Institutional</td>
<td>0.2</td>
<td>0.15</td>
</tr>
</tbody>
</table>

Commercial use property is defined as property that does not include accommodation use property or property used for certified farming operations.

Accommodation use property is defined as property for short term accommodation and includes a guest house.

Annual allowances and tax rebates are available as follows:

• Residential use property and condominium allowance of XCD 80,000 from the taxable value.
• No property tax will be assessed on any buildings, condominiums, etc. that are under construction.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% per annum on the unpaid taxes.

Alien land holding licences

To hold land as an owner, a non-citizen must first obtain an alien land holding licence and pay 10% of the market value of property or XCD 750, whichever is greater.
A non-citizen is required to obtain a licence to hold shares in a company that owns land, to vote at shareholders meetings of the company, and to be a director of the company. Each licence costs XCD 250.

If a non-citizen purchases land in the Frigate Bay area, then there is no requirement to obtain a licence and only a minimal fee of XCD 50 is payable. If a non-citizen wishes to purchase land in the South East Peninsula, the non-citizen is required to obtain a licence prior to purchasing the property; however, the payment of the 10% license fee will be waived.

**Stamp duty**

Stamp duty applies to a very wide range of transactions (e.g. bill of sale, leases, mortgages, contract, bill of lading). Stamp duty on transfer of real property, transfer of shares, mortgages, and bank loans to aliens is specifically covered below.

**Transfer of real property**

Stamp duty is levied on the consideration for the sale or the value of property as assessed by the Chief Valuation Officer, whichever is higher.

The vendor is responsible for the payment of all stamp duty on property transfers on the following basis:

<table>
<thead>
<tr>
<th>Type of property transfer</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Transfer of property for consideration in money or value in kind of not less than the value of the property</td>
<td>12%</td>
</tr>
<tr>
<td>b. Transfer of property for consideration in money or value in kind of less than the value of the property</td>
<td>12%</td>
</tr>
<tr>
<td>c. Transfer of property without consideration in money or value in kind</td>
<td>6%</td>
</tr>
<tr>
<td>d. Transfer of property in any Special Development Area other than the South East Peninsula</td>
<td>14%</td>
</tr>
<tr>
<td>e. Transfer of property situated in the South East Peninsula</td>
<td>18.50%</td>
</tr>
<tr>
<td>f. Transfer of property other than stock or debenture stock or funded debt or land</td>
<td>2%</td>
</tr>
<tr>
<td>g. Transfer of property between husband and wife and between parents and children and vice versa</td>
<td>XCD 100</td>
</tr>
<tr>
<td>h. Transfer of land by will or by similar instrument</td>
<td>XCD 100</td>
</tr>
<tr>
<td>i. Transfer of registered condominium units</td>
<td>5%</td>
</tr>
</tbody>
</table>

Where a developer has obtained concessions in connection with a house or building constructed on the land being transferred, the developer is required to pay stamp duty on the same basis as noted in a, b, and c above.

Where a developer has obtained concessions in connection with a house or building to be constructed on the land being transferred, then the developer will be required to pay stamp duty initially on the land on the same basis as noted in a, b, and c above. However, when the house or building is subsequently constructed on the land with the aid of the concession, the owner of the building shall pay stamp duty on the house or building as provided in a, b, and c above as if the concessions or any part thereof had not been utilised.

Where a developer has not obtained concessions in connection with a house or building constructed on the land being transferred, the developer will be required to pay stamp duty on the same basis as noted in a, b, and c in respect of the land only.
Saint Kitts and Nevis

**Transfer of shares**
Stamp duty is levied on the value of the consideration for the sale of shares or debentures issued by or on behalf of a company or at the value assessed by the Chief Valuation Officer, whichever is higher. The stamp duty is levied at a rate of 2%. If the company owns property and its value exceeds 50% of the value of the company's assets, then the stamp duty is calculated using the applicable rate on the transfer of real property (see above).

**Mortgages**
Stamp duty is levied on the total amount secured and is applicable to both the registration and discharge of the mortgage. The standard rate is 1%. For amounts secured in relation to a Special Development Area, the rate is 2%.

**Bank loans to aliens**
Stamp duty is levied on the total amount of a bank loan to aliens. The standard rate is 2.5%. For loans to finance development in a Special Development Area, the rate is 5%.

**Life insurance premium tax**
A premium tax of 5% is levied on the premium income of all life insurance companies, whether resident or non-resident. In addition, a registration fee of XCD 2 per XCD 1,000 of income or XCD 30, whichever is less, must be paid to the Comptroller of Inland Revenue.

**General insurance premium tax**
A premium tax of 5% is levied on the premium income (net of agent's commission) of all general insurance companies, whether resident or non-resident.

**Statutory payroll deductions**

**Social Security**
The employer portion for Social Security is 5% of chargeable income (on income of up to XCD 6,500 per month).

**Housing and Social Development Levy (Social Services Levy)**
The employer portion for the Social Services Levy is 3% of chargeable income.

**Employment Injury Benefit**
The employer portion for Employment Injury Benefit is 1% of chargeable income (on income of up to XCD 6,500 per month).

**Severance Payment Fund**
The employer portion of the contribution to the Severance Payment Fund is 1% of chargeable income.

**Branch income**
Branch income is taxed on the same basis and at the same rate as the income of a corporation. A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Recharges of expenses from head office to the branch will be subject to WHT at a rate of 10%; however, the recharges have to be justified and cannot be based on a percentage allocation.
Income determination

Inventory valuation
Inventories are generally stated at the lower of cost or net realisable value. The first in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Comptroller of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. The last in first out (LIFO) method is not permitted for tax or book purposes.

Capital gains
Capital gains tax will be imposed if an asset is sold within one year of the date of acquisition. The maximum rate of tax will be one half the CIT rate. Assets sold after one year will not attract capital gains tax.

Dividend income
Dividends received by a company resident in St. Kitts-Nevis from another company resident in St. Kitts-Nevis are taxed at source at the CIT rate of 35%. Credit is given to the recipient for the tax on the dividend in computing the tax liability.

Interest income
Interest income received by a company registered in St. Kitts-Nevis is taxed at the CIT rate of 35%. Interest earned on local and other CARICOM government securities are normally exempt from the payment of CIT.

Foreign income
A St. Kitts-Nevis corporation is taxed on foreign branch income when earned and on foreign dividends when received. Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom [UK] and CARICOM). There is also relief from British Commonwealth taxes. See Foreign tax credit in the Tax credits and incentives section for more information.

Deductions

Depreciation
Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates. An initial allowance of 20% is granted on industrial buildings or structures and in respect of capital expenditure incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of between 2% and 5% is allowed on all buildings constructed after 1 March 1994. Concrete buildings are depreciated at a rate of 2%, while the rate varies for other buildings depending on the type of material used in construction. Conformity between book and tax depreciation is not required.

Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

Initial allowances and annual allowances can’t reduce the tax that would have been otherwise payable by more than 50%. Any initial allowance or annual allowance not utilised may be carried forward indefinitely.

Goodwill
Goodwill and trademarks are not depreciable assets, and amortisation is not allowed.
Saint Kitts and Nevis

**Start-up expense**
There are no specific provisions in relation to deductions for start-up expenses. However, the policy is that certain start-up expenses, such as costs of incorporation and other initial start-up costs, may qualify for a three to five year straight-line write-off, depending on the total dollar value.

**Interest expenses**
No specific restrictions will apply to interest paid on loans owing to shareholders, directors, their spouses, children or relatives, or to any related parties. Interest is only deductible to the extent that it was incurred in producing chargeable income.

**Restriction on bad debts**
Specific bad or doubtful debts in excess of 5% of total trade receivables will not be allowed as a deduction.

**Charitable donations**
Charitable donations are not deductible for tax purposes.

**Contributions to a pension fund**
Contributions made by an employer to a pension fund (approved by the Comptroller) on behalf of its employees are deductible, up to a maximum of 5% of annual earnings of the employee or a maximum of XCD 2,000. Application should be made to the Ministry of Finance or to the Pension Fund Committee.

**Restriction on compensation expenses**
Salaries, wages, leave pay, fee, commission, bonus, gratuity, or any other perquisite or such other payment that an employee of a company receives in the course of one’s employment or the value of any benefit to such employee or to any member of an employee’s family in excess of XCD 75,000 per annum will not be allowed as a deduction from chargeable profit.

Where an employee or shareholder receives remuneration in a tax year from two or more associated companies, the amount deductible in relation to the employee or shareholder in the tax year by all of the associated companies shall not exceed XCD 75,000. If the remuneration received by the employee or shareholder exceeds XCD 75,000, the amount deductible by each associated company will be equal to the allowable deduction of XCD 75,000 times the remuneration received from the associated company divided by the total remuneration paid to the employee or shareholder by all of the associated companies.

**Fines and penalties**
Fines and penalties imposed under tax laws of St. Kitts-Nevis are not deductible expenses.

**Taxes**
There are no provisions in the Income Tax Act in relation to the deductibility of taxes paid by a company. However, in general, VAT, VAT input tax, and adjustments under the VAT Act are disregarded for income tax purposes. Other taxes, including property tax, transfer taxes, payroll taxes, and insurance premium taxes, except income tax and share transfer tax, are deductible to the extent they are incurred in producing chargeable income.
Net operating losses
Income tax losses may be carried forward for five years following the year in which the loss was incurred. However, the chargeable income of a company after deducting initial and annual capital allowances in any one income year may not be reduced by more than 50% by losses brought forward. No carryback of losses is permitted.

Payments to foreign affiliates
A company incorporated in St. Kitts-Nevis may claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm’s-length test, and WHT will be payable at a rate of 10%.

Restriction on related party expenses
Amounts paid or payable to related or associated persons for administration fees, management fees or expenses, head office charges and allocations, technical services, shared costs, and other similar charges is restricted to 5% of the taxpayer’s gross sales or revenues.

Group taxation
Group taxation is not permitted in St. Kitts-Nevis.

Transfer pricing
There are no provisions for transfer pricing in the tax laws of St. Kitts-Nevis.

Thin capitalisation
There are no provisions for thin capitalisation in the tax laws of St. Kitts-Nevis.

Tax credits and incentives
Tax incentives are currently available under the following legislation.

Income Tax Act, No. 17 of 1966
The Income Tax Act provides that if a company is licensed under the Hotel Aids Ordinance and constructs a hotel with more than 30 rooms, the hotel will receive an exemption from CIT for a period of ten years beginning on the day it is first open for business. If the hotel has less than 30 rooms, then it will be entitled to a five-year tax holiday. During the tax holiday period, no initial deductions or annual capital allowance deductions shall be allowed. Thereafter, only the annual allowance will be allowed and will be computed on the total capital expenditure incurred during the holiday period less any assets sold. The net losses arising during the tax holiday period (i.e. the excess of accumulated tax losses over total profits) may be carried forward and reduced against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

The Income Tax Act also provides that if a licence is granted to a pioneer manufacturer under the Pioneer Industries Act, the manufacturer is entitled to a five-year tax holiday (or up to ten years, at the discretion of the government) as provided in the licence.
Saint Kitts and Nevis

**Hotel Aids Act**
The Hotel Aids Act provides that a licence may be granted to any person who desires to construct or extend an existing hotel to import building material and equipment free from import duties as specified in the licence for use in the construction of the hotel and to furnish and equip the hotel. The holder of a licence may not dispose of any hotel equipment within three years of being imported free of duties and taxes. Permission must be received from the Comptroller of Customs to dispose of any building material and hotel equipment within the three-year period.

**Fiscal Incentives Act**
The Fiscal Incentives Act provides that if a company is declared to be an approved enterprise to manufacture certain ‘approved products’, then the manufacturer is entitled to a tax holiday period of between ten and 15 years depending on the classification of the approved enterprise. The net losses arising during the tax holiday period (i.e. excess of all losses over all profits) may be carried forward and set off against profits of the approved enterprise for the five-year period following the tax holiday period.

**Small Business Development Act, 2009**
The Small Business Development Act provides the framework for the promotion of investment opportunities in St. Kitts-Nevis by introducing a system of registration of small businesses and a range of incentives that are available to locals. The available incentives and concessions to any small business that would be entitled for consideration are as follows:

- Concession on consumption tax applicable to professionals (e.g. engineers, doctors).
- Reduction on CIT for a minimum of three years to a maximum of five years.
- Relief on CIT by way of an allowable deduction on any monies borrowed from any financial institution, including any bank, non-bank, or credit union.
- Export incentives.
- Rebate on CIT.
- Exemption from or reduction in customs duty on inputs imported for use in the small business.
- Exemption from or reduction in customs duty on any plant, machinery, equipment, or motor vehicle imported for use in the small business.
- Reduction of property tax of up to 75%.

A small business to which this Act applies must meet all of the following criteria:

- No more than 25 employees.
- Net assets or paid up capital does not exceed XCD 1 million.
- Annual sales that do not exceed XCD 2 million.
- Owned by citizens of St. Kitts-Nevis.
- Not more than 25% owned or controlled by a company whose annual turnover or net assets exceed the limits noted above or by a subsidiary of a larger company.
- The composition of the board of directors is not controlled by a company whose annual turnover exceeds the criteria above.
- Has no agreement for managerial or other services to persons who are not citizens of St. Kitts-Nevis or other CARICOM territories.

The registration fee for an approved small business status is XCD 100. Each approved small business must, within six months after the end of its financial year, submit to the Registrar (person designated by the Minister to perform the functions of Registrar of
Small Businesses) audited financial statements of its accounts audited by an auditor in accordance with generally accepted international auditing standards.

**Other incentives**
Approved manufacturing, agricultural, and tourist ventures are permitted to import building material and equipment free of customs duties.

A Memorandum of Understanding (MOU) between the government and small hotel operators provides for certain conditions under which small hotel operators will be eligible for duty free concessions on the refurbishment of their facilities every seven years, and on food and wine for their restaurant facilities where applicable. For purposes of this new incentive package, a small hotel is defined as a hotel consisting of at least ten rooms and not exceeding 99 rooms.

**Foreign tax credit**
Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom and CARICOM). A foreign tax credit is also available to persons in St. Kitts-Nevis who have paid or are liable to pay British Commonwealth income tax.

**Residents**
The relief available from tax in St. Kitts-Nevis for a person resident in St. Kitts-Nevis from tax paid in St. Kitts-Nevis is the British Commonwealth income tax rate if that rate does not exceed ½ the tax rate in St. Kitts-Nevis. If the British Commonwealth income tax rate exceeds the St. Kitts-Nevis tax rate, then the relief will be limited to one half the tax rate in St. Kitts-Nevis.

**Non-residents**
The relief available from tax in St. Kitts-Nevis for a person not resident in St. Kitts-Nevis from tax paid in St. Kitts-Nevis is one half the British Commonwealth income tax rate if that rate does not exceed the tax rate in St. Kitts-Nevis. In any other case, the relief will be limited to the amount by which the St. Kitts-Nevis tax rate exceeded one half the rate of British Commonwealth income tax.

**Withholding taxes**
A WHT at the rate of 10% should be withheld from payments made to non-residents in respect of the following:

- Dividends.
- Interest, annuity, premium, and discount.
- Rent, lease, contract, and royalty payments.
- A natural resource payment.
- Commissions, remuneration, fees, and licences.
- Charges for the provision of personal services, commercial advice, and managerial skills.
- Administration, management, or head office expenses.
- Profit.
- Technical, professional, vocational, and any other service fees.
- Accounting, actuarial, legal, and audit expenses.
- Non-life insurance premiums.
- Any other annual or periodic payment or distribution.
Saint Kitts and Nevis

**Tax treaties**
There is a tax treaty with the United Kingdom and a DTA between member states of CARICOM.

---

**Tax administration**

**Taxable period**
Taxes are assessed on a fiscal-year basis.

**Tax returns**
The taxpayer must file an information return on Form CIT-01 by the 15th day of the fourth month after the fiscal-year end along with the financial statements. The authorities either accept the self-assessment or issue a revised assessment. If a return is not filed on a timely basis, the authorities have the power to issue estimated assessments. There is a 2.5% penalty for late filing (minimum of XCD 1).

The taxpayer can object to assessments raised within one month and ask the Comptroller of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Commissioners of Income Tax.

**Payment of tax**
Advance tax is payable in quarterly instalments on 15 March, 15 June, 15 September, and 15 December of each year and is ordinarily based on the tax chargeable and assessed in the previous fiscal year. The standard amount of each instalment is determined as one quarter of the tax chargeable in the previous fiscal year. If the assessment for the prior year has not been finalised, the Comptroller of Inland Revenue can raise an assessment based on best judgment.

The balance of tax due after the final assessment is issued, as notified in the assessment, is payable on or before the 15th day of the fourth month after the fiscal-year end. If the Comptroller of Inland Revenue revises the assessment, then payment of the balance of taxes due is due one month after the date of issue of the revised assessment.

Tax is deemed to be in default if not paid by the 15th day of the fourth month after the fiscal-year end or within one month of the date of the notice of assessment, whichever is later. Interest of 1% per month or 12% per annum is charged on unpaid taxes in default.

**Anti-avoidance provisions**
With effect from 1 April 2012, the Comptroller on Inland Revenue can now, by notice in writing:

- distribute, apportion, or allocate amounts to be deducted in calculating income tax paid between related persons as is necessary to reflect the chargeable income or tax payable if the arrangement had been done at arm's length
- re-characterise the source and type of income, loss, or payments made under an arrangement, the form of which does not reflect its substance or is classified as an avoidance arrangement, and
- disregard an arrangement, transaction, or part of an arrangement or transaction that does not have substantial economic effect or is classified as an avoidance arrangement.
Tax audit process
The St. Kitts-Nevis tax system for companies is based on self-assessment; however, the Inland Revenue Department (IRD) undertakes ongoing compliance activities to ensure that corporations are meeting their tax obligation. There is no specific approach used by the IRD in relation to compliance and audit activities. Compliance activities generally take the form of reviews of specific issues and audits.

Statute of limitations
Assessments may be reviewed and revised by the Comptroller of Inland Revenue within the year of assessment or within six years of the expiration of the assessment year.

Topics of focus for tax authorities
The IRD does not have any specific compliance program; however, when an audit is done, the focus is mainly on the detection of basic non-compliance, such as omission of income, inclusion of non-deductible expenses, and classification of items between expenses and capital items. In 2012, the IRD paid special attention to the application of WHT on payments made to non-resident persons and VAT on services imported into St. Kitts-Nevis, mainly between related parties.
Significant developments

A value-added tax (VAT) was introduced by the government of Saint Lucia on 1 October 2012. In doing so, the government has fulfilled undertakings given to international institutions that VAT would be introduced during this financial year.

In the Budget Statement delivered by the Prime Minister and Minister of Finance on 8 May 2012, the overall rationale for the introduction of a VAT as a general tax on consumption is to broaden the tax base and move towards a system that decreases the tax burden on income in favour of consumption.

VAT is not an additional tax. It has replaced several other taxes and is expected to result in simplification of the tax system. In order to charge VAT, a business must meet the threshold for the minimum sales of taxable supplies for a business in one year, which for Saint Lucia is 180,000 East Caribbean dollars (XCD).

Consistent with its manifesto, the government has:

• maintained a basket of goods that will be zero rated and
• delayed the introduction of VAT on the payment of bills for electricity and water until the government is satisfied that the public is reasonably protected from arbitrary increases by the companies that provide these services.

Also, the following new tax measures were introduced:

• An impact assessment will be completed following the introduction of VAT in order to determine by how much the corporate tax will be reduced.
• Application fees for alien’s landholding licences increased from XCD 1,500 to XCD 4,050.
• A ‘short term’ opportunity to the hotel sector has been provided, which waved 100% of both interest charges and penalties within the three-month period from 1 June 2012 to 31 August 2012 for amounts paid towards hotel accommodation tax on principal payments and waved 100% on penalties and 50% on interest charges for amounts paid during the six-month period from 1 September 2012 to 31 March 2013.

Taxes on corporate income

Resident companies are taxed on gains or profits accrued directly or indirectly from all sources, whether in or out of Saint Lucia, and are subject to tax at a flat rate of 30%.
30% tax rate is only applicable to companies that prior to income year 2003 have no tax arrears and have complied with the requirements of any enactment administered by the Inland Revenue Department. The tax rate of 33.33% will still apply to those companies that have tax arrears and have not complied with the requirement.

Non-resident companies are taxed on Saint Lucia-source income. The gross amount of such income is liable to 25% withholding tax (WHT), while WHT of 15% applies to interest.

Associations of underwriters are taxed at 30% on 10% of the gross premium arising in Saint Lucia, and life insurance companies are taxed at 30% on 10% of the gross investment income arising in Saint Lucia.

Corporate residence

Companies are regarded as resident if they are incorporated in Saint Lucia or managed and controlled through a permanent establishment (PE) in Saint Lucia.

Permanent establishment (PE)

A PE is defined in Saint Lucia as a fixed place or premises through which the business is wholly or partly carried on.

Other taxes

Value-added tax (VAT)

VAT was implemented in Saint Lucia on 1 October 2012. VAT is designed to streamline the tax system in Saint Lucia.

VAT is not an additional tax and has replaced the following taxes:

- Consumption tax.
- Environmental protection levy.
- Motor vehicle rental fee.
- Mobile cellular telephone tax.
- Hotel accommodation tax.

The standard VAT rate is 15%. There is also a 0% rate charged on certain goods and services; however, in respect of the hotel sector and related services, a reduced rate of 8% will apply until April 2013. Between October 2012 and April 2013, the impact on the sector will be assessed, and a final determination will be made on the rate to be applied beyond April 2013.

The threshold for registered taxpayers has been set at XCD 180,000 per annum. This means that it is not mandatory for businesses earning less than the threshold to register for VAT. The threshold is based on the annual sales turnover of the taxpayer.

The VAT rate of 0% has been legislated on certain supplies, which include, but are not limited to, the following:

- Goods to be exported.
- Goods for sale at duty-free shops.
- Fuel.
• Water.
• Electricity.

The following goods and services are exempted from payment of VAT, but this list is not exhaustive:

• Domestic residential rental.
• Educational services.
• Financial services.
• Insurance services.
• Medical services.
• Local transportation services.
• Certain food items (e.g. chicken, rice, milk, flour, bread).

While the standard VAT rate of 15% is currently being charged on medical supplies, the government has secured the Caribbean Community and Common Market's (CARICOM's) approval to remove the import duty on medical supplies.

The government has also agreed to the establishment of a special VAT Refund Account in accordance with the provisions of the Financial Administration Act. This is to facilitate the timely processing and payment of refunds to taxpayers.

**Custom duties**

Custom duties are charged on a wide range of imported goods. Exemptions are granted for raw materials and plant and machinery used in manufacturing and for certain items imported by hotels under construction, extension, or refurbishing projects.

**Excise taxes**

Excise taxes are imposed on home-produced goods, mainly liquor, beer, and cigarettes. XCD 1.44 per litre of liquid applies to beer in glass bottles and XCD 3.50 per liquid gallon applies to beers in metal cans.

There is also an excise tax on fuel when fuel is imported by a wholesaler. Tax is included on the price of fuel paid at the gas pump. The tax rate formula is based on the current price provided by the supplier and regulated price at the gas pump.

**Commercial property tax**

Commercial property tax is assessed annually at 0.4% of the open market value of the property. The owner is required to obtain a commercial valuation assessing the open market value of the property. All new commercial properties completed after 1 April 2001 can benefit from a three-year tax exemption from commercial property tax.

**Residential property tax**

The property tax rate for residential property is 0.25% of the open market value.

**Stamp tax**

Stamp tax is charged on any document that evidences a legal or contractual relationship between two or more parties. Additionally, many types of commercial and legal documents must be stamped, denoting the payment of taxes, which may be either at a fixed rate or at an *ad valorem* rate, depending, for example, on the value of the property transferred.

The current rate of stamp tax under the stamp duty regulations for the conveyance or transfer on sale of the debenture, stock, debt, or shares of a company and the release,
renunciation, or reassignment of any shares or interest in any shares of a company or corporation is the greatest of the following:

- 0.5% of the net value of the assets of the company or corporation.
- XCD 10.
- Provided that at least 75% of the open market value of the assets of the company or corporation is comprised of immovable property, the stamp duty (including vendor’s tax) based on the stamp duty on the sale of immovable property that would be payable on a conveyance or transfer on sale of such immovable property, as indicated below:
  - Conveyance or transfer on sale of any immovable property such duty to be paid by the purchaser: 2% ad valorem.
  - Conveyance or transfer on sale of any immovable property such duty to be paid by the vendor:
    - where the vendor is not a citizen of Saint Lucia or is a foreign company: 10% ad valorem.
    - where the vendor is a citizen of Saint Lucia or is a local company: 2.5% ad valorem from XCD 50,000 to XCD 75,000; 3.5% ad valorem from XCD 75,001 to XCD 150,000; 5% ad valorem from XCD 150,001 and over.

**Branch income**

The tax rate on branch income is the same as that on income earned by resident companies. No additional tax is withheld on transfers of profits to the head office.

**Income determination**

**Inventory valuation**
Stocks generally are valued at the lower of cost or market value. Obsolescence is permitted where it occurs, but there are no provisions to account for monetary inflation on inventory valuation.

**Capital gains**
There is no tax on capital gains except in instances where such gains comprise a portion of the income-earning activities of the business. In such instances, the corporate tax rate applies.

**Dividend income**
Dividends are tax exempt in Saint Lucia.

**Inter-company dividends**
Inter-company dividends are not subject to tax in Saint Lucia.

**Interest income**
The corporate tax rate applies to interest income. However, income earned on securities issued by member governments of the Eastern Caribbean Central Bank and income accruing from trading in securities under the Securities Act to any citizen or resident of any member state of the Organisation of Eastern Caribbean States or to any company incorporated in and registered in any member state of the Organisation of Eastern Caribbean States is tax exempt.
Any expenditure incurred for the purpose of producing exempt income is not deductible.

**Royalty and rental income**
The corporate tax rate applies to royalty and rental income. However, rental income from a residential accommodation shall be exempt from tax if certain requirements, as defined by regulations, are met.

**Foreign exchange gains/losses**
Foreign exchange gains or losses arising from foreign exchange transactions on trading items are assessable or deductible as realised gains or losses, if settled within normal credit terms. Gains or losses on other instruments, including inter-company loans, are recognised only when actually realised.

Unrealised exchange gains/losses are not taxable/deductible.

**Bribes, kickbacks, illegal payments**
Bribes, kickbacks, and illegal payments received by a company are includible in taxable income.

**Foreign income**
Resident companies are taxed in Saint Lucia on income earned outside Saint Lucia. Reciprocal understandings exist with some countries for the avoidance of double taxation, and foreign tax is allowed as a credit against tax charged in Saint Lucia. Saint Lucia has no tax treaties with other countries, except for the member states that make up CARICOM. There is an agreement among the governments of CARICOM for the avoidance of double taxation. Where no agreement exists, the foreign tax offset is the lesser of the foreign tax paid or the tax payable on that income in Saint Lucia.

Tax deferral is not permitted in Saint Lucia.

**Deductions**
Accrued expenses are deductible as long as they are business related. Contingent liabilities are deductible expenses once they are recognised in the book of accounts.

**Depreciation**
The following capital allowances are available in Saint Lucia:

- An initial allowance of 20% is granted on the acquisition of industrial, agricultural, and commercial buildings (except for hotels and rental properties); on plant and machinery, including motor vehicles and furniture; and on fixtures and equipment.
- Thereafter, annual allowances for wear and tear, ranging from 10% to 33.33%, are granted on the reducing-balance method, except for industrial and agricultural buildings, which are allowed an annual rate of 5%, and commercial buildings (except for hotels and rental properties), which are allowed an annual rate of 2.5%.

The Comptroller of Inland Revenue may also grant, on application, a higher rate for annual allowance for assets that have higher or abnormal wear and tear.

Gains on disposal are taxable as ordinary income to the extent of depreciation recovered, and any proceeds in excess of the cost of the asset are treated as a capital
gain, which is not subject to tax. Where the proceeds on disposal are lower than the tax written-down value of the asset, a balancing allowance is granted for the shortfall.

**Goodwill**
Neither the amortisation of impaired goodwill nor the related write-off of it is an allowable deduction.

**Organisational and start-up expenses**
All expenditures incurred in connection with incorporation costs for the establishment of a new small business enterprise are allowable deductions. A small business enterprise is an enterprise incorporated during the year of income that:

- is wholly owned by citizens of Saint Lucia who have not been owners of previously incorporated businesses in Saint Lucia
- employs not more than 50 persons
- has gross income that does not exceed XCD 1 million
- engages in an activity on the listing of preferred business activities as approved by the Minister of Finance, and
- satisfies the provision of any law in force with respect to micro or small scale business.

**Interest expenses**
Interest on any loan, including interest payable on debentures, is an allowable deduction to the extent that the amount of such loan was used for the purpose of producing assessable income.

**Bad debt**
Bad debt expense is deductible provided it has been brought to account in generating the company's assessable income for any income year and that the company has taken all reasonable steps to establish that the collection of such debt is unlikely.

**Charitable contributions**
Charitable contributions are an allowable deduction when the contributions are made under a deed of covenant for a period of not less than three years to any religious, charitable, medical, or educational institution; sporting body; or fund of a public character, approved by Cabinet, if such contributions are made to the Saint Lucia National Trust. However, the deduction with respect to such contributions shall not exceed 25% of the assessable income of the company for that income year.

**Pension expenses**
Current annual contributions to an approved pension fund are deductible expenses. However, where a special payment is made to an approved pension fund, in relation to a period of service by an employee prior to the setting up of the approved pension fund, or to meet any actuarially ascertained insufficiency in the resources of the approved pension fund to meet its obligations to its employees, such amount shall be deductible as follows:

(i) Where the special payment does not exceed the current annual contribution, such amount is wholly deductible.

(ii) Where the special payment exceeds the current annual contribution, the special payment is an allowable deduction in such years of income, not exceeding five in number, as in the opinion of the Comptroller is reasonable under the circumstances.
Saint Lucia

(iii) Where under (ii) above, annual deductions are allowable over a number of years of income, the first such deduction is allowable for the income year for which the special payment is made.

**Taxes**

VAT paid on goods imported or purchased, and sold in the ordinary course of business, are deductible for tax purposes. Property taxes are deductible where the property is used in producing assessable income. Income taxes, penalties, and interest on tax in arrears are not deductible.

**Other significant items**

Meals and entertainment, officer’s compensation/life insurance, and payment to directors are deductible expenses, provided they are wholly and exclusively incurred by a company during that year of income for the purpose of producing its assessable income.

**Net operating losses**

Net operating losses may be carried forward for up to six years if the losses have not been fully absorbed earlier. In carrying losses forward, the amount that can be claimed in any subsequent year is restricted to ½ of the assessable income of that year. Losses may not be carried back.

**Payments to foreign affiliates**

There are no restrictions on the deductibility of interest paid to foreign affiliates if the transaction is carried out at arm’s length and at commercial rates. However, deductions for management charges, allocations of head office expenses, royalties, and other charges that are subject to 25% WHT are restricted to the lesser of the aggregate of those charges or 10% of all allowable business deductions, excluding cost of sales and capital allowances.

**Group taxation**

Group tax filing is not allowed in Saint Lucia; however, group tax relief is available under certain circumstances to allow the trading losses, excluding the current loss, of a resident company within a group to offset the profits of another resident company within the same group. A claim for group relief requires the consent of the Comptroller of the Inland Revenue Department and is only available to resident companies.

**Transfer pricing**

Related party transactions are accepted if they are made on an arm’s-length basis. The Inland Revenue has the power under the Income Tax Act to make any adjustment deemed necessary to place such transactions at arm’s length.

**Thin capitalisation**

No provision exists for thin capitalisation in Saint Lucia.

**Tax credits and incentives**

**Foreign tax credit**

Where income has accrued to a resident and has been taxed in a foreign country with which there is no double tax agreement (DTA), or is income to which a DTA, if there
is one, does not relate, credit for tax on such income is allowed for the lesser of the tax payable in the foreign country or the tax charged under Saint Lucia tax law.

**Tax holidays**

Tax holidays are available for manufacturing companies. The incentives are aimed at increasing the manufacturing base of Saint Lucia, the level of exports, and the use of local materials and labour in production. An approved manufacturing enterprise will be granted a tax holiday up to a maximum of 15 years. In determining the length of the tax holiday, the extent of the local value added to approved products is taken into account.

**Investment incentives**

Income tax incentives and other fiscal concessions are provided under the Fiscal Incentives Act, the Tourism Incentives Act, the Special Development Areas Act, and other concessions granted by the Cabinet of Ministers. The extent of the incentives and concessions granted are specific to the legislation or Cabinet conclusions and depend on the impact that the investment would have on local employment, exports, and the generation of foreign exchange earnings. The incentives granted include the following:

- Duty-free importation of raw materials, machinery, components, and spare parts and other inputs used in manufacturing, and the duty-free importation of construction materials, equipment, and other inputs used in the construction and operation of hotels and other hospitality products.
- Income tax waivers of up to 100% of the taxable income of companies engaged in manufacturing, tourism, and agriculture and other employment generating activities, for periods of up to 15 years.
- Whole or partial waivers of property tax, stamp duties, Alien Landholding Licence fees, WHT, and VAT with respect to investments in specific areas, or in specific industries and activities.
- Guaranteed repatriation of capital and dividends. Remittance of profits and dividends are tax-free as they are not subject to WHT.
- Export allowances for goods manufactured in Saint Lucia and exported. Companies that engage in such activity are given tax exemption on the export of such goods, up to a maximum of ten to 15 years.

**Employment incentives**

Employment incentives are available in the Income Tax Act for the following:

- Hiring university graduates. An additional deduction of 25% of salaries is provided for a maximum period of three years.
- Hiring persons in the offshore financial services industry with skills not available in Saint Lucia. A special tax concession is given to such persons that allows a prescribed percentage of an employee’s or contractor’s salary or fees to be exempt from income tax.

**Other incentives**

Complete or partial waivers of income tax are available on the taxable profits of companies engaged in providing services to the offshore financial services industry.

Special tax concessions are also available for capital construction in the hotel industry. Capital expenditures on the construction of a hotel may offset profits for up to 15 years.
Saint Lucia

**Withholding taxes**

Resident corporations and persons that make certain payments of an income nature to residents or non-residents are required to withhold tax on these payments as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Resident corporations:</strong></td>
<td></td>
</tr>
<tr>
<td>Payments to contractors</td>
<td>10</td>
</tr>
<tr>
<td>Equipment hire</td>
<td>10</td>
</tr>
<tr>
<td><strong>Non-resident corporations:</strong></td>

<td>25/15 CARICOM</td>
</tr>
<tr>
<td>Commissions or fees (not by way of employment)</td>
<td>25</td>
</tr>
<tr>
<td>Income of a trust</td>
<td>25</td>
</tr>
<tr>
<td>Premiums, including insurance premiums</td>
<td>25</td>
</tr>
<tr>
<td>Any other payment of an income nature</td>
<td>25</td>
</tr>
</tbody>
</table>

Saint Lucia has only one DTA. This treaty, between the Caribbean territories, is referred to as the CARICOM Double Taxation Agreement. CARICOM is comprised of the following states:

- Antigua and Barbuda
- The Bahamas
- Barbados
- Belize
- Dominica
- Grenada
- Guyana
- Haiti
- Jamaica
- Montserrat
- St. Kitts and Nevis
- St. Vincent and the Grenadines
- Suriname
- Trinidad and Tobago

**Tax administration**

**Taxable period**

Returns must cover a 12-month period, which may be changed only with the Comptroller's permission.

**Tax returns**

Tax returns must be filed within three months of the company's fiscal year-end. An extension of the filing date may be obtained.

Financial statements must be submitted with the returns, together with a schedule reconciling taxable income with book income and various other schedules of additional information.

The system is one of self-assessment. Upon receipt of the returns, the Inland Revenue Department examines the information provided and issues a notice of assessment at any time, subject to the statute of limitations. The Revenue Department may also issue assessments in the absence of returns.

**Payment of tax**

Tax is payable in instalments on 25 March, 25 June, and 25 September in each year of income, based on the preceding year's income. Any remainder is payable within three months of the end of the financial year.
Penalties and interest
The following civil penalties and interest, which are non-deductible, are imposed:

- For late filing or for failure to file: 5% of the tax charge at filing date.
- For late payment: 10% of the unpaid tax at the due date.
- On tax and penalties unpaid: monthly interest at a rate of 1.04%.
- Tax knowingly evaded or sought to be evaded: 100% of the tax.

Appeals
Within 30 days after the date of service of a notice of assessment or reassessment, the taxpayer may submit a written objection to the Revenue Department on any matters in such assessment or reassessment. If the Revenue Department confirms its assessment, the taxpayer may file an appeal with the Appeal Commission, which comprises seven persons appointed by the Minister of Finance. A decision by that body may be further appealed to the Saint Lucia High Court within 30 days. An appeal against an order from this Court may be made to the Court of Appeal.

Tax audit process
The Inland Revenue Department carries out audits of a selection of tax returns, usually at the taxpayer’s place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations, whether or not notices of assessment have been issued. The Revenue Department has wide powers in determining the information it requires for these audits.

Statute of limitations
Assessments are not final until six years after the end of the income year, within which period assessments may be made at any time. In cases of misrepresentation or failure to disclose any material fact, a reassessment can be made at any time.

Topics of focus for tax authorities
The government of Saint Lucia is executing a Front End Tax Electronic Filing (E-Filing) System under which taxpayers will be able to file and pay their taxes online. The project is slated to be completed in July 2013.
**Significant developments**

**Minister’s approval to allow Zakat payers to use the straight-line method for fixed assets depreciation**

As per Circular number 3299/16/1434 dated 26/5/1434 AH (7 April 2013), the Finance Minister approved to allow Zakat payers to use the straight-line method to calculate depreciation of fixed assets.

Until this Circular was issued, only the declining-balance method could be used for calculation of Zakat deduction of fixed assets.

The Circular states that Zakat payers, including mixed companies, can use the straight-line method, provided that the fixed assets are classified into five groups, which are the same approved groups in Article 17 of the Saudi Income Tax Law, and there is no change to the groups or applicable depreciation rates.

The Circular further states that it is permissible for Zakat payers to continue using the depreciation method stated in Article 17 of the Law (i.e. the declining-balance method).

This Circular is enforced as of its issuance date and applies to all non-finalised assessments, including cases under appeals.

It appears that this change in Zakat regulations offers a choice to Zakat payers. They are allowed to continue using the declining-balance method or switch to the straight-line method.

However, this is only our initial reading as it opens up a number of follow-up questions, such as:

- How to treat fixed asset opening balances if switched to the straight-line method? In other words, what will be the depreciation base for the new straight-line method?
- Does this mean that mixed companies will have to prepare two fixed assets forms: one for Zakat purposes as per this Circular (if switched the method) and one for tax purposes in line with Article 17 of the Law?

We will provide more updates as we clarify the above and other open items.

**New fees on expatriate employees**

Based on current Saudisation requirements, companies having a workforce of less than 50% of Saudi Nationals have to pay 200 Saudi riyals (SAR) monthly to the Labor Office for each expatriate employee.
### Taxes on corporate income

The rate of income tax is 20% of the net adjusted profits. Withholding tax (WHT) rates are between 5% and 20%. Zakat, an Islamic assessment, is charged on the company’s Zakat base at 2.5%. Zakat base represents the net worth of the entity as calculated for Zakat purposes.

Only non-Saudi investors are liable for income tax in Saudi Arabia. In most cases, Saudi citizen investors (and citizens of the Gulf Cooperation Council [GCC] countries, who are considered to be Saudi citizens for Saudi tax purposes) are liable for Zakat. Where a company is owned by both Saudi and non-Saudi interests, the portion of taxable income attributable to the non-Saudi interest is subject to income tax, and the Saudi share goes into the basis on which Zakat is assessed.

According to the income tax law, the following persons are subject to income tax:

- A resident capital company to the extent of its non-Saudi shareholding.
- A resident non-Saudi natural person who carries on activities in Saudi Arabia.
- A non-resident person who carries out activities in Saudi Arabia through a permanent establishment (PE).
- A non-resident person who has other income subject to tax from sources within Saudi Arabia.
- A person engaged in natural gas investment fields.
- A person engaged in oil and other hydrocarbon production.

It should be noted that although the income tax rate is 20%, income from the following two activities is subject to different rates:

- Natural Gas Investment Tax (NGIT) shall be determined on the basis of the internal rate of return (IRR) on the cumulative annual cash flows of the taxpayer derived from natural gas investment activities. The rate applicable will be 30% if the IRR is 8% or less. The rate increases progressively up to 85% if the IRR equals or exceeds 20%.
- Income from oil and hydrocarbon production is subject to tax at the rate of 85%.

### Local income taxes

There are no local, state, or provincial government taxes on income other than the regular income tax or Zakat as mentioned above.

### Corporate residence

A company is considered a resident company if it is formed under the Saudi Arabian Regulations for Companies or if its central management is located in Saudi Arabia.

### Permanent establishment (PE)

According to the Saudi tax regulations, the following are the requirements for considering a non-resident party to have a PE:

- A PE of a non-resident in Saudi Arabia, unless otherwise provided below, consists of the permanent place of activity of the non-resident through which one carries out business, in full or in part, including business carried out through an agent.
- The following are considered a PE:
Saudi Arabia

- Construction sites, assembly facilities, and the exercise of its related supervisory activities.
- Installations or sites used for surveying for natural resources, drilling equipment, or ships used for surveying for natural resources, and the exercise of its related supervisory activities.
- A fixed location where a non-resident natural person carries out business.
- A branch of a non-resident company that is licensed to carry out business in Saudi Arabia.
- A place is not considered a PE of a non-resident in Saudi Arabia if it is used in Saudi Arabia only to do the following:
  - Store, display, or deliver goods or products belonging to the non-resident.
  - Keep an inventory of goods or products belonging to the non-resident only for the purposes of processing by another person.
  - Purchase of goods or products only for the collection of information for the non-resident.
  - Perform any other activities that are preparatory or auxiliary in nature for the interests of the non-resident.
  - Prepare contracts relating to loans, supply of products, or perform technical services for signature.
  - Executing any group of the activities mentioned above.
- A non-resident partner in a resident personal company is considered an owner to a PE in Saudi Arabia in the form of a share in a personal company.

Furthermore, the agent mentioned in the above article is identified as a dependent agent who has any of the following authorities:

- Negotiate on behalf of a non-resident.
- Conclude contracts on behalf of a non-resident.
- Has a stock of goods, owned by a non-resident, on hand in Saudi Arabia to supply the clients' demands regularly on behalf of the non-resident.

A place from which a non-resident carries out insurance and/or reinsurance activity in Saudi Arabia through an agent is considered a PE of the non-resident even though the agent is not authorised to negotiate and conclude contracts on behalf of the non-resident.

Other taxes

Value-added tax (VAT)
There is currently no VAT system in Saudi Arabia.

Customs duties

Customs duties are imposed on imports according to tariffs rates that are effective on the payment date in accordance with the Saudi Customs regulations. Customs duties are imposed on the price of the imported goods. This price is assessed based on the actual cost paid or on the agreed upon cost denominated in the currency of the exporting country. The price consists of the price of the imported goods as packed for shipping from the port of export plus freight and insurance cost to the Saudi port, which is converted to Saudi riyals at the exchange rates published by Saudi Arabian Monetary Agency (SAMA) on the date of the declaration. In case this procedure is not achievable, the imported goods will be priced based on the most proximate comparable value that could be ascertained. Imported goods that are subject to customs duties based on weight are assessed based on the gross weight or the net weight as shown in
the tariff schedules. The gross weight of the goods includes the goods weight including all internal and external packing materials. Net weight of the goods excludes all internal and external packing materials, including the items used for separating and arranging the goods.

To encourage joint ventures in manufacturing, the government grants tariff protection from competing imports to locally produced, quality goods. Rates can be as high as 20%.

Penalties on smuggling goods vary from confiscation, to collections of customs duties and penalties, to imprisonment.

**Social insurance tax**
Social insurance tax is paid monthly based on the monthly basic salary plus housing with an upper limit of SAR 45,000, is computed at 2% for non-Saudi employees, and is paid by the employer. For Saudi employees, the rate is 20% and is paid by both the employee (9%) and the employer (11%).

Based on new Saudisation requirements, companies having a workforce of less than 50% of Saudi Nationals have to pay SAR 200 monthly to the Labour Office for each expatriate employee.

**Other taxes**
There is no form of stamp duty, transfer, excise, sales, turnover, production, real estate, or property taxation except in so far as they may fall within the scope of Zakat, which is applicable only to Saudi nationals.

**Branch income**
Taxable income from a branch of a non-Saudi based corporation is taxed at 20%. Certain charges incurred by the headquarters are not deductible on the branch tax return.

**Income determination**

**Inventory valuation**
The weighted average-cost method is used for valuing inventory under Saudi tax law.

**Capital gains**
Capital gains are subject to income tax or Zakat, as appropriate, at the normal income tax or Zakat rate. However, capital gains realised from the disposal of shares in Saudi stock companies listed in the Saudi market are tax exempt, subject to certain conditions.

**Dividend income**
Dividend income that is received by a resident party is subject to income tax at the normal income tax rate. However, dividends paid to a non-resident party are subject to WHT at 5%.

**Interest income**
Interest income is subject to income tax at the normal income tax rate.
Imports and supply contracts
Saudi tax law provides that no profit will be considered to arise from a contract for
the supply of goods to Saudi Arabia, provided delivery of the goods is either free on
board (FOB) or cost, insurance, and freight (CIF) to a Saudi port. However, should the
contract provide for the delivery and/or installation of materials at a point inside Saudi
Arabia, the supplier may be considered to be carrying on business within Saudi Arabia,
and, as a consequence, the contract may be subject to Saudi income taxation as follows:

- If the material cost was identified in the supply contract separately from the cost
  of work performed in Saudi Arabia, then, in the absence of a PE, a WHT on the
  work that will be performed in Saudi Arabia may be assessed, based on the type of
  services. However, if the contract qualifies the supplier to have a PE in Saudi Arabia,
  then income tax will be applied according to the Saudi tax regulations as for a
  normal taxpayer.
- If the supply contract indicates a total cost without segregation in the value of supply
  and the value of the other activities in Saudi Arabia, then the work performed in
  Saudi Arabia will be assigned a value equal to 10% of the contract value for each
  type of activity.

Foreign income
The gross income derived by a capital company resident in Saudi Arabia from its
operations and of its branches inside and outside Saudi Arabia is subject to tax in Saudi
Arabia. However, in order to avoid double taxation on the same income, the following
exceptions and clarifications are to be considered:

- With respect to the income realised from investments in other resident capital
  companies and in order to avoid double taxation, such income is to be excluded from
  being subject to tax under the following conditions:
  - That such income was subjected to tax in Saudi Arabia.
  - The percentage of ownership in the company invested in is not less than 10%.
  - The period of ownership of shares is not less than one year.
- With respect to the income realised from investments and operations outside
  Saudi Arabia, it will be subject to tax in Saudi Arabia unless an effective double
tax treaty (DTT) between Saudi Arabia and the country invested in stipulates
different provisions.

There are no restrictions on repatriation of profits, fees, capital, salaries, or
other monies.

Deductions
All expenses that are necessary and normal to the business, paid or accrued, are
allowable deductions, provided the expense meets the following conditions:

- It is an actual expense, supported by a verifiable document or other
  qualifying evidence.
- It is related to the generation of taxable income.
- It is related to the subject tax year.
- It is of a non-capital nature.

Depreciation
A depreciation deduction is allowed under the following limitations as stipulated by
the law:
• The asset is not intended for resale and is to be used, in full or in part, for the entity's purposes.
• The asset is of a depreciable nature that loses value because of use or because of wear and tear and obsolescence and has a value extending beyond the end of the taxable year.
• The asset is owned by the business, as per the ownership document for buildings and contracts and invoices for other assets.
• The asset depreciation is allowed even if the asset becomes inactive during the tax year.

Depreciation for tax purposes is calculated as follows, based on the following five categories of depreciable tangible or intangible assets, other than land:

<table>
<thead>
<tr>
<th>Asset category</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fixed buildings</td>
<td>5</td>
</tr>
<tr>
<td>Industrial and agricultural movable buildings</td>
<td>10</td>
</tr>
<tr>
<td>Factories, machines and equipment, computer application programs,</td>
<td>25</td>
</tr>
<tr>
<td>passenger cars, and cargo vehicles</td>
<td></td>
</tr>
<tr>
<td>Expenditures for geological surveying, drilling, exploration, and</td>
<td>20</td>
</tr>
<tr>
<td>other preliminary work to exploit and develop natural resources and</td>
<td></td>
</tr>
<tr>
<td>their fields</td>
<td></td>
</tr>
<tr>
<td>All other tangible or intangible assets not included in previous</td>
<td>10</td>
</tr>
<tr>
<td>categories, such as furniture, planes, ships and trains, and goodwill</td>
<td></td>
</tr>
</tbody>
</table>

The declining-balance method of depreciation, according to the above rates, should be followed for tax purposes. However, straight-line depreciation is allowed for Zakat payers as of 7 April 2013 (see the Significant developments section for more information).

There are also rules for depreciation relating to assets either acquired or disposed. Essentially, 50% of the allowable acquisition price or disposal proceeds is added to or subtracted from the asset pool in the first year, and the remaining 50% in the following year.

Assets under build, own, and transfer (BOT) and build, own, operate, and transfer (BOOT) are allowed to be depreciated over the contract period. This presumes, although it is not clear, that assets under the BOT and BOOT schemes actually will have a separate grouping in addition to the above prescribed groups.

**Start-up expenses**  
Tax treatment of start-up expenses depend on how they were treated under Saudi generally accepted accounting principles (GAAP). Generally, they can be fully expensed at the first financial year or can be amortised.

**Loan charges (interest expenses)**  
An interest deduction is limited to the lower of the loan charge incurred during the tax year, if related to income that is subject to tax, or the result of the following formula, whichever is less.

The taxpayer’s total income from loan charges, plus 50% of (A minus B) as below:

A = income subject to tax other than income from loan charges.

B = expenses allowed under the law other than loan charge expenses.
Note that banks are not subject to this formula.

**Bad debt**
Bad debts are deductible, provided they meet all of the following conditions:

- The bad debt was previously declared in the appropriate year’s income.
- The debt resulted from sale of goods or services.
- The company holds a certificate from the taxpayer’s certified public accountant (CPA) certifying that the debt has been written off in the taxpayer’s books and records, based on a decision by the taxpayer at the appropriate management level.
- Serious efforts have been exerted by the taxpayer to collect the debt with no success and the inability of the debtor to pay has been proved based on a judicial ruling or bankruptcy.
- The debt is not from a related party.
- There is a commitment by the taxpayer to reinstate, as income, any written-off debt whenever collected.

**Charitable contributions**
In determining the tax base of each taxpayer, a deduction is allowed for donations paid during the taxable year to public agencies or philanthropic societies licensed in Saudi Arabia, which are non-profit organisations and are allowed to receive donations.

**Allocations and reserves**
Allocations and reserves formed during the year are deductible as follows:

- Bank allocations to a reserve fund for doubtful debts are allowable deductions. However, a bank must submit a certificate from the SAMA stating the amount of doubtful debts and the amount of doubtful debts collected during the year, which should be reinstated in the tax base of the year of collection.
- Insurance/reinsurance companies may deduct, based on industry standards, a reserve for unearned premiums and for unexpired risks, provided that it is reported in the tax base of the following year.
  A reserve for unearned premiums means a part of premium amounts collected or stated in books that covers risks related to the future tax year(s). A reserve for unexpired risks mean the amount of compensation claimed or reported, but for which the payment process falls short of completion during the tax year.
- A taxpayer may reduce its book profit by the amount of reserves used during the year that had been readjusted when made, to increase income or decrease expenses in the year of formation. Examples of such reserves are end-of-service awards, doubtful debt, and drops in prices. Such amounts are deductible, provided the following conditions are met:
  - The used amount was paid or accrued during the year, and it is supported by documentation.
  - The reserve had been adjusted in the year of formation to increase the tax base.

**School fees**
School fees paid by taxpayers for their employees’ children are deductible expenses, provided they meet the following conditions:

- They are paid to a local licensed school.
- This benefit is stated in the employment contract.
**Pension fund**

Employers’ contributions to employees’ pension funds or savings funds established under Saudi Arabia’s rules and regulations are deductible, provided that such contribution, one payment or in aggregate, is not in excess of 25% of the employee’s income before the employer’s contributions and that the fund meets the following criteria:

- The fund is established according to special provisions that clearly stipulate conditions of subscription and rights of subscribers.
- Such obligation is stated in the employment contract or in the Articles of Association of the establishment.
- The fund has a character independent of the establishment and has separate accounts audited by an independent CPA.

**Research and development (R&D)**

A deduction is allowed for R&D expenditure incurred during the tax year in connection with the generation of income that is subject to tax. Such expenditure relates to technical, scientific, and engineering experiments; computer systems; or similar research. This provision does not apply to the acquisition of land and facilities, or to equipment used for research. Such facilities and equipment are subject to depreciation under the law.

**Fines and penalties**

Fines and penalties related to income tax, paid or payable in Saudi Arabia or to other countries, are not deductible.

Financial fines or penalties paid or payable to any party in Saudi Arabia, such as traffic fines or fines for causing damage to public utilities, are also not deductible.

Fines or penalties paid for breach of contractual obligations, such as fines on delayed or defaulted completion of contracts, are deductible, provided they are documented by the contracting party and the income from such penalties is reported in the year of recovery.

**Taxes**

Income taxes are not deductible.

**Non-deductible expenses**

The following expenses are non-deductible:

- Wages, salaries, and whatever is so deemed, in cash or in kind, paid to an owner, partner, or shareholder, or to a member of their families, being a parent, spouse, sons/daughters, and siblings (this provision does not apply to stockholders in a stock company).
- Compensation in cash or in kind paid to a partner, shareholder, or to a family member, including a parent, spouse, sons/daughters, and siblings, for a property or service to the extent that the compensation is higher than the fair market value of such property or service at time of transaction.
- Entertainment expenses incurred for events such as parties, sports competitions, entertainment trips and activities, etc.
- Expenses of a natural person for personal consumption, such as personal withdrawals, dependants’ cost of living, or education.
- Any bribe or similar payment, which is considered an illegal practice in Saudi Arabia, even if paid abroad.
Saudi Arabia

- Insurance commission in excess of 3% of total premiums collected in Saudi Arabia through an agent or others and regardless of whether or not the agent is a partner.

**Net operating losses**
A taxpayer may carry forward operational losses, as adjusted, to the years following the loss year until the cumulative loss is fully offset. The maximum profit percentage of any year that could be used to offset cumulative losses should not exceed 25% of the year’s profit as reported in the taxpayer’s return. Carryback of losses is not allowed.

**Payments to foreign affiliates**
Payments made to headquarter offices located abroad by wholly owned local subsidiaries or branches are not deductible. Such payments include:

- royalties or commissions
- loan charges (interest expense) or any other financial fees, and
- indirect administrative and general expenses allocated on an estimated basis.

The value of goods or services delivered to the taxpayer by related parties is not deductible to the extent that it is in excess of an arm's-length value.

**Group taxation**
Double taxation on the income of foreign investors realised from their investments in other resident companies is eliminated under the following conditions:

- Such income was subjected to tax in Saudi Arabia.
- The percentage of ownership in the company invested in is not less than 10%.
- The period of ownership of shares is not less than one year.

With respect to the income realised by a resident capital company from its investments and operations outside Saudi Arabia, it will be subject to tax in Saudi Arabia (unless an effective DTT between Saudi Arabia and the country invested in stipulates different provisions).

However, for Zakat purposes, the concept of consolidation is acceptable and relief may be obtained for wholly owned subsidiaries by Saudi/GCC companies that are subject to Zakat.

Note that an entity operating in Saudi Arabia that has undertaken more than one project under the same commercial registration is required to consolidate the results of such projects into the financial statements of that entity and subject them to taxation as a single operation.

**Transfer pricing**
There are no specific transfer pricing rules in Saudi Arabia that impose or deem a charge to arise where the Department of Zakat and Income Tax (DZIT) has reason to believe that a transaction has taken place at a value other than on an arm’s-length basis. However, there is a generic provision that allows the DZIT to re-characterise or re-allocate income or expenses arising from a transaction if it is undertaken for the purposes of avoiding or reducing a tax liability in Saudi Arabia.
**Thin capitalisation**
There is no special legislation governing thin capitalisation for tax purposes. A Saudi company may deduct interest payments to affiliates, but not the head office, provided that the amount of debt and rate of interest are at arm's length and that the interest deductibility formula is met. A Saudi company may be financed with minimum capital, and there is no limit to the amount of debt that may be used.

**Tax credits and incentives**

**Incentives for investment in less-developed regions**
The government of Saudi Arabia has granted tax concessions to the following six less-developed regions in Saudi Arabia, with the intention of attracting more investment:

- Ha’il.
- Jazan.
- Najran.
- Al-Baha.
- Al-Jouf.
- Northern territory.

These tax privileges are granted for a period of ten years from the start of any project.

The qualifying investing company’s annual tax bill may be reduced by:

- Half the annual training expenditure on Saudis.
- Half the annual salaries paid to Saudis.
- 15% of the non-Saudi capital share, subject to certain conditions.

More deductions are granted if investment capital for any project exceeds SAR 1 million and if more than five employees of Saudi nationality have jobs of a technical or administrative nature with contracts of at least one year.

**Customs incentives**
An exemption from customs duties is available on machinery and raw materials that are required for approved projects, provided that they are not available in the local market. Such exemptions should be applied for prior to their importation and are subject to certain terms.

**Withholding taxes**
Payments made from a resident party or a PE to a non-resident party for services performed are subject to WHT. The rates vary between 5%, 15%, and 20% based on the type of service and whether the beneficiary is a related party.

The WHT should be paid within the first ten days of the month following the month during which the payment was made.

The domestic rate for WHT is 5% on dividends, 5% on interest, and 15% on royalties.
Saudi Arabia

**Tax treaties**

Saudi Arabia has entered into tax treaties with several countries. Treaties currently or about to be in force are listed below. A number of other treaties are at various stages of negotiation.

DTTs have not yet been effectively tested in Saudi Arabia. However, they generally follow the Organisation for Economic Co-operation and Development (OECD) Model Treaty and may provide certain relief, including WHT on dividends, interest, and royalties.

The following are the treaty WHT rates for payments made from Saudi Arabia to treaty country recipients. Each tax treaty should be studied carefully because there could be exceptions to the general rules:

**Notes**

1. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that has owned, directly or indirectly, at least 25% of the capital of the company.
paying the dividends for a period of at least 12 months preceding the date the dividends were declared.
• 10% of the gross amount of the dividends in all other cases.

2. Shall not exceed:
• 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
• 10% of the gross amount of the dividends in all other cases.

3. Shall not exceed:
• 5% of the gross amount of dividends if the beneficial owner is (i) a company or (ii) an entity wholly owned by the government.
• 10% of the gross amount of the dividends in all other cases.

4. Shall not exceed:
• 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
• 10% of the gross amount of the dividends in all other cases.

5. Shall not exceed:
• 5% of the gross amount of the dividends.
• The contracting state of which the company paying the dividends is a resident shall exempt from tax the dividends paid by that company to a company (other than a partnership) that is a resident of the other contracting state, as long as it directly holds at least 25% of the capital of the company paying the dividends.

6. Shall not exceed:
• 5% of the gross amount of the dividends:
  • If the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends or
  • If the beneficial owner is central bank or an entity that is wholly owned by the government.
• 10% of the gross amount of the dividends in all other cases.

7. Shall not exceed:
• 15% of the gross amount of the dividends where qualifying dividends are paid by a property investment vehicle.
• 5% of the gross amount of the dividends in all other cases.

8. Shall not exceed:
• 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 50% of the capital of the company paying the dividends, or has invested 20 million United States dollars (USD) or more, or any equivalent currency, in the capital of the company paying the dividends.
• 12.5% of the gross amount of the dividends in all other cases.

9. Shall not exceed:
• 5% of the gross amount of the dividends if the beneficial owner is a company that holds, directly or indirectly, during the period of 183 days ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares or of the total issued shares of the company paying the dividends.
• 10% of the gross amount of the dividends in all other cases.

10. Shall not exceed:
• 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
• 10% of the gross amount of the royalties in all other cases.

11. Shall not exceed:
• 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
• 8% of the gross amount of the royalties in all other cases.

12. Shall not exceed:
• 7.5% of the gross amount of such royalties that are paid for rendering of any services or assistance of a technical or managerial nature.
• 10% of the gross amount of such royalties in all other cases.

13. Shall not exceed:
• 5% of the gross amount of the dividends.
• The contracting state of which the company paying the dividends is a resident shall exempt from tax the dividends paid by that company to a company (other than a partnership) that is a resident of the other contracting state, as long as it directly holds at least 25% of the capital of the company paying the dividends or when paid to the government, the central bank, or any institution, agency, or fund wholly owned by the government of Ireland.

14. Shall not exceed:
• 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
• 7% of the gross amount of the royalties in all other cases.

15. Shall not exceed:
• 5% of the gross amount of the dividends if the beneficial owner directly holds at least 20% of the capital of the company paying the dividends.
• 15% of the gross amount of the dividends in all other cases.
Saudi Arabia

**Tax administration**

**Taxable period**
Tax filings are based on the company's fiscal year.

**Tax returns**
Returns are due to be filed with the DZIT within 120 days after the taxpayer’s year-end. The system is one of self-assessment.

According to the tax authority, companies that are owned by Saudis only, or by Saudis and non-Saudis, must file audited financial statements along with the tax return. However, this requirement is not applicable for companies that are 100% owned by non-Saudis.

**Payment of tax**
Final tax due must be paid within 120 days after the taxpayer's year-end.

Three equal advance tax payments are required to be made on the last day of the sixth, ninth, and 12th months for a current tax year, provided that the taxpayer has earned income during the year. Each advance payment is equal to 25% of the amount resulting from the taxpayer’s tax liability based on the previous year return minus the withheld tax on reported income, if any. The taxpayer is not required to make advance tax payments if the result of the said formula is less than SAR 500,000. Late payment of an advance payment is subject to a delay penalty of 1% of the amount due for every 30 days of delay.

**Tax audit process**
There is no specific audit process followed by the DZIT; however, the most common ways for the DZIT to select companies for tax audits are the size of the company, the companies’ shareholders nationality (totally owned by foreigner and branches of foreign companies), and certain risk assessment measures.

**Statute of limitations**
The DZIT may, with a reasoned notification, make or amend a tax assessment within five years from the end of the deadline specified for filing the tax declaration for the taxable year, or, at any time, upon a written consent of the taxpayer.

The DZIT may make or amend an assessment within ten years of the deadline specified for filing the tax declaration for the taxable year if a taxpayer does not file its tax declaration or it is found that the declaration is incomplete or incorrect with the intent of tax evasion.

A taxpayer may request a refund of overpaid amounts at any time within five years from the end of the overpaid taxable year.

**Topics of focus for tax authorities**
It was noted recently that the DZIT is emphasising the submission of a certificate from the General Organization for Social Insurance (GOSI) along with a reconciliation statement between salaries and wages subject to GOSI and salaries and wages charged to the taxpayer’s accounts duly certified by a Saudi licensed CPA.

The DZIT recently started to focus on the payments made to non-resident parties to verify compliance with the WHT regulations by requesting a reconciliation statement for such payments with the annual WHT form.
The DZIT has also recently been requesting import value lists from the Customs Authority in order to confirm the value of goods imported and declared by taxpayers in their annual declarations during the financial period.

---

**Significant developments**

The General Tax Code (GTC) has been deeply reformed by the Law n°2012-31 dated 31 December 2012. This law took effect from 1 January 2013, except for the corporate income tax (CIT) for which the changes should be implemented for the financial year closed on 31 December 2012 as well.

The most significant changes introduced by this reform are:

- CIT rate increase: 30% (previously 25%).
- Introduction of a transfer pricing regulation (documentation required).
- Introduction and slight modifications on tax incentives: any tax incentive is actually now directly included in the GTC and applicable as soon as the required criteria are met, with no further need of an administrative authorisation.
- Reduction of the registration duties on real estate and business transfers: 10% (previously 15%).
- Reduction of employees’ payroll taxes (to mainly impact low and middle-income earners) through a sole progressive taxation system, i.e. removal of the previous additional proportional duty.

---

**Taxes on corporate income**

Branches and companies are liable for corporate income tax (CIT) at the rate of 30%.

Residents are taxed upon their worldwide income. Non-residents are generally taxed via the existence of a permanent establishment (PE) on Senegal-source income. Withholding taxes (WHTs) may also apply to non-residents, as per the services delivered to Senegalese taxpayers, subject to the application of a double tax treaty (DTT).

**Minimum CIT**

A minimum CIT is due, in case of lack of profits, at the rate of 0.5% applied on the minimum amount of 500,000 Communauté financière d’Afrique (Financial Community of Africa or CFA) francs (XOF) and the maximum amount of XOF 5 million in annual turnover.

**Local income taxes**

See the Other taxes section for a description of local taxes based on turnover and property.
Corporate residence

Companies are considered as Senegalese residents if they have a registered fixed establishment. Nonetheless, foreign companies that are not registered locally may be deemed to have a PE in Senegal in relation to their local activity and will then be subject to tax liabilities.

Permanent establishment (PE)

The criteria for a PE were derived from the former GTC and are close to the Organisation for Economic Co-operation and Development (OECD) standards. The new GTC does not include a PE provision, but the former one should be applicable. DTTs can be applicable and can provide specific definitions. These DTTs are based on the OECD model in most cases. See the Withholding taxes section for a list of countries with which Senegal has concluded DTTs.

Other taxes

Value-added tax (VAT)

Subject to certain exclusions, most commercial operations are subject to an 18% VAT.

VAT on tourism activities is 10%.

A 17% special tax on financial activities (mainly banking, money transfers, and change operations) is applicable instead of VAT.

VAT returns must be filed monthly.

Customs duties/Import tariffs

In the case of import of goods, the following tariffs apply:

- Customs duty: 0%, 5%, 10%, or 20%, depending on the nature of the goods.
- Statistical tax: 1%.
- Solidarity community levy: 1%.
- CEDEAO levy: 0.5% (only applicable among CEDEAO countries).
- COSEC levy: 0.4% (only applicable on importation by sea).

Excise taxes

The products on which the Senegalese authorities levy excise tax, and the relevant excise tax rates, are as follows:

- Beverages: 40% for beverages containing alcohol, plus an additional tax ranging from XOF 800 to XOF 3,000 per litre; 3% for sparkling beverages.
- Tobacco: rate varies from 40% to 45%.
- Coffee: 5%.
- Tea: 5%.
- Fat: rate varies from 5% to 12%.
- Private cars with a horsepower (tax engine rating) superior to 13CV: 10%.
- Cosmetic products: 10% (increased to 15% for depigmentation products).
Senegal

**Tax on built real estate**
The tax on built real estate applies annually to owners of buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is 5% for common buildings and 7.5% for factories and industrial premises. It is applied on the basis of the rental value of the lands, buildings, etc.

**Tax on non-built real estate**
The tax on non-built real estate applies annually to owners of land without buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is fixed at 5%. It is applied on the basis of the rental value of the land.

**Stamp/registration duties**
There are many stamp and/or registration duties, depending on the operations, such as the following:

- 1% registration duty applicable to the incorporation of a company and the increase in cash of the share capital.
- 1% registration duty applicable to transfer of stocks.
- 1% registration duty applicable to transfer of debts.
- 10% registration duty applicable to sale of business.
- 10% registration duty applicable to transfer of real estate.
- 2% registration duty applicable to rent agreements.

**Business licence tax**
Business licence tax is an annual duty consisting of a fixed annual payment (fixed duty) and a proportional duty, calculated in most cases on the basis of the rental value of the premises used. The amounts and rates of these taxes are fixed according to the type and size of the activity carried out.

There is a table that includes several categories of business. For each category, a fixed tax is provided as well as the percentage that is applied on the assets at their fair value. In cases where the business does not fit any category, the closest business or the most similar one is considered by the tax administration in order to calculate the business licence tax for the taxpayer.

As an example, the ‘merchant’ business licence tax fixed duty classification rates are provided below. As per this classification, a ‘merchant’ will be liable for business licence tax depending on its annual turnover. Indeed, it will have to pay a tax determined as follows:

<table>
<thead>
<tr>
<th>Merchant turnover (XOF)</th>
<th>Fixed amount of tax (XOF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 10 billion</td>
<td>10 million</td>
</tr>
<tr>
<td>Between 5 billion and 10 billion</td>
<td>5 million</td>
</tr>
<tr>
<td>Between 1 billion and 5 billion</td>
<td>3 million</td>
</tr>
<tr>
<td>Between 500 million and 1 billion</td>
<td>1.5 million</td>
</tr>
<tr>
<td>Between 300 million and 500 million</td>
<td>1 million</td>
</tr>
<tr>
<td>Between 200 million and 300 million</td>
<td>700,000</td>
</tr>
<tr>
<td>Between 100 million and 200 million</td>
<td>400,000</td>
</tr>
<tr>
<td>Between 50 million and 100 million</td>
<td>300,000</td>
</tr>
</tbody>
</table>

The general rate of proportional tax is 19%, and it is levied on the annual rental value of the offices, stores, warehouses, yards, workshops, stations, wharfs, sites, other
premises, and installations considered as constructions used for the activities of the company. In addition to that, the basis of the proportional tax also includes the assets or rented materials at their fair value.

**Tax on telecommunication**
The tax rate is 5% on telecommunication use and access. To offset the tax, the purchase of mobile telephones (and other types of telephones) remains exempt from VAT and customs duty.

**Company tax on vehicles**
In addition to the tax on vehicles, companies owning or renting vehicles (more than 15 days a year) must pay a specific annual tax on them. Rates range from XOF 50,000 to XOF 200,000, depending on the type and horsepower of the vehicle.

---

**Branch income**

In general, the tax on branch income is similar to that of corporate income. Nonetheless, a 10% duty is automatically applied to profits generated after CIT. It corresponds to an automatic application of the 10% tax on payment on dividends applicable to a company.

Headquarter expenses, which are a proration of the worldwide office expenses, may be allocated to the Senegal branch. This proration is based upon a ratio of the local turnover of the branch and the worldwide turnover of the parent company. It applies to the total amount of headquarters’ expenses incurred by the company. In addition, the deductibility of headquarters expenses is limited to 20% of the accounting profits before the deduction. This limitation does not apply to other types of services provided by headquarters, such as technical assistance.

---

**Income determination**

**Inventory valuation**
Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) are permitted. Book and tax conformity is required.

**Capital gains**
Capital gains derived from the transfer of assets are subject to the 30% CIT. There is no basket system. The taxable base will be reduced to one-third if the transfer of assets arises due to a cessation of activity. However, if the transfer of assets is made less than five years after the start of the business, a one-half reduction of the taxable base will be applicable.

Sales of stocks by a non-resident are liable to the 30% CIT, subject to the application of a DTT.

**Dividend income**
If a parent company domiciled in Senegal owns 10% of the subsidiary (main condition for the application of the parent-subsidiary corporation special taxation status), a 95% reduction on the dividends received is applicable for CIT purposes.
Senegal

Stock dividends
Stock dividends are unusual in Senegal. However, this kind of distribution would be taxable at the general WHT rate of 10% on the basis of its real value.

Foreign income
In general, profits generated in Senegal are taxed under Senegal's income tax law. Profits generated outside Senegal and constituting a PE in the relevant country are not taxed in Senegal. A DTT can provide different rules.

Deductions

Depreciation and depletion
The rates of depreciation are not provided by the law. The rate is determined on the normal and predictable duration of use of the asset by taking into account normal wear and tear. In practice, there are standard rates for common assets. Accelerated depreciation can be applicable, subject to conditions.

Goodwill
There are no provisions in Senegal for goodwill.

Start-up expenses
Start-up expenses are deductible if justified and approved by the shareholders.

Interest expenses
Interest paid to shareholders may be deducted when it relates to loans with an amount lower or equal to the amount of the share capital and whose rate is lower or equal to the base rate of the Central Bank of West African States plus two points.

Bad debt
There are no provisions in Senegal for bad debt.

Charitable contributions
Only payments made to specific chartered organisations are deductible, at a rate of up to 0.5/100 of turnover. On the contrary, payments made to non-chartered organisations are not deductible.

Fines and penalties
Fines and penalties are not deductible for CIT purposes.

Taxes
CIT and the company tax on vehicles are not deductible.

Other significant items
Provisions are deductible if they correspond to a risk or a probable cost that is more than possible and leads to a decrease in the assets. Provisions for paid holidays and retirement compensation are not deductible.

Net operating losses
Tax losses may be carried forward to the next three years. The carryback of losses does not exist. Losses corresponding to the depreciation of assets can be carried forward indefinitely.
Payments to foreign affiliates
Reasonable royalties, interest, and management service fees paid to foreign parent companies are deductible. Supporting documents (e.g. invoices, contracts) will be necessary to prove that these expenses are justified.

Group taxation
Group taxation is not permitted in Senegal.

Transfer pricing
The transfer pricing regulations globally correspond to the OECD requirements standards (i.e. identifying related party transactions, choosing the suitable transfer pricing method, and preparing documentation to support the selection of such method).

Thin capitalisation
There are no specific rules regarding thin capitalisation in Senegal. Nonetheless, the following tax and legal rules should be known:

• From a legal point of view (corporate law), the net assets must be equal at least half of the share capital of the company. In case the net assets are lower than this threshold, the situation should be regularised by any lawful means within a period of two years following the financial year it appears. Otherwise, any third party can request the closing of the entity before the courts.
• The deductibility of interest paid to a shareholder upon a loan or an advance in general is limited to a maximum rate calculated on the Central Bank base rate (currently fixed at 6.25%) plus 3 points, calculated on the amount of the share capital. Portions exceeding this limit are not deductible for CIT purpose.

Tax credits and incentives
Foreign tax credit
Usually, DTTs may provide some tax credit on the basis of the relationship between Senegalese entities and their partners located abroad. For each DTT, the specific process to enforce those tax credits either in Senegal or abroad (depending on the payments directions) are stipulated within that DTT. Nonetheless, as far Senegal is concerned, the practice consisting of enforcing locally foreign tax credits is very rare.

The Investment Code
The Investment Code applies to investments over XOF 100 million (mainly production, processing, industrial, tourism, agricultural, and complex trade). The benefits of the Investment Code include exemption from customs duties, suspension of VAT payment for three years, CIT limitation, etc. The tax benefits are directly integrated in the GTC and do not require administrative authorisation (i.e. as long the requirements are met, the taxpayers may benefit from those tax benefits).

Free export company status
Agriculture, industry, and telecommunications companies that have an exporting potential amounting to at least 80% of their turnover may qualify for the free export company status. There are several advantages for companies that qualify, including a CIT rate of 15%, exemption from dividend WHT, exemption from business licence
tax, exemption from taxes on real estate, and exemption from registration duty for incorporation or bylaws change purposes.

**Miscellaneous incentives**
There are a wide range of investment laws (i.e. negotiations with the government to set up a specific tax regime different from common rules) for investments greater than XOF 250 billion, including the mining code and the petroleum code, among others. All of these tax benefits are now directly included in the GTC.

**Withholding taxes**
Senegal has various WHTs. The primary ones are as follows:

- 20% WHT on remuneration paid for services (including royalties) rendered by a foreign individual or foreign company.
- 10% WHT on dividends distributed.
- 13% WHT on bond interest.
- 8% WHT on deposits or guaranteed interest on accounts with a bank.
- 16% WHT on other revenues, notably interest on loans.

These WHTs may be limited by DTTs.

**Double tax treaties (DTTs)**
The DTTs concluded by Senegal are based on the OECD model in most cases. Senegal has concluded such treaties with the countries listed in the table below.

Treaty WHT rates are as follows:

<table>

* West African Economic and Monetary Union (member states are Benin, Burkina-Faso, Côte d’Ivoire, Guinea-Bissau, Mali, Niger, and Togo).

**Tax administration**

**Taxable period**
The tax year in Senegal is the calendar year.
**Tax returns**
Companies must file CIT returns by 30 April of the year following the tax year.

Also, in addition to the miscellaneous annual returns (business licence tax, company car tax, etc.) and other monthly tax returns (VAT, payroll taxes, WHT, etc.), taxpayers must file by 31 January for the prior financial year:

- An annual recapitulative payroll tax return.
- An annual recapitulative return on payment for services.

**Payment of tax**
CIT must be paid in two instalments (each equal to one-third of the previous year’s tax) by 15 February and 30 April. The outstanding balance payment amount of the tax due must be paid by 15 June.

For the first financial year of a newly incorporated company, no instalment is due; the new company pays the whole CIT before 15 June of the following year.

**Penalties**
In case of late payment, a 5% interest of delay on the amount due plus an additional 0.5% duty per month of delay or portion of month of delay are applicable. This late payment is due when the taxpayer’s regularisation is spontaneous.

On the other hand, if such payment is triggered by a tax audit from the authority itself after the deadline is crossed, the following penalties apply:

- 50% for any WHT and VAT.
- 25% for other taxes (CIT, business licence tax, taxes on real estate, registration duties, company car tax).

Also the late filling of tax returns triggers a XOF 200,000 penalty per return.

**Tax audit process**
The tax authorities may request information, clarifications, or justification to the taxpayers. The taxpayers have 20 days to answer to those requests.

The tax authorities may also implement an inspection of the accounting documents at the premises of the taxpayer or at any place the taxpayer would consider more appropriate for material reasons upon a specific request. In such cases, a prior notice is sent to the taxpayer.

The tax authorities are not allowed to process a new tax inspection on a period already inspected by their services unless a new element or document is revealed after the first inspection was processed.

Where the tax authorities estimate that the taxpayer has not fulfilled all of one’s tax obligation, a tax reassessment shall be transmitted to the taxpayer, who has 30 days in order to answer or comment on the findings.

After the tax authorities have received those comments, they can confirm partially or totally the reassessment within a statutory delay of 60 days.

**Statute of limitations**
The statute of limitations is, generally speaking, four years.
Significant developments

The latest amendments to the Corporate Income Tax (CIT) Law were enacted in December 2012 and May 2013, and apply to determination of the CIT liability for fiscal year 2013. Most notably, the CIT rate increased from 10% to 15%.

At the end of 2012, the Ministry of Finance also adopted several bylaws for implementation of amendments to the CIT Law.

In September 2012, the Serbian Parliament also adopted amendments to the Value-added Tax (VAT) Law. The increase of the standard VAT rate from 18% to 20% entered into force on 1 October 2012, while most of the other changes are applicable as of 1 January 2013. At the end of 2012, the Ministry also adopted a number of bylaws for clarification of new VAT rules.

Amendments to Excise Duty Law were also adopted in January 2013. Most notably, excise duty rates increased and the right to refund excise duty cost up to prescribed amounts was introduced for specific industries.

Finally, amendments to Tax Administration and Tax Procedure Law were also enacted in September 2012 and May 2013. According to the latest changes, the tax authorities will be authorised to initiate and conduct tax offence procedures and impose penalties, and will also undertake to perform foreign exchange activities instead of foreign exchange inspectorate.

Taxes on corporate income

Residents are taxed on their income generated in Serbia, as well as on their worldwide income. Non-residents are taxed only on their income sourced through a permanent establishment (PE) in Serbian territory.

As of 1 January 2013, the CIT rate is 15%. Prior to 1 January 2013, the CIT rate was 10%.

Local income taxes
There are no local taxes on income in Serbia.

Corporate residence

A legal entity is considered to be a resident of Serbia if it is established or has its place of effective management and control in Serbia.
Permanent establishment (PE)
A PE is any permanent place of business through which a non-resident conducts its business.

Other taxes

Value-added tax (VAT)
The VAT was introduced on 1 January 2005 and generally follows the European Union's (EU’s) Sixth Directive.

As of 1 October 2012, the standard VAT rate is 20% (previously 18%) for most taxable supplies. A reduced VAT rate of 8% applies for basic food stuffs, daily newspapers, utilities, etc.

In addition to these tax rates, there is a 0% tax rate with the right of deduction of the input VAT that applies to the export of goods, transport and other services directly related to exports, international air transport, etc.

A 0% tax rate without the right of deduction of the input VAT applies to trading in shares and other securities, insurance and reinsurance, and the lease of apartments, business premises, etc.

A taxpayer for VAT purposes is a person who independently, and in the course of its business activities, undertakes the supply of goods and services or import of goods. Business activity is defined as the permanent activity of a manufacturer, salesperson, or service provider for the purpose of gaining income. A branch or other operating unit can be a taxpayer.

A non-resident without a head office or PE within Serbia cannot register for VAT purposes.

The tax period for taxpayers whose turnover for the last 12 months exceeds 50 million Serbian dinars (RSD), or is forecast for the next 12 months to do so, is a calendar month. Such taxpayers have to file tax returns and pay VAT liability 15 days after the end of each month. The tax period for other taxpayers is a quarter (three months), and tax returns have to be filed and VAT paid within 20 days after the end of each tax period.

Customs duties
Goods imported into Serbia are subject to customs duty rates provided in the Law on Customs Tariff. These rates are ad valorem (the only exception is related to the importation of other cigarettes containing tobacco, where a combined ad valorem and specific customs duty rate is prescribed) and applies to goods originating in countries that have a most favoured nation (MFN) status in trading with Serbia. Goods originating in other countries are subject to MFN duty rates increased by 70%.

At the moment, the only trading partner with Serbia that does not have MFN status is Taiwan.

Customs duty rates in Serbia range from 0% to 57.6%, with most being under 30%. At the moment, the 57.6% rate only applies to cigarettes containing tobacco.
Excise duties
Excise duties are levied on producers and importers of the following goods:

- Oil derivatives.
- Tobacco products.
- Alcoholic beverages.
- Coffee (green, roasted, ground, and coffee extracts).

Excise duty in Serbia is specific (for oil derivatives, alcoholic beverages, cigars, cigarillos, and coffee), *ad valorem* (for pipe tobacco), and combined (specific + *ad valorem* on retail price for cigarettes).

Excise duties stated in Serbian currency are adjusted on a half-year basis according to variations of the consumer price index (CPI) declared by relevant government bodies in charge of statistics. For oil derivatives, the government can modify the specific excise duty amounts during the year according to changes in prices of crude oil on the market.

Property tax
Property tax is payable annually in Serbia by all legal entities and individuals who own or have rights over real estate located in Serbia, such as:

- Ownership rights.
- Right of occupancy.
- Tenancy rights over an apartment or a building for a period longer than one year or for an indefinite period.
- Urban land usage right (municipal, public, and other state-owned land) larger than ten acres in area.

Where the taxpayer keeps books, the property tax on real estate is levied at a flat rate that cannot exceed 0.40%.

Transfer tax
Transfer tax is levied on the transfer for a consideration of rights over real estate when VAT is not payable on such a transfer; intellectual property rights; ownership over used vehicles, vessels, and aircrafts (unless owned by the state); right to use urban and/or public building land; as well as rights relating to expropriated real estate.

The contract price is used as a tax base; however, the tax authorities have the right to adjust the tax base in case they estimate that the price agreed to in the contract is lower than under market conditions. The tax is payable at a 2.5% rate.

Stamp taxes
There are no stamp taxes in Serbia.

Capital gains tax of non-residents
Capital gains realised by non-residents from both residents or other non-residents are subject to 20% capital gain tax. Non-residents should appoint a fiscal representative in Serbia who should submit a tax return within 30 days from the realisation of capital gain. Based on the tax return, tax authorities will issue a decision assessing tax liability (if any).

In order to benefit from application of a relevant double tax treaty (DTT), the same rules are applicable as for withholding tax (WHT). Non-residents (i.e. the income recipient) must provide a tax residency certificate (on the form prescribed by the
Serbian Ministry of Finance stamped by the relevant body from the non-resident’s country of residence or official translation of certificate issued by foreign tax authorities), and the income recipient must be the beneficial owner of the income.

**Branch income**

Non-residents carrying on business in Serbia through a branch are taxed on their Serbian-sourced income at the CIT rate of 15%. A branch is considered to be a PE.

**Income determination**

Taxable profit is determined by adjusting the accounting profit as stated in the profit and loss statement (determined in accordance with International Financial Reporting Standards [IFRS] and local accounting and audit legislation) and in accordance with the provisions of the CIT Law.

For taxpayers who, according to local legislation, are not obligated to apply IFRS, taxable profit is determined according to the special guidelines prescribed by the Ministry of Finance.

**Inventory valuation**

Cost of materials and the purchase value of merchandise are tax-deductible up to an amount calculated by applying the average weighted cost method or the first in first out (FIFO) method. If another method is used, an adjustment for tax purposes should be made.

**Capital gains**

Capital gains are generated by the sale or other transfer of real estate, rights related to industrial property, as well as shares, stocks, securities, certain bonds, and investment units. A capital gain is determined as the difference between the sale and purchase price of the asset concerned, determined in accordance with the provisions of the Law. If the amount is negative, a capital loss is realised.

Capital gains and operational profit are disclosed in the same tax return, but they are taxed separately. Consequently, capital gains/losses cannot be used to offset business losses/gains.

However, capital gains can be offset with capital losses occurring in the same period. A capital loss can be carried forward for five years.

The capital gains tax rate is 15%.

However, the rate applicable for capital gains incurred by non-residents is 20%, unless envisaged otherwise by a relevant DTT (see the Other taxes section for more information).

**Dividend income**

Dividends received by a Serbian company from another Serbian company are not subject to CIT.

Dividends received from a non-resident will be treated as taxable income of a Serbian company and subject to 15% CIT. However, a Serbian entity will have the right to decrease its tax liability by taking a tax credit for the WHT and underlying CIT paid in a country other than Serbia.
subsidiary's country, provided that the taxpayer holds at least 10% of the shares in the subsidiary. If the taxpayer holds less than 10% of the shares in the subsidiary, the tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income (see the Tax credits and incentives section for more information).

**Interest income**
Interest income will be included in accounting profit determined in accordance with IFRS and will be taxable at the CIT rate of 15%. A Serbian resident has the right to decrease its CIT liability for WHT on interest paid abroad. The amount of the tax credit should not exceed the amount of CIT that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income.

**Royalty income**
Royalty income will be treated as business income and subject to the general CIT rate.

A resident taxpayer also has the right to decrease its CIT liability for WHT on royalties paid abroad. The amount of the tax credit should not exceed the amount of CIT that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income.

**Unrealised currency exchange gains**
Unrealised currency exchange gains will be included in accounting profits under IFRS rules. Serbian legislation does not provide any exception of taxation of this income.

**Foreign income**
Companies resident in Serbia are taxed on their worldwide income.

When profit generated in another country is taxed in the foreign country, a company has the right to decrease its tax liability by claiming a tax credit from the tax authorities in Serbia (see the Tax credits and incentives section for more information).

There are no provisions that provide for the possibility that taxation of income earned abroad may be deferred.

---

**Deductions**

**Depreciation and amortisation**
Fixed and intangible assets are divided into five groups, with depreciation and amortisation rates prescribed for each (Group I: 2.5%; II: 10%; III: 15%; IV: 20%; and V: 30%). A straight-line depreciation method is prescribed for the first group, which includes real estate, while a declining-balance method is applicable for assets in the other groups.

Assets subject to tax depreciation and amortisation are all tangible and intangible (except goodwill and renewable resources) assets with a useful life longer than one year that are recognised as non-current assets under IFRS.

**Goodwill**
Goodwill is not subject to tax amortisation.

**Start-up expenses**
Generally, start-up expenses are tax deductible for CIT purposes.
Interest expenses
Interest on related party loans exceeding thin capitalisation and transfer pricing thresholds are not deductible (see the Group taxation section).

Bad debts
Bad debt provisions are generally tax deductible if they are at least 60 days overdue. Provisions have to be made individually for each receivable.

Write-off of individual debts, except for those from debtors who are at the same time creditors, is recognised as an expense under the following conditions:

- They were written off as uncollectable.
- The taxpayer has initiated a court procedure to collect debt or duly reported the receivables in case of liquidation or bankruptcy procedure over the debtor.

Taxable income should be increased for receivables that are written-off and do not meet the above requirements and for which tax deductible provisions were previously made.

Charitable contributions
Expenses for health care, scientific, educational, humanitarian, religious, ecological, cultural, and sport related purposes are deductible, up to 5% of total revenues.

Fines and penalties
Fines and penalties (both commercial and those charged by the authorities) are not deductible.

Taxes
All taxes, duties, and contributions that do not depend on the profitability of the company are deductible in the tax period that the liability in this respect was settled.

Other significant items
The following other expenses are not recognised for CIT purposes:

- Non-documented expenses.
- Provisions for receivables from entities that are creditors at the same time, up to the amount of the liability due to that entity.
- Presents provided to political organisations.
- Presents provided to related parties.
- Penalty interest for late payment of taxes, contributions, and other charges.
- Expenses related to forced collection of taxes and other liabilities.
- Non-business related expense.
- Share in the profit paid to employees or other individuals.
- Calculated but unpaid redundancy payments (deductible when paid).
- Impairment of assets (deductible in tax period in which asset is disposed of or used).
- Direct write-off of receivables (under certain conditions).
- Long-term provisions (except those for renewal of natural resources, expenses within warranty period, and other mandatory long-term provisions).

The following other expenses are recognised for CIT purposes only up to a certain limit:

- Advertising and promotional expenses, up to 10% of total revenues.
- Business entertainment expenses, up to 0.5% of total revenues.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue.
Serbia

Net operating losses
The taxpayer has the right to carry forward and utilise tax losses incurred over the following five years.

Carryback rules do not exist in Serbia.

Payments to foreign affiliates
Generally, there are no restrictions on the deductibility of royalties and service fees paid to foreign affiliates, provided they are at arm’s length, appropriately documented (by agreements, contracts, calculation sheets, etc.), and incurred for business purposes only.

Payment of interest to foreign affiliates is restricted and regulated by thin capitalisation rules and transfer pricing rules (see the Group taxation section).

-----------------------------------------

Group taxation

Tax grouping/consolidation is allowed to a group of companies where all members are Serbian residents and one company directly or indirectly controls at least 75% of the shares in another company. Each company files its own tax balance sheet, and the parent company files a consolidated tax balance sheet for the whole group.

In the consolidated tax balance sheet, losses of one or more companies are offset by the profits of other related companies. Each company is liable for the portion of tax attributable to its share of the group’s taxable profit.

Once approved by the Ministry of Finance, tax grouping/consolidation applies for at least five years.

Transfer pricing
A transfer price is the price of transactions between related parties. Related parties exist if there is a possibility of control or influence over business decisions between them. Ownership of 25% or more, or a majority of shares, is considered as potential control. Influence over business decisions exists when an associated party holds 25% or more, or individually holds the greatest portion, of votes in the taxpayer’s management bodies. If the same persons participate in management or control of both companies, a connection between them will be deemed to exist.

Close family members are also regarded as related parties. Non-resident entities from tax havens are considered as related parties of resident entities. The Serbian Ministry of Finance prescribed the list of countries that are to be considered as tax havens for the application of relevant CIT Law provisions.

A company should disclose transactions with related parties separately at transfer prices and at arm’s-length prices in its CIT calculation. Positive difference between these prices (adjustments of expenses) and negative difference (adjustments of revenues) is included in taxable profit.

Serbian CIT Law recognises the following methods for determining arm’s-length prices:

• Comparable uncontrolled price (CUP).
• Cost plus.
• Resale minus.
• Transactional net margin (TNMM).
• Profit split.
• Any other method that allows determination of arm’s-length prices if none of the above methods can be applied.

It is mandatory to prepare and submit transfer pricing documentation together with the CIT return for periods starting from 1 January 2013.

**Transfer pricing rules for intra-group loans**
Any interest incurred on related party loans exceeding the arm’s-length interest rate is not tax deductible. Arm’s-length interest is deemed to be the:

• weighted average key policy rate for the tax period, for loans denominated in dinars, and
• weighted average interest rate at which domestic banks borrowed from foreign lenders in related tax period, for foreign currency loans.

These indicators are determined by the National Bank of Serbia and published by the Ministry of Finance. However, taxpayers are entitled to determine market interest rates by using all general methods for determining arm’s-length interest rates. In case the taxpayer decides to determine interest rates by applying general methods, it will be obligated to apply such interest rates for assessment of all related party loans.

Transfer pricing rules in this respect are applied up to the amount of tax deductible interest determined in accordance with the thin capitalisation threshold.

**Thin capitalisation**
The interest and related costs will be fully deductible if the loans from related parties do not exceed four times the taxpayer’s net equity (ten times for banks and leasing companies). The amount of a taxpayer’s net equity for this purpose is calculated as the average of the total assets less total liabilities at the beginning and the end of the year, while the amount of loan from related parties is calculated as a daily average for the year.

In cases where the loans from related parties exceed the prescribed threshold, the amount of non-deductible interest will be calculated as proportional to the amount of loans exceeding the 4:1 (10:1) threshold.

**Tax credits and incentives**
Profit earned on the basis of a concession is tax exempt for a period of five years.

**Foreign tax credit**
A Serbian entity is entitled to a tax credit for the WHT paid on foreign-sourced dividends and underlying CIT paid abroad (by its non-resident subsidiary), provided that the taxpayer holds at least 10% of the shares in the subsidiary for at least one year before filing a return. If the taxpayer holds less than 10% of the shares in the subsidiary, the tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income. Non-utilised tax credit can be carried forward by the parent company for five years.

A resident taxpayer also has the right to decrease its tax liability for WHT paid abroad on interest and authorship fees. The tax credit should not exceed the amount of tax
Serbia

that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income. Carryforward of unused tax credits is not allowed.

**Tax holidays**
A ten-year tax holiday is available for companies with a minimum investment in property, plant, and equipment (PPE) of RSD 1 billion. To qualify for the credit, a taxpayer must employ at least 100 new workers for an indefinite period. The tax holiday is available for the ten-year period in proportion to the investment made. The number of employees employed in the tax period in which the taxpayer qualified for the tax holiday must be retained throughout the whole tax holiday period.

**Other tax credits**
A tax credit of 20% (40% for small enterprises) is available for qualifying investments in fixed assets. The credit is limited to 33% (70% for small enterprises) of the assessed CIT liability in the current tax period. Unused tax credits can be carried forward for ten years.

**Withholding taxes**
WHT is calculated and paid at the rate of 20% on payments such as dividends/share in profit, royalties (including neighbouring authorship rights, intellectual property rights, and related rights), interest income, income from distributed surplus of a company in bankruptcy, revenues derived from the liquidation surplus of a company in liquidation, and lease payments for real estate and other assets made to a non-resident, unless a DTT applies to provide a reduced rate.

WHT is also payable on a non-resident’s income realised on the basis of performing entertaining, artistic, sports, and similar programs in Serbia, which is not taxed as income of an individual (performer, musician, sportsman etc.).

In order to benefit from application of a relevant DTT, non-residents (i.e. the income recipient) must provide a tax residency certificate on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident’s country of residence.

Special WHT rules apply in case of non-resident entities from tax havens. WHT is payable at the rate of 25% on royalties, interest, income from lease of immovable property and other assets, and service fees paid to non-resident entities from tax havens. Dividend payments to non-residents from tax havens are subject to WHT at 20%. Serbian Ministry of Finance publishes a list of jurisdictions that are regarded as tax havens.

WHT rates envisaged by applicable DTTs are provided in the following table.

Notes

1. If the recipient company owns/controls at least 25% of the equity of the paying company, the lower of the two rates applies.
2. A new DTT was signed with Denmark in 2009 and is applicable from 2010.
3. The treaty has not been ratified by one of the parties.
4. A tax rate of 5% will be applicable to literary, scientific, and work of art; films and works created like films; or other source of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedures.
5. Only in cases when dividends are to be paid to Serbian residents. If paid to Malaysian residents, they are taxable at 20% in Serbia.
6. A 0% rate is applicable in cases when the income recipient is the government or government owned banks.
7. WHT rate refers solely to dividends distributed from Serbia. In Malta, WHT cannot be higher than CIT on profit before dividend distribution.

**Tax administration**

**Taxable period**
The tax period in Serbia is the calendar year. However, entities have a possibility to opt for a different tax period other than the calendar year (subject to the approval of the Ministry of Finance), but still 12 months long. Once approved, such tax period must be applied for at least five years.

**Tax returns**
CIT returns, together with all supporting documents (e.g. tax depreciation and tax credit forms), must be filed with the tax authorities not later than 180 after expiration of the tax year.

A newly established company needs to register with the tax authorities within 15 days of registration with the Serbian Business Registry.

**Payment of tax**
CIT is payable monthly in advance instalments by the 15th day of the following month for the prior calendar month. The amount of payable advances is determined on the basis of a company’s CIT calculation for the previous year.

The due date for final settlement of CIT liability is the date of filing the annual tax return.
Tax audit process
The tax authorities may undertake an unlimited number of tax audits in respect of the same taxes within a reviewed period. In principle, re-performing of an audit of the same tax within a reviewed period is based on existence of new facts that were previously unavailable to the tax authorities.

Statute of limitations
The statute of limitations period for assessment of tax liabilities is five years from the year in which tax should have been assessed. The statute of limitations for collection of tax liabilities is five years from the year in which tax was due for payment. This is with the exception of pension insurance contributions, which do not become statute barred.

The statute of limitations commences from 1 January of the year following the year in which the tax return/liability was due.

Topics of focus for tax authorities
Historically, audits by the tax authority have been focused primarily on VAT, personal income tax, and social security contributions assessment.
**Significant developments**

The 2013 Budget was announced on 25 February 2013. Corporate tax changes include the following:

- 30% corporate tax rebate for the years of assessment 2013 to 2015, capped at 30,000 Singapore dollars (SGD) for each year of assessment.
- Enhancements to the Productivity and Innovation Credit (PIC) scheme.
- Changes to the incentives for the maritime and financial sectors.
- Withdrawal of certain tax incentives.

Other tax changes include the following:

- Increase in excise duties for certain tobacco products.
- Increase in property and vehicle taxes.
- Increase in foreign worker levies.

On 14 May 2013, the Singapore government announced four key measures intended to strengthen Singapore’s exchange of information (EOI) framework:

- Singapore will extend EOI assistance to all existing tax treaty partner jurisdictions, without having to update the terms of those treaties.
- Singapore will sign the Convention on Mutual Administrative Assistance in Tax Matters, which will expand Singapore’s network of EOI partners by 11 jurisdictions (including the United States).
- Singapore will allow the Inland Revenue Authority of Singapore (IRAS) to obtain bank and trust information from financial institutions without the need for a court order.
- Singapore will conclude a Model 1 Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA) with the United States.

These changes are part of the progressive steps Singapore is taking to enhance its EOI framework, since it endorsed the Standard in 2009. They also come after measures introduced by the Monetary Authority of Singapore since 2011 to ensure that Singapore’s financial system is not used to harbour illegitimate funds or as a conduit for the flow of undeclared assets. In addition, from 1 July 2013, Singapore will criminalise the laundering of proceeds from serious tax offences.
Singapore

**Taxes on corporate income**

Companies (resident and non-resident) that carry on a business in Singapore are taxed on their Singapore-sourced income when it arises and on foreign-sourced income when it is remitted or deemed remitted to Singapore. Non-residents are subject to withholding tax (WHT) on certain types of income (e.g. interest, royalties, technical service fees, rental of movable property) where these are deemed to arise in Singapore (for details, see the Withholding taxes section).

Tax on corporate income is imposed at a flat rate of 17% for the year of assessment 2013 (i.e. income year 2012). There is an exemption of up to SGD 152,500 out of the first SGD 300,000 of taxable income.

A three-year tax exemption on the first SGD 100,000 and a further exemption of up to SGD 100,000 on the next SGD 200,000 of taxable income are available for qualifying start-up companies. This exemption is not available to property development and investment holding companies incorporated on or after 26 February 2013.

In addition, for the years of assessment 2013 to 2015 (i.e. income years 2012 to 2014), there is a 30% corporate tax rebate, capped at SGD 30,000 for each year of assessment.

Singapore adopts a one-tier taxation system, under which all dividends are tax-exempt in the shareholder's hands.

**Corporate residence**

In Singapore, the tax residence of a corporation is determined by the place where the central management and control of its business is exercised. This is taken generally to mean the place where the directors meet to exercise *de facto* control, although the IRAS has recently set out further qualifying criteria.

**Permanent establishment (PE)**

The presence of a PE is largely irrelevant, except for treaty purposes, as Singapore taxes with reference to the source of income rather than the presence of a PE.

However, a PE is a clear indication of source.

The definition of a PE in Singapore's double taxation agreements (DTAs) is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition.

It is generally taken to be a fixed place through which the business of an enterprise is wholly or partly carried on, and normally includes a place of management, a branch, an office, a factory, a workshop, and a place of extraction of natural resources, etc.

In addition, and subject to the terms of the relevant agreements, a non-resident may also have a PE in Singapore if one:

- has a building site or a construction, assembly, or installation project that lasts longer than a specified number of months, or supervisory activities connected with the building site or construction project
- furnishes services (including consultancy services) through employees in Singapore for more than a specified number of days or months, or
Singapore

- has an agent in Singapore who has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of the enterprise.

The Singapore tax legislation defines a PE more broadly than most of the DTAs; however, as mentioned above, this is largely irrelevant where a treaty can take precedence.

**Other taxes**

**Goods and services tax (GST)**

GST is charged at 7% on the supply of goods and services made in Singapore by a taxable person in the course or furtherance of one’s business.

The only exemptions from GST are prescribed financial services (including life insurance) and the sale or rental of residential properties. Zero-rating only applies to the export of goods and international services.

GST is also levied on imports of goods, at the time of importation. However, there are reliefs available to ease the cash-flow burden of import-export traders by suspending GST at the time of importation. GST is not currently charged on imports of services.

A taxable person is one who is, or is required to be, registered for GST. GST registration is required if one’s taxable turnover exceeds SGD 1 million per year. Voluntary registration is permitted if the taxable turnover is below the registration limit, subject to conditions.

A supply of goods is made in Singapore if the goods are in Singapore at the time of supply, and a supply of services is made in Singapore if the supplier belongs in Singapore. Generally, a person belongs in Singapore if one’s business (including carrying on a business through a branch or agency) or fixed establishment is in Singapore.

A taxable person is allowed to offset the input GST paid on taxable purchases against the output GST chargeable on supplies made. However, certain purchases are specifically denied an input GST deduction. These include supplies of goods and services such as non-business expenses, club subscription fees, family benefits, car rental expenses, motor vehicle expenses, medical expenses, and transactions involving betting, sweepstakes, lotteries, fruit machines, or games of chance.

A non-resident is not entitled to GST refunds except by appointing a resident tax agent to act on one’s behalf. The resident tax agent can then recover import GST paid on behalf of the non-resident business but will be required to account for output GST on any subsequent supply of the non-resident’s goods in Singapore.

**Customs and excise duties**

Singapore is essentially a free port with minimal import restrictions. Customs and excise duties are imposed on intoxicating liquors (SGD 48 to SGD 70 per litre of alcohol or SGD 90 per kilogram of non-liquid alcohol preparations), tobacco products (SGD 299 to SGD 352 per kilogram), motor vehicles (12% to 20% ad valorem), and petroleum products (SGD 3.70 to SGD 7.10 per dal).
Property tax
Property tax is levied annually at the following rates on the annual value of houses, land, buildings, or tenements.

<table>
<thead>
<tr>
<th>Property</th>
<th>Up to 31 December 2013</th>
<th>From 1 January 2014</th>

</tr>
</tbody>
</table>

A property tax refund concession is available for unoccupied buildings (residential and non-residential), but this will be removed with effect from 1 January 2014, when all vacant buildings will be taxed at the prevailing tax rates.

Stamp duties
Stamp duties are levied on written documents relating to stocks and shares and immovable property at the rates listed in the table below.

Stamp duties are typically payable by the buyer (i.e. buyer’s stamp duty or BSD); however, seller’s stamp duty (SSD) and additional buyer’s stamp duty (ABSD) have been introduced as short term measures to cool the residential property market. Stamp duty rates on immovable property therefore vary, depending on the date of purchase, the holding period, the number of properties already owned, and whether the buyer is a foreigner, Singaporean, or permanent resident.

Foreigners of certain nationalities who fall within the scope of the respective free trade agreements will be accorded the same treatment as Singaporeans.

Leases with annual rents not exceeding SGD 1,000 are exempt from stamp duty.

### Foreign Workers Levy (FWL)

The FWL is a monthly levy of up to SGD 650 that employers are liable to pay for each foreign employee (Work Permit or S Pass holders) hired. The levy rate depends on the employee’s qualifications, the employer’s industry, and the ratio of foreigners to Singaporeans and permanent residents employed in the company. The government has announced that the FWL will be increased further in 2014 and 2015.

### Social security contributions

#### Central Provident Fund (CPF)

The CPF is Singapore’s national pension scheme. Contributions are payable by Singapore citizens and permanent residents only. Generally, employers and employees contribute 16% and 20%, respectively, of ordinary monthly wages up to an income ceiling of SGD 5,000. Their respective maximum contributions are therefore SGD 800 and SGD 1,000.
These rates also apply to additional wages (e.g. year-end bonus) for year of assessment 2013 (income year 2012), up to a maximum contribution of:

- the actual additional wages if the annual ordinary wages are not more than the ordinary wage ceiling of SGD 60,000 and the total wages are not more than the maximum contribution of SGD 85,000
- the difference between the maximum contribution of SGD 85,000 and annual ordinary wages if the total wages exceed the maximum contribution of SGD 85,000 but the annual ordinary wages are not more than the ordinary wage ceiling of SGD 60,000, or
- the lower of the difference between the maximum contribution and the ordinary wage ceiling [SGD 85,000 - SGD 60,000] or the actual additional wages if annual ordinary wages exceed the ordinary wage ceiling of SGD 60,000.

Reduced rates apply for employees above the age of 35 who are earning less than SGD 1,500 per month, and those above 50, although these rates are being gradually increased.

Foreign nationals and their employers are precluded from making CPF contributions. Foreign employees who become Singapore permanent residents, and their employers, may contribute at reduced rates for the first two years.

**Supplementary Retirement Scheme (SRS)**

The SRS is a voluntary scheme to encourage employees and the self-employed to save for retirement over and above their CPF savings. The maximum amount to be contributed is subject to an income cap of SGD 85,000. Employers are allowed to contribute to their employees’ SRS accounts. This is subject to a 15% contribution limit for Singapore citizens and permanent residents, and a 35% cap for foreigners. Employees will be taxable on these contributions, but will be allowed corresponding tax relief.

---

**Branch income**

Tax rates on branch profits are the same as on corporate profits. There is no branch profits remittance tax on the repatriation of profits to the head office.

**Income determination**

**Inventory valuation**

There are no special rules as to which valuation basis should be adopted for inventories (stock-in-trade) in the case of a continuing business, as long as the basis is consistent from one year to another. However, a last in first out (LIFO) basis of valuation is not permitted for tax purposes. Generally, tax reporting conforms to book reporting.

**Capital gains**

There is no tax on capital gains. Where there is a series of transactions or where the holding period of an asset is relatively short, the tax authorities may take the view that a business is being carried on and attempt to assess the gains as trading profits of the corporation. The United Kingdom (UK) Badges of Trade, which are used in judicial decisions to distinguish capital and revenue transactions, are generally applied in determining this issue. They include the existence of a profit-seeking motive, the number of transactions, the nature of the asset, the existence of similar trading
transactions or interests, changes to the asset, the way the sale was carried out, the source of finance, the interval of time between purchase and sale, and the method of acquisition.

Gains from the disposal of equity investments that take place between 1 June 2012 and 31 May 2017 will not be taxed if at least 20% of the ordinary shares in the investee company have been held for a continuous period of at least 24 months prior to the disposal. This protection does not apply to gains derived by an insurance company.

**Dividend income**
Singapore dividends are exempt in the hands of the recipient.

**Stock dividends**
Stock dividends generally are not taxable. However, certain distributions may be treated as deemed dividends in certain circumstances.

**Deemed dividends**
Certain distributions to shareholders under a capital-reduction scheme, a share buyback, or a share redemption exercise may be treated as dividends paid by the company. Under the one-tier taxation system, this is not a significant issue unless the transaction is not correspondingly treated as a dividend in the hands of the shareholder. In which case, the gain may be taxable if it is in respect of a trade or business.

**Interest income**
Singapore-sourced interest income is taxable when it arises, and foreign-sourced interest is taxable when it is remitted or deemed to be remitted to Singapore. For further details on foreign-sourced interest income and the availability of foreign tax credit, refer to Foreign income below.

**Foreign income**
A corporation, whether resident in Singapore or not, is taxed on foreign income when it is received in Singapore. Legislative provisions govern the basis of treating foreign income as received in Singapore. There are no special rules for taxing the undistributed income of foreign subsidiaries.

Where income is earned from treaty countries, double taxation is avoided by means of foreign tax credit granted under those treaties. For non-treaty countries, unilateral tax credit is given in respect of foreign tax on all foreign-sourced income. These foreign tax credits may be pooled with effect from the year of assessment 2012 (i.e. income year 2011), subject to certain conditions.

Foreign dividends, foreign branch profits, and foreign service fee income remitted to Singapore may be exempt from tax if they fulfil certain conditions.

**Deductions**

**Depreciation**
Tax depreciation is allowable at specified rates on buildings used in qualifying industry sectors, subject to conditions. However, in 2010, industrial building allowances were replaced by a Land Intensification Allowance. The latter provides for faster depreciation but is subject to approval as it is allowed as a tax incentive. Transitional provisions for industrial building allowances are available for taxpayers who committed to qualifying capital expenditure before 22 February 2010.
Tax depreciation is available on machinery and equipment on a straight-line basis over their specified working life for all types of business. In lieu of the straight-line basis, accelerated tax depreciation allowances can be claimed by all businesses on all machinery and equipment in equal instalments over three years.

A 100% depreciation allowance is available on capital expenditure incurred on computers, robots, standby generators, pollution control and energy-efficient equipment, certain diesel-driven vehicles, and prescribed automation equipment.

Writing down allowances on a straight-line basis over five years are allowable on the cost of acquisition of intellectual property (IP), subject to certain conditions.

In addition, enhanced allowances may be available for the acquisition of automation equipment and IP (see Productivity and Innovation Credit in the Tax credits and incentives section).

Gains on tax depreciable property (i.e. the excess of proceeds over tax base) are taxed as ordinary income to the extent that tax depreciation has been allowed; that is, there is a clawback of tax depreciation on the disposal of the asset.

**Goodwill**

Payments for the acquisition of goodwill are generally capital in nature and not deductible.

**Start-up expenses**

Generally, expenses incurred prior to the commencement of business are not tax deductible. However, most businesses are allowed to deduct expenses incurred in the 12 months immediately preceding the accounting year in which the business earned its first dollar of trading income. Deductible expenses are those that would have been allowed a deduction had they been incurred after the business commenced operations.

In addition, deductions and writing down allowances are available for certain types of pre-commencement expenditure (acquisition of plant and machinery, research and development [R&D], etc.) that are deemed to be incurred on the first day on which the taxpayer carries on one’s business.

**Interest expenses**

Interest incurred on capital employed in the production of income, and borrowing costs that are incurred as a substitute for interest or to reduce interest costs, will be allowed as a tax deduction.

**Research and development (R&D) expenses**

Expenses incurred in respect of R&D carried out in Singapore qualify for a tax deduction of 150% of the expenses incurred. If the R&D is carried out overseas, the expenses incurred can be deductible if they meet certain conditions.

Expenditure incurred in relation to R&D cost-sharing arrangements are accorded the same tax treatment as R&D expenses.

Enhanced deductions may also be available under the PIC scheme (see Productivity and Innovation Credit in the Tax credits and incentives section).
Bad debts
Bad trade debts and provisions for trade debts are deductible to the extent that they are incurred in the business. Doubtful debts are deductible if they are properly estimated and specific. General provisions for bad debts are not deductible.

Businesses that have elected to align their tax treatment of financial instruments with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement) will be allowed a tax deduction for impairment losses on trade debts when they are incurred (regardless of whether they are general or specific provisions). Correspondingly, any reversal will be taxed.

Charitable contributions
Donations are deductible only if they are made in cash or another prescribed form and to an approved recipient. The deduction allowed for qualifying donations is generally 250% of the value of the donation.

Fines and penalties
Fines and penalties imposed for violations of the law are not deductible.

Taxes
Income taxes are generally not deductible in determining corporate income. However, irrecoverable GST is deductible under certain circumstances. The FWL and property taxes are deductible to the extent they are incurred wholly and exclusively in the production of income.

Other significant items
Private automobile expenses are not deductible.

The tax deduction for medical expenses is limited to 2% of total payroll if the employer implements certain portable medical insurance or benefit schemes. Otherwise, the amount deductible will be limited to 1% of total payroll. Where the company is exempt or taxed at a reduced rate, the expenses disallowed are effectively taxed at the prevailing corporate rate.

A tax deduction for employee share-based remuneration (stock awards or stock option schemes) is allowed only if treasury shares in the company or its holding company are purchased to fulfil such obligations. A company may also claim a tax deduction when the share-based remuneration scheme is administered by a special purpose vehicle (SPV). The deduction is restricted generally to the lowest of the actual outlay incurred by the company, its holding company, or the SPV.

Net operating losses
Loss carryover, including unutilised tax depreciation allowance, is unlimited, provided shareholdings in the loss-making corporation have not changed beyond 50% of the issued and paid-up capital. Additionally, for tax depreciation allowances to be carried forward, the same trade needs to be continued. The tax authorities may exercise discretion to allow carryover of tax losses and unutilised tax depreciation even when there has been a change in shareholding beyond 50%, absent any tax avoidance motives. Losses of up to SGD 100,000 incurred by the company in the current year can be carried back for one year.
Payments to foreign affiliates
Payments to non-residents, including foreign affiliates, are deductible, provided they are fair and reasonable, are revenue in nature, and can be seen to be relevant to earning the payer’s income.

Group taxation
A company is allowed to transfer excess current year trade losses, current year tax depreciation, and current year approved donations to another company within the same group if certain conditions are satisfied.

Broadly, to qualify for group relief, companies must be incorporated in Singapore, belong to the same ‘75%’ group of companies such that there must be at least a 75% ownership relationship between claimant and transferor, and have the same accounting year-end. In addition, a group must comply with certain prescribed offset and apportionment rules.

Transfer pricing
The Income Tax Act contains provisions that may be used in a transfer pricing context to effectively allow the IRAS to challenge and revise inter-company transactions. Additionally, specific transfer pricing provisions define the arm’s-length principle and provide the IRAS with a right to make transfer pricing adjustments in cases where taxpayers do not comply with the arm’s-length principle.

The IRAS has also issued transfer pricing guidelines to supplement the provisions in the Income Tax Act and the various treaties signed by Singapore. The guidelines cover the application of the arm’s-length principle and documentation requirements relating to all related party transactions, including local related party transactions. The intention of the guidelines is to help taxpayers substantiate their transfer prices with their related entities by maintaining adequate documentation to mitigate the risk of tax adjustment by the IRAS and to safeguard them from potential double taxation. The IRAS has also provided guidance on matters relating to mutual agreement procedures (MAPs) and advance pricing arrangements (APAs).

The IRAS has also issued guidance on the application of the arm’s-length principle to related party loans and services.

Although Singapore’s income tax rates are traditionally lower than the majority of its trading partners, the IRAS is increasing its focus on transfer pricing issues.

Thin capitalisation
There are no formal thin capitalisation rules in Singapore. However, general anti-avoidance and transfer pricing provisions may operate in cases of blatant abuse.

Tax credits and incentives
There are various tax incentives available to taxpayers involved in specified activities or industries identified as being beneficial to Singapore’s economic development.
Pioneer tax incentive
Corporations manufacturing approved products with high technological content, providing qualifying services, or engaging in countertrade activities may apply for tax exemption for five to 15 years under the pioneer tax incentive. Corporations may apply for their post-pioneer profits to be taxed at a reduced rate under the Development and Expansion Incentive, as discussed below.

Development and Expansion Incentive
Under the Development and Expansion Incentive, corporations engaging in new high-value-added projects, expanding or upgrading their operations, or undertaking incremental activities after their pioneer or post-pioneer period may apply for their profits to be taxed at a reduced rate of not less than 5% for an initial period of up to ten years. The total tax relief period is subject to a maximum of 40 years (inclusive of the post-pioneer relief period previously granted, if applicable).

Investment allowance
Under the investment allowance, a tax exemption is granted on an amount of profits based on a specified percentage (of up to 100%) of the capital expenditure incurred for qualifying projects or activities within a period of up to five years (up to eight years for assets acquired on hire-purchase). With effect from year of assessment 2013 (income year 2012), capital expenditure incurred for productive equipment placed overseas on approved projects may likewise be granted integrated investment allowances.

Productivity and Innovation Credit (PIC)
The PIC scheme provides for an enhanced 400% deduction for qualifying expenditure incurred in respect of six qualifying activities during the accounting periods that end between 2010 and 2014 (i.e. years of assessment 2011 to 2015). The six qualifying activities are:

• The acquisition or leasing of prescribed IT and automation equipment.
• Staff training.
• The acquisition of IP.
• The registration of IP rights.
• R&D.
• Design.

The enhanced deduction is available only on the first SGD 400,000 of qualifying expenditure incurred each year on each of the qualifying activities although this cap may be combined for certain years of assessment. Certain activities are subject to approval or minimum ownership requirements.

For the years of assessment 2013 to 2015, the acquisition of IP rights includes licensing of those rights, other than trademarks.

Merger and acquisition allowance
The merger and acquisition allowance allows a write-off, over five years, of 5% of the value of qualifying merger or acquisition deals executed between 1 April 2010 and 31 March 2015, subject to a cap of SGD 5 million per year of assessment. This incentive is available only to companies that are incorporated, tax resident, and carrying on a business in Singapore. A 200% tax allowance will also be granted on transaction costs (capped at SGD 100,000 per year of assessment) incurred on qualifying deals from 17 February 2012 to 31 March 2015.
Financial services incentives

Financial sector incentive (FSI) scheme
The FSI scheme covers approved bond intermediaries, Asian currency units, approved derivative traders, approved fund managers, equity capital market intermediaries, operational headquarters, syndicated offshore credit and underwriting facilities, providers of high-value-added processing services supporting financial activities, futures members of the Singapore Exchange Limited, and members of the Singapore Commodity Exchange Limited.

High growth, high-value-added activities, such as services and transactions relating to the bond market, derivatives market, equity market (i.e. futures, securities trading, which includes sale of stocks, shares, bonds and other securities, and extends to brokerage, nominee, and custodian services in relation to securities trading), and credit facilities syndication, will be exempt from tax or taxed at 5%, while other broader range financial activities will only qualify for a 12% tax rate. The tax incentive period may last for five, seven, or ten years, subject to certain conditions being met.

Finance and treasury centre (FTC)
Income derived by an FTC from approved finance and treasury centre activities is taxed at a reduced rate of 10%. Approved activities include international treasury and fund management activities, corporate finance and advisory services, economic and investment research and analysis, and credit control and administration.

Interest payments to overseas banks and approved network companies are also exempt from WHT where the funds borrowed are used for approved activities.

Debt securities incentives
A package of tax exemptions and reduced tax rates is available to various players in the Singapore bond market, including those involved in certain Islamic financing arrangements.

Offshore insurance incentives
Approved insurance companies engaged in the business of insuring and reinsuring offshore risks are taxed at a rate of 10% on qualifying income arising from offshore risks business. Tax exemption is available to approved insurance companies for qualifying income from the writing of both onshore and offshore marine hull and liability risk insurance and offshore specialised risk insurance, and for qualifying income of approved offshore captive insurance companies.

Approved insurance and reinsurance brokers are taxed at a rate of 10% on commission income from broking activities if the risks being insured or reinsured are offshore risks and on fee income from advisory services provided to non-Singapore based clients. The concessionary tax rate is further reduced to 5% on qualifying income for approved insurance and reinsurance brokers in respect of the offshore specialty insurance broking business.

Real Estate Investment Trusts (REITs)
Distributions made to foreign non-individual investors by a listed REIT out of rental from Singapore real estate are subject to a reduced tax rate of 10%, subject to certain conditions. Listed REITs investing in foreign properties can apply for tax exemption for certain foreign income received in Singapore. Distributions out of this income similarly are exempt. Stamp duty relief is available upon the transfer of immovable Singapore
property to a REIT, and GST concessions are available in respect of overseas non-residential properties and SPVs or sub-trusts.

**Islamic financing arrangements**
The income tax, stamp duty, and GST treatment of (a) Islamic financing arrangements based on (i) the cost-plus (Murabaha) concept, (ii) the investment-partnership (Mudaraba) concept, and (iii) the leasing-with-option-to-purchase (Ijara Wa Igtina) concept for mortgage financing; and (b) Islamic debt securities (Sukuk) are aligned with conventional financing contracts that they are economically equivalent to, subject to certain conditions.

**Infrastructure project finance incentives**
Tax exemption is available for interest income earned from qualifying investments in qualifying infrastructure projects/assets. FSI companies that provide project finance advisory services related to qualifying projects/assets pay tax at 5% on their qualifying income, and companies that provide management services to qualifying business trusts and funds pay tax at 10% on their qualifying income. Stamp duty relief is also available on the transfer of such projects/assets to listed companies.

**Sovereign wealth funds**
Tax exemption is available for income derived by a sovereign fund entity and an approved foreign government-owned entity from funds managed in Singapore.

**Headquarters (HQ) schemes**
Approved regional headquarters in Singapore are taxed at a concessionary rate of tax of 15% on qualifying overseas income. Approved international headquarters can negotiate for various tax incentives, including tax exemption or concessionary tax rates on qualifying income.

**Maritime Sector Incentive (MSI) scheme**
The MSI scheme is the umbrella incentive for the maritime sector. Incentives offered include tax exemption for shipping companies and a 10% concessionary tax rate for international freight and logistics operators. Approved ship investment managers are also taxed at 10% on qualifying management-related income. The scheme also includes approved ship investment vehicles, which are tax exempt on their qualifying vessel lease income; approved container investment enterprises, which are taxed at 5% or 10% on qualifying income from container-leasing; and approved container investment management companies, which are taxed at 10% on qualifying management fees.

Qualifying ship operators and lessors under the MSI scheme also enjoy automatic tax exemption on gains from the disposal of vessels, vessels under construction, and new building contracts.

**Other incentives**
Incentives for not-for-profit organisations, international arbitration, oil traders, international traders, general insurance companies, leasing companies, trust companies, cyber traders, and the provision of international legal services include tax exemptions or concessionary tax rates of 10% for qualifying income. The concessionary tax rate for liquefied natural gas (LNG) trading, aircraft leasing, qualifying oil traders, and international traders is further reduced to 5%.
Foreign tax credit
See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Withholding taxes

Domestic corporations paying certain types of income to non-residents are required to withhold tax.

Unless a lower treaty rate applies, interest on loans and rentals from movable property are subject to WHT at the rate of 15%. Royalty payments are subject to WHT at the rate of 10%. The tax withheld represents a final tax and applies only to non-residents who are not carrying on any business in Singapore or who have no PE in Singapore. Technical assistance and management fees for services rendered in Singapore are taxed at the prevailing corporate rate. However, this is not a final tax. Royalties, interest, rental of movable property, technical assistance, and management fees can be exempt from WHT in certain situations or subject to a reduction in tax rates, usually under fiscal incentives or DTAs.

Payments made to public entertainers and non-resident professionals who perform services in Singapore are also subject to a final tax of 15% on their gross income. For public entertainers, this appears to be a final tax unless they qualify to be taxed as Singapore tax residents. However, non-resident professionals may elect to be taxed at the prevailing tax rate for non-resident individuals of 20% on net income if this results in a lower tax cost. The WHT rate on payments to non-resident entertainers is reduced to 10% from 22 February 2010 to 31 March 2015.

With effect from 17 February 2012, ship charter fee payments are no longer subject to WHT.

The WHT rates are shown in the following table.

</tbody>
</table>

Notes

1. Singapore has no WHT on dividends over and above the tax on the profits out of which the dividends are declared. However, some treaties provide for a maximum WHT on dividends should Singapore impose such a WHT in the future.
2. The non-treaty rates (a final tax) apply only to non-residents who do not carry on business in Singapore or have a PE in Singapore. This rate may be further reduced by tax incentives.
3. Interest:
   a. Lower rate or exemption if received by a financial institution.
   b. Exempt if paid to the government.
   c. Lower rate or exemption if paid by an approved industrial undertaking.
   d. Exempt if paid by a bank and received by a bank.
   e. Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
   f. Exempt if paid in respect of an approved loan or indebtedness.
   g. Exempt if paid to an approved pension fund.
   h. Exempt if paid by a financial institution.
4. Royalties:
   a. Royalties on literary or artistic copyrights, including film royalties, are taxed at the non-treaty rate.
   b. Lower rate for payments in connection with industrial, commercial, or scientific equipment.
   c. Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
5. Treaties:
   a. Treaty with Bermuda covers only the exchange of information.
   b. Treaty with Chile covers only international ship operations.
   c. Treaties with Hong Kong and the United States cover only shipping and air transport activities.
   d. Treaty applies from 1 January 2014.

Tax administration

**Taxable period**
The tax basis period is the calendar year; however, for business profits, the accounting period will generally be adopted.
Singapore

**Tax returns**
Tax is computed for each tax year based on the income earned in the preceding year (the tax basis period). The corporation files an estimate of its income within three months of the end of the accounting period followed by a return of income by 30 November of the tax year, and the tax is assessed by the Comptroller of Income Tax. There is no fixed date for the issue of assessments.

**Payment of tax**
Assessed tax is payable within one month after the service of the notice of assessment, whether or not a notice of objection to the assessment has been lodged with the tax authorities. Application may be made to the Comptroller to pay estimated tax liabilities on a monthly basis. However, the Comptroller is under no obligation to grant such an application.

Late payment of tax will attract penalties, up to a maximum of 17% of the outstanding tax.

**Tax audit process**
The IRAS now adopts a risk-based approach to identifying compliance risk, with a focus on improving the behaviour of taxpayers who pose a higher risk of non-compliance. It also prioritises and tailors specific compliance programmes that aim to identify taxpayers who have made mistakes in their tax returns, create an audit presence in the community to deter non-compliance by other taxpayers, educate taxpayers on their tax obligations and how to comply with these, and identify areas of tax law, policies, and processes where the tax system can be simplified.

**Statute of limitations**
The statute of limitations is four years from the year of assessment (if the year of assessment is 2008 or a subsequent year of assessment) or six years (if the year of assessment is 2007 or a preceding year of assessment). It does not apply where there has been fraud or wilful default by the taxpayer.

**Topics of focus for tax authorities**
In the past, the IRAS has focussed its compliance efforts on:

- the timely filing of corporate tax returns
- accurate filing of income and expenses, especially by family-owned and managed companies
- abuse of the tax exemption scheme for new companies, and
- claims for capital allowances and industrial building allowances.

The IRAS has announced that, in addition to the above, it will also be focussing on:

- the classification of income and expenses by companies enjoying tax incentives
- related-party transactions and the allocation of development costs by real estate developers, and
- income declarations by companies whose principal activities are that of tutoring services or tuition agencies.
Other issues

Adoption of International Financial Reporting Standards (IFRS)
Companies incorporated in Singapore and Singapore branches of foreign companies are required by the Companies Act to prepare and present financial statements that comply with the Singapore Financial Reporting Standards (SFRS). In Singapore, the Accounting Standards Council (ASC) has the statutory authority to issue SFRS for adoption.

The SFRS is principally based on and substantially similar to the International Financial Reporting Standards (IFRS) that are issued by the International Accounting Standards Board (IASB). The ASC’s strategic direction was the convergence of SFRS with IFRS by 2012 for use by listed companies. However, a few key outstanding issues remain to be resolved before full convergence can be implemented. These depend on the progress of certain IASB projects that are not expected to take effect before 1 January 2015. For unlisted companies, the development of IFRS for small and medium-sized entities is being observed and evaluated.

Companies are required to submit financial statements as part of their tax return filing. The IRAS generally accepts financial statements prepared for statutory filing, although companies that have been allowed to prepare their financial statements using standards other than SFRS, such as IFRS or the Generally Accepted Accounting Principles (GAAP) adopted by the United States, may be required to explain and/or account for any differences and make the necessary tax adjustments, if any.

In relation to financial instruments, the Income Tax Act was amended to align the tax treatment with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement). As a concession, the IRAS allows taxpayers to elect to align their tax reporting of lease income to the accounting treatment prescribed by SFRS 17 (Leases), which requires operating lease income to be recognised using the ‘effective rent method’.

Sample corporate tax calculation
Accounting period ended 31 December 2012 (year of assessment 2013).

---

**Significant developments**

At this moment, there are no proposed changes, nor have changes been implemented recently. The Minister of Finance has decided to study possible changes to the overall tax system of the island. At this time, no detailed proposals have been made, and the Ministry of Finance has yet to publish a broad outline of the system it wants to achieve. The apparent target date for implementation has been postponed by a year, with introduction by 2014.

With regard to social security, the government is preparing the introduction of general health care insurance and to raise the age for old age pension (AOV) from 60 to 62, and maybe later on to 65.

**Transitional legislation**

While the offshore tax regime was abolished in 2001, qualifying offshore companies incorporated before 1 January 2002 may continue to apply the old regime until 2019, provided that certain conditions are met under transitional legislation.

---

**Taxes on corporate income**

Resident corporations are taxed on worldwide income. Non-resident companies are taxed on the following Sint Maarten (St. Maarten)-source income:

- Income attributable to a permanent establishment (PE).
- Income from real property situated in St. Maarten.
- Interest on loans secured by a mortgage on property situated in St. Maarten.

Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 34.5%. Special minimum rates apply to the taxable income of certain companies:

</table>

**Shipping business**

Shipping companies are subject to the general profit tax rate of 34.5% but may apply for the tonnage regime. If applicable, their profit is calculated based on the rates in the table below. If a shipping company applies the tonnage regime, the actual profits...
or losses are not taken into account, regardless of whether they are regular profits or capital gains.

The calculated profit based on the table below is subject to the general tax rate of 34.5%.

**Exempt companies**

Please see the Tax credits and incentives section for more information on tax exempt companies.

**Companies under transitional offshore rules**

Transitional rules distinguish three types of offshore companies.

- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support subject to tax rates of 2.4% to 3% (while capital gains and losses were not taken into account) will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to tax rates of 4.8% to 6% or, under certain circumstances, 2.4% to 3% and that had a valid ruling with the tax inspector (e.g. trading companies, banks, captives commissions, and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. These revenues were, under the old offshore regime, exempt from tax. For profit tax purposes, these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules, provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.
Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in St. Maarten is considered to be a resident. A company that has been established in St. Maarten will always be considered a resident of St. Maarten.

Offshore entities in St. Maarten must have a local managing director. This function is easily provided by one of the many trust companies established in St. Maarten.

Permanent establishment (PE)

The definition of a PE in St. Maarten is generally in line with the Organisation for Economic Co-operation and Development (OECD) model.

Transfer of legal seat

Legislation has been enacted under which a St. Maarten company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction) and a foreign company is allowed to migrate to St. Maarten.

Other taxes

Turnover tax

A 5% turnover/sales tax is levied on the revenue derived from services and deliveries rendered by an entrepreneur or company in St. Maarten. Note that non-resident service providers are also subject to this tax.

A limited number of services and deliveries are exempt, such as:

- Exports.
- Certain basic food and other products.
- Electricity and water.
- Medical services.
- Services at the airport or in the harbour regarding imported or exported goods or goods in transit.
- Advisory and management services provided to or by offshore companies and offshore banks.

An entrepreneur liable to turnover/sales tax must file a declaration, with the Tax Inspectorate before the 16th day of the month following the month concerned, at the Tax Collector’s office.

Import tariffs

In general, there are no customs duties or import tariffs in St. Maarten, except for a special import tariff on gasoline. The rate is ANG 29 per hectolitre.

Excise duties

There are no excise duties in St. Maarten.

Property taxes

There is no property tax in St. Maarten.
Sint Maarten

**Transfer tax**
The transfer of immovable property located in St. Maarten is subject to a 4% transfer duty.

**Stamp taxes**
A stamp tax is levied in two ways, in the form of stamps and as stamped paper.

Stamp tax applies to documents such as government licences, leases, agreements, and court documents. The rate depends on the type of document. As an example, the stamp tax for bank checks is ANG 0.25. The general rate for each page of a legal document is ANG 5.

**Social security contributions**

**Health and accident insurance**
Employees with an income of ANG 64,035 or less are insured against health care costs and loss of income in case of illness. The premium is 8.3% to be paid by the employer and 2.1% by the employee.

Employees are also insured against loss of income as a result of an accident that occurs at work. The premium varies from 0.5% to 5%, depending on the class of risk, to be paid fully by the employer. Maximum premium income is ANG 64,035.

**Old age insurance (AOV) and widows and orphans insurance (AWW)**
The collective premium for AOV and AWW amounts to 14% up to an income of ANG 89,928, of which 7.5% is to be paid by the employer.

**Withholding obligation**
Employers must not only withhold wage tax but also the employee part of social security premiums from their employees and pay the amount withheld, together with the amount payable by the employer, to the tax collector.

---

**Branch income**

Tax rates on the profits of PEs are the same as for resident corporations.

There are specific rules for the PE of an insurance company. In that case, the company may elect to declare profit based on a percentage of premiums received by the PE, as well as premiums the company has received from insured residents and from insured risks in St. Maarten. The insurance company may also elect to declare a profit that is in the same proportion to total profit of the company as the aforementioned premiums to total premiums.

No tax is withheld on transfers of profits to the head office.

---

**Income determination**

**Inventory valuation**
Both the last in first out (LIFO) and first in first out (FIFO) methods of inventory valuation are permitted, provided the chosen method conforms to sound commercial practice. Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.
**Capital gains**
Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages (dividends and capital gains) from a qualifying participation (see Dividend income below).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired asset. The reserve may be maintained for a maximum of four years. If the reserve has not been fully applied, the remainder will be liable to taxation in the fourth year.

Under the transitional regime for offshore companies (investment, holding, finance, and patent holding companies), capital gains and losses are tax exempt.

**Dividend income**
In general, a full participation exemption applies to all local as well as foreign participations for dividends as well as for capital gains. However, it is required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.

Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax in St. Maarten.

**Non-portfolio investment clause**
A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest, or royalties received other than from an enterprise of that participation.

**Subject-to-tax clause**
A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited to 70% of dividends. Consequently, the dividends would be subject to an effective tax rate of 10.35% (30% x 34.5% regular tax rate).

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

**Immovable property**
The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

**Definition of dividend**
A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.
Sint Maarten

Minimum cost-price threshold for participations
The minimum cost-price threshold for shareholdings, profit-sharing notes, or voting rights of less than 5% is ANG 890,000.

Interest income
There is no specific regime for interest received. Interest income is therefore taxed at the same rate as other income.

Foreign income
A St. Maarten corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

St. Maarten has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a PE on Aruba, Curaçao, or the Netherlands, including the Caribbean Netherlands, are tax exempt in St. Maarten based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

Foreign real estate is always deemed to be part of a PE and, as such, is fully tax exempt.

Deductions

Depreciation and amortisation
Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs, and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable. In addition, an accelerated deduction of one-third of the assets' depreciable basis may be taken. The assets' remaining cost basis (two-thirds) is depreciated using one of the acceptable methods.

The cost basis of certain intangible assets, such as patents, trademarks, and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.

The tax department has issued the following estimated depreciation table:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
<th>Residual value (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2/2.5</td>
<td>10</td>
</tr>
<tr>

</tr>
<tr>
<td>Mainframe</td>
<td>10/12.5</td>
<td>0</td>
</tr>
</tbody>
</table>
Start-up expenses  
Start-up expenses should be capitalised and may be depreciated, comparable to goodwill, over five years.

Anti-abuse rules regarding interest and loans  
Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction, or in case the interest in the hands of the recipient is taxed at an effective tax rate that is considered adequate by St. Maarten standards, the interest may be deductible.

In case of intra-group financing, for profit tax purposes the amount of interest paid or received should be based on arm's-length principles.

In case of profit participating loans, the interest will be qualified as a dividend and will not be deductible. Interest received on such loans may meet the definitions of the participation exemption if the creditor also holds a qualifying participation in the debtor.

A write-down of an intra-group loan may be denied in case of a profit-participating loan, or if at the time of issuance it was foreseeable that the loan would never be fully repaid.

Provision for bad debt  
It is possible to make a provision for future expenses with a cause existing on the balance sheet of the tax year in question. Therefore, a provision may be made for bad debts.

Charitable donations  
Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

Bribes, kickbacks, and illegal payments  
Expenses that are connected to a criminal offence for which a taxpayer has been convicted are not deductible. Bribes paid to public servants and politicians are not deductible.

Fines and penalties  
Fines and penalties are not deductible in cases where they have been imposed by a criminal court in St. Maarten, or have been paid to avoid prosecution, and in cases of administrative fines imposed by a government agency in St. Maarten.

---

Sint Maarten

www.pwc.com/taxsummaries
**Taxes**
Taxes, other than the corporate tax itself, incurred in the course of doing business are deductible.

**Other significant items**
Deduction of certain expenses (e.g. costs for food, drink, and entertainment) are only allowed in part. These costs are often referred to as mixed costs. The non-deductible portion is 10% of the total of these expenses.

**Net operating losses**
Losses may be carried forward for a period of ten years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.

**Payments to foreign affiliates**
The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

---

**Group taxation**

**Fiscal unity**
The Corporate Tax Act provides for fiscal unity treatment for corporate profit tax purposes. Resident companies with wholly owned resident subsidiaries can qualify for this regime. The parent company is entitled to submit one consolidated income tax return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of St. Maarten, the Netherlands, Aruba, or Curaçao. The companies that invoke this relief must have their place of management in St. Maarten.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime provided that they are resident in St. Maarten.

**Transfer pricing**
There are no specific regulations with regard to transfer pricing. However, based on case law, businesses can be required to show that in case of intra-company transactions, these transactions have been made at arm’s length.

**Thin capitalisation**
In cases where a company receives a loan from an associated exempt private limited liability company (*Besloten Vennootschap* or BV), and the amount of the loan is more than three times the net equity of the company, the interest on the loan is not deductible for the part that is more than three times the net equity.
**Tax credits and incentives**

**Foreign tax credit**
A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the St. Maarten profit tax that is attributable to that foreign income.

**Inward investment and capital investment**
There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.

**Investment allowance**
For a minimum investment of ANG 5,000, an 8% investment allowance on acquisitions and improvements (for new buildings, 12%) is permitted as a deduction from taxable profit in the year of investment and in the subsequent year for businesses operating in St. Maarten.

**Accelerated depreciation and tax rollover reserve**
An accelerated deduction of one-third of the assets’ depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.

**Tax exempt company**
It is possible to elect tax-exempt status for a BV. To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, financials, and the activities (only investment and financing activities) of the company. Recently, the licensing of intellectual and industrial property rights, and other comparable property and usage rights, have been added to the list of allowed activities.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of St. Maarten. A profit tax regime is comparable to that of St. Maarten if the foreign tax regime provides for a profit tax rate of at least 15% (50% of the old Netherlands Antillean rate, excluding island surcharges).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all European Union (EU) and OECD member states and all jurisdictions with which St. Maarten has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

**Independent expert**
Currently, an independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax comparable to that of St. Maarten, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.
Sint Maarten

**Ocean shipping companies**
Ocean shipping companies are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control). International aviation companies may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of St. Maarten. As a result, the overall effective tax rate is 9.66%.

**New industries and hotels**
New industries and hotels are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

**Land development companies**
Land development companies are granted a tax holiday. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1 million is required. Activities should be expected to enhance the economic development of St. Maarten.

**Private foundations**
Private foundations are exempt from St. Maarten profit tax, and their distributions are exempt from St. Maarten gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor’s country may be applicable.

The ‘private’ foundation is a variant of the long-existing ‘common’ foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. Acting as a holding company or investment company is not considered running a business. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

**Withholding taxes**
Although a dividend withholding tax (WHT) was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time in St. Maarten.

**Tax treaties**
St. Maarten currently has tax treaties in effect with the Netherlands, Aruba, Curaçao, and Norway. A double tax agreement (DTA) has been negotiated with Jamaica, but this has not entered into force yet. See the Tax administration section for a description of tax information exchange agreements (TIEAs).

**Tax arrangement for the Kingdom of the Netherlands (TAK)**
As part of the Kingdom of the Netherlands (TAK), St. Maarten is party to a federal tax agreement with the Netherlands, Aruba, and St. Maarten. Subject to this treaty, dividends, interest, and royalties paid out to a St. Maarten company may qualify for reduced rates of WHT in the subject countries.
Dutch dividend WHT is 15% if the St. Maarten company owns less than 25% of the Dutch company. If the St. Maarten company's interest is 25% or more, Dutch WHT can be reduced to 8.3%.

The WHT regime in the TAK also applies to the old St. Maarten offshore companies.

The TAK is to be revised. Negotiations have already started between Aruba and Curaçao each with the Netherlands. In the end, the existing TAK will then be replaced by separate bilateral tax agreements. However, as long as such agreements have not been signed, the old TAK will remain in force.

**Tax administration**

**Taxable period**
Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar year basis or on a different book year. On request, this may also apply, for example, when a resident company is the subsidiary of a foreign parent company (i.e. only a local company must request for a different tax year-end).

**Tax returns**
A provisional return must be filed within three months after the end of the book year. A final return must be filed within six months after the end of the book year.

For the provisional return, no extensions are granted. For the final return, an extension may be requested. In general, no extensions will be granted for more than 12 months after the book year.

**Payment of tax**
Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment. This means that if the book year equals the calendar year, the provisional return is due before 1 April of the following year, and the final return before 1 July of the following year.

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2012 was 100, then at the time of filing the provisional return for 2013, which is due before 1 April 2014, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2013 will be lower than for 2012, the estimated lower amount may be paid at the time of filing the provisional return, upon request.

At the time of filing the final return for the year 2013, which is due before 1 July 2014, the balance due must be paid; or if the total amount is less than the amount already paid up, a repayment will follow.

**Tax audit process**
As the profit tax is levied based on self-assessment, the tax department does not issue a final tax assessment. There is no specific cycle for audits. Depending on a desk review of the tax returns of the last couple of years, an audit may follow.
Sint Maarten

**Statute of limitations**
A reassessment can be imposed until five years after the tax year. In cases where the taxpayer is considered to be in bad faith, a reassessment can be imposed until ten years after the tax year.

**Topics of focus for tax authorities**
There are no specific topics of focus. In case an audit is started, each aspect may be investigated. Often the audit will not only focus on the profit tax, but also the other tax obligations, such as sales tax, wage tax, and social security premiums.

**Tax information exchange agreements (TIEAs)**
TIEAs have been signed with several countries, including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand, and the United States. As a result, St. Maarten, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

**Other issues**

**Exchange controls**
In general, exchange control regulations are very liberal for offshore companies. Offshore companies established in St. Maarten can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a licence fee of 1%.

**Business combinations**
The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.
Significant developments

The tax legislation in the Slovak Republic (Slovakia) has been amended recently. The primary change, effective as of 1 January 2013, is an increase of the corporate income tax (CIT) rate from 19% to 23%.

Note that the legislation is expected to be subject to frequent amendments and new official interpretations; consequently, it is advisable to contact PwC Bratislava for up-to-date information.

Taxes on corporate income

As a member state of the Organisation for Economic Co-operation and Development (OECD), the Slovak Republic's system of corporate taxation generally follows OECD guidelines and principles.

CIT applies to the profits generated by all companies, including branches of foreign companies.

Slovak tax residents are taxed on their worldwide income. Slovak tax residents may utilise a method of elimination of double taxation if their income is taxed abroad. The exemption or credit method can be used to eliminate the double taxation, depending on the relevant double tax treaty (DTT) and the type of income.

Slovak tax non-residents are taxable in Slovakia on their Slovak-source income only. Slovak-source income is defined by local tax law and includes, inter alia, the business income of permanent establishments (PEs) and passive types of income, such as royalties, interest, and income from disposal of assets.

As of 1 January 2013, Slovakia has a flat CIT rate of 23%. Prior to 1 January 2013, the CIT rate was 19%, and some income may still be subject to a 19% withholding tax (WHT) rate.

Local income taxes
Slovakia does not have local, state, or provincial CIT.

Corporate residence

A company is a tax resident in the Slovak Republic if it has its registered seat or effective place of management in the Slovak Republic.
Slovak Republic

**Permanent establishment (PE)**
A foreign company may create a PE if (i) its employees (or persons working for it) are present and providing services in the Slovak Republic on behalf of the foreign company where this activity is carried out through a permanent place of business, (ii) the employees conclude and negotiate agreements on the foreign entity's behalf, or (iii) the foreign entity establishes a building site within the territory of the Slovak Republic.

---

**Other taxes**

**Value-added tax (VAT)**
A basic VAT rate of 20% applies to all taxable supplies, with certain exceptions. Certain medical products and printed materials have a VAT rate of 10%. Exempt supplies without credit entitlement include postal services, financial and insurance services, education, public radio and TV broadcasting services, health and social services, the transfer and leasing of real estate (with exceptions), and lottery services. There are also other VAT-exempt transactions without credit entitlement, as well as exempt taxable supplies with credit entitlement.

VAT grouping is possible if certain conditions are met.

**Customs duties**
Goods imported from non-European Union (EU) countries are subject to import customs clearance. Goods exported from the EU customs territory have to be declared for export customs clearance.

To communicate with the customs offices, each person must have an Economic Operator Registration and Identification Number (EORI), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

The European customs rate, customs nomenclature, and customs tariffs are set by EU legislation.

**Excise taxes**
Excise tax is charged on the release to tax-free circulation or import of tobacco products, wine, spirits, beer, mineral oil, electric energy, coal, and natural gas.

**Immovable property tax**
Immovable property tax, which is divided into land tax, building tax, and tax on apartments, is governed by the Act on Local Taxes. Immovable property tax is calculated based on the area of the real estate, its location, and its type, as well as the tax rate of each self-governing region.

The immovable property tax rate may vary significantly. Please find below the spread of the tax charges per square metre.

<table>
<thead>
<tr>
<th>Tax rates in euros (EUR)</th>
<th>Four floor office building in centre of city of Bratislava</th>
<th>One floor hall rural area</th>
</tr>
</thead>
<tbody>
<tr>
<td>Immovable property tax per square metre</td>
<td>8.30 *</td>
<td>0.73 - 1.012</td>
</tr>
</tbody>
</table>

* For each additional floor, add an additional tax of EUR 0.33.
**Transfer taxes**
There are no transfer taxes in the Slovak Republic.

**Stamp taxes**
There are no stamp duties or similar taxes on share or other property transfers in the Slovak Republic, although small administrative fees are payable to register such transactions.

**Turnover taxes**
There are no turnover taxes in the Slovak Republic.

**Special tax on regulated industries**
There is a special tax from activities of entities in regulated industries (e.g. energy, insurance and re-insurance, public healthcare insurance, electronic communications, pharmaceuticals, postal services, railway transport, public water distribution and sewerage, air transport), which applies for the period from September 2012 to December 2013. The tax is calculated as a multiple of the tax base (accounting result before tax) that exceeds EUR 3 million a year and the tax rate. The monthly tax rate is 0.00363. The annual rate can be up to 4.35%.

**Special tax on banks**
A special tax on banks is charged at a rate of up to 0.4%, up to the amount of EUR 750 million for a given year. The special tax on banks is calculated from the bank's liabilities recognised on the balance sheet net of deductions (e.g. the amount of the bank’s equity, provided that its value is positive), the amount of the subordinated debt under a special regulation, and the amount of funds provided to the branch of a foreign bank.

**Motor vehicle tax**
Vehicle tax applies to vehicles that are registered in the Slovak Republic and used for business purposes. The taxpayer is the entity that uses the vehicle for business purposes. The tax rate depends on engine capacity, vehicle size, and the decision of each self-governing region.

**Payroll taxes**
Taxable remuneration from employment includes all remuneration, whether monetary or non-monetary, including in-kind benefits provided to an employee. Statutory health insurance and social security contributions paid by the employee reduce taxable income. Obligatory employer’s health insurance and social security contributions paid by the employer are not part of the employee's taxable income.

Employers must keep Slovak payroll records for employees and members of their statutory bodies.

The tax base until EUR 34,401.75 should be taxed at 19%. The exceeding part of the tax base should be taxed at 25%.

Income of constitutional authorities from dependent activity will, in addition to the tax calculated as listed above, be subject to a special tax rate of 5%.

**Social security contributions**
Employer’s health insurance and social security contributions total 34.4% of remuneration; however, due to caps on the amounts on which these contributions are levied, the total contribution does not exceed EUR 1,351.91 per month for the period
Slovak Republic

from 1 January 2013 to 31 December 2013. Employers also pay injury insurance contributions of 0.8% of employees’ total salary costs per month, which are not capped.

The rate of health insurance contributions for individuals who receive dividends has been increased from 10% to 14% of the assessment base. Also, a higher maximum annual assessment base for income on dividends of EUR 94,320 has been introduced. The obligation to pay the health insurance contribution is on the payer of the dividend, and the contribution is paid in advance. These advances are payable on the eighth day after the end of the calendar month in which the dividends are paid.

**Branch income**

A foreign company may trade through a Slovak branch, which must be registered in the Slovak Commercial Register. The taxable income of the branch must not be lower than that which an independent entity (e.g. a Slovak company) would achieve from carrying out similar activities under similar conditions. If the branch’s taxable income cannot be assessed based on its income less costs, as adjusted for tax purposes, certain other methods may be used. A taxpayer may ask the tax authorities in writing to approve such a method.

**Income determination**

The tax base is generally the accounting result as determined under Slovak statutory accounting rules, adjusted for tax purposes.

**Inventory valuation**

Stock (i.e. inventory) is valued at cost. Slovak legislation specifically provides for the use of the arithmetical average cost and first in first out (FIFO) methods to value stock. Last in first out (LIFO) may not be used. The tax treatment follows the accounting treatment.

**Capital gains**

Capital gains from the disposal of assets are included in the CIT base. The tax treatment of capital losses depends on the type of asset on which they arose.

**Dividend income**

Dividends paid out of profits earned on or after 1 January 2004, and liquidation surpluses and settlement amounts to which shareholders became entitled on or after 1 January 2004, are not subject to tax. A specific tax regime applies for dividends generated before 1 January 2004 and declared after 31 December 2012 (see the Withholding taxes section). Income from acquiring new shares due to an increase in share capital from retained profits or mergers and demergers within the Slovak Republic or the European Union is also not subject to tax.

**Interest and royalty income**

Slovak-source interest income earned by taxpayers with limited, as well as unlimited, tax liability is subject to withholding at a flat tax rate of 19%, except where the recipient of the deposit interest or the yield is a Slovak investment fund, Slovak supplementary pension fund, Slovak bank or the branch of a foreign bank, or the Slovak Export-Import Bank.

Royalty income is subject to the 19% corporate flat tax rate.
Interest and royalty income is exempt if it is paid by a Slovak payer to a recipient who is a tax resident in the European Union and is a beneficial owner of this income, provided that for 24 months before the payment:

- the payer owns at least 25% direct shareholding of the recipient of the income
- the recipient owns at least 25% direct shareholding of the payer of the income, or
- a third entity resident in European Union owns at least 25% direct shareholding on both the payer and the recipient of the income.

**Unrealised foreign exchange gains/losses**
The taxpayer may decide whether to include unrealised foreign exchange differences relating to unsettled payables and receivables in the tax base in the tax period when they are accounted for or in the tax period when they are realised. However, the decision to include these differences when they are realised must be made in writing to the Tax Office before the start of the tax period. Any subsequent decision to revert back to including these differences must be made before the end of the tax period concerned.

**Foreign income**
Companies resident in the Slovak Republic are taxed on their worldwide income, including income of its foreign branches. A Slovak tax resident entity is able to deduct from its tax base a tax loss made by its taxable PE (e.g. branch) outside the Slovak Republic, adjusted for Slovak tax purposes.

Credit relief is available for foreign tax paid under most of Slovakia's DTTs. Alternatively, exemption of foreign income taxed abroad from taxation in Slovakia may apply.

Slovakia does not have provisions related to deferral.

**Deductions**

**Depreciation and amortisation**
Tax depreciation is calculated on an asset-by-asset basis using a straight-line or reducing-balance method at statutory rates, and is generally available for expenditure incurred on tangible fixed assets. Some types of assets are excluded from depreciation (i.e. land, artwork, and national monuments).

Tangible fixed assets are classified into tax depreciation groups to which different depreciation periods apply, as follows:

<table>
<thead>
<tr>
<th>Depreciation group</th>
<th>Assets</th>
<th>Depreciation (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Motor vehicles, office machines and computers, and tools and implements</td>
<td>4</td>
</tr>
<tr>
<td>2</td>
<td>Engines, most production line equipment, furniture</td>
<td>6</td>
</tr>
<tr>
<td>3</td>
<td>Buildings made of metal, turbines, air-conditioning systems, and ships</td>
<td>12</td>
</tr>
<tr>
<td>4</td>
<td>Buildings of a permanent nature</td>
<td>20</td>
</tr>
</tbody>
</table>

Taxpayers do not have to depreciate an asset every year. Tax depreciation may be interrupted in any year and continued in a later year without a loss of the total tax depreciation available.
Slovak Republic

A lessee can depreciate a tangible fixed asset held under a financial lease. For tax purposes, the depreciation period equals the leasing period, and the tax depreciation base equals the acquisition value of the leased asset without VAT and financing costs plus expenses related to acquisition of the leased asset that the lessee incurred before the asset was put into use.

The value to be used as the basis for tax depreciation depends on how the asset is acquired and is usually based on one of the following:

- Acquisition costs (i.e. the price for which the asset was acquired).
- The taxpayer’s own costs incurred, if the asset is acquired or produced internally.

Intangibles are amortised for tax purposes in line with their accounting amortisation (i.e. over the useful life of the intangible asset).

**Goodwill**
Amortisation of purchase goodwill, including the goodwill on purchase of a business as a going concern, if it represents an identifiable intangible asset, is tax deductible.

For goodwill created at the contribution of business as a going concern or goodwill created at a merger, the tax deductibility of the goodwill depends on the method of tax treatment of this reorganisation. If the reorganisation is performed for tax purposes in fair market values, the goodwill created will be tax effective. On the other hand, if the reorganisations are made in original values, the goodwill created is not tax effective.

**Start-up expenses**
Start-up expenses are tax deductible in the period when incurred.

**Interest expenses**
Interest expenses incurred in order to generate taxable income can be treated as tax deductible.

However, since dividends are tax exempt, the costs of interest on loan incurred to acquire the shares should be treated for tax purposes as costs incurred to generate non-taxable income, i.e. as not tax deductible.

**Bad debt provisions**
Provisions for unsecured receivables from loans created by banks, and bad debts of regular commercial companies, are fully tax deductible (subject to certain conditions) once the debt has been overdue for more than 1,080 days (20% of the bad debt is tax deductible when it has been overdue for more than 360 days, and 50% after 720 days), provided certain conditions are met.

**Charitable contributions**
Charitable contributions are treated as gifts, which are not tax deductible.

**Pension expenses**
Contributions to supplementary pension savings made by the Slovak employer on behalf of the employee, up to 6% of the gross salary of the employee participating in these plans, are tax deductible.

**Fines and penalties**
Statutory penalties and fines are not tax deductible. Contractual penalties and late payment interests are generally tax deductible on a cash basis.
Taxes
Road tax, real estate tax, and most of other taxes are tax deductible. Social security contributions paid by an employer with respect to employees are also tax deductible.

Income tax is not tax deductible.

Other non-deductible expenses
Expenses are generally tax deductible if incurred to generate, secure, and maintain the entity’s taxable income. However, certain other costs are specifically not tax deductible. These include entertainment costs, various provisions (e.g. provisions to tangible and intangible assets, certain bad debt provisions), and certain expenses in excess of statutory limits (e.g. employee travel expenses and meal allowances).

Net operating losses
A company or branch may carry forward and utilise a tax loss for a period of up to five years following the year in which the loss arose, and for up to seven years for tax losses reported after 31 December 2009. Each year’s tax loss should be considered separately, and can be utilised over its own five or seven-year period.

Carryback of losses is not available in the Slovak Republic.

Payments to foreign affiliates
Generally, deductions may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm’s length.

Group taxation
There is no concept of group CIT in the Slovak Republic. Each company in a group is taxed individually.

Transfer pricing
Under the transfer pricing rules, prices in transactions between a Slovak company and its foreign-related parties should be at arm’s length, which means the prices should be at rates similar to those that would be charged between unrelated parties for the same or similar transactions under comparable conditions. Although the OECD Transfer Pricing Guidelines were not formally implemented, these are usually followed for determination of arm’s-length prices.

If transactions between the related parties are not made at arm’s length, and this results in a reduction in the Slovak entity’s corporate tax base, then the tax authorities can adjust the corporate tax base to that which it would have been if arm’s-length prices had been used.

Transfer pricing documentation
All Slovak taxpayers must keep sufficient transfer pricing documentation to justify prices charged by or to their foreign related parties. The Slovak Ministry of Finance has issued a guideline setting out detailed requirements for transfer pricing documentation (the Guideline) for entities that are obligated to prepare their financial statements under International Financial Reporting Standards (IFRS).

The EU code of conduct was not formally implemented. However, the Guideline requires maintaining transfer pricing documentation in a form generally in line with the EU standards.
Slovak Republic

Slovak tax inspectors may require transfer pricing documentation during a tax inspection. Without such documentation, transfer pricing adjustments (increased tax base) are much more likely to be imposed. In addition, entities reporting under IFRS may be specifically penalised for not keeping transfer pricing documentation or for non-compliance of their documentation within the Guideline requirements.

**Thin capitalisation**
There are no thin capitalisation rules in the Slovak Republic.

**Controlled foreign companies (CFCs)**
There is no CFC regime in place in the Slovak Republic.

**Treatment of inter-company items**
Dividends are not treated as taxable costs if they are paid out of the profit after tax earned since 2004.

Royalties, commissions, and other payments paid to foreign related parties are tax-deductible, provided they would be taxable if paid to a third party and if the charges are in line with transfer pricing rules.

---

**Tax credits and incentives**

There are several types of investment incentives potentially available, including corporate tax credits, discounts on the price of publicly owned real estate, and financial support for creating jobs or for training employees. All of these are treated as state aid.

Various conditions must be met in order for a company to qualify for state aid. These include a minimum amount of investment in fixed assets, where the amount depends mainly on the type of project and where it is located.

**Investment incentives**
Investment incentives (including tax credits) are potentially available for projects in the following areas:

- Industry.
- Technology centres.
- Shared services centres.
- Tourism.

The granting of a tax relief is subject to approval of the Slovak authorities. If certain conditions are met, a taxpayer may apply tax relief in the five subsequent years following the tax period in which the relief was granted.

**Research and development (R&D) incentives**
R&D incentives currently available under Slovak law include the following:

- Subsidies for R&D projects from the state budget.
- Income tax relief at the amount incurred for R&D.

Types of projects that can be granted investment incentives include:

- Fundamental research projects.
- Experimental development projects.
Slovak Republic

- Applied research projects.
- Feasibility studies.
- Protection of intellectual and industrial property.
- Staffing of R&D functions.

**Foreign tax credit**

Foreign tax credits are available only if allotted under an applicable DTT. If credit is not available under a tax treaty, CIT paid abroad may be deducted as an expense, provided it is imposed on the income included in Slovak taxable income.

**Withholding taxes**

Mainly, the following payments are subject to WHT when made by Slovak companies to foreign parties. However, a DTT may reduce or eliminate the rate:

<table>
<thead>
<tr>
<th>Payments</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fees for services provided in the Slovak Republic</td>
<td>19</td>
</tr>
<tr>
<td>Royalties *</td>
<td>19</td>
</tr>
<tr>
<td>Interest on loans and deposits *</td>
<td>19</td>
</tr>
</tbody>
</table>

* Royalties and interest paid to related EU-resident companies are not subject to WHT if certain conditions are met.

Dividends paid out of profits arising in 2004 and later years are not subject to Slovak WHT.

The dividends generated for the tax periods until 31 December 2003 and paid out after 31 December 2012 are subject to a 15% WHT. These dividends are not subject to WHT if paid to an EU tax resident having at least a 10% direct share in the paying company at the time of the payment.

Based on an amendment to the Income Tax Act, income from any bonds arising to a foreign taxpayer will not be subject to taxation in Slovakia. The income from government and non-government bonds and treasury bills will not be subject to WHT from 1 July 2013, provided that it is not income that arises to taxpayers not established or founded for business purposes, the National Property Fund, and the National Bank of Slovakia. This amendment was adopted in order to increase the attractiveness of issuing domestic bonds on foreign markets and to gain credit for Slovak businesses.

WHT should be paid to the Tax Office no later than 15 days from the end of the calendar month following that in which the payment was made. The withholding obligation lies with the Slovak resident taxpayer. The taxpayer must also notify the tax administrator of the tax withheld and transferred. If the tax is not properly withheld, the unpaid tax becomes the Slovak tax resident’s tax liability, and a penalty may be assessed.

**Double tax treaties (DTTs)**

This table highlights countries with which Slovakia has entered into a DTT.

## Notes

1. The lower rate applies to cultural royalties.
   a. In the case of Romania, the rate of 10% applies to royalties in respect of the use of trademarks, patents, or know-how. The higher rate applies in any other cases.
   b. In the case of Brazil, the rate of 25% applies to royalties for the use of trademarks. The lower rate applies in other cases.

2. The lower rate applies to interest on loans and credits granted by a bank for at least ten years in connection with the sale of industrial equipment; with the study, installation, or furnishing of industrial or scientific units; or with public works.
   a. The zero rate applies to interest on certain commercial debt-claims, loans guaranteed by public entities for export promotion, accounts/loans between banks/public institutions of the two states, and interest paid to another state or political subdivision of a local authority.

3. The lower rate applies if the interest is received by the government/the central bank/other state institutions (see the respective treaty for exact wording).

4. The zero rate applies if the interest is received by the government or the central bank or other state institutions, or if the receivables on which the interest is paid are guaranteed/indirectly financed by the government/governmental institutions (see treaty for exact wording).

5. The rate of 10% applies to royalties for cinematography, TV broadcasting, and radio broadcasting, and to giving up rights related to royalties. The higher rate applies in other cases.

6. This rate also applies to payment for services.

7. WHT is 0% on bank loans.

8. The zero rate applies to copyrights; 1% applies to finance lease of equipment; 5% applies to equipment rental and royalties for software, cinematography, and TV and radio broadcasting; and 10% applies to payments for the use of trademarks and know-how.

9. The rate of 2% applies to state bonds, obligations, and loans insured or guaranteed by the National Bank of Slovakia/Israel, Slovak Society for Insurance of Foreign Credits and Loans, or Israel Society for Insurance of Foreign Trade; 5% applies if interest is received by a financial institution; and 10% applies in all other cases.

10. Slovakia can apply the rate of 5% to royalties for the use of trademarks, patents, or know-how paid from Switzerland to Slovakia, if Switzerland does not apply the 10% rate.

11. The zero-rate applies to interest on loans and credits in connection with the sale of industrial, business, or scientific equipment, or the sale of goods.

12. The zero-rate applies if the interest received is related to loans (monetary or non-monetary) provided to the government of the other contracting state corporation or any other institution with state shareholding or to loans provided to a bank institution under a governmental approval.

13. The zero-rate applies to copyrights.

14. The zero-rate applies to interest received by a resident of one state in respect of indebtedness of the other state government or political subdivision/local authority, or in respect of a loan made/ guaranteed by the other state government in respect of imports/exports.

15. The zero-rate applies if the interest is received by the government, the central bank, or other state institutions, or if the receivables on which the interest is paid are guaranteed/indirectly financed by the government/governmental institutions (see treaty for exact wording).

16. The rate of 5% applies to royalties for the use or the right to use of patent, draft or model, plan, confidential formula or procedure, for information related to industrial or scientific experience and for...
Slovak Republic

the use or the right to use of an industrial, business, or scientific device. The rate of 10% applies to royalties for the use or the right to use of trademark or for information related to business experience. The rate of 15% applies to royalties, other than those stated above.

17. Slovakia is waiting for Egypt to announce approval of the DTT.
18. DTT between Slovakia and Libya is effective as of 21 June 2010.
19. Slovakia and Switzerland signed the Protocol to a DTT on 8 February 2011, which is not ratified yet. Based on this Protocol, the interest rate will be a maximum of 5%. Industrial royalties are subject to 10%, but the potential reduction of the rate is in case the royalties are paid within European Union, and entities are considered to be related companies with direct share exceeding 25% for more than 24 months, which is in accordance with the EU Directive on interest and royalty payments made between associated companies.

Tax administration

Taxable period
The standard fiscal year is a calendar year, but a Slovak entity may opt to change this to a different 12-month period.

Tax returns
A corporate tax return must be filed together with the entity's financial statements within three months following the fiscal year-end. If part of the income to be reported in the tax return is from sources abroad, the taxpayer may extend the filing deadline by up to three months. To extend the filing deadline, the taxpayer must notify the Tax Office before the normal filing deadline. After notification, the deadline is automatically extended. Further extension of up to six months is available upon Tax Office approval.

Payment of tax
The balance of tax due for a fiscal year is payable by the filing deadline.

Advance payments of corporate tax must be paid monthly or quarterly during the current tax period. Instalments are usually based on the last known tax liability of the entity. It is not necessary to pay tax advances if the last tax liability did not exceed EUR 1,659.70.

Tax audit process
Generally, the tax authority selects the taxpayers subject to tax audit based on certain criteria that are not communicated to the public.

The taxpayers that utilise state aid in the form of tax relief are subject to specific tax audit in the year of utilisation of the tax relief.

The tax audit has to be finalised within one year.

Statute of limitations
A tax may not normally be assessed or additionally assessed more than five years (ten years when DTT treaty was applied, including transactions with foreign related parties) after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obligated to pay the tax. If a tax inspection is undertaken within this five-year period, another five-year period commences from the end of the year in which the taxpayer was notified of this action.

If a taxpayer utilises a tax loss, a tax or additional tax cannot be assessed more than seven years after the end of the year in which the obligation to file a tax return in which a taxpayer reported the tax loss arose.
However, tax may be assessed, or additionally assessed, no later than ten years after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obligated to pay the tax.

**Topics of focus for tax authorities**
The tax authorities, within a tax inspection, generally focus on transfer pricing, VAT, limited tax deductibility of special types of costs (e.g. entertainment, promotion costs), and tax incentives.

**Other issues**

**Reserve fund**
When a joint-stock company is incorporated, it must create a reserve fund of at least 10% of its share capital. The statutory reserve fund must be increased annually by an amount set out in the company's Articles of Association, but not less than 10% of its net profit, up to a total of 20% of the share capital.

A limited liability company must create a reserve fund following the first year in which it reports a profit, at the latest. The minimum contribution is then 5% of the net profit each year (or more if specified in the company's Articles of Association) up to a total of at least 10% of the company’s share capital.

A branch of a foreign company is not required to set up a reserve fund.

A reserve fund may be used to cover prior year losses of the company, and in certain other limited situations, but it is not distributable.

**Business combinations**
Two alternative tax treatments may be used for business combinations, including in-kind contributions to a company's share capital, mergers, and demergers.

Under the first alternative, the taxpayer should value assets for tax purposes using their current market values, and the revaluation difference must be reflected in the appropriate company's tax returns within seven years of the transaction.

Under the second alternative, the taxpayer should continue to use the original tax book values of the assets, and revaluation difference is not taxable/tax deductible.

When selling a business, the purchaser must include goodwill or negative goodwill, acquired as part of the purchase, in its tax base within seven tax periods.

**Adoption of International Financial Reporting Standards (IFRS)**
Slovakia has adopted most of the principles of IFRS in its accounting law. However, there are still some differences between IFRS and Slovak accounting standards.

**Obligation to prepare statutory financial statements according to IFRS**
Financial institutions (banks, insurance companies, etc.) must prepare their statutory financial statements according to IFRS. In addition, a company that fulfils two or more of the following conditions, in two consecutive accounting periods, must prepare its statutory financial statements according to IFRS:

- The total value of assets is more than EUR 165,969,594.
- Net turnover exceeds EUR 165,969,594.
Slovak Republic

- The average number of employees in the individual accounting period exceeds 2,000.

If the Slovak taxpayer is obligated to prepare its financial statements under IFRS, the tax base is derived from either:

- the profit before tax under IFRS, adjusted for tax purposes using the ‘IFRS Tax Bridge’ issued by the Slovak Ministry of Finance or
- the profit before tax under Slovak statutory accounting standards.
**Significant developments**

**Amendments to corporate taxation**
The Slovene Corporate Income Tax (CIT) Act was amended in June and December 2012. The changes became effective retroactively as of 1 January 2012.

**Progressive reduction of CIT rate to 15%**
The CIT rate was decreased from 18% (i.e. applicable for FY 2012) to 17% in 2013. This rate will be further reduced to 16% in 2014 and to 15% in 2015, at which level it shall remain.

**Increase of investment allowance**
Tax allowance for investments into equipment and intangible assets increased from 30% to 40%, whereas the threshold of 30,000 euros (EUR) per period was abolished.

**Increase of research and development (R&D) allowance**
General tax relief for investments in R&D increased from 40% to 100%, regardless of the regional location of the company.

**Utilisation of tax losses carried forward**
As of 1 January 2013, the use of retained tax losses is limited to a maximum of 50% of the actual tax base. Despite this limitation, tax losses may still be carried forward to subsequent years without a limitation.

**Withholding tax (WHT)**
Prior to 1 January 2013 WHT was calculated, deducted, and paid from the payment for all services, provided they were made to countries with an average CIT rate not exceeding 12.5%, where such a country was also stated on a separate list published by the Ministry of Finance.

As of 1 January 2013, WHT is applicable only for explicitly determined types of services (i.e. consulting, marketing, staffing, administration, information, and legal services). All other conditions remain the same.

**Amendments to value-added tax (VAT)**
Amendments to the Slovene VAT Act have been published and took effect on 1 January 2013. Under the amendments, the threshold for VAT registration was increased to EUR 50,000.

**Changes to double tax treaties (DTTs)**
A DTT with Germany (amendments as to Article 26 of the DTT) came into force in June 2012.
Taxes on corporate income

Slovenian tax residents are liable to pay CIT on their worldwide income. Slovenian tax non-residents are taxed only on income from sources in Slovenia, including income earned through permanent establishments (PEs) in Slovenia.

In 2013, the CIT rate is a flat rate of 17% (in 2012 it was 18%). It will continue to decrease until 2015, reaching 15%.

A special tax regime is granted for certain economic zones where additional tax allowances for investment and employment may be available (see the Tax credits and incentives section).

Non-profit taxpayers and charitable organisations, associations, foundations, etc. are exempt from CIT on their non-profit-making activities.

Investment funds, as well as pension funds, pension insurance companies, and venture capital companies, may be taxed at a rate of 0% if certain conditions are met.

Tonnage tax

A company may request to be subject to tonnage tax instead of CIT if it meets certain conditions (i.e. it operates in maritime transport in international shipping) and notifies the tax authorities in advance.

The tax base for tonnage tax is the sum of the tax bases for each of an entity’s ships that are included in the tonnage tax regime. The tax base for a particular ship is calculated by multiplying the number of ship operating days by the daily tax base shown in the following table:

<table>
<thead>
<tr>
<th>Net tonnage (NT)</th>
<th>EUR/day for 100 net tonnes</th>
</tr>
</thead>
<tbody>
<tr>
<td>For the first 1,000 tonnes</td>
<td>0.90</td>
</tr>
<tr>
<td>For the next 1,001 to 10,000 tonnes</td>
<td>0.67</td>
</tr>
<tr>
<td>For the next 10,001 to 25,000 tonnes</td>
<td>0.40</td>
</tr>
<tr>
<td>Above 25,001 tonnes</td>
<td>0.20</td>
</tr>
</tbody>
</table>

Local income taxes

There are no state or local taxes on income in Slovenia.

Corporate residence

A legal entity is considered to be a Slovenian tax resident if the entity has its statutory (registered) seat or place of effective management located in Slovenia. These conditions, however, do not exclude a society or any association of persons, including an association under civil or foreign law that does not have legal identity, from also being considered to be a Slovene tax resident.

Permanent establishment (PE)

The Slovene definition of a PE is generally in line with the definition set out in the Organisation for Economic Co-operation and Development (OECD) model tax treaty. Thus, it is a place of business in Slovenia in or through which the non-resident’s
activities are conducted in whole or in part. The following, in particular, are considered to constitute a PE:

- An office, branch, factory, workshop, mine, quarry, or other place where natural resources are obtained or exploited.
- A building site; construction, assembly, or installation site; or the supervision thereof, if the duration of the activities concerned exceeds 12 months.

A place of business is not considered a non-resident’s PE if the non-resident:

- only uses the premises in question for storage, display, or delivery of goods belonging to oneself
- only maintains inventories of goods belonging to oneself for the purpose of storage, display, or delivery
- only maintains inventories of goods belonging to oneself for the purpose of processing by third parties
- only maintains the place of business in question for the purpose of purchasing goods or collecting information for oneself
- only maintains the place of business for the purpose of engaging in any other preparatory or auxiliary activity for oneself, or
- only maintains the place of business in question for the purpose of any combination of activities referred to above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

Other taxes

**Value-added tax (VAT)**
A basic VAT rate of 20% applies to all taxable supplies.

A lower VAT rate of 8.5% generally applies to foodstuffs, live animals, seeds, plants, water supplies, medicines, medical equipment, transport of passengers, books, admission fees, royalties for writers and performers, certain works of art, certain residential properties, hotel accommodation, use of sport facilities, burial and cremation services, public hygiene services, minor repairs of bicycles, shoes and clothing, domestic care services, and hairdressing services.

Exempt supplies without credit entitlement include financial and insurance/reinsurance services, rent and lease of immovable goods (with exceptions), tax and court stamps, lottery services, trade of land, health and social services, etc. There are also other VAT-exempt transactions without a credit entitlement as well as exempt taxable supplies with a credit entitlement.

VAT grouping is not possible within Slovenia.

The threshold for VAT registration is EUR 50,000.

**Customs duties**
Goods imported from non-European Union (EU) countries are subject to import customs clearance, and goods being exported from the EU customs territory must be declared for export customs clearance. The person responsible for paying the customs debt is the declarant. The declarant is the person making the customs declaration in its own name or the person in whose name the customs declaration is made. The customs declaration should be made in the prescribed form and manner (in writing
Slovenia

or by another action specified by law). Import or export duties are customs duties and other charges payable on the import or export of goods (import VAT, excise duties, environmental tax, and motor vehicle tax).

For purposes of communication with the customs offices, each person has to be identified by an Economic Operator Registration and Identification (EORI) Number, which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

**Excise tax**

Excise tax is charged on the release into free tax circulation or import of tobacco products, alcohol and alcoholic drinks, fuel and mineral oils, and electricity. The table below is in effect as of 1 January 2013.

<table>
<thead>
<tr>
<th>Product</th>

</table>

**Property tax**

Property tax in Slovenia applies annually to immovable property (i.e. buildings, facilities for rest and recreation, and business facilities) at rates ranging from 0.1% to 1.5% of the (administratively calculated) value of immovable property. The tax base may be reduced if certain conditions are met.

**Real estate tax**

Anti crises tax on immovable property of high value was recently introduced in Slovenia. The tax is calculated on the (administratively calculated) value of immovable property at:

- 0.5% (0.25% for residential property) per year for property of EUR 500,000 up to EUR 2 million, and
- 1% (0.5% for residential property) per year for property over EUR 2 million.

In addition, real estate transfer tax of 2% is charged on real estate transfers and leases, unless VAT has been charged on the transaction.

**Stamp tax**

There is no stamp duty in Slovenia.

**Financial services tax**

Slovenia introduced a new tax on financial services provided by banks and other financial institutions, which has been in effect since 25 December 2012. The tax rate is 6.5% and is applied to the fee of the financial service.
**Environmental tax**
Environmental tax is charged on carbon dioxide (CO2) emissions, waste disposal, lubricating oils and fluids, used tyres, and used motor vehicles.

**Motor vehicle tax**
Motor vehicle tax applies to all vehicles that are registered for the first time in Slovenia. The taxpayer is the entity that imports the vehicle from EU or non-EU countries. The tax rate depends on fuel range, engine power, and emission of CO2 and ranges from 0.5% to 46%.

In addition to the existing motor vehicle tax, the government introduced an additional tax on motor vehicles as of 1 January 2013 that ranges from 0% to 16%, depending on the engine size.

**Water vessel tax**
The existing water vessel tax is imposed on:

- vessels exceeding five metres in length that are entered in vessel registers, with the exception of vessels under construction
- vessels exceeding five metres in length whose owners are residents of the Republic of Slovenia and that comply with the technical conditions required for entry into the vessel registers referred to in the first bullet but have not yet been entered into these registers, and
- vessels exceeding five metres in length whose owners are residents of the Republic of Slovenia and that comply with the technical conditions required for entry into the vessel registers referred to in the first bullet but have not been entered into these registers because they are registered abroad.

In addition to the existing water vessel tax, the government introduced an additional tax on water vessels as of 1 January 2013, depending on the length of the vessel:

<table>
<thead>
<tr>
<th>Class of vessel length (in metres)</th>
<th>General part of tax liability (in EUR)</th>
<th>The liability per metre of length (in EUR)</th>
<th>The liability per kilowatt propulsion power (in EUR)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Above To 5 8</td>
<td>2.00</td>
<td>0.50</td>
<td>0.10</td>
</tr>
<tr>
<td>8 12</td>
<td>10.00</td>
<td>2.00</td>
<td>1.00</td>
</tr>
<tr>
<td>12</td>
<td>20.00</td>
<td>3.50</td>
<td>2.00</td>
</tr>
</tbody>
</table>

The tax liability decreases by 5% per each year of age of the vessel. The tax cannot, however, be lower than 50% of the tax liability of a new vessel.

**Insurance premium tax**
Insurance premium tax is levied on insurance premiums at the rate of 6.5% and paid by insurance companies, unless the insurance lasts for at least ten years.

**Branch income**
If a branch meets the conditions, as set out in the tax legislation and relevant DTT, to be treated as a PE, then it will be liable to pay tax in Slovenia on profits that are attributable to the PE.
The profit that is attributed to a PE is determined broadly in line with OECD principles. Generally, the attributable profit is the profit that would be expected to be earned by the PE if it were an independent taxpayer performing the same or similar activities and/or business.

A branch whose activities do not create a PE is not subject to CIT in Slovenia.

**Income determination**

Taxable profits are assessed in accordance with Slovenian Accounting Standards 2006 or International Financial Reporting Standards (IFRS) and modified for certain revenues and certain expenses, which are partly or wholly tax non-deductible.

**Inventory valuation**

Slovenian law allows the application of all the most commonly used inventory valuation methods, including the first in first out (FIFO), weighted average cost, and floating average prices methods.

**Capital gains**

Under certain circumstances, the gains made by a Slovenian taxpayer on the disposal of an equity shareholding are effectively 47.5% exempt from taxation. Similarly, 50% of a loss arising on the disposal of such a shareholding would not be deductible for CIT. This treatment applies to the disposal of shareholdings of at least 8% that have been held for at least six months and where the taxpayer disposing of the holding employed at least one person during the six-month holding period.

The above treatment is not available for the disposal of a shareholding of a company that is resident in a country that:

- is outside the EU
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

**Dividend income**

Dividends and similar income received by a Slovenian taxpayer are generally 95% exempt from taxation as long as the distributor was subject to Slovenian CIT or to a comparable profits tax. The exceptions to this are where dividends represent untaxed reserves of the distributor or where the distributor is tax resident in a country that:

- is outside the EU
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

**Interest income**

Interest and similar income received by a Slovenian taxpayer is included in the taxable base and can be reduced in the amount of a tax liability paid abroad. Interest between related parties needs to be calculated in accordance with the arm’s-length principle.

**Foreign income**

Foreign income, except dividends, received by a Slovenian entity from foreign sources is included in taxable income for CIT purposes in the same tax year as it arises unless the applicable DTT provides for an exemption.
Deductions
In general, business expenses that are necessary to generate taxable revenues are fully tax deductible.

Depreciation and amortisation
Depreciation of tangible fixed assets, amortisation of intangible assets, and depreciation of investment property are recognised as expenditures in line with the accounting treatment, up to a maximum of the amount calculated using the straight-line depreciation method and the maximum tax depreciation rates listed below. Any accounting depreciation in excess of these rates is not tax deductible in the period concerned, but may be deductible in subsequent tax periods until the asset is fully depreciated or disposed of.

The maximum annual depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Depreciation category</th>
<th>Types of assets</th>
<th>Annual depreciation rate (%)</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

Goodwill
In general, if goodwill is impaired for accounting purposes, then the impairment cost may be treated as tax deductible. The amount that may be treated as tax deductible in any one tax period is limited to 20% of the initial value of the goodwill.

Start-up expenses
In accordance with Slovene legislation, costs that occur prior to the entry of a legal entity into court register may not be treated as tax deductible. Such a principle arises from a common legal principle whereby an entity may be subject to rights and obligations only after its establishment date. The date of entry into the court register is deemed to be the date of the establishment.

Related-party interest
Companies may deduct interest expense on loans from their owners or other associated parties up to a maximum of the amount calculated by using the prescribed interest rate published by the Ministry of Finance. Taxpayers must increase taxable profits by the amount of any excess interest expense, unless they can prove that they could have received the loan on comparable terms from an unrelated party.

Provisions
Certain provisions are only 50% tax deductible when accrued, with the remaining 50% being treated as tax deductible when the provision is utilised. The provisions that are subject to this treatment are provisions for warranties granted when selling products or providing services, reorganisations/redundancies, anticipated losses from onerous contracts, pensions, long-service bonuses, and severance payments on retirement.
Bad debt
Bad debt provisions are only tax deductible if the amount does not exceed the lower of:

• the arithmetic mean of the bad debts written-off in the past three tax periods, under certain conditions specified in the tax law, and
• the amount corresponding to 1% of taxable revenues of the tax period.

In order to take advantage of this deduction, a company must be able to calculate amounts for both tests and then take the lower of the two amounts so calculated. If the company is not able to determine the amount for either, the cost of the bad debt provision is not tax deductible until the provision is utilised.

Costs of bad debts are tax deductible when the debt is finally written-off, provided there is a finalised court procedure, the creditor can demonstrate that it would cost more to pursue the debtor than the debt is worth, or the creditor can demonstrate that it has done everything required by good business practice to try to recover the debt.

Charitable contributions
A taxpayer may claim a reduction of its taxable profits for donations made for humanitarian, disabled, charitable, scientific, educational, medical, sports, cultural, ecological, and religious purposes to residents of Slovenia or of EU or European Economic Area (EEA) member states, up to 0.3% of the taxable person's taxable revenues. An additional allowance of 0.2% of the taxpayers' taxable revenues is available for payments made for cultural purposes and to voluntary organisations that work for the public interest to protect the public from natural and other disasters.

A taxpayer may decrease its taxable base for payments made to political parties and representative trade unions, up to an amount equal to three times the average monthly salary per employee of the taxpayer.

Compensation
Salaries and other payments relating to employment (e.g. wage compensation, holiday allowances, employer’s social security contributions, long-service awards, severance benefits paid upon retirement, solidarity assistance, and reimbursement of business related expenses) are generally fully tax deductible.

The costs of benefits in kind are also tax deductible if such benefits are taxed for the individual under the Personal Income Tax Act.

Pension allowances
Under certain conditions, a tax-deductible allowance for voluntary supplementary pension insurance may apply, of up to 24% of compulsory contributions for pension and disability insurance for insured employees, but may not exceed EUR 2,819.09 annually per employee.

Fines and penalties
Costs relating to compulsory collection of taxes and other levies are, in accordance with Slovene legislation, not tax deductible.

Taxes
Taxes paid by a shareholder as a natural person and VAT that was not deducted as an input VAT, even though there was a right to deduct, are not tax deductible. In addition, interests on late payment of taxes are not tax deductible.
Other significant items
The following expenses are considered unnecessary for the generation of taxable revenues and are not deductible for tax purposes:

- Expenses that are not directly necessary for performing business activities or are not incurred as a consequence of a business activity.
- Expenses of a private character.
- Expenses that do not correspond to standard business practice.

Some of the most common non-deductible expenses include:

- Penalties and the cost of bribes.
- Input VAT that could have been reclaimed in accordance with the VAT Act.
- Entertainment costs, which are only 50% tax deductible.
- Costs relating to the supervisory board, which are only 50% tax deductible.
- Legal and other costs of incorporation, which may be deductible for the parent company but not for the entity being incorporated.

Net operating losses
As of 1 January 2013, the use of retained tax losses is limited to a maximum of 50% of the actual tax base. Despite this limitation, tax losses may still be carried forward to subsequent years without a limitation, but loss carrybacks are not permitted. Loss relief may not exceed the amount of current taxable income. Generally, losses that are generated in multiple tax years are absorbed chronologically. The right to carry losses forward may be forfeited if the ownership of the capital or voting power of the taxpayer claiming the loss carryforward changes by more than 50% within the tax period and the taxpayer either has not performed business activities for two years prior to the change of ownership or substantially changes its business activity two years prior to or after the change in ownership.

Treatment of tax losses mentioned in the preceding paragraph does not apply for those losses that are generated in the year of the change of ownership or prior tax periods.

Payment to foreign affiliates
Payments to foreign affiliates are normally subject to WHT if there is no right to apply exemptions in accordance with Slovenian legislation or DTT. Payments similar to dividends, including disguised distribution of profit, are not tax deductible. Any other payments to foreign affiliates are tax deductible if they are made in accordance with the arm’s-length principle.

Group taxation
Group tax returns were abolished with the introduction of the CIT Act on 1 January 2007.

Transfer pricing
Prices between a Slovenian entity and its related parties must be set, for tax purposes, at fair market value using the arm’s-length principle. Broadly speaking, taxpayers are related by direct, indirect, or common shareholdings of over 25%; through a participation in management; or by control through other means, including through contractual terms.
For transactions between two related Slovenian tax residents, provided neither is in an ‘advantaged’ position (advantaged usually means having unutilised tax losses), there is no actual requirement for the companies to adjust their tax returns to reflect an arm’s-length price.

Taxable persons must prepare transfer pricing documentation. The Slovenian rules regarding such documentation follow the EU Code of Conduct on transfer pricing documentation for associated enterprises in the EU (EU TPD).

**Thin capitalisation**
Interest payments on loans granted, or guaranteed, by a related party (a party that directly or indirectly owns at least 25% of the shares or voting rights in the taxpayer) are not tax deductible to the extent that the loan amount exceeds the thin capitalisation threshold specified in law. This does not apply to loan recipients who are banks or insurance companies.

Generally speaking, the thin capitalisation threshold is exceeded if the debt-to-equity ratio exceeds 4:1.

**Tax credits and incentives**

**Foreign tax credit**
Tax paid abroad can be credited against tax liability in Slovenia. The amount of tax that can be credited is the amount of final and actually paid tax. If there is DTT made between countries in question, the amount of tax that can be credited is the amount calculated at the rate determined in the DTT. A taxpayer needs to provide proof of the amount of foreign tax, the basis for calculation of the tax, and the amount of the tax paid.

**Investment allowances**
A tax allowance for investment in equipment and intangible assets is available for investments made after 1 January 2008. The tax allowance is limited to 40% of the value of the assets acquired.

**Research and development (R&D) allowances**
A 100% investment allowance is granted for investments in R&D within the tax period, regardless of the location of establishment of the company within Slovenia. Such an investment tax allowance may be obtained for expenditures on:

- internal R&D activities within the company and
- the purchase of R&D equipment from related or unrelated parties or from a private research institution.

**Allowances for employing certain individuals**
A taxpayer that employs trainees or students to undertake practical work may reduce its taxable profits by an additional 20% of the average monthly payment paid to such persons, for every month the person carries out the work.

A taxpayer that employs disabled persons may decrease its taxable profits by an additional 50% of the salary paid to such persons (in addition to the deduction for their actual salary cost). A taxpayer that employs a severely disabled person or a person with a combination of total hearing loss and speech impairment may reduce its taxable base
Slovenia

by an additional 70% of the salary paid to such a person (in addition to the deduction for their actual salary cost).

**Tax relief for investments in the Pomurje region**

Entities based in the Pomurje region of Slovenia may claim additional employment incentives and additional tax relief for investments. These extra benefits are available from 2010 to 2015. As a result, provided certain conditions are met, entities with their seat in Pomurje are entitled to a 70% tax allowance for investments in equipment and intangible assets as well as to certain employment allowances.

**Tax relief for employment of hard-to-place workers**

A taxpayer who employs a hard-to-place worker may be able to benefit from a tax allowance for both CIT and tax on activity. A hard-to-place worker is a person younger than 26 or older than 55 who has been registered as unemployed for at least six months and who has not been employed by the taxpayer or a related party in the past 24 months. The tax allowance equates to 45% of the salary paid to the person during the first 24 months of their employment, up to the amount of the tax base.

**Withholding taxes**

In Slovenia, tax must be calculated and withheld on the payments made by residents and non-residents on Slovenian-sourced income to recipients outside Slovenia.

Payments to which the WHT rules apply include payments for dividends, interest, copyrights, patents, licences, leases on real estate situated in Slovenia, services of performing artists, and services charged from low-tax jurisdictions.

The WHT rate is 15%.

If a DTT exists, the WHT rate may be reduced in line with the provisions of the treaty. Similarly for payments of interest, royalties, and dividends within Europe, the Interest and Royalties Directive and the Parent Subsidiary Directive, respectively, may also reduce this WHT rate to zero.

Furthermore, WHT is not deducted on dividends paid to a parent company in another EU member state if those dividends are subject to an exemption from tax in the hands of the recipient, provided certain conditions are met.

Subject to certain conditions, tax is not required to be withheld on interest on non-exchangeable debt securities issued outside Slovenia by a Slovenian tax resident corporation through a public placement on an international clearing system (i.e. Euroclear).

Prior to 1 January 2013, WHT was calculated, deducted, and paid from the payment for all services, provided they were made to countries with an average CIT rate not exceeding 12.5%, where such a country was also stated on a separate list published by the Ministry of Finance.

As of 1 January 2013, WHT is applicable only for explicitly determined types of services (i.e. consulting, marketing, staffing, administration, information, and legal services). All other conditions remain the same.

Egypt | 8/13 | 13 | 15
Kuwait | 5 | 5 | 10

Notes

1. Under certain treaties, the WHT rate depends on whether, and to what extent, the recipient participates in the capital of the distributor. Generally, if the recipient holds a participation of more than 25% in the distributing company, the dividends are subject to a lower 5% WHT rate. The higher WHT rate is, however, normally due when the participation is less than 25%.
2. Some DTTs include specific provisions whereby interest payments are subject to a 0% WHT rate if certain conditions are met.
3. The rates shown apply from 1 January 2011, when the new treaty with Italy came into effect.
4. These treaties have yet to be ratified by both parties.
5. 5% rate if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividend; 10% rate if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which by virtue of the law of the state in which the payer is a resident are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% rate applicable in all other cases.
6. 5% rate applicable to the gross amount of: (i) royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work (but not including cinematograph films) and (ii) royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment, 10% rate applicable in all other cases.
7. 5% rate applicable to royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films or films or tapes used for radio or television broadcasting; 10% rate applicable to royalties for the use of, or the right to use, any patent, trade mark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
8. 10% rate applicable to royalties for the use of, or the right to use, any copyright of literary or artistic work including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment; 15% rate applicable to royalties in all other cases.
9. 5% rate applicable to copyright, as defined by the Copyright and Related Rights Act; 10% rate applicable to other property rights.

---

**Tax administration**

**Taxable period**

The tax period should be the calendar year. However, a tax period may differ from the calendar year but may not exceed a period of 12 months. In this case, the tax authorities must be informed about the chosen tax period, and the taxable entity will not be allowed to change its tax period for the following three years.

**Tax returns**

A tax return must be submitted to the tax authorities by the end of the third month following the end of the tax year.
Slovenia

**Payment of tax**
CIT is paid in advance in monthly instalments (if the amount of prepayment exceeds EUR 400 per month) or in quarterly instalments (if the amount of prepayment is less than EUR 400 per month) determined on the basis of the previous year’s assessment.

The final CIT payment must be made within 30 days of the tax return submission.

**Tax audit process**
Slovene legislation does not define an audit cycle. However, we understand that the Slovene tax administration has its own criteria for how to determine audit targets, which is in accordance with their annual tax plan.

**Statute of limitations**
Under Slovene legislation, a tax inspection may be initiated within five years from the date when a tax return was due for submission to the tax authorities. However, the five year period runs following each interrupting act (generally, certain actions by the Tax Office or the taxpayer within the tax period may be considered as interrupting acts), but may not surpass a maximum of ten years counting from the date when the tax return is due. A concluded tax inspection will foreclose any further tax authorities’ inspection only for the period and the items that were subject of the concluded tax inspection. Any issue not examined remains open for a future tax inspection. The right of the tax authorities to assess and collect tax permanently expires after ten years counted from the date when the tax return is due.

**Topics of focus for tax authorities**
Recently, we have noticed that tax authorities focus on appropriateness of transfer pricing for multinational companies.
Significant developments

After the switch from the source-based taxation to the worldwide taxation of South African (SA) residents in 2000, and the introduction of capital gains tax in 2001, the SA tax system has not undergone fundamental changes. Smaller reforms, however, are ongoing. The most significant recent changes are:

- Withholding tax (WHT) on interest to be introduced at 15% (March 2014).
- WHT on royalties to be increased to 15% (March 2014).
- The proposed introduction of a 15% WHT on cross-border service fees (March 2014).
- The Tax Administration Act came into effect from 1 October 2012, replacing and consolidating the administrative provisions of various tax acts.

Administrative developments

A single registration process and number for multiple taxes will be launched in the future to simplify registration and administration for all businesses. A new corporate tax return and supplementary return was implemented during May 2013.

Taxes on corporate income

An SA-resident company is subject to corporate income tax (CIT) on its worldwide income, irrespective of source. Non-residents are taxable on SA-source income.

In South Africa, the CIT rate applicable for corporate income of both resident and non-resident companies for tax years ending between 1 April 2013 and 31 March 2014 is a flat 28%.

Close corporations, which are essentially a simplified form of company, are taxed at the same rate as companies and are subject to the same taxation rules.

Small business corporations (i.e. companies with only natural persons as members/owners and with gross income of not more than 20 million South African rand [ZAR]) are taxed at 0% on the first ZAR 67,111 of taxable income earned, 7% on the amount above ZAR 67,111 but not exceeding ZAR 365,000, 21% on the amount above ZAR 365,000 but not exceeding ZAR 550,000, and 28% on the amount exceeding ZAR 550,000.

Special CIT rates apply in certain industries, such as mining and insurance (see below).

Alternative turnover-based tax for very small companies

To reduce the compliance costs for very small companies, a turnover-based presumptive tax is available. Companies with a turnover of less than ZAR 1 million per year can elect
to pay this tax instead of normal CIT, at a rate ranging from 0% to 6%, depending on the turnover. This election for the tax year commencing on or after 1 March 2013 must have been made before 28 February 2013.

**Dividends tax**

Dividends tax is imposed at 15% on dividends declared and paid by resident companies and by non-resident companies in respect of shares listed on the Johannesburg Stock Exchange (JSE) paid to SA residents.

Dividends are tax exempt if the beneficial owner of the dividend is an SA resident company, SA retirement fund, or other prescribed exempt person.

The tax is to be withheld by companies paying the taxable dividends or by regulated intermediaries in the case of dividends paid through a regulated intermediary. In the case of *in specie* dividends, the company declaring the *in specie* dividend is liable for the dividends tax and not the beneficial owner of the dividends.

Exemptions from dividends tax and treaty imposed reduced rates only apply if the beneficial owner of the dividend has made the required declaration to the declaring company or regulated intermediary.

The balance of Secondary Tax on Companies (STC) credits as on 31 March 2012 that a resident company had prior to dividends tax remain available to that company to be set-off against dividends declared to reduce the amount subject to dividends tax. All STC credits must, however, be utilised before 31 March 2015, or they will be forfeited.

**CIT for mining companies**

Previously, there were two formulae for determining CIT for gold-mining companies: one for gold-mining companies that were subject to STC and the other for such companies that had elected to be exempt from STC. However, with the implementation of the dividends tax, STC was repealed and all gold mining companies must now use the standard formula to calculate the tax rate from years of assessment ending during the 12-month period before 31 March 2013 and onwards.

The maximum tax rate that applies to companies’ income from oil and gas activities is capped at 28%.

**CIT for long-term insurance companies**

Life insurance companies are obligated to follow the ‘four-funds approach’, with policies divided into four funds, depending on the nature of the beneficiary. Each fund is then allocated assets according to the risk carried by the fund. Funds are treated as separate taxpayers and taxed at four separate rates. These rates are 30% for individual policyholder funds, 0% for untaxed policyholder funds, 28% for company policyholder funds, and 28% for corporate funds (the company itself).

**Local income taxes**

No local government taxes on income apply to either SA-resident or non-resident companies.

**Corporate residence**

A company is resident in South Africa if it is incorporated, established, or formed in South Africa or has its place of effective management in South Africa. However, a
company that is deemed to be exclusively resident in another country by the terms of a double taxation agreement (DTA) is excluded from SA residency. Also excluded as a resident is any company that is incorporated, established, or formed in a country other than South Africa, has its place of effective management in South Africa, is a controlled foreign company (CFC) with a foreign business establishment as a result of being a non-resident, and the foreign taxes payable by the company are at least 75% of the South African CIT that would have been payable had it been a resident.

The place of effective management is, in terms of an Interpretation Note issued by the South African Revenue Service (SARS), interpreted as the place where the strategic decisions of the directors are implemented. However, this approach has not yet been tested by the South African courts. Where international precedent applies a different meaning to the term, it is expected that the South African courts would interpret the term in accordance with international precedent for both domestic law and treaty purposes. SARS has indicated that it intends to amend the Interpretation Note in the near future to align it with internationally accepted principles.

**Permanent establishment (PE)**

South Africa does not, as a general rule, tax non-residents on the basis of having a PE in South Africa. Rather, non-residents are subject to income tax in South Africa on income derived from a South African source. The primary exception to this rule is in relation to capital gains, where non-residents are subject to tax on assets attributable to a PE in South Africa. A PE is defined by reference to the definition thereof in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

---

**Other taxes**

**Value-added tax (VAT)**

VAT is an indirect tax that is largely directed at the domestic consumption of goods and services and at goods imported into South Africa. The tax is designed to be paid mainly by the ultimate consumer or purchaser in South Africa. It is levied at two rates, namely a standard 14% rate and a zero rate (0%).

Very few business transactions carried out in South Africa are not subject to VAT. The tax is collected by businesses that are registered as vendors with the SARS on all taxable supplies throughout the production and distribution chain. Sales or supplies by non-vendors are not subject to VAT.

**VAT registration and administration**

All suppliers of goods and services having an annual turnover currently exceeding ZAR 1 million are obligated to register as VAT vendors and to charge output VAT. Other vendors may elect to register as VAT vendors, provided their annual turnover exceeds ZAR 50,000. If they do not register, they are prohibited from charging VAT on goods or services they supply and claiming an input tax (rebate of VAT paid) on goods and services that they acquire.

Under the VAT system, vendors normally pay VAT on expenses (input tax) and charge VAT on supplies made (output tax). This mechanism, therefore, ensures that only the so-called 'added-value' is taxed. Due to VAT being a self-assessment system, the output tax collected may be reduced by input tax paid. Thereafter, the net amount is payable to, or refundable by, the SARS. The self-assessment returns are due regularly within prescribed periods (tax periods).
**South Africa**

**Taxable supplies**
Standard rated and zero-rated supplies are known as taxable supplies. Other supplies are known as exempt and non-supplies.

**Goods and services**
For a liability for VAT to exist, there must be a supply or importation of goods or services. Goods are corporeal movable things, fixed property, and real rights in such things and property. The meaning of 'services' is very broad and includes the granting, assignment, cession, or surrender of any right or the making available of any facility or advantage.

**Imports**
Services imported by a vendor and utilised or consumed by the vendor for the making of taxable supplies are not subject to VAT. In addition, the VAT Act has a schedule that lists goods that are exempt from VAT on importation, whether by a vendor or an unregistered person.

**Zero-rated supplies**
The VAT Act contains a list of the supplies of goods or services that are taxed at the zero rate. Most of the items refer to exports and international transport, but other specified goods utilised for farming purposes, the sale of an enterprise as a going concern, fuel subject to the fuel levy, and deemed supplies by welfare organisations are also zero-rated.

A zero-rated supply made by a vendor is subject to VAT but at a rate of 0%. Under a zero-rated supply, a vendor does not charge VAT on the consideration for the supply and obtains a refund or credit for the VAT paid on taxable supplies utilised in the making of the zero-rated supplies.

**Exempt supplies**
In addition to zero-rated supplies, the VAT Act contains a list of the supplies of goods or services that are exempt from VAT. While all fee-based financial services are subject to VAT, the charging of interest is exempt. Other exempt supplies include residential rentals, basic foodstuffs, non-international passenger transport by road or rail, and educational services.

Under exempt supplies by vendors, the vendors do not charge VAT on the supply, and they are not entitled to a deduction or credit for the VAT paid by them on goods and services supplied to them for the making of the exempt supply. Accordingly, vendors treat the VAT paid by them, and for which they do not obtain a deduction or credit, as another cost and recover it in the consideration they charge for the making of the exempt supply.

**Customs duties**
Customs duties are charged on importation of goods into South Africa at rates ranging between 3% and 20%, except for clothing and apparel, which may have rates as high as 45%. The import duties may also include anti-dumping and countervailing duties of up to 150%. No customs duties are charged on trade between South Africa and Botswana, Lesotho, Namibia, and Swaziland, as these five countries constitute a Southern African Customs Union.

**Excise duties**
Excise duty is levied on certain locally manufactured goods as well as their imported equivalents. A specific duty at a pre-determined amount is levied on tobacco (52%
including excise and VAT) and liquor (23% to 43%), and an ad valorem duty (calculated as a percentage of price) on monitors (7%), cosmetics, televisions, audio equipment, and luxury automobiles (marginal rate of 25%). Relief from excise duty is available for exported products and for certain products produced in the course of specified farming, forestry, and (limited) manufacturing activities.

**Property taxes**
Local municipalities levy rates on land. These rates are based on a percentage of the municipal valuation of land and improvements and vary from municipality to municipality. Generally, a higher rate is levied on properties zoned for business use.

**Transfer duty**
Transfer duty levied on the sale of immovable property is payable by the person acquiring the property within six months from the date of acquisition at the following rates:

<table>
<thead>
<tr>
<th>Purchase price (ZAR)</th>
<th>Transfer duty rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not exceeding 600,000</td>
<td>0</td>
</tr>
<tr>
<td>600,000 to 1 million</td>
<td>3</td>
</tr>
<tr>
<td>1 million to 1.5 million</td>
<td>5</td>
</tr>
<tr>
<td>Exceeding 1.5 million</td>
<td>8</td>
</tr>
</tbody>
</table>

Transfers of immovable property subject to VAT are exempt from transfer duty.

**Securities transfer tax (STT)**
STT is levied at a rate of 0.25% of the taxable amount in respect of the transfer of a security. The taxable amount is usually the consideration for which the security is purchased or the market value of the security, if the consideration declared is less than the market value or if no consideration was paid. STT is payable by the company that issued the securities in question. However, the company can recover the tax from the person acquiring the shares. Slightly different rules apply in the case of listed securities.

**Skills Development Levy (SDL)**
SDL is a compulsory levy to fund the education and training as envisaged by the Skills Development Act. It is payable by an employer and cannot be deducted from the remuneration payable to an employee. Small employers with an annual payroll of less than ZAR 500,000 are exempt from the levy. SDL is levied at the rate of 1% of payroll. It is payable monthly, together with income tax that the employer has withheld on its employees’ salaries.

**Unemployment Insurance Fund (UIF) contributions**
Employers are required to contribute on behalf of their employees on a personalised basis to the UIF. The rate of contributions is 1% of gross remuneration payable to an employee; however, the monthly cap of ZAR 148.72 applies. Another 1%, subject to the same cap, is payable by the employee and withheld by the employer.

**Compensation for Occupational Injuries and Diseases Act (COIDA) fund**
Employers are liable for making annual contributions to the COIDA fund. COIDA contributions are a payroll cost that cannot be deducted from the employee’s salary, with a maximum salary cap of ZAR 292,032 per annum applying from 1 April 2012. The rates vary depending on the employer’s industry (e.g. a rate of 1.62% is applied to the
salaries of employees involved in the manufacture of pottery up to a maximum salary band of ZAR 292,032 per annum).

**Donations tax**
Disposals of assets below their market value are a deemed donation and, at least theoretically, subject to donations tax. Donations tax is payable by resident companies at a flat rate of 20% on donations made. An annual exemption of ZAR 10,000 is available.

Public companies, comprised of mostly listed companies, are exempt from donations tax. An exemption is also available for donations made to certain charities and other non-profit organisations.

**Vehicle emissions tax**
An environmental levy is levied on new motor vehicles based on gram per kilometre of CO2 emissions of the vehicle over a stated level. The levy is currently ZAR 90 to ZAR 125 per gram per kilometre over the CO2 threshold level.

**Fuel levy**
A fuel levy is included in the price of petroleum fuel sold. The general fuel levy for 2013/14 is 212.5 cents per litre of petrol and 197.5 cents per litre of diesel. A refund of the diesel fuel levy may be claimed in certain industries, such as agriculture, fishing, and mining.

**Electricity levy**
To support energy efficiency, the government has implemented a levy on electricity generated from non-renewable sources at 3.5 cents/kWh (2.5 cents/kWh prior to 1 July 2012). The levy is paid at source by the electricity producer and recovered in the price to the consumer.

**Air passenger tax**
Passengers departing on international flights must pay air passenger tax at the rate of ZAR 100 on flights to Botswana, Lesotho, Namibia, and Swaziland, and ZAR 190 on other flights. The tax is added to the price of the ticket.

**Branch income**
SA branches of foreign companies are not considered to be separate legal entities for tax purposes, and no tax is withheld on transfers of profits to the head office. Branches of foreign companies are taxed at a rate of 28% and are not liable for dividends tax or any branch profits repatriation tax.

Note that a branch must register as a taxpayer and submit tax returns. Separate financial statements must be drawn up for the SA-trading operations. For all practical purposes, the SARS will treat the branch as a separate entity. For example, inter-branch cost recoveries levied by the head office incurred in the production of SA income normally will be allowed as a deduction by the branch, although this treatment is not extended to interest on inter-branch loans.

In terms of DTAs, the taxation of branches is limited to cases where the branch constitutes a PE.
Income determination

Inventory valuation
Inventories generally are stated at the lower of cost or net realisable value. Write-downs of inventory for slow-moving and obsolete items must be justified, and a general policy on a percentage basis is not permitted. Last in first out (LIFO) is not accepted for tax purposes.

Capital gains
Although the capital gains tax forms part of income tax, the two taxes are not fully integrated. Gains realised by companies are taxed at the normal CIT rate; however, only 66.6% of gains are included in taxable income.

Dividend income
Dividends are generally taxed in the hands of the beneficial owner at a rate of 15%. The amount is withheld by the company declaring the dividend on behalf of the shareholder receiving it. In specie dividends are subject to tax in the hands of the company and not the beneficial owner.

Foreign dividends received by or accrued to an SA-resident taxpayer are included in income based on a formula and taxed at the normal CIT rate, which results in an effective tax rate of 15%. Qualifying foreign dividends are also generally not subject to tax where they are received by resident shareholders holding in excess of 10% of the equity shares and voting rights of the company declaring the dividend. Dividends received by residents holding less than 10% of such shares will generally be taxable in South Africa, subject to a tax credit for foreign taxes payable by the recipient shareholder.

Stock dividends
Stock dividends (capitalisation issues of shares) are not subject to CIT or dividends tax.

Interest income
Interest income for resident companies is taxed at the normal CIT rate. Interest received by non-resident companies is only subject to CIT if it is from a source in South Africa and the company carried on business through a PE in South Africa during the tax year.

As of 1 March 2014, a 15% WHT on interest will apply to interest paid on certain debt instruments to non-resident companies.

Foreign income
Foreign income of an SA-resident company is subject to tax in South Africa on an earliest of receipt or accrual basis. However, income that may not be remitted to South Africa in terms of the laws of the country where the amount arose is deferred until the income can be remitted. Double taxation may be avoided under certain DTAs or by way of unilateral credit or deduction for foreign tax payable on foreign income (see Foreign tax credit in the Tax credits and incentives section).

Deductions

Depreciation and depletion
A depreciation (wear and tear) allowance may be deducted on movable assets used for the purpose of trade. There are no statutory provisions relating to rates of wear and tear, but the SARS has published a table of periods over which the assets may be written
off. The rates of wear and tear, based on the cash cost, are calculated either according to the straight-line or diminishing-balance method.

New and unused machinery used in the process of manufacture or in a similar process is depreciable at the rate of 40% in the first year of use and 20% in the three following years. If the machinery is not new and unused, an allowance of 20% per year over five years is available.

An accelerated depreciation allowance (50% in the first year of use, 30% in the second, and 20% in the third year) applies to the machinery and articles used in farming, production of biodiesel or bio-ethanol, and production of energy from certain renewable sources.

Specific allowances are also provided for pipelines, transmission lines, railway lines, airport property, ships, mining operations, and other qualifying industrial assets.

Buildings and other permanent structures may not be depreciated, apart from an annual allowance for each of the following:

- Buildings used in a process of manufacture or a process similar to a process of manufacture: For buildings erected before 1 January 1989, a 2% rate applies per year. For buildings erected after 1 January 1989, a 5% rate applies.
- Hotel buildings: For buildings built prior to 4 June 1988, a 2% rate applies per year. For hotel buildings erected after 4 June 1988, a 5% rate applies. Improvements within the existing building framework that commenced on or after 17 March 1993 are depreciated at the rate of 20%.
- Agricultural cooperative storage buildings: For buildings built prior to 1 January 1989, a 2% rate applies per year. For buildings erected on or after 1 January 1989, a 5% rate applies.
- Housing projects of not less than five units: Housing projects of not less than five units of residential accommodation, which consist of more than one room and the erection of which commenced on or after 1 April 1982 and before 21 October 2008, are subject to a 2% rate of depreciation. After 21 October 2008, an allowance of 5% is available on this type of property. The 5% depreciation rate is available to the taxpayer provided that the unit is used by the taxpayer solely for trade purposes, the unit is situated in South Africa, and the taxpayer owns at least five units in South Africa used for the purposes of trade. An additional allowance is available for a low-cost residential unit. Additionally, from 21 October 2008, taxpayers are granted relief for the transfer of ownership on a contract for deed basis of employer provided low-cost residential units to employees.
- Buildings in urban development zones: Improvements to an existing building in an urban development zone, where the existing structural or exterior framework is preserved and brought into before 31 March 2014, qualify for an accelerated allowance of 20% per year. Buildings that are erected, extended, or added to in an urban development zone on or after 21 October 2008 and which are not covered by the first mentioned allowance qualify for a 20% allowance in the first year and an 8% allowance in the following ten years. As of 21 October 2008, new and unused low-income residential units located in urban development zone demarcations are subject to an additional annual depreciation allowance. The rate is 25% in the first year, 13% in the succeeding five years, and 10% in the year following the last year. Improvements are subject to a depreciation allowance of 25% over a period of four years.
• Commercial buildings: The cost to the taxpayer of any new and unused building owned by the taxpayer, or any new and unused improvement to any building owned by the taxpayer, if that building or improvement wholly or mainly is used by the taxpayer for trade purposes, other than the provision of residential accommodation, is subject to a 5% rate of depreciation. This allowance is applicable to any building or improvement contracted for on or after 1 April 2007 and the construction of which commenced on or after 1 April 2007.

An allowance for assets disposed of or scrapped during a year of assessment is determined by reference to the cost less allowances already granted and the proceeds on disposal (if any). Recoupments of allowances granted are taxable where disposal proceeds exceed the tax basis at the time of sale. Such recoupments cannot exceed the cost of the asset. Proceeds above cost will be taxed as a capital gain.

Book depreciation does not need to be consistent with tax depreciation.

No cost or percentage depletion is available for natural resources.

**Goodwill**
The sale and purchase of goodwill is generally a transaction on capital account, and the person paying for the goodwill will usually be unable to claim a deduction. No capital allowances are available for goodwill.

**Start-up expenses**
Special relief is provided for start-up (or pre-trade) expenditure to allow for a deduction in the year that trade commences. The expenses are only deductible if they would have been deductible had they been incurred after the commencement of trade. These expenses and any loss they create are ring-fenced and may only be deducted against income from the trade to which the start-up costs relate.

**Interest expenses**
Generally, interest expenditure incurred in the production of non-exempt income and for the purposes of trade is deductible. However, interest that is incurred to produce income that is exempt from tax will not be allowed as a tax deduction. A special dispensation applies to the deduction of interest on debt used to acquire shares in a company, provided certain requirements are met.

Special rules apply to determine the amount of interest and timing of any deductions taking into account all payments and receipts in respect of debt instruments with interest being determined on the basis of an internal rate of return.

Certain debt instruments that are convertible to shares or may be settled in shares are treated as hybrid debt instruments and no interest deduction is allowed in respect thereof. It is proposed that these hybrid debt rules are to be significantly expanded from 1 January 2014. In addition, it is proposed to introduce rules that will limit the interest deduction for interest paid between related parties where such interest is not taxed. Further interest deduction limitations are also proposed to apply to interest paid on debt used to fund acquisitions of shares or businesses under certain of the corporate rollover relief provisions (see the Group taxation section).

The deduction of cross-border interest paid to connected persons is subject to limitation under transfer pricing rules (see Transfer pricing and thin capitalisation in the Group taxation section).
**Bad debt**
Bad debts are tax deductible if the debt relates to an amount that has been included in the taxpayer's taxable income in any tax year if it is due at the end of the year of assessment. A tax allowance is also provided for in respect of specifically identified doubtful debts.

Any bad debts arising on loaned money is deductible if it was lent in the course of a money-lending business.

**Charitable contributions**
Donations to certain charitable organisations approved as public benefit organisations are tax deductible, up to a maximum of 10% of taxable income.

**Cost of inventory**
The cost of inventory is, in principle, deductible as soon as the inventory is acquired. However, at the end of each year, the cost of the inventory still on hand has to be added to the company's income. Then in the next year, it can be deducted again. This has the effect of timing the deduction of the cost of inventory to match the time of its realisation.

**Assets acquired for shares issued**
When assets are acquired by a company in return for shares issued to the seller, the purchaser of the assets is deemed to have incurred expenditure equal to the market value of the shares immediately after acquisition. Special rules apply in the case of cross-issues of shares or where there is a mismatch in the value of the shares and assets.

**Fines and penalties**
Any fine or penalty imposed in respect of an unlawful activity carried out in South Africa, or in any other country where it would be unlawful in South Africa, is not deductible for tax purposes.

**Taxes**
Most taxes (other than income taxes, donations tax, and dividends tax) are deductible from taxable income for the corporation, provided they qualify for deduction under general rules.

**Net operating losses**
Losses may be carried forward indefinitely, provided an active trade or business of a similar nature is carried on without interruption. There is no loss carryback in South Africa.

**Payments to foreign affiliates**
Deductions may be claimed for royalties, managerial service fees, and interest charges paid to foreign affiliates, provided such amounts approximate those that would be paid to an unrelated party in an arm's-length transaction.

Interest deductions may be limited in certain circumstances (see Interest expenses above and Transfer pricing and thin capitalisation in the Group taxation section).
**Group taxation**

Group taxation is generally not permitted in South Africa. However, relief is given for transactions between group companies to allow for reorganisations, provided certain requirements are met.

In general, the relief will only apply to transactions between companies within the same group. A group of companies is defined as a controlling company and one or more controlled companies in relation to that controlling company. A controlling company means a company holding, directly or indirectly, at least 70% of the equity shares of any other company. Foreign-incorporated companies do not form part of a group of companies for the purposes of this relief unless effectively managed in South Africa, although relief is extended to CFCs in certain circumstances.

Corporate rollover relief is available for asset-for-share transactions, amalgamation transactions, intra-group transactions, unbundling transactions, and transactions relating to liquidation, winding-up, and deregistration.

The relief may cover the capital gains tax arising from the disposal of capital assets, income tax arising from the disposal of a depreciable asset, income tax arising from the disposal of trading stock, donations tax arising from the disposal of an asset, dividends tax, VAT, securities transfer tax, and transfer duty.

Companies that finance intra-group transactions and liquidation transactions with debt have to apply for approval to be able to claim the interest on the debt as a tax deduction. This requirement will fall away when new rules for hybrid debt instruments and excessive debt are introduced (see Interest expenses in the Deductions section).

**Transfer pricing and thin capitalisation**

The transfer pricing and thin capitalisation rules were substantially amended with effect from years of assessment commencing from 1 April 2012. The provisions no longer separately addresses transfer pricing and thin capitalisation. Rather, thin capitalisation is treated as simply a breach of the general arm’s-length standard.

Where a transfer pricing adjustment is required to be made, that adjustment is subject to a secondary adjustment where it is deemed to be a loan that is itself subject to transfer pricing and thereby giving rise to deemed interest.

**Controlled foreign companies (CFCs)**

If one or more residents together, directly or indirectly, hold more than 50% of the voting or participation rights in a foreign company, then it is a CFC in relation to those residents. The income of a CFC is imputed to the residents in proportion to their holdings, subject to certain exclusions and tax credits, where applicable. The most notable exclusions are for high-tax CFCs and income attributable to foreign business establishments.

**Tax credits and incentives**

**Foreign tax credit**

The South African Income Tax Act makes provision for a rebate against CIT in respect of foreign taxes paid on foreign-sourced income or a deduction against income of foreign taxes paid on SA-sourced income. In both instances, the taxpayer must be an SA resident, the income must be included in taxable income and is not exempt, and that
income was subject to a foreign tax that is not recoverable. The rebate is limited to the total normal tax payable calculated by applying the ratio of the total taxable income attributable to the foreign tax to the total taxable income. The deduction, however, may not exceed the income on which the foreign tax was levied.

A foreign tax rebate also applies to grant relief to amounts relating to services rendered in South Africa that are subject to tax in a foreign jurisdiction where the general foreign tax rebate does not apply.

**Research and development (R&D)**
The current costs related to certain R&D activities carried on in South Africa are 150% deductible, subject to pre-approval by a government appointed approval committee. The cost of machinery and other capital assets acquired for the purposes of R&D may be depreciated 40% in the first year of use, 20% in the second, 20% in the third year, and 20% in the fourth year. Buildings used in the process of R&D may be written-off over a 20-year period.

**Headquarter company regime**
A ‘headquarter company’ regime encourages the use of South Africa as a location for intermediate holding companies.

The main benefits offered to a headquarter company are:

- Exemption from South Africa’s CFC rules.
- Exemptions on the headquarter company’s dividend distributions.
- Exemption from the WHT on interest in certain circumstances.
- Exemption from South Africa’s transfer pricing rules on back-to-back loans, outbound loans, back-to-back intellectual property (IP) licensing arrangements, and outbound IP licensing arrangements.
- Capital gains tax exemption upon the disposal of shares by the headquarter company.

The requirements for a headquarter company are as follows:

- The headquarter company must be SA resident.
- Each shareholder in the headquarter company must hold at least 10% of the headquarter company’s equity shares and voting rights. This means that a headquarter company can never have more than ten shareholders.
- At least 80% of the headquarter company’s assets (measured on a ‘cost’ basis and excluding cash and certain bank deposits) must be comprised of certain assets related to the foreign companies in which the headquarter company holds at least 10% of the equity shares and voting rights. Specifically, these assets must be:
  - the equity shares in those companies
  - loans to those companies, and
  - IP licensed to those companies.
- At least 50% of the headquarter company’s gross income must be comprised of dividends, interest, royalties, rentals, service fees, or proceeds from the sale of equity shares or IP from its 10%-plus holdings, where the gross income exceeds ZAR 5 million.

**Industrial policy projects**
In 2008, a ZAR 20 billion incentive package for investors in energy efficient projects was announced. The incentive is available for industrial projects participating in the manufacturing sector (other than alcohol or alcohol related products, tobacco or
tobacco related products, arms and ammunition, and bio-fuels, which have a negative impact on food security). Companies are divided into those with a qualifying status and those with a preferred status. The status is determined in terms of a point system.

The proposed project must either be a ‘brownfield project’ (expansion or upgrade of an existing industrial project) or a ‘greenfield project’ (a wholly new industrial project, which uses new and unused manufacturing assets). Approved projects may be granted a tax allowance known as an additional investment allowance equal to 55% (100% if located in an industrial development zone) of the cost of any manufacturing asset used in an industrial policy project with preferred status or 35% (75% if located in an industrial development zone) of the cost of any manufacturing asset used in any other approved industrial policy project.

Note that the additional investment allowance may not exceed ZAR 900 million in the case of any greenfield project with a preferred status, ZAR 550 million in the case of any other greenfield project, ZAR 550 million in the case of any brownfield project with a preferred status, or ZAR 350 million in the case of any other brownfield project.

In addition to the above, a company may also claim a deduction known as an additional training allowance.

**Venture capital companies**

In order to assist small and medium-sized businesses to raise capital to finance businesses, a tax incentive for investors in small and medium-sized enterprises through venture capital companies was introduced.

A deduction is allowed from the income of a taxpayer in respect of expenditures actually incurred by that person in respect of shares issued to that person by a venture capital company.

---

**Withholding taxes**

**Payments to residents**

The only payments to residents that are subject to WHT are in respect of dividends, although resident companies are exempt from the dividend WHT.

**Royalties payable to non-residents**

Royalties and know-how payments made to non-residents for the use of or right to use IP rights in South Africa are deemed to be from an SA source. The payer of the royalty or know-how payment is obligated to deduct a WHT of 12% (increased to 15% from 1 March 2014) of this payment, which is a final tax payable by the recipient of such income. The treaty rate is only the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply.

**Dividends payable to non-residents**

A dividend WHT of 15% applies to any dividend paid by a resident company or non-resident company in respect of shares listed on an SA exchange to SA residents. The tax is imposed on the beneficial owner of the dividend and not on the company, with the exception of in specie dividends. The payer of the dividend or regulated intermediary is obligated to deduct the 15% WHT from the payment. The treaty rate is only the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply.
Interest payable to non-residents (as of 1 March 2014)
A 15% WHT on interest will apply to interest payable from an SA source to non-residents on certain debt instruments from 1 March 2014. The resident payer of the interest is obligated to deduct the 15% WHT from the payment. The treaty rate is only the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply.

Cross-border service fees payable to non-residents (1 March 2014)
A 15% WHT on cross-border service fees is proposed to apply to service fees payable to non-residents from 1 March 2014.

Treaty rates for dividends, interest, and royalties
The WHT may be reduced by the terms of the relevant tax treaty, as follows:

### Notes

'D' refers to direct capital holding.

www.pwc.com/taxsummaries

South Africa 1849
1. Recipient is the beneficial owner of the royalty.
2. Royalty is subject to tax in recipient country.
3. 15% is levied on royalties for cinematographic or television films.
4. The maximum rate for copyright royalties, royalties for use of computer software, and patents concerning industrial, commercial, and scientific equipment is 6% of the royalties paid; otherwise, 10%.
5. Maximum rate of 10% on royalty of the adjusted amount (being 70% of the gross royalties) for use of industrial, commercial, or scientific equipment.
6. The 5% rate applies to royalties for the use of a copyright. A 7% rate applies to royalties for the use of patents, trademarks, designs, models, etc.
7. In respect of right to use industrial, commercial, or scientific equipment and transport vehicles, a 10% rate applies.
8. The lower rate of 5% applies to any cultural, dramatic, musical, or other artistic work (but not including royalties in respect of motion picture films) as well as industrial, commercial, or scientific works. The lower rate of 10% applies in all other cases.
9. The 5% lower rate applies to use of literary, artistic, and scientific works. The 7% lower rate applies to right of use of patents, trademarks, designs, and models.
10. No right to tax dividends in payor state if the beneficial owner of the dividend is resident in the payee state.
11. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital, and the higher rate applies in other cases.
12. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of capital, and the higher rate applies in other cases.
13. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of voting shares, and the higher rate applies in other cases.
14. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital, and a minimum 12-month holding period prior to the end of the accounting period prior to the dividend payment, and the higher rate applies in other cases.
15. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of voting shares and a minimum six-month holding period prior to the end of the accounting period prior to the dividend payment, and the higher rate applies in other cases.
16. SA resident payor to Maltese resident beneficial owner (Maltese resident payor to SA resident beneficial owner is limited to tax on profits).
17. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital and a minimum two-year uninterrupted holding period prior to the dividend payment, and the higher rate applies in other cases.
18. Lower rate applies to a beneficial owner who has a minimum holding of 30% of capital and a minimum direct investment of 100,000 United States dollars (USD) in the company declaring the dividend, and the higher rate applies in other cases.
19. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of capital, and the higher rate applies in other cases. However, a ‘most favoured nations’ clause applies, which will limit the above rates to the lowest treaty rate in terms of any other treaty.
20. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 20% of capital, and the higher rate applies in other cases.
21. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 15% of capital, and the higher rate applies in other cases.
22. Lower rate of 5% applies to a beneficial owner that is a company and has a minimum holding of 10% of capital. Lower rate of 10% applies in all other cases. 15% rate applies to all dividends from property investment companies.
23. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of voting power (directly), and the higher rate applies in other cases.
24. The treaty contains no provisions regarding dividends WHT, thus the domestic rate will apply.
25. The Netherlands Protocol has a 'most favoured nations' provision whereby the rate most favourable in any other treaty will apply over the default treaty rate. This, however, only applies to treaties concluded after this treaty.
26. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state.
27. The 5% rate applies to interest derived by a bank or any other financial institution, and the 10% rate applies in other cases.
28. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state and provided interest is taxable in that other state.
29. No specific provision is made for interest in the DTA.
30. The 10% rate applies to interest received by a financial institution (including an insurance company), and the 15% rate applies in other cases.
31. The 5% rate applies to interest on loans made by banks, and the 12% rate applies in other cases.
32. The 5% rate applies if the interest is paid to a bank; the 10% rate applies in other cases.
33. In Canada, a beneficial owner that is a company controls a minimum of 10% of the voting power (directly/indirectly), but excludes non-resident owned investment corporation resident in Canada.
34. In New Zealand, dividends are taxed at a flat rate of 15%.
35. No right to tax interest in payor state if the beneficial owner is the government of the other state or a government entity.
36. No specific provision is made for royalties in the DTA.
37. No right to tax interest on stocks and securities issued by any government other than South Africa, even if business is carried on in South Africa, if taxed in residence state.

38. No right to tax dividend in payor state if recipient is resident in payee state.

39. Lower rates for royalties do not apply if attributable to a PE in the payor state or the right or property on which royalty is paid is attributable to PE in payor state.

40. The 10% rate applies if the beneficial owner is resident in the payee state.

41. Lower rate of 5% applies to the dividend if beneficial owner is resident in payee state.

Non-resident entertainers and sportspersons
A WHT at the rate of 15% applies to all payments made to non-resident entertainers and sportspersons in respect of their activities exercised in South Africa.

Disposal of immovable property by non-residents
Any person who pays an amount to a non-resident in respect of the sale of immovable property in South Africa must withhold from the amount payable an amount equal to:

- 5% if the non-resident seller is an individual
- 7.5% if the non-resident seller is a company, or
- 10% if the non-resident seller is a trust.

The amount so withheld is not a final tax for the non-resident seller. Instead, this amount is regarded as an advance payment of the non-resident seller’s normal tax liability for the year of assessment during which the property is disposed of. The non-resident seller is still obligated to submit an income tax return for that year.

Tax administration

Taxable period
The corporate tax year is the same as the company’s financial year. It may be changed upon application showing reasonable cause.

Tax returns
Annual income tax returns must be submitted within one year from the end of the company’s tax year. The annual tax return has been amended and also includes a new supplementary reconciling return where requested. Furthermore, new schedules apply for controlled foreign companies, short term insurers, mining companies, headquarter companies, and learnership allowances.

‘Signed off’ financial statements are now required to be submitted with the annual tax return.

Payment of tax
Payments are made with provisional returns filed at six-month intervals from the tax year-end based on an estimate of taxable income for the year. Interest is charged on any underpayment outstanding for more than six months after the tax year-end, except in the case of February year-ends, in which case it is seven months. Any balance (together with interest) is then paid following assessment.

Tax audit process
There is no prescribed audit process, and an audit can be initiated by any factor as determined by the SARS. The audit or inspection will commence with a request from the SARS for the taxpayer to make available any such records or information as may be required.
South Africa

Statute of limitations
Tax debts to the state prescribe after a period of 15 years. Tax returns submitted that have been assessed may not be reopened after a period of three years from date of assessment by the SARS or five years if it is a self-assessment by the taxpayer, unless there has been fraud, misrepresentation, or non-disclosure by the taxpayer.

Topics of focus for tax authorities
The SARS, in their 2012-2016 Compliance Program, stated that they will focus on the following areas:

- Large multinational business will be focused on in respect of transfer pricing, international tax compliance, and under declaration of provisional tax.
- The construction industry has been identified as having very low tax compliance, and this will be a focus, especially in relation to companies that receive government tenders.
- The SARS envisages a clamp down on illicit cigarette trade, whereby cigarette as smuggled via warehouses or cigarettes destined for export are diverted for local consumption.
- Undervaluation of imports in the clothing and textile industry is another focus area. The practice will be confronted by inter-governmental department cooperation and establishing a frequent revision of a reference pricing database and more cooperative border management.
- Small business registrations will be encouraged, with the SARS conducting registration drives. Abuse of the VAT system by small business will also be focused on.
Significant developments

Over the past year, the following significant amendments have been made to Spanish law on the taxation of companies.

Royal Decree-Law 4/2013, containing measures to support entrepreneurship and to stimulate growth and create employment, was passed on 22 February 2013. This legislation provides a reduced corporate income tax (CIT) rate for companies incorporated on or after 1 January 2013.

See Newly created companies in the Taxes on corporate income section for further information.

Law 16/2012, containing various tax measures aimed at the consolidation of public finances and the boosting of economic activity, and Law 17/2012, approving the State Budget for 2013, were passed in December 2012. The main measures contained in these reforms that affect taxation of companies are the following:

- The possibility to restate the value of tangible fixed assets and property investments for tax purposes at a relatively low-tax cost is introduced. This step-up on assets is voluntary and it is applicable to CIT payers, personal income tax (PIT) payers who carry on a business activity, and non-residents’ income tax (NRIT) payers that act in Spain through a permanent establishment (PE).
- For tax periods commencing in 2013 and 2014, the amount of accounting amortisation/depreciation of intangible/tangible assets and investment property is limited to 70% of that which would be tax deductible under the regulations implemented under Spanish CIT law.
- Severance pay is not tax deductible for CIT purposes when it exceeds, for each recipient, 1 million euros (EUR) or, if it exceeds this amount, the amount that is exempt under Spanish PIT law.
- The companies subject to the reduced tax rate of 1%, or even 0%, under Spanish CIT law should not make advance payments of CIT and will not be required to file the relevant return. The obligation to make the minimum advance payments is not applicable for these companies, for certain non-profit organisations, and for real estate investment trusts.
- The regulations for property lease companies and real estate investment trusts are reformed to make their application easier.
- The regulations for finance leases have been amended to ensure that the early depreciation of certain assets is compatible with European Union (EU) legislation.
- The reduced tax scale for micro companies remains unchanged for 2013.
- The staff training tax credit is maintained in 2013 for expenses and investments incurred in the year to train staff in the use of new communication and information technologies.
Spain

• The tax credit for investments in the production of Spanish films and TV series is extended and will remain in effect for tax periods commencing before 1 January 2015.

• From 1 January 2013, tax on non-resident companies owning real estate in Spain will only be applicable to companies that are resident for tax purposes in a tax haven.

Law 7/2012, amending tax and budgetary legislation and adapting financial legislation to strengthen the proceedings to prevent and combat tax fraud, was passed on 29 October 2012. The tax measures laid down in this legislation include, most notably, the following:

• Payments in cash over EUR 2,500 are not allowed for transactions carried out on or after 19 November 2012 in which at least one of the parties is a person carrying on a business or professional activity, with fines of up to 25% of the amount of the transaction being payable by both the payer and the recipient of these cash payments.

• Introduction of the obligation to disclose assets, such as accounts, shares, or real estate, that are located overseas. Severe fines are imposed (a minimum of EUR 10,000) for breaches of this obligation.

• Assets regarding which the information disclosure obligation is not complied with by the established time limits are treated as unreported income for CIT and PIT payers and allocated to the earliest tax period of those that are not statute barred. Breaches of the obligation to declare this income are a very serious infringement, and fines of 150% of the gross tax liability are imposed.

• Severe fines are introduced for taxpayers in an inspection or audit proceeding that do not comply with the tax authorities’ requests for information or documentation by the time limits notified by the authorities.

Royal Decree-Law 20/2012 (RDL 20/2012), containing measures aimed at guaranteeing budgetary stability and supporting competitiveness, was published in Spain’s Official State Gazette on 14 July 2012. The main tax measures included in this reform that affect companies’ taxation are as follows:

• Value-added tax (VAT) rates increased as of 1 September 2012. The new rates are as follows:
  • Ordinary rate: 21% (previously 18%).
  • Reduced rate: 10% (previously 8%).
  • Super-reduced rate: 4% (no change).

In addition, the VAT rates of certain supplies of goods and services changed. These goods and services will be taxed at a different rate.

• New limits are established for the amount of tax-loss carryforwards that may be offset by large companies in tax years commencing in 2012 and 2013. The amount of tax-loss carryforwards to be offset had been limited previously with Royal Decree-Law 9/2011 (RDL 9/2011) for tax years commencing in 2011, 2012, and 2013.

See Net operating losses in the Deductions section for further information.

• Advance payments of CIT made by companies whose turnover (calculated in accordance with Spanish VAT law) exceeded EUR 6,010,121.04 during the 12 months prior to the beginning of the tax period (large companies) have been increased for tax years commencing in 2012 (only for advance payments made in October and December) and 2013.
Spain

See Payment of tax in the Tax administration section for further information.

• The minimum advance payment for tax periods commencing in 2012 and 2013 established in Royal Decree-Law 12/2012 (RDL 12/2012) for companies whose turnover during the prior 12 months was EUR 20 million or more has been increased to at least 12% of their accounting profits for the first 3, 9, or 11 months of each calendar year.

For companies where the international double tax exemption is applicable on at least 85% of their turnover or on which the internal 100% double tax deduction for dividends applies, the rate will be 6%.

See Minimum advance payment for tax periods commencing in 2012 and 2013 in the Tax administration section for further information.

• The limits on the deduction of financial expenses introduced by RDL 12/2012 have been modified as follows with effect for tax years commencing on or after 1 January 2012:

  • RDL 12/2012 reduced the amount of net deductible financial expenses in the tax year to 30% of operating profits (with the application of certain adjustments) for the year (financial expenses of less than EUR 1 million are deductible regardless of this limit). According to RDL 20/2012, this EUR 1 million will be proportionally reduced for tax periods of less than one year.
  • The limits on the deduction of financial expenses will apply to companies whether or not they form part of a group.
  • The limits on the deduction of financial expenses will not apply to insurance companies and credit institutions.
  • The limits on the deduction of financial expenses will not be applicable for dissolved companies in the tax period in which they are dissolved, with exceptions for restructuring operations carried out under the tax neutrality regime and for companies that were previously taxed under the tax grouping regime.

• The annual maximum 10% tax amortisation of intangible assets that do not have a specific useful life is limited to 2% for tax periods commencing in 2012 and 2013.

See Amortisation of intangibles in the Deductions section for further information.

• Taxpayers could opt to not include dividends and capital gains on transfers of interests in non-resident companies that complied with certain requirements and that were accrued before 1 December 2012 in their CITable base. Such dividends and capital gains were subject to a special tax rate of 10%.

Taxes on corporate income

The general CIT rate in Spain is currently 30%. Other tax rates (ranging from 25% to 35%) may apply, depending on the type of company that is taxed and the type of business carried out.

Resident companies are taxed on their worldwide income.
For PEs in Spain of foreign companies, NRIT is chargeable on their Spain-source taxable income at a 30% tax rate.

NRIT is also chargeable on non-established foreign companies/individuals that obtain income in Spain (see the Withholding taxes section).

**Small companies**
Companies with a turnover under EUR 10 million in the preceding tax year are considered small companies for CIT purposes and are taxed at the following rates:

- Taxable income up to EUR 300,000 is taxed at a 25% tax rate.
- The part of the taxable income that exceeds this threshold is taxed at the general tax rate of 30%.

The tax rate levied on companies forming part of a group depends on the total amount of the group companies’ turnovers. The general 30% tax rate is levied when the sum of the group companies' turnovers exceeds EUR 10 million.

**Micro companies**
Lower tax rates are established for companies that maintain or increase their staff levels in the tax years 2009 through 2013:

The rates for tax years 2011 through 2013 are as follows:

- Taxable income up to EUR 300,000 is taxed at a 20% tax rate.
- The part of the taxable income that exceeds this threshold is taxed at a 25% tax rate.

These lower rates of 20% and 25% are applicable subject to compliance with, amongst others, the following requirements:

- The income generated by all of the company's business activities does not exceed EUR 5 million.
- The company's total staff does not exceed 25 employees.
- The company's average number of employees during the 12-month period following the commencement of the tax year in question is not less than one employee and not less than the company's average number of employees during the 12-month period prior to the first tax year commencing as of 1 January 2009.

**Newly created companies**
Companies that are incorporated on or after 1 January 2013, carry on a business activity, and comply with certain requirements are taxed at a reduced rate of 15% for the first EUR 300,000 of income and 20% on the remaining amount for the first tax period when they generate positive taxable income and during the following tax period.

**Business and professional activities tax**
The business and professional activities tax is a local direct tax levied annually on the performance in Spain of business, professional, or artistic activities, regardless of whether or not they are carried out in a particular premises. The tax payable depends on different factors, such as the type of activity carried out and the location and size of the premises where the activity is carried out. As regards limits, it may not exceed 15% of the presumed average profits of the professional/economical activity.

CIT payers and non-resident companies carrying on an activity in Spain through a PE are exempt from this tax if their net turnover for the tax year of the last CIT/NRIT
return filed prior to the date of accrual of the local tax (1 January) was less than EUR 1 million.

Corporate residence

A company is resident in Spain and subject to CIT on its worldwide income when:

- it has been incorporated in accordance with Spanish law
- its registered office is in Spain, and/or
- its ‘effective’ head office is in Spain.

Under Spanish law, a company’s ‘effective’, head office is in Spain when its business activities are managed and controlled from Spain.

Companies established in a country or territory where no tax is levied or that is a tax haven are deemed to be tax resident in Spain in the following cases:

- When the company's main assets consist, directly or indirectly, of property located or rights fulfilled or exercised in Spain.
- When the company's core business activity is carried on in Spain.

This presumption may be refuted by the company if it can prove that it is effectively administered and managed in the country or territory in which it is established and that it was incorporated and operates for valid economic and business reasons and not merely for the purpose of managing securities or other assets.

Permanent establishment (PE)

Taxpayers operating in Spain through a PE are subject to NRIT.

Most Spanish tax conventions for the avoidance of double taxation contain a definition of PE in line with Organisation for Economic Co-operation and Development (OECD) criteria.

In the absence of a tax convention, internal law states that an individual or company is considered to operate through a PE when, by any legal means, one has continuous or habitual work facilities in Spain or a place to do any kind of work where one performs all or part of one’s activity, or when one acts in Spain through an agent with powers to enter into an agreement in the name and on behalf of the non-resident individual or company, provided said powers are exercised on a regular basis.

In particular, management offices, branches, offices, factories, workshops, warehouses, shops or other establishments; mines, oil or gas wells, quarries, farms, forestry facilities, livestock farms, or any other site where natural resources are collected; and construction, installation, or assembly sites whose duration lasts more than six months will be considered PEs.

Other taxes

Value-added tax (VAT)

Spanish VAT is payable on supplies of goods and services carried out in Spanish VAT territory and on imports/intra-EU acquisitions of goods and services. There are three rates for the different types of goods and services, which are as follows:
Spain

- Ordinary rate of 21%, applied on regular supplies of goods and services.
- Reduced rate of 10%, applied on basic necessities (e.g. food and agricultural products not included in the ‘super reduced’ 4% rate, dwellings, and other qualifying services).
- Super reduced rate of 4%, applied on basic necessities other than those classified under the reduced rate (e.g. bread, milk, books, medicine).

In the Canary Islands, a specific tax is applied instead of VAT, called the Canary Island General Indirect Tax (IGIC). The ordinary IGIC rate is 7%, and the other IGIC rates are 0%, 2.75%, 3%, 9.5%, and 13.5% (20% for tobacco). IGIC is similar to VAT, but it has some significant differences, such as the exemption established for telecommunications services. Imports of tangible goods into the Canary Islands are subject to this tax.

In Ceuta and Melilla, sales tax is applied instead of VAT.

**Customs duties**
Many goods imported into Spain from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff and vary widely.

**Excise duties**
Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in Spain. Purely as examples, most road fuels carry a duty of about EUR 0.31 per litre, cigarettes carry a duty of about EUR 19.1 per thousand (plus 53.1% of the maximum retail sale price), tobacco of about EUR 8 per thousand (plus 41.5% of the maximum retail sale price), most wines of EUR 0 per litre, and spirits of about EUR 8.3 per litre of pure alcohol included.

**Tax on non-resident companies owning real estate in Spain**
Non-resident companies that own real estate or hold real property rights in Spain are subject to a special levy accrued on 31 December and declared and paid in January of the following year in the place and manner established by law. The tax is equal to 3% of the assessed value of the real estate. As of 1 January 2013, only companies that are resident for tax purposes in a tax haven are subject to this special levy.

**Transfer tax**
A transfer tax, which is usually 5% to 10%, depending upon the region, is generally levied on *inter vivos* transfers, including real estate transfers and real estate leases that are exempt from VAT.

Second and ulterior transfers of buildings are exempt from VAT and thus, they are in principle, subject to transfer tax.

Residential leases are exempt from VAT and therefore subject to transfer tax.

Transfers of quoted or unquoted (listed or unlisted) securities are, in principle, exempt from both transfer tax and VAT. This exemption will not apply for transfers of unlisted securities of a company in the secondary market that tries to evade the tax that is payable on a direct transfer of real estate that it owns. For this purpose, Spanish law establishes certain cases where it is understood that there is an intention to evade tax.

This exception will not apply to transfers of securities received as a result of the incorporation by banks of asset management companies and to transfers of securities of banks affected by the integration plans regulated by Royal Decree-Law 9/2009,
which will therefore be exempt from transfer tax. In addition, acquisitions of assets in the Canary Islands may be exempt from transfer tax (and from IGIC) when certain requirements are complied with.

Restructuring transactions are also exempt from transfer tax. For these purposes, mergers, spin-offs, exchanges of shares, and certain in-kind contributions are considered to be restructuring transactions.

**Stamp duty**
A stamp duty is mostly levied on notarial instruments and records documenting transactions that have an economic value and need to be registered in public registries (e.g. company, land, and industrial property registries). Stamp duty is incompatible with transfer tax and capital duty, but compatible with VAT. The general rate is between 0.75% and 1.5%, depending on the region of Spain and the taxable event.

Stamp duty is also levied on certain commercial (e.g. bills of exchange, promissory notes), court, and administrative documents.

**Capital duty**
1% capital duty is levied on capital reductions and company dissolution, to be paid by the shareholders.

Capital duty is incompatible with transfer tax and stamp duty in certain cases, but it is compatible with VAT.

**Payroll taxes**
Employers are required to withhold a percentage of their employees’ salaries and benefits as a payment on account of their PIT. The rate of withholding is a progressive rate of between 24.51% and 51%, depending on the employee’s personal circumstances and income.

**Social security contributions**
Employers are required to pay social security contributions. The rate of the contributions under the general social security contribution regime is the fixed rate of 29.9% plus a variable rate for occupational accidents (e.g. 1.1% for office work).

Employees are also required to pay social security contributions. Under the general social security contribution regime, the rate of social security contributions is 6.35%. Employers should deduct this amount from the amounts that they pay to employees.

The rates of social security contributions stated above should be applied on the employee’s total monthly gross employment income, whether in cash or in kind, with a minimum monthly contribution base of between EUR 748.51 and EUR 1,045 (EUR 753 and EUR 1,051.50 in 2013), depending on the employee’s professional category, and a maximum monthly contribution base of EUR 3,262.50 (EUR 3,425.75 in 2013).

Both parts of the social security contributions (employer and employee) should be paid by the employer to the Social Security Treasury.

**Other local taxes**
In addition to the taxes stated above, the following other local taxes may be charged on companies:
Spain

- Real estate tax, levied annually by local authorities on the ownership of real estate.
- Local tax levied on the increase in the value of urban land, chargeable when urban real estate is sold.
- Motor vehicle tax, charged on the ownership of vehicles.
- Tax on constructions, installations, and building works, charged on the cost of certain works that require town planning licences.
- Waste collection fees.

**Branch income**

Income obtained by a branch in Spain of a non-resident company is taxed at the standard CIT rate of 30% and, in most cases, the regulations established by tax law for resident companies are applicable.

Payments made by a branch to its head office or a PE of its head office for royalties, interest, commissions, or technical assistance fees are not tax deductible. Management and general administrative expenses incurred by the foreign head office that can be allocated to the branch are tax deductible if the payments for these expenses are made following a criteria of continuity and rationality and provided that certain documentary requirements and other formalities are fulfilled.

Under Spanish law, income obtained by a branch that is repatriated to its head office is taxed at source at the general withholding tax (WHT) rate of 21% (applicable rate from 1 January 2011 to 31 December 2013). This tax is not chargeable in the case of a PE of a company resident in the European Union (unless the company is resident in a tax haven). Most tax treaties signed by Spain do not establish any provisions on this matter, and, in such cases, no tax is chargeable on income repatriated by branches. Some tax treaties, such as the treaties with Canada, Indonesia, and the United States (US), expressly establish a tax on income repatriated by branches. For example, US head offices are taxed at a 10% rate on the repatriated profits of a Spanish branch under the US/Spanish tax treaty.

**Income determination**

The general rule for determining income for CIT purposes is that accounting rules must be followed unless tax law establishes otherwise. In order to maintain this consistency, CIT/PE NRIT returns include pages in which the company’s accounting/commercial balance sheet and profit and loss account figures must be entered.

In Spain, the tax authorities are authorised to modify accounting results exclusively for the purpose of determining tax results if they observe that a company’s accounting results have not been calculated in accordance with Spanish Generally Accepted Accounting Principles (GAAP).

**Inventory valuation**

Inventory is valued at acquisition price or production cost under the average and first in first out (FIFO) valuation methods (the replacement and base stock valuation methods may only be used in exceptional cases). Again, since there are no specific tax rules for determining taxable income, accounting rules are also applicable for calculating valuation and obsolescence provisions for inventory.
Capital gains
Capital gains are taxable in the tax year in which they arise. They are treated as normal income and taxed at the standard CIT rate of 30% (in the case of gains from real estate after taking into consideration an increase in the cost base for tax indexation purposes).

On meeting certain requirements, companies may be eligible for a tax credit for reinvesting the proceeds obtained on the transfer of the assets from which the capital gain arises.

Please see the Tax credits and incentives section for a description of a tax credit for reinvestment.

For operations where payment is deferred or paid in instalments, the income is obtained proportionally as the corresponding payments are made, unless the taxpayer opts to be taxed in accordance with the accrual criteria.

Dividend income
The amount of dividends included in the calculation of taxable income must be the gross amount.

Upon meeting certain requirements, companies may be eligible for a tax credit for dividends equal to the tax rate applied by the company on the dividends received. This tax credit is generally allowed for the total dividends received from taxable domestic companies when the interest of the company receiving the dividend in the other company is 5% or more and such interest has been held for at least one year. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed.

This tax regime is, to some extent, the same as a tax exemption regime. When an interest in a company is less than 5% or is held for less than one year, the tax credit is 30% of half of the amount of the dividends received.

In addition, taxation on capital gains arising from the sale of shares in domestic companies by a company with at least a 5% interest in the subsidiary held for at least one year prior to the sale can be reduced by means of a tax credit at the tax rate applicable on the undistributed part of the subsidiary’s profits generated during the company’s holding period. The reason for this tax relief is that this capital gain is understood to be an underlying dividend.

Internal tax credits for the avoidance of double taxation may be carried forward for up to seven years.

Please see Foreign income below for a description of the taxation of dividends received from foreign companies.

Stock dividends
CIT is not levied on bonus shares (i.e. shares partially or totally given to shareholders in a capital increase charged against distributable reserves), although they must be taken into account when calculating the average cost of shares held for the levying of tax when the shares are sold.

Interest income
Interest income is treated as normal income and taxed at the standard CIT rate of 30%.
Spain

**Other significant items**
The following items, amongst others, are excluded or deferred from taxable income:

- Distributed dividends corresponding to profits obtained by companies in tax years in which the flow-through tax regime (internal and international) has been applied.
- Assets written up in accordance with revaluation laws and tax-protected restructuring transactions involving accounting capital gains.

**Foreign income**
Resident companies are taxed on their worldwide income. For foreign-source income, total or partial tax relief in the form of tax credits or exemptions is given if tax is levied on the income in both Spain and the foreign country where the income has been generated.

This tax relief may be available for the following:

- Economic double taxation, which is when the same income is taxed in the hands of two different taxpayers. For example, another government taxes a foreign company on the income earned in that country and a Spanish resident shareholder is taxed on the dividends that it receives from the foreign company or the capital gains from transfers of its shares.
- Juridical double taxation, which is when the same income is taxed in two countries in the hands of the same taxpayer. For example, the income is taxed (via a WHT) in the country where the income is generated and again in the other country where the recipient is resident.

The main characteristics of double tax relief are discussed below.

Dividends or profit-sharing income received by a Spanish company from a foreign company are tax exempt, subject to compliance with the following requirements:

- The Spanish company has at least a 5% interest in the foreign company during the entire tax year prior to the tax year in which the dividend is paid. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed.
- The foreign company is subject to a similar tax to Spanish CIT and is not resident in a tax haven. The foreign tax is deemed to be similar to Spanish CIT if the foreign company is resident in a country with which Spain has signed a tax treaty containing an exchange-of-information provision.
- The income out of which the dividend is paid is generated from the business activities of the foreign company carried out abroad stipulated in CIT law.

Capital gains arising from the sale of shares in foreign companies also qualify for a tax exemption if the requirements stated above are complied with during the holding period and the acquiring company is not resident in a tax haven. Tax exemption is limited in certain cases.

As an alternative to this ‘tax exemption’ regime and applicable to dividend distributions only, a tax credit based on imputation is established. This tax credit allows the crediting of the foreign tax paid abroad on the income from which the dividends are paid and the foreign WHT paid on the profit distribution, up to the limit of the tax that would have been paid on the gross amount in Spain. The only requirement for the application of this ‘tax imputation’ regime is that the Spanish company has at least a 5% interest in the foreign company during the 12 months prior to the date on which the dividend
is due and payable. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed. This tax relief may be carried forward for up to ten years.

Spanish international legislation provides for CIT relief on ‘juridical’ double taxation by applying the ‘tax imputation’ regime. Under this regime, gross foreign income (including foreign WHT paid) is included for Spanish tax calculation purposes, and a tax credit for the foreign WHT paid is applicable up to the amount of the CIT that the company would have paid if such gross income had been obtained in Spain. The tax credit can be carried forward for up to ten years, but the rate will be the rate applicable at the moment when the tax credit is applied.

Under Spanish tax treaties and implemented EU tax directives, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties, which allows for the deduction of not only the tax actually paid but a higher amount of tax.

### Deductions

**Depreciation, amortisation, and depletion**

All assets, except land, are depreciable/amortisable for tax purposes. Guideline tables of tax depreciation/amortisation rates are established that state maximum per annum rates and maximum years of useful life for each asset type, classified by business sector. Please see the table below as an example of the maximum per annum rates and maximum years of useful life of some assets that are typically depreciated/amortised:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Maximum per annum depreciation/amortisation rate (%)</th>
<th>Maximum useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial buildings and warehouses</td>
<td>3</td>
<td>68</td>
</tr>
<tr>
<td>Administrative and commercial buildings</td>
<td>2</td>
<td>100</td>
</tr>
<tr>
<td>Passenger cars</td>
<td>16</td>
<td>14</td>
</tr>
<tr>
<td>Furniture and office equipment (excluded computers)</td>
<td>10</td>
<td>20</td>
</tr>
<tr>
<td>Computers</td>
<td>25</td>
<td>8</td>
</tr>
<tr>
<td>Software</td>
<td>33</td>
<td>6</td>
</tr>
<tr>
<td>Tools</td>
<td>30</td>
<td>8</td>
</tr>
</tbody>
</table>

The straight-line depreciation/amortisation method is normally used, calculated over the asset’s useful life and applied on the asset’s cost or written-up value (if such a write-up is acceptable for tax purposes). Off-book adjustments must be included in tax assessments if accounting depreciation/amortisation exceeds tax depreciation/amortisation.

Qualifying assets with a useful life of more than one year can also be depreciated/amortised using declining-balance methods. Buildings, furniture, and fittings cannot be depreciated using the declining-balance methods.

For tax periods commencing in 2013 and 2014, the tax deduction of recorded depreciation of tangible fixed assets and investment property is limited to 70% of the
maximum depreciation permitted by the regulations implemented under Spanish CIT law. This limitation does not apply to small or medium-sized companies. Recorded depreciation that is not deducted as a result of this limitation can be carried forward and is deductible either on a straight-line basis over ten years or, alternatively, over the asset’s useful life, from the first tax period commencing in 2015.

Mining assets and assets used for research and development (R&D), amongst others, but not including buildings, can be freely depreciated/amortised for tax purposes.

**Free depreciation**
Unrestricted depreciation of investments in new tangible fixed assets and investment property was regulated for investments made by taxpayers in tax periods commencing in 2011, 2012, 2013, 2014, and 2015. This tax relief was also available for tax periods commencing in 2009 and 2010, but it could only be availed of if the requirement that the taxpayer’s staff levels were maintained or increased was met.

Due to the tax reform carried out by RDL 12/2012, this tax incentive has been repealed effective 31 March 2012.

A transitional regime is provided for investments made prior to that date. Under this transitional regime, unrestricted depreciation tax relief may be applied to these investments, although with certain limits, during the tax periods commencing in 2012 and 2013.

**Amortisation of intangibles**
A 50% reduction may be applied for income obtained from licensing certain intangible assets, subject to compliance with certain requirements (the effective tax on this income would be 15%).

Goodwill cannot be amortised under Spanish GAAP. However, it can be amortised for tax purposes at a maximum annual rate of 5% (1% for tax periods commencing in 2012 and 2013), subject to compliance with certain requirements (e.g. it is acquired for consideration from an unrelated party in accordance with the provisions of Article 42 of the Spanish Commercial Code and an obligatory non-distributable reserve is established).

Intangible assets with a specific useful life may be amortised and such amortisation is tax deductible when the company complies with the following requirements:

- The assets are acquired for consideration.
- The company does not form part of a group as defined in Article 42 of the Spanish Commercial Code.

The tax deduction of the amortisation is up to 10% per annum, unless a lower useful life can be evidenced.

If the two requirements stated above are complied with, the amount of intangible assets that do not have a specific useful life is also tax deductible, with an annual limit of 10% of its value (2% for 2012 and 2013), regardless of whether they are amortised under Spanish GAAP or not.

For tax periods commencing in 2013 and 2014, the tax deduction of recorded amortisation of intangible fixed assets with a specific useful life is limited to 70% of the maximum amortisation permitted by the regulations implemented under CIT law (i.e.
to 7% per annum). This limitation does not apply to small or medium-sized companies. Recorded amortisation that is not deducted as a result of this limitation can be carried forward and is deductible either on a straight-line basis over ten years or, alternatively, over the asset’s useful life, from the first tax period commencing in 2015.

**Depletion**

Depletion is allowed for mining companies and companies involved in exploring/investigating natural oil resources as established in applicable legislation.

**Balance sheet restatement and special tax**

Law 16/2012 establishes the possibility that companies may voluntarily restate the value of part of their assets at a 5% tax cost. The write-up on assets is valid for tax purposes. If the decision is taken to restate assets, it should be recorded in the company’s financial statements.

CIT payers; PIT payers carrying on business activities, provided that they keep their accounting records in accordance with the Spanish Code of Commerce or are required to keep records of their business activities; and NRIT payers with a PE in Spain may carry out a balance sheet restatement.

Tangible assets and investment property located in Spain and overseas may be restated.

When the decision to make the restatement has been taken, the restatement should be for all qualifying assets and their depreciation. Exceptionally, the decision to make the restatement may be taken for each individual real estate property.

Values should be restated for items recorded in the first balance sheet closed after the entry into force of Law 16/2012 (28 December 2012). Under Law 16/2012 (27 December 2012), the balancing entry for the corresponding monetary depreciation is the account restatement reserve. This reserve has high distribution limits.

The tax rate is 5% of the creditor balance of the restatement reserve. For companies, the taxable event should be understood to take place when the restated balance sheet is approved by the relevant body.

The tax is payable on the date when the return for the tax period corresponding to the balance sheet that records the restatement is filed.

The tax should be self-assessed and paid together with the CIT with the return for the tax period corresponding to the balance sheet that records the restatement. The return should refer to the restated balance sheet and include the additional information required by the Ministry of the Finance and Public Administrations.

If the return is not filed within the established filing period, the restatement will be invalidated.

**Financial goodwill**

To promote the internationalisation of Spanish companies, in 2002 a rule was introduced that financial goodwill arising from the acquisition of an interest in a non-resident company (financial goodwill being, in this case, the excess price paid for the acquisition of the business over its net book value at the date of the acquisition that cannot be allocated to the non-resident company’s assets in Spain) could be amortised up to a maximum of 5% per year.
Spain

To apply this tax relief, the following requirements had to be met:

- A minimum 5% interest had to be held in the non-resident company.
- The non-resident company had to be subject to a similar tax to Spanish CIT.
- The income obtained by the non-resident company had to be generated from business activities carried out abroad in accordance with Spanish CIT law.

Decisions of the European Commission dated 28 October 2009 (regarding interest in non-resident EU companies) and 12 January 2011 (regarding interest in non-resident non-EU companies) considered that this tax relief was unlawful state aid.

According to the Commission’s decisions, only acquisitions of interests in non-resident companies carried out before 21 December 2007 (or before 21 May 2011 for majority interests in non-resident companies established in countries with explicit obstacles to cross-border business combination transactions) can continue applying this tax relief until the financial goodwill is wholly amortised.

For companies that, in accordance with the above, can continue applying financial goodwill tax relief, the maximum 5% annual amortisation is temporally reduced to 1% for tax periods commencing in 2011, 2012, and 2013.

**Start-up expenses**
According to Spanish GAAP, start-up expenses are considered to be expenses in the financial year in which they are incurred. As no special rule is provided for tax purposes, they are deductible for CIT purposes in the year in which they are incurred.

**Financial expenses**
With effect for tax periods commencing on or after 1 January 2012, RDL 12/2012 and RDL 20/2012 have introduced the following rules for the deduction of financial expenses.

**General limits on the deduction of financial expenses**
The amount of net deductible financial expenses in the tax period is generally reduced to 30% of operating profit (similar to earnings before interest, taxes, depreciations, and amortisation [EBITDA], applying certain adjustments) for the year, financial expenses of less than EUR 1 million (or the proportional part for tax periods of less than one year) being deductible regardless of the 30% limit. For such purposes, net financial expenses will be considered to be the excess of financial expenses (excluding the non-deductible expenses mentioned below) with respect to income deriving from the assignment of capital to third parties accrued in the tax period.

For companies taxed under the tax consolidation regime, the deduction limit will refer to the tax group. Nonetheless, the company’s net financial expenses available for deduction at the time of its inclusion in the group will be deducted, up to the limit of 30% of its operating profit. When a company stops forming part of the group or the group is extinguished and there are net financial expenses available for deduction, the rule will be similar to that for assigning tax losses to the companies that formed part of the group.

Limits on the deduction of financial expenses will not be applicable for dissolved companies for the tax period in which they are dissolved, with exceptions for restructuring operations carried out under the tax neutrality regime and for companies that were previously taxed under the tax grouping regime.
Finally, limits on the deduction of financial expenses will not apply to (i) insurance companies or to (ii) credit institutions.

**Specific limit on the deduction of financial expenses on acquisitions of intra-group ownership interests**

Over the past few years, a large number of tax inspections have adjusted the tax effects of acquisitions of shares from group companies with intra-group debt. Many of these operations were acquisitions of shares in non-resident companies, so that the dividends and capital gains arising from the acquisition of the shares were covered by the exemption for the avoidance of double taxation established in Article 21 of the Spanish CIT Act. In addition, the lenders of these operations were usually located in low-tax territories.

In the absence of specific limitation rules on the tax deductibility of financial expenses in previous years, the reaction of the tax authorities to these kinds of operations has been to apply general anti-abuse rules.

With this scenario, RDL 12/2012 introduced a limitation rule for the deduction of intra-group financial expenses that is applicable for tax periods commencing on or after 1 January 2012. In accordance with this rule, financial expenses arising from debts with group companies generated from acquisitions of interests in other group companies or contributions to capital or equity of other group companies will not be deductible unless there is evidence that there are valid economic reasons for such expenses.

**Bad debt provisions**

Provisions for covering the risk derived from possible bad debts are tax deductible when, at the time the tax accrues, any of the following circumstances exists:

- Six months have elapsed since the obligation became due.
- The debtor is declared bankrupt.
- The debtor is prosecuted for an offence of embezzlement.
- The obligations have been claimed judicially or are the subject of a legal dispute or arbitration proceedings, and collection depends on the solution thereof.

Provisions for the credits listed below are not tax deductible unless they are the subject of arbitration or legal proceedings concerning their existence or the amount thereof:

- Credits owed or guaranteed by Public Law entities.
- Credits guaranteed by credit entities or mutual guarantee societies.
- Credits guaranteed by pledges (real property rights), ownership reservation agreements, or liens, except in the event of loss or degradation of the guarantee.
- Credits guaranteed by a credit or guarantee insurance contract.
- Credits that have been expressly extended or renewed.

Provisions to cover the risk derived from possible bad debts of persons or companies related to the creditor will not be deductible, except in the case of legally declared insolvency, and neither will provisions made on the basis of overall estimates of the risk of bad debts of clients and debtors.

Special rules apply to bank entities.
Spain

**Severance pay**
Severance pay is not tax deductible for CIT purposes when it exceeds, for each recipient, EUR 1 million or, if it exceeds this amount, the amount that is exempt under Spanish PIT law.

**Charitable donations**
Donations are considered to be non-deductible expenses for CIT purposes.

This notwithstanding, a tax credit may be availed for donations to non-profit organisations that comply with certain requirements. The tax credit in this case is 35% of the donation.

In addition, the tax credit is not limited to 35% (or to 25% in 2012 and 2013) of the donating company's gross tax payable less the tax credits for internal and international double taxation and tax relief for income obtained in Ceuta and Melilla, for export activities, and for local public services that is applicable for other tax credits.

The tax credit base cannot exceed 10% of the taxable income of the financial year. Any excess may be carried forward for a period of ten years.

For donations to listed priority sponsorship activities, the tax credit may be increased by 5% (up to 40%) and the tax credit base 10% limit can be increased to 15%.

**Fines and penalties**
Penalties imposed due to the failure to pay taxes and surcharges for late filing/payment or for other tax infringements are not tax deductible.

Late-payment interest recorded as an expense is, in principle, tax deductible.

**Taxes**
Taxes, other than CIT, that are recorded as an expense due to their nature (e.g. business and professional activities tax, but not withholdings) are tax-deductible expenses. In some cases, indirect taxes, such as non-deductible VAT or transfer tax, can be added to the value of assets for depreciation purposes.

**Net operating losses**
Tax losses may be carried forward for 18 years, but they cannot be carried back. There are no tax loss 'baskets' (operating/capital) under Spanish law.

The amount of tax-loss carryforwards that may be offset in tax periods beginning in 2011, 2012, and 2013 is limited for large companies. The limits for tax periods beginning in 2012 and 2013 are as follows:

- For companies whose turnover in the 12 months preceding the beginning of the tax period was between EUR 20 million and EUR 60 million, the amount of tax-loss carryforwards that may be offset is limited to 50% of their previous taxable income.
- For companies whose turnover in the 12 months preceding the beginning of the tax period was EUR 60 million or more, the amount of tax-loss carryforwards that may be offset is limited to 25% of their previous taxable income.

Complex rules may limit the use of tax losses of a company dissolved as a result of a restructuring operation and, in certain circumstances, when it has a change of shareholders.
**Payments to foreign affiliates**

Supplies of goods or services by a company not established in Spain to a Spanish group company must be valued at arm’s length. If recorded expenses for such goods/services exceed the arm’s-length price, the tax deductibility of the excess amounts could be challenged in a tax inspection. The tax deductibility of expense charges received from tax havens is fully disallowed unless proper evidence of an actual service valued at arm’s length can be provided.

Management services received from outside Spain and recorded as distributions of costs of a group centre do not have to be documented in a written agreement entered into before the commencement of the services to ensure the tax deductibility of the expenses (as previously was the case), although it would be recommendable to have such an agreement. For any other types of services, an agreement recorded before a notary public is not obligatory under Spanish law, but it is advisable.

As regards the taxation in Spain of the foreign company that supplies the services, the WHT rate to be applied on the gross income obtained by the company is 24.75%. Dividends, interest, and capital gains generated as a result of a transfer of assets are taxed at a 21% WHT rate. If management services, technical assistance, or the performance of studies are solely used outside Spain and are linked to business carried on abroad, then no WHT is applicable. In addition, under most tax treaties signed by Spain, ‘business profits’ obtained in Spain by non-residents are exempt from WHT. However, ‘business profits’ is a miscellaneous residual category. For instance, if the amount obtained qualifies as a royalty payment, WHT is applicable at the reduced tax treaty rates if the foreign company can obtain a document from the tax authorities of its country of residence certifying its tax residence. If no tax treaty applies, then the above 24.75% WHT rate is applicable (see the Withholding taxes section for more information).

**Group taxation**

**Tax groupings for CIT purposes**

Under Spanish tax law, companies can form a group and apply a special tax consolidation regime for CIT purposes. Companies forming a tax group must formally pass a resolution agreeing to do so before the beginning of the first tax year in which the tax consolidation regime will be applied.

To apply the tax consolidation regime, the controlling company of the tax group must hold a 75% or higher interest, either directly or indirectly, in the companies forming the tax group at the beginning of the first tax year in which the tax consolidation regime is applied, and this interest must be maintained during the year unless the dependent company is dissolved. The interest requirement is 70% for companies listed on a stock exchange.

The main characteristics of the tax consolidation regime are as follows:

- The taxable income of the tax group is the sum of the taxable incomes of each of the companies forming the group.
- The tax losses of any of the companies forming the group can be offset against the tax profits of any of the other group companies.
- For the calculation of consolidated taxable income, the tax profits (losses) generated from transactions carried out between group companies are eliminated and only included in consolidated taxable income when:
  - they are carried out with third parties
Spain

• a group company participating in the internal operation ceases to form part of the tax group, and
• the tax consolidation regime is no longer applied by the group for whatever reason.

• Specific limitations apply regarding the offsetting of tax losses or the application of tax credits generated by the group companies before they formed part of the tax group. Such tax losses/credits may be offset (applied) by the tax group up to the limit of the tax profits/tax liability of the company that generated the losses/credits.
• No WHT is chargeable on payments made between companies of the tax group (e.g. interest, dividends).

Tax groupings for VAT purposes
Groups of companies may also choose to be taxed under a special tax consolidation regime for VAT purposes. This special regime is optional, but once it has been opted for, it must be applied for a minimum of three years, which is extendible unless it is expressly waived by the companies.

The VAT consolidation regime may only be applied by groups resident in Spanish VAT territory that do not form part of any other VAT grouping.

The controlling company of the group must be a legal entity or PE that is not dependent on any other entity established in Spanish VAT territory, and it must hold at least a 50% interest in the subsidiary companies of the group for the entire calendar year.

With the application of the VAT consolidation regime, there are two different options for taxation:

• The aggregation system, where the balances of the VAT returns of the individual companies of the group are totalled. The right to a tax deduction is exercised by the individual companies.
• The consolidation system, where an individual company can opt to reduce VAT taxable income for inter-company operations, which is limited to the ‘external’ cost.

Transfer pricing
All related-party transactions must be valued at market price, following the arm’s-length standard (e.g. the value that in normal market conditions would have been established between unrelated parties).

For this purpose, related persons or entities shall be:

• A company and its shareholders or members.
• A company and its board members or directors.
• A company and the spouses of or persons related to its shareholders or members, board members, or directors, either in a direct line or collaterally, by consanguinity or affinity up to the third degree.
• Two companies of a group.
• A company and the shareholders or members of another company, when both companies form part of a group.
• A company and the board members or directors of another company, when both companies form part of a group.
• A company and the spouses of or persons related to the shareholders or members of another company, either in a direct line or collaterally, by consanguinity or affinity up to the third degree, when both companies form part of a group.
Spain

- A company and another company in which the former company has at least a 25% holding, held indirectly, in its share capital or shareholders’ equity.
- Two companies in which the same shareholders or members or their spouses, or persons related to them either in a direct line or collaterally, by consanguinity or affinity up to the third degree, have at least a 25% holding, whether directly or indirectly, in their share capital or shareholders' equity.
- A company resident in Spanish territory and its PEs abroad.
- A company not resident in Spanish territory and its PEs in Spanish territory.
- Two companies forming part of a group taxed under the tax regime for groups of cooperative companies.

For cases where association exists as a result of a shareholder/member-company relationship, the shareholding must be 5% or more, or 1% if the shares are quoted on a regulated stock exchange. The reference to directors shall include de facto and de jure directors.

The determination of the market value by taxpayers must be done through the application of one of the following transfer pricing methodologies, in order of preference as follows: comparable uncontrolled price (CUP) method, cost plus (CP) method, or resale price method (RPM), usually referred to as traditional transaction methods.

If the application of any of the above methods is not possible, the profit split method (PSM) or transactional net margin method (TNMM) can be applied, usually referred to as transactional profit methods.

Documentation is also a requirement, with taxpayers required to produce group-level and taxpayer-specific documentation for each tax year. Related persons or entities must keep such documentation available for the tax authorities as from the end of the voluntary return or assessment period in question. Some exceptions are established for these documentation requirements.

Documentation is always required for transactions with entities, whether related parties or otherwise, that are resident in tax havens.

Please note that specific penalties may be imposed in the event of the absence of documentation or where data are omitted, inaccurate, or false.

**Thin capitalisation**
Thin capitalisation rules have been repealed effective for tax periods starting on or after 1 January 2012.

**Controlled foreign companies (CFCs)**
Spanish CFC rules seek to avoid the effects produced when Spanish tax resident entities or individuals place their capital in low-taxed foreign entities to avoid including passive income generated by such capital in their taxable bases.

Under this regime, Spanish tax resident entities are subject to Spanish CIT on certain kinds of positive passive income obtained by non-resident entities in which they own, individually or together with related entities or persons, more than 50% of the share capital, equity, profits, or voting rights, provided that the CIT due by the non-resident entity is below 75% of the tax that would be due in Spain.
Spain

CFC rules are not applicable to EU resident entities if they are incorporated for economic reasons and carry on a business activity.

The types of passive income to which CFC rules apply are as follows: (i) income from immovable property not used for business activities; (ii) income derived from equity in other entities or from capital assigned to third parties (interest and dividends); (iii) transfer of the above mentioned immovable property and financial assets; and (iv) income arising from credit, financial, insurance, and service activities carried out directly or indirectly with related Spanish tax resident entities in which a tax deductible expense is generated.

Passive income mentioned in numbers (i) to (iii) above obtained by the non-resident entity will not be considered taxable income of the Spanish tax resident entity when it arises from entities in which the latter holds a direct or indirect interest of over 5%, provided that the non-resident entity controls and manages the interest using the relevant human and material resources and provided at least 85% of the income obtained from such participated entities comes from business activities.

Moreover, the passive income mentioned in numbers (i) to (iii) above will not be included in the Spanish entity’s taxable base when it amounts in total to less than 15% of the total profits obtained by the CFC or less than 4% of its total turnover.

**Tax credits and incentives**

**Foreign tax credit**

See Foreign income in the Income determination section for a description of double tax relief.

**CIT relief**

No specific tax relief is established in Spanish law for foreign investors. Relief may be availed of by Spanish and foreign-owned companies alike. The tax relief available under CIT law in Spain is as follows.

Most of the tax credits that have been established to promote certain investments have been or must be reduced and eliminated. However, the largest tax credits are maintained (tax credit to prevent internal and international double taxation, tax credit for the reinvestment of extraordinary profits, and tax credit for R&D).

**Tax relief for business activity/place of business activity**

- 50% tax credit on CIT levied on income obtained in Ceuta and Melilla through companies established and carrying on activities during a full business cycle in these enclaves because of their specific geographic location.
- 99% tax credit on the CIT levied on income obtained from the supply of local public services, except when the state company in question is owned, partially or wholly, by a quoted/non-quoted company or individual.
- 13% tax credit on the CIT levied on income obtained from exports of films, books, and similar cultural items if profits are reinvested in the acquisition of assets used for such activities. This tax credit will be eliminated in 2014.
R&D credits
A 25% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average R&D expenses incurred by the company during the previous two years, the tax credit is 42% for the excess amount.

An additional tax credit of 17% can be availed of for staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.

An 8% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets that are exclusively assigned to R&D activities.

Technological innovation credits
A 12% tax credit can be availed of for technological innovation activities.

Tax credit for environmental investments
The tax credit for environmental investments in installations is 8%.

The tax credit for environmental investments in vehicles and the tax credit for environmental investments in assets to promote the exploitation of renewable energies have been eliminated.

Reinvestment of extraordinary income
A 12% tax credit can be availed of for sales of assets that are used for the company's business activities when the amount obtained from the sale is reinvested in similar types of assets during a four-year period (as from one year prior to the sale up to three years after the sale). This tax credit therefore reduces the effective tax levied on sales of certain assets to 18%.

In the case of a sale of company shares, to be eligible for this tax credit, the interest in the company must be a minimum of 5% and must have been held for more than one year prior to the sale.

The asset in which the reinvestment is made must be maintained for five years (three in the case of moveable assets) unless its useful life is shorter.

Other CIT relief
The tax credit for film productions (18% of qualifying production costs for film producers, 5% for financial co-producers) will be eliminated for tax periods commencing on or after 1 January 2015.

The tax credit for investments in heritage assets (2% in 2013) and book publishing (1% in 2013) will be eliminated for tax periods commencing on or after 1 January 2014.

A tax credit of 1% may be obtained on expenses incurred by companies to familiarise staff in the use of new technologies. These expenses are not a benefit in kind for the staff. This tax credit is expected to be eliminated in 2014.

A tax credit can be applied for increases in the number of disabled workers contracted per year on a permanent and full-time basis (EUR 6,000 per worker contracted). This increase is calculated by taking the average number of company workers meeting these requirements in the tax year in question and comparing it with the company's average number of staff in the previous tax year.
Spain

Limits on the amount of tax credit applied
The combined sum of all investment tax credits may not exceed 35% of the company's gross tax payable less any tax credits for internal and international double taxation and tax relief for income obtained in Ceuta and Melilla, for export activities, and for local public services. This percentage is reduced to 25% for tax periods commencing in 2012 and 2013.

When R&D and technological innovation tax credits for expenses and investments in the year exceed 10% of the company's gross tax payable, less tax credits and relief mentioned above, the limit will be 50% (60% for tax periods commencing on or after 1 January 2014).

For tax periods commencing in 2012 and 2013, these limits will also apply for the tax credit for reinvestments of extraordinary profits.

Time limits for the application of tax credits
Tax credits that are not applied in the tax period owing to insufficient tax payable may be applied in tax periods ending in the 15 years immediately thereafter (ten years for the tax periods commencing before 1 January 2012). However, R&D and technological innovation tax credits may be applied in tax periods ending in the 18 years immediately thereafter (15 years for tax periods commencing before 1 January 2012).

Special tax regimes
Special tax regimes are applicable, among others, in the following cases:

Spanish and European Economic Interest Groupings and Temporary Consortia of Entities

- Spanish Economic Interest Groupings (SEIGs) that meet certain requirements will not be subject to Spanish CIT on the part of the taxable income that corresponds to members resident in Spain for tax purposes. Such part of the positive or negative taxable income shall be deemed to be the profits/losses of the SEIG members. The proportional part of tax credits and payments in advance will also be assigned to the Spanish tax resident members of the SEIG where they are subject to CIT or PIT. Dividends distributed to SEIG members that have been subject to imputation will not be taxed under CIT or PIT on distributions. Dividends distributed to Spanish non-resident SEIG members will be taxed in accordance with the Spanish NRIT law and Conventions for the Avoidance of Double Taxation.

- European Economic Interest Groupings (EEIGs) will be taxed under the above-mentioned regime with the following exception: EEIG will not be subject to Spanish CIT.

If the EEIG is not resident in Spain for tax purposes, Spanish tax resident members will include the corresponding part of the profits or losses determined for the grouping, corrected by applying the rules for determining taxable income for CIT or PIT purposes, as applicable. When the activity carried out by the members through the grouping determines the existence of a PE abroad, the rules provided for in this law or in the respective treaty for the avoidance of double international taxation will be applicable.

Non-Spanish tax resident members will only be subject to Spanish NRIT when the activity they perform through the grouping determines the existence of a PE in Spanish territory.
Dividends distributed to non-Spanish tax resident members that have been subject to imputation will not be taxed in Spain on the distribution.

- Temporary Consortia of Entities (TCEs) are taxed under the SEIG regime. As an exception, members of a TCE that operates abroad may benefit from exemptions for income obtained abroad.

**Restructuring transactions**

The special tax regime for restructuring transactions is a tax neutrality regime implemented under EU Directive 2009/133. As a general rule, under this regime, asset transfers carried out through such transactions do not have any tax implications (either from a direct, indirect, or other Spanish tax perspective) for the parties involved (transferor, beneficiary, and shareholder), until a subsequent transfer takes place that is not protected by this regime.

The transactions that can be taxed under this regime are mergers, global transfers, spin-offs of business units/majority interests, splits, share-to-share transactions, contributions of business units, and contributions of assets (this last transaction is not fully tax-protected). Each of them must comply with a series of requirements for the application of the regime.

The tax credit position of a company dissolved as a result of a tax-protected restructuring transaction is ‘acquired’ in full by the beneficiary company in the case of universal succession.

The ‘acquired’ tax credits only include tax credits that are obtained in relation to assets transferred in transactions where the transferor is not dissolved or the succession is not a full succession for Spanish commercial purposes.

Regarding tax losses, the Spanish tax authorities hold the view that tax losses may not be transferred when the transferring company is not dissolved. When the transferring company is dissolved, the tax losses may be applied by the beneficiary company, subject to certain restrictions.

Financial goodwill arising in a merger transaction is amortised for tax purposes at a maximum annual rate of 5% at the level of the Spanish beneficiary company of the merger (1% for tax periods commencing in 2012 and 2013) if the seller of the shares giving rise to the ‘merger’ goodwill has been actually taxed for the equivalent capital gain in Spain or in any other EU country (excluding tax havens), provided that certain requirements are met. Amortisation of financial goodwill does not have to be recorded in the profit and loss account for it to be tax deductible, although an annual amount must be charged to a non-distributable reserve (either from annual profits or from freely-distributable reserves), which must be at least the tax-deductible amount.

This tax regime cannot be applied if the transaction is carried out for the purpose of tax fraud or evasion (anti-abuse clause). An additional anti-abuse clause in line with the clause established by the EU directive is established in Spanish law to ensure that the tax regime cannot be applied if the transaction is not carried out for valid economic reasons, such as the streamlining of activities or group restructuring to gain efficiency, but to obtain a tax benefit.

The tax authorities must be notified of the application of this tax regime.
Spain

Tax transparency
Tax transparency (under international CFC rules) is not applicable for companies resident in the European Union. See CFCs in the Group taxation section for more information.

Venture capital companies and funds
Venture capital companies (VCCs) and funds (VCFs) may benefit from the following tax regime if certain requirements are met:

- Dividends from target companies may benefit from a 100% tax credit for the avoidance of double taxation or tax exemption.
- Capital gains arising from the transfer of shares in target companies may be 99% exempted from CIT, provided that such shares have been held for a period between two and 15 years.
- Profit distributions to VCC and VCF shareholders may benefit from a 100% tax credit for the avoidance of double taxation if the shareholders are Spanish tax residents or have a PE in Spain. Income from profit distributions to non-Spanish tax resident shareholders without a PE in Spain is not subject to taxation in Spain unless it is obtained through a tax haven. The same regime applies to the transfer of shares in VCCs and VCFs.

Collective Investment Institutions (CIIs)
CIIs are subject to CIT at a reduced rate of 1%. They are not entitled to apply any tax credits. Dividends distributed by these institutions are subject to the general WHT regime. Shareholders are taxed on dividends received from the CII and on capital gains obtained for the transfer of the CII without being entitled to the application of a tax credit for the avoidance of double taxation.

Lease transactions
Financial leasing contracts with a purchase option that may be exercised at the end of the lease period may benefit from a special tax regime if they meet certain requirements. According to this regime, the lessee may deduct the following expenses from its taxable income:

- The part of the lease payments that corresponds to the financial charge (interest) paid to the lessor.
- The part of the lease payments that corresponds to the recovery of the cost of the leased object. Tax deductibility for this amount may not exceed the result of applying twice the straight-line depreciation/amortisation rate applicable on the leased object in accordance with the official depreciation/amortisation tables.
- For tax periods commencing in 2013 and 2014, the deductible amount that corresponds to the recovery of the cost of the leased object is limited to the amount that would be tax deductible with the application of this tax regime.

Spanish holding companies of foreign companies (Entidad de Tenencia de Valores Extranjeros or ETVE) regime
Spanish resident companies whose corporate purpose includes the holding and management of foreign companies' shares are granted some tax benefits, subject to compliance with certain requirements.

The tax authorities must be notified of the application of this tax regime.
Companies taxed under this tax regime are granted a tax exemption on dividends and capital gains when they have a 5% direct interest or, if their interest is less than 5%, when the acquisition value of their interest is at least EUR 6 million.

In addition, the distribution of profits by the holding company to non-resident companies or individual shareholders is not taxable in Spain (unless the profits are distributed to a tax haven). Resident company shareholders are now entitled to an internal tax credit on dividends under Spanish law.

**Small and medium-sized companies**

Small and medium-sized companies are eligible for tax relief, such as accelerated depreciation/amortisation or more favourable bad debt provision treatment. Accelerated depreciation/amortisation can be applied for assets acquired using amounts obtained from sales of trading assets. To be eligible for this relief, turnover in the previous tax year must not exceed EUR 10 million. In the case of a group, the turnover of all the companies must be considered for this purpose.

A reduced CIT rate of 25% is levied on the first EUR 300,000 of annual tax profits.

**Special tax regime for companies that lease housing**

Companies whose main business activity is the lease of housing located in Spain that they have constructed, promoted, or acquired may apply a special tax regime that significantly reduces CIT liability, provided that certain requirements are met.

**Real Estate Investment Trust Regime (SOCIMI)**

A special tax regime is established in Spain for listed companies that make investments in the real estate market (called SOCIMIs in Spain) and meet certain requirements. SOCIMIs apply a 0% CIT rate and have strict profit distribution obligations.

**Special economic and tax regime of the Canary Islands**

Due to the remoteness and isolation of the Canary Islands, they have traditionally enjoyed a special economic and tax regime with specific economic and tax measures different to those established for the rest of Spain. As a result, they have one of the most profitable tax regimes in Europe.

Regarding direct taxes, the Canary Island economic and tax regime establishes the following tax benefits for companies and businesses domiciled in the Canary Islands or with a PE in the Canary Islands:

- Up to 90% of annual undistributed accounting profits can be allocated to a special investment reserve and not taxed, provided that they are invested within a four-year period (including the period during which the profits are obtained) in qualifying assets in the Canary Islands or in certain public debt securities or shares in other companies operating in the Canary Islands that invest in qualifying assets.
- Most Spanish CIT deductions are 80% higher (a total increase of at least 20%) for companies and businesses located in the Canary Islands.
- A 25% tax credit can be availed of for investments in new tangible fixed assets and, subject to compliance with certain requirements, second-hand assets.
- A tax credit of 50% of the CIT liability is granted for taxable income generated from the production of tangible goods while carrying on agricultural, farming, industrial, and fishing activities.
- A tax credit of 90% of the CIT liability is granted for profits of shipping companies generated from ships registered in the Canary Islands Special Ships and Shipping Companies Register. For sailors of such ships, a 50% tax exemption can be applied.
Spain

to PIT levied on their employment income and a 90% reduction to the part of their Social Security contributions paid by their employers.

Regarding indirect taxes, in addition to lower taxation through the Canary Island general indirect tax (IGIC at the general rate of 7%) compared to VAT and specific IGIC exemptions, the following should be noted:

- Companies domiciled in the Canary Islands that are CIT payers and are newly incorporated, start new activities, or improve their existing activities may benefit from the following tax relief:
  - Exemption from IGIC/transfer tax on supplies and imports of capital goods if the company has a deduction percentage that is not 100%.
  - Shipping companies qualify for an exemption from transfer tax for any contracts related to ships registered in the Canary Islands Special Ships and Shipping Companies Register.
  - Custom Free areas are available. Upon EU demand, there are restrictions on the application of certain tax relief (special investment reserve, tax credits for production, and new business indirect tax relief) for the following industrial sectors: shipbuilding, synthetic fibres, automobile, iron and steel, and coal.

Canary Islands Special Zone tax regime
In January 2000, a special Canary Island Special Zone tax regime was approved by the European Union. The main regulations of this regime, established by the Spanish government, are as follows:

- New companies may qualify for the application of this tax regime and, on the approval of the tax authorities, may be registered up to 31 December 2013 (applying the tax regime up to 31 December 2019). This may be extended by the European Union.
- To qualify for this tax regime, the company must:
  - covenant to make an investment in fixed assets of at least EUR 100,000 in Gran Canaria or Tenerife, or EUR 50,000 in Fuerteventura, Lanzarote, La Palma, El Hierro, or La Gomera, within the first two years of their business activity
  - covenant to create at least five new jobs in Gran Canaria or Tenerife, or three in the other islands
  - provide a description of the business activities to be carried out that support the company’s solvency, viability, international competitiveness, and contribution to the economic and social development of the Canary Islands
  - establish its registered office and place of effective management in the Special Area
  - have at least one company director who resides in the Canary Islands, and
  - carry out one of the qualifying business activities.
- The territory where this tax regime can be applied includes all the Canary Islands, except for companies that intend to carry out industrial or commercial activities involving tangible goods, which must be located in specific controlled areas.
- Companies applying the tax regime may operate outside the Canary Islands through branches if separate accounting books are kept, but the tax regime will not be applicable to such branches’ activities.
- Activities for which the tax regime can be applied include a wide range of industrial and commercial activities, most services and holdings. Credit and insurance entities are excluded, and no stock exchanges are allowed.
- Companies applying the tax regime are subject to CIT in Spain at a 4% rate for companies authorised from 1 January 2007 onwards and at a variable rate of between 1% and 5% for companies authorised before this date. The special 4%
rate is levied on a maximum amount of taxable income, which will depend on the number of jobs created and the company's business activity. These thresholds are considerably high, and the tax incentive is not usually capped. The general CIT regime establishes a 30% tax rate for Spanish companies. For small companies, the tax rate is 25% for the first EUR 300,000 of profits and 30% for remaining profits.

- Under this tax regime, companies can avail themselves of large tax exemptions for IGIC, transfer tax, and stamp duty, and large reductions and simplified regulations for local taxes.
- Interest and some other returns from moveable goods paid by companies under this tax regime are exempt from Spanish NRIT, except when paid to residents in tax havens.
- Benefits established in the EU Parent-Subsidiary Directive are extended to non-EU residents. These benefits are not applicable when the income is paid to residents in tax havens.
- A fee of EUR 820 is payable to be registered as a company that applies this tax regime, and an annual fee of EUR 1,225 is payable to continue to be registered as qualifying for the tax regime.

Finally, the Spanish Parliament has recently proposed some amendments to the law regulating the Canary Island Special Zone tax regime.

---

**Withholding taxes**

Ordinarily, WHT is the mechanism by which the Spanish tax authorities collect the final tax levied on non-residents. In the case of resident beneficiaries, however, it is simply an advance payment of a tax that is then normally self-assessed by the resident taxpayer in the final annual tax return.

The advance payment system of WHT for resident beneficiaries referred to above also applies if non-resident companies/individuals not established in Spain sell their title to Spanish real estate. In this case, the acquirer of the real estate must levy a 3% WHT on the selling price on account of the 21% tax chargeable to the seller on its capital gain. Other capital gains (for instance, from a sale by a non-resident of a substantial interest in a Spanish company where neither a tax treaty nor internal rules establish a tax exemption) are taxed in the hands of the non-resident transferor, but the mechanics of levying the tax are not those of a WHT. In this case, the non-resident’s tax is paid directly, through its representative or by the depositor or manager of the assets in question, if any.

The following table states the general WHT rates on income obtained by resident/non-resident companies. The most significant peculiarities regarding the rates for each type of income are stated in footnotes to the table.

</table>

**Notes**

The general rates in the table above are for guidance only and should not be treated as tax advice.

The rates above are for income obtained by non-residents that is not related to any PEs they may have in Spain.

* Aside from these tax treaties, the following tax treaties are not yet in force, as they are currently being negotiated or are not yet approved or published: Argentina, Azerbaijan, Belarus, Cyprus, Dominican Republic, Kuwait, Namibia, Nigeria, Oman, Peru, Qatar, Senegal, Syria, and Uzbekistan.

** These treaties are currently being renegotiated.
Spain

1. If a corporate taxpayer, as a shareholder, is entitled to full tax relief on the dividend received, no WHT is levied. As a general rule, corporate shareholders with at least a 5% interest held for at least one year are granted full tax relief.

2. a. The 21% WHT rate does not apply if, amongst other cases, the recipient is a resident bank or savings or other financial institution subject to CIT, provided that this income is not portfolio income. In addition, no WHT is levied on interest arising between companies taxed under the tax consolidation regime.

b. A 21% WHT rate is levied on income generated under royalty and technical assistance agreements, from leases or from the granting of rights when ownership is not transferred. A 24.75% rate is levied on fees received by a company for the transfer of rights to an image or consent or authorisation to its use.

3. Implementation of the EU Parent-Subsidiary Directive in Spanish law gives EU shareholders a WHT exemption on dividends from Spanish companies, subject to compliance with certain requirements. Luxembourg recipients of income that are companies under paragraph 1 of the Protocol to the Tax Treaty with Spain (holding companies) are not allowed this exemption.

4. The EU Interest and Royalties Directive WHT exemption for interest obtained by EU lenders is applicable when appropriate.

5. Taxable income from supplies of services, technical assistance, or assembly/installation work under engineering contracts provided or carried out by non-resident companies with no PE in Spain does not follow the general rule for gross income. In such cases, total income can be reduced by related staff costs, certain supplies (water, electricity, telephone), and materials used for the services/work, provided that, in the case of staff costs, evidence can be furnished that they were actually taxed in Spain. According to the EU Interest and Royalties Directive, royalties paid to other EU member state associate companies are exempt from WHT.

6. A 5% WHT is levied if the recipient is a company that holds at least 10% of the capital of the company paying the dividends; no WHT is levied if the recipient company holds at least 75% of the capital of the company paying the dividends.

7. Levied if the recipient is a company holding at least a 10% interest in the paying company; otherwise, a 15% rate is levied.

8. Interest paid by certain public institutions is tax exempt.

9. Interest paid to certain public institutions is tax exempt.

10. Interest arising from the acquisition of commercial, industrial, or scientific equipment is tax exempt.

11. Interest paid on loans granted by a bank or other financial institution is tax exempt.

12. For royalties for any copyright of artistic, scientific, or literary work (including cinematograph films and films or tapes for radio or television broadcasting), the rate levied is 14%.

13. Levied if the recipient is a company holding at least a 25% interest in the paying company; otherwise, a 15% rate is levied.

14. No WHT is levied on interest when both contracting states agree this and the loan is for no less than five years.

15. No WHT is levied on dividends if the beneficial owner is a company (other than a partnership) that holds at least 25% of the capital of the company paying the dividends.

16. Levied if the recipient is a company holding a direct interest of at least 50% in the paying company for at least one year; otherwise, a 15% rate is levied.

17. No WHT is levied if the recipient is a company holding at least a 25% interest in the paying company.

18. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 50% of whose shares are directly or indirectly held by non-residents. This clause will not apply if the company can prove that it carries out important industrial or commercial activities and does not merely manage or hold shares.

19. A tax exemption can be applied to interest on commercial loans, loans guaranteed by public bodies for the promotion of exports, and on current accounts in banks or nominative advances between banks of both contracting states.

20. Royalties for any copyright of literary, theatrical, musical, or artistic work (with some exceptions, such as films and TV programs) are exempt from WHT.

21. 5% WHT is levied if the recipient (beneficial owner) is the shareholder of the paying company with at least a 20% interest; otherwise, 10% WHT is levied.

22. No WHT is levied if the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state or its political divisions; (iv) the recipient is a financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.

23. Levied if the recipient is a company with at least a 25% interest in the paying company with voting rights; otherwise, a 15% rate is levied.

24. The maximum WHT is 10% for interest paid to financial institutions for loans and credits granted for a minimum term of ten years for the purchase of capital equipment.

25. Interest arising from securities issued by a contracting state is exempt from WHT.

26. A 10% WHT rate is levied on royalties for copyrights of any literary, scientific, or artistic work (including films and TV programs).

27. Levied if the beneficial owner is a company (excluding partnerships) with at least a 25% interest in the paying company held directly or indirectly; otherwise, a 15% rate is levied.
28. A reduced WHT rate is only levied if the income is taxed in Canada; otherwise, the general rate is levied.
29. Levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly; otherwise, a 10% rate is levied.
30. Interest arising from bank or insurance company loans, bonds, some securities that are regularly negotiated on stock markets, and credit sales of industrial equipment are taxed at a 5% tax rate.
31. A 5% WHT rate is levied on royalties for the use of industrial, commercial, or scientific equipment.
32. No WHT is levied on 80% of gross royalties for the use of industrial, commercial, or scientific equipment.
33. A 0% WHT rate is levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly.
34. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a loan granted by a bank or financial institution resident in a contracting state.
35. A 5% WHT is levied if the beneficial owner is a company that directly holds at least 20% of the capital of the company paying the dividends.
36. a. 5% WHT is levied if the interest is paid on a long-term loan (more than five years).
b. No WHT is levied: (i) if interest is paid to a Croatian bank, (ii) on interest arising from the acquisition of commercial, industrial, or scientific equipment, (iii) on interest arising from a credit sale.
37. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a long-term loan (five or more years) granted by a bank or financial institution resident in a contracting state.
38. Royalties for copyrights of any literary, theatrical, musical, or artistic work, excluding films and TV programs, are tax exempt if the recipient is resident in the other contracting state and taxed on such income in such state.
39. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial, or scientific equipment, the sale of merchandise from one business to another business, or the financing of construction, installation or assembly works. No WHT is levied if the interest is paid on a long term loan (more than five years) or if the interest is paid to the other contracting state or one of its political subdivisions or a financial institution totally owned by the other contracting state or one of its political subdivisions.
40. A 5% WHT rate is levied on royalties for copyrights of any literary, theatrical, musical, or artistic work (excluding films and TV programs).
41. A 5% WHT rate is levied on the gross amount of the dividends if the beneficiary owner is a company (other than a partnership) that has at least a 25% direct interest in the company paying the dividends.
42. No WHT is levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its public bodies or local authorities, or if the interest is paid to the Central Bank of the other contracting state.
43. No WHT is levied if the recipient is a company with at least a 50% direct interest in the company paying the dividends, provided that the dividends are distributed from profits taxed in Spain.
44. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the interest arises from a loan or credit granted by a contracting state or its political divisions; (iv) the recipient is a qualifying financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.
45. No WHT is levied if the French company has at least a 10% direct interest in the company distributing the dividend.
46. No WHT is levied if the French company receives interest (i) from the other contracting state or any of its political divisions, or (ii) from a resident in the other contracting state from an underlying commercial or industrial activity, (iii) in connection with a credit sale of commercial, industrial, or scientific equipment, or (iv) for a loan granted by a financial institution.
47. No WHT is levied on royalties on copyright of any literary or artistic work (excluding films and TV programs) if the recipient is the beneficiary owner or royalties paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.
48. Dividends and interest may be taxed at source under domestic law when (i) they are generated from any right (including credits) that allows for shares in profits (such as shares, bonds, or participating loans) and (ii) they are tax deductible for the debtor. Notwithstanding, WHT may not exceed 15% when the beneficial owner is tax resident in the other contracting state.
49. Levied if the recipient is a company with at least a 25% direct interest in the paying company; otherwise, a 10% rate is levied.
50. No WHT is levied on interest if: (i) the interest is paid by a contracting state, one of its political subdivisions, or one of its local entities; (ii) the interest is paid to the other contracting state, one of its political subdivisions, or one of its local entities or to a body (including financial institutions) of such contracting state; or (iii) the interest is paid to another body (including financial institutions) in relation to loans granted by virtue of an agreement between both contracting states.
51. No WHT is levied on interest paid to the Central Bank of the other contracting state.
52. No WHT is levied on interest paid to companies in the other contracting state if the operation that generates the debt has been authorised by the government of the state where the company paying the interest is resident.
53. A 10% WHT rate is levied on royalties for the use or cession of use of industrial, commercial, or scientific equipment. The general 20% WHT rate is levied on technical services and other royalties.

54. No WHT is levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its local entities or if the interest is paid to the Central Bank or a financial institution controlled by the other contracting state, its political subdivisions, or its local entities.

55. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment.

56. Levied if the recipient is a company with at least a 20% interest in the paying company; otherwise, a 10% rate is levied.

57. Royalties for copyright on literary, theatrical, musical, or artistic work are taxed at a 5% WHT rate. Royalties on films or other means of audio or video transmission, for the use or right to use industrial, commercial, or scientific equipment, or on scientific works or under agreements between both states are taxed at an 8% rate.

58. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial, or scientific equipment, the sale of merchandise from one business to another business, or loans granted by a financial institution.

59. No WHT is levied on interest if the beneficial owner of the interest is a resident of the other contracting state and: (i) the beneficial owner of the interest is that contracting state, its central bank, a political subdivision, or a local authority; (ii) the interest is paid by the contracting state in which the interest arises or by a political subdivision, a local authority, or non-profit-making statutory body thereof; (iii) the interest is paid in respect of a loan, debt-claim, or credit that is owed to, or made, provided, guaranteed, or insured by that contracting state or a political subdivision, a local authority, or an export facilitating agency thereof; (iv) the beneficial owner of the interest is a financial institution; or (v) the beneficial owner of the interest is a qualifying pension fund and the income of that fund is generally exempt from tax in that other contracting state.

60. A 4% WHT rate is levied on royalties for copyright on literary, theatrical, musical, or artistic work (excluding films and TV programs).

61. Reduced WHT rates are not levied when more than 75% of the shares of the recipient company resident in a contracting state are owned, directly or indirectly, by non-residents and the income generated by the paying company is not taxed in its country of residence.

62. Levied if the recipient is a company with at least a 25% interest in the paying company; otherwise, a 15% rate is levied.

63. No WHT is levied on interest arising from a loan guaranteed by a contracting state.

64. Consideration received for waiving, either totally or partially, the use or right to use goods or rights is considered to be a royalty.

65. No WHT is levied on interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or on interest paid on a long-term loan (five or more years) granted by a bank or credit institution resident in a contracting state.

66. No WHT is levied if the recipient is a company with at least a 5% direct interest in the paying company.

67. A 5% WHT rate is levied on royalties for technical services.

68. No WHT is levied on dividends paid to a shareholder resident in the other contracting state of the company distributing the dividend with at least a 25% interest.

69. A 10% WHT rate is levied on interest received by a bank (beneficial owner).

70. Levied if the recipient is a company with at least a 50% direct interest in the paying company. A 5% WHT rate is levied if the recipient is a shareholder with at least a 25% direct interest; otherwise, a 10% rate is levied. WHT is reduced to 5% if the recipient company is not taxed in the Netherlands for this dividend.

71. WHT is reduced to 10% if the recipient is a Dutch company with at least a 50% direct interest in the paying company or if the recipient holds 25% of its capital and another Dutch company holds at least the other 25%.

72. No WHT is levied on capital gains from sales of assets/rights when they are considered to be a royalty.

73. a. No WHT is levied on fees paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.

b. A 5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 50% of voting shares of the company paying the dividends; a 7.5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 25% of voting shares of the company paying the dividends.

74. Levied if the recipient is a shareholder in the company paying the dividends with at least 25% of voting shares of the company paying the dividends.

75. A 10% WHT rate is levied on interest paid for bonds or similar securities generally offered to investors and related to transfers of industrial, commercial, or scientific equipment. No WHT is levied on interest from bonds or similar securities issued by the state or a local entity or from loans given or guaranteed by either of the two contracting states, Central Banks, or financial institutions as agreed between the contracting states.

76. A 20% WHT rate is levied on royalties for films or audio or TV tapes.

77. No WHT is levied on interest from loans granted or guaranteed by a contracting state.

78. If the recipient has invested more than EUR 100,000 in the company that pays the dividend or the dividend is tax exempt in its country of residence, the WHT rate levied is 10%. If both of these requirements are fulfilled, the rate applicable is 5%.
79. Interest on loans with a maturity period of over seven years is tax exempt.

80. A 10% WHT rate is levied on any patents, trademarks, designs or models, plans, secret formulae, or processes incorporated in the computer software, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experiences. A 5% WHT rate is levied on any copyright of literary, artistic, or scientific work, excluding computer software and including cinematographic films or tapes used for radio or television broadcasting.

81. No WHT is levied on interest paid to a contracting state, one of its political subdivisions, or one of its local entities or interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or interest paid on any long-term loan (seven years minimum) granted by a bank resident in a contracting state.

82. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment or merchandise.

83. No WHT is levied on dividends when they are paid to a shareholder with at least a 25% interest held for at least two years, provided that the company distributing the dividends is effectively taxed.

84. No WHT is levied on interest paid to a bank resident in Switzerland on a long-term loan (over five years).

85. No WHT is levied if the royalties are paid between associated companies, affiliated by at least a 25% direct interest held for at least two years or both held by a third company with at least a 25% interest in both companies, and CIT is levied on all of the companies.

86. A. No WHT is levied on royalties paid for the use or licensing of containers used in international trade.

87. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 75% of whose shares are directly or indirectly held by non-residents and such income is not subject to taxation in such contracting state.

88. A 5% WHT rate is levied on royalties for any copyright of literary, artistic, theatrical, musical, or scientific work (excluding cinematograph films and films or tapes for radio or television broadcasting); an 8% WHT is levied on financial leasing related with the use or the right to use industrial, commercial, or scientific equipment.

89. Levied if the recipient is a shareholder of the paying company with at least a 50% interest; otherwise, a 15% rate is levied.

90. No WHT is levied on interest from loans granted by the government, Central Bank, or certain institutions.

91. a. No WHT is levied on dividends when they are paid to a company holding at least a 75% direct interest in the paying company.

92. No WHT is levied if the interest is paid on a long-term loan (more than three years) to finance investment projects if the interest is paid to a pension fund that meets certain requirements or if the interest is paid in relation to a credit acquisition of merchandise, equipment, or services.

93. A 5% WHT rate is levied on royalties for any copyright of literary, artistic or scientific work.

94. A 4.95% WHT rate is levied on interest received by financial institutions.

95. No WHT is levied if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the interest is paid by one contracting state or its political divisions, (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state to promote exports and development, (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income generated from the fund is tax exempt in the contracting state paying the dividend, or (v) the interest is paid in relation to the credit acquisition of industrial, commercial, or scientific equipment.

96. Levied if the recipient is a shareholder of the paying company with at least a 50% interest. A 10% WHT rate is levied if the recipient is a company with at least a 25% direct interest in the paying company; otherwise, a 15% rate is levied.

97. No WHT is levied on interest arising from loans granted or guaranteed by qualifying public institutions or interest paid to public financial institutions.

98. No WHT is levied if the recipient is a company (other than a partnership) with at least a 25% direct interest in the paying company; otherwise, a 5% rate is levied.

99. No WHT is levied if the recipient is a company with at least a 10% direct interest in the paying company; otherwise, a 10% rate is levied.

100. 5% WHT rate is levied if the recipient (excluding partnerships) is a shareholder with at least a 40% direct interest in the paying company; otherwise a 10% rate is levied. No WHT is levied if the recipient is a shareholder with at least an 80% direct interest in the paying company, and (i) its shares are listed on a stock exchange, (ii) the recipient is at least 50% owned by residents from either of the two countries, (iii) the recipient is owned by shareholders resident for tax purposes in third countries by a proportion of less than 25%, and (iv) the recipient is owned (an interest of more than 25%) by residents in third countries, provided that a tax treaty for the avoidance of double taxation has been signed with the country of the company paying the dividends and that this tax treaty establishes the same or more favourable conditions. No WHT is levied for dividends paid to pension funds.
Spain

101. Reduced rates/exemptions are not applicable when a Panama tax-resident company pays dividends, interest, or royalties to a Spanish tax resident and such income has been obtained either in Spain or in a country that has not signed a tax treaty for the avoidance of double taxation with Spain.

102. Levied if the recipient is a company (excluding partnerships) with at least a 10% direct interest in the paying company; otherwise, a 5% rate is levied. In the case of distributions made out of a real estate investment trust, 5% is levied if the beneficial owner holds, directly or indirectly, less than 10% of the value of the capital in such trust.

103. A 5% WHT is levied on interest if: (i) the recipient is a contracting state of the treaty, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the payer is a financial institution of a contracting state and interest is paid to a financial institution of the other contracting state; (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend; (v) the interest is paid in respect of a loan, debt-claim, or credit that is owed to, made, provided, guaranteed, or insured by an export financing agency of a contracting state or political division, or guaranteed or insured by that state or political division; (vi) the recipient is an institution wholly or mainly owned by a contracting state as may be agreed from time to time between the competent authorities; or (vii) the recipient is the government of Singapore Investment Corporation Pte Ltd.

104. No WHT is levied on dividends if the beneficial owner is a company resident in the other contracting state whose capital is wholly or partly divided into shares and it has held at least 25% of the capital of the company paying the dividends for at least two years before the date of such payment and such dividends are not subject to profit tax in the other contracting state.

105. A 5.5% WHT rate is levied on royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films or films and tapes used for radio or television broadcasting.

Tax administration

Taxable period
The tax year for CIT purposes is the company’s accounting year. The tax year cannot exceed 12 months. Incorporation, change of accounting year, or dissolution of a company can give rise to a period of less than one year.

Tax returns
The tax system in Spain is a self-assessment system, and tax returns may be inspected by the tax authorities.

Annual CIT returns must be filed within 25 calendar days following the six months subsequent to the end of the tax year (i.e. if the tax year coincides with the calendar year, the return must be filed between 1 July and 25 July of the following calendar year).

Payment of tax
For CIT, three advance payments of the annual tax payment must be made during the first 20 calendar days of April, October, and December. The final CIT payment must be made with the annual CIT return.

For companies whose turnover, in accordance with Spanish VAT law, for the 12 months prior to the beginning of a tax period exceeds EUR 6,010,121.04, the advance payments are calculated by applying the following percentages to the taxable income (reduced by any applicable tax-loss carryforwards) for each advance-payment period, i.e. at 31 March, 30 September, and 30 November:

- Generally, 21%.
- This percentage has been increased temporarily for tax periods commencing in 2011, 2012, and 2013. The percentage applicable in tax periods commencing in 2013 is:
  - 23% for companies whose turnover, in accordance with Spanish CIT law, for the 12 months prior to the beginning of the tax period was over EUR 10 million but did not exceed EUR 20 million.
Spain

- 26% for companies whose turnover, in accordance with Spanish CIT law, for the 12 months prior to the beginning of the tax period was over EUR 20 million but did not exceed EUR 60 million.
- 29% for companies whose turnover, in accordance with Spanish CIT law, for the 12 months prior to the beginning of the tax period was EUR 60 million or more.

For advance payments corresponding to tax periods commencing in 2012 and 2013 (except for the April 2012 advance payment), 25% of dividends or income for which the international double tax exemption applies should be included in taxable income. This rule is only applicable to large companies and will only have a financial effect as the amount will finally not be taxed.

Some allowances and the previous advance payments of the year can be credited against these percentages of taxable income.

Small and medium-sized companies can opt to calculate their advance payments in the same way as large companies (applying a percentage of 21%) or to apply a rate (currently 18%) on the tax liability of their last advance CIT return filed on 1 April, 1 October, or 1 December.

For tax periods commencing on or after 1 January 2013, variable capital investment companies, financial investment funds, real estate investment companies, real estate investment funds, mortgage market regulation funds, and pension funds that meet certain requirements and are taxed at a 1%, or even a 0%, tax rate should not make advance payments and are not required to file the corresponding tax return.

Minimum advance payment for tax periods commencing in 2012 and 2013
For tax periods commencing in 2012 and 2013 and for companies whose turnover, in accordance with Spanish CIT law, for the prior 12 months is EUR 20 million or more, the advance payments should be at least 12% of the company’s accounting profits for the first 3, 9, or 11 months of the calendar year. This minimum advance payment can only be reduced by previous advance payments for the tax period in question (not by withholdings or on-account payments).

For companies whose turnover, in accordance with Spanish CIT law, is income for which the international double tax exemption or the internal 100% double tax deduction for dividends applies (to at least 85% of the income), the tax rate is 6%.

This will apply to tax periods commencing in 2012 and 2013.

For tax periods commencing in 2013, there is no obligation to make minimum advance payments for:

- Companies that apply the special tax regime established in Law 49/2002 for non-profit organisations and tax relief for sponsorships.
- Variable capital investment companies, financial investment funds, real estate investment companies, real estate investment funds, mortgage market regulation funds, and pension funds that comply with certain requirements.
- Listed companies that make investments in the real estate market (SOCIMIs).

*EUR 2,500 limit on cash payments*
Payments in cash over EUR 2,500 are not allowed for transactions carried out on or after 19 November 2012 in which at least one of the parties is a person carrying
Spain

on a business or professional activity, with fines of up to 25% of the amount of the transaction being payable by both the payer and the recipient of these cash payments.

**Tax inspections**
The Spanish tax authorities have a tax inspection department that is responsible, amongst other things, for verifying that taxpayers’ obligations are correctly complied with and, if necessary, for making adjustments to their tax affairs by issuing one or more tax assessments.

As part of its responsibilities, the tax inspection department may investigate a taxpayer’s tax affairs to ensure that they are correct and verify the accuracy of filed tax returns.

Taxpayers’ tax returns to be examined by the tax inspection department are chosen on the basis of different criteria, such as: (i) by random sample, (ii) if debt push down restructuring transactions have been carried out that involve Spanish companies with material debt levels, (iii) if companies have recurring tax-loss carryforwards, or (iv) if companies are related to a family group and lack a production or commercial structure and where their personal and business assets are not clear.

If taxpayers disagree with a tax assessment issued by the tax inspection department as a result of a tax inspection, they may file an appeal firstly with the Spanish economic-administrative tribunal for tax appeals and then, if the appeal is not upheld by the tribunal, with the ordinary courts.

If taxpayers have paid incorrect amounts of tax to the tax authorities, they may claim a refund of any excess tax paid from the authorities within the statute of limitation period (four years) by means of a special procedure that commences with the filing of a request with the tax authorities.

**Statute of limitations**
The statute of limitations for taxes in Spain is four years commencing from the day following the date of termination of the voluntary tax filing period.

This four-year period may re-start for a tax if the tax authorities carry out any actions or procedures, with the formal acknowledgement of the taxpayer, to acknowledge, adjust, review, inspect, guarantee, or collect all, or any part of, a tax obligation, or due to actions by the taxpayer, such as the filing of a new or late tax return, that alters or rectifies a previous tax return or the filing of an appeal or claim by the taxpayers regarding the tax.

**Topics of focus for the tax authorities**
Every year, the Spanish tax authorities issue general guidelines on the authorities’ annual tax and customs control plan. These guidelines identify areas where the tax authorities intend to adopt a greater role of verification, inspection, and monitoring during a certain tax year.

**Obligation to disclose assets located overseas**
Law 7/2012 has introduced the obligation to disclose assets, such as accounts, shares, or real estate, that are located overseas. Severe fines are imposed (a minimum of EUR 10,000) for breaching this obligation.

In addition, assets regarding which the information disclosure obligation is not complied with by the established time limits are treated as unreported income for CIT payers and allocated to the earliest tax period of those that are not statute barred.
Breaches of the obligation to declare this income are a very serious infringement, and fines of 150% of the gross tax liability are imposed.

**Automatic and standardised exchange of tax information agreements**

Spain and the United States have signed an agreement aimed at improving compliance of international tax law and at enforcing the Foreign Account Tax Compliance Act (FATCA). Under this agreement, financial entities in Spain and the United States are required to provide their tax authorities with information on taxpayers from the other signatory country. This information will then be automatically exchanged between those tax authorities through a standardised procedure. The text of the agreement has not yet been published.

In addition, the governments of France, Italy, Germany, Spain, and the United Kingdom have agreed to work together on a pilot scheme for the multilateral, automatic, and standardised exchange of tax information based on the FATCA exchange model.

**Other issues**

**Special tax regime applicable in the Basque Country**

The three provinces that make up the region of the Basque Country (Álava, Guipúzcoa, and Vizcaya) have an ‘economic agreement’ with Spain’s central government (laid down and regulated by Law 12 of 23 May 2002) in accordance with which these regions are granted the right to regulate their own tax regimes.

There are certain provisions in this law regarding CIT that make this area of Spain more attractive for companies.

**General tax rate**

The general tax rate is 28%.

**Lower tax rates**

A reduced rate of 24% is levied on small companies. A small company is considered to be a company that meets the following requirements in the year prior to the application of the special tax regime:

- Carries on an economic business activity.
- Net turnover or assets under EUR 10 million.
- Average number of staff under 50.

An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

For real estate companies that comply with the following requirements, a 20% tax rate is levied on taxable income up to EUR 10,000 and 22% on any excess for companies in Álava and Vizcaya, and a 20% tax rate is levied on taxable income up to EUR 4,000 and 23% on any excess for companies in Guipúzcoa:

- Their share capital is wholly owned by individuals during the whole tax year.
- More than half of their assets are securities or more than half of their assets are not used for economic business activities during at least 90 days of the tax year.
- At least 90% of their profits are generated from investment income and capital gains.
Spain

A 21% rate is levied on companies that are floated on the Bilbao Stock Exchange and on brokerages and cooperatives. Companies that are floated on the Bilbao Stock Exchange are taxed at this rate for three years, as long as they are in compliance with certain requirements.

**Tax-loss carryforwards**

Tax losses may be carried forward for the following 15 years in Guipúzcoa. In Vizcaya and Álava, there is no time limit for the offsetting of tax losses.

Companies that do not comply with the requirements to be considered a small company can offset tax-loss carryforwards of prior years at up to a maximum of 70% of their prior taxable income. There is no limit for small companies.

**Tax deductibility of amortisation of goodwill and intangible assets**

Amortisation recorded for intangible assets (irrespective of whether they have a specific useful life or not), including goodwill, is tax deductible at up to a maximum annual limit of 20%, subject to compliance with the following requirements:

- The assets have been acquired for consideration.
- The acquiring and transferring companies are not associated parties.

**Financial goodwill**

Financial goodwill is tax deductible over a period of five years when at least a 5% interest is acquired in the company and these shares are not quoted on a stock exchange or, if they are quoted on a stock exchange, they are shares of group or associated companies.

If the company from which the shares have been acquired has an interest in another company, the equity, assets, and rights recorded in the group's consolidated annual accounts must be taken into consideration for the purpose of calculating the amount of the financial goodwill.

If the company from which the shares have been acquired is a non-resident company, in addition to the requirements stated above, the following requirements must be fulfilled:

- The company is subject in its country of residence to a tax that is identical or similar to Spanish CIT.
- The company carries on business activities abroad.

If the shares are not acquired on a stock market, the company that acquires the shares must not be in any of the situations provided for in Article 42 of the Spanish Commercial Code in relation to the transferring company.

**Depreciation periods**

The depreciation periods for assets are shorter than those under state CIT law.

**Balance sheet restatement and special tax**

The possibility to restate the value of tangible fixed assets and property investments for tax purposes has also been introduced in Vizcaya and Álava. The measure established for these regions is very similar to that applicable at a national level.

**Reinvestment of extraordinary income**

Income obtained from the sale of tangible fixed assets or intangible assets can be deducted from taxable income, subject to compliance with the following requirements:
• The amount obtained from the sale is reinvested in similar types of assets within a four-year period (as from one year prior to the sale up to three years after the sale).
• The asset in which the reinvestment is made is maintained for five years (three in the case of movable assets), unless its useful life is shorter.
• For sales of shares in other companies when the interest held is at least 5% and has been held for a period of one year prior to the date of sale, 60% of the income obtained from the sale can be deducted from taxable income.

**Income generated from intellectual or industrial property**
30% of the income obtained from the transfer of intellectual or industrial property rights can be deducted from taxable income, subject to compliance with certain requirements, and 60% if the company has created the intellectual or industrial property itself. There are no quantity limits to be complied with for the application of this deduction.

**Investments in new tangible fixed assets**
A 10% tax credit can be applied to investments in new tangible fixed assets, subject to compliance with certain requirements. The minimum depreciation period for the assets, excluding computer equipment, is five years.

The total amount of the investment must be over EUR 60,100 and the investment must comply with at least one of the following requirements:

• Exceeds 10% of the carrying amounts (minus depreciation/amortisation) of the company’s tangible fixed assets, buildings, and software during the previous year.
• Exceeds 15% of the carrying amount of the same type of tangible fixed assets of the company during the previous year.

**Special reserve for investments in production**
A tax credit can be applied for the distribution of profits to a special reserve for investments in production, subject to compliance with the following requirements:

• The company invests the amount distributed to the reserve in new tangible fixed assets during the following two years.
• These assets are maintained by the company during a five-year period or during their useful life if it is less than five years.
• The company's shareholder's equity is increased by the amount distributed to the reserve, and this increase is maintained for a five-year period as from the date on which the investment was made.

The tax credit is 10% of the profits distributed to the reserve.

**Research and development (R&D)**
A 30% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average expenses incurred by the company during the previous two years, the tax credit is 50% on the excess amount.

An additional tax credit of 20% can be availed of for the following expenses:

• Staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.
• Expenses incurred for projects contracted from certain universities and public organisations.
A 10% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets that are exclusively assigned to R&D activities.

**Technological innovation**
A 20% or 15% tax credit can be availed of for certain expenses incurred for technological innovation.

**Expenses incurred for environmental conservation and improvement and for conservation of energy**
Companies are eligible for a 30% tax credit for investments made in the equipment listed in the Basque List of Environmental Technologies, subject to compliance with certain requirements.

Companies may also qualify for a 15% tax credit for investments made and expenses incurred in respect of tangible fixed assets, subject to compliance with certain requirements.

**Export investments (e.g. foreign advertising, formation of companies, and branches abroad)**
As in state CIT law, there is no tax credit for export investments.

**Staff training**
A 10% tax credit can be applied for expenses incurred in staff training. If the expenses are higher than the average training expenses incurred by the company during the previous two years, there is an additional tax credit of 15% for the excess amount.

A tax credit can also be applied for expenses incurred to obtain the Occupational Health and Safety Assessment Sequence (OHSAS) 18001 certificate and to train staff in new technologies.

**Job creation**
The following tax credits can be availed of for job creation, subject to compliance with the requirements stated:

- EUR 4,900 for each job created, provided that a permanent employment contract is signed with the employee.
- EUR 9,200 for each job created, provided that a permanent employment contract is signed with the employee and a person who has special difficulties in finding employment is contracted.

The company's average number of staff with permanent employment contracts must be increased by at least the same number of contracts that generated the tax credit, and this increase must be maintained by the company for two years.

**Corporate contribution to an EPSV**
A tax credit of 10% applies to corporate contributions to certain pension schemes in favour of the staff of the company, up to the limit of EUR 6,000 per employee each year.

**Time limits for the application of tax credits**
In Guipúzcoa, tax credits can be carried forward for a period of 15 years as from the date on which the company qualifies for them. In Vizcaya and Álava, there is no time limit for the application of tax credits.
Limits on the amount of tax credit applied
For a tax year, the combined sum of all investment tax credits, excluding tax credits for R&D and technological innovation, may not exceed 35% of the company’s CIT liability (45% for small companies).

Advanced CIT tax
There is no obligation to make advanced payments on account of CIT.

Special regime for small and medium-sized companies
A small company is considered to be a company that meets the following requirements during the year prior to the application of the special tax regime:

- Carries on an economic business activity.
- Net turnover or assets under EUR 10 million.
- Average number of staff under 50.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

A medium company is considered to be a company that meets the following requirements during the year prior to the application of the special tax regime:

- Carries on an economic business activity.
- Net turnover under EUR 50 million or assets under EUR 43 million.
- Average number of staff under 250.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

The benefits obtained with this special tax regime are as follows:

- Free depreciation for new tangible assets (except buildings) for small-sized companies (general free depreciation relief set forth for tax years 2009 to 2015 is not applicable in the Basque Country).
- Restrictions have been established for free depreciation and accelerated depreciation relief for the following assets, which are effective as of 1 January 2013:
  - Motor vehicles and their trailers, mopeds, and motorcycles.
  - Vessels, cruise ships, and aeroplanes.
- Accelerated depreciation for new tangible assets (except buildings) for medium-sized companies.
- Global bad debt provisions up to 1% of credit sales and services of small and medium-sized companies are tax deductible for CIT purposes. Provisions for possible insolvency of credit sales and services are tax deductible up to a limit of 1% of the amount of credit sales and services at the end of the tax period.

Restrictions on the tax deductibility of certain expenses
As of 1 January 2013, Vizcaya and Álava have established restrictions for the tax deductibility of certain expenses, such as expenses related to the acquisition or use of vehicles, expenses incurred from public relations, and expenses related to vessels, leisure ships, and aeroplanes.
**Significant developments**

**Deductions**
In the determination of business profits, a deduction will now be allowed for the following:

- 100% of the cost of acquisition (as depreciation allowance) of any plant, machinery, or equipment for:
  - energy efficiency purposes (i.e. that provide more than 30% of the total requirement of the power generation from alternative energy resources), or
  - the establishment of a Broker Bank Office System to be compliant with the Colombo Securities Exchange (CSE) requirements in relation to risk management systems acquired on or after 1 April 2013.

- 50% of the cost of acquisition (as depreciation allowance) of any plant, machinery, or equipment for:
  - any export industry where at least 60% of the turnover is from export
  - technology upgrading purposes, or
  - introducing any new technology acquired on or after 1 April 2013.

- 100% advertisement expenses for specific sponsorship of international sport events approved by the Minister of Sports.

**Value-added tax (VAT)**
The threshold for chargeability of VAT at 2.5 million Sri Lankan rupees (LKR) per annum has been increased to LKR 3 million per quarter, or LKR 12 million per annum, effective from 1 January 2013.

Any person (including a company) or partnership carrying on a business of wholesale or retail trade will be liable to register for VAT if the turnover (including exempt turnover/supplies) per quarter is LKR 500 million or more.

**Nation Building Tax (NBT)**
As of 1 January 2013, the threshold for chargeability of NBT increased from a quarterly turnover of LKR 500,000 to a quarterly turnover of LKR 3 million, or LKR 12 million annually.

**Taxes on corporate income**
Resident companies and public corporations are liable for corporate income tax (CIT) on their worldwide taxable income. Non-resident companies are liable for CIT of their Sri Lanka-source taxable income.
CIT rates are based on the nature of the income and the institution earning the income, as follows:

<table>
<thead>
<tr>
<th>Income/Institution</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Undertaking for manufacture of any product for export or for supply to an exporter for export, being a product having domestic value addition over 65% and a Sri Lanka brand name with patent rights received in Sri Lanka</td>

* Unit trusts and mutual funds are treated like resident companies for CIT purposes. Units of investment are treated like company shares, and returns to investors are treated like company dividends. The tax rate is 10% on the profits derived by any unit trust or mutual fund.

**Marginal relief**
A concessionary CIT rate of 12% applies where the taxable income of any company (other than a group company) does not exceed LKR 5 million. Where the taxable income of any company (other than a group company) for any year of assessment exceeds LKR 5 million but does not exceed LKR 6,111,111, then such part of the CIT computed for such year of assessment as is attributable to such excess shall not be more than such excess (i.e. the maximum CIT on LKR 6 million taxable income is LKR 1.6 million, see below).

</table>

**Dividend tax**
A dividend tax is payable at 10% on the gross dividends distributed by a resident company, other than such dividends distributed out of any dividend received from another resident company (and few other exceptions).

**Deemed dividend tax**
A deemed dividend tax of 15% is payable by any resident company in any tax year if the said company has, in the preceding tax year, distributed dividends of less than 10% of the distributable profits (duly defined) for that preceding tax year.

The tax base for the 15% deemed dividend tax is the book profits of the company reduced by the aggregate of the CIT payable by that company for that tax year, the cost incurred by the company in that tax year in the acquisition of any land or any capital asset, and any notional profit computed on the basis of a revaluation of any capital asset included in such book profit and increased by the aggregate of the allowance for depreciation deducted in respect of any capital asset and any notional loss computed on the basis of a revaluation of any capital asset included in such book profit.

**Special tax on public corporations**
In the case of a public corporation, where not less than 75% of the capital is provided by the government (other than via a loan), a tax of 25% of the balance profits, after
deducting CIT payable, will be charged. However, where the total gross dividends distributed are not less than 25% of such balance, no special tax will be charged in the relevant years. Where the total gross dividends distributed are less than 25% of such balance, the tax chargeable will be the difference between such balance and the dividends distributed.

**Remittance tax**
Where profits of a non-resident company are remitted in a tax year, a remittance tax of 10% of the remittances is payable.

**Local income taxes**
There is no local or provincial income tax in Sri Lanka.

---

**Corporate residence**
A company is treated as resident for tax purposes in Sri Lanka if its registered or principal office is in Sri Lanka or if the control and management of its business is exercised in Sri Lanka.

**Permanent establishment (PE)**
PE is only a treaty concept in Sri Lanka. If a non-resident company creates a PE in Sri Lanka in terms of a double tax treaty (DTT), then such company is liable to Sri Lanka CIT. In this absence of a DTT, the domestic tax laws will apply.

---

**Other taxes**

**Value-added tax (VAT)**
VAT is payable on imported goods and on the supply of goods (including wholesale and retail trade where the turnover, both liable and exempt supplies, per quarter is not less than LKR 500 million) and services in Sri Lanka. Provisions are made for filing returns monthly or quarterly, based on specified criteria. Even where returns can be filed quarterly, the tax payments are required to be made on a monthly basis by manufacturers and on a half-monthly basis by others. Certain specified imports and domestically supplied goods and/or services are exempt.

VAT is payable on the prescribed valuations of imports and domestic supplies at a standard rate of 12%. Exports and certain specified international services are zero-rated.

Effective from 1 January 2013, registration for VAT will arise only if the quarterly value of taxable supplies exceeds LKR 3 million or annual value of taxable supplies exceeds LKR 12 million. Prior to 1 January 2013, no registration for VAT was necessary if the total value of taxable supplies was LKR 650,000 or less in a quarter, or LKR 2.5 million or less in a year.

The input tax paid on the imports and supplies of goods (including capital goods) and services in a month, and used in the business of making taxable supplies in that month, can be deducted from the tax payable (output tax) on such supplies, subject to a limitation of the lesser of 100% of output tax or the actual input tax paid.
Refunds of excess VAT paid are available to zero-rated supplies, to suppliers who are qualified to issue suspended tax invoices, and to new businesses registered under Section 22 (7) of the VAT Act.

**Customs duties**
Customs duty is levied on the value for customs duty (i.e. transaction value). World Trade Organization (WTO) rules on customs valuations are implemented. Sri Lanka has a simplified four tier tariff structure. The rates are published in the government gazettes. The current rates are 5%, 15%, 30%, and 0% (applies to few goods).

**Special Commodity Levy**
Special Commodity Levy is imposed on certain commodity items at the rate specified by the Minister by order published in the gazette at the point of importation of such commodities. Special Commodity Levy is covered by the Director General of Customs.

Special Commodity Levy is a composite levy and no other tax, duty, levy, cess, or other charge is imposed in terms of any other laws specified as applicable in respect of the commodities specified in any such order.

**Excise duties**
Excise duties and special excise levies are charged on tobacco, cigarettes, liquor, motor vehicles, selected petroleum products, paints, air conditioners, dishwashers, household washing machines, and other products at various rates and at unit rates.

**Stamp duty**
Stamp duty is payable on specified instruments and documents at rates prescribed in the Gazette.

**Economic Service Charge (ESC)**
ESC is payable quarterly by businesses that are enjoying a tax holiday or incurring a loss in the previous tax year at 0.25% of the aggregate turnover of the trade, business, profession, or vocation if the total turnover exceeds LKR 50 million for that quarter. ESC so paid is deductible from the CIT payable for that tax year. ESC is not refundable but can be carried forward for four immediately succeeding tax years to be set off against CIT payable. Maximum ESC payable for any quarter is LKR 30 million.

**Nation Building Tax (NBT)**
NBT is chargeable at 2% from every person (a person includes a company) who imports any article on the ‘liable turnover’ from such importation, who carries on the business of manufacture of any article, who provides a service of any description, or wholesale or retail sale of any article (other than such sale by the manufacturer of that article) on the liable turnover of the relevant quarter. Certain specified articles or services are exempt from NBT.

As of 1 January 2013, the threshold for NBT of LKR 500,000 per quarter has been increased to LKR 3 million per quarter, or LKR 12 million per annum.

Liable turnover means:

- In the case of importers, the value of any article ascertained under Section 6 of the VAT Act for the purpose of importation.
- In the case of manufacturers, the proceeds receivable, whether received or not, from the manufacture and sale of goods in Sri Lanka.
- In the case of service providers, the proceeds receivable, whether received or not.
• In the case of wholesale or retail traders, the proceeds receivable, whether received or not, other than pharmaceuticals, gems and jewellery sold for payment in foreign currency, and any article subject to the Special Commodity Levy sold by an importer.

In case of wholesale and retail traders, 50% of the liable turnover will be taxed at a zero rate and the remaining 50% will be taxed at 2%. In the case of a distributor as defined in the ESC Act, 75% of the liable turnover will be taxed at a zero rate and the remaining 25% will be taxed at 2%.

Bad debts, VAT, excise duty rebate under export development, or services in relation to an international event should not be included in the liable turnover.

**Construction industry guarantee fund levy**
Construction industry guarantee fund levy is payable by each construction contractor or subcontractor on the contract value arising from any contract entered into, calculated at rates varying from 0.25% to 1%, depending on the value of the construction contract. Any person or partnership that makes any payment, which is subject to such levy, to a contractor or subcontractor should deduct such levy as a withholding tax (WHT) and remit the amount withheld to the Commissioner General of Inland Revenue.

**Tourism development levy**
Tourism development levy is payable by tourist hotels and institutions licensed under the Tourist Development Act on the turnover of such institution at the rate of 1%.

**Employees Provident Fund (EPF)**
Employers and employees are required to contribute specified percentages (employer 12%; employee 8%) of each employee's monthly emoluments/salary to the EPF established by the government. Alternatively, employers and employees can contribute to certain private provident funds approved by the labour authority.

**Employees Trust Fund**
Employers are also required to contribute a specified percentage (currently 3%) of each employee's monthly emoluments/salary to the Employees Trust Fund established by the government.

**Share transaction levy**
Share transaction levy at the rate of 0.3% is chargeable from both the buyer and the seller on the sale value of listed shares transacted through the Colombo Stock Exchange.

**Local taxes**
Taxes (more usually called rates) are currently assessed and collected annually from the owners of land and premises by the local authorities of the areas in which the properties are located. These authorities also charge and collect annual licence fees from certain businesses as well.

---

**Branch income**
Foreign companies are permitted to register a place of business as an ‘overseas company’ in Sri Lanka under local company law, where the business carried on conforms to the stipulations made under the Exchange Control Law.
Sri Lanka

An overseas company registered under the Companies Act may also carry on in Sri Lanka any non-commercial, non-trading, or non-industrial activities, such as the activities undertaken or carried on by a liaison office, representative office, regional office, or other similar office, provided such activities do not provide any income directly or indirectly to the company.

In addition to paying the standard CIT, a trading branch is also subject to the 10% remittance tax on remittance of its after tax profits to its foreign head office.

The Sri Lanka-source income of foreign companies from a local ‘place of business’ is taxed at the CIT rate. However, under most DTTs that Sri Lanka has entered into, the income of a project carried out will not be liable for CIT if its duration is less than the period specified in the treaty concerned.

Where branch or project income is liable for CIT but the income is not readily ascertainable, the tax authority may prescribe that the income be computed on a fair percentage (not less than 6%) of the branch or project turnover in Sri Lanka.

---

**Income determination**

Business accounting for CIT purposes should, unless otherwise specified by the tax statute, conform to Sri Lanka Accounting Standards.

**Inventory valuation**

Inventories should be measured at the lower of cost and net realisable value.

**Capital gains**

There is no capital gains tax. Capital gains from transfer of property are exempt from CIT.

**Dividend income**

Resident company dividends paid on shares held by resident or non-resident persons are not assessable to the recipients if income tax is withheld on such dividends (see the Withholding taxes section), the dividends are exempt from income tax, or the dividends are paid out of dividends received from resident companies.

**Stock dividends**

Stock dividends (bonus shares) are not taxable in the hands of a shareholder at the time of issue; however, where such shares are capitalised out of company profits and there is a return of this capital to the shareholder within six years from the date of issue, the amount of capital returned to the extent of the paid-up value of the bonus shares is treated by definition as a dividend and is taxable in the hands of the shareholder. However, if the shareholder is a company, this dividend may not be assessable, as explained above.

**Interest income**

Interest income forms part of the total statutory income, if not exempt under the tax statute.

The interest income exempt from taxes includes interest accruing on money lying in a foreign currency accounts in any commercial bank; interest accruing to any person or partnership outside Sri Lanka in respect of any loan granted in a foreign currency by...
that person or partnership to the government of Sri Lanka, any public corporation, any government institution, any commercial bank, or any other undertaking if the loan is granted on or after 1 April 2012; or interest accruing to any person on moneys invested in government bonds denominated in a foreign currency.

**Foreign income**
Foreign income of a resident person forms part of the total statutory income, if not exempt under the tax statute.

**Deductions**
In ascertaining the total income liable to CIT from the financial accounts filed by a company, deductions from revenue are permitted for outgoings and matching expenses incurred in producing the income, including special deductions.

**Depreciation**
An annual allowance for depreciation for wear and tear is calculated at:

- 100% for software developed in Sri Lanka, or any plant, machinery, or equipment for:
  - energy purposes, which provide more than 30% of the total requirement of the power generation out of alternative energy resources, or
  - the establishment of a Broker Bank Office System to be compliant with the CSE requirement in relation to the risk management systems acquired on or after 1 April 2013.
- 50% for plant, machinery, or equipment for:
  - any export industry
  - technology upgrading purposes, or
  - introducing any new technology acquired on or after 1 April 2013.
- 33 1/3% for other plant, machinery, or equipment for a period of three years.
- 25% of the cost of any information technology for a period of four years.
- 20% of the cost of acquisition of any motor vehicle or furniture for a period of five years.
- 10% of the cost of any qualified building for a period of ten years.

The cost of renewal of any capital asset, if no allowance exists, is deductible for the purpose of ascertaining profits and income.

**Goodwill**
Amortisation is not allowed on the acquisition of goodwill.

**Formation or liquidation expenses of a company**
In the case of a company, expenses incurred in the formation or liquidation of that company are allowed in computing the taxable income.

**Interest expenses**
Interest paid or payable on borrowings for purposes of business are deductible, subject to the thin capitalisation rules (*see the Group taxation section*).

**Bad debts and doubtful debts**
A sum equal to the bad debts incurred in any trade, business, profession, or vocation that have become bad debts during the period for which the profits are being ascertained is allowed for tax purposes.
Sri Lanka

In the case of a bank or financial institution, deductibility of a specific bad debt provision is restricted to the lesser of the actual amount of the provision or 1% of the aggregate debts as of the end of the period for which profits are ascertained.

**Charitable contributions**
Relief is available as a deduction from assessable income for contributions in money to an approved charity, if the charity is established for the provision of institutionalised care for sick or the needy, and contributions in money or in kind to the government of Sri Lanka. The deduction for the former is subject to a ceiling of one-fifth of the assessable income of the company. In the case of the latter, there is no limit to the deduction, and any un-recouped excess of such contributions over the assessable income can be carried forward and deducted from the following year’s assessable income and so on.

**Termination gratuities**
Termination gratuities paid to employees on cessation of business and annual payments made to an approved fund, held for payment under compulsory legislation of gratuities to employees upon termination of their services, are deductible.

**Fines and penalties**
Fines and penalties, paid or payable, are not deductible for tax purposes.

**Taxes**
Sri Lanka income tax payable or any income tax or other similar tax payable in any country with which Sri Lanka has a DTT is not deductible, other than the excess of the foreign-country tax on doubly taxed income over the maximum amount of the credit allowed in the foreign country for the Sri Lanka income tax on that income.

Taxes paid in a foreign country that does not have a tax treaty with Sri Lanka may be deducted.

NBT paid/payable is fully deductible.

Input VAT is not deductible from CIT if creditable against output VAT.

Any other prescribed tax or levy is not deductible.

**Non-deductible expenses**
Deductions not permitted for certain expenses or allowances, in the determination of total income, are itemised below:

- Business entertainment expenses incurred or entertainment allowances paid to executive officers.
- Any expenditure of a capital nature or any loss of capital, including book depreciation of capital assets.
- Depreciation allowances, rentals, annual payments, or renewals in respect of vehicles used for purposes of business travel, or capital assets provided for the use of employees at their places of residence, other than motorcycles or bicycles used by non-executive staff and motor coaches used to transport employees to and from their places of work.
• The excess of management fee paid over LKR 2 million or 1% of turnover, whichever is lower, or such amount as may be determined by the tax authorities. This restriction does not apply to a venture capital company, unit trust, or mutual fund.
• Royalties paid to a person outside Sri Lanka to another person outside Sri Lanka.

**Other significant items**
Expenses incurred solely in connection with the promotion of the export trade or the provision of any services for payment in foreign currency or in carrying out an approved programme for the promotion of tourism are fully allowed.

Any foreign travel or foreign training expense incurred in the production of income of any trade, business profession, or vocation is also deductible, subject to a maximum limit of 2% of the previous year’s statutory income from the respective trade or business.

Deductions from the total income from all sources of a company are allowed for any interest payable on loans used for the construction or purchase of any building or the purchase of any site for construction of a building; for any annuity, ground rent, or royalty payable; or for a business loss.

**Net operating losses**
No deduction from total income is allowed in a tax year for a business loss if, at any time in that year, more than one-third of the issued share capital of the loss-making company is held by persons who did not hold such share capital at any time in the year in which the loss was incurred. In such circumstances, the loss is deferred for deduction only from profits of the particular business in which the loss was incurred.

Any loss incurred in any business of life insurance can be deducted to the extent of any profits from such business included in such total statutory income. Similarly, any loss incurred in any business of finance leasing can be deducted to the extent of any profits from such leasing business included in such total statutory income.

Losses incurred in the conduct of a trade or business may be carried forward indefinitely but only up to 35% of statutory income of a given tax year.

Carryback of losses is not permitted.

**Payments to foreign affiliates**
Any payment made to an affiliate is allowed for tax purposes, if such payment is in the nature of revenue and is incurred in the production of income.

**Group taxation**
There are no special provisions for taxation of companies in a group in Sri Lanka. Each company is taxed independently of others in the group.

**Transfer pricing**
Any profits and income arising, derived, or accruing from, or any loss incurred in, any transaction entered into between two associated undertakings shall be ascertained with regard to the arm’s-length price.
Sri Lanka

**Thin capitalisation**
Deductible interest payments made between members of a group of companies, including holding companies, are restricted to the debt-to-equity ratio of 3:1 for manufacturing companies and 4:1 for other companies.

**Tax credits and incentives**

**Foreign tax credit**
Where any DTT is entered into between the government of Sri Lanka and the government of any other territory outside Sri Lanka, a credit is to be granted in respect of any tax paid or payable outside Sri Lanka in respect of profits or income arising outside Sri Lanka. Such credit should not exceed the amount of the Sri Lanka tax payable in respect of such profits or income.

Where any non-resident person or any partnership registered outside Sri Lanka providing certain services is liable to pay income tax in Sri Lanka and income tax in any other country, then such person or partnership shall be entitled to relief from income tax payable in Sri Lanka of an amount equal to the excess, if any, of the income tax in respect of such income payable in Sri Lanka over the income tax in respect of such income payable in such other country.

**Tax holidays**

**Exemptions for new enterprises**

</table>
A five-year tax holiday is available to a new venture capital company satisfying specified criteria.

A five-year tax holiday is granted for the profits from the new undertaking of a company that is engaged solely in R&D in the field of science or technology with the object of using the results thereof for the production or improvement of products with a minimum investment of LKR 2 million.

Tax holidays outside the purview of the tax statute are also available in specified areas of investment to companies that enter into agreements with the BOI and to any strategic development projects indentified in accordance with the provisions of the Strategic Development Projects Act No 14 of 2008. The specified areas include non-traditional export-oriented manufacturing and thrust industries, export-oriented services, large-scale projects of which the project cost exceeds LKR 500 million. Generous waiver of import duties on specified imports and other concessions are also available for these companies.

Profits and income derived from the sectors of fishing, cultivation, and primary processing of agricultural seeds or planting materials will be exempt from CIT for a period of five years reckoned from the tax year commencing from 1 April 2011.

A ten year tax exemption on profits and income of an undertaking from cultivation of renewable energy crops in agricultural land will be granted, effective from 1 April 2013.

Profits and income from all transactions connected with manufacturing, distribution, and marketing of organic fertilisers and pesticides will be exempt from CIT, effective from 1 April 2013.

**Inbound investment incentives**

Exemption from CIT is granted on the profits and income earned in foreign currency by any resident company in Sri Lanka from any services, excluding commissions, discounts, or similar type of receipt, rendered in or outside Sri Lanka, if such profits and income (less such amount expended outside Sri Lanka as is considered by the Commissioner General to be reasonable expenses) are remitted to Sri Lanka through a bank.

Exemption from CIT is granted in respect of dividends, interest, or royalties received on investments made outside Sri Lanka, provided that dividends, interest, and royalties are remitted to Sri Lanka through a bank.

**Other incentives**

New or existing companies that export non-traditional goods are entitled to be taxed on the profits from these exports or services at a concessionary rate of 12% for a period of 20 years, ending on 31 March 2014 and 2015 respectively. Dividends paid by such companies, out of profits earned from the exports of non-traditional goods that are taxed at 12%, are in turn liable to tax of 10% in the hands of corporate
shareholders where the income tax is already withheld from the dividends (see the Withholding taxes section).

- Exemption from CIT is granted on the profits arising from trading in shares, rights to any share, bonus, or share warrants in respect of which the share transaction levy has been charged.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any non-resident person or to any licensed commercial bank in Sri Lanka by the issuer of any sovereign bond denominated in foreign currency, issued on or after 21 October 2008, by or on behalf of the government of Sri Lanka and on the profits and income from the sale of such sovereign bond.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any person on or after 1 April 2009, on any Sri Lanka Development Bond denominated in United States dollars, issued by the Central Bank of Sri Lanka and on the profits and income from the sale of such Sri Lanka Development Bond.
- Exemption from CIT is granted on the profits and income derived by or accruing to any person or partnership from investment in Economic Resurgence Certificates, utilising money lying to credit of any account opened in any commercial bank or in any specialised bank with the approval of the Central Bank of Sri Lanka from and out of monies deposited in such account on or after 1 February 2009.

*Withholding taxes*

Resident companies are entitled to withhold income tax at 10% of gross dividends payable to any shareholder that is chargeable with CIT, excluding any dividend received from another resident company and any dividend that is exempt from CIT.

Any person in Sri Lanka who pays or credits to a person or partnership outside Sri Lanka any sum due as interest, rent, ground rent, royalty, or annuity is required to withhold income tax at a rate of 20% of the sum, but the requirement to withhold income tax does not apply to (i) interest not sourced in Sri Lanka, (ii) interest on any loan or advance made by a banker, (iii) interest paid in foreign currency held in an account with a foreign currency banking unit, (iv) interest on any corporate debt security, or (v) any interest that is exempt from income tax under any provisions of the Income Tax Act.

In particular instances, the tax authority may prescribe that CIT be withheld at a rate other than 20%, or the rate may be reduced for sums falling due as interest or royalties in respect of persons resident in countries with which Sri Lanka has DTTS in force. Sri Lanka-source income from loan interest or royalties accruing to a non-resident company is taxed at a flat 15% in the absence of a lower rate in the tax treaty with the home country of the non-resident.

However, interest accruing to any overseas lender from a loan granted by that overseas lender to the Sri Lanka government or institution, public corporation, any commercial bank, or to any other undertaking, if such loan is granted on or after 1 April 2012, is exempt from income tax.

Every bank and financial institution is required to withhold income tax at 10% on the amount of any interest paid to a company on any sum of money deposited with it. The depositor is entitled to receive a certificate setting out the gross amount of interest, the amount of tax withheld, and the net amount of interest paid. With respect to Treasury bills and Treasury bonds issued by the Central Bank, the WHT rate of 10% is deducted
at the time of the sale of the Treasury bills and Treasury bonds by the Central Bank in the primary market.

Notes

1. 0% for copyright royalties.
2. 0% in certain circumstances.
3. 50% of normal tax, which is 7.5%.
4. These treaties are limited to the avoidance of double taxation of income from international transport by air.
Sri Lanka

5. 10% applies if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends. In all other cases, the rate is 15%.

6. 10% applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. In all other cases, the rate is 15%.

Tax administration

Taxable period
A tax year is any period of 12 consecutive months reckoned from 1 April in any calendar year to 31 March of the following year.

Tax returns
CIT returns are due on 30 November, immediately following the end of the tax year.

Statement of accounts
Where any trade, business, profession, or vocation is being carried on or exercised by any quoted public company or any other company having a turnover of not less than LKR 250 million or net profit of not less than LKR 100 million, such quoted company or such other company should furnish a statement of accounts in support of a return of income. Such statement of accounts is to be prepared by an approved accountant on the basis of an audit carried out by such approved accountant.

Payment of tax
Sri Lanka has a pay-and-file system under which the CIT payable for each tax year is required to be paid in four instalments, on or before 15 August, 15 November, and 15 February of the tax year and 15 May immediately following the end of the tax year. If each instalment is not less than one-quarter of the CIT payable for the tax year immediately preceding, the balance of any CIT payable may be paid on or before 30 September immediately following the end of the tax year without incurring penalties.

Tax audit process
The tax authority may select tax files for an audit on a random basis or if there is any specific information relating to a taxpayer that warrants investigation.

Statute of limitations
No assessment of the income tax payable by any person:

a. who has made a return of one’s income on or before the 30th day of November of the tax year immediately succeeding that tax year shall be made after the expiry of a period of:
   • two years in respect of any tax year commencing prior to 1 April 2013, and
   • 18 months in respect of any tax year commencing on or after 1 April 2013 from the 30th day of November of the immediately succeeding tax year, or
b. who has failed to make a return on or before such date as referred to in paragraph (a) shall be made after the expiry of a period of four years from the 30th day of November of the immediately succeeding tax year.

However, such limitation shall not apply where any fraud, evasion, or wilful default has been committed.
**Significant developments**

Effective for tax years ending after 31 December 2013, the corporate tax rate in Swaziland will be lowered from 30% to 28.5%.

---

**Taxes on corporate income**

Income tax is levied on all income derived from sources generated within or deemed to be generated within the country, irrespective of whether the recipient of the income is actually resident in Swaziland.

All companies generating income within Swaziland are taxed on that income at a flat rate of 30%. Effective for tax years ending after 31 December 2013, the corporate tax rate will be lowered to 28.5%.

---

**Corporate residence**

**Permanent establishment (PE)**

PE in Swaziland is determined according to physical presence.

---

**Other taxes**

**Value-added tax (VAT)**

As of 1 April 2012, VAT replaced the sales tax at the standard rate of 14%.

Prior to 1 April 2012, sales tax was levied at a rate of 14% (25% for liquor and cigarettes) on goods imported into Swaziland and on the first sale of goods manufactured for sale in Swaziland. Customs and excise duties were also imposed on such goods. The 14% sales tax was also applicable to most professional services.

**Customs duties**

Swaziland has a provision for customs duties for various goods imported into the country. Details are available in the Harmonized Tariff Schedule (HTS).

**Excise duties**

Swaziland has an excise duty provision for various goods manufactured in the country.

**Property taxes**
There are no property taxes in Swaziland.

**Transfer taxes**
Transfer taxes are applied on a variable rate basis to property transfers based on the fair market value of the property being transferred.

**Stamp taxes**
Swaziland has a provision for stamp taxes on various documents. The tax is determined either by way of a set fee or on a sliding scale percentage basis.

**Branch income**
Income tax on registered branch profits is calculated as for a resident company, and a branch profits tax of 15% is assessed for deemed repatriated income. In practice, however, branches are rare since most foreign companies incorporate local subsidiary companies.

\[
\begin{align*}
\text{Net profit before tax} & \quad 100 \\
\text{Tax @ 30%} & \quad (30) \\
\text{Repatriated income} & \quad 70 \\
\end{align*}
\]

* Swaziland lilangeni

**Income determination**

**Inventory valuation**
Inventory valuation is not specific but is effectively at the lower of cost (i.e. first in first out [FIFO] or average cost) and net realisable value.

**Capital gains**
Capital gains are not subject to income tax, provided it can be demonstrated that the gains are of a capital and not an income nature (i.e. not recurring transactions).

**Dividend income**
Dividend income is taxable via withholding tax (WHT) for non-residents *(see the Withholding taxes section)*. No tax is due if received from another local company.
Inter-company dividends
Inter-company dividends are not subject to income tax.

Stock dividends
Stock dividends are paid out of taxed profits. Such dividends are not subject to income
tax when received by a local company, but they are subject to taxation in the hands of
local individual taxpayers at the rate of 10%.

Interest income
Interest income sourced in Swaziland is taxable.

Foreign income
Foreign income is not subject to income tax unless it is deemed to be from a
Swaziland source.

Deductions

Depreciation
Depreciation (wear-and-tear) allowances calculated by the net-reducing-balance
method are available as follows:

For the first year after the addition of an asset, the wear-and-tear allowance is
calculated on a monthly basis. With respect to leased assets, the lessor’s claim for wear-
and-tear allowance is usually spread over the lease period.
Swaziland

An initial allowance of 50% is granted for plant and machinery used in a manufacturing process, including hotel equipment. An initial allowance of 50% is granted for industrial buildings used for manufacturing purposes and hotels, together with a 4% annual allowance.

**Goodwill**
The write-off of any goodwill is not allowed for tax purposes.

**Start-up expenses**
It is departmental practice to not allow the deduction of any start-up expenses.

**Interest expenses**
Interest is deductible as long as it is incurred in the production of income.

**Bad debt**
Swaziland does allow a deduction for bad debts, subject to the Commissioner’s approval and provided that the debts were included in the taxpayer's income in the year of assessment or in years past.

**Charitable contributions**
Subject to the Commissioner’s approval in regard to the amount allowable as a deduction in the year of grant and subsequent years, Swaziland allows a deduction for, among other things, grants made to the government for the building of schools and hospitals.

**Fines and penalties**
Fines and penalties resulting from late payment of any tax or levied as payable under any Act administered by the Commissioner will be a non-deductible expense.

**Taxes**
Taxes are not deductible.

**Net operating losses**
Losses may not be carried back but may be carried forward for as long as trading continues (i.e. indefinitely). If any break in trading occurs, however, the losses are forfeited.

**Payments to foreign affiliates**
Deductions may be claimed for payments of management service fees, interest, and royalties to foreign affiliates, provided the payments are made under a written agreement, are reasonable, and receive exchange control approval for transfers outside the rand monetary area. Note that this approval is routinely given without any significant delay for *bona fide* transactions.

**Group taxation**
Swaziland does not have group taxation legislation. All companies are assessed on their individual profits and losses.

**Transfer pricing**
Swaziland does not have transfer pricing legislation; however, under the anti-avoidance provision, the Revenue Authority will look for arm’s-length transactions.
Swaziland

**Thin capitalisation**
Swaziland does not have thin capitalisation rules.

**Tax credits and incentives**

**Development Approval Order**
The Minister of Finance, along set guidelines and with prior consent of the Cabinet, may nominate a business as a developmental enterprise (i.e. a business the Minister deems to be beneficial to the development of the economy) for a grant of a Development Approval Order. If approved, the business generally will be granted tax concessions, such as a lower corporate tax rate.

**Withholding taxes**
Non-resident WHTs are levied as follows.

**Dividends**
WHT for dividends is payable at the rate of 15% (12.5% for companies registered in Botswana, Lesotho, and the Republic of South Africa). The rate drops to 10% under the double taxation agreement (DTA) with South Africa where the holding company owns more than 25% of the shares. Non-resident shareholders’ WHT is payable within 30 days of the date on which the dividend is payable.

**Interest**
WHT for interest is payable at the rate of 10%. Non-resident WHT on interest is payable within 14 days of the date of the accrual of the interest.

**Royalties**
WHT for royalties is payable at the rate of 15%. The rate drops to 10% if there is a DTA in place.

**Entertainers and sportsmen**
WHT is payable at the rate of 15% on income earned in Swaziland by entertainers and sportsmen. This tax relates only to public entertainers and sportsmen not ordinarily resident in Swaziland. The payer is required to deduct the tax and pay it within 15 days.

**Contractors or professionals**
WHT is payable at the rate of 15% on services provided by contractors or professionals in Swaziland (materials are not taxed to the extent that materials are incidental to the overall charge). The Commissioner of Taxes must be notified of any agreement relating to construction operations or professional services under which payments are made to non-resident persons within 30 days after entering into the agreement. It is required that the tax be paid within 15 days from the date of payment.

**Tax administration**

**Taxable period**
The tax year runs from 1 July to 30 June. Companies are required to have a 30 June year-end unless another year-end date is approved by the Commissioner of Taxes; such approval is routinely given.
**Swaziland**

**Tax returns**
Income tax returns should be submitted within 90 days of 30 June, unless an extension of time for submission is granted, which also is routinely given.

**Payment of tax**
Notice of the date of payment is usually given on the tax assessment.

**Provisional tax payments**
With respect to companies, provisional tax is payable in two instalments: one payment is due within six months of the company’s financial year-end, and the other payment is due no later than the last day of the company’s financial year.

The estimate of taxable income for provisional tax purposes should not be less than the taxable income assessed for the latest preceding year of assessment, for which an assessment has been issued not less than 21 days before the date the estimate is made. This rule does not apply if the taxpayer can convince the Commissioner of Taxes that the taxable income for the current year will be less than the taxable income for the preceding year.

A provisional taxpayer becomes liable to pay a penalty if the estimate for taxable income for the second payment of provisional tax is found to be both less than 90% of the taxable income as finally determined and less than the taxable income as assessed for the immediately preceding tax year.

**Tax audit process**
All assessments are subject to a tax audit. Current departmental practice is to perform tax audits going back four years.

**Statute of limitations**
There is no statute of limitations in Swaziland.

**Topics of focus for tax authorities**
Currently, there is a focus on advertising, marketing, and director costs.
Significant developments

Tightened interest stripping restrictions apply from 1 January 2013

The current Swedish restrictions from 2009 refuse tax deductions for interest payments on intra-group loans related to an acquisition of shares from an affiliate unless the creditor either is taxed for the interest at least at 10% or it is shown that both the share transfer and the debt are based on commercial reasons.

There has been a debate in Sweden in respect of aggressive debt financing and debt push-down transactions by permanently established houses and industrial players believed to be threatening the Swedish welfare system and routing Swedish pre-tax income offshore. That debate led to a proposal for strengthened interest stripping restrictions. New rules have been enacted with effect from 1 January 2013. The main implications of these new rules are:

- An extension of the scope of the current restrictions for interest deductibility to apply in respect of interest expenses on any loan within an affiliated group, whatever its purpose.
- A minimum 10% tax test at the true creditor level, i.e. the person entitled to the interest, will still allow an interest deduction (measured as if the interest had been the sole income); however, an interest deduction will not be allowed if the achievement of considerable tax benefits for the group was the main reason behind the debt structuring.
- Commercial reasons for the loan is still also an alternative test for allowing deduction, but only if the creditor is resident within the European Economic Area (EEA) or in a tax treaty jurisdiction with which Sweden has a full tax treaty.
- For internal share acquisitions, the commercial reasons test requires both the share transfer and the debt to be based on commercial reasons. Special qualifications will apply for life insurance businesses subject to yield taxes and similar regimes, as well as for back-to-back loans.

In line with the new rules, the scope-extension to any internal loan, whatever its purpose, might drastically increase the applicability of these restrictions, to not only loans for debt push-downs (internal share transfers), but also to external acquisitions of shares, as well as regular financing for acquisition of businesses or assets, or just for cash needs. As the new restrictions apply for interest accruing in 2013, they might naturally also affect many existing, old loans.

Reduced Swedish corporate tax rate to 22%

The corporate tax rate has effectively been reduced from 26.3% to 22% for financial years commencing after 31 December 2012.
Sweden

**Review of the corporate tax system**
A governmental committee has, for some time, been appointed for a major review of the corporate tax system with the aim of broadening the tax base and, *inter alia*, creating neutrality between equity and debt. The report of the committee’s findings is due to be produced by the end of March 2014.

New tax administration rules apply, including, *inter alia*, a split of the current single tax filing date in May into four different dates and new tax payment dates, as from 2013 year-endings.

---

**Taxes on corporate income**

**State (national) income tax**
Resident legal entities are liable for tax on their worldwide income unless tax treaties or special exemptions apply. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

As of 1 January 2013, taxable income is subject to corporate tax at the rate of 22% (previously 26.3%). All income of corporate entities is treated as business income.

**Local income taxes**
No local income taxes apply to Swedish corporations.

---

**Corporate residence**
A company is considered to be a tax resident of Sweden if it is incorporated in Sweden.

**Permanent establishment (PE)**
The term ‘permanent establishment’ is defined in Sweden as a fixed place of business through which the business is carried on from a specific establishment, such as a place of management, branch, office, factory, or workshop. Places where construction work is carried on are also regarded as PEs, as well as if an agent who is dependent upon the foreign company habitually exercises authority in Sweden.

---

**Other taxes**

**Value-added tax (VAT)**
The Swedish VAT system is harmonised with the European Union (EU) rules. The general VAT rate of 25% is chargeable on most goods and services. Reduced rates apply to a few goods and services, such as foodstuffs, restaurant meals, and non or low alcoholic drinks (12%), as well as to transport of passengers (6%). Certain financial and insurance services are exempt from VAT.

VAT returns are filed and tax is paid monthly or quarterly. However, for companies with a turnover of less than 1 million Swedish kronor (SEK), VAT may be reported in an annual VAT return.

**Customs duties**
As a member of the European Union, Sweden is also part of the Customs union enforcing the Community Customs code. Most EU Customs duties are calculated as a percentage of the value of the goods being imported. All imported goods must be
classified according to the EU Customs tariff (TARIC), and the duty rates applied depend on the economic sensitivity of the goods. The actual duty rate to be applied also depends on other factors, such as the country of origin of the product and any free trade agreements that may be applicable.

**Excise duties**
The three main Swedish excise duties are harmonised with EU rules. These are alcohol tax, tobacco tax, and tax on fuels and electricity.

Fuels are subject to energy tax, carbon dioxide tax, and sulphur tax. Depending on the use of fuels, taxes may be partly or fully reduced. For bio-fuels, certain exemptions may also apply.

Other Swedish excise duties are waste tax, tax on advertisement, and the on traffic insurance premiums.

The Swedish parliament has decided on changes in the Energy Tax Act, meaning that the reductions for industrial manufacturing activities will be changed. The reductions are applicable on taxable fuels, and the changes will be introduced gradually by 2015. For an industrial company that does not participate in emissions trading systems (EU ETS), the tax cost will increase significantly. For participants in the EU ETS, the tax cost will be slightly lower.

**Real estate tax**
The annual real estate tax rate on business premises is 1% of the tax assessed value. For industrial property, the tax rate is 0.5%. Other rates exist for special property.

**Stamp tax**
Stamp tax at 4.25% is payable on a transfer of real estate. The tax base consists of the highest of the purchase consideration or the tax assessed value of the real estate. Stamp tax on an intra-group transfer of real estate may be deferred as long as the real estate remains within the group.

**Social fees**
Mandatory social security charges payable by employers on remuneration to employees (or by the self-employed) are levied at approximately 31%. Reduced rates apply for very young or old people. Social security charges are deductible for corporate tax purposes.

Pension benefits beyond the mandatory system are customary amongst most Swedish employers. A special salary tax is levied at approximately 24% on these additional pension premiums/commitments and is deductible for corporate tax purposes.

**Branch income**
Branch income (i.e. PE income) is taxed at the corporate tax rate of 22%, and general corporate tax rules apply for branch offices in Sweden. No withholding tax (WHT) is levied on the outbound repatriation of taxed profits.

The receipt of Swedish-source royalties or fees for use of tangible or intangible assets by a foreign resident is also (subject to treaty restrictions) regarded as a special form of PE income.
Sweden

**Income determination**

**Inventory valuation**
Inventories (stock-in-trade) are valued at acquisition cost or market value, whichever is lower. As an alternative, inventories may be valued at 97% of the total acquisition cost, which is determined on a first in first out (FIFO) basis. The last in first out (LIFO) method is not permitted. Generally, inventories should be stated at the same amount for tax and accounting purposes.

**Capital gains**
There is a capital gains tax exemption for Swedish corporate entities on gains related to the disposal of shares held for business reasons. This abolishment of capital gains taxation for corporations, under the participation exemption provisions, has made Sweden a favourable holding company location.

Note that non-tax-exempt capital gains are included in business income and taxed at the corporate tax rate.

Shares in Swedish corporations, as well as in foreign companies, can qualify as shares held for business reasons. Unquoted/unlisted shares will always be considered as held for business reasons. Quoted/listed shares are considered held for business reasons if the company has a holding corresponding to at least 10% of the voting rights or the shares are held in the course of the business. An additional condition regarding quoted/listed shares is that the shares must be held for a period of at least one year.

Shares in partnerships (tax transparent entities) and indirect holdings via partnerships are also included in the participation exemption regime.

An exception from the capital gains tax exemption applies for the sale of shares in a ‘shell company’, which is a company or partnership where the market value of cash, shares and other marketable instruments (other than shares held for business reasons), and similar assets exceeds 50% of the consideration paid for the shares. The sale of a shell company results in harsh taxation of the gross consideration. Provided certain formalities are fulfilled, however, it is possible to avoid such taxation.

A consequence of the participation exemption is that capital losses on shares or participations held for business reasons are not deductible.

Capital losses on portfolio holdings of shares, share options, convertible debentures, and similar financial instruments are allowed only as an offset to capital gains on the same group of financial instruments.

Certain special rules apply to computation of capital gains and losses on real estate.

**Dividend income**
A participation exemption applies for dividends received on shares held for business reasons (see above) and on qualifying holdings via partnerships.

**Interest income**
Interest received by a corporation is included in the corporate tax basis.

**Foreign income**
Companies resident in Sweden are taxed on their worldwide income. Non-resident entities are taxed on income that is deemed to have its source within Sweden.
A Swedish corporation is taxed on foreign branch income. Double taxation normally is avoided by means of either a deduction for foreign tax, or a foreign tax credit.

Dividends and capital gains from foreign subsidiaries are generally exempt from taxation according to the participation exemption provisions applicable to shares held for business reasons (see above).

**Deductions**

**Depreciation, amortisation, and depletion**

**Depreciation on fixed assets**
Land improvements may be depreciated at the rate of 5% per year of the acquisition cost. The maximum allowance is 100% of the tax basis of the improvement.

Buildings may be depreciated at rates between 2% and 5% per year of the taxable basis, depending on type and usage of the building. The maximum allowance is 100% of the tax basis of the building.

For machinery and equipment, the depreciation for tax purposes should correspond to the depreciation charged in the books and accounts, as long as the total net value of the assets is not less than the 70% of net value in previous accounts plus additions less proceeds of sales (i.e. 30% declining-balance depreciation) or cost less 20% per year (i.e. 20% straight-line depreciation on remaining assets). An alternative 25% declining-balance method without correspondence to the books also exists.

**Immediate deduction of certain assets**
The cost of assets having an expected life of no more than three years and the cost of assets not exceeding certain limits, depending on size of operations, may be deducted immediately. Certain costs for repairs, maintenance, and modifications of buildings may also be deducted immediately.

**Amortisation of intangibles and goodwill**
The amortisation of patents, leaseholds, and acquired goodwill follows the same rules as depreciation for machinery and equipment (see above).

**Depletion of mines and quarries**
The entire cost of mines and quarries may be depleted over their expected exploitation period. These depletion amounts may be deducted annually but are limited to 100% of the acquisition cost of the mine or quarry.

**Start-up expenses**
General start-up expenses for generating and maintaining business income are, as a rule, deductible for Swedish tax purposes.

**Interest expenses**
Interest expenses on external loans are fully deductible, whereas interest paid to affiliated companies are deductible only if an exception applies under the Swedish interest stripping restrictions and to the extent that the arm’s-length principle is complied with. Under the interest stripping restrictions, a deduction is not allowed for interest accruing on an intra-group loan unless the creditor (i.e. the person entitled to the interest) is taxed on the interest income at a rate of at least 10% or it is shown that the debt is based on commercial reasons. Regardless, a deduction may be refused if
Sweden

the debt structure has been put in place mainly for the group to achieve a substantial tax benefit.

**Bad debt**
Business bad debts are deductible if they are proven wholly or partially worthless.

**Charitable contributions**
Purely charitable contributions are generally non-deductible.

**Fines and penalties**
Fines and penalties are non-deductible for Swedish tax purposes.

**Taxes**
Generally, Swedish taxes are not deductible for tax purposes. However, specific taxes, fees, and foreign taxes may be deductible. Recoverable VAT is not treated as an expense or cost.

**Net operating losses**
Tax losses may be carried forward indefinitely, subject to restrictions or forfeiture upon ownership changes, mergers and demergers, dispositions with creditors, and certain other reorganisations. No carryback of losses is possible.

**Payments to foreign affiliates**
Transactions with affiliates not liable to tax in Sweden must be at arm’s length. Formal transfer pricing documentation requirements apply.

**Group taxation**
Swedish companies are not taxed on a consolidated basis. However, it is possible for qualifying groups (i.e. a holding greater than 90% of the capital, which must have been owned during the whole fiscal year) to effectively offset operating losses of one Swedish company against operating profits of another Swedish company by way of group contributions, which are tax deductible for the contributor and taxable for the recipient. EEA companies are regarded as Swedish companies for these purposes if the recipient is taxable in Sweden.

A similar Swedish deductibility is, under certain circumstances, also available for cross-border consolidation within the EEA for final subsidiary losses.

**Transfer pricing**
The Swedish transfer pricing regime is generally an Organisation of Economic Co-operation and Development (OECD) type of regime. Sweden has formal transfer pricing documentation requirements in place.

**Thin capitalisation**
There are no thin capitalisation rules for tax purposes in Sweden; however, interest stripping restrictions exist (see Interest expenses in the Deductions section).

**Controlled foreign companies (CFCs)**
Sweden's CFC provisions aim at taxing a Swedish resident shareholder for shareholdings in low-taxed foreign entities. A Swedish resident shareholder with a holding in a CFC entity will annually be taxed for its ownership portion of the CFC’s income, according to provisions applicable to a Swedish corporation. For a corporation,
the portion will be taxed at the Swedish corporate tax rate. Only holdings, direct or indirect through other foreign entities, corresponding to at least 25% (capital or voting rights) in the foreign entity could lead to CFC taxation. A foreign company is considered low taxed if the income in the company, calculated in accordance with Swedish provisions, is taxed at a rate below 12.1%. However, if the foreign entity is resident in an ‘approved country’, CFC taxation should not arise. Approved countries appear in an official ‘black/white’ list. Active EEA entities are, under certain circumstances, not considered low taxed.

Tax credits and incentives

There are no specific tax incentives in Sweden for corporations. However, some generally applicable regimes exist.

For example, Sweden has an accruals reserve regime. The accruals reserve regime allows for a tax-deductible appropriation for corporations of 25% of the taxable profit before appropriation to a reserve. Each year’s appropriation forms a separate reserve that must be reversed to income no later than the sixth year following the appropriation. However, a standardised interest income is imposed on former years’ appropriations at 72% of the interest rate on governmental debt notes.

Foreign tax credit

A foreign tax credit is generally available, provided certain conditions are fulfilled, and the tax credit allowed is limited to an amount corresponding to the Swedish tax on the foreign income. Unutilised foreign taxes may be carried forward for five years. Tax treaty implications may exist.

Withholding taxes

There are no Swedish taxes on interest and service fees paid to non-resident corporations or individuals. Such payments to resident corporations and individuals are taxed as ordinary income.

WHT on dividends, royalties, and certain rentals vary according to domestic law and tax treaties, as shown below.

Apart from the highlighted treaties, Sweden has concluded agreements on exchange of information in tax matters and partial tax treaties with many tax haven jurisdictions.

#### Notes

1. According to domestic law, there is no WHT on dividends to a foreign company on shares held for business reasons (for the definition of shares held for business reasons, see Capital gains in the Income determination section), provided that the foreign company is similar to a Swedish limited liability company (and some other legal entities) and is subject to income tax at a similar level to that imposed on a Swedish company. Further, there is no tax liability for a legal entity of a member state of the European Union if the entity owns 10% or more of the share capital in the distributing company and fulfils the conditions of the Directive (90/435) regarding parent company and subsidiaries.

2. The reduced rate shown before a stroke (/) refers to payments to corporations having requisite control. Where appropriate, the particular treaty should be consulted to see whether the reduced rate is applicable.

3. Swedish-source royalties and certain rental fees are treated as a special form of PE, taxable at the corporate tax rate, subject to treaty reduction or waiver. Royalties paid from Sweden to a company within the European Union should not be taxed in Sweden if one of the companies holds at least 25% (capital) of the other or, where there are two companies concerned, at least 25% are held by another company within the European Union. Indirect participation does not benefit from the legislation. Both the payer and the recipient must be legal entities under the EU directive.

4. Payments to resident corporations and individuals are taxed as ordinary income. Only resident banks and similar entities are required to withhold tax on payments of cash dividends to resident individuals.

5. Royalties and certain rentals paid by Swedish licensees are treated as business income taxable in Sweden and do not incur WHT (see Note 3).

6. Note also the domestic provision stating a 0% WHT on dividends distributed on shares held for business reasons to qualifying entities (see Note 1).
Sweden

7. Dividends: 10% of the gross amount if the company receiving the dividends owns at least 25% of the foreign company’s capital.

Royalties: of the gross amount paid for the use of, or the right to use:
- News: 3%.
- Copyright of literary, dramatic, musical, or other artistic work: 5%.
- Any patent, trademark, design or model, plan, or secret formula or process; industrial or scientific equipment or information concerning industrial, commercial, or scientific experience; payments for the rendering of technical assistance: 10%.
- All other cases: 15%.

8. Royalties are normally taxable only in the recipient’s home country. However, where the royalty is paid by a Swedish legal entity that is more than 50% owned by one Austrian recipient, entity or individual, the tax in Sweden is a maximum of 10%.

9. Literary, artistic, or scientific royalties: 0%; other royalties: 5%.

10. Royalties for use of industrial, commercial, or scientific equipment: 5%; with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 3%; other royalties: 10%.

11. Royalties for use of copyright and literary, dramatic, musical, and artistic royalties: 0%. Other royalties: 10%. (Treaty should be consulted).

12. The treaty has effect on income derived on or after 1 January 2006.

13. The double taxation treaty does not include Hong Kong.

14. The same treaty is applicable to the Czech Republic and the Slovak Republic.

15. According to the Nordic multilateral tax treaty.

16. Dividends are exempt from tax if the recipient of the dividends is a company directly owning at least 10% of the capital of the company paying out the dividends. Certain rentals are subject to tax if there is a PE in a country other than the home country and the claim is connected with the business carried on from the PE. Concerning Iceland, dividends are normally exempt from tax for companies, but the tax rate is 15% if the dividends have been deducted from the income of the distributing company.

17. Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.

18. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 5%; other royalties: 12.5%.

19. Royalties for the use of industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience: 10%; other royalties: 15%. (Treaty should be consulted.)

20. Literary, artistic, or scientific royalties including films: 15%; other royalties: 10%. (Treaty should be consulted.)

21. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial or scientific experience: 5%; other royalties: 15%.

22. Commercial royalties, including films: 20%; copyright, literary, dramatic, musical, or artistic royalties: 0%.

23. Commercial royalties, including films: 15%; literary, dramatic, musical, or artistic royalties: 5%.

24. Literary, artistic, scientific, or film royalties: 10%; other royalties: 7%.

25. Royalties with respect to patents, designs or models, secret formulas or processes, or for information concerning industrial or scientific experience or for the use of industrial, commercial, or scientific equipment involving a transfer of know-how: 5%; other royalties: 15%.

26. The treaty is applicable to all republics and autonomous provinces of the former Yugoslavia with the exception of Macedonia, with which Sweden has concluded a bilateral treaty.

---

Tax administration

Taxable period
If the income is derived from business, the basis for tax assessment is the financial year. The year-end for a company may be fixed at any calendar month ending. Swedish subsidiaries of foreign parents are generally permitted to adopt the same year-end as the parent company, provided it ends on the last day of the month.

Tax returns
Every corporate entity or registered branch must file an annual corporate tax return. Tax returns covering financial year 2011 are due to be filed by 2 May 2013, although an extension may be available. New due dates apply for tax return submissions after the filings of the financial year 2012 tax returns. The applicable due date will depend on the month in which the financial year ends: tax returns for financial years ending in January through April are due on 1 November in the same year; tax returns for financial years ending in May or June are due on 15 December in the same year; tax returns for
financial years ending in July or August are due on 1 March in the following year; and tax returns for financial years ending in September through December are due on 1 July in the following year. The financial year of most Swedish companies follow the calendar year; consequently, most tax returns will be due on 1 July each year.

The annual assessments are made by the local tax offices during the calendar year following the income year and should be completed within six months. Employer returns (employee Pay As You Earn [PAYE] and employer withholding) are normally due on a monthly basis.

**Payment of tax**

Income taxes are collected during the year in which the income is earned, under a preliminary tax system. A corporate entity’s preliminary tax liability is determined by a preliminary tax assessment based either on the latest available final tax assessment or on a preliminary tax return filed by the company. The preliminary taxes are payable in monthly instalments. Interest surcharges on underpayment of preliminary taxes, however, generally apply from 12 February the year after the financial year (the assessment year). Any balance owed by the taxpayer is payable in 90 days after the assessment has been made. Normally, any balance owed to the taxpayer is refunded in December of the assessment year.

For financial year endings in 2012, these rules still apply. Following the changes to the filing due dates for financial years ending in 2013 and going forward, new dates will also apply in respect of final tax payments. The situation of each company should be carefully managed in the transition from the old rules to the new rules to avoid potential interest on unpaid final tax.

**Tax penalty**

A taxpayer that submits incorrect or insufficient information in a tax return is charged a penalty of up to 40% of the tax that, if the incorrect information had been accepted, would have been imposed or credited. The penalty and the rate may vary depending on the type of the shortcoming.

**Appeals**

Taxes are assessed by the Swedish Tax Agency. Depending on the circumstances, reassessments and/or appeals generally can be initiated within one and five years after the assessment year. Appeals can be made to the administrative court, and onwards to the administrative court of appeal, and in case of granted trial dispensation, onwards to the supreme administrative court.

**Topics of focus for tax authorities**

The Swedish Tax Agency has for quite some time focused on challenging interest deductions on inter-company loans made under the view that the interest rate fixed is too high. This particular focus is currently resulting in a number of court cases.

Another focus of the Swedish Tax Agency has been to challenge individual owners of private equity companies on the taxation of carried interest.

Significant developments

Corporate Tax Reform III
After having implemented two favourable corporate tax reforms, a federal and cantonal project organisation announced in May 2013 the direction of a third corporate tax reform. The aim of the reform is to stabilise and strengthen Switzerland’s fiscal competitiveness as a business location. More specifically, the project organisation proposed that the following measures shall be considered:

- Introduction of new special tax regimes compatible with European Union (EU) and Organisation for Economic Co-operation and Development (OECD) requirements.
- Reduction of cantonal corporate income tax (CIT) rates.
- Removal of certain tax obstacles in order to generally strengthen the attractiveness as a business location.

With respect to the first measure, the introduction of new special regimes, it shall be ensured that the possible abolition or changes to the current tax privileges (see Privileged cantonal tax regimes in the Tax credits and incentives section) will be compensated in order to maintain an attractive level of taxation for mobile activities. Possible solutions are, for example, intellectual property (IP) boxes and a notional interest deduction on equity. With respect to the third measure, changes to the current participation relief mechanism, the abolition of the issuance stamp tax on equity, and improvements to the conditions in relation to group financing, in particular, will be looked into.

The project organisation concluded that the implementation of corporate tax reform III into Swiss law will take approximately five to seven years.

Foreign Account Tax Compliance Act (FATCA)
In February 2013, Switzerland and the United States (US) signed a bilateral FATCA agreement (see FATCA in the Tax administration section). The agreement will help Swiss financial institutions by means of simplifications in the implementation of the US FATCA legislation entering into force on 1 January 2014. The agreement shall ensure that accounts held by US persons with Swiss financial institutions are disclosed to the US tax authorities either with the consent of the account holder or through ordinary administrative assistance channels (no automatic information exchange). The agreement and the implementing act require the approval of the Swiss parliament and will subsequently be subject to a referendum procedure. The agreement must enter into force by 1 January 2014 at the latest in order for Swiss financial institutions to benefit from simplified implementation of FATCA.
Introduction of the new Federal Act on the taxation of equity-based employee compensation schemes on 1 January 2013

On 1 January 2013, the new Federal Act on the taxation of equity-based employee compensation schemes entered into force. It harmonises the taxation of equity instruments in Switzerland (see Switzerland’s Individual tax summary at www.pwc.com/taxsummaries) and contains new regulations pertaining to employer reporting obligations. Corporations may be impacted if they issue equity-based employee compensation, such as shares or stock options.

Withholding tax (WHT) exemption on the interest from specific Swiss bonds since 1 January 2013

Since 1 January 2013, interest paid on contingent convertible bonds (CoCos) and on write-off bonds (bonds with claim waiver) of systematically important banks has been exempt from Swiss WHT. The WHT exemption is restricted to bonds issued by respective institutions between 2013 and 2016. These bonds must, furthermore, fulfil specific criteria in order to benefit from the WHT exemption.

Taxes on corporate income

Resident companies are subject to Swiss CIT on their taxable profits generated in Switzerland. CIT is levied at the federal, cantonal, and communal level. Foreign-source income attributable to foreign permanent establishments (PEs) or real estate property located abroad is excluded from the Swiss tax base and only taken into account for rate progression purposes in the cantons that apply progressive tax rates.

Non-resident companies may be subject to Swiss CIT if they are (alternatively) partners of a Swiss business, have a PE in Switzerland, own real estate property in Switzerland, have loan receivables secured by a mortgage on Swiss real estate property, or deal with or act as a broker of Swiss real estate property. Non-resident companies are taxed on their income generated in Switzerland only (see the Branch income section).

Federal level
Switzerland levies a direct federal CIT at a flat rate of 8.5% on profit after tax. Accordingly, CIT is deductible for tax purposes and reduces the applicable tax base (i.e. taxable income), resulting in a direct federal CIT rate on profit before tax of approximately 7.83%. At the federal level, no corporate capital tax is levied.

Cantonal/communal level
In addition to the direct federal CIT, each canton has its own tax law and levies cantonal and communal income and capital taxes at different rates. Therefore, the tax burden of income (and capital) varies from canton to canton. Some cantonal and communal taxes are imposed at progressive rates.

Overall tax rates
As a general rule, the overall approximate range of the maximum CIT rate on profit before tax for federal, cantonal, and communal taxes is between 11.5% and 24.2%, depending on the company’s location of corporate residence in Switzerland.

Corporate residence
A company is considered resident in Switzerland if its domicile is in Switzerland. Residency is also linked to the place of effective management, which may be the centre
Permanent establishment (PE)
For Swiss tax law purposes the term ‘permanent establishment’ means a fixed place of business through which the business activity of an enterprise is wholly or partly carried on. In particular, PEs are branches, factories, workshops, sales agencies, permanent representations, mines and other places of extraction of natural resources, as well as building or construction sites that last at least 12 months. This definition is generally in line with the criteria according to Article 5 paragraph 2 of the OECD Model Tax Convention on Income and Capital.

Other taxes
Value-added tax (VAT)
As a matter of principle, proceeds of sales and services conducted in Switzerland are subject to VAT at the standard rate of 8%. Goods for basic needs are subject to VAT at the rate of 2.5%. These rates include a temporary increase that went into effect on 1 January 2011 and will remain applicable until 31 December 2017. On 1 January 2018, if no extension or change is enacted, the rates should decrease from 8% to 7.6%, and from 2.5% to 2.4%. Services in connection with the provision of lodging are subject to VAT at the rate of 3.8% (limited until 31 December 2013). An extension of the 3.8% VAT rate up to 31 December 2017 is currently subject to legislative consultations.

Any person, regardless of legal form, objects, and intention to make a profit is liable to VAT if that person carries on a business and is not exempt from the tax liability. A person carries on a business if one independently performs a professional or commercial activity with the aim of sustainably earning income from supplies and acts externally under one’s own name. Persons, who are taxable, must register with the Swiss Federal Tax Administration of their own accord in writing within certain deadlines. Anyone who in Switzerland generates less than 100,000 Swiss francs (CHF) in turnover within a year from taxable supplies is exempt from the aforementioned liability. A registered taxpayer generally is entitled to offset the amount of VAT charged by suppliers or paid on imports against the VAT payable.

The VAT rates are dependent on the goods sold or the services provided. Some supplies are just exempt from the tax without credit (e.g. hospital treatment, cultural services, insurance and reinsurance turnovers, specific turnovers in the field of money and capital transactions) and some supplies are fully exempt from the tax (e.g. supply of goods that are transported or dispatched directly abroad). The difference relates to the fact that the input VAT related to supplies exempt from the tax without credit cannot be deducted, whereas supplies exempt from the tax are fully eligible for input VAT deduction.

Customs duties
All goods arriving in Switzerland from abroad are generally subject to customs duty and import VAT. The customs duty is calculated on the gross weight of imported goods, where category-specific weight rates apply. Products like alcoholic drinks, tobacco products, food, and textiles are typical categories of higher duty rates. Furthermore, imported goods are subject to import VAT of generally 8%. A reduced rate of 2.5% applies on certain goods, like food, non-alcoholic beverages, books, magazines, pharmaceutical products, etc.
Excise taxes
In Switzerland, various excises taxes are levied. To name a few, the following excise taxes are levied at the federal level:

- VAT (see above).
- Petroleum tax.
- Performance-related Heavy Vehicle Fee.
- National road tax (motorway tax sticker).
- Beer excise tax/Tax on alcohol.
- Tobacco excise tax.

Property taxes
With regard to the ownership and the transfer of real estate property in Switzerland, property taxes may apply. Depending on the location of the real estate property, ownership related property taxes are levied at the cantonal and/or communal level or do not exist at all.

In case of the sale of real estate property, real estate transfer tax and taxes on the capital gain may apply.

At the federal level, the capital gain realised on the sale of real estate property is subject to ordinary CIT. At the cantonal and communal level, the capital gain realised is either subject to the ordinary CIT (dualistic method) or subject to the real estate capital gain tax (monistic method).

It is in the authority of the cantons to decide how real estate capital gains shall be taxed within their territory.

Securities transfer tax
Swiss securities transfer tax (often called ‘securities turnover tax’ or ‘transfer stamp tax’) is levied on the transfer of Swiss or foreign securities in which Swiss security dealers participate as contracting parties or as intermediaries. The ordinary tax rate of Swiss securities transfer tax is 0.15% for securities issued by a tax resident of Switzerland and 0.3% for securities issued by a tax resident of a foreign country.

Swiss security dealers are defined as any person professionally engaged in the buying or selling of securities for one’s own account or for another person, including Swiss banks and other Swiss bank-like institutions. The definition also includes companies holding taxable securities whose book value exceeds CHF 10 million and remote members of a Swiss stock exchange.

Taxable securities include, but are not limited to, shares and bonds. Options and many other derivative instruments are not subject to Swiss securities transfer tax. However, the exercise of such financial instruments or derivatives may result in a taxable transfer of a security.

Various transactions are exempt from the Swiss securities transfer tax. Generally, no Swiss securities transfer tax is levied in the case of a merger or a reorganisation in which a Swiss security dealer is involved and taxable securities (including participations) are transferred. Furthermore, the like-kind exchange of a participation by a Swiss security dealer is also exempt from the Swiss securities transfer tax. This is particularly important for holding companies, which may qualify as Swiss security dealers.
Switzerland

**Issuance stamp tax**

Issuance stamp tax (often known as ‘capital duty’) on the issuance and the increase of the equity of Swiss corporations is levied at the rate of 1% on the fair market value of the assets contributed, with an exemption on the first CHF 1 million of capital paid in, whether it is made in an initial or subsequent contribution.

A tax ruling may be obtained to apply for and confirm exemption of a multitude of transactions from issuance stamp tax. In particular, special tax provisions allow for most reorganisations to take place on a tax neutral basis. In addition, an existing non-resident company may generally transfer assets to Switzerland without incurring Swiss issuance stamp tax. However, if the company was formed abroad and re-domiciled to Switzerland exclusively or mainly in order to avoid Swiss stamp taxes, the issuance stamp tax may apply.

On 1 March 2012, the amendment of the Swiss banking act (so called ‘too big to fail rules’) was enacted. These rules include the abolition of Swiss issuance stamp tax on the issuance of Swiss bonds and money market instruments. Accordingly, the issuance of Swiss bonds and money market instruments are no longer subject to Swiss issuance stamp tax.

In addition, the conversion of CoCos into equity will also not trigger Swiss issuance stamp tax on the newly created equity. This relief applies to CoCos according to the Swiss banking law only; other convertible bonds will still trigger Swiss issuance stamp tax if converted into equity. The abolition of issuance stamp tax on debt instruments is to be seen as a starting point in the promotion of issuing debt instruments in Switzerland.

**Capital tax**

Corporate capital tax is only levied at the cantonal and the communal level (not at the federal level). It is based on a corporation's equity (i.e. the taxable equity corresponds to the sum of nominal capital, paid in surplus, retained earnings, other equity reserves, and, according to Swiss thin capitalisation rules, potential deemed equity). The ordinary capital tax rates vary between 0.001% and 0.525%, depending on the company's location of corporate residence in Switzerland. Reduced capital tax rates are applicable for companies subject to a special cantonal tax regime (e.g. holding companies, mixed trading companies).

The cantons are allowed to foresee in their tax law that CIT is creditable against a corporation's capital tax. As of 1 May 2013, the following cantons have implemented such credit system: Argovie, Appenzell Innerrhoden, Bern, Basel-Land, Geneva, Glarus, Neuchâtel, St. Gallen, Solothurn, Schwyz, Thurgau, and Vaud.

**Payroll taxes**

**Wage tax withholding (tax at source)**

Employees meeting certain criteria (e.g. Swiss tax resident foreign nationals without a permanent residence permit, non-Swiss tax resident individuals) are subject to wage tax withholdings. It’s the employer’s obligation to withhold the appropriate wage tax on the employee’s gross salary. The wage taxes cover the employee’s federal, cantonal, and municipal taxes as well as church tax (if applicable) (see Switzerland’s Individual tax summary at www.pwc.com/taxsummaries).
Social security contributions
Employers, in general, are required to account for social security contributions on the salaries of their employees. If the employee is subject to the Swiss social security system, the following compulsory social security contributions are concerned (see Switzerland’s Individual tax summary at www.pwc.com/taxsummaries):

- Old age, survivors’, and disability insurance (9.8%; the employee’s share is one half).
- Unemployment insurance/supplementary unemployment insurance (approximately 1.1%; the employee’s share is one half).
- Family compensation fund (1% to 3%; fully employer financed).
- Occupational accident insurance (approximately 0.17%; fully employer financed).
- Occupational pension scheme (2nd pillar) (contributions depend on pension plan; the employee’s share is usually one half).

Branch income
Foreign legal entities having a branch in Switzerland become subject to limited taxation in Switzerland. Such branches generally qualify as PEs in line with the OECD Model Tax Convention. The branch’s income is, in general, subject to the same CIT rules that apply for Swiss corporations. It is worth noting that there is no Swiss WHT on profit transfers from the Swiss branch to its foreign head office.

Income determination
The statutory accounts of a Swiss company (or in the case of a non-resident company, the branch accounts) serve as the basis for determining taxable income. There are generally very few differences between statutory profit and taxable profit apart from the participation relief for dividend and capital gains income (see below), adjustments required by tax law, and the usage of existing tax loss carryforwards (see Net operating losses in the Deductions section).

Inventory valuation
Swiss CIT treatment does, in principle, follow underlying Swiss statutory accounting treatment. Inventory valuation is therefore determined according to the accounting rules of the Swiss code of obligations.

Accordingly, the maximum inventory value represents the inventory’s acquisition costs or its production costs. In case these costs exceed the inventory’s market value at the balance sheet date, the latter lower market value must be applied. In order to determine the inventory’s acquisition or production cost, various methods exist.

It is at the corporate taxpayer’s discretion to determine which method shall apply (e.g. weighted average method, first in first out [FIFO], last in first out [LIFO], highest in first out) (see Obsolete inventory provision in the Deductions section).

Participation relief
Participation relief is the name generally attributed to the tax relief on qualifying dividend income and capital gains from the disposal of a subsidiary. Participation relief is not an outright tax exemption, but rather a tax abatement mechanism. It is therefore also commonly referred to as ‘participation deduction’ or ‘participation exemption’.
Participation relief is a percentage deduction from CIT that is equal to net participation income divided by taxable income. Net participation income consists of the gross participation income from qualifying dividends and (usually) qualifying capital gains less related administration and financing costs and any depreciation of the participation that is linked to the dividend distribution. In most cases, participation relief results in a full exemption of participation income from federal CIT, or one close thereto. Note that participation relief may be diluted in certain cases (e.g. if loss carryforwards are offset).

The participation relief on dividend income is mandatory at the federal CIT as well as at the cantonal/communal level. The participation relief on capital gains is voluntary for cantonal/communal tax purposes, but nevertheless implemented by all cantonal tax acts. Specific privileged cantonal/communal tax regimes may foresee more favourable rules for dividend income and capital gains than the participation relief (see Privileged cantonal tax regimes in the Tax credits and incentives section).

**Dividend income**
Dividends qualifying for participation relief are those from participations representing at least 10% of the share capital or 10% of profits and reserves of another company or those having a market value of at least CHF 1 million. Note that there is neither a minimum holding period nor a requirement that the dividend paying subsidiary is liable to income tax in its jurisdiction of residence.

**Capital gains**
Capital gains derived from the disposal of a qualifying participation are entitled to participation relief if the following conditions are cumulatively met:

- The participation sold was owned by the company for a period of at least one year.
- The amount sold constitutes at least 10% of the share capital or 10% of profits and reserves of the underlying subsidiary. Partial sales of residual holdings of less than 10% are possible, provided their market value at the beginning of the year still amounted to at least CHF 1 million.

It is noteworthy that capital gains are only entitled to participation relief to the extent the sales price exceeds the original investment costs (commonly also referred to as ‘acquisition costs’) of the participation, whereas the so-called ‘recaptured depreciation’ (i.e. the amount of former depreciations) is taxable.

**Interest income**
Interest income earned is taxable income. It is of no relevance whether the payment of the interest was made by a related party (affiliated company or shareholder) or by a third party (see Interest expense in the Deductions section).

**Foreign exchange gains**
Realised foreign exchange gains (transaction gains) are included in the tax basis of a corporation as taxable. Based on a federal court decision in 2009, unrealised gains (or losses) resulting from the translation of financial statements in a foreign (functional) currency to Swiss francs (presentation currency) may not be taxable (respectively tax deductible).

**Foreign income**
Swiss tax resident corporations are basically taxed on their worldwide income. However, income attributable to a foreign PE (i.e. a PE outside of Switzerland) is not taxed in Switzerland. It may only be taken into account to determine the applicable
tax rate, in case progressive tax rates apply. The same rule applies for income from real estate property situated abroad.

Dividends, interest, and royalties from Swiss or foreign sources are included in taxable income. However, in certain cantons, special methods of assessment may apply for dividend and other income originating outside Switzerland. For dividend income, a relief generally is available at the federal income tax level as well as at the cantonal/communal level (see Participation relief above). The irrecoverable portion of foreign WHT of most treaty countries can be credited against the related Swiss income taxes on the same income. Foreign WHT of non-treaty countries generally is not creditable, but is deductible for income tax purposes.

There are no controlled foreign company (CFC) rules in Switzerland. Consequently, undistributed income of foreign subsidiaries is usually not taxed in Switzerland (see Controlled foreign companies [CFCs] in the Group taxation section).

**Deductions**

The statutory accounts of a Swiss company are the basis for determining taxable income. To be tax deductible, an expense has to be booked in the statutory accounts accordingly.

Generally, all business expenses that are booked in the statutory accounts are tax deductible, assuming they are economically/commercially justified from a tax perspective. If an expense is not a justifiable business expense in the sense of the tax law, it will be added back to taxable income. Examples typically include excessive depreciation, non-justified payments to related parties (e.g. hidden profit distributions), etc.

**Depreciation and amortisation**

Maximum depreciation/amortisation rates allowed for tax purposes are issued by the Federal Tax Administration. Higher depreciation/amortisation is allowed for tax purposes if the taxpayer can prove that such higher depreciation/amortisation is required (not only allowed) from a statutory accounting perspective. Some cantons follow the federal guidelines, whereas some cantons apply their own (more liberal) applicable depreciation/amortisation rates.

The following summary of the rates specified by the Federal Tax Administration provides the general range of tax accepted depreciation:

<table>
<thead>
<tr>
<th>Assets</th>

</tr>
</tbody>
</table>
Switzerland

Some cantons (e.g. Basel-City, Bern, Grison, Zurich) take a more liberal approach and even permit an immediate write-down of certain assets (including fixed assets) to 20% or nil of the purchase price in the first year, provided that such write-downs do not, in the aggregate, result in a drastic decline in taxable income or even a tax loss. For tax purposes, such immediate write-downs must be booked in the statutory accounts and generally disclosed in the tax return. As the cantonal tax authorities are responsible for assessing not only cantonal/communal CIT but also federal CIT, the immediate write-down will typically be accepted for federal CIT purposes as well.

**Goodwill**
Only acquired goodwill (derivative goodwill) may be capitalised in the statutory accounts and be amortised. Amortisation is generally allowed straight-line over five years. Special limitations apply to acquired shares, where the purchase price for these shares partly represents inherent goodwill.

**Start-up expenses**
Since 1 January 2013, the Swiss code of obligations no longer contains any specific Swiss statutory accounting provision with regard to start-up expenses (previously stated in Article 664 of the Swiss code of obligations; transition rules to the repeal apply). As such, for Swiss statutory accounting purposes, start-up expenses can no longer be capitalised and amortised straight-line over a maximum of five years. Instead, for Swiss statutory accounting purposes, start-up expenses shall be expensed as incurred. For Swiss CIT purposes, business related start-up expenses as booked in the statutory profit and loss statement are likely fully tax deductible.

**Interest expense**
Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliated company or shareholder) has to reflect the fair market rate and is subject to limitations (see Thin capitalisation in the Group taxation section).

With respect to related parties, the Federal Tax Administration annually issues safe harbour interest rates to be used on loans denominated in Swiss francs on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates used are at arm’s length and more appropriate in the present case. The cantons usually follow these federal guidelines.

The safe harbour rules for loans denominated in Swiss francs applicable as of 1 January 2013 are as follows:

<table>
<thead>
<tr>
<th>For loans made to related parties</th>
<th>Minimum interest rate (%)</th>

</table>

* In calculating the amount of the maximum interest permissible from a tax perspective, any potentially existing hidden equity (under Swiss thin capitalisation rules) has to be considered.

**Bad debt provision**

Based on a longstanding practice in Switzerland, it is admissible to set up an accounting provision for specific impaired receivables, which will be accepted for income tax purposes. Unlike most other countries, it is also possible to account for an additional (‘lump sum’) bad debt provision of 5% on all domestic and 10% on all foreign receivables (i.e. a provision in addition to the provision for specific impaired receivables), except for inter-company receivables and receivables to the public, enabling the taxpayer to defer the related tax liability until this provision has been released. Some cantons, such as Zurich, accept an even higher reserve (i.e. 10% on domestic and 20% on foreign receivables). This additional bad debt provision may have the character of a ‘hidden’ (i.e. undisclosed) reserve and is appropriate because the Swiss statutory accounting standards favour prudence over true and fair view accounting principles.

**Obsolete inventory provision**

Similarly to the bad debt provision, it is also possible to account for a ‘hidden’ (i.e. undisclosed) reserve on a company’s inventory. This provision, which must also be booked in the statutory accounts, is accepted for tax purposes (similar to the bad debt provision). Specifically, a company may book a provision for specific obsolete inventory as well as a general provision of 33.3% of the inventory value after deduction of the obsolete inventory.

**Charitable contributions**

At the federal level, charitable contributions of up to 20% of the net profit (after tax) of a company are tax deductible, provided certain criteria are met. In particular, the charitable contribution has to be remitted to (i) Swiss legal entities that are exempt from taxation based on their public welfare or exclusively charitable objective or to (ii) the Swiss Federation, a Swiss canton or municipality, or their agencies (‘Anstalten’). The cantons usually apply the same rules and similar thresholds.

Sponsoring contributions are only tax deductible if commercially justified (without specific thresholds).
Switzerland

Royalties
Royalty payments are generally deductible for tax purposes as long as the royalty rate is at arm’s length.

Costs of employee share plans and stock option plans
The cost of employee share plans and stock option plans are generally deductible, assuming the employees eligible for the plan are employed by the Swiss company. The same holds true for the recharge of costs for plans covering local employees.

Fines and penalties
Under Swiss tax law, tax fines are not tax deductible. The potential tax deductibility of other fines or penalties has to be analysed with respect to the specific case.

Tax expenses
Corporate income and capital taxes paid to the federal government, as well as to the cantons and the municipalities, are tax deductible.

Net operating losses
Tax losses can be carried forward for, at maximum, seven years and can be offset against the taxable income of the following seven years. There is no carryback of tax losses in Switzerland.

Payments to foreign affiliates
Management and services fees paid by a Swiss company to a related party are generally tax deductible as long as the fees are at arm’s length.

Group taxation
Tax is levied on each corporation as a separate entity. A parent company and its Swiss subsidiaries are taxed separately, and only the dividends from the subsidiaries (but not their profits) are taxable in the parent company’s hands. However, usually for dividend income, the participation relief is applicable (see Participation relief in the Income determination section). For income and capital taxes, no rules on group taxation exist.

Transfer pricing
Switzerland is of the opinion that transfer pricing matters cannot be addressed by legislation and therefore has no plans to issue any domestic provisions on transfer pricing in the near future. There is, however, an increasing awareness of the issue and concern on the part of the Swiss tax authorities that taxpayers may transfer profits without economic justification either to countries with strict transfer pricing rules and documentation requirements in order to avoid challenges by the respective local tax authorities or to offshore locations. In this context, Swiss tax authorities take an increasing interest in a company’s transfer pricing position in order to defend their own position. Some cantonal, as well as the federal, tax authorities started to particularly focus on low risk/low profit entities located in Switzerland.

Switzerland follows the OECD Guidelines as closely as possible and recognises the arm’s-length principle based on interpretation of actual legislation. To clarify transfer pricing issues, Switzerland offers an informal procedure for agreeing to pricing policies in advance.
Switzerland

**Thin capitalisation**
Swiss thin capitalisation rules are, in general, only applicable for related parties. In case of a thin capitalisation, the related party debts can be treated as taxable equity. The respective circular letter issued by the Federal Tax Administration provides for debt-to-equity ratios as safe harbour rules. As an example, the debt-to-equity ratio is generally fixed at 6:1 for finance companies (safe harbour). Interest paid on loans that exceed the relevant ratios are not tax deductible; further, these interest may be deemed as a hidden distribution and hence subject to Swiss WHT. There are no limitations on the financing of Swiss corporations by independent third parties (e.g. banks).

Interest rates paid to affiliated companies are also subject to periodically fixed ceilings (see Interest expense in the Deductions section). The tax deduction of interest in excess of the permitted safe harbour rate may be disallowed and treated as a hidden distribution subject to Swiss WHT.

**Controlled foreign companies (CFCs)**
In Switzerland, no CFC or ‘subject to tax’ rules exist. Foreign companies are therefore recognised for Swiss tax purposes if they are managed and controlled offshore and are not set up purely for the reason of avoiding Swiss taxes.

**Tax credits and incentives**
Generally, cantons offer competitive income tax rates for cantonal and communal tax purposes. Depending on the specific cantonal and communal tax location in Switzerland, the ordinary overall (federal, cantonal, and communal) CIT rates applicable on profit before tax may vary between 11.5% and 24.2% (see the Taxes on corporate income section). The cantons continually try to improve their attractiveness as business locations. As a result of the corporate tax reform II, the cantons can choose to credit CIT against the capital tax to reduce the overall tax burden (see Capital tax in the Other taxes section). As a further example, the canton of Nidwalden introduced a tax relief for certain licence income (so-called ‘licence box’), whereupon net licence income from the use of intangible assets is taxed separately at a reduced CIT rate of one-fifth of the regular rate.

In addition, many cantons offer tax incentives for newly established companies or for expansion investments, such as tax holidays or significant tax relief for cantonal and communal tax purposes for up to ten years. In some cantons or for specific regions, a tax holiday may even be granted for federal CIT purposes if certain conditions are met.

**Privileged cantonal tax regimes**
Many cantons offer privileged corporate tax regimes. Usually, an up-front confirmation for such privileged tax regimes can be obtained by way of an advance tax ruling with the respective cantonal tax authorities. Such ruling process usually takes at least four to six weeks.

The privileged tax regimes, as described below, are usually granted for an unlimited period of time and can be relied upon unless the Swiss company’s facts and circumstances change materially.

**Holding company tax regime**
A qualifying holding company is exempt from all cantonal/communal CIT (with the exception of income from Swiss real estate, which is subject to tax after deduction of typical mortgage expenditures on such real estate).
Consequently, a holding company is in principle only subject to an effective income tax rate of 7.83% (i.e. federal CIT rate) prior to participation relief for qualifying dividends and capital gains. Further, usually a reduced capital tax rate at the cantonal/communal level applies.

Companies that meet the following conditions are eligible for the holding company tax status:

• The primary purpose of the company must be to hold and to manage long-term equity investments in subsidiaries, and this purpose must be stated in the by-laws.
• The company must not be engaged in a commercial activity in Switzerland.
• The company must pass an alternative asset or income test, whereby either two-thirds of the company's assets must consist of substantial shareholdings or participations or two-thirds of total income of the company must consist of participation income (dividend income or capital gains) from such shareholdings and participations.

A tax ruling may be obtained from the cantonal tax authorities in the proposed canton of residence in order to confirm eligibility for the holding company status prior to forming the holding company.

**Domicile company tax regime**

Companies that only carry out administrative functions in Switzerland but have no commercial activities are eligible for the domicile company tax status.

Insofar as a company fulfils the above mentioned criteria, it may apply with the cantonal tax authorities in the proposed canton of residence for a tax ruling entitling it to the following taxation:

• A modest portion of foreign source income (i.e. from 0% to 15%) is subject to tax in accordance with the importance of the administrative function in Switzerland.
• Income from qualifying participations (including dividends, capital gains, and re-evaluation gains) is usually tax exempt (whereas losses deriving from qualifying participations usually are not tax deductible).
• All income from Swiss sources is taxed at ordinary rates.
• Expenditures that are justified for business purposes are deductible from the income to which they have a business correlation.
• Reduced capital tax rates usually are applicable.

The conditions to qualify as a domicile company vary from canton to canton. This is particularly the case with regard to determining the percentage of income from foreign sources subject to tax in Switzerland and to the definition of exactly what type of income is considered foreign-source income.

A domicile company can be expected to be subject to an effective tax rate of 7.83% to 11% on foreign-source income.

**Mixed trading company tax regime**

This tax status, which is very similar to the domicile company tax status, was given different names by the cantons. Internationally, it is most often referred to as the 'mixed trading company' tax status.

In contrast to the pure domicile company tax status, a mixed trading company is allowed to undertake limited commercial activities in Switzerland. As a general rule, at
least 80% of the income from commercial activities of a mixed trading company must derive from non-Swiss sources (i.e. a maximum of 20% of income may be linked to Swiss sources). Many cantons additionally require that at least 80% of the costs must be related to activities undertaken abroad.

Insofar as a company fulfills the above mentioned criteria, it may apply with the appropriate cantonal tax authorities for a tax ruling entitling it to a tax treatment analogous to the rules set forth above for domicile companies. Depending on the concrete Swiss activity and infrastructure, the portion subject to cantonal and communal income taxes generally varies between 5% and 25% of the foreign source income and is normally higher than is the case for domicile companies. The exact portion needs to be clarified with the responsible cantonal tax authorities, typically with an advance tax ruling.

**Foreign tax credit**

Swiss tax resident corporations may suffer foreign non-recoverable WHTs on dividend, interest, and royalty income derived from foreign sources. As such foreign-source income is generally subject to income taxation in Switzerland, a double taxation occurs. In case a double tax treaty (DTT) exists and in order to reduce or to eliminate double taxation, Switzerland usually applies the credit method. Specific conditions and formalities will need to be met to benefit from foreign tax credits.

**Withholding taxes**

The statutory rate of Swiss WHT is 35%. Relief, if any, is generally granted by refund. With respect to qualifying related companies, a mere notification/reporting procedure may be requested for the fraction of the Swiss WHT exceeding the residual WHT. The table further below shows the residual/remaining tax for the recipient. Credit for the unrelieved portion of Swiss WHT may be available in the country of the recipient.

Since 1 January 2013, interest paid on CoCos and on write-off bonds (bonds with claim waiver) of systematically important banks has been exempt from Swiss WHT. The WHT exemption is restricted to bonds issued by respective institutions between 2013 and 2016. These bonds must, furthermore, fulfil specific criteria in order to benefit from the WHT exemption.

**Capital contribution principle**

The capital contribution principle allows the repayment of qualifying shareholders’ capital contributions without deduction of Swiss WHT at the level of the distributing company and without income tax implications at the level of Swiss individual shareholders (holding the shares as private assets). Based on the applicable legal provisions, capital contributions that were accumulated after 31 December 1996 and meet some further requirements (e.g. specific and timely recordings in the Swiss statutory books and vis-à-vis the tax authority) are deemed ‘qualifying capital contributions’. In general, the capital contribution principle applies for premiums, additionally paid-in capital, and contributions into the reserves of a company without increasing the nominal share capital.

* Bilateral Agreements (in particular Article 15 of the Savings Agreement) between Switzerland and the European Union apply as of 1 July 2005 and provide the following benefits:

Upon request, Swiss WHT on dividends paid by a Swiss subsidiary company to its EU parent company may be reduced to 0% (reduction at source) and is only subject to a notification/reporting procedure, provided the following conditions are cumulatively met:

- Direct minimum holding of 25% of the subsidiary’s capital for at least two years.
- Both companies are subject to CIT.

Upon request, WHT on interest and royalty payments made between associated companies or their PE resident respectively situated in Switzerland and the European Union may be reduced to 0% (reduction at source) in the source state, provided the following conditions are cumulatively met:

- Direct minimum holding of 25% for at least two years (parent/subsidiary) or direct holding by a third company of minimum 25% in the capital of both companies for at least two years (sister companies).
- Both companies are subject to CIT.

**Transition periods/rules:**

- Greece, Latvia, Poland, and Portugal: WHT rate on interest is at maximum 5% as of 1 July 2009 to 30 June 2013, afterwards 0%. Further transition rules have, meanwhile, elapsed.

In general, the Bilateral Agreements between Switzerland and the European Union are applicable with all EU countries. Consequently, Swiss WHT, which would normally be levied at a domestic rate of 35% can also be reduced to 0% in connection with EU countries with which Switzerland has not concluded a DTT (e.g. Cyprus), provided the requirements above are met. The application of the Bilateral Agreements is subject to foreign and Swiss misuse conditions.

DTTs between Switzerland and EU countries with more favourable tax treatment of dividend, interest, and royalty payments remain unaffected.

**Notes**

1. In Switzerland, there is no WHT on interest deriving from regular loan agreements. Swiss WHT of 35% is only levied on interest paid by banking institutions (or paid by entities tax-wise qualified as ‘banking institutions’) to non-banks, interest on bonds, and interest on bond-like loans. Further, Swiss WHT of 35% may be levied on interest paid on mortgage loans with respect to Swiss located real estate; however, this is not covered in the table above.
2. There is no Swiss WHT on royalties, licences, and similar fees payable by Swiss individuals or corporations (provided that the dealing at arm’s-length principle is met).
3. The statutory Swiss WHT rate of 35% is levied but refunded, provided that the respective earnings are declared as income for tax purposes.
4. Between Swiss group companies, Swiss WHT of 35% is usually fully refundable. Furthermore, in many cases, the tax liability can be met by the notification/reporting procedure. For this purpose, a direct investment of at least 20% in the share capital of the payer of the dividend is required.
5. Certain types of interest payments are lower taxed or exempt from WHT in the country of the payer.
6. 15% residual tax for companies with more than 10% shareholding if the company receiving the dividend is directly or indirectly controlled by a shareholder not resident in the European Union or Switzerland and cannot prove that the company is not set up only to benefit from the 0% WHT on dividends.
7. Full relief of WHT on interest paid for a loan granted by the Israel government (including political subdivisions and local corporate bodies) or granted by the Israel Central Bank.
8. Full relief if recipient is a retirement fund.
9. Full relief if certain requirements are met.
10. Full relief if recipient is a retirement fund or ‘The Hong Kong Monetary Authority’.
11. Full relief for certain dividend payments to certain United States (US) pension funds.
12. Full relief on certain categories of interest.
13. Only applicable for corporate bodies.
14. According to the territorial principle of Venezuela, only certain persons can benefit from the tax relief.
15. Interest on bank loans to corporations is 0%.
16. 0% WHT on dividends of participations of at least 25% if participation was held for at least two years.
17. 20% minimal shareholding plus foreign investment of minimal 200,000 United States dollars (USD).
18. 20% minimal shareholding plus foreign investment of minimal CHF 200,000.
19. 30% WHT only on income bonds (‘Gewinnobligationen’) and on profit participating loans (‘partiariasche Darlehen’).
20. 5% WHT for specific power houses (‘Grenzkraftwerke’).
21. 10% WHT for shareholdings between 20% and 50%; 7% WHT for shareholdings of more than 50%.
22. Full relief if recipient is a retirement fund or a governmental institution.
23. 5% WHT on loans from banks and insurance institutions, bonds or other securities traded on a stock market and on certain credit buying; 15% WHT on any other interest.
24. 5% WHT if the shareholding of 10% was held less than two years, 0% WHT if the shareholding of 10% was held longer than two years.
25. 5% WHT if interest is paid to a bank or a securities dealer or an insurance/reinsurance institution; 10% Swiss WHT in all other cases.
26. Only applicable if holding period is at least 12 months.
27. 0% WHT if minimum shareholding is at least 50% for at least six months. 5% WHT if minimum shareholding is at least 10% for at least six months.
28. Only applicable if holding period is at least 24 months.
29. As of 1 July 2013, WHT on interest will be reduced to 0%.
30. New DTT between Switzerland and United Arab Emirates, in force since 21 October 2012, applicable as of 1 January 2012 for income taxed at source and applicable as of 1 January 2013 for any other income.
31. 5% WHT on interest in connection with export promotion; 10% on any other interest.
32. New DTT between Switzerland and Hong Kong, in force since 15 October 2012, applicable as of 1 January 2013 for Swiss taxes and as of 1 April 2013 for Hong Kong taxes.
33. Full relief if recipient is ‘Monetary Authority of Singapore’ or ‘Government of Singapore Investment Corporation Pte Ltd’.
34. Full relief if recipient is ‘Monetary Authority of Singapore’.
35. 5% WHT if dividend recipient is a corporate body; 10% WHT if dividend recipient is an individual.

---

**Tax administration**

**Taxable period**
The tax year is the business year. Thus, the basis for corporate taxation is the applicable accounting period, which may end at any date within a calendar year.

**Tax returns**
The tax system is based on taxpayers’ declarations, with subsequent assessments being issued by the tax authorities on the basis of the tax returns filed. The tax return filing deadlines vary from canton to canton. Companies are initially assessed on a provisional basis, with the final assessments being issued after the tax base was either subject of a tax audit or declared final by the authorities.

**Payment of tax**
Unless instalment payments are specifically requested, federal, cantonal, and communal taxes on income and capital are, in most cantons and for federal tax purposes, payable only upon receipt of a demand based on a provisional or final assessment.

Note that cantonal exemptions apply. As an example, based on the date of maturity of the respective tax year (30 September), the canton of Zurich levies late payment interest to the extent that the full (final) tax amount had not been paid in time (independent from any earlier provisional tax invoices). About one month before the due date, a (provisional) tax bill based on the latest tax return filed or the assessment of the preceding period is sent to the taxpayer. Payment is usually made in two or three instalments. If the entire amount is paid up front, a discount may be granted.
Switzerland

The provisional federal CIT is usually due by 31 March of the year following the tax period at question. The due date of the final federal CIT and the provisional or final cantonal CIT varies.

**Tax audit process**
Swiss CIT law does not outline specifics of the tax audit process. At first, the tax authorities review the tax return and its enclosures as filed by the taxpayer. Such review is usually a desk related work. The competent tax authorities are obligated and entitled to clarify all relevant information necessary to assess taxpayers on a true and complete base. The tax authorities may request further information/documentation or may inspect the taxpayer’s premises.

**Statute of limitations**
As a general rule, the right to assess a taxpayer in relation to corporate income and capital taxes expires five years after the end of the corresponding tax period (relative statute of limitations). Under certain conditions (e.g. where the relative statute of limitations is interrupted), the absolute statute of limitations of 15 years applies.

In case of tax fraud (‘Steuerbetrug’) or tax evasion (‘Steuerhinterziehung’; e.g. where specific information was not available to the tax inspector at the time of the assessment), finally assessed tax periods can be reopened. The statute of limitations to reopen finally assessed tax periods is ten years after the end of the corresponding tax period.

**Topics of focus for tax authorities**
The Swiss tax authorities do not communicate specific topics of focus. The tax authorities do normally start their assessment with reviewing the tax return and its enclosures as filed by the taxpayer (see Tax audit process above).

**Foreign Account Tax Compliance Act (FATCA)**
In February 2013, Switzerland and the United States signed a bilateral FATCA agreement. The agreement will help Swiss financial institutions by means of simplifications in the implementation of the US FATCA legislation entering into force on 1 January 2014.

The agreement shall ensure that accounts held by US persons with Swiss financial institutions are disclosed to the US tax authorities either with the consent of the account holder or through ordinary administrative assistance channels (no automatic information exchange).

The agreement and the implementing act require the approval of the Swiss parliament and will subsequently be subject to a referendum procedure. The agreement must enter into force by 1 January 2014 at the latest in order for Swiss financial institutions to benefit from simplified implementation of FATCA.

**WHT agreements**
Switzerland has concluded a WHT agreement with the United Kingdom and Austria. Both agreements became effective as of 1 January 2013.

The agreements define a final WHT procedure for the future and a tax-related regularisation of the past related to investment income of foreign bank clients. According to the Swiss government, the long-term effect of these bilateral agreements is equivalent to the automatic exchange of information in the area of investment income.
Other issues

Reorganisations
Most corporate reorganisations (e.g. mergers, de-mergers, transfer of business assets within a group of companies, vertical and horizontal spin-off of business or part of business, share-for-share transactions and cross-border reorganisation where the Swiss tax residence is maintained, and replacement of participations) are typically possible without triggering adverse Swiss tax consequences (tax neutrality). In addition, special rules provide for a legal framework to tax neutrally substitute assets and qualifying shareholdings. For reorganisations, it is best practice to apply for advance tax rulings with the competent tax authorities.

---

**Significant developments**

Due to the political instability in Syria, there have been no significant corporate tax developments during the past year.

---

**Taxes on corporate income**

Corporate income tax (CIT) is levied on all corporeal and incorporeal persons, residents and non-residents, on all profits generated in Syria. Profits are considered to be realised in Syria if they occurred from efforts exerted in Syria, irrespective of the taxpayer’s identity or place of residency.

Syria does not tax residents on a worldwide basis. Syria’s tax is based on territoriality.

Except for the special cases listed below, common CIT rates (including branches of a non-resident entity) vary between 10% and 28% of profits, as follows:

<table>
<thead>
<tr>
<th>Taxable profit (SYP *)</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 200,000</td>
<td>10</td>
</tr>
<tr>
<td>From 200,001 to 500,000</td>
<td>15</td>
</tr>
<tr>
<td>From 500,001 to 1,000,000</td>
<td>20</td>
</tr>
<tr>
<td>From 1,000,001 to 3,000,000</td>
<td>24</td>
</tr>
<tr>
<td>Over 3,000,000</td>
<td>28</td>
</tr>
</tbody>
</table>

* Syrian pounds

**Surtaxes**

Depending on the location of the taxpayer, an additional local administration surtax of 4% to 10% (of the CIT amount) will apply.

**Joint stock companies (JSCs) with more than 50% shares offered to the public**

JSCs offering more than 50% of their shares to the public are subject to a flat CIT rate of 14% on profits. In this case, the 4% to 10% administration surtax does not apply.

**Other JSCs, limited liability companies (LLCs), and projects included under investment encouragement laws**

JSCs offering less than 50% of their shares to the public, LLCs, and projects signed with Syrian companies included under the investment encouragement laws are subject
to a flat CIT rate of 22% on profits. In this case, the 4% to 10% local administration surtax applies.

**Hotels, restaurants, and recreational establishments**
International standard, first and second-class hotels, restaurants, lodging houses, related services, and all recreational establishments are subject to tax based on their turnover. The tax rate is 3%, and it covers both CIT and salary tax.

**Contracts with public sector, oil companies, and non-residents**
A Syrian company contracting with the public sector and/or with an oil company or with a non-resident entity will be subject to a withholding tax (WHT) based on the contract value (on that specific contract only) rather than CIT on real profits.

The same tax rate applies to non-residents operating directly from abroad; they are subject to a 1%, 2%, 4%, 7%, or 10% WHT on the value of the contract. The applicable rates vary according to the nature of the contract and the customer. The non-resident tax covers both income tax and salary tax of the foreign and local employees working on the contract.

**Corporate residence**
The following entities are considered Syrian residents for tax purposes:

- An entity whose principal activities are administered in Syria.
- An entity that adopts the Syrian Arab Republic as its headquarters.
- Branches or offices of foreign companies in Syria.

**Permanent establishment (PE)**
In Syria, the law does not discuss PE.

**Other taxes**

**Value-added tax (VAT)**
There is no VAT in Syria.

**Customs duties**
In setting the rules for valuation of merchandise, Syrian customs take into consideration the related explanatory notes issued by the World Trade Organization (WTO).

Customs duties classified in the Harmonized Tariff Schedule apply to goods introduced into Syria. Import operations are subject to prior licences granted to all importers after they present their documents to the commercial registration and chambers of commerce or industry in Syria.

The value of the goods imported to Syria that should be declared is based on the transaction value. It includes the price that is actually paid or payable for the goods when purchased for the purpose of being exported to Syria and any and all other subsequent expenses incurred by the buyer that were not covered by the price (including, but not limited to, shipment, insurance, unloading, etc.) until the arrival of goods to Syria.
In practice, customs duty is levied on the higher of the value of the transaction to which are added subsequent expenses or the price specified by the General Foreign Trade Organization (GFTO).

**Ordinary tariffs and preferential tariffs**
Ordinary tariffs apply to goods that are not qualified for preferential tariffs. Preferential tariffs apply to all goods or part thereof originating from a country or a group of countries with which Syria is bound by special customs agreements that qualify these goods for preferential status within limits specified in the said agreements.

Merchandise that has been put into use in a country other than its country of origin, and that is imported from that country, is subject to the higher customs tariff between country of origin and country of import. Merchandise that has been manufactured in a country other than its country of origin is subject to customs tariff related to country of origin or country of manufacture, depending on the degree of manufacture in each country and according to the rules set by the Minister.

**Consumption tax/Excise tax**
Consumption tax is imposed on certain services and luxury goods, with rates ranging from 1.5% to 40%. Taxpayers are required to register for consumption tax purposes, and tax is withheld by the party providing the service or goods or by customs (at import) and paid on a monthly basis to the Ministry of Finance.

There is also a levy at a fixed price measured in Syrian pounds per kg (instead of a percentage on the value of the invoice) on a number of food items, from SYP 1 per kg to SYP 10 per kg, depending on the food item.

**Property taxes**
Tax on real estate ranges from 14% to 60% annually, based on the type of property. Property tax is also paid on rental income at progressive rates ranging from between 14% and 60%.

**Stamp duty**
Stamp duty generally is imposed on transactions (e.g. the formation of corporations, the execution of documents, licences, contracts) at a rate ranging from 0.4% to 0.7%.

The surtax is applicable on the stamp duty tax.

**Registration taxes**
The estimated cost of establishing a company ranges from 4,000 United States dollars (USD) to USD 8,300 plus 0.5% of the capital stamp duty plus local administration tax of 5% of the stamp duty.

For branch offices, establishment costs are lower and may be estimated at USD 3,000.

**Salary tax**
Syrian labour law applies to agreements by which the employee (whether Syrian or foreign, resident or non-resident) carries out in Syria an activity or service for the benefit of the company in Syria against a remuneration, provided that the employee works under the direct control and authority of the company.

Payroll tax in Syria is levied at a progressive rate, with the highest bracket set at 22% as follows:
SYRIA

**Monthly salary (SYP) vs. Tax (%)**

<table>
<thead>
<tr>
<th>Monthly salary (SYP)</th>
<th>Tax (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 12,000</td>
<td>5</td>
</tr>
<tr>
<td>12,001 to 16,000</td>
<td>7</td>
</tr>
<tr>
<td>16,001 to 20,000</td>
<td>9</td>
</tr>
<tr>
<td>20,001 to 24,000</td>
<td>11</td>
</tr>
<tr>
<td>24,001 to 30,000</td>
<td>12</td>

<tr>
<td>50,001 to 75,000</td>
<td>19</td>
</tr>
<tr>
<td>Over 75,000</td>
<td>22</td>
</tr>
</tbody>
</table>

Note that certain categories of income (e.g. reimbursement of certain business expenses) are exempt from payroll tax.

**Social security contributions**

Social security contributions in Syria vary based on whether the company has more than four employees in Syria or not.

If the company has five employees or more, the contributions are as follows:

- 17% of the salary is borne by the company to cover invalidity, death, old age, and accidents at work.
- 7% is withheld from the employee’s salary and paid by the company to cover invalidity, death, and old age.

If the company has less than five employees in Syria, it will pay 5% of the salary to cover invalidity, death, and accidents at work. The employee will not be responsible for any social security charges in that case.

**Branch income**

The taxes on branch income are the same as taxes on corporate income (i.e. tax rate varies between 10% and 28%). See the Taxes on corporate income section for more information.

**Income determination**

**Inventory valuation**

Inventory is typically valued at the specific cost. Otherwise, inventory may be valued via the first in first out (FIFO) or weighted average cost method.

**Capital gains**

Capital gains are considered taxable income and are taxed at the normal CIT rates (10% to 28%). Capital gains include dividends, interest, revenue, premiums, and other cash income sources.

**Dividend income**

Dividends paid by Syrian corporations on previously taxed income are not subsequently subject to tax upon distribution.
Syria

Dividends received from a non-resident entity are subject to tax, upon distribution in Syria, of 7.5%.

**Interest income**
Interest income is taxed at the normal CIT rates (10% to 28%).

**Rental income**
Since property tax is paid on rental income, rental income should be deducted from the accounting result to reach the taxable result.

**Royalty income**
Royalties received are taxed as ordinary income.

**Partnership income**
Profits of partnerships are deemed to be distributed and are taxed at progressive rates of 10% to 28%.

**Foreign income**
Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches. However, all income considered to be managed from Syria is considered to be sourced in Syria and will be taxed in Syria.

**Deductions**

**Depreciation**
Depreciation of property, plant, and equipment (at rates fixed by ministerial decree) is deductible. The depreciation method to be used is the straight-line method.

**Goodwill**
Goodwill is not amortised over a specific period of time. An annual impairment test is performed, and the result is recorded as a gain or loss that is included in the CIT calculation.

**Start-up expenses**
There are no specific regulations concerning the deductibility of start-up expenses.

**Interest expenses**
There are no specific regulations concerning the deductibility of interest expenses.

**Bad debt**
There are no specific regulations concerning the deductibility of bad debt.

**Charitable contributions**
Grants paid by taxable persons against official receipts for known public or private entities are deductible on condition that the grants do not exceed 3% of net profits.

**Fines and penalties**
Fines and penalties are not deductible in Syria.

**Taxes**
Taxes and duties levied during the year, except CIT, are deductible.
**Other significant items**
The following expenses are also deductible:

- Cost of goods sold.
- Cost of services rendered.
- Rent paid for the business premises (or rent value if the taxable entity owns the property).
- Salaries and incentives paid to employees/workers.
- Payments representing employer’s portion of social security contributions.
- Indemnities and allowances (end of service) paid according to the labour law.

The following expenses are not deductible:

- Expenses leading to the increase of the value of fixed assets (capital expenditures).
- Personal expenses considered by the business owner (or/and his partner) as personal compensation.
- Compensations for partners in some business entities.

**Net operating losses**
Losses may be carried forward for five years. The carryback of losses is not available.

**Payments to foreign affiliates**
Payments to foreign affiliates are considered normal payments because Syria has no transfer pricing rules. However, the payments may be subject to WHT.

**Group taxation**
There is no group taxation in Syria.

**Transfer pricing**
No transfer pricing rules exist in Syria.

**Thin capitalisation**
No thin capitalisation rules exist in Syria.

**Tax credits and incentives**

**Foreign tax credit**
There are no specific regulations concerning foreign tax credits in Syria.

**Investment incentives**
Investment encouragement regulations allow foreign investors to benefit from customs exemptions for the imports used in the investment.

**Permanent CIT exemptions**
Physical and moral persons and associations exempted from CIT are the following:

- Types of consumers and investors’ cooperative associations.
- Farmers harvesting and selling crops; this exemption includes animals and livestock bred on their farming lands.
- Facilities in which stocks are bred or where poultry farming is exercised; subject to CIT according to the real-profit tax.
Syria

- Day-care centres.
- Institutes and associations taking care of people with special needs.
- 75% of the yearly net profits for air and maritime transportation.
- 50% of net profits of stock breeding and poultry farming facilities.

**Withholding taxes**

**Interest**
The income, revenue, and interest earned from accounts opened at Syrian banks and from treasury bonds are subject to an 8.25% total WHT (i.e. 7.5% WHT and 10% surtax).

**Royalties**
Royalties paid to non-residents are subject to a 7% total WHT (i.e. 5% CIT as well as a 2% salary tax).

**Resident contractors**
When a Syrian company performs contracts with the public sector, with an oil company, or with a non-resident entity, it will be subject to a WHT based on the contract value (on that specific contract) rather than CIT on real profits.

**Non-resident contractors**
Revenue earned by non-resident contractors in Syria is subject to a WHT based on the contract value (of that specific contract) rather than CIT on real profits.

**Double taxation treaties (DTTs)**
The table below shows the treaty and non-treaty WHT rates. If the treaty rates are higher, the recipient may choose the non-treaty rates.

## Notes

1. Taxed only in the dividend beneficiary’s jurisdiction (when the beneficiary is owner of the shares).
2. **Tax should not exceed:**
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that owns at least 10% of the shares of the company paying the dividends or
   - 10% of the gross amount of the dividends in all other cases.
3. **Tax should not exceed:**
   - 5% of the gross amount of the dividends if the beneficial owner is a company that has owned at least 25% of the capital of the company paying the dividends or
   - 10% of the gross amount of the dividends in all other cases.
4. Total Malta or Syrian tax on the profits of a company and the dividends distributed by such company, as the case may be, shall not exceed the maximum tax chargeable on the company’s profits out of which the dividends are paid.
5. **Tax should not exceed:**
   - 18% of the gross amount for any patent, trademark, design or model, plan, secret formula or process, industrial or scientific equipment, or for information concerning industrial or scientific experience
   - 15% of the gross amount paid for any copyright of literary, artistic, or scientific work, or
   - 10% of the gross amount paid for any copyright of cinematographic films, or tapes for television, or radio broadcasting.
6. **Tax should not exceed:**
   - 10% of gross amount paid for cinematographic films, magnetic films, and tapes for television and radio or
   - 5% of the sum paid for any copyright of a literary, artistic, or scientific work, including cinematographic films and films and recordings for other forms of radio transmission or television transmission; any patent, trademark, design or model, plan, secret formula, or secret process, as well as for the use or right to use industrial, commercial, or scientific equipment, and for information related to experience in the industrial, commercial, or scientific area.
7. **Tax should not exceed:**
   - 18% of the gross amount of royalties paid for any patent, trademark, design or model, plan, secret formula or process, any computer software program, or for information concerning industrial, commercial, or scientific experience
   - 13.5% of the gross amount of royalties paid for any copyright of literary, artistic, or scientific work, or
   - 4.5% of the gross amount of royalties paid for cinematographic films, programmes, and recordings for radio or television broadcasting.
8. **Tax should not exceed:**
   - 15% of the gross amount of royalties paid for any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience or
   - 10% of the gross amount of the royalties for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.
9. **Tax should not exceed:**
   - 20% of the gross amount of royalties paid for any patent, trademark, design or model, plan, or any industrial or scientific equipment, or for information concerning industrial or scientific experience or
   - 15% of the gross amount of the royalties for any copyright of literary, artistic, or scientific work including cinematographic films, or tapes for television or radio broadcasting.
10. Tax should not exceed:
   • 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends or
   • 10% of the gross amount of the dividends in all other cases.

Tax administration

Taxable period
The tax year in Syria is the calendar year.

Tax returns
Taxpayers in Syria shall comply with the following requirements:

• Tax returns must be filed by 31 May for JSCs and LLCs and 31 March for other types of companies.
• Salary WHT should be submitted by the employer on a semi-annual basis.

Payment of tax
Payment is due at the time of filing.

Penalties
A penalty is assessed for late payments 30 days after the filing date at a rate of 10%, up to the amount of the tax liability.

Tax audit process
The most common ways for the tax authorities to select companies for tax audits are via risk assessment measures. Tax audits typically cover a single type of tax.

In a typical situation, a tax audit is likely to take two years from first information request to substantive resolution.

Statute of limitations
In Syria, the statute of limitations with respect to tax is five years.

Topics of focus for tax authorities
Lately, due to the political situation in Syria, the tax authorities are not carrying out a high number of tax audits.

Other issues

Choice of business entity
Law No. 13/2011 encourages Syrian companies to transfer to limited liability and shareholding forms. This law extends the facilities provided by Law No. 61/2007 and grants additional ones to companies. The law provides for companies to pay between 1% and 2% of the difference in the value of their assets as taxes after their revaluation, instead of a rate of between 14% and 28%, and exempts them from any additional taxes or fees that would fall on them because of the revaluation.

Law No. 29/2011 regulates the rules regarding establishment of companies in Syria, such as:

• the establishment of one-person limited liabilities
• the transformation of state-owned entities into companies (currently state-owned institutions operate under specific regulations)
• the establishment of holding firms as limited liabilities, and
• the establishment of non-public shareholding companies.

The minimum face value of shares to be sold by JSCs is SYP 100.

In order to ease the establishment of LLCs, investors are able to apply to set their company up through the regional offices of the Syrian Investment Agency, the Industrial Cities located across the country, or the Domestic Trade Directorate of the Governorates.

Holding companies can assume the form of a limited liability, while previously constrained to JSC form. Also, state owned entities can opt to become public JSCs, post-approval from the Prime Minister, and abide by the Company Law.

In addition, one person LLCs, a new type of company, are allowed by Law No. 29/2011 and may be established by either Syrian or foreign persons or entities. However, foreign shareholders may establish one person LLCs only in the case where they have projects licensed by specified Syrian authorities.

The minimum capital for such LLCs has been set at SYP 5 million, which is well above the capital set for a standard LLC of SYP 400,000.

These one person LLCs may be transformed into standard LLCs or JSCs at a later stage.
**Taiwan**

**Significant developments**

Pursuant to the amendments to the Income Tax Act and Income Basic Tax (IBT) Act, from 1 January 2013 onwards, the IBT rate increased from 10% to 12%, and the exemption amount decreased from 2 million New Taiwan dollars (TWD) to TWD 500,000.

The Taiwan-Germany double taxation agreement (DTA) came into effect on 7 November 2012. From 1 January 2013 onwards, the withholding tax (WHT) rate imposed on dividends and royalties decreased from 20% to 10%. WHT rate on interest decreased from 20% to 10%, and may be reduced to 15% or nil under specified circumstances.

On 19 December 2012, the Taiwan-Thailand DTA also came into effect. From 1 January 2013 onwards, the WHT rate imposed on dividends and royalties decreased from 20% to 10% (the rate on dividends may be reduced to 5% for shareholders with at least a 25% shareholding). WHT rate on interest decreased from 20% to 15%, and may be reduced to 10% or nil under specified circumstances. Taiwan currently has DTAs with 25 countries.

**Taxes on corporate income**

The corporate income tax (CIT) rate in Taiwan is 17%.

Resident companies in Taiwan are taxed on their worldwide income as follows:

<table>
<thead>
<tr>
<th>Taxable income (TWD)</th>
<th>Tax thereon</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 120,000</td>
<td>Exempt</td>
</tr>
<tr>
<td>120,001 and over</td>
<td>17% of total taxable income</td>
</tr>
</tbody>
</table>

A non-resident company is taxed on income derived from Taiwan sources. A non-resident company with a fixed place of business (FPOB) or business agent in Taiwan is taxed similarly to a resident company (i.e. subject to filing of an annual CIT return based on the same CIT rate provided above). A non-resident company having no FPOB or business agent in Taiwan is subject to WHT at source on its Taiwan-sourced income. WHT rates on dividends, interest, and royalties may be reduced if the recipient is a tax resident of a tax treaty country and the relevant treaty provides for a reduced rate. See the Withholding taxes section for more information.
**Tonnage tax system**
A qualifying enterprise having its head office in Taiwan engaged in maritime transportation may elect to be taxed under the tonnage tax system, where a lump sum tax is calculated on the net tonnage of their fleet. Once the application is approved, the enterprise must remain under the tonnage tax system and cannot switch to the regular tax system at its discretion for ten consecutive years. Furthermore, loss carryforwards and tax incentives are not eligible under the tonnage tax system.

**Profit retention tax**
An additional 10% profit retention tax is imposed on any current earnings that remain undistributed by the end of the following year.

**Imputation tax system**
Taiwan operates an imputation tax system to eliminate double taxation on earnings of a corporation. The 17% CIT and 10% profit retention tax already paid by the corporation can be distributed to the resident individual shareholders as tax credits to offset against their individual income tax. However, the tax credits distributable to shareholders are subject to certain limitations.

Non-resident shareholders may credit the 10% profit retention tax previously paid by the investee company against the dividend WHT where the dividends are distributed from retained earnings that have already been subject to the 10% profit retention tax. Please note that credit for profit retention tax from dividend WHT is calculated based on a prescribed formula.

**Income basic tax (IBT)**
All Taiwan resident companies, as well as non-resident companies with an FPOB or business agent in Taiwan, should calculate IBT if they earn certain income that is tax-exempt. The basic income of a company is the amount calculated in accordance with a formulae stipulated by the government, with a deduction of TWD 500,000. As of 1 January 2013, the IBT rate is 12% (previously, it was 10%). If the IBT amount is greater than the regular CIT amount, taxpayers must pay income tax based on the regular CIT amount plus the difference between the IBT amount and the regular CIT amount. On the other hand, if the regular CIT amount is greater than the IBT amount, no special action is required.

**Corporate residence**
A company is a resident of Taiwan for CIT purposes if it is incorporated in Taiwan. A non-resident company that has an FPOB or business agent in Taiwan is obligated to file a CIT return in Taiwan on its Taiwan-sourced income.

**Permanent establishment (PE)**
The term ‘permanent establishment’ only exists under the underlying DTAs with Taiwan. Taiwan domestic tax regulations only refer to an FPOB and business agent, which generally follows the definitions of an FPOB and agency PE in the Organisation for Economic Co-operation and Development (OECD) model tax convention.
Taiwan

Other taxes

Business tax
All sales of goods and services in Taiwan, as well as the importation of goods into Taiwan, are subject to business tax. There are two types of business tax systems: value-added tax (VAT) and gross business receipts tax (GBRT).

Sellers and service providers are generally obligated to pay business tax for the sales of goods or services within Taiwan unless the law provides otherwise. For importation of goods, the business tax will be paid by the goods receivers or buyers via customs. For importation of services sold by foreign companies to Taiwanese buyers, business tax shall be paid by the service buyers. However, if the foreign service purchased is under TWD 3,000 per transaction, the business tax shall not apply. Furthermore, the service buyer (corporate entity) will not be required to pay business tax if it adopts the VAT system and is exclusively engaged in taxable transactions.

Value-added tax (VAT)
VAT is applicable to general industries, and the VAT rate is 5%. Under the VAT system, each seller collects output VAT from the buyer at the time of sale, deducts input VAT paid on purchases from output VAT, and remits the balance to the tax authority.

Gross business receipts tax (GBRT)
GBRT is applicable to specified industries (e.g. financial institutions, small businesses). For banks, insurance companies, investment trust companies, securities and futures firms, short-term commercial paper enterprises, and pawnshops, the rate is 2%. For re-insurance enterprises, the rate is 1%.

Customs duties
Taiwan uses the Customs Cooperation Council Nomenclature (CCCN) to classify goods and set duty rates. The customs duty is payable by the consignee or the holder of the bill of lading for imported goods and is based on the dutiable value or the volume of goods imported.

Commodity tax
Commodity tax (excise duty) is levied on certain commodities, as specified in the Commodity Tax Act (including rubber tyres, beverages, cement, plate glass, oil and gas, electrical appliances, and vehicles), at the time when such goods are dispatched from a factory or when imported. Tax rates vary from 8% to 30% and are applicable to different types of commodities based on the value of the goods or the volume in specific circumstances.

<table>
<thead>
<tr>
<th>Type of commodity</th>

</tr>
<tr>
<td>Electrical appliances</td>
<td>10% to 20%</td>
</tr>
<tr>
<td>Vehicles</td>
<td>15% to 30%</td>
</tr>
</tbody>
</table>
Property tax
A tax is levied on land and buildings annually. The land tax rate ranges from 1% to 5.5% of the assessed land value. The building tax rate for business properties is 3% of the assessed value, and the rate for non-business properties is 1.2% or 2% of the assessed value.

Stamp tax
Stamp taxes are imposed on each copy of the following documents executed within the territory of Taiwan (with the following respective tax rates):

- Monetary receipts must have a revenue stamp of 0.4% of the amount received per piece. However, a receipt for the money deposited by the bidder requires a revenue stamp of 0.1% of the amount received per piece.
- Contract or deed for the sale or purchase of movable property must have revenue stamp of TWD 12 per piece.
- Contractual agreement under which one party agrees to complete a specific piece of work for the other party for consideration must have a revenue stamp of 0.1% of the contract price.
- Contract for the sale, transfer, and partition of real estate must have a revenue stamp of 0.1% of the contract price.

Securities transaction tax
Tax is levied on securities transactions at the rate of 0.3% on gross proceeds from the sale of domestic shares. Trading in corporate bonds and financial bonds issued by Taiwan companies is temporarily exempt from securities transaction tax assessment.

Luxury tax
With an aim to curb real estate speculation, Selective Goods and Services Tax (also known as luxury tax) of 10% applies on real estate properties purchased not for self use and sold within two years, as well as various luxury products, such as upscale automobiles, yachts, private jets, helicopters, fur, ivory, high-end furniture, and membership rights. However, the rate is increased to 15% where real estate properties purchased not for self use are sold within one year.

Branch income
A non-resident company whose head office is located outside of Taiwan must keep separate books for its branch in Taiwan. A head office or regional headquarters' general and administrative expenses may be allocated to the branch under certain conditions. CIT is assessed only on the branch's profits. A Taiwan branch should complete an annual CIT return.

A Taiwan branch of a foreign company may remit after-tax profits to its foreign head office without further tax due.

Motion picture leasing
A foreign motion picture’s branch in Taiwan can deem 45% of its revenue from leasing of motion pictures as cost. However, if a foreign enterprise with no branch office in Taiwan leases motion pictures through agents, 50% of the revenues can be deemed as taxable income.
Taiwan

**Deemed profit method**
A non-resident company that is engaged in international transportation, construction contracting, provision of technical services, or machinery and equipment leasing within Taiwan, and where the cost and expenses are proven to be difficult to calculate, may apply for advance approval from the National Tax Administration (NTA) to adopt the deemed profit method to determine the taxable income as 10% or 15% of the gross revenues. This will effectively reduce the WHT rate to 2% to 3% on gross revenues once the approval is obtained from the NTA.

**Income determination**
A Taiwan resident company is taxed on its net income, which is defined as gross annual income after deduction of costs, expenses, losses, and taxes. Except for certain exempt items, income from all sources, including offshore and onshore, is subject to CIT.

A non-resident company is only taxed on its Taiwan-sourced income. Article 8 of the Income Tax Act and the related Guideline defines the types of income that should be regarded as sourced from Taiwan. For example, fees received by a non-resident company for service performed entirely outside of Taiwan are exempt from income tax assessment, subject to supporting evidentiary documents.

**Inventory valuation**
Inventory must be valued at cost. If cost exceeds the net realisable value, the latter may be used as the valuation basis. Cost may be determined by the first in first out (FIFO), moving average, weighted average, specific identification, or any other method approved by the tax authorities. Conformity between financial and tax reporting is not required.

**Capital gains**
Gains on the disposal of fixed assets are taxable as current-year income of the company, with the exception of gains on the sales of land. Capital gains on disposal of Taiwanese marketable securities and futures by resident companies and non-resident companies with an FPOB or business agent in Taiwan are exempt from CIT assessment, but are liable for IBT of 12%, with an exemption amount of TWD 500,000. Capital losses may be deducted against capital gains and carried forward for five years. 50% of capital gains can be tax exempt should the securities be held for more than three years. In addition, securities transaction tax is levied on the sales proceeds (see the Other taxes section).

**Dividend income**
Dividends received from resident investee companies by a resident corporate shareholder are not included in taxable income. In addition, the imputation tax credit derived from the dividend income of the investee corporation can be distributed to the domestic corporate shareholders, but this tax credit cannot be used to offset the domestic corporation's income tax liability; rather, the tax credits must be recorded in a separate book until they are further distributed to the resident individual shareholders of the resident corporate shareholders.

Dividends received from foreign subsidiaries are taxable, but credits are given for the WHT paid offshore, limited to the incremental tax liability that would result if the dividends were added to the Taiwan corporate shareholder's taxable income and taxed at the Taiwan CIT rate.
**Interest income**
Interest received on commercial paper and certain other interest-bearing financial instruments is subject to WHT of 10% and 15%/20% for resident and non-resident taxpayers, respectively (see the Withholding taxes section). This income should be reported as current-year income, and the WHT paid can be deducted against the income tax payable.

**Foreign income**
Taiwan adopts a worldwide tax system to tax its resident companies (including the Taiwan subsidiaries of foreign companies). In theory, taxation on foreign investment income of a Taiwanese company is deferred until cash is repatriated to Taiwan and then subject to CIT. However, given Taiwan also taxes undistributed profits based on net income shown on the income statement (see Profit retention tax in the Taxes on corporate income section), foreign investment income may still be taxed in Taiwan before cash is repatriated back to Taiwan.

**Deductions**

**Depreciation**
Depreciation on all fixed assets other than land, including premises, plants (buildings), and equipment, used to generate income is allowed as a deduction. The straight-line, fixed percentage on diminishing book value, sum-of-years-digit, unit-of-production, and working-hour methods are acceptable depreciation methods to the tax office. The useful lives of typical assets are shown below:

<table>
<thead>
<tr>
<th>Asset category</th>
<th>Useful life</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computer equipment</td>
<td>3</td>
</tr>
<tr>
<td>Furniture and fixtures</td>
<td>5</td>
</tr>
<tr>
<td>Automobile</td>
<td>5</td>
</tr>
<tr>
<td>Building</td>
<td>50</td>
</tr>
</tbody>
</table>

With the approval of the tax authority, a company may revalue its fixed assets each time the government's wholesale price index increases by 25% over the base period. A company's base period is established at the time of purchase of fixed assets or at such time when a company revalues its fixed assets. Any increase in fixed assets may then be depreciated for tax purposes.

**Goodwill**
Goodwill is commonly realised from merger and acquisition, which should follow the purchase method as defined under Taiwan Generally Accepted Accounting Principles (GAAP). Goodwill should be amortised for 15 years if a valuation report is issued by a creditable professional valuation firm and the net identifiable assets are valued separately. However, in practice, the amortisation of goodwill is frequently challenged by the Taiwan tax authority.

**Start-up expenses**
Start-up expenses during the start-up period can be deducted in the year incurred. The start-up period is from the preparatory stage to the date the business starts to generate significant revenue from its primary business operation.
Taiwan

**Interest expenses**
Interests on loans that are used for business purposes are deductible in the year incurred. However, for a loan from a non-financial institution, the interest rate shall not exceed 15.6% per annum. As for interest on inter-company loans, the deductible amount is subject to the thin capitalisation rule and transfer pricing regulations (see the Group taxation section).

**Bad debt**
Actual losses on bad debts are allowed for deduction when certain legal proceedings or time requirements have been satisfied. The loss should first be charged against the bad debt provision, which should not exceed either 1% of accounts receivable and notes receivable outstanding or the actual average bad debt ratio for the past three years.

**Charitable contributions**
Charitable contributions to support national defence construction, troop morale, contribution to government of any level, and donation made with special approval of the Ministry of Finance (MOF) are not subject to any tax limit. Donations to other parties are subject to prescribed limits under the relevant regulations.

**Fines and penalties**
Fines and penalties arising from violation of various tax laws are generally not deductible.

**Taxes**
All taxes, other than income tax, are generally deductible, unless where such taxes are related to tax-exempt income. The tax associated with the acquisition of real estate should be included in the cost of the land or building.

**Other significant items**
If a company invests in a foreign entity and holds at least 20% equity ownership (this limitation does not apply if special approval is obtained from the Executive Yuan), the company can attribute 20% of the investment amount to a ‘reserve for foreign investment loss’.

**Net operating losses**
A company’s net operating losses can be carried forward for ten years. Losses cannot be carried back.

**Payments to foreign affiliates**
Royalties, interest, and service fees paid to a foreign affiliate are subject to WHT. Royalties or service fees paid to a foreign entity may be tax-exempt if certain requirements are met and prior approval is obtained.

**Group taxation**
Group enterprises meeting certain criteria under the Financial Holding Company Act and Business Mergers & Acquisitions Act may file consolidated tax returns for the Taiwan parent and its first tier Taiwan subsidiaries. For other enterprises, group taxation is not permitted. The Taiwan parent is eligible to file consolidated tax returns if it continuously holds over 90% of the shares of the subsidiaries for 12 months in a tax year.
**Transfer pricing**

Transfer pricing regulations were established to constrain multinational corporations from leaving their profits in countries with lower tax rates. For applicable companies, the disclosure of related party transactions in the CIT return and the preparation of a transfer pricing report is required. Upon request, the transfer pricing report will have to be submitted to the Taiwan tax authority within one-month of notice. The transfer pricing report must demonstrate the company’s good faith effort to comply with the assessment rules. Without proper reason, failure to comply with such rules will result in additional tax payable and financial penalties. The types of transactions governed by these regulations include the following: transfer of tangible assets, use of tangible assets, transfer of intangible assets, use of intangible assets, rendering of services, use of funds, and other types of transactions prescribed by the MOF.

**Thin capitalisation**

Deductible interest expense on inter-company loans is capped at a prescribed debt-to-equity ratio of 3:1. The thin capitalisation rule generally applies to profit-seeking enterprises, except banks, credit cooperatives, financial holding companies, bills finance companies, insurance companies, and securities companies.

---

**Tax credits and incentives**

Certain tax incentives are provided to investors if they are located in prescribed areas, such as science parks, economic processing zones, free-trade-zones, etc. Other tax credits are granted to qualifying companies that invest in specific businesses or industries promoted by the government, such as biotech.

**Research and development (R&D) tax incentive**

Under the Statute for Innovating Industries (SII), R&D credits are available for up to 15% of qualified R&D expenses incurred, with the maximum amount of tax credit capped at 30% of the tax payable for the year in which the expenses were incurred, including the 10% profit retention tax. Unutilised R&D credits will be forfeited and cannot be carried back or carried forward.

According to Regulation Governing R&D Investment Tax Credit (ITC) Available to Profit-seeking Enterprises, a single annual application for R&D ITC should be made with the central competent authorities within four months prior to the CIT return filing due date. Information relating to R&D ITC should be provided with the CIT return.

**Tax concessions on merger**

Under the Business Mergers and Acquisitions Act, a merger or consolidation of companies can be exempt from stamp tax, deed tax, securities transaction tax, and business tax if certain conditions are met. After the merger or consolidation, any tax concession previously enjoyed by the merged entities will continue to be applicable to the surviving company (or new company) after the merger or consolidation. However, the surviving company is required to manufacture the same products or provide the same services that were approved for tax concessions by the merged entities in order to continue the concessions obtained previously.

The unexpired and unutilised net operating losses of the participating entities prior to the merger or consolidation may be carried over to the surviving or newly-created entity according to the percentage of shareholding in the surviving or newly-created entity held by all shareholders of the participating entities.
Free-trade-zones
According to the Statute for the Establishment and Management of Free-trade-zones, foreign companies or their branch offices in Taiwan that apply for establishment in the free-trade-zone or delegate companies already established in the free-trade-zone to store and/or perform simple processing in the free-trade-zone and selling the goods to customers within and outside of Taiwan shall be exempted from CIT. However, in the event that the annual domestic sales exceed 10% of the total annual domestic and foreign sales, the portion in excess shall not be exempted from CIT.

Foreign tax credit
Taiwan uses the credit method to avoid double taxation of income. Foreign taxes paid on foreign-sourced income may be credited against a company’s total Taiwan income tax liability. However, the credit is limited to the incremental taxes derived from foreign-sourced income.

Withholding taxes
Resident corporations paying certain types of income are required to withhold tax as follows:

<table>

Notes

1. For non-resident enterprises, a 15% WHT applies to interest income derived from short-term bills, securitised certificates, corporate bonds, government bonds, or financial debentures, as well as interest derived from repurchase transactions involving these bonds or certificates. The rate in all other cases is 20%, unless reduced under a tax treaty.

2. Royalties received by foreign enterprises that are specially approved in advance by the government are exempt from income tax.

3. A rate of 10% for shareholders that are companies (other than partnerships) with at least a 25% shareholding.

4. 7% of the gross amount of the interest arising in a territory and paid on any loan of whatever kind granted by a bank of the other territory.

5. The WHT rate on technical service fee is reduced to 7.5%.

6. The total tax burden of CIT and dividends tax is not to exceed 40% of the total profits of the company.

7. A rate of 5% for shareholders with at least a 10% shareholding.

8. A rate of 5% for the use of (or the right to use) industrial, commercial, or scientific equipment.

9. A rate of 10% for shareholders with at least a 20% shareholding.

10. 10% applies to all types of interests, except a rate of 15% for interest derived from real estate investment trusts and real estate asset trusts in Taiwan. Tax exemption applies to interests paid to public institutions of the other territory as mutually agreed between the competent authorities of both territories.

11. A rate of 5% for shareholders with at least a 25% shareholding.

12. 15% applies to all types of interests, except a rate of 10% for interest received by any financial institution (including an insurance company). Tax exemption applies to interests paid to the authority of the other territory as mutually agreed between the competent authorities of both territories.

Tax treaties

Tax treaties entered into with Australia, Belgium, Denmark, France, Gambia, Germany, Hungary, India, Indonesia, Israel, Macedonia, Malaysia, Netherlands, New Zealand, Paraguay, Senegal, Singapore, Slovakia, South Africa, Swaziland, Sweden, Switzerland, Thailand, the United Kingdom, and Vietnam relate to corporate and individual income tax.

Treaties with Canada, the European Union, Germany, Israel, Japan, Korea, Luxembourg, Macau, Netherlands, Norway, Sweden, Thailand, and the United States relate to certain earnings from the operation of ships and/or aircraft.

Tax administration

Taxable period

The tax year in Taiwan runs from 1 January to 31 December. Businesses may request approval from the local collection authority to file CIT returns using a fiscal year-end other than 31 December.

Tax returns

Tax returns are filed on a self-assessment basis. CIT returns are due no later than five months after the end of the tax year.

Payment of tax

Tax is paid on a self-assessment basis in two instalments. The first payment is based on 50% of the tax liability of the prior year's tax return and is made in the ninth month of the enterprise's fiscal year. However, if the taxpayer meets certain requirements, it may self-assess the provisional tax based on the taxable income of the first half of the current fiscal year. The second payment is made at the time of filing the annual tax return.
Taiwan

The returns are subsequently reviewed by the tax authorities, and a final assessment is issued.

Any overpaid tax as a result of the tax collection authority's mistake shall be refunded to the taxpayer within two years of acknowledgement of such mistake and shall not be subject to the original five-year period for applying for refund where the taxpayer is responsible for the mistake.

**Tax audit process**
Taiwan does not have a fixed audit cycle. Tax audit can be carried out any time prior to the expiration of the statute of limitations. Companies may be selected for audit if certain criteria are met.

**Statute of limitations**
The statute of limitations in Taiwan is five years from the tax return filing date if the return is filed on time. Where a taxpayer fails to file an annual tax return within the statutory deadline or evades tax by fraud or any other unrighteous means, the statute of limitations is extended to seven years.

**Recent focus of Taiwan tax authorities**
The tax authorities have developed sophisticated and comprehensive tax audit techniques and approaches over the years. The following sets out some of the common items frequently challenged or audited by the tax authorities:

- Management fees allocated from the foreign parent company or affiliates: The tax authorities frequently question the economic substance of the services rendered, the allocation method, and the availability of sufficient documents to support the tax deduction claim.
- Amortisation of goodwill: The tax authorities frequently challenge the valuation report supporting the calculation of goodwill and whether the transaction itself should give rise to goodwill.
- Amortisation of business rights: The tax authorities have taken a more conservative view, which limits 'business rights' to those explicitly authorised by laws (e.g. those regulated under certain public utilities act).
- Eligibility for R&D tax credits.
- WHT compliance.
- Transfer pricing compliance.
- Business tax audit.
**Significant developments**

The double tax treaty (DTT) between Tajikistan and Austria has been ratified and became effective as of 1 July 2012. The DTT will provide support and development in economic and trade procedures between the countries.

On 18 September 2012, the President signed a new Tax Code, which was developed in cooperation with Tajik entrepreneurs, individuals, and tax authorities, aiming at improving the economic situation in the country and providing a more understandable tax legislation framework to taxpayers. The most significant changes include elimination of a number of state and local taxes as well as gradual reduction of income tax rates to reach 13% applicable for producers and 23% for others in 2017.

As of 1 January 2013, individuals and businesses are required to register as VAT payers if the taxpayer’s taxable turnover exceeds a threshold of 500,000 (previously 200,000) Tajikistan somoni (TJS) (approximately 105,000 United States dollars [USD]) for the preceding 12-month period. The general VAT rate is 18% and 5% for all taxable turnover of enterprises in production and (or) sales of catering products, wholesale and retail trade, construction companies, as well as for taxable export turnover.

The first planned documentary tax audit of a small business, implementing the simplified tax system, can be carried out only after 24 (previously 36) full calendar months from the date of its registration.

**Taxes on corporate income**

All Tajik legal entities are subject to corporate income tax (CIT) in Tajikistan. Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan-source income. Non-residents operating through a permanent establishment (PE) are generally subject to the same CIT provisions.

CIT is computed by applying the statutory 25% rate to taxable income (15% for enterprises producing goods), which is calculated based on gross income decreased by allowed deductions and losses carried forward from previous periods. CIT liability may not be less than 1% of aggregate income.

The gradual reduction of CIT rates is expected to reach 23% (13% for enterprises producing goods) in 2017.

**Local income taxes**

There are no local income taxes in Tajikistan.
Corporate residence

Legal entities formed under Tajik law, as well as legal entities whose effective control (management) is in Tajikistan, are recognised as residents for CIT purposes.

Permanent establishment (PE)

Under general provisions of the Tax Code, any activity carried out through a fixed place on the territory of Tajikistan, including activity performed through a dependent agent, regardless of duration of such activities, will create a PE of a non-resident.

Further, a non-resident legal entity having business activities in Tajikistan may also create a PE in the following cases:

- ‘Services PE’: a non-resident enterprise renders services in Tajikistan through employees or other personnel engaged by the non-resident for such purposes, provided that these activities continue for more than 90 calendar days within any consecutive 12-month period.
- ‘Construction PE’: a construction site, assembly facility, performance of supervisory activities (connected with such objects), or project works/design works.
- ‘Agency PE’: a non-resident will be considered as having a PE in cases where a resident or non-resident has the contractual authority to represent the non-resident’s interests in Tajikistan (i.e. act and/or sign contracts on behalf of the non-resident).

Other taxes

Value-added tax (VAT)

VAT is generally assessed on taxable turnover, which includes goods and services. The current VAT rate is 18%. Individuals and businesses are required to register as VAT payers if the taxpayer’s taxable turnover exceeds a threshold of TJS 500,000 (approximately USD 105,000) for the preceding 12-month period.

Generally, the Tax Code exempts the following from VAT: goods and services that are not provided in Tajikistan under the place of supply rules; sale, transfer, or rent of real property; financial services; certain medical services; and certain other goods and services.

For goods, the place of supply is determined as the initial point of transportation. Services are generally considered to be provided at the place of business of the service provider or the actual place where services are rendered. However, certain types of services are considered to be provided at the location of the buyer. Such services include legal, marketing, consulting, accounting, etc.

A VAT refund is generally available for qualified exporters if input VAT exceeds assessed VAT.

VAT returns, together with issued and received invoices, are filed monthly, not later than the 15th day of the month following the reporting month. Payments are due by the same date.

Customs duties

The tariff rates established by the government, ranging from 0% to 15%, are applied on an ad valorem basis, at a specific rate, or via a combination of the two. The tax rate
of 0% is granted to certain types of goods (e.g. some types of printed publication, unwrought wool, gaseous hydrocarbons, electricity).

Note that Tajikistan is signatory to several free trade agreements, primarily among the following Commonwealth of Independent States (CIS) countries: Russia, Belarus, Kazakhstan, and Kyrgyzstan.

**Customs fees**
Customs clearance can’t be performed without certification of goods, for which importer should pay a fee based on the time spent by a certification specialist. Fees for customs clearance range from approximately USD 10 to USD 450, depending on customs value.

**Excise taxes**
Excise tax is assessed on beverages, tobacco products, fuel, tyres, passenger automobiles, and jewellery. Excise tax rates are established by the government.

**Property taxes**
Property tax is divided into two taxes, which are paid based on the taxable base.

**Land tax**
A tax on land plots is paid annually based on the area of the land plot and varies depending on the location. The land tax rates are established by the government of Tajikistan and may vary depending on the location of the land plot.

**Real estate tax**
Tax on real estate is paid annually and applies to immovable real property, such as buildings, houses, and flats. The real estate tax rate varies from 3% to 12% and also depends on territory coefficients.

**Transfer taxes**
There are no transfer taxes in Tajikistan.

**Stamp taxes**
There are no stamp taxes in Tajikistan.

**Social tax**
An employer is obligated to make social tax payments at the rate of 25% of salary. In addition to an employer’s portion, 1% social tax is withheld from employee’s income.

**Road tax**
The formula for calculating road tax is total deductions of the reporting year multiplied by the 2% tax rate (0.5% for trade companies). If actual deductions do not exceed 70% of gross income, the tax base for road tax would be 70% of gross income. It is contemplated that the rate will be gradually decreased to 1% (0.25% for trade companies) in 2015. In 2017, the tax will be eliminated.

**Vehicle tax**
Vehicle tax is computed as a percentage of the calculation index applied for horsepower of the vehicle engine. The percentage ranges from 2.5% to 15%.
Tajikistan

**Branch income**

In addition to CIT, PEs are subject to branch profit tax at the rate of 15% of net profit after CIT, unless a lower rate is prescribed by an applicable DTT.

**Income determination**

Income tax is assessed on taxable income, which is the difference between gross income and allowed exemptions and deductions.

**Inventory valuation**

Inventory accounting for tax purposes follows inventory accounting for financial reporting purposes. Public companies are required to apply International Financial Reporting Standards (IFRS). Other legal entities may apply IFRS or National Accounting Standards.

For tax purposes the following inventory methods are permitted: last in first out (LIFO), first in first out (FIFO), and weighted average. For public companies, there can be a mismatch between the tax method and the book method, as LIFO is not permitted under IFRS. For other legal entities, the tax method will match the book method if the tax accounting follows National Accounting Standards.

**Capital gains**

In general, capital gains on securities are taxed as business profits.

**Dividend income**

Under the Tax Code, dividends are defined as any distribution of income or property of a legal entity between its shareholders. Dividends should be included in annual aggregate income.

**Inter-company dividends**

Inter-company dividends received by a resident parent company from a resident subsidiary are exempt from annual aggregate income.

**Interest income**

The Tax Code defines interest income as income received from any fees associated with a debt obligation, including tax liability, payments for any loans, and contributions on deposit (accounts). Interest income is subject to CIT in Tajikistan and should be included in annual aggregate income.

**Foreign income**

Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan-source income. There are no provisions in the Tax Code for tax deferral.

*For information about Controlled foreign company provisions, see the Group taxation section.*
**Deductions**

In general, all business expenses (e.g. materials, payroll) are allowed as a deduction if the expenses are connected with the earning of income, not of a capital nature, and supported by proper documentation.

**Depreciation**

The deduction for costs related to fixed assets generally is made through depreciation at rates ranging from 7% to 20%, using the declining-balance method.

**Goodwill**

There are no special provisions for goodwill deduction in the Tax Code; however, goodwill is not deductible in accordance with the general rules on intangible assets amortisation.

**Start-up expenses**

Start-up expenses are not deductible. However, in case of registration of a branch, the head office can deduct expenses related to the creation of such branch.

**Interest expenses**

Interest deductibility is generally limited to three times the refinancing rate of the National Bank of Tajikistan (currently 6.5%). For certain entities, additional limitations may apply.

**Bad debt**

A taxpayer is allowed a bad debt deduction in cases where the income associated with such bad debt is already recognised for CIT purposes. Bad debts are deductible when they are written-off in the accounting books. Special provisions apply for banks and other financial institutions.

**Charitable contributions**

Charitable contributions are limited to 10% of taxable income.

**Fines and penalties**

Fines and penalties paid to the budget of Tajikistan and other states are not deductible.

**Taxes**

Taxes paid to the budget of Tajikistan and other states are deductible, except for CIT and individual income tax.

**Other significant items**

Among other deductions specifically mentioned in the Tax Code are research and development (R&D), repair expenses, and geological and geophysical expenses.

**Non-deductible expenses**

Non-deductible expenses specifically mentioned by the Tax Code include meals and entertainment, personal expenses, passenger vehicles, and non-business expenses.

**Net operating losses**

Net operating losses may be carried forward for three years but may not be carried back.
Tajikistan

**Payments to foreign affiliates**
No special provisions for deduction of payments to foreign affiliates exist in the Tax Code; consequently, general rules for deductibility of expenses should apply.

**Group taxation**
There are no rules permitting grouping for tax purposes in Tajikistan.

**Transfer pricing**
The tax authorities have the right to review prices applied in the following transactions for their compliance with market-level pricing:

- Transactions between related parties.
- Barter transactions.
- Cross-border transactions.
- All transactions with deviation of more than 30% from market level.

**Thin capitalisation**
There are no thin capitalisation rules in Tajikistan; however, interest deductibility is limited as described in the Deductions section.

**Controlled foreign companies (CFCs)**
The Tax Code contains CFC provisions, according to which, income received by the resident’s subsidiary (more than 10% ownership) registered in countries with privileged taxation should be included in the income of the resident.

**Tax credits and incentives**

**Foreign tax credit**
Taxes paid outside Tajikistan may be credited against the same types of taxes in Tajikistan, if appropriate supporting documents are provided. The amount of credit may not exceed the amount of tax assessed in respect of such income at the rates applicable in Tajikistan.

**Special economic zones**
Tax incentives include the special economic zones of Sogd, Panj, Ishkoshim, and Dangara. Sodj and Pyandj are actively functioning economic zones.

Free Economic Zone (FEZ) ‘Sogd’ was formed in October 2008 and has 14 operating business units. The main activities of businesses should be connected with industrial production and attracting international technologies in production of local goods. To date, this FEZ has attracted international investments of USD 1.7 million out of USD 48 million planned.

FEZ ‘Panj’ has two operating units and is a manufacturing and trade free zone for agricultural products, specifically vegetables, fruit, meat, leather, and cotton.

Both FEZs have created over 110 workplaces for local people and produced goods in the amount of USD 5 million. The businesses that work in the FEZs pay only social tax and some portion of import duties. Foreigners who wish to work there have a 50% discount on visa application duties. These two FEZs will be working for 50 years.
In addition, there are two FEZs, ‘Ishkoshim’ and ‘Dangara’, that are currently at the developing stage and will mainly provide industrial products. The tax incentives and regimes will be the same as for the active FEZs.

**CIT exemptions**

An exemption from CIT is available for taxpayers that have made a certain amount of investments into chartered capital of a production company, as follows:

- Two years exemption if volume of investments is up to USD 200,000.
- Three years exemption if volume of investment is from USD 500,000 up to USD 2 million.
- Four years exemption if volume of investment is from USD 2 million up to USD 5 million.
- Five years exemption if volume of investment exceeds USD 5 million.

**Withholding taxes**

Tajikistan-source income of non-residents is subject to withholding tax (WHT) at its source at the rates shown in the following table:

<table>
<thead>
<tr>
<th>Types of income at source of payment</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends and interest</td>
<td>12</td>
</tr>
<tr>
<td>Insurance and reinsurance premiums</td>

**Notes**

1. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 15% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
2. A rate of 5% of the gross amount of the dividends if the recipient is an enterprise (except a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
3. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
4. A rate of 10% of the gross amount of the dividends if the beneficial owner is a legal entity and directly holds no less than a 30% stake in the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
5. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that holds at least 50% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
6. A rate of 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 75% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
7. A rate of 5% of the gross amount of the royalties paid for the use of or the right to use software, or industrial, commercial, or scientific equipment; 10% of the gross amount of the royalties in all other cases.
8. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
9. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
10. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that holds directly at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
11. A rate of 5% of the gross amount of the dividends if the beneficial owner is a person who holds directly at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
12. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
13. Interest arising in Tajikistan and paid to the government of Turkey or to the Central Bank of Turkey shall be exempt from Tajikistan tax; interest arising in Turkey and paid to the government of Tajikistan or to the National Bank of Tajikistan shall be exempt from Turkish tax.

### Tax administration

**Taxable period**
The Tax Code prescribes a calendar year as the tax year.

**Tax returns**
Annual CIT declarations are due by 1 April in the year following the tax year-end.

Taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.
Payment of tax
With respect to CIT, advance payments are due every 15th day of the month. Payment of any outstanding CIT liabilities is required not later than 10 April following the reporting tax period.

The settlement of minimum income tax should be done by 10 April following the reporting tax period in cases where it exceeds CIT liability.

Fines and interest penalties
The fine for failure to file a tax return ranges from a minimum amount of 1 calculation index (CI), which is currently TJS 40 (approximately USD 8.4), to a maximum fine of 100 CI, or TJS 4,000 (approximately USD 840). The amount of the fine depends on the taxpayer’s category and should be assessed based on each ten days of delay. In the absence of tax returns, the tax authorities are entitled to assess taxes based on any information available.

Fines may be assessed in the amount of 10% to 20% of the understated tax liabilities. In severe cases, a violation may be considered a criminal offence.

A fine for failure to withhold and remit tax may be assessed in the amount of 3 to 200 CI (approximately TJS 120 to 8,000 [approximately USD 25 to 1,680]) of the tax not withheld.

Interest penalties may apply to late tax payments in the amount of 0.08% of the underpaid tax amount, for each day of tax underpayment.

Tax audit process
Tajikistan tax authorities have the right to conduct regular tax audits (once per year for planned tax audits). Generally, there are two types of audits:

- Planned tax audits. Planned tax audits are conducted according to the list of entities that fall under tax audit, published by the competent authority.
- Unplanned tax audits. Reorganisation or liquidation of a legal entity, the expiration of the contract on subsoil use, validation of the VAT amount that is charged for a return, etc., may trigger an unplanned tax audit.

Documentary tax audits may be further subdivided into comprehensive (i.e. covering all taxes), thematic (covering only specific type of taxes), or cross-check (covering only transactions with a particular counterparty). Comprehensive and thematic audits may be conducted once a year.

The first planned documentary tax audit of a small business, implementing the simplified tax system, can be carried out only after 24 full calendar months from the date of its registration.

The tax authority sends or presents a notice of a tax audit to a taxpayer no later than ten working days before the start of the documentary tax audit unless otherwise provided in the Tax Code.

The period of tax audits, specified in issued orders, shall not exceed 30 working days from the date of receipt of the order, unless otherwise provided in the Tax Code.
Tajikistan

**Statute of limitations**
Taxpayers are allowed to make changes to prior period tax returns within the statute of limitations (three years). No fines should apply to corrections in this case.

**Other issues**

**Adoption of IFRS**
In accordance with the governmental Resolution of the Republic of Tajikistan concerning International Standards of Financial Statements, the Ministry of Finance of the Republic of Tajikistan shall adopt IFRS through a step-by-step approach. Starting from 2011, juridical legal entities should apply IFRS; however, National Accounting Standards may still be applicable by companies, except for public companies.

Accounting policies and practices are being revised in light of the legal requirement that companies adopt IFRS and International Accounting Standards. Such revised accounting policies should be adopted by companies’ boards of directors and disseminated to all the accounting units with clear instructions on how to introduce and follow the new policies and procedures.
**Tanzania**

**Significant developments**

The Finance Act 2012 introduced amendments to the ‘change in control’ rules (Section 56 of Income Tax Act 2004) to trigger an automatic deemed disposal of assets and liabilities in Tanzania where the underlying ownership of an entity changes by more than 50% as compared with that ownership at any time during the previous three years.

In addition, the Finance Act 2012 abolished the tax exemption investment income derived by a resident corporation that owns and controls 25% or more of the shares in another resident entity. Previously, this exemption resulted in gains on share disposal as well as dividends being free from tax. Following the change, gains on share disposals will be brought into tax at the normal corporate tax rate and dividends will be subject to withholding tax (WHT) (albeit at a lower rate of 5% compared to the normal 10% rate).

**Taxes on corporate income**

A Tanzanian resident is taxed on worldwide income, irrespective of source. Non-residents are taxable on income with a source in Tanzania.

Income tax is charged at a rate of 30% on income of a resident corporation and of a permanent establishment (PE) of a non-resident corporation. Certain payments to non-residents are subject to tax at the relevant non-resident WHT rates (see the Withholding taxes section for the relevant rates).

Income from the disposal of investments in Tanzania is subject to income tax where such investments fall within the source rules, and, in such a case, the income will be taxed at a rate of 30%.

**Reduced rate for newly listed companies**

A reduced corporate tax rate of 25% applies for three consecutive years for companies newly listed on the Dar es Salaam Stock Exchange (DSE). To qualify, at least 30% of the company's shares must be issued to the public.

**Alternative minimum tax**

Alternative minimum tax applies at a rate of 0.3% to the turnover of companies with perpetual unrelieved tax losses for the current and preceding two income years.

**Local income taxes**

There are no local income taxes levied by local authorities. Please see Local taxes in the Other taxes section for a description of the local service levy based on turnover.
Corporate residence
A company is tax resident if it is incorporated or formed under the laws of Tanzania or if the management and control of its affairs is exercised in Tanzania.

Permanent establishment (PE)
A non-resident entity has a PE in Tanzania if it carries on business in Tanzania. This includes a place where a person (i) is carrying on business through a dependent agent; (ii) has used or installed, or is using or installing, substantial equipment or machinery; and (iii) is engaged in a construction, assembly, or installation project for six months or more, including a place where a person is conducting supervisory activities in relation to such a project.

Other taxes

Value-added tax (VAT)
VAT is chargeable on all taxable goods and services supplied in, or imported into, mainland Tanzania. For imported goods, VAT is payable at the time of importation together with any customs and excise duties. For imported services, VAT is accounted for by registered businesses through a ‘reverse charge’ mechanism. The standard rate of VAT is 18%, but the export of goods and certain services is eligible for zero rating. Businesses with an annual taxable turnover of more than 40 million Tanzanian shillings (TZS) must register for VAT.

The Commissioner for VAT has the discretion to register as intending traders investors whose projects have not commenced production but who wish to be VAT-registered in order to reclaim the tax they incur on start-up costs. VAT payable with respect to capital goods (as defined), which are imported or purchased in Tanzania, may be permanently deferred, subject to certain procedures being followed.

Exempt supplies include supplies of unprocessed food, crops and livestock supplies, health supplies, transport services, financial and insurance services, and certain petroleum products. This list is not exhaustive. A business that only makes exempt supplies is unable to register for VAT and, consequently, unable to recover the VAT incurred on inputs. However, businesses in this category that import taxable services with a value over the registration threshold must register for VAT to account for the VAT on such services.

Certain goods and services supplied to specified entities are eligible for ‘special relief’ from VAT. The ‘special relief’ provisions enable supplies, which would otherwise be chargeable with VAT, to be made VAT free, provided certain administrative requirements are followed.

Registered businesses must submit VAT returns, and pay any tax due, on a monthly basis.

Businesses entitled to VAT refunds can claim any remaining credit six months after a refund first became due, subject to all intervening returns being rendered. Any claim for a VAT refund must be supported by an auditor’s certificate. Businesses in a consistent refund position (e.g. exporters) can apply for approval to lodge their refund claims on a monthly basis.

Zanzibar has its own VAT Act, but it is similar to the Mainland Tanzania Act.
**Customs duties**

Tanzania is a member of the East African Community, which became a Customs Union on 1 January 2005 on the implementation of the East African Customs Union Protocol. This protocol provides for a common external tariff (CET), elimination of internal tariffs, rules of origin, anti-dumping measures, a common customs law, and common export promotion schemes.

The customs duty rates applicable under the CET are as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Raw materials, capital goods, agricultural inputs, pure-bred animals, medicines</td>
<td>0</td>
</tr>
<tr>
<td>Semi-finished goods</td>
<td>10</td>
</tr>
<tr>
<td>Finished final consumer goods</td>
<td>25</td>
</tr>
</tbody>
</table>

Tanzania is also a member of the Southern African Development Community (SADC). Where goods are subject to a lower rate of duty from another trade bloc, such as SADC, the lower duty rate applies until such a time as the trading arrangements between the trading blocs are harmonised.

**Excise duties**

Excise duty rates apply as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Rate for FY 2012/13 (TZS)</th>

</table>

**Fuel levy**
Fuel levy is charged on petroleum products at a rate of TZS 200 per litre.

**Stamp duty**
Examples of instruments giving rise to stamp duty obligations include conveyances, leases, share transfers, and issue and transfer of debentures. For most of these instruments, the applicable stamp duty rate is 1% of the consideration.

**Payroll taxes and social security contribution**
Apart from individual income tax (deducted at source by the employer), payroll taxes include a skills and development levy at 6% of payroll cash costs and a 20% social security contribution. The social security contribution is normally split equally between employer and employee (i.e. 10% each).

**Local taxes**

**Property taxes**
The local government levies a property tax based on the value of a premise. The rates vary depending on the value and location of the property.

**Service levy**
The local government is entitled to charge a 0.3% service levy based on turnover generated in the relevant district.

**Cess levy**
For agricultural produce and livestock, there is a cess levy, currently capped at 5% of the producer price.

**Branch income**
The income tax liability of a person with a PE in Tanzania is calculated as if the person and the PE are independent but as if the PE is resident in Tanzania. The income of the PE is taxed at the normal income tax rate for entities, namely 30%.

The PE is also subject to a tax on ‘repatriated income’, which applies at a rate of 10% (the same rate as a company would withhold on dividends).

In certain circumstances, business activities of the head office may be attributed to the branch. Arrangements between a PE and head office generally are not recognised, other than the transfer of an asset or liability between the two. Amounts derived (or payments received) and expenditures incurred (or payments made) that relate to assets held by, or liabilities owed by, the business of the PE are attributed to the PE.
Tanzania

**Income determination**

Subject to any provision to the contrary in the Income Tax Act, income is to be calculated in accordance with generally accepted accounting principles (GAAP). Local GAAP is in accordance with International Financial Reporting Standards (IFRS). Corporations must apply an accrual basis of accounting.

**Inventory valuation**

Trading stock is valued at the end of the year at the lower of cost and market value. No explicit method is stated for determining inventory cost, and, so far, for tax purposes, such cost will match the cost determined in accordance with GAAP. Special rules apply for the valuation of long-term work in progress.

**Capital gains**

There is no separate capital gains tax in Tanzania. Instead, income tax is charged on the taxable profit arising on a gain arising from the realisation of an ‘investment asset’ (a term that [subject to certain exceptions] includes shares, interests in land and buildings, and a beneficial interest in a non-resident trust). The gain is determined as the difference between costs incurred and sale proceeds.

**Dividend income**

Dividend payments are taxed by way of WHT, and this is a final tax. The normal rate of WHT on dividends is 10%.

Where a dividend is paid by a resident corporation to another resident corporation holding 25% or more of shares and voting rights in the corporation paying the dividend, the WHT rate is 5%.

**Interest income**

Interest income is treated as income from investment. The term ‘interest’ is defined as payment for the use of money and includes payment made or accrued under a debt obligation that is not a repayment of capital, any gain realised by way of a discount, premium, swap payment, or similar payment.

Interest income is taxed by way of WHT.

**Foreign income**

A resident person’s foreign-source income or loss (from employment, business, and investment) is calculated as that person’s worldwide income or loss less any income sourced in Tanzania and plus any loss sourced in Tanzania.

A resident person may claim a foreign tax credit on any foreign tax paid by the person on foreign income. However, such credit should not exceed the Tanzanian tax rate applicable to that income. Any unrelieved amount of foreign tax credit may be carried forward (subject to the ‘change in control’ provisions). An election may be made to relinquish foreign tax credit and claim a deduction for the amount of foreign income tax.

There are no provisions for the deferral of the taxation of foreign income.
Deductions

In calculating taxable profit, deductions are allowed for revenue expenditures incurred wholly and exclusively in the production of income, with some statutory exceptions. For capital expenditures, there are specific tax depreciation allowances.

There are special rules with regard to the valuation of trading stock and long-term contracts and in relation to the treatment of instalment sales and finance leases.

There is ring-fencing of mining operations per licence area.

Depreciation

The categories of depreciable assets and their tax depreciation rates are set out in the table below.

Expenditures on plant and machinery are generally written off on a reducing-balance basis at rates of 37.5%, 25%, or 12.5%, depending on the category of the asset. Certain plant and machinery for manufacturing, fish farming, and tourist hotels benefit from a 50% allowance in the first year, with the normal rates applying to the remaining balance in subsequent years. There is an immediate write-off of expenditures on plant and machinery used in agriculture.

Expenditures on buildings qualify for a depreciation allowance of 5% per year on a straight-line basis. For intangible assets, the write-off is over the useful life of the asset.

Apart from the immediate write-off of plant and machinery, agricultural businesses also benefit from the immediate write-off of agricultural improvement expenditures (including the costs of clearing land, excavating irrigation channels, and planting perennial crops or tree bearing crops). Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock, or fish farming are written off on a straight-line basis over five years.

Mining companies are entitled to a 100% capital deduction with respect to capital expenditures on exploration and development.

</table>
Class | Depreciable assets | Rate (%)  
---|------------------|----------  
4 | Natural resource exploration and production rights and assets in respect of natural resource prospecting, exploration, and development expenditure. (However, note that the Income Tax Act 2004 does provide for predecessor capital deduction provisions in the Income Tax Act 1973 to continue for the holders of mining rights.) | 20  
5 | Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock farming, or fishing farming. | 20  
6 | Buildings, structures, and similar works of permanent nature other than those mentioned in Class 5. | 5  
7 | Intangible assets other than those in Class 4. | 1 divided by the useful life of the asset in the pool and rounded down to the nearest half year  
8 | Plant and machinery (including windmills, electric generators, and distribution equipment) used in agriculture. | 100  

**Goodwill**

Goodwill does not qualify for depreciation allowance as it is excluded from the definition of ‘depreciable asset’.

**Start-up expenses**

Start-up expenses are deductible to the extent that they meet the general deduction criteria (i.e. they are revenue in nature and were incurred wholly and exclusive in the production of income). The definition of ‘business’ includes a prospective business.

**Interest expenses**

Interest expenses are deductible on an accrual basis, subject to thin capitalisation rules (see Thin capitalisation in the Group taxation section).

**Bad debt**

In order to claim relief for a bad debt, it is necessary to demonstrate that all reasonable steps have been taken to pursue payment and that there is a reasonable belief that the debt claim will not be satisfied.

**Charitable contributions**

The Income Tax Act allows deduction for contributions made:

1. to charitable institutions (approved by the Commissioner to operate as such) and social development projects  
2. under Section 12 of the Education Fund Act 2001, or  
3. to local government authorities under statutory obligations to support community developments projects.

The deduction available under item (1) above is restricted to 2% of the company’s taxable income before such deduction.

**Fines and penalties**

Fines and similar penalties payable to a government or a political subdivision of any country for the breach of any law or subsidiary legislation are not deductible.
Tanzania

**Taxes**
Taxes payable under the Income Tax Act 2004 are not deductible.

**Net operating losses**
There is no limit on the carryforward period for tax losses. However, there is ring-fencing of tax losses as follows:

- Losses from agricultural business can only be offset against profits derived from agricultural business.
- Losses from one mining licence area can only be offset against profits from the same mining licence area.
- Foreign-source losses can only be offset against foreign-source profits.
- Losses on investments can only be offset against investment income.
- Foreign-source losses on investments can only be offset against foreign-source investment income.

In certain circumstances, tax losses may be forfeited on a change in the underlying control of an entity.

Tax losses can be carried back only in long-term contracts in a case where a contract is completed and a person has unrelieved losses for that period or a previous period that is attributable to the long-term contract. These losses can then be carried back to a previous year of income and treated as unrelieved loss for that year.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible to the extent they are wholly and exclusively incurred in the production of the company's income. The deduction is subject to transfer pricing provisions as detailed in the Group taxation section.

**Group taxation**
There are no provisions for tax consolidation or group relief in Tanzania.

**Transfer pricing**
With respect to transactions between related parties, there is an obligation to 'quantify, apportion, and allocate amounts' for income tax purposes on an arm's-length basis. If the Commissioner considers that a person has failed to comply with this requirement, the Commissioner may make such adjustments as the Commissioner thinks appropriate.

The Commissioner has the power to make counteractive adjustments to a person's tax liability where the Commissioner considers that an arrangement is a tax-avoidance arrangement.

**Thin capitalisation**
There is a thin capitalisation restriction on the amount of deductible interest for what are termed 'exempt-controlled resident entities', where the debt-to-equity ratio exceeds 7:3. There are specific definitions of 'debt' and 'equity' for the purposes of thin capitalisation (such definitions having been introduced in the Finance Act 2012).

**Controlled foreign trusts and corporations**
There are provisions that relate to the treatment of unallocated income of controlled foreign trusts and corporations.
Change in control provisions
The change in control provisions are triggered at the moment the underlying ownership of an entity changes by more than 50% as compared to any time during the previous three years. Where there is such a change, the consequences are that:

- the accounting period of the entity is split at the point of such a change, so that the parts of the year of income before and after the change are treated as separate years of income, and
- there is deemed realisation of assets and liabilities at market values.

In certain cases, such a change can also result in the forfeiture of unutilised tax losses and tax credits.

Other anti-avoidance provisions
Other anti-avoidance provisions exist to address the following:

- Income or dividend stripping arrangements.
- Income splitting.

Tax credits and incentives

Foreign tax credit
See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Agriculture, manufacturing, mining, and tourism incentives
Tax incentives by way of generous capital deduction provisions are given for specific sectors, namely agriculture, manufacturing, mining, and tourism. See the Deductions section for more information.

Export processing zones (EPZs) and special economic zones (SEZs)
There are special benefits for EPZs and SEZs. Included in the benefits available to a person licensed to carry on business in an EPZ, as well as to SEZ investors selling in export markets, are a ten-year income tax holiday and WHT holiday, subject to a requirement to export at least 80% of production.

**Notes**

1. The domestic WHT rate applies unless the DTT rate is lower, in which case the lower DTT rate applies.
2. The lower rate applies if the beneficial owner is a company that controls, directly or indirectly, at least 15% of the voting power in the company paying the dividends; otherwise, the higher rate applies.
3. The lower rate applies if the recipient is a company that owns at least 25% of the shares of the company paying the dividends during the six month period immediately preceding the date of payment of the dividends; otherwise, the higher rate applies.
4. Signed but awaiting ratification.

### Tax administration

#### Taxable period

While the year of income for tax purposes is the calendar year, an entity may apply to use its own accounting period rather than the calendar year.
Tanzania

**Tax returns**
A statement of estimated tax payable, which contains an estimate of the chargeable income and the tax payable thereon, is due for submission within three months from the beginning of the accounting period. A final tax return must be furnished within six months from the end of the accounting period.

WHT returns must be submitted every half year.

A late filing penalty applies monthly at an amount equal to the higher of (i) TZS 100,000 or (ii) 2.5% applied to unpaid tax. If estimated tax is significantly underestimated, a penalty may also apply.

**Payment of tax**
Instalment tax is payable in four equal instalments not later than three months, six months, nine months, and 12 months from the beginning of the accounting period. Final tax is payable on the date on which the final return is due for submission, namely six months after the end of the accounting period.

WHT is due seven days after the month of deduction.

Interest on late payment is charged at the Bank of Tanzania discount rate plus 5%.

**Tax audit process**
The normal practice is for the Revenue Authority to carry out a review every two or three years.

**Statute of limitations**
There is a three-year time limit for the Revenue Authority to adjust an income tax return filed by a taxpayer. The three years runs from the due date of filing the final tax return.

**Topics of focus for tax authorities**
Currently, the topics of particular focus for the Revenue Authority include transfer pricing, VAT compliance, WHT on payments to non-residents, and compliance on payroll taxes.

**Functional currency**
Taxable income and deductible expenditure is quantified in Tanzanian shillings. The Commissioner has the power, by notice in writing, to permit quantification in a foreign currency convertible to Tanzanian shillings.
**Significant developments**

**Corporate income tax (CIT) rate**
The CIT rate is 20% for accounting periods beginning between 1 January 2013 and 31 December 2014.

This rate also applies to companies listed on the Stock Exchange of Thailand (SET) and the Market for Alternative Investment (MAI) for the same period.

**Taxes on corporate income**

Thailand incorporated companies are taxed on worldwide income. A foreign incorporated company is taxed on its profits arising from or in consequence of the business carried on in Thailand. A foreign company not carrying on business in Thailand is subject to a withholding tax (WHT) on certain types of assessable income (e.g. interest, dividends, royalties, rentals, and service fees) paid from or in Thailand. The rate of WHT is generally 15%, except for dividends, which is 10%, while other rates may apply under the provisions of double tax treaties (DTTs).

The CIT rate is 20% for accounting periods beginning between 1 January 2013 and 31 December 2014.

**Rates for companies with low paid-in capital and income**
Companies and juristic partnerships with a paid-in capital not exceeding 5 million Thai baht (THB) at the end of any accounting period and income from the sale of goods and/or the provision of services not exceeding THB 30 million in any accounting period will be subject to CIT at the following rates:

<table>
<thead>
<tr>
<th>Net profit (THB)</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 300,000</td>
<td>0</td>
</tr>
<tr>
<td>300,001 to 1 million</td>
<td>15</td>
</tr>
<tr>
<td>Over 1 million</td>
<td>20</td>
</tr>
</tbody>
</table>

**Reduced rates for certain banking transactions**
Banks are subject to CIT at the rate of 10% with respect to profits derived from lending to non-Thai residents from foreign currency funds obtained from non-Thai sources (so-called ‘out-out’ business).
Petroleum income tax
Taxation on income from petroleum operations is imposed on petroleum concessionaire companies by the Petroleum Income Tax Acts (PITA). Companies taxed under the PITA are exempt from taxes and duties on income imposed under the Revenue Code and under any other laws. The exemption applies so long as the company pays taxes and duties on income subject to the PITA or on dividends paid out of income subject to the PITA.

Petroleum companies are taxed at the rate of 50% of their annual net profit from petroleum operations, including profit from the transfer of their concession interests and other activities incidental to petroleum operations. Deductions are allowed for ‘ordinary and necessary’ business expenses, as well as depreciation on capital expenditure, petroleum royalties, and other charges. Certain types of expenses are specifically disallowed for deduction, including interest.

Local income taxes
There are no local government taxes on income in Thailand.

Corporate residence
Corporate residence is determined by the place of incorporation. A company incorporated under the laws of Thailand is a resident company.

A company incorporated abroad is subject to CIT in Thailand if it is considered to be carrying on business in Thailand. The term ‘carrying on business in Thailand’ is broad and, subject to the provisions of DTIs, includes the presence of an employee, representative, or go-between that results in a foreign corporation deriving income or gains in Thailand.

Other taxes
Value-added tax (VAT)
VAT, at the current rate of 7%, is levied on the sale of goods and provision of services. However, exports are zero-rated while a number of goods and services are exempt (e.g. basic groceries, education, healthcare, interest, leasing of immovable property, and sale of real estate).

Customs duties
Basis of taxation
Customs duties are imposed under the Customs Act and the Customs Tariff Decree. Customs duties are collected on both imports and a very limited number of exports. Classification of imports is based on the Harmonized Commodity Description and Coding System (the so-called ‘Harmonized System’). Thailand has adopted the ASEAN Harmonized Tariff Nomenclature (‘AHTN’) 2012, which is based on the Harmonized System 2012, as its latest import tariff nomenclature.

Duties are levied on a specific or an ad valorem basis, whichever is higher, and the applied ad valorem duties range between 0% and 80%. Exemptions from import duties are available on particular items of goods as prescribed in the Customs Tariff Decree. Preferential duty rates are available on imported goods from countries that have a preferential free trade agreement (FTA) with Thailand.
Currently, Thailand has FTAs with the following countries:

- ASEAN member states (i.e. Singapore, Vietnam, Malaysia, Indonesia, Philippines, Cambodia, Laos, Myanmar, and Brunei).
- Peru.
- New Zealand.
- Australia.
- India.
- Japan.

Also, as part of ASEAN, Thailand has preferential trade agreements with the following countries:

- China.
- Korea.
- Japan.
- Australia and New Zealand.
- India.

Generally, the value of imports is based on their CIF (cost, insurance, and freight), whereas exported goods are based on their FOB (free on board).

Thailand has implemented the World Trade Organization (WTO) Valuation Agreement. The primary basis for the customs value is transaction value (i.e. the price actually paid or payable for the goods when sold for export). This is subject to adjustments for certain elements that are considered to form a part of the value for customs purposes, but are not yet included in the selling price. The elements that may need to be added include: royalties and licence fees that are related to the goods and paid as a condition of sale; proceeds from subsequent resale in the importing country; value of goods or services supplied by the buyer, such as design or development fee related to imported goods; etc. If the declared price is evidently low or is unlikely to be the true value of such goods, Thai Customs will dispute the declared price.

**Customs controls and procedures**

Customs procedures for goods arriving in Thailand in any manner are similar to those existing in most other countries. An importer is required to file an entry form together with other requisite documents, including a bill of lading, invoice, and packing list via the e-Customs system.

Customs duties are due upon the arrival of the vessel carrying the imported goods, and goods may be stored in a bonded warehouse. Landing and storage charges must be paid before the goods are released.

**Customs incentives schemes**

Various customs incentives schemes, each with its own specific conditions and duty privileges, are available in Thailand, including the following:

- Duty and tax compensation (‘Tax Coupons’).
- Duty drawback under Section 19 bis for imported raw materials used in export production.
- Duty drawback for re-export in the same state under Section 19.
- Free zones (Customs or Industrial Estate Authority of Thailand Free Zones).
- Manufacturing bonded warehouses.
- General bonded warehouses.
- Board of Investment (BOI) promotion.
Thailand

**Excise tax**

**Basis of taxation**

Excise tax is imposed on the sale of a selected range of commodities, whether manufactured locally or imported. Tax liabilities arise on locally manufactured goods when leaving the factory and at the time of importation for imported goods.

Below is an outline of the *ad valorem* rate on commodities that are subject to excise tax in Thailand; however, a specific rate may also be applied on some commodities. Tax rates are based on *ad valorem* or a specific rate, whichever is higher.

In cases where the *ad valorem* rate is applied, the excise tax payable can be calculated based on the following formula:

\[
\text{Excise tax payable} = (\text{CIF} + \text{ID}) \times \left(\frac{\text{ETR}}{1-(1.1 \times \text{ETR})}\right)
\]

Where, \(\text{CIF} = \) landed CIF price; \(\text{ID} = \) Amount of import duty; and \(\text{ETR} = \) Excise tax rate \% (in schedule).

**Taxable goods and services**

<table>

</tr>
</tbody>
</table>

In addition to the excise tax, an interior tax is also levied by the Excise Department at a rate of 10% of excise tax payable, except for cigarettes and playing cards. Other taxes, such as Health Tax and Thai Public Broadcasting Service (TPBS tax or TV tax), may apply to limited specified products (i.e. cigarettes and alcohol).

The manufacturer of the products must file a return and remit the tax due prior to taking the goods from the factory or bonded warehouse. If a VAT liability arises before the goods are taken out of such locations, the manufacturer must file a return and remit the excise tax to the Excise Department within 15 days from the end of the month.

**Stamp duty**

Stamp duty is levied on 28 different types of documents and instruments, including contracts for hire of work, loans, share transfers, leases of land or buildings, and
insurance policies. The rate of stamp duty varies depending on the type of agreement, but ranges from THB 1 per THB 1,000 of value on most contracts and agreements to a fixed amount per instrument on most commercial and other documents. Unstamped documents are not admissible as evidence in a civil lawsuit, and the surcharge can be as high as 600% of the duties for failure to pay the stamp duty on a timely basis.

**Specific business tax (SBT)**

SBT is collected at fixed rates on the gross revenue of certain businesses not subject to VAT. Commercial banking, similar financial businesses, and the sale of immovable property are taxed at 3% and life insurance at 2.5%.

The rate of SBT has been reduced to 0.01% for certain revenue derived by commercial banks and finance, securities, and credit foncier businesses as well as businesses with regular transactions similar to commercial banking.

An additional 10% of SBT is levied as municipality tax.

**Capital taxes**

There are no capital taxes in Thailand.

**Social security contribution**

Contributions are levied at a rate of 4% (as a temporarily reduced rate for 2013 from the standard rate of 5%) of the monthly salary of each employee, subject to a maximum levy per employee of THB 600 per month. These contributions are payable by both the employer and employee.

**Local taxes**

There are three major local taxes:

**Household and land tax**

Household and land tax is levied at 12.5% of assessable economic rental income.

**Signboard tax**

Signboard tax is levied at varying rates according to size. The minimum tax is THB 200 per annum.

**Local development tax**

Local development tax is levied at rates ranging between 0.25% and 0.95% of the value of land assessed by local authorities. This tax does not apply if the property is subject to household and land tax.

**Branch income**

Branches of foreign corporations pay income tax at the CIT rate on locally earned profits only. Branch profits remitted to the foreign head office are subject to additional tax at the rate of 10%. However, this is a tax on disposition of profits abroad and is not limited to remittances. For example, a credit of profits to the head office account in the books is held to be a disposition of profits abroad even though no remittance of funds takes place.

**Income determination**

**Inventory valuation**
Inventory is valued at the lower of cost or market price. Any recognised method of ascertaining the cost price may be used, but a change in the method may be made only with the prior approval of the director-general of the Revenue Department. Conformity between book and tax reporting is required.

**Capital gains**
There is no specific legislation governing capital gains. All capital gains earned by a Thai company are treated as ordinary revenue for tax purposes. Capital gains on the sale of investments derived from or in Thailand by a foreign company not carrying on business in Thailand are subject to a tax of 15%, withheld at source by the purchaser, unless otherwise exempt under a DTT.

The following income earned by a foreign company not carrying on business in Thailand is subject to 15% WHT:

- Interest on bonds/debentures issued by state enterprises.
- Difference between the redemption price and the initial sale price of bonds issued by the government, state enterprises, and specified institutions.
- Gains on the transfer of bonds issued by the government, state enterprises, and specified institutions.

**Dividend income**
Dividends received from a Thai company by a company listed on the SET are exempt from tax. Dividends received by a non-listed company from other Thai companies are also exempt from tax, provided that the company receiving the dividends holds at least 25% of the total voting shares without any cross-shareholding. The tax exemption applies on the condition that the shares have been held for at least three months before and three months after the dividends were received.

In other cases, where one Thai company receives dividends from another Thai company, one-half thereof is exempt from tax also on the condition that the shares have been held for at least three months before and three months after the dividends were received.

Dividends received from outbound investment are exempt from tax if the Thai company receiving the dividends holds at least 25% of the shares with voting rights of the company paying the dividends for a period of not less than six months before the date on which the dividends are received and the dividends are derived from net profit in the foreign country taxed at a rate of not less than 15%. In the event that a ‘special law’ in a particular foreign country provides a reduced tax rate or exemption for the net profit, the limited company that receives the dividends is still eligible for tax exemption.

The share of profits received by a Thai company or a foreign company carrying on business in Thailand from an unincorporated joint venture carrying on business in Thailand is exempt from CIT.

**Stock dividends**
Stock dividends are taxable to the recipient as ordinary income.

**Interest income**
Interest is taxable as income on the accrual basis.
**Foreign income**

Thailand incorporated companies are taxed on worldwide income. The Revenue Code does not describe how foreign income received by a Thailand incorporated company is taxed, but the Revenue Department regards foreign branch income as taxable when earned and foreign dividend income as taxable when received. Double taxation is relieved by way of a credit against the tax chargeable in Thailand (see Foreign tax credit in the Tax credits and incentives section).

**Deductions**

**Depreciation, amortisation, and depletion**

Deductions for depreciation are allowed as a percentage of cost. If the rate of deduction adopted by a company under its own accounting method is lower than the maximum percentage of cost permitted, a deduction will be allowed only at the rate adopted by the company. The straight-line basis is the method most commonly used by companies, but any generally accepted basis, such as sum-of-the-years-digits method or double-declining method, is permitted. The maximum permitted rates are as shown:

<table>

</tr>
</tbody>
</table>

**Special depreciation methods for certain assets**

- Machinery and equipment for research and development (R&D) may initially be depreciated at 40% of cost, with the remaining balance being depreciated at the above maximum rate of 20% per annum.
- Computer hardware and software may be depreciated within three accounting periods.

**Special depreciation method for small companies**

Companies and juristic partnerships with fixed assets, excluding land, with a value of no more than THB 200 million and with no more than 200 employees are entitled to the following special depreciation methods:
• Machinery and equipment may initially be depreciated at 40% of cost, and the remaining balance will then be depreciated at the maximum rate of 20%.
• Computer hardware and software may initially be depreciated at 40% of cost, and the remaining balance can then be depreciated within three accounting periods.
• Factory buildings may initially be depreciated at 25% of cost, and the remaining balance will then be depreciated at the maximum rate of 5%.

**Start-up expenses**
Start-up expenses, such as incorporation expenses and registration fees, are deductible when the expenses are incurred.

**Interest expenses**
Interest on money borrowed for the purpose of acquiring profits or for the purpose of business is deductible. Interest incurred in respect of the construction or installation of fixed assets that require a period of time to get them ready for their intended use is considered to be capital expenditure.

**Bad debts**
Bad debts written off are deductible, provided that they are consistent with the rules, procedures, and conditions prescribed by the Ministerial Regulations.

**Charitable contributions**
Donations to specified charities or for public benefit, for education or for sport, are deductible, in the amount actually paid but not exceeding 2% of net profit.

Donations made to support certain education, recreation, and sport programs are allowed a double deduction of tax.

**Fines and penalties**
Fines, penalties, and surcharges charged under the Revenue Code are not deductible.

**Taxes**
In general, all taxes are deductible except CIT and VAT.

**Other significant items**
Other non-deductible expenses include, but are not limited to, the following:

• Expenses in the nature of provisions or reserves.
• Contributions to any fund (except an approved provident fund).

**Net operating losses**
Losses may be carried forward for the following five accounting periods. Carryback of losses is not permitted. A change in control of a loss company does not impact its loss carryforward.

**Payments to foreign affiliates**
A Thailand incorporated company may claim a deduction for royalties, management service fees, and interest charges, provided they are expended exclusively for the purpose of generating profit or for the purpose of the business in Thailand and are determined on an arm’s-length basis.
Group taxation

Group taxation is not permitted in Thailand.

Transfer pricing

Thailand has no detailed transfer pricing legislation. However, transfer pricing guidelines issued by the Revenue Department define the term ‘market price’, detail the permitted transfer pricing methods, describe the transfer pricing documentation requirements, and allow taxpayers to apply for advance pricing agreements (APAs) in respect of any intended related party transaction.

The transfer pricing guidelines do not have the status of legislation but are internal directives that the Revenue officials must adhere to when conducting tax audits, reviews, or investigations. The guidelines are also intended to inform taxpayers about transfer pricing practices.

The guidelines authorise the use of both traditional transaction methods (e.g. comparable uncontrolled price, resale price, and cost plus methods) as well as transactional profit methods, in order to determine the market price of a transaction. No one method is preferred over another, and there is no hierarchy of acceptable methods. Although the Revenue Department would generally accept a taxpayer’s chosen method, it retains the right to select an alternative method if it deems it to be more appropriate.

To enter into an APA under the guidelines, the taxpayer must submit a letter to the Director-General of the Revenue Department requesting the APA together with the relevant documents. Certain requirements specified in the guidelines must also be adhered to.

Thin capitalisation

There are no thin capitalisation rules. However, for certain businesses or as part of tax incentive conditions, a minimum capital requirement is needed.

Tax credits and incentives

The Board of Investment (BOI), by virtue of the Investment Promotion Act, provides tax incentives to certain activities within the following categories:

- Agriculture and agricultural products.
- Mining, ceramics, and basis metals.
- Light industry.
- Metal products, machinery, and transport equipment.
- Electronic industry and electrical appliance.
- Chemicals, paper, and plastics.
- Service and public utilities.

The tax incentives available include the following:

- Exemption from or reduction of import duties on imported machinery.
- Exemption from import duties on raw materials and components imported for manufacturing for export.
- Exemption from CIT equal to the amount of the investment, excluding the cost of land and working capital, for up to eight years, depending on the promoted activity and location.
Exclusion of dividends derived from promoted enterprises from taxable income during the period of exemption from CIT.

Additional incentives for enterprises located in an industrial estate or promotion zone include the following:

- Reduction of 50% of CIT for five years after the end of the tax holiday.
- Double deduction from taxable income of the cost of transportation, electricity, and water supply.
- Deduction from net profit of the project’s infrastructure installation or construction costs in addition to normal depreciation; such deduction can be made from the net profit of one or several years within ten years from the date when revenue was first derived from the promoted activity.

**Regional operating headquarters (ROH)**

ROH means a company organised under the Thai law providing administrative, technical assistance, or supporting services to its domestic or overseas affiliated enterprises or branches in at least three countries other than Thailand with a paid-in capital of at least THB 10 million on the last day of any accounting period.

Tax incentives available to ROH are under two packages, known as the old and the new package, either of which taxpayers may elect to follow. However, the applications to obtain the privilege under the new package have to be made before 14 November 2015.

Tax incentives can be obtained when all of the criteria for each package are met.

The following corporate tax incentives are available under the old package:

- 10% CIT on net profit from ROH services provided to foreign and domestic affiliates.
- 10% CIT on net profit from qualified royalties and interest income from lending borrowed funds to domestic and foreign affiliates.
- CIT and domestic WHT exemptions on dividends received from affiliates.
- WHT exemption on dividends paid on net profit arising from ROH qualified income to foreign shareholders.

The corporate tax incentives available under the new package are as follows:

- Full CIT exemption on net profit from ROH services provided to foreign affiliates for ten years (this can be extended to 15 years if cumulative ‘operating expenses’ for ten fiscal periods exceed THB 150 million at the end of the tenth fiscal year).
- 10% CIT for ten years on net profit from ROH services provided to domestic affiliates, including qualified royalties and qualified interest income (with extension to 15 years under the same conditions noted above).
- The exemption from CIT and domestic WHT on dividends received from affiliates is also limited to ten years (with extension to 15 years under the same conditions noted above).
- WHT exemption on dividends paid on net profit arising from ROH qualified income to foreign shareholders.

**Foreign tax credit**

A Thai company can use foreign tax paid on business income or dividends as a credit against its CIT liability. However, the credit cannot exceed the amount of Thai tax on the income.

Notes

1. The zero rate applies to a recipient company listed on the SET.
2. The 1% rate applies to interest paid to all resident corporations other than banks or finance companies, except where interest arises from bonds or debentures.
3. The progressive rate is in accordance with the personal income tax schedule.
4. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
5. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work.
6. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, excluding cinematograph films and films, tapes, or discs for radio or television broadcasting.
7. The 5% rate applies to copyright royalties and other like payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work, excluding royalties with respect to motion picture films and works on film or videotape for use in connection with television.
8. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
9. The 10% rate applies to interest paid (i) to a recipient that is a bank or financial institution (including an insurance company); (ii) in connection with the sale on credit of any industrial, commercial, or scientific equipment; or (iii) in connection with the sale on credit of any merchandise by one enterprise to another enterprise.
10. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, dramatic, musical, artistic, or scientific work, including software, cinematograph films or films, or tapes used for radio or television broadcasting; and the 10% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience.
11. The 5% rate applies to royalties paid for the alienation of any patent, trademark, design, or model, plan, secret formula, or process.
12. The 3% rate applies to interest paid on loans or credits granted for four years or more with the participation of a financing public institution to a statutory body or to an enterprise in relation to the sale of any equipment or to the survey, the installation, or the supply of industrial, commercial, or scientific premises and of public works. The 10% rate applies to interest paid to any financial institution.
13. The 10% rate applies to royalties paid to a contracting state or state-owned company with respect to films or tapes, and the 5% rate to royalties for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work.
The 5% rate applies to royalties paid for the use or the right to use any copyright of literary, artistic, or scientific work and the 10% rate for the use or the right to use any patent, trademark, design, or model, plan, secret formula, or process.

The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting.

The zero rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, while the 10% rate applies to royalties for the consideration for any services of a managerial or consultancy nature, or for information concerning industrial, commercial, or scientific experience.

The 10% rate applies to royalties paid for the use of or the right to use any copyright; or the use of, or the right to use, any industrial, scientific, or commercial equipment; or the use of, or the right to use, any motion picture film, or film or videotape or any other recording for use in connection with television, or tape or any other recording for use in connection with radio broadcasting; or the reception of, or the right to receive, visual images or sounds, or both, transmitted to the public by satellite or, cable, optic fibre, or similar technology; or the use in connection with television or radio broadcasting, or the right to use in connection with television or radio broadcasting, visual images or sounds, or both, transmitted by satellite or cable, optic fibre, or similar technology.

The 5% rate applies to royalties paid for the use for the use of or the right to use any copyright of literary, artistic, or scientific work, including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment.

The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, dramatic, musical, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties in consideration of financial leasing for the use of, or the right to use, industrial, commercial, or scientific equipment.

The 5% rate applies to royalties paid for the alienation of any patent, trademark, design, or model, plan, secret formula, or process.

The 5% rate applies if the recipient holds at least 25% of the capital of the company paying the dividend.

The zero rate applies to interest paid to any financial institution wholly owned by the other contracting state, a ‘land’, a political subdivision, a local authority, or a local administration thereof, and in particular, in the case of the Federal Republic, by the Deutsche Bundesbank or the Kreditanstalt für Wiederaufbau, and in the case of Thailand, by the Bank of Thailand. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).

The 10% rate applies to (i) interest paid to a bank or financial institution (including an insurance company) and (ii) interest paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm’s length.

The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company). In the case of interest arising in Thailand, the 10% rate applies to interest paid to a Philippines financial institution (including an insurance company).
34. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work, including software, motion pictures, and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. The 8% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment.

---

**Tax administration**

**Taxable period**
The tax year for a company is its accounting period, which must be of 12 months’ duration. However, it may be less than 12 months in the case of the first accounting period after incorporation, the accounting period of dissolution, or after approval for a change in the accounting period has been received from the Revenue Department and the Business Development Department.

**Tax returns**
The Thai system is one of self-assessment. A company prepares and files its tax returns by the due dates and at the same time pays the taxes calculated to be due. The annual CIT return is due 150 days from the closing date of the accounting period.

**Payment of tax**
CIT is paid twice in each year. A half-year return must be filed within two months after the end of the first six months of an accounting period. The tax to be paid is computed on one-half of the estimated profit for the full accounting period, except for listed companies, banks, certain other financial institutions, and other companies under prescribed conditions where the tax is based on the actual net profit for the first six months. The balance of the tax due is payable within 150 days from the closing date of the accounting period, along with the annual tax return. Credit is given for the amount of tax paid at the half-year.

**Tax audit process**
If, within a period of two years from the date of filing a tax return, the assessment officer has reason to believe that false or inadequate information has been declared in a return, the assessment officer has the power to issue a summons requesting the presence of the person responsible, or a witness, for examination, and to order either of them to produce accounts or other relevant evidence, provided that advance notice of seven days is given. The subsequent examination of the books and records is normally carried out at the company’s offices if it is inconvenient to transfer all the documents to the tax office. After completion of the examination, the assessment officer has the power to adjust the amounts previously assessed or included in a return on the basis of the evidence, and issue a further assessment for tax together with penalties and surcharges, or adjust the amount of losses available for carryforward.

Tax audits may cover the previous five accounting periods from the date of filing a tax return with the approval of the Director-General if the assessment officer has evidence of an intention to evade tax or in the case of a claim for a refund of tax. However, under the Civil and Commercial Code, the Revenue Department can assess tax for up to ten years.

**Statute of limitations**
The statute of limitations for tax is ten years.
Topics of focus for tax authorities

Topics of focus for tax authorities include the following:

- Deductibility of management service fees or expenses allocated to Thailand by foreign affiliates.
- International inter-company transactions and transfer pricing.
Significant developments

There have been no significant corporate tax developments in Timor-Leste during the past year.

Taxes on corporate income

Timor-Leste residents are subject to income tax on worldwide taxable income, where taxable income is essentially the difference between gross income and allowable deductions. Non-residents are generally subject to income tax on Timor-Leste-source income attributed to a permanent establishment (PE) (see the Branch income section for more information). Non-residents without a PE may be subject to a 10% withholding tax (WHT) (see the Withholding taxes section for more information).

The income of companies is generally subject to corporate income tax (CIT) at a flat rate of 10%.

Industry-specific CIT rates

The rate of CIT for oil and gas contractors is 30%, while sub-contractors are subject to CIT at the flat rate of (generally) 6%.

Supplemental Petroleum Tax (SPT) also applies for oil and gas contractors and is imposed on ‘accumulated net receipts’ using a specific formula. SPT is deductible for CIT calculation purposes.

Separate tax arrangements apply for petroleum activities in the Joint Petroleum Development Area (JPDA) (see the Other issues section).

Local income taxes

There are no local taxes on income in Timor-Leste.

Corporate residence

The definition of a corporate resident (resident legal person) covers a wide range of entities, such as companies, partnerships, trusts, governmental institutions, and unincorporated associations incorporated, formed, organised, or established in Timor-Leste.

Permanent establishment (PE)

A PE is defined as a fixed place of business through which the business of a person is wholly or partly carried on, including:
Timor-Leste

- A place of management.
- A branch.
- A representative office.
- An office.
- A factory.
- A workshop.
- A mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, including any place of drilling for mineral exploration.
- A fishery, place where animal husbandry is conducted, farm, plantation, or forest.
- A construction, installation, or assembly project.
- The furnishing of a service through employees or other personnel, if conducted for more than 60 days in any 12-month period.
- A natural or legal person acting as a dependent agent.
- An agent or employee of a non-resident insurance company, if the agent or employee collects premiums or insures risks in Timor-Leste.

Other taxes

Sales tax
Sales tax is imposed on the sales tax value of:

- taxable goods imported into Timor-Leste and
- taxable goods sold or taxable services provided in Timor-Leste on or after the date specified by Parliament.

Taxpayers liable for sales tax include the following:

- A taxpayer who imports taxable goods into Timor-Leste.
- A taxpayer who sells taxable goods in Timor-Leste.
- A taxpayer who provides taxable services in Timor-Leste.

The rates of sales tax are 2.5% for taxable goods imported into Timor-Leste and 0% for the sale of taxable goods and provision of taxable services in Timor-Leste.

Services tax
Services tax is imposed at 5% on any gross consideration of more than 500 United States dollars (USD) received by a taxpayer for the provision of hotel, restaurant and bar, or telecommunication services.

Import duties
Import duty applies to imported goods (except for specifically exempted goods) at 2.5% of the ‘customs value’ of the goods. Customs value is the fair market value, including cost, insurance, and freight (CIF), as stated in the General Agreement on Tariffs and Trade (GATT) rules.

The following goods are exempted from import duty:

- Goods accompany a person arriving in Timor-Leste from another territory (limitations apply).
- Imports of the type exempted under specific international conventions.
- Goods re-imported in the same condition as when they were exported.
• Goods, other than alcohol or tobacco, imported by registered charitable organisations, registered under any law of Timor-Leste, provided the goods are to be used for charitable purposes of humanitarian assistance and relief, education, or health care.
• Other goods for temporary admission, if the importer has provided security for the import duty in the prescribed manner.
• Goods for consumption by international staff of the United Nations Integrated Mission in East Timor or members of peace keeping forces from contingent countries, if the goods are sold in conformity with prescribed rules of sale.
• Certain infant and female hygiene products.
• Other goods imported into Timor-Leste as personal goods accompanying a traveller and where the import duty that would be imposed on the import would be USD 10 or less.

**Excise tax**

Excise tax is imposed on excisable goods where removed from a warehouse by a registered manufacturer for consumption in Timor-Leste or imported into Timor-Leste.

Below is the list of excisable goods and the respective rates of excise tax:

<table>
<thead>
<tr>
<th>Goods</th>
<th>Excise tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beer</td>
<td>USD 1.90/litre</td>
</tr>
<tr>
<td>Wine, vermouth, fermented beverages (such as cider)</td>
<td>USD 2.50/litre</td>
</tr>
<tr>
<td>Ethyl alcohol (other than denatured) and other alcoholic beverages</td>
<td>USD 8.90/litre</td>
</tr>
<tr>
<td>Gasoline, diesel fuel products, and other petroleum products</td>
<td>USD 0.06/litre</td>
</tr>
<tr>
<td>Tobacco and tobacco products</td>
<td>USD 19.00/kg</td>
</tr>
<tr>
<td>Cigarette lighters</td>
<td>12% of the excise value</td>
</tr>
<tr>
<td>Smoking pipes</td>
<td>12% of the excise value</td>
</tr>
<tr>
<td>Arms and ammunition</td>
<td>200% of the excise value</td>
</tr>
<tr>
<td>Motor cars and small passenger vehicles (with an excise value exceeding USD 70,000)</td>
<td>35% of the excise value</td>
</tr>
<tr>
<td>Private boats and aircrafts</td>
<td>20% of the excise value</td>
</tr>
</tbody>
</table>

Note that the excise value of excisable goods imported into Timor-Leste is the total of the customs value and any import duty imposed. The excise value of excisable goods manufactured in Timor-Leste is their fair market value at the time of removal from the manufacturer's warehouse.

Goods on the above list are excisable goods, other than:

• goods imported into Timor-Leste that are exempt from import duty, or
• goods exported from Timor-Leste within 28 days after their production or import, as long as the taxpayer liable to excise tax submits to the Banking and Payments Authority documentary proof of the export of goods.

**Property taxes**

There are no taxes on property in Timor-Leste.

**Transfer taxes**

There are no transfer taxes in Timor-Leste.
Timor-Leste

**Stamp duties**
There is no stamp duty in Timor-Leste.

**Branch income**
The taxable income of a non-resident carrying out business activities through a PE is calculated by reference to:

- the income attributable to the PE
- any sales of goods or merchandise of the same or similar kind as those sold through the PE, and
- any other business activities carried on in Timor-Leste of the same or similar kind as those effected through the PE.

Other principles for determining the taxable income of a PE in Timor-Leste include the following:

- Profit is calculated as if the PE was a Timor-Leste entity engaged in the same or similar activities under the same or similar conditions and dealt with wholly independently from the non-resident person of which it is a PE.
- Subject to this, deductions may be claimed for expenses incurred for the purposes of the business activities of the PE, including head office expenditures, whether incurred in Timor-Leste or elsewhere.
- No deductions may be claimed for amounts paid or payable by the PE to its head office or to another PE of the non-resident person, other than towards the reimbursement of actual expenses incurred by the non-resident person to third parties, by way of:
  - royalties, fees, or other similar payments
  - compensation for any services (including management services) provided to the PE, and
  - interest on money lent to the PE (except for banking businesses).

**Income determination**

Taxable business profits are determined on the basis of net profit for financial accounting purposes in accordance with International Financial Reporting Standards (IFRS), subject to certain modifications in the Tax and Duties Act (TDA). In general, income is assessable when ‘receivable’, while expenses are deductible when ‘payable’. A taxpayer with turnover of less than USD 100,000 may, however, elect to pay tax on a cash basis.

Gross income is defined widely to mean “any realised increase in economic capacity in whatever name or form which can be used for consumption or to increase the wealth of the taxpayer other than wages that are subject to Wages Income Tax (WIT)”.

The gross income for a tax year is the total amount earned by the taxpayer, including, but not limited to, business income, property income, lottery prizes or awards, and refunds of tax payments previously deducted as an expense.
Inventory valuation
There are no specific provisions dealing with inventory valuation in Timor-Leste. This is because a deduction is allowed for the cost of inventory incurred during the tax year even if the inventory is on hand at the end of the year.

Capital gains
Gains and losses arising from the alienation of assets are generally assessable and deductible as ordinary income and subject to tax at the standard CIT rate.

Dividend income
Dividends are tax exempt in the hands of Timor-Leste residents.

Interest income
Interest income is generally assessable as ordinary income and subject to tax at the standard CIT rate.

Exempted income
The following income is tax exempt:

- Any aid or donations, provided that the donor and recipient do not have any business or control relationship.
- Gifts received by a religious, educational, or charitable organisation, provided that the donor and recipient do not have any business or control relationship.
- Assets (including cash) received by a resident in exchange for shares or a capital contribution.
- Any amount paid by an insurance company to a resident in connection with accident or life.

Foreign income
Under the worldwide income principle, a resident taxpayer is required to calculate income that is not only Timor-Leste sourced but also foreign sourced. In the case that the foreign-sourced income is taxed at source, Timor-Leste allows a foreign tax credit for the particular tax year (see Foreign tax credit in the Tax credits and incentives section).

Deductions
The taxable income of residents and non-residents who have a PE in Timor-Leste shall be determined on the basis of gross income reduced by:

- expenditure and losses incurred from the alienation of assets or the discharge of debt in the conduct of a taxable business activity
- expenditure incurred in deriving any other amounts included in gross income
- any loss on disposal of an asset other than assets held on personal account
- contributions to an approved pension fund, and
- bad and doubtful debts (subject to various tests—see Bad debt below).

Depreciation and amortisation
'Depreciable assets' include any tangible movable property with a useful life exceeding one year that is wholly or partly used for taxable business activities. 'Intangible assets' include property, other than tangible movable property or immovable property, with a useful life exceeding one year that is used for taxable business activities.
Timor-Leste

There are provisions for election of either straight-line or double-declining methods, the pooling of assets, and de minimis exceptions. However, the rate of tax depreciation/amortisation (for non-petroleum operations) is set at 100%, meaning that taxpayers are, in effect, entitled to a full and up-front deduction. In circumstances where the asset is only partly used for the conduct of taxable business activities, the deduction is reduced by the proportion of its non-taxable business use.

Goodwill
There are no specific provisions dealing with the treatment of goodwill. We expect that the treatment should follow that under IFRS.

Start-up expenses
There are no specific provisions dealing with the treatment of start-up expenses. However, assuming that the start-up expense is incurred to derive income, we expect that start-up expense should be deductible.

Interest expenses
Interest expenditure is not deductible unless incurred by a financial institution.

Bad debt
Bad debts are not deductible without passing all of the following tests:

- The debt was previously included in taxable income.
- The debt was written off in the accounts during the relevant tax year.
- There are reasonable grounds for believing that the debt will not be recovered.

The above tests do not apply to banks, which are entitled to deduct provisions for doubtful debt where determined in accordance with the prudential requirements prescribed by instruction of the Banking and Payments Authority.

Charitable contributions
Donations are not deductible if the donations are exempt from income tax in the hands of the recipient.

Fines and penalties
Penalties for violation of law and regulation are not deductible.

Taxes
Timor-Leste or foreign income tax is not deductible.

Deductions not allowed or conditional deductions
The following expenses are also not deductible to a resident or non-resident with a PE in Timor-Leste:

- The distribution of profits in whatever name or form.
- Expenses incurred for the personal benefit of a taxpayer, a taxpayer’s dependents, shareholders, partners, or members.
- Reserves, other than as provided for under the TDA.
- Excessive compensation paid by a legal person to a member of the legal person, or paid between associates.
- Salaries paid to a partner in a partnership.
- A bribe, or any similar payment.
- Expenditure or losses incurred to the extent recoverable under an insurance policy or a contract of indemnities.
**Net operating losses**
Losses from previous years may be carried forward indefinitely. However, the carried forward loss from the disposal of assets may only be utilised against gains arising from the disposal of assets. Foreign-sourced losses may only be offset against foreign-sourced income of a particular country.

**Payments to foreign affiliates**
Excessive payments or compensation to ‘members of a legal person’ or payments between associates for work performed should not be deductible. The TDA, however, does not elaborate on the meaning of ‘excessive’.

---

**Group taxation**
Companies, etc. are taxable on a stand-alone basis (i.e. there is no grouping or ability to transfer tax losses).

**Transfer pricing**
Excessive payments or compensation to ‘members of a legal person’ or payments between associates for work performed should not be deductible. The TDA, however, does not provide specific guidance on how to determine arm’s-length pricing on related-party transactions or any other general transfer pricing principles.

**Thin capitalisation**
There are no ‘thin capitalisation’ or similar rules in Timor-Leste (noting that interest is not deductible, except for financial institutions).

---

**Tax credits and incentives**

---

**Foreign tax credit**
A resident taxpayer is entitled to a credit for any foreign income tax paid in respect of foreign-source income. The foreign tax credit is calculated separately for each foreign country from which income is derived by a taxpayer. The value of such tax credits is limited to the value of the Timor-Leste income tax payable on that income. There is no deduction or carryforward of any excess foreign tax credit.

---

**Withholding taxes**
WHT is imposed on the following payments by residents to a resident:

<table>
<thead>
<tr>
<th>Type of payment</th>
<th>WHT rate (%)</th>
<th>Final/non-final tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>0</td>
<td>Final</td>
</tr>
<tr>
<td>Interest</td>
<td>0</td>
<td>Not final</td>
</tr>
<tr>
<td>Royalties</td>
<td>10</td>
<td>Not final, except where paid to an individual</td>
</tr>
<tr>
<td>Rent (land and building)</td>
<td>10</td>
<td>Not final, except where paid to an individual</td>
</tr>
<tr>
<td>Prize and winnings</td>
<td>10</td>
<td>Final</td>
</tr>
<tr>
<td>Construction/building activities</td>
<td>2</td>
<td>Final</td>
</tr>
<tr>
<td>Construction consulting services</td>
<td>4</td>
<td>Final</td>
</tr>
</tbody>
</table>
Timor-Leste

<table>
<thead>
<tr>
<th>Type of payment</th>
<th>WHT rate (%)</th>
<th>Final/non-final tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Air and sea transportation</td>
<td>2.64</td>
<td>Final *</td>
</tr>
<tr>
<td>Mining and mining support services</td>
<td>4.5</td>
<td>Final *</td>
</tr>
</tbody>
</table>

* The default position is that such amounts will be a final tax. The income recipient can elect to have these payments for services not subjected to final tax by submitting a notification letter to the Timor-Leste Revenue Service.

Payments of Timor-Leste-source income made by a resident to a non-resident are subject to WHT at 10%. Timor-Leste has not entered into any DTTs.

Where WHT is applied as a final tax, the taxed income is not included in the recipients' taxable income for income tax purposes. Accordingly, expenses incurred in deriving income that is subject to final tax are not deductible for income tax purposes.

**Tax administration**

**Taxable period**
The standard tax year is the calendar year, although different accounting year-ends can be granted upon application.

**Tax returns**
CIT returns are to be filed annually by the 15th day of the third month following the year end.

Service tax, excise tax, sales tax, and WHT are to be filed monthly by the 15th day of the following month.

**Payment of tax**
CIT due shall be settled to the Banking and Payments Authority or another entity nominated by the Timor-Leste Revenue Service by the date of filing (see above).

Service tax, excise tax, sales tax, and WHT should be settled to the Banking and Payments Authority or another entity nominated by the Timor-Leste Revenue Service by the 15th day after the end of the following month.

**Penalties**
If a taxpayer fails to deliver the tax form on time, it shall be liable to an additional tax of USD 100. If a taxpayer fails to deliver all or part of any tax due by the due date, that taxpayer shall be liable to an additional tax of 5% of the amount due plus an additional 1% of the tax due on the 15th day of each month following the due date and:

- if the failure was due to gross carelessness on the part of the person, further additional tax of 25% of the tax that remains unpaid, or
- if the failure was due to a deliberate attempt to avoid payment of tax, further additional tax of 100% of the tax that remains unpaid.

If a taxpayer has understated the tax due in the tax form, that taxpayer shall be liable to an additional tax of 15% and:

- if the understatement was due to gross carelessness on the part of the taxpayer, further additional tax of 25% of the tax understated, or
• if the understatement was due to a deliberate attempt to avoid payment of tax, further additional tax of 100% of the tax understated.

**Tax audit process**
Assessments may occur upon the following:

• The delivery of a tax return form and payment.
• After receipt of a return where the Commissioner believes a return is incorrect.
• Where a taxpayer fails to file a return.

Assessments may be amended according to the following events:

• By the taxpayer upon delivery to the Commissioner of an amended assessment.
• Via a taxpayer request to the Commissioner.
• Via specific amendment by the Commissioner.

**Statute of limitations**
The Timor-Leste Revenue Service may issue an assessment notice or amend an assessment notice only within five years from the date of filing of the return. In the event of a deliberate tax evasion or fraud, there is no time limit for the issuance of an assessment notice.

---

**Other issues**

**Taxation of petroleum operations**
The taxation of petroleum operations in Timor-Leste is partly covered by the TDA. However, the TDA operates only to modify the taxation of petroleum activities pursuant to a number of legacy tax regimes. These modifications apply to contractors, subcontractors, and any other parties receiving income from the supply of goods or services to a contractor or sub-contractor.

A contractor is defined as a person with whom the responsible Ministry or Designated Authority, as the case may be, has made a petroleum agreement. A sub-contractor includes any person supplying goods or services directly or indirectly to a contractor in respect of petroleum operations.

Specific provisions for the taxation of petroleum operations include:

• A CIT rate for contractors of 30% on taxable income, while sub-contractors will generally be taxed on a final WHT basis at rate 6% *(although see JPDA below).*
• No tax on branch profit remittances *(although see JPDA below).*
• Where ‘net receipts’ exceed specified levels, an SPT can apply.
• The ‘ring fencing’ of income and expenditure within the contract area.
• Modified deductibility rules, including around the deductibility of interest for contractors and a modified depreciation regime.
• A specific WHT regime.
• A specific transfer pricing and associated anti-avoidance provision.

**Special tax regime for the Joint Petroleum Development Area (JPDA)**
The JPDA is a geographical area in the Timor Sea known to be rich in hydrocarbon deposits. The JPDA covers the ‘Annex F’ Production Sharing Contracts (PSCs) *(see below)* known as *Bayu-Undan* (including the Elang Kakatua and Kakatua North fields) PSCs, and Greater Sunrise. The JPDA also covers a number of non-Annex F PSCs.
Pursuant to the Timor Sea Treaty (TST), the JPDA is technically within the taxation jurisdiction of both in Timor-Leste and Australia and therefore falls under the joint control and management of Timor-Leste and Australia. ‘Annex F’ of the TST refers to the PSCs with commercial discoveries at the time of the TST signing and so imbeds a number of historical tax principles.

Control of the JPDA is exercised by a ‘Joint Authority’ containing representation from Australia and Timor-Leste. The petroleum activities covering the exploration, development, processing, transportation, and marketing of hydrocarbons are carried out pursuant to PSCs entered into between the designated authority and the oil company in question.

Under the TST, revenue from the JPDA PSCs is split 90% for Timor-Leste and 10% for Australia. Accordingly, for tax calculation purposes, business profits or losses of an entity carrying on business in the JPDA are reduced by the ‘reduction percentage’ of 90% for Timor-Leste and 10% for Australia. This effectively means that the tax rates applied by Timor-Leste and Australia are at 90% and 10% of their respective national level.

For Timor-Leste, these tax rates are generally 30% for all participants with PEs and an 8% or 20% final WHT for non-residents (according to the PSC). A 10% value-added tax (VAT) also applies.

The tax regime as outlined under ‘Taxation of petroleum operations’ above also applies in the JPDA (except for ‘Annex F’ PSCs). This is, however, with a number of important modifications, including the exclusion of the service tax, excise tax, sales tax, import duty, and WIT.
Significant developments
There have been no significant corporate tax developments in Trinidad and Tobago during the past year.

Taxes on corporate income
A Trinidad and Tobago resident corporation is taxed on worldwide income. A non-resident company engaged in business in Trinidad and Tobago is taxed only on income directly or indirectly accruing in or derived from Trinidad and Tobago.

The standard corporation tax rate is 25%, but this varies in the case of certain classes of companies. The current corporation tax rates are as follows:

<table>
<thead>
<tr>
<th>Type of company</th>
<th>Corporation tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ordinary companies</td>
<td>25</td>
</tr>
<tr>
<td>Petrochemical companies</td>
<td>35</td>
</tr>
<tr>
<td>Life insurance companies</td>
<td>15</td>
</tr>
<tr>
<td>Petroleum production companies (petroleum profits tax)</td>
<td>50</td>
</tr>
<tr>
<td>Petroleum production companies (deep sea)</td>
<td>35</td>
</tr>
</tbody>
</table>

Business levy
Corporations are subject to a business levy at the rate of 0.2% of gross revenue or receipts where the levy exceeds the corporation tax liability. Exemption is available for certain companies, including petroleum companies and companies whose annual turnover is less than 360,000 Trinidad and Tobago dollars (TTD). The levy is a non-deductible expense for corporation tax purposes.

Green fund levy
A green fund levy of 0.1% on gross income is applicable to companies and partnerships doing business in Trinidad and Tobago. This levy is payable quarterly and is neither a deduction in computing chargeable income nor a credit against corporation tax due.

Unemployment levy
Only petroleum companies remain liable to the unemployment levy, at the rate of 5% of taxable profits. No set-off for prior year losses is permitted in computing the liability.

Supplementary petroleum tax (SPT)
SPT is chargeable on the gross income (derived from the sale of crude oil) less royalties and overriding royalties paid on the crude oil sold. The tax is computed separately in
Trinidad and Tobago

respect of land and marine operations and is a quarterly tax based on the actual gross income for each quarter.

The SPT is deductible in arriving at profits subject to petroleum profits tax.

**Corporate residence**

Corporate residence is determined by reference to the location of the central management and control of the business of a company.

**Permanent establishment (PE)**

A non-resident company is subject to corporation tax on its income derived from trading within Trinidad and Tobago. A company is deemed to be engaged in or carrying on trade or business in Trinidad and Tobago if it has an office or place of business or has a branch or agency within Trinidad and Tobago. The local legislation does not make any reference to the term ‘permanent establishment’; however, this term is used generally in the treaty context. Subject to the terms of specific double taxation treaties (DTTs), a non-resident company will have a PE in Trinidad and Tobago where:

- it has a fixed place of business in Trinidad and Tobago through which the business of the company is wholly or partly carried on, or
- it has an agent acting on behalf of the company and that agent has the authority to bind the company.

The term ‘fixed place of business’ has been generally defined to include a place of management, a branch, office, factory, a workshop, an installation or structure for the exploration of natural resources, or a building, construction, or installation project.

Most treaties outline circumstances under which a company will not be deemed to have a PE, and these include where the activities of the company are merely of a preparatory or auxiliary nature.

**Other taxes**

**Value-added tax (VAT)**

VAT is applicable to a wide range of goods and services. The standard rate applicable to commercial supplies is 15%.

Most food items and agricultural supplies are zero-rated, as are crude oil, natural gas, and exported goods and services. Hotel accommodation and yachting services to non-residents are zero-rated.

A number of services, including financial services, real estate brokerage, residential rentals, and educational services, are exempt. However, certain financial services are subject to a transaction tax at a rate of 15%. Imported inputs of highly capital-intensive manufacturers are exempt from VAT.

The VAT registration threshold for companies making commercial supplies is TTD 360,000 for a 12-month period.
Customs duties
Customs duties are imposed at varying rates on imports and manufactured goods according to classification in Schedules to the Customs Act. The basis is the cost, insurance, and freight (CIF) value of the goods at the time of import. However, there is a provision for exemptions in relation to specific goods.

Excise taxes
Excise taxes are imposed at varying rates on certain manufactured goods, including tobacco, alcohol, and petroleum products.

Property taxes
At present, no property tax is imposed in Trinidad and Tobago.

Stamp duty
Stamp duty is levied on instruments of all types (e.g. deeds of conveyance, mortgages, debentures, trust deeds, leases, insurance policies, annuity policies, agreements, share transfers). The rate of stamp duty varies from TTD 25 on a trust deed to up to 10% on property conveyances.

Hotel accommodation tax
Hotels are subject to a hotel accommodation tax at a rate of 10% of the value of the accommodation.

Insurance premium tax
A tax at the rate of 6% has been imposed on insurance premiums in respect of general insurance contracts. Life insurance and reinsurance premiums are exempt.

Branch income
A branch is subject to Trinidad and Tobago taxation on all income directly or indirectly accruing in or derived from Trinidad and Tobago. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction of corporation tax and reinvestments, are subject to withholding tax (WHT) at the rate of 5%. This may be varied by the provisions of any applicable DTTs.

Income determination

Inventory valuation
Inventories are generally stated at the lower of cost or market value. Cost may be determined by the first in first out (FIFO) or the average cost method. The last in first out (LIFO) and base stock methods are not generally accepted for tax purposes.

Capital gains
Gains on the disposal of chargeable assets within 12 months of acquisition are subject to tax at standard corporation tax rates. Capital gains are not otherwise taxable, except for the application of the balancing allowance on depreciable assets. See Depreciation in the Deductions section for capital gains information on the sale of tax-depreciable assets.

Dividend income
Dividends received by a Trinidad and Tobago company from both domestic subsidiaries and other domestic corporations are exempt from corporation tax and business levy but are subject to green fund levy.
Trinidad and Tobago

**Stock dividends**
A Trinidad and Tobago corporation can distribute a dividend of common stock (bonus issue) proportionately to all resident common stockholders on a tax-free basis.

**Interest income**
Interest income received by a Trinidad and Tobago company is generally taxable.

**Foreign income**
A company resident in Trinidad and Tobago is subject to tax on its worldwide income. There is no deferral regime in Trinidad and Tobago.

---

**Deductions**

**Depreciation**
Tax depreciation rates (wear-and-tear allowances) have been standardised by statute. Fixed assets are to be classified into one of four classes:

<table>
<thead>
<tr>
<th>Asset class</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Class A: Buildings and improvements</td>
<td>10</td>
</tr>
<tr>
<td>Class B: Motor vehicles, furniture and fittings, plant and machinery</td>
<td>25</td>
</tr>
<tr>
<td>Class C: Heavy equipment, motor lorries, trucks, and computer equipment</td>
<td>33.3</td>
</tr>
<tr>
<td>Class D: Extra heavy equipment, airplanes</td>
<td>40</td>
</tr>
</tbody>
</table>

The allowance will be calculated at the rate applying to aggregate expenditure incurred on assets within the class on a declining-balance basis.

Accelerated tax depreciation is allowed to manufacturers in the form of an initial allowance at the rate of 90% on capital expenditure on plant and machinery. The allowance is to be claimed in the year that the asset is first brought into use. For those companies engaged in the production of sugar, petroleum, or petrochemicals, or enjoying concessions under the Fiscal Incentives Act, the rate is 20%.

Gains on the sale of tax-depreciable assets are taxable as ordinary income (i.e. a balancing charge) but only when the written-down value of the assets of a class goes into credit. Prior to this, the proceeds of sale are credited to the particular class, thereby reducing the written down value of the class. Tax depreciation is not required to conform to book depreciation.

**Petroleum operations**
A company engaged in the petroleum production business is entitled to capital allowances on tangible costs and intangible drilling and development costs as follows:

- Tangible costs: Initial allowance at 20% and annual allowance at 20% under the straight-line method.
- Intangible costs: Initial allowance at 10% and annual allowance at 20% under the reducing-balance method.

Allowances in respect of petroleum operations are granted from the earlier of (i) the year following the year in which the expenditure was incurred or (ii) the year in which commercial production commences (save that in the case of exploration activity the allowances are to commence from the year incurred).
Goodwill
Goodwill expense is generally not allowable in arriving at chargeable income.

Start-up expenses
No specific rules exist in respect of start-up expenses, but, generally, these expenses are not deductible.

Interest expenses
Interest expenses incurred by a company in the production of its income are generally allowed as deductions. However, in the case of interest payable or paid by the company, there are certain restrictions that exist in the taxing Acts, as well as practice by the tax authority, that could restrict a company’s ability to deduct interest paid or payable in its computation of tax for a particular year of income. The criteria laid down by the legislation for the deductibility of interest are:

- The sums borrowed are wholly and exclusively incurred in the production of income.
- The interest is revenue in nature.
- The interest income earned is either chargeable to tax or exempt under the Trinidad and Tobago legislation.
- Where the interest payment is being made to a non-resident, the payer has accounted for and paid over WHT to the Board of Inland Revenue (BIR).

Bad debt
A specific provision for bad debt will be deductible for tax purposes where:

- It is in respect of a revenue expenditure.
- It is made in accordance with acceptable accounting principles.
- It is specific.
- It becomes bad in the year in which the claim is made.

Charitable contributions
Charitable contributions under deeds of covenant to approved charities are deductible, up to a maximum of 15% of total income.

Fines and penalties
Fines and penalties are not generally deductible.

Taxes
Other than SPT, taxes or levies are not generally deductible in arriving at taxable profit.

Other significant items
Contributions by local insurance companies to ‘catastrophe reserve funds’ are deductible for tax purposes, up to the value of 20% of net premium income from property insurance business.

Net operating losses
A trading loss may be carried forward indefinitely to be set-off against future profits. Loss carrybacks are not permitted.

A limited form of group loss relief exists, whereby current year losses may be surrendered to a claimant company within a group, except that the claimant’s tax liability cannot be reduced by more than 25%. Such companies must be resident in Trinidad and Tobago.
Trinidad and Tobago

Payments to foreign affiliates
A corporation engaged in business in Trinidad and Tobago may claim a deduction for royalties, interest, and service charges paid to foreign affiliates, provided the appropriate WHT is deducted and properly accounted for. For interest to be deductible for tax purposes, the funds borrowed must have been utilised in the production of income and the recipient must be subject to tax in Trinidad and Tobago or otherwise specifically exempt from local tax.

Deduction for management charges (as this term is defined) paid to a non-resident is restricted to the lower of the management charges or 2% of deductible outgoings and expenses, exclusive of the charges. Tax depreciation allowances may not be treated as an expense for this purpose. WHT may also be applicable to management charges paid to non-resident persons.

Group taxation
There is no provision for group taxation in Trinidad and Tobago; however, a limited form of group loss relief is available (see Net operating losses in the Deductions section).

Transfer pricing
There are no specific transfer pricing rules in Trinidad and Tobago. However, the legislation empowers the tax authority to disregard any transactions that it views as artificial or fictitious. This general power has been utilised by the tax authority in dealing with related parties and large multinational companies to evaluate whether transactions are at arm’s length.

Thin capitalisation
There are no thin capitalisation rules in Trinidad and Tobago.

Tax credits and incentives
Foreign tax credit
Double taxation is avoided or mitigated by means of foreign tax credits.

Tax holidays
Fiscal Incentives Act, 1979
An approved enterprise, which must be a locally incorporated resident corporation, may be granted an exemption from corporation tax for a period of up to ten years, depending on the category under which it is approved. Exemption may be total or partial. Subject to approval, profits may be distributed tax free to shareholders, except in the case of certain non-resident shareholders, where the relief is restricted to the amount of tax that exceeds their liability in their country of residence. Net losses during the tax holiday period (i.e. the excess of total losses over total profits) may be carried forward for set-off without limitation for five years from the end of the tax holiday period, after which the normal set-off provisions for losses apply. As of 1 January 2007, the tax holiday in respect of corporation tax is no longer granted.

Approved tourism projects
Under the Tourism Development Act 2000, approved tourism development projects, including hotels, are granted a tax holiday for periods of up to seven years. In addition, a carryover from a tax exemption period is permitted of any loss arising out of the
operation or renting of an approved tourism project to be written off against profits in accordance with normal income tax loss provisions, subsequent to the tax holiday period. An approved tourism project means a project declared to be so by the government.

Approved mortgage and other companies
The profits of an approved company are exempt from corporation tax. The exempt profits, when distributed to shareholders, are exempt from corporation tax and income tax. Expenses incurred in the course of the approved mortgage business remain fully deductible.

Business expansion scheme
The business expansion scheme was introduced in 1988 to allow approved small companies carrying on business in a regional development area and companies carrying out certain approved activities a tax credit of 15% of their chargeable profit. This scheme is to be restructured to encourage both individual and corporate investors to invest in venture capital companies by allowing a ‘tax rebate’ on their investment. As of 2006, the tax credit has been removed and replaced by a five-year tax holiday.

Free Zone
The profits of an approved company operating in a designated Free Zone are free from corporation tax. In addition, payments to non-residents are free of WHT. Approved activities include manufacturing.

Other allowances/incentives

Promotional expenses
Promotional expenses incurred by local firms to promote the expansion of existing markets and/or the creation of new ones for the export of specified services or locally produced goods are tax deductible as an expense at 150% of the actual outlay. Tax-deductible promotional expenses are defined as those expenses incurred in respect of specified services or goods produced in Trinidad and Tobago. This includes such items as advertising in foreign markets and participation in trade fairs and missions.

Scholarship allowance
Companies can deduct the actual expenses incurred in granting scholarships to nationals who are not employees, directors, or associates of directors of the company for tertiary education.

Production company allowance
An allowance equal to 150% of actual expenses incurred in respect of the company’s own audio, visual, or video productions for educational or local entertainment, or local culture, is available.

Allowances are granted in respect of each of the following activities, based on the actual expenditure incurred but not exceeding TTD 2 million in aggregate:

- Art and culture allowance.
- Sportsman/sporting activity allowance.
- Audio, visual, or video production allowance.

Child care/Home work facility
A deduction is allowed for the actual cost incurred in setting up a facility for dependents of employees who are minors, up to a maximum of TTD 500,000 for each facility, subject to an aggregate sum of TTD 3 million in any year.
Trinidad and Tobago

Wear and tear allowances
A 130% wear and tear allowance is available for expenditure incurred in compressed natural gas (CNG) related initiatives.

A 150% wear and tear allowance is available on the expense incurred in relation to solar heaters, wind turbines, and photovoltaic systems.

Allowance for purchase of certain equipment
An allowance of 50% of the expenditure incurred on the purchase of equipment for the retail dispensing of CNG and liquefied natural gas (LNG) is available, up to a maximum of TTD 2 million per station.

**Withholding taxes**

WHT is imposed at varying rates up to 15%, depending on the nature of the payment, the status of the payee, and the applicability of DTTs. The tax treaty rate in some instances is now higher than the statutory rate. In such cases, the lower statutory rate applies. The rates below have been adjusted to reflect these reductions:

### Notes

1. Individuals.
2. Corporations. The lesser rate applies to parent companies.
3. The lesser rate applies to companies, other than investment companies, that control at least 10% of the voting power.
4. The rate is 10% of the gross amount if interest is paid to a resident of France; it is 0% if the interest is paid to the French government or to any agency or instrumentality of the French government.
Trinidad and Tobago

5. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Germany, 0% where interest is paid to certain stated governmental institutions, and 15% of the gross amount in all other cases.

6. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Sweden, 0% where interest is paid to certain specified governmental institutions, and 15% of the gross amount in all other cases.

7. The rate is 15% of the gross amount if the interest is paid to a bank or financial institution in the United States (US) that does not have a PE in Trinidad and Tobago, 0% where the interest is paid to the US government or to any agency or instrumentality wholly owned by the US government, and 20% of the gross amount in all other cases.

8. The rate applies to copyright royalties and similar payments.

9. The rate applies to royalties paid in respect of the operations of mines or quarries or of the extraction or removal of natural resources.

Tax administration

Taxable period
The tax year is the calendar year. Companies are assessed by reference to their accounting period, which for tax purposes cannot exceed 12 months other than in the year of cessation of the business.

Tax returns
The taxpayer is required to file a tax return with the BIR by 30 April following the end of the fiscal period. An automatic six-month grace period is allowed, following which a penalty is imposed of TTD 1,000 for every six months or part thereof that the return remains unfiled.

Payment of tax
Corporation tax, business levy, and green fund levy are payable quarterly in advance on 31 March, 30 June, 30 September, and 31 December. Any balance of tax due is payable on or before 30 April of the following year. Instalments of corporation tax are based on an estimate of the current year’s liability or on the actual chargeable profits for the previous year, whichever is greater. If the current year’s estimate is lower, the company may apply to the BIR to reduce its quarterly instalment. The levy liabilities are based on the actual receipts for the quarter.

Tax audit process
Tax audits are conducted by the BIR. There is no specific timeframe to conduct an audit, but, generally, companies are selected for varying reasons, including where large refunds are claimed. The BIR usually notifies the company of the intended audit and requests that the books and records be made available for inspection. An assessment is generally raised after the audit.

Statute of limitations
A company carrying on business in Trinidad and Tobago is required to keep proper accounts and records and is required to retain these accounts for a period of at least six years after the completion of the transactions, acts, or operations to which they relate or three years after the filing of its return (whichever is later).

Topics of focus for tax authorities
The following issues are currently the focus of the tax authorities:

- Transfer pricing.
- CARICOM tax planning structures.
- Management and other fees paid to non-resident persons.
**Tunisia**

**PwC contact**

**Significant developments**

There have been no significant corporate tax developments in Tunisia during the past year.

**Taxes on corporate income**

Tunisian-resident companies are subject to corporate tax in Tunisia on the basis of profits generated from permanent establishments (PEs) located in Tunisia and those attributable to Tunisia by virtue of a double taxation treaty (DTT). Non-Tunisian-resident companies are subject to corporate tax on the basis of their Tunisian-sourced income.

PEs of non-Tunisian-resident companies are subject to corporate tax in the same way and under the same conditions as Tunisian-resident companies. However, certain particularities, related mainly to deductions, exist (see the Branch income section).

Corporate tax is also due by non-resident, non-PE companies on Tunisian-sourced income through withholding taxes (WHTs).

Corporate tax is broadly levied on the total net income resulting from the statutory financial statements of the company, duly adjusted according to the specific tax rules.

Positive/negative items of income are taxed/deducted based on the accrual basis. Income items accruing in a tax period where the above principle is not met are not allowed for tax deduction nor taxed in that tax period. Tax deduction/taxation is correspondingly deferred to the future tax periods where the principle will be met.

Income items have to be certain in their occurrence and objectively determined or determinable in their amount.

**Corporate tax rates**

The general corporate tax rate is 30%. However, specific rates are foreseen for specific sectors of activity. Indeed, corporate tax is due at the rate of:

- 10% for:
  - companies carrying out craft activities, agricultural and fishing activities, and fitting out fishing boats
  - trading groups of retail businesses organised as service cooperatives, governed by the general cooperation legislation
  - service cooperatives formed between producers for the wholesale of their production
Tunisia

- consumer cooperatives governed by the general cooperation legislation, and
- wholly exporting companies created as of 1 January 2013 that will enter into production no later than December 2014.

- 35% for:
  - certain domestic financial institutions
  - offshore financial institutions governed by the code related to financial services destined to non-residents, and this only for the benefits derived from services provided to non-resident persons
  - investment companies
  - insurance and reinsurance companies
  - debt collection companies
  - telecommunication companies
  - companies operating in the oil and gas service field
  - companies operating in the production and the transport of hydrocarbons and governed by particular conventions, as well as companies operating in the transfer of hydrocarbons via pipeline, and
  - companies operating in the oil refining sector and the wholesale of hydrocarbon products.

**Minimum corporate tax**

A minimum corporate tax is due at the rate of 0.1% of the local turnover, including value-added tax (VAT), in case:

- the company realises losses or
- the corporate tax due at the rate of 10%, 30%, or 35% is less than the minimum corporate tax of 0.1% of the local turnover, including VAT.

The minimum corporate tax is not due by companies established in the regional development zones during the period of tax holidays. These latter are fixed by decree.

**Local income taxes**

For a description of local taxes, see Vocational training tax, Local authority tax (LAT), and Hotels tax in the Other taxes section.

**Corporate residence**

A company is tax resident in Tunisia if it is registered or has its effective place of management therein.

**Permanent establishment (PE)**

No definition of PE is given by the Tunisian domestic law. In practice, the Tunisian tax authorities refer to the definitions given by DTTs.

**Other taxes**

**Valued-added tax (VAT)**

**VAT scope and rates**

VAT is levied under the Tunisian VAT Code and is due on all transactions taking place in Tunisia. The sale of goods is considered as taking place in Tunisia and thus subject to VAT if the goods sold are delivered in Tunisia. The sale of services is considered as
taking place in Tunisia and thus subject to VAT if the services sold are exploited or used in Tunisia.

The standard rate of VAT is 18%. Lower rates of 6% and 12% apply to specifically designated operations.

Some operations, products, or services are out of the scope of VAT in Tunisia, and some others are expressly exempt from VAT.

Some goods and services may be acquired VAT free, based on a certificate delivered for the purpose by the relevant tax authorities. This exemption is granted mainly to wholly exporting companies, oil and gas companies, their contracts, and their subcontractors.

Registration for VAT purposes may be either obligatory or optional.

Voluntary registration is allowed where persons:

- carry out activities that are outside the scope of the Tunisian VAT, in which case the option has to be a full option, which means that all the activities carried out by these persons will be subject to VAT, or
- carry out operations that are exempt from VAT and that are destined for export, or supply products and services that are exempt from VAT to persons liable to VAT, in which case the option may be a partial or a full option.

Output VAT
Output VAT is calculated on the basis of the amount of the invoice excluding VAT.

Input VAT
Individuals and companies that are subject to VAT may deduct the input VAT incurred on the purchase of goods and services necessary to carry out activities subject to VAT.

VAT declaration
VAT is declared and paid on a monthly basis.

Refunds
If the input VAT exceeds the output VAT, the VAT credit resulting from the difference between the input VAT and the output VAT may be reimbursed on the basis of a written request made to the tax authorities.

The VAT credit is refundable if it arises from:

- exportation operations of goods and services, sales made to clients allowed to acquire goods and services VAT-free, and WHT made on the remunerations paid to companies that are neither resident nor established in Tunisia (such VAT credit is refundable if it is shown at least on one monthly tax return)
- investments destined for the carrying out of new projects as provided for in the Tunisian Incentives Investment Code (such VAT credit is refundable if it is shown on at least three successive monthly tax returns)
- suspension of activity (such VAT credit is refundable after a tax audit), or
- other operations (such VAT credit is refundable if it is shown on at least six successive monthly tax returns).

In order to benefit from the refund of VAT credits, the taxpayer has to file supporting documents, such as declarations relating to exportation of goods, documents proving
Tunisia

that the service rendered by the Tunisian taxpayer was used or consumed outside Tunisia, authorisations to sell VAT-free, and WHT certificates.

To benefit from the refund of VAT credits, the taxpayer must already have submitted all tax returns and paid all taxes due at the time of submission of the request for the refund.

An advance payment of 15% of the VAT credit is to be paid to the taxpayer as soon as the taxpayer presents the request for refund if the VAT credit arises from operations other than export, suspension of activity, and operations of companies that are neither resident nor established in Tunisia. This rate is to be increased to 50% if the taxpayer is a company of which the financial statements are subject to legal audit, and to 100% if the VAT credit is originated from exports.

Time limits
The taxpayer may claim the VAT credit within three years starting from the date from which the VAT credit becomes refundable.

Customs duties/Import tariffs

Import VAT
Importation of goods and services are subject to import VAT unless:

- the imported good is expressly exempt, such as:
  - Fresh milk, uncondensed and unsweetened, whether skimmed or full-fat.
  - Milk flour.
  - Devices intended for use by physically disabled persons.
  - Pure-bred breeding animals.
  - Equipment with nothing similar manufactured locally, expressly designated.
  - Boats destined to maritime navigation and fishing, other pleasure boats.
- the importer benefits from the acquisition of goods necessary to its activity VAT free (e.g. oil and gas companies).

Customs duties
Customs duties are due on importations other than those made from the European Union (EU).

Some equipment expressly designated by the Tunisian domestic law is exempt from customs duties, whether imported from EU countries or not.

Customs duties are not due in cases where the importer is expressly exempt, even if the goods are imported from outside the European Union.

For temporary importation of equipment, the customs duties due are to be calculated in proportion to the period spent in Tunisia. 1/60 of the total customs duties are due per month spent in Tunisia.

Excise taxes
There are no provisions for excise taxes in Tunisia.

Property taxes
A real estate tax (RET) is calculated by the relevant municipalities and is notified annually to the taxpayers at the beginning of the civil year.
For companies subject to the payment of the local authority tax (LAT) (see below) and in case the LAT paid over the year is less than the RET notified by the municipalities, then the differential is due and is payable as complementary LAT. In other words, the RET constitutes a minimum of due LAT per year.

**Transfer taxes**
The registration of some operations is compulsory. In these cases, the registration fees are expressly determined by the Registration and Stamp Fees Code.

The registration remains optional for certain operations. In case of optional registration, the registration fees due to be paid are equal to 20 Tunisian dinars (TND) per page and per copy.

In case of compulsory registration, the fees due depend on the nature of the transaction and the goods involved.

Some transactions are subject to proportional registration fees, for example:

- 5% on the transfer of immovable properties.
- 2.5% for the transfer of goodwill (*fonds de commerce*).

Transactions that are not subject to proportional registration fees, as well as transactions the registration of which is optional, are subject to insignificant fixed registration fees (TND 20 per page, TND 100 per contract, etc.)

**Stamp duties**
Stamp duties are due, in general, on certain contracts expressly designated, as well as invoices, unless the customer is expressly exempt.

In general, stamp duties range from TND 0.4 for invoices, to TND 2 per page for contracts, to TND 60 for passports.

Certain documents are expressly exempt from stamp duties, mainly judgments, checks, etc.

**Social security contributions**
The Tunisian social security system is financed by contributions from both employers (16.57%, reduced to 0.5% for wholly exporting companies) and employees (9.18%) based on salaries. Employers collect and pay the social security contributions from each wage-earner.

Contributions for Accident and Professional Insurance are collected in the same manner.

**Social logging tax**
Employers established in Tunisia, regardless of being liable or not to income tax, are subject to a social logging tax, calculated at 1% of the gross amount of salaries paid to its employees, including benefits in kind.

The social logging tax is filed on the monthly tax return through which VAT and other direct taxes, except corporate tax, are filed.

This tax is payable monthly before the 28th day of the following month.
Vocational training tax
Entities subject to corporate tax are subject to vocational training tax, calculated at 2% of the gross amount of salaries paid to its employees, including benefits in kind. The rate of this tax is 1% for industrial companies.

This tax is payable monthly before the 28th day of the following month.

Local authority tax (LAT)
LAT is payable by entities subject to corporate tax, except entities operating in the tourism sector. The tourism sector is defined as accommodation, entertainment, tourist transportation, thermals, congressional tourism, companies managing hotels and entertainment centres, and travel agencies.

If a company is engaged in several activities, some of which are subject to LAT and the remaining are not subject to LAT, the taxable base to be considered is constituted only by the turnover of the activities that are subject to LAT.

The LAT paid to the local authority of 0.2% of the total turnover of the entity, with a minimum calculated on the basis of the number of square metres of construction used by the entity.

LAT is payable monthly before the 28th day of each month.

Hotels tax
The hotels tax is due by entities that work with tourists; provide accommodation, food, and beverages; or organise leisure activities clients. The tax is calculated at 2% of the gross turnover generated from the tourism and relating activities.

This tax is payable monthly before the 28th day of the following month.

Tourism Sector Development Fund (FDCST)
The FDCST tax is a tax that is paid by entities operating in the tourism sector. The tax is calculated at 1% of the turnover, excluding VAT, generated from tourism and relating activities.

Branch income
The income attributable to a PE corresponds to:

- the revenues generated directly by the PE further to the exercise of its activity
- the revenues corresponding to works carried out by it, even if invoiced by the head office, and
- the revenues that would have been realised by an independent company carrying out the same business, in case the activity of the PE is provided for free.

The following charges are deductible for the purpose of the determination of the taxable results of a PE:

- All the charges incurred directly by this PE and necessary for its proper functioning. These charges have to be supported by proper documentation.
- Direct charges incurred by the head office exclusively for the PE and supported by proper documentation.
• A proportion of the indirect charges (real central administration costs) incurred by the head office. The proportion admitted for deduction is most often calculated on the basis of the turnover of the Tunisian branch against the global turnover of the head office. The deduction is limited to 10% of the Tunisian turnover in case the head office is resident of a state that did not conclude a DTT with Tunisia.

**Income determination**

**Inventory valuation**

Inventory is valued at cost.

**Capital gains**

According to the provisions of article 11 of the Income and Corporate Tax Code, “the net income of a company is determined as the result of all the operations undertaken by the company, including mainly the transfer of assets…” Consequently, capital gains, if any, arising from the transfer of assets will be considered as taxable income and will be subject to corporate tax.

Capital gains are calculated as the difference between the sale price, which is supposed to be equal to the fair market value, and the net book value.

In the particular case of goodwill (fonds de commerce) generated internally, capital gains will be equal to the total sale price, as goodwill, other than derived from acquisitions, has no value on the books of the company.

All tangible and intangible transaction assets have to be valued at their fair market value.

The goodwill (fonds de commerce) generated internally, even if not booked as an asset of the company, also has to be valued at fair market value.

**Particular case of capital gains resulting from mergers**

Capital gains arising from the transfer of assets, other than inventories, on the occasion of a merger operation are deductible from the taxable income of the merged company and are to be added back to the taxable income of the absorbing company at up to 50% of their amount, spread out over five years.

**Dividend income**

Dividends distributed by Tunisian-resident companies are exempt from corporate tax.

Dividends distributed by non-resident companies are subject to tax in Tunisia, unless otherwise provided for by the DTTs concluded by Tunisia.

**Interest income**

Interest income arising from Tunisia or outside is part of the taxable results of the company, unless expressly exempt by the law (e.g. interests on deposits in foreign currencies).

**Royalty income**

Royalty income, except that derived from exports, is part of the taxable results of the company.
Tunisia

Foreign income
Foreign income derived from services that are realised outside Tunisia or provided for wholly exporting companies are considered as derived from exportation and are not subject to corporate tax and are exempted from VAT on purchases, based on a certificate delivered for the purpose by the tax authorities.

Deductions

Depreciation
Depreciation expenses of fixed assets that are owned by the company and within the limit of the depreciation expense calculated according to the straight-line method are deductible for the purpose of determination of taxable income at a maximum depreciation rate fixed by decree.

Buildings may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 5%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

Equipment and machinery may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

The equipment and machinery depreciation rate may be increased by 50% if the equipment is used at least 16 hours a day, or doubled if used 24 hours a day, but the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method, multiplied by 1.5 or by 2, depending on whether the equipment will be used 16 or 24 hours a day.

Depreciation expenses of assets exploited under leasing contracts are also deductible for the purpose of determination of taxable income. In fact, even if assets exploited under leasing contracts are not owned by the company, they are booked as assets in the balance sheet and depreciated accordingly over a minimum period fixed by decree, as follows:

<table>
<thead>
<tr>
<th>Asset exploited under leasing contracts</th>
<th>Minimum period (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Constructions</td>
<td>7</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>4</td>
</tr>
<tr>
<td>Transportation equipment</td>
<td>3</td>
</tr>
</tbody>
</table>

Goodwill
Goodwill (fonds de commerce) amortisation expenses are not tax deductible for the purpose of the determination of taxable income.

Start-up expenses
The maximum amortisation expense allowed for deduction is equal to 100% of the start-up expenses.
Interest expenses
Interest expenses (commissions, bank charges, interest loans, etc.) relating to loans contracted by the company and necessary for its proper functioning are tax deductible.

Interest expenses on shareholders current account are tax deductible within the limit of the maximum rate of 8%, provided that the capital is fully paid and the amount to be remunerated shall not exceed 50% of the capital; the rate of 8% is not applied to banks.

Bad debt
Provisions for bad debts are tax deductible within the limit of 50% of the taxable result (after deduction of non-taxable revenues and add-back of non-deductible charges).

The deduction of bad debts is subject to the presentation of a detailed statement of the concerned creditors while filing the annual corporate tax return, as well as court cases against the creditors in order to claim payment.

Provisions for bad debts that are initially constituted tax-free and become groundless during an exercise (e.g. by the covering of the debt totally or partially) are taxable.

Charitable contributions
Charitable contributions are either deductible:

- totally, in cases where they are granted to proprietary organisms, the list of which is fixed by decree, or
- within 0.2% of the revenue, in other cases.

The deduction of charitable contributions is subject to the presentation of a detailed statement of the beneficiaries while filing the annual corporate tax return of the year during which these charitable contributions were granted.

Fines and penalties
Transactions, fines, and any other penalties for violating legal provisions are not tax deductible. However, contractual penalties (for late payment for example) remain tax deductible.

Taxes
All taxes due by the company are considered as tax-deductible charges, except corporate tax.

Note that when the tax due by non-resident, non-PEs on royalties is borne by a Tunisian-established company (the debtor), then the correspondent charge is not tax deductible.

Net operating losses
Under the Tunisian tax legislation, tax losses are divided into two categories:

- operating losses, and
- deferred depreciation.

Operating losses are to be carried forward for five years, starting from the year following the one during which they were booked.

Deferred depreciation is to be carried forward indefinitely, starting from the year following the one during which they were booked.
With regard to the Tunisian tax legislation, operating losses cannot be carried back.

**Payments to foreign affiliates**

*See Transfer pricing in the Group taxation section.*

---

**Group taxation**

Companies belonging to the same group have the possibility, if certain requirements are met, to opt for the tax consolidation regime.

The tax consolidation regime allows the determination of one taxable basis given by the algebraic sum of the taxable profits/losses determined by each of the companies participating in the scheme, with apportionment in relation to the corporate tax rate applicable to each company in comparison with the corporate tax rate applicable to the consolidating entity.

The tax consolidation regime is applicable for a minimum period of five years, renewable by tacit agreement for a five-year period each time.

The election to the tax consolidation scheme is subject to the prior authorisation of the Ministry of Finance if certain conditions are met:

- The mother company has to be listed on the Tunisian Stock Exchange. In case the mother company is not listed on the Tunisian Stock Exchange, it has to undertake to be listed by no later than the end of the year following the first year during which the tax consolidation regime comes into effect; this deadline may be extended by one additional year.
- Participations held by the mother company in the capital of the other group-companies electing to the tax consolidation regime, whether directly or indirectly, have to be equal to at least 75% of the capital of each company during the whole period of the tax consolidation scheme.
- Companies electing to the tax consolidation regime have to be resident in Tunisia.
- Companies electing to the tax consolidation regime have to be subject to corporate tax. According to the tax law in force, companies benefitting from tax holidays during a certain period of time may elect to the tax consolidation scheme even if no minimum tax is due.
- Companies electing to the tax consolidation scheme have to consider the same opening and closing dates for the fiscal years covered by the scheme.

The taxable result of each group-company participating in the tax consolidation scheme is determined according to the common law. However, and unlike the general rules applicable to the determination of the taxable result, interests generated by sums of money deposited in inter-company current accounts are not taken into consideration for the purpose of determination of the taxable base subject to corporate tax.

Deferred depreciation and operating losses generated by a group-company prior to the tax consolidation scheme enters into effect are to be carried forward at the level of the same company.

Taxable results of companies subject to the same corporate tax rate as the mother company are to be considered for their whole amount, whereas taxable results of
companies subject to corporate tax rates different from the one applicable to the mother company are to be reprocessed. In fact, in this latter case, only a portion of the taxable result is to be considered for the sake of computation of the consolidated tax. This portion is determined according to the following formula:

\[
\text{Taxable base }^* \times \frac{\text{corporate tax rate applicable to the company}}{\text{corporate tax rate applicable to the mother company}}
\]

Once the taxable results of the group-companies are added together, they are to be reprocessed by the mother company as follows:

- Add back provisions for bad debts booked and deducted by a group-company, before the tax consolidation scheme enters into effect, for doubtful receivables from the other group-companies.
- Add back benefits reinvested by a group-company in the capital of another group-company after tax consolidation scheme enters into effect, unless they are reinvested lately within the receiving entity itself.
- Deduct remission of debts by a group-company to the benefit of another group-company, both of them participating in the tax consolidation scheme.

Corporate tax is calculated at the rate applicable to the consolidating entity on the basis of the consolidated taxable result calculated (as outlined previously). However, a minimum corporate tax equal to 0.1% of the total gross turnover of the group-companies participating to the tax consolidation scheme remains due in case the taxable results shows a deficit or in case the minimum corporate tax is greater than the one calculated by applying the corporate tax rate applicable to the consolidating company to the consolidated taxable profit.

All pre-payments, WHTs, instalments, and tax surpluses generated by a group-company before the election to the tax consolidation scheme are creditable against the corporate tax to be paid by the consolidation entity. The surplus, if any, remains deductible from corporate tax due in the subsequent years.

**Transfer pricing**

According to the Tunisian tax legislation, where there is evidence for the tax authorities of the existence of commercial or financial business transactions between a company and other dependent companies, which, for the determination of their value, are based on rules that differ from those governing relations between independent companies and which result in the reduction of taxable benefits, the tax department is allowed to add back to the taxable result of the invoicing company the differential between the benefits that would have been realised if the practiced prices were in line with the arm’s-length principle and those actually accounted for by the company.

The burden of proof is on the tax department.

**Thin capitalisation**

Projects may be financed by shareholder’s equity, shareholder’s loans, or external debts.

Interest due on shareholder’s loans is tax deductible within the limit of an interest rate of 8%, provided that the following conditions are met:

- the capital is fully paid-up and
- the amount of the sums put at the disposal of the company must not exceed 50% of the capital.
Tunisia

In case shareholders loans exceed 50% of the share capital, then interests due in the part exceeding 50% are not tax deductible.

**Tax credits and incentives**

In order to harmonise investment legislation with general economic objectives, the Incentives Investment Code (IIC) has been promulgated.

The IIC provides a number of incentives applicable to all projects covered by the code and approved by the competent government institutions and specifically developed in the following sectors:

- Agriculture and fisheries.
- Manufacturing industries.
- Public works.
- Tourism.
- Handicrafts.
- Transport.
- Education and learning.
- Professional training.
- Cultural production and industries.
- Promotion of young people and children’s education.
- Healthcare.
- Environmental protection.
- Property promotion.
- Other non-financial activities and services.

The IIC foresees common and specific incentives.

The considered common incentives are detailed as follows:

- Deduction by an entity from the taxable base of profits reinvested by subscribing to initial capital or to capital increases in companies operating under the IIC, within the limit of 35% of its net taxable profits, and within the limit of the minimum corporate tax rate, which means that the corporate tax cannot be less than 20% of what it would have been without deducting the considered profits.

The main conditions for benefiting from the aforementioned incentives are that the:

- subscribing company keeps its accounts in accordance with Tunisian accounting standards
- new shares must be issued for the subscribed amount
- registered subscribed capital may not be reduced during the five years following 1 January of the year following the reinvestment, except for the purpose of absorbing losses
- subscribing company must join to its corporate tax return a certificate proving that the capital in which they subscribed is entirely paid
- subscribed shares must not be sold before the end of the two years following the payment of the capital, and
- reinvested profits have to be posted in a ‘special investment reserve account’ under the liabilities in the balance sheet before the final date for filing the corporate tax return relating to the year during which the benefits were reinvested and deducted.
• Deduction from the taxable base of profits reinvested in the company itself (activities extension), provided the respect of the minimum tax rate condition of 20% and the following other conditions:
  • The reinvested profits have to be posted in a ‘special investment reserve account’ under the liabilities in the balance sheet before the final date for filing the corporate tax return relating to the year during which the benefits were reinvested and deducted.
  • The benefits posted in the ‘special investment reserve account’ have to be incorporated/included in the capital of the company before the end of the year during which the reserve was posted/booked.
  • An investment plan is to be joined to the income tax return.
  • The investment must be realised before the end of the year during which the reserve was posted/booked.
  • The assets acquired must not be transferred during at least two years after the date of the start of production.
  • The registered capital must not be reduced during the five years following the date of the incorporation of the reinvested benefits in the capital, except for the purpose of absorbing losses.

The IIC foresees specific advantages that apply to:

• Exportation activities.
• Investments in regional development zones.
• Agricultural development.
• Environmental protection.
• Research and development (R&D) and technological development.
• Small enterprise and trade development.
• Investments of support (learning, training, etc.).

**Wholly exporting activities**
The following are considered as wholly exporting companies:

• Companies with products totally destined to be sold outside Tunisia.
• Companies providing services totally utilised/exploited outside Tunisia.
• Companies working exclusively with wholly exporting companies as defined above.
• Companies working exclusively with financial and banking institutions working mainly with non-Tunisian resident persons.
• Companies set up in the Economical Free Zones in Tunisia.

Note that wholly exporting companies may commercialise locally, during a given year, up to 30% of the turnover of the previous year without losing the status of a wholly exporting company.

Profits derived from exportation by companies that have already obtained an investment certificate from the relevant authorities (the Agency of Promotion of the Investment in the particular case of industrial companies) before 1 January 2013 and that will enter into production during 2013 may benefit from the deduction of the benefits derived from exportation operations during the first decade of activity, and this starting from the first exportation operation.

In addition to the above mentioned deduction, the company may also benefit from the deduction of other profits in connection with exportation during the first decade of activity.
The concerned profits are detailed as follows:

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted within the frame of support to the export operations.
- Capital gains derived from the sale outside Tunisia or to other wholly exporting companies of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (fonds de commerce).
- Realised exchange profits in connection with the exportation activity.
- Remission of debt for the benefit of the wholly exporting companies.

However, all the other profits (financial interests, rentals, etc.) remain subject to corporate tax at the rate of 30%.

After the expiry of this period, profits derived from the main activity are to be subject to corporate tax at the rate of 10% and all other revenues will be subject to corporate tax at the rate of 30%.

Wholly exporting companies created as of 1 January 2013 that will enter into production no later than December 2014 will be subject to corporate tax at the rate of:

- 10% of the basis of the benefits derived from exportation and
- 30% on the basis of the benefits derived from local sales as well as the other profits.

Note that companies are subject to a minimum corporate tax calculated at the rate of 0.1% on the basis of the local turnover.

Wholly exporting companies also benefit from:

- Exemption from VAT on purchases based on a certificate delivered for the purpose by the relevant tax authorities, to be presented by the Tunisian entity to its suppliers and the exemption from VAT at sales based on a certificate delivered for the purpose by the relevant tax authorities to be presented by the client to the Tunisian entity.
- Exemption from other indirect taxes, including customs duties.
- Exemption from LAT, professional training tax, registration fees, stamp duties, and social logging tax.

However, they remain subject to the payment of the following insignificant taxes and duties only:

- Taxes and duties to passenger cars.
- The single compensation tax on road transport.
- Taxes on real estate: calculated on the number of square metres of construction used by the entity.
- Taxes and duties by virtue of services rendered directly in compliance with the current legislation.

**Regional development zones activities**
The IIC provides that investments in certain activities (industry, tourism, handicraft, and certain other services) carried out by entities established in regional development zones benefit from a number of tax advantages, detailed as follows:
• Deduction from the taxable profits of the entity of the profits derived from the investments in the regional development zones during a period of:
  • Five years, in case the investments are realised in the development zones enumerated in category one.
  • Ten years, in case the investments are realised in the development zones enumerated in category two.
  • Ten years, in case the investments are realised in the development zones of priority. During the second decade of activity, the deduction is reduced to 50% of the profits generated on the investments.

In addition to the above mentioned deduction, companies carrying out investment in regional development zones may also benefit from the deduction of other profits in connection with the main activity during the first decade of activity.

The concerned profits are detailed as follows:

• Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted within the frame of support to the export operations.
• Capital gains derived from the sale of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (fonds de commerce).
• Realised exchange profits in connection with the exportation activity.
• Remission of debt for the benefit of the wholly exporting companies.

Other benefits include:

• Deduction from the taxable profits of the revenues reinvested in the subscription to initial capital or to capital increases in these companies, up to 100% of the taxable result and without any minimum tax. However, the deduction is subject to the remaining conditions listed under the common incentives section.
• Exemption from social logging tax and vocational training tax.

Support activities
The supporting investments activities are defined as being the following:

• Training of children.
• Education.
• Teaching.
• Scientific research.
• Professional training.
• Cultural production and co-ordination of young people.
• Healthcare services.

The investments made by institutions for these considered activities give entitlement to the following tax incentives:

• Exemption from customs duties and taxes with a similar effect.
• Suspension of VAT and consumption duty for imported equipment with no locally manufactured equivalent that is necessary for the realisation of the investments, as well as suspension of VAT on equipment manufactured locally.
Tunisia

**Foreign tax credit**
In the absence of DTTs, corporate tax (or any WHT in connection with) paid outside Tunisia is not deductible from the tax due in Tunisia.

However, in the presence of DTTs, in cases where profits derived from outside Tunisia were subject to corporate tax in Tunisia, the foreign tax, if any, is deductible, but only up to the corresponding Tunisian tax on these profits.

**Withholding taxes**
The payments of certain remunerations are subject to corporate WHT in Tunisia.

The WHT is an advance payment of corporate tax and is thus deductible from the corporate tax due by the invoicing entity. To this end, the paying entity shall withhold the tax at the appropriate rate. It shall then issue a WHT certificate to the invoicing company to enable the latter to use the certificate as proof of the payment at the moment of filing its corporate tax return. The paying entity subsequently pays the withheld amount to the tax authorities.

The withheld tax is to be declared and repaid by the paying entity each month before the 28th day of the following month.

The rates of the WHT differ according to the nature of the goods/services and the rates applicable within the framework of the DTTs.

Applicable WHT rates in Tunisia are as follows:

- 15% of the gross amount of the invoices related to fees, commissions, brokerage fees, rentals, payment of non-commercial activities (non-commercial activities include especially independent scientific, literary, artistic, educational, or teaching activities, such as independent activities of physicians, dentists, lawyers, consultants, architects, engineers, accountants, etc.).

  This rate is reduced to 5% for fees (including those paid for non-commercial activities) and hotel rentals when these amounts are paid to entities subject to corporate tax and individuals who keep proper accounts in accordance with the Tunisian accounting principles.

- 20% on interest and director’s attendance allowance. This does not include interest on deposits and bonds in foreign currency or convertible dinars.
- 5% on bank loans extended by non-Tunisian resident banks.
- 2.5% on the sales price indicated in a real estate sale, in case the seller is an individual.
- 1.5% on payments exceeding TND 2,000 (including VAT) made for the acquisition of goods and services necessary to the activity and that are not subject to a specific WHT rate.
- 15% on other payments made to non-Tunisian tax resident persons.

**DTT rates**
Note that the following interest WHT rates are applicable to interest payable to non-resident, non-PE companies and financial institutions according to DTTs concluded by Tunisia.

Tunisia

Notes

1. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 15% of the gross amount of the royalties for cinematographic films and TV films, patents, trademarks, designs or models, plans, secret formulae, or processes; technical and economical studies; information concerning industrial, agricultural, commercial, or scientific experience; and the use of or the right to use industrial, commercial, or scientific equipment.

2. 11% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work, including cinematographic films and films for TV broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities; and economical and technical studies, and technical assistance realised in the state of source.

3. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical assistance and studies in all fields.

4. 20% of the gross amount of the royalties for the use of, or the right to use, licences, trademarks, cinematographic films, and films and discs for radio or television broadcasting and the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied. 15% of the gross amount of the royalties for all the other cases, mainly technical and economical studies; the use of, or the right to use copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; and information concerning industrial, commercial, or scientific experience. However, royalties paid for the use of, or the right to use, copyrights of literary, dramatic, musical, or artistic work, except royalties in respect of cinematographic films and films and discs for TV broadcasting, are taxable in the state of residency and thus cannot be subject to tax nor to any WHT in connection with the state in which they arise.

5. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; and information in respect of industrial, commercial, or scientific experience. 5% of the gross amount of the royalties for technical and economical studies and technical assistance.

6. 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic and films for TV and radio broadcasting. 15% of the amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use industrial, commercial, or scientific equipment; and technical and economical studies and technical assistance rendered in the state in which they arise.

7. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience. 5% of the gross amount of the royalties for the use of, or the right to use industrial, commercial, or scientific equipment; and technical and economical studies.

8. 15% of the gross amount of royalties for the right to publish any literary, artistic or scientific work, patents, trademarks, designs or models, plans, secret formulae or processes; information in respect of industrial, commercial or scientific experience; the use of or the right to use industrial, commercial or scientific equipment; and cartoons, films, and videos for TV broadcasting.

9. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

10. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 15% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 20% of the gross amount of the royalties for the use of, or the right to use, agricultural, industrial, commercial, scientific equipment, or port facilities and licences, trademarks, cinematographic films, and films for TV broadcasting. However, payments made to public entities for the use of cinematographic films or the broadcasting on radio and TV are exempt from WHT; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied.

11. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work; information concerning agricultural, industrial, commercial, or scientific experience; and technical and economical studies. 15% of the gross amount of the royalties for patents, trademarks, designs or models, plans, secret formulae, or processes, and cinematographic films or films for television.

12. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or
13. Royalties may be subject to tax in the contracting state in which they arise in cases where the legislation of that state allows such taxation, at a maximum rate of 12%.

14. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies.

15. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, agricultural, industrial, commercial, scientific equipment, or port facilities, except remunerations for the chartering of vessels and aircraft used for international transport.

16. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 12% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 16% of the gross amount of the royalties for the use of, or the right to use industrial, commercial, or scientific equipment, and licences, trademarks, cinematographic films, and films for TV broadcasting; however, since the 16% treaty rate is higher than the 15% common law rate, the latter will be applied.

17. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation and according to the legislation of that state for the use of, or the right to use, any copyright of literary, artistic, or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 16% of the gross amount of the royalties for the use of, or the right to use industrial, commercial, or scientific equipment, and licences, trademarks, cinematographic films, and films for TV broadcasting; however, since the 16% treaty rate is higher than the 15% common law rate, the latter will be applied.

18. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 16% of the gross amount of the royalties for the use of, or the right to use industrial, commercial, or scientific equipment, and licences, trademarks, cinematographic films, and films for TV broadcasting; however, since the 16% treaty rate is higher than the 15% common law rate, the latter will be applied.

19. 5% of the gross amount of royalties for the use of, or the right to publish, any literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, a transmission by satellite or optical fibre transmission or similar means of transmission, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

20. 12% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience, except remuneration for vessels and aircraft chartering in respect of international transport; the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; and technical services, such as technical and economical studies and technical assistance, carried out in the state of source.

21. Royalties may be subject to tax in the contracting state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films recording for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies and technical assistance.

22. 12% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies and technical assistance.

23. 25% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies and technical assistance.

24. Royalties may be subject to tax in the contracting state in which they arise in case the legislation of that state allows such taxation; but if the recipient is the beneficial owner of the royalties, the tax so charged shall not exceed 11% of their amount. However, this rate is reduced to 7.5% in case royalties received by a resident of Tunisia are not subject to WHT in the Netherlands and as long as the Netherlands does not proceed to the modification of its tax legislation. Remunerations paid for the following are considered royalties: the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes;
information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment, except remunerations paid for the exploitation of vessels for the international transport; and technical and economical studies and technical assistance rendered in the state from which royalties are paid.

25. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, except cinematographic films and films for TV broadcasting. 15% of the gross amount of the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities; and technical and economical studies and technical assistance.

26. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities; except remuneration for vessels and aircraft chartering in respect of international transport; and technical and economical studies and technical assistance.

27. 12% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities; and technical and economical studies and technical assistance.

28. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical and economical studies and technical assistance in respect of the use of, or the right to use, the equipments, rights, and information mentioned above.

29. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of or the right to use industrial, commercial, or scientific equipment.

30. Royalties are subject to tax in the state of residency of the beneficiary. However, the non-exclusive taxation right attributable to the state of residency does not prohibit the taxation of such royalties in the state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation. Remunerations paid for the following are considered royalties and thus are subject to tax in the state in which they arise: the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and the use of, or the right to use, industrial, commercial, or scientific equipment that is not considered as an asset in the meaning of Article 6 of the present treaty.

31. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

32. 15% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; and economical and technical studies and technical assistance.

33. 10% of the gross amount of royalties for copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; studies and information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and cinematographic films and video tapes for TV broadcasting.

34. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment, except chartering of ships and aircraft used for the international transport.

35. 5% of the gross amount of royalties for remunerations paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, software, designs or models, plans, secret formulae, or processes.

36. 15% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic and films for TV and radio broadcasting. 15% of the amount of the royalties for the use of, or the right to use, cinematographic films, films for TV and
radio broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment, and technical and economical studies.

37. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and technical and economical studies and technical assistance related to these information; and the use of, or the right to use, industrial, commercial, or scientific equipment.

38. 18% of the gross amount of royalties for the use of, or the right to use patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment; however, since the 18% treaty rate is higher than the 15% common law rate, the latter will be applied.

39. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

40. 7.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

41. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

42. Royalties are only taxable in the contracting state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films for TV broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, scientific equipment or port facilities; and economical and technical studies and economical assistance.

43. 15% of the gross amount of the royalties for copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and profits from any ownership, depending from the productivity, the use, or the alienation of that ownership. 10% of the gross amount of the royalties for the use of, or the right to use, industrial, commercial, or scientific equipment other than vessels and aircraft used for international transport, and technical studies paid from public funds or political subdivisions or local authorities or technical assistance for the use of the ownership of the rights above mentioned, in case the technical assistance is realised in the state of source.

44. 7.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and the use of, or the right to use, industrial, commercial, or scientific equipment and port facilities, except remunerations paid for vessels and aircraft used in international transport.

45. These rates are applicable, in certain cases, to the loans extended by the Central Bank.

46. 5% for loans extended by banks and not represented by bonds or other debt securities.

47. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the Chinese state.

48. 0% for loans granted by financial institutions, the capital of which is held at least up to 50% by the Ethiopian state, its political subdivisions, or local authorities.

49. 0% for loans granted by the Deutsche Bundesbank, Kreditanstalt für Wiederaufbau, and the Deutsche Gesellschaft für wirtschaftliche zusammenarbeite Gmbh. (Entwicklungsgesellschaft).

50. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Iran.

51. 0% for loans granted by financial institutions, the capital of which is totally held by the Italian state or its local authorities.

52. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Kuwait.

53. 0% for loans granted by financial institutions, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.

54. 0% for loans granted by companies, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.

55. 7.5% for loans guaranteed or granted by financial institutions and the reimbursement period of which exceeds five years.

56. 7.5% as long as the tax legislation of the Netherlands provides that interest paid by a company resident in the Netherlands to a company resident in Tunisia is exempt from any WHT.
Tunisia

57. 0% for loans, the reimbursement period of which exceeds seven years.
58. 5% for loans, the reimbursement period of which exceeds seven years, and 10% in the other cases.
59. 2.5% for bank loans, as long as the Tunisian domestic tax legislation provides that interest on bank loans extended by non-established banks is subject to a 2.5% WHT rate, and 5% for the above mentioned bank loans in cases where an increase of the WHT rate is applicable to interest paid to non-established banks.
60. 0% for loans granted by financial institutions, provided that the reimbursement period exceeds seven years.

Tax administration

Taxable period
Under Tunisian law, both the accounting year and tax year follow the calendar year. However, derogation is possible if prior authorisation is obtained from the Ministry of Finance.

Tax returns
Tunisian-established companies have the obligation to file monthly tax returns, an annual corporate tax return, and an annual Employer’s Declaration.

Monthly tax returns include WHTs, VAT, LAT, social logging tax, and professional training tax, and must be filed each month before the 28th day of the following month. Filing and payment take place simultaneously.

The annual tax return is the corporate tax return, which must be filed before 25 March of the following year. The deadline for filing the corporate tax return is moved to 25 June for public liability companies and private liability companies subject to statutory audit. Filing and payment take place simultaneously.

The Employer’s Declaration has to be filed each year before 28/29 February of the following year. This declaration must list all fees and salaries paid or incurred, even if not yet paid, to service suppliers and employees during the concerned year. No payment is due in connection with this filing, but fees not listed on this declaration are not recognised as deductible costs.

Payment of tax
Corporate tax is paid through:

- WHTs applied on certain payments and operated by the debtor on behalf of the taxpaying entity.
- Beginning from the second year of activity, three provisional instalments, each calculated at 30% of the total corporate tax due for the previous year. The instalments fall due on 28 June, 28 September, and 28 December.
- An annual tax return.

Both WHTs and provisional payments of income tax are creditable against the annual/final tax due.

Filing and payment take place simultaneously.

The most common process is the filing in person at the tax office. In this case, payment is made in cash or by check.
However, companies, the turnover of which exceeds TND 1 million, are constrained to file their tax returns electronically. Electronic filing remains optional for other companies. In this case, payment is made through bank transfer.

**Tax audit process**

Tax controllers may proceed either with preliminary tax audit or an in-depth tax audit.

**Preliminary tax audit**

In case of a preliminary tax audit, the taxpayer under control is not notified prior to starting the audit.

The tax audit is conducted in the offices of the tax administration and deals with the documents made available to them (tax returns, registered contracts, etc.). However, preliminary tax audits can never deal with the taxpayer’s accounts.

The results of the tax control are notified in writing to the taxpayer within a tax audit report, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated. It is worth pointing out that the tax audit report is not an executive act against the taxpayer and does not bear any request for payment of taxes or penalties.

Indeed, the taxpayer has the possibility to answer to the tax audit report within 30 days starting from the date of the receipt of this report. Failing that, the taxpayer will receive a tax assessment notice that brings forth requests for payment of taxes and penalties to the taxpayer. In cases where the taxpayer answers to the notification of the results of the tax audit and brings additional explanations, clarifications, and documents to the tax auditors, then they will be constrained to examine the evidence provided by the taxpayer and answer to the taxpayer’s opposition, but no deadline is fixed.

Once the taxpayer receives the answer of the tax authorities to the taxpayer’s opposition, the taxpayer will have the possibility to file a second opposition, in case the taxpayer still disagrees with some or all the points raised by the tax controllers.

Once the second answer is filed by the taxpayer, there will be no other written correspondences with the tax auditors.

In cases where the tax administration agrees to the clarifications, explanations, arguments, and documents provided by the taxpayer, then the tax audit will be closed. However, in cases where the tax administration still disagrees with some or all the evidence provided by the taxpayer, then the taxpayer will receive a tax assessment notice and will have to pay the notified taxes. The tax assessment notice has to take into consideration the taxpayer’s observations enclosed in the first and the second opposition filed by the taxpayer.

Further to the receipt of the tax assessment notice, the taxpayer may make an appeal to the relevant court.

A preliminary tax audit does not prevent an in-depth tax audit of the same period and the same taxes.

**In-depth tax audit**

In case of an in-depth tax audit, the taxpayer under control is notified 15 days prior to starting the audit. This period may be extended to a maximum period of 60 days.
Tunisia

In-depth tax audits deal with the accounts of the taxpayer under control (in cases where the taxpayer has the obligation to maintain accounts according to the accounting legislation into force) as well as any other evidence (presumptions, registered contracts, etc.).

In-depth tax audits take place, as a general rule, on the business premises of the taxpayer. However, and upon the request of the taxpayer or the tax controllers, the tax audit can be conducted in the tax authorities’ office. In this case, books, records, and any other documentation deemed necessary to the tax auditors to complete the audit have to be moved to the tax auditors’ office.

In-depth tax audits last for:

- six months, in case the taxpayer under control is constrained by the law to maintain accounts, and
- one year, in the other cases.

At the end of this period, the tax audit must come to an end and the tax auditors must draw up a tax audit report to be sent to the taxpayer, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated.

Once the tax audit report is sent to the taxpayer, the procedure will be the same as for preliminary tax audits.

**Statute of limitations**
The period open for tax audit, unless it was subject to a previous in-depth tax audit, is:

- Four years, in case of partial omission; an omission is considered as partial in case the tax return is filed but the taxable base is not determined properly or in case the WHT rates applied to payments made to third parties are lower than the rates provided for by the law.
- Ten years, in case of total omission; an omission is considered as total in case the tax return is not filed at the date when the company becomes under tax control.

The four-year period and the ten-year period begin to run from 1 January (in case the fiscal year coincides with the calendar year) of the year following the completion of sales, earnings, receipt, or disbursement of any sum to be taxed.

**Topics of focus for tax authorities**
The tax authorities primarily focus on extraordinary transactions (e.g. mergers, restructuring, suspension of business). After introducing a transfer pricing provision as a part of the 2009 law, the tax authorities are increasing their attention towards transactions concluded between affiliated companies.

Significant developments

Interest withholding tax (WHT) rates on deposits
As per the Council of the Ministers Decree No. 2012/4116, published in the Official Gazette No. 28515 dated 1 January 2013, the WHT implications on interest income from bank deposits (excluding interbank deposits and money market operations of intermediaries) and profits from participation accounts issued by Turkish participation banks that are considered as deposit interest for tax purposes are changed in a way that differs depending on the currency (Turkish lira [TRY] or the foreign exchange) and maturity (see Portfolio investment income in the Tax credits and incentives section).

Resource Utilisation Support Fund (RUSF) rates
Under the Council of the Ministers Decree No. 2012/4116, the RUSF rates on foreign currency and gold borrowings by Turkish residents from abroad (excluding banks and financing institutions) have been changed (see Resource Utilisation Support Fund in the Other taxes section).

Taxes on corporate income

Corporations are liable for corporate income tax (CIT) at a rate of 20% on net profits generated, as adjusted for exemptions and deductions and including prior-year losses carried forward, to a limited extent.

According to Turkish tax legislation, income taxation differs significantly based on the taxpayer’s place of residence. Resident entities are subject to tax on their worldwide income, whereas non-resident entities are taxed solely on the income derived from activities in Turkey.

Local income taxes
There are no provincial or municipal taxes on corporate income in Turkey.

Corporate residence

If both the legal and the business headquarters of a company are located outside Turkey, the company is regarded as a non-resident entity for Turkish tax purposes. If one of these headquarters is located within Turkey, the company is regarded as a resident entity for Turkish tax purposes.

Note that there is no distinction between CIT and value-added tax (VAT) registration in Turkey. Therefore, corporations or permanent establishments (PEs) are liable for
Turkey

all taxes (e.g. CIT, VAT, WHT, stamp tax) once they are registered for tax purposes in Turkey.

**Permanent establishment (PE)**
Unlike the provisions of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital, there is no minimum period of presence in Turkey before a presence is regarded under the Turkish tax legislation as a PE. In this regard, we believe that the PE evaluation should be made for each case depending on the merit of the cases, both from a local legislation perspective and from a treaty (if applicable) perspective.

**Other taxes**

**Value-added tax (VAT)**
Deliveries of goods and services are subject to VAT at rates varying from 1% to 18%. The general rate is 18%. VAT payable on local purchases and on imports is regarded as ‘input VAT’, and VAT calculated and collected on sales is considered ‘output VAT’. Input VAT is offset against output VAT in the VAT return filed at the related tax office. If output VAT is in excess of input VAT, the excess amount is paid to the related tax office. Conversely, if input VAT exceeds output VAT, the balance is carried forward to the following months to be offset against future output VAT. With the exception of a few situations, such as exportation and sales to an investment incentive holder, there is no cash refund to recover excess input VAT.

Turkish VAT principles contain a ‘reverse-charge VAT mechanism’, which requires the calculation of VAT by resident entities on payments to persons in foreign countries. Under this mechanism, VAT is calculated and paid to the related tax office by the resident entity. The resident entity treats this VAT as input VAT and offsets it in the same month. This VAT does not create a tax burden for the resident or non-resident entity, except for its cash flow effect on the former if there is insufficient output VAT to offset the input VAT.

**Banking and insurance transactions tax (BITT)**
The transactions being performed by licensed banks and insurance companies are generally exempt from VAT but are subject to BITT at a rate of 5% in general (although some transactions are subject to 1% or 0% BITT), which is due on the gains of such corporations from their transactions.

The purchase of goods and services by banks and insurance companies are subject to VAT, but this is considered an expense or cost item. Therefore, it is not recoverable (i.e. for VAT purposes by offsetting against the output VAT) in the hands of these corporations.

**Special consumption tax**
There are four main product groups that are subject to special consumption tax at different tax rates, depending on the GTIP numbers (tariff numbers):

- Petroleum products, natural gas, lubricating oil, solvents, and derivatives of solvents.
- Automobiles and other vehicles, motorcycles, planes, helicopters, yachts.
- Tobacco and tobacco products, alcoholic beverages.
- Luxury products.
Unlike VAT, which is applied on each delivery, special consumption tax is charged only once (except for some activities, such as production).

**Customs and foreign trade**
PwC Turkey’s customs and foreign trade specialist team would be pleased to assist in determination of customs duties and in providing extensive information regarding the local excise regime.

**Property taxes**
Buildings and land owned in Turkey are subject to an annual real estate tax at different rates.

**Stamp tax**
Stamp tax applies to a wide range of documents, including, but not limited to, agreements, financial statements, and payrolls. Stamp tax is levied as a percentage of the value stated on the agreements at rates varying between 0.189% and 0.948%.

Salary payments are subject to stamp tax at a rate of 0.759% over the gross amounts, whereas a lump-sum stamp tax is calculated for certain types of documents, such as the printed copies of the financial statements.

**Resource Utilisation Support Fund (RUSF)**
According to the RUSF legislation, any importation conducted on credit (if the payment related to the importation is not made before the actual importation) is subject to a special payment of 6% of the value of the goods to be imported.

Additionally, foreign loans obtained by Turkish resident individuals or legal entities (except for banks or financial institutions) are subject to RUSF, depending on the currency denomination and the maturity. RUSF is applicable at the following rates:

- 3% over the interest amount for the Turkish lira denominated loan, regardless of the maturity of the loan.
- Varies between 0% and 3% over the principal amount of the foreign currency denominated loan and gold-based loans, depending on the maturity.
- 0% in the case of locally obtained loans.

Note that special exemptions may apply in cases where one is investing in certain industries.

**Social security contributions**
Social security contributions for both the employer and the employee total 33.5% of an employee’s salary; 14% for the employee and 19.5% for the employer.

**Branch income**
Branches are taxed solely on the income derived from activities in Turkey since they are regarded as non-resident entities for Turkish tax purposes. Branch profits are subject to Turkish CIT at the rate of 20%.

The branch profit transferred to headquarters (i.e. upstream income repatriation) is subject to dividend WHT at a rate of 15%, which might be reduced if there is a bilateral tax treaty between Turkey and the country of which the principal is a resident for
Turkey

Income tax purposes. See the Withholding taxes section for a list of countries with which Turkey has an applicable tax treaty.

--------------------------
Income determination

Inventory valuation
The weighted average and first in first out (FIFO) methods are allowed for calculating the value of year-end stock or goods sold. Last in first out (LIFO) is not permitted. Stock-count deficits are recorded as disallowable expenses, whereas stock-count surpluses are treated as income at year-end for CIT purposes. Necessary VAT adjustments should also be made accordingly.

Capital gains
No separate rules exist with respect to capital gains taxation in Turkey. Capital gains and losses are included in the determination of taxable corporate income.

See Capital gains exemption in the Tax credits and incentives section for information about an incentive that can reduce the effective CIT rate on capital gains in certain instances.

Dividend income
In dividend distribution's between Turkish resident companies, the dividend payer is exempt from WHT and the recipient is exempt from CIT.

Interest income
In principle, all interest income is subject to tax. Interest income on bank deposits denominated in both Turkish lira and foreign currency is subject to WHT. Interest income is recorded at gross, and any WHT incurred on this income is offset against CIT calculated.

Foreign income
In principle, foreign-sourced income is taxable in Turkey. However, foreign-sourced dividend income may also be subject to a participation exemption if certain conditions are fulfilled. A participation exemption for capital gains generated from a foreign subsidiary may also be available in Turkey, under certain conditions.

Other foreign-sourced income, such as royalties and interest, is fully taxable in Turkey. Partial relief from taxation is granted insofar as the foreign tax paid does not exceed the rate of tax payable for the same income in Turkey.

Although undistributed income of foreign subsidiaries should not be taxable in Turkey, controlled foreign company (CFC) rules should also be taken into consideration in this respect. See Controlled foreign companies (CFCs) in the Group taxation section for more information.

Deductions

Turkish CIT legislation allows a deduction for all the “ordinary and necessary expenses paid or incurred for the generation and sustenance of income during the taxable year in carrying on any trade or business”.

The general principle for tax deductibility is that the payment should be a necessary business expense and it should be properly documented in accordance with the
relevant provisions of the Turkish transfer pricing regulations and those in the local tax procedural law.

Depreciation and amortisation
Fixed assets are subject to depreciation at rates determined by the Turkish Ministry of Finance (MoF), based on their useful life.

Intangible assets (i.e. licence, franchise, copyright, etc.) and goodwill are depreciated over 15 years and five years, respectively. Additionally, leasehold improvement is depreciated based on lease period.

Depreciation can be calculated by applying either the straight-line or declining-balance method (limited to 50%), at the taxpayer's discretion. The taxpayer may also change the option from declining-balance to straight-line (but not vice versa) at any time during the life of the asset. The applicable rate for the declining-balance method is twice the rate of the straight-line method, subject to certain limitations. Furthermore, in special cases, the tax authorities may determine higher depreciation rates.

Intangible assets are amortised by the straight-line method over their estimated useful lives, if objectively determinable.

Profits or losses on disposal of fixed assets (i.e. the difference between the proceeds and the written-down values) are included in taxable income in the year of disposal. If the renewal of disposed-of assets is considered necessary by the owners of the business concern, the profit accrued may be retained for a certain amount of time. After the purchase of new fixed assets, the profits may be offset against the depreciation of the new assets.

Start-up expenses
Start-up expenses are considered as deductible expenses as incurred. Also, the taxpayer has the option to capitalise such expenses and to depreciate them over five years at equal amounts.

Interest expenses
According to the amendments to the corporate tax law, it is envisaged to make some changes regarding the deductibility of the finance expenses of companies.

A portion, yet to be determined by the Council of Ministers, of interest and similar expenses incurred on foreign resources will not qualify for deduction for CIT purposes. According to the arrangement:

- credit institutions, financial institutions, financial leasing, factoring, and financing companies shall not be subject to finance cost restrictions
- cost restrictions shall apply exclusively to the portion of liabilities that exceed a company's shareholder's equity
- restrictions shall not exceed 10% and the rate may be amended per industry by the Council of Ministers, and
- restrictions shall not apply to interest rates and similar payments added to investment costs.

Bad debt
Bad and doubtful accounts receivable are deductible under certain conditions. Amounts of the receivables collected afterwards are added to the profits of the year in which they are collected.
Turkey

**Charitable contributions**
Donations to listed charities and for construction of schools, hospitals, and scientific research organisations are deductible at up to 5% of the company’s gross profit.

**Pensions and employee termination benefits**
Payments for pensions and employee termination benefits are deductible for CIT purposes under certain conditions and are not subject to WHT beyond a certain limit.

**Fines and penalties**
In principle, fines and penalties incurred due to the wrong-doings of the taxpayer or its employees are not tax deductible.

**Taxes**
Essentially, the CIT itself and VAT are, subject to certain exceptions, not deductible for CIT purposes.

Fees and duties paid in relation to assets of the company are, in principle, deductible in determining taxable corporate income.

**Net operating losses**
Corporate losses may be carried forward for five years. Losses cannot be carried back.

**Payments to foreign affiliates**
Charges for royalties and interest by foreign affiliates may be deductible for CIT purposes, provided that transfer pricing and thin capitalisation rules are followed (see the Group taxation section for more information).

**Group taxation**
Consolidation of the accounts of group companies for tax purposes is not allowed in Turkey since each company is regarded as a separate taxpayer.

**Transfer pricing**
The new CIT law includes considerable amendments to transfer pricing regulations, using the OECD’s guidelines as a basis. If a taxpayer enters into transactions regarding the sale or purchase of goods and services with related parties in which prices are not set in accordance with the arm’s-length principle, the related profits are considered to have been distributed in a disguised manner through transfer pricing. Such disguised profit distribution through transfer pricing is not accepted as deductible for CIT purposes. The methods prescribed in the law are the traditional transaction methods described in the OECD’s transfer pricing guidelines.

**Thin capitalisation**
According to local thin capitalisation regulation, if the ratio of the borrowings from shareholders or from persons related to the shareholders exceeds triple the shareholders’ equity of the borrower company at any time within the relevant year, the exceeding portion of the borrowing will be considered thin capital and the corresponding interest will not be deductible. Accordingly, the ratio of loans received from related parties to shareholders’ equity must be no more than 3:1 in order to eliminate Turkish thin capitalisation issues.
Controlled foreign companies (CFCs)
A CFC is a company established abroad with at least 50% of the organisation controlled directly or indirectly by tax-resident companies and real persons by means of separate or joint participation in the capital, dividends, or voting rights. A CFC also must meet certain conditions (e.g. 25% or more of its gross revenue must be comprised of passive income, it must be subject to an effective income tax rate lower than 10% for its commercial profit in its home country, and gross revenue of the subsidiary established abroad must be more than the foreign currency equivalent of TRY 100,000 for the related fiscal year).

The CFC’s profit is included in the CIT base of the controlling resident corporation at the rate of the shares controlled, irrespective of whether it is distributed.

Tax credits and incentives

Foreign tax credit
A partial relief from income taxation is granted for the foreign tax paid that does not exceed the rate of tax payable for the same income in Turkey.

Participation exemption for dividends
There is an unconditional CIT and dividend WHT exemption for dividend income between Turkish companies. If a Turkish company has a shareholding in a foreign company, this dividend income is exempt from CIT, under certain conditions.

Exemption for income from foreign construction and repair activities
The profit from construction and repair activities carried out by Turkish corporations in foreign countries may be exempt from CIT in Turkey under the Turkish CIT law. It should be noted that if loss occurs from these activities, it is not possible to deduct this loss amount from the income generated through domestic activities since deduction of a loss relating to foreign activities that are exempt from CIT in Turkey is not allowed for deduction.

Capital gains exemption
For capital gains generated from the sale of shares in a company, a 75% CIT exemption is applicable under certain conditions. This partial exemption may also be applicable for the capital gains derived from the alienation of real estate investments under certain conditions.

In the event a foreign subsidiary is sold by a Turkish company, a CIT exemption at the rate of 100% is applicable under certain conditions.

Investment incentives
The new incentive system comprises the following four elements.

General incentive practices
Excluding the subjects of investments that do not meet the requirements, all investments above the minimum fixed investment amount will benefit from incentive elements, regardless of regional location.

Regional incentive practices
The industries categorised by region in the relevant Decree will benefit from incentive elements under the conditions determined for each relevant region.
Turkey

Large-scale investments
Incentives are granted to all large-scale investments, although incentive size will vary depending on the investment’s regional location.

Strategic investments
The related legislation defines strategic investments as well as different incentive ratios and periods for strategic investments. A new committee to be established will decide which investments are strategic within the scope of the defined criteria.

Based on the related legislation, investments in production of products that are highly dependent on imports and meet all the following criteria will be regarded as strategic investments:

• Minimum fixed investment amount should be more than TRY 50 million.
• Total domestic production capacity for a given product that is the matter of investment should be below the import amount.
• Added value to be generated with the investment should be at least 40%.
• The total import amount realised related to the invested product within the last year should be more than 50 million United States dollars (USD).

There are six main components of the new investment regulation:

• Reduced CIT rate.
• VAT exemption.
• Exemption for social security premium (employer’s portion).
• Customs duty exemption.
• Interest support.
• Allocation of land for investments.

Free trade zones
Free trade zones are special sites that lie geographically within the country but are deemed to be outside the customs territory. In these regions, the normal regulations related to foreign trade and other financial and economic areas are either inapplicable, partly applicable, or superseded by new regulations.

In general, activities such as manufacturing, storage, packing, general trading, banking, insurance, and trade may be performed in Turkish free trade zones. Goods moving between Turkey and the zones are treated, for all purposes, as exports or imports. However, operations within the zones are subject to the supervision of the zone management (and customs authorities), to whom regular activity reports must be submitted. Consequently, there is a requirement for zone users to maintain full accounting records (in Turkish) with respect to their activities. These accounting requirements extend to inventory records. Customs duty is levied on any unexplained inventory losses as though the goods had been imported into the country.

The right to operate in a free trade zone is conferred by an operating licence obtained from the Undersecretariat for Foreign Trade, which reviews the application for conformity with the objectives and types of activity specified by the Economic Affairs Coordination Council.

Portfolio investment income
Under the WHT regime introduced on 1 January 2006, certain portfolio investment income (e.g. capital gains derived from listed equities acquired after 1 January 2006 or capital gains or interest from Turkish local government bonds issued after 1 January
2006) derived by eligible entities are subject to 0% WHT. However, the WHT rate is 10% for other resident and non-resident entities. In the case of repo income, 15% WHT should be applied for all non-resident investors (the provisions of double tax treaties [DTTs] are reserved).

Furthermore, by the Decree of Council of Ministers dated 18 May 2012 and numbered 2012/3141, 0% WHT is applicable for all type of investors with respect to capital gains derived from listed equities on the Istanbul Stock Exchange (ISE) purchased after 1 January 2006 (excluding securities investment trust shares), income derived from transactions on equity index futures carried out under Turkdex, warrants with underlying of equities traded on ISE, and participation shares of investment funds that intensively invest in listed shares (equity intensive funds).

Under the Communiqué No: 277 of Income Tax Law, the following qualify for the eligibility criteria for 0% WHT:

• Turkish resident capital corporations (limited liability companies, joint stock companies, and commandite companies whose capital is divided into shares).
• Non-resident corporations that have the same characteristics as Turkish capital corporations.
• Turkish investment funds (regulated in accordance with the Capital Markets Board).
• Non-resident investment funds similar to Turkish investment funds.
• Those non-residents similar to Turkish investment funds and trusts that engage in investment in securities and other capital markets instruments as their only business in Turkey to derive income and capital gains from these instruments and to exert the rights attached to these instruments.

Under the aforementioned Communiqué, the investor should be an institutional portfolio investor. However, what is meant by ‘institutional’ is not crystal clear. It seems to us that the intention of the MoF is to treat all non-resident portfolio investors (other than the individuals) as institutional portfolio investors. The Communiqué does not have a principle based approach; rather, it enlists a number of ‘institutional investor’ examples, such as limited liability partnerships (LLPs), sovereign funds, investment funds, investment institutions, and investment companies.

In terms of interest income from deposits, under the Council of the Ministers Decree No. 2012/4116 published in the Official Gazette dated 1 January 2013, the WHT rates on interest income from bank deposits (excluding interbank deposits and money market operations of intermediaries) differ depending on the currency (Turkish lira or the foreign exchange) and maturity, which are as follows:

• Interest income derived from foreign exchange deposit:
  • In current call accounts and deposit accounts with maturity of less than six months (including six months): 18%.
  • In deposit accounts with maturity of less than one year (including one year): 15%.
  • In accounts with maturity of more than one year: 13%.
• Interest income derived from a Turkish lira deposit:
  • In current call accounts and deposit accounts with maturity of less than six months (including six months): 15%.
  • In deposit accounts with maturity of less than one year (including one year): 12%.
  • In accounts with maturity of more than one year: 10%.
Turkey

The withholding will be applied by local intermediary banks, brokerage houses, or local custodian banks, instead of the conventional self-declaration mechanism, and this withholding will be the final taxation in Turkey for both non-residents and Turkish individuals.

On the other hand, certain portfolio investment income (e.g. capital gains from unlisted shares) is taxed under permanent tax rules. In some cases, a non-resident fund may need to file a tax return within 15 days following the sale of securities and subject to a 32% effective tax rate. However, DTTs may provide relief except in special cases. Certain income, such as interest and dividends, are usually taxed via the WHT regime, so no filing is required for a non-resident investor.

Moreover, Turkish corporate bonds that are issued after 1 January 2006 and sold outside of Turkey are not taxed under the WHT regime, and rather taxed as per permanent tax rules. The WHT rates on interest income from such corporate bonds issued by all type of resident corporations (including Turkish banks and corporations) vary depending on the maturities of the bonds and are regressive. The WHT rates are as follows (please note that DTT provisions are reserved):

• 10%, if maturity is under one year.
• 7%, if the maturity is between one and three years (including one year).
• 3%, if the maturity is between three and five years (including three years).
• 0%, if the maturity is five or more than five years (including five years).

The interest income derived from bonds that are issued by the Turkish Treasury outside of Turkey (i.e. Eurobonds) is subject to a 0% WHT. Capital gains derived by non-residents from Turkish Eurobonds issued by the Treasury are exempt from capital gains taxation.

The responsibility to apply this WHT belongs only to the issuer of the corporate bond, regardless of the fact that a payment agent exists or not, and the WHT liability of the issuer is not disregarded even if the payment agents make any withholding.

Research and development (R&D) activities

In the last decade, the Turkish Parliament has enacted several regulations to provide incentives for R&D activities in Turkey. The three primary incentive mechanisms granted to investors planning to carry out R&D activities are cash subsidy programmes conducted by several institutions, incentives and supports stated in Law Numbered 4651 on Technology Development Zones (Technoparks), and incentives and supports stated in Law No 5746 (R&D Law).

The most commonly used incentives are stated in the R&D Law, which was enacted in 2008. One of the objectives of the R&D Law is to attract foreign investors with significant R&D activities abroad to invest in Turkey by enabling non-resident companies with a subsidiary or branch in Turkey to benefit from R&D tax incentives. The main incentives introduced by this R&D law are listed as follows.

R&D deduction

All eligible innovation and R&D expenditures made in technology centres or R&D centres, which must employ at least 50 full-time equivalent R&D personnel, or R&D and innovation projects supported by foundations established by law or international funds can be deducted from the CIT base at a rate of 100%. The same expenditures can also be capitalised and expensed through amortisation over five years in the case of successful projects, whereas the R&D expenditure on failed projects can be expensed immediately.
Companies with separate R&D centres employing more than 500 R&D personnel can, in addition to the aforementioned deduction, deduct half of any increase in R&D expenditures over similar money spent in the previous period.

Any unutilised R&D deduction can be carried forward for an unlimited period of time, indexed to the revaluation rate, which is an approximation of the inflation rate.

**Income WHT exemption on salaries**
80% of the salary income of eligible R&D and support personnel (maximum 10% of number of full-time R&D personnel) is exempt from income tax. However, this rate is increased to 90% for personnel with a PhD.

**Support for the contributions to the Turkish social security institution**
Half of the employer portion of social security premiums for R&D and support personnel (maximum 10% of number of full time R&D personnel) will be funded by the MoF for five years.

**Stamp tax exemption**
Documents prepared in relation to R&D activities are exempt from stamp tax.

---

**Withholding taxes**

There is no WHT on payments to resident corporations by other resident corporations, except for a 3% WHT on progress payments to contractors, both domestic and foreign, within the scope of construction work spanning more than one calendar year.

The local WHT rates are as follows:

Notes

1. The local rate of 10% will be applied in the event a higher rate is stipulated in the agreement.
2. Provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
3. A rate of 10% if the loan or other debt claim is for a period exceeding two years; 15% in all other cases (1).
4. A rate of 10% if the loan is taken for a period exceeding two years; 15% in all other cases (1).
5. A rate of 10% if the loan/credit is taken from a financial institution; 15% in all other cases (1).
6. A rate of 10% if the loan is taken from a bank or a financial institution; 15% in all other cases (1).
7. A rate of 10% if the credit/loan is taken from a bank, financial or savings institution, insurance company; 15% in all other cases (1).
8. A rate of 7.5% if the loan is taken from a financial institution; 10% in all other cases.
9. A rate of 10% if the interest is the result of a loan provided/given by a bank or if the interest is paid in return for an article of merchandise, or equipment given to the contracting state on credit; 15% in all other cases (1).
10. A rate of 10% if the loan is taken from a financial institution, including insurance companies; 15% in all other cases (1).
11. A rate of 10% for the use of, the right to use, or the sale (contingent on the productivity, use, or disposition) of any copyright of literary, artistic, or scientific work, including royalties in respect of motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process, or for information concerning, industrial, commercial, or scientific experience; 5% for the use of or the right to use industrial, commercial, or scientific equipment.
12. A rate of 5% for the use of industrial, commercial, or scientific equipment; 10% in all other cases.
13. A rate of 15% for patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 10% for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.
14. The new bilateral income tax treaty between Turkey and Germany, as well as its Protocol, is in effect as of 1 August 2012. Note that the treaty provisions are in effect retrospectively starting from 1 January 2011. Accordingly, there will be no time-gap between the former bilateral tax treaty, which was not in effect as of 1 January 2011, and the new bilateral tax treaty.
15. A rate of 5% in respect of a loan or credit made, guaranteed, or insured for the purposes of promoting export by the Oesterreichische Kontrollbank AG or a similar Turkish public entity the objective of which is to promote the export; 10% if the interest is derived by a bank; 15% in all other cases (1).
16. If the beneficial owner of the ‘income from debt claims’ is a resident of Saudi Arabia, the tax so charged shall not exceed 10% of the gross amount of income.
17. A rate of 10% in respect of a loan or other debt claim for a period exceeding two years or if the interest is received by a financial institution; 15% in all other cases (1).
18. Interest arising in one of the contracting states and paid to the government of Turkey or the Central Bank of Turkey shall be exempt from income taxes in the contracting state. Similarly, interest arising in the Republic of Turkey and paid to the government or the Central Bank of the other contracting state shall be exempt from income taxes in Turkey.
19. Interest arising in Turkey and paid to the government of Canada or to the Bank of Canada shall be exempt from Turkish tax. Similarly, interest arising in Canada and paid to the government of Turkey or to the Central Bank of Turkey (Türkiye Cumhuriyet Merkez Bankası) shall be exempt from Canadian Tax.
20. The rate of the income tax shall not exceed (i) 10% if the interest is paid to a bank (also note that in the case of Turkey, a lower rate of 0% may apply for eligible financial institutions’ and banks’ loans under the domestic regulation) or (ii) 5% if the interest is paid to the Norwegian Government Pension Fund (Statens Pensionsfond), the Norwegian Guarantee Institute for Export Credits (Garantiinstitutt for Eksportkreditt), the Turkish Social Security Fund (Sosyal Guvenlik Fonu) and the Eximbank of Turkey (Türkiye İhracat Kredi Bankası).

21. The rate of the income tax (i) shall not exceed 10% if the interest is paid to a bank (also note that in the case of Turkey, under the domestic regulation, a lower rate of 0% may apply for the loans provided by eligible financial institutions and banks). The interest shall be exempt from income taxes in the contracting state where it arises, if the payment is made to the government of Turkey, to the Central Bank of Turkey (Türkiye Cumhuriyeti Merkez Bankası), to the government of New Zealand, or to the Reserve Bank of New Zealand.

22. A rate of 5% of the gross amount of the interest paid in respect of a loan or credit made, guaranteed, or insured for the purposes of promoting export by an Eximbank or similar institution, the objective of which is to promote the export; 10% if the interest is derived by a bank; 10% in all other cases.

23. A rate of 15% from the use of, or the right to use, trademarks; 10% in all other cases.

**Turkish WHT on dividends**

Dividend distributions to individuals and to non-resident persons who are shareholders are subject to WHT at a local rate of 15%. This rate might be reduced for non-resident shareholders in the presence of a tax treaty. Please note that dividend distributions to resident entities and branches of non-resident entities are not subject to WHT.

**Notes**

1. The local rate is 15% for dividends. Unless a lower rate is stated in the Agreement, the local rate is applied.
2. As per the provisions of the protocol amending the agreement, the rate may be (partially or wholly) reduced:
   - For the Netherlands: to 10%, as long as, under the provisions of the Netherlands Company Tax Act and to the future amendments thereto, a company that is a resident of the Netherlands is not charged tax with respect to dividends the company receives from a company that is a resident of Turkey.
   - For Belgium: to 10%, as long as, under the provisions of the Belgian laws and of the future amendments thereto, a company that is a resident of Belgium is not charged tax with respect to dividends the company receives from a company that is a resident of Turkey.
   - For Austria: to 5%, if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends, provided that such dividends are exempt from tax in Austria.
   - For Ireland: to 5%, where the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the voting power of the company paying the dividends. 15% in all other cases.
3. Subject to 5% of the gross amount of the dividends if the recipient is the government, or a public institution that is wholly owned by the government or its political subdivisions, or local authorities of the United Arab Emirates.
4. The tax rate shall be 15% where the amount of the Turkish tax imposed on the income of the company paying dividends is less than 40% of such income derived in the accounting period ending immediately before the date when such dividends become payable.
5. The income should be subject to full corporate taxation in the hands of the Turkish tax-resident subsidiary.
6. The new bilateral income tax treaty between Turkey and Germany, as well as its Protocol, is in effect as of 1 August 2012. Note that the treaty provisions are in effect retrospectively starting from 1 January 2011. Accordingly, there will be no time-gap between the former bilateral tax treaty, which was not in effect as of 1 January 2011, and the new bilateral tax treaty.
7. The provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
8. If the beneficial owner of the dividends is a resident of Saudi Arabia, the tax so charged shall not exceed 5% of the gross amount of the dividends provided: (i) the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the Turkish company paying the dividends or (ii) the beneficial owner is a central bank or an entity that is wholly owned by the government.
9. In case of Turkey, the tax rate shall not exceed 5%, to the extent that they are paid out of profits that have been subject to full rate of CIT in Turkey (i.e. without benefitting from tax exemption).
10. The rate of the income tax shall not exceed 5% if it is derived by the Government Pension Fund (Statens Pensjonsfond) or by the Government Social Security Fund (Sosyal Guvenlik Fonu), provided that such dividends are exempt from tax in the contracting state where the beneficial owner is a resident.
11. The treaty-reduced rate of 5% shall apply if such dividends are exempt from tax in the contracting state of which the beneficial owner is a resident.
12. As per the provisions of the agreement, the rate may be reduced to 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends, provided that a relief from Swiss tax is granted for such dividends by way of an abatement of the profits tax in proportion corresponding to the ratio between the earnings from participations and the total profits or by way of an equivalent relief.
Turkey

**Anti-tax haven provisions**
According to the law, all sorts of payments made to corporations (including branches of resident corporations) that are established or operational in countries that are regarded by the Turkish Council of Ministers to undermine fair tax competition (through taxation or other practices) may be subject to taxation in Turkey through withholding at a rate of 30%.

In the meantime, the Turkish Council of Ministers has not yet determined which countries receiving payments are considered ‘tax havens’.

---

**Tax administration**
All Turkish taxes are imposed under laws drafted by or with the involvement of the Turkish MoF and are promulgated by the Turkish Parliament. The central government, acting through the MoF, imposes most of them, although local authorities have certain rights over some minor transaction charges. Tax procedures are governed by the Turkish tax procedural law.

**Taxable period**
The taxable period is the calendar year. Note that a different fiscal year is also allowed.

**Tax returns**
A self-assessment system is used in Turkey.

In principle, residents and non-resident entities having a PE in Turkey are obligated to be registered for all taxes in Turkey (e.g. CIT, VAT, WHT, stamp tax) and file annual CIT returns.

The last date of submission of the CIT return is the 25th day of the fourth month following the fiscal year-end. This date will be 25 April if CIT returns are filed on a calendar-year basis.

**Payment of tax**
Taxable income is declared on a quarterly-basis as advance tax on the 14th day of the second month following each quarter, and corresponding tax is payable on the 17th day of the same period. Advance CIT paid is offset against the final (i.e. fiscal year-end) CIT calculated in the annual CIT return.

The last date of payment of CIT is the 30th day of the fourth month following the fiscal year-end.

**Tax audit process**
The tax authorities in Turkey do not have a regular audit cycle for every taxpayer. Tax audits are usually performed based on selection through risk assessment software, where they can conduct either sector-specific or issue-specific audits.

**Statute of limitations**
The Turkish tax system is based on self-assessment, and there is no procedure to agree the filed tax returns with the tax authorities that can prevent further inspections. Tax returns filed by companies remain open to tax inspection until the end of the five-year statute of limitations according to the provisions of Turkish Tax Procedural Law.
Topics of focus for tax authority
The tax authority has recently inspected companies for the following topics:

- Transfer pricing.
- Capital decrease.
- Loss compensation fund.
- Partial spin-off.
- Thin capitalisation.

Corporate income tax certification
In Turkey, a special kind of tax control mechanism is established called ‘corporate income tax certification’. Under this mechanism, the tax authority accepts accounts and tax returns of taxpayers whose accounts are audited and certified by Sworn Fiscal Advisors (SFAs) to be true and correct unless proved to be incorrect. On the other hand, the MoF has announced that those companies that do not have their tax returns certified as such will be on the priority list for tax inspection. The Ministry sets standards of work to be done for any taxpayer wanting to use an SFA. At the end of each year, SFAs have to prepare a comprehensive report to be submitted to the MoF and to certify the accuracy of the CIT return.

The work is carried out over the statutory financials that are subject to tax calculations. Note that this service is not of a ‘statutory audit’ nature, technically it is ‘non-audit assurance’ work.

The tax certification process helps to identify and take corrective measures against erroneous applications that may otherwise be detected only upon a tax investigation by the Turkish MoF.

Other issues
For up-to-date information
For up-to-date information on the most recent and significant developments in Turkish tax regulations, please refer to the tax bulletins added to our tax portal, Vergi Portali, which can be accessed at Vergiportali.com.
**Significant developments**

A new law on state pension insurance, effective 1 January 2013, introduces obligatory pension insurance contributions payable by employers at the rate of 20% of total remuneration of the employees (Turkmen citizens and foreign individuals permanently residing in Turkmenistan). Additional 3.5% obligatory professional pension insurance is levied on employers with respect to employees who work under hazardous conditions. Employees may participate in a voluntary pension insurance, the minimum rate for which is established at 2% of total remuneration. The new law introduced the model of the conditional-cumulative pension system replacing the previously existing social security system.

**Taxes on corporate income**

Residents of Turkmenistan are subject to corporate income tax (CIT) on worldwide income; non-residents are subject to CIT only in respect of their Turkmenistan-sourced income. The CIT base is determined as gross income less allowable deductions.

Branches of foreign legal entities are subject to a 20% CIT, whereas Turkmen legal entities are subject to an 8% CIT (or 2% CIT in cases where the company qualifies as a small or medium enterprise).

Companies involved in oil and gas operations are subject to a 20% CIT, irrespective of the legal status/ownership structure.

**Special purpose duty for improvement of urban and rural territories**

A special duty aimed at improving urban and rural territories is imposed on registered entities (e.g. legal entities and branches). The duty applies at 1% of the taxable base for CIT purposes. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this duty.

**Contributions to Agriculture Development and Ashgabat City Development Funds**

The contributions to the Agriculture Development Fund and Ashgabat City Development Fund are outside of the general tax legislation (Tax Code) and are provided for by specific decrees. Permanent establishments (PEs)/branches of foreign legal entities are subject to these contributions on the same terms as local legal entities.

Contribution to the Ashgabat City Development Fund only applies to entities located in Ashgabat City.
Turkmenistan

The base for the contributions is comprised of the accounting income. The contribution rate for the Agriculture Development Fund is 3%, and the contribution rate for the Ashgabat City Development Fund is 0.5%.

Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from these contributions.

---

**Corporate residence**

Legal entities are treated as residents for CIT purposes if they are established in accordance with Turkmenistan law or their place of effective management is located in Turkmenistan.

**Permanent establishment (PE)**

The general definition of a PE under domestic legislation is similar to the one per the Organisation for Economic Co-operation and Development (OECD) model convention. A PE is a permanent place of the foreign legal entity in Turkmenistan through which it, fully or partially, conducts entrepreneurial (commercial) activity, including that through an authorised person.

---

**Other taxes**

**Value-added tax (VAT)**

VAT is generally payable at the rate of 15%. A zero-rate applies to exports of goods (except for oil and gas) and international transport services. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this tax.

The tax base is sales turnover including excise tax. If a sale is made by state-fixed prices, then the tax base is the respective sales turnover including VAT and excise tax. The amount of input VAT incurred may be offset against the amount of output VAT. The amount of input VAT related to capital expenditures should be capitalised.

**Customs duties**

The import of certain goods into Turkmenistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Although the list of items that are subject to customs duty is relatively limited (i.e. around 50 items), the rates of customs duties may vary from 5% (e.g. products from cement) to 100% (e.g. carbonic acid) depending on the type of imported goods. In most cases, the customs duty is set on an *ad valorem* basis. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

**Excise taxes**

Excise tax is paid on goods or products that are considered in the list of excised goods or products. Normally, excised goods consist of alcoholic beverages, tobacco products, and automobiles. Excise rates vary based on the type of goods as well as by domestic production or import.

**Property tax**

Property tax in Turkmenistan generally applies at the rate of 1% on the average annual net book value of fixed assets and average annual value of tangible assets used for business purposes and located in Turkmenistan. Generally, contractors and
subcontractors operating under the umbrella of the petroleum law may be exempt from this tax.

**Transfer taxes**

There are no transfer taxes in Turkmenistan.

**Stamp taxes**

Although state duties of various amounts set forth by the government may apply to certain actions (e.g. branch registration), there is no unified stamp tax/duty mechanism as normally practiced in other countries.

**Subsurface-use tax**

Subsurface-use taxpayers are legal entities and individual entrepreneurs extracting natural resources and using land or subsoil waters for the extraction of chemical products. This tax does not normally apply to contractors and subcontractors operating under the umbrella of the petroleum law.

Taxable operations include the sale of natural resources extracted by taxpayers and utilisation of natural resources for consumption. Tax rates vary depending on the goods being extracted. Natural or associated gas extraction is taxed at 22%, and crude oil extraction is taxed at 10%. Tax rates for other mineral resources vary depending on profitability (internal rate of return) from 0% to 50%.

**Pension insurance payments**

Pension insurance is payable by employers at 20% of the total remuneration provided to local employees. Additional 3.5% obligatory professional pension insurance is levied on employers with respect to employees who work under hazardous conditions. Employees may participate in a voluntary pension insurance, the minimum rate for which is established at 2% of total remuneration. Income paid to expatriate employees should not be subject to the pension insurance payments.

**Advertising levy**

An advertising levy is imposed on the amount of expenses on commercial advertising and is to be paid quarterly at the rate of 3% to 5%, depending on the location of the payer within Turkmenistan. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this levy.

**Branch income**

Branches pay CIT at the rate of 20%.

Branches are taxed on profits received from activities in Turkmenistan. The gross income is reduced for expenses incurred (both inside and outside of Turkmenistan) in relation to the activities in Turkmenistan. The procedure for determining the taxable base for branches is generally similar to the one for Turkmen legal entities.

Branches subject to the standard tax regime also pay and file returns with respect to the other taxes described in this summary.
Income determination

Inventory valuation
Inventory is valued at cost, including costs relating to its acquisition. The law permits the use of the weighted average, first in first out (FIFO), and last in first out (LIFO) methods for tax purposes.

Capital gains
Capital gains are taxable as normal business income in Turkmenistan.

Dividend income
Generally, dividend income paid by Turkmen taxpayers is subject to taxation at the source of payment at the rate of 15%, irrespective of whether paid to residents of Turkmenistan or to non-residents.

Inter-company dividends
The Tax Code provides for relief from economic double taxation of inter-company dividends.

The withholding tax (WHT) rate on dividends payable by Turkmen legal entities to their foreign shareholders may be reduced under applicable double tax treaties (DTTs).

Technically, Turkmen branches of foreign legal entities may also be subject to 15% WHT on repatriation of income to their head offices. However, if the head office collects the income from its clients directly to its bank account abroad, the mechanism of collecting the dividend tax is unclear.

Interest income
Turkmenistan sourced interest income paid to non-residents that do not have PEs in Turkmenistan is subject to WHT of 15%. The above rate may be reduced under the applicable DTTs.

Foreign income
A resident company is subject to tax on its worldwide income (including capital gains). There are no provisions for tax deferrals in Turkmenistan tax legislation.

Deductions
In general, taxpayers may deduct expenses paid or accrued during the year in connection with their business and aimed at income generation. All expenses must be substantiated by documentary proof.

The deduction of certain expenses is subject to specific ceilings. Such expenses include representation expenses, which are deductible at up to 1% of gross income. Furthermore, deductible norms for business travel expenses are established periodically by the government.

Depreciation
Tax depreciation is based on accounting depreciation. Depreciation is accrued based on the straight-line method. Accelerated depreciation is also allowed based on specific consent of the Ministry of Finance. A Presidential Decree establishes the maximum depreciation rates, ranging from 5% to 25%, for five different groups of assets.
Generally, for the purposes of CIT, depreciation accrued is deductible. Fixed assets acquired free of charge as well as assets of non-commercial legal entities, budget organisations, and public associations should be excluded from depreciable assets for CIT purposes, even if they are used for generating income.

Fixed assets provided under operational lease shall be depreciated by the lessor. Fixed assets provided under financial lease shall be depreciated by the lessee.

**Goodwill**
There are no provisions for goodwill in Turkmenistan tax legislation.

**Start-up expenses**
Pre-incorporation costs are generally non-deductible.

**Interest expenses**
Interest expense occurring from debt instruments of any kind should be deductible for CIT purposes, provided that the purpose of the underlying debt relates to the entrepreneurial activity of the taxpayer.

Interest expense incurred by a foreign legal entity abroad and recharged to its branch in Turkmenistan is generally not deductible unless specifically addressed by applicable DTTs.

**Bad debts**
The Tax Code permits a taxpayer to include provisions for uncollectable debts as well as losses incurred as a result of expiration of the collection period for accounts receivable.

**Charitable contributions**
There are no specific restrictions on deductibility of charitable contributions. However, they may be disallowed under the general restriction of non-business related deductions.

**Repair and maintenance expenses**
Deductible expenditures for the repair of fixed assets shall be comprised of the cost of spare parts and consumable materials used for repair, remuneration of employees carrying out the repairs, and other expenditures associated with such repairs, including payments to third parties for the purpose of such repairs.

**Research and development (R&D) expenses**
R&D costs (including those that produced no positive result) shall be subject to deduction from gross revenue, except for costs associated with the purchase of fixed assets, their installation, and other costs of a capital nature.

**Fines and penalties**
Fines, penalties, and other financial sanctions (except for tax-related ones) are deductible for CIT purposes.

**Taxes**
For CIT purposes, the following taxes are deductible: property tax; subsurface-use tax; levies established by the Tax Code (except the special-purpose duty for the improvement of urban and rural territories); accrued amounts of VAT in selling goods, performing work, and rendering of services; and amounts of excise tax included in the price of sold excisable goods by manufacturers of such goods.
Turkmenistan

**Net operating losses**
Loss is defined as excess of allowable deductions over gross revenue. Losses shall be carried forward and deducted in subsequent tax (reporting) periods, but not for more than three years. Losses cannot be carried back.

**Payments to foreign affiliates**
Administrative and management expenses incurred by the head office of a branch in Turkmenistan are not deductible at the branch level.

**Group taxation**
There is no group taxation in Turkmenistan.

**Transfer pricing**
The Turkmenistan Tax Code contains provisions concerning state supervision of transfer pricing. According to these rules, the tax authorities monitor and control transfer pricing of certain types of transactions, including transactions between related parties, foreign trade operations, and transactions where the tax authorities during tax audits perceive considerable deviation from the market price (i.e. more than 20%).

**Thin capitalisation**
There are no provisions for thin capitalisation in Turkmenistan tax legislation.

**Tax credits and incentives**
Tax and investment incentives may be negotiated on a case-by-case basis. The President has often issued special decrees granting taxation exemptions and other privileges to specific investors. However, since adopting a new edition of the Tax Code in 2004, such practice has been significantly reduced.

**Foreign tax credit**
Foreign tax credits are available to tax residents of Turkmenistan based on the provisions of the respective tax treaties. The tax credited shall not exceed the tax liability computed in accordance with Turkmenistan regulations.

**Witholding taxes**
Turkmenistan-source income generated by a foreign legal entity that has no PE in Turkmenistan generally is subject to WHT at the source of payment at 15% (6% for income from the lease of sea vessels and aircraft).

Relief may be available for WHT if a foreign entity is a resident of a country that has a valid DTT with Turkmenistan and if the foreign entity complies with certain administrative procedures.

Currently, Turkmenistan has only a few DTTs in force. Turkmenistan is a successor to a number of DTTs concluded by the USSR, while some treaties were concluded and ratified by the government of Turkmenistan. The countries listed below are considered to have valid tax treaties with Turkmenistan:

* USSR treaties honoured by Turkmenistan.

**Notes**

1. 5% where beneficial owner holds at least 25% of the authorised capital of the company paying the dividends.
2. 0% where one of the following conditions is met: (i) interest paid to the government of the other contracting state or interest paid in respect of a loan guaranteed by that other state or by an institution authorised by that state; (ii) interest from commercial debt-claims relating to instalment payments for supplying merchandise, goods, or services; (iii) interest on loans, not represented by bearer instruments, from banks; or (iv) interest on cash deposits, not represented by bearer instruments, with banks, including public credit institutions.
3. 5% where beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
4. Interest arising in a contracting state and paid to, or on loans guaranteed or insured by, the government or a local authority thereof, the Central Bank, or any financial institution wholly owned by the government of the other contracting state, shall be exempt from tax in the first-mentioned state.
5. Interest on bank credits and loans and interest on commercial credits arising from sources located in one of the states and received by a resident of the other state shall not be taxable in the first state.
6. 0% where interest is paid by the governments, Central Bank, or National Bank of the contracting states.
7. 0% where the loan has been guaranteed by the state or by an organisation authorised by it for that purpose.
8. 0% where interest is paid by government, a political sub-division, or a local authority of the other contracting state.
9. Interest paid by government, ministries, other governmental institutions, municipalities, Central Bank, and other banks wholly owned by the government of the other contracting state shall be exempt from tax.
10. 0% where the recipients of the interest are governments of contracting states or any governmental body, as well as the Central Banks (‘the bank of banks’ of a contracting state), a state export or import credit underwriting organisation, or another similar organisation to which, in accordance with the law of a contracting state, the relevant rights were delegated.
Turkmenistan

**Tax administration**

**Taxable period**
The taxable period comprises a calendar year (i.e. 1 January to 31 December).

**Tax returns**
Reports are generally filed quarterly within the month following the reporting quarter. Annual income tax declaration and financial statements of branches of foreign legal entities are due by 20 March of the year following the reporting one.

Tax agents must file WHT reports not later than the 20th day of the month following the one when the respective tax liability occurred.

**Payment of tax**
Advance CIT payments under the standard tax regime are made before the 13th and 28th days of each month (unless agreed otherwise with tax authorities). Final payments upon results of the first quarter, first half-year, nine months, and tax year are made within five days from the reporting deadlines.

Under the Petroleum Law tax regime, CIT is reported and paid once annually based on dates indicated in the respective Product Share Agreement (PSA).

**Tax audit process**
Tax audits may be of two types: ‘cameral’ (preliminary) and ‘documentary’.

Cameral tax audits are performed at the location of tax authorities within 30 days after submission of tax returns and financial statements with the aim of monitoring their accuracy and completeness. The tax authorities may request the taxpayer to amend the tax return(s) if they have revealed mistakes or inconsistencies therein.

Documentary tax audits are conducted based on tax authorities order aimed at verification of the tax returns submitted by the taxpayer. During such audits, the tax authorities review the accounting records, copies of tax returns, and source documents as required. Tax authorities are to notify the taxpayer about the upcoming tax audits at least five days prior to the start of the audit. However, in cases when there is sufficient evidence of tax evasion, the tax authorities may initiate the tax audit without prior notice.

Scheduled documentary tax audits are usually carried out once in three years. There can also be un-scheduled tax audits (e.g. in case of liquidation of the enterprise) and counter tax audits (to review transactions with the enterprise’s supplier/customer, which is under the scheduled tax audit).

In cases when tax violations are revealed during tax audits, taxpayers should make necessary corrections to address those and pay respective taxes/obligatory payments and late payment interest within five days after the tax authority’s decision is released. If accomplished within the deadline, the tax authority’s decision on applying penalty may be cancelled. If not accomplished, the unpaid taxes/obligatory payments and late payment interest are to be withdrawn from the (i) taxpayer’s bank accounts (by issuing a tax liability claim without acceptance), (ii) taxpayer’s debtors (by issuing a tax liability claim on the debts payable to taxpayer), or (iii) taxpayer’s property (by issuing a tax liability claim upon decision of the court).
Statute of limitations
Statute of limitations for tax purposes is five years.

Topics of focus for tax authorities
The tax administration environment in Turkmenistan is form-driven. Therefore, the quality of documentation supporting the deductions should be of particular importance.

Cross-border transactions are normally scrutinised by tax authorities during statutory tax audits in view of WHT and reverse charge VAT implications.

Another area of focus for tax authorities is the deductions taken by Turkmenistan branches of foreign legal entities in respect of expenses incurred by their head offices abroad.
Significant developments

In June 2012, there were a few amendments made to the Income Tax Act, the Value-added tax (VAT) Act, and the Excise Tariff.

Withholding tax (WHT)
The rate of WHT on interest derived by a resident person from government securities was increased from 15% to 20%, and the tax withheld is still a final tax. However, the rate of WHT on any other interest derived by a resident person, other than interest derived from government securities, remains at 15%.

VAT
The supply of betting, lotteries, and games of chance was added to the list of exempt supplies. Consequently, the supply of betting, lotteries, and games of chance are not taxable supplies for VAT purposes.

The supply of biodegradable packaging materials was removed from the list of exempt supplies. Consequently, the supply of biodegradable packaging materials is a taxable supply for VAT purposes.

The following were removed from the list of zero-rated supplies:

- The supply of water, excluding mineral water and aerated water containing sweetening matter or flavour.
- The supply of mobile toilets, ekoloo toilets, and components made from polythene.

Consequently, the supply of water, mobile toilets, ekoloo toilets, and components made from polythene are now standard-rated supplies.

Excise duty
The excise duty on beer and spirits made from locally produced raw materials was increased from 45% to 60%.

Excise duty was also introduced on the following products:

- Cosmetics and perfumes at a rate of 10%.
- Undenatured spirits at a rate of 2,000 Ugandan shillings (UGX) per litre or 80%, whichever is higher.
Taxes on corporate income

The income tax rate applicable to the chargeable income of companies is 30%, with the exception of:

- Mining companies.
- Non-resident air transport, shipping, and some telecommunication services.
- Resident companies whose turnover is less than UGX 50 million.

Chargeable income is gross income for the year less the total deductions allowed under the Income Tax Act (ITA). A resident company is taxed on its income from all geographical sources. A non-resident company is only subject to Uganda income tax on income derived from sources in Uganda.

Mining companies

The income tax rate applicable to mining companies is calculated according to the following specified formula:

\[
\text{Annual tax rate} = 70 - \frac{1500}{x}, \text{ where } x \text{ is the ratio of the company's chargeable income to the gross revenue for the year.}
\]

Note that the derived tax rate is subject to a minimum tax rate of 25% and a maximum tax rate of 45%.

Non-resident air transport, shipping, and some telecommunications services

Non-resident ship operators, charterers, and air transport operators who derive income from carriage of passengers who embark, or cargo or mail that is embarked, in Uganda, as well as road transport operators who derive income from carriage of cargo or mail that is embarked in Uganda, are taxed at the rate of 2%.

A non-resident person who carries on the business of transmitting messages by cable, radio, optical fibre, or satellite communication and derives income through transmission of such messages by apparatus established in Uganda, whether or not such messages originated from Uganda, is taxed on one's gross income at a rate of 5%. Similarly, a non-resident person who derives income from providing direct-to-home pay television services to subscribers in Uganda is taxed on one's gross income at a rate of 5%.

Resident companies with turnover of less than UGX 50 million

A rate of 1% of turnover is used to determine income tax payable by a resident company whose turnover is between UGX 20 million and UGX 50 million (approximately between 10,000 United States dollars [USD] and USD 25,000), subject to certain thresholds.

However, on application to the Commissioner, a resident company with a turnover of less than UGX 50 million may be taxed at 30%.

This category excludes professionals, public entertainment services, public utility services, or construction services.
Corporate residence

A company is resident in Uganda for a year of income if it meets one of the following criteria:

- Is incorporated or formed under the laws of Uganda.
- Has its management and control exercised in Uganda at any time during the year of income.
- Undertakes the majority of its operations in Uganda during a year of income.

Permanent establishment (PE)

A PE (branch) means a place where a person carries on business, and includes:

- A place where a person is carrying on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such.
- A place where a person has, is using, or is installing substantial equipment or substantial machinery.
- A place where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such a project.

Other taxes

Value-added tax (VAT)

VAT is governed by the VAT Act and administered by the Uganda Revenue Authority (URA). VAT is charged at the rate of 18% on the supply of most goods and services in the course of business in Uganda. Specified goods and services, as well as exports outside of Uganda, attract a zero rate of tax.

Some supplies are exempt from VAT, the main categories being government subsidies, the supply of unprocessed foodstuffs, agricultural products and livestock, financial services, insurance services, unimproved land, leases and sale of certain residential properties, betting and gaming, education, medical and health services, social welfare services, pesticides, petroleum products subject to excise duty, machinery for processing agricultural or dairy products, accommodation in hotels outside specified areas, computers, computer accessories, software, and power generated by solar.

The supply of specialised vehicles, plants, and machinery; engineering designs; feasibility studies; consultancy services; and civil works related to hydro-power, road and bridge construction, public water works, agriculture, education, and health sectors is also exempt.

Zero rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while those incurred in making an exempt supply cannot be recovered.

The zero-rated supplies include the supply of goods and services exported from Uganda; the supply of drugs and medicines; the supply of seeds, fertilisers, pesticides and hoes; the supply of machinery, tools, and implements suitable for use only in agriculture; the supply of milk, including milk treated in any way to preserve it; and the supply of leased aircraft, aircraft engines, spare engines, spare parts for aircraft, and aircraft maintenance equipment.
The annual threshold for VAT registration is UGX 50 million (approximately USD 21,000). Persons who make supplies that are VATable and whose turnover exceeds UGX 50 million are required to register for VAT with the URA. VAT registered persons are required to:

- Charge VAT whenever they make supplies that are VATable.
- File monthly returns before the 15th day of the month following the reporting month.

**Credit for input tax**
A person making exempt, zero-rated, and standard supplies can recover all the input VAT if the exempt supplies are less than 5% of the total supplies. However, if the exempt supplies are more than 5% but less than 95%, the person is required to recover only a portion of the VAT input tax corresponding to the percentage of the taxable supplies. If the exempt supplies exceed 95%, the person cannot recover any input VAT.

**Imported services**
The VAT Act defines a supply of service to mean any supply that is not a supply of goods or money, including the performance of services for another person.

An imported service is one provided by a person normally resident outside Uganda who is not required to register for VAT in Uganda. According to Regulation 14 of the VAT Regulations 1996, any person who imports a service into the country must account for VAT on such a service. The Regulations require the person importing the service to account for the VAT at the time when performance of the service is completed, when payment for the service is made, or when the invoice is received from the foreign supplier, whichever is earliest.

The tax on such imported services is computed at the rate of 18% of the cost of the service. VAT-registered companies are no longer required to prepare self-billed tax invoices, thus they are unable to claim the VAT paid as input tax. Further, if the importer of the services is not registered for VAT, the importer is required to calculate and pay the VAT to the URA.

Failure to pay VAT on non-exempt imported services is tantamount to lack of compliance with the law, and a penalty of 2% per month, compounded, may apply.

**VAT representative for non-resident persons**
The VAT Act provides for the appointment of a VAT representative by a non-resident person who may be required by the Commissioner to register for VAT in Uganda but has no fixed place of business. If the non-resident person does not appoint the VAT representative within 30 days after being required to register for VAT, the Commissioner may appoint the representative for the non-resident person. The VAT representative of the non-resident person shall be a person who is ordinarily residing in Uganda, may be an agent for more than one non-resident person, and will have the responsibility for doing all things required of the non-resident person under the VAT Act.

**Customs duties**
Many goods imported into Uganda are subject to customs duties. However, exemptions are available to various classes of plant and machinery imported into Uganda. The rates of duty are provided by the East African Community common external tariff code. Certain products imported from the East African Community and the Common Market for Eastern and Southern Africa (COMESA) region enjoy special custom duty rates. Imported items are classified according to the nomenclature established under the
Uganda

international convention on the harmonised commodity description and coding system. Duty’s range from 0% to 60%, depending on the item imported.

**Excise duties**
Excise duties are imposed on goods considered luxuriant. Examples include locally manufactured soft drinks, cigarettes, alcoholic drinks, and spirits. A schedule of some of the rates is provided below:

<table>
<thead>
<tr>

</tbody>
</table>

**Property taxes**
Property taxes are administered by the local authorities annually. They are based on the value of the property as assessed by the local authorities.

**Stamp duties**
Stamp duty is charged on a number of transactions at varying rates. Stamp duty is charged at 1% of the total value for a number of instruments, including hire purchase agreements, composition deeds, leases, exchange of property, conveyance, transfers, share warrants, gifts, and agreements relating to deposit of title deeds.

Stamp duty of 0.5% is incurred on formation of a company, capital-raising activities such as increase of share capital, debentures, equitable mortgages, and mortgage deeds.

Stamp duty of 1% applies on transfer of shares.

No stamp duty is charged on the increase of share capital where it is in fulfilment of a condition precedent for acquiring loan funds for a development project or where it is made on becoming public through the stock exchange.

Stamp duty of UGX 5,000 is also charged in a number of various other instruments.

**Turnover taxes**
Every promotor of gaming and pools promoted within Uganda and every principal agent of a promoter of gaming and pools promoted outside Uganda is liable to tax at 15% of the total amount of money received or the total amount of bets.

A tax of 5% is charged on gross income earned by non-resident persons carrying on the business of transmitting messages by cable, radio, optical fibre, satellite, or provision of direct to home pay television services to subscribers in Uganda.
Environmental levies

Environmental levies are charged on every person who imports motor vehicles that are eight years old or older. Levies are also imposed on the importation of used household appliances. The levy on motor vehicles is 20% of the value of the vehicle as determined for customs duty purposes. Levies on electrical appliances range from UGX 20,000 to UGX 50,000 per item, depending on the nature of the item.

Branch income

Tax is imposed on the income of a non-resident company derived from running a branch in Uganda. The chargeable income of a branch in Uganda is taxed at the corporation tax rate of 30% after deduction of allowable expenses.

In addition to corporation tax, branches are subject to extra tax at a rate of 15% on any repatriated income for a year of income. The repatriated income is calculated using the A + (B - C) - D approach. Where A is the net assets at the beginning of the year, B is the net profit for the year, C is the tax charge for the year, and D is the net assets at the end of the year.

Income determination

In arriving at chargeable income (taxable income) one has to go through the process of adjusting profits by taking into account deductions allowed and deductions not allowed.

Inventory valuation

A taxpayer is allowed a deduction for the cost of trading stock disposed of during the year, which is determined by adding to the opening value of the trading stock the cost of trading stock acquired during the year and subtracting the closing value of stock. The opening value of the stock is the closing value for the previous year or, where the taxpayer commenced business during the year, the market value at the time of commencement of the business of the trading stock acquired prior to commencement. The closing stock valuation method is the lower of cost or market value. Trading stock is allowed to be valued using either the absorption costing or prime cost method. The stock valuation method chosen may not be changed, except with written permission of the Commissioner.

Capital gains

Capital gains are included in and taxed together with the business income at a rate of 30%. There is no separate capital gains tax. Capital gains arise on disposal of non-depreciable business assets as well as sale of shares.

Dividend income

The general rule is that dividend income is taxable as part of business income at a rate of 30%. Dividend income is also subject to WHT at the rate of 15%. The WHT paid in respect of the dividend income is creditable where the income is subject to the corporation tax rate of 30%. The WHT rate for dividend payments to resident persons is 15%. For dividends paid out by companies listed on the stock exchange to individuals, the rate is 10%.

Dividend income is exempt from tax if the recipient company directly or indirectly controls the paying company through ownership of 25% or more of the voting power of the paying company.
Uganda

**Interest income**
The general rule is that interest income is taxable as part of business income at a rate of 30%. Interest income is also subject to WHT at the rate of 15%. The WHT paid in respect of the interest income is creditable where the income is subject to the corporation tax rate of 30%. However, interest income earned by financial institutions with respect to agricultural loans is not subject to tax. Also, interest income earned with respect to government securities is subject to tax at 20% as a final tax.

**Rental income**
Rental income for companies is included in gross income and taxed at the 30% corporate tax rate.

**Foreign income**
Foreign income is taxable on resident recipients, and tax suffered in the country where it is sourced (if any) is creditable, subject to the provisions of any double taxation agreements (DTAs). This credit is limited to the amount of Ugandan tax payable on that income.

There are no provisions for deferring tax on income earned abroad by tax residents.

**Deductions**
The ITA sets out the following conditions for deductibility of an expense:

- There must be an expenditure or loss.
- The expenditure or loss must be incurred by a person during the year of income.
- The expenditure must be incurred in the production of income included in gross income.

A taxpayer who is accounting for tax purposes on an accrual basis derives income when it is receivable by the taxpayer and incurs expenditure when it is payable by the taxpayer.

An amount is treated as payable by the taxpayer when all the events that determine liability have occurred and the amount of the liability can be determined with reasonable accuracy, but not before economic performance with respect to the amount occurs. Economic performance occurs:

- with respect to the acquisition of services or property, at the time the services or property are provided
- with respect to the use of property, at the time the property is used, or
- in any other case, at the time the taxpayer makes payment in full satisfaction of the liability.

Contingent liabilities are not tax-deductible in Uganda.

**Depreciation**
A deduction is allowed for the depreciation of the person’s depreciable assets, other than minor assets, in accordance with the appropriate applicable rates. The ITA allows a taxpayer a deduction for the depreciation of their depreciable assets on a reducing balance basis. Depreciable assets are classified in four classes as follows:
Class | Assets included                                                                                                                                                                                                 | Rate of tax depreciation (%) |
--- | ---                                                                                                                                                                                                                           | ---
1 | Computers and data handling equipment                                                                                                                                                                                         | 40 |
2 | Automobiles, buses, and mini-buses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than 7 tonnes; construction and earth moving equipment (cost of motor vehicle sealed at approximately USD 24,000). | 35 |
3 | Buses with a seating capacity of 30 or more passengers; goods vehicles designed to carry or pull loads of 7 tonnes or more; specialised trucks, tractors; trailer-mounted containers; plant and machinery used in farming, manufacturing, or mining operations. | 30 |
4 | Rail cars, locomotives, and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft, specialised public utility plant, equipment, and machinery; office furniture, fixtures, and equipment, and any depreciable asset not included in another class. | 20 |

**Initial allowance**
Where a taxpayer places an item of eligible property into service for the first time during the year of income, they qualify for a tax deduction for that year of income that is equal to 75% of the cost of the asset if the property is put into use outside Kampala, Entebbe, Namanve, Jinja, and Njeru. However, if the property is put into use in the above named areas, the tax deduction is equal to 50%.

Eligible property is defined to mean plant and machinery wholly used in the production of income included in gross income but does not include goods or passenger vehicles; appliances of a kind ordinarily used for household purposes; or office or household furniture, fixtures, and fittings.

**Industrial building allowance**
A company is eligible for an industrial building allowance on its industrial and commercial buildings at a tax rate of 5% per annum on a straight-line basis. The industrial building allowance will be granted on the actual cost incurred in constructing the buildings.

In addition to the above, a company is entitled to an initial allowance at the rate of 20% on an industrial building in the first year the building is put to use. The industrial building allowance is computed on the residual value after the initial allowance of 20%.

An industrial building is defined to mean any building that is wholly or partly used, or held ready for use, by a person in manufacturing operations, research and development into improved or new methods of manufacture, mining operations, an approved hotel business, an approved hospital, or approved commercial buildings.

**Goodwill**
Goodwill is treated as an intangible asset and is amortisable over its useful life.

**Start-up expenses**
A company setting up business for the first time or engaged in the initial public offer at the stock market will be entitled to a tax deduction for all its start-up costs that are of capital nature that would otherwise not be tax-deductible under the ordinary tax rules. The start-up costs will be allowed as tax-deductible costs over a period of four years at a straight-line basis at the rate of 25% per annum.
Uganda

**Interest expenses**
Interest is deductible if the interest is incurred in respect of a debt obligation by the company in the production of income included in the company's gross income. Interest arising from non-trade-related debt obligation is not deductible.

Interest charged before capital investment is put to use has to be capitalised. Interest incurred after capital investment is put to use is allowed as a deduction.

If the company is foreign controlled, then the interest arising from the loan in excess of two times the company's equity will not be allowed (see *Thin capitalisation in the Group taxation section for more information*).

**Bad debt**
A deduction is allowed for bad debt only if:

- the amount was included in the person's income in the year of income
- it is in respect of money that was lent in the ordinary course of business by a financial institution in the production of income, or
- the amount of the debt claim was in respect of a loan granted to any person by a financial institution for the purpose of farming, forestry, fish farming, beekeeping, animal and poultry husbandry, or similar operations.

For the bad debt to be deductible, the taxpayer must demonstrate to the URA that reasonable steps to collect the debt were taken and that the taxpayer failed to recover the debt. In relation to a financial institution, it should be a debt in respect of which a loss reserve held against presently identified losses or potential losses, and which is therefore not available to meet losses that subsequently materialise, has been made.

**Charitable contributions**
Charitable donations are deductible if made to amateur sporting associations; religious, charitable, or educational institutions of public character; trade unions; and other similar associations that have been issued with a written ruling by the Commissioner currently in force stating that it is an exempt organisation. The donations should not exceed 5% of the person's chargeable income.

**Meals, refreshments, and entertainment**
Expenses for meals, refreshments, and entertainment are deductible only where the value is included in the employment income of the employees or is excluded from employment income owing to the fact that it is provided on equal terms to all workers.

**Pension expenses**
Employers are allowed a deduction for the contributions made to pension schemes on behalf of their employees. Employees, on the other hand, do not get a deduction for the contributions they make to pension funds.

**Payment for directors**
Directors are treated as employees, so expenses incurred in respect of directors are deductible expenses.

**Bribes, kickbacks, illegal payments**
Non-business expenses are not tax-deductible, including those of a private nature.
**Fines and penalties**
No deduction is allowed for any fine or similar penalty paid to a government or its subdivision for breach of any law.

**Taxes**
No deduction is allowed for income tax payable in Uganda or in a foreign country.

**Other significant items**
No deduction is allowed for the following other expenditures:

- Any expenditure or loss of a domestic or private nature.
- Any expenditure or loss of a capital nature.
- Any expenditure or loss recoverable under insurance contract or indemnity.
- Any contribution or similar payment made to a retirement fund by the employee or for the benefit of any other person (e.g. National Social Security Fund [NSSF] contributions).
- Any premium or similar payment made in respect of a life insurance policy for the life of the person paying the premium or on the life of some other person.
- Any income appropriated to a reserve fund or capitalised in any way.
- The amount of pension paid to any person.

**Net operating losses**
A deduction is allowed for any assessed tax losses carried forward from previous years of income. Such tax losses are carried forward and deducted against future taxable profit of the business in the subsequent years of income. The losses can be carried forward indefinitely. There is no ring-fencing of losses except in the following circumstances:

- Where, during a year of income, there has been a change of 50% or more in the underlying ownership of a company, as compared with its ownership one year previously, the company is not permitted to deduct an assessed loss in the year of income or in subsequent years, unless the company, for a period of two years after the change or until the assessed loss has been exhausted if that occurs within two years after the change:
  - continues to carry on the same business after the change as it carried on before the change and
  - does not engage in any new business or investment after the change where the primary purpose of the company or the beneficial owners of the company is to utilise the assessed loss so as to reduce the tax payable on the income arising from the new business or investment.
- In cases where losses relate to farming, the assessed farming loss can only be deducted from farming income of the taxpayer in the following year and not from any other income.

There is no provision for carryback of losses in Uganda.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible as long as they are charged at an arm’s length and incurred in the production of income.
Uganda

**Group taxation**

There are no specific provisions in the law covering groups, so companies in a group do not get any special treatment for tax purposes in Uganda.

**Transfer pricing**

The transfer pricing regulations apply to controlled transactions if a person who is a party to the transactions is located in and is subject to tax in Uganda and the other person who is a party to the transaction is located in or outside Uganda.

The URA Practice Note issued on 14 May 2012 gives details on the transfer pricing documentation to be maintained by the taxpayer. These include company details and transaction details, including agreements and the pricing methodology used in determining the arm's-length price.

In addition, the anti-avoidance provisions contained in Sections 90 and 91 of the ITA require transactions between associates to be at arm's-length basis. These are the provisions that are often applied by the URA in instances where they are of the view that a non-resident person may be transferring profits from Uganda.

**Thin capitalisation**

Where a company intends to finance some of its Uganda operations by use of foreign debt, the ITA provides for thin capitalisation rules in Uganda, and the safe harbour debt-to-equity ratio is 2:1.

The thin capitalisation rules are provided for in Section 89(1) of the ITA. According to this Section, where a foreign controlled resident company that is not a financial institution has a foreign debt to foreign equity ratio in excess of 2:1 at any time during that year of income, a deduction is disallowed for the interest paid by the company during that year on that part of the debt which exceeds the 2:1 ratio.

**Controlled foreign companies (CFCs)**

Uganda does not have a CFC regime.

**Tax credits and incentives**

**Foreign tax credit**

A resident taxpayer is entitled to a foreign tax credit for any foreign income tax paid by the taxpayer in respect of foreign-source income included in the gross income of the taxpayer. The foreign tax credit allowed is subject to the income tax rate (i.e. 30%) in Uganda.

**Tax holidays for exporters**

A tax holiday of ten years is available to exporters who export at least 80% of their produce of finished goods, subject to certain conditions.

**Scientific research expenditure, training expenditure, and mineral exploration expenditure**

A 100% allowance is available for scientific research expenditure, training expenditure, and mineral exploration expenditure in the year of expenditure.
**Incentives for the importation of plant and machinery**
Plant and machinery is exempt from customs duty and WHT on importation. Additionally, a VAT deferral facility is available where VAT is deferred on importation of plant and machinery and subsequently waived upon approval by the relevant authorities.

**Employment incentives**
A deduction of 2% of income tax payable is granted to any employer who can prove to the URA that at least 5% of their employees on a full-time basis are people with disabilities.

**Other incentives**
- Income derived from agro processing is exempt from income tax, subject to certain conditions.
- Business income derived by a person managing or running an educational institution is exempt from income tax.

**Withholding taxes**
With effect from 1 July 2012, the rate of WHT on interest derived by a resident person from government securities has increased from 15% to 20%, which is still considered a final tax. However, the rate of tax on any other interest derived by a resident person, other than interest derived from government securities, remains at 15%.

According to Section 83(1) of the ITA, a tax is imposed on every non-resident person who derives any dividend, interest, royalty, rent, natural resource payment, or management charge from sources in Uganda. WHT at a rate 15% therefore applies on gross dividend payments, interest, management fees, and royalty payments in respect of non-treaty countries.

However, Section 83(5) exempts interest paid by a resident company in respect of debentures that:

- were issued by the company outside Uganda for the purpose of raising a loan outside Uganda
- were widely issued for the purpose of raising funds for use by the company in a business carried on in Uganda or the interest is paid to a bank or a financial institution of a public character, and
- the interest is paid outside Uganda.

A debenture is defined in the ITA as any form of debt, including debenture stock, mortgage stock, loan, loan stock, or any similar instrument acknowledging indebtedness, whether secured or unsecured. The term widely issued is also specifically defined.

**Double taxation agreements (DTAs)**
A taxpayer may benefit from the provisions of a DTA that Uganda has with another country. Please find below a table showing the countries with which Uganda has DTAs and the applicable WHT rates on various categories of income.
Accordc to Section 88(2) of the ITA, the terms of the lnternational agreement to which Uganda is a party prevails over the provisions of ITA in case the terms of the international agreement are inconsistent with the provisions of the Act.

Note
1. With respect to the Uganda/Netherland DTA, the rate applicable on dividends is 15%, except where the investment is new or is an expansion of the current investment made after the DTA entered into (10 September 2006).
   For new investments and expansions of current investment, the rates are:
   - 0% if the beneficiary holds at least 50% of the shares in the company paying the dividends.
   - 5% if the beneficiary holds less than 50% of the shares in the company making the payment.

---

**Tax administration**

**Taxable period**
A normal period of 12 months is known as a year of income. This spans from 1 July to 30 June. On application, a taxpayer may be allowed to use a substituted year of income, which is a 12-month period other than the normal year of income.

**Tax returns**
The ITA provides for two provisional returns within a 12-month period (financial year). The first provisional return is due within the first six months of the accounting year while the second is due by the end of the 12th month of the accounting year.

The Self Assessment Return (SAR) is due by the sixth month after the end of the accounting year.

Electronic filing has been introduced for all tax returns.

**Payment of tax**
For all companies, a system of provisional payments on account, based on estimated profits, is in place. The first payment of 50% is due in the sixth month of the accounting period and the second payment is due in the 12th month. The balance is expected to be paid together with the SAR.

**Tax audit process**
In most cases, audits are initiated by the URA, which notifies the taxpayer of the records they need to prepare before commencement of the audit. The URA then reviews the records. This is normally done at the premises of the taxpayer, where the URA can obtain the necessary clarifications from the bookkeepers.
The audit findings are then communicated to the taxpayer subsequent to whom an assessment is raised. If the taxpayer does not agree with the objection decision, they may appeal to the Tax Appeals Tribunal or to the high court.

**Statute of limitations**
The ITA requires a taxpayer to maintain records for at least five years after the end of the year to which the records relate.

The VAT Act provides for records to be maintained for six years after the end of the tax period to which they relate.

**Topics of focus for tax authorities**
The focus of the URA keeps shifting but is generally based on the risk analysis of the information availed to them. Currently, the focus is on transfer pricing.
**Ukraine**

**Significant developments**

**Corporate income tax (CIT)**  
The CIT rate has been reduced from 21% for the year 2012 to 19% for the year 2013, with further reduction to 16% for the year 2014.

**New transfer pricing rules**  
Starting from 1 January 2013, new Ukrainian transfer pricing rules apply (see **Transfer pricing in the Group taxation section**). The Parliament is also considering a draft Law in respect of transfer pricing rules in the near future. If approved, the Law will provide significant developments in respect of determination of controlled transactions, application of transfer pricing methods, transfer pricing documentation and reporting requirements, transfer pricing audits procedures, advance pricing agreements (APAs), etc.

**Taxes on corporate income**

CIT applies to taxable profits earned by resident entities in Ukraine and abroad and non-residents with a permanent establishment (PE) in Ukraine. Resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Ukrainian-source income.

As of 1 January 2013, Ukraine’s CIT has a uniform rate of 19% (standard CIT rate). The rate will be reduced to 16% from 1 January 2014 and onwards.

There are a number of tax incentives in respect of CIT available for certain industries and business activities. See the **Tax credits and incentives section for more information**.

Withholding tax (WHT), at a rate of 15%, applies for the majority of income payments for non-residents, unless relief is given under a double taxation treaty (DTT). Ukraine has 70 effective DTTs in place. See the **Withholding taxes section for more information**.

**Local income taxes**

No CIT is levied at the regional or local level.

**Corporate residence**

Corporate residence is determined by the place of incorporation.
Permanent establishment (PE)

The Ukrainian definition of a PE generally follows the PE definition from the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, but with stronger agency tests.

In particular, a non-resident’s PE is defined as a fixed place of business through which the business activity of a non-resident entity is wholly or partly carried out in Ukraine. A PE includes, among other things, a place of management, affiliate, office, etc.

The Tax Code contains the concept of a service PE whereby the provision of services (apart from the provision of personnel), including consultancy services, by a non-resident through its employees or other personnel in Ukraine, shall constitute a Ukrainian PE of this non-resident, provided such activities (within the frame of one project) last more than six months in any 12-month period.

A construction site in Ukraine may also give rise to a taxable presence of a non-resident in Ukraine in the form of PE, if the length of the construction activities exceeds six months.

The Tax Code also provides for the concept of a non-dependent agent, which means, specifically, a Ukrainian agent acting on behalf of more than one non-resident in the ordinary course of its business should not constitute a PE in Ukraine.

Still, there is a list of exclusions from the PE definition. In particular, according to the Tax Code, auxiliary and preparatory services of a non-resident should not result in the creation of a PE, but, in practice, the Ukrainian tax authorities usually interpret the term ‘business activity’ in a very broad sense, and, without DTT protection, may consider any type of activity as giving rise to a taxable presence (i.e. a PE) of a foreign entity in Ukraine.

Other taxes

Value-added tax (VAT)

There are two VAT rates: 20% and 0%. The rate of 20% applies to almost all transactions subject to VAT except the export of goods, which is taxable at 0%. The zero rate also applies to the supply of international transport services (confirmed by a single international shipping document), toll manufacturing services (if the finished goods are then exported from Ukraine), and certain other services.

Provision of services to a non-resident is not considered to be zero-rated. Such services are subject to 20% VAT or considered to be outside the scope of VAT (effectively exempt with no right to claim input VAT), depending on the place of supply.

Transactions that are subject to VAT include the following:

- The supply of goods and services when the place of supply is in Ukraine, including when the supply is made free of charge without consideration.
- Transfer of the object of the financial lease to the lessee.
- The importation of goods into Ukraine.
- Exportation of goods.
- International transportation services.
Ukraine

Transactions that are not subject to VAT include the following (among others):

- The issue, sale, and exchange of securities.
- The transfer of property from a lessee to a lessor under an operating lease and the return of property upon expiration of the operating lease (other than in the course of import operations).
- Interest/commission element of lease payments under financial lease agreements.
- Provision of financial loans and bank guarantees.
- Insurance and reinsurance services supplied by licensed insurers and services of insurance/reinsurance agents and brokers.
- Payment of royalties.
- Reorganisation of a legal entity (merge, spin-off, accession, division, and change of legal form).
- Transit of cargo and passengers through Ukrainian territory and services related to such transit.

**VAT registration**

Tax registration as a VAT payer is compulsory if the volume of an entity's taxable transactions exceeds the compulsory registration threshold. The current registration threshold is 300,000 Ukrainian hryvni for the previous 12 months. An entity qualifying as a taxable entity should register with the tax authorities at the place of its location and obtain a VAT registration number. In addition, if a person makes taxable supplies, voluntary VAT registration is available prior to achievement of the mentioned threshold. There is no mechanism for a non-resident to register without a PE in Ukraine. Accordingly, any Ukrainian VAT incurred by a non-resident is non-recoverable.

**VAT recovery and refunds**

Generally, VAT incurred by a registered entity on the purchase and/or importation of goods and services used for the purpose of its own business (except for VAT incurred in relation to exempt supply) may be recovered by way of a credit against output VAT. In case VAT credit exceeds VAT output for two months consecutively, a VAT refund is available in the form of a cash payment or an offset against future VAT liabilities (subject to certain rules and limitations).

An automatic VAT refund procedure is available for eligible exporters. In practice, obtaining a VAT refund by other taxpayers is difficult.

Recently, an option for taxpayers to convert the non-refunded VAT into financial promissory notes was introduced, but no procedure for this tool is established yet.

**VAT returns**

VAT returns must be filed by the taxpayer on a monthly basis. Monthly tax returns are due within 20 calendar days following the end of the reporting month. Taxes, which are expected to be paid, are assessed on the basis of tax returns and due within ten calendar days following the deadline for filing the relevant tax returns.

**Customs duties**

Customs duties are payable by the importer upon import of the goods into Ukraine. Rates of the customs duties are established by the Customs Tariff. Currently, there are two duty rates: relieved and full rates. Relieved rates of duty apply to goods originating from World Trade Organization (WTO) countries and countries that have granted Ukraine ‘most favoured nation’ trade status. Full rates of duty apply to the goods originating from all other countries or where the country of origin cannot be determined (is unknown).
Ukraine

Ukraine has concluded free-trade agreements (FTAs) with the Commonwealth of Independent States (CIS), European Free Trade Association (EFTA) countries, Georgia, Macedonia, and Montenegro. These agreements allow many goods to be imported into Ukraine duty-free (or with reduced rates of duty), subject to compliance with preferential rules of origin.

Ukraine has recently completed the negotiation of an FTA with the European Union; however, when this agreement will finally be signed and come into force is uncertain.

Ukraine has no export duties except on natural gas, scrap metal, livestock, rawhide, barley, and certain oil seeds.

Special kinds of import duties (i.e. seasonal, special, anti-dumping, and countervailing) may be applicable on the import of certain goods. For instance, in April 2013 the Ukrainian government introduced special customs duties (6.46% to 12.95%) for the import of cars (with engine volume from 1,000 to 2,200 cubic centimetres), regardless of their country of origin.

**Excise taxes**

Excise tax applies to certain goods imported to or produced in Ukraine. Excisable goods include ethyl alcohol, alcoholic beverages, tobacco and tobacco products, cars, car bodies, motorbikes, liquefied gas, petrol, diesel fuel, and certain other oil products, as well as disposal of qualifying securities and transactions with derivatives. Ukraine is currently experiencing a gradual increase of excise tax on oil products, tobacco goods, ethyl alcohol, and alcoholic beverages.

Rates of excise tax can be ad valorem (a percentage of the value of the goods), specific (in monetary units per unit of goods), or combined.

Special excise tax applies to disposal of securities and transactions with derivatives with the following criteria and tax rates:

- 0.1% for off-stock exchange transactions with listed securities.
- 1.5% for off-stock exchange transactions with non-listed securities.
- Five tax-free allowances (currently UAH 85) for off-exchange derivatives.

Shares of private joint stock companies, corporate rights issued in a form other than securities, securities issued by non-residents, and a few other financial instruments and transactions are exempt from excise tax.

**Property taxes**

Owners of residential property in Ukraine (both individuals and legal entities, including non-residents) are subject to real estate tax. The tax base is determined based on the size of the living space of a real estate asset.

Legal entities are obligated to submit a tax return by 1 February of the reporting year and pay tax in equal instalments within 30 days following each reporting quarter.

**Land tax**

Land tax is assessed annually for the following year and is paid monthly in equal instalments by the owners or users of the land. The rate of land tax depends on the category, location, and the existence of a state valuation for each particular land plot.
Stamp duties
Stamp duty is imposed on certain actions, including the notarisation of contracts and the filing of documents with the courts. In most cases, the amounts involved are nominal.

Operations carried out at commodity exchanges and the sale of real estate attracts a stamp duty of 1%.

Special Pension Fund charges
The following special charges are payable to the State Pension Fund:

- 3%, 4%, or 5% charge on the value of a new car, which is subject to the first registration with the state authority (state traffic inspectorate), depending on the said value (for the year 2013, the following criteria is applicable: up to UAH 189,255, 3%; above UAH 189,255, but not more than UAH 332,630, 4%; above UAH 332,630, 5%).
- 1% charge on the acquisition of real estate payable by individuals and legal entities that purchase real estate.
- 7.5% charge on mobile communication services.
- 5% charge on sales of jewellery.

Charges on environmental pollution
Environmental pollution charges (ecological taxes) are imposed on any legal entity that discharges contaminants into the environment (air or water) or disposes waste. The actual rate depends on the type and toxicity of each contaminant.

Charge for subsoil usage
Companies engaged in extracting mineral resource in Ukraine, regardless of the form of their ownership, are liable for a charge for use of subsoil.

The payments to be made for subsoil usage are calculated as follows:

\[
\text{volume of extracted mineral resources} \times \text{specific tax rate} \times \text{coefficient}
\]

Payments for subsoil use for hydrocarbons’ producers should be calculated as a percentage of the value of extracted products (for gas, the average customs value of imported gas; for oil, the average price for Urals at the London International Petroleum Exchange). Separate charge rates for the use of subsoil apply to the storage of oil and gas products.

Hydrocarbons extracted under a product sharing agreement are subject to reduced tax rates of 1.25% for gas and 2% for oil.

Charges for the use of subsoil are deductible for CIT purposes.

Rental payments (oil and gas industry)
Rental payments for extraction of oil, gas, and gas condensate are cancelled as of 1 January 2013.

Payroll taxes
Employers and other business entities that pay income to individuals are defined as tax agents and are responsible for withholding the tax and mandatory unified social contribution (USC) and remitting them to the state.
Unified social contributions (USC)
Ukrainian mandatory state USC apply to all salaries paid through the payroll of a Ukrainian entity or a Ukrainian representative office of a foreign entity, as well as remuneration paid to individuals under civil agreements.

For 2013, the following rates apply to gross remuneration: 36.76% to 49.7%, depending on the level of risk of accidents in the entity’s industry sector (34.7% for remuneration of services based on civil agreements).

The taxable base for contributions (both employee and employer) is capped. For 2013, the cap is set at 17 times the subsistence minimum set for able-bodied individuals (based on the subsistence minimum valid as of 1 January 2013, the cap is UAH 19,499, approximately 2,437 United States dollars [USD] per month). The cap will be increased to UAH 20,706 (approximately USD 2,588) in December 2013.

Other local taxes
According to the Tax Code, there are four other local taxes that may be levied at the discretion of the local authorities: tax on real estate other than land plots, vehicle parking place duties, duties for the exercise of some entrepreneurial activities, and tourism duty.

Branch income

Domestic incorporated branches or other separate units are treated as separate taxpayers for CIT purposes. However, their head offices may pay consolidated CIT.

In Ukraine, it is not currently possible to register a branch of a foreign legal entity. A foreign company may set up a representative office in Ukraine, which is similar to an unincorporated branch. A non-resident company conducting business activities via a representative office is deemed to carry out business in Ukraine through a PE and may be subject to CIT at 19% in 2013 (16% starting from 1 January 2014 and onwards) unless protected by a DTT. When a foreign company conducts business in Ukraine through a PE, taxable income should be determined on the same basis as for domestic entities. If the PE has no separate accounts, the taxable income may be determined as 30% of sales proceeds attributed to the PE (income derived in respect of activities in Ukraine).

Distributions made by a PE (out of after-tax income) to its head office should not trigger any further taxation in Ukraine, provided that the head office is in a jurisdiction that has an effective DTT with Ukraine.

Income determination

The Tax Code determines taxable profits as taxable income (items of income defined by the Tax Code) less deductible expenses (expenses allowed for deduction by the Tax Code), including depreciation charges. Taxable income includes any operational (business) income received or accrued within a reporting period and other income, which includes generally passive and irregular receivables. Items of income are recorded when a legal title on goods is transferred or when a document confirming the rendering of services is signed by the parties.
**Inventory valuation**
A taxpayer is entitled to adopt any of the methods of inventory valuation prescribed by the accounting standards, namely: the first in first out (FIFO) method, weighted average methods, identified cost of unit of goods, normative cost, or sale price. The last in first out (LIFO) method does not apply in Ukraine.

**Capital gains on the sale of property**
Capital gains realised by the local entity on the sale of buildings are calculated as the difference between the sales price of the fixed asset and its net book value. Capital gains on the sale of land are computed as the difference between the sale price of the land and adjusted purchase price of the land.

**Income from securities**
New rules on taxing transactions with securities were introduced in 2013.

Taxable gains on sale of securities are subject to a reduced CIT rate, while losses are available to offset future gains. Gains/losses should be computed by individual transactions, but the taxable gain will be calculated on an aggregate basis. The aggregate gain is subject to a 10% CIT, and the aggregate loss can be carried forward.

Gains and losses should be calculated and reported separately for stock exchange transactions and off-stock exchange transactions.

The maximum carryforward period for losses from off-stock exchange transactions with securities and derivatives is three years.

Accumulated taxable losses from transactions with securities and derivatives as of 1 January 2013 cannot be utilised. The cost of securities held at that date will be deducted in arriving at taxable gain when these securities are sold.

For information on a special excise tax on disposal of securities and transactions with derivatives, see Excise taxes in the Other taxes section.

**Dividend income**
Dividends received by a Ukrainian entity from another Ukrainian entity are exempt from CIT. Dividends received by Ukrainian companies from foreign companies controlled (at least 20% shareholding) by these Ukrainian companies (except for those having ‘offshore status’) are exempt from CIT.

Companies paying dividends are required to pay advance CIT at the standard rate, unless the dividends are paid to individuals or out of received dividends (with some other exceptions). The advance payment is used to meet subsequent CIT liabilities (other than for insurance companies). If the advance tax is not able to be used in the year the dividend is paid, it is carried over to future years, but cannot be refunded.

According to the tax office clarification, advance CIT on dividends paid in 2013 cannot be offset against ‘general’ advance CIT, which is payable by taxpayers whose annual turnover for the previous year exceeds UAH 10 million.

**Interest income**
Interest received by taxpayers is included in their taxable income on a general basis.
Rent/royalties income
Income from rent/royalties received by taxpayers is included in their taxable income on a general basis.

Foreign exchange gains/losses
Taxable income in foreign currency is revaluated in Ukrainian hryvni at the National Bank of Ukraine’s (NBU’s) official exchange rate at the date when the respective taxable income should be recognised under the general rules of the Tax Code, and, in terms of previously received payments, at the exchange rate on the receipt date.

Expenses incurred (and not paid) by the taxpayer in a foreign currency on the purchase of goods, works, and services are recognised at the NBU’s official exchange rate on the date of such purchase, and, in case of a previous payment, at the exchange rate on the payment date.

Realised and non-realised foreign exchange gains/losses are generally treated as taxable/deductible. Foreign currency differences arising from unsettled debt balances and foreign currency account balances are computed according to accounting standards.

Other significant items
Ukrainian tax legislation does not provide special tax treatment for bribes, kickbacks, or illegal payments. However, all income should be included in taxable income unless a specific provision in the law says otherwise.

Funds or property returned to the holder of corporate rights issued by a legal entity after that entity’s liquidation, but not in excess of the shares’ par value, are not taxable. If the amount of liquidation proceeds paid by a taxpayer who is being liquidated to its shareholders is less than the amount of funds contributed by the shareholders to the taxpayer’s charter capital, the difference is not included in the taxpayer’s taxable income.

Interest-free loans from non-residents are taxable (and deductible upon repayment), unless they are received from shareholders for a period not exceeding 365 calendar days.

Foreign income
Foreign income is taxed under the general rules, and there are no special rules regarding anti-deferral or unremitted earnings.

Deductions
Deductible expenses include any operational (related to the cost of goods/services sold) or other expenses actually incurred or accrued in respect of the taxpayer's business, excluding non-allowable expenses specified by the Tax Code.

Generally, operational expenses are recognised at the date of income recognition from the goods/services sold; other expenses are recognised when they are actually incurred.

Depreciation and amortisation
Assets costing more than UAH 2,500 that have a useful life exceeding one year are required to be depreciated. Depreciation is determined on a monthly basis and is computed using the following methods:
Ukraine

- Straight-line.
- Reducing balance.
- Method of accelerated reduction of a residual value.
- Cumulative.
- Production-based.

Fixed assets are divided into 16 groups according to their statutory minimal useful life. The useful life of fixed assets may be extended by a taxpayer.

Expenses related to repairs of fixed assets (including leasehold) are subject to depreciation in excess of 10% of the aggregate book value of all assets as of the beginning of the tax year (the amount below the limit is deductible).

Land value may not be depreciated unless the land plot is purchased together with a building (object of Group 1).

The following intangible assets may be amortised using one of the above mentioned methods over the period of an asset’s lifetime as defined in the documents certifying the rights to the intangibles and considering the minimum period set by the law:

- Rights to use natural resources.
- Rights to use property.
- Rights on intangible assets.
- Technology, know how (not less than five years).
- Copyrights (not less than two years).
- Other intangible assets.

If not stated in the documents, the useful life of an intangible asset is ten years of continuous use.

**Goodwill**

Amortisation of goodwill is not permitted (not deductible) for tax purposes.

**Organisational and start-up expenses**

Deduction of organisational and start-up expenses incurred prior to the entity's registration is not explicitly allowed by the law.

**Research and development (R&D) expenses**

R&D expenses, other than those subject to amortisation, are deductible when incurred, provided they are business-related.

**Interest expenses**

Interest paid is generally deductible for CIT purposes if incurred for business needs. However, a limitation for deducting interest expense applies if at least 50% of the borrower’s capital belongs to non-residents and the interest is payable to non-residents (and related entities) that have a holding on the borrower’s capital. The deductible interest paid to those persons and their related parties cannot exceed the amount of interest income derived plus 50% of the company’s taxable profit (excluding interest income and before the deduction of interest). Any interest paid to affiliates in excess of this limit is carried forward to future tax periods.

**Bad debt**

The decrease of taxable income for bad and doubtful debt is allowed if (i) the creditor applies to the court with a claim for debt collection or for initiating bankruptcy
proceedings or (ii) the creditor has a note of execution for collection executed by a notary. At the same time, the cost of goods/services sold should be adjusted as well.

When a creditor pursues action to recover the debt, the debtor is required to adjust its deductions at the moment of (i) the court’s decision taking effect or (ii) delivery of the note on debt collection by the notary.

**Charitable contributions**
Charitable donations made by a CIT payer in monetary or non-monetary form to certain types of non-profit organisations are deductible, up to a limit of 4% of the prior year’s taxable profit.

**Pension expenses**
The obligatory Ukrainian social security insurance contributions, including state pension contributions charged on payroll expenses, are deductible for employers.

If an employer pays non-state pension contributions at its own expense, such contributions may be deducted. Based on the Transition Provisions of the Tax Code, such a deduction is limited to 15% of the annual salary of each employee insured (cumulatively for the year), but shall not exceed 15% of the salary per month of each employee insured, but not more than five times the minimal salary (i.e. UAH 5,735 [approximately USD 717] for January 2013 to November 2013, UAH 6,090 [approximately USD 761] for December 2013).

**Payment for directors**
Payments (including bonuses) relating to business are normally deductible payments, if properly structured.

**Fines and penalties**
Fines and penalties are not deductible.

**Taxes**
CIT, personal income taxes, WHT/remittance taxes, and VAT incurred on purchases are disallowed for deductions. Fines and penalties paid to the budget are not deductible.

VAT is deductible if it cannot be offset against output VAT. Other taxes, if paid in the course of business activities, are generally deductible in full.

**Other significant items**
Examples of other non-deductible items include the following:

- Expenses that are not supported by relevant documents (e.g. contracts, vouchers, receipts, cheques).
- Service fees paid to related entities, unless there is documentation to prove that the fees are paid in relation to services actually performed.
- Expenses related to receptions, presentations, entertainment, sampling, and free of charge provision of goods and services. However, advertising expenses are deductible according to the general rule.
- Fees for consultancy, marketing, and advertising services, as well as royalties, paid to non-residents, are limited for deduction (up to 4% of net revenue for the year preceding the reporting one, excluding VAT and excise taxes, separately for royalties and services). They are not deductible entirely if their recipient is not a beneficial owner (for royalty payments) or resides in an offshore jurisdiction. In addition, royalties paid to a person who shall not be taxed with regard to such royalty in the
Ukraine
country of its residence or royalties for intellectual property (IP) rights originated in Ukraine are also fully non-deductible.

- Engineering fees payable to a non-resident are deductible only up to 5% of the customs value of the equipment imported under a related contract. The engineering fees are not deductible entirely if their recipient is not a beneficial owner or a resident in an offshore jurisdiction.
- Business trip expenses for individuals that are not employees or members of the taxpayer’s management/supervising bodies. Business trip expenses for employees are deductible within the limits set by the Cabinet of Ministers of Ukraine.
- Expenses relating to providing employees with uniforms, safety clothes, shoes, and food, if the amount exceeds the norms established by the Cabinet of Ministers of Ukraine.
- Banks are entitled to a tax deduction of 20% of loan-loss provisions, excluding off-balance (including interest and commissions accrued, the amount of guarantees issued, and in respect of all securities purchased, etc.). Other financial institutions are entitled to a deduction of up to 10% of all loan-loss provisions.

**Net operating losses**
Ukrainian tax legislation does not provide refunds for deductions. However, tax losses may be carried forward, subject to certain limitations.

Tax losses accumulated as of 1 January 2012 will be carried forward and used from 2012 to 2015, 25% each year. Thus, 25% of such losses, together with tax losses for 2012 (including an unutilised 25% limit for 2012, if any), may be carried forward and used in 2013.

Ukrainian tax legislation does not provide for refunds for losses carried back.

**Payments to foreign affiliates**
Payments relating to business are normally deductible payments. When such payments are made to related parties, however, the payer is required to hold documentary evidence that the payments are for services actually rendered. The amount of the payment may also not exceed the ‘usual’ (market) price. Reimbursement of costs incurred by holding companies is directly prohibited for deduction.

Payments for goods or services, as well as interest, to foreign entities registered in listed jurisdictions operating offshore tax regimes (36 tax haven jurisdictions are listed by Ukraine’s Cabinet of Ministers) are deductible at 85% of payments, unless evidence is held that the foreign entity is subject to the ordinary tax rules of the respective foreign jurisdiction (i.e. it does not benefit from the offshore tax regime).

**Expenses connected with the sales of products to related parties**
According to a direct provision in the Tax Code, expenses connected with the sales of products to related parties must only be recognised to the extent that they do not exceed the income from such sales.

**Group taxation**
In Ukraine, each company is taxed individually. However, companies that have domestic unincorporated branches may pay consolidated CIT or as separate branches.
Transfer pricing
Starting from 1 January 2013, new Ukrainian transfer pricing rules apply. The Tax Code provides the following list of controlled transactions:

- Transactions between related parties.
- Barter transactions.
- Transactions with taxpayers that apply special tax regimes or a CIT rate other than the standard rate, or with non-payers of Ukrainian CIT (except for individuals who are not registered as entrepreneurs).

The Tax Code provides for a 'safe harbour' threshold according to which the price in a controlled transaction may be subject to transfer pricing adjustments only in case of more than 20% deviation from the market (usual) price.

There are five pricing methods provided by the Tax Code of Ukraine that can be used to determine the market price:

- Comparable uncontrolled price (CUP) method.
- Resale price method.
- Cost plus method.
- Profit split method.
- Net profit (margin) method.

At the same time, the methodology of the application of these methods is not clearly described in the Tax Code.

The Tax Code does not contain any provisions regarding specialised transfer pricing audits. Transfer pricing control is envisaged as a part of a full-scope tax audit.

Companies registered as ‘large taxpayers’ are entitled to conclude advance pricing agreements (APAs) with the tax office. The purpose of an APA is to agree upfront with the tax office on the market (arm’s-length) character of the terms of transactions between related parties. Currently, the Ukrainian tax legislation does not contain a clear procedure for the application and conclusion of APAs.

The Ukrainian tax authorities increase their focus on transfer pricing and currently are developing new transfer pricing legislation based on OECD Transfer Pricing Guidelines with more specification of the methods and the methodology of their application. The draft Law, which is going to introduce changes to the Tax Code of Ukraine in respect of transfer pricing, is currently being considered by the Parliament. Mandatory reporting of controlled transactions and transfer pricing documentation requirements are also going to be introduced. It is expected that this law, if approved by the Parliament and signed by the President, will come into force starting from 1 July 2013 or from 1 January 2014.

Thin capitalisation
Ukraine does not have thin capitalisation rules. Instead, there are restrictions on related parties’ interest deductibility rules. The interest paid to a related party (as defined in the Tax Code) is deductible within the amount of interest income plus 50% of the company's taxable profit (excluding interest income and before the deduction of interest). Any interest paid to affiliates in excess of this limit is carried forward to future tax periods.
Ukraine

**Controlled foreign companies (CFCs)**
There are no specific CFC rules in Ukraine.

**Treatment of inter-company items**
Ukrainian tax legislation provides the following treatment for inter-company items:

- Dividends paid by Ukrainian companies are not tax deductible. Dividends received are not generally taxable.
- The payer of royalties is required to hold documentary evidence that the royalty payments are made for services actually rendered. The amount of the payment also may not exceed the ‘usual’ (market) price. Royalties paid to a non-resident are deductible only up to 4% of net revenue of the previous year. Royalties are completely non-deductible in respect of intangibles originated in Ukraine and paid to residents of offshore jurisdictions, persons who are not beneficial owners, or persons that will not be taxed with regard to such royalty in the country of residence.
- Expenses in relation to the financing of management bodies, including holding companies, are not tax deductible.
- Cost-sharing and similar intra-group payments, other than remuneration for services actually rendered, may not be deductible.
- Transactions for the receipt (provision) of financial aid between a taxpayer and its branches and other separate units without the legal entity status located in Ukraine shall not affect their taxable income or deductible expenses.
- Interest on loans is limited (see Interest expenses in the Deductions section).

---

**Tax credits and incentives**
The following businesses are entitled to benefit from ten years of CIT exemption starting from 1 January 2011 (subject to certain limitations):

- The light industry.
- Ship and aircraft-building industry.
- Enterprises that produce machinery for the agricultural industry.
- Power generating companies that receive profit from the generation of electric energy from renewable energy sources.
- Three, four, and five stars hotels.

There are also several other tax incentives in respect of CIT available, as follows:

- The publishing industry and cinematography are entitled to benefit from an incentive regime until 1 January 2015 and 1 January 2016 respectively.
- Certain incentives are available for taxation of profit of investment funds.
- For enterprises selling domestically produced energy saving goods in Ukraine, up to 80% of profits may be tax exempt; and for enterprises adopting energy saving projects, up to 50% of profits may be exempt.
- Income from the sale of bio-energy fuel by producers of bio-energy fuel is exempt from CIT until 2020. Also, the same tax exemption is available for producers of electric and heat energy generated from bio-energy fuel, as well as for producers of domestic equipment powered with bio-energy power.
- A similar tax incentive (exemption from CIT) is also available for producers of gas (methane) until 2020.
- The profits of producers of qualifying baby food products from the sale of such domestically produced products are tax exempt.
• The investor’s income derived from qualifying investment projects (resulting in job creation) in qualifying industries is exempt from CIT until 2018 and taxed at a reduced CIT rate of 8% from 2018 to 2023.
• Qualifying IT companies are entitled to use a reduced CIT rate of 5% until 2023.
• Taxable gains on sale of securities are subject to a reduced CIT rate of 10%.
• There are also certain tax incentives for fuel and energy sector and for enterprises supplying water, heat, and wastewater disposal services.

**Favourable tax regime for agricultural producers**
Agricultural producers are entitled to use a very favourable tax regime (with exemption from CIT), provided certain requirements are met. The main criterion requires that income from the sale of their own agricultural products constitutes not less than 75% of their total gross revenue of previous tax (reporting) year.

Under this regime, the amount of tax due depends on the square of the agricultural land plot owned or rented by agricultural producers. The tax rates vary from 0.03% to 1%, apply to the normative monetary value of one hectare of agricultural land, and depend on the type of such land.

**Favourable tax regime for informational technology (IT) companies**
Qualifying IT companies are entitled to utilise the reduced CIT rate of 5% from 1 January 2013 until 1 January 2023. The main criterion requires that income from IT activity for the last four consecutive quarters (two for newly established companies) constitutes not less than 70% of the total gross revenue.

The list of qualifying IT activities, in particular, includes production/sale of software, computer programming and similar activities, consulting on information, implementation and management of IT systems, and data processing.

Some VAT incentives are also available for the supply of qualifying IT products (e.g. result of IT programming in the forms of operating systems; systems, application, entertaining, and/or educating software [their components]; internet sites and/or online-services; and cryptographic tools for information security) during the period from 1 January 2013 until 1 January 2023.

**Favourable tax regime for investors**
Starting from 1 January 2013 until 1 January 2018, Ukraine provides a rate of 0% CIT for taxation of investor’s income derived from qualifying investment projects resulting in job creation in qualifying industries. Thereafter, a reduced CIT rate of 8% will apply until 2023.

The incentives are provided under the following conditions:

• The value of the investment should exceed EUR 3 million for large businesses, EUR 1 million for medium businesses, and EUR 0.5 million for small businesses.
• The number of new jobs created should exceed 150 for large businesses, 50 for medium businesses, and 25 for small businesses.
• The salary level should exceed 2.5 times the minimum salary set at 1 January of the reporting year (the minimum salary as of 1 January 2013 is equal to UAH 1,147).

A list of such qualifying industries is not developed yet.
Reduced rates for insurance companies
Reduced CIT rates of 0% and 3% are applicable for the income of insurance companies. Long-term life insurance premiums and pension insurance premiums are subject to a 0% rate, but the 3% rate applies for gross insurance premiums regarding other insurance, investment income, and some other income from insurance activities (commissions received for agent and other similar services, penalties for the breach of a contract, etc.). Profits earned by insurance companies from non-insurance activities are taxed at the standard CIT rate.

Simplified (unified) tax regime
Entities and individuals (i.e. private entrepreneurs) are entitled to use a simplified tax regime (with exemption from CIT) if certain requirements are met. There are six groups of simplified taxpayers available (four groups for private entrepreneurs and two for legal entities), depending on the types of activities, the level of income (up to UAH 20 million per annum) and number of employees' criteria.

This regime foresees a low effective tax rate (from 1% of the minimal salary per month for a private entrepreneur of the first group up to 7% of turnover for an entity of the sixth group) and easier reporting for small businesses. However, specific types of business activities are prohibited under this tax regime (inter alia, transactions with certain excisable products, exploration/production/sale of precious metals and stones, company management, and communication services).

Tax holidays
The Tax Code has introduced tax holidays for small businesses, which are unlikely to impact international businesses. In particular, until the end of the year 2015, a zero income tax rate is applicable for those taxpayers who meet certain criteria (including maximum amount of total income for reporting period, minimal amount of salary paid to employees, date of incorporation, etc.)

Foreign tax credit
Tax residents are allowed a credit for foreign taxes paid on income received abroad, provided there is a DTT between Ukraine and the relevant foreign state. The amount of foreign tax credit is limited to the amount of Ukrainian tax that would arise from the equivalent income in Ukraine. To claim a tax credit, the taxpayer requires an official confirmation of payment issued by the relevant foreign tax authority.

Withholding taxes
WHT must be remitted to the authorities no later than the date when the payment is made to the income recipient.

Passive income (dividends, interest, royalties) from Ukrainian sources that is paid to non-resident entities is generally subject to 15% WHT. Other payments, including payments for engineering services, lease payments, and agency and brokerage fees, are also subject to 15% WHT, but payments for most other services are not subject to withholding.

A 15% WHT rate applies to income on the sale of real estate and on profits from the sale of securities.

Payments for freight services (including sea freight) are subject to 6% WHT.
WHT rates may be reduced under a relevant tax treaty.

The non-resident recipient of income sourced in Ukraine must also be considered the beneficial owner of such income in order to benefit from reduced tax rates under relevant tax treaties. According to the Tax Code, agents, nominee holders, and other intermediaries in respect of received income cannot be beneficial owners of income sourced in Ukraine, and, therefore, are not entitled to favourable treaty provisions.

Payments to non-resident persons for advertising services are not subject to withholding. However, the resident payer is required to pay, from its own funds, a 20% remittance tax based on the value of such services.

A resident payer is similarly required to pay, from its own funds, a 12% remittance tax if a payment is made to a foreign insurer or reinsurer whose rating of financial reliability does not meet requirements set by the authorised state agency. Otherwise, 0% or 4% rates apply.

As taxes on advertising and insurance are levied on a resident party, they cannot be relieved using a tax treaty.

Ukraine
Recipent | Dividends (%) | Interest (%) (2) | Royalties (%) (3) |
--- | --- | --- | --- |
Vietnam | 10 | 10 | 10 |

Notes
1. The ownership threshold for the non-portfolio rate is 10%, 20%, 25%, or 50%, depending on the specific provisions in the treaty.
2. Several treaties contain a rate of 0% on interest paid to or guaranteed by a government or one of its agencies.
3. If more than one rate is shown, this means that the rate will depend on the type of royalties paid.
4. The lower rate applies to interest on current or deposit bank accounts and certificates of deposit until 1 January 2015.
5. The lower rate applies to interest paid on certain credit sales and on loans granted by a financial institution.
6. The treaties with Cyprus, Japan, Malaysia, and Spain were entered into by the USSR before it dissolved. Ukraine will continue to honour these treaties, unless they are superseded. On 8 November 2012, a new tax treaty between Ukraine and Cyprus and a protocol to the treaty were signed. The new treaty introduces the following WHT rates: Dividends: 5%/15%; Interest: 2%; Royalties: 5%/10%. There is no certainty when the new treaty will be ratified by both Parliaments. If ratified, the treaty will come into force a year following the year of its ratification.
7. The lower rate applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, unless the indebtedness is between associated enterprises.
8. The 0% rate applies if the investor holds at least 50% of the capital of the company paying the dividends and the capital invested is at least 1 million United States dollars (USD); the payer of dividends should not operate in the field of gambling, show business or an intermediation business, or in auctions.
9. The 0% rate will apply if a French company or companies hold, directly or indirectly, at least 50% of the capital of the Ukrainian company, and the aggregate investments exceed 5 million French francs.
10. The lower rate applies to interest paid on any loan granted by a bank.
11. The 0% rate applies if the investor directly holds at least 50% of the capital of the company paying the dividends, and the capital invested is at least USD 300,000.
12. The 10% rate applies if the company receiving the dividend has, for an uninterrupted period of two years before the dividend is paid, owned at least 25% of the capital stock of the company paying the dividends.
13. The 5% rate applies if the capital invested is at least USD 50,000.
14. The 0% rate applies if the Swedish company directly holds at least 25% of the voting power of the company paying the dividends and at least 50% of the Swedish company is held by Swedish residents.
15. The 0% rate applies only if the royalties are taxable in the United Kingdom.
16. The 15% rate applies to dividends from privileged shares or other fixed payments on shares, as well as to disguised employment income.
17. The 10% rate applies if the company receiving the dividend directly owns at least 25% of the capital stock of the company paying the dividends.
18. The 5% rate applies if the investor (other than partnership) being a beneficial owner holds at least 25% of the capital of the company paying the dividends.
19. The 5% rate applies if the investor being a beneficial owner holds at least 20% of the capital of the company paying the dividends.

On 19 April 2013, a new tax treaty between Ukraine and Ireland and a protocol to the treaty were signed. The treaty introduces the following WHT rates: dividends: 5%/15%; interest: 5%/10%; royalties: 5%/10%. To become effective, the treaty needs to be ratified by the parliaments of the two states. If such ratification happens before 31 December 2013, the new treaty will apply from 1 January 2014.

**Tax administration**

**Taxable period**
The reporting year for companies generally follows the calendar year. The exception is for agricultural manufacturers, whose reporting period starts from 1 July of the current reporting year and ends on 30 June of the next reporting year.
**Ukraine**

**Tax returns**
Tax returns for CIT should generally be submitted on an annual basis, but some taxpayers will have to submit them quarterly (in case the amount of CIT advance payment cannot be determined).

The monthly returns (e.g. VAT) must be filed within 20 calendar days following the end of the respective reporting month.

Quarterly returns are due within 40 calendar days following the last day of the reporting quarter.

Annual returns are due within 60 calendar days following the last day of the reporting year.

Starting from 2013, taxpayers have to submit to the tax authorities financial statements, including the calculation of differences between the statutory and tax accounts for CIT purposes in accordance with the form and based on the methodology approved by the Ministry of Finance of Ukraine.

Resident companies and non-resident entities with a PE in Ukraine must keep records that comply with the tax rules.

**Payment of tax**
Taxes payable assessed on the basis of tax returns are due within ten calendar days following the deadline for filing the relevant tax returns.

Taxpayers whose annual turnover for the previous year exceeds UAH 10 million (excluding agricultural producers) have to make monthly advance CIT payments in the amount of one-twelfth of the previous year’s tax liabilities. Together with an annual tax return, such taxpayers have to provide a calculation of monthly advance payments for the next 12 months. The advance payments should be made by the 30th day of each month.

Taxpayers, whose annual turnover for the previous year does not exceed UAH 10 million, and newly established companies, have to submit an annual tax return and pay CIT on an annual basis.

**Penalties**
The tax authorities will charge significant penalties for late filing, late payment, or understating tax liabilities.

Late payment of tax may result in a penalty in the amount of 10% of the underpaid amount for delays of up to 30 calendar days (20% if the delay exceeds said term).

In case of understatement of tax liabilities, the penalty amounts depend on the frequency of violations (i.e. understatement of CIT and VAT liabilities, overstatement of VAT refunds) during a period of 1,095 consecutive calendar days. In particular: 25% for the first violation; 50% for the second violation, and each subsequent violation related to the same taxes.

In addition to these penalties, late payment interest is calculated by the application of a rate of 120% per annum of the prime rate of the National Bank of Ukraine, effective from the actual date of underpayment on the amount of additionally assessed tax liabilities for the whole period of underpayment.
If a taxpayer fails to withhold tax when required, a penalty of up to 75% of the deficient tax is imposed.

**Tax audit process**
The tax authorities may carry out scheduled audits once a year. Taxpayers must be notified of the audit in writing at least ten days in advance. In addition, the tax authorities may perform out-of-schedule audits in certain circumstances (e.g. if a taxpayer does not file tax returns on a timely basis or is reorganised or liquidated).

**Statute of limitations**
Under Ukrainian tax legislation, a three year statute of limitations applies on any outstanding Ukrainian tax liability, starting from the date a tax return is due to be filed and/or tax, if assessed by the tax authorities, is due to be paid. There is no limit on the period in which an assessment may be made if a taxpayer has deliberately evaded tax (if proven in court) or when a taxpayer fails to file a return.

**Tax advice**
Tax advice may be sought from the tax authorities, who are required to issue such clarifications. Tax advice is not legally binding and may be challenged in court. A taxpayer may use the tax advice as guidance on the methodology to be applied by the taxpayer. In practice, the tax advice often does not provide solid protection against assessment of tax, but does protect from penalties.

**Topics of focus for tax authorities**
The tax authorities are focusing on the following major areas with regards to corporate taxpayer compliance:

- Business nature of any taxpayer’s deductible expenses and their proper documenting for tax purposes.
- Deductibility of marketing, advertising, and promotional expenses.
- Deductibility of expenses that could be treated as financing of personal needs of individuals (e.g. housing, travel allowance, cost of education).
- Losses carried forward.
- Proper payment of advance CIT (either general or connected to payments of dividends).
- Deductibility of the fees paid for the services from non-residents.

**Other issues**

**Exchange controls**
The key issues regarding Ukraine’s current exchange control regulations are as follows:

- Trade related settlements between residents and non-residents can be made in foreign currency and Ukrainian hryvni.
- Payments in foreign currencies between residents in the territory of Ukraine are generally prohibited.
- Salaries to Ukrainian staff must be paid in Ukrainian currency (but expatriate employees can be paid in hard currency).
- Foreign loans must be registered with the NBU before funds are remitted to Ukraine. The NBU has reinstated a maximum interest rate and other charges that may be applied to foreign currency loans obtained from non-residents.
- The maximum allowable interest rates for foreign fixed rate loans in hard currency (inclusive of any fees and charges due under the loan agreement) are 9.8% per
annum for loans up to one year; 10% per annum for loans for one to three years; and 11% per annum for loans over three years. For loans with floating interest rates, the maximum allowable interest rate is three months of USD London Interbank Offered Rate (LIBOR) plus 7.5%.

- Proceeds from exports must be credited to the exporter’s Ukrainian bank account in general within 180 days (within 90 days until 19 November 2013 with possible prolongation) from the date of customs clearance (for goods) or the date of service delivery. Similarly, prepaid goods must be imported and cleared through customs in general within 180 days (within 90 days until 19 November 2013 with possible prolongation) of payment. Failure to do so results in a fine of 0.3% of the amount due or paid for each day of delay but not higher than the debt itself.
- Until 19 November 2013 (with possible prolongation), Ukrainian companies are obligated to exchange at the local market 50% of their foreign currency proceeds received from the export of goods.
- Payments by Ukrainian business entities for services rendered by non-residents for amounts exceeding 100,000 euros (EUR) (annually) require confirmation from the Foreign Markets Monitoring Centre (FMMC) that the fee for the services does not exceed market prices. Provided the relevant documentation is in place, this should not delay payment. However, the process cannot be taken lightly, because no payment will be permitted if the FMMC rejects an application.

A number of foreign currency transactions may be undertaken only if an individual licence has been obtained from the NBU.

**Choice of business entity**

Generally, a limited liability company is the most widely used corporate vehicle in Ukraine for both residents and non-residents. A limited liability company has a simple registration procedure, is inexpensive, and is easy to maintain. It also provides more flexibility in terms of repatriating dividends from Ukraine.

**Business and tax treatment of intellectual property (IP)**

Ukrainian laws concerning IP rights provide for a rather developed background for IP usage. Economic rights of authors and neighbouring rights owners may be assigned or licensed. Moral rights are not transferable. Tax treatment for IP transactions is subject to separate analysis on a case-by-case basis since the Ukrainian tax legislation provides different approaches depending on the nature of the concluded agreement. For instance, the transfer of IP may be treated as a sale of non-tangible assets, the provision of services, or a royalty agreement.

**Mergers and acquisitions (M&A) from a business and tax perspective**

There are no specific laws regulating public takeovers or mergers in Ukraine.

The Ukrainian Tax Code provides some guidance on the tax regime for corporate mergers and acquisitions that is generally favourable for M&A transactions. However, no VAT refund for the newly established company will be available in cash for 12 months after the transaction. Also, no deduction of tax losses is available if the acquired entity was a related party to its acquirer for less than 18 months.

Significant developments

There is a growing trend of tax reforms in the Middle East region, and this may result in changes to the tax laws in the United Arab Emirates (UAE).

In particular, the United Arab Emirates (along with the other Gulf Cooperation Council or GCC states) has committed to introduce a value-added tax (VAT) system. The UAE government has made significant progress towards the introduction of VAT; however, there is no formal legislative announcement yet on its introduction.

Advice should therefore be sought to confirm the current status of the UAE tax laws and reforms.

Taxes on corporate income

The United Arab Emirates is a federation of seven emirates: Abu Dhabi, Dubai, Sharjah, Ajman, Umm Al-Qaiwain, Ras Al-Khaimah, and Fujairah. Currently, the UAE federation does not impose a federal corporate income tax (CIT) in the emirates. However, most of the emirates introduced income tax decrees in the late 1960s, and taxation is therefore determined on an emirate-by-emirate basis.

Under the emirate-based tax decrees, CIT may be imposed on all companies (including branches and permanent establishments [PEs]) at rates of up to 55%. However, in practice, CIT is currently imposed only on companies that produce, trade in, or trade in rights over oil, gas, or other hydrocarbon products (i.e. oil and gas companies) having operations in the emirate.

In addition, some of the emirates have introduced their own specific banking tax decrees, which impose tax on branches of foreign banks at the rate of 20%.

Corporate residence

Tax residence under the tax decrees of the various emirates is based upon the French concept of territoriality. Basically, the French territoriality concept taxes profits based on territorial nexus and does not tax profits earned outside the country.

Permanent establishment (PE)

For non-resident companies, the CIT liability will also depend on the existence of any kind of PE. Most of the emirate tax decrees include a definition of a PE that generally
United Arab Emirates

includes a branch, management or other fixed place of business, and presence through an agent that has and habitually exercises authority to conclude contracts on behalf of such corporation. The definitions need to be considered individually under the applicable tax decree.

**Other taxes**

**Value-added tax (VAT)**
The United Arab Emirates does not currently operate a VAT regime. However, the United Arab Emirates has made significant progress towards its introduction, and it is known that the introduction of a VAT is expected in the near future.

**Customs duties**
Generally, a customs duty of 5% is imposed on the cost, insurance, freight (CIF) value of imports. Other rates may apply to certain goods, such as alcohol and tobacco, and certain exemptions may also be available.

**Excise taxes**
Currently, there are no separate excise taxes levied in the United Arab Emirates.

**Municipal or property tax**
Most emirates impose a municipality tax on properties, mostly by reference to the annual rental value. It is generally the tenants’ obligation to pay the tax; however, the tenants’ employer will typically pay the tax on behalf of the employee. In some cases, separate fees are payable by both tenants and property owners. For example, in the Emirate of Dubai, it is currently imposed at 5% of the annual rental value for tenants or for property owners at 5% of the specified rental index.

Further, a land registration fee may also be levied on transfer of ownership of land or property. For example, a land registration fee is levied in the Emirate of Dubai at a rate of 2% of the sale value of the property (shared between the buyer and seller), payable to the Dubai Land Department.

These levies are imposed and administered differently by each emirate.

**Stamp taxes**
Currently, there are no separate stamp taxes levied in the United Arab Emirates.

**Hotel tax and tourism levies**
Most emirates impose a hotel tax of 5% to 10% on the value of hotel services and entertainment. In addition, there may be tourist fees/charges of up to 10% levied for practice of certain tourist/entertainment activities (e.g. events and shows).

These levies are imposed and administered differently by each emirate.

**Branch income**

As each emirate has a different CIT decree, the decree of each emirate must be consulted to determine the treatment of branches of foreign corporations.

In certain emirates, branches of foreign banks are governed by special banking tax decrees, where they are taxed at 20% of their adjusted taxable income.
**Income determination**

The tax decrees of the various emirates levy taxation on financial accounting profits. The tax decrees may provide for additional adjustments in specific situations. Currently, these adjustments may not be too relevant given that CIT is not imposed for most companies (except for oil and gas companies and branches of foreign banks having operations in the emirate) in the United Arab Emirates.

**Deductions**

Deductions are determined based on accounting principles and the tax decrees of the various emirates. Currently, these deductions may not be too relevant given that CIT is not imposed for most companies (except for oil and gas companies and branches of foreign banks having operations in the emirate) in the United Arab Emirates.

**Group taxation**

The United Arab Emirates does not currently permit group taxation.

**Tax credits and incentives**

The United Arab Emirates has many free trade zones that offer numerous incentives in the form of tax holidays/exemptions.

**Free trade zones (FTZs)**

Currently, there are over 30 FTZs (and business parks) in the United Arab Emirates, each having its own regulations. Businesses (and their employees) established in FTZs are generally eligible for guaranteed tax holidays for ten to 50 year (renewable) periods. The FTZs also offer exemption from customs duties. The laws granting these holidays and exemptions are not consistent among the various FTZs, and each FTZ therefore needs to be considered separately.

**Withholding taxes**

There are currently no withholding taxes (WHTs) in the United Arab Emirates.

**Tax treaty network**

Taxpayers resident in the United Arab Emirates have access to an extensive tax treaty network. These treaties may not be immediately relevant for UAE WHTs (which are not imposed under the UAE tax decrees); however, they may continue to allow for other beneficial tax provisions (e.g. right to tax in the other treaty country). For completeness, the treaties currently in force are listed below. A number of other treaties are at various stages of negotiation.

**Tax administration**

Most companies operating in the United Arab Emirates (except oil and gas companies and branches of foreign banks) are currently not required to file CIT returns in the United Arab Emirates.
Significant developments

Extensive and far reaching reforms to the United Kingdom’s (UK’s) corporate tax system have been made in the past year, continuing the reform programme since 2010. The reforms have a stated aim of improving the international tax competitiveness of the UK economy by reforming four main areas:

- Rate of corporation tax.
- The corporate tax base.
- Policy making.
- Administration and collection.

Because the UK legislative process can lag behind the announcement of proposals, certain changes are already law, others are very likely, or practically certain, to become law, whilst others are issues announced for wider consultation and future enactment into law.

Most of the reforms to tax rules are announced in December and March before becoming law in the Finance Act in the following July each year. For example, the Finance Act 2012 became substantively enacted on 3 July 2012 and fully enacted on 17 July 2012, and Finance Act 2013 will follow a similar pattern.

Changes that have taken effect in the past year

The introduction of the package of complex and far reaching reforms of the taxation of foreign profits impacts UK inbound, outbound, and purely domestic businesses. Many businesses with international operations are reviewing their business structures in response to the reform.

The elements of the reform package that took effect in the past year include:

- The main rate of corporation tax was reduced to 23% as of 1 April 2013. There are proposals for reductions down to 20% in future years (see below).
- Major reform of the complex controlled foreign company (CFC) regime is effective as of 1 January 2013, so that most genuine overseas businesses will be exempt from the CFC charge. The proposals include a gateway test to exempt smaller businesses entirely, together with safe harbours, which will exclude many others. A partial participation exemption is proposed for the finance income of UK-based businesses. In effect, this will tax such income at no more than 5.25% by 2014 and permits UK businesses to lend to associated companies in a tax advantaged manner.
- Under the UK ‘patent box’ regime, a reduced rate of corporation tax of 10% is being phased in from April 2013 for UK patent income.
- From April 2013, large companies may claim an ‘above the line’ research and development (R&D) credit, instead of an enhanced revenue deduction.
• Increase in the annual investment allowance (capital allowance) from 25,000 pound sterling (GBP) to GBP 250,000 from 1 January 2013 for two years.
• Measures to tackle tax avoidance, including use of high-risk tax avoidance schemes and consultation on what is intended to be a moderate and narrowly focused general anti-abuse rule (GAAR). Commencement of the rule will be late July 2013.
• From 1 April 2013, companies tendering for certain government contracts will be required to disclose details of their recent tax compliance history, and ‘non-compliance occasions’ may impact adversely on tendering decisions.
• From April 2013, UK and non-UK companies and similar non-natural persons will incur additional tax liabilities on the purchases, sale, and holding of high-value residential properties.

Changes enacted but not yet in force
There are no significant changes enacted but not in force, but a number of important proposed reforms for 2013 and beyond are described elsewhere.

Consultations and proposals - ongoing
There are a number of announced proposals for future reform, on which consultations are currently in progress or proposed, most significantly:

• Further reductions in the main rate of corporation tax to 21% as of April 2014, and 20% from April 2015.
• A review of the loan relationship and derivatives rules with a view to modernising the rules.
• Review of the taxation of partnerships.

The European Union (EU) is presently working towards a common consolidated corporate tax base (CCCTB) (and/or a common corporate tax base [CCTB]) to harmonise the corporate tax base (but generally not corporate tax rates, although Germany and France intend to adopt a common rate) across the European Union. It is not clear whether the United Kingdom will adopt any final proposal, nor when it will take effect.

Taxes on corporate income
Resident companies are taxable in the United Kingdom on their worldwide profits (subject to an opt out for non-UK branches), while non-resident companies are subject to UK corporate tax only on the trading profits attributable to a UK permanent establishment (PE) plus UK income tax.

General corporation tax rates
The normal rate of corporation tax is 23% for the year ending 31 March 2014. The rate for the year ending 31 March 2013 was 24%. This main rate applies to companies with profits in excess of GBP 1.5 million. It is proposed that this rate will fall to 21% from 1 April 2014 and to 20% from 1 April 2015.

For UK resident companies with tax-adjusted profits below GBP 300,000, a lower rate is generally applicable. This small profits rate is 20%. For companies with tax-adjusted profits between GBP 300,000 and GBP 1.5 million, there is a sliding scale of tax rates. For corporate entities with associated companies, both profit limits are divided by the number of active companies worldwide. From 1 April 2015, this rate will be unified with the main rate of corporation tax into a single rate of 20% for all profits.
United Kingdom

Special corporation tax regimes
With two specific exceptions, there are no special regimes for specific types of business activity; in general, all companies in all sectors are subject to the same corporate tax rates.

Profits that arise from oil or gas extraction, or oil or gas rights, in the United Kingdom and the UK Continental Shelf (‘ring-fence profits’) are subject to tax in the United Kingdom in accordance with rates applicable in 2006, i.e. a full rate of 30% and a small profits rate of 19%. Such activities also attract 100% capital allowances on most capital expenditure. A supplementary tax charge of 32% applies to ‘adjusted’ ring fence profits in addition to normal corporation tax.

Life insurance businesses are also taxed under a special regime, which effectively includes different corporate tax rates as well as special rules for quantifying profits.

Petroleum revenue tax (PRT)
A tax of 50% is levied on profits accruing from oil and gas extracted in the United Kingdom and in the UK territorial sea and continental shelf in respect of fields given development consent before 16 March 1993. PRT has effectively been abolished, together with associated relief and allowances, for fields that received development consent after 15 March 1993. PRT paid is deductible in computing corporation tax on the company's total profits.

Income tax for non-resident companies
A non-resident company is subject to UK corporation tax only on the trading profits of a UK PE. Any other UK-source income received by a non-resident company is subject to UK income tax at the basic rate, currently 20%, without any allowances (subject to any relief offered by a double tax treaty [DTT], if applicable). This charge most commonly arises in relation to UK rental income earned by a non-resident landlord (NRL). The United Kingdom therefore operates an NRL scheme that requires the NRL's letting agent or tenants to withhold the appropriate tax at source unless they have been notified that the NRL has applied for and been given permission to receive gross rents.

Local income taxes
There are no local or provincial taxes on income.

Corporate residence
UK incorporated companies are generally treated as UK resident. However, companies resident in the United Kingdom under domestic law, but treated as solely resident in a different country under that country's DTT with the United Kingdom, are not treated as UK resident for the purposes of UK domestic tax law.

Additionally, subject to the above exception, companies incorporated overseas are also treated as UK resident if their central management and control is situated in the United Kingdom. That is, if the place of the highest form of control and direction over a company’s affairs, as opposed to decisions on the day-to-day running of the business, is in the United Kingdom.

Permanent establishment (PE)
For non-resident companies, the liability to corporation tax depends on the existence of any kind of PE through which a trade is carried on. The meaning of PE for UK tax purposes is set out in statute; it is largely based on the Organisation for Economic
Co-operation and Development (OECD) Model Tax Convention definition, but is not identical in all respects. Subject to the terms of the relevant DTT, a non-resident company will have a PE in the United Kingdom if it either:

• has a fixed place of business in the United Kingdom through which the business of the company is wholly or partly carried on, or
• an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in the United Kingdom.

A fixed place of business includes (but is not limited to) a place of management; a branch; an office; a factory; a workshop; an installation or structure for the exploration of natural resources; a mine, oil or gas well, quarry, or other place of extraction of natural resources; or a building, construction, or installation project. However, a company is not regarded as having a UK PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

Special rules exist to explain how the PE's profits should be evaluated for UK tax purposes (see the Branch income section for more information).

Other taxes

Value-added tax (VAT)
The standard VAT rate of 20% applies to most goods and services, apart from domestic fuel and power and certain other reduced-rate supplies, which are subject to VAT at 5%.

Most exports, most food, most public transport, books and publications, and certain other essential goods and services are zero-rated. Some supplies are exempt, the main categories being the grant of certain interests in land, insurance, financial services, betting and gaming, education, certain sports services, cultural services, and health and welfare. Zero-rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while that incurred in making an exempt supply cannot.

VAT is chargeable on the supply of most goods and services made in the United Kingdom by ‘taxable persons’ in the course of business, when their taxable turnover exceeds the registration thresholds. Taxable persons include individuals, companies, partnerships, clubs, associations, or charities.

Taxable persons who are not normally resident in the United Kingdom, do not have a business establishment in the United Kingdom, and, in the case of companies, are not incorporated in the United Kingdom, but who make taxable supplies, sales to unregistered persons in the United Kingdom, or acquisitions of goods in the United Kingdom above the relevant limits, may be required to register and account for VAT in the United Kingdom.

If the value of taxable supplies is over a specified limit, registration for VAT is compulsory unless the taxable supplies made are wholly or mainly zero-rated, in which case it is possible to apply for exemption from registration. With effect from 1 December 2012, a zero VAT registration threshold applies for businesses not established in the United Kingdom.
The rules applying to VAT and territoriality are different to those applying to direct tax in that they derive from the principles of the place of supply in EU law, as enshrined in European Commission (EC) VAT Directives. Having determined that a supply of goods or services has taken place, the second condition to be determined, if the transaction is to fall within the scope of UK VAT, is whether the supply takes place within the United Kingdom. The place of supply rules are different for goods and for services. A person or business belonging outside the United Kingdom, with no place of business in the United Kingdom, may, nevertheless, be liable to UK VAT registration where the place of supply of those goods or services is in the United Kingdom.

For goods, the basic rule is that a supply of goods is taxable in the territory where those goods are physically located at the time of supply. Hence, if goods are supplied in the United Kingdom by a non-established taxable person, there will still be a liability for VAT purposes, and the person must register for VAT in the United Kingdom if the taxable supplies exceed the current UK VAT registration thresholds. With effect from 1 December 2012, a zero VAT registration threshold applies for businesses not established in the United Kingdom.

For services, the basic rule is that services are treated as made where the customer ‘belongs’ or is established for VAT purposes, and the customer is responsible for accounting for the VAT due via the reverse charge procedure. However, this is subject to a number of special rules and exceptions. Determining where a business is established for VAT purposes is based on EU law criteria.

For business to consumer (B2C) supplies, the basic rule is that services are treated as made where the supplier ‘belongs’ or is established for VAT purposes. Effective 1 January 2015, B2C supplies of telecommunications, broadcasting, and electronic services will change from being taxed where the supplier belongs to being taxable where the customer is located or is normally resident.

**VAT returns and payments**

VAT returns must be completed at preset intervals (usually every three months). Larger companies may be required to file monthly returns or make monthly payments on account. As of 1 April 2012, all businesses are required to file VAT returns online and make electronic payments. Smaller enterprises can apply for annual returns. VAT returns are usually required to be filed 30 days after the end of the period.

Annual accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

Cash accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

In addition, a flat rate scheme operates for small businesses and is intended to simplify VAT accounting procedures.

**Customs and excise duties**

Many goods imported into the United Kingdom from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff and vary widely.

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in the United Kingdom. Examples include the following:
Products | Excise duty (GBP)
---|---
Road fuels | 0.5795 per litre
Cigarettes | 176 per thousand (plus 16.5% of the retail price)
Tobacco (hand rolling) | 172 per kg
Wines (5.5% to 15%) | 2.66 per litre
Spirits | 28.22 per litre of pure alcohol included

**Stamp taxes**
Stamp duty is charged at 0.5% on instruments effecting sales of shares. Agreements to sell shares usually attract stamp duty reserve tax (SDRT) at 0.5%. The liability to SDRT may be cancelled by paying the stamp duty due on a stock transfer form (or other transfer instrument) executed in pursuance of the agreement. Stamp duty is not usually charged on an issue of shares, but is charged at a higher rate of 1.5% on an issue of shares in bearer form. Issues or transfers of shares to clearance services or depository receipt systems may attract SDRT at 1.5% (stamp duty at 1.5% may be payable on instruments effecting transfers of shares to such services or systems).

Acquisitions of non-residential or mixed land and buildings are charged stamp duty land tax (SDLT) at graduated rates of up to 4%. Acquisitions of residential property by companies and similar non-natural persons are charged at graduated rates of up to 15% (whereas acquisitions by individuals are capped at 7%). Grants of new leases are charged SDLT at 1% of the net present value of the rents payable in excess of GBP 150,000 (or GBP 125,000 for residential property) plus up to 4% (or, for residential property, up to 15%) on any premium paid. Reliefs from the 15% SDLT rate for commercially used properties will be introduced in late July 2013.

**Annual tax on enveloped dwellings (ATED) and related capital gains tax charge**
An annual tax on enveloped dwellings is charged on the acquisition and holding of high-value residential properties (property over GBP 2 million) through a company or other ‘non-natural’ person. Firstly, a company or other non-natural person holding high-value property will pay ATED from 1 April 2013. Broadly, this will be 0.3% to 0.75% of the 1 April 2012 value, based on bands starting at GBP 2 million and increasing to GBP 20 million. The charge on a property worth GBP 20 million or more cannot exceed GBP 140,000 per annum.

In addition, a disposal of such a property or an interest in such a property by a company or other non-natural person will be subject to capital gains tax at 28% on any gains accruing after 5 April 2013. Relief will be available from ATED and the capital gains tax extension for most property used for commercial, charitable, or public use.

**Bank levy**
A bank levy takes the form of an annual tax on certain liabilities of most UK-based banks and building societies. The tax is levied at the following annualised rates:

- From 1 January 2012: 0.088% of a bank’s short-term relevant liabilities and 0.044% of long-term equity and liabilities.
- From 1 January 2013: 0.13% of a bank’s short-term relevant liabilities and 0.065% of long-term equity and liabilities.
- From 1 January 2014: 0.142% of a bank’s short-term relevant liabilities and 0.071% of long-term equity and liabilities.
The levy is not charged on the first GBP 20 billion of chargeable liabilities and is not deductible for corporation tax purposes.

**Insurance premium tax (IPT)**

IPT at the standard rate of 6% applies to premiums for most general insurance, such as for buildings and contents and motor insurance, where the insured risk is in the United Kingdom. Life assurance and other long term insurance remain exempt, though there are anti-avoidance rules surrounding long-term medical care policies. As an anti-avoidance measure, a higher rate of 20% applies to insurance sold by suppliers of specified goods or services, e.g. mechanical breakdown insurance, travel insurance (irrespective of supplier), insurance sold with TV and car hire, and 'non-financial' guaranteed asset protection (GAP) insurance sold through suppliers of motor vehicles or persons connected with them. Further anti-avoidance rules affect administration or similar fees connected with contracts of insurance, charged under separate contracts by brokers and other intermediaries.

**Airport passenger duty**

Individuals leaving the United Kingdom by air are obligated to pay a duty, which in practice is invariably included in the cost of the air ticket. Rates of duty are based on a system of geographical banding and class of travel, ranging from a reduced rate of GBP 13 for short haul destinations in the lowest class of travel to GBP 188 for long haul destinations in higher classes of travel. Certain exemptions and lower rates apply for some geographically outlying areas of the United Kingdom. Significantly higher rates apply for travel in certain 'executive jets'. The scope of air passenger duty was extended with effect from 1 April 2013 to encompass smaller aircraft, including private jets, with an authorised takeoff weight of 5.7 tonnes or more.

**Environmental taxes**

There are several environmental taxes, including the following.

**Landfill tax**

The landfill tax is a tax on waste disposal in landfill sites. The standard rate increased from GBP 64 per tonne to GBP 72 per tonne from 1 April 2013 and will increase to GBP 80 from 1 April 2014. The reduced rate for inert waste is GBP 2.50 per tonne.

**Climate change levy**

The climate change levy is a tax on energy used in the United Kingdom, such as electricity, gas, coal, etc., and is charged at rates that depend on the nature of the fuel used. There are reduced rates and exclusions from the charge, e.g. supplies to domestic or charitable users, renewable source energy, and energy-intensive sectors committing to specific emissions/energy-saving measures. New ‘carbon price support’ rates of the tax were introduced from April 2013, applying to fossil fuels used to generate electricity. Such use had previously been exempt.

**Aggregates levy**

The aggregates levy is a tax on the extraction or importation of sand, gravel, and crushed rock for commercial exploitation in the United Kingdom. The rate of tax is GBP 2.00 per tonne. A planned increase to GBP 2.10 per tonne from 1 April 2013 was cancelled as part of Budget 2013.

**Carbon Reduction Commitment**

The Carbon Reduction Commitment is a mandatory scheme for large businesses with financial, reputational, and behavioural drivers aimed at improving energy efficiency.
Employers’ national insurance contributions (NICs)
Employers are obligated to pay NICs based on a percentage of each employee’s earnings. For the year ending 5 April 2013, the rate is 13.8% on all earnings above GBP 148 per week. There is some reduction for employees ‘contracted out’ of the state pension scheme into a private scheme. From 1 April 2014, it is proposed that businesses will be exempt from the first GBP 2,000 pa (maximum) of this liability.

Pension protection fund levy
All defined benefit pension schemes pay a levy, based on pension fund liabilities and the financial risk of the employing company. This levy funds a compensation fund for pensioners and employees of failed schemes.

Local municipal taxes
Local taxes are not based on income, but rather are levied on the occupiers of business property by reference to a deemed annual rental (or ‘rateable’) value for the property concerned. These taxes (known as ‘rates’) are administered by regional local government authorities rather than central government. The amounts paid are deductible for corporation tax purposes, provided they meet all the usual requirements for deductibility.

Branch income
Tax rates on the profits of PEs are the same as for domestic corporations, except that the small profits rate is not available to non-UK resident corporations unless under the terms of a DTT.

There are specific rules setting out how the PE’s profits should be evaluated for UK tax purposes, which broadly seek to treat the business as if it were a standalone company. Financing arrangements between the branch and head office must be disregarded, and there are special rules for banks to stop under-performing loans being allocated to the UK branch in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

No tax is withheld on transfers of profits to the head office.

Taxable income determination
A UK resident company is taxed on its worldwide total profits.

The UK tax system requires those total profits to be calculated by finding the aggregate of (i) the company’s net income from each source and (ii) the company’s net chargeable gains arising from the sale of capital assets.

The main sources of income recognised by the legislation are (i) profits of a trade, (ii) profits of a property business, (iii) non-trading profits (or losses) from loan relationships, mainly interest receivable or payable, (iv) non-trading gains (or losses) on intangible fixed assets, and (v) non-exempt dividends or other company distributions. Determining income for sources (i) to (iv) relies heavily on the company’s accounts. Taxable income from non-exempt dividends and calculating chargeable gains or income from other sources is based on actual amounts.
The rules for determining the gross income in each category differ in certain respects according to the source concerned and are different again when calculating gains. Likewise, there are also subtle differences in the rules concerning the deductions that are permissible in respect of different sources of income and in respect of gains. Because of this continuing reliance on taxing companies on a ‘source-by-source’ basis, the UK system is not well suited to being analysed in terms of income determination and deductions as two wholly separate topics.

**Basic rules for accounts-based sources**

A company’s trading profits are based on its worldwide profit before tax in its accounts. Adjustments are made for non-trading receipts (such as dividends from other companies and income from property) and non-deductible expenditure (such as capital expenditure or expenditure that is not incurred for the purposes of the trade). Depreciation for tax purposes (known as capital allowances) is calculated and substituted for the depreciation charged in the accounts. There are also a number of other statutory adjustments to be made; three important ones are that pension contributions and deferred pay are broadly deductible only when paid, that a deduction is available for the notional cost of certain share awards to employees, and that, where acquired intangibles are not depreciated in the accounts, a 4% flat-rate deduction can usually be claimed. There are, however, many other adjustments.

Similar principles apply in relation to the calculation of profits of a property business.

The profits from a company’s trading and non-trading loan relationships and related matters are based on the accounts. For this source of income, the distinction between ‘capital’ and ‘revenue’ receipts and deductions is not relevant. All credits and debits in the accounts are aggregated in order to find the net profit or deficit. Certain statutory adjustments have to be made, which include an interest capping limitation (‘debt cap’). Broadly, the same regime applies to income and expenses relating to intangibles, including goodwill. For a trader, these are therefore specific areas where capital amounts can be taxed or allowed.

For traders, any profit or loss on loan relationships, and/or on intangibles, is generally included within the trading profits; they become a single source of profits. For loan relationships and intangibles not connected with a trade, the company has a separate source of profits or a separate class of loss.

**Income losses**

Where a loss arises in respect of a particular source of income, there are detailed rules regarding the possible offset of the loss. Carryback and sideways reliefs are often allowed within limits; carryforward is generally allowed and carried forward losses do not time expire. Losses can also be utilised by other group companies (see the Group taxation section).

More specifically, dealing with the main sorts of income losses,

- trading losses may be set off against any other source of profit (or gains) in the same year, may be carried back one year (three years on the cessation of the trade) against any other source of profit (or gain), or may be carried forward without time limit against profits of the same trade only
- property losses may also be set off against any other source of profit (or gains) in the same year, or may be carried forward without time limit against profits of any sort; they cannot, however, be carried back, and
• non-trading deficits (i.e. interest and financing losses) can again be set off against any other source of profit (or gains) in the same year, may be carried back one year against non-trading credits (i.e. interest and financing profits), or may be carried forward without time limit against non-trading profits.

Non-trading companies may deduct non-capital management expenses incurred in managing their investments from their total profits. Any excess management expenses can be carried forward without limit to set against profits in future years.

While income losses can generally be offset against capital gains of the same accounting period, capital losses are never available for offset against any type of income.

**Inventory valuation**

In general, the book and tax methods of inventory valuation will conform. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last in first out (LIFO) method.

**Capital gains**

Gains on capital assets are taxed at the normal corporation tax rates. The chargeable gain (or allowable loss) arising on the disposal of a capital asset is calculated by deducting from gross proceeds the costs of acquisition and subsequent improvements, plus the incidental costs of sale and indexation allowance. Indexation allowance compensates for the increase in costs based on the percentage rise (if any) in the UK retail prices index to the date of disposal. Indexation allowance is, however, limited; it cannot create or increase a capital loss, it can only reduce or eliminate a chargeable gain. Generally, these calculations must be done in sterling, so any foreign exchange gains and losses will be taxed (or relieved) on disposal.

Special rules apply to assets held at 31 March 1982.

Most acquisitions and disposals between UK group companies are treated as made on a no gain no loss basis (i.e. at base cost plus indexation). Otherwise, acquisitions from, or disposals to, affiliates are treated as made at fair market value, as are other acquisitions or disposals not at arm’s length.

Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a company’s accounting period may be carried forward without limitation but may not be carried back.

There is a good deal of anti-avoidance legislation concerning the computation of chargeable gains, notably to stop losses being created or gains avoided where assets are depreciated by intra-group transactions, or where losses are ‘bought in’ from third parties.

Gains realised on certain types of assets can be deferred where all or most of the proceeds are reinvested in other assets of those types within a specified period (generally three years). The ‘rolled-over’ gain then crystallises as and when the latter assets are sold. At present, the main asset categories qualifying for roll-over are land and buildings used for a trade.

Most disposals by trading groups of shareholdings of 10% or more are exempt from tax. The main exceptions will be those of non-trading subsidiaries or subgroups, or of
companies acquired within the previous year. Note that gains on goodwill and other intangibles acquired after March 2002 are taxed as income, not as capital gains.

**Dividend income**
Most foreign and UK dividends received by UK companies are exempt from corporation tax; however, one of several criteria has to be met, but these are widely drawn (one test, for example, is that the recipient controls the payer). For non-exempt foreign source dividends, double tax relief (DTR) will be available on a dividend-by-dividend basis. It is unusual for companies to be taxed on UK dividends because of the breadth of the exemption; however, where they are taxed, there is no concept of DTR for UK dividends.

**Realised and unrealised exchange gains/losses**
Unrealised exchange gains and losses tend to arise on debts and derivatives; they are then taxed or allowed, together with realised amounts, on an accounts basis in the same way as other debits and credits arising out of loan relationships. Where gains or losses arise on other payables or receivables, to a trader or property investor, they will again generally be taxed or allowed on an accounts basis. For a trader, the taxable or allowable amount will become simply part of the trading profit or loss; for other companies, it will become a separate source of taxable profit (a ‘non-trading credit’) or loss (a ‘non-trading deficit’).

Where unrealised differences arise on other capital assets, they will not generally be taxable or allowable at that stage; instead, the exchange difference becomes part of the computation and is effectively taxed or allowed when the asset is disposed of and any difference is realised.

**Partnership income**
In broad terms, if companies participate in UK partnerships (whether general partnerships, limited partnerships, or limited liability partnerships), they will be taxed on a flow through basis. This will, in very broad terms, mean that UK corporate partners will be taxed on trading, property, or financing income as it arises in the partnership accounts, and on non-exempt dividends on a receipts basis.

When considering overseas entities, the UK authorities will not be bound by how the entity is classified in its country of origin. Case law has determined a number of matters that should be considered when establishing whether a non-UK entity should be taxed in the UK as if it were a company or a partnership. Her Majesty’s Revenue and Customs (HMRC) also maintains a public list of non-UK entities and the decisions it has previously made regarding their classification. However, if the parties have flexibility regarding the constitution of such entities, then their classification may be viewed differently, either by HMRC or the courts. This area is complex; consequently, specialist advice should be sought.

**Foreign income**
In principle, the United Kingdom taxes on a worldwide basis, although non-UK branch profits can be exempted from UK taxation by election. The election applies to all accounting periods starting after the election is made and to all the branches of the company (so it cannot be made on a PE by PE basis). The election is irrevocable and has the effect of exempting all profits of the branch, including gains (other than for close companies). Equally, relief for branch losses will be denied. Profits will be measured by reference to DTTs, or, in absence, OECD principles. Certain businesses may not elect to exempt profits (e.g. life insurance, shipping and aircraft operations, and most investment activity).
Where no election is made, profits from non-UK branches are computed and taxed in the normal way for UK tax resident companies. However, UK tax will generally be reduced by credit for local direct taxes paid, either under a treaty or via the UK's unilateral relief rules (see Foreign tax credit in the Tax credits and incentives section for more information).

**General rules for deductions**

As noted in the income section, the UK tax system requires taxable profits to be calculated by aggregating (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets. This approach gives rise to a particularly complicated regime so far as deductions are concerned. Expenses are usually allocated to the source of income (or occasionally by reference to income generally) or to the particular gain to which they relate. The rules governing their deductibility differ according to whether the expense relates to a capital gain or to income, and, indeed, according to the particular source of income concerned. For example, there is a considerable difference in the manner in which tax relief is given for expenses incurred by companies trading in property as compared to those that invest in property. The regime also has a large number of specific rules dealing with particular types of deductions that take priority over the more general rules for each type of income.

We have therefore set out the general rule for trading expenses, being the most common category, and, following that analysis, considered some specific common exceptions.

**General rules for trading expenses**

A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for the purposes of the company’s trade, provided those costs are not capital in nature and are charged to the profit and loss account. There is a significant amount of case law surrounding whether expenses have been incurred wholly and exclusively for the purposes of a company's trade and whether they are capital or not. Relief is generally given in the period the expenses are accrued in the accounts, subject to some specific exceptions. In particular, contributions to a registered pension scheme are only allowed on a ‘paid’ basis, with some further provisions under which some contributions may be spread over a number of years; and if bonuses and other staff costs are paid out more than nine months after the end of the accounting period in which they are accrued, they are only allowed on a paid basis.

The general rule is made subject to a raft of specific statutory provisions, some of which allow deductions and others of which limit them; some of the more important of these are discussed below, but there are many others. There is, as one example, a bar to deducting the costs of business entertainment, except within quite strict limits.

**Depreciation and amortisation**

Depreciation of fixed assets (other than of goodwill and other assets within the intangible fixed asset regime, see below) is not allowable as a deduction from any source of income. However, traders, and most non-traders, are instead allowed specified rates of annual deduction in respect of specified classes of assets, together referred to as ‘capital allowances’, that are deducted in calculating trading income for traders and (broadly) against income derived from the use of the fixed assets for non-traders.

In the period of expenditure, capital allowances are available, generally at 18% (post April 2012) of the cost of machinery and equipment acquired for use in a trade or property rental business; thereafter, capital allowances are taken generally at 18% per
United Kingdom

annum on the reducing-balance basis. With some exceptions (notably cars, ships, and machinery and equipment in offices and other non-industrial buildings), the rate of capital allowances for machinery and equipment with an expected useful life when new of at least 25 years, and purchased after 25 November 1996, is 8%. Since 1 April 2008, this 8% rate also applies to certain integral features in buildings and thermal insulation.

Capital allowances are given on cars at rates dependent on emission levels.

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 250,000 per year of most qualifying expenditure (from 1 January 2013 to 31 December 2014, previously GBP 25,000). This is restricted to a single allowance for groups of companies or associated businesses.

Enhanced allowances, typically at a rate of 100%, are available for expenditure on certain energy saving plant and other specific categories. The products and technologies supported by this regime are reviewed and updated regularly.

The rate of capital allowance of most plant or machinery leased to non-residents is restricted, generally to 8% but in some cases to nil. However, HMRC now accept that in some circumstances these rules may be contrary to EU law, and for leases finalised on or after 1 April 2006 where the lessee is resident in an European Economic Area (EEA) country that does not give the lessee relief broadly equivalent to the UK's capital allowances, HMRC will accept that the lessor is entitled to allowances at the normal 18% rate; in addition, the 0% rate will not be enforced in the case of other EEA lessees.

No capital allowance is normally allowed on buildings, apart from certain machinery and equipment embodied in the fabric of the buildings.

Capital allowance of machinery and equipment, and of industrial buildings, can be disclaimed in whole or in part, thereby deferring allowances.

Capital allowances may also be available in respect of the cost of the acquisition of mineral assets and other qualifying expenditures relating to mineral extraction, generally at the rates of 10% and 25%, respectively, on the reducing-balance basis and in respect of various other types of capital expenditure, including the cost of ships, construction of public roads, and dredging.

Excess capital allowances are generally recaptured on disposal. The recapture is calculated on a ‘pool’ basis for most machinery and equipment, in which case there is no recapture unless the sale proceeds exceeds the total tax written down value of the pooled assets. The rules concerning which pool an asset goes into can be complex; a large company will generally have several pools ranging from single asset pools to a single large pool for most of its plant and machinery. There is no recapture for sales of industrial buildings.

Where assets are leased, capital allowances are generally available to the lessor rather than the lessee. However, this is an area of complexity, and in some situations (generally relating to finance leases) the allowances are only available to the lessee.

**Intangible fixed assets**

A special regime applies to intangible assets, such as patent rights, know-how, and trademarks, and including goodwill. Royalties are generally deductible on an accounts basis, and, except in relation to ‘grandfathered’ assets owned by the group on 31 March 2002, the accounts’ amortisation of intangible assets is also deductible (with an option
to take a flat 4% deduction even if not amortised in the accounts). Traders will take the
deductions in computing trading income; non-traders will create a ‘non-trading loss
on intangible fixed assets’ that can be relieved as a loss against any profits of the year,
carried back one year, or carried forward indefinitely.

Income costs relating to R&D are normally deductible in any event, but there is a special
incentive connected with R&D that generally allows an additional deduction (see the
Tax credits and incentives section for more information).

**Management expenses**
Holding companies are permitted a deduction for expenses to the extent that they are
expenses of managing the company’s investment business and are not capital in nature.
Such costs would typically include audit fees, directors’ costs, rent, local rates, and
office costs. These costs can be set against any sources of profit the company may have
(such as financing income). For the top company of a listed group, such expenses can be
very substantial.

If the company has inadequate income (given that most dividend income will not be
taxable), the excess can be surrendered as group relief. Alternatively, it can be carried
forward to set against future income, with no time limit.

Many of the specific prohibitions on the deduction of trading expenses (though not not
all) are extended to create a similar bar on the deduction of such costs as management
expenses for non-traders; conversely, many rules giving traders a specific deduction for
certain costs are extended to allow non-traders similar relief. But this is not invariably
the case. For example, traders can only deduct costs ‘wholly and exclusively’ incurred
for the purposes of the trade; there is no similar rule for management expenses.
However, the two specific limitations on trading deductions referred to above (pension
contributions and late-paid remuneration) are extended to management expenses.

**Employee share schemes**
A deduction is often available to an employing company for the deemed cost of
providing shares to employees, on a formula basis rather than the accounts charge (if
any); this depends on the nature of the share plan and of the shares provided. This
regime will generally allow a deduction to a subsidiary company whose employees
receive shares (or options over shares) in the parent company.

**Funding costs**
Funding costs (primarily fees and interest) are broadly deductible on an accounts basis,
even if capital in nature, but subject to thin capitalisation constraints (with no explicit
safe harbours) and an interest cap based on the group’s external debt levels. This
extends to foreign exchange deductions relating to debts owed and receivable.

Traders will generally take the deductions in computing trading income (which is also
accounts based). Deductions relating to loans not used for trading purposes will give
rise to ‘non-trading deficits’ that, if not group relieved, can be offset against profits
of that year generally, carried back one year (against that year’s funding profits), or
carried forward indefinitely against non-trading profits.

**Bad debts, provisions, and reserves**
A provision will be deductible for tax purposes if (or to the extent that) it:

- is in respect of allowable revenue expenditure
- is made in accordance with acceptable accounting practice
United Kingdom

• does not conflict with any statutory rule governing the timing of relief (e.g. in relation to payment of staff costs), and
• is estimated with sufficient accuracy.

This rule extends to bad debts on trading account. Generally, however, bad debts are dealt with under the ‘loan relationships’ rules for financing costs and financing income. The rules there, however, are broadly the same; if the bad debt can be identified specifically enough to allow a bad debt provision that satisfies UK accounting standards, it should be deductible.

Charitable donations
Most donations to charities by companies are deductible.

Fines, penalties, and bribes
Any payments that would constitute a criminal offence (e.g. a bribe), or would do so if paid inside the United Kingdom, are expressly not deductible as trading expenses or management expenses. Likewise, fines and penalties imposed for breaking the law are also not deductible, although a deduction is usually available for legal costs incurred in defending such an action. Civil penalties, interest, and default surcharges (e.g. relating to certain VAT defaults) are also generally non-deductible, except for damages that are compensatory rather than punitive (e.g. damages for defamation payable by a newspaper company).

The rule that any amount paid by way of a penalty for breach of the criminal law is not deductible derives largely from case law and was explicitly said to be a policy rule. It is applied strictly; parking fines and fines for breaches of regulations, or for price-fixing, are not deductible.

The rule does not, however, extend to compensatory payments that are not punitive. So, settlements in relation to negligence that harms customers or patients, for breach of contract, or with employees for wrongful dismissal ought to remain deductible.

Taxes
Local municipal taxes (business rates) may be deducted from taxable income.

Net operating and capital losses
Income losses may be carried forward indefinitely, and, in general, set against any type of non-trading profits; in contrast, losses of a particular trade can be carried forward only against profits of the same trade. Unlimited loss carryback is available for trading losses against total profits of (normally) the previous 12 months (provided the same trade was being carried on in that period). There is a more limited facility to carry back certain non-trading losses, also normally for 12 months. Losses can also generally be surrendered to other group companies to set against their taxable profits for the same period.

Capital losses may also be carried forward indefinitely but may not be carried back. There is no ability to surrender capital losses to fellow group members, but gains or losses arising on a particular asset can be allocated to another group member (by means of a joint election on an asset-by-asset basis). Therefore, there is a limited ability for the capital losses of one company to be offset against the gains of a fellow group member in the same or subsequent period.

Note that there are complex anti-avoidance rules that restrict the utilisation of losses where there is a change in ownership of the company.
**Payments to foreign affiliates**
There are no special rules for payments to foreign affiliates, so their tax treatment follows the basic rules for deductions set out above. The transfer pricing rules will impose an arm’s-length price.

---

**Group taxation**

Each individual corporate group member is required to submit their own tax return on a stand-alone basis, with the exception of the election available with respect to VAT (*discussed below*). However, there are a variety of ways in which one’s relationship with fellow group members is recognised in the UK tax system for the purposes of corporation tax, VAT, and stamp duty.

**Corporation tax**
The corporation tax system includes a number of measures that advantage UK members of qualifying groups, all of which are subject to anti-avoidance measures.

Operating taxable profits and losses arising in the same period can usually be offset between UK resident 75% affiliates within a worldwide group. This extends to offsetting the UK profits attributed to a UK PE of a non-UK resident group member. There are some restrictions, primarily where one of the two companies is not an economic 75% subsidiary of the group or is subject to arrangements under which it might leave the group.

Intra-group transfers of capital assets between UK companies, including UK PEs, are normally tax-free, though the definition of group for these purposes is slightly different than the definition of group relief for losses. This treatment is also extended to intra-group transfers of loan relationships, derivatives, and intangibles. There is generally a ‘degroupping’ charge if the transferee company leaves the group within six years.

There is no automatic offset of capital gains and losses where these arise in different group companies, but it is normally possible for offset to be arranged either by actual transfer of the asset prior to disposal or by election.

A UK resident parent company is potentially able to claim group relief for income losses of a non-UK subsidiary that is resident in the EEA or has incurred the relevant losses in a PE within the EEA, provided that all possibilities of non-UK relief for the losses have been exhausted and future relief is unavailable.

In addition, the corporation tax system also has a number of measures that seek to prohibit groups unfairly manipulating the tax system by shifting profits between group members (either internationally or within the United Kingdom) in a way that is considered unacceptable.

A debt cap limits the aggregated UK tax deductions group members may claim for finance costs to the level of a group’s external finance expense.

**VAT**
Group companies can, subject to certain requirements, elect to account for VAT as if they were one taxable person; where this is done, no VAT is charged on intra-group supplies of goods or services. The registration is made in the name of the representative member, who is responsible for completing and rendering the single return on behalf
of the group. All the companies are jointly and severally liable for any VAT debts. VAT
grouping is subject to detailed anti-avoidance provisions.

Stamp duty and SDLT
Transfers of shares or real estate within worldwide 75% groups are generally exempt
from stamp duty or SDLT, respectively. For SDLT, the relief can be retrospectively
withdrawn in certain circumstances, primarily where the transferee leaves the group
within three years of the transfer.

Transfer pricing and thin capitalisation
The United Kingdom has widely drafted transfer pricing rules that are intended to apply
to almost any kind of transaction made or imposed between related parties that gives
rise to:

- a provision that differs from one that would have been made between third
  parties and
- a UK tax advantage (potential or actual) to one or more of the parties.

These rules apply to UK-to-UK transactions as well as cross-border transactions.

The regime therefore applies not only to the provision of products and services but also
to finance arrangements, including both the rate of return charged and the amount of
loan principle (or equivalent) made available. It is therefore the mechanism by which
the UK's revenue authorities address the issue of thin capitalisation. Unlike many other
territories, the United Kingdom does not operate any ‘safe harbours’ of any kind in
relation to the amount of debt or interest (or equivalents) it considers demonstrates
that a UK company or group is not thinly capitalised. Note that the United Kingdom
also has a debt cap regime that limits the amount of finance expense for which a
UK tax deduction will be available by reference to the worldwide group's external
finance expense.

Parties are considered related for this purpose where either one controls the other or
both are under common control. Control here is not confined to situations in which one
party is the majority shareholder in the other. Effectively, control exists where one party
has the power to ensure that the affairs of another party are conducted in accordance
with the first party’s wishes. The concept is also subject to two important extensions:

- The rules apply to many joint venture companies where two parties each have an
  interest of at least 40%.
- There are attribution rules to trace control relationships through a number of levels
  in determining whether parties are controlled for the purposes of the transfer pricing
  rules.

In addition, the regime restricts interest deductions to an arm’s-length basis where a
financier and persons who collectively control a company or a partnership have ‘acted
together’ in relation to the financing arrangements of that company or partnership. The
financier (usually a bank) can then be taken as controlling the company or partnership,
and the loan becomes subject to transfer pricing limitations.

There are a number of exemptions that essentially exclude small or medium-sized
enterprises (SMEs) and dormant companies from the regime.
The effect of the rules is to require an arm's-length provision to be substituted for the actual one, thereby increasing the party's UK tax liability and cancelling out the UK tax advantage that would otherwise have arisen.

Where both parties to the transaction are UK taxpayers, the disadvantaged party will generally be entitled to claim a compensating adjustment (except where the transaction falls within the transfer pricing regime because of the 'acting together' provisions), but only after the UK adjustment has been made. The legislation also provides that parties may make balancing payments to each other in such circumstances, of any amount up to the transfer pricing adjustment, which will neither be taxable for the recipient nor tax deductible for the payer.

Where the disadvantaged party is outside the UK tax net, they can pursue a claim for relief under the relevant DTT if it provides a mechanism for such relief; where the adjustment in the United Kingdom is to reduce a deduction for an amount paid under deduction of UK tax, the compensating adjustment rules should allow the overseas party to reclaim any withholding tax (WHT) paid on the disallowed amount.

UK taxpayers are required to self-assess their compliance with this arm’s-length principle. Companies and partnerships must therefore identify and make transfer pricing adjustments when submitting their tax returns. This is the case even where the disadvantaged party would be entitled to claim a compensating adjustment equal to the transfer pricing adjustment. An important implication of this approach is the potential for interest and penalties if the adjustment made is subsequently held to be wrong.

**Controlled foreign companies (CFCs)**

Under the CFC regime, a UK resident company may be taxed on a proportion of the profits of certain UK-controlled non-resident companies in which the resident company has an interest. The overall intention is to tax profits that have been artificially diverted from the United Kingdom.

Broadly, profits of a non-UK resident CFC will be taxed, using normal corporation tax rates and rules, on the persons controlling the CFC if (i) the profits pass through the CFC 'gateway' and (ii) are not exempt.

The ‘gateway’ is a series of tests that identify profits that are, broadly, artificially diverted from the United Kingdom. One of the most important tests is ‘main purpose’. For example, where profits arise in the CFC under any arrangements a main purpose of which is to achieve a UK tax or duty advantage, those profits will be taxed in the United Kingdom. A range of other tests may capture other profits.

Various exemptions exist for companies coming into the regime for the first time, CFCs with low profits or low margins, and CFCs in excluded territories, usually those territories with corporation tax rates similar or above UK rates.

There is a special exemption for intra-group financing profits that can result in an effective rate of UK tax on such profits of 5% when the main rate of corporation tax falls to 20% in 2015.
Tax credits and incentives

Foreign tax credit
The United Kingdom has an extensive network of DTTs. Unilateral relief is generally available, in any event, to credit overseas tax paid on non-UK source profits against the UK tax on the same profits; while the relevant treaty might sometimes extend that relief, their main function for UK companies is to limit overseas WHTs that would otherwise be payable on passive income.

The United Kingdom has a complex regime allowing ‘underlying’ tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved (at least in part) where dividends flow to the United Kingdom via a chain of companies. This exemption is of limited application because most foreign dividends are exempt from tax.

Enhanced capital allowances
A variety of tax incentives are given in the form of enhanced tax depreciation allowances (known as capital allowances, see Depreciation and amortisation in the Deductions section). Some of these incentives are given by reference to the expenditure concerned and others by reference to the size of the company incurring that expenditure.

For example, a full write-off can be claimed in the year of expenditure on a range of ‘green’ products and technologies. The list of items supported in this way is reviewed annually. It currently consists of the following: designated energy saving equipment; designated environmentally beneficial plant and machinery; cars with low emissions; plant or machinery relating to gas stations for refuelling vehicles with natural gas or hydrogen fuel incurred prior to 31 March 2013; and conversion or renovation of business premises in designated disadvantaged areas of the United Kingdom for expenditure incurred up to 11 April 2012.

Annual investment allowance
All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 250,000 of most qualifying expenditure from 1 January 2013. This is restricted to a single allowance for groups of companies or associated businesses.

Research and development (R&D) incentives
A deduction currently equal to 130% of the qualifying expenditure on R&D can also be claimed by large companies. For small and medium companies, as defined, a deduction equal to 225% of the qualifying expenditure on R&D is given in the year in which it is incurred, which can be surrendered for a cash payment (at a rate of GBP 24.75 for each GBP 100 of qualifying R&D spend) by companies that are trading at a loss or have not yet started to trade.

From April 2013, large companies may, by election, claim a 10% ‘above the line’ tax credit instead of the enhanced 130% deduction.

Other incentives
A deduction equal to 150% of the qualifying expenditure on the remediation of contaminated or derelict land is given in the year incurred, which can be surrendered for a cash payment (at a rate of GBP 24 for each GBP 100 of qualifying land remediation spend) by companies that are trading at a loss.
There are special tax reliefs available for certain expenditure on UK film production and proposals for additional deductions and tax credits for certain creative sector activities (e.g. high-end television, animation, video games).

There are no tax holidays and no foreign investment incentives in the United Kingdom.

**Withholding taxes**

Under UK domestic law, a company may have a duty to withhold tax in relation to the payment of either interest or royalties (or other sums paid for the use of a patent). The circumstances in which such a liability arises are discussed below.

There is no requirement to deduct WHT from dividends. Therefore, dividends may always be paid gross, regardless of the terms of the applicable DTT.

Please note, however, that this is not an exhaustive list of all the deductions that might be required to be made in respect of UK tax from payments made to or by companies. In particular, non-resident companies that are subject to UK income tax on UK-source rental profits (see the Taxes on corporate income section for more information) will find their letting agent or tenants are obligated to withhold the appropriate tax at source (currently 20% without any allowances) from their rental payments unless the recipient has first applied and been given permission to receive gross rents under the Non-Resident Landlord Scheme. Two other important examples are the UK’s deduction at source regime for entertainers and sportsmen, and the scheme under which payments to unregistered subcontractors working on big building projects may need to have tax deducted at source.

**Interest WHT**

As a general rule, UK domestic law requires companies making payments of interest to withhold tax at 20%. However, there are a number of exceptions to this general rule. The key exclusions are:

- Payments of interest by UK resident companies if the beneficial owner of the interest is also a UK resident company, or a UK PE, provided the interest concerned will be taxed in the United Kingdom as part of the PE’s trading profits.
- Payments of interest on a quoted Eurobond.
- Payments of interest that qualify for exemption under the EU Interest and Royalties Directive.
- Payments of interest paid to or by a UK bank (or a UK branch of a foreign bank).
- Payments of ‘short’ interest. This is, broadly speaking, interest on loans that will not be in place for more than a year. However, the definition can be contentious, and detailed advice should be taken on this if intending to utilise this exemption.
- Payments of interest that do not ‘arise’ in the United Kingdom. Whether a payment constitutes UK-source interest is a complex issue, and specialist advice needs to be taken if seeking to use this exception.

If none of these exceptions apply, a payment of interest must be made after the deduction of WHT unless (or until) HMRC has given authorisation that the payment may be made gross (or with a reduced rate of WHT) because of the applicability of treaty relief for the recipient.
United Kingdom

Royalties WHT
UK domestic law requires companies making payments of patent, copyright, and design royalties that arise in the United Kingdom to deduct WHT at 20%. In addition, there is also the possibility that other royalties that arise in the United Kingdom may also be subject to the same rate of WHT if they constitute 'qualifying annual payments', so specialist advice will be needed to clarify this. However, certain types of royalties, such as film royalties and equipment royalties, will generally not be subject to UK WHT.

Unlike the rule regarding interest, a company may make a royalty payment gross of WHT (or subject to a reduced rate of WHT under a treaty) without prior clearance having been given by HMRC if they reasonably believe at the time the payment is made that the payee is entitled to relief under the treaty. However, if that belief is later found to be incorrect, HMRC may direct that the payment must be made net of WHT, with the WHT paid to HMRC, and the payer may be subject to interest and penalties in respect of the WHT that should have been withheld (even if their belief was reasonable).

Double taxation treaties (DTTs)
The table below sets out the rates of WHT applicable to payments of dividends, interest, and royalties under UK domestic law where such a liability arises and the reduced rates that may be available under an applicable DTT.

Notes

1. A tax credit is available to UK resident individual shareholders on dividends received, as described above. Some DTTs allow a half or full tax credit (less, normally, a 5% to 15% notional WHT) also to non-resident individuals and usually to corporate portfolio investors. Treaties that allow a payable credit are indicated by an asterisk (*). However, since 6 April 1999, the credit has been reduced from one quarter to one ninth, which has the result that the tax credit indicated by the asterisk is now, in effect, useless, since it is wholly eliminated by the (usually 15%) WHT allowed by the treaty.

2. WHT applies only to 'annual interest' (i.e. excluding interest on certain short-term loans). Banks and similar financial institutions are also normally able to pay annual interest to non-UK residents free of WHT. In addition, most of the UK treaties provide for a zero-rate of withholding on interest paid to governmental and quasi-governmental lenders. Such exemptions are not separately indicated in the table below.

3. Some types of royalties are not subject to UK WHT, including film royalties and equipment royalties. Treaty provisions specifically relating to these are therefore not mentioned here.

4. From 6 April 2001, payments to any UK resident company (not just banks, as before) can be made free of WHT if the recipient is chargeable to tax on the interest or royalty. Discussions continue as to whether this provision will be extended to recipients who are exempt from UK tax on the interest or royalty.

5. Where a reduced rate of withholding is allowed by any treaty, whether on interest or royalties, it is usual for this reduced rate to be stated not to apply to amounts that are in excess of a normal commercial rate of interest/royalty, or where the interest/royalty is effectively connected to a PE in the United Kingdom of the recipient or where the debt/licence was created primarily to obtain the advantage of the treaty; such general limitations are not specifically indicated in the table below.

7. Treaty rate not applicable to certain loans held by tax-exempt holders and resold within three months of acquisition.

8. Lower rates, primarily of 3% on use of news, 5% on copyright royalties other than films and TV, and 10% on certain intellectual property, will in practice apply in almost all cases.

9. No repayable tax credit for companies.

10. A 5% rate on literary/artistic copyright royalties.

11. A 7.5% rate on interest paid to banks and other financial institutions.

12. The United Kingdom announced that the old UK/USSR treaty ceased to apply to certain former Soviet Republics on 5 April 2002 (such that from that date there was no treaty in force with any of those countries), while it continued to apply to others until new treaties were concluded. Treaties have subsequently been signed with a number of these states such that the old UK/USSR treaty currently only continues to apply to Tajikistan, Turkmenistan, and Belarus (the last of which concluded a new treaty with the United Kingdom in 1995 that is not yet in force). The only remaining states without a treaty in force with the United Kingdom post 5 April 2002 are Armenia and Kyrgyzstan. Moldova signed a new treaty with the United Kingdom on 8 November 2007 that took effect in the United Kingdom from 6 April 2009.

13. The United Kingdom's treaty with the former Yugoslavia is regarded as still in force between the United Kingdom and Croatia, Montenegro, Serbia, and Bosnia-Herzegovina. Macedonia signed a new treaty with the United Kingdom on 8 November 2006, which took effect for UK WHT purposes on 1

14. The independent states of the Czech Republic and the Slovak Republic have confirmed that they will honour the treaty between the United Kingdom and the former Czechoslovakia.

15. The 10% rate applies to royalties for use of industrial, commercial, or scientific equipment or experience as well as royalties in respect of patent, trademarks, and know-how. Zero-rate on all other royalties.

16. A rate of 10% on certain bank loans.

17. A rate of 10% in certain cases.

18. A rate of 15% on film and TV royalties.

19. A rate of 5% on royalties for use of industrial, commercial, or scientific equipment.

20. Zero-rate on government and local authority loans. The rate is 5% where the beneficial owner is a bank or insurance company or the interest is derived from bonds and securities that are regularly and substantially traded on a recognised securities market. The rate is 10% where the beneficial owner is not a bank or insurance company but the interest is paid by a bank or by the purchaser of machinery and equipment to a person who sold that equipment on credit.

21. A rate of 7% on interest paid to banks.

22. A rate of 10% on interest on bonds issued to the public.

23. A rate of 15% on royalties on films, TV, and radio broadcasting.

24. A rate of 10% on copyright royalties.

25. A rate of 10% on interest paid to banks and other financial institutions.

26. A rate of 5% on literary/artistic/scientific copyright royalties.

27. Full relief for copyright royalties.

28. Lower rates may be substituted to match any lower rate agreed in a treaty between Uzbekistan and a third OECD country.

29. A rate of 10% for royalties on industrial, commercial, or scientific equipment.

30. Zero-rate for royalties on certain government loans.

31. A rate of 2% for royalties on industrial, commercial, or scientific equipment.

32. Zero-rate for literary/artistic copyright royalties, patent royalties, and royalties for use of industrial, commercial, or scientific know-how and computer software.

33. The new treaty effective for UK income tax (and therefore WHT) from 6 April 2007 reduced WHT on both interest and royalties to the rates shown in the table. Prior to this, the rate of WHT on interest and royalties was 15% in both cases (subject, in the case of interest, to note 7).

34. A rate of 5% on royalties for the use of a patent, etc. concerning industrial, commercial, or scientific experience.

35. A rate of 10% on royalties for which the recipient controls more than 50% of the voting power of the payer.

36. A rate of 15% can be withheld on royalties in respect of cinematograph or television films.

37. A rate of 5% can be withheld on royalties in respect of cinematograph or television films.

38. Full relief is available for literary, artistic, or scientific copyright (excluding royalties on cinematograph films and films or tapes for TV or radio broadcasting). No relief is available for amounts paid in respect of the extraction or removal of natural resources.

39. HMRC continues discussions on new or revised treaties with Australia, Croatia, Israel, New Zealand, and Thailand.

40. Relief may be restricted to 15% in certain circumstances.

41. New tax treaties/protocols have been signed but have not yet entered into force. These agreements will enter into force once both countries have completed the required Parliamentary procedures and exchange of diplomatic notes and will take effect on the dates set out therein.

42. Provided one of several conditions is specified, one of which is that the recipient is quoted, another being that HMRC accepts that the interest is not paid in connection with tax avoidance (broadly).

43. In force February 2012, with varying implementation dates.

44. Effective January 2012.

45. Effective from 1 February 2013.

46. Wider exemptions for certain loans.

---

**Tax administration**

**Taxable period**

Companies are assessed by reference to accounting periods. Normally, the accounting period is the period for which the company makes up its accounts. However, an accounting period for corporation tax purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one corporation tax return.
**Tax returns**
Companies must file their statutory accounts and tax return within one year from the end of the accounting period; the return must include a self-assessment of the tax payable, eliminating the need for assessment by HMRC (though HMRC retains assessing powers for certain cases where it is not satisfied with the return, or where the company fails to make a return).

**Electronic filing requirements**
Returns for accounting periods ending after 31 March 2010 must be filed online, and such returns must be filed in a specified format that is machine readable by the tax authorities.

**Payment of tax**
For smaller companies, corporation tax is payable nine months after the end of the accounting period to which it relates (i.e. before the return must be filed). For larger companies and groups, a system of quarterly payments on account (based on estimated profits) is in place, with the first payment being due in the seventh month of the accounting period concerned. A company will generally be considered large for this purpose in any accounting period in which it has taxable profits in excess of GBP 1.5 million (that limit being reduced by reference to the number of companies under common control, where relevant).

**Penalties**
The UK tax system can impose numerous penalties for failing to adhere to the self-assessment system. These include penalties for late filing of returns, failing to maintain appropriate records, submitting an incorrect return, making errors in certain documents sent to HMRC, unreasonably failing to report errors in assessments by HMRC, and failing to respond to a notice of enquiry from the tax authorities within the specified time limit.

**Other filing requirements**
Large companies (those with turnover greater than GBP 200 million or balance sheet assets over GBP 2 billion) are required to notify HMRC of the identity of their senior accounting officer, who must certify annually that the accounting systems are adequate for the purposes of accurate tax reporting. Penalties are chargeable on the officer and the company for careless or deliberate failure to meet these obligations.

Certain tax planning and structuring transactions and arrangements must be disclosed to HMRC either before or on implementation of the transaction under the Disclosure of Tax Avoidance Schemes (DOTAS) regime. This scheme covers most taxes and is a reporting system only, with responsibility placed on taxpayers and advisors to report. HMRC are not required to respond to the reporting, and this is not an advance clearance or approval process. It is a reporting mechanism only, and, on occasions, new legislation has been introduced to block specific arrangements reported.

**Tax audit process**
The UK corporate tax process is one of self-assessment. Following filing of the tax return, HMRC has a period of (usually) 12 months in which to raise formal enquiries. These can range from simple information requests to detailed technical challenges over treatments adopted in the tax return.

These enquiries are often settled between the taxpayer company and HMRC by exchange of information and correspondence. Where agreement cannot be reached, litigation may be necessary.
United Kingdom

HMRC has certain powers to demand information and, in some circumstances, to enter premises to obtain documents, etc. These powers are rarely used, and there are no routine visits by HRMC officials to taxpayer premises.

**Statute of limitations**
For companies that are members of medium or large groups, there is generally a period of one year after the statutory filing dates for the tax authorities to start an enquiry into any aspect of the return. For other companies, enquiries can be started up to 12 months after the date of actual filing. These periods are extended for returns submitted after the filing deadline, that are amended by the taxpayer, or where an issue is subsequently discovered that was not sufficiently disclosed within the standard period.

**Intergovernmental agreements and cooperation**
The United Kingdom has a wide range of international agreements, alongside DTTs, for the exchange of information about taxpayers. In addition, the United Kingdom seeks to take a participative role in the EU and within the OECD with regard to the development of international tax principles.

The United Kingdom has agreed to implement the United States (US) Foreign Account Tax Compliance Act (FATCA) arrangements with effect from January 2014. The FATCA legislation is being introduced by the US authorities to prevent tax evasion by US citizens who use offshore accounts, and UK-based financial institutions must comply with its requirements or face suffering WHTs on interest or dividends from US corporations.

**Other issues**

**Adoption of International Financial Reporting Standards (IFRS)**
IFRS is mandatory for the consolidated financial statements of listed UK companies. All companies continue to have the choice of adopting IFRS or remaining on UK Generally Accepted Accounting Principles (GAAP) for their non-consolidated (solus) accounts. Many groups therefore continue to apply UK GAAP in their solus accounts.

The Financial Reporting Council (FRC) has confirmed that it intends to abolish UK GAAP in its current form for all periods beginning on or after 1 January 2015. From that time, UK companies will have a choice of either using full IFRS or a new UK GAAP standard (FRS 102) for their accounts. UK companies that are subsidiaries will also have an additional option to prepare accounts under either IFRS or FRS 102 methodologies with reduced disclosures. Early adoption is permitted. In addition, the Financial Reporting Standard for Smaller Entities (FRSSE) will be an option for small companies or small groups as defined by the Companies Act 2006. However, the options available to a company are subject to the requirements of the UK Company Law framework for consistency of GAAP within a group.

**UK tax legislation**
Announcements of proposed new legislation generally occur at least once a year. The main announcement is made on Budget Day (generally in March), when tax rates are set for the coming year. Other announcements can be made at other times and, subject to becoming approved and adopted law, can apply from a specified date. The new legislation is then included in an annual Finance Act, which is normally finalised in July. Much of the legislation introduced in recent years has been due to challenges under the EC treaty, or as a result of the tax planning being notified under the UK’s tax avoidance
disclosure regulations. In years of a general election (such as 2010), there may be additional Budget Days and Finance Acts.

UK tax law is periodically consolidated. Until recently, the latest consolidation Act dated from 1988, which covered both income tax and corporation tax. Over the last few years, income tax and corporation tax legislation has been consolidated separately, and currently the latter is to be found in the Corporation Tax Acts 2009 and 2010, and the Taxation (International and Other Provisions) Act 2010.
Significant developments

Numerous temporary tax provisions that expired at the end of 2011 were renewed retroactively to 1 January 2012, and extended through 31 December 2013, as part of the American Taxpayer Relief Act of 2012, which was signed into law by President Barack Obama on 2 January 2013. The general business incentives that have been renewed and extended include the following provisions:

- 50% bonus depreciation.
- Increased Section 179 expensing limit of 500,000 United States dollars (USD) with USD 2 million phaseout threshold and expanded definition of Section 179 property (see the Deductions section for a description of the Section 179 deduction).
- Research credit.
- Subpart F exception for active financing income (see the Income determination section for a description of Subpart F income).
- Look-through treatment of payments between related controlled foreign companies (CFCs) under the foreign personal holding company rules.
- 15-year straight-line cost recovery for qualified leasehold improvements, restaurant buildings and improvements, and retail improvements.
- Seven-year recovery period for motor sports entertainment complexes.
- Work opportunity tax credit.
- Wage credit for employers of active-duty military members.
- Railroad track maintenance credit.
- Special expensing rules for qualified film and television productions.
- New markets tax credit.
- Mine rescue team training credit.
- Expensing of advanced mine safety equipment.
- Enhanced charitable deduction for contributions of food property.
- Treatment of some dividends of regulated investment companies (RICs).
- RICs considered qualified investment entities under the 1980 Foreign Investment in Real Property Tax Act.
- Special rules for qualified small business stock.
- Reduction in S corporation recognition period for built-in gains tax (see the Taxes on corporate income section for a description of S corporations).

Taxes on corporate income

In the United States (US), resident corporations are taxed based on worldwide income. Generally, a foreign corporation engaged in a US trade or business is taxed at regular US corporate tax rates on income from US sources that is effectively connected with that business and at 30% on US-source income not effectively connected with that business.
The US corporate income tax (CIT) rate is based on a progressive rate schedule; however, an alternative minimum tax (AMT) provides for a flat rate with fewer deductions.

<table>
<thead>
<tr>
<th>2013 taxable income</th>
<th>Pay (USD) + % on excess of the amount over (USD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over (USD) But not over (USD)</td>
<td>0</td>
</tr>
<tr>
<td>0</td>
<td>50,000</td>
</tr>
<tr>
<td>50,000</td>
<td>75,000</td>
</tr>
<tr>
<td>75,000</td>
<td>100,000</td>
</tr>
<tr>

<td>10,000,000</td>
<td>15,000,000</td>
</tr>
<tr>
<td>15,000,000</td>
<td>18,333,333</td>
</tr>
<tr>
<td>18,333,333</td>
<td></td>
</tr>
</tbody>
</table>

The 39% tax rate applies to taxable income between USD 100,000 and USD 335,000 to eliminate the benefit of the 15% and 25% rates, and the 38% tax rate applies to taxable income between USD 15,000,000 and USD 18,333,333 to eliminate the benefit of the 34% rate. Special rules apply to personal service corporations and personal holding companies.

**Alternative minimum tax (AMT)**

An AMT is imposed on corporations other than S corporations (see below) and small C corporations (generally those with no three year average annual gross receipts exceeding USD 7.5 million). The tax is 20% of alternative minimum taxable income (AMTI) in excess of a USD 40,000 exemption amount (subject to a phase out). AMTI is computed by adjusting the corporation's regular taxable income by specified adjustments and 'tax preference' items. Tax preference or adjustment items could arise, for example, if a corporation has substantial accelerated depreciation, percentage depletion, intangible drilling costs, or non-taxable income.

**S corporations**

Corporations with 100 or fewer shareholders, none of whom may be corporations, that meet certain other requirements may elect to be taxed under Subchapter S of the Internal Revenue Code (IRC or ‘the Code’) and are thus known as S corporations. S corporations are taxed in a manner similar, but not identical, to partnerships (i.e. all tax items [e.g. income, deductions] flow through to the owners of the entity). Thus, S corporations generally are not subject to US federal income tax.

**Gross transportation income taxes**

Foreign corporations and non-resident alien individuals are subject to a yearly 4% tax on their US-source gross transportation income (USSGTI) that is not effectively connected with a US trade or business. Transportation income is any income derived from, or in connection with, (i) the use (or hiring or leasing) of any vessel or aircraft, or (ii) the performance of services directly related to the use of any vessel or aircraft.

**Local income taxes**

CIT rates vary from state to state and generally range from 1% to 12% (although some states impose no income tax). The most common taxable base is federal taxable income, which is modified by state provisions and generally is allocated to a state on the basis of a three-factor formula: tangible assets and rental expense, sales and other receipts,
United States

and payroll. State and municipal taxes are deductible expenses for federal income tax purposes.

Corporate residence

A corporation organised or created in the United States under the law of the United States or of any state is a domestic corporation. A domestic corporation is a resident corporation even though it does no business or owns no property in the United States.

Permanent establishment (PE)

A PE generally is defined as a fixed place of business.

Other taxes

Sales taxes

No provisions exist for a sales tax or value-added tax (VAT) at the federal level. However, sales and use taxes constitute a major revenue source for the 45 states that impose such taxes and the District of Columbia. Sales and use tax rates vary from state to state and generally range from 2.9% to 7.25% at the state level. Most states also allow a 'local option' that permits local jurisdictions such as cities and counties to impose an additional percentage on top of the state-level tax and to keep the related revenues.

In general, a sales tax is a tax applied to the retail sale of tangible personal property and certain services. Although the form of the tax may vary, it is usually imposed either directly upon the retail sale of the taxable item, on the gross receipts from the sales of taxable items, or on the person engaged in the business of making retail sales of taxable items. The use tax compliments the sales tax and is usually assessed on purchases made out of state and brought into the jurisdiction for use, storage, or consumption. Typically, either a sales tax or a use tax can be assessed on a transaction, but not both.

Customs duties and import tariffs

All goods imported into the United States are subject to entry and are dutiable or duty-free in accordance with their classification under the applicable items in the Harmonized Tariff Schedule of the United States. The classification also identifies eligibility for special programs and free trade agreement preferential duty rates.

When goods are dutiable, ad valorem, specific, or compound duty rates may be assessed. An ad valorem rate, which is the type of rate most often applied, is a percentage of the value of the merchandise, such as 7% ad valorem. A specific rate is a specified amount per unit of weight or other quantity, such as 6.8 cents per dozen. A compound rate is a combination of both an ad valorem rate and a specific rate, such as 0.8 cents per kilo plus 8% ad valorem. Customs requires that the value of the goods be properly declared regardless of the dutiable status of the merchandise.

Liability for the payment of duty becomes fixed at the time an entry is filed with US Customs and Border Protection (CBP). The obligation for payment is upon the person or firm in whose name the entry is filed, the importer of record.

Excise taxes

Excise taxes are generally imposed by the federal and state governments on a wide range of goods and activities, including gasoline and diesel fuel used for transportation, air travel, manufacturing of specified goods, and indoor tanning services.
The excise tax rates are as varied as the goods and activities upon which they are levied. For example, the excise imposed on indoor tanning services is 10% of the amount paid for the services while the excise imposed on the sale of coal mined in the United States is the lower of USD 1.10 per ton or 4.4% of the sale price.

**Property taxes**
Most states, and some cities, impose a variety of property taxes on both real and personal property.

**Stamp taxes**
No provisions exist for a stamp tax at the federal level. However, state and local governments frequently impose stamp taxes at the time of officially recording a transaction based upon the value of real estate. The sales tax on real estate may be a stamp tax on the documents recording the transfer of the real estate.

**Capital gain taxes**
On current transactions, the long-term capital gains tax rate is the same as the tax rates applicable to ordinary income. Thus, the maximum rate is 35%, excluding the additional phase out rates. However, differences may arise where AMT is imposed.

**Accumulated earnings tax**
Corporations (other than S corporations, domestic and foreign personal holding companies, corporations exempt from tax under Subchapter F of the Code, and passive foreign investment companies) accumulating earnings and profits for the purpose of avoiding shareholder personal income tax are subject to a penalty tax in addition to any other tax that may be applicable. The accumulated earnings tax is equal to 15% of ‘accumulated taxable income’. Generally, accumulated taxable income is the excess of taxable income with certain adjustments, including a deduction for regular income taxes, over the dividends paid deduction and the accumulated earnings credit. Note that a corporation can justify the accumulation of income, and avoid tax, based on its reasonable business needs.

**Personal holding company tax**
US corporations and certain foreign corporations that receive substantial ‘passive income’ and are ‘closely held’ may be subject to personal holding company tax. The personal holding company tax is 15% of undistributed personal holding company income and is levied in addition to the regular tax.

**Payroll taxes**
Employers are subject to federal unemployment insurance tax (FUTA) of 6.2% on the first USD 7,000 of wages paid to employees meeting certain criteria. In addition, states impose workers’ compensation insurance tax at varying rates depending on state law and the nature of employees’ activities. For 2013, employers also are subject to social security contributions tax of 7.65% (including 1.45% Medicare tax) on the first USD 113,700 (up from USD 110,100 for 2012) of wages paid to employees and 1.45% of Medicare tax on any wages in excess of USD 113,700 (up from USD 110,100 for 2012).

**Environmental tax**
Importers, manufacturers, and sellers of petroleum or other ozone-depleting chemicals (ODC) are subject to an environmental tax calculated per weight of the ODC used in the manufacture of the product. The tax is determined under an exact or table method provided in the instructions to Form 6667. If the weight cannot be determined, the tax is 1% of the entry value of the product.
Other state and municipal taxes
Other taxes that states may impose, in lieu of or in addition to taxes based on income, include franchise taxes and taxes on the capital of a corporation. State and municipal taxes are deductible expenses for federal income tax purposes.

Branch income
Tax rates on branch profits are the same as on corporate profits. The law also imposes a 30% branch profits tax in addition to US corporate level income taxes on a foreign corporation’s US branch earnings and profits for the year that are effectively connected with a US business. The taxable base for the branch profits tax is increased (decreased) by any decrease (increase) in the US net equity of the branch. The branch profits tax on profits may be reduced or eliminated entirely if a relevant treaty so provides (subject to strict ‘treaty shopping’ rules). The purpose of the branch profits tax is to treat US operations of foreign corporations in much the same manner as US corporations owned by foreign persons.

With certain exceptions, a 30% (or lower treaty rate) branch profits tax also will be imposed on interest payments by the US branch to foreign lenders. In addition, the tax will apply if the amount of interest deducted by the branch on its US tax return exceeds the amount of interest actually paid during the year.

Income determination
Inventory valuation
Inventories generally are stated at the lower of cost or market on a first in first out (FIFO) basis. Last in first out (LIFO) may be elected for tax purposes on a cost basis only and generally requires book and tax conformity.

The tax law requires capitalisation for tax purposes of several costs allocable to the manufacturing process that frequently are expensed as current operating costs for financial reporting (e.g. the excess of tax depreciation over financial statement depreciation).

Capital gains
Gains or losses on the sale or exchange of capital assets held for more than 12 months are treated as long-term capital gains or losses. Gains or losses on the sale or exchange of capital assets held for 12 months or less are treated as short-term capital gains or losses. The excess of net long-term capital gain over net short-term capital loss is considered net capital gain. Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a taxable year may be carried back three years and carried forward five years to be used against (offset) capital gains.

For dispositions of personal property and certain non-residential real property used in a trade or business, net gains are first taxable as ordinary income to the extent of the depreciation/cost recovery, with any remainder generally treated as capital gain. For other trade or business real property, net gains generally are taxed as ordinary income to the extent that the depreciation or cost recovery claimed exceeds the straight-line amount, with any remainder treated as capital gain.

An exception to capital gain treatment exists to the extent that losses on business assets were recognised in prior years. A net loss from the sale of business assets is treated as an
ordinary loss. Future gains, however, will be treated as ordinary income to the extent of such losses recognised in the five immediately preceding years.

**Dividend income**
A US corporation generally may deduct 70% of dividends received from other US corporations in determining taxable income. The dividends received deduction is increased from 70% to 80% if the recipient of the dividend distribution owns at least 20% but less than 80% of the distributing corporation. Generally, dividend payments between US corporations that are members of the same affiliated group (see the Group taxation section) are deferred or eliminated until a transaction with a third party occurs. With minor exceptions, a US corporation may not deduct dividends it receives from a foreign corporation.

**Stock dividends**
A US corporation can distribute a tax-free dividend of common stock proportionately to all common stock shareholders. If the right to elect cash is given, all distributions to all shareholders are taxable as dividend income whether cash or stock is taken. There are exceptions to these rules, and extreme caution must be observed before making such distributions.

**Interest income**
Interest income is generally includible in the determination of taxable income.

**Rental income**
Rental income is generally includible in the determination of taxable income.

**Royalty income**
Royalty income is generally includible in the determination of taxable income.

**Partnership income**
The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership’s taxable income.

**Foreign income (Subpart F income) of US taxpayers**
Generally, a US corporation is taxed on its worldwide income, including foreign branch income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credits. Alternatively, a deduction may be claimed for actual foreign taxes that are paid. In the case of foreign subsidiaries that are more than 50% owned (by vote or value) by US shareholders (commonly known as controlled foreign companies or CFCs), certain types of undistributed income will be taxed currently to the US shareholders (Subpart F income). Generally, Subpart F income includes income that is easily transferred to a low-tax jurisdiction.

Income from certain passive foreign investment companies (where 75% or more of the income is passive or at least 50% of the assets held produce passive income) also is subject to current taxation. Current taxation occurs if the corporation elects to be a qualified electing fund (QEF) or there are actual distributions. If a QEF election is not made and the corporation makes an actual distribution, the distribution will be treated as an excess distribution to the extent it exceeds 125% of the average of the distributions made with respect to the stock over the three immediately preceding years. The excess distribution is spread over the taxpayer’s holding period, and the amount allocated to each year in the holding period is subject to tax at the highest marginal tax rate in effect for that year. This deferred tax amount also is subject to an
interest charge. The interest charge is designed to pay the benefit of the tax deferral that arises out of having an overseas investment that pays no US income taxes.

---

**Deductions**

**Depreciation and amortisation**
Depreciation deductions are allowances that may be taken for capital outlays for tangible property. For property placed in service after 1986, capital costs must be recovered by using the modified accelerated cost recovery system (MACRS) method. Depending on the type of tangible property, the general cost recovery periods are three, five, seven, ten, 15, 20, 27.5, and 39 years (31.5 years for property placed in service before 13 May 1993). The cost recovery methods and periods are the same for both new and used property. Most tangible personal property is in the three, five, or seven year class. Property placed in the three, five, seven, or ten year class is depreciated by first applying the 200% declining-balance method and then switching to the straight-line method at such a time as when use of the straight-line method maximises the depreciation deduction. Property in the 15 or 20 year class is depreciated by using the 150% declining-balance method and later switching to the straight-line method. An election may be made to use the alternative depreciation system (basically, the straight-line method over prescribed lives). Residential rental property generally is depreciated by the straight-line method over 27.5 years. Non-residential real property is depreciated by the straight-line method over 39 years (31.5 years for property placed in service before 13 May 1993).

An election to use the straight-line method over the regular recovery period or a longer recovery period also is available. Alternatively, taxpayers may elect to use the 150% declining-balance method over the regular recovery period for all property other than real property. This method is required for AMT purposes.

For most tangible personal and real property placed in service in the United States after 1980 but before 1 January 1987, capital costs were recovered using the accelerated cost recovery system (ACRS), which applied accelerated methods of cost recovery over periods specified by statute. The general ACRS recovery periods were three, five, ten, 15, 18, and 19 years.

Special rules apply to automobiles and certain other ‘listed’ property. Accelerated depreciation deductions can be claimed only if the automobile is used 50% or more for qualified business use as defined in related regulations. Further, for automobiles placed in service after 1986, the allowable yearly depreciation deduction cannot exceed specific dollar limitations.

Separate methods and periods of cost recovery are specified by statute for certain tangible personal and real property used outside the United States.

Rapid amortisation may be allowable for certain pollution control facilities.

Tax depreciation is not required to conform to book depreciation. Tax depreciation generally is subject to recapture on the sale or disposition of certain property, to the extent of gain, which is subject to tax as ordinary income.

The cost of most intangible assets is generally capitalised and amortisable rateably over 15 years.
Section 179 deduction
Corporations can elect to expense, up to a statutory amount per year, the cost of certain eligible property used in the active conduct of a trade or business. This is commonly referred to as the Section 179 deduction.

The 2003 tax cuts temporarily increased the maximum dollar amount that may be deducted under Section 179 from USD 25,000 to USD 100,000. The 2003 tax cuts also increased the phase-out amount from USD 200,000 to USD 400,000. These amounts have been further modified and extended several times on a temporary basis, increasing up to a high of USD 500,000 and USD 2 million, respectively, for tax years beginning in 2010 and 2011, and then to USD 125,000 and USD 500,000, respectively, for tax years beginning in 2012, before reverting to the permanent amounts of USD 25,000 and USD 200,000, respectively, for tax years beginning in 2013 and thereafter. The American Taxpayer Relief Act of 2012, signed into law on 2 January 2013, increases the maximum amount and phase-out threshold in 2012 and 2013 to the levels in effect in 2010 and 2011 (USD 500,000 and USD 2 million, respectively). At the end of 2013, the amounts revert to USD 25,000 and USD 200,000, respectively.

In addition, the deduction under this election is limited to the taxable income of the business.

Bonus depreciation
A 50% special first year depreciation allowance (i.e. bonus depreciation) applies (unless an election out is made) for new MACRS property with a recovery period of 20 years or less, certain computer software, water utility property, and certain leasehold improvements acquired after 31 December 2007. The special allowance applies for regular income tax and AMT purposes. No AMT adjustment is made if the special allowance is used. The special allowance does not apply to property that must be depreciated using the alternative depreciation system or to 'listed property' not used predominantly for business. The special allowance reduces basis before regular depreciation is figured. Additionally, claiming bonus depreciation on automobiles may affect the first year depreciation limits on such automobiles.

The American Taxpayer Relief Act of 2012, signed into law on 2 January 2013, extends 50% bonus depreciation through 31 December 2013 (31 December 2014 for long-production-period property [LPPP] and certain aircraft). This provision was set to expire on 31 December 2010 (31 December 2011 for LPPP and certain aircraft) as extended by the Small Business Jobs Act of 2010.

- The Act did not extend 100% bonus depreciation, which expired at the end of 2011.
- The Act extends for one year, to tax year beginning in 2013, the provision allowing a corporation to elect to accelerate AMT credits in lieu of bonus depreciation.

Depletion
For natural resource properties other than timber and certain oil and gas properties, depletion may be computed on a cost or a percentage basis.

Cost depletion is a method of depletion applied to exhaustible natural resources, including timber, which is based on the adjusted basis of the property. Each year, the adjusted basis of the property is reduced, but not below zero, by the amount of depletion calculated for that year. The current year cost depletion deduction is based on an estimate of the number of units that make up the deposit and the number of units extracted and sold during the year.
Percentage depletion is a method of depletion applied to most minerals and geothermal deposits, and, to a more limited extent, oil and gas. Percentage depletion is deductible at rates varying from 5% to 25% of gross income, depending on the mineral and certain other conditions. Percentage depletion may be deducted even after the total depletion deductions have exceeded the cost basis. However, percentage depletion is limited to 50% (100% for oil and gas properties) of taxable income from the property (computed without allowance for depletion). Generally, percentage depletion is not available for oil or gas wells. However, exceptions exist for natural gas from geopressurised brine and for independent producers of oil and gas.

**Goodwill**
The cost of goodwill generally is capitalised and amortisable rateably over 15 years.

**Start-up expenses**
Generally, start-up expenditures must be amortised over a 15-year period; however, certain taxpayers may elect to deduct some expenses in the tax year in which the trade or business begins.

**US manufacturing deduction**
Over the last several decades, various tax incentive systems have been enacted in the United States to encourage exports and were later repealed, including the extraterritorial income (ETI) regime, which was repealed as a result of a World Trade Organization (WTO) ruling that the ETI regime favoured US goods and violated the national treatment provisions of the General Agreement on Tariffs and Trade. In response, the United States enacted the American Jobs Creation Act of 2004, which introduced a phase-out repeal of ETI and introduced the domestic production activities deduction under Section 199, seeking to compensate US manufacturers for the loss of ETI benefits.

Under Section 199, taxpayers are allowed a 9% deduction for qualified production activities (QPA) income (subject to a taxable income limitation). The deduction is available to all taxpayers actively engaged in QPA. For corporate taxpayers, the deduction generally will mean a federal income tax rate of 31.85% on QPA income. Importantly, the deduction also applies in calculating the AMT. There is a limit on the amount of the deduction equal to 50% of W-2 wages allocable to QPA (subject to a specific effective date), and the deduction is not allowed for taxpayers that incur a loss from their production activities or have an overall loss (including a carryover loss) from all activities.

A taxpayer's QPA income is calculated using the following formula: domestic production gross receipts less the sum of cost of goods sold allocable to such receipts and other expenses, losses, or deduction that are properly allocable to such receipts.

**Interest expenses**
Interest expenses generally are deductible but may be limited by thin capitalisation rules (see Thin capitalisation in the Group taxation section).

**Bad debt**
Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless. Determining the date the debt becomes worthless may present difficulty.
Charitable contributions

Deductions for allowable charitable contributions may not exceed 10% of taxable income computed without regard to certain deductions, including charitable contributions themselves. Deductions for contributions so limited may be carried over to the five succeeding years, subject to the 10% limitation annually.

Employee benefit plans (pension plans and expenses)

Through the Code, the government provides incentives for employers to provide retirement benefits to workers, including employee benefit, qualifying profit-sharing, or stock bonus plans. Usually, the employer will be allowed a current deduction for any contributions made to the fund, and the employee’s tax liability will be deferred until the benefit is paid. For-profit, non-government employers generally have two types of available plans, which generally are subject to the reporting and disclosure requirements set forth under the Employee Retirement Income Security Act of 1974 (ERISA).

The first category of employee benefit plans is the defined benefit plan, or more commonly known as a pension plan, to which an employer contributes money, on an ongoing basis, to cover the amount of retirement income owed to retired employees under the plan (which will vary based on years of service, average salary, and/or other factors). Any investment gains or losses will not affect the amount of benefits paid to participants but will affect the amount an employer needs to contribute in order to cover its obligation.

The second category of employee benefit plans is the defined contribution plan, or more commonly known in the United States as a ‘401(k) plan’, to which an employer’s contributions (if any) are allocated amongst the separate accounts of participating employees, who also may contribute to their respective accounts. Investment gains or losses and the history of contributions will affect the value of a participant’s account at retirement but will not affect an employer’s contributions since the employer is not obligated to ensure any specified level of benefit in the plan.

Non-profits, including churches and government entities, have similar employee benefit plans, except different requirements apply. Small employers and self-employed individuals also have similar options available but are subject to different requirements.

Fines and penalties

No deduction generally is allowed for fines or penalties paid to the government for violation of any law.

Bribes, kickbacks, and illegal payments

An amount paid, directly or indirectly, to any person that is a bribe, kickback, or other illegal payment is not deductible.

Taxes

State and municipal taxes are deductible expenses for federal income tax purposes.

Other significant items

- No deduction generally is allowed for a contingent liability until such liability is fixed and determinable.
- Costs incurred for entertainment must meet strict tests in order to be deductible. The deduction for business meal and entertainment expenses is 50% of the expenses
United States

incurred. There are also limitations on the deductibility of international and domestic business travel expenses.

• Royalty payments, circulation costs, mine exploration and development costs, and other miscellaneous costs of carrying on a business are deductible, subject to certain conditions and limits.

• Depending on the taxpayer’s tax accounting method, research and experimental expenditures may be deducted as incurred or treated as deferred expenses and amortised over a period of not less than 60 months; however, in general, the method used must be consistently applied.

Net operating losses (NOLs)
An NOL is generated when business deductions exceed gross income in a particular tax year. Depending on current tax law, an NOL may be carried back to offset past income and possibly obtain a refund or carried forward to offset future income. Generally, a loss may be carried back two years and, if not fully used, carried forward 20 years. For tax years beginning before 6 August 1997, a loss may be carried back three years and, if not fully used, carried forward 15 years. For state tax purposes, carryback and carryforward provisions are often similar to the federal provisions, except that several states do not permit any carrybacks or carryforwards.

Special rules surrounding NOLs may apply if a taxpayer is located in a qualified disaster area.

Special rules also apply relating to specified liability losses.

Complex rules may limit the use of NOLs after a reorganisation or other change in corporate ownership. Generally, if the ownership of more than 50% in value of the stock of a loss corporation changes, a limit is placed on the amount of future income that may be offset by losses carried forward.

Payments to foreign affiliates
A US corporation generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates to the extent the amounts are actually paid and are not in excess of what it would pay an unrelated entity (i.e. are at arm’s length). In addition, US withholding on these payments may be required.

Group taxation
An affiliated group of US ‘includible’ corporations, consisting of a parent and subsidiaries directly or indirectly 80% owned, generally may offset the profits of one affiliate against the losses of another affiliate within the group by electing to file a consolidated federal income tax return. A foreign incorporated subsidiary may not be consolidated into the US group, except for certain Mexican and Canadian incorporated entities. A partnership may not be included in a consolidated return, even if it is 100% owned by members of an affiliated group, since a partnership is not a corporation. However, a member’s earnings that flow through from a partnership are included as part of the consolidated group’s taxable income or loss. Filing on a consolidated (combined) basis is also allowed (or may be required or prohibited) in certain states.

Sales, dividends, and other transactions between corporations that are members of the same group generally are deferred or eliminated until such time as a transaction occurs with a non-member of the group. Losses incurred on the sale of members of the group are disallowed under certain circumstances.
Transfer pricing
Transfer pricing regulations govern how related entities set internal prices for the transfers of goods, intangible assets, services, and loans in both domestic and international contexts. The regulations are designed to prevent tax avoidance among related entities and place a controlled party on par with an uncontrolled taxpayer by requiring an arm’s-length standard. The arm’s-length standard generally is met if the results of a controlled transaction are consistent with results that would have been realised if uncontrolled taxpayers had engaged in a similar transaction under similar circumstances. If a company is not in compliance with the arm’s-length standard, the Internal Revenue Service (IRS) may raise taxable income and tax payable in the United States. After a transfer pricing adjustment, a multinational company may face double tax, paying tax twice on the same income in two countries. Multinational companies may request competent authority relief from double taxation through a tax treaty.

In order to avoid potential transfer pricing penalties, one avenue available to companies may be to obtain an advance pricing agreement (APA) with the IRS, unilaterally, or with the IRS and another tax authority, bilaterally, covering inter-company pricing.

Thin capitalisation
Thin capitalisation rules may apply to disallow interest payments related to excess debt and to re-characterise such payments as dividends. The interest expense deduction can be limited and suspended if more than 50% of the adjusted taxable income of a thinly-capitalised corporation (with similar rules for a corporate partner in a partnership) is sheltered by interest paid to a related party (or paid to a third-party but guaranteed by the related party) who is not subject to US tax on the income.

Controlled foreign companies (CFCs)
Under the Subpart F regime, a CFC is any foreign corporation with respect to which more than 50% of either the voting power of all classes of stock entitled to vote or the total value of all classes of the corporation’s stock is owned by US shareholders on any day during the foreign corporation’s taxable year.

Tax credits and incentives

Foreign tax credit (FTC)
Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction foreign income, war profits, and excess profit taxes paid or accrued during the tax year to any foreign country or US possession. An FTC reduces US income tax liability dollar for dollar, while a deduction reduces the US income tax liability at the marginal rate of the taxpayer. For taxpayers with NOLs, the FTC is of no value in such year. However, a benefit might be received either in an earlier year (through a refund of previously paid taxes) or a later year (through a reduction of future taxes). It also should be noted that a taxpayer has an ability to switch from credit to deduction (or from deduction to credit) at any time in a ten-year period commencing when the foreign taxes were paid or accrued. Generally, an FTC may be carried back one year and, if not fully used, carried forward ten years.

In addition, the FTC goes beyond direct taxes to include foreign taxes paid ‘in lieu of’ a tax upon income, war profits, or excess profits, which would otherwise generally be imposed. It also includes deemed-paid (indirect) taxes paid for certain US corporate shareholders of non-portfolio foreign corporations when actual or deemed dividends are received. Furthermore, the FTC system has numerous limitations to mitigate the potential abuses of the credit by the taxpayer.

United States

**General business credit**
Various business credits are available to provide special incentives for the achievement of certain economic objectives. In general, these credits are combined into one ‘general business credit’ for purposes of determining each credit’s allowance limitation for the tax year. The general business credit that may be used for a tax year is limited to a tax-based amount. In general, the current year’s credit that cannot be used in a given year because of the credit’s allowance limitation may be carried back to the tax year preceding the current year and carried forward to each of the 20 years following the current year.

In general, the current year business credit is a combination of the following credits:

- Investment credit.
- Work opportunity credit.
- Alcohol fuels credit.
- Research credit.
- Low-income housing credit.
- Enhanced oil recovery credit.
- Disabled access credit for certain eligible small businesses.
- Renewable electricity production credit.
- Empowerment zone employment credit.
- Indian employment credit.
- Employer social security credit.
- Orphan drug credit.
- New markets tax credit.
- Small employer pension plan startup cost credit for eligible employers.
- Employer-provided child care credit.
- Railroad track maintenance credit.
- Biodiesel fuels credit.
- Low sulphur diesel fuel production credit.
- Marginal oil and gas well production credit.
- Distilled spirits credit.
- Advanced nuclear power facility production credit.
- Non-conventional source production credit.
- New energy efficient home credit.
- Energy efficient appliance credit.
- A portion of the alternative motor vehicle credit.
- A portion of the alternative fuel vehicle refuelling property credit.
- Hurricane Katrina housing credit.
- Hurricane Katrina employee retention credit.
- Hurricane Rita employee retention credit.
- Hurricane Wilma employee retention credit.
- Mine rescue team training credit.
- Agricultural chemicals security credit for eligible businesses.
- Differential wage payment credit.
- Carbon dioxide sequestration credit.
- A portion of the new qualified plug-in electric drive motor vehicle credit for vehicles that will vary based on the date of purchase.

**Employment credits**
A ‘work opportunity tax credit’ is available for employment of certain types of workers. ‘Creditable’ wages generally are the first USD 6,000 of wages paid to each qualified employee for the year. The credit is 40% of creditable wages, for a maximum credit of
USD 2,400. The American Taxpayer Relief Act of 2012, signed into law on 2 January 2012, extends this credit through 2013.

**Research and development (R&D) credit**
The credit for qualified research expenses was extended as part of the American Taxpayer Relief Act of 2012, retroactive to 1 January 2012, and is available with respect to qualified research expenses (QREs) incurred before 1 January 2014. For QREs incurred before that date, a credit against the federal income tax equal to 20% of the sum of QREs in excess of the ‘base amount’ and basic research payments (as discussed below) to a qualified organisation may be obtained for certain periods.

The base amount cannot be less than 50% of current-year QREs. In tax years ending after 8 August 2005, the research expense credit also includes 20% of the taxpayer’s expenditures on qualified energy research undertaken by an energy research consortium.

In addition, for tax years ending after 2006, taxpayers may be able to use the new alternative simplified credit (ASC), which does not use a gross receipts factor. The ASC generally equals 12% for tax years ending after 2006 and beginning before 2008 for QREs that exceed 50% of the average QREs for the three tax years preceding the credit determination year. For other tax years, the applicable ASC percentage is 14%.

The deduction for R&D expenditures must be reduced by the entire amount of the credit unless an election is made to reduce the amount of the credit.

**Inbound investment incentives**
There generally are no specific incentives related to inbound investment at the federal level, other than certain portfolio debt and bank deposit exceptions. The portfolio debt exception enables non-residents and foreign corporations to invest in certain obligations (which must meet certain statutory requirements to qualify as ‘portfolio debt’) in the United States without being subject to US income (or withholding) tax on the interest income. Certain state and local benefits may also be available.

**Qualified private activity bonds**
Interest income received on certain qualified private activity bonds generally is exempt from federal income tax. This enables a business enterprise to issue the bonds at a lower interest rate.

**Other tax incentives**
State and local governments provide numerous incentives to encourage business and, thus, employment in their jurisdictions.

**Withholding taxes**
Under US domestic tax laws, a foreign person generally is subject to 30% US tax on its US-source income. US persons making payments (‘withholding agents’) to foreign persons generally must withhold 30% of the payment amount as tax withheld at source on payments, such as dividends and royalties, made to foreign persons. In other situations, withholding agents may apply reduced rates or be exempted from withholding tax (WHT) at source when there is a tax treaty between the foreign person’s country of residence and the United States.
The United States has entered into various income tax treaties with countries in order to avoid double taxation of the same income and to prevent tax evasion. The table below, from IRS Publication 901 (April 2013), summarises the benefits resulting from these treaties.

Notes

* Please note the tax rates and associated footnotes appearing in the ‘Royalties’ column in the table address three types of royalties, as denoted in the most recent IRS publication. These three are industrial royalties, motion picture and television copyright royalties, and ‘other’ copyright royalties. The slashes ‘/’ between each figure and associated footnote(s) are meant to demarcate these three types of royalties, respectively.

1. No US tax is imposed on a dividend paid by a US corporation that received at least 80% of its gross income from an active foreign business for the three-year period before the dividend is declared.
2. The reduced rate applies to dividends paid by a subsidiary to a foreign parent corporation that has the required percentage of stock ownership. In some cases, the income of the subsidiary must meet certain requirements (e.g. a certain percentage of its total income must consist of income other than dividends and interest). For Italy, the reduced rate is 10% if the foreign corporation owns 10% to 50% of the voting stock (for a 12-month period) of the company paying the dividends. For Japan, dividends received from a more than 50% owned corporate subsidiary are exempt if certain conditions are met.
3. The exemption or reduction in rate does not apply if the recipient has a PE in the United States and the property giving rise to the income is effectively connected with this PE. Under certain treaties, the exemption or reduction in rate also does not apply if the property producing the income is effectively connected with a fixed base in the United States from which the recipient performs independent personal services. Even with the treaty, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States under IRC Section 894(b).
4. The exemption or reduction in rate does not apply if the recipient is engaged in a trade or business in the United States through a PE that is in the United States. However, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States to apply the reduced treaty rate to that item of income.
5. Interest determined with reference to the profits of the issuer or one of its associated enterprises is taxed at 15%.
6. Contingent interest that does not qualify as portfolio interest is treated as a dividend and is subject to the rates under those columns, as appropriate.
United States

7. The exemption applies only to interest on credits, loans, and other indebtedness connected with the financing of trade between the United States and the CIS member. It does not include interest from the conduct of a general banking business.
8. The tax rates in the US treaty with the former USSR still apply to the following countries: Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan, and Uzbekistan.
9. The rate in column 2 applies to dividends paid by a RIC or a real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is an individual holding less than a 10% interest (25% in the case of Portugal, Spain, and Tunisia) in the REIT.
10. The rate is 8% for copyrights of scientific work.
11. The rate is 5% for interest (i) beneficially owned by a bank or other financial institution (including an insurance company) or (ii) paid due to a sale on credit of any industrial, commercial, or scientific equipment, or of any merchandise to an enterprise.
12. The rate is 10% if the interest is paid on a loan granted by a bank or similar financial institution. For Thailand, the 10% rate also applies to interest from an arm's-length sale on credit of equipment, merchandise, or services.
13. This is the rate for royalties for the use of, or the right to use, industrial, commercial, and scientific equipment. The rate for royalties for information concerning industrial, commercial, and scientific know-how is subject to the rate in column 5 ('other royalties').
14. Amounts paid to a pension fund or employee benefit organisation that are not derived from the carrying on of a business, directly or indirectly, by the fund or organisation are exempt.
15. The rate in column 2 applies to dividends paid by a RIC. Dividends paid by a REIT are subject to a 30% rate.
16. An election can be made to treat this interest income as if it were industrial and commercial profits taxable under article 8 of this treaty.
17. The rate is 4.9% for interest derived from (i) loans granted by banks and insurance companies and (ii) bonds or securities that are regularly and substantially traded on a recognised securities market. The rate is 10% for interest not described in the preceding sentence and paid (i) by banks or (ii) by the buyer of machinery and equipment to the seller due to a sale on credit.
18. The rate is 10% for interest determined with reference to (i) receipts, sales, income, profits, or other cash flow of the debtor or a related person, (ii) any change in the value of any property of the debtor or a related person, or (iii) any dividend, partnership distribution, or similar payment made by the debtor to a related person.
19. Interest received by a financial institution is tax exempt. For Venezuela, the rate is 4.95% if the interest is beneficially owned by a financial institution (including an insurance company).
20. The rate in column 2 applies to dividends paid by a RIC or REIT. However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual (or pension fund, in the case of France or New Zealand) holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.
21. Dividends received from an 80%-owned corporate subsidiary are exempt if certain conditions are met.
22. Exemption does not apply to amounts paid under, or as part of, a conduit arrangement.
23. Interest is exempt if (i) paid to certain financial institutions, or (ii) paid on indebtedness from the sale on credit of equipment or merchandise.
24. Amounts paid to a pension fund that are not derived from the carrying on of a business, directly or indirectly, by the fund are exempt. This includes amounts paid by a REIT only if the conditions in footnote 31 are met. For Sweden, to be entitled to the exemption, the pension fund must not sell or make a contract to sell the holding from which the dividend is derived within two months of the date the pension fund acquired the holding.
25. The rate in column 2 applies to dividends paid by a RIC or REIT. However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual or a pension fund holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified. Dividends paid to a pension fund from a RIC, or a REIT that meets the above conditions, are exempt. For Sweden, the pension fund must also satisfy the requirements in footnote 30.
26. The rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is an individual holding less than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.
United States

**Tax administration**

**Taxable period**

US corporate taxpayers are taxed on an annual basis. Corporate taxpayers may choose a tax year that is different from the calendar year. New corporations may use a short tax year for their first tax period, and corporations may also use a short tax year when changing tax years.

**Tax returns**

The US tax system is based on the principle of self assessment. A corporate taxpayer is required to file an annual tax return (generally Form 1120) by the 15th day of the third month following the close of its tax year. A taxpayer can obtain an additional six month extension of time to file its tax return. Failure to timely file may result in penalties.

**State tax returns**

| Various | Income tax returns for states where corporation carries on trade/business. | Varies, often 15 April |

**Payment of tax**

A taxpayer’s tax liability generally is required to be prepaid throughout the year in four equal estimated payments and fully paid by the date the tax return is initially due for that year. However, because a corporation that expects its tax liability for the tax year to exceed the small sum of USD 500 (based on its tax liability for the preceding year), almost all corporations are required to pay their full estimated tax liability for the year in their four estimated tax payments. For calendar year corporations, the four estimated payments are due by the 15th day of April, June, September, and December. For fiscal year corporations, the four estimated payments are due by the 15th day of the fourth, sixth, ninth, and 12th month of the tax year. Generally, no extensions to pay are allowed. Failure to pay the tax by the due dates as indicated above can result in estimated tax and late payment penalties and interest charges.
The instalment payments must include estimates of regular CIT, AMT, environmental tax, and, for foreign corporations, the tax on gross transportation income. To avoid a penalty, corporations must calculate the instalment payments based on at least 25% of the lesser of (i) the tax shown on the current tax return or (ii) the prior year’s tax liability, provided that the tax liability was a positive amount in the prior year and that such year consisted of 12 months. However, corporations with taxable income of at least USD 1 million (before use of NOLs or capital loss carryforwards) in any of the three preceding years are not permitted to calculate the instalment based payment on the prior year’s tax liability, except in determining the first instalment payment. Instead, such corporations must calculate the instalment payments based on the tax shown on the current tax return.

Corporations with more than USD 1 billion in assets will be required to make estimated tax payments that are 100.25% of the amount otherwise due in July, August, or September of 2014. Such overpayments will be balanced out in October, November, or December of 2014 when payments of 99.75% of the amount otherwise due will be paid by corporations with more than USD 1 billion in assets.

Penalties
Civil and criminal penalties may be imposed for failing to follow the Code when paying US taxes. The civil penalty provisions may be divided into four categories: delinquency penalties; accuracy-related penalties; information reporting penalties; and preparer, promoter, and protester penalties. Many, but not all, have exception provisions to cover reasonable cause. In addition, many have provisions directing how the penalties interact with the other penalties.

These four main civil penalty categories may further be divided. First, the delinquency penalties may be divided into failure to file, failure to pay, and failure to make timely deposits of tax. Failure to make timely deposits of tax applies to taxpayers required to make instalment payments and WHT payments.

Second, the penalties relating to the accuracy of tax returns are divided into the negligence penalty, the substantial understatement penalty, substantial overstatement of pension liabilities, substantial estate or gift tax valuation underestimate, and the valuation penalties. These penalties are also coordinated with the fraud penalty to eliminate any stacking of the penalties. Again, like other provisions, the fraud penalty is not intended to be imposed as a stacked penalty.

The third category of penalties is the information reporting penalties. These penalties may be imposed upon those who only have a duty to report information to the IRS.

The fourth and final major categories of civil penalties are the preparer, promoter, and protester penalties. Currently, the most notable of these is the return preparer penalty for which there is a penalty for a position on a return for which the preparer did not have substantial authority. Also included in this provision is a penalty for wilful or reckless attempt to understate the tax liability of another person. Additionally, return preparer penalties may be imposed for failure to furnish a copy of a return or claim for refund to the taxpayer, sign the return or claim for refund, furnish his or her identifying number, or file a correct information return.

Other promoter and protester penalties include a penalty for promoting abusive tax shelters, aiding and abetting the understatement of tax liability, and filing frivolous income tax returns. Additionally, a court may award sanctions and costs if a person
institutes or maintains a proceeding primarily for delay, takes a position that is frivolous, or unreasonably fails to pursue available administrative remedies.

In addition to these major civil penalties, international tax related penalties for failures other than timely and accurate filing (e.g. wilful failure to report international boycott activity, failure of an agent to furnish a notice of a false affidavit relating to the WHT on dispositions of US real property interests, failure of a US person to furnish information relating to CFCs and controlled foreign partnerships, failure of a US person to report foreign bank accounts) exist. Pension and employee benefit related tax penalties exist that protect the policy reasons for the tax incentives, including, most notably, early withdrawal of pension funds. Another group of specialised penalties apply to exempt organisations.

Criminal penalties exist for situations when the failures to stay within the tax system are more egregious. Although applicable to corporate taxpayers, they are applied more frequently to individuals.

In addition to the penalty provisions, interest at statutory rates generally applies to underpayments of tax.

**Tax audit process**

Generally, the US tax system is based on self-assessment; however, many large and mid-size businesses are under continuous audit by the IRS and state tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller business and persons with lower incomes are generally subject to audit on a random basis.

**Statute of limitations**

The IRS generally has three years after an original return is filed to assess income taxes. A return will be deemed to have been filed on its due date, even if the return is actually filed on an earlier date.

**Topics of focus for tax authorities**

Currently, the IRS is focused on abusive payments related to contribution to capital of a corporation, domestic manufacturing deduction, foreign earnings repatriation, FTC generators, repairs vs. capitalisation change in accounting method, research credit claims, transfer of intangibles/offshore cost sharing, WHTs, and employee classification.

**Tax shelter**

Treasury regulations require taxpayers to disclose transactions determined to be abusive or possibly abusive. Current information on these transactions, known as listed and reportable transactions, is available from the IRS website (www.irs.gov).

**Accounting for income taxes**

For US federal tax purposes, the two most important characteristics of a tax method of accounting are (i) timing and (ii) consistency. If the method does not affect the timing for including items of income or claiming deductions, it is not an accounting method and generally IRS approval is not needed to change it. In order to affect timing, the accounting method must determine the year in which an income or expense item is to be reported.

In general, in order to establish an accounting method, the method must be consistently applied. Once an accounting method has been adopted for federal tax purposes, any change must be requested by the taxpayer and approved by the IRS. Changes in
accounting methods cannot be made through amending returns. The two most common methods of accounting are the accrual basis and cash basis methods.

**Foreign Account Tax Compliance Act (FATCA)**
FATCA was enacted in 2010 to prevent and detect offshore tax evasion. While the name may imply that FATCA is directed at financial institutions, many global companies outside the financial services industry may be affected if they have entities in their worldwide network falling under the purview of FATCA, or have operational areas that make or receive payments subject to FATCA.

Multinational enterprises that are withholding agents are already currently obligated to report, withhold on payments, and document payees, but FATCA requires changes to these activities. FATCA mandates that multinational businesses evaluate entity payees differently, engage in withholding on certain gross proceeds transactions (a change from historic processes), as well as report different information to the IRS.

The withholding provisions of FATCA are scheduled to begin in January 2014. Compliance with FATCA may require changes to existing systems and processes across business units and regions, the renewal of policies and day-to-day practices, and new tasks, such as registering with the IRS.

To mitigate certain foreign legal impediments to FATCA compliance, intergovernmental agreements (IGAs) also have been negotiated (with more to come) between the US Treasury and foreign governments. Under certain IGAs, including most of the IGAs signed thus far, information will be exchanged directly between the IRS and local governments. This obligates entities in IGA jurisdictions to report information to their government that may not have been required or permitted in the past.

Assessing FATCA’s impact will require identifying whether an IGA may apply to the entity or payment stream at issue. Provisions in the final FATCA regulations or any other IGA that provide more favorable results may be utilised. This likely will increase the complexity of the process, due in part to the multiple paths to compliance (e.g. regulations or an IGA). The regulators have focused on having consistent requirements in each IGA, but there are noticeable differences in the agreements signed to date.

**Other issues**

**Tax accounting and internal controls**
Accounting Standards Codification (ASC) 740, Income Taxes (formerly known as Financial Accounting Standards Board [FASB] Statement No. 109, Accounting for Income Taxes) addresses how companies should account for and report the effects of taxes based on income. ASC 740’s principles and requirements apply to domestic and foreign entities in preparing financial statements in accordance with US generally accepted accounting principles (GAAP), including not-for-profit entities with activities that are subject to income taxes. This scope includes: (i) domestic federal (national) income taxes (US federal income taxes for US enterprises) and foreign, state, and local (including franchise) taxes based on income; and (ii) an enterprise’s domestic and foreign operations that are consolidated, combined, or accounted for by the equity method.

In recent years, controls around the accounting for income taxes have been a critical source of material weaknesses in companies’ internal controls over financial reporting. Accounting for income taxes also has been a primary reason for restating
financial statements. Management should ensure that its judgments and estimates are reasonable (e.g. assessing the need for a valuation allowance on deferred taxes) and that the underlying internal control processes are reliable.

**Corporate reorganisations**
In general, a corporate reorganisation involving a merger, acquisition, or consolidation is a taxable event under the general recognition provisions of the Code. However, a corporate reorganisation that meets certain statutory and judicial requirements may qualify as a tax-free transaction, with gain or loss generally not recognised or deferred to a later date.

**US possessions**
Puerto Rico, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the US Virgin Islands have their own independent tax departments. Accordingly, they have their own rules. See the Puerto Rico summary for more information about Puerto Rico taxation.
**Significant developments**

**Tax treaties**
During 2012, double tax treaties (DTTs) with Portugal (as of September 2012), Liechtenstein (as of September 2012), Ecuador (as of November 2012), and Malta (as of December 2012) entered into force.

During 2012, the national government announced the beginning of negotiations of other DTTs as well as tax information exchange agreements (TIEAs) with several countries (e.g. Austria, Qatar, Singapore).

**Rural Real Estate Concentration Tax (ICIR)**
Since its entry into force, the ICIR attracted criticism from scholars. This caused several taxpayers to present actions to the Supreme Court of Justice, claiming the ICIR was against the Uruguayan Constitution.

Since the ‘leading case’ was decided in favour of the taxpayer, the national government decided to freeze the collection of the tax and to submit to the Parliament’s consideration a law abolishing the ICIR. During the first few months of 2013, the national government publicly communicated its intention to abolish the current net wealth tax (NWT) exemption granted to rural activities as a way to collect the amounts that would have been generated by the ICIR.

**Transfer pricing**
A recently approved law provides that the Executive Power can enter into advance pricing agreements (APAs) with taxpayers, which was already allowed and provided by regulations since 2009. Those APAs cannot cover more than three fiscal years.

Furthermore, stronger penalties have been introduced for failure to comply with transfer pricing formal duties and with other formal documentation requirements.

**Bank secrecy and identification of title holders**
Uruguay has recently introduced several relevant modifications to internal law that may impact corporate taxpayers.

The inclusion of the request of information by a treaty partner has been approved as one of the hypotheses under which banking secrecy can be lifted.

The identification of holders of bearer titles representing the capital of entities domiciled or doing business in Uruguay is now mandatory. In this regard, on 27 June 2012, the Congress passed a law that includes the compliance of certain obligations for identification purposes. This obligation relies on the holders, who must identify
themselves with the Central Bank of Uruguay, providing not only their identity but also the percentage of their participations in the entity.

Information shall be kept by the Central Bank of Uruguay and subject to secrecy, although the National Tax Office, Anti-money laundering authorities, Penal and Family Courts, and related entities may access them in certain cases.

The duty of identification applies to all entities domiciled in Uruguay and to companies incorporated abroad, provided that they act in Uruguay through a permanent establishment (PE) or if their management is carried out in Uruguay.

**Tax benefits for investments in dwellings of social interest**

During 2012, several practical aspects of the law granting tax benefits for investments in dwellings of social interest were approved by the Executive Power. These benefits, which cover not only the construction company but also the eventual buyers, range from exemption of corporate income tax (CIT) on the first sale by the constructor to exemption of income tax on the leasing income derived by the buyer (if any).

---

**Taxes on corporate income**

Net income derived from business activities conducted in Uruguay, obtained by legal entities resident in Uruguay and non-residents operating through a PE in Uruguay, is taxed at a CIT rate of 25% under the source principle (i.e. the territorial system of taxation). Accordingly, Uruguay taxes only income that is derived from activities conducted within its borders, income generated from property located in Uruguayan territory, or income derived from the economic use of rights within its territory (see **Foreign income in the Income determination section for an exception to this principle**).

In order to determine the net taxable income, all accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer will be able to deduct expenses from its gross income if such expenses are subject to taxation (either foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated if the tax is at a rate that is lower than 25%.

A 12% withholding tax (WHT) is imposed on Uruguayan-sourced income obtained by non-residents, except in cases where the income is obtained through the operations of a PE in Uruguay (see the **Withholding taxes section for more information**).

**Trading companies**

Uruguayan corporations that sell and buy foreign goods or services from Uruguay (which are not physically introduced to the country, in the case of goods, or which are not economically used in Uruguay, in the case of services) may determine the net Uruguayan-source income on a notional basis of 3% of the gross margin (difference between the selling price and the purchase price). This gross margin has to be compliant with transfer pricing rules (in line with Organisation for Economic Co-operation and Development [OECD] guidelines). The applicable effective CIT rate is 0.75% (25% x 3%).

**Local income taxes**

No taxes on corporate income may be levied by municipal authorities or other local governments.
Corporate residence

Legal entities are deemed to be resident in Uruguay when they are incorporated according to the local legislation.

Permanent establishment (PE)

The concept of PE in the Uruguayan tax legislation follows, in general terms, the definition provided in the OECD Model Tax Convention, although it has some special clauses that may be found in the United Nations (UN) Model Tax Convention. From a Uruguayan law perspective, the term PE means a fixed place of business through which the business of an enterprise is wholly or partly carried on in Uruguay. The term PE especially includes: (i) places of management; (ii) branches; (iii) offices; (iv) factories; (v) workshops; (vi) mines; oil or gas wells; quarries or any other place of extraction of natural resources; (vii) buildings, constructions, installation projects, or the management activities associated to them, when they last more than three months; and (viii) services rendered (in particular consultancy) by a non-resident through employees or hired personnel in Uruguay during a period or periods exceeding six months on an annual basis. Please note that item (viii) constitutes an exception to the OECD model and is based on the provisions of the UN model.

Other taxes

Value-added tax (VAT)

Uruguayan VAT is levied at a general rate of 22% on the provision of services and on the circulation of goods within the limits of the Uruguayan territory. The import of goods and value-added in regard to the construction of immovable assets are also within the scope of this tax.

The following items are either subject to a reduced 10% VAT rate or exempt from VAT entirely.

Items subject to the 10% VAT rate:

- Food and medicines.
- Hotel services.
- Health services.
- The first sale of immovable assets.

Items exempt from VAT:

- Milk.
- Books.
- Magazines.
- Agricultural machinery.
- Certain bank services.
- Accessories.

Exports are VAT zero rated. VAT on purchases of the exporters can be recovered in the form of credit certificates that can be (i) used to pay other taxes, (ii) used to pay social security contributions, or (iii) endorsed to suppliers who can pay their own national taxes or their own social security contributions.
This tax requires monthly payments and may require monthly or annual tax returns, depending on the qualification of the taxpayer.

**Customs duties**

- Consular duty: 2%.
- Customs computer services duty: a scale flat duty, with a limit of 50 United States dollars (USD).
- Customs extraordinary duty: a scale flat duty, with a limit of USD 600.
- Global customs duty (TGA): depends on the origin of goods. If they come from Mercosur, the TGA is generally zero (some goods still apply the payment of the TGA). If not, it varies depending on the type of product, with a maximum rate of 20%, with exceptional levels that range from 23% to 55% (corresponding mainly to certain types of shoes, sugar, automotives, and peaches). For goods classified as capital goods or information and telecommunication goods, there is a special regime.

All imports and exports duties are applied on the ‘customs value’ (in general, in imports it is considered as cost, insurance, and freight [CIF] and in exports as freight on board [FOB]).

On imports, VAT is also applicable according to the following detail:

- Goods subject to the general VAT rate (22%):
  - ‘Import VAT’ at the rate of 22%.
  - ‘Advanced payment import VAT’ at a rate of 10%.
- Goods subject to the reduced VAT rate (10%):
  - ‘Import VAT’ at the rate of 10%.
  - ‘Advanced payment import VAT’ at a rate of 3%.

The tax base of VAT on imports is the customs value plus the customs duties.

Additionally, some goods are also subject to an ‘advanced payment import on account of CIT’ at a rate of 10%, which can be deducted from the amount of CIT for the fiscal year.

**Export duties**

Exports are not subject to any taxes, and there are almost no prohibitions regarding the type of goods to be exported. On the contrary, several instruments are offered to promote exports, such as the reimbursement of taxes. For VAT on exports, please see VAT above.

For the reimbursement of indirect taxes, the exporter may recover internal taxes that are added to the cost of the products exported. The amount to be reimbursed is a percentage of the FOB value set by the Executive Power for each product.

Additionally, temporary admission consists of the import of raw materials, pieces, motors, package material, and other industrial input without import duties or taxes. To be subject to this customs duties exemption, the company has to export the finished goods within 18 months from the introduction of the exempt goods or materials. The subsequent local sale of such finished goods is not entitled to this benefit.

**Excise tax (IMESI)**

In general, excise tax applies on the first transaction effected in the domestic market by manufacturers or importers of goods. Exports are not taxable.
Uruguay

Excise tax rates vary for each item, and they are generally fixed by the government within maximum parameters established by law.

Goods subject to the highest rates are alcoholic beverages (from 20.20% to 80%, depending on the alcohol degree), tobacco (from 28% to 70%), lubricants (from 5% to 35%) gasoline, fuel, and other petroleum products (from 5% to 133%).

This tax requires monthly payments and/or tax returns.

**Net wealth tax (NWT)**

All types of legal entities and business enterprise owners are subject to an annual NWT at a rate of 1.5% on the value of net assets. This tax also follows the source principle, whereby only assets located or economically used in Uruguay are taxable. Taxpayers may reduce their capital tax liability in determining the NWT basis, up to their total amount of CIT for the fiscal year. In practice, taxpayers deduct 1%, which was established prior to the tax reform law.

The deduction of liabilities from the amount of taxable assets to determine the NWT basis is limited to: (i) the average of debts with financial institutions, (ii) debts with suppliers of goods and services, (iii) taxes not yet due, (iv) debts with governments, international credit offices of which Uruguay is a member and with foreign state financial institutions that lend funds for long-term productive projects, and (v) debts documented in debentures and obligations, if their emission is done in a public offering and such papers are quoted in a stock exchange.

**Property taxes**

Regarding taxes of relevance for those doing business in Uruguay, please see Net Wealth Tax above. There are additional property taxes of less significance, levied by Municipal authorities (e.g. Contribución Inmobiliaria) and by National authorities (e.g. Impuesto de Primaria).  

**Tax on real estate transfer (ITP)**

A tax on real estate transfer applies to the transfer of immovable assets. Transfer is defined in an ample sense, as a sale, a cession of the right to use, a transfer of inheritance rights, etc.

Both parties to the transfer contract are subject to this tax at a rate of 2% on the property's tax value (according to a National Register, a value generally lower than market value). When the property is transferred without payment, the beneficiary pays tax at a rate of 4% on the property tax valuation, except in instances where the property is transferred to direct heirs or legatees, who pay this tax at a rate of 3%.

**Stamp taxes**

Stamp taxes are not applicable in Uruguay.

**Tax of control of corporations (ICOSA)**

Upon the set up of a corporation, a tax is payable at a 1.5% rate on a notional basis amount, which is determined annually by the authorities. For fiscal year 2013, the estimated amount of this tax (lump sum) is approximately USD 1,157.

This tax is also due annually at the end of each fiscal year, at a rate of 0.75% on said notional amount, and can be deducted from the NWT. For fiscal year 2013, the estimated amount of this tax (lump sum) is approximately USD 579.
**Social Security Contributions (SSC)**

The Uruguayan Social Security regime states that hiring personnel under a dependency relationship implicates the obligation (both for employer and employee) of making contributions over the compensations that constitute the taxable basis.

Taxable basis consists of all earning that in a regular and permanent basis, in cash or kind, susceptible to pecuniary appreciation, is perceived by the dependant personnel, in concept of remuneration and product of its personal activity in the frame of the working relationship. As a general rule, any compensation originated in activities carried out in Uruguay are subject to SSC.

The SSC rates are applicable on gross remunerations, according to the following percentages:

<table>
<thead>
<tr>
<th>Concept</th>
<th>Employer contributions (%)</th>
<th>Employee contributions (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Retirement contributions *</td>
<td>7.5</td>
<td>15</td>
</tr>
<tr>
<td>Health insurance</td>
<td>5</td>
<td>3/4.5/6/6.5/8 **</td>
</tr>
<tr>
<td>Labor restructuring fund</td>
<td>0.125</td>
<td>0.125</td>
</tr>
<tr>
<td><strong>Total SSC</strong></td>
<td><strong>12.625</strong></td>
<td><strong>18.125 to 23.125</strong></td>
</tr>
</tbody>
</table>

* Both employer and employee retirement contributions rates are applicable, up to the monthly amount of 94,854 Uruguayan pesos (UYU) (approximately USD 4,890); the exceeding amount will be exempt.

** May vary depending on whether the employee is married and whether they have children.

**Branch income**

CIT is imposed at a rate of 25% on net income derived from business activities carried out in Uruguay. A 7% WHT is imposed on profits remitted or credited to a home office. Profits paid or credited to a non-resident home office will not be subject to WHT when they are paid out of non-taxable income for CIT purposes.

Furthermore, those profits and/or losses derived from financial operations between the branch and its home office will be disregarded for Uruguayan tax purposes (i.e. not taxed in case of income or not deductible in case of costs and/or expenses).

**Income determination**

**Inventory valuation**

Replacement cost is permitted for tax purposes, as well as the first in first out (FIFO), last in first out (LIFO), or average cost methods, irrespective of the inventory valuation method used for accounting purposes.

**Capital gains**

Capital gains are treated as ordinary income for CIT purposes.

As a general rule, capital gains are calculated as the selling price minus the fiscal cost (usually acquisition cost updated by certain inflationary indexes) of goods being sold. In certain cases, not all the fiscal cost may be deductible, depending on the application or not of the compulsory proportional deduction mentioned previously in the Taxes on corporate income section.
Furthermore, for certain capital gains, there are special ways of determining the taxable income (e.g. based on notional income).

**Dividend income**
Dividends received from local subsidiaries are exempt. Dividends received from foreign subsidiaries are out of the scope of this tax since they are considered foreign-sourced, thus non-taxable, income.

**Interest income**
Uruguayan-sourced interest income, derived by companies resident in the country, is subject to CIT under the general regime (i.e. taxed at 25%).

**Foreign income**
Uruguayan legal entities (CIT payers) and non-residents operating through a PE in Uruguay are only subject to tax on income from Uruguayan sources under the territorial system of taxation. Hence, foreign-source income is not subject to tax.

However, there is an exception to this principle, as follows. When a CIT payer obtains income as a consequence of rendering technical services outside the limits of Uruguayan territory to another CIT payer and such technical services are used by the recipient to obtain its income subject to CIT, the income obtained by the company rendering the services will be subject to CIT, even when foreign sourced. Technical services are those rendered in the fields of management, technical administration, or advice of any kind.

Income derived from activities performed, assets located, or rights utilised outside Uruguay, regardless of the nationality, domicile, or residence of the parties participating in the transactions and the place where the transaction agreements are subscribed, is not subject to CIT.

**Income adjustment for inflation**
An income adjustment for inflation has been in force since 1 January 1981 and is calculated by multiplying the variation in the wholesalers' price index for the financial year by the difference between:

1. total assets at the beginning of the year (excluding fixed assets) and
2. total liabilities at the beginning of the year.

If (1) is higher than (2), then an inflation loss adjustment is deducted from gross income. However, if (2) is higher than (1), then an inflation gain adjustment is added.

---

**Deductions**
As a general rule, duly documented expenses that are necessary to obtain and preserve gross taxable income are tax deductible. On the contrary, those expenses associated with deriving or preserving income not subject to CIT are not deductible from the taxable basis. Furthermore, for CIT purposes, all costs and expenses will be subject to the compulsory proportional deduction mentioned in the Taxes on corporate income section (with some exceptions).

**Depreciation and depletion**
Straight-line depreciation over useful life is mandatory. Specific rates exist for the following cases: (i) 2% per year for urban buildings, (ii) 3% per year for rural buildings,
and (iii) no less than 10% per year for new vehicles. Other rates are accepted if economically justified. No conformity between book and tax depreciation is required.

Percentages for depletion computed on the cost of natural resource properties are allowed in accordance with generally accepted criteria.

Depreciation and depletion percentages are computed on the historical cost of fixed assets revaluated at year-end, based on the variation of the wholesalers’ price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

**Goodwill**
When transferring a business or a business unit, the difference between selling price and fiscal costs of the assets being transferred constitutes ‘goodwill’. This goodwill constitutes an asset for the buyer and must not be depreciated, neither for CIT nor NWT purposes.

**Start-up expenses**
Start-up expenses should be depreciated within a period of three to five years. The taxpayer may elect the number of years to depreciate those expenses within those period limits.

**Interests expenses**
Interests expenses, as well as other costs and expenses, are subject to the compulsory proportional deduction mentioned in the Taxes on corporate income section.

When companies derive both income subject to CIT and either income exempt or not included in CIT (e.g. from a foreign source), interest expenses associated to the former (i.e. deductible interest) will be determined by applying a proportion based on assets.

**Bad debt**
As a general rule, only those debts that are at least 18 months old will be deductible as ‘bad debts’. However, national rules allow deductions under some other special situations.

**Charitable contributions**
Deductibility of charitable contributions will depend on the organisations receiving them.

Furthermore, there is a special regime to certain charitable contributions under which the contributor may deduct 25% of the contribution and the other 75% will be recovered through credit certificates that may be used to pay taxes (with certain limitations).

**Fines and penalties**
Fines and penalties generated from unduly paid taxes are not deductible for CIT purposes.

**Taxes**
CIT and NWT are not deductible.

**Net operating losses**
Losses may be carried forward and deducted from the net taxable income of the following five years, once adjusted for inflation. There are no loss carrybacks.
Payments to foreign affiliates
All accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer may deduct expenses from its gross income if such expenses are subject to taxation (either via foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated if the tax is at a rate that is lower than the CIT rate of 25%.

Group taxation
Group taxation is not permitted in Uruguay.

Transfer pricing
As a general principle, transfer pricing rules are applicable to international transactions between related parties. However, Uruguayan legislation has extended the scope of these regulations to transactions carried out with low-tax or no-tax jurisdictions or regimes (either international or domestic) and to certain operations through third intermediaries. Domestic transactions with Uruguayan Free Zone users fall under this category.

The definition adopted by the law for related parties is quite broad. Such a relationship is configured when both parties are subject (directly or indirectly) to the management or control of the same individuals or legal entities, or when they have power of decision to direct or define the taxpayer’s activities due either to their participation in capital interest, the level of their credit rights, or their functional or any other type of influence (whether contractual or not).

Regarding transfer pricing administration rules, the Executive Power can enter into APAs with taxpayers, which cannot cover more than three fiscal years. Furthermore, strong penalties are provided for failure of compliance with transfer pricing formal duties and with other formal documentation requirements.

Thin capitalisation
Thin capitalisation rules do not apply in Uruguay.

Tax credits and incentives

Foreign tax credit
There is no foreign tax credit regime in Uruguay for CIT purposes, except for that provided in the DTTs currently in force.

CIT reduction for income reinvested in fixed assets
40% of income reinvested in the purchase of (i) industrial and agricultural machinery, (ii) vehicles and installations, (iii) computers, (iv) telecommunications equipment, and (v) some assets for the tourism industry is exempt from CIT.

20% of income reinvested in the construction and expansion of industrial, agricultural, and tourism buildings is exempt from CIT (limited to 40% of net taxable income in the year of expenditure).

The joint amount of said investments can be deducted from the taxable basis, with a limit of 40% of the annual net profit, once the amount of other exemptions has been
deducted. The excess can be deducted (with the same limitations) in the following two
tax periods. It is important to mention that income exempt by these provisions cannot
be distributed and must be retained as a reserve account, which ultimately can only
be capitalised.

**NWT exemption**
Movable fixed assets directly connected to the industrial cycle and equipment for data
processing are exempt from NWT.

All assets directly associated to the development of agricultural and/or farming
activities will be exempt from NWT as long as the owners are individuals or companies
with nominatives shares also owned by individuals. As a consequence of the elimination
of the Rural Real Estate Concentration Tax (ICIR), this NWT exemption on rural assets
is expected to be abolished for certain taxpayers and under certain conditions.

**Investments law (IL)**
Uruguay has modified the IL, achieving a better framework for local and foreign
investments carried out in the country. To obtain tax benefits, the IL requires that
talent enterprises obtain a government statement in this regard. The Bureau of Investor
Assistance is in charge of monitoring the correct compliance of these projects.

The IL grants two types of benefits:

**Automatic benefits**
This kind of benefit is only for manufacturing, extractive, or farming/ranching
activities, and includes:

- Exemption from NWT for chattel property directly engaged in the production cycle
  and data-processing equipment.
- Exemption from VAT and CIT paid on the importation of such goods, and
  reimbursement of VAT in the case of locally purchased items.

**Discretionary benefits**
Benefits that may be obtained at the discretion of the Executive Power for any type of
business activity (not cumulative with automatic benefits) include:

- VAT and CIT exemptions (among other taxes) on importation of fixed assets items.
- NWT exemptions: permanent for chattel property items, for a period of eight years
  for construction work in Montevideo (capital city), and for a period of ten years in
  the rest of the country.
- VAT reimbursement on local purchase of goods and services for civil
  construction work.
- Increased deductions for CIT in respect of fees and remunerations related to
  technological developments.
- Exemption from CIT, depending on the nature and size of the project to be carried
  out. The Executive Power takes into account the following criteria to grant
  this benefit:
  - Addition of technology to improve competitiveness.
  - Contribution to export growth and diversification.
  - Contribution to geographic decentralisation.
  - Improvement of technological investigation, innovation, and development.
  - Generation of employment.
Uruguay

**Auto-saving ‘direction’ benefit**

The auto-saving ‘direction’ benefit allows a company to deduct from the CIT basis the amount of the capital increase that occurred as a consequence of the reserves capitalisation or of the in-kind distribution of shares, for an amount equivalent to the investment carried out with the investor’s own funds. The amount of the CIT deduction and the period/s to which said exemption will apply is granted by the government through a statement issued by the Executive Power.

**Free zones (FZs)**

Following the approval of the FZ law in 1987, this system has become an important tool for attracting investments to Uruguay.

It has been utilised for carrying out traditional activities in the FZs (warehousing, logistics, and distribution), for the provision of services (software, finance, call centres, etc.), and for manufacturing activities such as cellulose pulp and leather production. In a clear sign of stability, none of the administrations in office over the last three decades has modified the basics of the FZ system.

The law defines FZs as privately or publicly owned isolated and fenced off areas of Uruguayan territory determined by the Executive Branch with the purpose of carrying out all types of manufacturing, commercial, and service activities within the zone, while enjoying tax exemptions and other benefits envisaged in the law.

Companies in these areas cannot carry out industrial, trading, or service activities in the non-FZ Uruguayan territory, except for services expressly authorised by the government (listed below) but are allowed to render all types of services within the FZs or to third countries.

FZ users are allowed to render the following services to the non-FZ Uruguayan territory (the provision of these services is subject to the general tax system, not to the tax holidays):

- International call centres, except for those whose main destination is the non-FZ Uruguayan territory.
- E-mail, distance learning, electronic signature certificate issuance.
- Software production, technology consulting, and related training services.
- Accounting, administration, and management services rendered to related companies who carry out port and shipping logistics activities, if said services are lower than 20% of the total income obtained during the fiscal year.
- Processing of film material and data.

In order to operate in/from the FZ, certain requirements must be fulfilled from an ‘economic substance’ perspective (i.e. there must be an actual economic activity developed in the FZ). In this sense, during 2012, some modifications were introduced to the FZ Law to determine which substantial activities can be developed outside the FZ.

FZ users are exempt from all current and future national taxes, including those taxes for which a specific legal exemption is required, in connection with the activities performed within the FZs. The Uruguayan government guarantees all the exemptions and benefits granted by the law for the term of their contracts. FZs can be located outside or inside the cities; it depends on the kind of FZ.
Social security taxes, as well as certain WHTs, are excluded from the exemption. WHT on payments of dividends made by these companies to their non-resident shareholders are exempt.

**Industrial park incentives**
Individuals or legal entities that establish industrial parks within Uruguayan territory, as well as companies located within such industrial parks, are entitled to CIT exemption for their industrial equipment, excise tax and VAT exemption on the acquisitions of such goods, and other benefits.

**Holding companies**
Uruguayan legal entities holding shares in non-resident entities or investing in assets not located in Uruguay are not subject to tax (due to the application of the source principle).

**Industry-specific incentives**

**Printing industry incentives**
Companies that print books and educational material are exempt from the NWT and VAT.

**Long distance services and call centres**
Companies developing long distance services and call centre activities have special benefits regarding CIT (from 70% to 100% exemption).

**Condo Hotels**
Companies running a Condo Hotel have special benefits regarding CIT (from 70% to 100% exemption), among other taxes. There are also exemptions and other tax benefits granted on behalf of the promoting company.

**Electric power industry incentives**
Companies that generate electric power from non-traditional energy sources have special benefits regarding CIT (from 40% to 90% exemption).

**Machinery industry incentives**
Companies that build and/or assemble (under certain conditions) machinery with agricultural purposes have special benefits regarding CIT (from 50% to 90% exemption).

**Shipping industry incentives**
Imports of material, supplies, and equipment required for the construction, maintenance, and repair of shipyards or vessels are exempt from VAT. The shipbuilding industry has special benefits regarding CIT (from 50% to 100% exemption).

**Water and air transportation incentives**
The income of water and air transportation companies is tax exempt. In the case of foreign companies, the exemption is subject to reciprocal treatment. The government may exempt from CIT companies engaged in transportation by land, subject also to the conditions of reciprocal treatment.

**Forestry plantation incentives**
Income derived from forestry plantations up to July 2007 is tax exempt. Income derived from new forestry plantations is also tax exempt, but under strict conditions, such as wood quality.
Uruguay

Software industry incentives
Software production and related services are exempt from CIT as long as either the final product or the related services are entirely used in a foreign country.

Electronic industry incentives
The production of electronic devices has special benefits regarding CIT (from 50% to 100% exemption).

Tourism industry incentives
Investments in the tourism industry have tax benefits related to CIT, VAT, and NWT, as follows:

• Deduction of up to 40% of CIT in investments made in the fiscal year in hotel equipment and equipment for improving entertainment and information services to tourists and deduction of up to 20% of CIT in investments made in construction and expansion of hotel buildings, with the limits mentioned in previous sections (40% of the annual net profit, once the amount of other exemptions has been deducted).
• VAT refund included in local acquisitions of goods and services for construction, improvement, or expansion of tourist complexes.
• VAT exemption on import of goods for construction, improvement, or expansion of tourist complexes.
• The list of operations included in the concept of exports of services for VAT purposes (thus zero-rated) was broadened to include, among others, services related to accommodation that hotels, apartments, and rural tourism establishments provide to tourists.
• NWT exemption for ten years on investments in infrastructure and civil work for construction, improvement, or expansion of tourist complexes.
• NWT exemption for four years on fixed assets investment for tourist complexes.
• 50% exemption of import duties on materials and goods for construction, improvement, or expansion as well as fixed assets of tourist complexes.

Withholding taxes
All Uruguayan-sourced income obtained by non-residents (other than those obtained through a PE in Uruguay) is taxed at flat rates of up to 12% on gross income, with some exceptions. This tax is basically collected by way of WHT.

The exceptions are as follows:

• Interest on deposits in local currency for terms exceeding one year is taxed at 3%.
• Interest on public bonds is not taxed.
• Dividends paid or credited by CIT payers are taxed at 7%, provided they are derived from taxable income.

Profits originated in the alienation of stock of CIT payer companies obtained by non-residents are exempt only if the capital of the local company is expressed in bearer shares. The alienation of registered stock is taxed at a rate of 12%.

Although the Uruguayan tax law follows the source principle, technical services (defined as services rendered in the fields of management, technical administration, or advice of any kind) rendered in another country by non-residents but associated with taxable income obtained by the local user in Uruguay are considered to be Uruguayan sourced for tax purposes and subject to WHT. However, when the taxable income
obtained by the local user of the service does not exceed 10% of its total income, then only 5% of the service fee paid or credited abroad will be subject to non-resident WHT. Therefore, in these cases, the effective WHT rate is only 0.6% (5% x 12%).

This WHT should be declared and paid to the Tax Office on the month following the one in which the tax is withheld.

For those countries with which Uruguay has entered DTTs, the maximum WHT rates are the following (in those cases where the maximum WHT provided by the DTT is higher than the internal law WHT, the latter will be applicable):

<table>

Notes

1. Source country may tax at a rate not higher than 5%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 75% of the capital of the company distributing dividends, then the WHT will be 0%.
2. Will depend on the kind of royalty paid.
3. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.
4. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 10% of the capital of the company distributing dividends, then the WHT will be 5%.
5. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is an entity, other than an individual, resident in the other contracting state and holds at least 10% of the capital of the company distributing dividends, then the WHT will be 5%.
6. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.
7. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and directly holds at least 25% of the capital of the company distributing dividends, then the WHT will be 10%.

**Tax administration**

**Taxable period**
The taxable period may be chosen by the company. However, certain sectors or industries have mandatory fiscal year closing dates.

**Tax returns**
CIT and NWT are self assessed and their tax returns are filed by the end of the fourth month following the date of the year-end.
Uruguay

**Payment of tax**
Income and capital taxes are paid monthly by way of advanced payments, which are calculated on the basis of the previous year’s tax. The difference between the advanced tax payments and the total annual tax calculated at fiscal year-end is paid four months after the fiscal year-end.

**Tax audit process**
The taxpayer has the right to appeal an Administrative Act to the Tax Bureau and, simultaneously, to the Executive Branch in an administrative process. Both appeals must be filed jointly within ten days from the notification of the administrative act. If both appeals are tacitly (not expressly resolved within a period of 150 days) or expressly rejected, the taxpayer has the right to appeal to a special court through a judicial proceeding.

**Statute of limitations**
The statute of limitations in Uruguay is five years, which can be extended to ten years in the case of: (i) tax fraud, (ii) not complying with Tax Office registration, (iii) lack of communication of a taxable event, or (iv) not submitting a tax return (among other cases).

**Topics of focus for tax authorities**
There are several topics the tax authorities are currently focusing on.

One of the newest topics of interest for the tax authorities concerns ‘transfer pricing’ rules and their impact on multinational companies operating in Uruguay.

During the last few years, important investments have been made by the government to automate processes and improve assistance to taxpayers.

**Significant developments**

Tax reporting periods, and thus frequency of tax reports submission, for value-added tax (VAT), excise tax, unified social payment (USP), turnover taxes, and subsurface use tax returns, and reports on individual pension fund contributions, have been reduced from monthly to quarterly. The frequency of the water use tax report changed from monthly to annually, and the frequency of the property tax return changed from quarterly to annually.

For the purposes of property tax, intangible assets are now excluded from the list of taxable property.

Microfirms and small enterprises paying taxes under the standard tax regime (except enterprises producing excisable goods and extracting mineral products subject to subsurface use tax) are no longer subject to obligatory contributions to pension fund and road fund.

A new Special Industrial Zone (Djizzak) is to be created in Djizzak region for a preliminary term of 30 years with potential prolongation. During that period, special customs and tax regimes and benefits will be in force within its territory.

The protocol to the double tax treaty (DTT) with India was enforced. The protocol decreases maximum rates applicable for interest, dividend, royalty, and technical payments from 15% to 10% and introduces articles on mutual assistance in collection of taxes and on limitation of benefits.

**Taxes on corporate income**

Resident corporations pay corporate income tax (CIT) on their worldwide income, whereas non-residents (i.e. foreign legal entities that have a permanent establishment [PE] in Uzbekistan or have income from sources in Uzbekistan not associated with a PE) pay CIT on income resulting from activities/sources in Uzbekistan.

Non-resident corporations are taxed directly at the level of their Uzbek PE, if there is one, or via withholding tax (WHT) at the source of payment of the Uzbek-source income.

CIT is charged on taxable profit calculated as a difference between gross income and deductible expenses reduced by applicable incentives granted by the Tax Code, other laws, or presidential decrees.
The CIT rate is set annually by presidential decree. In 2013, enterprises (i.e. legal entities) are generally subject to CIT at the rate of 9%. Commercial banks are subject to CIT at the rate of 15%.

**Local income taxes**
There is a local tax on accounting profit (less CIT), an infrastructure development tax, which is charged at a maximum rate of 8%.

**Corporate residence**
For Uzbek tax purposes, corporations are classified as resident or non-resident. A resident corporation is a legal entity that passed state registration in Uzbekistan (i.e. Uzbek legal entity). Other legal entities are regarded as non-resident corporations for tax purposes.

**Permanent establishment (PE)**
PE is defined by the Tax Code as “any place through which non-resident carries out entrepreneurial activity in the Republic of Uzbekistan, including activity carried out through an authorised person. PE is also existent where a non-resident carries on entrepreneurial activity for 183 days (or more) in any consequent 12-month period ending in the current tax period”.

**Other taxes**

**Value-added tax (VAT)**
Legal entities are subject to VAT, which is applied to taxable turnover and taxable imports. The rate for taxable turnover is 20%. This rate also applies to taxable imports, for which the tax base is determined as the customs value plus import duties and excise tax (on excise-liable goods). Export of goods for hard currency is generally zero-rated. Insurance and most types of financial services are exempt. As of January 2013, VAT is reported quarterly.

**Customs duties**
Import of certain goods to Uzbekistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Rates of customs duties vary from 5% to 40%, depending on the type of imported goods. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

**Excise taxes**
Legal entities producing or importing excise-able goods (e.g. cigarettes, jewellery, petrol, alcohol drinks) are subject to excise tax. Rates vary from 5% to 200%, depending on the type of goods produced/imported. The taxable base is determined as the value of produced/imported goods excluding VAT. As of January 2013, excise tax is reported quarterly.

**Property taxes**
The property tax rate in 2013 is 3.5% for legal entities. As of January 2013, the tax is computed annually (previously quarterly), based on the net book value of the fixed assets, adjusted for the effect of revaluation, which should be performed annually on 1 January, and the value of overdue construction-in-progress. The rate is doubled for equipment not installed in due time. Prior to January 2013, the residual value of intangibles was also included in the basis.
A charge of 0.25% of the historic value of outdated equipment is collected from legal entities (except for micro-firms and small enterprises) for exploitation of fully depreciated equipment.

Newly opened enterprises are exempt from property tax for a period of two years from their date of registration, unless such enterprises have been created on the basis of production facilities or assets of existing enterprises. There is also a rate reduction benefit available to companies engaged in production and export of goods (work, services). Property tax exemption is also available in respect to leased property, for a period of the lease, and new technological equipment, for a period of up to five years.

**Land tax**

Enterprises, including foreign legal entities operating in Uzbekistan via a PE, owning land plots or rights of their use are subject to land tax or land lease payment annually. Land tax is charged at fixed fees that vary depending on the quality, location, and level of water supply of each land plot. Land lease payment is charged at negotiable rates; however, the minimum amount cannot be less than the land tax rate for the respective land plot. Land tax and land lease payment are computed based on the area of the land in use.

**Transfer taxes**

There are no transfer taxes in Uzbekistan.

**Stamp duties**

According to Uzbek legislation, stamp duty is an obligatory payment charged for performance of legal actions and/or issuance of legal documents. The following actions, among others, are subject to stamp duties: filing claims, performing notary actions, civil registration, state registration of a legal entity, obtaining licences/permits to carry out certain activities, etc.

The rates of stamp duties generally vary from 0.5 to 20 times minimum monthly wage (MMW, approximately 35 United States dollars [USD]), depending on the type of action executed. For instance, duty for filing a claim depends on the amount of claim. If the amount is less than 20 MMW, the duty comprises 5% of this amount; if the amount exceeds 80 MMW, the duty is 20% of this amount. Duty for notarisation of copies of documents for legal entities is 2% of the MMW per each page of the document. Duty for registration of legal entities with foreign investment comprises five times the MMW plus USD 500.

**Turnover taxes**

There are three mandatory contributions that are charged on the enterprise’s gross annual turnover (less VAT and excise tax):

- Road fund to be imposed at a rate of 1.4%.
- Pension fund at a rate of 1.6%.
- Educational and medical institutions fund (for reconstruction, capital repair, and equipment) at a rate of 0.5%.

The taxable base (and tax rate in exceptional cases) for these mandatory contributions may differ depending on the type of activity of a company. As of January 2013, turnover taxes are reported quarterly.

Also as of January 2013, microfirms and small enterprises paying taxes under the standard tax regime (except enterprises producing excisable goods and extracting
mineral products subject to subsurface use tax) are no longer subject to obligatory contributions to pension fund and road fund.

**Water-use tax**
Enterprises (including PEs) using water in their production are subject to water-use tax. The tax rate is set by the Cabinet of Ministers and depends on the source of water consumption (i.e. surface or underground). Water-use tax is calculated based on the volume of the water consumed. As of January 2013, water-use tax is reported annually.

**Unified social payment (USP)**
Employers are subject to USP assessed on total payroll cost related to local and expatriate staff. This payment is collected by the tax authorities. The rate of USP is 25%.

Income of foreign personnel paid to non-resident legal entities as part of secondment fees under personnel provision agreements is subject to USP. The taxable base for calculation of USP on such income shall be the income of foreign personnel provided, but not less than 90% of the secondment fee payable under the personnel provision agreement. As of January 2013, USP is reported quarterly.

**Taxes of subsurface users**
In addition to standard taxes, subsurface users (i.e. legal entities and individuals exploring and extracting natural resource) are subject to subsurface users’ specific taxes, as listed below:

**Subsurface use tax (royalty)**
Subsurface use tax is charged on volume of produced (extracted) natural resources that are ready for sale or transfer (including free of charge) and consumption for internal purposes. Taxable base is determined as average weighted sales price.

<table>
<thead>
<tr>
<th>Business activity</th>
<th>Tax rate examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extraction of natural resources</td>
<td>natural gas 30%, precious stones 24%, oil 20%, gold 5%, silver 8%</td>
</tr>
<tr>
<td>Utilisation of by-products received during the extraction of natural resources</td>
<td>30% of tax rate applicable to main natural resources extracted</td>
</tr>
</tbody>
</table>

As of January 2013, subsurface use tax is reported quarterly.

**Excess profits tax**
Excess profits tax is assessed on the difference between the selling price of the extracted natural resources (as per the list) and the statutory price set by the legislation. Excess profits tax is not payable by entities operating under production sharing agreements.

The list of natural resources and goods subject to excess profits tax includes copper, cement, natural gas, polyethylene granules, and clinker. Excess profits tax is paid at 50% of the taxable base.

**Signing and commercial discovery bonuses**
Signing and commercial discovery bonuses are one-off payments to the state budget. The signing bonus is payable for the right to engage in exploration and extraction of natural resources and range from 100 to 10,000 times the MMW, depending on the type of minerals. The commercial discovery bonus is paid for each field where a subsurface user discovers the natural resources and comprises 0.1% from the cost of the proved reserve volume.
Branch income

There is no concept of a ‘branch’ of a foreign legal entity in the Uzbek legislation. Instead, such entities use a PE registration to perform business activities without establishing an Uzbek company.

In addition to CIT, non-residents operating in Uzbekistan via PE pay net profit tax assessed at 10% on accounting profit less CIT.

Income determination

Inventory valuation
Uzbek legislation permits the application of the weighted average cost method (AVECO) and the first in first out (FIFO) method for the valuation of inventory for tax purposes.

Capital gains
Capital gains arising from the disposal of tangible and intangible assets are calculated as the difference between the selling price and the net book value of an asset. The capital gain is included in taxable profits (unless specifically exempt), and the capital losses are deductible (only if the disposed asset had been used for business purposes for three or more years). This is applicable to Uzbek legal entities and PEs of foreign legal entities. Capital gains on non-resident companies may be subject to WHT at 20% as ‘other’ income.

Dividend income
Dividends paid by a domestic subsidiary are subject to 10% WHT at the source. The net dividends received by its domestic parent company are then excluded from its CIT base. Such net dividends received by a foreign parent company are taxed in accordance with the respective country’s internal legislation or DTT provisions (if Uzbekistan has a DTT with this country). See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.

Interest income
Interest income is subject to 10% WHT at the source. The net interest income received by companies is then excluded from its CIT base. Such net interest income received by foreign companies is taxed in accordance with the respective country’s internal legislation or DTT provisions (if Uzbekistan has a DTT with this country). See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.

Foreign income
Gross foreign income of a resident corporation (e.g. income from its foreign branch) should be included in its aggregate income on an accrual basis, regardless of remittance date. Expenses incurred abroad in relation to such foreign income can be deducted, subject to provisions of the Uzbek Tax Code. Foreign income tax paid on such income should be credited against the Uzbek CIT only if this branch is registered in a country with which Uzbekistan has a DTT. There are no deferrals for foreign income to be recognised for Uzbek tax purposes.
Deductions

The tax base for CIT purposes varies significantly from the computation of taxable profits in most Western jurisdictions. Expenditures such as entertaining, benefits in-kind, and business trip allowances exceeding the statutory norms (that are generally low) are non-deductible.

There are additional costs that cannot be deducted by PEs of foreign legal entities, such as interest on head office loans; commission fees charged by the head office; and royalty, administrative, and management expenses of the head office incurred outside Uzbekistan. However, PEs are eligible to deduct expenses incurred outside of Uzbekistan if they directly relate to their business in Uzbekistan.

Depreciation and amortisation

For tax purposes, depreciation/amortisation is calculated with application of rates defined by the Tax Code. If depreciation for accounting purposes is charged at higher rates (compared with the Tax Code rates), the difference is treated as a temporary difference for CIT purposes (i.e. deducted in future periods).

Depreciation is calculated from a month following the month when the asset was put into use until it is fully depreciated, disposed, or written off. The maximum annual depreciation rates applicable to different types of fixed assets are outlined in the table below.

<table>
<thead>
<tr>
<th>Depreciable item</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and other structures</td>
<td>5</td>
</tr>
<tr>
<td>Cars, tractors, special equipment, computers and related hardware</td>
<td>20</td>
</tr>
<tr>
<td>Lorries, buses, special cars and trucks, industrial machinery and equipment,</td>
<td>15</td>
</tr>
<tr>
<td>agricultural machinery and equipment, oil extraction and mining equipment, office</td>
<td></td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td>Railway, river and air transport vehicles, thermo-technical equipment, turbines,</td>
<td>8</td>
</tr>
<tr>
<td>electric and diesel drives, power supply and communication lines, pipelines</td>
<td></td>
</tr>
<tr>
<td>Depreciable assets not mentioned above</td>
<td>10</td>
</tr>
</tbody>
</table>

For statutory accounting purposes, fixed assets can be depreciated using one of the following methods:

- Straight-line method.
- Production method.
- Double-declining-balance method.
- Sum-of-the-years’ (cumulative) method.

Intangible assets, including leases and other property rights, are amortised over the shorter of an asset’s useful life or the period of activity of the enterprise. Where an asset’s useful life cannot be determined, the asset can be amortised over five years.

Expenses related to geological exploration and developmental works necessary for the extraction of natural resources are deductible for CIT purposes through depreciation at the rate of 15% per annum.
**Goodwill**
For tax purposes, expenses incurred for acquisition of goodwill should be deductible through monthly amortisation charges at norms calculated by the taxpayers based on historical cost of goodwill and its useful life.

**Start-up expenses**
Current legislation does not provide specific guidance on tax treatment of start-up expenses. However, as per Uzbek accounting legislation, certain types of start-up expenses (e.g. expenses for acquisition of right for production, right for rendering services and carrying out works, right to use economic or other privileges) can be considered as expenses for procurement of intangible assets and, respectively, can be deducted through monthly depreciation charges.

**Interest on short-term loans**
Interest is deductible, except for interest on overdue/delayed loans (i.e. ‘penalty interest’) and interest capitalised in the value of fixed assets (i.e. in cases where a loan was obtained to purchase fixed assets).

**Bad debt**
Bad debts are deductible for tax purposes in cases where they are recognised in accordance with Uzbek accounting legislation. Otherwise, such expenses should be considered as non-deductible. According to the current Uzbek legislation, arrears are recognised as bad debts upon expiration of three-years from their due date.

**Charitable contributions**
Charitable contributions are generally treated as non-deductible expenses and added-back to the taxable base.

However, taxable income can be reduced for the amount of charitable contributions to ecological and charitable foundations and cultural, medical, educational, and municipal institutions, not exceeding 2% of the taxable income.

**Fines and penalties**
Fines and penalties are considered as non-deductible expenses.

**Taxes**
Generally, taxes are deductible for CIT purposes. The exceptions are the infrastructure development tax based on after-tax profits and the net profit tax for PEs.

**Other tax losses**
In cases where goods or services are sold below cost (or given for free), the revenue should be adjusted for tax purposes to the cost or purchase price of the goods or services.

Production wastes and defects within statutory norms, and losses resulting in force-majeure circumstances, are generally deductible.

Losses from the disposal of fixed assets also may be deducted if the fixed asset has been used for three or more years.

**Net operating losses**
Tax losses may be carried forward for a period of five years, allowing a reduction of taxable income of the respective year by up to 50%. Loss carrybacks are not permitted.
Uzbekistan, Republic of

Payments to foreign affiliates
There are no special tax provisions regarding deductibility of payments to foreign affiliates for services provided. They may be deducted in full if the general deductibility criteria are met (see Transfer pricing in the Group taxation section).

Group taxation
There is no provision for consolidation of income or losses by related companies for tax purposes in Uzbekistan. A foreign legal entity that has several PEs in Uzbekistan may not consolidate those for tax purposes.

Transfer pricing
The transfer pricing concept in the Uzbek Tax Code is limited to a couple of paragraphs stating that tax authorities may adjust prices used by interrelated parties if these prices differ from the prices that would have been used in transactions with independent parties. There is no further guidance for application of this rule, which gives rise to different interpretation by tax authorities and taxpayers.

Thin capitalisation
Effective legislation does not provide for thin capitalisation rules, except for debt-to-equity ratios set up by the Central Bank of Uzbekistan (CBU) for commercial banks.

Tax credits and incentives
The current tax legislation offers tax incentives for enterprises in oil and gas exploration/development projects, enterprises engaged in the production and export of goods for foreign currency (when export share exceeds 15%), and companies rendering certain services.

Incentives for oil and gas exploration and extraction companies
Foreign companies carrying out oil and gas exploration works, as well as their foreign contractors/subcontracts engaged in such works, are exempt from payment of all forms of taxes and contributions to non-budget funds during the exploration period. Additionally, import by these companies of equipment, material, and technical resources and services necessary for the exploration and related works is exempt from customs duties.

Resident corporations supplying materials and rendering services to foreign companies carrying out oil and gas exploration are exempt from VAT.

Furthermore, if foreign companies carrying out oil and gas exploration form joint venture companies for extraction of oil and gas at respective fields, such companies are granted a seven-year CIT holiday starting from the date of commencement of extraction.

Incentives for carrying out export activities
Enterprises exporting goods (works, services) of their own production for freely convertible currency may apply reduced rates of CIT as follows:

- If export share of total sales ranges from 15% to 30%, the effective rate shall be reduced by 30%.
• If export share of total sales is 30% or more, the effective tax rate shall be reduced by 50%.

This incentive is applied likewise in regards to property tax as follows:

• If export share ranges from 15% to 30%, the property tax rate is reduced by 30%.
• If export share is 30% or more, the property tax rate is reduced by 50%.

The incentive in both cases is subject to a restriction that it does not apply to wholesale/retail sale or intermediary companies, nor to revenues from the export of specific items such as cotton fibre, oil, gas, precious metals, etc.

Producers can also defer payment of their import VAT in respect of material and technical resources used for production of goods to be exported. The deferral is granted for up to 90 days without application of any interest.

**Incentives for service companies**

Micro-firms and small enterprises engaged in certain types of activity are exempt from CIT and unified tax payment until 1 January 2014. These types include, without limitation, leasing, insurance, auditing/bookkeeping services, and repair of footwear and leather goods.

**Exemptions from customs payments**

There are certain customs exemptions offered by the legislation for the following:

• Technological equipment imported by foreign investors as their charter fund contribution.
• Technological equipment imported under projects for creation of new or the modernisation of existing production facilities (with appropriate certificates issued by an authorised bank).
• Property imported for production needs by foreign investors and enterprises with foreign investment with foreign participation in the equity of not less than 33%.

**Foreign tax credit**

In accordance with international tax treaties of the Republic of Uzbekistan, legal entities/residents of Uzbekistan can obtain a tax credit in respect of CIT paid outside of Uzbekistan. In order to claim tax credit, legal entities should provide a copy of the tax payment order, confirmation from a competent tax authority, or any other document confirming payment of the tax outside of Uzbekistan.

**Withholding taxes**

WHT is to be withheld and remitted to the state budget by entities paying income to non-residents if these entities qualify under a tax agent definition (i.e. by (i) Uzbek legal entities and (ii) non-residents operating in Uzbekistan via PE).

The domestic WHT rates are as follows:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends and interest</td>
<td>10</td>
</tr>
<tr>
<td>Insurance and reinsurance payments</td>

</tr>
<tr>
<td>Freight</td>
<td>6</td>
</tr>
</tbody>
</table>
**Uzbekistan, Republic of**

**Payment WHT (%)**
- Royalties, services (including management, consulting services), rents, other income 20

**Double taxation treaty (DTT) relief**
Foreign legal entities that do not carry on activities in Uzbekistan through a PE are subject to WHT on income from sources in Uzbekistan, subject to the terms of a relevant DTT. Uzbekistan has signed DTTs with 52 countries; 48 of them are in force.

DTTs in force establish WHT rates as follows:

<table>

Notes

1. Where the beneficial shareholder owns not less than 10% of the voting shares.
2. Where the beneficial owner holds at least 10% of the capital of the paying entity.
3. Where royalties are paid for patents, trademarks, know-how, etc.
4. Where royalties are paid for copyrights on literature, cinema, musical works, etc.
5. Where royalties are paid for secret formulas, processes, or know-how.
6. Where royalties are paid for computer software, patents, designs, models, or plans.
7. Where one of the following conditions is met:
   a. recipient is a local authority or corporate body constituted under public law, including the central bank of the state, or interest is paid by the local authorities or corporate bodies
   b. interest is paid in respect to debt claims or loans, guaranteed, insured, or aided by the state or on behalf of the state
   c. interest is paid in respect to credit sales of industrial, commercial, scientific equipment of goods and merchandise or provision of services by an enterprise to another enterprise, or
   d. interest is paid in respect to a loan of any kind granted by a bank.
8. Where the beneficial shareholder owns no less than 25% of the capital of the paying entity.
9. Where the recipients of the interest are governments of contracting states or any governmental body (such interest is exempt from WHT).
10. Where royalties are paid in respect to use or the right to use industrial, commercial, or scientific equipment.
11. Where the beneficial shareholder owns no less than 20% of the voting shares.
12. Where the interest is received by any financial institution (including insurance companies).

Note that there may be other WHT rates offered by protocols to the individual treaties. For example, the protocol to the DTT with India enforced on 20 July 2012 decreases the maximum rates applicable for payment of interest, dividends, royalty, and technical payments from 15% to 10% and introduces articles on mutual assistance in collection of taxes and on limitation of benefits.

**Tax administration**

**Taxable period**

The taxable period for CIT is a calendar year.

**Tax returns**

CIT is reported quarterly before the 25th day of the month following the reporting quarter, with an annual return due by 25 March following the reporting year for enterprises with foreign investment and 15 February following the reporting year for other categories of CIT payers. PEs report on CIT once a year prior to 25 March following the reporting year.
Uzbekistan, Republic of

Payment of tax
Uzbek enterprises, including enterprises with foreign investment, are required to make advance instalments of CIT in each quarter based on estimated profits in the quarter. The instalments are payable by the tenth day of each month. Final quarterly payments based on actual profit figures are payable no later than the filing deadline for the quarterly tax returns (which is the 25th day of the month following the period of assessment). In case the final quarterly payment is more than 10% higher than advance instalments made in this quarter, tax authorities have the right to recalculate the advance instalments based on the actual quarterly profit figures and charge late payment interest accordingly.

Final CIT payment should be made no later than the date set as the deadline for annual return submission.

Payment of CIT by PE is made annually within a month after the filing deadline.

Tax audit process
Scheduled statutory tax audits are to be carried out once in three years (once in four years for micro-firms, small enterprises) by the tax authority of the district where the enterprise is registered, i.e. district tax inspectorates. However, in certain cases, the tax audit is undertaken by the State Tax Committee, which is the highest tax authority.

The tax audits are aimed at verification of the tax returns submitted by the taxpayer. Normally, the tax authorities will review the accounting records, copies of tax returns, and source documents as required.

There can also be un-scheduled tax audits (e.g. in case of liquidation of the enterprise) and counter tax audits (e.g. to review transactions with the enterprise’s supplier/customer who is under the scheduled tax audit).

In case of tax breaches revealed during tax audits, taxpayers should remove tax violations and pay respective taxes/obligatory payments and late payment interest within 30 days after the tax authority’s decision is released. If accomplished within the deadline, the tax authority’s decision on applying penalty may be cancelled. If not accomplished, the unpaid taxes/obligatory payments and late payment interest are to be withdrawn from (i) the taxpayer’s bank accounts (by issuing tax liability claim without acceptance), (ii) the taxpayer’s debtors (by issuing tax liability claim on the debts payable to taxpayer), or (iii) the taxpayer’s property (by issuing tax liability claim upon decision of the court).

Another form of monitoring accuracy and completeness of fulfilment of tax liabilities imposed by the tax authorities is 'cameral control', which is performed at the time of tax returns submission. The tax authorities may require the taxpayer to amend the tax returns(s) if they have revealed mistakes or inconsistencies therein. The amended tax returns should be filed within ten days.

Statute of limitations
The statute of limitations for tax purposes in Uzbekistan is set to five years.

Topics of focus for tax authorities
There are no officially announced areas of focus during tax audits. In practice, the tax authorities usually focus on currency control, cash discipline, deductibility of expenses for CIT purposes, and taxes on resources (e.g. excess profits tax, subsurface use tax).

---

**Significant developments**

The Law creating a Special Contribution on Extraordinary and Exorbitant prices in the International Hydrocarbons Market (windfall tax on oil production) was amended on 20 February 2013. The amendment increased the cap for calculating the contribution for extraordinary prices and modified the ranges for calculating the contribution for exorbitant prices. *For detail, see Windfall tax on oil production in the Other taxes section.*

Decree N° 9,430 with the new Customs Tariff was published on 25 March 2013. The new Customs Tariff is founded on the Law that Approved Venezuela’s adhesion to MERCOSUR (Spanish acronym for *Mercado Común del SUR*) and its adoption of MERCOSUR’s Common Tariff Nomenclature and its Common External Tariff passed in July 2006.

---

**Taxes on corporate income**

Corporations resident in Venezuela are subject to corporate income tax (CIT) on their Venezuelan and foreign-source income, whereas corporations resident abroad with a permanent establishment (PE) in Venezuela are levied CIT on only their Venezuelan and foreign-source income attributable to said PE. Corporations are able to claim any similar taxes paid abroad on foreign-source income as a tax credit. Non-resident corporations without a PE are subject to CIT only on Venezuela-source income.

Corporate income is taxed at the following progressive rates based on tax units (TU) (see below) (i.e. Tariff 2):

<table>
<thead>
<tr>
<th>Taxable income</th>
<th>Rate (%)</th>
<th>Subtract (TU)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>15</td>
<td>0</td>
</tr>
<tr>
<td>2,000</td>
<td>22</td>
<td>140</td>
</tr>
<tr>
<td>3,000</td>
<td>34</td>
<td>500</td>
</tr>
</tbody>
</table>

**Tax units (TU)**

The 1994 Income Tax Law reform established the concept of a taxable unit as an element that reduces the negative effects created by inflation on the determination of the tax rates. The tax code established the initial TU at 1 bolívar fuerte (VEF), with annual basis adjustments according to the variation on the consumer price index (CPI) from the previous year. For 2012, TU was VEF 90. For 2013, TU is VEF 107.
Venezuela

Additional rates and considerations
Income for oil exploitation and certain related activities is taxed at a flat rate of 50%. Related activities are comprised of those such as refinery, transportation, and purchases for the exports of hydrocarbons and by-products for exploitation. Joint venture corporations are also subject to a 50% CIT rate.

The above indicated regime does not apply to corporations engaged in the exploration and exploitation of non-associated gas (and the processing, refining, transportation, distribution, commercialisation, and exportation of the gas and its components) or companies exclusively engaged in the refining of hydrocarbons or improvement of extra heavy oil, which are subject to Tariff 2.

Local income taxes
See Municipal business licence tax in the Other taxes section for a description of local taxes on income.

Corporate residence
According to the Venezuelan tax code, the following companies are regarded as resident:

• Companies incorporated in Venezuela and registered with the Mercantile Registry as established by commercial law.
• Foreign companies registered with the Superintendence of Foreign Investments (SIEX) to be resident in Venezuela as branches duly registered with the Mercantile Registry.

The following companies are non-residents but subject to Venezuelan taxes:

• Foreign companies registered with SIEX to provide technical assistance, technological services, royalty items, and professional services from abroad.
• Foreign banks granting loans to local companies.
• Foreign companies leasing goods to local companies.
• Foreign companies deriving income from economic activities carried out in Venezuela or from assets in Venezuela.

Permanent establishment (PE)
According to the Venezuela Income Tax Law (VITL), generally, a passive party is deemed to be carrying out operations in Venezuela through a PE when:

• The passive party owns, directly or through an agent, employee, or representative in the Venezuelan territory,
  • an office, fixed place of business, or an activity centre where its activities are totally or partially carried on
  • management headquarters, branches, offices, factories, shops, facilities, warehouses, stores, construction, installations, or assembling works, when the duration thereof exceeds six months, or
  • agencies or representatives authorised (according to the VITL) to contract in the name of or on behalf of the passive party.
• The passive party performs, directly or through an agent, employee, or representative in the Venezuelan territory, professional, artistic activities.
• The passive party possesses, directly or through an agent, employee, representative, or other contracted personnel in the Venezuelan territory, other work places where the operations are wholly or partially performed.

Any agent acting independently shall be excluded from this definition, except if such representative has the power to conclude contracts in the name of the principal.

Other taxes

Value-added tax (VAT)
Federal VAT (Impuesto al Valor Agregado or IVA), is a one-time tax payable by the ultimate consumer of all types of products and services. However, each business entity involved in the process, from the sale of raw materials to the production and distribution of finished products to the ultimate consumer, is required to include the tax on its products to customers (output tax) and to pay the tax on its purchases or imports of goods and services (input tax), crediting the amounts paid against the amounts due on its own activities. The net amount payable by each entity is considered to represent a tax on the value added.

In general, VAT does not represent an additional cost to business enterprises because even though all types of business enterprises, including government departments and agencies (with some exceptions), are required to accept charges of the tax by suppliers on their purchases of goods and services, such amounts are normally deductible from the liability of the business enterprises for the tax on their bills to customers.

There are exceptions, principally when the sales of an enterprise are exempt from VAT, in which case the enterprise is treated as the final consumer and must absorb any VAT charges on its purchases except insofar as its activities are subject to the zero rate (see below). However, input tax paid on goods or services used to produce items that are exempt from VAT may be deducted for CIT purposes.

Taxable transactions
In general, VAT is payable on all sales, rental, and importation of goods, and rendering of services executed or used in the country, although a number of significant exceptions are provided by law.

Sales of goods
The law defines a sale as any transmission of tangible goods, including those made on a conditional basis or through an irrevocable trust. The taxable amount of a sale includes the sale price as well as other amounts charged to the purchaser for other taxes, duties, interest, or surcharges of whatever nature. VAT becomes payable when the goods are invoiced or shipped to the customers or when the price is paid in full or in part.

Exempt sales include the following:

• Certain foods and other products for human consumption.
• Fertilisers as well as any natural gas used in the manufacturing thereof.
• Some products for animal consumption.
• Medicine.
• Products derived from hydrocarbons and some raw materials intended to improve the quality of gasoline.
Venezuela

- Wheelchairs.
- Books, magazines, newspapers, and the paper used in producing these products.
- Vehicles, aircraft, and trains for passenger transport.
- Machinery and equipment for agribusiness.
- Scientific equipment purchased by the government.

Services
Taxable services are those rendered within Venezuela by one person to another on an independent basis, transportation of passengers or goods, agency activities, technical assistance, and transfer of technology. VAT is payable to service providers at the time the invoice is issued, the service is rendered, or the fee becomes demandable, whichever comes first. The taxable amount includes not only the price of services, but also charges to the customers for other taxes, interest, etc.

Exempt services include the following:

- Domestic land and maritime transportation of passengers.
- Educational services.
- Accommodations for students and persons with disabilities.
- Healthcare and dental services, surgery, and hospitalisation.
- Theatres, sports, and cultural events.
- Food services for employees and students.
- Certain utilities (e.g. electricity, water).
- Housecleaning.
- Transport services for hydrocarbon-derived fuels.
- Services involving livestock, poultry, and other minor species, including breeding and production.

Exports
Exports are zero-rated. Consequently, VAT is not payable on exports, including exports of in-bond processing companies, technical fees to foreign residents, and sales to in-bond processing companies and companies that export their entire production. Sale of natural hydrocarbon by joint ventures regulated by the Hydrocarbon Law to Petroleos de Venezuela S.A. (PDVSA) and affiliated companies are also taxable at 0%. Though exporters do not collect VAT on export sales, they may recover VAT charges on their purchases of goods and services by means of a refund certificate. This certificate may be used to pay other tax obligations. If such exporters carry out sales in the country, they will be entitled to recover only input VAT related to foreign sales.

Additionally, a zero rate applies to independent personal services provided by residents in Venezuela that are used solely by and for the benefit of persons abroad without a PE or fixed base in Venezuela.

Tax rates
The rate may change every year, within the range of 8% to 16.5%. Currently the general VAT rate is 12%.

An additional tax rate of 10% is applicable to the sale and imports of luxury products (e.g. vehicles valued at more than 30,000 United States dollars [USD], motorcycles with a cylinder capacity of 500 cc, nickel or token game machines, aircraft used for recreational or sport purposes, fighting bulls, trained horses, caviar, jewellery with precious stones valued at a price exceeding USD 500). An 8% VAT applies to the following transactions:
• Goats, sheep, and minor species for slaughter or breeding.
• Meats in their natural state, or refrigerated, frozen, or salted meats, or meats in brine of goats, sheep, and poultry.
• Shortening.
• Rendering of professional services to any government entity, in any level or branch of government, provided such services do not involve any commercial transactions but rather predominantly intellectual work or efforts.
• Domestic air passenger transportation.

Payment and collection
Excess VAT charged or chargeable to customers over VAT paid to vendors or customs authorities (Servicio Nacional Integrado de Administración, Aduanera y Tributaria or SENIAT), including the correspondent payment, must be remitted to SENIAT within the first 15 days of the following month.

Customs duties
As a general rule, the importation of goods into Venezuela is subject to customs duties. These duties are generally levied on the cost, insurance, and freight (CIF) value of the product being imported, excluding VAT.

Custom duty rates generally range from 5% to 35%. The duty rates vary depending on the product involved. In general, import tariffs are 5% for capital goods, 10% to 15% for raw materials and intermediate goods, and 15% to 35% for finished products. In addition, all imports are subject to customs handling charge, a duty import, and VAT.

Excise taxes

Tax on alcohol and alcoholic beverages
In general terms, the manufacture, commercialisation, and importation of alcohol and alcoholic beverages are subject to excise taxes. The Law of Tax on Alcohol and Alcoholic Beverages provides for three main types of excise taxes:

• Tax on the national production and importation of alcohol and alcoholic beverages, which is established on the basis of TU per litre and varies depending on the type of product.
• Additional excise tax per litre for national and imported beer and for other alcoholic beverages is levied on the sale of those products to the public, which is also provided on the basis of TU per litre, depending on the type of product.
• In addition to the above, another excise tax is imposed on the importation or local sale of national and imported alcoholic beverages to the public, which is levied on the sales price, which is provided on the basis of a percentage on the price of sale to the public and varies depending on the type of product.

Tax on cigarettes and manufacturing of tobacco
The importation and national production of cigarettes and tobacco to be consumed in Venezuela is subject to an excise tax. This proportional tax is levied at a rate of 70% on the retail price of cigarettes, tobacco, and its derivates.

Urban Property Tax
The Urban Property Tax is a local or municipal tax payable by any person who owns property rights or any other real rights on urban real estates. The taxable basis is the value of the urban real estate. For these purposes, the fair market value of the
real estate is provided as a point of reference. The applicable rate varies according to each municipality.

**Public registry tax**
Commercial companies are registered with the Mercantile Registry Office and are subject to a tax levied upon incorporation of a company and registration of capital increases. The tax is 1% of the amounts of subscribed or increased capital. The sale of a going concern is also registered in the Mercantile Registry Office and is subject to a tax levied upon the total amount of the sell. The tax is 2% of the amount.

**Stamp duties**
The Stamp Duties Law establishes a number of stamp duties on the issuance of official documents (e.g. certificates, permits, authorisation, registrations). Stamp duties may be levied at fixed amounts (ranging from TU 0.01 to TU 10,000) or at a rate based on the value of the transaction or work in question.

**District Capital stamp tax**
Until May 2012, under their own interpretation of the District Capital Stamp Law, Mercantile Registries of the District Capital were charging 10% of the amount of subscribed or increased capital of companies and 20% for the sale of a going concern. An amendment on this Law enacted on 2 May 2012 reduced the applicable stamp tax to subscribed or increased capital of companies to 2%.

**Gift tax**
Overall, the Inheritance and Donations Tax Law, published on 1999, stipulates the taxes attributable to inheritances left by individuals. Nonetheless, this Law provides regulation about donations, which are significant to corporations. Subject to payment of the gift tax are the beneficiaries of gifts in the form of movable or real property, rights, or shares located in the country.

For tax calculation purposes, the progressive tax rate (up to 55%) set forth in the Law will be applied to the donated good. Both donors and donees are jointly liable for the tax generated from the gift.

The gift tax is applicable from the time in which the donors manifest before the National Treasury their will to donate and must be paid before the registration of any document formalising or evidencing the authenticity of the gift. Should the donation not be perfected due to express will of the donor or rejection on the part of the donee, the obligation to pay the tax will be eliminated and reimbursement may be requested of the amounts paid in this connection.

Under the transfer pricing rules contained in the VITL, the tax authorities are empowered to impute income in inter-company transactions at a price reflecting the fair market value of the property being transferred.

Before the introduction of transfer pricing rules, under the Inheritance and Donations Tax Law, the tax authorities could and still can presume in transactions involving a sale, assignment, barter, or transfer, the existence of a donation if, for instance, the price stipulated in such transaction does not reflect the real value of the property being transacted. In such a case, a gift tax may be imposed on the difference between the fair market value of the property being transacted and the consideration received in return.
Also, a cancellation of a debt gives rise to gift tax issues. In this regard, the Inheritance and Donations Tax Law provides that the total or partial forgiveness or cancellation of a loan must be viewed as a gift and, as such, is subject to gift tax.

**Windfall tax on oil production**
The windfall tax on oil companies, which was amended in February 2013, is provided in the following terms:

- The contribution on extraordinary oil prices is a 20% tax on the difference in price when the internationally quoted price per barrel exceeds the budgeted price per barrel (for purposes of the Venezuelan Annual Budget Law), provided that the quoted price per barrel is equivalent or lower than USD 80 per barrel (i.e. the maximum basis is the difference between USD 80 per barrel and the current budgeted price of USD 55).
- The contribution on exorbitant oil prices is comprised of the following:
  - 80% tax on income generated by quoted oil prices between USD 80 and USD 100 per barrel (i.e. 80% on the range from USD 80 to USD 100 quoted price per barrel).
  - 90% tax on the difference in the quoted oil prices between USD 100 and USD 110 per barrel.
  - 95% tax on the difference over the threshold of USD 110 per barrel.

The tax is payable by oil companies exporting with sale purposes. Also, the mixed companies (*empresas mixtas*) created in accordance with the Master Hydrocarbons Law that sell oil and by-products to the state-owned company (PDVSA), or any of its affiliates, are also obligated to pay the above described tax.

On the other hand, tax exemption is provided for the following cases:

- For mixed companies when their activities are the result of the performance of projects for new developments of reservoirs, enhanced production, or projects to remediate production, declared as such by the Ministry of the Popular Power for Petroleum and Mining, until they have recovered their total investment. Parameters to determine the volumes exempted are to be separately established by the aforesaid Ministry by Resolution.
- Exports executed in connection with cooperation or financing international agreements.

The tax is payable on a monthly basis in foreign currency. Other terms of payments are to be regulated by Resolution.

Additionally, USD 80 per barrel is the maximum price to be used as the calculation basis for the payment of royalties, extraction tax, and export registration tax provided for in the Master Hydrocarbons Law.

**Hydrocarbons Organic Law**
The state is entitled to 30% of the volume of hydrocarbons extracted from any deposit, by way of royalties. The National Executive can reduce this within certain limits, when it is shown that certain types of deposits are not economically exploitable.

Persons conducting activities related to hydrocarbons must pay the following taxes:
Surface tax
For the portion of the surface area granted that is not under development, the equivalent of 100 TU for each square kilometre or portion of a square kilometre for every elapsed year is due as a surface tax. This tax will increase annually by 2% during the first five years and 5% during the following years.

Tax on own consumption
10% of the value of each cubic metre of hydrocarbon by-products produced and consumed as fuel in wholly-owned operations, based on the price of the end consumer, is due as a tax. In the case that said product fails to be sold in a domestic market, the Ministry of Energy and Mines shall provide the price.

General consumption tax
For every litre of hydrocarbon by-products sold in the domestic market, a tax is due at the rate of between 30% and 50% of the price paid by the end consumer, whose aliquot should be implemented annually between the two extremes under the Budget Law. This levy to be paid by the end consumer should be withheld at the supply source, to be handed over to the National Treasury on a monthly basis.

The National Executive may waive, in whole or in part, by the time specified, the general consumption tax, in order to encourage certain activities of public or general interest. The National Executive can also reinstate this levy to its original level when the causes for the waiver cease to exist.

Gaseous Hydrocarbons Organic Law
The Gaseous Hydrocarbons Organic Law establishes a system of royalties, determinable by the volumes of gaseous hydrocarbons extracted from any deposit and not re-injected. The state is also entitled to a 20% share for this item. The exploitation companies of gaseous hydrocarbons shall pay for the gaseous hydrocarbons consumed like fuel, the taxes settle down on the matter by applicable laws.

Additional taxes are provided for in the license agreements, which vary for each particular case.

Contribution to support Organic Law on Sports, Physical Activity, and Physical Education
The purpose of the Organic Law on Sports, Physical Activity, and Physical Education (Sports Law) is to establish the public service nature of physical education and the promotion, organisation, and administration of sports and physical activity, as well as their organisation as an economic activity with social aims.

The provision of the Sports Law are of a public nature and are applicable to the public national, state, and municipal administration and organisations, and also to individuals and legal entities that conduct any activity related to the practice, promotion, organisation, sponsorship, administration, or any economic activity associated with sports or physical activities and education.

The Sports Law creates the National Fund for the Development of Sports, Physical Activity, and Physical Education, which will be constituted with the contributions made by companies or other public or private organisations that perform economic activities for profit in the country; by donations, gifts, or any other special contribution made by the Republic, the states, the municipalities, or any other public or private entity; and by the revenue produced by such funds.
The contribution is 1% of the annual net of accounting profit and is payable by all companies or other public or private organisations that perform economic activities within the country and obtain an annual net or accounting profit of more than TU 20,000. Up to 50% of the contribution can be for the implementation of the taxpayer's own projects, provided the respective project follows the guidelines to be issued by the National Sports Institute, which will be updated every two years.

**Anti-drugs contribution**
The Organic Drug Law stipulates that any company employing 50 or more employees must make an annual contribution from their operating profit equivalent to 1%. On the other hand, corporations with the specifications mentioned before but that are dedicated to the manufacture or import of alcohol beverages, tobacco, or their mixtures are required to make a contribution equivalent of 2% from their operating profit. Under the definitions established by this Law, operating profit can be understood as the result from subtracting the operating expenses from the income profit in accordance with the accepted Venezuelan general accounting principles.

This contribution will be collected by the National Anti-Drug Fund (FONA), within 60 continuous days counted from the end of the fiscal year.

Note that this contribution can be retrieved if the company performs:

- prevention programs and projects intended for the company employees and their family environment
- prevention programs for children and adolescents, or
- programs to fight drug trafficking.

**Payroll taxes and other contributions**
Contributions applicable to resident companies in Venezuela:

Notes

1. As of 1 May 2013, the minimum monthly metropolitan salary amount was increased to VEF 2,457.02 from 2,047.52. It will increase to VEF 2,702.73 as of 1 September 2013.
2. According to the current system, the employer’s contribution to social security will depend on the company’s risk qualification (minimum risk, middle risk, or maximum risk).
3. Regarding Instituto Nacional de Capacitación y Educación Socialista (INCES) contribution, the employer must contribute 2% of the total wages and salaries paid to employees.
4. Employers are also required to withhold 0.5% of the annual profit-sharing bonus paid to employees.
5. According to the Ley Orgánica del Sistema de Seguridad Social (LOSSS), the general rule for contribution basis for the new systems may not exceed ten minimum wages. The transition rules establish a contribution basis of five metropolitan minimum wages for urban workers for social security purposes. No cap is expressly established in the transition rules for the housing system and work, security, and health regime.
6. The basis of calculation of the housing contributions is the ‘Integral Salary’. The Integral Salary is a concept established in the Organic Labour Law, and it comprises the following payments: commissions, gratifications, profit sharing bonuses, vacation bonus as well as surcharges for holidays, overtime, night shifts, among others, all of which are made to the employee and correspond to the services rendered by the individual.
7. Contributions to be made to this regime are exclusively for the employer and vary depending on the risk associated to the company. A company’s risk is to be determined by the Instituto Nacional de Prevención, Salud y Seguridad Laborales (INPSASEL).
8. Ley Orgánica de Prevención, Condiciones y Medio Ambiente de Trabajo (LOPCYMAT) regulations do not establish a cap for the contribution. However, as mentioned, the LOSSS establishes a maximum of the minimum urban salaries. For this reason, there are several contrary interpretations on whether a cap should be applied in this case.

Notes

1. Ley Orgánica de Ciencia, Tecnología e Innovación (LOCTI) (see below).
2. Ley Orgánica de Drogas (LOD).
3. 2% in the case of companies that manufacture or import alcohol beverages or tobacco. 1% for companies that employed 50 or more employees.

### Science, technology, and innovation contribution

The Law on Science, Technology, and Innovation (LOCTI, by its Spanish acronym), establishes a mandatory contribution to be paid by companies that obtained, in the previous fiscal year, over TU 100,000 in gross income.

The kind of companies that are required to pay this contribution are stock companies, limited liability companies, partnerships, communities, irregular associations, associations, foundations, and permanent establishments or fixed bases located inside or outside the national territory with current activities in Venezuela.

Contributions established in the LOCTI are as follows:

- Contributions made from companies related to bingos and casinos activities, alcoholic drinks, or tobacco: the companies engaged in activities related to bingos and casinos, alcoholic drinks, or tobacco must contribute annually the equivalent of 2% of gross income.
- Contributions made by private companies engaged in hydrocarbon or mining activities: the companies that are engaged in hydrocarbon activities, including
gaseous hydrocarbons, or mining activities, must contribute the equivalent amount of 1% of gross income.

- Contributions made by companies engaged in other economic activities: these companies must contribute annually the equivalent of 0.5% of gross income.
- The company that performs activities with two different percentages will apply the highest one.

The National Fund for Science, Technology, and Innovation (FONACIT) is the entity responsible for the administration, collection, control, verification, and qualitative and quantitative determination of the contributions.

Although the contribution to FONACIT is mandatory, companies can retrieve these resources, providing in the third quarter of each year an annual investment in science, technology, and innovation containing the projects planned for the next year, in line with priority areas and guidelines established by the national authority.

At present, the National Government has given informally the following areas as a priority to which projects should focus on the annual plan:

- Housing and habitat.
- Dynamics, trends, and challenges for urban development.
- Impact of climate change.
- Energy efficiency.

**Municipal business licence tax**
Companies and business entities, as well as individuals and unincorporated companies, are subject to municipal tax on gross income from industrial or trade activities carried on in the municipality during the fiscal year. The rates range from 0.1% to 10.0%, depending on the activity and the municipality.

**Other municipal taxes**
Municipalities also tax vehicles, public entertainment, legal bets, and commercial advertisements. There are also various municipal tariffs and fees.

**Branch income**
Branches of foreign corporations are subject to the same tax rules as Venezuelan corporations. Inter-branch income and deductions must be eliminated. The positive difference between a branch's annual book and taxable income is deemed to be remitted to the branch's head office (branch profits tax). Such remittances are subject to the 34% flat dividend tax (see Dividend tax in the Income determination section for more information) regardless of whether there is an actual payment unless the branch can provide proof of reinvestment of its profits for a five-year period. If such proof is established, no deemed remittance is assumed.

A Venezuelan taxpayer has to recognise, annually on an accrual basis, income generated in a company or other legal entity it controls that is located in a jurisdiction with low fiscal taxation (JLFT). Further, investments in a JLFT must be declared to the SENIAT.
**Income determination**

**Inventory valuation**
Inventories may be valued at cost or the lower of cost or market value. Any method generally accepted for accounting purposes can be accepted for tax purposes.

**Capital gains**
Capital gains are taxable as ordinary income, and capital losses are deductible from ordinary income. Note that capital losses resulting from the sale of stock, capital reduction, or liquidation of a company are only deductible if they meet one of the following conditions:

- The cost of the capital stock was not in excess of the price quoted on a stock exchange or an amount with a reasonable relationship to the book value of the capital stock.
- The holding period of the investment was for at least two years immediately preceding the date of the sale.
- The stockholder proves that the company selling the shares carried on economic activities for at least two years, preceding the date of sale.

At present, the tax law contains two different rulings relevant to the deductibility of losses incurred through operations on the Venezuelan Stock Market, one of which has been described above. The second ruling pertains to income obtained from operations on the local market. This income is subject to a final 1% tax that is withheld at the source. Losses in this kind of operation are not deductible against other income. Corporate shareholders not domiciled in Venezuela may not deduct such losses from other taxable income other than dividends arising from Venezuelan sources.

Gains upon liquidation or reduction of capital are taxable to the liquidating entity.

**Dividend income**
A dividend tax is levied at a flat rate of 34% on the positive difference between book income and tax income generated after 2000. Book income is understood to be that approved at a shareholders’ meeting and based on the financial statements prepared pursuant to generally accepted accounting principles (GAAP). To determine the applicable difference, a last in first out (LIFO) method applies. The tax is triggered when dividend is paid and shall be remitted via withholding. Withholding is to be made at the moment a dividend is declared or credited to the account a recipient. The 34% (domestic) rate can be mitigated under tax treaties.

Dividends obtained from companies incorporated or resident abroad or incorporated abroad and resident in Venezuela are taxed at a flat 34% rate.

**Stock dividends**
Dividends of stock are subject to payment of the aforementioned dividend tax. Moreover, stock dividends are subject to an advanced payment of dividend tax equivalent to 1% of the dividend distributed. Stock dividends have no cost for tax purposes.

**Interest income**
Unless the debtor can prove otherwise, any sum paid by a debtor in excess of the principal is deemed to be interest. As a general rule, interest is sourced in Venezuela if it is derived from activities carried out in Venezuela or from property located in Venezuela. Specifically, interest is deemed to be derived from activities carried out in...
Venezuela

Venezuela if the loan principal is used or enjoyed in the country. Interest received by non-resident corporations is therefore subject to Venezuelan income tax if the loan is granted or invested in Venezuela.

Interest paid on loans granted by non-resident financial institutions is subject to a final withholding tax (WHT) at source at a rate of 4.95% on gross income. Interest paid to other non-resident legal entities is subject to tax at a rate of 34% applied to 95% of the gross income.

**Foreign income**

Extraterritorial income is subject to Venezuelan CIT based on the concept of worldwide income taxation, according to which:

- Resident companies must pay a tax on total income whether from national or foreign source.
- Non-resident companies with PE in Venezuela will pay tax on their income, whether of national or foreign source, attributable to the Venezuelan PE.
- Non-resident companies will pay taxes on their income originated or caused in Venezuela.
- Resident companies as well as non-resident companies with PE in Venezuela may credit the tax paid abroad for earnings of an extraterritorial source against the income tax payable in Venezuela, subject to limitations.
- In general terms, taxation of foreign-source income is ruled by domestic provisions on taxation of territorial-source income. Foreign-source dividends are taxable when dividends are received. However, in case of investments located in a JLFT, anti-deferral rules in the international fiscal transparency regime apply (see below).

**Foreign technical assistance and services**

Taxable income of foreign taxpayers providing technical assistance or technological services from abroad to individuals or entities that use them in Venezuela or assign them to third parties is presumed to be 30% of gross income for technical assistance fees and 50% of gross income for technological service fees. If the contract does not specify the proportion in which the services are rendered, the law provides that 60% of the technical assistance and technological service fees are deemed to be rendered abroad (i.e. foreign-source), with the other 40% deemed to be rendered in Venezuela. The law also provides that 75% of the entire income related to technological services and 25% of that related to technological assistance is rendered abroad if not otherwise specified in the contract. See the Withholding taxes section for more information.

**International fiscal transparency regime**

A regime of international fiscal transparency is created for the purpose of establishing special standards of fiscal control, governing capital investments in countries classified as a JLFT, or tax havens. Under certain conditions, a Venezuelan taxpayer may be required to recognise income generated in its JLFT subsidiary on an accrual basis in its tax return.

**Inflation adjustment**

A system for the adjustment of non-monetary assets, non-monetary liabilities, and shareholder’s equity has been established. ‘Non-monetary assets’ include land, construction, machinery, vehicles, installations, inventories, and investments other than in securities (e.g. bonds and stocks).
There are two phases to the adjustments: (i) initial adjustments and (ii) annual adjustments. Both phases are mandatory adjustments for taxpayers engaged in commercial, industrial, financial, and insurance operations, and in the exploitation of mines and hydrocarbons. The annual adjustment is optional for taxpayers performing non-business activities.

**Initial adjustment**
The initial adjustment on depreciable fixed assets requires a registration tax of 3% on the amount of the adjustment.

The initial adjustment must be filed at the closing date of any fiscal year ending after 1 January 1993. This adjustment is applicable to all non-monetary assets and non-monetary liabilities.

The initial adjustment is calculated by applying the variations between the CPI of the Caracas Metropolitan Area prevailing in the month in which the non-monetary assets were acquired and the month corresponding to the initial adjustment. Assets acquired before 1950 are deemed to have been acquired in January 1950.

A registry tax of 3% is applied exclusively to the initial revaluation adjustment of depreciable fixed assets. For payment, taxpayers must be registered with the Asset Revaluation Registry, maintained by the tax administration. The resulting tax may be paid in three consecutive annual instalments, beginning on the date of registration.

Companies in the pre-operating stage, deemed to end with the first invoice, must determine and pay a 3% tax once the pre-operating period has ended.

Depreciation or amortisation on the revaluation adjustment is allowed, based on the original estimated life of the asset.

**Annual adjustment**
The annual adjustment is applied each year in determining taxable income. The adjustment factor must be applied to the following balance sheet items at the closing date of the fiscal year. The resulting adjustment will increase or decrease taxable income.

### Deductions

**Depreciation and amortisation**

Companies may deduct depreciation of tangible fixed assets and amortisation of intangible fixed assets that are used in the production of income. Depreciation is generally computed on a straight-line basis although any other generally accepted method for accounting purposes is also accepted. Depreciation is not allowed on real estate used as rental property. Depreciation on the stepped-up portion of assets revalued by any method other than the inflation adjustments (see the Income determination section) is not permitted. In principle, useful lives of assets shall be consistent with the parameters used in accordance with accounting principles. Although domestic standards provide that tables with depreciation and amortisation rates to be applied by taxpayers may be provided via the Income Tax Rules, such a table has not been provided to date.

**Goodwill**

Deduction of the amortisation of goodwill is allowed for income tax purposes. Deduction of the cost basis for purposes of calculating the capital gain on the sale is also allowed for income tax purposes.

**Organisational and pre-operating expenses**

Domestic income tax regulations do not provide for specific guidance as to the treatment of organisational and pre-operating expenses. The accepted practice is to follow GAAP.

**Interest expenses**

Interest paid on a loan, the principal of which is invested to generate income, is deductible.
Venezuela

**Bad debt**
Losses arising from bad debts are deductible, provided:

- the loan concerned was granted as part of the taxpayer's business
- the amount of the debt was previously included in the taxpayer's gross revenue (except in the case of loans granted by financial institutions or by employers to their employees), and
- either the debtor and the debtor's guarantors are insolvent or the amount of the loan does not justify collection expenses.

**Charitable contributions**
Deductions for allowable charitable contributions are limited to 10% of taxable income (before deducting contributions) when taxable income does not exceed TU 10,000. When taxable income exceeds TU 10,000, charitable contributions are limited to 8% of taxable income. For oil extraction companies, the deduction is limited to 1% of the pre-contribution tax amount.

**Taxes**
Municipal, state, and local taxes are deductible in determining taxable income. Corporate taxes are not deductible.

**Other significant items**
Payments required by the labour law, such as profit sharing (generally between 15 days and four months' salary) and severance indemnity accruals are also deductible. In cases of unjustified dismissals, double severance indemnities must be paid. However, accruals for such additional indemnities are generally not deductible until paid.

**Net operating losses**
Losses may be carried forward for three years. Losses may not be carried back. Note that losses from inflation adjustments may be carried forward only one year.

Foreign losses may be offset only against foreign profits.

**Payments to foreign affiliates**
A Venezuelan corporation may claim a deduction for royalties and technical assistance and for technical service fees paid to foreign affiliates, subject to the following conditions:

- The contract is registered within 60 days of execution with the SIEX.
- Income tax payable by the recipient is withheld at the source.
- Transfer pricing requirements are met.
- In the case of technical assistance and technological services fees, the expenses may be deducted if such services cannot be otherwise provided in Venezuela.

Foreign companies domiciled in Venezuela are allowed to deduct royalties paid to parent companies or foreign affiliates. Companies must notify the SIEX of payments made within 60 days (see the Withholding taxes section for more information). Branches of foreign companies, however, may not deduct such payments to head offices or related parties.

**Group taxation**
Group taxation is no longer possible in Venezuela.
Transfer pricing
Taxpayers that carry out operations with related parties abroad must calculate their income, costs, and deductions by applying a defined methodology of transfer pricing. This regime is applicable to imports, exports, and interest paid to recipients abroad as well as technical assistance, technological services, and royalty fees.

Thin capitalisation
Thin capitalisation rules limit the deduction of interest from debt with related parties in excess of a 1:1 debt-to-equity ratio. Under these rules, if the average of a taxpayer’s debt (with related and unrelated parties) exceeds the average amount of its equity for the respective fiscal year, the excess debt is treated as equity for income tax purposes. Consequently, the ability to deduct interest on related-party loans may be affected.

Tax credits and incentives
Foreign tax credit
Foreign income tax paid on taxable foreign income may be offset by the payable Venezuelan tax, up to the proportion of Venezuelan payable tax related to foreign-source income. Taxpayers must keep documentation of foreign tax. No carryforward rules are provided for in domestic regulations.

Other incentives
Customs duty incentives are also available, such as drawbacks on the import of materials used for exporting products. This may take the form of a tax refund certificate issued by the Ministry of Finance. The certificate is a negotiable bond and will be accepted by the Treasury Funds Office for payment of national taxes. Determination of the amount of the refund will take into account the import duties effectively paid at the time the materials used in the manufacture of the exported product were received in Venezuela.

Withholding taxes
Resident corporations making certain types of payments must withhold taxes. T2 refers to Tariff 2. These include the following:

<table>
<thead>
<tr>

</tbody>
</table>

**Notes**

1. WHTs constitute prepayments against final tax liabilities as determined by the income tax return when filed.
2. Includes commissions earned in instances other than through a dependent relationship (e.g. employer/employee). Commissions are subject to withholdings in the same manner as salaries and wages.
3. The rates for non-residents are similar to those rates applicable for payments to a non-domiciled corporation not resident in a treaty country and rendering services from abroad with no PE in Venezuela.
4. Excludes payments exempted under international shipping agreements.
5. Withholding applicable only on the excess on profits taxed at the corporate level (see Dividend income in the Income determination section).

**Tax treaties**

There are currently comprehensive treaties for the avoidance of double taxation with the following countries:

<table>

Notes

1. Domestic rate applicable to payments to non-resident corporations.
2. The 4.95% rate applies to non-resident financial institutions, and the Tariff 2 on 90% on the gross income in all other cases of non-resident entities.
3. The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
4. The 4.95% rate applies to interest paid to banks, and the 10% rate applies in other cases.
5. The 5% rate applies when the beneficial owner is a company that holds at least 5% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
6. The 5% rate applies to interest paid to banks, and the 15% rate applies in other cases.
7. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
8. The 5% rate applies to payments for the use or the right to use copyrights on scientific work, software, trademarks or for the use or the right to use any type of equipment or transportation vehicles. The 10% rate applies in all other cases.
9. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
10. The 5% rate applies when the beneficial owner is a company that holds at least 20% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
11. The 10% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
12. The 5% rate applies to artistic copyright, computer software, patent, and industrial, commercial, and scientific royalties.
13. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
14. The 5% rate applies to interest paid to banks, and the 10% rate applies in other cases.
15. The 10% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
16. The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
17. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
18. The 10% rate applies to royalties, and the 5% rate applies to technical assistance.
19. No withholding applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends. The 5% rate applies in all other cases. The 15% rate applies to a resident of Venezuela who receives from a company that is a resident of France dividends that would give the right to a tax credit (avoir fiscal) if they were received by a resident of France and shall have the right to a payment from the French Treasury of an amount equal to this tax credit (avoir fiscal), subject to deduction of the tax.
20. The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
21. The 10% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
22. The 20% rate applies to royalties, and the 10% rate applies to technical assistance.
23. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
24. The 7% rate applies to literary, artistic, and scientific work copyright royalties, and the 10% rate applies in other cases.
25. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
26. The 5% rate applies to interest in case of banks, and the 10% rate in other cases.
27. The 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment. The 10% rate applies in other cases.
28. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
29. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
30. The 4.95% rate applies to interest in case of banks and insurance companies. The 10% rate applies to the aforesaid entities when the payment is carried out by banks. The 15% applies in other cases.
31. No withholding applies when the beneficial owner is a company whose capital is totally or partially divided into shares and controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
32. The 7% rate applies to patent royalties and to industrial, commercial, and scientific equipment royalties, the 7% rate applies to trademark royalties, and the 10% rate applies to literary, artistic, and scientific work copyright royalties.
33. The 5% rate applies if the beneficial owner is a company that directly controls at least 10% of the company paying the dividends.
34. The 5% rate applies to interest paid to banks, and the 15% rate applies in other cases.
35. The 12% rate applies in case of royalties, and the 9% rate applies to technical assistance.
36. The 12% rate applies in case of royalties, and the 10% rate applies to technical assistance.
37. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
38. The 10% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends and has invested in this company not less than the equivalent to USD 100,000. The 10% rate applies in all other cases.
39. The 5% rate applies to interest paid to banks, and the 10% rate in other cases.
40. The 15% rate applies to royalties, and the 10% rate applies to technical assistance.
41. No withholding applies when the beneficial owner is a company whose capital is totally or partially divided into shares and controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
42. The 4.95% rate applies to interest in case of banks. The 10% rate applies in other cases.
43. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
44. The 10% rate applies to literary, artistic, and scientific work copyright royalties, and the 7% rate applies in other cases.
45. No withholding applies when the beneficial owner is a company that controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
46. No withholding applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.
47. No withholding applies when the beneficial owner is a company that controls at least 10% of the capital of the company paying the dividends. The 10% rate applies in other cases.
48. The 5% rate applies to patent and trademark literary, artistic, or scientific work copyright royalties, including films, and the 7% rate applies in other cases.
49. The 5% rate applies if the beneficial owner is a company that owns at least 10% of the voting stock of the company paying the dividends. The 15% rate applies in other cases.
50. The 4.95% rate applies to interest to financial institutions (including insurance companies), and the 10% applies in other cases.
51. The 5% rate applies to Industrial, commercial, and scientific equipment royalties, and the 10% rate applies in other cases.
52. The 5% rate applies if the beneficial owner is a company that controls at least 10% of the capital of the company paying the dividends. The 10% rate applies in other cases.

The treaties with Brazil and Mexico have been published in the Official Gazette and signed by the contracting parties but have not entered into force since diplomatic notes have not been exchanged.

Treaties with additional countries are being negotiated.

**Tax administration**

**Taxable period**

Taxable years may not exceed 12 months, but the first year may be less than 12 months. Taxpayers engaged in commercial, industrial, or service activities may choose a taxable year that does not coincide with the calendar year. A taxpayer that makes such an election may only change it after obtaining prior authorisation from the tax authorities. All other taxpayers are required to conform their taxable year to the calendar year.
**Tax returns**
Final tax returns must be filed within three months following the end of the tax year or at the date indicated on the corresponding calendar for those designated as a 'special taxpayer' by the tax authorities. The system is one of self-assessment.

**Payment of tax**
The total amount of tax due must be paid at the time of filing the annual return. Estimated tax payments must be paid consecutively in six monthly instalments. Companies engaged in mining, hydrocarbon exploitation, and related activities must make 12 equal monthly estimated tax payments.

**Penalties**
Fines for omitted taxes when assessed as a result of tax audits range from 25% to 200% of the omitted tax. The tax authorities generally assess the average fine (112.5%) unless aggravating or mitigating circumstances apply.

Fines are reduced to 10% if assessment is accepted within a specific timeframe.

Fines are adjusted according to the value of the Tax Unit.

Late payment interest is 1.2 times the average banking lending rate considering the six major banks.

**Tax audit process**
According to the Master Tax Code, the tax administration is entitled to review the existence of a taxpayer’s liability, whether it has been reported or not. In exercising this power, the tax administration is entitled to obtain and verify information in connection with a determined tax liability. Verifications may be carried out on the basis of available information or on a presumptive basis if concrete information is not available.

**Statute of limitations**
According to the Master Tax Code, the statute of limitations for tax liabilities is four years starting to run on 1 January of the year following the tax period involved. Regarding taxes that are assessed by periods (e.g. income tax and VAT), it is understood that the taxable event occurs at the end of such period. Exceptionally, the statute of limitations is extended to six years in any of the following circumstances: (i) the taxpayer fails to declare the taxable event or submit the relevant returns; (ii) the taxpayer does not comply with its obligation to register with the tax administration; (iii) the tax administration was not able to become aware of the taxable event; (iv) the taxpayer has extracted from the country property that is subject to the payment of the tax liability or if the tax liability is related to taxable events occurring abroad; or (v) the taxpayer does not keep its accounting in accordance with the relevant standards.

**Topics of focus for tax authorities**
Tax audits are generally focused on special taxpayers. The main subjects of focus of tax audits on corporate taxpayers are related to compliance of formal obligations for direct and indirect taxes and transfer pricing.
**Other issues**

**Sample corporate tax calculation**

**Exchange control**

In January 2003, the Venezuelan government and the Venezuelan Central Bank (VCB) restricted the free trade of foreign currency and established an Exchange Control Regime, which is characterised by the following aspects:

- VCB centralises the purchase and sale of foreign currency.
- All foreign currency derived from the export of goods, services, and technology must be sold to the VCB, through the financial system and at the official exchange rate. Exporters are to be registered with the Users Registry and are to consign certain documentation certifying good fiscal status. Likewise, the sale of every foreign currency introduced in the country for various concepts, including direct foreign investment, to the VCB is mandatory. In such cases, said foreign currency is to be registered with the SIEX for re-exportation and remittance purposes. The acquisition of foreign currency for imports is also subject to application for ‘Foreign Currency Authorisation’, which is subject to certain conditions.
- At the end of 2012, the mechanism to purchase securities denominated in foreign currency through the System of Transactions with Securities stated in Foreign Currency (SITME by its Spanish acronym) was extinguished.
- On 19 March 2013, the Venezuelan government announced a new mechanism for the acquisition of currency created under the name of Complementary System for Currency Administration (SICAD by its Spanish acronym) and available only for corporations previously authorised by the government for imports of goods and services. This system is ruled by Exchange Agreement N°21, (Official Gazette N° 40,134) of 22 March 2013, and provides that the auctions will be managed by the Superior Organism for the Exchange Optimization. This Organism will receive from the VCB consolidated data summarising exchange rates offered by the auction bidders and after completing the award of the foreign currency auctioned, the Organism will provide the VCB with the bidding results to be published by it through regular or specialised media.

The Law on Foreign Exchange Crimes is in effect, thereby establishing the actions that constitute exchange crimes and their respective penalties. Said penalties may be both criminal and pecuniary.

Significant developments

An amended Law on tax administration and Circular 45/2013/TT-BTC on depreciation of fixed assets have recently been issued. The amended Law on tax administration will be effective from 1 July 2013. Circular 45/2013 applies from tax year 2013 onwards.

Amended Law on tax administration

Advance pricing agreements (APAs)
The amended Law allows taxpayers and the tax authority to agree in advance to the manner of determination of arm’s-length pricing and the method of tax assessment in relation to related party transactions. An APA can be unilateral or bilateral.

Tax penalties
The amended Law increases the level of penalty and interest, in particular:

• Interest on late payments increases from 0.05% to 0.07% per day for payments that are late in excess of 90 days.
• Penalty for under-declaration increases from 10% to 20%.
• A penalty of 20%, instead of the current 10%, will apply for import/export related matters that are detected during customs inspection.

The statute of limitation for tax violation
The statute of limitation for tax violation remains at two years for penalties on violation of tax procedures and five years for penalties for tax evasion and under payment. The amended Law introduces a ten-year statute of limitation for collection of outstanding tax, which is in line with the record keeping requirement for accounting purposes. No statute of limitation applies for taxpayers that are not registered for tax payments.

Changes in tax procedures
The amended Law requires a tax inspection to be undertaken within one year from the date of a tax refund decision if:

• an enterprise declared losses for two consecutive years or has accumulated losses exceeding their charter capital
• an enterprise claims a tax refund from real estate activities, trading, or services
• an enterprise changes business location two times or more within 12 months prior to the date of the tax refund decision, or
• an enterprise has unusual changes in its tax assessable income and its tax refund amount within 12 months prior to the date of the tax refund decision.
Other cases are subject to tax inspection based on the risk management principle.

**Circular 45/2013 on fixed asset depreciation**
Circular 45/2013 introduces various changes, including an increase in the threshold for being recognised as a fixed asset from 10 million Vietnamese dong (VND) to VND 30 million.

---

**Taxes on corporate income**

**Standard rates**
All taxes are imposed at the national level. The standard corporate income tax (CIT) rate is 25%. Enterprises operating in the oil and gas industry will be subject to CIT rates ranging from 32% to 50%, depending on the location and specific project conditions. Enterprises engaging in prospecting, exploration, and exploitation of mineral resources (e.g. silver, gold, gemstones) are subject to CIT rates of 40% or 50%, depending on the project’s location.

There is no concept of tax residency for CIT. Business organisations established under the laws of Vietnam are subject to CIT and taxed on worldwide income. 25% CIT shall be applicable to foreign income. There are no provisions for tax incentives for such income.

Foreign organisations/individuals carrying out business in Vietnam without setting up a legal entity in Vietnam and/or having Vietnam-sourced income are considered foreign contractors, irrespective of whether the services are performed inside or outside Vietnam. Payments to foreign contractors are subject to foreign contractor withholding tax (FCWT), which consists of value-added tax (VAT) and CIT elements. See the Withholding taxes section for more information.

**Preferential rates**
Preferential CIT rates of 10% and 20% are available where certain criteria are met. See the Tax credits and incentives section for more information.

**Calculation of taxable profits**
Taxable profit is the difference between total revenue, whether domestic or foreign sourced, and deductible expenses (see the Deductions section), plus other assessable income.

Taxpayers are required to prepare an annual CIT return that includes a section for making adjustments between accounting profits and taxable profits.

**Local income taxes**
There are no local, state, or provincial income taxes in Vietnam.

---

**Corporate residence**
There is no concept of tax residency for CIT. Enterprises established under the law of Vietnam are subject to CIT in Vietnam. In addition, Vietnam has a broadly worded PE definition.
Permanent establishment (PE)
In Vietnam, a PE is defined as “a fixed place of business through which a foreign enterprise carries out part or the whole of its business or production activities in Vietnam and earns income. The permanent establishment of a foreign enterprise shall include:

- A branch, an operating office, a factory, a workshop, means of transportation, a mine, an oil and gas field, any place relating to the exploitation of natural resources in Vietnam.
- A building site; a construction, installation, or assembly project.
- An establishment providing services, including consultancy services, through its employees or other persons.
- An agent for a foreign enterprise.
- A representative in Vietnam where [one] has authority to sign contracts under the name of the foreign enterprise, or where [one] does not have authority to sign contracts under the name of the foreign enterprise but regularly delivers goods or provides services in Vietnam.”

Foreign enterprises with their PEs in Vietnam shall pay tax on the taxable income earned in Vietnam (irrespective of whether it relates to the PE) and on the taxable income generated out of Vietnam and related to operations of the PEs.

Where a treaty on avoidance of double taxation to which Vietnam is a signatory contains different provisions relating to PE, such treaty shall apply (see the Withholding taxes section for a list of countries with which such treaties exist).

Other taxes
Value-added tax (VAT)
VAT is applied to goods and services used for production, trading, and consumption in Vietnam (including goods and services purchased from non-residents), with certain exemptions. Depending on the category of goods or services, the VAT rates are as follows:

- A 0% rate applies to exported goods/services, including goods sold to enterprises in non-tariff zones, goods processed for export or in-country export, goods sold to duty free shops, certain exported services, construction and installation carried out for export processing enterprises, aviation, marine, and international transportation services.
- A 5% rate applies generally to areas of the economy concerned with the provision of essential goods and services. This includes clean water, fertiliser production, teaching aids, books, unprocessed foodstuffs, medicine and medical equipment, husbandry feed, various agricultural products and services, technical/scientific services, rubber latex, sugar and its by-products, and certain cultural, artistic, and sport services/products.
- The 10% 'standard' rate applies to activities not specified as exempt or subject to the 0% or 5% rate.

Activities not subject to output VAT
A separate category includes supplies not subject to output VAT, but related input VAT can, nevertheless, be claimed. This category includes the following:
Vietnam

- Goods and services provided outside Vietnam (including between two Vietnamese taxpayers), except for certain international transportation activities.
- Compensation, bonus, subsidies, transfers of emission rights, and other financial revenues.
- Certain services rendered by a foreign organisation that does not have a PE in Vietnam where the services are rendered outside of Vietnam, including repairs to means of transport, machinery, or equipment.
- Fixed assets that are transferred between a parent company and its subsidiaries, or between subsidiaries of the same parent company, and which are used for producing/providing VATable goods/services; capital contributions in the form of assets; transfers of assets between dependent units of the same company, or in the case of split/merger/restructuring.
- Collections of compensation/indemnities by insurance companies from third parties.
- Collections on behalf of other parties that are not related to the provision of goods/services (e.g. if company A purchases goods/services from company B but pays to company C, and, subsequently, company C pays to company B, then the payment from company C to company B is not subject to VAT).
- Commissions earned by (i) agents selling services, including postal, telecommunications, lottery, airlines/bus/ship/train tickets, at prices determined by principals; and (ii) agents for international transportation, airlines, and shipping services entitled to 0% VAT; or (iii) insurance agents.
- Commissions from the selling of exempt goods/services.

Exempt goods and services
There are stipulated categories of VAT exemptions, including transfer of land use rights, various financial services, capital assignments, certain types of insurance, medical services, education, printing/publishing, public transportation, export of unprocessed natural resources, etc.

When a supply cannot be readily classified based on the tax tariff, VAT must be calculated based on the highest rate applicable for the particular range of goods that the business supplies.

Taxpayers must file monthly VAT returns and remit the VAT payable no later than the 20th day of the following month.

Customs duties
Import duty rates are classified into three categories: ordinary rates, preferential rates, and special preferential rates.

Preferential rates are applicable to imported goods from countries that have most-favoured-nation (MFN, also known as normal trade relations) status with Vietnam. The MFN rates are in accordance with Vietnam’s World Trade Organization (WTO) commitments and are applicable to goods imported from other member countries of the WTO.

Special preferential rates are applicable to imported goods from countries that have a special preferential trade agreement with Vietnam.

Import duty exemptions are provided for encouraged projects and goods imported in certain circumstances.

Export duties are charged only on a few items, basically certain natural resources. Rates range from 0% to 40%.
Special sales tax (SST)
SST is a form of excise tax that applies to selected goods and services, such as alcohol, imported automobiles having less than 24 seats, motorcycles, airplanes, boats, petroleum, air-conditioners up to 90,000 British thermal units (BTU), cigarettes, playing cards, discotheques, massages, karaoke, casinos, gambling, golf clubs, and entertainment with betting and lotteries. For goods, SST is charged at the production or importation stage.

The SST rates are as follows:

<table>
<thead>
<tr>

Property taxes
The rental of land use rights by foreign investors (if not contributed as capital) is, in effect, a form of property tax. It is usually known as land rental, and the range of rates is wide depending upon the location, infrastructure, and the industrial sector in which the business is operating.

Stamp taxes
Certain assets, including houses, land, automobiles and motorcycles, etc., that are subject to registration of ownership are subject to stamp duty. The stamp duty rates vary depending on the asset transferred.

Production royalties
Production royalties in the form of a natural resource tax (NRT) are payable in industries exploiting natural resources, such as oil and gas, other minerals, forests, fisheries, and natural water. The tax rates vary depending on the natural resource being exploited, ranging from 1% to 40%, and are applied to the production output at a specified taxable value per unit. Various methods are available for the calculation of the taxable value of the resources, including cases where the commercial value of the resources cannot be determined.
Environment protection tax (EPT)

EPT is an indirect tax applicable to the production and importation of certain goods, including petroleum products. The tax is calculated as an absolute amount on the quantity of the goods.

The tax rates are as follows:

<table>
<thead>
<tr>
<th>Goods</th>
<th>Unit</th>
<th>Tax range (VND)</th>

* Excludes plastic bags used for packaging or that are ‘environmentally friendly’

Branch income

Branches of foreign entities are subject to the same CIT regime as entities incorporated in Vietnam.

Income determination

Inventory valuation

At present, there are no provisions for valuing inventories or determining inventory flows. The tax treatment follows the accounting treatment.

Asset revaluation

Gains from the revaluation of assets for the purposes of capital contribution or transfer upon division, demerger, consolidation, merger, or conversion of business are subject to 25% CIT.

Capital gains

Gains made by a foreign investor on the transfer of an interest (as opposed to shares) in a limited liability company are subject to 25% CIT. The assignee is required to withhold the tax due from the payment to the assignor and account for this to the tax authorities.

Gains earned by a foreign investor from selling securities (i.e. bonds, shares of public joint-stock companies, irrespective of whether they are listed or non-listed) are subject to CIT at a deemed rate of 0.1% of the sales proceeds. 25% CIT will apply to any gains earned by a foreign company (not incorporated in Vietnam) upon a sale of shares in a non-public joint-stock company.

Dividend income

Dividends received from investments in other companies in Vietnam are from after tax profits and are not subject to CIT.

Interest income

Interest income is subject to 25% CIT and is not entitled to tax incentives (including preferential tax rate and exemption/reduction).
**Other significant items**
The following other income items are subject to 25% CIT and are not entitled to tax incentives (including preferential tax rate and exemption/reduction):

- Income from transfer of real estate.
- Income from royalty, leasing of assets.
- Income from transfer of assets.
- Income from trading of foreign currency.
- Reversal of provisions, except for reversal of provisions for inventory devaluation, financial investment loss, bad debts, warranties, and salary.
- Collected written off debts.
- Unidentified payables.
- Difference between penalties and compensation for breaching economic contracts.
- Gain from the revaluation of assets.
- Income from the transfer of projects and the rights to exploit, explore, and process minerals.
- Income from selling scrap, which is not directly related to tax incentivised activities.
- Exchange gains on revaluation of payables denominated in foreign currencies at the end of the fiscal year.

**Foreign income**
Foreign income, under the domestic tax law, is subject to 25% CIT with tax credits available (see Foreign tax credit in the Tax credits and incentives section).

Foreign income shall be taxed when earned. There are no provisions for tax deferral or preferential tax rates for foreign income.

**Deductions**

**Depreciation and amortisation**
Tax depreciation may differ from accounting depreciation. Depreciation in excess of the rates specified in the regulations on tax depreciation is not deductible. These regulations specify maximum and minimum permissible effective lives for various classes of assets, including intangibles. Current straight-line tax depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rates (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2 to 16.67</td>
</tr>
<tr>
<td>Office equipment</td>
<td>10 to 20</td>
</tr>
<tr>
<td>Automobiles</td>
<td>3.33 to 16.66</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>5 to 33.33</td>
</tr>
<tr>
<td>Intangible assets</td>
<td>Not more than 5</td>
</tr>
<tr>
<td>Goodwill</td>
<td>33.33</td>
</tr>
</tbody>
</table>

**Start-up expenses**
Pre-establishment expenses (i.e., expenses for setting up a company) and certain expenses (i.e., training, advertising before establishment, costs for the research stage, relocation cost) can be amortised over a period of up to three years from the commencement of operations. In order for pre-establishment and pre-operating expenses to be deductible for CIT purposes, supporting documents to substantiate the
fact that these pre-operating expenses were necessarily and legitimately incurred for the establishment of the company should be available.

**Interest expenses**
Interest on loans corresponding to the portion of charter capital not yet contributed as scheduled is not deductible.

Interest on loans from non-economic and non-credit organisations exceeding 1.5 times the interest rate set by the State Bank of Vietnam is not deductible.

**Bad debt**
Provisions for bad debts are deductible if the provision is made in accordance with the guidance by the Ministry of Finance. Certain conditions must be satisfied in order to set up a provision for bad debts (e.g. the debts must be supported by original documentation, confirmation from clients of the overdue amounts, and that the debt is overdue under the terms of an economic contract). In the absence of satisfying the necessary conditions, the provision for bad debts will generally not be deductible until incurred and supported by invoices.

**Charitable contributions**
Donations are generally non-deductible, except certain donations for education, health care, natural disasters, or building charitable homes for the poor.

**Fines and penalties**
Administrative penalties and fines are specifically considered non-deductible.

**Taxes**
Creditable input VAT, CIT, and other fees/charges are not deductible for CIT purposes.

**Other significant items**
The following other expenditures are specifically stated to be non-deductible:

- Depreciation of fixed assets, which is not in accordance with the prevailing regulations.
- Employee remuneration expenses that are not actually paid or are not stated in a labour contract, collective labour agreement, or the financial regulations of the company.
- Life insurance premiums for employees that are not stated in a labour contract, collective labour agreement, or the financial regulations of the company.
- The portion of costs of raw materials, materials, fuel or goods that are used in excess of the reasonable consumption levels.
- Reserves for research and development (R&D) not in accordance with the prevailing regulations.
- Provisions for stock devaluation, bad debts, financial investment losses, product warranties, or construction work, which are not in accordance with the prevailing regulations.
- Advertising, promotion (except certain items), conferences/parties, commissions, and prompt payment discounts exceeding 10% of total other deductible expenses (this cap is increased to 15% for newly-established enterprises for the first three operating years).
- Unrealised foreign exchange gain/losses due to the revaluation of foreign currency items other than account payables at the end of a financial year.
- Management expenses allocated to PEs in Vietnam by the foreign company’s head office, which are not in accordance with the regulations.
For certain businesses (e.g. insurance companies, securities trading, lotteries), the Ministry of Finance provides specific guidance on deductible expenses for CIT purposes.

**Net operating losses**
Losses may be carried forward fully and consecutively for a maximum of five years. Carryback of losses is not permitted.

**Payments to foreign affiliates**
There are no special restrictions on the deductibility of royalties, loan interest, and service fees paid to foreign affiliates (except for those paid by branches). However, the payment must be defensible on an arm's-length basis as required by transfer pricing regulations (see Transfer pricing in the Group taxation section). Certain contracts for the transfer of technology and foreign loans must be registered with the competent authorities.

**Group taxation**
There is no provision for any form of consolidated filing or group loss relief in Vietnam.

**Transfer pricing**
Vietnam has transfer pricing regulations that outline various situations where transactions will be considered as being between related parties and the mechanisms for determining the market ‘arm's length’ transaction value (e.g. comparable uncontrolled price, cost plus, resale price, comparable profits, and profit split).

Under the wide ranging definition of associated parties, the control threshold is lower than in many other countries (20%), and the definition also extends to certain significant supplier, customer, and funding relationships between otherwise unrelated parties.

Compliance requirements include an annual declaration of related party transactions and transfer pricing methodologies used, which is required to be filed together with the annual CIT return.

Companies that have related party transactions must prepare and maintain contemporaneous transfer pricing documentation.

**Thin capitalisation**
There are no thin capitalisation requirements in the tax legislation. However, the level of permitted debt funding will be limited by virtue of licensing requirements. The maximum amount of debt funding is the difference between the licensed investment capital and charter capital.

**Tax credits and incentives**

**Foreign tax credit**
In respect of Vietnamese enterprises earning income from overseas investment, CIT (or a kind of tax with a nature similar to CIT) paid in a foreign country or paid on behalf by its partner in the country receiving the investment (including tax levied on the dividend) is allowed to be creditable. The credit shall not exceed the CIT amount payable in Vietnam.
Vietnam

The foreign income tax that is entitled to exemption or reduction in accordance with the foreign law shall also be credited.

Inbound investment incentives
Tax incentives are granted based on regulated encouraged sectors and difficult socio-economic locations. The sectors that are encouraged by the Vietnamese government include education, health care, sport/culture, high technology, environmental protection, scientific research, infrastructural development, and computer software manufacturing.

The two preferential rates of 10% and 20% are available starting from the commencement of operating activities. When the preferential rate expires, the CIT rate reverts to the standard rate.

Criteria for preferential tax rates are as follows:

- 10% tax rate for 15 years shall be applied to the newly-established enterprises that:
  - operate in regions with specially difficult socio-economic conditions, in economic zones, and high technology zones
  - invest in high technology, science research and technology development, development of water plants, power plants, water supply, and drainage systems; bridges, roads, railways; airports, sea ports, river ports; airfields, stations, and other especially important infrastructure facilities decided by the Prime Minister, or
  - invest in production of computer software.

- 10% tax rate for the duration of operations is available for the income earned from activities in the fields of education/training, vocational training, public health, culture, sport, and environment (socialised fields).

- 20% tax rate shall be applied for ten years to new enterprises established from investment projects in regions with difficult socio-economic conditions.

- 20% tax rate for the duration of operations is available for the income earned from agricultural service cooperatives and people's credit fund.

Tax holidays
Investors may be considered for tax holidays and reductions. The holidays take the form of a complete exemption from CIT for a certain period beginning immediately after the enterprise first makes profits, followed by a further period where tax is charged at 50% of the applicable rate. However, where the enterprise has not derived profits within three years of the commencement of operations, the tax holidays/tax reduction will start from the fourth year of operation. Criteria for eligibility to these holidays and reductions are set out in the CIT regulations as follows:

- Four years of tax exemption and nine subsequent years of 50% reduction shall be applied to the newly-established enterprises that:
  - operate in regions with specially difficult socio-economic conditions, in economic zones, and high technology zones
  - invest in high technology, science research and technology development, development of water plants, power plants, water supply, and drainage systems; bridges, roads, railways; airports, sea ports, river ports; airfields, stations, and other especially important infrastructure facilities decided by the Prime Minister
  - invest in production of computer software, or
  - operate in the socialised fields and in regions with difficult or especially difficult socio-economic conditions.
• Four years of tax exemption and 50% tax reduction for five subsequent years shall be given to new enterprises operating in the socialised fields and in regions not included in the list of regions with difficult or especially difficult socio-economic conditions.
• Two years of tax exemption and four subsequent years of 50% reduction shall be applied to newly-established enterprises operating in regions with difficult socio-economic conditions.

**Employment incentives**
Additional tax reductions may be available for engaging in manufacturing, construction, and transportation activities that employ several female staff and/or ethnic minorities. CIT reduction must correspond with the actual payment for those employees.

**Research and Development (R&D) Fund**
Business entities in Vietnam are allowed to set up a tax deductible R&D Fund. Enterprises can appropriate up to 10% of annual profits before tax to the fund. Various conditions apply.

**CIT reduction and deferral**
Eligible small and medium size enterprises (SMEs, as regulated) and labour intensive enterprises engaged in (i) production and processing of agriculture products, forestry and aquatic products, textiles and garments, footwear and electronic components; and (ii) construction/installation of certain infrastructure projects (e.g. water, power, roads, railroads, airports, hospitals, schools) can be entitled to 30% CIT reduction and enjoy a one year deferral of 2012 CIT payments.

In addition, there is a three-to-six-month deferral of CIT payments for the first, second, and third quarter of 2013 for enterprises that:

• use less than 200 employees and have annual revenue up to VND 20 billion
• are labour intensive enterprises in certain sectors as mentioned above, or
• are engaged in investing, selling, and leasing of houses.

However, the incentives are not provided for enterprises earning profits from lotteries, property trading, securities business, finance, banking, insurance or goods/services subject to special sales tax; SMEs belonging to State Economic Groups and classified as first or special rank; and SMEs that are majority owned by a holding company that is not an SME. In addition, 30% CIT reduction is not allowed to profits from the exploitation and processing of minerals.

**Withholding taxes**

**Interest**
The interest withholding tax (WHT) applied to payments to an overseas lender is 5%. Interest on pre-1999 loans may be exempt from WHT. Offshore loans provided by certain government or semi-governmental institutions may obtain an exemption from the interest WHT where a relevant double taxation agreement (DTA) or Inter-Government Agreement applies.

Interest earned from bonds (except for tax-exempt bonds) and certificates of deposit are subject to 5% WHT. The sale of bonds and certificates of deposits are subject to deemed tax of 0.1% of the gross sales proceeds.
Vietnam

**Royalties, licence fees, etc.**
A 10% royalty WHT applies in the case of payments made to a foreign party for transfers of technology, unless the transfers are contributed as part of legal capital (akin to equity). Transfers of technology are defined very broadly. Certain contracts for the transfer of technology must be registered with the competent authorities.

**Management fees and head office charges**
WHT applies on management fees and head office charges at the rates applicable to services (*see below*).

**Payments to foreign contractors**
FCWT on payments to foreign contractors applies where a Vietnamese contracting party (including a foreign-invested enterprise incorporated in Vietnam) contracts with a foreign party that does not have a licensed presence in Vietnam, irrespective of whether the services are provided in Vietnam or overseas.

Foreign contractors can apply to be deduction-method VAT payers if they adopt the Vietnamese accounting system. If accounting records are adequate, the foreign contractor will pay CIT on actual profits, but otherwise on a deemed-profit basis.

For direct (non-deduction-method) foreign contractors, VAT and CIT will be withheld by the contracting party at a deemed percentage of taxable turnover. Various rates are specified according to the nature of the contract performed. For CIT, the WHT rate varies from 0.1% to 10%. For VAT, the effective WHT rate can also range from 3% to 5%. The VAT withheld by the contracting party is an allowable input credit in its VAT return.

A summary of VAT and CIT WHT rates follow:

<table>

**Notes**

1. On the basis that import VAT is paid.

**Cross-border leases**

A Vietnam-based lessee is required to withhold tax from payments to an offshore lessor. 5% VAT and 5% CIT is applicable to the rental charge if it is an operating lease. If it is a finance lease, the interest portion will be exempt from VAT and subject to 10% CIT.

**Tax treaties**

The above WHT rates may be affected by a relevant DTA.

**Notes**

1. The treaty is not yet in force.
2. In some cases, the limits set by the treaty are not lower than the present withholding rate under domestic law. Therefore, the domestic rates will apply.
3. Interest derived by certain government bodies is exempt from WHT.
4. Royalty WHT rates vary for certain types of royalties.

---

**Tax administration**

**Taxable period**

The standard tax year is the calendar year. However, different accounting year-ends can be used if approval is obtained from the authorities.
**Tax returns**
The annual final CIT return and the audited financial statements must be filed within 90 days from the end of the financial year.

**Payment of tax**
CIT shall be declared and paid provisionally on a quarterly basis (based on actual revenues and expenses of each quarter). Quarterly CIT returns and payment must be made no later than the 30th day of the next quarter.

Final payment of CIT is due with the final CIT return (i.e. the 90th day of the following financial year).

**Penalties**
There are detailed regulations setting out penalties for various tax offences. These range from relatively minor administrative penalties to tax penalties amounting to various multiples of the additional tax assessed.

In practice, imposition of penalties has been arbitrary and inconsistent. However, in recent periods there has been a much tougher stance adopted by the tax authorities. Hence, where tax is paid late (e.g. as a result of a tax audit investigation), there is a significant likelihood of penalties being imposed. Notably, where tax adjustments are made at a tax audit, any resulting additional taxable profits are not eligible for any CIT incentives to which a company may be entitled.

**Tax audit process**
Tax audits are carried out regularly and often cover a number of tax years. Prior to an audit, the tax authorities send the taxpayer a written notice of time and scope of the audit inspection.

**Statute of limitations**
The general statute of limitations for imposing tax administration penalties is two years.

**Topics of focus for tax authorities**

**Transfer pricing**
Transfer pricing is commonly discussed in the press, and the enterprises that are attracting the attention of the tax authority are generally multinational companies that have many inter-company transactions, have reported losses for many years, and/or are expanding businesses.

**Documentation of expenses**
The tax authorities are strictly reviewing the documentation of expenses, including contracts, invoices, evidence of work done/benefit received, etc. Insufficient documentation is resulting in disallowance of input VAT credit/refund and CIT deductibility.

**FCWT on supply of goods**
The customs authority has been requested to provide the tax authority with information of companies engaged in in-country import/export transactions in an effort to collect under-declared FCWT arising from these transactions. In addition, there are some tax rulings issued by the tax authority stating that existence of a warranty clause in a contract for the supply of goods by foreign suppliers, irrespective of whether the warranty services have been actually provided, creates an FCWT exposure.
Vietnam

Secondment arrangements
We have seen the tax authority seek to impose FCWT on reimbursements of expatriate remuneration costs by Vietnamese entities. Companies need to ensure that supporting documents are available to show amounts have been reimbursed at cost.

Other issues

Foreign investment restrictions
In several fields, foreign investment will not be licensed or will only be licensed under special conditions. The List of Conditional Investment Sectors include television, production and publishing cultural products, telecommunication, transportation by all means, cigarette production, exploring and processing natural resources, real-estate business, education, and medical services and distribution.

Exchange controls
All buying, selling, lending, and transfer of foreign currency needs to be made through credit institutions and other financial institutions authorised by the State Bank of Vietnam (SBV).

Outflow of foreign currency by transfer is authorised for certain transactions, such as payments for imports and services abroad, refund of loans contracted abroad and payment of interest accrued thereon, transfer of profits and dividends, and revenues from transfer of technology.

All monetary transactions in Vietnam must be undertaken in Vietnamese dong. Exceptions are applicable to payments for exports made between principals and their agents, and payments for goods and services purchased from institutions authorised to receive foreign currency payments such as for air tickets, shipping and air freight, insurance, and international communications.

Forms of doing business
According to the Law on Enterprises, a foreign-invested enterprise may be established as either a single member limited liability or a limited liability with more than one member, a joint-stock company, or a partnership.

Intellectual property
Intellectual property rights are protected by the Civil Code (1995 and 2005), the Law on Intellectual Property (2005), and a host of subordinate legislation.

Vietnam is signatory to the Paris Convention, the Madrid Agreement on International Trademark Registration, and the Patent Cooperation Treaty and is a member of the World Intellectual Property Organisation. Vietnam has entered into an agreement on copyrights with the United States (US). According to the Vietnam-US Bilateral Trade Agreement, Vietnam is further under the obligation to adhere to the Berne Convention.
Significant developments

Zimbabwe's annual budget presentation was held on 15 November 2012 by the Minister of Finance, the Honorable Tendai Biti, and the proposed changes have been promulgated into law.

The announcements relating to corporate tax can be summarised as follows.

Customs duties
Minor adjustments were made to some tariffs in order to protect local producers.

Corporate income tax (CIT)
There have been no significant CIT developments in Zimbabwe during the past year. A new draft Income Tax Act has been published that is expected to commence in January 2014. While significant changes have been included in the draft legislation, it has been made public in order to seek comment, and some adjustments are bound to be made. The major changes are discussed under the appropriate headings in this summary.

Taxes on corporate income

The corporate tax rate for companies (other than mining companies with special mining leases, but including branches) continues at 25.75%. This rate includes a base rate of 25% plus a 3% AIDS levy.

Zimbabwe presently operates on a source-based tax system. This means that income from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe unless a specific exemption is available. The specific circumstances of a transaction should always be considered to determine whether the transaction gives rise to taxation in Zimbabwe.

Income earned by foreign companies from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe. In such a case, one should determine whether the foreign entity is obligated to register a local entity. A company is required to register a branch if it has established a place of business or is otherwise considered to be trading in Zimbabwe. A local subsidiary company may be registered as an alternative to a branch operation.

Non-residents who do not have a place of business in Zimbabwe may, however, be subject to withholding tax (WHT). See the Withholding taxes section for additional details.
Note that Zimbabwe is currently considering a move to a residence-based tax system. In addition, profits on the disposal of ‘business property’ (which are currently taxed under the Capital Gains Tax Act) are to be brought into business income. These concepts are included in the planned changes in the draft legislation that is due to become effective in January 2014.

**Local income taxes**
There are no local income taxes payable in Zimbabwe.

**Corporate residence**
Currently, the Zimbabwean tax system is based on source and not on residency. Zimbabwe is moving towards a residence-based taxation system, but the details are still to be announced. Income derived, or deemed to be derived, from sources within Zimbabwe is subject to tax. Under the proposed new legislation, the place of effective management concept may be used for a residence-based tax.

Source is the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Zimbabwe, the source of income is deemed to arise in Zimbabwe, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Zimbabwe may, in the hands of a domestic company, be deemed to arise in Zimbabwe and be taxed as such. Examples include interest and certain copyright royalties arising outside Zimbabwe. Where the income is deemed to be from Zimbabwe, relief of the foreign tax suffered, up to a maximum of the Zimbabwe tax, may be allowed as a tax credit.

**Permanent establishment (PE)**
In the event that Zimbabwe has entered into a double taxation agreement (DTA) with the country where the foreign company resides, the entity will only be taxable in Zimbabwe if it operates through a PE, which, in most cases, includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered. If a PE exists, only the portion of the income attributable to the PE will be subject to tax in Zimbabwe.

Otherwise, and except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance.

**Other taxes**

**Value-added tax (VAT)**
VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions. Advice on VAT implications of specific transactions related to corporate operations should be obtained prior to execution of transactions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Zimbabwe that involves the supply of goods or services for consideration.
VAT is payable on all imports for home consumption into Zimbabwe, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated). Import VAT is payable on the import value plus the applicable customs duty.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard-rated and zero-rated supplies) exceed 60,000 United States dollars (USD) in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may only be deducted as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due by the 25th day following the month to which the VAT relates.

It is mandatory for all registered operators with an annual turnover exceeding USD 240,000 to use electronic fiscal registers (EFRs) that can be linked to the Zimbabwe Revenue Authority (ZIMRA). Penalties of up to USD 25 per day per point of sale may be imposed.

**Customs duties**

Zimbabwe is a member of the Southern African Development Community (SADC) as well as the Common Market for Eastern and Southern Africa (COMESA). Customs duties are payable according to the general customs tariffs that are legislated for in Zimbabwe. Preferential duty rates apply on imports from SADC or COMESA countries, while goods may be imported free of customs duties from Namibia in terms of the Zimbabwe-Namibia Free Trade Agreement.

25% surtaxes have been imposed on a number of imported goods (including footwear, clothing, and certain foodstuffs) in order to protect the local manufacturing sector.

A security deposit is required by Customs on all temporary importations to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs' bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

**Excise duties**

Excise duties are levied on local production of excisable products and are included on most excisable products imported from other countries. Examples of the excise products and applicable rates include the following:

- Cigarettes: 40% + USD 7 per 1,000 sticks.
- Spirits: USD 2 per litre.
- Wine: USD 0.50 per litre.

Excise and fuel levies are also levied on petrol, diesel, and illuminating kerosene.
Property taxes
Property taxes are levied by cities, towns, and rural councils. Each of these bodies conducts periodic valuations of the properties in their area and annually set out a ‘rates schedule’ based on a percentage of the valuations. These may alter each year depending upon the entities budgetary requirements for funds. Valuations of the properties are usually based on estimates as there are very few qualified property valuators operating in Zimbabwe at present.

Transfer duty
Transfer duty is payable on the acquisition value of property purchased at the following rates:

<table>
<thead>
<tr>
<th>Value of the property (USD)</th>
<th>Rate of transfer duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 5,000</td>
<td>USD 400</td>
</tr>
<tr>
<td>5,001 to 20,000</td>
<td>2% of the value above USD 5,000</td>
</tr>
<tr>
<td>20,001 to 50,000</td>
<td>3% of the value above USD 20,000</td>
</tr>
<tr>
<td>50,001 and above</td>
<td>4% of the value above USD 50,000</td>
</tr>
</tbody>
</table>

Transfer duty is normally payable by the buyer, but the agreement for the sale of the property will determine the person liable to pay these costs. In addition, conveyance costs of up to 3% (plus 15% VAT) must be added on.

Stamp duty
Certain transactions may attract stamp duty. The amount of stamp duty payable will differ and will be based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

<table>
<thead>
<tr>
<th>Transaction</th>
<th>Stamp duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bonds</td>
<td>0.4% (USD 0.40 for every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes - purchase of securities</td>
<td>0.25% (USD 0.25 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes - purchase/sale of any movable property other than a security</td>
<td>0.10% (USD 0.10 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes - purchase/sale of any immovable property</td>
<td>1% (USD 1.00 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Off market share transfer instruments</td>
<td>2% or USD 2</td>
</tr>
<tr>
<td>Cheques</td>
<td>0.05% (USD 0.05)</td>
</tr>
</tbody>
</table>

Tax advice should be obtained for major transactions in respect of the transactions mentioned above in order to ensure that the correct stamp duty implications are considered.

Capital gains tax
It should be noted that capital gains tax is payable in Zimbabwe on the disposal of immovable property or shares that are held in listed (on the Zimbabwean Stock Exchange) or unlisted companies at the following rates:
Acquired pre-February 2009

- Listed securities: 1% of proceeds.
- Property: 5% of proceeds.
- Unlisted securities: 5% of proceeds.

Acquired post-February 2009

- Listed securities: 1% of proceeds.
- Property: 20% of capital gain.
- Unlisted securities: 20% of capital gain.

Profits arising from the sale or disposal of ‘business property’ are to be taxed under the Income Tax Act after the laws are altered on 1 January 2014.

**Payroll taxes**

Zimbabwe operates a pay-as-you-earn (PAYE) system that is called the ‘Final Deduction System’ (FDS). This is based on the presumption that all employers must register for PAYE (both local and foreign-based employers), and that they are responsible for calculating, collecting, and paying the correct amount of PAYE every month to ZIMRA. Tax audits are carried out periodically (every year or two) to test the payroll systems.

The full burden of collecting the correct tax is placed on the employer, and, because of this, there is no requirement for employees to file annual tax returns in respect of employment income.

**Branch income**

Branch income that is received or has accrued from a source within, or deemed to be within, Zimbabwe is taxable in Zimbabwe in terms of the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may therefore not deduct fees paid to its foreign head office (unless a tax treaty makes provision for such deduction) as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

A 15% WHT is imposed on any payments made in respect of head office charges.

The amount of fees charged by the head office to the Zimbabwe branch is also subject to a limitation, usually based on a maximum of 1% of total expenditure (excluding the charge itself and any capital allowances). Exchange control regulations also limit the remittability of administration and management fees to 2% of turnover.

Note that the move from a source-based system to a residence-based system may affect the level of profits that are attributed to Zimbabwe.

**Income determination**

The Zimbabwe Income Tax Act (Act) tax base for CIT is taxable income rather than profits. The source and nature of the income determines whether the amount is taxable...
Zimbabwe

or not. In addition to amounts received or accrued from actual Zimbabwean sources, there are deeming provisions that bring income from foreign sources into Zimbabwean taxable income.

In general, all receipts from a Zimbabwe source are taxed, excluding amounts that are proven by the taxpayer as being capital receipts. Most expenditure items and some specified exemptions are deductible against income. Capital expenditure is generally not deductible, with amounts on specific items being deductible by way of annual allowances spread over a period.

As previously indicated, Zimbabwe is moving to a residence-based tax system in order to expand the tax revenue base.

**Inventory valuation**
The legislation permits three methods of inventory valuation: historic cost, cost of replacement, or net realisable value. Standard cost based on first in first out (FIFO) is normally used for accounts valuations and is an accepted basis for tax purposes. Last in first out (LIFO) is not permitted for tax or for accounting purposes. The tax valuation may differ from the accounting valuation; this is a rare occurrence in Zimbabwe but is acceptable.

**Capital gains**
See Capital gains tax in the Other taxes section.

**Dividend income**
Dividends received from Zimbabwe incorporated companies are tax exempt. When received from non-Zimbabwe companies, they are taxed at a flat rate of 20%; however, relief is granted by allowing any foreign tax suffered as a tax credit.

**Interest income**
Interest accruing from ‘financial institutions’ is subject to a 15% WHT and thereafter is exempt from CIT (the WHT becomes a final tax). Interest from other local or foreign sources is included in gross income and is taxed at the normal CIT rate. Relief will be granted for any foreign tax paid, up to the maximum Zimbabwe tax rate.

**Partnership income**
The partnership itself is not taxed directly; however, the taxable income of the partnership is calculated in the same way as corporate income and is then allocated amongst the partners in accordance to their agreed profit sharing ratios. This income is taxed in their hands at the basic CIT rate.

**Rent/royalties income**
Rents and royalties are generally treated as normal taxable income and are taxed at the basic CIT rate. Rent arising in respect of land and buildings situated outside of Zimbabwe, however, is exempt from local tax.

**Foreign income**
Where income (including business profits) is deemed to be from a Zimbabwe source, it will form a part of the local company's taxable income and will be subject to tax at the basic CIT rate. Relief in respect of foreign taxes suffered will be granted unless it is clear that the true source of the income is, in fact, Zimbabwe.
Corporations need to examine their Zimbabwe tax status after the proposed new Income Tax Act, which includes a residence-based tax system, comes into operation on 1 January 2014.

**Deductions**

The Act makes provisions for specific deductions. Some of the deductions, such as the deduction of foreign exchange losses, development and exploration costs, hire purchase allowances, and manufacturing allowances can be more complex.

**Capital allowances**

The cost (including finance charges) of machinery, implements, and other articles used by the taxpayer in the production of income is deductible in four equal annual allowances. No apportionment is required where the asset was held for less than 12 months.

Industrial buildings (including hotels) constructed and used by the taxpayer in the production of income qualify for an initial allowance of 25% of construction cost in the year they enter service. Thereafter, an annual allowance of 25% is deductible for each year following the year of construction. Additions to existing buildings (not alterations or repairs) qualify for the same deductions. It is important to note that the allowance is calculated on the cost of construction and not the cost of acquisition. In the latter case, the allowances are set at 5% of the cost.

A mining exploration expenditure incurred before commencement of production is deductible in full in the first year of production against income derived from the mine. Subsequent development expenditure is presently written off in the year expended. Note that this aspect of Zimbabwe’s mining legislation is currently under review.

Capital allowances may also be deducted with respect to patents, trademarks, and leasehold improvements.

A recovery or recoupment of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recouped by way of disposal. The recoupment is presently calculated on the capital allowances previously granted.

**Goodwill**

Goodwill is currently not deductible for tax purposes in Zimbabwe.

**Start-up expenses**

Start-up expenses may be deducted if incurred within 18 months of commencement of business and not considered to be capital in nature.

**Interest expenses**

Zimbabwe has thin capitalisation rules based on a 3:1 debt-to-equity ratio. A portion of the overall interest may be disallowed if this ratio is exceeded.

**Bad debt**

Bad debts written off may be claimed, but not a provision for bad debts.
Charitable contributions
Donations (with varying maximum limits) made to specified charities and educational bodies may be claimed.

Entertainment expenses
Entertainment expenses are not deductible for tax purposes.

Fines and penalties
Fines and penalties are not deductible for tax purposes.

Taxes
Taxes are generally not allowed as a deduction against income unless they form a part of a cost of an allowable expense (e.g. VAT incurred on an expense line that may not be claimed as input tax).

Net operating losses
Assessed tax losses may be carried forward (but not backwards) for up to six years, provided the company continues to trade. This restriction does not apply to mining companies. Tax laws do not allow for losses to be transferred to other group companies, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

Assessed losses are reduced in the event of a compromise agreement with creditors.

Payments to foreign affiliates
The law prohibits the deduction of amounts incurred in excess of specified limits in respect of management and general administration expenses, as well as interest. This applies to branches or subsidiaries of both local and foreign companies.

The limit on management and general administration expenses is based on such expenses exceeding 1% and 0.75%, respectively, for a company already in production and prior to production of total tax-deductible expenses.

Group taxation
No taxation of combined operations is allowed in Zimbabwe, including where operations are conducted by more than one company.

Transfer pricing
No detailed transfer pricing legislation is currently in place in Zimbabwe. The law does, however, allow the Commissioner General to substitute a new sales price for a transaction in which the Commissioner General considers the declared sales price to be too high or low.

Effective 1 January 2014, transfer pricing legislation is to be introduced under a provision titled ‘tax avoidance’. This draft legislation does not detail any parameters that corporations should follow, nor has ZIMRA issued any practice notes.

Thin capitalisation
The limit on the deductibility of interest is based on a company incurring interest charged by a subsidiary, a fellow subsidiary, or a holding company when the debt-to-equity ratio exceeds 3:1.
### Tax credits and incentives

It has been announced by the Minister of Finance that Zimbabwe is moving away from taxation incentives; however, the following are still available.

Note that this is a high-level summary, and certain conditions should be met in order to utilise these incentives.

<table>
<thead>
<tr>
<th>Person for whom incentive is available and duration of incentive</th>
<th>Tax incentive</th>
<th>Tax treatment for normal taxpayers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Taxpayers operating at designated growth point areas.</td>
<td>The capital allowance is calculated as 25% of the cost of construction of a commercial or industrial building in growth point areas in the year when the building enters service and 25% during the three years that follow the year of construction.</td>
<td>Capital allowances are calculated as 25% of the cost of construction of industrial building in the year when the building enters service and 25% during the three years that follow the year of construction.</td>
</tr>

### Foreign tax credit

Where foreign income is taxed in Zimbabwe, a tax credit (limited to the amount of local tax suffered) will be set off against the local tax liability.

### Withholding taxes

WHTs are applicable where dividends and royalties or similar payments are declared or distributed to non-Zimbabwean residents (and Zimbabwean residents in some instances).
Zimbabwe

**Dividends**
Dividends declared by a Zimbabwean company to a non-resident holding company will be subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 15% unless treaty relief is available. Dividends from companies listed on the Zimbabwe Stock Exchange have a rate of 10%. NRST is payable within ten days after declaration of the dividend.

**Royalties or similar payments**
WHT on royalties are payable once a Zimbabwean company pays a royalty to a non-Zimbabwean resident. WHT is levied at a rate of 15% and is payable within ten days of the date of payment. The WHT falls due upon accrual (i.e. when payable), and actual payment is not a factor.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula or process, or any other property or right of a similar nature. It also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Zimbabwe. The nature of the amount payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

**Fees**
Fees are defined to include amounts that are technical, managerial, administrative, or consultative in nature; costs are paid externally. There are some exceptions, but the definition is broad and brings in most costs that may be charged to a Zimbabwean person.

WHT is levied at a rate of 15% and is payable within ten days of the date of payment.

**Interest**
WHT of 15%, calculated on the gross amount of interest, is payable on interest accruing to any person resident in Zimbabwe. This applies to interest arising from a registered banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Non-resident investors, however, are currently exempt from any WHT on interest.

Under the provisions of the new draft Income Tax Act, it appears that a 10% WHT will be re-introduced on interest paid by financial institutions that are registered in Zimbabwe.

**Summary of WHT payable**
The non-residents WHT rates and treaty relief for Zimbabwean DTAs can be summarised as follows. It should be noted that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, royalties, and interest in the various treaties should also be considered.

* Applies to unlisted companies. The rate for companies listed on the Zimbabwe Stock Exchange is reduced to 10%.

** Resident persons have a 15% WHT on interest arising from financial institutions. Interest from other sources is taxed at the corporate tax rate.

‘N/A’ means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Zimbabwean rate. It should be noted that a treaty can only provide tax relief and cannot impose a higher tax rate.

These are payable within ten days of the date of distribution or accrual.

Zimbabwe has either negotiated, or is currently negotiating, tax treaties with the following countries:

- Botswana
- Democratic Republic of the Congo
- Indonesia
- Iran
- Jamaica
- Namibia
- Serbia and Montenegro
- Seychelles
- South Africa
- Tanzania
- Tunisia
- Zambia

### Tax administration

#### Taxable period

The tax year-end is 31 December each year. Applications may be made for a different year-end if good reasons are given (e.g. to comply with the international group year-end). In the first year of trade, a longer or shorter period than 12 months may be accepted to tie in with a future year-end.

#### Tax returns

The CIT return is due by 30 April in the following tax year.

#### Payment of tax

Zimbabwe regulates the payment of CIT on four dates during the course of the current tax year; these are referred to as Quarterly Payment Dates (QPDs). The first payment of 10% is due by 25 March of the respective tax year. The second payment of 25% is due by 25 June of the respective tax year. The third payment of 30% is due by 25 September of the respective tax year. The fourth payment of 35% is due by 20 December of the respective tax year.
Zimbabwe

All taxes are expected to have been paid by the 25th day of December. If there is an adjustment after the year-end accounts have been finalised, a top-up payment must be made. There is no set date for this. However, in practice, this payment should not be more than 10% of the annual tax liability. ZIMRA often imposes a 10% per annum interest charge on any underpayments of QPDs.

WHT payments are due within ten days from the date of distribution or accrual.

**Tax audit process**
Tax audits do not, at present, have a set cycle; however, the aim is to establish a three year cycle in the future.

**Statute of limitations**
The statute of limitations is generally three years unless ZIMRA considers that there is fraud or misrepresentation involved. In those circumstances, there is no set limit on how far back ZIMRA can go, but they usually do not go beyond six years in practice.

**Topics of focus for tax authorities**
ZIMRA is focused on ensuring that all compliance issues are in order and that VAT and payroll taxes have been correctly calculated.

**Anti-avoidance**
Current Zimbabwe legislation contains basic anti-avoidance sections that empower the Commissioner General to disregard the implications of a transaction or scheme if it can be proven that:

- such a transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Zimbabwe Income Tax Act
- it was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or
- it has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question.

The Commissioner General may, at the Commissioner General's sole discretion, impose this legislation on any transaction or scheme, which will place the burden of proof on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

Note that the anti-avoidance sections are being altered in the new proposed tax legislation that is due to commence on 1 January 2014. No practice notes have been issued, nor have any basis that will be followed (e.g. the OECD system).

**Other issues**

**Exchange control**
Zimbabwe has been operating a multi-currency system since February 2009. The Zimbabwe dollar (ZWD) was demonetarised effective April 2009. This has had a significant impact on the country's exchange control regulations.
The Exchange Control Handbook in Zimbabwe is not available to the public; only banking institutions have access to these regulations.

Transactions that involve the transfer of funds to countries outside Zimbabwe are generally subject to bank approval.

The issue of shares in a Zimbabwe company to persons residing outside of Zimbabwe requires specific exchange control approvals. Under recent legislation, a limit of 49% is available for non-residents. A 51% local shareholding by indigenous persons is a requirement. Applications may be made for increased levels; each case will be decided on its own merits.
Global Tax Contacts
The increasing tax burden is one of the most important concerns of CEOs\(^1\), driving the adoption of proper internal controls and robust financial reporting processes to satisfy tax authorities, regulators, and other stakeholders. At the same time, tax authorities worldwide are concerned with ensuring both increased compliance amongst taxpayers, and that their fiscal policies are not overtaken by global business and economic developments.

\(^1\) CEO Survey 2013
PwC is the leading provider of tax services worldwide, both in terms of the size and scope of our tax practice and our reputation². Clients engage us because we combine a strong understanding of their business and economic environments with specialist tax knowledge in hundreds of national and local jurisdictions across the globe. As tax codes become increasingly complex and tax planning more controversial, we help companies to:

- identify and reduce tax risks
- understand and meet their compliance obligations
- implement tax strategies that complement their business and operational objectives
- resolve disagreements with tax authorities when they arise, and
- manage tax accounting and reporting issues and design of best in class tax functions.

The advice we provide to clients is based on our Global Tax Code of Conduct, which guides the way as we help organisations think through the legal basis for their planning and the reputational issues that may result. In difficult economic times when companies are focused on paying their fair share of taxes as efficiently as possible and governments need to collect the maximum amount of tax revenue, we look forward to being a productive participant in these discussions.

We take pride in our role as an essential and productive part of global tax administration and compliance. Our policy specialists advise regulators, governments, corporations, and supra-national bodies worldwide on the technical and practical aspects of developing and implementing tax policy initiatives. We lead the debate with tax authorities and governments around the world, changing the way we all think about tax.

² The Global Tax Monitor recognises PwC as the leading tax adviser globally, by reputation, with a very strong lead over the competition. These results are based on the Q4 2012 figures, with a sample size of 3,653 primary buyers of tax services globally.
Governments enact laws and enter into treaties with other nations so as to determine how companies and other taxpayers should be taxed. These laws are then interpreted by taxpayers, taxing authorities, and, ultimately on occasion, by the Courts.

It is a general principle that taxpayers have a legal right to manage their tax affairs provided they act within these laws. However, the global nature of the business world together with the complexity and competing priorities of national laws are such that it is not always clear where lines should be drawn. Accordingly, the member firms of the PwC Network have adopted the following Code of Conduct to assist their clients, other stakeholders, and their respective partners and staff.

**What PwC firms do**

The main business objective of the tax practices of PwC firms is to support their clients to:

- understand and comply with their legal and regulatory obligations for taxation
- plan their affairs so as to be tax efficient in the business or, where the client is not a business, financial decisions they make, and
- manage the tax risks they face. These include their compliance obligations and, in the case of businesses, corporate governance and tax related financial accounting risks centred on relevant internal controls and appropriate financial reporting.

**Who PwC firms should act for**

PwC firms should only work with clients that generally seek to demonstrate high standards of legitimacy and integrity in their business and financial activities. Before accepting clients, and in continuing to work with existing clients, PwC firms should look to satisfy themselves that the client intends to seek to comply with their legal and regulatory obligations in relation to taxation. In this regard, we should pay particular attention to all of the following:

- The reputation of the client and the conduct of its/their activities.
- Understanding who is behind the client, in terms of control, influence, and the legitimacy of any financial interests or funding.
- The integrity and reliability of management/individuals, including their responses following situations in which actions may have fallen below the appropriate standards.
- Relevant ethical, professional, and regulatory requirements.
- Other relationships and potential conflicts of interest.
**Tax Code of Conduct for the Global PwC Network**

*How PwC firms should act*

PwC firms should:

- act in accordance with local laws and regulatory requirements
- give proper disclosure as required by those laws or requirements
- strive to apply the highest possible technical standards, and
- comply with professional standards of integrity and objectivity.

In addition, work performed by PwC firms should be undertaken in accordance with the following principles:

a. **All tax advice that results in positions taken in a client’s tax return must be supported by a credible basis in tax law.** Tax law is often subject to differing interpretations. It is open to a client to take a position that differs from the most commonly held interpretation, but this should be consistent with the standard applicable in each country concerned and, as a minimum, on the basis that there is reasonable support in law and proper disclosure.

b. **No tax advice should rely for its effectiveness on any tax authority having less than full facts.** Any advice that a PwC firm gives should include advice on, and be based on the assumption that the client will make, relevant disclosures that will be sufficient both to comply with the law and to enable tax authorities to make further enquiries should they wish to do so. Disclosure will also include the registration of tax avoidance arrangements with the tax authorities where this is required by law or regulations and any other information-sharing obligation to the tax authorities to which the client may be subject.

c. **Tax advice should be given in the knowledge of the actual facts and circumstances of the client concerned.** PwC firms should always operate on the basis that they seek to know their clients and their business or financial affairs. Recommending a particular course of action should follow discussion with the client. Tax planning that does not fit with a client’s facts and circumstances should not be recommended.

d. **Tax advice should always involve discussion of the wider risks involved, including how a client’s actions might be viewed by others.** Tax planning, like many other matters, involves the balancing of various risks. These risks include tax technical, legal, and related areas (e.g. the risks that a tax authority may take a different interpretation of the relevant tax law or that a particular tax planning strategy will not ultimately be effective), but also include reputational and commercial risks arising from the way others (e.g. shareholders, government, taxing
authorities) might view a particular course of action. Advice from PwC firms should always involve proper consideration and discussion with the client of these issues. While, ultimately, it is for each client to decide how they wish to plan their own tax affairs within the law, a PwC firm should be satisfied that the client has a full understanding at the appropriate level of responsibility of the potential consequences of their actions.

e. We are advisers on tax planning and not principals or counterparties. Our business includes advising clients on tax planning. We will not act as principals or counterparties in tax planning with our clients as to do so would compromise our objectivity.

f. There are certain types of planning arrangements that, although legal, PwC firms should not propose or recommend implementing to clients. PwC firms should advise clients of appropriate options available to them under the law. However, where a client is a company or other business entity, PwC firms should only propose or recommend the implementing of planning arrangements where at least one of the following apply:

i. The underlying business arrangements have some commercial purpose other than the avoidance of tax.

ii. The tax outcomes of the arrangements are consistent with the intention of the relevant tax law, other relevant law, regulation, and administrative arrangements (as evidenced by publicly available statements or evidence of an equivalent standard) in the country concerned or the international treaties it has entered into.

iii. The planning has or creates economic or commercial consequences or effects, including the necessary economic substance (as required by tax law, other relevant law, regulation, and administrative practice), in each location to achieve those effects.

Where a client is not a company or other business entity (such as an individual or a trust), the above alternative tests are not appropriate. For example, concepts of commerciality may not be relevant to their actions (e.g. gifts). Nonetheless, PwC firms should seek to exercise judgement over the types of planning that should be proposed to, or implemented on behalf of, such clients.

Employees are probably your organisation’s greatest asset and your biggest challenge. The PwC Human Resource Services (HRS) network helps you create value by helping you actively manage your people. We have one of the world’s largest human resource (HR) advisory networks, with solid grounding in areas such as HR transformation, compensation, benefits, pensions, HR transactions, labour law, HR data metrics, and deploying talent around the world. We can put together the team that is right for you to give you all the support you need. And our 6,000 professionals in over 100 countries follow the same multi-disciplinary approach to people management to give you the consistency that is so important when working across borders.

Indirect Taxes

We customise the support we give you, and use the latest technology

Global Leader, Indirect Taxes
Michaela Merz
PricewaterhouseCoopers AG
+41 (0)58 792 4429
michaela.merz@ch.pwc.com

To give the best advice on indirect taxation, we believe you need to work closely with the people devising it. At PwC, we do this. We have a thorough knowledge of indirect taxes from every perspective - we appreciate that indirect taxes can be very different depending on which industry sector you work in. Across the world, our indirect tax and customs specialists work closely with PwC industry specialists to really understand the specific issues in your sector, and give you advice with genuine insight. And because the implications of indirect taxes can be so important to your business, we customise the support we give you, and use the latest technology, to provide you with what you need, wherever you are and whenever you need us. We can assist you with strategy, risk, process, and margin improvement.

The pressures on business to manage tax across borders, along with growing regulation and the need to stay competitive in a global market, means that a local perspective on international tax is not enough. With specialists experienced in complex international tax matters across the world, our network is well positioned to give you top quality advice. It’s this combination of local and global expertise that gives you real insight into managing tax across borders.

Legal Services

Over 2,000 corporate lawyers in more than 80 countries

Global Leader, Legal Services
Leon Flavell
PricewaterhouseCoopers LLP
+44 20 7212 1945
leon.flavell@pwclegal.co.uk

We understand that one size doesn’t fit all when it comes to legal services.

With over 2,000 corporate lawyers in more than 80 countries, we’re able to tackle problems in a way that is genuinely specific to your business. As well as specialist legal advice, we also offer day-to-day general counsel support. We support businesses with teams drawn from the range of skills within the PwC global network. Depending on your legal issues, we might include tax advisers, human capital consultants, corporate finance specialists, actuaries, management consultants, or accountants. We’ll put together whatever it takes to give you a creative solution in the least possible time.

Mergers and Acquisitions

An international network of almost 1,000 Mergers and Acquisitions specialists, experienced in every type of transaction

Global Leader, Mergers and Acquisitions
Mark Boyer
PricewaterhouseCoopers LLP
+1 202 414 1629
mark.boyer@us.pwc.com

Whether you’re buying, selling, or merging, it is important to manage risk with tax due diligence and to increase tax efficiencies with deal structuring, thereby maximising value associated with a transaction. With an international network of almost 1,000 Mergers and Acquisitions (M&A) specialists, experienced in every type of transaction, we know how to help you evaluate, structure, and finance the transaction to your best advantage. Our M&A Tax specialists support you through every stage of the deal continuum. They work closely with our transactions services, corporate finance, and legal teams, so that all aspects of the transaction are considered by experienced specialists.

Mergers and Acquisitions
Sustainability and climate change continues to evolve as a business issue.

Momentum is building. As such, you need more than advice on the current state – you need advice that anticipates what legislative and policy changes are likely to happen. You need that advice to help you to predict how these developments will impact your business. You also need to understand how your organisation is changing to address sustainability and climate change as a business issue and how existing taxes impact on those changes. Our Sustainability and Climate Change Tax network helps businesses and investors in two ways: it helps them stay on top of global trends and developments in climate change related policy; and it helps businesses address the tax implications of climate change related policy and their own organisation’s response to the business issue.

By giving you insight into your company’s risks and exposures across different territories and disciplines, we can be the effective option to help you deal with tax disputes, audits, and examinations, from prevention through to management and resolution. Our specialists also use their experience to help businesses put in place consistent and defensible practices and policies, so they know what to expect in the future. The Tax Controversy and Dispute Resolution network brings together former revenue authorities and government officials, accountants, economists, international tax litigators, and industry sector specialists, in all areas of direct and indirect tax, as well as customs duties, employment taxes, and tax fraud. We think being effective is about more than just knowledge; it’s about having an insight into what could happen next, so we build strong relationships with governments and policy makers worldwide. That way, we’re close to the people who are setting the dispute agenda, and know how to work with them to get the right results.

</table>
Today, when it comes to managing taxes, many businesses find that the approaches they’ve taken in the past are no longer optimal nor sustainable to manage risks and the dynamics of today’s operating environment. This could be due to changes in their industry or organisation, changing legislation, structural transformations, pressure from shareholders and regulators, or budget pressures. Our global Tax Management and Accounting Services (TMAS) network has the experience to help you define and implement an operating model that works for your business, so that you retain effective control over your global taxes. PwC’s TMAS group can provide insight and credentials that help teams navigate today’s business changes and build efficient, effective, and adaptable tax functions to support global tax management responsibilities. In addition to assisting you in building internal capabilities, we can also coordinate the outsourcing of your compliance - enabled by software that gives you central control and visibility to the status of your compliance across borders - for direct and indirect taxes, statutory financial statement production, and tax reporting.

Our Tax Policy and Administration network provides insight into today’s policy trends and issues worldwide. There are a number of elements to this, which include:

- helping our clients to understand and comply with their fiscal and regulatory obligations in relation to tax
- helping our clients maximise value for all stakeholders over time on the basis of full disclosure and in compliance with our Global Code of Conduct
- using our knowledge and experience to assist policy makers in both developed and developing countries improve the efficiency and effectiveness of their tax systems, and
- being seen as acting fairly, openly, and consistently with all stakeholders such that we are trusted by all parties.

For this purpose, ‘stakeholders’ include, as well as our clients, revenue authorities, governments, legislators, governmental departments and their officials, non-governmental organisations, supra-national bodies, regulators, the media, professional bodies, and trade associations.

Our specialist knowledge and expertise in these areas sits mainly with the members of our network and tax country leaders. For assistance in tax policy and administration matters, please do not hesitate to contact us.

Transfer Pricing

Extensive experience in dealing with revenue authorities around the world

Global Leader, Transfer Pricing
Garry Stone
PricewaterhouseCoopers LLP
+1 312 298 2464
garry.stone@us.pwc.com

The scrutiny of transfer pricing by tax authorities worldwide has intensified, and our network of 2,000 transfer pricing specialists in over 75 countries has extensive experience in dealing with revenue authorities around the world. Using our expertise in accounting, economics, dispute resolution, and your industry, we can help you prepare for the challenges this scrutiny will present. As a network of specialists, we help companies develop sustainable arm's-length pricing and tax efficient structures, help make them more compliant with legal requirements, and help them respond quickly to an audit and resolve transfer pricing disputes. More importantly, we work to ensure they're less exposed to transfer pricing risks in the future.

Business transformation invariably leads to complex operational, tax, and legal implications. PwC’s Value Chain Transformation (VCT) can help. VCT is defined as the integrated and cross-border portfolio of capabilities to support organisations to align their tax, legal, and operating models to achieve sustainable financial and operational benefits during business transformation. VCT helps you to align and optimise key elements to improve profitability, efficiency, controls, and visibility throughout the value chain. Our deep industry experience in key sectors and our international network of 600 cross-disciplinary VCT specialists allows us to manage the complexity involved in business transformation and help clients build the foundation for sustainable growth.
## Value Chain Transformation

www.pwc.com/taxsummaries
The *Worldwide Tax Summaries – Corporate Taxes 2013/14* guide represents the combined efforts of more than 500 local PwC tax specialists in over 150 countries and territories. While too numerous to name individually, we thank them for their efforts in preparing this guide.

To obtain regularly updated information on the corporate and individual tax rules in operation in over 150 countries, please visit the Worldwide Tax Summaries online at [www.pwc.com/taxsummaries](http://www.pwc.com/taxsummaries).

To download an eBook version of the *Worldwide Tax Summaries - Corporate Taxes 2013/14*, please visit [www.pwc.com/taxsummaries/ebook](http://www.pwc.com/taxsummaries/ebook).

**Worldwide Tax Summaries editorial team**
Christopher Wooley
James Calderon
Penny Vaughn

To contact the editorial team, please email us at worldwide.tax.summaries@us.pwc.com.
If you are responsible for managing taxes in a business that trades or operates across a number of different territories, you will recognise how much of a challenge it can be trying to keep on top of the corporate tax rates and rules in each of those countries, notwithstanding the fact that these frequently change.

Worldwide Tax Summaries – Corporate Taxes 2013/14 is a useful reference tool, to help you manage taxes around the world. It offers quick access to information about corporate tax systems in 153 countries worldwide, in an easily digestible format.

Written by local PwC tax specialists in each country, this guide covers recent changes in tax legislation as well as key information about income taxes, residency, income determination, deductions, group taxation, credits and incentives, withholding taxes, indirect taxes, and tax administration, up to date (unless otherwise stated) as of 1 June 2013. Also included is a global directory of PwC contacts organised by their tax speciality area.

Visit our online version, which is updated regularly throughout the year, at www.pwc.com/taxsummaries.

---

1 “PwC” is the brand under which member firms of PricewaterhouseCoopers International Limited (PwCIL) operate and provide services. Together, these firms form the PwC network. Each firm in the network is a separate legal entity and does not act as agent of PwCIL or any other member firm. PwCIL does not provide any services to clients. PwCIL is not responsible or liable for the acts or omissions of any of its member firms nor can it control the exercise of their professional judgment or bind them in any way.
